

ARE YOU A GOOD
BUG HUNTER?

WHO IS THE BEST
BUG HUNTER IN
SIERRA MADRE?

VOLUME 16, NO. 32

FRIDAY, MAY 12, 1922

PUBLISHED EVERY WEEK AT SIERRA MADRE, LOS ANGELES COUNTY, CALIFORNIA

Traffic Menace Is Subject Of New Ordinance

Kersting Court will be made a one-way street, beginning June 1, with the adoption of an emergency ordinance which was presented for first reading at last night's meeting of the city trustees. The ordinance is designed to prevent the traffic congestion which has been a source of constant danger for a long time.

Under the terms of the ordinance auto traffic will be permitted only in the direction from Hartman's store toward Nomura's grocery. Parking will be permitted only along the curb, with marks to be painted on the paving so as to have cars headed in on an angle. Parking will be prohibited a reasonable distance on either side of the corners where there is not room for an auto to pass between the electric cars and another parked against the curb. Appropriate signs and marks will be installed for the guidance of traffic.

It is expected a curb and gutter will be installed along the Pacific Electric right of way beside the station. Parking on that side of the street will be automatically prohibited by the one-way traffic regulation. This legislation is expected to go a long way toward solving the traffic problem which has worried Marshal Udell and the other city officials a long time.

New Tracts to Open

Messrs E. A. Miller, W. A. Evans, R. A. Fowler and F. M. Smith were present to discuss plans for cutting Montecito avenue through between Lima and Sunnyside, forming a connection between existing portions of the street. Mr. Miller and Mr. Evans are subdividing tracts of land owned by them on both sides of the proposed street. Mr. Fowler owns the land between the two subdivisions. He does not expect to subdivide and would prefer not to have the street cut through, but indicated he would conform to whatever program seemed best for the good of the city. Mr. Smith owns a lot which will lie at the northwest corner of the intersection of Lima and Montecito when the latter is cut through.

Points of discussion were whether to run the new street at right angles or on a slight slant. The existing portions of Montecito are not exactly in line. After a lengthy argument over the relative disadvantages of a jog at intersections or of having a slight bias on frontage lines of the lots, the latter plan was adopted as a means of avoiding a jog in the street connecting at Sunnyside.

It was decided to make the street fifty-five feet wide to conform to the portion of Montecito west of Sunnyside. This will necessitate taking a strip five feet wide along the south line of Mr. Smith's lot. Mr. Smith argued for a fifty foot street which would leave his lot intact. He agreed, however, to an adjustment on a friendly appraisal of benefits and damages, rather than involve all concerned in the bother and expense of condemnation proceedings. On these points the views of City Engineer Gierlich and the trustees were accepted, some concessions being made by all owners.

These matters were taken up only in an advisory way at this time. The desires of the city officials were expressed in order that the property owners might prepare their maps correctly before presenting them for final acceptance by the board.

Reservoir Site

The site of the abandoned reservoir at the corner of Auburn and West

Chaffee Store Rents a Room

Chain Store System Will Open Here in the Near Future

Rumors that one or more of the numerous chain grocery store systems would break into the Sierra Madre field developed into definite news this week with the leasing by the Chaffee company of the room now occupied by Hub Freeman's billiard hall. The lease was arranged through D. N. Alcorn, Mrs. William Walker being the owner of the building.

The Chaffee lease calls for possession of the building on June 1. It is reported the store will begin operating as soon as necessary alterations can be made and fixtures installed. The Chaffee system is represented in practically every town in Southern California with 2,000 or more population.

RADIO FOR GUESTS AT FERN LODGE

Guests at Fern Lodge never lack for anything Mr. and Mrs. Hosford can provide to make their stay enjoyable. A radio receiving set is the latest addition to the many features which make Fern Lodge a distinctive resort. The set was installed recently and while there was some difficulty at first for lack of power, it has been used sufficiently to demonstrate its value as an acquisition of the camp entertainment facilities.

The radio system has not yet been developed to the point of displacing ordinary phones, for lack of practicable sending power for individuals. But it relieves the mountaineer's sense of isolation for lack of knowing what is going on in the outside world. It will be a boon to ranchers, campers and homesteaders who are beyond the network of telephone wires.

Laurel will be advertised for sale by the city, on petition of neighboring property owners who want it removed as an eyesore and public menace. Attorney Baker said he had not been able to find any record of specific transfer of this property from the old water company to the city. It was thought that the title was covered by a blanket deed to all real estate owned by the company and that title to the property can be conveyed to the highest bidder.

More Fire Hose

Purchase of 200 feet of fire hose was authorized on recommendation of Trustee Topping, fire chief. It will be paid for with the residue of the fire apparatus bond fund.

Mira Monte Improvement

Preparation of an ordinance of intention for the improvement of West Mira Monte Avenue was authorized. The work was petitioned for nearly two years ago and Attorney Baker ruled that the lapse of time would not invalidate the petition.

Dr. Jackson, city health officer, asked for regulations providing for the muzzling of dogs in case of rabies appearing. The city attorney was instructed to prepare an amended dog ordinance raising the license fees on dogs and giving authority for ordering the muzzling of dogs in an emergency without waiting for the passage of a new ordinance.

SERVANT IN THE HOUSE COMING NEXT FRIDAY

Charles Rann Kennedy's great play, "The Servant in the House," will be shown on the screen in the First Congregational Church next Friday evening, May 19. The young people of the Christian Endeavor Society will have the entertainment in charge. No admission fee is asked, but a silver offering will be taken.

The Kennedy play is regarded as one of the stage masterpieces of the present generation. It is clean, wholesome and at times amusing. In addition it is powerful as a drama.

***** NEXT SUNDAY IS MOTHER'S DAY

It's a day when every proud son thinks an extra thought or two about his first and truest friend—a day when he shows he is thinking about her by wearing a carnation in his buttonhole. A white flower indicates that she has gone, never to return. A red carnation means that the man or boy who wears it is more fortunate, for his mother is still alive to cheer him with her love. Don't forget—it's Sunday, Mother's Day.

Funds Coming Very Slowly

Salvation Army Drive Lags For Lack of Workers to Solicit Aid

Sierra Madre seems likely to lose her reputation for assisting a worthy cause unless contributors to the Salvation Army fund will come in voluntarily and make their payments.

Mr. E. J. Webster who was appointed chairman of the committee, reports that he has been able to secure only two ladies to aid in making a house to house canvass. Obviously he cannot make the drive alone.

Arrangements have been made whereby payments can be made at the First National Bank or the office of Andrews & Hawks. Citizens who would like to help the great work which is done in Southern California by the Salvation Army are urged to bring in their bit and get the regulation receipt and button.

