EXPERIMENT STATION RECORD

EDITOR: HOWARD LAWTON KNIGHT

EDITORIAL DEPARTMENTS

Agricultural and Biological Chemistry, Soils and Fertilizers—H. C. WATERMAN,
SYBIL L. SMITH.
Agricultural Meteorology—W. H. BEAL.
Agricultural Botany, Diseases of Plants—H. P. BARSS.
Genetics—H. M. STEECE, J. W. WELLINGTON, G. HAINES.
Field Crops—H. M. STEECE.
Horticulture and Forestry—J. W. WELLINGTON.
Economic Zoology and Entomology, Veterinary Medicine—W. A. HOOKER.
Animal Husbandry, Dairying, and Dairy Farming—H. W. MARSTON.
Agricultural Engineering—R. W. TRULLINGER.
Agricultural Economics—F. G. HARDEN, B. YOUNGBLOOD.
Rural Sociology—B. YOUNGBLOOD, F. G. HARDEN.
Agricultural and Home Economics Education—F. G. HARDEN.
Foods and Human Nutrition—SYBIL L. SMITH.
Textiles and Clothing—H. M. STEECE, SYBIL L. SMITH.
Home Management and Equipment—_____.
Indexes—MARTHA C. GUNDLACH.
Bibliographies—CORA L. FELDKAMP.
Cooperation with *Biological Abstracts*—F. V. RAND.

THE AGRICULTURAL EXPERIMENT STATIONS

- ALABAMA—*Auburn*: M. J. Funchess.¹
ALASKA—*College*: G. W. Gasser.¹
ARIZONA—*Tucson*: R. S. Hawkins.²
ARKANSAS—*Fayetteville*: D. T. Gray.¹
CALIFORNIA—*Berkeley*: C. B. Hutchison.¹
COLORADO—*Fort Collins*: E. P. Sandsten.¹
CONNECTICUT—
[New Haven] Station: *New Haven*.¹
Storrs Station: *Storrs*.¹ } W. L. Slate.¹ }
DELAWARE—*Newark*: C. A. McCue.¹
FLORIDA—*Gainesville*: W. Newell.¹
GEORGIA—
Experiment: H. P. Stuckey.¹
Coastal Plain Station: *Tifton*; S. H. Starr.¹
HAWAII—*Honolulu*: O. C. Magistad.¹
IDAHO—*Moscow*: E. J. Iddings.¹
ILLINOIS—*Urbana*: H. W. Mumford.¹
INDIANA—*La Fayette*: J. H. Skinner.¹
IOWA—*Ames*: R. E. Buchanan.¹
KANSAS—*Manhattan*: L. E. Call.¹
KENTUCKY—*Lexington*: T. P. Cooper.¹
LOUISIANA—*Baton Rouge*: C. T. Dowell.¹
MAINE—*Orono*: F. Griffee.¹
MARYLAND—*College Park*: H. J. Patterson.¹
MASSACHUSETTS—*Amherst*: F. J. Sievers.¹
MICHIGAN—*East Lansing*: V. R. Gardner.¹
MINNESOTA—*University Farm, St. Paul*: W. C. Coffey.¹
MISSISSIPPI—*State College*: J. R. Ricks.¹
MISSOURI—
College Station: *Columbia*; F. B. Mumford.¹
Fruit Station: *Mountain Grove*; P. H. Shepard.¹
Poultry Station: *Mountain Grove*; T. W. Noland.¹
MONTANA—*Bozeman*: F. B. Linfield.¹
NEBRASKA—*Lincoln*: W. W. Burr.¹
NEVADA—*Reno*: S. B. Doten.¹
NEW HAMPSHIRE—*Durham*: J. C. Kendall.¹
NEW JERSEY—*New Brunswick*: J. G. Lipman.¹
NEW MEXICO—*State College*: Fabian Garcia.¹
NEW YORK—
State Station: *Geneva*; U. P. Hedrick.¹
Cornell Station: *Ithaca*; C. E. Ladd.¹
NORTH CAROLINA—*State College Station, Raleigh*:
R. Y. Winters.¹
NORTH DAKOTA—*State College Station, Fargo*:
H. L. Walster.¹
OHIO—*Wooster*: Edmund Secrest.¹
OKLAHOMA—*Stillwater*: _____
OREGON—*Corvallis*: W. A. Schoenfeld.¹
PENNSYLVANIA—*State College*: R. L. Watts.¹
PUERTO RICO—
Federal Station: *Mayaguez*; Atherton Lee.¹
College Station: *Rio Piedras*; F. A. Lopez Dominguez.¹
RHODE ISLAND—*Kingston*: G. E. Adams.¹
SOUTH CAROLINA—*Clemson*: H. P. Cooper.¹
SOUTH DAKOTA—*Brookings*: J. W. Wilson.¹
TENNESSEE—*Knoxville*: C. A. Mooers.¹
TEXAS—*College Station*: A. B. Conner.¹
UTAH—*Logan*: Lowry Nelson.¹
VERMONT—*Burlington*: J. L. Hills.¹
VIRGINIA—
Blacksburg: A. W. Drinkard, Jr.¹
Truck Station: *Norfolk*; H. H. Zimmerley.¹
WASHINGTON—
College Station: *Pullman*; E. C. Johnson.¹
Western Station: *Puyallup*; J. W. Kalkus.³
WEST VIRGINIA—*Morgantown*: F. D. Fromme.¹
WISCONSIN—*Madison*: C. L. Christensen.¹
WYOMING—*Laramie*: J. A. Hill.¹

¹ Director.

² Acting director.

³ Superintendent.

EDITORIAL NOTES

VOLUME 61

	Page
Dr. Alfred Charles True, deceased (illustrated).....	1
A trio of recent gatherings in Washington.....	101
Research and the Agricultural Marketing Act.....	301
Agricultural education in the United States, 1785-1925.....	401
The agricultural experiment stations in 1928.....	601
Edwin West Allen, 1864-1929 (illustrated).....	701

VOLUME 62

The forty-third convention of the Association of Land-Grant Colleges and Universities.....	1
Research at the 1929 convention of the Association of Land-Grant Colleges and Universities.....	101
An "outsider's" view of the agricultural colleges.....	301
Cooperation in agricultural meteorology.....	401
The retirement of Director May of Puerto Rico.....	601
An experimental Institute of Plant Industry in India.....	701

VOLUME 63

The Extension Service Review.....	1
The Capper Award for Distinguished Service to American Agriculture....	4
Another view of the agricultural extension system.....	101
Dean Russell and the Wisconsin Alumni Research Foundation.....	106
Vocational education in agriculture from the viewpoint of labor.....	301
Federal appropriations for agriculture for the fiscal year 1931.....	401
The International Conference of Agricultural Economics at Cornell University.....	601
The Inter-American Conference on Agriculture, Forestry, and Animal Industry.....	603
Death of Director G. F. Freeman.....	607
The fiftieth anniversary celebration of the New Jersey State Experiment Station.....	701

VOLUME 64

The forty-fourth convention of the Association of Land-Grant Colleges and Universities.....	1
Research at the 1930 convention of the Association of Land-Grant Colleges and Universities.....	101
The survey of the land-grant colleges and universities.....	301
Research and the report of the survey of the land-grant colleges and universities.....	401
Two recent histories of economic entomology.....	601
International cooperation in agro-ecological investigation.....	701

VOLUME 65

Opportunities for engineering research in agriculture, by R. W. Trullinger.....	1
The passing of Jordan, Comstock, and Pammel.....	101
The Pennsylvania Soil Fertility Conference.....	301
Other summer meetings of 1931.....	306
The Guelph meeting of the Canadian Society of Technical Agriculturists.....	306
The quarter centennial of the American Society of Agricultural Engineers.....	401

	Page
A brief history of the South Carolina Experiment Station.....	405
Babcock and Spillman, deceased.....	601
James T. Jardine, fifth chief of the Office of Experiment Stations.....	701
The agricultural experiment stations in 1930.....	702

VOLUME 66

The forty-fifth convention of the Association of Land-Grant Colleges and Universities.....	1
Research at the 1931 convention of the Association of Land-Grant Colleges and Universities.....	101
Economic and sociological research in the agricultural experiment stations.....	301
New Policies for <i>Experiment Station Record</i>	401
Death of Dr. C. Ford Langworthy.....	404
The distribution of experiment station publications in foreign countries.....	601
The fiftieth anniversary of the State experiment stations in New York, Ohio, and Massachusetts.....	701
New Jersey's agricultural experiment station, 1880-1930.....	706

VOLUME 67

New quarters for the Office of Experiment Stations.....	1
Martha Van Rensselaer—Home economics pioneer.....	97
Monthly issues of <i>Experiment Station Record</i>	193
Changes in the insular experiment stations.....	353
The Sixth International Congress of Genetics.....	497
The agricultural experiment stations in 1931.....	641
Federal appropriations for agricultural research.....	643

VOLUME 68

The forty-sixth convention of the Association of Land-Grant Colleges and Universities.....	1
Research at the 1932 meeting of the Association of Land-Grant Colleges and Universities.....	141
Research in the Federal Department of Agriculture.....	285
William Arnon Henry, Wisconsin pioneer.....	429
Personnel changes in the Office of Experiment Stations.....	573
Chemical research in relation to agriculture and home economics.....	717

VOLUME 69

General indexes to <i>Experiment Station Record</i>	1
The <i>Record</i> now a monthly.....	2
Fiftieth anniversary of the Alabama and Wisconsin Experiment Stations.....	161
Appropriations available to the Federal Department of Agriculture.....	321
A handbook of the agricultural experiment stations in temperate countries.....	481
The agricultural experiment stations in 1932.....	625
Samuel Fortier, a pioneer leader in studies of farm irrigation practice.....	769

VOLUME 70

The forty-seventh convention of the Association of Land-Grant Colleges and Universities.....	1
Research at the 1933 meeting of the Association of Land-Grant Colleges and Universities.....	145
The passing of Presidents Thompson and Thatcher.....	289
Objectives in agricultural research, by B. Youngblood.....	433
The retirement of Drs. Taylor, Marlatt, and Marvin.....	577
Progress in agricultural adjustment.....	737

SUBJECT INDEX

NOTE.—The numbers inclosed in parentheses refer to volume numbers, the others to pages. The station publications are indicated by an abbreviation of the station immediately before the page number, except where all the references are from the same station, in which case the abbreviation precedes the volume number.

- Abaca—
bibliography, (70) 321.
grading, (70) U.S.D.A. 464.
Philippine, bleaching, (61) 394.
relation to banana wilt fungus, (67) 405.
root knot, (66) 746.
- Abax ater, life history and habits, (66) 557.
- Abella—
new species, description, (67) 443.
subflava, notes, (63) N.Mex. 455.
tomaspidis n.sp., description, (68) 641.
- Abelloides marquesi n.g. and n.sp., description, (62) 155.
- Abbreviations in original descriptions, protest against use, (62) 647.
- Abdomen, diseases of, (70) 241.
- Abia americana on Lonicera, (69) 73.
- Abies concolor twig canker, notes, (66) 643.
- Abirus yashiroi n.sp., description, (64) 249.
- Abortion—see also *Alcalignes abortus*, *Bacillus abortus*, *Bacterium abortus*, and *Brucella abortus*.
agglutination test—
collection of blood for, (62) Ill. 263.
discrepancies, (61) 567.
for, (61) Idaho 675, 873; (67) 596; (68) Utah 243; (69) Ind. 104, Minn. 318; (70) 241, 385, Conn.Storrs 385.
in field, (64) 72.
rapid macroscopic, (64) 772.
relation to agglutinins in sera, (62) 75.
technic, (62) 260.
value, (64) 557.
- agglutination tests, principles and practices, (69) 107.
- agglutination tests, rapid and tube, (67) Ohio 69.
- agglutination titer, effect of trypan blue, thionine, and pyronine, (69) 108.
- and *Brucella suis* infection in a sow, (65) Mich. 670.
- and sterility studies, (62) Ky. 262.
- answers to questions regarding, (64) Ill. 265.
- antibody titer curves in, (65) Ind. 174.
- avirulent vaccine for, (61) Mich. 873.
- Abortion—Continued.
bacilli and *Bacillus paratyphosus*, identification, (66) 70.
bibliography, (62) 263.
blood reactions and breeding records, correlation, (66) 572.
breeding results in a herd of cattle, (69) 348; (70) 674.
carrier problem, (62) Calif. 779.
caused by unusual strain of *Brucella*, (64) 73.
chemotherapy, (63) 873; (64) 557.
control, (61) Oreg. 68, 70; (62) 263, Del. 468, Tex. 666; (63) Wash.Col. 273, Nebr. 672; (65) 70, Utah 670; (66) N.H. 71, Idaho 270, Ill. 270, 371, Mo. 371, 469; (67) Wyo. 70, 72, 312, 449, 450, Tex. 740; (68) 245, Tenn. 246, Mich. 811, W.Va. 811; (70) 244, Tenn. 244.
control, breeding principles and blood test in, (66) 174.
control by nonvirulent vaccine, (66) Mich. 173.
control, controversial points relating to, (70) 832.
control in Pennsylvania, (64) 558.
control in State institution herds, (63) 773; (70) 386.
control, papers on, (62) 260, 555, 668.
control, progress in Connecticut, (62) 773.
control project, (62) Ill. 374.
control, value of lye solution as disinfectant, (69) 107.
control with organic iodine, (65) N.J. 872.
control with trypan blue, (70) 92.
detection, (63) Ohio 72, Wis. 73.
detection, comparative blood and milk tests, (68) 92.
development, effect of iodine feeding, (68) 229.
diagnosis, (62) 876; (68) 249; (69) 856.
diagnosis by rapid agglutination test, time element in, (67) 741.
diagnosis, double intradermal test for, (63) 479, 574.
diagnosis, drawing and handling blood samples for, (69) Conn.Storrs 107.

Abortion—Continued.

- diagnosis, test tube agglutination test for, Minn., (65) 177; (66) 175.
diseased herd, breeding record, (65) Mich. 771.
distribution in nature of causative organism and control, (68) 811.
economic aspects, (64) Nebr. 175; (65) 268.
economic losses due to, (64) Oreg. 376.
effect of metaphen on agglutinin titer, (67) 72.
effect of nutrition, (63) 479.
effect of organic iodine feeding, (67) N.J. 594.
elimination of positive reactors, (64) S.Dak. 678.
epizootic, and undulant fever, relation, (62) 262; (69) 266.
epizootic, summary, (62) 875.
eradication, (61) Ga. 175; (62) West. Wash. 558; (63) N.J. 371, Idaho 573; (64) Miss. 72, Mo. 72, West. Wash. 677; (65) Utah 670; (66) 469; (68) Tenn. 246, Idaho 375, Mich. 811; (69) N.H. 420, Idaho 865; (70) 240, 832.
eradication in infected herds, (67) Md. 742; (68) 93; (69) Nebr. 578.
free herds, purchased v. home-grown replacements for, (64) 558.
immunity during calfhood, (64) 265.
immunization, (61) Mich. 471; (69) 585; (70) 675, 679.
in a valuable dairy herd, vaccination and segregation in, (70) 679.
in animals, summary, (63) N.Dak. 273.
in buffalo and elk in Yellowstone National Park, (68) 667.
in cattle, caused by molds, (64) 380.
in cattle in Netherlands, (69) 426.
in cattle in Puerto Rico, (64) 380.
in cattle, questions on, (66) 174.
in cattle, vaccination with living cultures, (62) 559.
in cows on different rations, (65) 70; (66) 371.
in domestic animals, (64) 677.
in fowls, (61) Mich. 875; (62) 471; (64) 477.
in heifers, (64) Ohio 677.
in mares, (64) Ky. 173; (69) Ind. 104.
in mares, filtrable virus of, (69) Ky. 433.
in mares, vaccination experiments, (65) 670.
in monkeys, (65) Mich. 771.
in rabbits, (64) 558; (66) 472.
in range animals, (65) Wyo. 176; (67) 314.
in sheep, (64) 74; (66) 466; (68) 672.
in sheep and goats in Cyprus, (69) 109.
in sheep, cause, (65) 377; (68) 531.
in sheep, spirilla as cause, (69) 717.
in sheep, vibronic, (63) 774.
in South Africa, *Vibrio foetus* as cause, (67) 70.

Abortion—Continued.

- in swine, (63) Ill. 173; (64) Ky. 173; (65) 873; (66) Mo. 371, 466; (69) Calif. 104, Ind. 104.
in swine, epizootology, (70) 97.
in swine in Denmark, (66) 668.
in tuberculous cattle, (68) 380.
inheritance of resistance and susceptibility, (68) 245.
live germ vaccine in beef herd, (70) 94.
nature and economic importance, (70) 241.
need for further research, (69) 273, 713.
notes, (66) P.R. 272.
official regulations for, principles, (70) 241.
organism of cattle, immunity of human beings to, (65) Mich. 772.
organism, survival on pastures, (63) Ga. 172.
organism, tissue reaction to, (65) Mich. 771.
papers on, (64) 71; (69) 273.
partial agglutination reactions, significance, (64) 556.
portals of entry, (69) 426.
prevention, (61) Mich. 471; (63) 75; (64) Miss. 72, Mo. 72.
progress in control, (61) 257.
rapid spread in an accredited herd, (69) 426.
rate and *Bruce* agglutination reaction, (66) Mich. 175.
relation to interherd transfer of cattle, (63) 773; (66) 174.
relation to milk, (67) 313.
relation to nutrition of cattle, Wis., (61) 173; (67) 313.
relation to trichomonads, (61) 471; (69) 712, 713.
relation to undulant fever in man, (67) 741.
report, (61) 70.
research by Bureau of Animal Industry, (65) 265.
resistance to, effect of nutrition, (63) Wis. 73.
revised bulletin on, (70) U.S.D.A. 527.
rules and regulations for accredited herds, (63) 479.
spread, relation of bull to, (62) 260, 263.
studies, (61) Kans. 172, 768; (63) Mont. 371, La. 574; (64) Ky. 173, Oreg. 377, Mich. 380, Wash.Col. 676, Ill. 877, Kans. 878; (65) Wis. 470, Conn.Storrs 775; (66) Wash.Col. 771; (68) Ky. 375, Mich. 375, N.C. 526, Kans. 529, Ill. 666, Ariz. 811, Wyo. 811; (69) Calif. 104, Kans. 265, 713, Wis. 865; (70) Ky. 240, Tex. 241, U.S.D.A. 526, Colo. 674, Ill. 674, Ariz. 825, N.C. 825.
summary, (70) 530, 833.
tests, (67) N.H. 596.

- Abortion—Continued.
 transmission, (61) 471; (68) Utah 244.
 transmission from immune dams to progeny, (70) Mo. 240.
 transmission from swine to cattle, (70) Mo. 240.
 use of Huddleson's vaccine for, results, (61) 674.
 vaccination of pregnant cows with living bacilli, effect, (69) 428.
 vaccination, problem, (62) Mich. 469.
 vaccination with an avirulent culture, (65) Mich. 771.
 vaccination with live cultures, (66) Tex. 69.
 vaccine, preparation, (63) 170.
 vaccines, commercial, viability and virulence, (65) Mich. 175.
 vaccines, pathogenicity for guinea pigs, (63) 74.
 work with bacterin in, (68) 529.
- Abortus-melitensis group, fermentation of carbohydrates by, (62) 772.
- Absidia in soil flora, (65) 320.
- Absidia ramosa, relation to abortion, (64) 380.
- Abutilon, self-sterility in, (66) 143.
- Acacia—
 arabica, notes, (65) 246.
 catechu and *Cassia florida*, suitability as lac hosts, (68) 785.
 glaucescens poisonous to livestock, (62) 558.
 mollissima, seed selection in, (67) 137.
- Acalla hastiana on osiers in Czechoslovakia, (62) 648.
- Acalla schalleriana, notes, (70) 208.
- Acanthaleyrodes, new genus, erection, (67) 432.
- Acanthocephala, nomenclature, (61) 350.
- Acanthocoris scabrator, bionomics, (66) 758.
- Acanthocoris scabrator, life history and habits, (61) 754.
- Acanthopsyche junodi, insecticidal dusts for tests, (69) 78.
- Acanthoscelides obtectus, *see* Bean weevil.
- Acanthoxyurus shortridgei n.sp., notes, (67) 70.
- Acarophenax tribolii, notes, (69) 396.
- Accounting, farm, *see* Farm accounting.
- Acer and Staphylea, chromosome number in, (70) 604.
- Acerastes, new genus, erection, (61) 758.
- Aceratagallia, keys, (70) U.S.D.A. 210.
- Acetaldehyde, effect on plant respiration, (67) 509.
- Acetaldehyde, use in fruit storage, (65) 232.
- Acetic acid—
 as soil disinfectant, (67) Mass. 399, 540; (69) Mass. 663.
 bacilli, formation of fructose and kojic acid by, (70) 165.
 dissociation constants, evaluation, (65) 611.
 formic acid in, determination, (61) 109.
- Acetic acid—Continued.
 treatment of tobacco beds, effect, (66) Ky. 146.
- Acetic fermentation organisms, inhibition of growth and metabolism, (70) 442.
- Acetone—
 biological production, factors in, (69) 5.
 in blood of pregnant and nonpregnant cows, (65) 567.
 production from corn, fermentation methods, (61) Wis. 107.
 production from molasses, (69) P.R. 771.
- Acetone-butyl alcohol fermentation, intermediary compounds in, (70) 293.
- Acetonemia, and acetonemia with parturient paresis, (70) 831.
- Acetonuria in sheep, (70) 680.
- Acetylene, effect on ripening process of fruits, (68) 175.
- Acetyl-*l*-tryptophane, racemization, (68) 12.
- Acetyl-methyl-carbinol test, improved reagent for, (68) 14.
- Achaea lienardi, notes, (61) 550.
- Achaetoneura genus, North American, revision, (64) 753.
- Achatodes zeae—
 biology and morphology, (69) U.S.D.A. 389.
 bionomics, (64) Iowa 851.
 notes, (61) Iowa 354, Mich. 450.
 parasites, bionomic notes, (62) 545.
 studies, (63) 356.
- Achlya prolifera affecting rice, (67) 267.
- Achorutes armatus, biology and control, (66) Pa. 756.
- Achorutes manubrialis in cold frames, (65) Conn.State 451.
- Achroia grisella, biology, (64) 544.
- Achroia grisella, studies, (63) 753.
- Achromobacter putrefaciens, proposed name, (67) Iowa 308.
- Acid—
 ingestion, long-continued, effect on reproduction, (67) 295.
 lead arsenate composition, relation to arsenical injury, (62) 55.
 output of infants on breast milk and cow's milk, (63) 290.
 phosphate, *see* Superphosphates.
- Acidimetry, applied, principles, treatise, (67) 203.
- Acidimetry, combination indicator for, (67) 103.
- Acidity, soil, *see* Soil acidity and Soils, acid.
- Acidophilus milk, *see* Milk.
- Acidosis—
 dairy feeds causing, (69) Ohio 99.
 in cows and corn silage feeding, (64) Ohio 767.
 in dairy cattle, (67) Ohio 65.
 of pregnant ewes, Ky., (61) 373; (62) 254; (64) 173; (66) 171; (68) 375.
- Acids—
 amino, *see* Amino acids.
 disinfecting power, (61) 870.
 fatty, *see* Fatty acids,

Acids—Continued.

- in feces of infants, effect of feeding, (63) 290, 893.
 in figs, (61) 804.
 in maple sirup, (61) 804.
 in plant cell membranes, (61) 815.
 in salt solutions, thermodynamic properties, (65) 611.
 organic—
 and carbohydrates in succulent plants, interrelations, (69) 187.
 for differentiation of *Salmonella pullorum* and *S. gallinarum*, (66) 375.
 in green plants, physiology, (69) 187.
 in honey, (65) 408.
 in plant tissues, determination, (66) 801.
 in tobacco leaves, (65) Conn. State 9.
 ionization constants, (61) 708.
 production from carbohydrates, (67) U.S.D.A. 359.
 role in plant metabolism, (70) 166.
 unsaturated, applicability of quinhydrone electrode, (64) 10.
Acne vulgaris, vitamin D treatment, (69) 762.
 Acorn storage in southern States, (64) 344.
 Acorns, feeding value, (67) 589.
 Acorns, tannin in, state and role of, (66) 319.
 Acrididae control in Russia, (62) 649.
 Acrididae in Siberia, zonal and ecological distribution, (66) 847.
 Acridine derivative, action on *Bacillus abortus*, (65) 869.
Acridotheres tristis, notes, (61) 357.
 Acriflavine treatment of undulant fever, (61) 872; (62) 468.
 Acrobasis—
caccinii, notes, (69) Fla. 231.
caryae, see Pecan nut case bearer.
juglandis, see Walnut case bearer.
pallioloella, control, (61) 553.
 spp., notes, (67) Fla. 559.
vaccinii, notes, (67) Fla. 559.
Acrocercops astaurota, biology and control, (67) 579.
Acrocercops astaurota, life cycle and habits, (64) 461.
Aerolophus sp., damage to corn, (65) Iowa 153.
Acronarista cornuta n.sp., description, (67) Tex. 576.
Acrostalagmus aphidum—
 fungus parasite of aphids, (62) 246.
 notes, (67) 694.
Acrosternum hilaris, see Stink bug, green.
Acrothecium lunatum, notes, (68) 769.
Acrothecium n.sp. on grapevines in India, (67) 46.
Acrotomopus atropunctellus in Argentina sugarcane, (66) 855.
Acrydium arenosum, inheritance of color patterns in, (65) 217.

Actinobacillosis—

- and actinomycosis, differentiation, (67) 740.
 in sheep, (67) 70.
 of cattle in United States, (69) 585.
 use of term, (69) 714.
Actinobacillus, systematic relationships, (70) 93.
 Actinomyces—
asteroides infection in bovines, (70) 93.
bovis, preservation in ray fungus form, (69) 269.
 decomposition of hemicelluloses by, (66) 10.
dermatonomus n.sp., notes, (62) 669.
fulvissimus n.sp., description, (64) 17.
necrophorus, notes, (65) 572; (66) Mont. 773.
 on roots of cannas, (62) Del. 746.
praecox, notes, (64) 234.
scabies, notes, (64) 233; (65) 345, N.J. 838; (67) 407.
 sp., notes, (65) 749; (66) Del. 543.
 Actinomycetes in Danish soils, (64) 17.
 Actinomycetes, molds, and yeasts, treatise, (68) 742.
 Actinomycosis—
 and actinobacillosis, differentiation, (67) 740.
 in livestock, etiology, (64) 71.
 of mammary gland of cows, (63) 874.
 studies, (66) 468; (69) 269.
 use of term, (69) 713.
Actinonema rosae, notes, (66) 152.
Actinophora fragrans trees, wholesale destruction by buprestid borer, (62) 157.
 Acuarria—
hamulosa in Ontario poultry, (67) 596.
martinagliai n.sp., notes, (64) 771.
nasuta, description, (64) Guam 849.
 Addisin for treatment of pernicious anemia, (68) 869; (69) 314.
 Addisin, proposed name for hormone of human gastric juice, (67) 629.
 Adelves abietis—
 as nursery pest, (65) 455.
 control, (64) 854; (65) N.Y.Cornell 53.
 notes, (61) Mich. 450; (64) N.Y.State 455; (70) 361, N.Y.State. 803.
 Adgelges plnicorticis, notes, (67) 566.
 Adelpnocoris—
lineolatus, notes, (63) 752.
rapidus, effect on cotton plant, (62) 655; (70) 208.
superbus, notes, Utah, (67) 287; (68) 215.
superbus, relation to flower drop in alfalfa, (68) 497.
 Adenine—
 and vitamin B₁, (70) 741.
 hydrochloride and vitamin B₁, crystal structure, (70) 741.
 ultra-violet absorption spectra, (64) 502.
 Adenoma, intestinal, of swine, (65) 572.
 Adhesion and cohesion, (69) 323,

- Adisura atkinsoni*, parasite of, mass rearing, (69) 234.
- Adjustment program in southeast Missouri, critical elements, (69) Mo. 601.
- Adlay, variety tests, (63) Guam 129.
- Adobe construction, studies, Calif., (62) 80; (65) 777.
- Adobe houses, temperature lags in, (67) Calif. 605.
- Adoretus sinicus*, natural enemies, (61) 753.
- Adrenal cortex, chemistry, (67) 645.
- Adrenal glands—
disappearance of vitamin C from, during scurvy, (69) 619.
hypertrophy in scurvy, (69) 620.
isolation of carotene from, (66) 607.
of guinea pigs, antiscorbutic activity, (70) 426, 880.
of human fetus, vitamin C in, (70) 880.
staining ability for silver nitrate as scurvy test, (70) 283.
vitamin C in, (69) 903.
- Adrenalectomy, double, and oestrous cycle in rats, (64) 215.
- Adrenaline, action on bovine uterus, (65) 868, 869.
- Adsorption by silica gel, theory and applications, (69) 823.
- Acidium mori*, notes, (68) 775.
- Aedes—
aegypti, see Yellow fever mosquito.
albopictus as dengue fever carrier, (63) 258.
campestris eggs, viability, (64) 365.
fasciata, anthrax transmission experiments, (62) 168.
flavescens, life history, (62) 856.
fluviatilis, notes, (70) 657.
scapularis, notes, (70) 657.
spp., studies, (61) Mont. 153.
sylvestris, egg-laying habits, (64) 160; (65) N.J. 847.
- Aedophronus echinatus* affecting almonds, (66) 558.
- Aegeria—
exitiosa, see Peach borer.
pictipes, see Peach borer, lesser.
rutilans, see Strawberry crown moth.
vignae n.sp., description, (62) 545.
- Aegerita webberi* host relations, (62) 360.
- Aegilops—
and *Triticum* hybrid, inheritance in, (66) 322.
and *Triticum* hybrids, cytological studies, (67) 119; (68) 32, 33.
hybrids, pollen mother cells, nuclear divisions in, (63) 324.
- Aeginetia indica*, notes, (69) 534.
- Aegyptianella pullorum*—
latent, effect of splenectomy, (65) 674.
n.g. and n.sp., description, (62) 566, 775.
notes, (65) 475, 877; (70) 382.
of fowls in Algeria, (65) 877.
of fowls in Greece, (69) 595.
of fowls in South Africa, (69) 114, 420.
parasitic entity, (68) 820.
- Aenoplex carpocapsae*—
life cycle of male, unusual variation, (70) 215.
parasite of codling moth, (62) Del. 754.
- Aeolothrips fasciatus*—
control, (64) Oreg. 357.
on apples, notes, (61) Oreg. 53.
- Aeration of culture solutions, effect on tobacco plants, (61) 213.
- Aerial wires, humming and atmospheric disturbances, (65) 111.
- Aerobacter—
aerogenes and *Escherichia coli*, differentiation, (67) 662.
aerogenes survival after pasteurization in ice cream, (64) 473.
oxytocum in milk, effect, (64) 68.
- Aerological—
code for pilot balloons, (64) U.S.D.A. 416.
observations, instructions for making, (64) U.S.D.A. 416.
- Aeronautics, status of instruction in, (65) 889.
- Aethalion reticulatum*, morphology and biology, (62) 155.
- African coast fever—
and redwater, studies, (64) 677.
immunity, (61) 69; (67) 70.
in South Rhodesia, (70) 676.
papers on, (63) 871.
parasite, life cycle in ticks transmitting it, (64) 265.
studies, (63) 170; (67) 314; (68) 666.
transmission experiments, (64) 71; (67) 451.
- Agalaxia, sheep and goat, control, (62) 170.
- Agalaxy, contagious, causative agent, (67) 312.
- Agallia—
keys, (70) U.S.D.A. 210.
sanguinolenta, notes, (64) Kans. 852; (68) U.S.D.A. 501.
- Agalliana, keys, (70) U.S.D.A. 210.
- Agalliosis forms, keys, (70) U.S.D.A. 210.
- Agameris unka*, life history and habits, (67) 710.
- Agar—
addition to Cheddar cheese, Idaho, (61) 869.
agar swelling, effect of ultra-violet rays, (61) 120.
decomposition by an aerobic bacterium, (68) 30.
- Agaricus campestris*, decomposition of manure by, (66) 316.
- Agathis bischoffi* parasite of moth enemy of lac insect, (69) 233.
- Agave leaf diseases, notes, (67) 408.
- Agave lechuguilla fiber and waste, composition, (67) 519.
- Agaves as fiber plants, (66) 427.
- Age, advanced, basal metabolic rate in, (63) 192.
- Ageniaspis fuscicollis*, notes, (69) 247.

- Agglutination—
 test, rapid, apparatus and technic, (68) 535.
 test, use in phytobacteriology, (65) 746.
 tests, zone phenomenon in, (63) 74.
- Agglutinins—
 in blood produced by bacteria in respiratory tract of fowls, (65) 270.
 nonspecific, in bovine sera, (62) 75.
 production by phytopathogenic bacteria, (65) 840.
- Aggregates, road, *see* Road materials.
- Aglais californica, notes, (68) 351.
- Agonischius spp., notes, (64) 249.
- Agonocryptus, new genus, erection, (61) 758.
- Agonoscelis versicolor, studies, (62) 853.

 and gasoline blends v. gasoline for fuel economy, (70) 545.
 and gasoline fuel tests, (70) U.S.D.A. 538.
 and gasoline mixtures, knock rating tests, (70) 254.
 and gasoline mixtures, road tests on, (70) 254.
 anhydrous, manufacture and use in internal-combustion engines, (68) 258.
 as fuel for tractor engine, effect of variable compression ratio, (66) 878.
 as motor fuel, (69) U.S.D.A. 730; (70) 253, 690.
 benzyl, small quantities, determination, (69) 490.
 byproduct from cane molasses, feeding value, (70) Md. 662.
 denatured, freezing and flow points for, (69) 122.
 effect on germ cells of male rabbits, (69) N.Y.Cornell 35.
 effect on growth of seedlings, (61) 514.
 ethyl, *see* Ethyl alcohol.
 gasoline, and kerosene as fuel for tractor engines, (66) 876.
 in blood, interferometric determination, (67) 209.
 industrial, potash from, (61) Md. 321.
 method for determining soil moisture, (66) 204.
 polyhydric, precipitation as copper barium complex, (64) 13.
 power, from sisal waste, (62) 672.

Alcohol—Continued.

production from cane bagasse, (63) La. 314.

separation of empty red spruce seed, effect, (67) 41.

triatomic, from urine of pregnant women, physiological properties, (65) 30.

Alcoholic fermentation, *see* Fermentation (s).

Alcoholism, effect on learning ability, (63) 327.

Alcohols, aliphatic—

and formates, toxicity to red spider, (68) 653.

toxicity, (68) 29, 492.

Aldehydes—

aromatic, condensation with glycine and acetylglycine, (63) 412.

chemical constitution and germicidal activity, (61) 410.

semicarbazones, optical properties, (64) 511.

Aldose sugars, oxidation, course by bromine water, (67) 199.

Aldoses, estimation of small amounts, (64) 610.

Alduronic acids, naphthoresorcinol reaction with, (67), 104.

Aleucaemia in dogs, (64) 771.

Aleurocanthus woglumi, *see* Blackfly, citrus.

Aleurodes bergi, notes, (67) 562.

Aleurodidae—

of Egypt, (68) 784.

on citrus in Far East and parasites, (62) 155.

Aleurothrixus floccosus, undescribed parasites of, (68) 794.

Aleyrodes vaporariorum, *see* White fly, greenhouse.

Aleyrodidae—

attacked by gall midges, lists, (64) 365.

of Brazil, (61) 755.

of India, (66) 350; (67) 151.

Alfalfa—

analyses, (69) Alaska 36.

and bromegrass mixtures, yields, (65) Mont. 528.

and grass mixtures v. pure stands, (69) Ohio 38.

and lespedeza hay, comparison, (70) N.C. 822.

and rape pasture for pigs, (61) Mich. 459.

and red clover, protein in, comparison, (67) 32.

and tankage, supplement to hogging down corn, (67) Mont. 300.

and timothy as crops, comparison, (64) Ohio 625.

and timothy hay for cattle, comparison, (66) Va. 567.

and timothy mixture, value, (64) Ill. 829.

anthracnose resistant varieties, (62) Miss. 145.

aphid, control by burning, equipment for, (67) Calif. 605.

as forage for hogs, (69) S.C. 254.

Alfalfa—Continued.

as orchard cover crop, (68) 479, Wash. Col. 760.

as pasture for dairy cows, (67) S.Dak. 158; (68) Mich. 236, 753; (69) Mich. 572.

as principal ration, physiological effect, (62) 870.

as rotation crop, (64) Minn. 134.

as source of vitamin A in sorghum-grain rations, (65) 363.

as vitamin supplement and effect on yolk color, (69) Idaho 839.

ash, effect on calves, (66) 367.

autogamous, (69) 793.

bacteria, inhibition by soil bacteria, (65) Wis. 422.

bacterial root rot, notes, (63) 44.

bacterial wilt—

description, (65) Wyo. 747.

 v. tepary bean hay for heifers, (69) Okla.Panhandle 573.
 v. timothy hay for horses, (61) Iowa 364.
 v. wheat hay for steers, (68) Wash. Col. 796.
 value for dairy heifers, (68) Ark. 661.
 vitamin A in, (61) Ohio 456.
 vitamin D in, (61) Wis. 168.
 hopper, three-cornered, feeding punctures, chemical nature of sheaths in, (70) 360.
 hopper, three-cornered, injury from, (64) Ala. 355.
 hopper, three-cornered, notes, (65) Ala. 455.
 improvement, N.J., (65) 824; (67) 517.
 in bacterial wilt sections, effect of cultivation, (65) Iowa 125.
 in England and Wales, (68) 185.
 in high plains dairy ration, (63) Okla.Panhandle 567.
 in prairie lime belt of South, varietal adaptations, (68) 609.
 in Quebec, (63) 131.
 in rotations, effect on potato yield, (68) Mont. 323.
 in rotations, value, (63) N.Y.Cornell 33, Colo. 514; (65) Colo. 717; (69) U.S.D.A. 789.
 in western Oregon, (61) Oreg. 633.
 inheritance of economic characters in, (70) Ariz. 761.
 inoculation experiments, (63) 333; (67) 123; (68) 319.
 insects affecting, (61) Kans. 152, 658; (62) Nev. 55; (64) Kans. 852,

Alfalfa—Continued.

