Report No, UKan #60
16 March 1948

SUBJECT: Subsequent Report on Stolen Reparations Machines

TO: Kyoto Branch of the Osaka Finance Bureau
Attn: Chief of the Branch Office

FROM: Custodian of the Uji Arsenal

Subsequent to report UKan # 51, dtd 8 March 1948, the following report from 9 March thru 15 March 48 is submitted.

1. Report period:
9 March thru 15 March 1948

2. Brief description of investigations made by the police dept and its results:

a. The following was gained by verbal connections by the Uji Police Dept:
(1) Investigations for the stolen motors in second-hand stores, and pawn shops of the Higashi-Uji-machi and Uji-machi were made. Besides these, endeavours to get a tip from conversations at cafes, bars and at the gay-centers were made, but up to the present moment no information could be gained.
(2) Above mentioned investigations were held in Fushimi-ku, concluding without any luck, so the area for investigation was enlarged and a more thorough investigation will be made.
(3) Since carrying away of these machines is most likely in the first or last electric car (Keihan-Uji Line), a thorough investigation of the early morn and late at night will be made.

3. Measures taken by the custodians:
a. Plans are being made to transfer the machines to the best store house (#176), due to unsuitable structure and locking of doors are inadequate. Further more this plan is not merely for the machines in the store room that were stolen, but counter plans for the whole collateral plant.
For this reason, the chief of the Reparations Section of the Kyoto branch of the Finance Bureau came and investigated the area and a conference was held for policies to be taken in the future.
b. We regret to say that even with the most close connection and cooperation with the Uji and Fushimi Police Dept, satisfactory results could not be obtained.
For this purpose the chief of the Kyoto Branch of the Osaka Finance Bureau interviewed the Uji Police Dept. on the 11th. and Fushimi Police Dept. on the 12th.

4. Inspections were made by the Chief of the Uji Police Dept. with a party of three on the 12th from 1000 to 1100, of area of the incident and the whole plant of its guard situation.
(On this date the chief met Mr. Leatherman of the Kyoto Military Government Team and acquired necessary information)

Translation No.333

To: Chief of the Local Dept.
From: Chief of the Uji-Intendant Office
Date: March 8, 1948

According to Kyoto Mil. Gov't Team's request on report U.Kan No.48, dated March 3, I am reporting to you its progress (weekly report)

(1) Report

March 3. We reported to the Uji Police Station and the spot had been inspected. We reported this to the Kyoto Local Dept. by telephone.

March 4. Sent the written report to the Kyoto Local Dept., and made Matsuura, a part-time office to go to the Kyoto Mil. Gov't Team and report it.

(2) Searching

This case is under investigation by the Uji Police Station since March 3, but the condition is as written in U Shi Hatsu No. 30, we heard no corroborative evidence is secured yet.

(3) Disposition at Intendance Office

We established a temporary watchers' house (at No.43 house) near the burglary place to guarding the middle part of the sub-branch plant.

Regarding "Watchermen for No.1 house were vacant" in U Shi Hatsu No.30, we had watchers there before for sometime, but as it was not a place to have regular watchers and also as we had no reserve power in personnel, it was with drawn.

The numbers of guards in U Shi Hatsu No.30 are the total numbers of both A and B squads and persons on duty are 6 (24 hours duty a day)

(4) Other Matters

According to an oral information from the Uji Police Station, as this robbed place belongs to the jurisdiction of Fushimi Police Station, the searching of this case will be transferred to the latter.

Re. Burglary Of Reparation Goods (Electric Motors)

We report to you that the above is as follows:

(1) Date and Time
From 5 p.m. 2nd
To 8 a.m. 3rd March, 1948

(2) Place
The Electric Motor piled place, in House No.1 sub-branch plant, Intendant Office of Uji Plant, Osaka Financial Bureau, No.1, Oshima, Mukojima, Fushimi-ku, Kyoto-City.
Representative for damage Taro Koshima,
Chief, Intendant Office.

(3) Stolen Goods
Three Electric Motors

1. I HP	made by Mitsubishi	Reparation reg.	No.2242
2. 2 HP	" Hidachi	"	No.2371
3. I HP	" "	"	No.221H1

(4) Condition of Burglary
The said Intendant Office of the Uji Plant, Osaka Financial Bureau was called "the Uji Plant, Tokyo and Army Arms-Manufactory," and was making gunpowder. Therefore the equipments and a part of furniture were designated as the reparation goods and the Chief of the Intendant Office and 12 guards were watching them day and night, but since about January, some of them resigned in succession and they couldn't be filled up, and the guards at the watching place for No.1 house at where the burglary was committed had been vacant.
The suspects are considered that they cut the wire entanglement with something like pincers, entered through it, go down, walked to the place passing the vegetable garden, went up the corridor, took off the window-frame that was covered with veneer boards, entered the room, stole the said goods, and ran away retrograding the same way.

(5) Searching Progress
We inspected the spot as soon as we received the report at 11.50 a.m. March 3, and found as bove. Tho we examined the fingerprints, we couldn't find, but the foot-prints remained in the garden were of jikatabi and sports shoes, and in ones of the former [illegible] like a trade mark was recognized.
A tag which had been attached to the motors was dropped in the garden about 10 meters from the outer-fence, and 2 of them were found near the manure tank under the northern dike close by the forked path (that lead to Obaku and Kobata) about 500 mtrs. to the east from the entered place along the bank of the concrete channel of about 3 mtrs. wide and about 3 mtrs. deep.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

There was a trace of burning straw but the farmers who were working near by said that when they passed there at about 8 a.m. on the same day, as they found some odd ends of strawmatting and and straw-ropes etc., and as it was cold, they burned them there to get warm.

