GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS
15 FEBRUARY 1946

SUPPLEMENT NO. 1 TO

PROGRESS OF DEMOBILIZATION OF THE JAPANESE ARMED FORCES

Previous issues of "Progress of Demobilization of the Japanese Armed Forces," dated 1 October and 1 November 1945, have reported the gradual transition of personnel of the Japanese Forces from military to civilian status. During the period covered by these publications, Japanese Forces within the Empire shrank to a remnant of their former size. As a supplement to the series, the 15 February volume records additional progress towards completion of demobilization, subsequent to 1 November 1945. In the case of the Japanese Army and Navy Air Forces, several final reports have been included.

The basic source of this series of reports is "Documents Furnished to the Supreme Commander for the Allied Powers by the Japanese Mission to Negotiate Surrender" (ATIS translation, 21 August 1945), delivered at the pre-surrender conference at Manila, 18 August 1945. Data contained therein have been subsequently amended and amplified by periodic reports from the Liaison Committee for the Japanese Armed Forces; from the Occupation Forces: Ground, Air, and Navy; and more recently, by reports from the First Demobilization Ministry (Army) and the Second Demobilization Ministry (Navy).

See AR 380—5, 15 March 1944, and Standing Operating Procedure Instructions No. 14, 14 March 1944, regarding security classifications.

CONFIDENTIAL

PROGRESS OF DEMOBILIZATION

OF

JAPANESE ARMY FORCES

On 1 November 1945, the strength of the Japanese Army in the home islands had been 97% demobilized. As of that date, only five tactical units, ie., 64th IMB, 67th IMB and the 25th, 41st and 44th Signal Regiments (handling communications) remained to be demobilized (see Enclosure 1, "Progress of Demobilization of Japanese Armed Forces, 1 November 1945"). By 1 December 1945, at which time the Japanese War Ministry became the First Demobilization Ministry and all remaining military personnel in the Empire assumed civilian status, the percentage figure for demobilization had risen to 98.6%. The cumulative progress of demobilization to date is set forth on the accompanying graph.

On 1 December 1945, there remained in the employ of the First Demobilization Ministry 10,232 former military personnel (this figure includes 2,294 members of the 64th IMB which was still isolated on Tokunoshima, Ryukyus) and 26,364 civilian employees or a total employee strength for the First Demobilization Ministry of 36,596. During the month of December 1945, 6,349 persons were dropped from the employment roles of the Ministry. During the month of January 1946, an additional 2,428 were discharged.

As of 1 February 1946, there remained in the employ of the First Demobilization Ministry 27,819 persons. Of this number, 6,966 had been in military service on 18 August 1945. 98.9% of all persons, military and civilian, employed by the War Ministry on 18 August 1945 had been discharged by 1 February 1946 and only three tenths of one percent of the military personnel of the Japanese Army as of 18 August 1945 were still employed but now in a civilian status only. For distribution, see Enclosure 3.

A continuous gradual reduction in the strength of the First Demobilization Ministry is anticipated as the occupation forces take over more Japanese military stores and the burden of repatriation and final disposition of Japanese POWs returning from overseas lessens. It is contemplated that on 1 April 1946, the First Demobilization Ministry will be dissolved and a smaller bureau of the Japanese Government will be established to handle the remaining affairs and to carry out directives concerning military affairs from SCAP. This is in accordance with the long range plan submitted by the Japanese in September 1945 which was published as Enclosure 14a of "Progress of Demobilization of the Japanese Armed Forces, 1 October 1945." For organization of the First Demobilization Ministry, see Enclosure 2.