- irrigation experiments, (61) Utah 27, Kans. 126; (63) Utah 630; (64) Kans. 829; (66) Idaho 220, Wash.Col. 730; (68) Wash.Col. 755; (69) Tex. 39.
- irrigation practices, (63) U.S.D.A. 677.
- irrigation requirements, (67) Can. 463; (69) Kans. 200.
- Kaw, new variety, (67) 669.
- Ladak, for range improvement, (69) N.Mex. 200.
- leaf meal—
as supplement to grain, (68) Mich. 364.
- bone-building value for poultry, (66) Pa. 261.
- effect on egg production, hatchability, and fertility, Ark., (62) 868; (64) 465; (66) 566; (68) 653.
- nutritive value for growing chicks, (67) N.Mex. 62.
- leaf spot in Manitoba, (63) 839.
- leaf spots, notes, (64) Mont. 229.
- leaves—
and stems for lambs, calcium and phosphorus balances, (69) 406.
- as protein substitute, (68) Mich. 370.
- as protein supplement, (65) Mich. 765.
- dried, value for poultry, (61) Idaho 861.
- vitamin A in, effect of curing methods, (63) N.J. 365.
- lime requirements, (68) W.Va. 755.
- long v. cut, effect on steers, (65) Wyo. 159.
- looper, notes, (63) Utah 251.
- loss of stands in, (67) N.Dak. 667.
- losses from bacterial wilt, (69) U.S.D.A. 644.
- manuring experiments, (61) Oreg. 26.
- maturity, effect on milk production and bacteria in milk, (70) Ariz. 822.
- meal, digestibility by swine, (70) 369.
- meal, vitamin A in, (69) N.H. 406; (70) Tex. 131.
- molasses meal for fattening lambs, (65) Nebr. 859.
- monograph, (66) 427.
- mosaic disease, notes, (65) Calif. 727.
- mulch, effect on apple trees, (64) N.Y. Cornell 632.
- nodulation and growth, relation to strains of nodule bacteria, (67) 237.
- nodule formation, effect of number of bacteria in culture, (63) 729.
- old stands, fertilizer experiments, (65) Mich. 719.
- on bacterial wilt infected soil, tests, (69) Iowa 37.
- on cut-over lands, (63) Idaho 334.
- on sandy soil, fertilizers for, (63) Mich. 527.

Alfalfa—Continued.

- optimum soil reaction, (66) Del. 526, W.Va. 528.
- origin, migration, and distribution, (70) 467.
- pasture—
for beef cattle, (68) Ill. 653.
- for fattening cattle, Nebr., (63) 262; (67) 589; (69) 562.
- for heifers, (70) Nebr. 75.
- for lambs, (70) Ill. 661.
- for pigs, (61) Mich. 462, U.S.D.A. 761; (63) Mich. 559; (64) Mont. 217, Kans. 867; (69) Kans. 248.
- irrigated, returns from, (61) Kans. 162.
- v. dry lot for pigs, (61) 257.
- v. sweetclover pasture for dairy cows, (61) S.Dak. 66.
- Peruvian, production test, (66) P.R. 223.
- plant bug in Iowa, (63) 752.
- plant, characters concerned with seed production, (69) 355.
- plant juice, rate of appearance as feed flavor in milk, (68) 808.
- pollination and seed setting, (67) 237.
- potassium in, variations, (62) 220.
- premature dying out, cause, (65) Calif. 727.
- production—
effect of fallowing, (63) 332.
- effect on composition of arid soil, (67) 16.
- factors affecting, (69) Wyo. 791.
- studies, (63) Ill. 633.
- subsoil moisture in, significance, (61) 518.
- survey, (66) Calif. 478.
- tests, (68) Alaska Col. 182.
- trials, (64) West.Wash. 627.
- products as green feed substitutes for laying hens, (70) 228.
- products, vitamin A in, (68) 659.
- proteins, biological value, Wash.Col., (64) 656, 657; (66) 762; (68) 796.
- proteins, metabolism experiments and biological value, (61) Mich. 66.
- proteins, nutritive value, (69) N.Y.Cornell 90.
- proteins, value, effect of plant maturity, (63) 360.
- pure lines, economic characters in, (68) Ariz. 753.
- rations, physiological effect, (67) 723, 731.
- relative susceptibility to wilt and cold, (65) Nebr. 148.
- residual effect on soil, (61) Kans. 116.
- resistance to potato leafhopper, (68) Ky. 354.
- root injuries from freezing, (62) 747.
- root reserves, (64) 27.
- root rot resistance in, (66) Tex. 43.
- roots and tops, effect on molds in soil, (61) 510.

Alfalfa—Continued.

- rotation experiments, (61) U.S.D.A. 724.
 roughages, processing for wintering stock calves, (70) Mo. 219.
 rust, notes, (65) 345.
 screenings, feeding value, (68) S.Dak. 796.
 seed—
 chalcid fly, studies, (63) Utah 656.
 crop, harvesting, (66) Mich. 132.
 green, value, (64) Mont. 216.
 production, (61) Utah 29; (65) Utah 432, Mich. 729; (67) Mich. 32, 126, Utah 126; (68) 185; (69) Oreg. 354.
 production, chalcid control in, (65) U.S.D.A. 552.
 production, effect of bees, (67) Mich. 384.
 production, relation to insects, Utah, (67) 287; (68) 215.
 quality, effect of color and plumpness, (67) 237, 522.
 quality sold in Colorado, (67) Colo. 126.
 screenings v. linseed meal for dairy cows, (69) Idaho 848.
 setting, (64) 28; (67) 237.
 sources, effect, (63) Nebr. 628.
 yields, factors affecting, (61) Idaho 823.
 seeding, cultivation, and cutting experiments, (67) Iowa 378.
 seeding experiments, (61) Oreg. 27, Va. 726; (63) Idaho 523; (64) Okla. 732.
 seedlings, hardiness, determination, (67) 379, Nebr. 508.
 seeds, hard, agricultural value, (62) 136.
 seeds, hard, studies, (65) 39.
 seeds of different shapes, value, (62) 136.
 seeds, quality, (62) Mich. 426.
 source of seed and curing studies, (67) Nebr. 517.
 source of seed tests, (66) W.Va. 528.
 spring seeding, (66) Tenn. 822.
 stand and yield, correlation, (66) 225.
 stands, different practices on, (66) Ark. 526.
 stands, permanency, (62) 425; (64) Ark. 431.
 stem blight, notes, (66) 147.
 stem nematode, relation to alfalfa seed production, (67) Utah 287.
 strains and seed sources for Michigan, (65) Mich. 628.
 strains resistant to homopterous insects, (67) 53.
 studies, Conn.Storrs, (63) 131.
 Sudan grass, and sweetclover pastures, comparison, (70) S.Dak. 822.
 tests, Hawaii, (61) 723.
 thrips, notes, (69) Kans. 232.
 thrips, predacious mite on, (64) 543.

Alfalfa—Continued.

- use of water for, effect of irrigation head and length of run, (67) N.Mex. 76.
 v. rape pasture for pigs, Mich., (64) 255; (65) 164.
 v. soybean hay for milk production, (66) W.Va. 568.
 v. sweetclover hay for dairy cows, (70) S.Dak. 822.
 v. sweetclover, white, for milk production, (61) Kans. 167.
 v. tankage for breeding gilts, (68) Mich. 795.
 variegated, value, (61) N.J. 725.
 variegated, variety tests, (61) Mich. 432.
 varietal comparisons, (61) Kans. 126.
 varieties, (61) Kans. 125; (62) Mich. 426; (70) Pa. 325, Va. 764.
 and strains, (67) N.J. 123.
 behavior, (65) N.J. 31.
 cold resistance in, (69) Kans. 200.
 comparison, (69) Wis. 791.
 for interior Alaska, (70) Alaska 172.
 hardy, (64) Iowa 825.
 improved, (69) Wis. 791.
 in order of hardiness, (63) Mass. 525.
 resistance to controlled low temperatures, (68) 185.
 time-of-cutting experiment in, (68) Ariz. 753.
 variety, new, (63) 334.
 variety tests, (61) Oreg. 26, Utah 27, Kans. 125, Tenn. 127, N.Mex. 219, Mich. 432, N.J. 724, N.Dak. 726, Va. 726, Idaho 823, Nebr. 824; (62) N.Dak. 129, Ill. 328, Tex. 626, Del. 728; (63) Ohio 31, Wyo. 130, Wash.  transportation by railway cars, (63) 756.
 white spot, irrigation and cause, (65) 44.
 white spot, notes, (61) Utah 45.
 wilt—
 control, (65) Nebr. 837.
 notes, (62) 145; (63) Wash.Col. 244, Nebr. 344, Nebr. 644.
 producing fungus, host plants, (62) 48.
 producing organism, temperature and moisture relations, (62) 747.
 relation to soil temperature and moisture, (67) Ill. 693.
 resistance, (68) Nebr. 628; (69) Calif. 60.
 survey, (61) Nebr. 840.
 winter hardiness, studies, (61) Iowa 329.
 winterkilling, (61) Wis. 129; (62) 49; (70) Colo. 609.
 yellows relation to leafhopper, (62) Ky. 355.
 yellows, studies, (70) 610, 639.
 yield increases by fertilization, (64) Iowa 810.
 yields, (64) Mont. 218, S.Dak. 626; (66) W.Va. 528.
 yields, effect of leaf destruction and clipping, (69) 644.
 yields, effect of lime, (63) N.J. 318.
 yields, effect of sulfur, (64) Oreg. 317.
 yields on heavy soils, effect of fertilizers, (65) Mich. 496.
 yields, variation in experimental plats, (69) 199.
 Alfort Station work in hygiene and pathology of small livestock, (64) 176.

Algae—

- green, isolation in pure culture from soil, (68) 167.
 green, manganese requirement, (66) N.Y.Cornell 622.
 green, soil as a habitat for growth, (68) 167.
 iodine in, mode of combination, (63) 203.
 spores, in water, density, (61) N.J. 748.
 utilization of organic compounds, (63) 514.
 Alimentary canal of rats, pH of, (61) 388.
 Alimentary tract, effect of bran, (69) 749.
 Alkali—
 action on cystine and cysteine, (65) 108.
 action on thiohydantoin derivatives of cystine and cysteine, (65) 11.
 black, reclamation with sulfur, (64) Oreg. 317.
 cleaning solutions, controls, (62) 873.
 disease, cause, (63) 171; (64) S.Dak. 677.
 disease in livestock, S.Dak., (67) 69; (68) 811; (70) 825.
 disease survey, (63) S.Dak. 72.
 effect on protein, (67) 195.
 poisoning, studies, (62) Nev. 74.
 problems, (69) Calif. 16.
 reserve in blood of equines and bovines, (65) 568.
 salts, effect on nitrification in Indian soils, (67) 218.
 soils—
 electrolytes affecting reaction in, (62) 119.
 flora and productivity, (64) 815.
 leached, microflora, (63) 213; (64) 17.
 leached, nitrogen fixers in, (68) 738.
 management, (63) Iowa 18.
 physical character, effect of replaceable sodium, (66) Utah 117.
 reclamation, (61) Oreg. 18, Calif. 314, Calif. 317; (63) Idaho 513; (64) Oreg. 317; (66) P.R. 209; (68) Wyo. 739; (69) Idaho 776; (70) Wyo. 747.
 reclamation, changes accompanying, (69) 17.
 studies, (61) Idaho 810; (62) Calif. 716; (65) Wyo. 118, Utah 207.
 treatment, (63) Wyo. 116.
 unproductiveness, factors affecting, (64) 324.
 water penetration in, (70) Ariz. 745.
 spots, microflora, (64) 815.
 spots, potash for, (64) Iowa 810.
 water, irrigation with, (70) 251.
 Alkalies, effect on germicidal value of sodium hypochlorite, (67) Mich. 5.

- Alkaline—
 chemicals, effect on sludge digestion, (61) N.J. 480.
 soils, dispersion and mechanical analysis, (61) 505.
 soils, nutritional disorders due to deficiency of carbon dioxide, (68) Ariz. 306.
 soils with different exchangeable bases, properties, (61) 506.
 washing solutions, germicidal properties, (61) 411.

- Amphibians as host for chiggers and other ectoparasites, (67) 49.
- Amphicomma vulpina*, control, Mass., (61) 850; (65) 357; (69) 687.
- Amphimermis zuimushi* n.g. and n.sp., description, (67) 579.
- Amphorophora—
 - crataegi* n.sp., description, (70) 505.
 - rubi*, notes, (62) Minn. 451.
 - rubicola*, notes, (62) Minn. 451.
- Ampulex* spp., habits, (68) 507.
- Amylase—
 - activation by cyanide, (69) 187.
 - activity, effect of potassium thiocyanate and ethylene chlorohydrin, (70) 28.
 - activity, effect of thiocyanates, (66) 710.
 - from cholam, action on potato starch, (63) 311.
 - from ragi, saccharifying power, (63) 311.
 - male, extraction from alumina gel, (69) 633.
 - pancreatic, purification, (65) 11.
 - saccharogenic, of leaves of differently fertilized potatoes, (70) 754.
 - studies, (61) 11.
 - vegetable, diastatic action, (68) 149.
- Amylirosa aurantiorum*, notes, (70) 645.
- Amyosoma chilonis*, introduction into Hawaii, (66) 448.
- Anabasine sulfate v. nicotine sulfate, toxicity for aphid and leafhoppers, (69) Conn.State 546.
- Anabasine, toxicity against mosquito larvae, (69) 242.
- Anabasis aphylla, neonicotine in, (66) 448.
- Anabrus simplex*, see Cricket, Mormon.
- Anacentrinus—
 - deplanatus*, notes, (68) 794.
 - genus, synopsis, (68) 793.
 - subnudus* n.sp., description, (68) 793.
- Anacentrus injuriosus* to sugarcane, (64) 462.
- Anaerobes—
 - in dairy products, (64) 376.
 - new pathogenic, from wound infection, (62) 260.

Anaerobes—Continued.

- of gas-gangrene type, immunization, (63) 170.
- pathogenic spore-bearing, in sheep carcasses, (62) 562.
- pathogenic, studies, (63) 771.
- reduced iron for cultivation, (69) 866.
- spore-bearing, in sheep spleens, (63) Colo. 571.

Anaerobiosis and use of alkaline solutions of pyrogallol, (64) 609.

Anagrus—

- haveolus, notes, (70) 217.
- giraulti, notes, (63) N.Mex. 455.
- urichi, notes, (70) 63.

Anaitis spp., notes, (68) 499.

Analysis—

- magneto-optical methods, new research tool, (68) 436.
- mechanical, hydrometer method, (70) U.S.D.A. 253.
- microchemical and microscopical methods, economic possibilities, (68) 437.
- microgravimetric, improved technic, (66) 803.
- of plant material, chemical and physical methods, handbook, (68) 729.
- precise, microscopic examination of precipitates as aid, (66) 504.

Anaphes pratensis, notes, (61) Ind. 353.

Anaphoidea calendrae, notes, (65) 759.

Anaplasma—

- marginale, immunization against, (69) 588.
- marginale in northern Queensland, (69) 866.
- marginale, longevity in blood of cow, (61) 269.
- marginale, notes, (67) 311, 600, 743.
- marginale, transmission by ticks, (61) 175; (65) 553.
- morphology, (69) 866.
- nature of, (62) 561.
- rossicum, notes, (69) 718.
- rossicum transmission by ticks, (63) 555.
- spp., pure strains by transmission through antelopes, (69) 107.

Anaplasmoses of ruminants, (63) 478.

Anaplasmosis—

- and Gonderia mutans, studies, (64) 677.
- and nature of Anaplasma, (69) 711, 866.
- carriers, effect of splenectomy on blood, (69) 267.
- chronic, and gonderiosis in ruminants after splenectomy, (64) 771.
- deer as carriers, (70) 829.
- identity and carrier problem, (69) 582.
- in animals in Brazil, prophylaxis, (70) 383.
- in bulls being immunized against Texas fever, (62) Tex. 666.
- in cattle, (61) Kans. 172, 269; (62) 561; (63) La. 368; (65) U.S.D.A. 178, Fla. 472, Calif. 770; (67) 149, Calif. 595, Fla. 596; (69) Calif. 104, 107, Fla. 265, 426.

Anaplasmosis—Continued.

- in cattle, blood filtrates of, (70) 382.
 - in cattle not transmissible to man, (66) 468.
 - in cattle, treatment, (63) 371.
 - in Colorado, (68) 813.
 - in fowls, (67) La. 313.
 - in France, focus of, (63) 371.
 - in livestock, (67) 313.
 - in sheep in Russia, (62) 170.
 - in sheep in Uralsk, (69) 711.
 - method of obtaining pure strains of Anaplasma spp., (69) 420.
 - prenatal infection in, (66) 572.
 - studies, (62) Calif. 770; (64) Kans. 879; (66) Tex. 69, P.R. 272; (67) Tex. 740; (68) Okla. 637; (69) Kans. 265; (70) U.S.D.A. 526.
 - transmission, (64) 556, Okla. 748; (69) 910.
 - transmission by American dog tick, (67) 311, 597.
 - transmission by ticks, (61) 175; (67) U.S.D.A. 597.
 - transmission experiments, (64) 266; (69) 269; (70) 530.
 - transmission experiments by horseflies, (67) Okla. 453.
 - treatment in Tunis, (64) 266.
 - types of disease, (67) 311.
- Anarhopus sydneyensis n.g. and n.sp., description, (61) 758.
- Anarsia lineatella, see Peach twig borer.
- Anasa tristis, see Squash bug.
- Anastatus—
- disparis and Ooencyrtus kuvanae, interrelations, (69) 86.
 - semifavidus, equipment and methods of rearing, (69) 836.
 - semifavidus, notes, (69) 830.
 - spp., notes, (69) 689.
- Anastrepha—
- fraterculus, see Fruit fly, West Indian.
 - ludens, see Fruit fly, Mexican.
 - spp., notes, (70) U.S.D.A. 501.
 - striata, notes, (61) 357.
- Anatomy, pathological, compendium for veterinarians, (66) 467.
- Anax parthenope as intermediate host of Prosthogonimus putschkowskii, (61) 574; (66) 867.
- Anchorage for reinforcing bars, tests, (69) 723.
- Anchylopera—
- angulifasciana, studies, (62) N.Y.Cornell 452.
 - semiovana, biology, (70) 655.
- Ancistrocerus spp., notes, (64) N.Y.State 455.
- Ancylics comptana, see Strawberry leaf roller.
- Ancylostoma—
- caninum, two strains, egg producton, (66) 669.
 - spp., anatomy, (68) 812.
- Ancylostomidae, third larval stage of man, dog, and cat, differentiation, (68) 812; (70) 802.

- Andropogon virginicus*, composition of consecutive cuttings, (64) 532.
- Anemia**—
- achlorhydric, cause and treatment, (67) 92.
 - and leucocythemia in fowls, comparative pathology, (64) 75.
 - and pellagra-like symptoms in rats, lack of correlation, (67) 92.
 - autolysed yeast products in treatment, (70) 886.
 - blood regeneration in, (63) 896.
 - blood regeneration in, effect of liver extract, (61) 392.

 - development in young rats, (68) 712.
 - development on raw or pasteurized milk, (66) Ohio 689.
 - due to milk diet, effect of feeding amino acids, (65) 597; (67) 92.
 - etiology and treatment, (67) 486.
 - experimental, studies, (63) 596.
 - genetic lethal, in mice, (68) 317.
 - hemorrhagic, changes in erythrocytes, (67) 628.
 - idiopathic, of newborn pigs, (67) 745.
 - in animals, blood transfusion for, (62) 467.
 - in cattle and sheep, phosphorus partition of blood in, (62) 865.
 - in cattle, relation to composition of feeding stuffs, (70) 221.
 - in chicks, effect of confinement, (63) Ind. 562.
 - in chicks on milk diet, (64) Ill. 868.
 - in children, iron and copper treatment, (65) 690.
 - in dogs, (64) 96.
 - in horses, (70) 99.
 - in horses, nonspecific reactions to tuberculin, (70) 91.
 - in infancy and early childhood, (67) 90.
 - in infancy, iron and copper for, (67) 485.
 - in lambs, copper for, (69) 406.
 - in lambs, development and cure, (69) Iowa 89.
 - in pigs, (61) Ind. 363, Ind 370; (63) Ind. 559, Ind. 572; (65) Ind. 163; (66) Ill. 270, 668; (68) 227; (69) Ind. 89.
 - in pigs, effect of ferric sulfate, (68) 233.
 - in pigs, new methods of feeding copper for, (65) Wis. 459.
 - in pigs, prevention, (62) Ill. 365.
 - in pigs, treatment, (65) Ind. 174.
 - in rats, (61) 660.
 - in rats, control, (66) Ill. 270.
 - in rats, effect of high doses of iron, (62) 191.
 - in rats, improved method of study, (64) 594.
 - in rats, relation of iron and copper to reticulocyte response, (70) 872.
 - in rats, relation to vitamin E deficiency, (61) 297.
- Anemia**—Continued.
- in ruminants, (68) 227.
 - in suckling pigs, (62) Wis. 367; (63) 469, 575, 774; (67) Ind. 299, 456, 596; (69) 405.
 - in suckling pigs, prevention, (64) N.Y.Cornell 664, Ill. 864; (66) N.Y.Cornell 658; (69) N.Y.Cornell 90; (70) 515, N.Y.Cornell 815.
 - in suckling pigs, relation to blood picture, (69) Minn. 93.
 - in young pigs, (70) 241.
 - infectious equine, *see* Swamp fever.
 - infectious, hematological studies, diagnostic importance, (65) 567.
 - inorganic elements of spinach for, (62) 297, 695.
 - milk, curing and prevention by iron salts alone, (70) Ill. 661.
 - milk, in rats, effects of radiant energy, (67) 190.
 - nutritional—
 - and hemorrhagic, in rats, effect of copper and iron on hemoglobin, (66) 295.
 - blood regeneration in, (61) 590.
 - blood regeneration in, effect of inorganic elements, (62) 695.
 - cure by pigeonpeas, (70) 425.
 - effect of feeding green leafy vegetables, (64) Miss. 695.
 - effect of feeding green leafy vegetables and cowpeas, (69) 763.
 - effect of feeding sorghum and sugarcane sirups, (64) Miss. 695; (66) 295.
 - effect of intraperitoneal injection of iron, (69) 904.
 - effect of metals supplementing iron, (68) 128.
 - effect on size of heart, (66) 195.
 - in albino rats on sole milk diet, (61) 490.
 - in infancy, (68) 127.
 - in rats, (67) 346; (70) 885.
 - in rats, production, (69) 620.
 - inability of metals other than copper to supplement iron for, (65) 894.
 - iron in treatment, (68) Ill. 653.
 - optimum mineral supplements for, (66) 597.
 - purified glutamic acid as iron supplement, (67) 91.
 - review of literature, (64) 594.
 - role of manganese in, (65) 297.
 - studies, (66) Miss. 793, Ga. 794; (68) Miss. 420.
 - use of metal cages in study, (69) 763.
 - value of oysters in diet, (67) 91.
 - of pregnancy, types, (69) 314.
 - of rice disease, studies, (62) 596.
 - oysters in diet for, value, (68) 868.
 - pernicious—
 - amount of dog liver effective in, (70) 885.

Anemia—Continued.

- pernicious—continued.
 autolyzed liver for, (68) 281; (69) 314.
 desiccated hog stomach for, (64) 297.
 duodenal juice for, (70) 729.
 effect of brain diet, (66) 394.
 fish liver extract for, (68) 712.
 gastric tissue for, (64) 794.
 glutathione in substances for treatment, (68) 569.
 hog stomach preparations, (62) 398; (64) 795; (65) 296.
 liver extract for, (62) 191.
 monograph, (64) 297.
 of pregnancy, studies, (65) 297.
 relation to disorders of digestive tract, (66) 797.
 single injection of concentrated gastric juice for, (69) 314.
 stomach tissue for, (63) 597, 898.
 swine gastric juice concentrate for, (68) 869.
 vitamin B therapy in, (67) 485.
 prevention and cure, relation of copper to iron in, (68) 859.
 production in rats, improved technic, (67) 90.
 rate of development, effect of raw v. pasteurized milk, (67) Ohio 65.
 relation to copper deficiency, (62) 191.
 relation to vaccination shock in young pigs, (68) 532.
 relation to vitamin D deficiency, (69) 624, 762.
 secondary, in infants, treatment with copper and iron salts, (65) Wis. 491.
 secondary, iron and liver for, (64) 795.
 secondary, treatment, (64) 297.
 secondary, treatment, intramuscular injections for, (70) 426.
 specificity of copper as iron supplement for, (62) 688.
 sprue, pathology of bone marrow in, (70) 885.
 studies, glass cage for, design and use, (68) 134.
 treatment, (70) 137.
 treatment of 126 cases, (67) 486.
 types, extrinsic factor in, (68) 280.
 Anemias, deficiency, of childhood, (70) 885
 Anemic debility, chronic, in sheep, treatment, (66) 372.
 Aneristus—
 asterole canii n.sp., description, (69) 72.
 hispaniolae n.sp., description, (69) 72.
 mangiferae n.sp., description (69) 72.
 n.sp., description, (70) 217.
 Anesthesia, epidural, in ewes, (68) 94.
 Anesthesia, extradural, in dogs and cats, (69) 579.
 Anetia dimmocki, notes, (69) 84.
 Aneurysms, dissecting, in swine, (69) 432.
 Angel cake, effect of acid potassium tartrate, (64) 282.

- Angiosperms, chromosome numbers in, (65) 522; (66) 25; (70) 459.
 Angiostoma plethodontis n.sp., description, (70) 356.
 Angitia—
 armillata, biology and rearing, (70) 649.
 armillata, notes, (69) 246.
 blackburni, notes, (61) 851.
 nana, notes, (70) 64.
 Angora goat industry in the United States, (62) U.S.D.A. 460.
 Angoumois grain moth—
 biography, (68) 786.
 hatching of eggs, (65) 244.
 host for breeding Trichogramma parasite, (70) Conn.State 216.
 in Maryland, life history, (69) U.S.D.A. 390.
 in stored rice, (62) 542.
 injury to corn, (62) S.C. 651.
 notes, (63) S.C. 752.
 parasite of, (67) 583.
 securing eggs of, (63) 461.
 Anhydremia in vitamin B-deficient dogs, relation to gastric motility, (63) 895.
 Anhydremia in vitamin B deficiency of rats, (61) 697.
 Animal—
 aggregations, treatise, (65) 845.
 and plant symbiosis, (64) 454.
 breeding—see also Breeding, Hybridization, and specific animals.
 aesthetic notions in, (67) 119.
 at University of Edinburgh, reports, (63) 818.
 by artificial insemination, (65) 27.
 for high prolificacy, (65) 662.
 genetic tests in, (61) Ohio 498.
 in Europe, methods, (67) 445.
 in Germany and Austria, (65) 254.
 projects in Russia, (65) 254.
 research in United States, survey, (66) 128.
 stock, diets for, (68) 561.
 studies, (68) Okla. 603.
 textbook, (62) 213.
 treatise, (63) 758.
 cells, germ, correlation of cytoplasmic storage and early growth stages, (66) Mo. 324.
 color and adornment, meaning, treatise, (69) 824.
 diseases—see also specific diseases.
 and control in South Africa, (61) 69.
 and parasites, (63) Tex. 476, 871; (70) 674.
 and parasites in Kansas, (66) 866.
 and parasites in the Far East, (63) 170.
 bacterial, genetic resistance to, (69) 347; (70) 674.
 compendium, (69) 265.
 control, (62) 875.
 control in state institution herds, (67) 450.

Animal—Continued.
 diseases—continued.
 control, notable progress in, (69)
 U.S.D.A. 697.
 general epidemiology, treatise, (65)
 566.
 importance in wild life administra-
 tion, (68) 526.
 in Ajmer-Merwara, (70) 526.

 hygiene and preventive veterinary medi-
 cine, principles, treatise, (67) 310.
 industry, agriculture and forestry, inter-
 American conference, editorial, (63)
 601.
 industry in British Empire, (69) 610.
 industry, Inter-American Conference on,
 notes, (62) 400.

Animal—Continued.

- internal organs, development, effect of quantity of protein in ration, (61) Calif. 360.
- life of Yellowstone National Park, (64) 237.
- materials, manganese determination in, (65) 12.
- metabolism, measuring equipment and technic, (61) N.H. 857.
- metabolism, perspiration as factor, (66) N.H. 65.
- motive power, maintaining at low cost, (63) 360.
- numbers relation to climate, (62) 611.
- nutrition—
- acid-base balance in, (67) 295.
 - copper in, function, (67) 340.
 - relation to changes in composition of range forage, (68) Calif. 508.
 - research, (70) 526.
 - research in Australia, (61) 371.
 - studies, (61) Calif. 360, Iowa 361; (63) Ind. 555; (64) Iowa 859; (65) Ind. 158, N.C. 158; (66) Wash.Col. 762; (67) N.H. 587; (68) N.C. 511; (69) N.Y.Cornell 89.
 - use of marine products in, (65) 254.
- pests, control, patents relating to, (61) U.S.D.A. 543.
- pests in districts of Poland, (64) 156.
- pests of useful plants, treatise, (67) 419.
- physiology and genetics in Great Britain, (65) 254.
- populations, balance, (69) 543.
- reproduction and inheritance, studies, (61) Kans. 123.
- shelters, heating and ventilation, (66) N.Y.Cornell 671.
- shelters, ventilation, (69) 124.
- tissues, aluminum in, (61) 589; (62) 190.
- tissues, aluminum in, spectrograms for demonstration, (63) 393.
- tissues, amino acids in, (61) 306; (68) 729.
- tissues, infected, reductant power, (67) 310.
- tissues, manganese, copper, zinc, and boron in, (62) Ky. 203.
- tissues, phosphorus in, (62) 122.
- tissues, post-mortem changes in (62) 161.
- traction in operation of field machines, results, (61) 478.
- work accomplishment, measurements in agriculture, (66) 676.
- Animals—*see also* Livestock, Cattle, Sheep, *etc.*
- basal metabolism and heat increments, (68) 227.
 - color changes in, (62) 514.
 - coloration and fly attack, (62) 647.

Animals—Continued.

- domestic—
- and man, parasitology, treatise, (68) 377.
 - blood of, (62) 260.
 - botulism in, (63) 170.
 - coccidial parasites, (65) 266.
 - compendium of histopathology, (68) 526.
 - cystoscopy and intravenous pyelography in, (70) 92.
 - effect of saline and alkaline water on, (70) Okla. 816.
 - epidermoid cysts in, (64) 771.
 - flies injurious to, in Mauritius, (64) 248.
 - growth and development, Mo., (63) 759, 760; (64) 670; (70) 70.
 - hypocalcaemic morbid conditions in, (69) 711.
 - in India, helminth parasites, (67) 750.
 - lethal factors in, (63) 127.
 - parasites affecting, (69) V.I. 585.
 - parasites and parasitisms, (67) 597.
 - parasites of, treatise, (69) 577.
 - pathological anatomy, textbook, (66) 369.
 - pH of digestive tracts, (64) 555.
 - physiology, treatise, (68) 653; (70) 674.
 - pigmentation, (62) 324.
 - pregnancy diagnosis, (70) 171.
 - sex life and transmission, (70) 33.
 - sterility in, (62) 468; (69) 33.
 - toxicity of sodium fluosilicate for, (65) 358, 669.
 - variations in, (62) 421.
 - worm infection, (63) 871.
- effect of general size factors on specific characters, (68) 179.
- experimental, effect of BCG vaccine, (61) 272.
- extension of life span by diet control, (70) N.Y.Cornell 865.
- farm, feeding and nutrition, (64) 463.
- farm, feeding and nutrition, treatise, (66) 559; (68) 75.
- farm, fertility and breeding, (67) 724.
- feeding, scientific, (66) 467.
- fertility in, factors affecting, (61) 821.
- food-producing, inspection, treatise, (70) 381.
- fur-bearing, *see* Fur-bearing animals.
- game, life history and habits, (61) 748.
- growth and development, Mo., (67) 586, 626; (68) 508; (69) 94, 407.
- growth, changes in energy and nitrogen metabolism, (67) Mo. 445.
- hypophysectomized, effect of prolactin, (67) 233.
- immature, ovarian changes due to stimulation, (62) 826.
- in South Africa, photosensitization, (70) 828.

Animals—Continued.

- inheritance of natural immunity in, (63) 219.
- injurious to agriculture, treatise, (66) 153.
- injurious to farm and garden in Yorkshire, (68) 351.
- insects and pests affecting health, (67) 566.
- irradiation, compared with irradiation of plants, (66) 595.
- laboratory, blood picture, (70) 91.
- laboratory, diseases in, resistance and susceptibility, (67) Iowa 450.
- laboratory, lactation studies, (66) N.Y. Cornell 663.
- laboratory, spontaneous diseases, anatomy and pathology, (67) 172.
- large, cystoscope for, (70) 827.
- lymph-virus inoculated, selection, diseases, and handling, (69) 578.
- magnesium deficiency, symptoms, (68), 130, 701.
- management, treatise, (70) 819.
- naturalized in California, (66) 753.
- origin of species, effect of earth radiations, (62) Calif. 723.
- predatory, control, symposium, (64) 153.
- prices, numbers, and kinds changed since war, (69) U.S.D.A. 697.
- protection on national reservations, (62) U.S.D.A. 52.
- protective adaptations among, (67) 420.
- rationing, scientific basis, (62) 862.
- reproduction and inheritance studies, (69) Kans. 193.
- self-sterility and cross-sterility in, (69) 33.
- sex determination in, (62) 726.
- slaughter, and meat inspection, textbook, (70) 241.
- small, fractures and dislocations, (70) 675.
- small, nonmetal cage for, (65) 897.
- small, oxygen consumption, chamber for measuring, (67) 297.
- soil, affecting cane, (67) La. 283.
- soil inhabiting, injuring sugarcane in Louisiana, (70) 358.
- starved, toxic substances in blood, (65) 772.
- surface area, determination, (69) 566.
- variability and individuality, age factor in, (69) 348.
- venomous, and insects of medical importance, treatise, (62) 542; (65) 244.
- vertebrate of northeastern United States, (62) 239.
- wild—*see also* Wild.
- coccidia of, (64) 243.
- epidemic diseases among, (66) 666.
- importance of disease in, (70) 837.
- of North America, (65) 242.
- predatory, information for field men controlling, (65) U.S.D.A. 242.

Animals—Continued.

- work, effect of large amounts of cottonseed meal, (68) Miss. 364.
- Anisakinae, new larval nematode, (61) 571.
- Anisoplia austriaca, development of eggs, (64) 543.
- Ankylostoma canina—
- effect of rotenone, (69) 423.
- notes, (62) 265.
- Anatto, vitamin A in, (67) 481.
- Anobium punctatum, notes, (64) 241.
- Anomala orientalis, *see* Asiatic beetle.
- Anopheles—*see also* Malaria and Mosquitoes.
- albimanus, notes, (63) 852.
- and malaria, papers on, (63) 153.
- atropos, new potential carrier of malaria, (67) 437.
- breeding in Louisiana Delta, (67) 436.
- breeding places, factors affecting, (61) 854.
- culicifacies in Ceylon, (61) 660.
- darlingi as transmitter of malaria, (67) 436.
- fuliginosus, anthrax transmission experiments, (62) 168.
- fuliginosus, surra transmission experiments, (61) 660.
- fuliginosus, transmission of buffalo disease by, (63) 847.
- gambiae as yellow fever carriers, (63) 259.
- infection with malaria parasites, (62) 546.
- infectivity, food, and breeding waters in Kenya, (69) 81.
- larvae, ecology, (62) 450.
- larvicide, use of Paris green for, (66) 351.
- maculipennis—
- biology, (64) 544.
- development, factors affecting, (61) 753.
- food of adult, around Amsterdam, (62) 455.
- fungus parasites, (62) 249.
- generations and biological phenomena, (65) 758.
- racial differentiation in Netherlands, (69) 81.
- racial differentiation in relation to malaria, (64) 159.
- seasonal life history, (68) 787; (69) 266.
- spread, effect of wind, (62) 249.
- two races, pattern of dorsal surface of ova, (69) 558.
- two races, structural differences, (68) 787.
- of California, comparative study of eggs, (68) 503; (69) 266.
- of Netherland East Indies, (68) 503.
- of Puerto Rico, (62) 58.
- of South Africa, illustrated keys, (67) 437.
- quadrifasciatus, cage rearing, (63) 852.
- quadrifasciatus, large scale rearing in captivity, (68) 788.

Anopheles—Continued.

- walkeri as carrier of malaria, (70) N.Y.Cornell 802.
- walkeri, vector of Plasmodium vivax, (69) 392.

Anopheline—

- dissections, preparation, (68) 788.
- imagines, manipulation and conservation, (68) 788.

Anophelism without malaria around Amsterdam, (62) 455; (69) 558.

Anoplocephala perfoliata, notes, (70) 246.

Anoplocnemis phasiana, bionomics, (66) 758.

Anoplura from South African hosts, (63) 171.

Anorexia—

- and vitamin deficiency, (67) 633.
- characteristic of lack of vitamin B complex, (66) 93.
- development, effect of administration of large amounts of water, (66) 198.
- in childhood, chronic, (62) 893.
- in children, corrective diets for, (65) 693.
- in children, raw basic feeding in, (66) 589.
- in dogs, role of vitamin B₁ in, (66) 692.
- relation to excessive milk feeding and gastric motility, (65) 694.

Ant—

- cricket, notes, (63) 354.
- imported into Florida, (65) 58.
- repellent, Kenya coal tar, (64) 542.
- trap for household use, (63) 758.

Antagonism and absorption of salts in plants, (68) 30.

Antagonism, bacterial, studies, (66) 124.

Antarchaea chionosticta, notes, (70) 650.

Antelopes as carriers of nematode parasites of ruminants, (67) 70; (69) 420; (70) 382.

Antestia—

- degenera, bionomics, (66) 758.
- faceta on coffee in wet districts, control, (70) 210.
- lineaticollis, life history and control, (68) 640.
- lineaticollis, notes, (67) 417, 702; (68) 488; (70) 649.
- orbitalis lineaticollis, control, (68) 784; (69) 551.

Anthelmintics—

- action on migration of ascarid larvae, (69) 585.
- administration to horses in bran, (70) 382.
- effect on fowls, (70) 827.
- for gastrointestinal parasites of horses, (70) 683.
- for intestinal parasites, (64) Guam 883.
- for parasites of swine, (65) Ga. 162.
- for poultry, tests, (63) Guam 176; (64) Kans. 882.
- for removal of thorn-headed worms from swine, (63) U.S.D.A. 673.
- for sheep parasites, tests, (62) 877; (66) 773.

