What We Must All Do

From the top of my head to my tiny
toes

I am built of bones, as every one knows.
These are the framework so strong
within;

Outside they are covered with flesh
and skin.

The parts of my body are only three—
My head, my trunk, and my limbs,
as you see.

My head has a back, two sides, and a
crown,
All covered with hair, yellow, black,
red, or brown.

And, just in front, in the foremost
place,
You plainly can see my neat little face.
My face has a forehead, nose, mouth,
and chin;
Two cheeks, where the dimples slip
out and in.

Two eyes you see when you are near,
Two ears, like sea-shells, to help me
to hear.

My neck and shoulders, so broad and
strong,

Arm, forearm, wrist, hand, and fin-
gers long.

My trunk and my thighs, legs, ankles,
and knees,

On two feet I stand, or run if I please.

My joints are to bend when I run,
jump, or walk;

I've a little red tongue to help me to
talk.

These make up my body, and now I
will tell

What we all must do to keep strong
and well.

To be neat and clean we must take
great care,

Have plenty of sunshine and breathe
the fresh air;

Eat nourishing food to make good
blood, and then

We all shall become strong women
and men.

FOOD

Good Food

We should eat pure, wholesome food.

We should eat three times a day.

Plain food will make us grow stronger
than will rich food.

We should have milk every day.

Eggs are good for us.

Bread and meat help us to grow and
become stronger.

Cereals and vegetables are healthful
foods.

Fruits and simple desserts are good.

We should eat often all these foods.

Good food helps us to grow.

Milk

Milk is good food.

There is no better food for children
than milk.

Children can learn to like milk.

Milk makes us healthy.

Milk makes our teeth strong.

Milk makes our bones strong.

Milk helps us to do good work in
school.

Milk is the best food for children.

We should drink milk every day.

Thank you, pretty cow, that made
Pleasant milk to soak my bread,
Every day and every night,
Warm and fresh and sweet and white.

—Ann Taylor

Breakfast

Eat some fruit every morning.

Orange or grapefruit is good for
breakfast.

Baked apple is good, too.

Oatmeal is good for our breakfast.

Whole grain cereals are good for us.

Any cooked cereal is good for us.

Cereals are made of oats, wheat,
corn, rice and barley.

Eggs are good for breakfast.

We should eat eggs three or four times
each week.

Buttered toast is good for breakfast.

Milk and cocoa are good to drink.

Coffee and Tea

Boys and girls should not drink coffee
nor tea.

Coffee and tea are not good for
children.

They make boys and girls thin.

Coffee and tea do not make boys and
girls strong and healthy.

Coffee and tea make girls and boys
nervous.

Girls and boys do not do good work
when they drink much tea and
coffee.

Coffee and tea make children lose sleep.
Children who drink much tea and
coffee sometimes feel dull and
tired.

We will not drink coffee and tea be-
cause they are not good for us.

I Don't Drink Coffee!

One, two, three,
I don't drink coffee,
I don't drink tea.
One, two, three,
Water, milk, and cocoa
Are better for me.

Guess My Name

I was a brown berry.

I was ground with other berries just
like me.

Then I was put into water.

After I had been boiled, I was poured
into a cup.

I was mixed with milk and sugar.

I hurt grown people.

I hurt little people even more than
grown people.

I make children cross and nervous.

Sometimes I make them feel dull.

I keep children awake nights.

I help to make them thin.

Can you guess my name?

Drink More Milk

Instead of drinking coffee and tea,
children should drink milk.

We should drink three or four glasses
of milk every day.

We should drink our milk slowly.

Milk makes us gain in weight.

We do not want to be under weight.

If we are under weight we shall not
be strong.

Milk makes boys and girls strong.

Fresh sweet milk makes children
healthy.

It makes boys and girls sleep well.

What Am I?

I am white.

I come from a cow.

I am good to drink.

Babies cry for me.

Kittens mew for me.

Boys and girls like me.

Sometimes I am found in a bottle.

What am I?

Put Him on the Scales

Eenie, meenie, minie, mo,
Catch a thin boy by the toe;
Put him on the scales to see
If he's as healthy as he should be.
If he's not what he should weigh,
Give him a quart of milk each day.

Other Good Things to Eat

If we wish to grow up to be strong men and women, we must eat the right kinds of food.

We should eat bread and butter.

Whole wheat bread is good for us.

We should eat it at least once a day.

Potatoes are good for us.

We should eat other vegetables, too.

We should eat some raw vegetable
and fruit every day.

Soup made of vegetables and milk is
good for us.

We should eat meat only once a day.

Macaroni and fish are good for chil-
dren.

Boys and girls like nuts and may eat
a few at times.

Rice and corn flakes are good for us.

Rye bread and barley are still better.

Custard makes a good dessert.

Puddings made of milk are good for
children.

Fruit

Fruit is very good for boys and girls.
Apples, oranges and peaches are good
for girls and boys.

Grapes, pears and plums are good for
children.

Strawberries, blackberries and blue-
berries are good to eat.

Grapefruit and cherries are good for
boys and girls.

We should eat orange or grapefruit
for breakfast.

Bananas must be ripe to be good for
children to eat.

Bananas are ripe when there are brown
spots on the skins.

Bananas are not good when the skins
are all brown.

Dried fruits are good to eat.

Prunes, figs and dates are good for
children.

Fruit may be eaten raw or stewed.

Canned fruit and jellies are good.

Children should not eat too much jam
or marmalade.

Fruit is wholesome food for children.
We should eat fruit every day.

Eating more fruit means better health.

Currants on a bush
And figs on a stem,
And cherries on a bending bough
And Ned to gather them.

—*Christina G. Rossetti*

Vegetables

Every day we should eat some fresh vegetables.

Vegetables are good for boys and girls.

Potatoes are good for children.

Potatoes may be boiled or baked.

Mashed potatoes are good to eat for dinner.

Peas and beans are good foods.

Spinach and asparagus are good.

Tomatoes are good for children.

Carrots and turnips are good for girls and boys.

Corn and cauliflower are good, too.

Celery and beets are good.

Onions are good, too.

More Vegetables — Better Health

Cabbage and squash are good for children.

Dried and canned vegetables are good to eat.

Some vegetables make good soup.

Potatoes and corn may be made into soup.

Celery makes good soup.

Children like tomato soup.

Cream of tomato soup is good for children.

Radishes and lettuce are very good for children.

All of these help us to grow.

We should not eat many pickles.

They do not help us to grow.

Roots

Some roots are good for food.

Potatoes are roots that are good food.

Beets and onions are roots, too.

Turnips and radishes are roots.

Parsnips and carrots are roots.

