Three four plane divisions departed base for the purpose of reconneitering shipping at Suruga Wan preparatory to a night shipping attack by DD's to be detached from the task force. Two planes and one escert were forced to return to base because of mechanical difficulties.

A thorough search of the day revealed about 25 ships larger than 50 gress tens and 12 of that number in excess of 700 gress tens.

The flight, having accomplished its mission proceeded to Juji at which point a factory had been designated as the target for the 500% bombs carried. Both divisions circled the target and pushed ever at 9000 feet from the north. Releasing at 4000 feet, eight hits were observed in the factory area, one bomb going short by about 100 feet. The area on retirement appeared well gutted and smoking considerably. A reconnalesance of Full airfield showed no planes and no acceptable ground target installations. The flight them broke into one four plane and the five plane division and sought targets of opportunity for their rockets. Three other semenhat smaller factory installations (one possibly a power plant) formed a 3 mile rectangle with the bombed plant and recket attacks were made on these by sections. Many reaket hits were scored and while semental caused fires, each area was giving off some smoke. The divisions randerboused and proceeded south to Suruge Van. Here a small "net tender mine layer" was well strafed and was forced to beach itself at Puji. Bugging the west ceast of the bay, shipping targets were sought and at Shiming three "Fox Tore Dogs" were heavily strafed. Just before leaving the coast to set course for base, it was noted that the Paji factory area was filled with make up to 5000 feet.