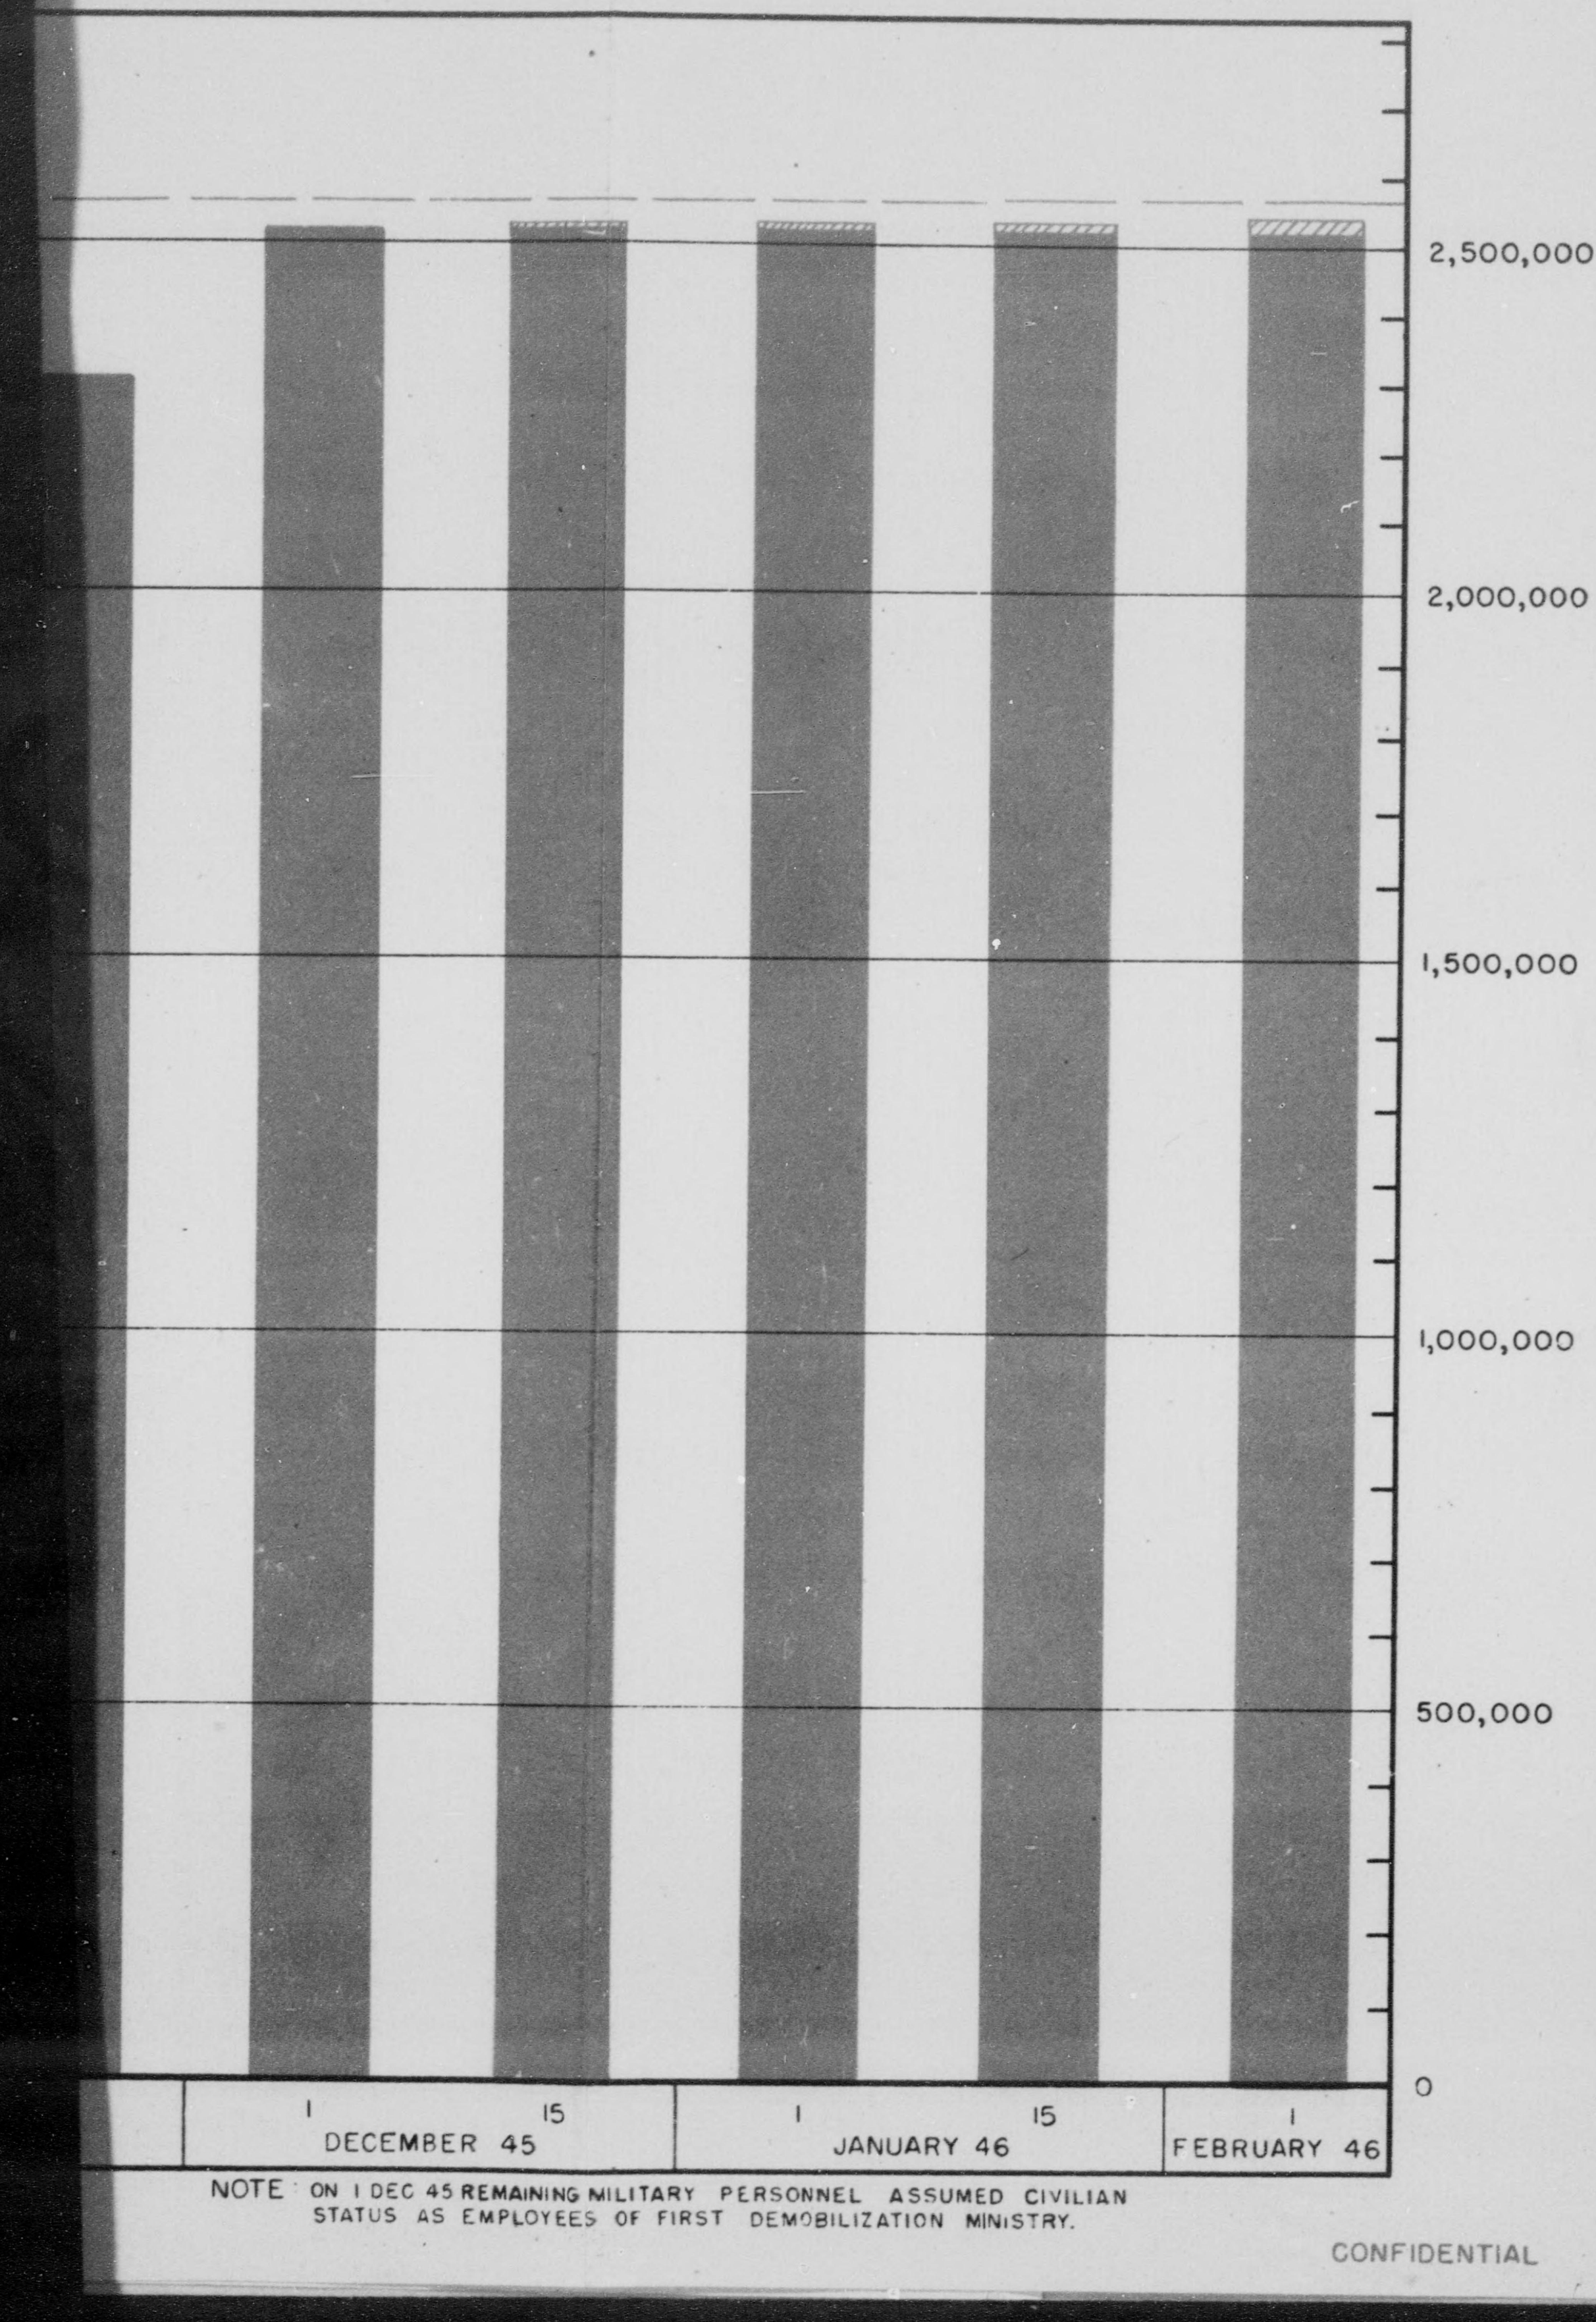
FORCES



NOTE: ON 1 DEC 45 REMAINING MILITARY PERSONNEL ASSUMED CIVILIAN STATUS AS EMPLOYEES OF FIRST DEMOBILIZATION MINISTRY.

(To accompany Encl 2)

CONFIDENTIAL

ORGANIZATION OF FIRST DEMOBILIZATION MINISTRY

The Japanese War Ministry together with its subordinate agencies and organizations was demobilized on 30 November 1945 and newly established on 1 December 1945 as a civilian organization, the First (Army) Demobilization Ministry. All military personnel on the active list (active duty) in Japan Proper were demobilized as of 30 November 1945.

Officials of the First Demobilization Ministry and its subordinate organizations have the status of civil officials. In order to meet expeditiously and accurately the requests of SCAP, key personnel were appointed from among the demobilized military personnel. In addition, certain former Officers and Enlisted Men were retained as civilian employees to carry out investigation and guard military stores and munitions (for numbers and location of these personnel, see Encl 1 & 3).

The former Demobilization Headquarters of the War Ministry and Army District Headquarters were reconstituted as the Demobilization Liaison and Demobilization Control Offices respectively. Division District Headquarters were abolished and reconstituted as branch offices of the Demobilization Control Office. Regimental District Headquarters became Local Local Assistance Sections.

Assistance

The function and duties of the First Demobilization Ministry and its bureaus are in general: 1) To supervise and control subordinate agencies, 2) Repatriation and demobilization of Japanese troops returning from overseas, and 3) Liaison with SCAP to include investigation and research on military history and technical matters.

Sixteen Remaining Affairs Offices comprise the Remaining Affairs Department under the First Demobilization Ministry. The offices were established one for each Supply Depot and to replace the former head offices for Army Ordnance, Aviation Munitions, Clothing, Fuel, etc. The duties of the Remaining Affairs Offices are to wind up the business of the Supply Depots (inventory and turning over to occupation forces) and to assist in investigations and research as required by SCAP.

The Demobilization Communications Office handles communications with Japanese units overseas and between agencies of the Demobilization Ministry.

The Demobilization Intendance Office handles appropriations, accounts and settlements and audits for the Ministry.

The Demobilization Control Office supervises control of the Local Assistance Sections, transfer of munitions to occupation forces and is charged with liaison matters between offices of the Ministry. Its branch offices handle the transfer of munitions and other local demobilization matters. Local Assistance Sections handle the affairs of homecoming repatriates. One section is located in each Prefecture with four sections for Hokkaido. Repatriation Stations, also under the Demobilization Control Office are charged with the demobilization of Japanese POWs returning from overseas and are located at the ports of entry.

Function

The Home Depot Affairs Office keeps records on overseas personnel and allots separation allowances.

A Demobilization Liaison Office is maintained to handle liaison matters between Eighth Army and the various offices of the Demobilization Ministry.

For organization chart of the First Demobilization Ministry, see Encl 2.

LOCATIONS AND STRENGTHS--OFFICES OF FIRST DEMOBILIZATION MINISTRY

Map Enclosure No. 3 shows the totals by location of the employees of the First Demobilization Ministry as of 1 February 1946. The table below lists the installations of the First Demobilization Ministry together with their strengths as of 1 February 1946. It will be noted that for administrative facility, offices are maintained at former Army, Division, and Regimental District Headquarters. In addition, there are detention houses, repatriation stations and depots. The depots contain military stores which have as yet not been taken over by the occupation forces. The concentrations of strengths in the Central, West Central, and Western (Kyushu) Districts are due to the fact that most of the ports of entry for Japanese POWs returning from overseas are located in these areas.

STATUS OF SURRENDERED ARMAMENT
Japanese Weapons collected by the U.S. Armed Forces in Japan and Korea

Weapons collected, regardless of source, are listed below. Such totals of weapons found in the area occupied by our forces naturally include many naval weapons (especially automatic weapons); another class consists of aircraft automatic weapons, taken from aircraft, and emplaced around airfields. Because of the very wide diversity of the weapons, they are listed in general categories.

Figures are compiled according to last reports which include weapons collected to 1 January 1946. See: Appendix and accompanying map, Japan Section, "Progress of Demobilization of the Japanese Armed Forces 1 November 1945".

WEAPONS	Collected by:			
	EIGHTH ARMY	SIXTH ARMY	XXIV CORPS	TOTAL
Bayonets	629,636	1,121,308	147,931	1,898,875
Rifles & Carbines	807,700	1,174,328	155,950	2,137,978
Pistols & Revolvers	21,804	40,585	4,927	67,316
Mortars & Grenade Dischargers	22,847	96,543	2,565	121,955
Automatic Weapons (a)	61,055	115,079	4,244	180,378
Field Artillery (b)	5,286	4,571	763	10,620
Coast Defense Artillery (c)	318	1,271	167	1,756
Antiaircraft Artillery (d)	841	8,251	10	9,102
Rocket Launchers (e)	1,370	2,837	175	4,382
Tank Guns (Dismounted)	90		57	147

(a) Includes submachine guns, light machine guns, heavy machine guns, and automatic cannon and antitank cannon and rifles.

(b) Includes battalion guns, mountain guns, and antitank guns.

(c) Emplaced weapons of all descriptions, up to 400-mm.

(d) High-angle cannon, 75-mm to 150-mm.

(e) 79-mm up to 400-mm.

OVERSEAS AREAS
DEMOBILIZATION SUMMARY - DISARMAMENT AND REPATRIATION
(To include data available to 10 Feb 46)

U.S.S.R. Area of Responsibility.

Complete figures on Japanese military status in this area are non-existent. However, some information has been obtained from the Japanese. A few reports, from a variety of sources and unsubstantiated, indicate mass movements of Japanese troops within the area, large groups fleeing to the hills and refusing to surrender, and many soldiers being pressed into labor service. Recently the Soviets requested assistance from American forces in the repatriation of Japanese, though no specific details were disclosed.

The Chinese Nationalist forces are gradually assuming control in Manchuria, but no definite date has been set for formal transfer of responsibility. A few key cities are now in the hands of the Chinese, but the Soviets are the predominant force in the area. When the National government has taken over complete authority throughout, more information on the Japanese military status in Manchuria will probably be available.

American Area of Responsibility - AFPAC.

Disarmament and repatriation of Japanese forces in the American area is continuing at a rapid rate. Troops in South Korea are almost 100% disarmed and repatriated, in addition, civilians in this area are 97% repatriated.

Japanese military strength in the Ryukyus is 100% disarmed and approximately 80% repatriated.

Military figures for the Philippines show almost 100% disarmament and 54% repatriation. However, in the Ryukyus and Philippines, it is estimated that several thousand hold-outs are still at large. In the Pacific Ocean area disarmament is 100%, less a few stragglers, and overall repatriation is approximately 79%. All Japanese in the entire American area of responsibility are 87% repatriated, and for all practical purposes, troops are 100% disarmed.

Chinese Area of Responsibility.

Previous constantly changing figures in China and Formosa are now fairly stable and reliable. Strength at 15 Aug 45 in China and especially in Formosa have always been a subject of much controversy. The estimate of total surrender strength in Formosa has dropped some 82,000.

Disarmament of Japanese troops in China proper is now close to 87%. 96% of those remaining armed are in North China near the centers of Nationalist-Communist conflict. Repatriation, off to a slow start, is now moving at a much faster rate. Military repatriation is now a little over 17%.

Japanese military forces in Formosa are 77% disarmed. Military repatriation is in the neighborhood of only 13%, though in the near future it is expected to pick up rapidly.

All of the 30,000 Japanese troops in North French Indo-China have been disarmed, but none have been repatriated. This probably will be further delayed pending results of current discussions detween Chinese and French authorities regarding responsibility in the area. It is expected that the French will be in full control within one to three months.

In the entire Chinese area of responsibility Japanese troops are about 86% disarmed and 16% repatriated.

British Area of Responsibility - SEAC (Southeast Asia Command).

Disarmament of Japanese in the Southeast Asia Command has proceeded smoothly and efficiently. In South French Indo-China it is around 71%; Thailand, 98%; Burma 97%; and Malaya, 100%.