Sweet potatoes are roots.

Potatoes and sweet potatoes are both
good for children.

Children like beets and carrots.

Turnips and onions are good for boys
and girls.

These roots are all good foods for
children.

Some Good Friends

Big Potato and Little Meat

Give us energy and heat.

If we eat red Billy Beet

We will find him nice and sweet.

Carrots and Spinach like to eat

Iron from the ground.

If we eat them, we shall be

Big and strong and round.

Seeds

Some seeds are good for food.

Wheat seeds are made into flour.

Flour is made into bread.

Bread is good food for us.

Corn is good food for children.

Peas and beans are good for boys and
girls.

White beans and brown beans are both
good to eat.

Peas and beans may be dried.

Dried peas make good soup.

Dried beans may be boiled or baked.

Lima beans are liked by children.

These seeds are all good food for us to
eat.

Stems

Some stems are good for boys and girls.

Beet stems are good for us.

Pieplant or rhubarb stems are good for children.

Pieplant stems are stewed for sauce.

Cooked asparagus stems are good
to eat.

Onions and celery stems are also very
healthful foods.

All these stems are good to eat.

Food Song

Tune: Row, Row, Row Your Boat

Drink, drink the good milk,
Eat some oatmeal, too.
Apple and orange, and brown bread
and butter
Are very good for you.

Eat, eat the best food,
That's the healthful way.
Corn and potatoes and rice
and tomatoes
Are very good, I say.

Leaves

Some leaves are good foods.

Lettuce leaves are good for children.

Leaf lettuce and head lettuce are both
good.

Spinach leaves are good for boys and
girls.

Dandelion leaves are good to eat.

Beet leaves are good for us.

Water cress is a good food.

We have to cook spinach and dandelion and beet leaves.

We do not need to cook lettuce and water cress.

We should eat all these leaves.

In winter as well as summer, we should eat some leafy vegetable.

They are all good foods for children.

Our Dinner

Now for our dinner!—what shall we eat?

Plenty of vegetables, but little meat;

Potatoes, carrots, and spinach are fine;

These give us strength, if on them we dine.

The Cow

The cow gives us good food.

She gives us milk.

Children should drink milk every day.

Butter and cheese are made from milk.

Buttermilk comes from milk.

Cottage cheese is made from milk.

Fresh cottage cheese is good for girls
and boys.

Custards are made with milk.

Children should eat butter, cheese
and custards.

Cream rises on the top of the milk.

We can make ice cream from cream.

Children like ice cream, which is a
good dessert.

The cow gives us beef.
Beef is good meat.
Roast beef is good to eat.
Beefsteak is good, too.
Stewed beef with vegetables is good for
 boys and girls.
Beef may be made into soup, too.
Children like beef soup.
All these foods are good for us.
The cow gives us all these good foods.

The Friendly Cow

The friendly cow, all red and white,
 I love with all my heart:
She gives me cream with all her might,
 To eat with apple-tart.

—*Robert Louis Stevenson*

A Riddle

I am thinking of an animal that gives
us milk to drink.

It gives us meat to eat.

It gives us cheese and something to
spread on our bread.

It gives us soap to wash our hands.

Can you guess its name?

Other Farm Animals

Other farm animals give us food.
From the lamb come lamb chops and
roast lamb.

Lamb chops and roast lamb are both
good for children.

The pig gives us ham and pork.

The pig gives us bacon and salt pork.

For children, bacon is the best food
which the pig gives us.

Bacon is good for breakfast.

Bacon is good to eat with eggs.

Children like bacon and eggs.

Fowls

Fowls come from the farm.

Chickens, turkeys, ducks and geese
are fowls.

They are good to eat.

Besides, the hen lays eggs.

Eggs are good to eat.

Fresh eggs are very good for little boys
and girls.

We may eat eggs for breakfast.

We may eat them at other times, too,
in place of meat.

Puddings made with eggs are good,
too.

One, Two

One, two, milk's good for you!

Three, four, play out of doors.

Five, six, bread nice and thick.

Seven, eight, stand up straight.

Nine, ten, eggs from the hen.

Eleven, twelve, brush your teeth well.

And so on to nineteen, twenty.

Healthy children are plenty.

A Queer Little House

There's a queer little house
That stands in the sun;
When the good mother calls
The children all run;
While under her roof
It is cozy and warm,
Though the cold wind may whistle
And bluster and storm.

In the daytime this queer
Little house moves away,
And the children run after,
So happy and gay;
But it comes back at night
And the children are fed

And tucked up to sleep
In their warm, cozy bed.

This queer little house
Has no windows nor doors;

The roof has no shingles,
The rooms have no floors;
No fireplaces, chimneys,
No stoves can you see,
Yet the children are cozy
And warm as can be.

The story of this
Little house is quite true;
I have seen it myself,
And I'm sure you have, too;
You can see it to-day
If you'll watch the old hen
While her downy wings cover
Her chickens again.

Water

Water is good for us.

We should drink plenty of water.

Children should drink four glasses or
more of water every day.

We should drink water between meals.

It is good for us to drink water
before breakfast.

Our food is cooked in water.

We need water every day.

Our bodies are three parts water.

So we must drink plenty of water.

Fresh, cool water satisfies thirst.

Water is better for children than tea
or coffee.

Water quenches thirst.

Boys and girls should drink plenty of
water.

Children need water to make them
strong and healthy.

If

If all the world were apple-pie,
And all the sea were ink,
And all the trees were bread and cheese,
What should we have to drink?

That's the Way

A bit of work, a bit of play,
And lots of quiet sleep.
A cheerful heart and a sunny face,
The health chores done at a merry pace.
Ah, that's the way the children grow,
Don't you know?
That's the way little children grow.

A Riddle

I am thinking of something that is
good to drink.

We could not live without it.

It has no taste.

It has no color.

We can see through it.

It comes from the rivers and lakes.

It comes from brooks and creeks.

It comes from springs.

It comes from clouds.

Sometimes it is salty.

Then we cannot drink it.

We cook with it.

It makes us sweet and clean.

Mother Nature uses very much of it.

Our own mothers use very much of it.
It keeps our houses sweet and clean.
We cross the ocean on it.
In winter we skate on it.
Fish live in it.
Insects like it.
Nothing could live without it.
Can you guess its name?

Candy

Children may eat a little candy once in a while.

The candy should be made of pure materials.

Too much candy is not good for children.

We should not eat candy between meals.

If we eat candy between meals, we shall not be hungry at meal time.

If we are not hungry at meal time, we shall not eat much at our meals.

If we do not eat our meals, we shall not get the good food we need.

Then we shall lose weight.

A Riddle

You can put me upon your bread.