BIG INVESTMENT AT ROSS FIELD

The two immense steel structures that have been attracting so much attention from motorists driving past Ross Field, and which during the past few weeks have grown into the likenesses of airship hangars, will cost the war department more than \$200,000, it is estimated. They will prove a safe and sure anchorage for valuable aircraft already in use at the Arcadia Balloon School, and for the new D-ship soon to be assembled there, says the Monrovia Messenger.

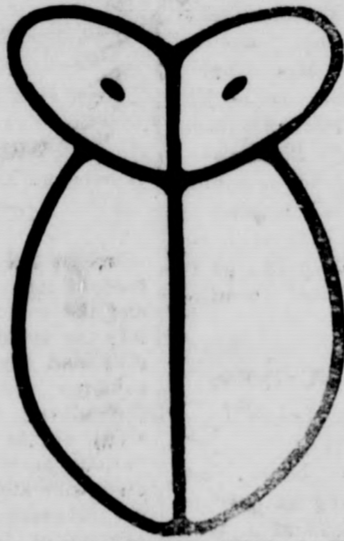

The first D-ship is already lying in the balloon house and will be put together and inflated as soon as the first hangar is completed. Colonel T. A. Baldwin, commanding officer at Ross Field, believes he will be ready to fly the new dirigible next month.

The D-ship is the government's largest dirigible, now that the Roma is no more. It is 200 feet in length and 55 feet in width. When driven by its two 150 horsepower Union motors it can attain a speed of nearly 60 miles an hour. The gondolas provide for two engineers, wireless operator, pilots and four or five passengers.

The government's investment at Ross Field is steadily mounting, and will shortly pass the \$300,000 mark. Sometime during the latter part of the month General Patrick, chief of Air Service, is coming to make his first formal inspection of the air post. Elaborate entertainment is being planned in his honor.

HUB FREEMAN MOVES TO HIS OLD STAND

After occupying Baldwin avenue locations for a number of years, Hub Freeman has decided to take his billiard hall back to the original location on Mountain Trail avenue. This time he is not going to be subject to lease terminations or any such bothers but has bought the entire 50-foot frontage from Jos. Odwarker. The building occupies about half the frontage, the remainder being the lot formerly used as a burro corral by John Boyd. The property transfer was arranged by Frank E. Cox.

DID YOU EVER SEE A BUG
JUST LIKE THIS?

ASSISTANT MINISTER APPOINTED FOR BETHANY

Because of the constantly increasing congregation and its consequent needs, Bethany Church has appointed the Rev. Mr. Uri Fox as assistant minister to Dr. Rawlings. Mr. Fox is a college graduate and fully ordained Baptist minister and will ably assist in the manifold activities of Bethany Temple.

At the fully attended communion service on Sunday last two new officers were appointed, Mr. J. C. Needham as Elder and Mr. J. Montgomery as Deacon, thus giving Bethany nine substantial and experienced Elders and Deacons together with five trustees. At the same service several new members were received into the church.

Not only is the history of the church remarkable in its past achievements spiritually and numerically, but it continues to enjoy remarkable prosperity in all these ways. With no single unpaid bill, the Treasurer's report at the last business meeting showed between three and four hundred dollars balance on the right side.

Several new activities are to be launched within a few weeks according to Dr. Rawlings announcement on Sunday last.

WEDDING NEXT WEEK

Many Sierra Madre friends have received invitations to the wedding of Miss Miriam Lucille Whitworth and Mr. Douglas Saunders, which will take place on Saturday, May 20, in the Church of the Ascension. The event is one of great interest by reason of both being so well known here, though absent for some years past.

MONROVIA BIRTHDAY SATURDAY, MAY 20

Whole San Gabriel Valley Will Take Part in Festivities of the Day

All roads will lead to Monrovia on Saturday, May 20. On that day the Foothill City will celebrate her thirty-seventh anniversary. She has invited all Southern California to help her observe her birthday and take part in the festivities.

Responses to invitations sent out last week indicate that practically every city and community of the San Gabriel Valley will be represented in the morning floral parade. Prizes valued at more than \$1000 will be awarded the best floats in the different classes.

Here are some features of the day's program:

The morning floral parade starts at 10 a. m. and will include municipal and civic floats, decorated automobiles, bands, comic section and so forth and so forth.

At noon there will be a regular old-fashioned barbecue. Provision will be made to serve all who come.

The afternoon program will be Wild West sports and will feature Bob Anderson and his celebrated Universal City cowboys and cowgirls in rough riding, bulldogging and fancy roping contests.

The Merchants' Exposition and Midway will offer additional attractions. As a grand finale Myrtle Avenue, swept and illuminated for a great Monrovia's principal street, will be street dance.

Phone social items to Black 42—The News Office.

PERTINENT COMMENT

Now is an opportune time to press for action on the oft delayed comfort station on the Pacific Electric property at the corner of Baldwin and Central.

During the past week the facilities provided in the rear of the bank building, at the expense of the bank, have been put out of commission. Constant use by the general public, together with abuse by the throwing of newspapers and solid articles into the drain pipes have filled up one cesspool after another.

The bank officials say they cannot afford to maintain the place for the public use. Accordingly the owners of the other store buildings are putting in such facilities as they may require for the use of their own tenants. But it is understood none of these will be accessible to the public, as the responsibility and expense of a public comfort station is more than anyone cares to assume.

Evidently some provision must be made for the convenience of the general public, either by the city or by the railroad company. The latter has no provision for the needs of its own station employees. When the matter has been threshed out in the past it has always come back to the one conclusion—that it was up to the railroad company. It has in fact been promised. But something has always blocked or delayed action.

Now is the time to do something definite. City officials and Chamber of Commerce should get busy without delay and demand immediate results.

Wrestles With Spike Buck

Bruce McGill Pulls Off Unique Stunt In Catching Wild Animals

Bruce McGill bids fair to set a new record as the champion single handed game getter in the speedy animal class. A spike buck and a jack rabbit captured single handed and without weapons constitute this week's catch. May not sound plausible but it is vouched for by Bruce's uncle, W. J. Lawless who witnessed both performances.

The spike buck was one of three which wandered down into the Lawless orchard at the corner of Grand View and Sunnyside on Wednesday. As Mr. Lawless and his nephew went out to chase them away from some of the tender growing things which deer like to nibble, the deer separated. One ran toward the west fence, with McGill in pursuit. After a little dodging among the trees, McGill found himself face to face with the spike buck coming around a tree from the opposite direction. Throwing his arms around the animal's neck, he gave it a quick swing which threw the buck on its back, with feet in the air.