In areas near the present Indonesian-NEI-British conflict, disarmament of Japanese has been hindered. Some reports indicate Japanese forces are being employed in the hostilities. In Sumatra only 6% of Japanese military strength has been disarmed, and in Java the figure is but 15%.

The French have recently taken over control of South French Indo-China from the British. What disposition will be made of the 18,000 armed Japanese in that area of internal unrest is not known.

For the whole British area of responsibility 74% of the Japanese have been disarmed. However, only 3,840 of the area's 572,651 total have been repatriated to date.

Australian Area of Responsibility - AMF (Australian Military Forces).

Japanese armed forces in the area, approximately 250,000 at surrender, have been 97% disarmed. Concentration, except in New Guinea and the Arafura Sea islands, is almost complete. Although only 11,000 of some 314,600 in the area, about 3.5%, have been repatriated to date, large scale repatriation recently has begun.

Throughout the area a few small garrisons of Japanese troops have been maintained to guard allied property and perform general police duties.

Detailed Figures: See Encls 6 and 7.

PROGRESS OF DEMOBILIZATION, ARMY AND NAVY AIR FORCES

The Japanese Army and Navy Air Forces have ceased to exist and what is left of equipment and installations is being destroyed as rapidly as practicable by the occupation forces, saved for reparations, or converted to civilian uses. Following is a recapitulation of the demobilization of Japanese air poswer since surrender showing the present status of personnel, aircraft, airfields, and installations and aircraft factories.

Personnel: All personnel of both the Army and Navy Air Forces stationed in the Empire proper and reported totaling 55,537 as of 15 August, have been demobilized and discharged. Air Force personnel in areas other than the Empire proper were lumped with other forces of their respective services for purposes of demobilization, repatriation and discharge. The following table shows the progressive steps of demobilization and discharge of personnel from 15 August to 1 December.

Japanese Air Forces

	Strength	Demobilized by:			
	15 Aug	1 Sept	1 Oct	1 Nov	1 Dec
ARMY	262,000	62,000	248,000	253,602	262,000
NAVY	291,537	187,543	281,105	285,801	291,523
TOTALS	553,537	249,543	529,326	539,403	553,523

Note: Fourteen men remaining in the Navy Air Force, as of 1 December 1945 were discharged between that date and 15 December 1945.

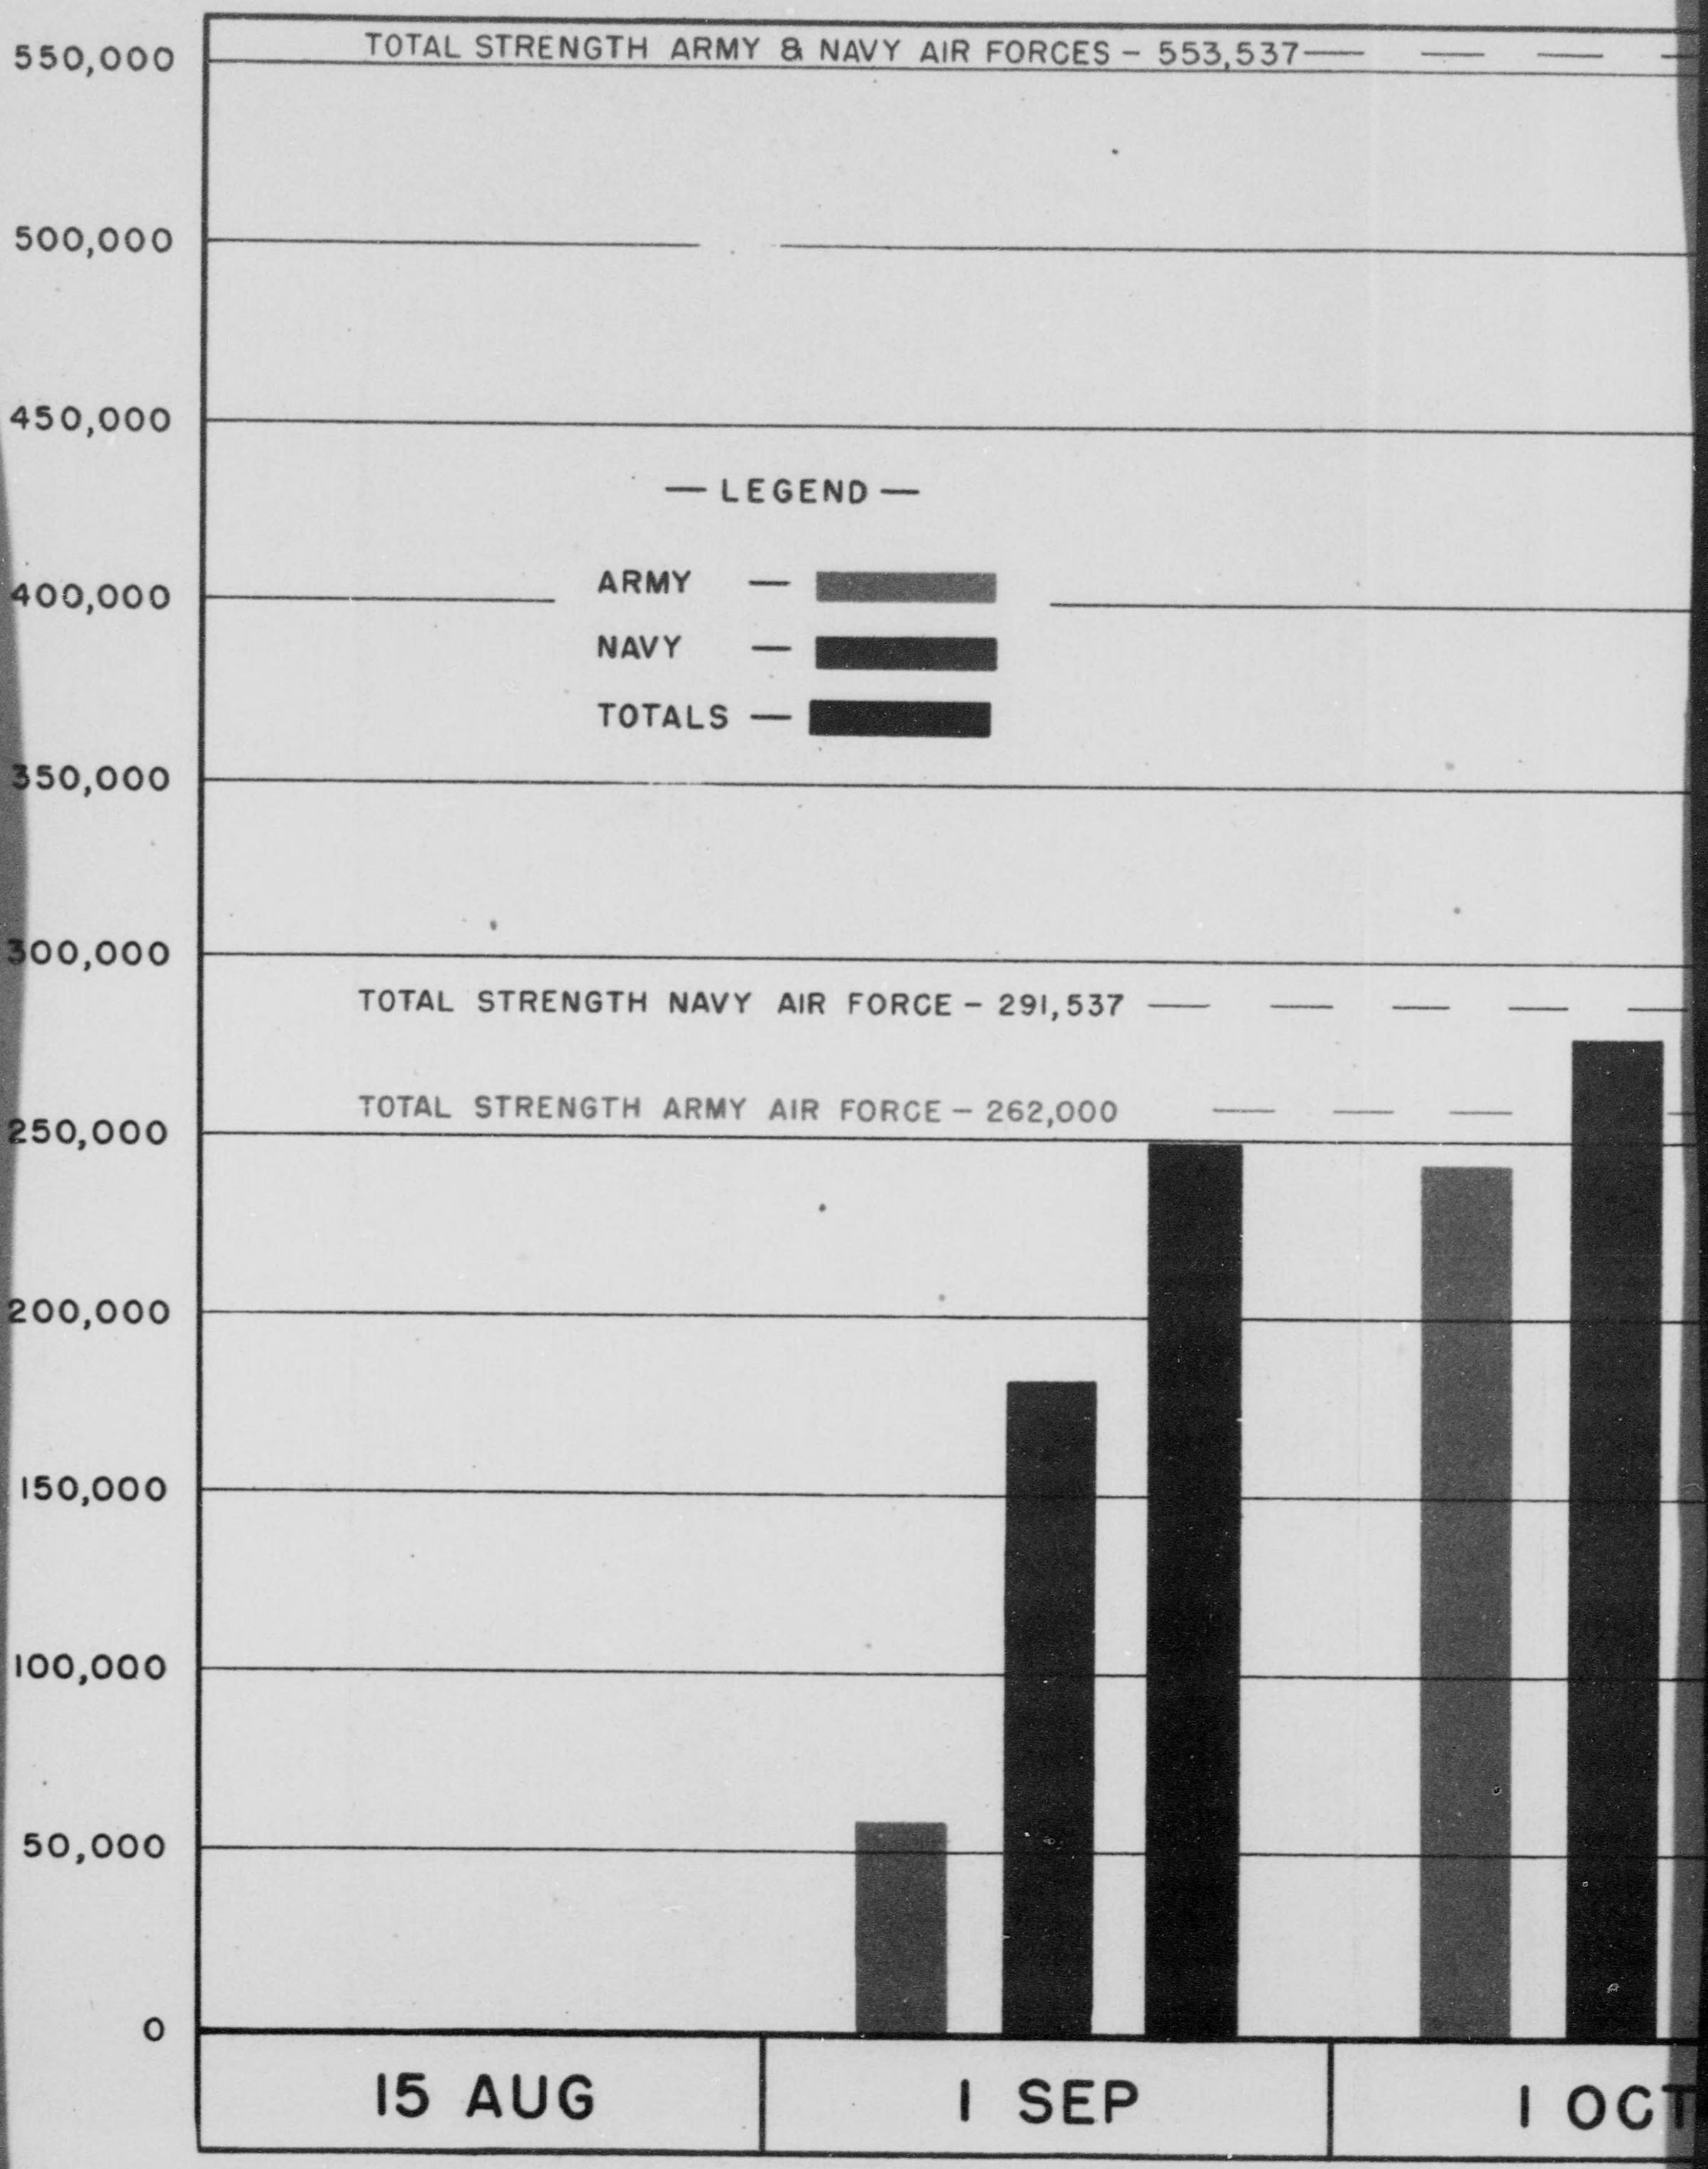
(See Encl 8)