I am very sweet.

I am better than candy.

I am good for you.

Busy bees make me.

What am I?

[*Honey*]

Oh, for the Apple!

Oh, for the apple!

So round and so red,

It's better than candy,

Let's eat it instead.

More fruit, good fruit!

Date, orange and fig;

The children who eat them

Will surely grow big.

Health Rules

We should eat three good meals a day.

Always eat at the same time of day.

Eat slowly.

Take time to eat at the table.

Stay at the table twenty minutes.

Be happy at meal time.

Chew your food well.

Eat plenty of good, wholesome food.

Drink plenty of milk.

Drink plenty of water.

Try to grow strong and well.

Take good care of your teeth.

Bathe at least twice a week.

Go to bed early.

Children, get plenty of sleep!

Health Brings Happiness

Sleep with your windows wide open.
Play outdoors.

Brush your teeth at least twice a day.
Always brush your teeth before going
to bed.

Drink no coffee nor tea.

Eat vegetables and fruit every day.

Milk pure,

Air pure,

Water pure.

Three things pure

That help to cure.

I'm Glad

I'm glad the sky is painted blue,
And the earth is painted green,
With such a lot of nice fresh air
All sandwiched in between.

Fresh Air and Sunshine for Health

FRESH AIR AND SUNSHINE

Fresh Air

No one can live without fresh air.

Animals need fresh air.

Babies must have fresh air.

Children need fresh air.

Girls cannot live without fresh air.

Boys cannot live without fresh air.

Young people need fresh air.

Old people cannot live without fresh
air.

School children need fresh air.

Teachers cannot live without fresh air.

Well people need fresh air.

Sick people need fresh air.

Fresh air is good for all.
Fresh air helps children to grow.
We need fresh air when we are asleep.
We need fresh air when we are awake.
So children should play outdoors.
Fresh air makes children healthy.
Fresh air makes children happy.

Hoop Song

Trundle-undle-undle!
Round and round and round
Go the hoops, in little troops,
Rolling on the ground.

Rumble-umble-umble!
Ever up and down
The little girls with flying curls
Drive them through the town.

Fresh Air Is Good for All

Fresh air is good for every one.

Fresh air was good for the Tree Dwellers long ago.

The Tree Dwellers had fresh air all the time.

Fresh air was good for the Indians.

Indians are Red Men.

Fresh air was good for the Pilgrims.

Fresh air is good for the Chinese.

The Chinese are yellow.

Fresh air is good for the Negro.

The Negro is black.

Fresh air is good for white people.

Fresh air is good for the red, black,
yellow and white races.

Fresh air is good for boys and girls.

That is why we play outdoors and
sleep with our windows open.

Children should have plenty of fresh
air.

Fresh air makes children well and
strong.

We need fresh air as much as food.

Fresh Air in the Spring

Fresh air is needed in the springtime.

Fresh air is needed in windy March
weather.

Then we wear warm clothes.

Fresh air is needed in April, when show-
ers fall.

Fresh air is needed in May, when the
apple trees blossom.

Fresh air is needed during the three
months of spring.

March, April and May are the months
of spring.

We can play outdoors in the spring.
It is good for us to be outdoors in the
spring.

The green leaves come out in the
spring.

Then it is pleasant to be outdoors.

We like to be outdoors in the spring.

There is no time like spring
When life's alive in everything.

—*Christina G. Rossetti*

Fresh Air in the Summer

In summer we should be outdoors
most of the time.

We should spend most of our time out-
doors in June.

The roses bloom in June.

Many flowers bloom in June.

We should be outdoors in July, when
the days are warm.

In July there are many flowers in
bloom and fruit is ripe.

We should be outdoors in August,
when the days are hot.

If we can, we should sleep outdoors
in the summer.

The summer days are long and
bright.

We should get plenty of fresh air in
summer.

We should sleep with our windows
wide open in summer.

June, July and August are the summer
months.

We take long walks and play outdoors
in the summer sunshine.

This golden sunshine makes us look
like little brown Indians.

But still we want the sunshine.

For sunshine makes us grow taller
and stronger.

It makes strong bones and teeth.

The summer sunshine gets us ready
for the cold, dark days of winter.

Sunshine is a free medicine that
helps to keep the doctor away.

The wonderful air is over me,
And the wonderful wind is shaking the tree.

—*William Brighty Rands*

Fresh Air in the Autumn

We need fresh air in autumn.

We need fresh air in September, when
we start to school.

September is the first month of
autumn.

We need fresh air in October, when
the leaves begin to fall.

We need fresh air in November, when
the days grow cold.

We need fresh air during the three
months of autumn.

We can play outdoors in the three
months of autumn.

When the days grow cold, we wear
warm wraps.

The leaves turn yellow in the autumn.

Some of the leaves turn red.

When the leaves turn, the trees look
bright.

Boys and girls like to play games out-
doors in autumn.

Fresh Air in the Winter

Fresh air is needed in the winter.

Fresh air is needed in December, the
Christmas month.

Fresh air is good for us in January.

January is the first month of the year.

Fresh air is needed in February.

George Washington was born in Feb-
ruary.

Abraham Lincoln was born in Feb-
ruary.

They both loved the great outdoors.

Fresh air is needed even when it is
very cold.

It is cold in winter.

Fresh air gives us rosy cheeks.

We need fresh air during the three months of winter.

We wear warm clothing in winter.

Then we can go out and enjoy the fresh air.

We can play outdoors in the winter time.

We need fresh air in winter as well as in summer.

We need fresh air all the year round.

We can enjoy games and sports outdoors in winter, too.

We need fresh air in winter, even though it is cold.

We sleep with our windows open in winter's coldest weather.

Winter Is Coming

Go bring the sled
From out the shed,
Hunt up your mittens, boys;
For well I know
There'll soon be snow,
And then for winter joys.

We'll build a fort;
Oh, boys, what sport!
So pile the snow-walls high!
We'll have a fight
With bullets white—
Ah, won't the snowballs fly!

Hurrah! my chums!
The snow-storm comes,

Ah, now's the time for fun!

The flakes fall fast,

It snows at last,

The winter is begun.

Oh, oh, oh, oh,

Just see the snow,

The ground is almost white!

To-morrow, boys,
For fun and noise!
I hope 'twill snow all night.

Guess My Name

I do not often visit dark, damp cellars.
When it is very cloudy you do not see
me.

You see me only in the daytime.
You can feel me, but you cannot hold
me.

I am good for plants.
I am good for children.
I warm the earth.
I bring health to many people.
Guess my name.

[Sunshine]

Sunshine and Fresh Air

Sunshine and fresh air make us
healthy.