But, like lots of other things in life, when he had it the puzzle was, what to do with it. Inasmuch as the law would not let him keep it even if it were practicable, Bruce decided the simplest thing after all was to let it find its way back to the mountains. Asked how in the world he did the little stunt, he said it was just like they used to do with cattle on the ranch where he worked up north.

The jack rabbit stunt was of similar nature and occurred only the day before. Bruce was chasing the big bunny out of the garden and caught it as it ran back and forth trying to find a hole in the fence.

GARDEN HINTS FOR MAY

by Jesse Ward

Keep weeds and grass hoed down or spaded under. The lawn should be mowed close and Bermuda grass raked out as much as possible. Any bad spots in lawn should be dug up, filled in with new soil and seed sown. Give whole lawn a dressing of screened manure or commercial fertilizer.

Basins should be made around fruit trees and the basins covered with old leaves, grass or manure. This will conserve the water and fertilize the tree. Avacado trees must have this treatment, and lots of water. An avacado tree that is properly cared for will be a source of great pleasure and profit to you, providing you have a good variety to begin with. Avacado trees should be shaded with burlap while young.

Established trees and shrubs can now be planted with great success and as many of them are in bloom or in full foliage at this time it is a pleasure to choose the varieties you wish to plant.

Set out young plants of the following annuals now: Asters, zinnias, pansies and marigolds. Cannas, iris, dahlias, chrysanthemums, carnations, Delphiniums, verbenias, statice, geums, lantanas, begonias, shasta daisies, blue daisies, Marguerites, forget-me-nots, gazanias, plotycodon, hydrangeas, and geraniums.

As roses are blooming now, or about to bloom it is a good time to choose varieties for the rose garden. Established or potted rose bushes can be easily planted now. Some of the best varieties for cut flowers and continuous bloom are: Hoosier Beauty, Lady Hillingden, Sunburst, Los Angeles Radiance, La Tosca, Mamon Cochet, Kaiserine, White Cochet, Aphelia, Mrs. George Shawyer, Mrs. Charles Russell, Irish Fireflame, Irish Elegance, Mme. Edward Herriott, Mme. Abel Chateney, and Lady Battersea.

Bulbs that have finished blooming and have died down can be dug up now and stored away in a cool, dry place until fall when they can be replanted. The beds should be filled with summer annuals.

CERTIFICATE OF BUSINESS (Fictitious Firm Name)

The undersigned does hereby certify that he is conducting an automobile and garage business at 4 West Central avenue, in the City of Sierra Madre, County of Los Angeles, State of California, under the fictitious firm name of Central Garage and that said firm is composed of the following persons, whose names and addresses are as follows, to-wit: Joseph Belohlavek, 687 West Alegria St., Sierra Madre, Cal.

Witness his hand this 14th day of April, 1922.
JOSEPH BELOHAVEK.
State of California, County of Los Angeles, ss.

On this 14th day of April, in the year nineteen hundred and twenty-two, before me, Robert Mitchell, a notary public in and for said county, residing therein, duly commissioned and sworn, personally appeared Joseph Belohlavek, known to me to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same.

Witness my hand and official seal.
(SEAL) ROBERT MITCHELL,
Notary Public in and for said County and State.
Filed April 15, 1922.

Hardy spring blooming shrubs as spirea, lilac, etc., should be pruned just as soon as they finish blooming, to make shapely plants.

Old fern fronds of last season's growth should be cut off. Vacancies in the fern bed can be filled in with new ferns, begonias, forget-me-nots, or fuscias.

Frozen poinsettias should be cut to the ground. They will in most cases come up again from the roots.

Rose bushes should be dusted with sulphur to prevent mildew. If infested with plant lice, or aphids, spray new growth with "Black Leaf Forty," a nicotine solution.

The following fruit trees can be planted now: Oranges, lemons, loquots, guavas, figs, custard apple, or cherimoyaf and avacados.

CAN YOU WORK THIS TRANSFORMATION?

There is a lot of fun in changing one word into another by changing one letter at a time and never changing the word into anything that is not a true word. Of course, with enough changes, any word may be changed to another having an equal number of letters. The puzzle part of the problem lies in limiting the changes to the fewest possible.

Three changes are used in changing hen to cow. Here they are:

H E N
H E W
H O W
C O W

Hard to easy may be changed in five moves:

H A R D
C A R D
C A R T
C A S T
E A S T
E A S Y

Here is a problem for you to try, now that you know how easy the puzzle is: With how few changes can you change March into April?

Iron.
Iron is the essential element in the food of man and the higher animals, and the only effective way to take it into the system is not in the form of pills and tinctures, but by the consumption of vegetable food containing the mineral. So says an exhaustive study of the distribution of iron in various parts of plants made by L. Maquenne and R. Cerignell, whose report appears in the Comptes Rendus (Paris) of the French Academy of Sciences.

Albany Flooded by the Mohawk and Hudson Rivers

There have been serious floods both in the east and in the Mississippi river valley. At Albany the Mohawk and Hudson rivers overflowed their banks and scenes like this at Arch and Green streets were frequent.

Mountain Out of Molehill.
"To make a mountain out of a molehill," meaning to exaggerate, to magnify a danger or a situation unduly, has become a common phrase. But it is not taken from an old proverb or other popular sayings. The first to use it was the American writer, Henry Ellis (1777-1869), in his "Original Letters." The author is not very well known; his principal contribution to literature is almost forgotten.

Universal Belief in Charms
Do you carry a lucky piece in your pocket or wear a charm on a ribbon round your throat? If you do you have plenty of company. Belief in charms and amulets is one of the most deeply rooted of all superstitions and is constantly appearing on the surface of civilized life. Most any devotee of these trinkets and baubles will swear by them.

Old and Gray.
A woman and her niece were standing at the brink of the Grand canyon. Finally the woman spoke, "Do you know, my dear," she said, "I think the canyon is beginning to show its age. It's lots dirtier than when I was here six years ago."

Darning Loom.

Darning is made into a pleasant occupation, it is claimed, when done with a device recently introduced in England. The little darning machine consists of a flat stretcher which is placed behind the heel in the stocking, and over which is slipped a saddle that holds the stocking in place. The thread is wound back and forth over the hole on hooks on this saddle. A third piece, hinged on the saddle, hooks under every other thread and raises or depresses them alternately while a threaded needle is passed back and forth between them, as in weaving.

Whaleskin Valuable.