Aircraft: The following number of aircraft of all types, located on airfields in the areas indicated, were surrendered by the Japanese: Honshu Island, 8,962; Shikoku Island, 631; Kyushu Island, 2,637; Hokkaido Island, 454; Formosa Island, 618; Korea, 962; China, 130; Manchuria, 1,042. Planes in areas occupied by U. S. forces are now in the process of being destroyed. Reports to the 15 December 1945 show a total of 6,871 destroyed in Japan and Korea. Early in the occupation all Japanese Aircraft were made inoperable by the removal of propellors.

Airfields, Installations and Equipment: Occupation forces assumed control of the 233 Japanese air fields in Japan and Korea upon occupying their respective areas. Fifty of these fields have been required by the occupation air forces for operational and emergency use. U. S. Air Force flying units are actually based on 17 of these fifty fields. Numerous other fields, not on the Air Force required list, are being used by liaiaon flights operating with U. S. ground forces. Barracks, hangars, and warehouses on some fields are being used by ground forces for billettin, offices, and storage. All Japanese equipment at airfields is being destroyed, and fields not required by occupation forces have been returned to the Japanese for the production of foodstuffs or for salt fields. (See Encl 9)

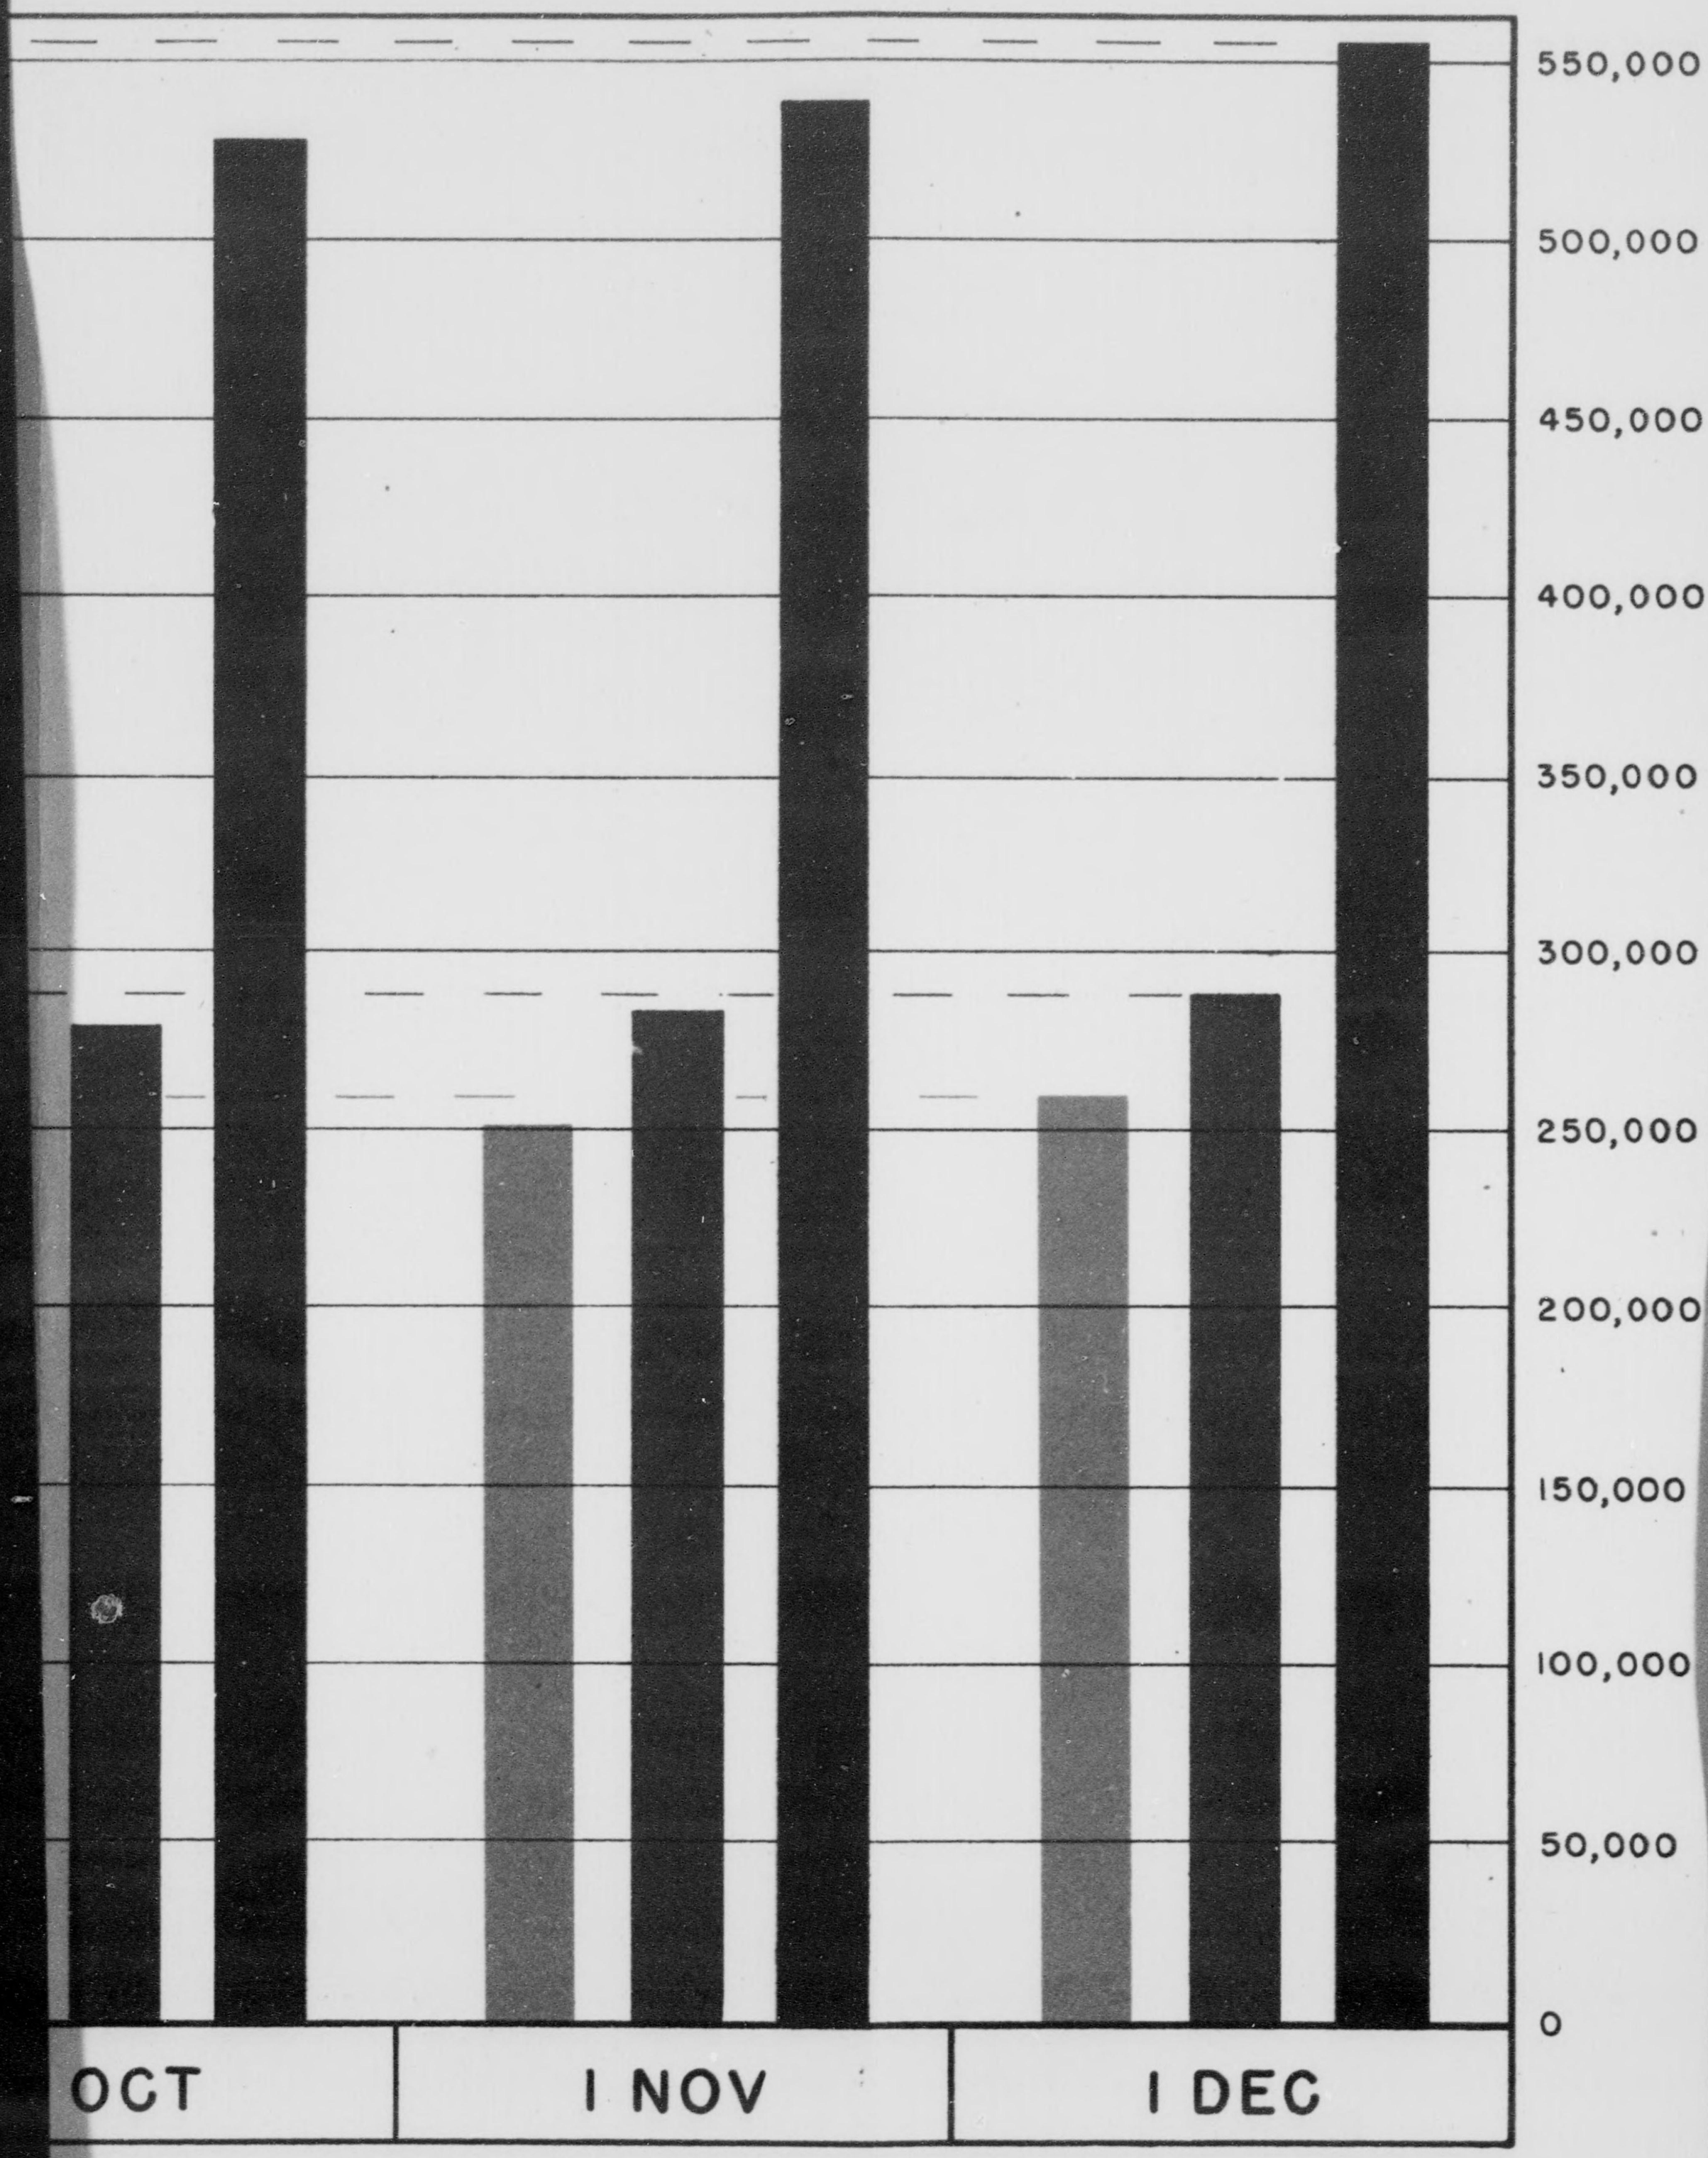
Aircraft factories: At the close of the war the following companies were operating major aircraft factories in Japan: Nakajima, Kawasaki, Japan International, Tachikawa, Mitsuishi, Hidachi, Kawaishi, and Kyushu. These factories during the first eight months of 1945 produced a combined total of 9,890 aircraft. Since the occupation forces have assumed all production of aircraft, parts and related equipment has been halted; jigs and dies, and other tools used only in the manufacture of aircraft or aircraft parts have been destroyed; machine tools and other equipment that can be used in the manufacture of goods not classified as "war material" have been left intact. Some of the factories were converted recently to the production of such materials as bicycles, small automobiles and others were granted permits for such conversion. However, during the latter part of December permits were revoked and the equipment of these factories was to be saved for reparations. (See Encl 10)

