MEMORANDUM FOR THE RECORD: 12 December 1947

Arrangements have been made with Legal Section for investigation of records to determine status of subject persons with respect to probability of arrest as war crimes suspects.

MEMORANDUM FOR: Chief, Public Service Qualifications Division

SUBJECT : Japanese Peerage - Final Designation Thereof.

1. Early in the implementation of SCAPIN 550 the Japanese Government was instructed to screen members of the House of Peers and electors thereto. This automatically subjected the entire peerage of Japan to review under the purge ordinances, but through an "error" very few were actually screened. It was not until this Division undertook a review of persons purged during 1946 that the error referred to above was discovered. The Japanese Government was promptly asked to submit a list of ex-peers deemed to fall under the provisions of the purge memorandum as well as to submit those questionnaires not reviewed by GHQ.

2. Despite the delay and confusion which has been encountered in reviewing the status of the former aristocracy under the purge ordinances, the project is now substantially complete. A total of 504 questionnaires have been reviewed by this Division. With the exception of approximately 60 ex-peers about whom the JapaneseGovernment has been unable to obtain any information - either from Imperial Household Ministry records, the Metropolitan Police Board, or relatives - all former members of the peerage have been examined under the purge ordinances. The total number purged is 139. Of these, 63 were purged in 1946, and 76 were screened and purged, or provisionally designated, in 1947. Unless additional information comes to hand, this project may be considered closed.

For this reason, he was appointed the above office. 24. TSUBOTA, Osamu 20272

Public Office: Secretary of Transportation Ministry
(1st Class)

Decision: Passed

Reason: Army Civil Administrator-General (Feb. 1943-Dec. 1944) (2nd Grade) (KOTOKAN)

Director of Transportation Department of
Sumatra Military Administration Government
(Apr. 1944-Sept. 1944)

Director of General Transportation Bureau of
Sumatra Military Administration Government
(Sept. 1944-July 1944)

1. Matters under the Transportations Department were the transportation on land and sea of civilians' necessaries, communication, etc. Those of military necessaries were charged by the military organs respectively. Therefore, the jurisdiction of duties of the Director of Transportation Department spread only over inner relations and was extremely to a small extent. Especially, in his tenure of office, the principal business was the restoration of transportation equipments.

2. The substance of his duties as Director of Transpportation Department was technical.

Decision: Passed

Reason: Councillor of Tama Technical Research Institute of Army (Mar. 1945-Sept. 1945)

Commissioner of Bureau of Aeronautics of Navy (1940-1942)

Councillor of Bureau of Technology of the Army (1939-1942)

1. As the Tama Technical Research Institute of the Army was altered in its organization so that it might employ the personnel and facilities of Tokyo Institute of Technology, entrusting the study and research to the professors and assistant-professors of the said Institute, the above person, who was the president thereof, was nominally entrusted councillor for the convenience of liaison, but the substance of his duties suffered no alteration. Therefore, the office of councillor was not important and the tenure of his office was short.

2. The destruction of wind tunnels of Technical Research Institute of Navy by the great earthquake of Kantō Region in 1923, and consequent transfer of the said Institute to Kasumigaura, made it necessary for Navy to make use temporarily of the new wind tunnel of Aeronautical Research Institute of Tokyo Imperial University. As the said person was being the head of wind tunnel department of the Institute at the time, he was

asked to do a job of liaison as non-official personnel of Bureau of Aeronautics of Navy. Actual works done were some wind tunnel experiments on a few models. But he was not allowed to take part in them and the experiments were performed exclusively by naval personnel. Though he remained nominally as commissioner till January 1942, he had nothing to do for the Navy during that time.

3. The tenure of his office as councillor of Bureau of Technology of the Army extended from 1939 to January 1942, when he was director of Aeronautical Research Institute of Tokyo Imperial University.

The duties of councillor was limited strictly to technical matters and, in his own case, to a job of liaison in connection with scientific researches which had been entrusted to the said aeronautical Institute.

The councillor was not a responsible post at all, and all that he had been allowed to do was to attend a meeting to hear about scientific researches in the Army and look at some research experiments twice a year.

tation Division, the business relative to the transportation (railways, autocars, roads, sea transports) and communication under his jurisdiction. For the Army, there were communication corps, railway corps, autocar corps, ship corps that were conducted by the Army itself.

Mayor of Jakarta City (Oct. 1943-Jul. 1944)

Governor of Kederi Province, Java (Jul. 1944-Aug. 1945)

1. The mayor of Jakarta City was a nominal existance which had not any importance.

(a) Jakarta was the seat of Military Administration Government (Direcotrs of Industry Dep't., Transportation Dep't.,Financial Affairs Dep't., Peace Preservation Dep't. and Home Affairs Dep't.) which directly held wider fields of administration. And the jurisdiction of the mayor was extremely limited. The police power was held directly by the Peace Preservation Department, but not by the Mayor.

(b) There was another person named Yoshiaki, Governor of Jakarta Province who gave direction and made supervision over him.

(c) The post of Mayor of Jakarta, having not been important, was usually filled by an official of Sōnin Rank. The former Mayor Tsukamoto, and the later Mayor Hasegawa were not also Chokunin Rank officials, but

Sōnin Rank officials which were inferior to above persons.

2. The post of Governor of Kederi was not important compared with the other governors of provinces.

(a) There was, as his superior, Chief of Military Administration Branch (Masaomi Yasuoka), which corresponded to governor of a prefecture of Japan, and the governor of province corresponded to chief of a county of Japan. Being under the direction and supervision of the Chief of Military Administration Branch, his jurisdiction was extremely limited.

(b) Kedri Province was a remote province in Java Island, outside of the main railway lines, and had little importance for its geographical situations. In the Province, these was no important military or industrial plant. Even the greatest city had a population of only eighty thousand. The most part of the inhabitants carried on agriculture. The collection and purchase of agricultural products were, under the supervision of the Military Administration Government, charged by the Food Public Corporation, out of the jurisdiction of the Governor of Province. As to the finance, there was a Branch of Yokohama Specie Bank which was also out of his jurisdiction (it was under that of the Director of Financial Affairs Department of the Military Administration Government.)

(c) The public peace and living condition were already satisfactory.

(d) The above person was put in the lowest position among the civil administrators-generals in Java, and he remained consistently in the 2nd Grade of Higher Official Rank.
