LET'S DO AN EXPERIMENT

- Which material do we need?

.....

.....

.....

.....

.....

.....

.....

- Read and list in the correct order the following steps as we did with the materials:

To represent the nose and ears, pinch small portions of soil and tie with small rubber bands.

First we take a thin sock and we put grass or millet seeds inside, at the tip.

Now we can glue the eyes using some buttons and paint a friendly smile with permanent markers.

Then just fill the sock with good soil and make a knot. Turn the sock because the knot remains down.

If everything goes well, very soon will grow long green hair.

We put our doll on a tray or pot and remember to water it every day.
