1. The attached request for machine tools for installation in Building 401 at Kisarazu Air Base is returned for further justification. The machine tool requirement is considered excessive for the mission of Kisarazu, particularly the indicated requirement for lathes and drill presses. The number of milling machines also appears excessive.

2. Request that this requirement be reevaluated and returned to this Headquarters for approval.

1. Reference preceeding indorsement, the indicated requirement for lathes, drill presses and milling machines has been thoroughly reviewed and reduced to what is considered a minimum requirement commensurate with the mission of a proposed iarcraft repair function at Kisarazu Air Base.

2. Justifications for the machine tools listed on Inclosure one (1) are as follows:

a. Facilities of the 13th Maintenance Group are inadequate to properly perform its mission. As additional depot maintenance facilities are required, it is contemplated that rehabilitation of certain facilities for the expansion of the mission of Kisarazu to include the repair and/or depot modification of aircraft, in addition to the erection of aircraft.

b. An Aircraft Repair Squadron, Depot, manning this function will consist of 250 airmen, 11 officers and approximately 390 indigenous personnel for augmenting the supporting shops as required.

3. It is estimated that approximately 50 % to 60% of machine tools will be required to support initial operations, however, it is anticipated that the workload will continue to expand, requiring all of the equipment as listed on the inclosure.

SUBJECT : Request for Help in Early Authorization for the Use of the Reparations Machinery and Equipment

1. Some time ago we filed an application for movement and authorized use of the designated reparations machinery and equipment for the Tokyo Metropolitan Industrial Upper Secondary School Engineering Joint Laboratory with the General Headquarters, Supreme Commander for the Allied Powers, but with the end of the current fiscal year at hand we are now under necessity of using the fund appropriated for those machinery and equipment. So it is requested that you are kind enough to take trouble to urge the authorities concerned to give us permission to use those machinery as soon as possible.