Anthelmintics—Continued.

- new, synthetic production and value, (70) 827.
- status of knowledge, (67) 75.
- studies, (61) Va. 768.
- tests, (65) 874.

Anther smut, biological forms, (62) 146.

Antheraea pernyi, nosematosis, (62) 450.

Anthocoridae, new genus and species from New Zealand, (70) 210.

Anthocoris muscular, notes, (66) Tex. 51.

Anthocyan pigmentation in rice, inheritance, (63) 519.

Anthocyan pigments in rice varieties, distribution, (62) 429.

Anthocyaninidins, characterization, (64) 501.

Anthocyanin—

- formation in plants and assimilative activity, (68) 458.
- in potatoes, (64) 24.
- physiological studies, (68) 458.
- pigment in corn, new gene for, (67) 515.
- pigmentation, inheritance in Asiatic cottons, (69) 783.
- pigments in aleurone grains of Gramineae, (70) 597.
- pigments, natural, (64) 501.

Anthocyanins—

- behavior at varying pH values, (65) 519.
- characterization, (64) 501.

Anthocyanins in grapes, (62) N.Y.State 9.

Antholcus varinervis, introduction into New Zealand, (69) 549.

Anthonomus—

- eugenii, see Pepper weevil.
- grandis, see Boll weevil.
- grandis thurberiae, see Thurberia weevil.
- ornatus, notes, (62) 154.
- pomorum, biology, (67) 293.
- pomorum, control, (63) 854.
- pomorum hibernation, (61) 354.
- rubi, effect of pyrethrum, (68) 637.
- rubi in Sweden, (65) 552.
- rubi, notes, (69) 72.
- signatus, see Strawberry weevil.
- spp. on pears in Rhone Valley, (65) 657.

Anthores leuconotus on coffee, (61) 850.

Anthracnoses of plants, new or little known, (61) 647.

Anthrax—

- antigens, sterile, production, (61) Ark. 870.
- bacilli in ticks, fate of, (67) 740.
- diagnosis, (69) 710.
- immunization, (61) 470; (63) 170.
- immunization, new method, (70) 829.
- immunization of draft animals in Burma, (68) 527.
- in Great Britain, data, (62) 260.
- infected hides, disinfection, (62) 167; (68) 91.
- infection, tissue specificity, (64) 771.
- notes, (66) P.R. 272.
- prevention of dissemination, (66) 466.

- Anthrax—Continued.**
 protection tests, (69) 275.
 scylla, notes, (69) U.S.D.A. 83.
 spore vaccine, preservative for, (64) 771.
 spores, disinfection, (61) 870.
 spores, germicides for, tests, (63) 370.
 spores in gelatin manufactured from bones, possibility, (70) 92.
 spores on skins of dead animals, effect of formaldehyde vapor, (61) 71.
 transmission experiments, (62) 167.
 vaccination with nonattenuated virus. (65) 569.
 values of anti-anthrax serum and neosalvarsan, (62) 773.
- Anthrenus scrophulariae**, *see* Carpet beetles.
Anthrenus verbasci, *see* Carpet beetle, varied.
Anthribidae, studies, (64) 755.
- Antibody—**
 and antigen, (61) 870.
 and antigen, heterogeneous, studies, (61) 567.
 production, effects of vitamins A and D on, (69) 149.
- Anticarsia gemmatilis**, *see* Velvetbean caterpillar.
- Antidesma**, eradication, (61) 227.
Antidesma ghesaembilla, eradication, (63) 732.
- Antiformin vaccine treatment of abortion.** (70) 679.
- Antigastra catalaunalis**, new parasite of, (66) 559.
- Antigen—**
 and antibody, (61) 870.
 and antibody, heterogeneous, studies, (61) 567.
 nephelometer solidified with pectin, (70) 243.
 new, for rapid whole blood test for pullorum disease, (66) 276.
 production, new methods, (69) 578.
 types, comparative sensitivity, (64) 557.
- Antimony—**
 electrode for computation of pH of soils, (67) 203.
 electrode for determining pH and lime requirement of soils, (62) 407.
 trichloride color test for cod-liver oil, variations in results, (63) 9.
 trichloride color test for vitamin A, (63) 8.
 trichloride reaction with cod-liver oil and unsaponifiable fraction, (65) 501.
 trichloride, reaction with compounds containing five-membered monoheterocyclic rings, (70) 740.
 trichloride test for vitamin A, (62) 111, 112.
- Antioxygens**, discussion, (70) 9.
Antirachitic substance, crystalline, (66) 9.
Antirrhinin, use of term, (64) 501.
- Antirrhinum—**
 foot rot and wilt, notes, (65) 241.
 inbred strains, rust resistance, (62) Calif. 724.
 magenta flower pigment, (64) 501.
- Antiseptics**, methods of testing, official, (66) U.S.D.A. 713.
- Ants—**
 Argentine, effect of cold storage temperatures, (68) 226.
 Argentine, in Maryland, (64) 455.
 attacking tobacco, (61) 256.
 attending coffee mealybug, repellents for, (64) 157.
 attending scales, use of tanglefoot for, (65) 60.
 biology, (62) 449.
 Chinese, list, (64) 366.
 economical value for forests, (62) 647.
 gray, control, (65) Calif. 755.
 house, studies, (69) N.J. 246.
 in dwellings, notes, (66) Mich. 154.
 in lawns, control, (66) Ill. 245.
 in seed beds, control, (69) 826.
 invasions, control, (62) Conn.State 599.
 leaf-cutting, phorids parasitizing, (62) 858.
 life of, treatise, (64) 463.
 manner of combating, (64) 749.
 methods and technic in study, (68) 74.
 mound-building, associated with tree-hoppers, (62) 861.
 mounds of, populations, (62) 159.
 notes, (61) Utah 54.
 of Mississippi, (62) Miss. 153.
 of Mississippi, annotated list, (68) 226.
 on citrus trees, control, (62) Tex. 652.
 poisons and control methods, (66) Ariz. 353.
 prairie, extermination, (64) Okla. 748.
 red forest, biology, (61) 753; (62) 450.
 red harvester, control, (66) U.S.D.A. 159.
 relation to aphids, (61) Colo. 557.
 relation to mealybug control, (65) Calif. 156.
 small brown, in golf greens, (69) Ohio 72.
 two introduced into United States, (61) 256.
 water-and-oil treatment against, (69) 826.
 white, *see* Termites.
- Anuraphis—**
 amygdali and *A. persicae-niger*, comparison, (69) 239.
 arundinariae n.sp., description, (69) 239.
 iteae n.sp., description, (69) 239.
 maidi-radialis, *see* Corn root aphid.
 minima n.sp., description, (69) 239.
 persicae-niger, *see* Peach aphid, black.
 roseus, *see* Apple aphid, rosy.
 tulipae, notes (63) 256; (65) 247.
 tulipae on gladiolus, (68) Conn.State 66.
- Anusoidea comperei**, habits, (67) Calif. 432.
Anusoidea comperei n.sp., description, (61) 758.
- Anystis agilis**, notes, (64) 543.
- Aonidiella citrina** and *A. aurantii*, comparison, (69) Calif. 555.

- Aorurus subcloatus n.sp., description, (65) 361.
- Apanteles—
- diatraeae, notes, (63) 257.
 - genus, revision of Ethiopian species, (69) 398.
 - Indo-Australian species, revision, (62) 359.
 - marginiventris, notes, (69) 398.
 - molestae n.sp., description, (69) 399.
 - n.sp., notes, (69) Mo. 79.
 - nonagriac, economic value, (62) 546.
 - parasites of wax moth, (70) 513.
 - thompsoni, notes, (61) U.S.D.A. 57.
 - thompsoni, parasite of European corn borer, (65) U.S.D.A. 252.
 - tirathabae n.sp., description, (62) 360.
 - tirathabae, notes, (64) 750.
 - tirathabae, studies, (68) 781.
 - xanthopus, notes, (69) U.S.D.A. 692.
- Apate carmelita, notes, (62) 542.
- Aphaenogaster barbara on tobacco in Turkey, (61) 256.
- Aphaereta minuta, oviposition, (70) 659.
- Aphaereta muscae, notes, (66) Ill. 245.
- Aphanomyces—
- camptostylus n.sp., description, (61) 237.
 - cladogamus n.sp., description, (61) 236.
 - cochlioides n.sp., on sugar beets, (65) 539.
 - cochlioides, studies, (61) 236.
 - euteiches on peas, (61) N.J. 743.
 - root rot, notes, (62) 146.
 - sp., notes, (69) Wis. 533.
- Aphanus sordidus, life history notes, (67) 709.
- Aphelenchoides—
- acroposthion n.sp., description, (68) 359.
 - conurus n.sp., description, (68) 359.
- Aphelenchus—
- fragariae, notes, Fla., (63) 644; (65) 439; (66) 446.
 - fragariae, relation to strawberry diseases, (64) 151.
 - parietinus, notes, (69) 228.
 - ritzema-bosi, notes, (62) 149.
 - ritzema-bosi on zinnia and dahlia, (69) 70.
 - spp. on cultivated plants, (67) 402.
- Aphelinus—
- chrysomphali, notes, (63) Tex. 456.
 - jucundus, notes, (62) 861.
 - mali, biology, (62) 56.
 - mali, establishment in many parts of world, (62) 861.
 - mali in Switzerland, (62) 155.
 - mali, introduction into Oregon, (64) 459.
 - mali, notes, (63) 457; (64) Oreg. 357.
 - mali, parasite of woolly aphid, (67) 283, 285.
 - mali, production and spread, (68) 362.
- Aphidicids, new, tests, (66) 156.
- Aphid—
- fauna of America, first papers on, (66) 350.
 - genera, new, list, (63) 256.
- Aphid—Continued.
- infestation, relation to calcium arsenate duting, (63) U.S.D.A. 255.
 - new gall-making, on Norway spruce, (64) Mich. 241.
 - parasite, biology, (64) 756.
 - preparations, microscopic, making, (62) 650.
- Aphidae of Colorado, (67) 53; (68) 784.
- Aphidencyrus inquisitor, notes, (62) 861.
- Aphidid galls, histogenetic and biological studies, (65) 548.
- Aphididae—
- in Japan, (67) 286.
 - new genera and species, (69) 388.
 - of Australia and hosts, (68) 642.
 - of Formosa, (67) 710, 711.
 - of Great Britain, (64) 157.
 - of Hokkaido, biological studies, (67) 286.
 - of Illinois, (66) 850.
 - on Coniferae, (64) 544.
- Aphidius—
- avenae, parasite of aphids, (64) 756.
 - gomezi n.sp., notes, (65) 651.
 - janinii n.sp., notes, (65) 651.
 - spp., parasites of cabbage aphid, (65) 359.
- Aphids—
- and ant attendants, (61) Colo. 557.
 - as vectors of breaking in tulips, (62) 256; (65) 247.
 - as vectors of yellow dwarf, (68) 502.
 - attacking currants and apples, keys, (63) 256.
 - attacking potatoes in Wales, (69) 238.
 - attacking potatoes on Long Island, (70) N.Y.Cornell 803.
 - black hickory, notes, (67) Fla. 559.
 - brown, on conifers, control, (64) 854.
 - control, (67) 424, Fla. 559; (69) 73, Fla. 232.
 - control on apple trees, (66) Va. 553.
 - control, reduced costs, (67) 560.
 - control, relation to bean mosaic, (61) 843.
 - European black, biology and classification, (65) 851.
 - fungus parasite of, (62) 246.
 - intermediate, and time-of-determination theory, (68) 748.
 - multiplication, (64) 359.
 - new, from Colorado, (68) 354; (70) 210.
 - new, from Florida, (68) 784; (70) 505.
 - new, of tribe Chaitophorini, (68) 784.
 - nicotine supplements for, tests, (70) N.Y.State 361.
 - of British Columbia, (63) 354.
 - of Utah, (68) 497.
 - on alfalfa, control, (69) Calif. 37.
 - on alfalfa, control by burning, (70) U.S.D.A. 505.
 - on alfalfa, tests of burners for control, (65) Calif. 777.
 - on fruit trees, control, (69) 547.
 - on potato sprouts, relation to virus diseases, N.Y.State, (64) 856, 857.
 - on potatoes, effect of nicotine, (63) 458.

Aphids—Continued.

- on truck crops, studies, (65) Va.Truck 156.
 parasites of, (65) 651.
 relation to alfalfa seed production, (67) Utah 287.
 resistance to toxic sprays, variation in, (61) 549.
 role in transmission of potato leaf roll, (66) 350.
 rosy, relation to spray practices, (63) 459.
 toxicity of pentathionic acid to, (69) 383.
 transmission of beet mosaic by, (65) Wash.Col. 348.
 transmission of cucumber mosaic by, (69) Wis. 810.
 transmission of onion yellow dwarf by, (67) 432; (69) 828.
 transmission of plant viruses by, (62) 854; (65) 247.
 transmission of potato leaf roll, (64) Oreg. 346.
 woolly—*see also* Apple aphid, woolly.
 chemically treated bands for, (67) 49.
 control, (64) Tenn. 357.
 control on dormant nursery stock, (67) 284.
 control, use of canker paints in, (70) 648.
 effect of soil on root infestation, (65) Tenn. 851.
 nicotine in paint for, (64) 456.
 parasite, biology, (62) 56.
 parasite of, (67) 284, 285.
 resistance of certain rootstocks to, physiology, (66) 349.
 sprays for, (61) Oreg. 53.
 spp., biology and control, (66) Pa. 756.
- Aphis—
 argentinæ-radicis n.sp., description, (68) 354.
 astericola n.sp., description, (69) 239.
 caryaefoliae, types, (69) 239.
 fabae, transmission experiments with virus diseases, (61) 651.
 floridanae n.sp., description, (69) 239.
 forbesi, *see* Strawberry root aphid.
 fumipennella, types, (69) 239.
 gossypii, *see also* Cotton aphid and Melon aphid.
 leguminosae, biology, (67) 426.
 leguminosae, notes, (62) 237.
 maidis, *see* Corn leaf aphid.
 persicae, *see* Peach aphid, green.
 pilosicauda n.sp. description, (68) 354.
 pomi, *see* Apple aphid.
 pseudobrassicæ, notes, (61) Mich. 450.
 pseudovaleriana n.sp., description, (68) 354.
 rhamnii, transmission experiments with virus diseases, (61) 651.
 rubicola, notes, (62) Minn. 451.

Aphis—Continued.

- rumicis, *see* Bean aphid.
 sacchari, notes, (70) 63.
 spiraeicola, biology and control, (61) 548, Fla. 754.
 spiraeicola, control, (64) 854.
 spiraeicola, food plants of, (62) 246.
 spiraeicola, notes, (62) Fla. 351; (63) Fla. 651, Fla. 652; (65) 51, Fla. 451; (67) Fla. 559; (69) Fla. 231.
 spiraeicola, toxic spray for, (61) Md. 656.
 spp., notes, (66) 350.
- Aphodius—
 granarius, intermediate host for Hy-menolepis carioica, (61) 455.
 larvae in lawns, (65) Conn.State 451.
- Aphoidea, key to families, (67) 53.
- Aphrophora parallela, damage to Scotch pine in Pennsylvania, (68) 639.
- Aphycus terryi, parasite of sugarcane mealy-bug, (68) 351.
- Aplariæ—
 inspection, (61) Conn.State 547; (63) Tex. 260, Conn.State 453; (64) Conn.State 849; (65) Conn.State 451; (66) Tex. 51; (67) 423, Tex. 705; (68) Conn.State 65; Tex. 226; (69) Conn.State 546; (70) Tex. 207.
 inspection, efficiency and economy in, (69) 87.
 inspection in Pennsylvania, (65) 362.
 management in California buckeye area, (67) 721.
- Apiculture, *see* Beekeeping.
- Apion spp., control on red clover, (62) 58.
- Apion virens on red clover, (64) 544.
- Apis mellifera, *see* Bees.
- Aplanobacter—
 insidiosum, notes, (61) Kans. 145; (62) 145; (63) Nebr. 344; (65) Nebr. 837.
 insidiosum, varietal susceptibility, notes, (69) 530, Nebr. 531.
 michiganense bacterial canker, notes, (63) Utah 647.
 michiganense, notes, (61) Utah 45; (63) 344, 839; (64) 646; (65) 446, Wis. 441; (67) 274, Utah 698; (70) 197, U.S.D.A. 197.
 stewartii, notes, (69) U.S.D.A. 653, 669.
- Aplocheilus latipes, genetical studies, (62) 621.
- Apodemia mormo virgulti, life history, (68) 502.
- Apogamy in Citrus and Mangifera, importance, (67) 532.
- Apogossypol, studies, (61) 10.
- Apoplexy, parturient, *see* Milk fever.
- Aporia crataegi bionomics, parasites and hyperparasites, (68) 642.
- Apotettix eurycephalus—
 inheritance studies, (64) Kans. 819.
 parthenoproduced, chromosomes, (65) 217.

Apparatus—

- air jet hydrocyanic acid sprayer, (66) 758.
- Allison, for detection of formaldehyde in cells of alga, (70) 742.
- atometer, automatically recording, (61) 819.
- bicycle-chain stirrer, description, (68) 578.
- capillary resistometer, description, (70) 728.
- chemotropic, description, (66) 243.
- constant temperature and humidity chambers, (62) 615.
- constant temperature, studies, (63) Ohio 50.
- continuous can washer for dairy plants, (61) Calif. 282.
- desiccating, for determining dry weight of wool, (66) 858.
- electrical transference, new type, (63) 608.
- electrodialysis, new modification, (67) 13.
- evaporating, condensing, and cooling, (62) 174; (70) 111.
- extraction, improved Soxhlet, (68) 586.
- fiber-testing machine, (61) Calif. 394.
- flame-projecting, for use against locusts, (62) 853.
- for adding load at steady rate, (67) 770.
- for artificial drying of hay, (66) 583.
- for artificial inoculation of cotton plant, (68) 215.
- for ashing samples slowly, (68) 587.
- for breeding fleas, (68) 71.
- for burette reading, (61) 805.
- for cellulose determination, (63) 806.
- for collecting insects, (70) 653.
- for collecting measured areas of sprayed foliage, (61) N.J. 751.
- for collection of excreta from cows, (68) N.H. 75.
- for continuous extraction of liquids, (66) 308.
- for continuous extraction of small quantities of fluid, (62) 607.
- for continuous measurement of respiration in plants, (61) 24.
- for cooking food with electric current passing through it, (65) Iowa 196.
- for cooking with heat generated by resistance of food to an electric current, (67) Iowa 493.
- for delivery of solutions in baking tests, (70) 9.
- for destructive oxidation of organic matter, (66) 504.
- for detecting tin, (66) 506.
- for determination of areas of compound leaves, (70) 309.
- for determination of carbon dioxide, (66) 506.
- for determination of nitrogen in yeast, (62) 312.
- for determination of pH of biological solutions, (65) Calif. 753.

Apparatus—Continued.

- for determining basic viscosity of ice cream mix, (61) 869.
- for determining body of fluid cream, (69) 853.
- for determining bound water in plant tissues, (70) 599.
- for determining carbon dioxide absorption by leaves, (68) 744; (70) 166.
- for determining carbon dioxide in respiration of apples, (62) 139, 615.
- for determining corrected melting points, (63) 204.
- for determining electrical resistance of pear fruit, (67) Oreg. 680.
- for determining heat-retaining properties of blankets, (64) 197.
- for determining height of trees, (65) 342.
- for determining H-ion concentration of biological fluids, (63) 414.
- for determining load-carrying capacity of extreme-pressure lubricants, (70) 546.
- for determining organic nitrogen in liquids, (63) 110.
- for determining replaceable bases in soils, (67) 106.
- for drying whey, milk, etc., (68) 243.
- for dusting cereal seed, (63) 246.
- for electro-dialysis, description, (61) 412.
- for electrofiltration of soils, (64) 420.
- for estimating moisture in flour, (63) 111.
- for estimation of amino nitrogen, improved design, (66) 114.
- for evaporation of liquids in test tube, (64) 711.
- for exposure of ergosterol to ultra-violet light, (61) 92.
- for extraction of biological products, (66) 610.
- for fumigation of woodwork of buildings, (67) 429.
- for gas-liquid reactions, (62) 806.
- for growing plants under controlled environmental conditions, (66) 724.
- for handling adult insects, (63) 457.
- for horticultural experiments, (66) 332.
- for improved microgravimetric analysis, (66) 803.
- for increasing effectiveness of freezing mixtures, (68) 578.
- for intermittent production of ozone, (66) 620.
- for intermittent washing, automatic, (68) 578.
- for judging tenderness of canned foods, (65) U.S.D.A. 190.
- for maintaining constant relative humidity, (65) 323.
- for making autographic records of catalase activity of plants, (70) 28.
- for making plant inoculations, (70) 794.
- for measurement of basal heat production, (62) 597.

Apparatus—Continued.

- for measurement of conductivities of very small volumes of liquids, (61) 203.
- for measurement of conductivity, (64) 802.
- for measurement of permeability of bird's eggshell to gases, (70) 820.
- for measuring adhesiveness of dry powder insecticides, (66) 654.
- for measuring glass electrode potentials, (64) 712.
- for measuring ionic removal and CO₂ production by roots, (70) 455.
- for measuring oxygen consumption of small animals, (67) 297.
- for measuring physical and dynamic properties of plastic materials, (68) 256.
- for measuring soil shrinkage, (70) 748.
- for measuring water in snow, Utah, (66) 117; (67) 654.
- for measuring wet hiding power of coatings, (65) 76.
- for microanalysis of gases, (66) 503.
- for microdetermination of volatile substances, (70) 444.
- for microelectroanalysis, improved, (68) 579.
- for obtaining displaced soil solution, (63) 315.
- for obtaining eggs of Angoumois grain moth, (63) 461.
- for photographing birds indoors, (68) 78.
- for pipetting serum, (62) 565; (70) 535.
- for plant growth in controlled environment, (62) 615.
- for rayon identification, (61) 96.
- for rearing flies in laboratory, (61) 848.
- for removing frozen plugs from stopcocks, (68) 578.
- for removing solid particles from gas streams, (68) 578.
- for soil extraction, continuous automatic, (70) 580.
- for soil sampling, (64) 417; (65) 811.
- for spraying plants with melted paraffin or waxes, (68) 191.
- for study of peach bud hardness, Mass., (61) 832; (63) 532.
- for study of respiratory quotient and basal metabolism, (63) 289.
- for studying effect of constant v. variable temperatures on insect metabolism, (61) 655.
- for studying temperature and climate around plants, (69) 775.
- for studying tree root respiration, (61) 524.
- for temperature and humidity control, (66) 345.
- for testing breaking strength of straw, (65) 734.
- for testing insulation materials, (70) 549.

Apparatus—Continued.

- for testing relative humidity, (65) 520.
- for testing tractive power and working capacity of horses, (63) 380.
- for ultrafiltration, (61) 503.
- for uniform percolation and automatic collecting device, (66) 203.
- for weighing live animals, (68) 422; (70) 223.
- for wireworm investigations, (64) 549.
- for withdrawal of soil tubes, description, (61) 504.
- fractionating column for use under diminished pressure, (68) 579.
- fruit juice filter, (69) Mich. 3.
- gas analysis pipette, (63) 313.
- gas washing bottle, description, (61) 412.
- glass tubing for dietary experiments on rats, (70) 128.
- humidity, description, (64) 542.
- improved gauze-plate column, (66) 803.
- improved lactic acid, (67) 202.
- jar proof galvanometer mounting, (61) 12.
- jelly strength tester, (68) 587.
- low temperature freezing unit for horticultural products, (70) 44.
- lysimeter for study of leaching of nitrogen, notes, (61) 798.
- manometric, applications and modifications, (69) 171, 172.
- micro conductance cell, description and drawing, (69) 488.
- modified microburette, (68) 579.
- modified Van Slyke amino nitrogen, (63) 506.
- multiple-chamber respiration, for small animals, (65) 98.
- new adiabatic calorimeter, (63) 804.
- new dispersion, for soil analysis, (64) 519.
- new manometric, for soil analysis, (68) 159.
- periodometer, description, (67) 654.
- photovoltaic cell as indicator in titrations, (68) 580.
- portable pH, description, (62) 11.
- quinhydrone electrode, improved form, (63) 413.
- seed counter, (61) U.S.D.A. 34.
- shaker for Clerk hydrogen electrode vessels, (61) 12.
- simplified respiration, modification, (66) 494.
- soil sampling tube, (61) 503.
- sublimation of caffeine, description, (64) 414.
- three-compartment electro dialysis cells from pine wood, (63) 410.
- torsion dynamometer, (61) 680.
- used in Philippine textile industry, (61) 331.
- used in testing bacillary white diarrhea carriers, (62) 671.
- wash bottle flask, nonspattering semi-automatic, (61) 108.

Appetite—

- and choice of diet, (70) 564.
- depraved, in cattle, (65) 267.
- effect of vitamin B, (66) 93.
- relation to weight, (64) 492.

Apple—

- and Alaska crab hybrid, (66) Alaska 632.
- and cedar rust galls, strains, (65) Iowa 145.
- and cedar rust organism, pathogenicity and seasonal development, (70) Iowa 790.
- and thorn skeletonizer, (66) 448; (69) 548.
- anthracnose, causal organism, (67) 553.
- aphid—

- attacks, effect of potash fertilizer of apple trees, (70) 649.
- commercial control, (63) Ohio 50.
- food plants, (62) 246.
- green, overwintering eggs, (65) N.J. 848.
- green, paper on, (62) 540.
- notes, (64) 53.

aphid, rosy—

- commercial control, (63) Ohio 50.
- control, (61) Oreg. 52; (63) 459; (70) N.Y.State 501.
- control, improvement, (65) 50.
- insecticides for, (63) N.Y.State 156.
- notes, (63) N.J. 352; (64) N.Y. State 455.
- overwintering eggs, (65) N.J. 848.
- ovicides for, (66) N.Y.State 551.
- tar distillate sprays for, (69) 236.

aphid, woolly—see also Aphids, woolly. alate females and progeny, (64) 544.

- control, (64) Oreg. 345.
- effect of potash fertilizer of apple trees, (70) 649.
- effect of resistant scions on susceptibility of nonresistant stocks, (64) 53.
- establishment in many parts of world, (62) 861.
- hibernating form, (70) 649.
- in Chosen, (61) 549.
- in Japan, (67) 286.
- multiplication and enemies, (64) 359.
- notes, (61) Va. 752; (63) 354; (70) Tenn. 206.
- parasite, in Switzerland, (62) 155.
- parasite, introduction into Oregon, (64) 459.
- parasite, production and spread, (68) 362.
- role in canker infection, (61) Oreg. 540; (64) Oreg. 357; (70) U.S.D.A. 498.

aphids—

- biological notes, (64) 459.
- control, (66) N.Y.State 552, W.Va. 553; (68) W.Va. 780.

Apple—Continued.

aphids—Continued.

- in Ohio, (64) Ohio 361.
- key, (63) 256.
- notes, (61) Ohio 450.
- overwintering eggs, combined sprays for, (61) N.J. 452.

bitter pit—

- diagnosis and control, (70) 642.
- in Australia, studies, (66) 445.
- origin, (61) 652.
- problem in Australia, (69) 537.
- relation to dates of picking, (61) 653.
- studies, (65) 345; (66) 147, 840; (67) N.H. 536.

bitter rot, notes, (63) 44.

black root rot, studies, (65) 446; (66) Va. 544.

black rot, control, (64) Tenn. 348.

black spot, control, (67) 698.

blight, control, (62) Ky. 234.

blister canker, notes, (65) 644.

blister canker, studies, Ill., (62) 346, 749.

blooms of Nova Scotia, bees taken on, (70) 659.

blossom blight, (70) Tenn. 192.

blossom weevil, control, (63) 854; (67) 156.

blossom wilt, notes, (63) 451.

blossoms, abscission, (62) Del. 750.

blossoms in western New York, insects collected from, (69) 686.

blotch, control, (63) 348; (68) Okla. 626.

blotch, cycle of infection, (61) Ind. 342; (65) 240

blotch, notes, (63) Wash.Col. 244, Ind. 541; (64) Okla. 742; (66) 147; (69) Ind. 60.

blue mold, cause, (66) Wash.Col. 745.

branches, rapidly growing, formation of narrow crotch angles with trunk, (69) N.J. 213.

Brooks' spot disease, control, (67) Ohio 43, 412.

brown rot, notes, (61) 347, 653; (64) 48.

bud moth, fringe-winged, notes, Mich., (61) 450; (64) 240.

bud sports, pollination, (67) 252, 677.

butter, quality, (62) Ohio 686.

canker and die-back, (70) 642.

canker of headworked trees, (62) 536.

canker, perennial, relation to woolly aphid, (61) Oreg. 540; (64) Oreg. 357; (70) U.S.D.A. 498.

canker, transmission, (64) Oreg. 345.

capsid bug, biology, (69) 72.

capsid bug, control, (64) 544; (65) 54; (67) 567; (68) 781.

capsid eggs, notes, (63) 255.

cellar, insulation, value, (63) Ind. 530.

chlorosis, lime-induced, notes, (64) 450.

chlorosis, notes, (63) Wash.Col. 244.

chlorosis, treatment, (62) 849.

Apple—Continued.

- color, measuring with disk colorimeter, (69) 655.
- containers, (64) R.I. 841.
- cork and drought spot, control, (64) N.Y.Cornell 642.
- cork and rosette diseases, (70) N.Y.Cornell, 791.
- cork disease, (69) N.Y.Cornell 61.
- crosses, pollination experiments, (69) 654.
- crown gall and wound overgrowth, correlation, (65) 48.
- crown gall, role of soil acidity in, (64) Tenn. 348.
- curculio—
- as pear pest in British Columbia, (63) 358.
 - control, (63) Ohio 829; (66) 448.
 - control by hogs, (62) Iowa 358.
 - control in Champlain Valley, (67) 719; (69) 246.
 - new description, (67) Colo. 718.
 - notes, (65) 657; (66) N.Y.State 552; (67) N.Y.State 150, 424; (69) Kans. 232; (70) N.Y.State 803.
- cuttings—
- and grafts, callusing, effect of environment, (63) 737.
 - failure to root, cause, (64) Ark. 439.
 - rooting, (62) Del. 736.
 - rooting and callusing, (61) 737.
- die-back, control, (65) Calif. 744.
- diseases—
- and insects, control, (62) N.Y.Cornell 740.
 - control with calcium sulfide, (61) Va. 347.
 - epidemic in Illinois, (67) 410.
 - fungicides for, (68) W.Va. 769.
 - in Quebec, control, (69) 376.
 - in storage, (63) 745.
 - in Tennessee, (67) Tenn. 551.
 - notes, (64) 449; (65) 345.
 - physiological, in British Columbia, (63) 746.
 - studies, (67) 410.
 - under overhead irrigation, (67) 554.
- drought spot, notes, (66) N.Y.Cornell 640.
- farms, economic study, (61) Me. 183.
- fillers, need of prompt removal, (67) Ohio 36.
- fire blight—
- bacteria, vascular penetration of fruit tissue, (66) 147.
 - control, (62) Ark. 845; (65) Tenn. 840.
 - in Wisconsin, (62) 350.
 - notes, (63) 44; (66) 147; (67) 552; (68) Ark. 626; (70) N.Y.Cornell 57.
 - overwintering and modes of infection, (61) Mich. 448.
 - resistant varieties, (65) 351.
 - varietal susceptibility, (66) 147.

Apple—Continued.

- flea weevil, studies, (63) Ohio 50; (67) 424.
- flower bud, differentiation, (62) 840; (65) 637.
- foliage, leafhoppers injurious to, (66) Va. 553.
- foliage, secondary effects of spray injury, (67) Mich. 145.
- frog-eye leaf spot, notes, (68) W.Va. 769.
- fruit bud differentiation, (63) 138; (68) Ark. 616.
- fruit bud formation, (61) N.H. 138; (62) Ark. 835; (66) 140; (70) 478.
- fruit bud formation, effect of phosphorus, (69) N.H. 364.
- fruit color and condition, effect of soil moisture, (69) 523.
- fruit fly, life history and control, (68) Me. 497.
- fruit fly or railroad worm, notes, (69) Me. 385.
- fruit rot, notes, (67) 553.
- fruit sawfly, control, (70) 198.
- fruit spot, control, (61) N.J. 741; (64) Del. 641; (65) N.J. 838; (66) 750.
- fruit spot, outbreak, (62) N.Y.State 439.
- fruit spots, notes, (68) W.Va. 769.
- fruit spur composition and fruit bud formation, effect of defoliation, (63) N.H. 833.
- graft overgrowths, effectiveness of adhesive tapes for, (69) Wis. 810.
- grafting, (65) Iowa 135.
- grafts, callus knot formations, prevention, (65) 48.
- grafts, defective union, (61) Mich. 525; (62) Mich. 434; (65) Iowa 135.
- grafts, wound overgrowths, development and suppression, (65) 48.
- grafts, wrapping union with tape, effect, (65) Wis. 440.
- grain aphid, biology, (67) 49.
- grain aphid, vector of yellow dwarf, (67) 432; (68) 502.
- green mold, notes, (61) 245.
- growers, economic research as aid to, (62) 89.
- hardwood cuttings, rooting, (66) Wash. Col. 736.
- industry—
- in Arkansas, (61) Ark. 782.
 - McIntosh, (61) Mont. 483.
 - of New England, economic research in, (61) 283.
 - of New York State, effect of codling moth, (69) 240.
 - of Nova Scotia, report of royal commission, (65) 483.
 - of Washington, economic aspects, (65) 580.
 - service of community packing house to, (64) W.Va. 486.
 - statistics and charts, (63) U.S.D.A. 588.
 - trends in, (69) Wash.Col. 453.

Apple—Continued.

- insects, control, (62) Pa. 353.
 insects, control by dusts, Mo., (62) 54; (63) 751.
 insects in Hudson Valley, N.Y.State, (67) 150; (68) 637.
 juice and tissue, sugar determinations, (63) 831.
 juice, commercial processing, (68) N.Y. State 443.
 juice in various forms, vitamin C in, (69) Mass. 747.
 juice, salt content, estimation, (61) 310.
 juice, sterilization with heat developed by resistance to alternating electric current, (69) Iowa 143.
 juice, unfermented, enzymic clarification, (64) N.Y.State 713.
 juices, sulfurous acid in, determination, (62) 206.
 leaf area, effect on fruit bud formation, (70) 478.
 leaf curling midge, (68) 215.
 leaf jassid in New South Wales, (63) 551.
 leaf roll and maturity, studies, (67) N.H. 536.
 leaf rollers in Ontario, (64) 358.
 leaf variegation, infectious, (69) 675.
 leafhopper—
 control, (68) 496, N.Y.State 637.
 notes, (64) 456; (66) Idaho 244; N.Y.State 551; (69) 384, Idaho 824.
 on alfalfa, control, (62) Ill. 352.
 white, notes, (63) 458; (64) N.Y.State 455, 456; (65) 54; (66) Idaho 244, N.Y.State 551, Va. 553; (67) N.Y.State 150; (69) 384; Idaho 824; (70) N.Y. State 803.
 white, seasonal life history and control, (69) Conn.State 546.
 white, spotting of apples, removal, (65) 52.
 white, spray tests for, (69) 238.
 leafhoppers—
 in Connecticut, (65) Conn.State 451.
 in Virginia, life history studies, (63) 458.
 spraying for, (69) 386.
 studies, (61) Ohio 450; (64) N.Y. State 455; (66) U.S.D.A. 349; (67) Va. 51, 424, Calif. 559, 709; (68) Conn.State 65.
 leaves—
 carbon dioxide assimilation by, (69) 213.
 carbon dioxide assimilation, effect of sprays, (70) 778.
 leaching with cold water, (62) 838.
 movement of nitrogen and carbohydrates from, (68) Mo. 46.
 photosynthesis rate, (70) N.Y.Cornell 623.

Apple—Continued.

- leaves—continued.
 stomatal activity, (67) 38.
 transpiration rate, effect of oils, (64) Ill. 540.
 little leaf, notes, (64) Oreg. 345.
 maggot—
 biology, (69) 244.
 biometrics and control, Iowa, (67) 424; (69) 71.
 conference of New England, (69) 384.
 control, (65) Wis. 453; (69) 384, N.H. 385, Mass. 686.
 control in Hudson Valley, (64) 57; (68) 496.
 digestive tract, morphology, (68) 357; (70) 509.
 dispersal in 1932, (69) 244.
 effect on export business, (68) 496.
 emergence records, Conn.State, (65) 451; (63) 66.
 flies, effect of carbohydrates on longevity, (69) Iowa 71.
 flies, trapping, (69) 548.
 habits, (69) 833.
 insects affecting, (65) Iowa 153.
 life history in Wisconsin, (70) 509.
 life history studies, role of yeast in, (64) 858.
 location of traps for, (66) N.Y. State 552.
 notes, (61) 358, Mich. 450; (64) N.Y.State 455; (65) 57, 855; (67) Ohio 50, N.Y.State 150, 424, Mass. 424, 427, Wis. 706, 716; (69) Me. 385, Me. 394, Wis. 825; (70) N.Y.State 803.
 outbreak, (62) 541.
 spraying recommendations, (61) Mass. 849.
 viability of eggs and larvae, (69) N.Y.State 394.
 market, Indianapolis, of 1929–30 crop, (66) Ind. 787.
 measles—
 cause and control, Ill., (62) 346; (64) 843.
 manner of spread, (67) N.Mex. 43.
 soil treatment for control, (70) Ill. 635.
 studies, (61) N.Mex. 236; (65) N.Mex. 234; (66) Ill. 235; (68) Ill. 626, W.Va. 769; (69) N.Mex. 222.
 types, (66) W.Va. 546.
 mildew, control, (64) 49.
 mildew, effect of rootstock on scion susceptibility to, (65) 644.
 mining caterpillar, new, in Missouri, (63) 462.
 Nectria canker, notes, (70) N.Y.Cornell 791.
 nursery stock, crown gall and callus knot on, control, (61) 231.
 nursery stock, potato leafhopper affecting, (67) 709.

Apple—Continued.

- orchard, cost of developing, (64) Ohio 87.
- orchards—
- costs and management, (66) N.H. 83.
 - fertilizer experiments, (69) N.Y. State 367.
 - management, (61) Ohio 440; (65) Pa. 229; (66) Kans. 538; (68) Ill. 618.
 - mulching with straw, (69) Ind. 798.
 - recovery from drought injury, effect of nitrogen fertilization, (69) 654.
 - sodium nitrate v. ammonium sulfate for, (63) Pa. 339.
 - soil fertility studies, (64) Pa. 138.