PROGRESS OF DE
JAPANESE ARMY AN



CONFIDENTIAL

DEMOBILIZATION OF AND NAVY AIR FORCES



NOTE:- FOURTEEN MEN REMAINING IN NAVY AS OF 1 DEC 45 WERE DISCHARGED BETWEEN THEN AND 15 DEC 45.

CONFIDENTIAL

JAPANESE ARMY-NAVY AIRFIELDS
CENTRAL AND SOUTHERN JAPAN AND KOREA
1 November 1945

The maps following depict Japanese airfield status as of 15 August 1945, corrected to 15 February 1946. The alphabetical tabulations by area gives ready reference to map locations. "A" "N" and "C" indicate Army, Navy and Commercial airfields respectively. Under Present Status column "*" means "for use of Occupation Air Forces", "**" means "under control of Occupation Ground Forces", and "--" means "returned to Japanese for civilian use".

Progress of Demobilization, Japanese Naval Personnel

The table below is a recapitulation of the progress of demobilization of the 1,693,223 personnel listed in the Japanese Navy as of 15 August 1945. 1,490,418 or 88% have now been demobilized. The remaining 202,805 who are not considered as demobilized are all overseas. These include 3,063 listed as missing. Not included in the above figures are the 32,402 personnel now in the employ of the Second Demobilization Ministry (See Enclosure 13). Although a portion of these are former Naval personnel they have been discharged from the Navy since surrender and subsequently re-hired as civilian employees.