Sunshine and fresh air make us grow.
Fresh air and sunshine help us do good
work in school.

Sometimes fresh air and sunshine
make our cheeks rosy.

Fresh air and sunshine are good for
children.

Fresh air and sunshine make us feel
well.

Fresh air and sunshine make us feel
happy.

Sunshine and fresh air make us
strong.

Sunshine and fresh air make children
feel well.

Sometimes fresh air will cure a head-
ache.

Sometimes, if we are tired, fresh air
will make us feel rested.

Children should play outdoors in the
fresh air.

Children should get fresh air and sun-
shine all the year round.

Outdoor games make children happy
and healthy.

Spend at least an hour out of doors
every day.

We will breathe pure air.

We will live in the sunlight.

The Sun

I never go to sleep, dear child,
 I'm always shining bright,
But as your world goes turning round
 It takes you from my light.
And then I shine upon the moon
 And she shines back to you,
So that my light you often see
 When hidden from my view.

And as your world goes turning round
 It whirls you into night,
But brings 'round other boys and girls
 Into my shining light.
And so I shine, forever shine,
 While you both sleep and wake;

And now you've rolled around again
My kind good morning take.

—*Amy Fiske*

Open the Door

Open the door, let in the sun;
He hath a smile for every one.
He hath made of the raindrops gold
and gems;
He giveth to us earth's diadems.
Open the door.

The Sun Is in the Sky

Whether fair, whether foul,
Be it wet or dry,
Cloudy time or shiny time,
The sun is in the sky.

CLEANLINESS

Clean Hands and Faces

If we wish to be healthy, we should be clean.

We should wash our hands and faces in the morning when we get up.

Warm water and good soap are best for washing the hands and face.

We should wash our hands before every meal.

We should always wash our hands before handling food.

We should wash our hands before going to school.

Our finger nails should be cleaned every day.

We should always wash before going
to bed.

Whenever we have done anything to
soil our hands, we should be
sure to wash them.

Indeed, we should keep our hands
and faces clean all of the time.
Then we shall look and feel happy.

The Little Clock

There's a neat little clock,
In the schoolroom it stands,
And it points to the time
With its two little hands.
And may we, like the clock,
Keep a face clean and bright,
With hands ever ready
To do what is right.

Clean Bodies

We should keep our bodies clean.

In summer take a bath several times
a week.

Always take a bath more than once a
week.

Keep your feet clean.

Wash your hair at least once a month.

Keep your teeth clean.

Use a toothbrush and a good toothpaste.

Brush the insides of your teeth as well as the outsides.

Be sure to keep your neck clean.

Keep your ears clean, too.

Keep your clothes clean.

If you are clean you will feel better and look better.

What Are They?

Thirty white horses upon a red hill,
Now they tramp, now they champ,
now they stand still.

Care of the Teeth

Good teeth help to keep us well.

If we have good teeth, we can chew
our food well.

If we chew our food well, we shall
have better health.

We should take good care of our teeth.

We should brush our teeth after each meal and at bedtime.

We should keep our toothbrushes clean.

Washing them in hot water and soap, and drying them in the sunshine will help to kill the bad germs.

Remember, the dentist is a good friend.

Visit him twice every year.

If we have a cavity in a tooth, we should go to the dentist at once, and have it filled.

If we do not do this, we may lose the tooth.

Sometimes decayed teeth make us sick.

Decayed teeth give us toothache.

Decayed teeth often cause pains and aches in different parts of our bodies.

Good food helps to make the teeth strong.

Milk and orange juice are both good for the teeth.

White cabbage, green lettuce, and red tomatoes are also very good for our teeth.

Exercise is good for the teeth, too.

We exercise our teeth by eating hard foods.

Apples and hard toast are foods that exercise the teeth.

Baked potatoes with jackets are good
for our teeth.

Play in the sunshine also makes better
teeth.

So we must go out in the sunshine
every day.

Clean, white teeth make us better
looking.

People like to see clean, white teeth.
We are going to take good care of our
teeth.

We are going to brush them, eat good
food, play in the sunshine, and
visit the dentist, too.

Then we shall have better health
and happy minds.

To Keep Good Health

Your hands and face clean should you
keep;

The windows open while you sleep;
And brush your teeth three times a
day;

To keep good health, this is the way.

A Good Resolve

Before I lay me down to sleep,

Each night I'll brush my teeth.

Each morning when I awake

Again my little brush I'll take—

A thorough brushing to repeat,

To keep my mouth clean and
sweet.

Be Clean

Always wear clean clothes.

Clean hands help to keep clothes clean.

We should change our underwear at least once a week.

When we go to bed, we should wear clean night clothes.

We should live in clean houses.

Children should help keep the house clean.

Eat clean food.

Wash carefully all fruits and vegetables.

Be sure the dishes are clean.

The one who does the cooking should be clean and neat, too.

SLEEP AND REST

Sleep

If we wish to have good health we must have plenty of sleep.

Grown people need eight hours of sleep. Children need more sleep than grown people.

Weak children need more sleep than strong children.

Children need ten or twelve hours of sleep every night.

Little children should go to bed at eight o'clock.

Older children should go to bed at nine o'clock.

We should sleep with our windows
wide open.

In the winter we need warm covers on
our bed.

Children should get plenty of sleep.
All children need plenty of sleep.

Sleep and Rest

Sleep and rest help us to gain in weight.

Sleep and rest make children strong
and well.

Sleep and rest help us to do good work
in school.

Sleep and rest make us look well.

Sleep and rest help us to be happy.

Sleep and rest keep us from being lazy.

Sleep and rest keep us from getting
nervous.

Sleep and rest are good for boys and
girls.

Go to bed early and sleep very tight;

You'll wake up in the morning feeling
gay and bright.

Get Plenty of Sleep

If we get enough sleep, we shall not be nervous.

Then we shall do good work in school. We shall be well and strong and happy, if we get enough sleep.

If we get enough sleep, we shall not be under weight.

Children who get enough sleep feel wide awake and rested.

Boys and girls who get enough sleep feel happy and cheerful.

So we are going to try to get enough sleep.

We are going to sleep with our windows wide open.

Early and Late

Go to bed early—wake up with joy;

Go to bed late—cross girl or boy.

Go to bed early—ready for play;

Go to bed late—moping all day.

Go to bed early—no pains or ills;

Go to bed late—doctors and pills.

Go to bed early—grow very tall;

Go to bed late—stay very small.

—*W. S. Reed*

How We Get Rest

We rest when we sleep.

It rests us to do something different
from what we have been doing.

If we have been sitting a long time, it
rests us to stand.

If we have been standing a long time,
it rests us to sit down.