The suspects are considered that they wrapped the motors with straw-mattings and ran away with them toward Obaku or Kobata.

The geographical feature there was: About 1,000 mtrs. between the Uji-line of Kyoto-Osaka-line and the outer fence of the said plant, and there are only bamboo groves, tea-gardens, and farms etc. without any path which can be called a road, but there is a path that admits a rear-car to pass to the said place at where straw mattings were burned from the direction of Obaku.

The suspects are considered to be ones who well acquainted with this neighbourhood and workman at the plant in those days when the plant was the gunpowder manufacturing plant, or delinquent youngmen living near were concerned, and we searched at second-hand dealers in Obaku, Kobata, Fushimi, and Kyoto but the culprits are still in large.

We are continually searching strictly.

4. Condition of the Robbery:

The follwoing fact was assured by the investigation made by the staff who came to the office about 8 on March 3 and found some splinters of window glass scattered around and one window frame taken away.

In the building, several electric motors were put together (We were collecting them fearing robbery).

At the time of the office-closing hour, there was no omission in door-fastening.

We recognized the foot-prints, numbered togs (galvanized iron togs and paper togs) were left and the end of the fence (of No.8 iron wire and barbed wire) was broken down, at the place, where we supposed through which the robbers passed. (refer to the attached plan)

5. Disposition:

Confirming the stolen goods, we reported to the Uji Police Station and requested them to investigate the spot, and the case is now under their investigation.

Immediately we informed this to the Local Dept. by telephone, and reported with this statement.

6. Adequate Measures:

Previously considering robbery, we had taken off the small electric motors from the bodies and had piled them up. With regard to such powerful robbers as this time, we shall transfer the remainders into a strong building and shall strengthen the watching not to give them any chance to trespass hereafter.

Uji Arsenal Case Brought To End

Seven Central Figures Sent to Procurators' Office

As the result of investigations of the special inspection headed by Assistant Police Inspector Matsumoto of the Pref. Police Dept (which was carried out from Jan. 23) in connection with the sensational Uji Arsenal Case, more than ¥100-million hoarded goods such as aluminum, textiles and toluol have been unearthed and seven central figures involved in the case were sent to the Procurators' Office.

Taro Kojima, the present Custodian Chief (former Japanese major,) Kaku Takatsuji, general affairs section chief (former captain) and Tsuruzo Shimizu, the then chief of the Japan Transport, Uji Branch, were indicted on the charges of embezzlement and breach of trust.

Kazuhiro Mayeda, chief of the Japan Nitrogen Co. Constructing Office, Kanji Iriye, materials section chief of the Co., and Ryuichi Mayeda of Nippon New Chemical Co., were charged for embezzlement and misappropriation, and Kenzo Yabuuchi, engineering contractor, for theft.

Concerning the unearthed hoarded goods, Police Inspector Mayeda of the Pref. Dept. will make a checkup next week in the presence of the Industrial Recovery Corporation officials and all the goods are slated to be disposed of into the legal channels.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 773013

RECONVERSION OF UJI FACTORY, BRANCH PLANT

24 February 1948

Osaka Finance Bureau.

1. Name of Installation.

Branch Plant of Uji Factory, Tokyo 2nd Army Arsenal.

Land area: 115,644 tsubo. Buildings area: 12,972 tsubo.

2. Date of Release.

A part of land (23,121 tsubo) and buildings (8,535 tsubo) has been released by the Allied Forces concerned to the Japanese Government by January 7, 1948.

Application for the release of the remaining land has already been submitted to Kyoto Military Government Team. There remain some buildings (4,437 tsubo) in which the reparations machines stored.

3. Applicants for Using the Installation.

By the end of last year the following companies have submitted to this office applications for the reconversion of the said installation.

a. Nippon Yakuhin Kasei K.K. (Manufacturer of sulphuric acid, chrolsulfamin, caustic soda, amalgamated salt, etc.)

b. Teikoku Kegawa K.K. (Manufacturer of leather and furs)

c. Noko Ryozen Kyodai. (Manufacturer of paper, fertilizer, lumber,)

d. Zenyo Jitsugyo K.K. (Manufacturer of sulpheric dyes, cosmetics, sulfamin, etc.)

e. Kyodo Kagaku K.K. (Manufacturer of margarine, fat, soap, etc.)

f. Kyoto City. (Proposed use is unknown yet.)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

4. Selection of User.

The user of the said installation should be chosen from those who are contributing or will be able to contribute to a large extent to the economic or industrial rehabilitation of post-war Japan. The user should also be selected among those who are provided with sufficient equipment, skilled laborers, raw materials, capital and with efficient management.

The investigation made by this office on these points on the part of the above applicants, however, revealed none of them is qualified to use the whole installation efficiently.

This office, therefore, recommended to Finance Ministry to have the installation divided into three parts and have the most qualified three applicants among them use the divided parts respectively.

5. Later, this office was informed by the Finance Ministry that the Committee for the Disposition of National Property at Tokyo which is the qualified organization to make decision on such case decided on January 28, 1948 that the said installatn will be utilized as shown in the attached sketch. Ryozen Kai, however, has not revealed its attitude toward this decision yet.

6. Along with the decision made by the above committee this office will decide finally what part of the installation shoud be used by what applicant upnn investigation on the spot.

Furthermore, when the users desire to buy the land and buildings they are using, this office consider it only if the users showed satisfactory results in their productions after the reconversan.

7. As to the reparations machines there, they will be stored in certain buildings for the convenience of custodying.