PROGRESS OF DEMOBILIZATION OF JAPANESE NAVY
PERSONNEL AS SHOWN BY PERIODIC REPORTS

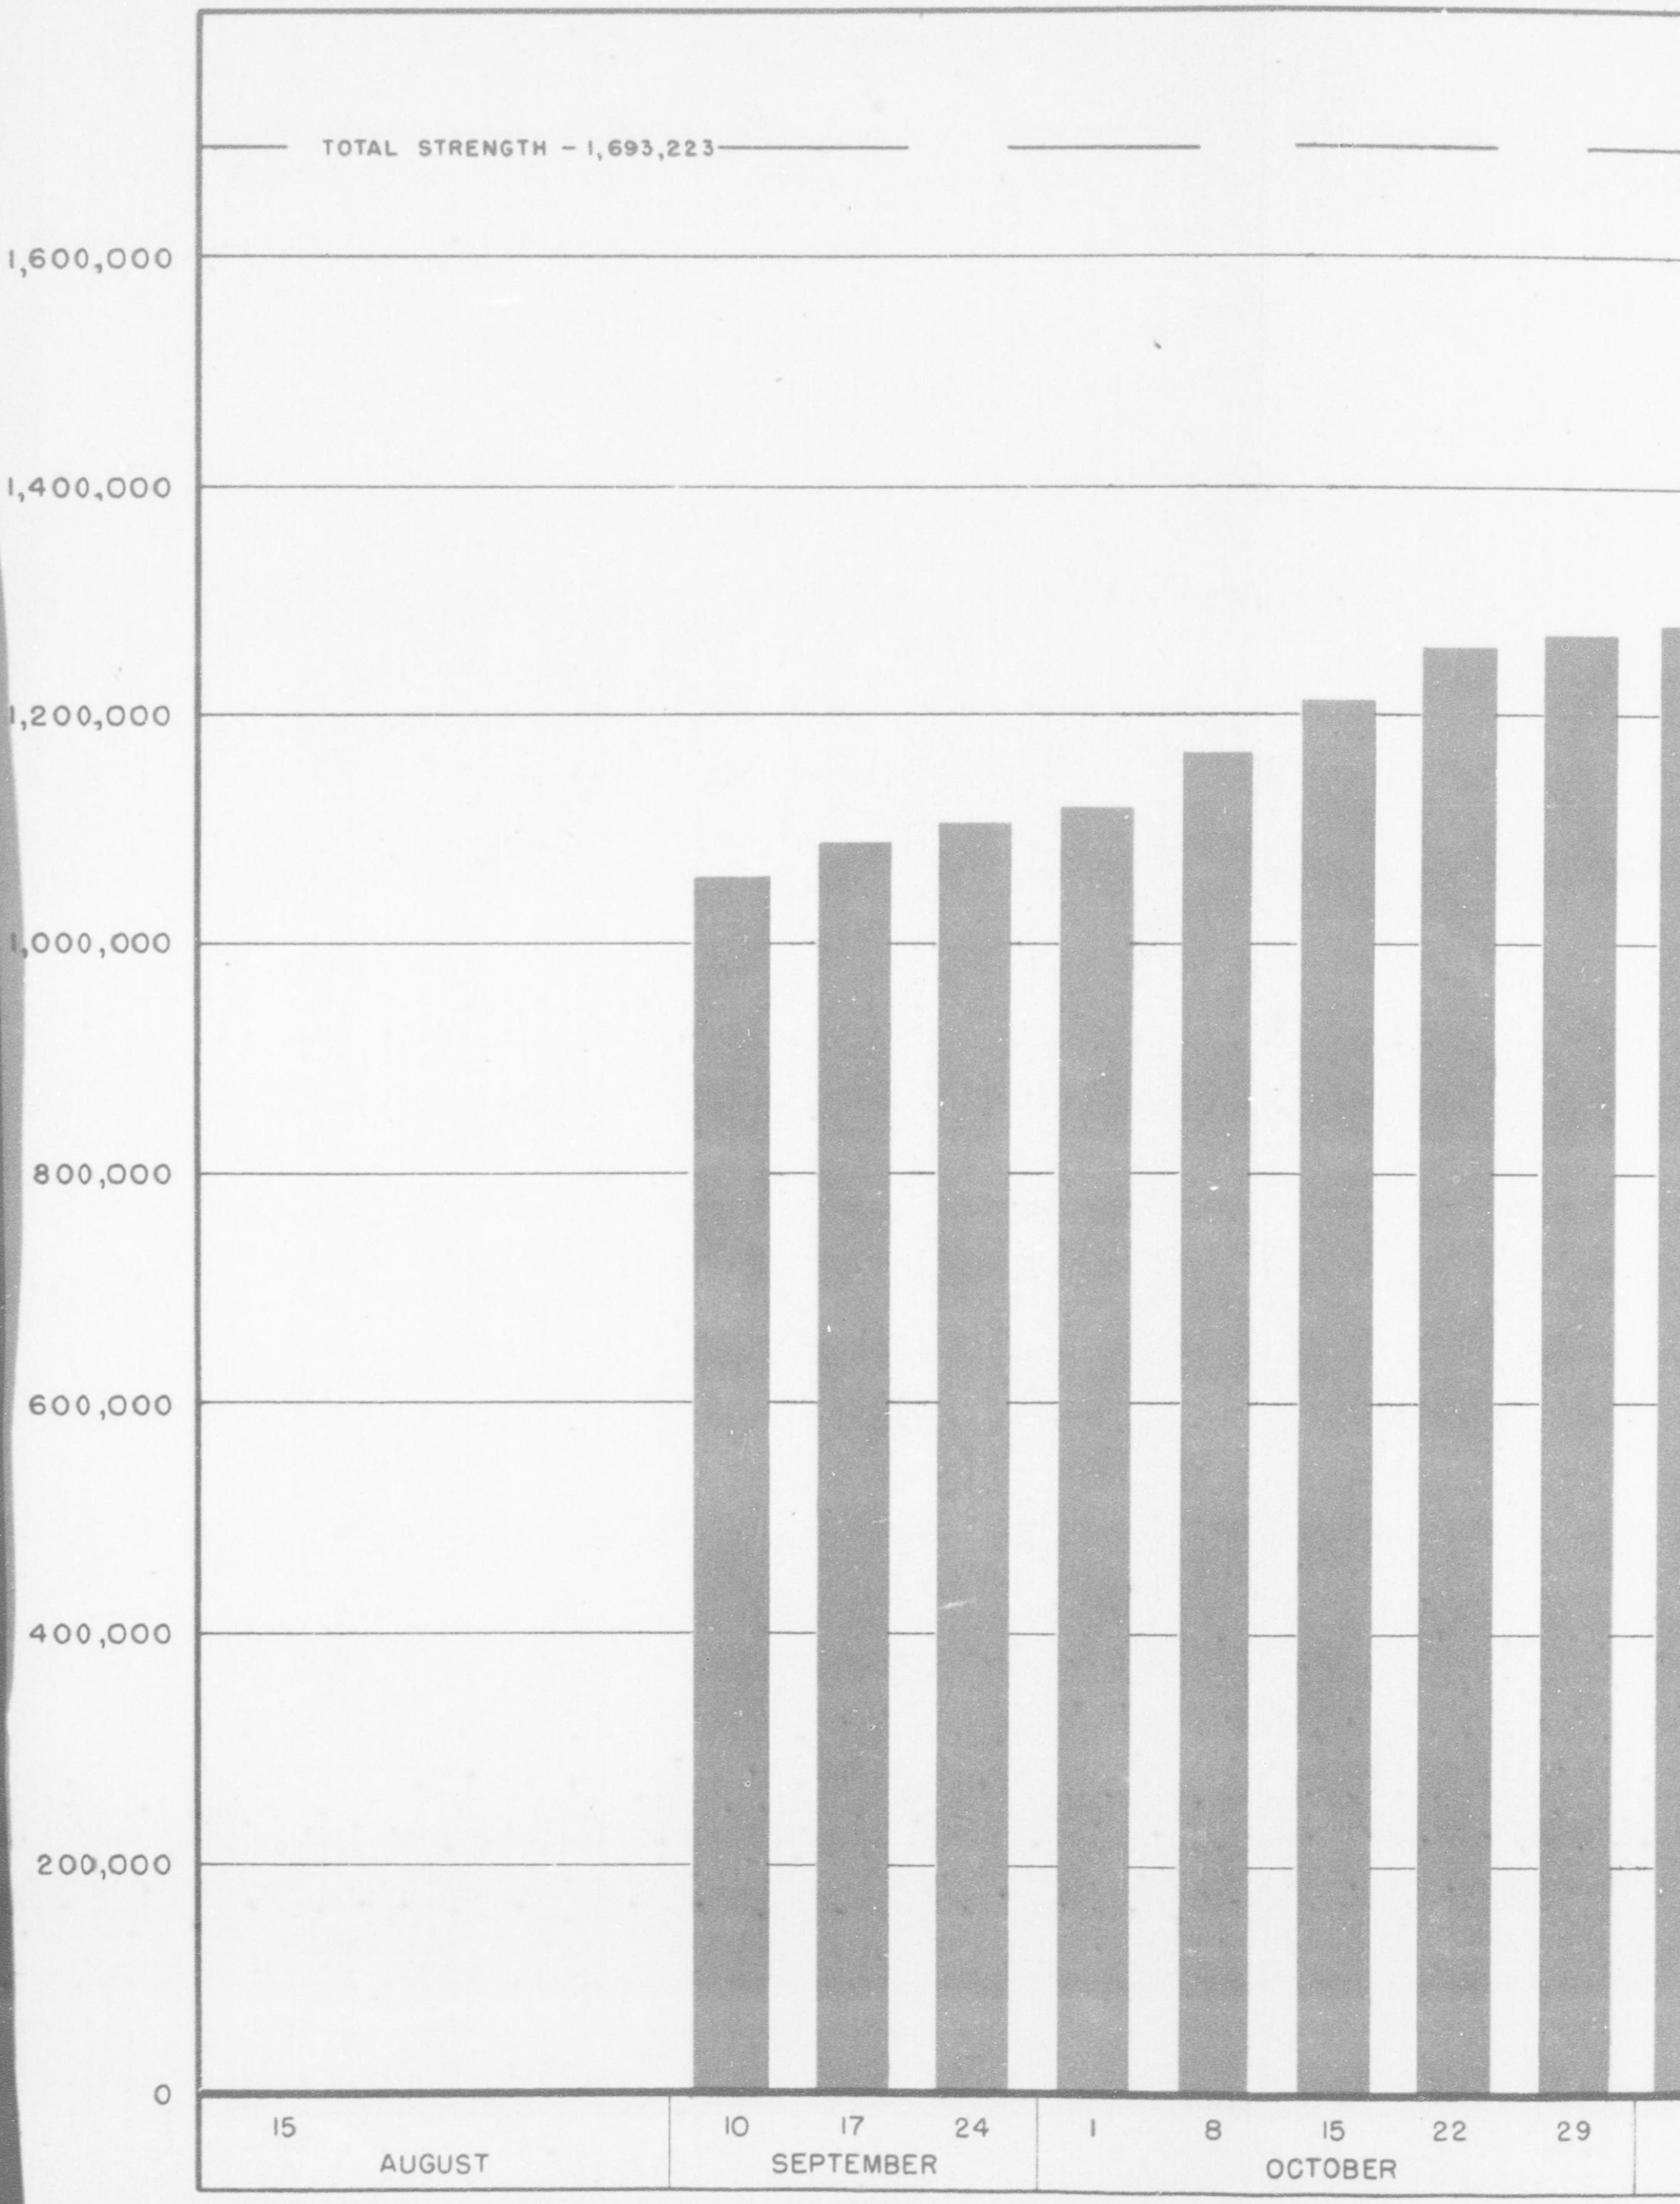