 - spraying and dusting, (69) Ohio 49.
 - spraying experiments, (61) N.Mex. 247.
 - wild insects in, N.Y.Cornell, (66) 647; (69) 72.
 - young, soil management, (70) N.Y.Cornell 777.
- overgrowths and hairy root on nursery stock, (65) 48.
- perennial canker, notes, (61) Oreg. 49.
- pink rot in Grimes, notes, (66) 147.
- pith moth, life history, (64) 547.
- pollen, effect of sprays, (63) 137.
- pollen handling for long-distance shipment, (61) 527.
- pollen, longevity and viability, (62) 525.
- pollen sterility, studies, (62) 321.
- pollen, wind-borne, (66) 434.
- pomace—
- dried, effect on milk production, (66) Wash.Col. 768.
 - dried, feeding value, (66) Va. 567; (68) Wash.Col. 85.
 - dried, for fattening lambs, (66) Ark. 561.
 - nutritive value, (64) Wash.Col. 657.
 - stored, pectin in, N.Y.State, (65) 712; (66) 502.
- prices by variety, grade, and size, (61) Oreg. 689.
- redbug, tar distillate sprays for, (69) 236.
- root borer, giant, life history studies, (65) N.Mex. 245.
- root borer, giant, notes, (61) N.Mex. 247; (62) S.C. 651; (69) N.Mex. 232.
- root development in wet clay soil, (68) 762.
- root rot, notes, (62) Tex. 637.
- root rot, varietal susceptibility, (67) Ohio 43.
- roots, development, (69) Ohio 49.
- roots, distribution in soil, (64) Wash. Col. 637.
- roots, growth and rest period, (67) 252.

Apple—Continued.

- roots, winter injury to, (63) Wash.Col. 236.
- rootstocks—
- cold injury, exosmosis method of determining, (70) 778.
 - cold resistance, (70) 621.
 - from open-pollinated seed, (66) 334.
 - Paradise, breeding experiments with, (70) 334.
 - raising from seeds, (65) 637.
 - resistance to woolly aphids, physiology, (66) 349.
 - studies, (67) Wis. 674.
 - transplanted, root regeneration on, (65) 637.
- rot due to *Hypochnus* sp., notes, (61) 244.
- rots, relation to *Stemphylium* type of fungi, (66) 445.
- rust—
- control, (66) Va. 545; (67) 551.
 - diseases in eastern New York, (67) 552.
 - diseases, three types, (61) N.Y. Cornell 150.
 - effect of sulfur dusts, (64) Kans. 839, 846.
 - galls, strains, (65) Iowa 145.
 - immune varieties, (66) W.Va. 545.
 - in Iowa, (67) Iowa 399.
 - menace to State orchards, (61) Mich. 449.
 - new, in Tennessee, (65) 351.
 - notes, (67) Ind. 536; (68) W.Va. 769; (69) N.J. 373.
 - on host tissue in culture dishes, (62) 645.
 - organism, pathogenicity and seasonal development, (70) Iowa 790.
 - outbreaks in Hudson Valley, (62) N.Y.Cornell 746.
 - varietal resistance, (61) Kans. 146.
- sales of an Ohio orchard company, (61) Ohio 684.
- sawfly, biology and control, (68) 652.
- sawfly, control, (68) 781; (69) 561.
- scab—
- ascospores, liberation, (66) Va. 545.
 - control, (61) Oreg. 49, Wis. 148, Ohio 444, Ohio 449, Me. 540, 649, N.J. 743, 845; (62) Pa. 347; (63) Ohio 39, Ohio 44, Wis. 46, Ohio 49, N.H. 244, N.J. 343, 348, Mich. 546, Ohio 829, Ohio 830, Ohio 838; (64) 49, 235, Tenn. 348, Ohio 642, Iowa 838, Ill. 843; (65) Tenn. 149, N.J. 838, Tenn. 840; (66) Mo. 330, N.Y.Cornell 640; (67) Ohio 43, Mich. 144, 274, 275, 410, 412, 413, N.H. 536, 540, 551; (68) Me. 487, N.Y.State 626; (69) 227, Me. 373, N.H. 373, 820, 821; (70) 198.

Apple—Continued.

- scab—continued.
- control, difficulties in 1931, (69) 675.
 - control, dusting and spraying materials for, (64) Pa. 144.
 - control, failure of sulfur dusts in, (61) Ohio 150.
 - control, fall applications of fungicides, (65) 541.
 - control, flotation sulfur for, (68) Ill. 626.
 - control in Bristol Province, (67) 552, 553.
 - control in Hudson Valley, (67) N.Y.State 143.
 - control in Quebec, (69) 377.
 - control in Wisbech area of England, (65) 648.
 - control, lime-sulfur for, (69) N.Y. State 377.
 - control, methods, (64) Oreg. 346.
 - control, success and failure in, (69) Mich. 212.
 - effect of rootstock on scion susceptibility to, (65) 644.
 - effect of sulfur dusts, (62) Ill. 346; (65) Ind. 134.
 - epidemic in 1932, (69) 820.
 - fall applications of fungicides, (67) 552.
 - fungicidal action of dusts and sprays for, (67) 552.

- Arrowroot starch gels, studies, (66) 201.
- Arsenates, analyses, (64) Mich. 239.
- Arsenates, compatibilities with fluosilicates and cryolite, (62) 653.
- Arsenic—
- compounds, toxicity for sheep, (69) 580.
 derivatives of cysteine, (65) 201.
 determination, (61) 311, 312.
 determination, Gutzeit method, sources of error in, (70) 296.
 determination in foods and related preparations, (63) 204.
 effect on oats, (64) 723.
 effect on vitamin A deficiency, (66) W.Va. 560.
 in animal tissues, tests for, (65) Conn. State 789.
 in plant materials, determination, (69) 493.
 minute quantities, determination, accuracy of Gutzeit method, (66) 505.
 poisoning as sequel of bone chewing in cattle, (62) 467.
 resistance of codling moth to, (70) Mo. 364.
 substitutes for codling moth control, (63) 459.
 toxicity, index, (66) S.C. 641.
 toxicity on mosquito pupae, (67) Calif. 559.
 toxicity, relation to soluble phosphate and soil characteristics, (68) S.C. 734.
 toxicity to fowls, (63) 171.
 water-soluble, in oil emulsion-lead arsenate sprays, (68) 352.
 water-soluble, in sprays, (63) Ohio 144.

Arsenical—

- and fluorine insecticides, relative toxicity, (67) 428.
- bait sprays, effect on citrus trees, (69) U.S.D.A. 73.
- compounds, effect on soils, (64) S.C. 616.
- dipping fluids, effect of bone oil in, (64) 263.
- dipping fluids, tests, (63) 76.
- dusts for dry seed treatment, (67) 266.
- injuries and correctives, N.J., (61) 451, 751.
- injury to apple foliage, corrective, (65) 847.
- injury to peach trees, (64) Mich. 352; (67) 563; (70) Ill. 635.
- insecticides, adhesive strength, measuring, (66) 654.
- insecticides, commercial, properties, (63) 847; (64) 52.
- insecticides, treatment with, causes of injury by burning after, (65) 852.
- poisoning in livestock from sprayed vegetation, (66) 666.
- poisoning in the field, (62) 562.
- poisoning of fowls, (69) 436.
- preparations for locusts, toxicity, (64) 459.
- residue problem on Long Island, (70) N.Y.State 803.
- residue, toxicity to rats, (69) Mo. 552.
- spray combinations for apples, (65) Mass. 354.
- substitutes, (63) 749; (65) N.J. 849; (70) Mo. 206.
- substitutes for peach sprays, (65) Tenn. 850; (66) 247; (67) 561.
- Arsenicals—
- effect on bean plants, (65) 58.
- for bollworm control, (66) 649.
- for Mexican bean beetle, tests, (67) 716.
- for potato flea beetle control, (67) Ohio 439.
- for weed control, (69) Calif. 37.
- injurious to plant growth, (64) Kans. 852.
- larvicidal effects on Anopheles, (61) 553; (68) 644.
- studies, (70) U.S.D.A. 501.
- toxicity, (68) Wash.Col. 780.
- Arsenious acid and trisodium arsenite, relative toxicity to house fly, (69) 244.
- Arsine, determination, (61) 312.
- Artesian basin, Roswell, in New Mexico, water resources, (70) 393.
- Artesian basins, drainage of land overlying, (61) 477; (67) 323.
- Arthritis—
- cause of stiff lambs, (66) Mont. 773.
- experimental erysipelo-thritic, in lambs, (69) 430.
- in lambs, (68) Mont. 811.
- in pigeons, (62) 269.
- pyemic, in swine, (64) 560.
- specific, in sheep, (69) 580.

- Arthropod parasites and disease transmitters, (64) 243.

 - stem rot, notes, (63) 245.
- Artichokes—
- as new crop with new uses, (66) Ill. 221.
 - globe, morphological and chemical studies, (67) 248.
 - in Limousin, (62) 836.
 - marketing, (67) Calif. 334.
 - new disease of, (65) Calif. 744.
 - role in diabetic diet, (67) 93.
 - vitamin B (B_1) in, (67) 634.
- Artocarpus integrifolia—
- carbohydrate-nitrogen flux in, (66) 722.
 - caterpillar pest of, (67) 426.
 - leaves, respiration, effect of sugars, (66) 620.
- Artona catoxantha—
- notes, (64) 460.
 - relation to *Levuana iridescens*, (61) 753.
- Asaphes americana, notes, (62) 861.
- Asbestos textile industry, (68) 423.
- Ascariasis—
- human, treatment with hexylresorcinol, (66) 771.
 - in dogs, use of hexylresorcinol in, (64) 562.
 - in horses, allergic reactions in, (69) 579.
 - in pigs, experimental, (66) 774.
 - in rabbits, experimental, immunity response, (66) 776.
 - treatment with hexylresorcinol pills, (68) 527.
- Ascaridia—
- galli, suggested name, (68) 677.
 - galli, summary, (61) 375.
 - lineata—
 - acquired resistance of chickens to, (67) 604.
 - age resistance of chickens to, (69) 267.
 - and *A. perspicillum*, identity, (68) 677.
 - anthelmintic for, (64) Kans. 882.
 - control, (62) 566.
 - feeding variable numbers of eggs to fowls, (66) 670.

Ascaridia—Continued.

- lineata—continued.
 - growth and infectivity, effect of yeast, (68) 779.
 - immunity or resistance to, (66) 577.
 - importance and control, (66) 179.
 - in California Valley quail, (69) 268.
 - in chickens, effect of vitamin A in diet, (64) 680.
 - in poultry, (61) Kans. 172.
 - mass treatment of poultry for, (69) 593.
 - morphology and life history, (66) 179.
 - notes, (64) 177; (69) Kans. 266.
 - ova, effect of chemical agents, (67) Ohio 69.
 - resistance in poultry, effect of blood loss, (69) 278.
 - resistance in poultry, effect of diet, (69) 593.
 - resistance of chickens to, (64) Ohio 679.
 - resistance of chickens to, relation to vitamin D, (61) 474.
 - studies, (69) 266.
 - vitamin requirements, (66) 77. - numidae, parasite of guinea hen, (65) 877.
 - perspicillum and *A. lineata*, identity, (68) 677.
 - perspicillum, notes, (61) 678.
 - spp. in poultry, (66) P.R. 571.
 - spp., *N*-butylidene chloride test for, (69) 106.
- Ascarids—
- anthelmintics for, tests, (65) 874.
 - effect of chenopodium oil from hybrid plants, (68) S.Dak. 811.
 - in animals and man, moisture requirements of eggs, (62) 240.
 - in colts, effect of *N*-butylidene chloride, (70) 247.
 - in poultry, nicotine sulfate for, (70) 391.
 - in poultry, treatment and prevention, (67) 461.
 - in pigs, treatment, (62) Ill. 375; (65) 572; (67) S.Dak. 69; (70) S.Dak. 825.
- Ascaris—
- equorum in a colt, (69) 268.
 - extracts, cutaneous and precipitin tests with, (62) 875.
 - extracts, reactive factors, (64) 380.
 - larvae, cause of liver and lung lesions in swine, (68) 818.
 - larvae migration in host, pathological changes from, (61) 71.
 - lumbricoides, moisture requirements of eggs, (62) 240.
 - lumbricoides, notes, (63) 874.
 - lumbricoides, tissues, precipitin reactions with, (61) 51.
 - megaloccephala migration of larvae in horse, effect of anthelmintics, (69) 585.

- Ascaris—Continued.
 proteins of, cutaneous tests with, (61) 174.
 suum, moisture requirements of eggs, (62) 240.
- Ascia rapae, *see* Cabbage worm, imported.
- Asclepias—
 latifolia, toxicity, (70) Tex. 241.
 spp. fibers, characteristics and textile values, (67) 93.
- Ascochyta—
 asteris on aster seed, (65) N.Y.State 741.
 betae, notes, (63) 245.
 blight in peas, (70) Tenn. 192.
 gossypii, development in culture, (65) 840.
 humuli, notes, (66) 443.
 pisi, notes, (64) 448; (65) 345.
 sedi-purpurei n.sp., description, (66) 833.
 sp., notes, (68) 488.
 spp. in pea and vetch fields, (65) Ala. 437.
 spp., notes, (67) 694.
- Ascogaster carpocapsae—
 biology, (67) N.Y.State 442.
 notes, (61) N.Mex. 247; (63) 461; (64) 158; (69) 692.
 parasite of codling moth, (61) U.S.D.A. 453; (62) Del. 754.
 rearing, (63) 162.
- Ascomycetes—
 effect of ultraviolet irradiation, (68) 314.
 morphology and life history, (63) 144.
 spermatia, relation to life history and propagation, (61) Ga. 144.
- Ascorbic acid—
 and glutathione in animal tissues, estimation and distribution, (69) 471.
 and vitamin C, identity, (69) 11, 169, 774, 902; (70) 153, 741.
 antiscorbutic action, (70) 426.
 from plant material, method of obtaining, (69) 773.
 oxidation-reduction potential, (70) 294.
 use of term, (69) 11.
- Aserica castanea—
 biology and control, (63) N.J. 354, 463.
 distribution and abundance in New York, (61) 556; (65) 57.
 notes, (63) Conn.State 453.
- Ash—
 determination by direct weighing, (62) 712; (63) 112.
 determination, use of oxygen in, (67) 361.
 determinations in laboratory electric muffle, increasing capacity, (64) 610.
 determinations, systematic and random errors in, evaluation, (70) 580.
 distribution in apple twigs, (61) Minn. 40.
 of pasture plants, factors affecting, (64) 421.
 of plants, constituents, determination in presence of silica, (66) 806.
- Ash—Continued.
 of vegetables, cobalt in, (66) 801.
 substances, passage into a plant, (62) 820.
 weighing, discussion, (63) 112.
- Ash (tree)—
 canker, studies, (67) 557.
 European mountain, seeds, afterripening, germination, and vitality, (67) 21.
 species, root systems, variability, (61) 235.
 trees, carpenter worm injury, (65) 853.
 trees in Wooster Arboretum, list, (69) Ohio 217.
 Victorian mountain, lignocellulose determination, (61) 803.
- Ashes v. cornstalk residues, fertilizing value, (64) Ill. 824.
- Asiatic beetle—
 anatomy and biology, (61) Conn.State 556.
 as sericus lawn pest, (63) U.S.D.A. 553.
 control, (64) 52.
 distribution and abundance in New York, (61) 556; (65) 57.
 distribution and importance, (69) 83.
 in Connecticut, Conn.State, (61) 547, 555; (63) 453, 651; (65) 451.
 in lawns, control, (62) Conn.State 599.
 in New Jersey, (64) 248.
 in new territory, (67) Conn.State 559.
 notes, (70) U.S.D.A. 499.
 quarantine, Conn.State, (62) 599; (63) 453.
 spread, (64) Conn.State 849.
 status, (68) Conn.State 66.
- Asiatic garden beetle—
 distribution and importance, (69) 83.
 life history and control, (68) U.S.D.A. 791.
 traps for, (67) 577.
- Asparagine—
 effect on glutamine estimation, (69) 492.
 isolation from enzymic digest of edestin, (69) 492.
- Asparagus—
 acreage and prices, (63) Calif. 86.
 anatomical studies, (68) 475.
 beds, weed control in, (70) Ohio 44.
 beetle, studies, (62) S.C. 650.
 beetle, toxic spray for, (61) Md. 656.
 beetle, twelve-spotted, notes, (66) 647.
 beetles, control, (61) N.J. 751.
 biochemical studies, (61) N.J. 734.
 breeding, N.J., (63) 339; (67) 524.
 breeding in Schwetzingen, (62) 432.
 culture, (63) N.Mex. 444; Utah 639; (64) U.S.D.A. 225; (67) La. 244, Iowa 385, Mass. 386; (69) Iowa 48; (70) 775.
 culture, breeding, and selection, (68) 761.
 culture, effect of root selection, (61) 523.

Asparagus—Continued.

- cutting and reestablishment of plants, (61) Mass. 833.
 cutting during first year, effect, (62) Ill. 337.
 cutting experiments, Ill., (64) 837; (66) 228; (68) 617.
 diseases in Vale of Evesham, (67) 405.
 effect of cold winter weather, (62) Fla. 335.
 effect of heavy applications of manure, (62) N.Y.Cornell 737.
 effect of lengths of green on spears, (61) 523.
 effect of manure, (64) N.Y.Cornell 632.
 experiments, (70) Ga.Coastal Plain 773.
 extract for cultivation of legume nodule bacteria, (64) 526.
 fern, beet army worm on, biology, (69) 392.
 fern injury from cicadas, (64) 545.
 fern, new spinning mite attacking, (65) 59.
 fern, red spider on, (67) Fla. 559.
 fern rust, notes, Fla., (65) 440; (67) 536; (69) 221.
 fern, two-spotted mite affecting, (66) Fla. 254.
 fertilization and culture, (69) Mass. 652.
 fertilizer and spacing tests, (68) S.C. 760.
 fertilizer applications, (66) S.C. 633.
 fertilizer combinations, range, (65) N.J. 831.
 fertilizer experiments, (61) N.J. 734, Md. 831; (62) Md. 339, S.C. 636; (64) S.C. 636; (67) La. 244, Mass. 386, N.J. 524; (68) Mich. 475; (69) N.Y.Cornell 50; (70) Tex. 183.
 flooded, effect of duration of cutting season, (70) 616.
 fresh and canned, vitamin C in, (66) S.Dak. 198.
 genetic and cytological studies, (67) 664.
 grown under four glass filters, vitamin A in, (66) 91.
 improvement, (69) Calif. 48.
 insects in Iowa, (67) Iowa 150.
 nitrogen requirements, (64) Ark. 438.
 nutrient supply, relation to carbohydrates from photosynthesis, (65) N.J. 830.
 plants, male, yields, (65) Calif. 736.
 plants, performance records, (61) 523.
 prices, relation to quality, (62) 576.
 propagation, (63) Mass. 533.
 reductase in, effect of length of day, (65) N.J. 830.
 rot, notes, (66) 835.
 sex in, studies, (61) 523.
 shoots, freezing point depressions, (67) 131.
 spacing and culture, (67) Calif. 525.
 spacing experiments, (67) Calif. 246.
 sprengeri, forcing with artificial light, effect, (68) 192.

Asparagus—Continued.

- studies, (61) Calif. 336; (63) Tex. 444.
 treated, vitamin A in, (61) 495.
 value in nutritional anemia, (68) 281.
 varieties, (62) N.Y.State 431.
 variety tests, Ga.Coastal Plain, (64) 630; (66) 633; (69) 48.
 vitamin A in, (61) 494; (69) Mass. 747.
 vitamin C in, (68) 861; (69) Mass. 747.
 yield and quality, relation to heavy cutting, (70) Ill. 616.
 yields, (63) N.J. 337.
 yields, effect of extending cutting season, (68) Calif. 43.
 yields, effect of size of crown and length of cutting season, (68) 199.
 Aspartic acid, conductivity data, (64) 801.
 Aspartic acid, synthesis, (65) 203.
 Aspartyl-aspartic acid, titration constants, (67) 196.
 Aspen—
 and paper birch stands, forest floor under, (70) 18.
 association in northern lower Michigan, (64) 344.
 availability, properties, and use. (64) Minn. 640.
 lands, forest possibilities in Lake States, (62) Minn. 231.
 quaking, value for pulp wood, (62) U.S.D.A. 743.
 suckers, effect of light burning, (65) 837; (67) 687.
 Aspergillus—
 alliaceus, notes, (70) Tex. 192.
 attacking mealybugs in insectaries, (67) 265.
 biochemistry, (65) 566.
 differentiation by serological methods, (66) 439.
 fischeri, ergosterol and mannitol from, (69) 166.
 flavus, notes, (70) 810.
 flavus, relation to thermogenesis in stored hay, (69) Iowa 27.
 fumigatus infection of kidneys, (62) 264.
 fumigatus, notes, (68) 679, 820.
 fumigatus, relation to abortion, (64) 380.
 glaucus, notes, (64) 452.
 luchuensis, phosphorus assimilation by, (65) 419.
 niger—
 action on sodium hexosediphosphate in presence of toluene, (68) 722.
 and Penicillium mixed inoculum for citrus fruits, effect, (61) 747.
 citric acid fermentation, effect of iron, (67) 645.
 metabolism of glucides by, effect of alkaloids, (70) 29.
 method for determination of potash needs of soils, (70) 23.
 notes, (62) 145; (67) 746.

Aspergillus—Continued.

- sclerotiorum, relation to apple decay, (69) 674.
 spp., effect on jelling power of fruit juices, (69) Mass. 633.
 spp., effect on mealybugs, (62) Calif. 744.
 spp., effect on temperature of stored grain, (67) 662.
 spp. in butter, (63) Minn. 670.
 spp. in cacao, (62) 149.
 spp. on sugarcane mealybug, (70) 650.
 spp., relation to decay in apples, (64) 451.
 spp. studies by serological methods, (65) 535.
 versicolor, growth on higher paraffins, (69) 486.
- Asphaltic materials, liquid, rationalization and simplification of test requirements, (68) U.S.D.A. 103.
- Aspidiotiphagus citrinus, parasite of fern scale, (67) 711.
- Aspidiotus—
 ancyclus, *see* Putnam's scale.
 hederæ, *see* Oleander scale.
 hederæ var. unipunctinata, notes, (65) 546.
 lataniae, control, (67) 432.
 lataniae, fumigation with chloropicrin, (62) 156.
 maki on pine in Japan, (67) 711.
 perniciosus, *see* San Jose scale.
 prunorum, new in Baluchistan, (67) 152.
 pseudomeyeri on juniper in Japan, (67) 711.
- Aspidomorpha hybrida, biology, (64) 549.
- Asses, statistics, (65) U.S.D.A. 486.
- Asses, variations in, (62) 421.

 - cause of fatal human infection, (61) 372.
 - cause of meat poisoning, (65) 472.
 - spontaneous pathogenicity for man and other species than swine, (68) 526.
- thuringiensis, parasite of corn borer, (64) 751.
- truffauti, notes, (64) 524.

Bacillus—Continued.

- tympaui-cuniculi, proposed name, (68) 98.
 typhi murium—
 destruction of muskrats and water voles by, (70) 647.
 permeability of intestinal tract to, effect of vitamin A deficiency, (67) 483.
 typhosus phenol coefficient values of disinfectants, (65) 669.
 vulgatus, notes, (64) 391.
 welchii—
 and *Bacterium paludis*, comparison, (67) 73.
 and bowel lesions, (64) 772.
 cause of blackleg in sheep, (62) 773.
 classification, (69) 105.
 notes, (67) 600.
 single-cell cultures, (69) 589.
 whitmeri infection in a cow, (65) 268.

Bacon—

- and bacon pig prices, (70) 848.
 and pork production, cost relations, (65) 662.
 curing on farm, (66) Tenn. 460.
 exports from United States, 1920-32, (69) Ohio 600.
 hog, handbook, (62) 867.
 improvement of quality, (61) 560.
 production, effect of seedy cuts, (70) Wis. 664.
 production in Sweden, (61) 261.
 production, use of oil cakes for, (65) 555.
 quality, effect of corn germ, (69) 409.
 sugar-cured v. salt-cured, (65) Tenn. 861.

Bacteremia, human case, due to *Salmonella suipestifer*, (63) 480.

Bacteremia, metaphen treatment, (62) 560.

Bacteria—*see also* *Microorganisms and Organisms*.

- acid-fast, behavior in oil and water systems, (68) 8.
 activity, effect of exchangeable ions in soil colloids, (65) 813.
 aerobic and anaerobic, decomposition of hemicelluloses by, (66) 11.
 aerobic, growth, relation to oxidation-reduction potentials, (68) 435.
 agar stab cultures, longevity, (68) Ky. 375.
 agglutination rate, effect of temperature, (61) 469.
 anaerobic, *see* *Anaerobes*.
 and seed-corn maggot, relation, (65) 360.
 antibiosis to smuts and other fungi, (69) Minn. 222.
 application against corn borer, (64) 751.
 behavior in certain soils, (62) N.Y. State 416.
 butyl-acetone group, physiological studies, (69) 324.

Bacteria—Continued.

- chemical study, (65) 205.
 classifications, diagrammatic summary, (66) 521.
 colonies on petri plates, variation in, cause, (61) 265.
 crown gall and hairy root types, differentiation, (67) 538.
 effect of high frequency displacement currents, (70) Mich. 828.
 effect of plant growth on, (68) 460.
 emulsions, highly concentrated, lysis by bacteriophage, (61) 514.
 gender of generic names, (70) 676.
 growing during pasteurization, control, (62) N.Y.State 373.
 growth, effect of carbonation, (65) Ill. 373.
 growth measurement, technic, (67) 374.
 heat-loving, in pasteurized milk, N.Y. State, (62) 73; (66) 569.
 in acid foods, importance of temperature on survival time, (69) 306.
 in commercially prepared infant foods, (62) 392, N.Y.State 392.
 in eggs, (69) 596.
 in ice cream, counting, (66) Iowa 665.
 in milk, *see* *Milk*.
 in nasal cavities and middle ear of vitamin A-deficient rats, (62) 493; (63) 493, 494.
 in plant tissues, staining for demonstration, (66) 439.
 in respiratory tract of fowls, effect on agglutinins in blood, (65) 270.
 in soils, *see* *Soil bacteria*.
 in water, *see* *Water*.
 inagglutinability, (66) 867.
 killing by bacteriophage, (68) 243.
 lactic acid, sugar-fermenting abilities, nitrogen sources for, (69) 263, 264.
 metabolism, (69) 487.
 microphotographic atlas, (61) 720.
 morphology and the d'Herelle phenomenon, (61) 720.
 nitrate-assimilating in soil, (68) 450.
 nitrifying, isolation and study, (61) Idaho 810.
 nitrogen fixing of volcanic ash, (68) 738.
 of enteric group in poultry, (67) 170.
 on seeds, effect on germination, (66) 622.
 pathogenic fluorescent group and fire-blight organism, comparison, (69) 68.
 pathogenic, longevity in frozen cherries, (70) 715.
 physiological studies, length of incubation period, (70) 591.
 physiology and biochemistry, treatise, (63) 478.
 physiology, treatise, (67) 738.
 phytopathogenic, agglutination tests with, (65) 746; (67) 538.
 plate counting, use of sodium oleate, (68) Mich. 288.

Bacteria—Continued.

- producing trimethylene glycol, (67) 661.
- propionic acid, formation and identification of acids, (65) 711.
- reduction of nitrates and nitrites in semisolid media, (68) 436.
- sulfofying, in mineral and peat soils, (68) 595.
- thermophilic, in milk, udder as source, (62) N.Y.State 768.
- utilization of sugars by, (70) 441.
- variation and dissociation, (70) 383.
- variations in, (65) 522; (69) 711; (70) 382.
- yeast, and molds in the home, (63) 275.

Bacterial—

- activities in soil, methods of study, (66) 616.
- cataphoresis, (64) Pa. 145.
- metabolism, treatise, (62) 707.
- spores, innocuity and latency in animal body, (64) 265.
- spores, studies, (61) 214.
- wilt disease, notes, (63) 462.

Bactericides—

- composition, Conn.State, (61) 355; (69) 234.
- phenol coefficients, determination, (69) Ohio 61.

- Bacterins, autogenous, value against mastitis, (69) 108.

Bacteriological—

- culture media, *see* Culture media.
- technic, treatise, (65) 69.

Bacteriology—

- agricultural, electrostatic studies, (63) N.Dak. 868.
- agricultural, handbook, (70) 164.
- and immunity, principles, treatise, (63) 74; (67) 738.
- animal, work in, (68) Mich. 375.
- applied to dairying, (70) 670.
- determinative, Bergey's manual, (62) 821.
- laboratory guide, (62) 166.
- of frozen meat, (66) 457.
- pitfalls in, (69) 711.
- problems, application of statistics to, (69) 6.
- recent advances in, treatise, (67) 310.
- system, relation to medicine, (66) 371.
- textbook, (62) 259; (66) 665; (68) 243; (69) 577.
- treatise, (62) 667, 770; (64) 260; (66) 868.
- veterinary, manual, (69) 709.

Bacteriophage—

- active against avian typhoid, (61) N.C. 770.
- Brucella abortus*, search for, (65) 376.
- electrical charge, (68) 8.
- Kuhn, studies, (61) 720.
- lysates of *Salmonella suispestifer*, antigenic properties, (69) 276.
- lysis of highly concentrated bacteria emulsions, (61) 514.

Bacteriophage—Continued.

- of *Bacterium pruni*, (65) 240.
- of d'Herelle, (61) 819.
- quantitative determination, (68) 601.
- relation to control of plant parasites, (69) 373.
- relation to *Salmonella* and pullorum disease, (65) Mich. 180.
- specific, for diarrhea of calves, (65) 872.
- Bacteriophage, treatise, (62) 875.
- Bacteriostasis, dye, significance of compound formation of crystal violet, (63) 309.
- Bacterium—
 - abortivo-equinus, *see* *Bacillus*.
 - abortus—*see also* Abortion, *Alcaligenes abortus*, *Bacillus abortus*, and *Brucella abortus*.
 - agglutination antigen, preparation, technic, (69) 585.
 - associated with carpal hygromata of cows, (64) 559.
 - diagnosis, (63) 869.
 - elimination from udder, relation to milk agglutination titer, (66) 71.
 - elimination in milk, (66) 174.
 - in blood, urine, and feces of cattle, (67) 314.
 - in body of cow, persistence, (66) 174.
 - in calves, (63) Ind. 572.
 - in fowls, (64) 562; (70) 241.
 - in milk, (67) 314.
 - in milk, agglutination titer as indicator, (65) 265.
 - isolated from gelatinous infiltration in uterus of cow, (65) 669.
 - isolation, methods, (61) 674.
 - live cultures fed to cows, effect, (61) Ind. 370.
 - notes, (61) Mich. 468.
 - ovis, causing abortion in sheep, (65) 377.
 - ovis, infection by agglutination, diagnosis, (70) 826.
 - relation to fistula and poll-evil of horses, (67) 168.
 - resistance of rats, effect of diet, (62) 876.
 - strains, comparative agglutinating properties, (62) Del. 772.
 - viability, (66) Ky. 172.
 - aerogenes in raw milk, (70) 86.
 - albilineans, notes, (68) 60.
 - aloes, proposed name, (67) 703.
 - anatum fatal infection of chicks, (62) 269.
 - anatum, notes, (64) Ky. 174; (67) 749.
 - andropogoni, notes, (61) 48.
 - apii, control, (64) Ohio 350.
 - beticola, galls formed in connection with, (68) 773.
 - beticola, notes, (66) 643.
 - betivorus, notes, (67) 148.
 - betle n.sp., description, (63) 748.
 - campestre—
 - armoraciae n.var., description, (61) 240.

- acterium—Continued.
 campestre—continued.
 B. phaseoli group, differentiation by agglutination tests, (62) 235.
 notes, (62) N.Y.State 748; (65) Me. 749; (66) 147; (70) 345.
 cazanbon, infection of Lepidoptera by, (64) 458.
 cerasi, notes, (63) 747.
 citri, see Citrus canker.
 citriputeale, notes, (61) Calif. 341; (63) 747.
 cucurbitae n.sp., description, (62) 849.
 cypripedii, notes, (67) 148.
 enteritidis in foxes, (66) 472.
 enteritidis, notes, (69) 710.
 gallinarum, elimination in the egg, (70) 248.
 granulosis, isolating, differential filtration for, (66) 572.
 holcicola n.sp., description, (63) 545.
 lachrymans, notes, (62) Fla. 344; (65) 45.
 lachrymans, relation to angular leaf spot and fruit rot, (63) Fla. 48.
 leguminosarium growth habits, (62) Pa. 347.
 lepisepticum, notes, (61) 770.
 maculicolum, notes, (70) 345.
 maculicolum, production of agglutinins by, (65) 840.
 malvacearum—
 development, factors affecting, (62) 441.
 in cottonseed, control, (61) 844.
 notes, (65) 646; (67) 536, 537; (68) 492; (70) 345.
 marginatum, notes, (62) 533; (65) 542; (68) 776.
 marginatum production of crystals in starch media, (62) 320.
 medicaginis phaseolicola halo blight, notes, Ga., (63) 143, 841.
 melitensis, see Micrococcus melitensis.
 melleum, notes, (69) 536.
 mori, notes, (70) 345.
 nakatae, new type B, (70) 345.
 nephritidis equi—
 rough and smooth variants, (68) 674.
 serologic characteristics, (68) 675.
 ovinum n.sp., description, (69) 717.
 paludis—
 and Bacillus welchii, comparison, (67) 73.
 n.sp., notes, (63) 372.
 notes, (65) 472; (67) 600.
 single-cell cultures, (69) 589.
 papavericola n.sp., notes, (62) 646.
 paraviscosum equi, description, (62) 265.
 phaseoli-B. campestre group, differentiation by agglutination tests, (62) 235.
 phaseoli—
 on beans in shipment, (69) 813.
 seed infection by, (67) 545.
- Bacterium—Continued.
 phaseoli—continued.
 sojense, notes, (66) Del. 543; (70) 345.
 studies, (64) U.S.D.A. 45.
 pruni—
 bacteriophage of, (65) 240.
 germicial action of lime for, (64) Del. 641.
 studies, (65) N.C. 146; (66) Del. 543; (67) U.S.D.A. 145, 414.
 pseudotuberculosis rodentium, studies, (67) 598; (69) 110; (70) 686.
 puerariae on kudzu vine, notes, (66) 147.
 pullorum—
 cultivation, selective media, (63) 375.
 from European bullfinch, (61) 676.
 in hatching eggs, (63) 876.
 in tissues of dead chick, viability, (62) 171.
 infection, atypical, in chicks, (62) 268.
 infection, effect on blood constituents, (66) 174.
 phasiani, notes, (62) 171.
 strains, variability, (70) 685.
 studies, (61) Calif. 370.
 transmission among mature chickens, (66) 174.
 transmission, methods, (61) R.I. 676.
 punctilans, notes, (70) U.S.D.A. 197.
 purifaciens, notes, (62) 77; (66) 573; (69) 717.
 pyogenes, biology, (61) 470.
 pyoseptikem viscosum equi, biology, (66) 371.
 pyranei, infection of Lepidoptera by, (64) 458.
 radiobacter and B. tumefaciens, comparison, (67) 538.
 ricini, notes, (70) 345.
 rubrilineans, notes, (70) 345.
 sanguinarium, viability relation to soil reaction, (61) N.J. 769.
 savastanoi fraxini, proposed name, (67) 557.
 sesami, B. solanacearum, and B. sesamicola, comparative studies, (69) 66.
 sesamicola, B. sesami, and B. solanacearum, comparative studies, (69) 66.
 sojae japonicum, notes, (70) 345.
 solanacearum—
 B. sesami, and B. sesamicola, comparative studies, (69) 66.
 in Arachis hypogaea, rotation test with, (62) 50.
 new host plants, (68) 60.
 notes, (61) 648; (62) Fla. 345; (64) 448; (65) N.C. 146, Fla. 439; (67) 407, 409, Fla. 535; (68) 207; (69) 533.
 wilt diseases caused by, control, (68) N.C. 487.

Bacterium—Continued.

