

Best of Wikimedia Commons 2014 Wall Calendar

Best of Wikimedia Commons 2014

What is Wikimedia Commons?

Wikimedia Commons is a media file repository making available public domain and freely-licensed educational media content (images, sound and video clips) to everyone, in their own language. It acts as a common repository for the various projects of the Wikimedia Foundation, but you do not need to belong to one of those projects to use media hosted there. The repository is created and maintained not by paid archivists, but by volunteers.

Launched on 7 September 2004, Wikimedia Commons hit the 1,000,000 uploaded media file milestone on 30 November 2006 and, as of 3 January 2014, contains 19,818,368 files and 113,868 media collections. Wikimedia Commons uses the same wiki-technology as Wikipedia and everyone can edit it. Unlike media files uploaded to other projects, files uploaded to Wikimedia Commons can be embedded on pages of all Wikimedia projects without the need to separately upload them there.

Unlike traditional media repositories, Wikimedia Commons is free. Everyone is allowed to copy, use and modify any files here freely as long as they follow the terms specified by the author; this often means crediting the source and author(s) appropriately and releasing copies or improvements under the same freedom to others. The license conditions of each individual media file can be found on their description page. The Wikimedia Commons database itself and the texts in it are licensed under the Creative Commons Attribution/Share-Alike License.

What is a featured picture?

Featured pictures are images that the community has chosen to be highlighted as some of the finest on Commons. There are, as of 3 January 2014, 5,769 of such images in the Commons repository, which is roughly 0.029% of the available images (19,818,368). Images may be considered for featured status by being listed at the Featured picture candidates page, where the community will reach a consensus.

The annual Picture of the Year competition is an event where the images that became Featured Pictures during the last year are voted on by members from all Wikimedia projects, to produce a single Picture of the Year. Wiki Loves Monuments (WLM) is a public photo competition around cultural heritage monuments, organized by Wikimedia chapters and groups. This calendar contains a selection of the winners and finalists from these two competitions.

Who made this calendar?

This calendar was compiled and laid out by User:Antony–22 using media available at Wikimedia Commons under various free content licenses. Each photograph is individually available under the specified licenses by accessing <http://commons.wikimedia.org/> and typing the specified filename (including the "File:" prefix) into the search box. This calendar may be downloaded in its entirety at "File:Best of Commons 2014.pdf". This calendar is not an official publication of, and has not been endorsed by, the Wikimedia Foundation.

Copyright and licensing

Wikimedia Commons only accepts free content, that is, images and other media files that can be used by anyone, anytime, for any purpose. The use may be restricted by issues not related to copyright, though, such as trademarks and personality rights, and the license may demand some special measures. Wikimedia Commons tries to ensure that any such restrictions are mentioned on the image description page; however, it is the responsibility of reusers to ensure that the use of the media is according to the license and violates no applicable law.

Wikimedia Commons only accepts media that are explicitly freely licensed, or that are in the public domain in at least the United States and in the source country of the work. Wikimedia Commons does not accept fair use justifications. Media licensed under non-commercial only licenses are also not accepted. The license that applies to an image or media file is indicated clearly on the file description page using a copyright tag.

Most of the content of this calendar is licensed under at least one of the following free licenses:

Creative Commons licenses

In the Creative Commons Attribution-ShareAlike license (CC-BY-SA), re-users are free to make derivative works and copy, distribute, display, and perform the work, even commercially. When re-using the work or distributing it, you must attribute the work to the author(s) and you must mention the license terms or a link to them. You must make your version available under CC-BY-SA.

More information: <http://www.creativecommons.org/>

GNU Free Documentation License (GFDL)

Re-users are free to make derivative works and copy, distribute, display, and perform the work, even commercially. To comply, (a) release your version under the GFDL, (b) credit all the authors or content creators, and (c) include a complete copy of the GFDL. In the case of derivative works you must also include the complete history section.

More information: <http://www.gnu.org/copyleft/fdl.html>

Free Art License (FAL)

The Free Art License, a free license published by Copyleft Attitude, can be applied to digital as well as to non-digital art. With this Free Art License, you are authorised to copy, distribute and freely transform the work of art while respecting the rights of the originator. The FAL is recommended by the Free Software Foundation: "We don't take the position that artistic or entertainment works must be free, but if you want to make one free, we recommend the Free Art License."

A yak near Yamdrok Lake, Tibet. It is a long-haired bovine found throughout the Himalayan region. Due to limited arable land, the primary occupation of the Tibetan Plateau is raising livestock, such as sheep, cattle, goats, camels, yaks, dzo, and horses.

On August 31, 2012 a long filament of solar material that had been hovering in the sun's corona erupted out into space. The coronal mass ejection traveled at over 900 miles per second, and caused aurora to appear on the Earth. This is a blended version of the 304 and 171 Å wavelengths.

High-speed photography of a light bulb shot with an airsoft pistol. Because of the low energy of the projectile, the bulb burst and only a few fragments were swept away. This gives the impression that the bulb is exploding. The scenery was "frozen" with flash lamps which had flash durations of 1/6000–1/8000 of a second. The threaded base on the bulb was added later by digital photo editing.

Best of Wikimedia Commons 2014 Wall Calendar

This calendar consists of winners and finalists from the annual **Wikimedia Commons Picture of the Year** and **Wiki Loves Monuments** competitions. Wikimedia Commons is a media file repository making available public domain and freely licensed educational media content (images, sound, and video clips) to everyone, in their own language. It acts as a common repository for the various projects of the Wikimedia Foundation, and contains 19,818,368 files and 113,868 media collections as of 3 January 2014. Unlike traditional media repositories, Wikimedia Commons is free. Everyone is allowed to copy, use and modify any files here freely as long as they follow the terms specified by the author.

This calendar features contributions from:

- Dennis Jarvis (User:Archer10)
- Mila Zinkova (User:Mbz1)
- Eric Pouhier (User:Eric Pouhier)
- David Gubler (User:Kabelleger)
- Pranav Singh (User:Pranav7)
- Pierre Dalous (User:Kookaburra 81)
- NASA Goddard Space Flight Center
- User:Rufustelestrat
- Stefan Krause (User:Ritchyblack)
- Коряков К.М. (User:KoMiKor)
- U.S. Farm Security Administration, Office of War Information Collection
- Serge Ouachée (User:Butterfly austral)
- Picture of the Year ribbon logo by User:LadyofHats
- Calendar grid design by Nevit Dilmen (User:Nevit)
- Selection and layout by User:Antony–22

This calendar is available under a CC-BY-SA 3.0 license, except for the September photograph, which is available under the Free Art License. This calendar is not an official publication of, and has not been endorsed by, the Wikimedia Foundation.