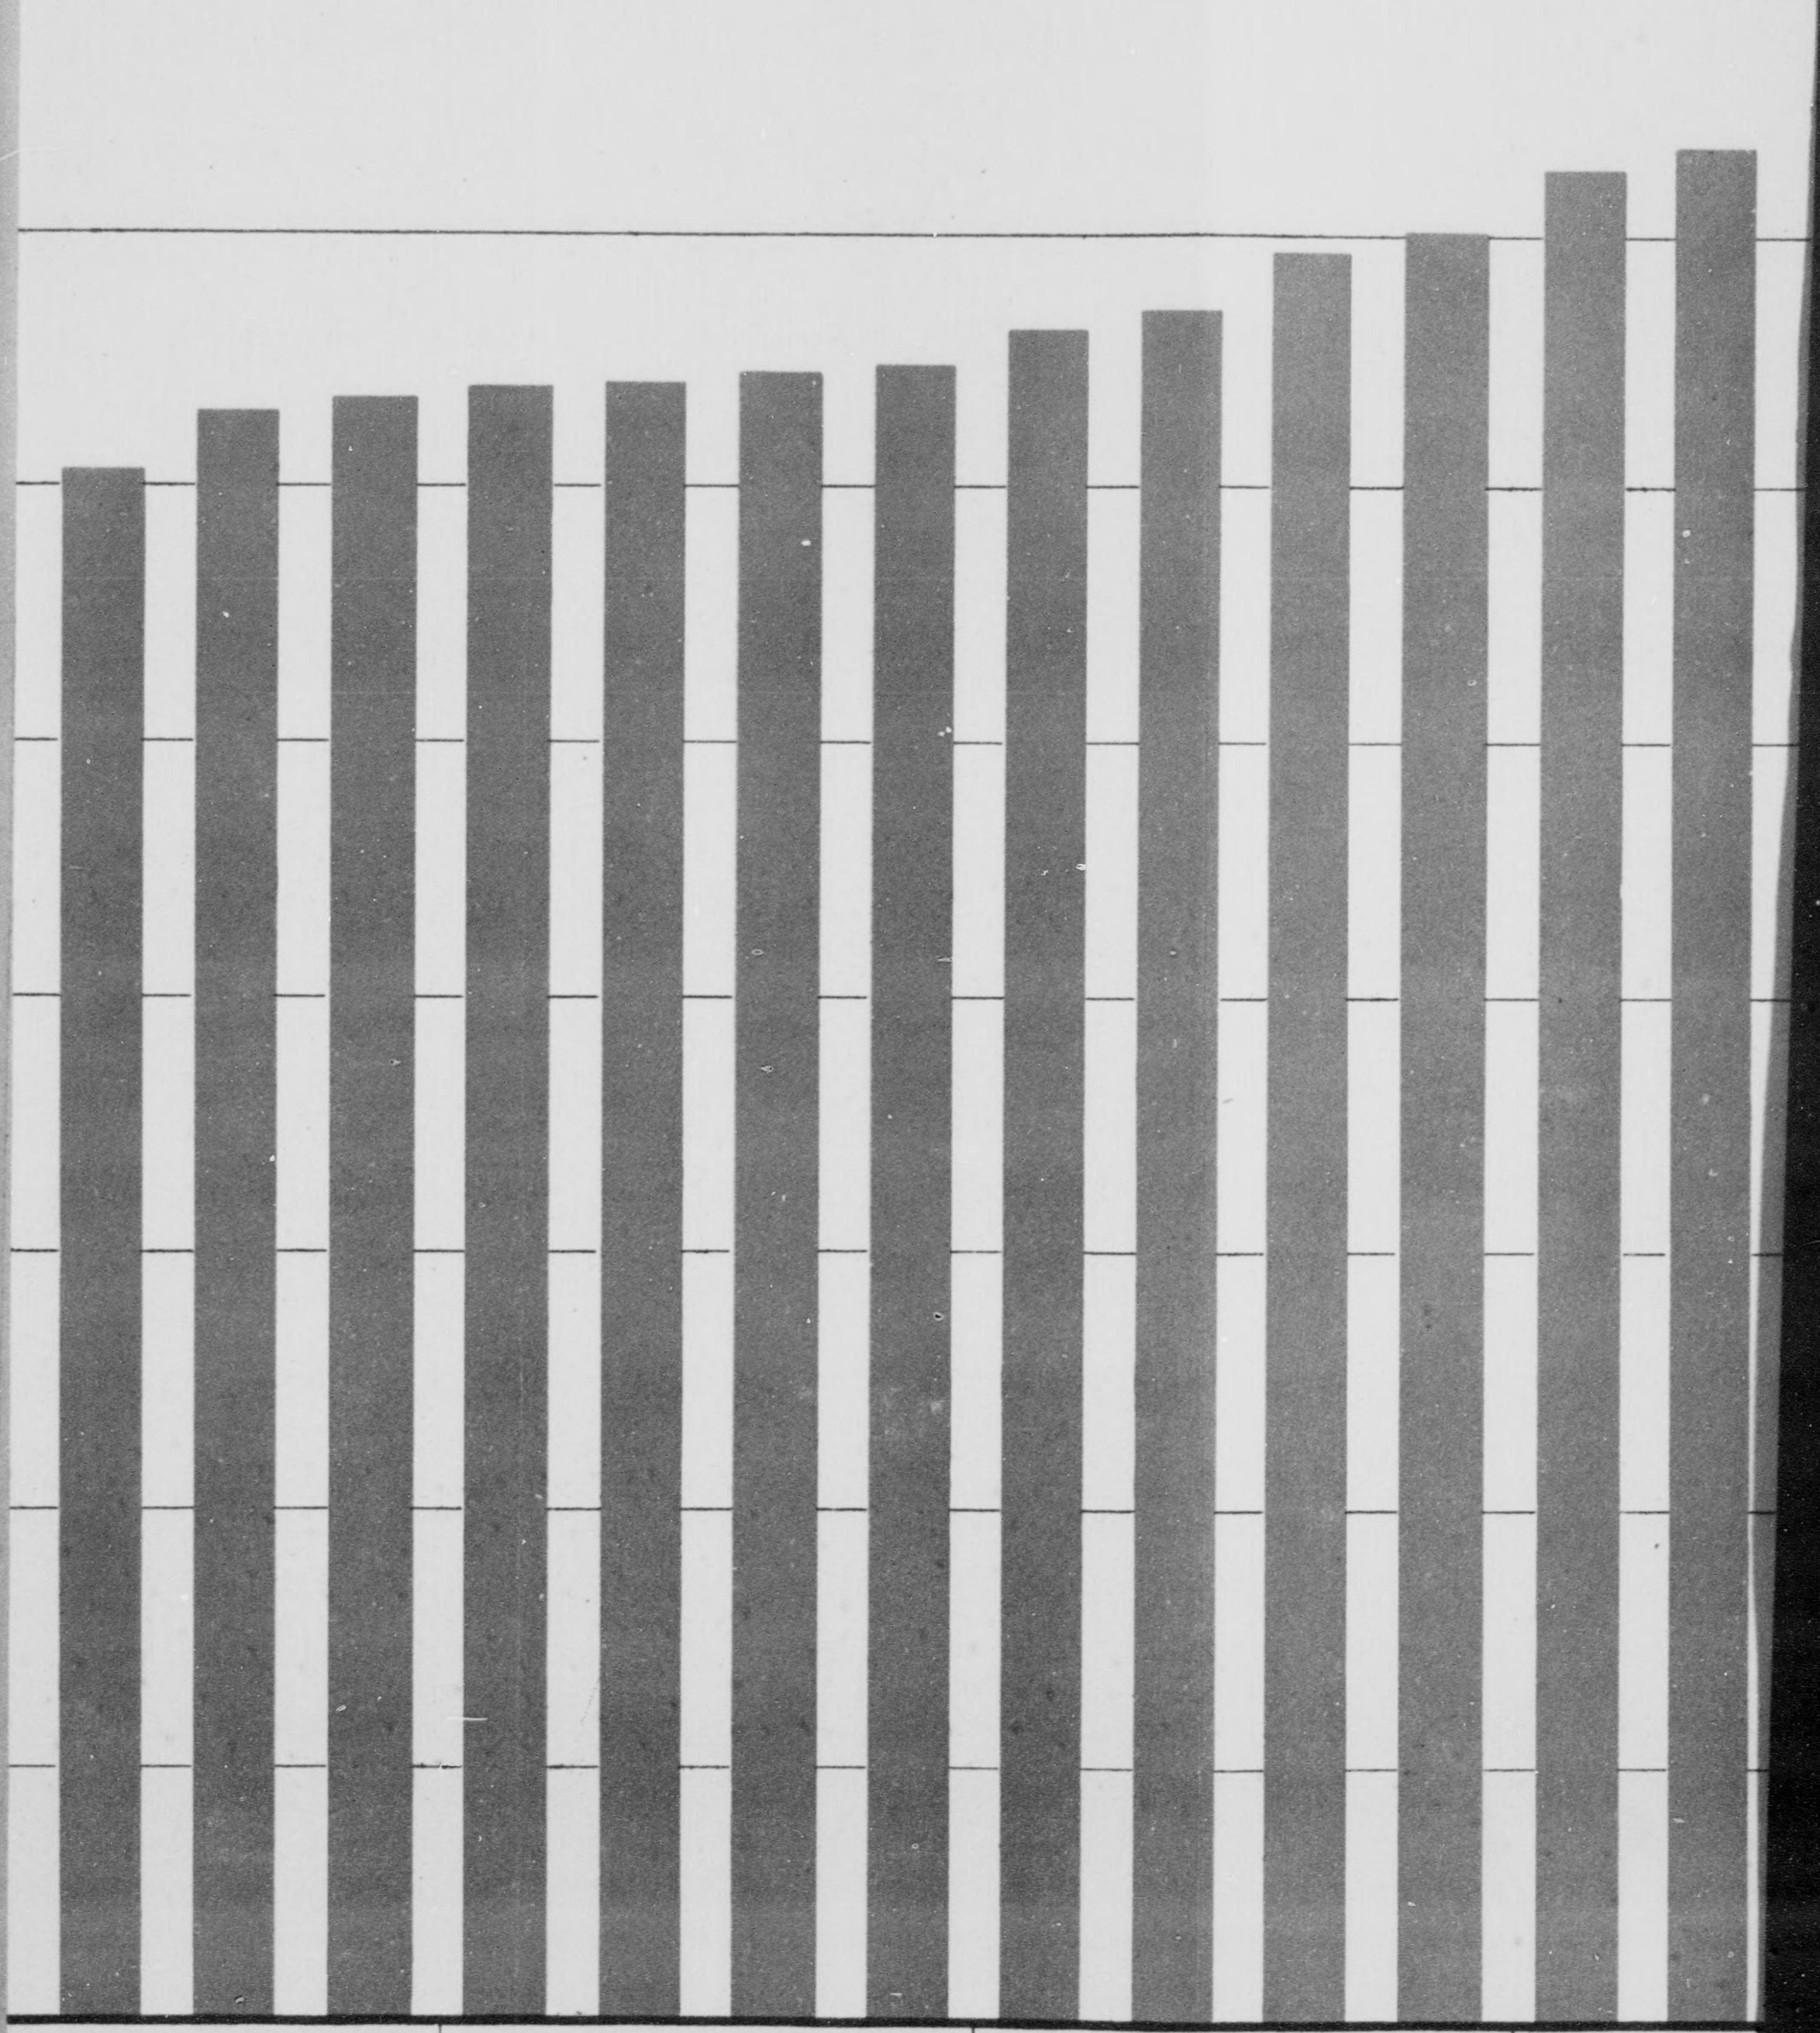
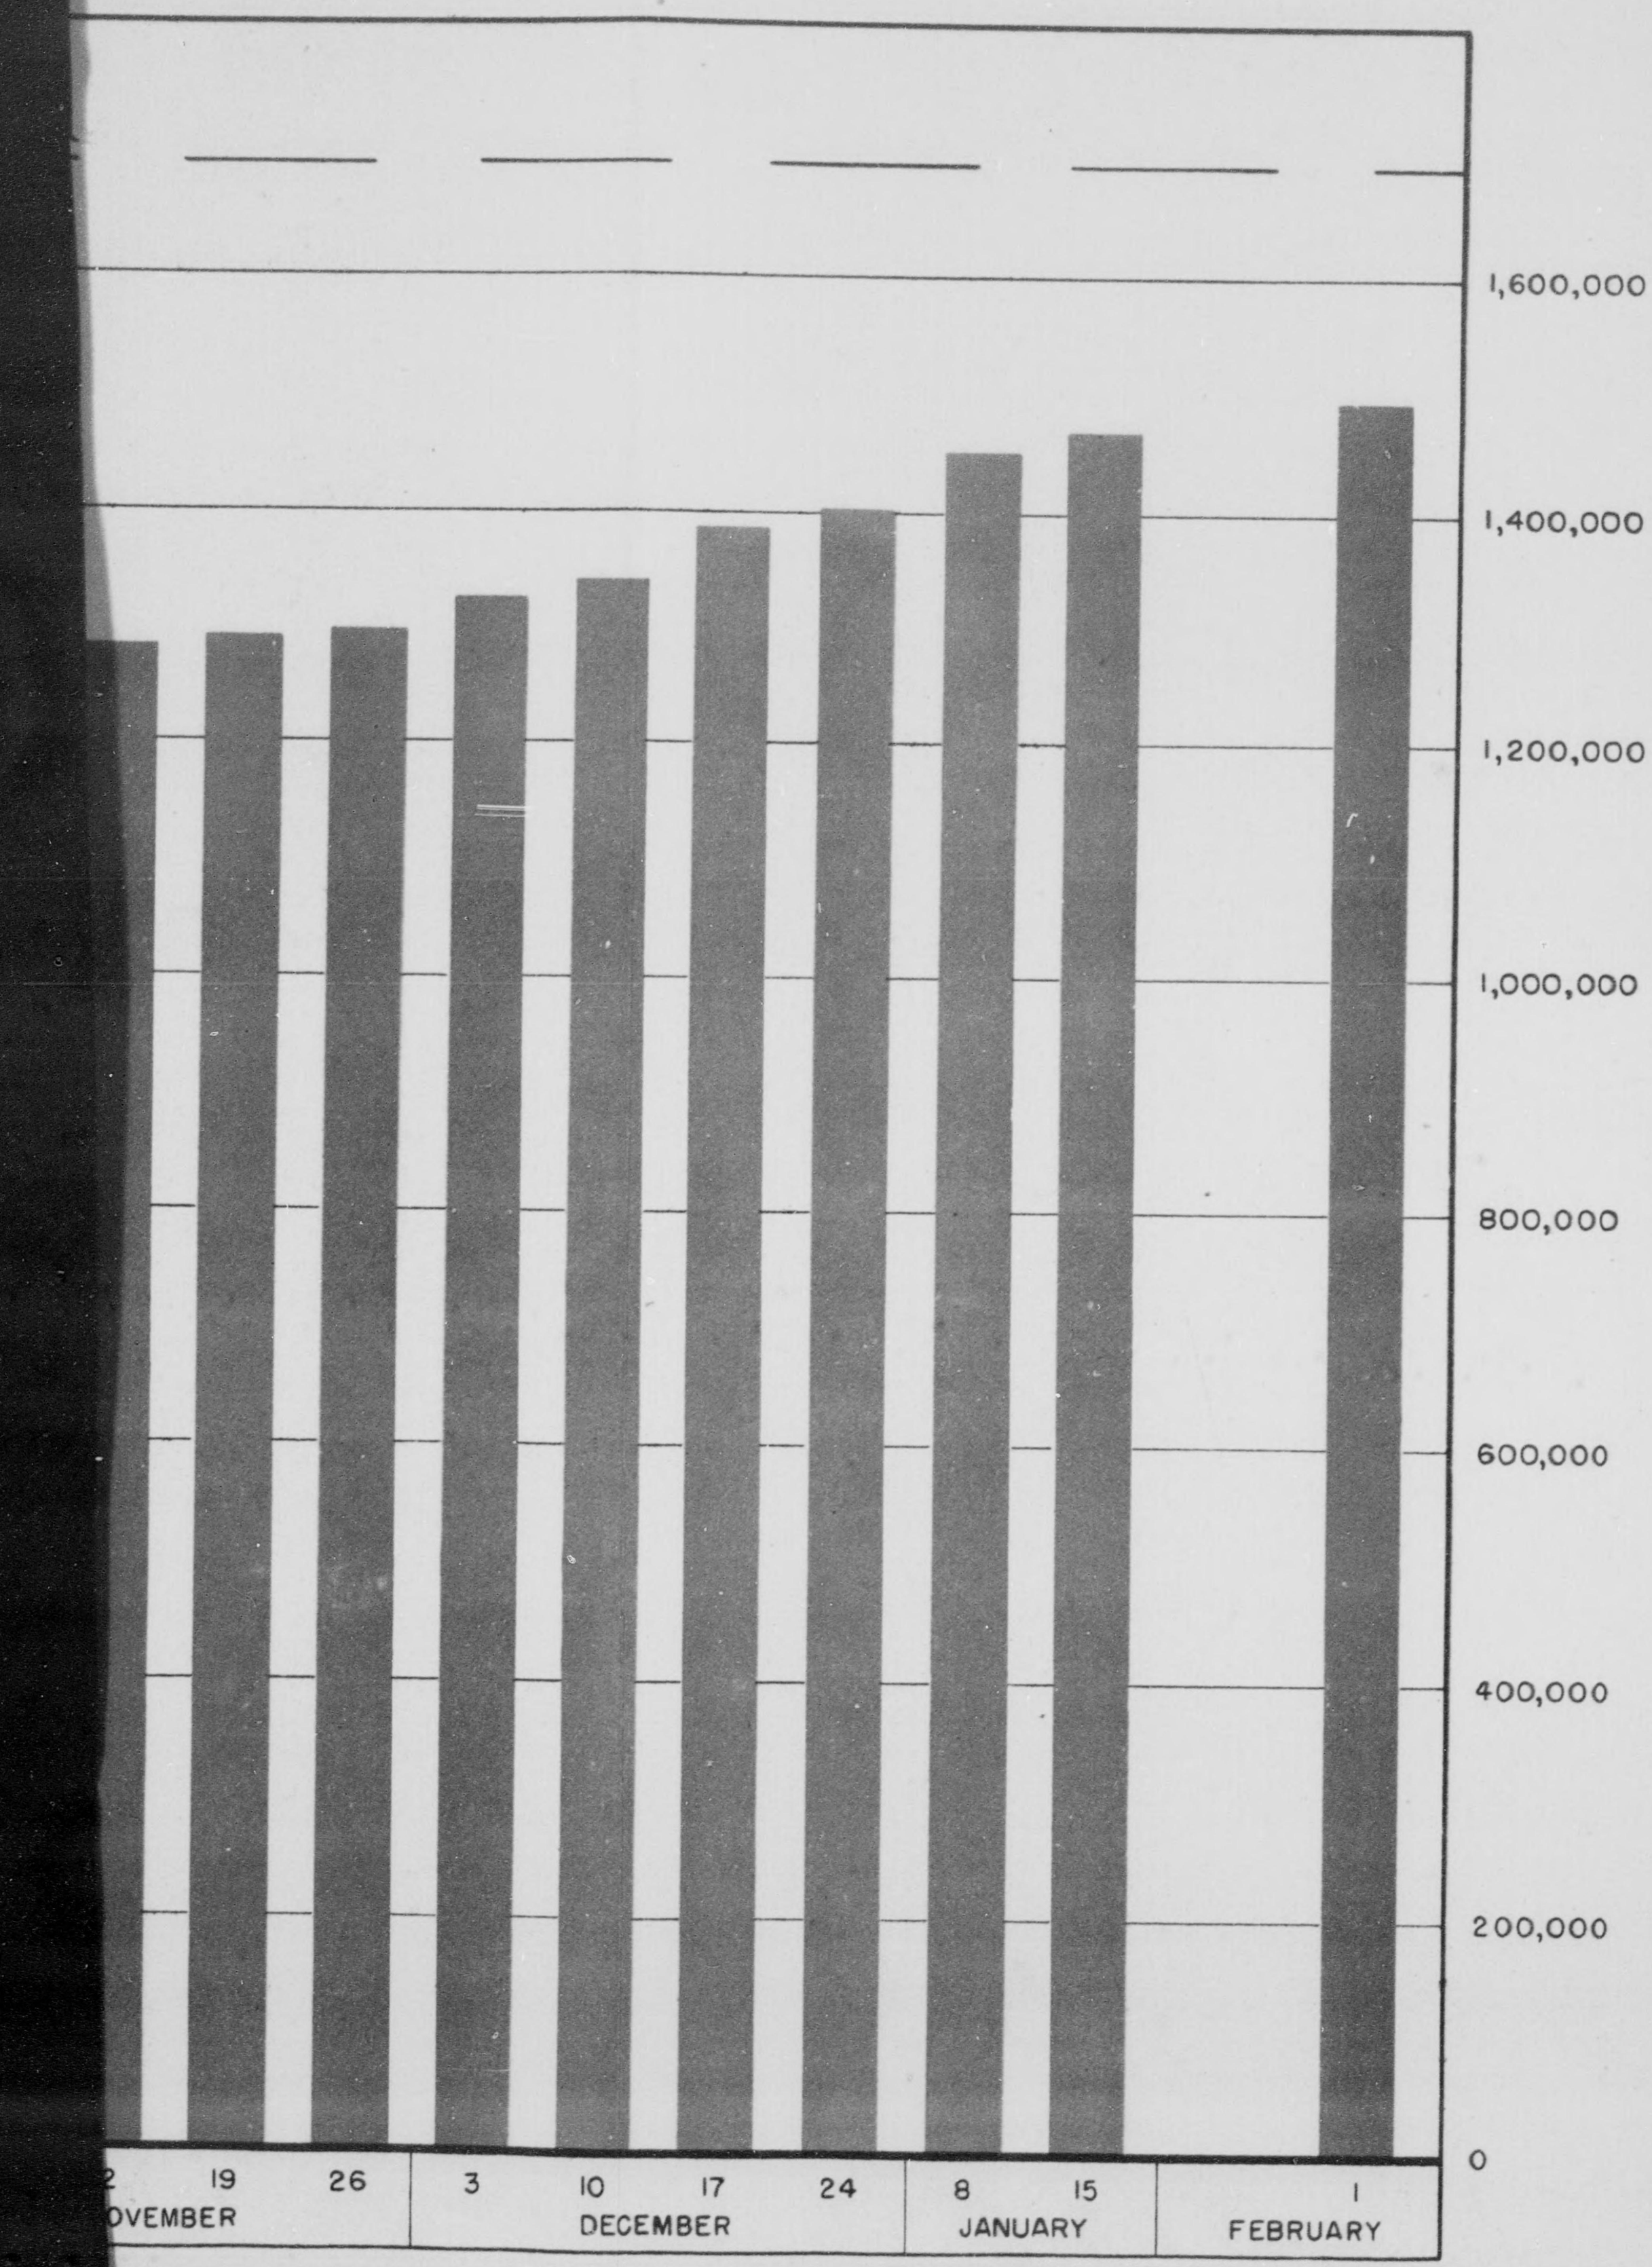
PROGRESS OF
JAPANESE NAV