If we have been quiet a long time, it
rests us to exercise.

If we have been working hard, it rests
us to be quiet.

If we have been working with our
brains, it rests us to work with
our muscles.

Change is sometimes restful.

Boys and girls should get plenty of
rest in sleep.

When you are tired, you should stop
and rest.

Good Night Song

Tune: Good Night, Ladies!

Good night, mother!

Good night, daddy!

Good night, parents!

We're going to leave you now.

Eight o'clock is time to go,

Time to go, time to go,

Eight o'clock is time to go

To our little beds.

Early to bed and early to rise

Makes a man healthy, wealthy and wise.

Outdoor Play Brings Health

EXERCISE

Home Exercise

Exercise helps to keep well people in good health.

Some of our work at home is good for us.

When we help our mother, we sometimes help ourselves.

We can get exercise at home.

We can sweep the kitchen floor.

We can make the beds.

Boys can chop wood.

Boys can carry in wood and coal.

We can dust the furniture.

Boys can shovel coal.

In winter time we can sweep the snow
from the walks.

We can go to the store for our mother.

We can play with the baby.

We can give the baby a ride.

In autumn we can rake the leaves.

In summer we can help keep the lawn
in good order.

We can water the flowers and plants.

We can pull the weeds from the garden.

We can do many things at home to
help.

Exercise Through Play

We get exercise in many ways.

We get exercise in our play.

We get exercise by running.

We run outdoors and play tag.

We get exercise by jumping the rope.

We get exercise by playing ball.

We throw snowballs.

We skate and get exercise.

We get exercise by playing games.

In summer we fly kites.

We play "hide-and-seeK."

We get exercise playing "run-away."

We coast down the hill.

We skip and run and hippity-hop
all the year round.

An Exercise

(Teach poem with actions)

My hands upon my (1) head I'll place,
On my (2) shoulders, on my (3) face,
On my (4) hips, then at my (5) sides,
And now (6) behind me they will hide.
Next I will lift them (7) up on high,
And make my (8) fingers swiftly fly.
I'll hold them now in (9) front of me;
Then I will (10) clap them, one, two,
three.

(1) Place both hands upon head. (2) Place both hands upon shoulders. (3) Put both hands on face. (4) Hand on each hip. (5) Hold hands closely at sides. (6) Clasp hands behind back. (7) Hold vertically above head. (8) Move fingers rapidly as in playing piano. (9) Arms stretched to front. (10) Clap three times in unison.

Exercise in Spring and Summer

There are exercises for us in the spring
and in the summer.

In the summer we swing.

We ride upon our little wagons.

We swim.

We run.

We skate on roller skates.

We play games of all kinds.

We play baseball.

We go fishing.

We jump rope.

We play cowboy.

Boys can saw wood for their mothers.

Girls can sweep the porches for their
mothers.

We can go to the store for our mothers.
We can plant flowers and care for them.
We pull weeds from the garden.
Boys can cut the grass on the lawn.
Girls can help indoors.
We can always exercise in both work
and play.

Autumn and Winter Exercise

We get exercise in autumn and winter,
too.

We rake the leaves and burn them in
the fall.

We gather nuts in autumn.

We sweep sidewalks.

In the winter we skate on ice skates.

We coast down the hill.

At home we throw snowballs.

We shovel snow off the sidewalks.

We play in the snow.

In the winter we carry coal.

We play hockey upon the ice.

When there is snow we play "fox and
geese."

We make snow houses.

In autumn and winter we play outdoors.

It is good for children to play outdoors
in autumn and in winter.

It makes them strong and healthy.

Facts About Exercise

The right kind of exercise is good for us.
It helps the muscles to grow firm and
strong.

It keeps people from getting too fat.
It strengthens the heart.

Exercise is good for healthy lungs.

Exercise helps to make the blood rich
and pure.

It makes the blood flow faster.

Exercise sometimes gives us rosy
cheeks.

All people need oxygen.

Exercise makes us breathe deeper.

Then we get more oxygen.

Exercise makes boys and girls stronger.

It makes them brighter and happier.
Exercise helps our bodies to get rid of
poisons and wastes.

Then we have better health.

Exercise helps us to digest our food
well.

If we digest our food, we shall grow
strong and well.

Exercise helps us to have better health.
Boys and girls should have the right
kind of exercise.

Exercises for All

Most people get exercise.

The baby exercises when he moves his arms and kicks with his legs.

Children run, jump and skip.

They play games, too.

Sometimes they help with the work at home.

School children exercise in school and in the gymnasium.

Older boys and girls play games and get exercise.

Older boys play baseball and football and basket ball.

Older girls play volley ball and basket ball.

Our mothers do the housework.

Many fathers get exercise in their
work.

Farmers work out in the fields.

Business men often exercise by walking
to their work.

Sometimes they play golf, too.

Office girls and other women workers
play tennis and golf.

Almost every one gets some exercise by
walking.

Most people exercise both through
work and play.

Children need plenty of the right kind
of exercise.

Exercise makes the muscles strong.

Exercise helps to make the body grow
strong.

Every one should take exercise every
day.

Hints on Exercise

Too much exercise is sometimes hard
on the heart.

So don't overdo.

Never exercise until you become very
tired.

Exercise when you are fresh.

Late in the day is not a good time.

Do not exercise much after a hearty
meal.

Take much of your exercise in the
open air.

If you cannot do this, exercise in a
room with windows open.

The air out of doors is fresher than
that indoors.

Always wear loose clothes when you
exercise.

Get all the fun you can out of your
exercise.

Learn to enjoy your exercise.

Exercise Song

Tune: Three Blind Mice

Exercise, exercise,

Helps us keep well,

Helps us keep well.

We'll walk and we'll run and jump
and skip,

We'll play outdoors every single day.

We'll skate on the ice or we'll coast
down the hill for exercise.

GENERAL HEALTH LESSONS

Posture

Bad posture may hurt us.

It always makes a boy or girl look
careless and shiftless.

Besides, a lazy body often means a
lazy brain.

If you wish to keep well and look well,
learn to stand, sit and walk erect.

Good positions help to keep us well.

Always stand on both feet.

If you stand too much on one foot, one
hip may grow larger than the
other.

Throw your shoulders back.

Keep your chest high.

Then you will not grow round
shouldered.

Grow straight and beautiful.

Remember that good posture makes a
boy or a girl look better, feel bet-
ter and think better.

Good posture always pays.

Care of the Feet

Take good care of your feet.

Then they will never ache or cause pain.

Painful feet make scowling faces and
cause much trouble.

Good feet bring joys and smiles.

You want your feet to be comfortable.

So take care of your feet.

Bathe them every night.

