Boston, L. C. Boules. This little story forms one of the series of Miss Martineau's Illustrations of Political Economy. Like all her preceding one of the series of Miss Martineau's Illustrations of Political Economy. Like all her preceding works it akibits strong and acute reasoning powers, warm benevolent feelings, and clear and occreed meral principles. This story points out the great evil of alvery in a moral, social, and economical view. We carnestly recommend it to all our readers. Even those who care little for political economy on slavery, cannot fail to be deeply interested in a feitilious marrative, which combines striking delineations of character and scenery, animated and graceful conversation, and incidents which excite the strongest feelings of sympathy and tenderases.
