Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

The Star which at present is nearest the North Pole is *Aruccabah*, a Star of the second magnitude, and the last in the constellation of Ursa Minor; the Latitude of this Star is $66^{\circ} 4' 43''$ and the mean Longitude, at the beginning of 1800, was $85^{\circ} 46' 10''$. Now the nearest approach of this Star to the Pole will be, when it is in the first of Cancer—which accordingly happens in the year 2103, at which time its distance from the pole will be about $29' 55''$. And since the fixed Stars complete a revolution about the axis of the celestial in 25816 years, therefore, any given fixed Star will perform half the revolution in half that time; and consequently, if that Star was before at its nearest appulse to the pole, it will now be the most remote from it possible; therefore, 12908 years after the year 2103, that is, in the year 15011, the present pole star will be $45^{\circ} 33' 5''$ distant from the pole. About 2300 years before the common account of the commencement of the Christian era, the star Draconis was the polar star, being then within ten minutes of the pole.

Mean place of the pole star from the first January 1827, is $1^{\circ} 36' 50''$, and its true place the first January, 1827, is $1^{\circ} 36' 26''$, and decreases yearly at the rate of $19'' 9$.

SOLAR AND LUNAR ECLIPSES,

IN THE YEAR 1827.

April 25—The Sun Eclipsed, *invisible*, δ at 9h 44m. evening. \odot will be centrally Eclipsed on the Meridian at 10h. 22m. evening, in Longitude $124^{\circ} 59'$ East, and Latitude $87^{\circ} 30'$ North.

THE keener tempests rise ; and fuming dun
From all the livid East, or piercing North,
Thick clouds ascend ; in whose capacious womb
A vapory deluge lies, to snow congeal'd—
Heavy they roll their fleecy world along,
And the sky saddens with the gathering storm.

Muttering, the winds at eve, with blunted point,
Blow hollow—blustering from the South. Subdu'd
The frost resolves into a trickling thaw.
Spotted the mountains shine; loose sleet descends
And floods the country round. The Rivers swell
Impatient of their bounds.

And see where surly WINTER passes off,
Far to the North, and calls his howling blasts:
His blasts obey, and quit the howling hill,
While softer gales succeed, at whose kind touch,
Dis-olyng snaws in livid torrents lost,
The mountains lift their green leads to the skies.

Joyous th' impatient husbandman perceives
 Relenting nature, and his lusty Steers
 Drives from their stalls, to where the well us'd plough
 Lies in the furrow loosened from the frost.
 There, unrefusing, to the harness'd yoke
 They lend their shoulder, and begin the toil,
 Cheer'd by the simple song, and soaring lark.

From the moist meadow to the wither'd hill,
Led by the breeze, the vivid verdure runs,
And swells, and deepens, to the cherish'd eye.
The hawthorn whitens; and the juicy groves
Put forth their buds, unfolding by degrees,
Till the whole leafy forest stands display'd
In full luxuriance, to the sighing gales.

Half in a blush of clustering roses lost,
 Dew-dropping Coolness to the shade retires;
 There on the verdant turf, or flowery bed,
 By gelid founts, and careless rills to muse;
 While tyrant Heat, dispreading thro' the sky,
 With rapid sway, his burning influence darts
 On man, and beast, and herb, and tepid stream.

Soon as the morning trembles o'er the sky,
 And, unperceived, unfolds the spreading day;
 Before the ripen'd fields the reapers stand,
 In fair array—

At once they stoop and swell the lusty sheaves,
 While thro' the cheerful land, the rural jest
 His harmless, to deceive the tedious time,
 And steal unfelt the sultry hours away.

Now Autumn basks; with fruit empurpled deep;
 Presents the downy peach—the shining plum,
 The ruddy fragrant nectarine; and dark
 Beneath his ample leaf, the lucious fig.
 The vine too here her curling tendrils shoots,
 Hangs out her clusters, glowing to the south:
 And scarcely wishes for a warmer sky.

But see the fading many-color'd woods,
Shade deepening over shade, the country round
Imbrown; a crowded umbrage, dusk, and dun,
Of every hue, from wan declining green
To sooty dark. These now the lonsome muse,
Low whispering, lead into their leaf-strewn walks,
And give the Season in its latest view.

Fled is the blasted verdure of the fields;
 And shrunk into their beds, the flow'ry race
 Their sunny robes resign. Even what remain'd
 Of stronger fruit falls from the naked tree;
 And woods, fields, gardens, orchards, all around
 The desolated prospect thrills the soul.

See here thy pictur'd life! pass some few years,
Thy dawning spring—thy summer's ardent strength,
Thy sober Autumn fading into age—
And pale concluding Winter comes at last
And shuts the scene.

Note.—In the compilation of the Calendar, the Publisher has used every means within his power to obtain correct information. Notwithstanding, some errors will no doubt, be found in it. Corrections will be thankfully received and attended to in a future Edition, which may be addressed to him (post paid) at the Gazette Office, York.

In the Table of the Divisions, Population, &c. of U.C. the correctness of the number of the Population may be questioned. Great difficulty has been found in giving this as correctly as could be desired, in consequence of the want of attention in making up the returns in some of the Districts. In a subsequent Edition of this work, the Publisher will endeavor to give a list of the Townships in the Province, with the population of each.