Whaleskin is so thick that it can be split into several layers, each as stout as ox hide, and it is excellent for making boots, bags, harness or belting. The usefulness of the whale in this respect is not confined to his outer skin. The stomach furnishes a leather as soft and as strong as the best kid. Another important thing about the whale is that the whole of his skin is good. The skins of cows, horses and other land animals furnish a comparatively small quantity of leather, for only certain portions of the hide are of the right quality.

The Hyacinth.

The hyacinth is like a balustrade placed upside down. A bed of hyacinths resembles a mass of balustrades. Thus that great invention of the renaissance, the balustrade, allows us to gain through it a glimpse of nature. This ray of art, the flower, this delicate inspiration, unknowingly requires the intelligence of men to develop its possibilities.—Auguste Rodin.

Totemism.

Totemism was, and still is, a system of tribal division among many primitive races of men, its origin dating back to the people of prehistoric times. Natural objects, usually an animal, bird, fish, or reptile, were taken as a totem, both for clans and individuals. The representation of individual totems in many regions of the earth was often painted upon the body, or painted or otherwise worked upon such possessions as blankets, skins of animals, utensils, and shields.

Jews Are a Nation.

Loosely, the term "Jews" means the Semitic nation that was earlier called Hebrews, Israelites, or the children of Israel; strictly, the term is applied to the people descended from the tribes of Judah and Benjamin. The Jews still remain a distinct people and retain their nationality.

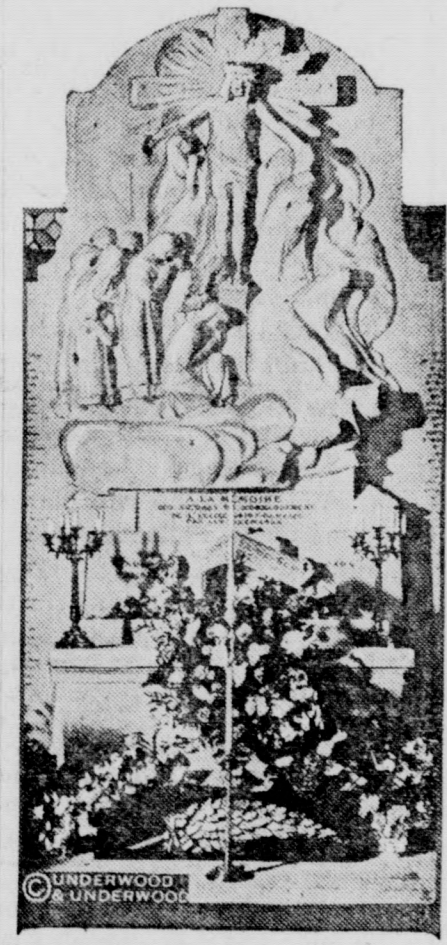

Observing Other Planets.

On the moon, as well as on Mars, there are many varied shades and tints of color to be seen; greens and blues, browns, yellows and reddish browns, as well as black, white and grays. A study of the color effects produced by our own vegetation and vast seas when viewed from great elevations may aid in an interpretation of the splashes of color that are easily observable on Mars and the moon.

Discoverer of Rubber Tree.

The rubber tree was discovered by a Jesuit missionary, Father Manoel de Esperanza. He found it while on one of his apostolic journeys among the Cambelas Indians of South America, and gave it the singular name of the seringueira, because he remarked that the savages used the sap of this tree, which hardens quickly to make rude bottles that were shaped like a syringe.

WAR HORROR MEMORIAL

This war memorial was recently dedicated in St. Gervais church, Paris, four years after a long range German shell struck the edifice during a Good Friday mass, killing many persons.

"One Big Union" Man Talks to Strikers

Ben Legere, organizer of the "one big union," addressing several thousand textile mill operators gathered on the common in Lawrence, Mass., center of the textile strike.

SCRAPS

Mt. Wrangell, Alaska, is 17,500 feet high. Alaska was discovered by Behring in 1741. An American historian asserts that Captain Kidd was not a pirate and that his fabled treasure does not exist.

A Swiss milkmaid with a musical singing voice obtains better wages than one who cannot sing, as a cow that is soothed with a pleasing melody during milking will, it is said, yield one-fifth more milk.

THIS FELLOW FLINTHAM

By John S. McGroarty in The Times Magazine

(Mr. Flintham, the subject of this sketch, will be the speaker before the May meeting of the Men's Community Club in the Congregational Church next Thursday evening, May 21.)

We wonder if this young fellow, Flintham, who holds the job of forester in Los Angeles county, felt his ears burning—burning so hot that he wanted to put ice packs on them—one night, not long ago?

You all know the old saw about your ears burning. It means that someone is talking about you.

Well, we were talking of Flintham that night in the green Verdugo Hills. Just a bunch of hill men talking about their county forester. Maybe the matter is of no importance. And then, again, maybe it is. It is hard to say just what is important in this world, and what is not.

Anyway, the event was unusual, even though it might not have been important. For we were praising and not "cussing" Flintham. And Flintham is a public official.

You don't often hear it—kind words from taxpayers for the fellow who spends the taxes.

The way the talk came up was that the man who plays the flute had been out over the old deer lick trail trying to see if he could get track of his pet badger which had mysteriously left home and had not reported himself for three days and three nights. And the man who plays the flute had gone clear down across the yon side of the hills looking for his badger.

And, by ginger, what does he see but his young fellow Flintham with a gang of men cutting and blazing great trails throughout the high ridges and blocking the whole hill country out like a checkerboard with the wide gashes he was making in the chaparral.

And the man who plays the flute had a talk with this young fellow Flintham about what the dickens he was doing. And Flintham said, by ginger, he is going to block off all the hills and mountains in the county with fire breaks like that. And when he gets through we will be able to head these mountain fires and hill fires off. We'll jump on them like a thousand of brick, Flintham said.

Now there's a fellow who is really doing something, said the neighbors, when they heard what the man who plays the flute told them. And the man who plays the flute was so excited over it, himself, that he forgot all about his pet badger.

My badger will come home when he gets ready, I guess, he said; and if he doesn't I will have to mourn his loss. But by ginger, if this young fellow Flintham wasn't doing what he is doing up in our hills and mountains, some time they would be burned bare as a bald head, and there would be nothing to hold the floods, and Los Angeles and all the towns down there in the lowlands would be buried fathoms deep under mud as Babylon and Nineveh were buried.

And that would be a danged sight more serious than losing a pet badger, said the man who plays the flute.

BY THE WAY

My Bonnie leaned over her gas tank
The depth of its contents to see,
She lighted a match to assist her,
Oh, bring back my Bonnie to me.
—Traveler's "Protection."

