Okt THOPEDA or distortion of the FEET.

This important branch of surgery, the object of which is to remedy all deformities of the fleet, having latterly become the subject of particular attention in France, and its treatment attended with decided success, the subscriber was induced during his residence in Paris in 1934, so devote much of his time to a thorough investigation of its theory and practice; and under the instruction of one of the most eminent practitioners there, he flatter himself that he has acquired such knowledge of the art as caables him with confidence to offer his services to the public.

All defects of the feet may be divided into two classes: the congenital, or such as take place before the birth, and accidental, or those which occur at different periods after it; and they are produced by a variety of causes, affecting the esseous, muscular or ligamentous system. All these cases may be completely and permanently cured. The time required to accomplish a cure must necessarily depend upon the nature and degree of the deformity, and the age and state of health of the patient; a congenital or very aggravated case of ten years standing having been completely, rectified.