Wear clean stockings.

Keep your feet warm and dry.

Wear the right kind of shoes.

Be sure that your shoes have good,
broad heels.

Be sure that they are long enough.

See that your shoes are wide enough.

Do not wear a shoe that pinches your
toes.

Remember that sometimes it is a good
plan to be a little barefoot child.

If you wish to enjoy living and walk-
ing, take care of your feet.

Care of the Eyes

Our eyes are the windows of our bodies.
With them we see the beautiful out-
doors.

With them, too, we peep into storyland
and read about strange children
in far-away lands.

It pays to be good to our eyes.

Let us remember these things:

Never face the light when reading.

When reading, let the light come from
the side or from behind.

The best position for reading is to sit
with the light falling over the left
shoulder.

The light should be steady and fairly
bright.

Stop reading when twilight comes on.

Do not try to read very fine print.

Never read on a moving train, bus or
street car.

Stop reading if your eyes begin to
smart or feel tired.

When you wipe your eyes, be sure that
your handkerchief is clean.

Never wipe your eyes with towels other
people have used.

Do not look directly at bright lights
or at the sun.

If you cannot see well, or if the
letters seem to dance about the
page, have your eyes tested.

If your eyes become red or sore, go to
a doctor.

Two Eyes and One Mouth

Two eyes and only one mouth have we;
The reason of this must be
That we should learn that it will not do
To talk about all we see.

The Ears

With our ears we hear the voices of
those we love.

We hear the murmur of the brook and
the songs of the birds.

With our ears we learn many things
worth while.

So surely we should treat our ears well.
We should never pick at the ears with
anything sharp.

We should not put anything into our
ears.

Without knowing it, we may injure
our ears in this way.

If we have trouble in hearing what
people say, we should have our
ears tested.

Deafness may come from tonsillitis,
measles or scarlet fever.

If our ears ache or run pus, we should
see a doctor at once.

Remember that, if taken in time, most
ear troubles can be cured.

Germs

Germs are the smallest forms of plant or animal life.

They are so tiny that we cannot see them with the naked eye.

Some of the germs are our friends.

Others among them are our enemies.

The enemy germs may cause disease.

They may cause trouble in other ways.

They sour milk and spoil meat.

They rot vegetables and fruit.

Many germs bring disease.

Germs cause diphtheria, pneumonia and smallpox.

Scarlet fever and measles are caused by germs

Germs also cause mumps and whooping cough.

Even a cold is a germ disease.

The best way to keep clear of germs is to keep everything clean.

Germs multiply in dirty places.

In clean places there will not be so many of them.

We will try to keep our homes clean to get rid of germs.

Keeping our homes clean helps to keep away germs that are harmful.

We will try to keep our hands clean so as not to have germs on them.

We will keep our food clean so germs will not spoil it.

More About Germs

Germs may be found in water, food
and on the dishes.

Sometimes insects carry germs.

Sometimes germs are found in the fur
of cats and dogs.

We often touch things that are covered
with disease germs.

That is one good reason why we ought
to wash our hands before eating.

For germs often enter our body
through the mouth.

They enter through the nose, too.

Sometimes pus germs come in through
a break in the skin.

Strong sunlight will kill many germs.

Boiling water will kill germs.

Soap and water also destroy germs.

Keeping our bodies clean helps to
keep us well and free from harm-
ful germs.

Make your body strong so that it can
overcome harmful germs.

The Fly

In the springtime the flies leave their winter hiding places.

They eat a great deal and soon begin to lay eggs.

They like best to lay their eggs in stables, in filth or in rotten or spoiled food.

Think of it!

One fly may carry as many as six millions germs.

One fly may lay as many as one hundred fifty eggs at one time.

Flies like dirt and filth.

They feed on rotten fruit and garbage.

They enjoy the filth of the stables.

From the stables they come to our
homes.

They alight on the food on our tables.
They like milk and so often go to the
baby's milk bottle.

They visit sick people and annoy them.

They carry disease germs on their feet
to our food.

If we eat that food we, too, may be-
come sick.

Flies are our enemies.

They often make well people sick.

So we must get rid of the flies.

They may not always bring sickness,
but they always carry filth.

Fighting the Flies

We must fight the flies.

Swat every fly you see.

Keep the windows and doors screened.

Take away all filth.

Do not keep decayed fruit or vegetables
in the cellar or basement.

Keep the garbage can as far from the
house as possible.

Be sure that the cover on the garbage
can fits tightly.

Keep the house and yard so clean that
the flies cannot find a dirty spot
in which to lay their eggs.

If every one does this, we shall soon be
rid of these pests.

Mosquitoes

There are ten kinds of mosquitoes.

Two kinds carry diseases such as malaria and yellow fever.

Even when they do not carry disease, mosquitoes are a pest.

They sting people.

They poison them enough so that often
there is a swelling and soreness.

Mosquito bites itch, too.

Mosquitoes hatch in swamps, puddles
and pools.

Sometimes they are found in rain
barrels or in dishes of water left
outside.

One mosquito may lay four hundred
eggs at one time.

A single can of water may be a hatch-
ing place for thousands of mos-
quitoes.

Boys and girls can help to keep mos-
quitoes away from their homes.

They can see that water is not left standing in barrels, tubs, cans or dishes.

They can fill puddles with dirt.

Perhaps they can even pour a little kerosene on the small pools and ponds.

This will keep mosquitoes from hatching.

They can help to get rid of mosquitoes by seeing that there are no damp or dirty places where they can hatch.

In all these ways boys and girls can help to keep these pests away from their homes.

Rats and Mice

We do not want rats and mice in our homes.

They eat our food and supplies.

They are too filthy to live in our homes.

They should not be allowed to live in markets and stores.

They damage and they destroy many things.

They carry germs of disease to our foods.

They often carry such diseases as typhoid fever and diphtheria.

So we must get rid of them.

We can set traps to catch mice.

We can set traps for rats, too.

Sometimes we must use rat poison to kill the rats.

We can fill up and cover holes through which rats and mice enter our homes.

In these ways we can keep rats and mice out.

Then we shall have cleaner foods and better health.

Colds

Little naughty germs make us catch cold.

Now, a cold is not a pleasant thing to have.

A cold makes us sneeze and cough.

A bad cough may keep us awake all night.

Sometimes a cold makes our noses run.

It gives us headaches and sore throats.

Sometimes it makes us feel too cold, and at other times it makes us feel too hot.

When we have a bad cold, we are too sick to go to school.

A bad cold might even keep us away
from a birthday party or a pleasant picnic.

Sometimes, when we have a cold, we
have to stay in bed.

Indeed, a cold may make us very,
very sick.