- sporigenes, growth factor requirement, (70) 165.
- suipestifer bacteriophage lysates, antigenic properties, (69) 276.
- suipestifer, septicemia of pigs, (69) 580.
- syringae, notes, (63) 747.
- tabacum, control, (67) Pa. 45.
- tabacum, migration through tobacco leaf tissues, (67) 550.
- tabacum, notes, (64) Pa. 144.
- thuringiensis, infection of gypsy moth by, (63) 849.
- thuringiensis, infection of Lepidoptera by, (64) 458.
- tolaasi, notes, (69) 375.
- tomato n.sp., notes, (70) 345.
- translucens and *B. translucens* v. *undulosum*, studies, (67) 542.
- translucens undulosum, notes, (64) 742; (69) 64.
- trifoliorum, notes, (66) 149.
- tularensis—
- in American dog tick, (67) 72.
 - in snowshoe rabbits, (65) 267.
 - in tissues of sage hens and infesting ticks, (67) 455.
 - in wood tick, (61) 856.
 - infection of quail by, (69) 271.
 - of low virulence in nature, (69) 712.
 - transmission by cats to man, (70) 91.
- tumefaciens—
- and *B. radiobacter*, comparison, (67) 538.
 - and closely related organisms, differentiation, (64) 526.
 - apple strain of, (62) 50, 51.
 - effect of bacteriophage, (62) 347.
 - in tomato, (62) 146.
 - in tomato, migration in, (65) 47; (66) 445.
 - inoculation experiments on celery roots, (69) 62.
 - notes, (64) 45; (65) 841; (67) 698.
 - radiations from, (62) 148.
 - vascularum, notes, (64) 448; (65) 46, 348; (67) 263, 271; (68) 60; (69) 225.
 - vesicatorium, notes, (65) N.J. 838; (70) U.S.D.A. 197.
 - viscosum equi—
 - and *Bacillus polymorphus suis*, relation, (66) 574.
 - in suckling pigs, (66) 467.
 - infection in foals of heavy breeds, (63) 480.
 - studies, Ky., (64) 172; (66) 575.
 - variation in, (66) Ky. 171. - viscosum, septicemias due to, (70) 247.
 - vulgatus, synthesis of vitamin B by, (62) 94.
- Bactroceca cucurbitae*, see Melon fly.
- Badebecia urticae, notes, (68) Mich. 351.
- Badger, embryology, (68) 464.
- Badgers, parasites of, control, (64) 777.
- Baeoanasia, African species, (65) 552.
- Baeus latrodicti n.sp., description, (64) 756.
- Bagworm—
- commercial use for, (67) 50.
 - notes, (64) Tenn. 357.
 - wattle, insecticidal dusts for tests, (69) 78.
- Bagworms, parasites of, (64) 455.
- Bahia grass—
- breeding, (67) Fla. 516.
 - growth and fertilizer formulas, (69) Fla. 199.
 - growth behavior and maintenance of organic foods in, (64) Fla. 218.
 - growth behavior and yields, (67) Fla. 516.
- Baileya multiradiata, toxicity, (70) Tex. 241, 380.
- Bairamliia fuscipes n.g. and n.sp., description, (62) 159.
- Bairamliia fuscipes, parasite on Ceratophyllus wickhami, (64) 250.
- Baits, use in pest control, (67) 285.
- Bakery products, heat flow through, (70) 271.
- Bakery products, pH determination, (61) 807.
- Bakewell, Robert, memorial to, (61) 400.
- Baking—
- chemistry, colloidal aspects, (69) 324.
 - club manual, revision, (65) Ill. 892.
 - experimental, variability of loaf volume, (66) 291.
 - ingredients, analyses, (67) 364.
 - laboratory, standardization, (65) 890; (69) 461.
 - powder—
 - and chemicals, development and use, (64) U.S.D.A. 193.
 - behavior, (66) 191.
 - carbon dioxide in, determination, (65) 14.
 - cream of tartar and tartaric acid in, (64) 513.
 - effect on rats, (64) 283.
 - reaction in doughs, (67) 338.
 - residues, effect on growth and nutrition, (63) 191. - procedure, experimental, standardization, (67) Nebr. 621.
 - quick breads and cakes at high altitudes, (65) Colo. 91.
 - research fellowship project, report, (68) 559.
 - test for low diastatic flours, supplementary procedure, (66) 687.
 - tests at high altitudes, Colo., (65) 90, 91.
 - tests, experimental, apparatus for delivery of solutions, (70) 9.
 - tests, points for consideration, (63) 590.
 - tests, utility of mechanical molding, (66) 687.
 - tests, variability in standard laboratory, (66) 687.

- Balance for live animals, description, (68) 422.
- Balaninus elephas, studies, (63) 854.
- Balaninus nucum, notes, (62) 852.
- Balansia hypoxylon, conidial fructifications, (64) 448.
- Balantidium coli—
in pigs, relation to diet and intestinal flora, (66) 774.
notes, (62) P.R. 771.
- Balantidium, experimental infection of rats, (62) 467.
- Balclutha—
mbila, transmission of plant virus by, inheritance, (66) 156.
punctata, introduction and distribution, (61) 249.
- Baloon observations, pilot, code for enciphering, (64) U.S.D.A. 416.
- Balsam—
annual increment, (64) N.Y.Cornell 639.
bark beetle, notes, (61) Mich. 450.
fir, decay in, (62) 538.
fir, girdling hardwoods to release, (62) 844.
fir, height growth in, (66) 438.
fir needle rusts in North America, conspectus, (66) 447.
fir, volume table, (61) Mich. 43.
seedlings, mineral soil requirements, (63) Mich. 43.
- Bamboo—
biochemical studies, (68) 457.
borer, notes, (64) 161.
Coccidae attacking, (65) 248.
Loranthaceae outbreak on, (67) 557.
pest, notes, (65) 546.
seedlings, response to electrocultural treatment, (68) 105.
shot borer, smaller, on tobacco, (67) 150.
- Banana—
aphid, notes, (63) 550; (67) 702.
bacterial wilt and Panama disease, differentiation, (68) 633.
bunches, twin character, asexual inheritance, (63) 125.
bunchy top disease in Ceylon, (62) 238.
bunchy top, studies, (66) 841.
disease, notes, (61) 648.
diseases, (67) 415.
diseases in British Guiana, (61) 654.
diseases in Queensland, (68) 349.
diseases in storage and transport, (69) 538.
finger tip disease of Chinese banana, (66) 343.
flour for infants, (66) 192.
fruit rot, new, in Palestine, (69) 676.
fruit-eating caterpillar, notes, (63) 551, 850; (65) 248.
leaf spot in Queensland, (68) 349.
Panama disease and bacterial wilt, differentiation, (68) 633.
Panama disease, recognition, (63) 248.
- Banana—Continued.
Panama disease, studies, (67) 276, 401, 415, 416.
peroxidase, inactivation temperature, effect of pH, (65) 214.
pitting disease, nature and control, (69) 676.
plant, composition and nutrient uptake, (69) 215.
powder, effect on fecal flora of infants, (70) 273.
powder, vitamins in, (70) 279.
root borer, notes, (62) 153; (66) P.R. 247.
root weevil, bibliography, (66) 352.
roots, Tylenchus musicola affecting, (67) 277.
seeds, crystalline globulin in, (65) 11.
squinter disease in Australia, (67) 276.
virus disease, new, (67) 701.
wilt fungus, relation to abaca, (67) 405.
wilt recognition, (63) 248.
wilt, symptoms, (67) 416.
- Bananas—
acclimatization tests, (61) 529.
apple and fig, analyses, (68) 271.
as supplementary feeds for poultry, (67) Hawaii 302.
beetle affecting, (62) 358.
breeding, (67) 395.
castniid moth affecting, (62) 854.
changes in osmotic pressure during ripening, (67) 260.
culture experiments, (63) V.I. 136; (67) Tex. 673.
culture in Palestine, (65) 834.
culture in Puerto Rico, (64) P.R. 842.
dried, vitamin C in, (68) 861.
dwarf, mutant types, (69) 29.
feeding value for poultry, (69) Hawaii 698.
from Philippines, composition, (62) 686.
Lacatan, identity of various sorts, (69) 806.
moth affecting, (62) 357.
nutritive value, (70) 558.
Philippine, mineral content, (70) 482.
respiration during ripening, effect of ethylene, (61) 517.
ripening, formation of pectins in, (61) Md. 803.
ripening processes, effects of acetylene, (68) 175.
ripening with ethylene gas, (61) Minn. 39, Mich. 424; (63) Mich. 41; (67) 136.
storage, ripening, and respiration, (68) 337.
testing, propagation, and distribution, (63) Guam 136.
vitamin A in, (70) Tex. 131.
vitamin B complex in, (67) 632.
vitamin C in, (68) 861; (69) 310.
yields, V.I., (62) 227; (65) 737.
- Bank, Federal Land, of Springfield, loaning operations, analysis, (69) N.Y.Cornell 134.
Bank loans, long term, (64) Iowa 387.

Banking—

- business, movement to larger cities, (69) Kans. 287.
- Iowa, effect of seasonality of agriculture, (68) U.S.D.A. 264.
- Russian cooperative, (65) 389.

Banks—

- country, and farm credit problems, (65) 80.
- country, of Texas, economic efficiency, (67) Tex. 615.
- Federal intermediate credit, functioning, (65) 580.
- Federal Land, functioning, (65) 580.
- intermediate credit system, papers on, (67) U.S.D.A. 614.

Bantams, see Poultry.

- Baptisia, chromosome numbers in, (68) 602.
- Barathra brassicae, notes, (67) 286.

Barberry—

- bacterial leaf spot, studies, (65) 750.
- eradication, (62) Mont. 234; (66) 531; (70) U.S.D.A. 486.
- situation in Ontario, (62) 220.
- susceptibility and resistance to stem rust, (67) U.S.D.A. 543.

Barium—

- chloride as ruminatoric, experimental study, (63) 75.

fluosilicate—

- and nicotine sulfate, incompatibility, (67) 49, 558; (68) 636.
- as arsenical substitute, (63) 749; (66) 760.
- effect on bean plants, (65) 58.
- for tobacco flea beetle, (69) 84.
- insecticidal value, (62) Tenn. 543; (67) La. 283, 427; (70) Mo. 206.
- use against Mexican bean beetle, (66) Conn.State 761.
- value for sprays, (66) 247.
- peroxide, formation, (67) 198.

Bark aphid, notes, (69) Fla. 231.

Bark beetles—

- affecting injured trees, (64) 462.
- and fungi, interrelations, (69) 560.
- control in western forests, results, (68) 73.
- control, solar-heat method, (63) U.S.D.A. 755.
- destruction by predacious mite, (69) 685.
- distribution in Finland, (68) 781.
- epidemics, relation to windfalls, (62) 650.
- fauna of, in Russia, (62) 542.
- galleries of, (64) 550; (68) 781.
- German, types of mines, (67) 285.
- in yellow pine, Coleoptera associated with, (63) 553.
- larval development, (69) 835.
- life history, (63) 253.
- new Braconidae parasitic on, (66) 160.
- of olives, (67) 285.
- period of development in Sweden, (63) 846.
- revision, (61) 359, 661.

Bark beetles—Continued.

- Swedish, biology, (61) 557.
 - tree medication for, new technic, (64) 249.
 - western, notes, (70) U.S.D.A. 499.
 - zoogeographical distribution in Czechoslovakia, (68) 781.
- Bark borers, control in fruit and shade trees, (69) 826.
- Barley—
- acre values, (69) Minn. 201.
 - acreage increase, (69) U.S.D.A. 644.
 - Alpha, loose smut control, (69) N.Y. Cornell 61.
 - and oats mixture for feed, seeding experiments, (63) N.Dak. 823.
 - and oats mixtures, tests, (67) Ohio 517.
 - and wheat crosses, studies, (68) 176.
 - and wheat for fattening hogs, (68) Mont. 796.
 - and wheat for pigs, grinding, (69) 405.
 - antirachitic properties, (69) 755.
 - as pasture supplement for pigs, (62) 163.
 - ash content, factors affecting, (61) Utah 409.
 - awnless, yield, (62) S.C. 625.
 - barbless, notes, (61) Wis. 127.
 - behavior in grinding, (67) 177.
 - breeding, (61) Oreg. 26, 29, Kans. 125, 825; (62) N.Y.Cornell 731; (63) N.J. 331, Tex. 435, Idaho 523; (64) Oreg. 334, N.Y.Cornell 623, Okla. 732, Ill. 825, Kans. 826; (65) Tenn. 825; (66) Tex. 27, Idaho 220, Ill. 221, 326, Mo. 326, N.Y.Cornell 626; (67) U.S.D.A. 28, Nebr. 517, Tex. 668; (68) Idaho 318, Colo. 608, Ill. 608, Mont. 753; (69) Iowa 37, N.Y.Cornell 38, Kans. 200, Oreg. 354; (70) Tex. 173, U.S.D.A. 464, Ill. 609, U.S.D.A. 609, S.Dak. 763.
 - breeding in France, (66) 426.
 - cane molasses, and pineapple bran, comparative feeding value, (61) 666.
 - caryopsis and lemma, inheritance of color in, (63) 23.
 - chromosomal mutation rates, effect of aging and heat, (70) 169.
 - combining test, (62) N.Dak. 129.
 - covered and loose smuts, effect of depth of seeding, (69) 666.
 - covered smut, control, (64) Okla. 742; (65) 345, Calif. 744; (66) Idaho 235; (67) 541.
 - crosses, inheritance of reaction to stem rust and barbing of awns, (70) 30.
 - crosses, studies, (67), 663.
 - culture, (68) Mont. 753.
 - culture and varieties, (61) Wyo. 437.
 - culture experiments, (61) Nebr. 824; (63) Wyo. 130, 728; (65) Wyo. 127, Nebr. 822; (67) 123, Ohio 517; (69) Kans. 200; (70) Tex. 173, Wyo. 763.
 - culture in Lawton, Oklahoma, region, (68) U.S.D.A. 467.
 - culture methods, (66) U.S.D.A. 222.

Barley—Continued.

culture under dry-farming conditions, (61) U.S.D.A. 724; (65) N.Mex. 527.
 culture under irrigation, (63) Wash. Col. 633.
 date-of-seeding test, (69) Del. 37.
 deficiencies for young pigs, (65) 254.
 development, heterozygous condition, effect of lethal factor, (69) Colo. 29.
 disease, notes, (68) 769.
 diseases and seed treatment, (66) 833.
 diseases, control, (67) 538; (69) 222, Wis. 811.
 diseases, field method of insuring positive attack, (66) 440.
 diseases in Kenya Colony, (64) 145.
 drying by forced draft with heated air, (63) U.S.D.A. 583.
 effect of delayed harvest, (64) Iowa 434.
 effect of phosphorus, (66) 20.
 effect of rainfall in different seasons, (65) 223.
 effect of uniformity of spacing seed, (66) 822.
 ergot on, effect on cattle, (66) Mich. 457.
 feeding value, (67) Tex. 723; (68) Pa. 511, Utah 799, Colo. 801.
 feeding value compared with other grains, (69) 840.
 feeding value, effect of fineness of grinding, (68) 228.
 feeding value for lambs, (64) Okla. 63.
 feeding value for pigs, (64) Nebr. 166.
 feeding value for poultry, (63) Mich. 564; (64) Mich. 374; (68) Mich. 364; Ariz. 795.
 feeding value for work horses, (66) N.Y.Cornell 659.
 fertilizer experiments, (63) 332, 333, 824; (67) 123, 124; (68) Utah 183, 319; (69) Del. 37.
 fertilizers, effect on following hay crop, (61) 330.
 flour for cakes and muffins, (69) 892.
 foot rot, notes, (63) 245.
 for fattening livestock, (66) S.Dak. 162.
 for feed, seeding experiments, (63) N.Dak. 823.
 genetic studies, (64) 24; (67) Mo. 378.
 germination after years of storage, (69) 363.
 germination studies, (70) Alaska Col. 321.
 glutelins, (61) 801.
 glutelins, optical rotation, (65) 108.
 gout-fly, chalcid endoparasite of, (66) 160.
 grain and straw, composition, (68) 320.
 grinding, fineness, Wis., (65) 466; (67) 723, 731.
 grinding for fattening cattle, (65) Minn. 365.
 ground, feeding value, (68) Wyo. 797.
 ground, for laying hens, (62) S.C. 661.

Barley—Continued.

ground, v. ground yellow corn for poultry, S.C., (64) 668; (65) 557.
 growing and marketing, (66) Ill. 283.
 grown in England, *Gibberella saubinetii* on, (70) 792.
 grown under glass, moisture fluctuations in, (65) 214.
 growth and yield in South Australia, effect of nitrogenous fertilizers, (70) 764.
 growth curves, (67) 371.
 growth, effect of high tension electric discharge on, (69) 188.
 hand-pollinating, methods, (70) Ill. 609.
 harvest period, (61) Iowa 329.
 harvesting with combine, (62) Minn. 478.
Helminthosporium diseases in South Africa, (67) 403.
 hull-less and hull, for fattening pigs, (64) Mont. 257.
 hybrids, notes, (65) Calif. 728.
 hybrids, rapid method for making, (70) 764.
 hybrids, smooth-awned, stripe resistance and yield, (70) Wis. 637.
 Illinois 1928 v. northern, feeding value, (62) Ill. 361.
 improved varieties, (63) Wis. 32; (69) Md. 643.
 improvement, (62) Mont. 219; (65) N.J. 824; (67) N.J. 517.
 improvement conference, papers, (70) 175.
 improvement, technic, (66) 125.
 in Scotland, effect of environment, (68) 468.
 indexes of prices, quantities, and cash incomes of Minnesota, (66) Minn. 480.
 inheritance and linkage in, analysis, (61) 629.
 inheritance in, (61) 721; (67) 375; (68) Colo. 608, 748; (69) 190, 344.
 inoculation tests with *Ustilago hordei*, (62) Calif. 745.
 leaf blotch near Cambridge, England, (69) 63.
 leaf rust in Manitoba, (63) 839.
 leaf rust resistance in crosses, inheritance, (62) 845.
 leaf rust, varietal susceptibility, (67) U.S.D.A. 266.
 leaves, inheritance of length and width, (65) 521.
 linkage relations in, (66) Minn. 126; (70) Colo. 609.
 loose smut, control, (64) N.Y.Cornell 642; (67) U.S.D.A. 138; (68) N.Y. State 626; (70) U.S.D.A. 486, N.C. 791.
 loose smut, floral infection, effect of humidity, (66) 239.
 malting quality, (61) 220; (70) 467.
 malting value, effect of fertilizers, (67) 123.

Barley—Continued.

 life history in California, (63) 53.
 lizards as predators, (70) 504.
 migration and control, (70) U.S. D.A. 648.
 modes of curly top transmission, (66) Calif. 451.
 morphology, (61) Utah 851.
 new automatic trap for, (65) 845.
 notes, (61) Idaho 848; (63) Idaho 548, 551; (68) Utah 215; (69) Idaho 824; (70) U.S.D.A. 499.
 outbreaks, predicting, (61) 249.
 Rickettsia-like microorganism in, (61) Calif. 352; (62) Calif. 752; (63) 551.
 spring migration, (63) N.Mex. 455.
 studies, Utah, (61) 54; (66) 155.
 thermohyetics of, (61) 52.
 weed hosts, (68) U.S.D.A. 42.
 yeast forms from, (61) 250.
 leafhoppers and parasites, range in Mexico, (61) Calif. 352.

Beet—Continued.

leaves, change of substances in, during vegetation, (67) 372.

leaves, deformation, (67) 545.

leaves, weight and nitrate nitrogen in juice, correlation, (64) 725.

mildew, cause, (65) Calif. 744.

molasses, feeding value, Mont., (68) 795; (70) 823.

mosaic—

and spinach mosaic, reciprocal transmissibility, (61) 45.

notes, Wash.Col., (63) 244; (64) 645; (65) 348.

studies, (62) 49.

tissue, intracellular bodies in, (61) 843.

planters for planting corn, tests, (63) N.Dak. 877.

pulp—

and molasses mixture v. silage for cows, Ohio, (63) 668; (64) 767.

dried and wet, feeding value, (66) U.S.D.A. 863; (68) W.Va. 806; (69) Wyo. 92.

dried, feeding value, (67) Nebr. 298; (68) Utah 237; (69) 567.

feeding value for pigs, (66) 459.

in winter ration for lambs, value, (63) Mo. 763.

v. molasses for milk production, (69) P.R. 849.

wet, feeding value, (68) Mont. 795.

wet, v. corn silage for dairy cattle, (68) Utah 808.

seed—

germination, (62) 136.

investigations, methods in, (61) 828.

production under paper bags, (68) 43; (70) 617.

quality on sale in New York, (67) N.Y.State 130.

treatment, (63) 245; (65) N.J. 839; (67) 522.

under glassine bags, production, (64) 34.

seeds, stimulation with dry media, (63) 427.

sugar factory waste waters, purification, (69) 734.

sugar industry in Colorado and in United States, (62) 178.

tops, aluminum in, detection, (61) Mich. 712.

tops, iron in, (67) U.S.D.A. 85.

Beetle—

larvae, Indian, descriptions, (61) 850.

new in Michigan, in dried sweet corn, (65) Mich. 750.

Pernambuco, attacking lead cables, (64) 248.

Beetles—

ambrosia, of California, (63) 161.

and damage to hides and leather, notes, (69) 695.

as strawberry pests, (66) 557.

Beetles—Continued.

British, handbook, (69) 395.

British, their homes and habits, (70) 652.

buprestid, revision of North American species, (61) 255.

collecting, new methods, (65) 355.

in Pennsylvania, fermenting baits for trapping, (68) 782.

Indian, immature stages, (63) 358.

long-horned timber-boring, control, (61) 358.

of America north of Mexico, manual, (65) 57.

Beets—

acidity response, (66) N.Y.Cornell 634. breeding, (64) Ill. 837; (66) 326; (69) Conn.State 209.

color, studies, (64) Oreg. 339.

cross blockers for, (69) Calif. 116.

cultivation experiments, (65) N.Y.Cornell 635.

culture experiments, (62) P.R. 737; (63) Utah 639.

Detroit Dark Red, improvement in color, (68) Ill. 617.

effect of potassium deficiency, (65) N.J. 831.

effect of rye and oat straws, (69) 183.

effect of soil acidity, (64) N.Y.Cornell 632; (66) Va.Truck 738.

effect of superphosphates, (66) Va.Truck 738.

fertilizer experiments, (61) R.I. 640; (63) Ill. 533, R.I. 616; (64) R.I. 839;

(65) R.I. 534; (66) N.Y.State 535; (67) Ill. 36; (70) Tenn. 182, Tex. 183.

field, *see* Mangels.

flowering tendency, inheritance, (66) 816.

growth and soil reaction, relation, (67) 37.

improvement, (63) Mass. 533; (69) Mass. 652; (70) Ill. 616.

Ohio Canner, description, (66) Ohio 635.

optimum pH range, (66) Va.Truck 739.

paper mulch experiments, (61) Mich. 37, 228. Ohio 440; (62) N.Y.Cornell 737; (66) N.Y.Cornell 634; (68) 43.

pollination period, (68) 200.

potash requirements, (63) N.J. 337.

premature flowering, causes and prevention, (70) N.Y.Cornell 775.

preparation for market, (61) U.S.D.A. 834.

production, machinery for, developing, (65) 275.

raising in Europe, labor problems, (65) 581.

seed, storage studies, (64) Ohio 634.

seedstalk formation, premature, (68) 43.

selection, (61) Mass. 833; (66) Ill. 228; (67) Ohio 524.

self-sterility and fertility in, (68) 43.

stock, variety tests, (66) 426.

strain tests, (62) Ill. 337.

- Beets—Continued.
 sugar, *see* Sugar beets.
 testing sugar content, (62) 133.
 type of growth, relation to temperature and length of day, (70) 618.
 variability and heredity in, (68) 748.
 variety tests, (62) *Tex.* 637; (66) *Alaska* 626; (67) *Conn.State* 523, *Calif.* 525; (69) *Alaska* 36; (70) *Tex.* 183.
 vitamin C in, (68) 861.
- Begonia—
 disease, notes, (66) 643.
 leaf nematode disease, *N.Y.Cornell*, (69) 61; (70) 791.
- Belascaris marginata—
 effect of rotenone, (69) 423.
 notes, (62) 265.
- Bellis perennis decapitated flower stalks, effect of growth-promoting substances, (64) 326.
- Beltsville laboratory, physiological research at, (70) *U.S.D.A.* 463.
- Bembecia marginata, *see* Raspberry root borer.
- Bembidion quadrimaculatum, notes, (61) *Mich.* 359.
- Bemisia—
 gossypiperda—
 n.sp., notes, (62) 452.
 notes, (70) 201, 356.
 on cotton in Punjab, (65) 654.
 vector of zinnia leaf curl, (69) 828.

 - mesdag and oats, hybrids, inheritance of smut resistance, (68) 748.
 - onion fly, notes, (67) 705.
 - quarter and malignant edema, (67) 70.
 - scale—
 - larval stage, dusting sulfur for, (63) 162.
 - new spray for, (63) 256.
 - notes, (62) 542.
 - parasites, expedition to Eritrea in search of, (65) Calif. 755.
 - parasites, notes, (65) 552, Calif. 756.
 - protective stupefaction, (63) 157.
 - resistance to hydrocyanic acid fumigation, (63) 157.
 - resistance to insecticides, (68) 355.
 - tolerance to insecticides, (70) 500.
 - water fever, studies, (69) 392.
 - wattle, seed selection in, (67) 137.
- Blackberries—
- Brainerd, new variety, description, (67) U.S.D.A. 135.
 - breeding, (61) N.J. 734; (62) 139; (67) R.I. 244; (69) R.I. 210; (70) Tex. 182.

Blackberries—Continued.

- culture, (63) West.Wash. 537, La. 640, Ohio 640; (64) Okla. 738; (70) Tex. 182.
 effect of freezing, (66) Ga. 740.
 effect of irrigation, (65) Oreg. 740.
 mite affecting, (64) West.Wash. 654.
 named seedlings, description, (69) 799.
 of lower South, tentative classification, (70) 51.
 of North America, key and descriptions, (67) 258.
 production, (61) Mo. 836.
 pruned, yields, (61) Tenn. 140.
 redberry disease of, (67) 425.
 seed and berry size, (67) 394.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 use for vinegar, (67) Fla. 619.
 varietal and cultural notes, (65) Fla. 435.
 varieties, jellying properties, Fla., (67) 620; (69) 303.
 varieties, promising, (67) 258.
 variety for shipment, (63) La. 136.
 variety immune to double blossom disease, (63) Fla. 635.
 variety tests, (61) Ga. 136; (62) Tex. 636; (64) Tenn. 340, Ga.Coastal Plain 631; (66) Ga.Coastal Plain 633; (67) Tex. 673; (68) Mont. 760; (69) Ga.Coastal Plain 48.

Blackberry—

- anthracnose, control, (62) Ill. 347.
 bushes, control in New Zealand, (65) 533.
 crosses, (63) Tex. 444.
 crosses, pseudogamy in, (70) 316.
 dwarf disease, description, (61) 244.
 Evergreen, thornless sport of, (66) 624.
 jam, preparation, standardization, W.Va., (63) 486, 591.
 Jelly, preparation, standardization, W.Va., (63) 486, 591.
 leaf miner, notes, (68) Mich. 351.
 mite, control, (69) Wash.Col. 561.
 mosaic diseases, (68) Mich. 348.
 orange rust, notes, (61) Mich. 449; (69) N.J. 373.
 seedlings and hybrids in Northwest, (66) 434.
 seedlings from cross of thorny and thornless types, (65) R.I. 534.

Blackflies of Adirondacks, (67) 716.

Blackfly, blood-sucking, transmission of Leucocytozoon anatis in ducks by, (69) 281.

Blackfly, citrus—

- hydrocyanic acid gas concentration for control, (67) 711.
 importation of parasite Eretmocerus serius into Jamaica for, (68) 507.
 notes, (62) 542.
 status and importation of natural enemies, (68) U.S.D.A. 218.

Blackhead—

- associated with coccidiosis in chicks, (63) 774.

Blackhead—Continued.

- control, (61) N.J. 769.
 epizootologic behavior, (67) Nebr. 602.
 in peafowl, (63) 777; (64) Oreg. 377.
 in poults, (63) N.Dak. 875.
 in turkeys, (61) R.I. 676; (62) 776; (63) R.I. 674; (64) 176; (65) Mich. 176, Mich. 772, Conn.Storrs 777; (66) 77, Mich. 173; (67) R.I. 318, Mo. 457; (68) Mich. 376; (69) Nebr. 578; (70) Mo. 240.
 in turkeys, cecal ablation for, Mo., (62) 74; (63) 376; (66) 370.
 in turkeys, epidemiological studies, (61) Conn.Storrs 475.
 in turkeys, ipecac treatment, (63) Idaho 577.
 in turkeys, prevention, (69) 863.
 in turkeys, prevention, value of tobacco powder, (69) Kans. 249.
 in turkeys, transmission experiments, (66) R.I. 775; (68) 678.
 outbreak in Japan, (64) 379.
 protozoan agent, loss of virulence in, (70) 836.

Blackleg—

- aggressin immunization, (68) 667.
 and Bacillus oedematiens, (61) 71.
 atypical form, (62) 467.
 bacillus, agglutination, (64) 379.
 caused by shearing wounds, (68) Colo. 672.
 filtrate and bacterin, production, use of salts in, (63) 771.
 immunization, (66) 867; (67) 740.
 in calves, etiology, (62) 558.
 in calves, lesions in cardiac muscle as sole evidence, (69) 714.
 in Nigeria, (62) 264.
 in sheep, (62) 773; (69) 109, 580; (70) Colo. 674.
 organism, agglutination reaction, relation to that of malignant edema, (68) 376.
 prophylaxis with formolized vaccine, (68) 813.
 studies, (61) Kans. 172; (64) Kans. 878; (66) P.R. 272, 466; (69) Kans. 265.
 transmission by Tabanidae, (62) 168.

Blackquarter—

- active immunization, (66) 466.
 and allied anaerobic diseases, (63) 872.

Blacksmithing industry in Kentucky, (68) U.S.D.A. 696.

Blacktongue—

- in dogs, role of iron deficiency, (67) 92.
 in dogs, treatment with Minot's liver extract, (64) 594.
 preventive action of casein and high protein diet, (63) 491.
 preventive value of various foods, (64) 96.
 Bladder stones, relation to diet, (63) 297.
 Blanjulus sp., naphthalene for, (63) 653.

- Blankets, heat transmission through, (64) 197.
- Blapstinus spp., notes, (62) Tex. 652.
- Blapstinus substriatus, notes, (69) Mont. 232.
- Blast furnace slag as source of agricultural lime, (64) Pa. 122.
- Blastodacna atra, life history, (64) 547.
- Blastophaga psenes—
morphology and biology, (64) 59.
notes, (66) 841.
- Blastophagus minor regularity in propagation, (62) 243.
- Blastothrix sericea—
introduction into British Columbia, (70) 68.
notes, (65) 549.
- Blatella germanica, *see* Cockroach, German.
- Blatta orientalis, *see* Cockroach, oriental.
- Bleedingheart, western, toxicity, (63) 478.
- Blight, *see specific hosts*.
- Blindness in fowls, effect of rations, (67) Iowa 444.
- Blissus leucopterus, *see* Chinch bug.
- Blister beetle, striped—
life history, (67) 56.
on tomatoes, (66) Tex. 52.
- Blister beetles—
control, (66) W.Va. 554.
notes, (66) Ind. 238; (67) N.Mex. 50.
relation to alfalfa seed production, (67) Utah 287.
relation to bees, (69) 395.
- Blister blight in India, (63) 150.
- Blister canker, control, (64) Ill. 843.
- Blitophaga opaca, biology and control, (63) 853; (64) 853; (67) 284, 426.
- Bloat in sheep and cattle, survey, (64) Mont. 262.
- Blood—
alcohol in, interferometric determination, (67) 209.
alkali reserve, effect of cranberries, (70) 866.
amino nitrogen in, determination, (66) 310.
ammonia determination in, (69) 172.
analyses of women, cyclic variations in nonprotein nitrogen, (66) 387.
analysis, methods, (62) Pa. 313.
analysis, micro time method, (63) 414.
analysis, precipitant for proteins, (61) 807.
as index of health and body functions, (69) Idaho 839.
avian, leucocyte counts, method for making, (69) 278.
bactericidal power, differences within inbred strain of rats, (69) 194.
bactericidal power, effect of vitamins, (69) 624.
bovine, constituents, (69) 585.
calcium and phosphorus in, microdetermination, (66) 309.
calcium of laying hens, studies, (65) 367.
- Blood—Continued.
calcium, variation in men and women, (66) 294.
carbon dioxide tension and pH determination, (69) 171.
changes in cats infected with Trypanosoma equiperdum, (61) 269.
changes in hens on soybean rations, (65) 367.
changes in vitamin B deficient dogs, (63) 93.
changes in vitamin B deficient rats, (63) 394.
chemical changes following magnesium deprivation, (70) 560.
chemical constituents, changes in, (70) 828.
chemistry in osteomalacia, (63) 194.
chemistry of women, (64) 582.
chloride in, determination, (70) 445.
cholesterol in dogs on vitamin A-deficient diet, (69) 468.
cholesterol of women, (69) 752.
clotting function and avitaminosis, (67) 486.
coagulation, effect of damaged sweet-clover feeding, (67) 316.
coagulation, effect of esophagus extract of Bunostomum trigonocephalum, (69) 589.
coagulation in sweetclover disease, (65) 267.
coagulation period in normal and diseased animals, (65) 264.
composition, effect of an exclusive meat diet, (61) 589.
composition in vitamin A deficiency, (66) 196.
composition of animals under pathological conditions, (64) 469.
composition on exclusive meat diet, (62) 491.
deproteinization, copper and iron salts for, (66) 808.
erythrocyte content, graduated tube method for estimation, (70) 534.
filtrates for sugar determination, preparation, (64) 713.
filtrates, preparation, (62) 408.
findings in rats on vitamin deficient diet, (64) 496.
flour v. skim milk powder for calves, Ohio, (67) 65; (69) 99; (70) 669.
flour, value for calves on grain rations, (70) Md. 663.
flake in Manchurian cattle, (66) 867.
formation, effect of diet, (69) 892.
formation, effect of food rich in vitamin C, (64) 590.
formation of albino rat, (61) 792.
formation of young pigs, effect of ultraviolet light, (61) 861.
from bred rabbits, effect on immature rabbits, (69) 643.
gases in, determination, (69) 172.
glutathione, determination, (69) 172.

Blood—Continued.

- group inheritance, genetic theories, comparison, (66) 523.
- group inheritance, multiple allelomorphism v. linkage in, (66) 523.
- groups—
 - and isoagglutination in cattle, (70) 827.
 - human, genetics, (61) 630.
 - in domestic animals, (61) 873.
 - in domestic animals, inheritance, (69) 640.
 - in equines and hereditary transmission, (70) 827.
 - in fowls, (69) 719.
 - in horses, (69) 580.
 - in man and animals, (68) 90.
 - in man, inheritance, (64) 529; (65) 324.
 - in pigs, inheritance, (68) 316.
 - in rabbits, (69) 510.
 - in rabbits, inheritance, (69) 195.
 - inheritance, (70) 604.
 - theory, (64) 530.
- hemoglobin derivatives in, spectrophotometric constants, (69) 633.
- H-ion concentration, determination, (63) 414.
- human, injection into mice, effect on vaginal reaction, (64) 215.
- human, sulfur in hemoglobin preparations, (69) 327.
- human, zinc filtrates of, nitrogenous substances in, (64) 708.
- in hog cholera, examination, (62) 773.
- in rickets and tetany, acid-base equilibrium, (66) 692.
- iodine in, determination, (64) 713; (65) 314; (69) 633.
- iron in, determination, (67) 105; (68) 730; (70) 154.
- letting and transfusion in animals, (69) 579.
- lines that produced winning carcasses, (65) 254.
- liquids as indicator of productive capacity of cow, (70) 84.
- lipids during lactation, changes in, (66) N.Y.Cornell 663.
- lipids, effect of deficiency of vitamins A and D, (69) 618.
- magnesium in, determination, (68) 16.
- meal, nitrogen availability, factors affecting, (61) N.J. 714.
- meal, nutritive value for growth, (61) Ohio 663.
- meals, feeding to mosquitoes, (66) 351.
- nitrogen determination in, method, (61) 503.
- normal, studies, (70) 242.
- normals for cattle, pathological values, (64) 263.
- of bovines, leucocyte formula, (63) 480.
- of cattle, ameboid forms of leucocytes from, (68) 815.
- of cattle and sheep in health and disease, (66) 867.

Blood—Continued.

- of cattle and sheep, quantitative examinations, (62) 667.
- of cattle, composition, (62) 864.
- of chickens, phosphorus in, effect of diet, (68) 367.
- of chickens, physiology, (62) 260.
- of cows and calves, composition, (64) 472.
- of cows, Brucella agglutinins in, (63) 370.
- of cows, hemoglobin in, (63) Ohio 67.
- of dairy cattle, studies, (67) Mo. 447.
- of diseased swine, leucocyte changes in, (64) 74.
- of dogs, acid-base balance in vitamin B deficiency, (68) 417.
- of dogs, arginine determination in, (65) 12.
- of dogs, chylomicron count and total lipids, (66) 195.
- of domestic animals, (62) 260.
- of equines and bovines, alkali reserve in, (65) 568.
- of fowls, white cells in, counting, (62) 170.
- of healthy and diseased horses, (69) 578.
- of horses, individual reactions, (65) 567.
- of infants, hemoglobin in, (69) Wis. 890; (70) 561.
- of insects, coagulation, temporary inhibition, (70) 500.
- of lactating and dry cows, fatty compounds in, (69) N.Y.Cornell 99.
- of lactating cows, dietary fat and phosphorus distribution, relation, (66) 864.
- of lactating cows, phosphorus distribution in, (66) N.Y.Cornell 662.
- of livestock, individual reactions, (65) 870.
- of livestock, ketones in, (69) 715.
- of patients with pituitary tumors, absence of gonad-stimulating hormone, (69) 350.
- of pigs, calcium and phosphorus in, (68) 228.
- of pigs, cellular changes in during hog cholera, (67) 317.
- of rabbits, catalase in, relation to metabolism, (63) 623.
- of rats, composition, (63) 789.
- of starved animals, toxicity of, (65) 772.
- oxygen and carbon monoxide in, determination, (69) 172.
- paste, hydrolyzed, preparation of lysine, histidine, and arginine from, (63) 410.
- phosphates and calcium in milk fever, (61) 570.
- phosphorus in, studies, (70) 873.
- phosphorus of dairy cattle, variations in, (64) 258.
- picture and clinical significance, treatise, (62) 667.

Blood—Continued.

picture in anemia of suckling pigs, (70) 515.

picture of laboratory animals, (70) 91.
picture of nursery school children, (64) N.Y.Cornell 693.

picture, peripheral, effect of stimulation of spleen of horse, (69) 710.

plasma lipids, changes in during period of lactation, (66) 864.

plasma of dairy cattle, calcium and phosphorus in, biometry, (65) 261.

porcine, *Brucella abortus* agglutinins in, (63) 873.

pressure—

in animals, (67) 71.

in cecal obstruction of the horse, (69) 710.

in horses, (69) 580, 711.

in horses, measurement, sources of error in, (70) 827.

in pigs, (66) 177.

measurement of diseased horses, (69) 579.

quantity in animals, (69) 579.

regeneration, *see* Hemoglobin.

respiratory function, evolution, (69) 383.

samples—

bovine, agglutination titer, effect of age and temperature, (64) 557.

drawing and handling for diagnosis of abortion, Conn.Storrs, (69) 107, 157.

from chickens, heart probe method, (65) 556.

representative, method of obtaining, (68) 809.

serum—

amino acids in, determination, (67) 104.

calcium and phosphorus of Indians and Europeans, (63) 194.

calcium, effects of protein and phosphorus, (62) 789.

calcium in, (67) 185.

calcium in, hydrotropic solution of, (66) 502.

calcium in vascular hypertension and in hypervitaminosis D, (64) 498.

diagnosis, significance for research in history of descent, (61) 326.

hemolytic and precipitating, preparation, (69) Mich. 5.

human and animal, calcium and inorganic phosphorus in, (70) 418.

human, proteolytic enzymes in, (66) 306.

human, vitamin A in, (68) 862.

inorganic phosphorus in, determination, (66) 308.

magnesium in, forms of, (70) 873.

minerals in, physical status, determination, (66) 309.

of chicks, effect of rachitic diets, (62) 551.