My Bonnie went out on the highway
Where gas carts are thick as can be.
She started jaywalking the traffic—
Oh, bring back my Bonnie to me!

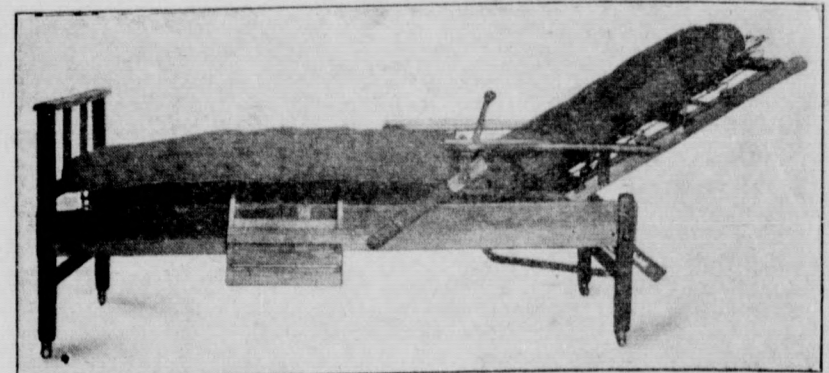

Over at the University of Southern California they are considering a compulsory course in domestic economy for co-eds. Male students are said to favor the idea. Some co-eds resent the implication that they are not competent cooks already. A football star says he would rather risk almost any kind of a battle rather than a co-ed's rolls. A co-ed replies that she can come as near the perfection of the rolls his mother made as he can approach the size of the roll her father made.

An Eastern editor who evidently goes to church suggests the cough drops be passed around with the collection plates. The sermon thus might be spared interruptions which make whole sentences devoid of meaning. Amen.

"Too much horsepower and too little horse sense forms a dangerous concoction," remarks the Whittier News. The horses ought to be thankful they are out of the way.

WOMAN'S CLUB NEWS

By Press Chairman, Mrs. Beese Palmer Rhodes.

Luncheon and Program

Following a most delightful luncheon served to club members and guests on Monday, May 8, under the supervision of Mrs. M. D. Wilsher, the several delegates to the state convention gave their reports. The president, Mrs. J. Milton Steinberger, after having given her own splendid report, told also of the sessions which were to have been covered by Mrs. E. C. Newton and Mrs. E. H. Carpenter, both of whom were unavoidably absent. The other delegates heard from Mrs. Frank Wright and Mrs. W. J. Lawless.

Mrs. J. A. Osgood described the luncheon at the Southwest Museum on Thursday, when the state and visiting officers were entertained by the Sierra Madre Woman's Club. The convention reports were most enjoyable and although necessarily long, were so comprehensively given as to hold the entire attention of the audience.

At the afternoon program, pleasing Mildred Jackson, of Pasadena, who, with her mother accompanying, sang pleasingly two groups of songs in costume. Mrs. E. T. Pierce of Pasadena formerly a resident of Sierra Madre, and a club member of years' standing, presented a very beautiful picture of "Springtime in England," in a paper, describing a May Day Festival witnessed by her on a visit to that country.

The nominating committee, unable to submit a complete report, requested the re-opening of nominations for president and vice-president, whereupon several new names were added to the working list already in the hands of the committee.

Before adjournment, Mrs. J. A. Osgood gave a short talk, calling the attention of the club members to their responsibility as members, urging upon them the necessity that each must assume her share of the club activity instead of simply availing herself of the opportunities afforded by the efforts of others.

Picnic Luncheon

The members of the Woman's Club who contributed so liberally toward financing the luncheon which was served to the state and visiting officers Thursday, May 4, may well feel proud of the manner in which the luncheon was prepared and served to the many delighted guests. An efficient corps of the club's women, having perfected every detail, the luncheon was a splendid and entirely successful achievement. The tables were decorated in the club colors with bouquets of California poppies combined with purple wild flowers, lupin predominating.

The tables were placed on the balcony of the museum, overlooking the mountains, where a wonderful view was accorded. Blue and gold place

cards, and most novel and attractive favors graced each place.

These favors were a gift of the Chamber of Commerce, and consisted of small dotted Kentia palms, each of which was wrapped in blue and gold crepe paper. At one end of the long table, at which little less than a hundred guests were seated, sat the club mother, Mrs. J. A. Osgood, and at the other the president, Mrs. J. Milton Steinberger, who, with a few well-chosen words, offered greetings from this club. Several attractive young matrons of the club cleverly capped and aproned in purple and yellow, gave efficient service as waitresses, and an added touch of life and color. So beautiful was the effect that many delegates who were not guests at the luncheon visited the balcony, just to feast their eyes, and many were the exclamations of delight and appreciation. Moving pictures of the scene were taken and are being shown at the California Theater, Los Angeles.

A Correction

A change has been made in plans for the regular club meeting of May 22. Instead of holding this meeting and having a picnic lunch at Southwest Museum, as per monthly bulletins the meeting will be held at the club house, and the election of officers for the ensuing year will be held.

WORTH KNOWING

The occupation of guide is followed by a large number of young women in Slam.

Oil pipelines now in operation in America are long enough to girdle the globe at the equator.

Tinned pig tongues, imported from America, have achieved a wide popularity for the midday lunch of British workmen.

As late as the fall of 1920 a high-grade mine of feldspar was discovered near Ottawa, Canada, and the material from this is nearly all used for the manufacture of high-tension electric insulators.

Negro Blood in Alexandre Dumas.

Alexandre Dumas, the great French romantic novelist, was born at Villers-Cotterets, Aisne, France, July 24, 1802. He died at Puy December 5, 1870. His father Gen. Alexandre de la Pallterie Dumas, was the natural son of the Marquis Alexandre Duvy de la Pallterie, a rich colonist of Santo Domingo, and of a negress whose name was Dumas.

Scrap Book for Child.

Mothers can make beautiful scrap-books for "the little ones" with pictures of all the things that children are interested in—trains and animals and bright colored flowers. Don't classify these pictures in pasting them in the book. Young children's minds don't work in an orderly way, and they will enjoy pointing to the many different kinds of things on one page.

Rather Gave Daddy Away.

A certain man is in the habit of dispensing with a coat, whether in winter or summer. During a cold snap he was traveling to town by train. Seated behind him was a small boy evidently much interested in the man's unusual attire. At last the child's curiosity overcame him and forgetting to be polite he asked loudly, "Daddy, is that man going to play ball?" Then came an admonition and a whispered explanation. The boy was still for an instant and then came the innocent inquiry, still in a loud tone, "Daddy what is a silly ass?"—London Tit-Bits.

Where to Educate.