How to Prevent Colds

Keep the body in good health.

Eat the right amount of good food.

Get plenty of sleep.

Have windows open at night.

Exercise in the open air.

Keep the body, mouth and nose clean.

Keep the feet dry.

Do not let the body become chilled
by sudden cold or wet.

Wear warm clothing, when it is cold
or damp.

Change clothing when it gets wet
with rain or snow.

Stay away from the person with a cold.

Stay away from crowded places, too.

Use your own dishes, towel and hand-
kerchief.

Have clean, fresh handkerchiefs every
day.

If you have a cold, remember the
other folks.

Always cover your mouth and nose
when you sneeze or cough.

Healthful Homes

In a healthful home water does not stand on the basement floor.

A healthful home has a clean, dry, airy cellar or basement.

Decayed vegetables and fruit are not kept in healthful homes.

Flies, rats and mice are not allowed to stay in healthful homes.

Garbage is not kept near the healthful home.

It is always placed in a tightly covered can away from the house.

A healthful home has plenty of sunshine and fresh air.

A healthful home is clean everywhere.

A healthful home is clean both inside
and outside.

The people who live in healthful homes
are clean and happy.

We will keep our homes clean and
wholesome.

Boys and girls can help to do this in
many ways.

They can help keep things clean.

Muddy Jim

A naughty lad was Muddy Jim,
He hated soap and water.
He didn't bathe but once a month,
His nails he didn't trim.
His hair uncombed—oh, what a sight
Was naughty Muddy Jim.

—*Emilie Berliner*

Where to Buy Food

Buy your food in the stores that are kept clean and free from flies, rats and mice.

Buy your food in the stores that are well screened and that keep food under cover.

Buy your food in the stores where the clerks are clean and tidy.

Buy food that has not been handled.

Buy ice cream in the store that keeps glasses, dishes and spoons clean.

Buy meat in a market where it is kept fresh in clean ice boxes.

Buy bread, cake, and cookies from a clean bakery.

Buy milk from the cleanest dairy in
your neighborhood.

Buy meals in clean restaurants only.
Never buy food in unclean places.

The Healthy Child

A healthy child weighs enough for his
height and age.

He is strong and well.

He has good tonsils and good teeth.

He breathes plenty of fresh air both
day and night.

He has enough sleep and exercise every day.

He does not work or play until he is over-tired.

He plays outdoors in the sunshine every day.

He eats good food, chews it well and eats slowly.

He does not eat candy between meals.

He drinks milk, and orange and tomato juices.

He does not drink tea and coffee.

He is happy at mealtime.

He has rosy cheeks and sparkling eyes.

He obeys all the health rules.

Now, are you a healthy child?

For Good Health

I will keep the Health Rules and try
to do right.

I will brush my teeth well both morn-
ing and night,

I will drink lots of water, healthy to be,
I will drink sweet milk, never coffee
nor tea,

I will eat wholesome food to keep well
and strong,

I will go to bed early to make my
nights long,

I will sleep with my windows wide
open, too,

I will get fresh air at night, good for
me and for you.

—*Maria Halsey Stryker*

Tobacco

Tobacco is a poison.

It hurts young people more than it
does older people.

Tobacco injures the heart.

It dulls the mind.

Cigarettes are bad for boys.

Boys who smoke cigarettes do not grow
as they should.

They are apt to be under weight and
under height.

The use of tobacco is an unclean habit.

The chewing of tobacco leads to the
filthy habit of spitting.

Smoking has a bad effect on the
breath, teeth and mouth.

Tobacco weakens the body.

It makes us more likely to take
diseases.

Then, too, tobacco costs a great deal
of money.

It is foolish to waste money on tobacco,
pipes, cigars and cigarettes.

Tobacco never helps a boy to learn his
lessons.

It does not help him to get work.

Tobacco never does any good.

In the end the use of tobacco always
harms people.

A boy who wishes to be a fast runner
must never use tobacco.

A wise boy will never use tobacco in
any form.

Alcohol

Alcohol is found in wine, beer and whiskey.

Alcohol is always an enemy.

Alcohol makes the muscles weak.

Alcohol dulls the mind.

It lessens the strength and shortens life.

People who use alcohol are more likely to take diseases than those who do not use it.

They cannot stand cold and heat as well as those who never drink alcoholic liquors.

Alcohol brings sadness and trouble.

Remember it is not wise nor safe to drink alcoholic liquors.

Things to Remember

Eat only clean food.

Put nothing into your mouth that has been in another person's mouth.

Never put pencils or money into your mouth.

Do not bite your finger nails.

Never drink from a glass or cup that another person has used until it has been washed.

Eat fruit and vegetables every day.

Drink a quart of milk each day.

Drink four glasses of water each day.

Drink no tea nor coffee.

Come to the table with clean hands and faces.

Chew your food with your mouth closed.

Chew your food without noise.

Be happy at mealtime.

Take a bath more than once a week.

Wash your face, ears, and neck every morning.

Brush your teeth morning and night.

Wear clean clothes.

Take a clean handkerchief to school every morning.

Cover your face with a handkerchief when you sneeze or cough.

Do not pick your nose, or wipe it on your hand or sleeve.

Never spit on the floor or sidewalk.

Play Out of Doors Every Day

Do not shout in anyone's ear.

Sleep long hours with windows wide
open.

Play out of doors at least an hour
every day.

Be happy and gay; be helpful and kind.
Smile and the world will smile at you.

How Strong Are You?

I like a lad of muscles big,
And lungs of shouting size,
Of active feet and figure trim
And brightly beaming eyes;
A lad who well can run a race,
And push a paddle well,
Or breast the waves with fishy grace,
Or raise a schoolboy yell.

—*Amos R. Wells*

INSPECTION AND SAFETY

Health Inspection

We have health inspection at school. Every day our teacher looks at our hands, faces, necks, ears, hair and clothes, to see if they are clean.

When we are clean, and have clean clothes and clean handkerchiefs, we pass the health inspection.

Sometimes, when we pass the health inspection, we can play "Teacher," and inspect other boys and girls.

Wouldn't you like to pass the health inspection?

Sometimes the school nurse inspects us, too.

If we have bad coughs, sore throats, or if we look sick, she sends us home. She says that when we are sick, we ought to stay at home.

Then if we have anything “catching,” like measles, we shall not give it to other children.

Besides, we shall get well sooner.

The nurse helps the school dentist
when he comes to see us.

The dentist looks at our teeth.

He tells us to take good care of them,
and to see our dentist twice a year.

If our teeth are clean, the school dentist
gives us a card that says, "Clean
Teeth" on it.

If there are no cavities, he gives
us a "Perfect" card with a gold
star on it.

