Pros and cons

- Only one click to start a draft article.
- Automatically generates headers, infobox, image, etc. based on Wikidata item
- Worklist generated by Listeria and can be updated with one click.
- URLs can be added to manual lists, social media, etc. to expand outreach beyond events.

- May cause confusion for new editors because they can't create articles at home the same way.
- Requires existence or creation of a Wikidata item.
- Requires significant preparatory work before an event.
- Advanced use requires knowledge of Wikidata, Listeria, and SPARQL.
- Article will have to be moved from Draft space when finished.