Education week might try to do something for those persons who open every sentence with "Say, listen!"—Chicago News.

The inhabitants of Jutland are believed to be the most nearly genuine specimens of the old Danish stock.

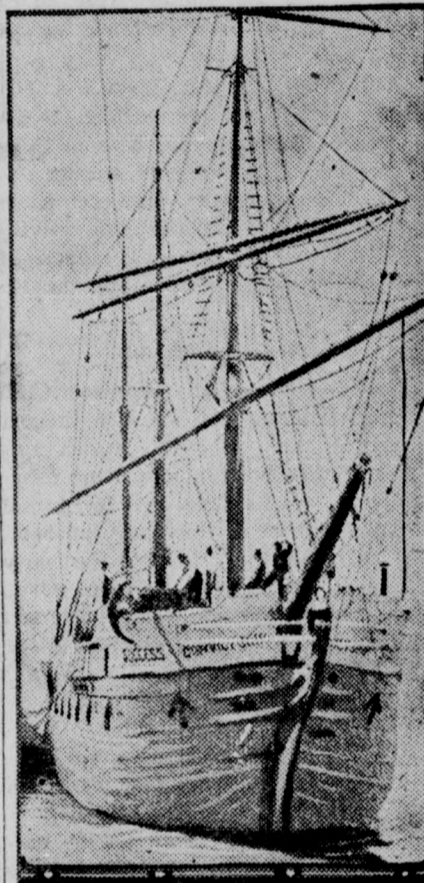

It is the habit of bees to place their honey in the coolest place in the hive, and the young insects in the warmest.

The gnat fashions its eggs in the shape of a lifeboat. You cannot sink them without breaking them to pieces.

February 28 was the one hundred and twenty-fifth anniversary of the birth of Mary Lyon, founder of Mt. Holyoke college.

The phrase "a feather in his cap," originated in an old custom in Hungary, which forbade any one to wear a feather in his cap unless he had killed a Turk.

OLD PRISON SHIP

The prison ship Success, perhaps the oldest ship afloat, built in 1790, left its mooring at the foot of West One Hundred and Twenty-ninth street, New York the other day and floated down the river to the Battery, where she docked. This ship is being used to show New Yorkers and visitors just how they took care of prisoners at sea in the old days.

Piston clearances /

4/1000 of an inch when cold
1/1000 of an inch under fire

An automobile engine having a 4" bore will have when cold a clearance between its pistons and cylinders of approximately 4/1000 of an inch. When the same engine has been heated to operating temperature, this clearance will have decreased 75%, or to 1/1000 of an inch.

Likewise, a main crankshaft bearing having a clearance of about 1 1/2/1000 of an inch when cold, will show a decrease in this clearance at operating temperature to less than 1/2/1000 of an inch.

All oils lose viscosity, that is, they become lighter in body when subjected to the heat of engine operation.

An analysis of Zerolene shows that the differences in its body at the various engine temperatures, from cold to operating temperature, follow in close relation the decrease in bearing clearances.

The right body at all operating temperatures

For this reason Zerolene oils have at all engine temperatures exactly the required body to splash and flow freely into the fast-moving, small-clearance bearings to provide an adequate film of lubricant.

Because of their "oiliness," Zerolene oils cling to bearing surfaces, and at the same time offer in themselves a minimum of resistance to the engine power going to the driving wheels. For this reason they give perfect lubrication and permit the development of the maximum power, speed and gasoline mileage of the car.

RADIO

THINGS BEGINNERS MUST LEARN FIRST

Explanation of Terms Used in Radio and of Its Basic Principles.

Due to the great interest taken in radio since broadcasting stations have been started, many radio terms are seen and heard that may be unfamiliar to the novice. Some of the most commonly used terms are explained and defined below.

Like light, heat and sound, radio energy is propagated in the form of a wave motion. Every one is familiar with the wave motion set up on the surface of a still body of water by the dropping of a stone into it.

Every time a point on the surface of the waves goes through a complete set of motions and starts to repeat those motions the wave is said to have gone through a cycle.

The number of complete cycles gone through per second is the frequency.

The human ear is responsive to sound frequencies up to a few thousand cycles per second but is not capable of responding to the higher frequencies encountered in radio. Arbitrarily a frequency of less than 10,000 cycles has been called an audible frequency—one which can be heard—and frequencies above 10,000 cycles, radio or inaudible frequencies—because they cannot be heard by the human ear.

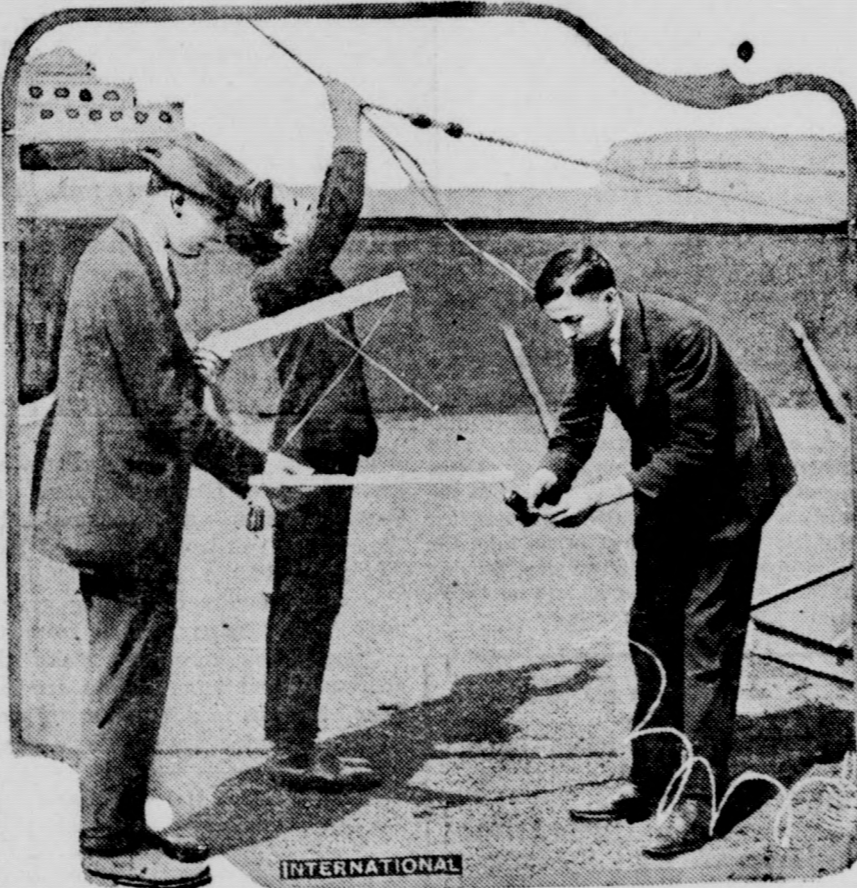

The particular type of wave which propagates radio energy is an electro-magnetic wave. All of us have seen bits of iron and steel attracted by the little toy magnets made up in the form of horseshoes. This attraction of the magnet for the bits of iron and steel showed the existence of a magnetic

The high-frequency current is known as the carrier-wave and its function is to radiate into space in the form of electro-magnetic waves and by its variation in amplitude carry with it the variation in the tone at the transmitting station.