Blood—Continued.

serum—continued.

of horse and pig, mineral composition, (70) 826.

of mares, sex hormone in, (64) 731.

of pregnant mares, effect on sexual maturity of rats, (64) 731.

pH determination, quinhydrone electrode in, (64) 712.

sodium in, determination, (69) 331.

small sample, estimation of hemoglobin and erythrocytes, (70) 885.

studies, (62) 667.

studies of animals in health and disease, (70) 382.

studies with fowl paralysis, (70) 101.

studies with milking animals, (62) N.Y.Cornell 766.

sugar—

capillary, fluctuations in young men, (61) 893.

capillary, fluctuations in young women, (64) 289.

determination, (63) 414.

in jugular and mammary vein, comparison, (66) Mo. 365.

in rabbits after injection of corpus luteum extract, (64) 730.

level in vitamin B (B₁) deficiency, (67) 635.

of cattle, (64) 475; (66) Mo. 365; (67) 448; (69) Kans. 257.

of cow in milk fever, (62) 264; (66) 174.

of lactating cows fed rations of varying fat content, (69) 849.

of sound and diseased animals, (65) 869, 870.

transfusions in treatment of anemias, (62) 467.

tumors in fowls, notes, (69) 105.

typing serums, desiccation and identification, value, (68) Mich. 243.

vessel changes, effect of diet, (68) 562.

vitamin C in, (70) 879.

volume determinations in cattle, (66) Mo. 464; (68) 815.

volume of insect larvae, (66) 846.

volume studies in cobalt polycythemia, (69) 754.

Blowflies—

activity at various heights, (69) 834.

baits for, (67) 575.

black, chemotropic responses, (66) U.S.D.A. 454.

box-type trap for control, (68) U.S.D.A. 789.

effect of carcass burial, (68) 647.

eggs and larvae, sterilization and growth, (67) 437.

environment, significant variables in, (68) Minn. 70.

fertility in, (68) 505.

in Australia, (65) 551.

in South Australia, (70) 66.

Blowflies—Continued.

in wooden olfactometer, olfactory responses, (69) 557.
larval parasite, life history and bionomics, (69) U.S.D.A. 837.
life histories, nutritional requirements, and fecundity, (70) 657.
notes, (70) Tex. 207, U.S.D.A. 499.
proboscis, anatomy and function, (63) 259.
proboscis response, (68) 352.
rearing and culture of sterile maggots, (69) U.S.D.A. 83.
research, recent developments, (64) 548.
sheep—

and bacterial activity in wool, relation, (68) 790.
biology, (67) 154.
field populations and natural control, (64) 462.
natural control, (68) 647.
of Australia, (68) 646; (69) 557.
of South Africa, (67) 70.
studies, (62) 358, 858.

trapping on ranges of Southwest, (64) 548.

Blowfly—

black, parasitism in man, (61) 757.
hatching of eggs, (65) 244.
larvae, enzyme from, which digests collagen, (69) 559.
larvae fed on fatigued frog muscle, growth stimulation, (69) 694.
larvae for treatment of osteomyelitis, (68) 646; (69) U.S.D.A. 83; (70) U.S.D.A. 509.
larvae for treatment of osteomyelitis, food requirements, (69) 394.
larvae for treatment of wounds, (68) 71; (69) 267; (70) 213, U.S.D.A. 499.
larvae, nutrition, (68) 646.
parasite, notes, (63) 854.

Blue goose, breeding ground, migration and habits on Baffin Island, (64) 746.

Blue gum seedling stem disease, notes, (64) 846.

Bluebells, Texas, root rot and stem blight, (70) Tex. 192.

Blueberries—

adaptation and selection experiments, (69) Ga.Coastal Plain 48.
containers for shipment, (63) Miss. 38.
culture, (65) N.J. 436; (69) Wash. Col. 215, Me. 364.
culture, effect of aluminum sulfate and peat mulch, (66) Can. 827.
culture experiments, (70) Alaska Col. 332.
cutworm damage in Maine, (61) 254.
effects of freezing, (66) Ga. 740.
fertilizer experiments, N.J., (67) 524; (70) 474.
fertilizers and tillage for, (70) N.J. 780.
growth of roots and tops, (67) N.J. 524.
highbush, propagation, (63) Mich. 537.
insects affecting, (65) Me. 756, N.J. 849.

Blueberries—Continued.

inspection for arsenic content, (68) Me. 408.

interplanted with strawberries, (61) Mass. 832.

low-bush, propagation, (64) 39.
mulching system, (61) Miss. 439.

northern, adaptability, (62) Miss. 38.
nutrition, (70) N.J. 482.

pollination, Me., (68) 497; (69) 385.
production, (67) N.H. 524.

propagation, (61) Ore. 35; (62) Miss. 38, Miss. 137; (63) Miss. 38; (64) Miss. 439, Miss. 631; (67) Mass. 385; (68) Wash.Col. 760.

respiration rate during ripening, (61) 836.

selection and testing, (68) Alaska Col. 191.

selection tests, (70) Ga.Coastal Plain 773.

southern, propagation, (64) Miss. 540.
studies, (63) N.J. 340; (65) N.J. 834; (68) Me. 474.

transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.

variety tests, (65) Miss. 39; (67) Mass. 385; (69) Ga.Coastal Plain 48; (70) Alaska Col. 332.

vitamin A in, (70) 277.

vitamin C in, (68) 861; (69) Mass. 747; (70) 277.

Blueberry—

cuttings, rooting, (61) 234.

cuttings, rooting in peat, (64) Ore. 338.
diseases, Me., (68) 487, 495; (69) 373.

diseases in Maine, (68) U.S.D.A. 495.
farms, economic study, (62) Me. 677.

fla beetle, notes, (65) Me. 757.

fruit worm, notes, Fla., (67) 559; (69) 231.

insects, notes, (68) Me. 497.

leaf beetle, notes, (65) Me. 757.

maggot, biology and control, (67) U.S.D.A. 55.

maggot, control in eastern Maine, (66) U.S.D.A. 455.

maggot, dusting, (64) U.S.D.A. 58; (69) 83.

maggot in Canada, (66) 347.

maggot, notes, (65) Me. 757; (70) U.S.D.A. 499.

maggot parasite, biology, (69) 85.

maggot, passing from one blueberry into another, (67) 558.

maggot, relation to climate and topography, (66) 557.

plants, types for propagation, (61) Miss. 438.

stem borer, life history and habits, (61) 662.

stem gall in Maine, (68) 651.

Bluebonnets, Texas, new damping-off disease, (69) Tex. 541.

Bluegrass—

and other forage crops, comparison, (63) Pa. 662.

- Bluegrass—Continued.
 bulbous, germination of bulbils, (61) Calif. 327.
 bulbous, taxonomy and morphology, (69) 645.
 cutting tests, (63) Wis. 32.
 growth with various defoliations and abundant nitrogen, (67) 126.
 harvesting seed, (70) Tenn. 172.
 improvement, (68) Ky. 318.
 Kentucky, and white clover, value for pasture, (64) Tenn. 335.
 Kentucky, effect of white clover, (61) Conn.Storrs 432.
 Kentucky, fertilizer experiments, (65) Conn.Storrs 727.
 Kentucky, injury from Helminthosporium vagans, (63) 146.
 Kentucky, liming, value, (61) Md. 823.
 Kentucky, vitamin A in, (69) 412.
 nitrogenous fertilizers for, (64) Ohio 658.
 optimum soil reaction for, (66) Del. 526.
 pasture for cattle, value of supplemental feeds, (66) Va. 560.
 pasture, response to mineral fertilizers, (69) Wis. 791.
 pastures, effect of heavy and premature grazing, (61) Wis. 128.
 pastures, fertilization, (70) 232.
 pastures, systems of grazing, (70) Mo. 219.
 quantitative development of tops and roots, (68) 186.
 reaction of nitrogen compounds to, and transformation, (64) 324.
 sod, feeding to pregnant sows, effect on anemia in pigs, (66) 668.
 sod, Hohenheim system of grazing, value, (63) Ohio 29.
 webworm, studies, (63) U.S.D.A. 54.
 white grub injury, relation to environment, (67) 292.
- Bluestem grass, utilization by aged steer, (61) 257.
- Bluetongue in sheep, blood filtrates, (70) 382.
- Bluetongue in sheep, studies, (63) 170.
- Boars, abnormal spermatozoa in semen, (70) Mo. 171.
- Boars, breeding, inheritance of mating ability in, (62) 823.
- Boars, cryptorchid, anatomy, (66) Mo. 323.
- Bobcat, methods of trapping, (65) U.S.D.A. 845.
- Bobwhite, *see* Quail.
- Body fluids and organs, iron determination in, (65) 312.
- Body measurements of adult, optimal proportions, (68) 699.
- Body size and metabolism, (66) Calif. 856.

- Bog soil, microbiological activities in, (61) 508.
- Bogeria fontinella, notes, (64) 365.
- Boiling-point rules, general theory, (66) 308.
- Boll rots, notes, (62) 145.
- Boll weevil—
 abundance, relation to summer weather and food, (67) Ark. 579.
 activities on dusted cotton plants, (66) Tex. 49.
 activity in cotton fields, (66) S.C. 654.
 and pink bollworm, combined infestation, (68) 215.
 biology at Florence, S. C., (62) U.S. D.A. 358.
 control, (61) U.S.D.A. 156; U.S.D.A. 360; (62) Ga.Coastal Plain 757; (63) 161, La. 161; (64) Ala. 355, Ga. Coastal Plain 656, Okla. 748; (65) Ala. 449; (66) 761; (67) Fla. 559; (68) Miss. 34, Okla. 637; (69) Fla. 231.
 control by airplane dusting, (61) Tex. 556.
 control, calcium arsenate tests for, (64) 59.
 control in winter, (64) Ark. 454.
 control under different rates of fertilizers, (68) 225.
 development on plants other than cotton, (70) 215.
 first generation, time of hatching, (64) 550.
 hibernated, resumption of egg-laying, (61) 556.
 hibernation, (63) Miss. 52; (67) Tex. 705; (68) S.C. 780; (70) Tex. 206.
 hibernation in Laguna District of Mexico, (65) 851.
 hibernation under controlled temperature and humidity, (66) Fla. 855.
 Hibiscus syriacus as host, (70) U.S.D.A. 648.
 immature stages, winter survival, (66) 854.
 in hibernation cages, emergence and percentage of survival, (67) 439.
 infestation counts, methods for making, (66) Fla. 854.
 infestation, relation to location of cotton fields in previous season, (62) 655.
 ingestion of poison by, (62) Fla. 354, Tex. 651; (63) Tex. 455; (67) Tex. 705; (69) Tex. 836; (70) Tex. 206.
 insect enemies, (66) 853.
 longevity, Florida records, (61) 856.
 Mexican and Thurberia, control, (64) 52.
 Mexican, biology, (62) 456; (64) 549.
 Mexican, biology in artificial hibernation quarters, (66) 855.
 Mexican, control program, (62) 647.
 Mexican, studies, (64) S.C. 655.
 movement, (62) S.C. 651.
 natural enemies, (61) 856.
 notes, (70) U.S.D.A. 499.
 parasite in Georgia, (63) 854.
 poisoning, Miss., (63) 52; (64) 655.
 poisoning, survey, (62) S.C. 651.

Boll weevil—continued.

rapidity of spread from hibernation quarters, (68) 649.
 studies, (62) S.C. 650; (63) Fla. 651; (68) Ark. 636, S.C. 780.
 susceptibility of cotton plants, irregularity among, (70) 512.
 thermotropism of, (62) 250.
 winter survival, determination, (66) Fla. 252.

Bollworm—

as cotton pest, (61) U.S.D.A. 756.
 control, (66) Tex. 50.
 control by airplane dusting, (64) 460.
 control, insecticide tests for, (66) 649.
 cooperative studies, (67) Tex. 705.
 in tomato, control, (62) S.C. 651.
 migration and population studies, (68) 221.

moth, activities, (70) 212.
 notes, (62) Tex. 652; (65) N.Mex. 245; (70) Tex. 207, 356, U.S.D.A. 499.

on carnations, (67) 428.
 on cotton, factors affecting, (66) 250.
 on cotton, uneven distribution, (62) 655.

pink—

and boll weevil, combined infestation, (68) 215.

biology, (66) Tex. 50; (68) 221.
 control, (61) 253, 658; (64) 52; (65) V.I. 758; (69) V.I. 512, 548; (70) 61, 65, U.S.D.A. 501.
 control in Egypt, (63) 257.
 control in Texas, (66) 250.

cooperative studies, (67) Tex. 705.
 detecting in cottonseeds by X-ray, (68) 357.

eradication work in Arizona, (63) 257.

hibernation, (66) Tex. 49, 650.

host plants, (68) 221.

in Arizona, (67) 423.

in Belgian Congo, (63) 846.

in Gezira district of Sudan, (62) 453.

in Puerto Rico, (67) 714.

in Punjab, studies, (61) 253.

in Tucumán, (61) 661.

infestation of young okra pods, (67) 573.

larvae in cottonseed, new sterilizer for, (70) U.S.D.A. 501.

notes, (64) 359; (65) 246; (66) P.R. 56; (67) 286; (69) P.R. 825; (70) Tex. 207, 356, U.S.D.A. 499.

on cotton in Algeria, (65) 56.

papers on, (62) 647, 648.

production, (70) U.S.D.A. 648.

scouting methods, (66) 753.

sources of infestation, (65) 655.

status in Southwest, (66) 251.

studies, (62) Tex. 652.

summary, (67) V.I. 573.

Queensland pink, validity of species, (63) 257.

Bollworm—Continued.

spotted, notes, (67) 286.

studies, (63) Tex. 455.

Sudan, summary, (65) 359.

Bombyliidae of China and near-by regions, (68) 504.

Bombyx mori, *see* Silkworm.

Bone—

analysis as indication of calcium assimilation, (66) 367.

and meat meal v. fish meal for laying ducks, (70) 821.

building value of poultry feeds, (66) Pa. 261.

calcification, effect of raw v. pasteurized milk, (66) Ohio 689.

chewing and carrion poisoning, (62) 467.

chewing in cattle, (65) 267.

chewing, relation to fodder, (66) Mont. 426.

composition, (65) 893.

composition, effect of massive doses of irradiated ergosterol, (62) 296.

development, effect of phosphatic limestone, (66) N.Y.Cornell 856.

development, specific action of cereals on, (69) 755.

ground, analyses, N.J., (61) 21; (63) 19; (65) 23; (67) 115; (69) 24.

growth and disease, phosphatase in, (68) 130.

growth, histology, in vitamin D deficiency, (68) W.Va. 862.

lesions of pony with glanders, (70) 99.

marrow and lymph nodes, functional approximation as filters and protectors, (70) 827.

meal—

as supplement to barley-rye and alfalfa hay ration, (68) Mont. 796.

feeding value, (63) Tex. 476; (64) Mont. 256; (67) 589; (68) Mich. 805.

fertilizing value, (62) 417.

for laying hens, S.C., (62) 661; (64) 668.

poultry, palatability tests with cows, (66) U.S.D.A. 863.

v. dicalcium phosphate as source of calcium for swine, (68) Ill. 654.

v. raw rock phosphate as source of calcium and phosphorus, (68) Mich. 370.

v. raw rock phosphate for dairy cattle, (65) Mich. 766.

oil, value in arsenical dipping fluids, (64) 263.

phosphate availability, increasing, (66) 418.

samples, preparing for analysis, (64) 860.

solubility in solutions of magnesium salts, (67) 199.

strength in cattle, relation to feed, (65) 254.

 botany, principles and problems, (67) 20.
 bread making, (63) 287.
 bridges and roofs, (67) 754.
 brooders, battery, operation, (65) 65.
 building costs, estimating, (68) 103.
 building materials and structures, (66) 673; (67) 324.
 buildings, framed, (67) 753.
 bulbs, commercial, growing, (69) 216.
 bulbs for American gardens, (67) 397.
 butter and cheese, (64) 69.
 butterflies of Australia, (69) 388.
 butterflies of North America, (66) 851.
 cacao, (68) 482.
 canning and preserving, (64) 91.
 caoutchouc, (63) 837.
 carnations, (65) 641.
 cattle, beef, raising, (67) 445.
 cattle breeding, (65) 857.
 cattle, breeding losses, prevention, (65) 378.
 cattle, dairy, selection, feeding, and management, (63) 889.

Books on—Continued.

- cattle industry in South Africa, (68) 513.
 ceceidology, (67) 437.
 cheese, (69) 419.
 cheese and butter, (64) 69.
 cheese, Emmental, manufacture and handling, (64) 376.
 cheese making, (61) 267; (63) 869.
 cheese, soft, making, (70) 88.
 chemical analysis, applied inorganic, (63) 804.
 chemical analysis, photometric, (68) 729.
 chemical microscopy, (63) 7.
 chemicals and drugs, analysis, (65) 314.
 chemistry—
 agricultural, (62) 501; (67) 195.
 and cookery, (65) 392.
 applied, (69) 747.
 capillary, (64) 7; (67) 195.
 etymological dictionary, (64) 201.
 organic, (63) 707.
 organic and biological, (70) 740.
 organic and food, (62) 487.
 physical, (67) 356.
 physiological, (69) 25, 142.
 surface, (64) 201.
 systematic organic, (67) 195.
 chicks, early embryology, (62) 164.
 chicks, production and marketing, (68) 367.
 chicks, raising, (63) 766.
 chrysanthemums, (62) 143.
 citrus insects, control, (62) 451; (66) 757; (68) 498.
 climate, (64) 315.
 clothing, (69) 303.
 clothing and textiles, (67) 349.
 clothing for women, (63) 298.
 cold storage and refrigeration, (62) 571.
 colic in horses, (63) 875.
 colloid chemistry, (62) 801; (63) 7.
 colloidal state, chemistry of, (64) 201.
 colloids, (63) 707.
 concrete mixtures, basic principles, (64) 566.
 concrete, reinforced, construction, principles, (69) 283.
 concrete structures, (70) 105.
 conifers, cultivated, in North America, (69) 525.
 conifers, growing, (64) 343.
 cookery and chemistry, (65) 392.
 cookery, experimental, (68) 559.
 cookery, national, (69) 892.
 cooking, (70) 865.
 cooking by Boston school, revision, (64) 490.
 cooking recipes, (66) U.S.D.A. 386.
 corn for the Northwest, (64) 28.
 correlation analysis, methods, (64) 399.
 cotton marketing, (62) 285.
 cotton plant, (65) 223; (68) 321.
 crops, production, (63) 889; (64) 281.
 crucifers, cytology, (68) 175.

Books on—Continued.

- culture media and reagents, (62) 311.
 culture medium technic, bacteriological, (62) 311.
 cytology, introduction to, (66) 725.
 dairy enterprises, (63) 889.
 dairy farming, (62) 869; (65) 385.
 dairy industry in Australia, (65) 864.
 dairy manufacturing machinery, (69) 123.
 dairy science, (65) 864.
 dairying, farm and factory, (70) 234.
 dairying principles, (65) 865.
 dairying, productive, (66) 289.
 delphiniums, history and cultivation, (69) 216.
 diet and nutrition therapy, (65) 890.
 diet in health and disease, (62) 687.
 diet, normal, (63) 486.
 dietetics, (62) 90.
 dietetics in warm climates, (69) 750.
 diets, wheat, egg, or milk free, recipes and food lists, (70) 272.
 dogs, diet for, (61) 261.
 dragonflies of North America, (61) 548.
 drainage, (68) 102.
 drainage and reclamation, (61) 275.
 drainage, land, in Britain, (70) 688.
 droughts and floods, British, (62) 314.
 drugs and chemicals, analysis, (65) 314.
 dust explosions, (67) 468.
 ecology, agricultural, (62) 314.
 economic history, American, introduction, (61) 489.
 economic life, American, improvement, (64) 279.
 education, adult rural, (69) 302.
 electric heating, (67) 191.
 electricity in agriculture, (64) 779.
 electrolytes, (62) 310.
 embryology, chemical, (66) 523.
 engineering, mechanical, laboratory practice, (66) 80.
 engineering, structural, (63) 380.
 engines, internal-combustion, and tractors, (67) 325.
 engines, internal-combustion high-speed, (66) 780.
 entomology, (63) 844; (64) 542; (65) 353; (68) 635; (69) 545.
 agricultural, (61) 848; (65) 545.
 applied, problems, (69) 545.
 forest, principles, (61) 355.
 history, (64) 648.
 medical, (67) 566; (68) 782.
 enzymes, (62) 309; (64) 203.
 eugenics, (64) 529.
 eugenics, evolution, and genetics, (69) 344.
 evolution, (63) 724.
 evolution, creative, mechanism, (69) 190.
 evolution, genetics, and eugenics, (69) 344.
 evolution, scientific basis, (70) 602.
 family income, earning and spending, (63) 889.

Books on—Continued.

- farm accounts, (63) 889.
 farm buildings, (69) 123, 880.
 farm buildings, construction, (66) 476.
 farm business administration, introduction to theory, (65) 579.
 farm crops projects, (63) 889.
 farm mechanics, principles, (63) 89.
 farm wiring, (61) 881.
 farming and farm life, (63) 889.
 farming, young man in, (70) 712.
 fats and oils, (63) 801.
 fats, inedible animal, in United States, (62) 711.
 feeding stuffs, microscopic examination, (66) 11.
 fermentation, alcoholic, (67) 201.
 ferns, (61) 530.
 fertilizers for greenhouse and garden crops, (67) 245.
 fiber structure, fundamentals, (70) 285.
 field crop enterprises, southern, (61) 290.
 five-year plan of Soviet Union, (65) 386.
 flax, (68) 873.
 flood flows, frequencies and magnitudes, (66) 377.
 flood protection and land drainage, (64) 777.
 floods and droughts, British, (62) 314.
 flour milling, physical science of, (66) 80.
 flower beds and bedding plants, (63) 447.
 flowers and insects, (66) 846.
 food—
 allergy, (65) 890.
 and nutrition, (67) 768.
 and principles of dietetics, (70) 270.
 chemistry and nutrition, (65) 392.
 chemistry and technology, colloid aspects, (68) 576.
 for the family, (62) 686; (67) 336.
 health, vitamins, (69) 303.
 in health and disease, (69) 889.
 inspection, (70) 242, 865.
 nutrition, and health, (61) 87.
 preparation, (68) 122, 558.
 preservation, (62) 686.
 products, (70) 713.
 purchasing for the home, (63) 88; (69) 477.
 foods, (69) 303; (70) 865.
 foods, analysis, (61) 609.
 foods, distribution in large cities, (62) 579.
 foods, microbiology, (69) 746.
 forest—
 education, (69) 370.
 entomology, (67) 287.
 fire laws and control, (63) Ohio 43.
 fire prevention, (61) U.S.D.A. 86.
 insects, (62) 451.

Books on—Continued.

- forest—continued.
 insects of central Europe, (66) 348.
 mapping, (66) 337.
 mensuration, (66) 337; (67) 688.
 protection, (64) 343.
 reserves, vanishing, (62) 843.
 forestry, (69) 59.
 forestry, an economic challenge, (69) 660.
 forestry statistics, mathematical theory of, elements, (65) 678.
 forests and mankind, (62) 843.
 French cooking, (64) 91.
 fruits and seeds, biology, (63) 429.
 fruits and vegetables, marketing, (61) 584.
 fruits, culture, (62) 228, 638; (68) 477.
 fruits, preservation, principles, (70) 270.
 fungi, comparative morphology, (61) 513.
 fungus and insect pests of the farm, (64) 228.
 fungus diseases, (70) 90.
 fur, (64) 66.
 fur farming, (62) 462.
 fur-bearing animals, (66) 845.
 game farming, (66) 846.
 game mammals, American, (64) 237.
 game management, (69) 543.
 gardening, (62) 228; (65) 227; (70) 183.
 gardening, English, (63) 237.
 gardening in southeastern United States, (61) 522.
 gardening in southern California, (62) 842.
 gardening, landscape, (70) 786.
 gardening, Wright encyclopaedia, (70) 786.
 gardens, (69) 524.
 gardens, hardy flower, (67) 398.
 gardens, maintenance, (67) 398.
 gardens of fragrance, (69) 216.
 gardens, old, in and about Philadelphia, (67) 398.
 genetics, (64) 529.
 genetics, evolution, and eugenics, (69) 344.
 goats, (61) 859; (62) 459.
 grapes, culture, (62) 140; (65) 640.
 grasses, Texas, (70) 465.
 grasshoppers and locusts, (61) 54.
 greenhouses, (69) 124.
 heat power, principles, (64) 780.
 heat transmission, (70) 694.
 heating, electric, (67) 191.
 helminthology, (61) 372; (68) 666.
 helminthology, human, (64) 174.
 hematological diagnosis, (69) 709.
 hematology, clinical, of domestic animals, (67) 310.
 hereditary statistics and variation, (63) 816.
 heredity, (65) 724.
 H-ion concentration, measurement, (63) 609.

Books on—Continued.

- H-ions, determination and importance in chemistry, (62) 707.
 histamine, pharmacology and significance in humoral physiology, (64) 309.
 home living problems, (62) 487.
 home maintenance and repair, (65) 299.
 homemaking, (61) 691; (67) 493.
 horses, breeding, (67) 62.
 horses, light, breeding, (65) 556.
 horses, stabling, feeding, and care, (61) 666.
 horses, thoroughbred, history of evolution, (70) 225.
 horticulture, (61) 227, 290; (65) 227.
 hotbeds, (69) 124.
 housework and marketing manual, (63) 486.
 human nature, biological basis, (63) 724.
 hydraulic machinery, (69) 874.
 ice cream, manufacture, (69) 707.
 ice making, (67) 331.
 immunology of parasitic infections, (69) 577.
 index numbers elucidated, (63) 786.
 insect behavior, (69) 382.
 insect life, fundamentals, (67) 422.
 insect menace, (66) 447.
 insects, (61) 848; (63) 748; (64) 238; (70) 205.
 and flowers, (66) 846.
 and fungus pests of the farm, (64) 228.
 and injuries from, (67) 422.
 and men, foibles of, (61) 51.
 behavior, (67) 289.
 ecology, (66) 846.
 of farm and garden, (67) 149.
 of Norway, (62) 242.
 ticks, mites, and venomous animals of medical importance, (62) 542; (65) 244.
 iodine, use in veterinary practice, (62) 770.
 irrigation practice and engineering, (69) 720.
 irrigation principles and practices, (68) 537.
 jute, (65) 34.
 laboratory technic, (61) 609; (68) 729.
 land drainage and flood protection, (64) 777.
 land economics, (61) 285.
 lands, public, and resources in United States, (69) 451.
 law of cooperative marketing associations, (65) 585.
 lecithin and allied substances, (63) 8.
 lentils, (66) 630.
 life and reproduction, (62) 515.
 life, materials of, (63) 608.
 light, artificial, (65) 195.
 light, artificial. application in the home, (70) 141.
 lilacs, (69) 524.

Books on—Continued.

- flies, (61) 530.
- lipins, (63) 8.
- livestock—
 - and poultry diseases, (63) 476.
 - feeding, (62) 160.
 - international atlas, (65) 660.
 - judging, elements, (65) 586.
 - production, (69) 141.
 - registry, (63) 758.
 - types and market classes, (65) 60.
- living in our homes, (69) 303.
- locusts and grasshoppers, (61) 54.
- lumber and uses, (67) 399.
- malaria, (64) 461.
- mammalogy, economic, (69) 381.
- mammals, anatomy and classification, (62) 446.
- mammals, histology and microscopic anatomy, (68) 810.
- mammals, North American, (61) 542.
- man and domestic animals, parasitology, (68) 377.
- mankind and forests, (62) 843.
- marketing, (62) 284; (63) 783, 887; (67) 334; (68) 843; (69) 459.
- marketing and housework manual, (63) 486.
- marketing associations, cooperative, law of, (65) 585.
- marketing, cooperative, (62) 187.
- marketing principles, (68) 114.
- marketing principles, organization and policies, (65) 683.
- markets, organized commodity, (65) 683.
- materials, (66) 279.
- materials, raw, international control, (65) 386.
- materials, strength of, (61) 691; (63) 379.
- meat hygiene, (70) 381.
- meat inspection, (63) 870; (70) 242.
- meat inspection and slaughter animals, (70) 241.
- meat through the microscope, (61) 664.
- meat trade, (62) 658.
- medical terms, (65) 566.
- men and insects, foibles of, (61) 51.
- meteorology, (64) 13; (67) 654.
- meteorology, agricultural, (64) 14.
- microbiology, (66) 421, 665.
- microbiology, household, (68) 275.
- microbiology of soil, (70) 590.
- microclimate and plant climate, (65) 413.
- microorganisms, (62) 259.
- microorganisms in soil, (65) 321.
- microorganisms, pathogenic, (67) 738.
- microscope, use, (67) 201.
- microscopy, chemical, (63) 7; (65) 309.
- microscopy, practical, (67) 202.
- milk and milk products, (62) 463.
- milk, dry, (63) 368.
- milk, market, (66) 569.
- mimicry, (70) 202.
- mineralogy, etymological dictionary, (64) 201.

Books on—Continued.

- minks, raising, (64) 66; (66) 463.
- molds, classification, (69) 189.
- molds, yeasts, and Actinomycetes, (68) 742.
- motor vehicles, (62) 673.
- mycology, field, (65) 746.
- narcissus culture, (61) 529.
- natural resources, (63) 384.
- nature in farming, (61) 489.
- Netherland East Indies, (65) 388.
- nitrogen fixation, (68) 598.
- North Carolina, economic and social, (63) 885.
- nutrition, (62) 686, 687.
 - and diet in health and disease, (65) 890; (67) 337.
 - and food chemistry, (65) 392.
 - and physical fitness, (68) 855.
 - foundations of, (70) 864.
 - in health and disease for nurses, (66) 890.
- obstetrics, veterinary, (64) 174; (66) 867.
- oils and fats, (63) 801.
- oils, drying, (63) 707.
- oils, fats, and fatty foods, (63) 802.
- ornithological nomenclature, (67) 558.
- ornithology, American, (70) 801.
- painting, house, (66) 581.
- paints, varnishes, lacquers, and colors, (70) 690.
- parasites, animal, (62) 355.
- parasites, animal, of man and domestic animals, (62) 240.
- parasites, external, (62) 154.
- parasitology, (61) 567; (62) 167; (64) 243, 676.
- parasitology, human, (64) 154.
- parasitology of domestic animals, (69) 577.
- pathology, (69) 865.
- pathology, comparative, (63) 869.
- pathology of domestic animals, (66) 369.
- Pegomyia hyoscyami, (67) 291.
- Penicillium group, classification, (69) 189.
- perennials, (67) 261.
- permeability, (67) 508.
- pests of man and domestic animals, control, (66) 844.
- pharmacognosy, (63) 870.
- pheasants, (67) 422.
- physics of the air, (61) 204.
- physiology, (62) 770.
- physiology, chemical, essentials, (62) 893.
- phytopathological and botanical research methods, (70) 454.
- pigs, embryology, (65) 556.
- pigs, raising, (64) Nebr. 167.
- plant—
 - and water relations, (64) 724.
 - biology, (68) 697.
 - breeding, (62) 827; (70) 608.

Books on—Continued.

plant—continued.

- breeding on theoretical basis, (66) 626.
 cell pathology, (66) 832.
 climate and microclimate, (65) 413.
 competition, (66) 321.
 diseases, (61) 532; (62) 144; (67) 538; (68) 53; (69) 219, 663; (70) 789.
 diseases of British crops, (63) 241.
 dispersal throughout world, (69) 187.
 ecology, (64) 526.
 geography, (70) 25.
 growth and tropic movements, (66) 518.
 histology, (70) 454.
 indicators, (66) 214.
 kingdom, raw materials, (63) 216.
 material, analysis, (70) 742.
 names, German, (63) 724.
 nutrition and fertilizer theory, (68) 595.
 pathogens, bacterial, (67) 688.
 pathology and therapy, (61) 532.
 pathology, principles, (63) 741.
 physiology, (66) 18, 319; (68) 309; (69) 341.
 physiology as horticultural theory, (68) 456.
 products, chemistry of, (64) 309.
 protection, (61) 343; (68) 626.
 sociology, (66) 419.
 succession, (66) 214.
 world, evolution of substances in, (61) 625.
- plants—
 American, for American gardens, (61) 530.
 animal pests of, (67) 419.
 aquatic, (69) 216.
 chemical microscopy, (66) 605.
 environmental complexes as dynamic systems, (65) 212.
 motor mechanism, (66) 518.
 nomenclature, (69) 504.
 perennial, (62) 842.
 starting under glass, (61) 522.
 tropical and subtropical agricultural, (69) 28.
 useful to man, (70) 25.
 wound compensation, transplantation, and chimeras in, (70) 458.
- pomology, (66) 333.
 population trends in United States, (69) 458.
 post-mortem diagnosis, (62) 166.
 potatoes, culture, (68) 612.
 poultry, (62) Miss. 163, 869.
 and livestock diseases, (63) 476.
 breeding and production, (61) 560.
 farming, (63) 366.
 raising, (61) 667, 865; (64) 66; (65) 64; (66) 462, 484.
 raising in Great Britain, (64) 169.

Books on—Continued.

- power and heat in agriculture, (64) 780.
 pox in man and animals, control, (64) 772.
 protoplasm, colloid chemistry, (62) 309.
 Protozoa, intestinal, in man, (62) 448.
 protozoology, (62) 447; (67) 282.
 pruning, (63) 446.
 quail, bobwhite, (65) 544.
 rabbit hutch, (62) 164.
 rabbits, (69) 847.
 rabbits, Angora, (69) 572.
 rabbits, breeding, (67) 420.
 rabbits for food and fur, (65) 663.
 rayon industry, (61) 96; (62) 598.
 reagents and culture media, (62) 311.
 refrigeration, (68) 544.
 refrigeration, cold storage, and ice making, (62) 571.
 refrigeration in transportation and storage of food products, (64) 782.
 reproduction and life, (62) 515.
 research and reports, (65) 479.
 research, scientific, methods and status, (65) 487.
 rice production and commerce, (66) 530.
 rickets, (67) 598; (68) 668.
 roadside development, (63) 447, 739.
 rock gardens, (69) 524.
 roofs and bridges, (67) 754.
 roses, culture, (62) 438, 639; (63) 240, 835; (67) 397; (69) 369.
 Ruffin, E., gentleman farmer, (67) 336.
- rural—
 community and social case work, (70) 712.
 community life, (63) 889.
 community, sociological study, (69) 300.
 economics, (65) 578.
 municipalities, (63) 389.
 neighborhoods, open-country and village, (66) 587.
 sociology, (61) 385; (62) 183, 891; (64) 280.
 sociology, systematic source book, (65) 687.
 Russia, five-year plan in, (65) 386.
 rusts, (62) 47.
 Sachs, Julius, (69) 341.
 salts, acids, and bases, (62) 310.
 science, application to crop production, (62) 701, 796.
 seeds, (66) 330.
 sewerage, (63) 181.
 sex hygiene and reproduction of cattle, (65) 378.
 sheep breeding, feeding, and management, (61) 859.
 sheep diseases, (64) 176.
 sheep production, (62) 162, 187.
 sheep, range, and wool in Western States, (65) 62.
 shrubs and trees for the garden, (69) 525.

Books on—Continued.

shrubs and trees, insects and diseases, (68) 766.
 silicates, soluble, in industry, (62) 707.
 silviculture upon ecological foundations, (63) 447.
 snakes of the world, (67) 282.
 social economics of agriculture, (68) 693.
 social research, (62) 184, 580.
 social science, methods in, (68) 693; (70) 845.
 social trends, rural, (69) 299.
 sociology, methods, (68) 852.
 sociology, rural, (62) 183, 891; (67) 766, 767.
 sociology, rural-urban, (62) 286.
 soil divisions, major, of United States, (63) 114.
 soil fertility, (62) 809.
 soil management, (65) 317.
 soil management and fertilization, (63) 513.
 soil microbiology, (67) 109.
 soil science, (61) 503; (63) 713; (65) 714; (66) 12; (67) 109.
 soil technology, principles, (62) 810.
 soils, (66) 810.
 soils and soil management, (63) 15.
 soils, effect on history of United States, (64) 275.
 soils, nature and properties, (62) 810.
 soils, origin, constitution, and classification, (68) 733.
 soils, physical properties, (66) 715.
 soils, scientific study, (68) 158.
 solution, association and dissociation theory, (70) 150.
 South Dakota State College, history, (65) 189.
 spinach leaf miner, (67) 291.
 squirrels, American gray, in the British Isles, (67) 148.
 standards of living, (66) 587.
 standards of living, rural, (64) 280.
 starch and sugars, (63) 801.
 starch, chemistry, technology, and uses, (63) 801.
 statistics, graphic, (69) 119.
 statistics, mathematical theory of, elements, (65) 678.
 statistics, methods of, (68) 601.
 stereochemistry, (62) 310.
 sterility in plants and animals, (69) 33.
 structural frames, continuous, of reinforced concrete, (69) 120.
 structures, stresses in, (69) 120.
 sugar of Puerto Rico, (65) 633.
 sugar terms in twelve languages, (69) 361.
 sugars and starch, (63) 801.
 sweet peas, (62) 143, 843.
 sweet peas for all purposes, (69) 524.
 swine enterprises, (66) 484.
 swine husbandry, treatise, (70) 77.
 textile analysis, (68) 423.
 textile fibers and use, (66) 693.

Books on—Continued.

textiles, (66) 97.
 textiles and clothing, (67) 349.
 timber design and construction, (64) 566.
 tobacco, (68) 614.
 tractors, (62) 673; (69) 122.
 tractors and internal-combustion engines, (67) 325.
 tractors, farm and industrial, (64) 780.
 tree surgery, (69) 522.
 trees, (68) 766.
 trees and shrubs for the garden, (69) 525.
 trees and shrubs, insects and diseases, (68) 766; (70) 340.
 trees, forest, structure and life, (63) 42.
 tularemia, (62) 263.
 tulips, (62) 143.
 turkeys, raising, (64) 66; (68) 661; (69) 704.
 ultra-violet light and vitamin D in nutrition, (63) 294.
 underdrainage principles, (64) 270.
 urbanization, (61) 385.
 van Leeuwenhoek, Anthony, and his "little animals", (69) 545.
 variance and covariance, analysis, calculation and interpretation, (70) 846.
 vegetables and fruits, marketing, (61) 584.
 vegetables, production, (62) 836; (67) 36.
 vegetation, science of, fundamentals, (66) 419.
 veterinary literature, early history and British development, (70) 240.
 veterinary medicine, (62) 260; (64) 555; (70) 90.
 veterinary obstetrics and zootechnics, (67) 449.
 veterinary pathology and bacteriology, (68) 666.
 veterinary surgery, Dollar's, (66) 369.
 vinegar, manufacture, (64) 314.
 Virginia, economic and civic, (70) 861.
 vitamin D and ultra-violet light in nutrition, (63) 294.
 vitamins, (65) 587.
 vitamins in health and disease, (69) 897.
 vocational agriculture, teaching methods, (67) 336.
 wagons, German farm, (68) 105.
 waste products of agriculture, utilization as humus, (66) 318.
 water and plant relations, (64) 724.
 water bacteriology, (66) 476.
 water gardens, (69) 216.
 water lilies, (69) 216.
 water supply, (67) 172.
 water supply and utilization, (65) 878.
 waterfowl, protection and increase, (67) 281.
 weather, (65) 413.
 weeds in modern agriculture, (63) 443.