PROGRESS OF DEMOBILIZATION
JAPANESE NAVY PERSONNEL



EMOBILIZATION
PERSONNEL



Disposition of Japanese Naval Forces:

For the previous report on the disposition of Japanese Naval Forces, see Enclosure 30 of "Progress of Demobilization of the Japanese Armed Forces, 1 November 1945." Since 1 November 1945 the number of personnel in Japan Proper has been reduced from 51,285 to 0. The total number remaining overseas (including those listed as Miscellaneous in the previous report) has been reduced from 365,472 to 202,805. A new classification, Miscellaneous Islands, has been adopted to include those 604 personnel remaining on Chichi Jima, Haha Jima, and Shimushu who were previously considered as stationed in Japan Proper.

AREA	NO. REMAINING 1 NOVEMBER 1945	NO. REMAINING 1 FEBRUARY 1946
JAPAN PROPER:		
Yokosuka Naval Station	14,035	0
Kure Naval Station	13,199	0

The Second Demobilization Ministry

1. Organization
   a. Central Organization
      (1) Minister of Second Demobilization Ministry
      (2) Vice Minister of Second Demobilization Ministry
      (3) Subsidiary groups:

Name	Functions
Ministerial Secretariat	Investigation of historical records; Liaison with the Allied Powers; Medical affairs; Demilitarization affairs of Naval Technical Department, Department of Naval Aeronautics & Naval Civil Engineering Department; Carrying out of communication; Stores and Supplies for repatriation and minesweeping craft.
Administrative Bureau	Synthetic control of business; Repatriation; Minesweeping; Any business outside the scope of other Bureaus.
Personnel Bureau	Appointment; Demobilization; Welfare work for the demobilized etc.; Investigation of the merits of the dead.
Bureau of Accounts and Supplies	Budget; Settlement of accounts; Funds; Pay; Examination of goods; Purchase of goods; Government property.
Bureau of Justice	Administration of judicial affairs, Punishment.

   b. Local Organization
      (1) District Demobilization Bureaus

Name	Location	Outline of Duties
Yokosuka District Demobilization Bureau	Yokosuka	Arrangement of Arms and military stores; Repatriation business; Guidance in Welfare work for the demobilized; Control of the business concerning the liaison with the Allied powers.
Kure "	Kure	
Sasebo "	Sasebo	
Maizuru "	Maizuru	
Osaka "	Osaka	
Ominato "	Ominato	

local assistance functions

      (2) Local Demobilized Personnel Office

Location	Outline of Duties
Sapporo, Akita, Morioka, Sendai, Nagano, Fukushima, Mito, Utsunomiya, Maebashi, Shizuoka, Nagoya, Wakayama, Tsu, Kobe, Okayama, Yamaguchi, Matsue, Takamatsu, Matsuyama, Kochi, Fukuoka, Kumamoto, Miyazaki, Kagoshima, Yamagata, Toyama, Niigata, Kanazawa.	Welfare work for the bereaved families; Welfare work for men of the Naval and civilians demobilized from the Navy.

2. Naval Activities of the Second Demobilization Ministry
   a. Principal post-war demilitarization activities
      (1) Transportation on naval vessels of military and civilian repatriates.
      This, in accordance with the directive of the Supreme Commander for the Allied Powers, is a long-period program requiring several years with a personnel of approximately 20,000 men and fleet of 140 vessels. In order to carry out this program, various difficulties are involved in connection with repair of vessels, maintenance and supply of fuel, provisions, stores, etc.
      (2) Sweeping of mines laid by Japanese and Allied Forces.
      This activity remains the same as mine sweeping carried on during the war. About 350 vessels and 12,000 men have been assigned to these duties. The maintenance and repair of and supplies for these vessels remain the same activities as those listed in (1) above.
      (3) Carrying out of demobilization after arrival of repatriated troops.
      The same procedure as with the Army.
      (4) Disposal of Arms and Ammunition.
      a. Delivery, custody, disposal, and transfer of war materials and dismantled or laid-down arms. This work did not progress according to schedule as originally planned by the Occupation troops and will require considerable time for complete disposal.
      b. Liquidating work of various arms and war materials rests with such administrative organs as the Naval Technical Dept. and the Dept. of Naval Aeronautics.
      (5) Matters relating to the aid for the war dead and bereaved families.
      (6) Investigation of data required by the Supreme Commander of Allied Powers.
      This is concerned with investigation of historical data in compliance with the extensive researches ordered by U.S. surveys. An unexpectedly large number of personnel is required for this work and the organization of data is a rather stupendous task, the greater part of which has now been completed.
      (7) Matters related to courts martial.
      (8) Matters related to Prisoners of War.
   b. These activities will be successively processed and transferred as soon as possible to the Ministries and civilian organizations concerned.
      For the duration of the Demobilization Ministry (to the end of March 1946), work on these activities will be pushed as much as possible in order to facilitate their transfer to the Demobilization Bureau.
3. Status of Officials in the Second Demobilization Ministry.
   a. With the establishment of the 2nd Demobilization Ministry, all Naval Personnel on the active list at home were demobilized, save for those abroad who shall retain their present status until their repatriation.
   b. Those officials who continue to perform duties for the Second Demobilization Ministry shall be retained until such time as they shall have completed their duties. For this purpose, drafting of specialists, crews for minesweepers and repatriation vessels is authorized.
   c. The Second Demobilization Ministry shall continue to function as a unit under the control of SCAP until 31 March 1946.

4. Personnel in the Employ of the Second Demobilization Ministry as of 1 February 1946.