It is the frequency of the carrier-wave that determines the wave-length on which a radiophone station is transmitted. By experiment it has been found that electro-magnetic waves travel at the same velocity that light waves travel, that is, 186,000 miles per second. Wave-length is the distance between any two similar points on two successive waves; for example, the distance from crest to crest of any two successive waves in the same direction, measured in meters, a unit of length equal approximately to one and one-tenth yards. Converting 186,000 miles to meters, the equivalent is 300,000,000 meters. The length of an electro-magnetic wave is equal then to 300,000,000 divided by the frequency. Suppose a station was transmitting on a wave-length of 360 meters. The frequency of the carrier-wave would be approximately 835,000 cycles.

Just as a violinist tunes his instrument, that is, makes a certain string emit a note of higher or lower pitch, or, technically speaking, a sound wave of higher or lower frequency, by adjusting the tension on the string, so may the electrical constants of the antenna circuit of a radiophone transmitter be changed in order to have the station emit a carrier-wave of a different frequency.

If a tuning fork having a natural period corresponding to middle C be placed near a violinist who is playing, the fork will vibrate when the musician plays middle C, but all other times it will remain quiescent. This phenomenon of the tuning fork vibrating whenever the musician plays the corresponding note on the violin is known as mechanical resonance. If a radio receiver be adjusted so that electrically its natural period of vibration will be 835,000 cycles (360 meters wave-length) every time a station transmits on a wave-length of 360 meters, current will be set up in the receiver by

Amateur Radio Operators Erecting Aerial on the Roof.

field about the tips of the magnet and this same kind of a field propagates the electro-magnetic force, except that unlike the toy magnet, its power comes off in the form of wavy motions. This electro-magnetic force propagates radio energy in all directions.

The medium that transmits the electro-magnetic waves is the same medium that transmits light—the ether. This medium is supposed to fill all space, even that occupied by fluids and solids. Little is known about its properties.

In radio it is more common to speak of wave length than frequency. The wave length of any wave motion is the distance between any two successive crests in the same direction. The wave length depends upon the frequency. If the frequency is high the wave length is short. On the other hand if the frequency is low the wave length is long. Numerically the wave length is equal to the distance traveled by the wave in one second divided by the frequency. Suppose, for example, that it were desired to know the wave length of an electro-magnetic wave having a frequency of 835,000 cycles. Electro-magnetic waves travel at the same speed as do light waves, that is, 186,000 miles per second. Dividing the 186,000 by 835,000 the wave length would be .223 miles or 396 yards. In radio work it is measured in meters. A meter is equal to approximately 1.1 yards. Converting 396 yards into meters the wave length would be 366 divided by 1.1 or 360 meters. This is the wave length on which KDKA operates. It also means that the electro-magnetic waves sent out from this station have a frequency of 835,000 cycles.

FUNDAMENTAL PRINCIPLES

In a radiophone transmitter there are two requirements that must be fulfilled. First, there must be a source of high-frequency current, say, between 15,000 and 1,500,000 cycles so connected to an antenna and ground system that energy in the form of electro-magnetic waves will be radiated. Second, there must be some method of controlling this high-frequency current or modulating it so that the variations in the amplitude of the high-frequency current will be directly proportional to the voice or music to be transmitted.

How One Editor Uses Radio.

The editor of a paper in an isolated town in the northwest is using the radio in a most ingenious and effective way. An amateur radio friend in a big city 50 miles away buys the latest editions of the city papers as soon as they are off the press, reads the best news into his transmitter, and a typist in the country office copies the news as it comes in over the office receiver. The editor, through this ingenious plan, is always "First With the Latest" in his home town.

Delicious Sundaes

THE PUREST AND CREAMIEST CRESCENT ICE CREAM COVERED WITH A LIBERAL HELPING OF YOUR CHOICE FLAVOR AND YOU HAVE A DISH THAT IS BOTH SATISFYING AND REFRESHING.

Only the purest ingredients are used in making our Cream and Flavors so they are healthful as well as delicious.

J. E. Thompson has been able to walk down town the last day or two but his injured foot is still too painful to permit him to resume the carrying of mail.

Mr. and Mrs. J. E. Fehd, formerly of Glencoe, Ills., have purchased the place known for years as the Burrell home, from W. C. MacNaul, and will make it their home.

Miss Mary A. Stanley who has been spending the winter at the home of her brother, C. F. Stanley of 126 East Mira Monte, left on Tuesday for her home in Chautauqua, N. Y.

MONROVIA LODGE, B. P. O. E. No. 1427

Meets every Monday night at K. P. Hall, South Myrtle Avenue.

Initiation second and fourth Mondays.

Elk's Dance, Friday, May 26th.

Starvation on Sunday.
The medical correspondent of a prominent London paper attributes much of the illness of the world to the custom of hearty eating on Sunday, the day on which most of us take the least exercise. He advocates Sunday as a day of abstinence and says we would all be better for it.

Mr. and Mrs. S. R. Norris have returned home after spending a week in their cottage at Seal Beach. On Sunday they entertained friends and relatives to the number of twenty.

Mr. and Mrs. Victor C. Hill were guests of honor at a dinner party last Friday evening at the home of Dr. and Mrs. Virgil McCombs of South Oxford Boulevard, Los Angeles. Mr. and Mrs. George B. Morgridge were among the guests.

The Ladies Aid Society of the Congregational Church will hold their regular monthly social meeting at the home of Mrs. Rust, 382 N. Auburn on Tuesday, May 16. There will be arrangements made to call for people who live too far to walk.

John G. Cox is at home after a year of work at San Fernando academy. His father, Frank E. Cox, went over Monday evening to attend the commencement exercises.

Mr. and Mrs. Thomas H. Flather entertained with a dinner party on Tuesday evening, their guests being Mr. and Mrs. Mark Rademacher of San Francisco, Mr. Edward Banker of Chicago, and Mr. and Mrs. H. I. Hawhurst. Mr. Banker is vice-president of the Sperry and Hutchison Co.