Books on—Continued.

- welding technic, (66) 281.
 wheat, (63) 782.
 wheat in Canada, (65) 483.
 wind stresses in buildings, (63) 881.
 winter construction methods, (61) 478.
 wood, (62) 343.
 zoology, (61) 350, 847; (62) 213, 538.
 zoology, agricultural and forest, fundamentals and laws, (67) 419.
 zoology, economic, (65) 242.
 zoology, vertebrate, (70) 646.
- Boophilus**—
 annulatus, *see* Cattle tick.
 annulatus australis in Texas, (69) 400.
 annulatus calcaratus—
 biology, (63) 555.
 transmitter of blood parasites in Caucasus, (65) 870.
 vector of *Francaella colchica*, (62) 469.
 australis—
 life history in Australia, (64) 251.
 notes, (69) 588.
 nymphal, resistance to arsenical dips, (62) 263.
 sodium arsenite solution for, (64) 773.
 decoloratus, anthrax bacilli in, fate of, (67) 740.
- Booponus intonsus**, notes, (69) 826.
- Borate mixtures**, pH determination, (61) 309.
- Borax as insecticide for seed**, (63) 748.
- Borax v. sodium fluosilicate in controlling house flies**, (65) 453.
- Bordeaux**—
 and lead arsenate mixtures, copper and lead in, determination, (68) 442.
 mixture—
 abrasive effect of lime in, (70) 844.
 action, plant as factor in, (63) 748.
 combined with arsenical sprays, (64) 44.
 commercial v. home-made, (64) Oreg. 337.
 commercial, adhesive quality, (61) Oreg. 35.
 direct insecticidal action, (61) 548.
 effect on blight-free potatoes, (63) 247.
 effect on onion yield, (65) Mass. 343.
 effect on potatoes, (66) W.Va. 546.
 effect on transpiration, (63) N.J. 342.
 factors affecting suspension properties, (67) 540.
 for blight control, value, (61) 526.
 for blossom blight prevention, (69) Oreg. 365.
 for leafhopper control, (66) N.Y. State 551.
 for spraying potatoes, proportion of lime, (67) Ohio 43.
 fungicidal value, (65) Mo. 340.

Bordeaux—Continued.

- mixture—continued.
 hydrated lime for, (63) Ohio 44.
 injury to tomatoes, (68) Ohio 775.
 Instant, preparation, (67) W.Va. 138.
 making with calcium hydrate, (61) 648.
 modifications, (69) 664.
 nature of action on potato leafhopper, (63) 255.
 on ginseng, blight control and injury, (69) Ohio 374.
 preparation, (62) Mo. 40.
 v. lime sulfur for apple scab, (65) Tenn. 150.
 paste for citrus gummosis, (65) 351.
 spraying of cranberries on sanded bogs, injury from, (61) N.J. 747.
- Boric acid**—
 effect on oxidation of glucose by alkaline copper solutions, (61) 415.
 electrometric titration, (68) 582.
 use in micro-Kjeldahl nitrogen determination, (66) 504.
- Borkhausenia pseudospretella**—
 damage to books, (67) 289.
 habits, (67) 573.
 notes, (65) 246.
- Borna disease**—
 and malignant catarrhal fever, (70) 92.
 dried virus, tenacity, (66) 371.
 Hortega's cells in inflammatory reactions complex, (70) 92.
 of horse and sheep, relation to infectious catarrhal fever of cattle, (70) 826.
 of horses, (65) 870.
 of horses and grass tetany of bovines, (66) 467.
 of horses and mules, Calif., (66) 76; (67) 595.
 of horses in San Joaquin Valley, etiology, (66) 74.
 of sheep and cattle, experimental enzootic, (65) 269.
 protective inoculation and incubation period, (70) 826.
 reply to previous publication, (70) 92.
 summary, (62) 875.
 virus, resistance to drying, (65) 773.
- Boron**—
 as factor in lettuce growth, (68) Ky. 328.
 deficiency, effect on citrus, (65) Calif. 150.
 deficiency, effect on growth of tobacco plants, (61) 213.
 deficiency, effect on plants, (62) 619.
 determination in water, (68) 440.
 determination in waters and plant materials, (66) 207.
 effect on citrus trees, (62) 819.
 effect on composition and growth of tomatoes, (61) 524.
 effect on oats, (64) 723.
 effect on plant growth, (61) 817.

Boron—Continued.

- effect on plants and animals, (62) Ky. 203.
 effect on soybean growth, (61) N.J. 719.
 effect on tobacco, (61) 719.
 effect on tomatoes, nature, (63) 830.
 in irrigation water, (66) U.S.D.A. 622.
 relation to growth and spore formation of fungi, (67) 23.
 requirements of citrus, (62) 142, Calif. 744; (63) 738; (65) Calif. 722; (66) 336.
 requirements of lettuce, (69) 366.
 requirements of plants, (61) 23.
 response of plants to, effect of length of day, (70) 600.
 toxic effect on fruit trees, (66) 420.
 toxicity, Calif., (61) 317; (62) 744.
- Boronia* roots, eelworms on, (65) 345.
Borrigo officinalis, bacterium in, (70) 311.
Borrelia novyi, notes, (70) 69.
Borreliota spp., proposed terminology, (69) 270.
Bosicola tricoloris n.g. and n.sp., description, (62) 850.
 Botrychids, Egyptian, notes, (67) 285.
 Botanic terms, glossary, (64) 211.
 Botanical—
 Congress, International, notes, (61) 100; (66) 699.
 Garden at Vassar College as outdoor laboratory for experimental ecology, (70) 309.
 serological studies, (69) 343.
 terms used in range research, glossary, (65) U.S.D.A. 623.
- Botany—
 aid and lexicon, (67) 20.
 college, treatise, (68) 558.
 for medical, pharmaceutical, and other students, textbook, (70) 594.
 horticultural, elements, treatise, (64) 211.
 principles and problems, treatise, (67) 20.
 research, (64) Can. 144.
 Strasburger's textbook, (67) 20.
 teaching, program for, (65) 888.
 textbook, (61) 512; (65) 23, 24; (69) 341; (70) 309.
- Botelho's test in veterinary practice, (69) 578.
 Botflies of horses and mules, studies, (68) Ill. 666.
- Botfly—
 eggs on horses, destroying, (70) Ill. 648.
 from white-footed mouse, (64) 365.
 horse, biology, (64) 248.
 horse, control, (66) Ill. 270.
 horse, eradication, (67) 318.
 horse, life history, (69) 268.
 horse, life history and lesions produced, (70) 98.
 horse, notes, (70) U.S.D.A. 499.
 horse, ovicide for, (66) 849.

Botfly—Continued.

- nose, life history and lesions produced, (70) 98.
 parasitic, on red deer, (68) 70.
 sheep—
 control, (69) 858.
 grubs of, (66) Idaho 269.
 life cycle, (69) 394.
 nasal, occurrence in trachea, (63) 553.
 new treatment, (66) 273.
 notes, (63) Idaho 575; (66) 866; (69) Idaho 865.
 relation to pneumonia in sheep, (66) 348.
 treatment, (68) Idaho 375.
 throat, life history and lesions produced, (70) 98.
 throat, method of ingress of newly hatched larvae, (66) 647.
- Botryodiplodia—
 root disease of tea, (63) 150.
 sp., notes, (63) 769.
 spp., notes, (65) 344.
 spp. on elms in United States, (69) 379.
 theobromae, notes, (64) 847.
- Botryosphaeria in Hawaii, (67) 402.
- Botrytis—
 alli, notes, (64) 743.
 blight of calendula and snapdragon, (69) N.Y.Cornell 61.
 blight of tulips, (70) N.Y.Cornell 791.
 byssoidea, notes, (66) 147.
 cinerea—
 and *Penicillium* mixed inoculum for citrus fruits, effect, (61) 748.
 and species problem, (69) 372.
 as potential agent of root rot, (69) 672.
 cause of germination loss of pine seeds, (64) 848.
 cause of potato tuber rot, (70) 796.
 growth, effect of magnesia, (70) 29.
 lini, new form on flax, (67) 695.
 notes, (61) 245; (63) 349; (66) 46, 149, 342; (69) 676.
 on aster seed, (65) N.Y.State 741.
 on beans in shipment, (69) 813.
 strains, differences in, (67) 536, 537.
 delacroixii, notes, (69) U.S.D.A. 692.
 disease of *Ribes odorata*, (63) 49.
 diseases of flower-bulb plants and peonies, (63) 349.
 elliptica n.sp., description, (64) 745.
 fabae n.sp., description, (67) 410.
 hyacinthi, notes, (65) 542.
 narcissicola, notes, (68) Oreg. 213.
 paeoniae, description, revision, (61) 51.
 polyblastis n.sp., description, (65) 543.
 rot on pears, control by treated wrappers, (66) U.S.D.A. 47.
 spp., notes, (66) 152.
 squamosa, notes, (66) 147.
 stem rot of roses, (63) 349.

- Botrytis—Continued.
tulipae, control, (61) N.J. 743.
tulipae, notes, (63) 245; (65) 542;
(66) 152.
- Bots on caribou in Labrador, (64) 365.
- Bots, throat, of horses, method of ingress
of newly hatched larvae, (66) 647.
- Bottle breakage in milk plants, factors in,
(67) U.S.D.A. 67.
- Botulinus—
antitoxin, improving, (64) Ill. 877.
toxins, formalized, antigenic value,
(61) 871.
- Botulism—
and ducks, (65) 271.
and home canning, (65) 98.
and western duck sickness, (64) 776.
from canned onions, (63) 597.
from home-canned beets, (62) 596.
from home-canned pears, (62) 597.
from home-canned products, (61) 889.
in animals, use of antitoxin for, (63)
Utah 672.
in domestic animals and birds, (63)
170.
in domestic animals in South Africa,
(63) 872.
in horses, (61) Utah 69.
in horses and grass disease, compari-
son, (62) 774.
in North Dakota, outbreak of fatal
cases, (68) 569.
of sheep in Western Australia, associa-
tion with sarcophagia, (70) 388.
outbreaks, (68) Colo. 713.
poisoning, temperatures fatal to organ-
ism, (63) Colo. 597.
protective measures of California
against, (67) 486.
summary, (62) 875; (66) 597.
toxoids, production, (62) Ill. 375.
- Boutonneuse fever—
and Rocky Mountain spotted fever, im-
munological relation, (69) 583.
in Tunis, transmission, (65) 871.
transmission by brown dog tick, (67)
741.
virus, dog as reservoir, (67) 597.
virus, filtrability, (66) 572.
virus, hereditary in *Rhipicephalus san-*
guineus, (65) 871.
virus, hereditary transmission, (68)
668.
virus, longevity, (68) 668.
- Bovicola bovis*, see Cattle biting louse.
- Box and crate construction, principles, (63)
U.S.D.A. 585.
- Box plants, hot water treatment, (64) 858.
- Boxelder bug—
as household pest, (69) Mich. 533.
damage to apples, (66) Wash.Col. 755.
notes, (68) Utah 215.
on strawberries, (68) 351.
- Boxelder root systems on black soils of
Kuban, (61) 235.
- Boxes, butter and cheese, comparative ser-
viceability, (61) 279.
- Boxes, knotty lumber for, (63) U.S.D.A.
277.
- Boxwood—
diseases, (65) N.J. 352.
leaf miner, control, (64) 858.
leaf miner, hot water treatment for,
(63) 850.
leaf miner, summary, (65) 249.
- Boyce Thompson Institute for Plant Re-
search, southwest aboretum of, (61) 99.
- Boys—
births, fluctuation in monthly ratio,
(62) 827.
farm, in southern New York, money
income, (64) N.Y.Cornell 387.
in agricultural high schools, food con-
sumption, (66) Miss. 193.
in private day school, growth, (62) 188.
income, savings, and work on farms in
New York, (70) N.Y.Cornell 269.
physical growth, (67) 771.
play suits for winter, (62) U.S.D.A. 598.
small, suits for, (62) U.S.D.A. 298.
strawberry club, manual, (61) Ill. 489.
- Brachyacma palpigera*, notes, (65) 457.
- Brachycaudus amygdali* and *Anuraphis per-*
sicae niger, comparison, (69) 239.
- Brachycera* of Jiji Islands, (61) 55.
- Brachymeria—
fijiensis n.sp., notes, (62) 861.
fonscolombei, biology, (69) U.S.D.A.
837.
minuta, notes, (69) 247.
robusta, notes, (66) 157.
- Brachyplatys subaeneus*—
bionomics, (66) 758.
studies, (65) 546.
- Brachyrhinus*—
cribricollis, new in North America, (63)
55.
cribricollis, notes, (64) 239; (68) 636.
ligustici, notes, (70) N.Y.Cornell 802.
ovatus, see Strawberry root weevil.
rugosostriatus, studies, (65) Calif. 53.
spp., notes, (64) Oreg. 355; (66)
N.Y.State 552.
spp. on *Taxus* and nursery plants, (68)
793.
sulcatus, see Vine weevil, black.
- Brachyspasta*, new genus, erection, (61) 358.
- Brachysporium* sp., notes, (68) 490.
- Bracken, eradication, (68) 320.
- Bracon mellitor* in Georgia, parasite of cotton
boll weevil, (63) 854.
- Bracon onukii* n.sp., description, (68) 650.
- Braconid* species, parasitic on rice and sugar-
cane insects, revision, (68) 650.
- Braconidae*, new species and host records,
(63) 261.
- Bradley Lane experimental road, (61)
U.S.D.A. 78.
- Bradycardia, effect of vitamin B deficiency,
(65) 595.
- Brain diet, effect in pernicious anemia, (66)
394.
- Brain tissue, human, ergosterol in, (66)
306.

- Brambles**—
 culture experiments, (67) Miss. 35.
 pruning, (67) Miss. 35.
 variety tests, (67) Miss. 35.
- Bran**—*see also* Rice bran, Wheat bran, *etc.*
 laxative action, cause, (63) 392.
 laxative effect, (69) 749.
 prices, 1866 to 1929, (63) Ill. 689.
 variations in local prices, (65) Mo. 485.
- Branding fluids**, suitability, (69) Calif. 88.
- Brass**—
 atmospheric corrosion, (67) 464.
 corrosion rate in vinegar, (65) Calif. 709.
 welding technic, (66) 281.
- Brassica**—
 groups, sterility and selective pollen tube growth, (68) 761.
 inheritance of plant colors in, (68) 747.
 napocampestris, new species hybrid, (66) 726.
 pekinensis, self-incompatibility in, (67) 247.
- Brassicacae**, germination, (62) 136.
- Braula coeca**—
 enemy of honeybee, (62) 250.
 internal structures, (69) Minn. 318.
 studies, (65) 657.
- Braxy** of sheep in Germany, (69) 716.
- Braxy**, vaccination with formalized whole cultures, (69) 109.
- Braxy-like disease** of sheep—
 immunization, (69) 589.
 in Western Australia, (67) 600.
- Brazil nut** in Malaya, (63) 447.
- Bread**—
 and wheat prices, (65) Ohio 481.
 baked with large amounts of yeast, vitamin B in, (61) 293.
 baking, high altitude, with Wyoming flour, (63) Wyo. 189.
 baking, time-temperature relations, (70) 271.
 chemical treatments, (68) 585.
 color in, measurement, (70) 581.
 composition, (67) 337.
 doughs, heat of imbibition, effect of moisture content of flour, (66) 291.
 from Illinois wheat, improvements, (64) Ill. 894.
 loaf crust color, relation to diastatic power of flour, (62) 288.
 making, function of oil and water emulsions, (66) 191.
 making, honey v. sucrose in, (65) 394.
 making, principles, (61) Colo. 291.
 making, principles and practice, treatise, (63) 287.
 mechanically sliced, molds on, effect of ultra-violet rays, (68) 275.
 milk solids in, estimation, (70) 299.
 mold growth in, new facts, (69) Minn. 462.
 of various kinds in Poland, biological value of proteins, (67) 620.
 poisoning, (70) 382.
- Bread**—Continued.
 vitamin B in, (67) 483.
 wheat, and flour, popular papers on, (63) 890.
 white, feeding value to animals, (62) 559.
 whole wheat and white, comparison, (62) 90, 787, 788; (63) 287.
 yeast, of different kinds, vitamin B (B₁) in, (69) Kans. 308.
- Breadfruit**—
 analyses, (68) 271.
 feeding value, Guam, (63) 165; (66) 458.
 propagation, Hawaii, (61) 732; (67) 385.
- Breads**—
 and cereal products, analyses, (68) Conn.State 271.
 quick, baking at high altitudes, (65) Colo. 91.
- Breakfast**, role of chemistry in preparation of food and equipment, (61) 291.
- Breakpins**, wooden, substitutes for, (62) Calif. 477.
- Breeding**, *see* Animal breeding, Plant breeding, *and specific animals and plants.*
- Bregmatothrips**—
 iridis in United States, (69) 824.
 ramakrishnae, notes, (68) 783.
- Bremia lactucae**, notes, (61) Mass. 840.

blackleg susceptibility, variation in, (64) Pa. 139.

bottom rot and head rot, (68) 343.

bottom rot and related diseases, (66) Fla. 836.

breeding, (61) Tenn. 140; (64) Can. 538, N.Y.Cornell 623, Del. 630; (66) Pa. 227, N.Y.Cornell 626; (67) La. 244, Calif. 525, Tex. 673; (68) Calif. 329, Pa. 475; (69) Del. 365.

breeding for yield and uniformity, (70) N.Y.Cornell 775.

bud pollination, (70) 616.

butterfly—

biological and histological studies, (61) 357.

bionomics and parasite *Microgaster glomeratus*, (70) 362.

ecology, (67) 285.

ecology and epidemiology, (69) 233; (70) 362.

larvae infected by parasites, changes in body of, (67) 433.

microsporidian parasites of, (63) 256.

calcium in, (69) 753.

California, composition and time for cooking, (67) 770.

Chinese—

adsorption of vitamin B (B_1) by, (70) 569.

breeding and selection, (67) N.Dak. 673.

Cercospora leafspot of, (61) 240.

leaf spot affecting, (61) Mass. 840; (66) 147.

maggot injury, (65) Me. 749.

powdery mildew affecting, (66) 441.

raw and bran-salted, vitamins A and B in, (69) Hawaii 747.

vitamin C in, (61) 595.

vitamins in, (67) Hawaii 473.

clubroot—

control, (61) Wis. 147; (62) 535; (66) Alaska 632; (69) Conn. State 221; (70) 488.

in soil, reaction and treatment, (65) 236.

Cabbage—Continued.

clubroot—continued.

life history and control, (63) U.S.D.A. 450.

life history, cytology, and method of infection, (66) 441.

notes, (65) 842.

cooperative cultural and varietal tests, (65) N.Mex. 227.

cost of production data, (61) N.J. 781.

cultivation experiments, (65) N.Y.Cornell 635.

culture, (64) Alaska 737; (69) U.S.D.A. 51.

culture experiments, (62) P.R. 737; (63) Utah 639; (67) La. 244.

diseases in Florida, (69) 223.

drought injury, (69) N.Y.Cornell 61.

duty of water for, (69) N.Mex. 282.

effect of inbreeding on earliness, (68) 200.

effect of irrigation, (64) Oreg. 339.

effect of manganese, (61) Ind. 338.

effect of nitrates, (61) Nebr. 833.

effect of nitrogen, (63) R.I. 639.

effect of removal of young heads, (64) Mont. 223.

effect of seed treatment, (66) N.Y.State 152.

effect of shade, (61) N.Mex. 228.

effect on hemoglobin regeneration, (63) 897.

fertility maintenance for, (61) Md. 622.

fertilizer experiments, (61) N.H. 139, N.Mex. 228, R.I. 640; (62) Ohio 41, Miss. 138, Ill. 337, N.Y.State 431;

(63) N.Mex. 444, N.Mex. 534, Ohio 829; (64) Ala. 137, Ala. 337, Miss. 341, Ohio 635, Ill. 837; (65) N.Mex. 227, R.I. 534; (66) N.Y.State 535;

(67) N.Mex. 35, La. 130, La. 244; (68) Okla. 616, Ill. 617, N.Y.State 617; (69) Ga.Coastal Plain 48, N.Mex. 210; (70) Tex. 183.

finger-and-toe disease, control, (64) 146.

finger-and-toe disease, life history, cytology, and method of infection, (66) 441.

fllea beetle, notes, (65) Mich. 153.

Florida, grading, packing, and storing, (69) Fla. 50.

flower and seed development, morphological study, (70) 183.

flowering habits, (63) 237.

for sauerkraut, effect of washing, (63) Wis. 13.

fresh green, vitamin A in, (64) 789.

Fusarium resistant, of Jersey Wakefield type, (65) 237.

genetical studies, (62) Del. 735.

green, pellagra-preventive value, (70) 282.

grown under Vitaglass, (63) Wis. 40.

growth, effect of electricity, (69) 877.

hardening treatments, (64) 35.

hardiness in, (69) 365, N.H. 638.

Cabbage—Continued.

- heads, solidity, determining, (65) Calif. 137.

- Calciferol—
 and vitamin D₂, identity, (67) 201.
 large doses, effect on dogs, (68) 868.

Calciferol—Continued.

properties, (67) 201; (69) 631.
studies, (68) 726.
use of term, (66) 9.

Calcium—

absorption, effect of irradiated ergosterol, (69) 312.
ammonium balance, (64) 424.
and inorganic phosphorus in human and cow's milk, comparison, (70) 419.
and magnesium, absorbed and exchangeable, in soils, (62) 818.
and magnesium in soil, effect of moisture and cropping, (61) 511.
and magnesium ratio in soils, relation to crop growth, (70) 23.
and magnesium, separating, method, (61) 711.
and phosphorus—
amounts, effect on dairy cattle, (63) W.Va. 69.
determinations, rabbit as experimental animal, (67) 296.
in bone formation in pigs, (61) Ohio 456.
intake, relation to hypercalcemia, (63) 295.
levels, effect on composition of blood and bone, (69) 147, Idaho 839.
ratio in growth of chicks, (61) Ohio 456; (62) 461; (63) Wis. 64; (64) 467; (68) 802.
ratio of diet, effect on growth and bone changes, (64) 391.
ratio of pig ration, effect, (70) 371.
relation to growth and rachitic leg weakness in chickens, (69) 570.
and potassium in soils, exchangeable, factors affecting, (63) 320.
antagonism for iron in plants, (68) 30.
arsenate—
additions to soils, (68) S.C. 734.
and unproductiveness in soils, (68) 609.
as fungicide, (65) 537; (67) 547.
as insecticide, (70) Mo. 206.
commercial, composition, (66) 154.
commercial, effect on bean foliage, (69) U.S.D.A. 683, 824.
diluted, for boll weevil control, (63) 161.
dusting, relation to aphid infestation, (63) U.S.D.A. 255.
effect on feeding value of alfalfa hay, (64) Utah 555.
effect on livestock, (63) Utah 672.
effect on soil productivity, (66) S.C. 614.
for boll weevil control, (61) Ala. 453; (64) 59.
response of soil types to, (69) 187.
as factor in alfalfa culture, (61) Wis. 119.
assimilation—
by calves, effect of magnesium, (68) Mich. 805.

Calcium—Continued.

assimilation—continued.
by cows, (65) Wis. 465; (66) S.C. 664; (68) 227, S.C. 806.
by cows on native grown feeds, (64) S.C. 673.
dietary factors affecting, (63) 864; (66) 366.
effect of ingestion of magnesium salts, (62) 458.
from different mineral compounds and effect on range cattle, (70) N.Mex. 73.
from grades 1 and 3 timothy hay, (68) 809.
studies, (66) 367.
availability and base exchange in rice soil, (62) Ark. 811.
availability for bone formation in chick, (65) 257.
balance in plant metabolism, (62) 618.
balance of cows through lactation and gestation, (68) Vt. 370.
balance of heavily milking cows, (65) 260.
balance of milking cows, (61) 257.
bentonite and sand mixture as growth medium in pot culture, (69) 782.
carbonate addition to ration low in lime, effect on pigs, (66) 565.
carbonate and calcium sulfate, effect on bone development, (69) 846.
carbonate carriers for eggshell formation, (64) S.Dak. 668.
carbonate pig-fattening ration, studies, (64) Kans. 867.
carbonate, value in cattle rations, (61) 257.
chlorate as substitute for sodium chlorate, (61) 227.
chlorate for weed control, (64) Alaska 731; (65) Wis. 432.
chlorate sprayed on weeds, spontaneous combustion from, (69) 651.
chloride as forest fire retardant, (69) 661.
chloride, effect on Portland cement concrete, (67) 464.
chloride, effect on sap acidity in corn, (63) 517.
chloride in concrete as frost protection, (63) 178.
chloride, treatment of milk fever and grass staggers, (65) 472.
citrate in nutrition of cows, value, (61) N.J. 764.
citrate, value for poultry, (61) N.J. 764.
compounds, effect on passage of food from stomach, (63) N.J. 366.
compounds, effect on soil and plant growth, (62) 122.
compounds, nutritive efficiency for pigs, (67) 61.
compounds, relative utilization by chicks, (65) 257.
concentration, effect on potassium absorption by plants, (66) Ark. 513.

- Calcium—Continued.
 concentration in blood of rats, factors in, (68) 129.
 conservation and vitamin D in rats, (68) 566.
 conservation in adults, and vitamin D, (70) 427.
 cyanamide—
 availability studies, (65) N.J. 816.
 behavior in soil and effect on crops, (68) 454.
 experiments with apple trees, (70) 48.
 fertilizing value, (63) 118.
 for clubroot control, (69) Conn. State 221.
 for weed control in asparagus beds, (70) Ohio 44.
 for weed control in lawns, (68) 759.
 cyanide—
 and raw linseed oil mixture for round-headed apple tree borer, defense of, (67) 56.
 and raw linseed oil mixture, injury to apple trees, (65) 854.
 and raw linseed oil mixture, notes, (66) 448.
 as insecticide in France, (62) 647.
 evolution of hydrocyanic acid from, (62) 448.
 for greenhouse pests, (62) 449.
 forcing experiments with, (61) 837.
 fumigation for bulb fly, (61) 255.
 fumigation for housefly, (61) S.C. 452.
 deficiency—
 as cause of disease, (61) 372.
 effect on apple trees, (62) 839.
 effect on composition of peas, (68) Mich. 340.
 effect on fruit trees, (64) 539; (65) 638.
 effect on peas, (65) 216.
 effect on tomatoes, (66) 828.
 in diet of horses, effect, (61) 571.
 deficient ration, effect on heifers, (66) W.Va. 567.
 deficient rations, effect on breeding pigs, (65) 63.
 deficient roughages, effect on milk production, (70) Fla. 82.
 deposition in bone, relation to vitamin D, (63) 295, 395.
 deposition in callus of parathyroidectomized rats, effect of diet and viosterol, (64) 593.
 determination—
 improved technic, (68) 16.
 in feeding stuffs and excreta, (68) Minn. 17.
 in mineral mixtures, (69) 489.
 in plant extracts, (70) Ky. 156.
 in presence of iron and aluminum, (63) 415.
 indirect colorimetric method, (70) 11, 298.
- Calcium—Continued.
 determination—continued.
 McCrudden method, accuracy, (70) 298.
 diet, low and high, effect on pigs, (64) 759.
 dihydrogen phosphate, removal of ions from, (63) 423.
 downward movement and fixation in soils, (66) Vt. 616.
 effect on nodulation of legumes, (62) 226, 518.
 effect on nodulation of soybeans, (62) 226; (68) 325.
 effect on solubility of potassium in soil and subsoil, (64) 425.
 excess, in irradiated ergosterol hypercalcemia, source, (67) 487.
 excretion, effect of excessive doses of irradiated ergosterol, (64) 397.
 excretion, effect of highly purified cellulose, (70) N.Y.Cornell 865.
 fecal, effect of bulk in diet, (66) 90.
 fluoride, effect on calcium retention of pigs, (65) 366.
 fluoride in rations, toxicity, (64) Iowa 859.
 fluosilicate as Natal fruit fly poison, (67) 427.
 fluosilicate compound and calcium fluosilicate, differentiation, (67) 708.
 for pigs, bone meal v. dicalcium phosphate as source, (68) Ill. 654.
 forms in human and animal sera, (70) 418.
 from different sources, effect on poultry, (64) 374.
 from milk and milk products, utilization, (69) Kans. 304.
 gluconate, assimilation of calcium from, (67) 732.
 gluconate, determination, (68) 293.
 hydroxide absorption by hydrated silica, nature, (63) 423.
 hydroxide, effect on hog cholera virus, (66) 177.
 hydroxide, fertilizing value, (65) Fla. 434.
 hydroxide, free, in set cements, estimation, (65) 273.
 in alfalfa plants on different soil types, (62) 220.
 in blood—
 and tissues, microdetermination, (66) 309.
 changes in, relation to diet, (69) Calif. 88.
 during milk fever, (61) 570.
 effect of cereal extracts, (64) 289.
 effect of excessive doses of irradiated ergosterol, (62) 197.
 effect of vitamin B deficiency, (65) 95.
 of dairy, distribution, (67) 184.
 of dairy cows, (65) 261; (66) Mo 365.

Calcium—Continued.

- in blood—continued.
 - of laying hens, distribution in circulation, (65) 367.
 - of laying hens, effect of calcium intake, (65) 367.
 - of pigs, (68) 228.
 - of rabbits, effect of pituitary injection, (68) 180.
 - plasma of dairy cows, relation to phosphate, (65) 261.
- in body, relation to that of food, (64) 391; (66) 892.
- in brain during rickets and tetany, (69) 155.
- in cabbage, (69) 753.
- in cheese, (67) 625; (70) 238.
- in cheese, effect on quality, (66) 570.
- in Chinese foods, (61) 589.
- in crops, relation to that in soil, (64) Wash.Col. 19.

- Cankerworm, fall, new in Utah, (67) 427.
- Cankerworms, emergence, (64) Kans. 852.
- Canna—
 breeding, (63) Hawaii 223.
 edible, experiments, (61) Hawaii 723.
 edible, starch properties, Hawaii, (63) 201; (65) 712; (66) 201.
 edible, variety tests, (63) Guam 129; Hawaii 223.
- Cannabis sativa, pests of, (68) 635.
- Canned—
 corn, causes of blackening, (62) Ill. 337.

- Canned—Continued.
 foods, in Asia, Africa, and Oceania, import duties and taxes, (67) 335.
 foods, in Europe, foreign tariffs and import regulations, (63) 284.
 foods, in western Hemisphere, foreign tariffs and import regulations, (63) 888.
 foods, report, (62) 772.
 foods, vitamins in, (62) 93, 396; (65) 293; (67) 88, 480, 776; (69) 619.
 vegetables, spoilage, identification of organisms, (65) Fla. 488.
- Cannibalism, control in battery brooders and fattening batteries, (66) 661.
- Cannibalism in poultry, control, (66) N.H. 63; (68) Wash.Col. 81.
- Canning—
 and preserving, treatise, (64) 91.
 centers, community, (70) U.S.D.A. 892.
 crops, diseases, (61) Utah 44; (69) Minn. 529.
 crops, experiments, (70) N.Y.State 774.
 crops, insects affecting, (64) N.Y.State 455; (65) Ind. 153; (70) N.Y.State 803.
 drying, and preserving, quality progress in, (69) U.S.D.A. 652.
 factories, tomato, organization and management, (61) Ark. 886.
 home methods, (65) Ind. 191; (67) Ind. 637, Ill. 769; (69) Ind. 143; (70) 714.
 industry, growing vegetables for, (68) 617.
 industry, position and scope, (61) Md. 384.
 nonacid foods, danger of botulism, (61) 889.
 of fruits, (64) 282.
 of fruits and vegetables, (63) 89.
 of vegetables and botulism, (65) 98.
 tests with fruits and vegetables, (63) N.Dak. 891.
- Canoeing, energy consumption during, (61) 191.
- Cantaloupes, *see* Muskmelons.
- Caoutchouc, science of, handbook, (63) 837.
- Cape weed, feeding experiments, (62) 467.
- Capillaria—
 annulata—
 description, (64) Guam 849.
 in fowls, (63) 777; (64) N.J. 178.
 in Hungarian partridges, (65) 878.
 in quail, (63) 777.
 hepatica, experimental infection of rabbit with, (68) 679.
 hepatica, structure and relationships, (67) 149.
 plica in silver foxes, (64) 479.
 spp. in domestic fowls, (61) 677; (66) P.R. 571; (69) 436.
- Capillary chemistry, treatise, (64) 7.
- Capitophorus fragaefolii, notes, (65) Fla. 439.
- Capitophorus tetraerodus, notes, (61) 244.
- Caplin fish, dried, v. tankage as protein supplement for swine, (69) 406.
- Capnodis tenebrionis, notes, (67) 285.
- Capnodium—
 brasiliense, notes, (63) 843.
 citri, notes, (67) 47.
 sp., biological and cultural characters, (61) 535.
 sp., notes, (65) 344.
- Capnoides caseana, poisonous to livestock, (65) Nev. 668.
- Capons—
 injection of male and female hormones into, effect, (65) 28; (67) 122.
 production, (68) Okla. 654; (70) N.C. 80, Hawaii 668, N.C. 816.
 profit from, (64) Okla. 763.
- Capper Award for Distinguished Service to American Agriculture, editorial, (63) 4.
- Capper Award, 1931, notes, (65) 500.
- Caprifigs, endosepsis and control, (66) 840.
- Caprina, studies, (61) 571.
- Capsicum—
 annum, cytological study, (66) 422.
 spp., chromosome numbers in, (63) 724.
- Capsid bug, green—
 on sugar beet, (66) 347.
 studies, (61) 850.
- Capsid bugs—
 control, (61) 356; (68) 781.
 on currants, control, (65) 653, 654; (67) 284.
 on fruit trees and bushes, (62) 57.
- Carabao, *see* Water buffaloes.
- Carabid beetles, affecting strawberries, (68) 781.
- Carabidae of British India, (64) 462.
- Carabunia myersi—
 n.g. and n.sp., description, (62) 360.
 parasite of nymphal froghoppers, (64) 361.
- Carabus nemoralis, biological study, (64) 365.
- Carbohydrate—
 complex, from culture medium of tubercle bacilli, *d*-mannose and *d*-arabinose in, (65), 205.
 derivative, new, description, (67) 645.
 diets, high, muscular efficiency on, (61) 693.
 diets, increased in treatment of diabetes, (70) 887.
 foods, new analyses, (62) 496.
 low diet, (62) 91.
 metabolism, (69) 751; (70) 721.
 dietary factor concerned with, (70) 871.
 effect of vitamin deficiencies, (61) 697; (62) 896; (64) Ark. 497.
 effect of vitamin G (B_2), (68) 566.
 in birds, (63) 494; (64) 497; (67) 340; (68) 867.
 in mammals, (65) 490.
 relation to vitamin B, (66) Ala. 895.
 specific, from tubercle bacilli, (69) 487.

Carbohydrate—Continued.

tolerance of two men, effect of exclusive meat diet, (62) 491.
transport in plants, (66) 621.

Carbohydrates—

accumulation in apple tissue, relation to moisture supply, (70) 623.
accumulation in apples, effect of fruit thinning, (68) 332.
and organic acids in succulent plants, interrelations, (69) 187.
assimilation, relation to potassium in tomato plants, (61) 339.
autumnal migration in apple trees, (68) Mo. 46.
distribution in apple twigs, (61) Minn. 39.
distribution in bearing apple spurs, (61) Mo. 40.
effect on assimilation of ammonia by seedlings, (64) 328.
effect on polyneuritic avitaminosis in pigeons, (66) 794.
fermentation and utilization of products, (64) Iowa 814.
fermentation by *Clostridium acetobutylicum*, intermediates in, (70) 293.
fermentation, production of organic acids from, (67) U.S.D.A. 359.
in apples, effect of nitrate applications, (65) 229.
in corn leaves, variations, (68) S.Dak. 36.
in egg proteins, molecular size, (63) 412.
in Jerusalem-artichokes, nature, (64) 607.
in leaves, determination, (70) 580.
in leaves, relation to water content, diurnal variations, (66) 21.
in plant foods, (62) 488.
in plants, determination, methods, (69) Ind. 48.
in seeds, storage, (65) Iowa 119.
in strawberry plants, (65) 231.
in vitro, attempted photosynthesis, (68) 577.
interconversion, (66) 202.
production in plants, effect of potassium, (62) 819.
progressive seasonal changes in plants, (61) Mich. 424.
relation to pruning, bud formation, and fruiting, (68) W.Va. 760.
soluble, in apples, effect of nitrate applications, (68) 192.
soluble, of feeding stuffs, calorific value, (63) 163.
sources for orchid seedlings, (70) 632.
specific dynamic action, (66) 388.
utilization, part of antestomach of one-cavity stomachs in, (70) 827.

Carbolineum, stimulating effect in horticulture, (63) 427.

Carbon—

and nitrogen in same sample, colorimetric determination, (70) 297.