Then we are very glad.

We try to have clean and perfect
teeth by obeying the health rules.

Could you pass teeth inspection?

The School Doctor

Once a year the school doctor comes
to our room.

He gives us a health inspection, too.

He asks us to open our mouths wide.

He puts clean white sticks into our
mouths.

Then he asks us to say, "Ah."

He is looking to see if we have good
tonsils.

If we have bad tonsils and adenoids,
we take a note home telling our
parents about it.

The doctor says that if we want to be
well, we should have our bad
tonsils and adenoids taken out.

He looks us over to see if we stand straight and if we look well.

He tells us that we must eat the right kind of food.

He tells us that we should play out of doors in the sunshine.

He also tells us to sleep long hours
with windows open.

If we are well, he says,

“Fine! You surely know how to
obey the health rules!”

Then the doctor plays “telephone.”

He puts the telephone upon our
chests, and listens.

Then he can tell whether we have good
hearts and lungs.

He says that our bodies are like
automobiles.

If we don't take good care of them,
they wear out.

Automobiles are looked over to see if
they are in good running order.

The school doctor says we ought to have our bodies looked over once a year.

So once a year we should go to our own doctor.

He will look us over carefully and see if our bodies are in good working order.

If there is anything wrong, the doctor will try to take care of it before it gets too bad.

This will help to keep us healthy. Of course, we are going to try to obey all of the health rules.

Then we shall be strong, and well, and happy.

A Safety-First Club

We have a Safety-First Club in our room, and we wear Safety-First badges.

To belong to this club, we must obey the Safety-First rules.

Here are some of them:

Always look both ways before crossing the street.

Cross streets only at the corners.

Cross the street when the green light says, "Go," or when the traffic policeman or the school patrol boy tells you to go.

Play all games on the playground or in the back yard at home.

Roller skate upon sidewalks only.

If you are coasting down hill,
choose a Safety street, or one
where there are no cars.

If you go skating in the winter time,
be sure that the ice is strong
enough to hold you.

Play with safe playthings only.

When you see a wire down in the
street, stay as far away from it as
you can.

It may be a live wire.

Should you touch a live wire, it
might kill you.

Obey all Safety rules.

Be safe and be healthy.

A BETTER HEALTH CHART

TAKE a sheet of paper and make a chart like the one below. Cross out lines on which you cannot give yourself 5. Then add the fives up and see what your health grade is. Make a new chart every week. Try to do better and better until you get a grade of 100 in health. That is the perfect grade.

My Better Health Chart

[1]	I brush my teeth every morning.....	5
[2]	I eat a cooked cereal for breakfast.....	5
[3]	I do not drink tea nor coffee.....	5
[4]	I eat fresh fruit or prunes every day.....	5
[5]	I drink several glasses of water every day.....	5
[6]	I do not drink from a glass anyone else uses.....	5
[7]	I sit up straight in school.....	5
[8]	I stand straight, with my chest up.....	5
[9]	I wash my hands before eating.....	5
[10]	I drink at least two glasses of milk every day.....	5
[11]	I eat plenty of vegetables every day.....	5
[12]	I chew my food well.....	5
[13]	I play out of doors every day.....	5
[14]	I do not eat too much candy.....	5
[15]	I am cheerful and happy.....	5
[16]	I take a complete bath oftener than once a week.....	5

[18]	I go to bed early.....	5
[19]	I sleep ten hours every night.....	5
[20]	I sleep with windows open.....	5

My grade is.....

My name is.....

Suggestions to Teachers

BETTER HEALTH FOR LITTLE AMERICANS is an outgrowth of oral composition and of health teaching in a second grade. The vocabulary and sentence-structure, therefore, possess the desirable simplicity that leads to complete comprehension on the part of the primary child. Thus the little student readily learns what to do to obtain and conserve good health. He gets a helpful understanding of the value of right foods, fresh air and sunshine, cleanliness, sleep, rest, and exercise. He learns "safety first," and, through the knowledge and habits obtained in the community health lessons, he becomes a better little American citizen. Indeed, the detailed factual material here presented gives in a simple but interesting way the scientific knowledge that will eventually lead to the ultimate goal—namely, the achievement of permanent good health habits.

The systematic topical arrangement of the subject matter is in keeping with the best usage of foremost reading authorities and educators. Silhouettes, rhymes, and riddles are stimulating additions to the book. It is hoped and believed that this revised and enlarged edition, incorporating lessons based on the latest thought on the subject, may reach even greater usefulness and popularity. The chief purpose of this primary textbook is to help little Americans build better health for themselves. The mere reading of the book is not in itself sufficient. The teacher should show by her own demeanor that she actually believes and practices what she teaches, for children are very quick to perceive any apparent insincerity. She must supplement the interest aroused by the textbook by many activities that aid in the process of building better health. Monthly weighing, health drives of various kinds, a preliminary preparation to develop interest in reading material, and to secure the coöperation of parents are all helpful. The teacher may have health drives on: going to bed at eight, drinking milk, abstaining from the use of coffee, cleaning the teeth, etc. If she prepares charts to show what each child is doing, and announces the winners of the health race, she may arouse

even greater interest. Children who show little progress should be kindly stimulated. However, the health projects must never be made burdensome or an occasion for criticism that might hurt sensitive feelings.

Other extra-curricular activities may aid in the process of building better health. Daily inspections; excursions to the farm, the dairy, and to community stores; health posters; illustrations in crayon or water color; mounted pictures; interesting booklets; sand-table projects; and class room discussions are valuable supplementary devices. The memorizing of rhymes and poems, the use of programs, pageants, stories, and dramatizations, adapted to the purpose when time and conditions permit, are helpful correlations. Health songs, singing and folk dances, marching, rhythm work, and competitive games, are kinæsthetic activities which assist in securing better health.

Since health education as a topic of first importance in schools is now freely and even emphatically advocated by practically all educators, it follows that time for this work consistent with its recognized importance should be provided and used. In the first three grades, from fifty to sixty minutes a week should be the minimum of time for health instruction. There should be a definite time provided on the daily program. A semester, or even an entire year, should be devoted to the use of the book with its many supplementary activities.

In any health program, special attention should be given to the underweight child. No stereotyped suggestions to fit individual cases can be given. Every teacher according to her own originality and initiative will think of the ways most effective to gain results from her own group.

Finally, the resourceful teacher will find that a carefully planned daily and semester outline for the teaching of the text book, coupled with initiative and originality, will be rewarded by a constantly growing interest on the part of the pupils. May the knowledge thus obtained gradually, but surely, result in the practice of health habits that will eventually lead to *better health for little Americans*.