DELEGATES RETURN FROM CONVENTION

Rev. W. J. Thompson and Howard Hill returned Wednesday from San Bernardino where they went as delegates of the First Congregational Church to the semi-annual conference of Congregational Churches of Southern California. They were entertained at the home of Mr. and Mrs. O. A. Peterson.

TICKETS FOR BENEFIT CONCERT ON SALE

Tickets for the concert to be given at the Woman's Club house, Friday, the 26th inst., are on sale at the office of the Southern California Edison Electric Company, Kersting Court, in charge of Mrs. Chalmers. The concert is being given for the benefit of the local chapter of the Red Cross. Tickets are one dollar each; Children half price. A splendid program will be presented, with Prof. Hague Kinsey as pianist.

WATER SHUTOFF NOTICE

Residents of Baldwin, Auburn, and Lima, north of Grand View, and east Carter Avenue, are warned that their water will be shut off next Monday from 8:30 a. m. to 4:30 p. m. Necessary repairs to the big gravity main which brings water from the canyon to the reservoir, make this necessary, and householders are cautioned to draw in advance a sufficient supply of water for the day's needs.

Wind Waits Not on Reason.

One thing the good Lord may do occasionally, but certainly does not do very often, is to combine in one of His creatures a brain of the highest quality and a voice of great carrying power.—Ohio State Journal.

CANYON RESIDENTS WITHOUT WATER

Some of the residents of the upper part of Sierra Madre canyon have been deprived of water supply by the breakdown of the pump in the well recently turned over to the city as a part of the Mann system. Water Superintendent Tom Henderson did his best to meet the emergency by transferring a motor and booster pump from the reservoir on E. Mira Monte Avenue. The equipment was duly installed but cannot be put into operation until a suitable transformer is installed on the electric power line. The old motor used 220-volt current while the new outfit requires 440 volts. As soon as the necessary change can be made the pump will be started and service resumed. A portion of the canyon residents are served with gravity water flowing from the city pipes in the upper part of the canyon. The houses which have been without water are situated so high they can be served only by way of the hillside reservoir.

THOMPSON-MERRITT

Bethany Temple was the scene of a pretty wedding on Wednesday when Miss Ella Thompson of Los Angeles became the bride of Mr. Thomas Merritt of Glendora. The ceremony was performed by the Rev. B. Dudley Snudden of the Methodist Church of South Pasadena, assisted by Rev. Uri M. Fox, assistant pastor of Bethany. Beautiful decorations were arranged by Mr. and Mrs. Earl Merritt, cousins of the groom. Mr. W. C. Peirce sang "One Fleeting Hour," and Mrs. H. Reeve Darling of Glendale sang "All For You." The bride was attended by her sister, Miss Bessie Thompson of Los Angeles, Mr. Harold K. Needham of Highland Park acted as best man. The bride has been a student of the Southern California Bible School at Highland Park the past two years, where she will be missed by a wide circle of friends. The groom is a well known auto dealer. After enjoying a honeymoon at Balboa they will make their home in Glendora.

DR. SUTHERLAND TO SPEAK

The P. T. A. are so fortunate as to have secured Dr. Sutherland to speak to the fathers and mothers Tuesday evening, May 16 at 8 p. m. in the kindergarten building. Dr. Sutherland is head of the psychology and research department of Los Angeles City Schools; a most able and interesting speaker and it was only by insuring him a full house that he would consent to come.

The musical program is as follows:
Trio—"Serenade" Tittl
"The Waters of Minnetonka" Lieurance
Mrs. Glidden Cornet
Mr. Ray Rockwood Clarinet
Miss Evans Piano

Mr. Rockwood has invented the instrument he plays, a combination of clarinet and oboe; his is the only one of its kind with such a range of tone and tone quality.

After the program a social hour and refreshments will be enjoyed.

HIGH POWER POLES NOT FOR RADIO USE

Radio fans, in their anxiety to get into the air, frequently attach their aerials to power poles, according to R. E. Cunningham, in charge of the Edison distribution lines. This practice is extremely hazardous, Cunningham says, and may lead to serious injury and even death, if the aerials are brought too close to the high voltage power lines.

The Edison inspectors are ordering all aerials removed from their poles as fast as they are discovered, and the radio enthusiasts can save themselves from a lot of trouble as well as possible danger by observing Mr. Cunningham's suggestion.

COUNTY FORESTER TO BE CLUB SPEAKER

Stuart J. Flintham Will Talk Before Men's Club Next Thursday

Work of Stuart J. Flintham, county forester of Los Angeles County, has been attracting much attention and interest. His efforts to prevent fires and to accomplish reforestation have been followed by all who are interested in outdoor life, public safety and the conservation of water.

Mr. Flintham has been secured as the speaker at the May meeting of the Men's Community Club next Thursday evening, May 18. The usual club dinner for the men will be served at 6:30 p. m. This will be followed by the open program at 7:30 to which the ladies and children are admitted. In addition to Mr. Flintham's talk there will be musical numbers of interest.

ROSS FINDS TOWN IS QUITE DIFFERENT PLACE

Fred B. Ross, superintendent in charge of garage and hotel service for the Automobile Club of Southern California, called on the editor Thursday to renew old acquaintance.

In the years when Mr. Ross was manager of the Mountain Wilson Hotel and all the hotel guests and supplies travelled by way of Sierra Madre and the old trail, Mr. Ross was a well known figure on Sierra Madre streets. He has not changed in the last six or eight years unless it is to appear a little younger. After leaving Mt. Wilson Mr. Ross embarked in the hotel business in Santa Barbara, being put out of business by a fire. For several years he has been engaged in automobile club work and is living in Los Angeles. He remarked on the great changes apparent in Sierra Madre since the old days and especially the absence of familiar faces from the streets.

MRS. GRAHAM PASSES AWAY

Mrs. Hannah Z. Graham, a revered resident of Sierra Madre, passed away Monday at the home of her daughter, Mrs. Greer Caskey. Mrs. Graham was born near Fredericktown, Ohio, November 16, 1836. She was married in 1861 to V. L. Graham, who passed away only a few months ago. They moved from Ohio to Missouri about 1871, where they resided until 1893 when they came to California. Since that time they lived in Sierra Madre, bearing the love and respect of the entire community. Of their three children, a daughter died in infancy, and their only son, John J. Graham, passed away in 1916. Funeral services were conducted on Wednesday by Rev. W. J. Thompson of the Congregational Church, of which Mrs. Graham and her husband had been faithful and active members ever since their arrival in Sierra Madre.
