

Working in wartime: update on Ukrainian community

User:Renvoy

General issues

Decrease in editor activity

In June, 68% of Wikimedia Ukraine members reported their activity had decreased considerably or somewhat since the all-out invasion

Most widespread reasons – lack of time (e.g. new volunteer / caretaking responsibilities), technical inability (e.g. no internet in a shelter), psychological stress

Readership interest

- Reader interest on Wikipedia grew considerably – 106,877,169 user views in UkWiki in April, second highest month in history
- The topic of the war is (predictably) most popular
- The leader – the article about Russia's invasion itself – has raked in 3 million views in less than six months, an absolute record for UkWiki

Particular activities

We are back in Wikipedia!