Carbon—Continued.

arc lamp, types and radiations, (68) 568.
atom, valency of, tetrahedron concept, (61) 801.
bisulfide fumigation of woodwork of buildings, (67) 429.
black, structure, (61) 801.
compounds, reactions and symbols, (64) 202.
cycle in soil, (68) 163, 451.
deposits from lubricating oils, (62) 570, 571.
deposits in gasoline engines, (70) 255.
determination, (61) 806.
dioxide—
absorption by leaves, apparatus for determining, (68) 744; (70) 166.
absorption by plant roots, (66) 722.
administration to plants via leaves, (63) 428.
and oxygen, simultaneous determination, apparatus for (66) 494.
as aid in fumigation of highly adsorptive commodities, (63) 458.
assimilation by apple leaves, effect of ringing, (70) 49.
assimilation, daily course, (66) 319.
assimilation in *Tropaeolum majus*, products, (64) 328.
assimilation, limiting factors, (67) 659; (68) 459.
deficiency in alkaline soils, effect, (68) Ariz. 306.
determination, (61) 806; (67) 206.
diffusion through soils, (69) 496.
dissolved in plant sap, effect on respiration measurements, (68) Minn. 28.
effect on greenhouse crops, (64) 35.
effect on solubility of phosphates in soil, (66) Ariz. 719.
evolution by plant materials, (67) 4.
evolution in soil, effect of alfalfa and sweetclover, (63) 419.
evolved from soils, determination, (62) 408; (64) 115.
excess, effect on mushrooms, (70) 476.
fertilization, (61) 426.
from organic matter in soil, (67) 223.
in baking powder, determination, (65) 14.
in carbonates, determination, (66) 506.
in gas mixtures, determination, (69) 171.
in respiration of apples, apparatus for determination, (62) 615.
in soil carbonates, determination, (66) 407.
in storage atmosphere, effect on changes in fruits and vegetables, (68) 327.

Carbon—Continued.

- dioxide—continued.
 penetration into living protoplasm, (61) 513.
 penetration into Valonia, (67) 372.
 production in fermentation of sauerkraut, (61) 712.
 production in soils, determination, (64) 203; (67) Iowa 106.
 production rate of germinating seeds, temperature characteristics, (68) 744.
 production, time-rate, measuring, (64) 313.
 solvent action on soil phosphoric acid, (64) 524.
 storage of fruits and vegetables, effect, (65) 412; (66) 829; (69) 50.
 treatment of fruits and vegetables for transit diseases, (68) U.S.D.A. 203.
 use to increase insecticidal efficacy of fumigants, (62) 152.
- disulfide—
 action on plants, (61) 213.
 emulsion for nematode control, (61) 542; (69) Mass. 220.
 for botfly control, (66) Ill. 271, 273.
 for Japanese beetle, (62) 157.
 for weed eradication, (61) Colo. 732.
 for white grub control, (66) Guam 448.
 for wireworm control, (68) 358.
 fumigation, effect on rice quality, (67) 286.
 injection beneath soil surface, (67) 329.
 maximum weights in inclosed space, (61) 545.
 new microanalytical test for, (68) 582.
 solid, capsules, tests on horses, (68) 503.
 toxicity to wireworms, effect of temperature, (69) 835.
 treatment of habronemiasis, critical experiments, (66) 870.
 treatment of soil, effects on soil bacteria and ammonia and nitrate content, (61) 510.
 elementary, in soil, (68) 162.
 formation in engines, factors controlling, (66) 474.
 in cells of certain bacteria, (63) 412.
 in organic compounds, determination, (68) 440.
 in soil, factors affecting, (63) Mo. 719.
 in soil, relation to green manures, (62) 816.
 in soils, total, determination, (62) 408.
- monoxide—
 action on autooxidation of sulphuryl compounds, (61) 307.

Carbon—Continued.

- monoxide—continued.
 determination in blood sample, (69) 172.
 determination in gas mixtures, (69) 172.
 poisoning, danger from, (67) 754.
 reactions with compounds of metals with cysteine, (61) 502.
 organic, accumulation and loss in cropped soils, (70) 160.
 organic, determination in soils, (64) 312.
 semimicro determination, (70) 297.
 tetrachloride—
 and ethylene dichloride as fumigant for clothes moths and carpet beetles, (67) 566.
 and tetrachlorethylene, comparison, (67) 452.
 anthelmintic value, (62) 566, 877; (66) Mich. 173.
 chlorinated, value for botfly larvae, (66) Ill. 271.
 efficiency against stomach worms, (69) 717.
 for roundworms in poultry, (66) Guam 472.
 in dogs, absorption, distribution, and excretion, (62) 470.
 in oil for ascarids, (64) Guam 883.
 injection for control of bark beetles, (69) 836.
 poisoning in livestock, (65) 268; (68) 672; (69) 710.
 total, procedure, (65) 312.
- Carbonates—
 carbon dioxide in, determination, (66) 506.
 in soil, determination, methods, (61) 413; (65) 505; (68) U.S.D.A. 15.
 insecticide action, (67) 426.
- Carboxide gas, new insecticidal fumigant, (70) 208.
- Carcass studies of steers and heifers, (62) Mo. 61.
- Carcinoma—
 in a calf, (70) 92.
 mediastinal, in a horse, (65) 870.
 solidum of urinary bladder of horse, (70) 826.
- Carcinomas in federally inspected establishments, (69) 868.
- Carcinomata, dissimilar, from same gland, genetic analysis, (70) 606.
- Carnation—
 bacterial spot, notes, (66) 147; (69) N.Y.Cornell 61.
 blight, notes, Mass., (61) 840; (63) 543; (65) 344; (67) 399; (69) 663.
 caterpillar, morphology, biology, and parasites, (68) 786.
 diseases, (65) N.J. 352.
 fly, notes, (64) 248.
 houses, soil management, (70) Ill. 630.
 leaf rot, fungus causing, (66) 152.

Carnation—Continued.

- maggots of British Columbia, identity, (70) 648.
- powdery mildew, notes, (63) 349.
- root rot, (68) Colo. 626.
- root rot, transmission, (66) Colo. 639.
- rust resistance, variation, (63) Ohio 45.
- rust, symptoms, cause, and control, (64) Ohio 152.
- wilt disease, (63) 349; (64) 353; (70) Colo. 635.

Carnations—

- breeding, (67) Iowa 385.
- calyx splitting, causes, N.J., (61) 734; (63) 339.
- culture, (63) Ohio 142; (64) Ill. 838.
- culture, effect of steaming soil, (68) Ill. 623.
- culture experiments, (64) Ohio 635; (65) N.J. 835.
- effect of plant nutrients, (69) Mass. 652.
- flower splitting, control, (70) Ill. 630.
- forcing with artificial light, effect, (68) 192.
- growth under glass, effect of nutrients, (67) Mass. 385.
- injury to root system by cabbage maggot, (64) 248.
- insects affecting, (65) 652; (67) 428.
- new thrips enemy in Egypt, (68) 783.
- sand culture studies, (67) N.J. 524.
- soil studies, (62) Ill. 338.
- treatise, (65) 641.
- variety tests, N.C., (65) 136; (68) 474.
- yield and quality, effect of position on the bench, (66) 142.
- yields, effect of soil steaming, (67) 685.

Carotenase in dog liver, (67) 647.

Carotenase, use of term, (66) 607.

Carotene—

- absence of vitamin D from, (63) 92.
- added to vitamin A-free diet, effect on tuberculosis in mice, (67) 778.
- after absorption in animal organism, fate, (67) 342.
- and growth of animals, (64) 96.
- and vitamin A, distinguishing properties, (67) 501, 646.
- and vitamin A, distribution in body of rat, (66) 592.
- and vitamin A, observations and measurements, (67) 630.
- and vitamin A, relation, (62) 492, 587; (63) 8, 393, 791, 792; (64) 96, 293, 393, 503, 588, 801; (65) Wis. 491, 612; (69) 151, 467.
- and vitamin A, relative velocities of photochemical reactions, (70) 152.
- anti-infective properties, (63) 791, 792.
- as source of vitamin A, (61) 793, 794; (67) Wis. 723; (68) 368.
- as vitamin A, physiological activity, (65) 203.
- chemical and physiological properties, (70) 566.
- contamination by vitamin A, (64) 112.

Carotene—Continued.

- conversion into vitamin A, (64) 393, 588; (65) 894; (66) 607; (70) 132, 234, 878.
- derivative giving same absorption band as vitamin A, (69) 324.
- dosage for vitamin A, (67) 482.
- effect on linoleic acid oxidation, (68) 131.
- equivalent and apricots as sources of vitamin A, comparison, (68) 864.
- from lettuce, relation to vitamin A, (66) 92.
- identity and naming, (65) 216.
- in apricots, (70) 725.
- in butterfat, (66) 409; (70) 877.
- in carrots, forms, (65) 804.
- in endocrine glands of cattle, (69) 467.
- in flour, determination, (68) Minn. 17.
- in green leaves, extraction and separation, (62) 616.
- in mangoes, (69) 151.
- in pig's liver, tests for, (61) 491.
- in plant tissue and vitamin A potency, relation, (68) 863.
- in red palm oil, vitamin A in, (63) 91.
- international standard, stability, (70) 877.
- isolation, (68) 149.
- isolation from adrenal glands, (66) 607.
- isomeric forms, (70) 579.
- isomerization by antimony trichloride, (68) 725.
- oxygen equivalent, (63) 503.
- physiological action, (61) 794; (64) 292.
- provitamin A properties for poultry, (67) 631.
- pure, and vitamin A, (65) 804; (67) 200.
- purification method and vitamin activity, (64) 292.
- role in cure of sinus infections, (69) 467.
- visible and ultra-violet absorption spectra, (66) 519.
- vitamin activity, (63) 109; (64) 709.
- xanthophyll, and vitamin A, distinguishing, (64) 309; (68) 724.

Carotenoid—

- in fruits, effect of light, (70) 279.
- pigments, chemical constitution, (64) 801.
- pigments in wheat flour, spectrophotometric determination, (70) 12.

Carotenoids—

- and vitamin A, (69) 150.
- biochemistry, (62) 112.
- growth-promoting properties, (64) 695.
- role in animal body, (69) 467.

Carotenosis of bovine livers, (63) 574.

Carp, tooth, sex determination in, (68) 747.

Carpenter ants, notes, (63) Mich. 549; (65) Ohio 852.

Carpenter worm, control, (69) 547.

Carpenter worm injury to ash in North Dakota, (65) 853.

- Carpentry construction, master specifications, (67) 78.
- Carpet—
 beetle, varicid, parasite of, (67) 57.
 beetles—
 and clothes moths, (69) N.J. 242.
 control with propylene dichloride mixture, (70) Mich. 62.
 immature stages, fumigation, (67) 566.
 naphthalene as fumigant for, (69) 237.
 grass germination, (62) 136.
 grass pasture, culture experiments, (68) S.C. 754.
 wear testing machine, (66) 693.
- Carphoborus cholodkovskiy, studies, (61) 557.
- Carpocapsa pomonella, *see* Codling moth.
- Carpophilus—
 dimidiatus, notes, (66) Tex. 51.
 hemipterus, *see* Fruit beetle, dried.
- Carposina—
 fernaldana, studies, (66) Mo. 345.
 sp. on apples, (63) 462.
- Carrión's disease, insect vectors, (61) 554.
- Carrot—
 black rot, description, (68) 206.
 blight, control, N.Y.Cornell, (66) 640; (70) 791.
 blight, notes, (64) 448.
 diseases in storage and in transit, (68) 54.
 leaf blight, notes, Fla. (67) 536; (69) 221.
 leaf psyllids, notes, (67) 284.
 leaf spot and blight, control, (69) Ohio 61.
 psyllid, biology and distribution in Sweden, (62) 355, 854.
 root rot susceptibility, (66) Tex. 43.
 roots, color, (64) Oreg. 339.
 rust fly—
 biology and control, Mass., (61) 849; (65) 355; (67) 424; (69) 686.
 control, (61) 544; (66) N.Y.Cornell 648.
 in Massachusetts, (62) 250.
 in Michigan, (65) Mich. 458.
 in New York, (61) 554; (65) 57; (67) 424.
 naphthalene for, (63) 653; (69) N.Y.Cornell 72.
 notes, (62) N.Y.State 449; (63) Mass. 549; (66) Mich. 154; (68) Mich. 351; (70) 803.
 seed, germination, (67) Calif. 525; (68) 44.
 seed, poor germination, cause, (61) Calif. 335.
 seed, quality on sale in New York, (67) N.Y.State 130.
 seed, viability, relation to point of origin, (67) Calif. 525.
 soft rot, notes, (69) Calif. 60.
- Carrot—Continued.
 weevil, notes, (67) 579.
 yellows, transmission, Calif., (65) 753; (68) 491.
- Carrots—
 acidity response, (66) N.Y.Cornell 634.
 California, composition and time for cooking, (67) 770.
 change in ash content during storage and cooking, (61) Kans. 190.
 changes during storage, (70) 617.
 cultivation experiments, (65) N.Y.Cornell 635.
 culture, (66) Ill. 739.
 culture experiments, (62) P.R. 737; (63) Utah 639; (68) Idaho 318.
 culture under dry farm conditions, (65) Utah 627.
 development of macrogametophyte and embryo, (66) 128.
 dried, vitamin A in, (65) 193; (70) 420.
 effect of rye and oat straws, (69) 183.
 effect of superphosphates, (66) Va. Truck 738.
 feeding value for poultry, (61) Calif. 364.
 fertilizer experiments, (61) N.H. 139, N.J. 734; (63) N.J. 339, Ill. 533, R.I. 616; (64) Ohio 635, R.I. 839; (65) R.I. 534; (67) Ill. 36; (70) Tex. 183, N.Y.Cornell 775.
 flower development, (67) 247.
 for livestock, culture and harvesting, (69) U.S.D.A. 354.
 fresh and canned, vitamin C in, (66) S.Dak. 198.
 growth and soil reaction, relation, (67) 37.
 home-canned, vitamin C in, (66) 795; (67) S.Dak. 88.
 improvement, (63) Mass. 533; (69) Calif. 48, Mass. 652.
 in storage, chemical changes, (70) N.Y. Cornell 775.
 injury, (69) 232.
 optimum pH range, (66) Va.Truck 739.
 paper mulch experiments, (61) Mich. 37, Ohio 440.
 pH requirements, (70) N.Y.Cornell 775.
 preparation for market, (61) U.S.D.A. 834.
 raw and cooked, vitamin C in, (67) S.Dak. 88; (68) 861.
 selection work, (61) Mass. 833.
 spraying for leaf diseases, (68) Ohio 771.
 storage experiments, (61) Idaho 830.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 varieties, (61) Ohio 441; (62) N.Y.State 431, S.C. 636; (63) Ohio 638; (66) Mich. 134.
 varieties and culture in Genesee County, New York, (70) N.Y.Cornell 44.

Carrots—Continued.

- variety tests, (61) Oreg. 26; (62) N.Dak. 129, Tex. 637; (64) Oreg. 334; (66) Alaska 626; (67) Conn. State 523; (68) Idaho 318; (69) Alaska 36, Oreg. 354; (70) Tex. 183.
- vitamin A in, (70) Tex. 131.
- vitamin B in, (63) Iowa 93; (67) 343.
- vitamins in, (67) 88.
- vitamins in, effect of cooking, canning, and storage, (69) 617, Mont. 898.
- yellow, vitamin A in, (68) 659.
- yields and costs, (63) Colo. 530.
- yields, effect of source of potash, (65) R.I. 526.
- yields under ultra-violet glass, (61) 834.

Cars, loading to reduce transportation losses, (68) Ill. 617.

Cartilage, articular, degeneration in bovine joints, (66) 372.

Cartodere argus, notes, (61) Mich. 450.

Cartodere spp., notes, (61) 753.

Caryomyia spp., notes, (61) 546.

Case bearer, pistol, life history and control, (66) W.Va. 759.

Case bearers on cherries and apples, oil sprays for, (67) Wis. 706.

Casein—

- acid-precipitated, manufacture from skim milk, (70) U.S.D.A. 524.
- and ammonia as emulsifying agent for oil emulsions, (69) 826.
- as sole protein, effect on rats, (66) Ala. 894.
- basic amino acids, determination, (63) 415.
- blacktongue preventive value, (63) 491.
- chemistry of, (62) N.Y.State 407.
- cyclotriptide isolation from (63) 802.
- digestion with papain-cyanohydrin, splitting off of tyrosine and tryptophane, (65) 711.
- domestic, properties, (66) 369.
- drying plants, location, (65) Wis. 482.
- effect of heat on biological value, (65) 789.
- effect on kidney, relation to vitamin B complex, (69) 152.
- grain-curd, testing pH, bromocresol green paper in, (65) 566.
- making, improved methods, (69) Idaho 848.
- manufacture, composition, and consumption, (68) 666.
- manufacturing machinery, (67) Calif. 605.
- molecular weight, (62) 606.
- phosphorus content, (69) 11.
- precipitation at its isoelectric point, (61) 410.
- production, (70) U.S.D.A. 731.
- properties, technologically useful, (69) 324.
- proteins in, (64) N.Y.State 410.

Casein—Continued.

- spreader, effect on lime-sulfur injury, (69) 685.
- supplements, effect on corn and soybean rations, (67) 295.
- tryptic hydrolysis, (63) 411.
- type, effect on vitamin tests, (63) 193.
- vitamin A free, preparation, new technic, (67) 647.

Caseinogen—

- lecithin complexes, studies, (61) 306.
- peptic digest of, (69) 418.
- purified, biological value, (65) 587.

Caseins—

- as source of protein in vitamin A-free diets, comparison, (66) 591.
- of milk, (65) 259.
- variations in biological properties, (67) 187.

Cashew nuts, tests, (69) V.I. 520.

Cassava—

- analyses, (68) 271.
- culture and disease of in Santo Domingo, (70) 54.
- feeding value for young pigs, (63) Guam 165.
- grater, description, (62) 478.
- new jassid attacking in Tanganyika, (64) 361.
- root weevil, notes, (64) 250.
- starch gels, studies, (66) 201.
- vitamin A in, (69) 617.

Cassavas—

- in Jamaica, insects affecting, (64) 456.
- variety tests, (63) Guam 129, Hawaii 223.

Cassia—

- artemisioides stem blight, notes, (70) Tex. 192.
- florida and Acacia catechu, suitability as lac hosts, (68) 785.
- mosaic, notes, (64) 448.
- oil, adulteration, detection, (66) 809.

Castanea vesca, extension of Loranthus europaeus to, (67) 48.

Castnia licus, studies, (62) 854.

Castniomera humboldti on bananas, (62) 854.

Castor oil—

- fish, composition of oil, (68) 291.
- leaf spot or blight, notes, (66) 842.
- plant pests in northern Caucasus, (67) 706.
- preparation and uses, (63) 335.
- soap, germicidal efficiency, (64) 473.

Castor pomace, nitrification, (69) Mass. 634.

Castor-bean—

- oil content, effect of bagging, (64) 28.
- oil content, relation to stem color, (64) 28.
- plant, toxicity to Japanese beetle, (69) 73.
- pomace, nitrogen activity, (64) Conn. State 426.
- seed, production and use, (63) 335.

Castor-bean tick—

- latent parasitism of Ixodiphagus caurtei in, (65) 59.

- Castor-bean tick—Continued.
 life history and bionomics, (68) 795.
 life history and postembryonic development, (66) 160.
 on sheep, control, (69) 694.
 transmission of louping-ill by, (68) 531.
 transmission of tick-borne fever of sheep by, (69) 590.
 vector of new sheep disease, (69) 110.
- Castor-beans—
 breeding in Bombay, (70) 468.
 culture in United Provinces, (70) 468.
 germinating, conversion of fat to carbohydrate, (70) 753.
 germinating, enzyme activity, (70) 456.
- Castration—
 cells in anterior hypophysis of spayed rat, (66) 524.
 effect on capacity of hypophysis to induce ovulation, (68) 465.
 effects, prevention by testis extract in-leaving epididymis intact, effect on rats, jection, (62) 824; (63) 432.
 (69) 350.
- Casuarina—
 equisetifolia, notes, (64) 448.
 paludosa, polarity in, (68) 744.
 symbiotic nitrogen fixation in, (70) 591.
- Cat, Siamese, pigmentation of fur, effect of thyroid, (66) 728.
- Cat, tortoise-shell male, progeny and gametic constitution, (69) 193.
- Cat trap, construction, (62) U.S.D.A. 447.
- Catalase—
 activity—
 and respiration in barley leaves, (69) 26.
 as measure of seed viability, (70) 752.
 in apple trees treated with nitrate, (63) Ohio 39.
 in apples, effect of freezing, (61) N.Y.Cornell 426.
 in barley, relation to growth curve, (67) 371.
 in Grimes Golden apples, (67) 390.
 in tomato fruits at different stages, (67) 249.
 of army cutworm moths, (68) 644.
 of fruit tree seeds, (70) 777.
 of plant tissue, apparatus for autographic records, (70) 28.
 of roots of bindweed, effect of chlorates, (66) 33.
 relation to breakdown in Jonathan apples, (66) Wash.Col. 742.
 and other enzymes, action, relation to virus diseases, (70) 636.
 distribution in normal and potassium-starved bean plants, (70) 754.
 in agricultural products, (68) 295.
 in Colorado potato beetle during metamorphosis, (64) 248.
 in honey, (65) 856.
 of plant and animal, relation to metabolism, (63) 623.
- Catalpa mealy bug—
 in Connecticut, (65) Conn.State 451.
 notes, (61) Va. 752.
- Catalpa—
 sphinx, notes, (67) 563.
 trees, growth, effect of black locust, (66) 831.
- Catalysis and surface, (69) 323.
- Cataporesis cell, new form, description, (66) Pa. 204; (69) 327.
- Cataract and allied eye defects in mice, inheritance, (68) 748.
- Catarrh, contagious, of poultry in Netherlands, (67) 171.
- Catarrh in poultry, different forms, (67) 603.
- Catarrhal fever, malignant, of cattle, (68) 670.
- Catarrhal fever, relation to borna disease, (70) 92, 826.
- Catch crops, tests, (61) Utah 27.
- Catechol, isolation from pigmented onion scales, (69) 533.
- Catenary curve, calculation, (70) 649.
- Caterpillar—
 pests on tea estates, (63) 52.
 processionary, in Pieve forests, (67) 285.
 salt-marsh, economic importance in Louisiana, (66) 250.
- Caterpillars—
 tree-defoliating, fly parasites, (69) 833.
 urticant spines of, (69) 389.
- Cathartus cassiae, notes, (63) S.C. 752.
- Cathode and ultra-violet rays for inducing antrachitic activity in ergosterol, comparison, (61) 495.
- Catolaccus aeneoviridis, notes, (69) Mo. 79.
- Catolaccus hunteri, parasite of boll weevil, (62) U.S.D.A. 359.
- Catoptes fraudator n.sp., description, (66) 558.
- Catoptes instabilis n.sp., description, (66) 558.
- Cats—
 infected with Trypanosoma equiperdum, blood changes in, (61) 269.
 Siamese, temperature effects on color, (65) 523.
 silver and Siamese coat variations, allomorphism of, (70) 605.
 tortoiseshell male, sterility among, (68) 606.
 white coat color, blue eyes, and deafness in, correlation, (70) 318.
- Cat-tail borer, notes, (61) Mich. 450.
- Cattle—see also Cows, Calves, Heifers, Steers, etc.
 abdominal organs in, topography, (62) 166.
 abortion-free herd, maintenance, (69) Conn.Storrs 572.
 acid-fast skin infections, relation to bovine tuberculosis, (61) 70, 270.
 albino, inheritance studies, (61) Wis. 123.

Cattle—Continued.

- albino, studies, (63) Wis. 25.
 alfalfa pasture for, (63) Nebr. 262.
 and beef prices, comparison, (68) Ohio 840.
 and carcasses, grading, (61) 257.
 Arkansas native, beef producing qualities, (65) Ark. 761.
 Ayrshire, Advanced Registry records, analysis, (69) U.S.D.A. 414.
 Ayrshire, progeny performance, (61) Mo. 163.
 baby beef—
 and yearlings, comparison, (68) Ill. 653.
 feeding experiments, (64) Oreg. 367; (67) Tex. 723; (69) Oreg. 407; (70) Tex. 220.
 from crossbred Angus-Holstein calves, Wis., (61) 161; (63) 58.
 meaning, (69) 405.
 production (68) Mont. 795.
 production, breeding as factor, (68) Okla. 654.
 quality, (64) Ill. 164.
 barns, construction, (67) 79.
 beddings, comparison, (70) Vt. 231.
 beef—
 and dual-purpose, body measurements, comparison, (69) 405.
 and dual-purpose, effect of experiments, (69) U.S.D.A. 697.
 breeding herd management, (68) Miss. 364.
 breeding, management, feeding, and marketing, (70) Fla. 76.
 calcium and phosphorus metabolism during pregnancy and lactation, (67) Calif. 588.
 carcasses relation to sex and age, (62) Mo. 60.
 composition of tissues, effect of long-continued muscular exercise, (69) 700.
 cost of production, (70) Tenn. 219.
 dehorning, castrating, and branding, (61) U.S.D.A. 759.
 evaluation for register of merit, (69) 405.
 experiments, (61) Oreg. 59, Ga. 158; (64) Oreg. 366; (66) Ill. 254.
 experiments at Beltsville farm, summary, (61) U.S.D.A. 457.
 fattening, (69) Ga. 248; (70) Minn. 515.
 fattening, comparison of grains, (70) N.C. 815.
 fattening, use of silage for, (69) Kans. 248.
 fattening, value of grazing for, (65) Fla. 459.
 feeding, (63) Idaho 556.
 feeding and breeding experiments, (62) Can. 549.
 feeding and management in Corn Belt, (63) 856.

Cattle—Continued.

- beef—continued.
 feeding and nutrition studies, (67) Ohio 58, La. 294.
 feeding experiments, (61) Kans. 158, Wis. 160, Calif. 362; (62) Miss. 60, Miss. 161, Ill. 361, Kans. 362; (63) Ohio 58, Kans. 362, La. 363, Colo. 556, Nebr. 657, Mo. 762, Ohio 857, N.Dak. 857; (64) Mont. 252, Ill. 862, Kans. 862; (65) Wyo. 159, Ala. 459, Nebr. 857; (66) Kans. 355, Mo. 356, Colo. 656, Ga. 764, Ala. 858; (67) Nebr. 589; (68) Kans. 231, Ill. 653; (69) Kans. 248; (70) Kans. 221.
 feed-lot and ranch equipment, (61) U.S.D.A. 779.
 grazing studies, (67) Fla. 588; (70) Ga.Coastal Plain 852.
 in southern Louisiana, value of Brahman cross on, (69) 405.
 inbreeding, (65) 254.
 industry of Montana, costs and incomes, (65) Mont. 583.
 industry of Virginia, economic factors, (65) U.S.D.A. 282.
 Kansas five-year program, (63) 361.
 outlook charts, (66) U.S.D.A. 285.
 outlook for 1930, (62) Okla. 784.
 pasture studies, (61) Utah 59; (65) Tenn. 856.
 prices, (61) Ohio 181; (70) Me. 119.
 production, (62) Miss. 161; (70) La. 515.
 production and quality of meat, relative efficiency, (70) N.C. 815.
 production in western States, (63) 761.
 production, treatise, (67) 445.
 protein supplements for, tests, (70) Mo. 219.
 quality of meat, (63) N.C. 658.
 retarded growth and mature size, (63) Mo. 466.
 shrinkage, (63) N.Dak. 857.
 situation, (69) Okla. 288.
 statistics, (65) U.S.D.A. 486.
 studies, (70) Ill. 661.
 swedes v. potatoes for, (68) 798.
 trends in purchasing power and cost of production, (66) Mich. 286.
 value of high grade steers, (64) Okla. 758.
 vitamin A requirements, (68) N.C. 511.
 wintering, (62) Mont. 253; (66) S.C. 656.
 wintering, effect and economy of shelter, (62) Miss. 161.
 wintering on straw and alfalfa hay, (69) Oreg. 407.
 biting louse, control, (68) 639.

Cattle—Continued.

- black spotting, and milk production, (65) 523.
- bloat on sweetclover pastures, (62) Mont. 260.
- blood—
- agglutinins in, effect of age, (69) 426.
 - composition, (64) 472.
 - composition, changes during milk fever, (70) Mo. 240.
 - distribution of plasma proteins in, (70) 676.
 - hemoglobin in, (68) 371; (69) Kans. 257.
 - phosphorus in, variations, (64) 258.
 - studies, (67) Mo. 447.
 - sugar in, (69) Kans. 257.
 - volume determinations, (68) 815.
- blue-gray, inheritance of color and horns, (64) Iowa 330.
- body weight, insensible loss in, (62) 863.
- bone-chewing or depraved appetite in, (65) 267.
- bones, structural changes in and effect of mineral deficient diet, (69) 272.
- Brahman, value, (63) La. 363.
- breeding, (65) Can. 60; (66) Can. 560; (70) U.S.D.A. 513.
- advanced by inheritance studies, (66) Ill. 264.
 - ages and proven sires in, (67) Iowa 724.
 - basis of, treatise, (65) 857.
 - by artificial insemination, (65) 27.
 - diseases due to streptococci, (69) Wis. 865.
 - effect of genetic studies, (69) U.S.D.A. 705.
 - herd, management, (62) Miss. 161.
 - in Alaska, (70) Alaska Col. 371.
 - in Alaska, history, (61) Alaska 158.
 - in Jamaica and Trinidad, (68) 370.
 - losses, prevention, treatise, (65) 378.
 - on phosphorus deficient veld, (63) 171.
 - troubles, role of trichomonads, (69) 713.
- breeds—
- development, factors affecting, (63) Mo. 759.
 - growth factors in, (68) 746.
 - major, fitting and showing, (70) Mich. 234.
 - milk energy formulas, (70) 84.
 - milk energy formulas, correction, (70) 824.
 - milk energy formulas, variations in, (68) Ill. 661.
- browse range utilization for, (61) U.S.D.A. 558.
- business, western, development and financing, (61) Colo. 785.
- buying replacements subject to agglutination test, (66) 371.

Cattle—Continued.

- calcium, phosphorus, and nitrogen metabolism, effect of mineral supplements, (67) 731.
 - carbon tetrachloride poisoning, (65) 268.
 - carcasses, effects of management and sex, (69) Mo. 564.
 - Chinese, protozoan fauna of rumen, (69) 275.
 - close inbreeding in, (63) 126.
 - college herd, history and production, (67) Conn.Storrs 733.
 - compounding rations for, (67) 724.
 - crossbred herd, hereditary data, (62) Ill. 323.
 - crossbreeding experiments, S.Dak., (67) 65; (70) 822.
 - crosses, inheritance of coat color in, (63) 431.
 - cutaneous and subcutaneous nodules, histopathology, (68) 249.
- dairy—*see also* Cows.
- accuracy of measurements, (63) 668.
 - advanced registry records, (68) S.C. 806.
 - age curves of creatinine and urinary nitrogen coefficients, (70) Mo. 71.
 - and dairy products, foreign trade in, (62) U.S.D.A. 388.
 - blood and plasma volume, determination, (66) Mo. 464.
 - blood constituents, (66) Mo. 365.
 - blood sugar level, (67) 448.
 - breeding capacity, criteria, (63) 360.
 - breeding experiments, (61) U.S.D.A. 671; (62) Can. 549; (64) S.C. 620.
 - breeding, importance of dams' production records, (66) 819.
 - cost of raising, (62) W.Va. 678.
 - daily fluctuations in weight, causes, (62) N.Y.Cornell 766.
 - diseases, (67) 313.
 - effect of feeding different amounts of calcium and phosphorus, (63) W.Va. 69.
 - effect of fluorine in ration, (61) Mich. 65.
 - effect of heavy cottonseed meal feeding, (65) 260.
 - environment and size of fat globules, (70) Ill. 669.
 - experiments, N.J., (65) 864; (70) 518.
 - experiments in Virgin Islands, (69) V.I. 572.
 - feeding, (62) Can. 549; (63) Mo. 368, La. 567; (65) Ill. 561.
- dairy, feeding—
- and management, (67) La. 303, Iowa 447; (68) P.R. 370.
 - economically, (70) Alaska 822.

Cattle—Continued.

- dairy, feeding—continued.
- experiments, (61) S.Dak. 66, Kans. 166, Mich. 464, Ohio 465; (62) Miss. 164, Mont. 257, Tex. 663, Ark. 869; (63) Ohio 65, Guam 167, Tex. 472, N.C. 667, N.Dak. 865; (64) Miss. 671, S.Dak. 673, Alaska 767, Guam 869, Kans. 872; (65) Ind. 169; (66) Va. 567, W.Va. 567, Alaska 661, N.Y.Cornell 662, S.C. 663, Vt. 664; (67) Ohio 65, Hawaii 448; (68) Utah 808; (69) Ind. 98; (70) Tex. 230, Pa. 374, Mont. 822.

 relation to lignin in wood, (67) 646.
 sugars produced by bacteria from, (63) 201.
 thermophilic fermentation products, (65) 411.
- Cellulosic materials, biochemical decomposition, (64) 124.
- Cellvibrio* spp. in Italian soils, (70) 17.
- Cel-O-Glass—
 as medium for ultra-violet radiation of chicks, (61) N.J. 763.
 durability, (62) 462.
 effect on egg production, (63) N.J. 366.
 effect on growth of melons, (64) Can. 538.
 seed bed sash for tobacco, (62) Conn. State 834.
 windows, antirachitic effect of sunlight through, (63) 794.
- Celosterna scabrator*, life history and control, (67) 438.
- Celotex, manufacture and uses, (66) 674.
- Cement—
 concrete fence posts, design and manufacture, (61) 280.
 fire-resistant, (61) 282.
 hot, effect, (66) 79.
 mortar specimens, strength, effect of moisture, (61) U.S.D.A. 878.
 mortar, strength, effect of curing conditions, (70) U.S.D.A. 253.
 Portland, action of sulfates on, (62) 568; (67) 753.

- Cement—Continued.
 Portland, properties, (63) 278.
 Portland, rate of hardening, factors affecting, (66) 78.
 results from the use of, (64) U.S.D.A. 271.
- Cements and mortars, colloidal nature and properties, (69) 323.
- Cements, free calcium hydroxide in, estimation, (65) 273.
- Cenopsis directana, biology, (70) 655.
- Census of distribution, first, results, (65) 889.
- Centeterus alternecoloratus, parasite of Asiatic rice borer, (68) 507.
- Centipede, garden—
 biology and control, (61) Oreg. 53, Ind. 663; (66) Ohio 253.
 control, (64) Oreg. 356, Ill. 851; (66) Calif. 456; (67) Calif. 559; (69) Calif. 87, 552.
 in greenhouses, (70) Pa. 356.
 notes, (61) Ohio 450; (63) Ohio 50; (66) Mich. 154; (67) Calif. 559.
 on sugarcane roots, (63) La. 351.
 on tomatoes, (67) 284.
 steam sterilization for, (66) Ill. 245.
- Centipede, greenhouse—
 life history and control, (61) Ind. 663.
 new to Michigan, (66) Mich. 154.
- Centipedes, control, (68) Ill. 637.
- Cephaleuros—
 mycoidea, notes, (65) 344; (68) 62.
 parasitica, notes, (64) 847.
 virescens, notes, (67) 47.
- Cephalobus elongatus, parasite of sugarcane borer, (63) 157.
- Cephalobus spp., notes, (69) 228.
- Cephalogonimus species from ducks, (69) 267.
- Cephalonomia—
 quadridentata, morphology and ecology, (67) 443.
 sp., notes, (64) 359.
- Cephalosporium—
 acremonium, notes, (62) Ill. 346.
 and ascospore stage, (67) 694.
- Cephalothecium roseum, notes, (64) 848; (67) 274.
- Cephenomyia—
 auribarbis, studies, (68) 70.
 profifer infesting deer, (68) Mich. 376.
 profifer, notes, (68) Mich. 351.
 sp. killing deer, (62) 157.
- Cephonodes hylas, description, (69) 78.
- Cephus cinctus, *see* Sawfly, wheat stem.
- Cerambycid beetles, Japanese, immature stages and habits, (68) 506.
- Cerambycidae—
 endemic, host trees in Hawaii, (69) 385.
 fermenting baits for trapping, (68) 782.
 Indian, identification of immature stages, (63) 358.
- Cerambyx dux, life history and control, (68) 647.
- Ceraptocerus mirabilis, notes, (65) 549.
- Ceratitis capitata, *see* Fruit fly, Mediterranean.
- Ceratonia catalpa, *see* Catalpa sphinx.
- Ceratophyllus—
 fasciatus, *see* Rat flea(s).
 saundersi, mite infesting, (70) 69.
 wickhami, hatching of eggs, (65) 244.
 wickhami, wasp as parasite of, (64) 250.
- Ceratostomella—
 and Graphium, relationship, (67) 704.
 cana as variety of C. piceae, (67) 539.
 fimbriata, disinfectants for, (65) 647.
 fimbriata, effect of formaldehyde, (69) 226.
 fimbriata, morphology of reproduction, (70) 56.
 fimbriata, notes, N.C., (61) 745; (63) 645; (65) 147; (68) 488.
 ips, cause of blue stain of pine trees in Japan, (69) 680.
 ips, notes, (66) 646.
 paradoxa, perfect stage of Thielaviopsis paradoxa, (65) 535.
 piceae cana n.v., notes, (67) 539.
 pilifera, notes, (70) 354.
 pini, comparison with other species, (67) 539.
 pini, notes, (66) 646.
 spp., notes, (62) 588.
 ulmi, notes, (70) 201, 652, U.S.D.A. 512.
- Cerceris bicornuta, notes, (61) S.C. 453.
- Cercopidae, synopsis, (70) 361.
- Cercoseptoria theae n.comb., proposed name, (68) 213.
- Cercospora—
 althaeina, notes, (66) 152.
 apii carotae, notes, (68) Ohio 771.
 apii, control, (64) Ohio 350; (66) N.Y. Cornell 640.
 atricincta, notes, (66) 147.
 beticola—
 in pure culture, physiology and variations, (69) 67.
 life cycle, (63) U.S.D.A. 345.
 notes, (65) Iowa 145, N.J. 839.
 spread, (68) 206.
 studies, (70) Iowa 797.
 carthami n. sp., description, (64) 149.
 cerasella, notes, (61) 841.
 coffeicola, notes, (63) 843; (68) 488.
 fusca, notes, (65) Fla. 440.
 leaf spot of sunn hemp, (64) 350.
 leaf spot on cowpeas, (64) 350.
 musarum on banana, (66) 343.
 neriella, notes, (61) 841.
 nicotianae, cause of tobacco leaf spot, (70) Tenn. 192.
 nicotianae, notes, (70) 492.
 North American species, host index, (68) 487.
 personata, notes, (63) Ga. 143; (65) Ga. 142; (66) Ga. 745; (67) 696.
 rubi, notes, (61) N.C. 745.
 sacchari, toxic substance produced by, (65) 238.
 sorghi, notes, (68) 346.

Cercospora—Continued.

- sp., notes, (64) 448; (66) 643; (68) 769.
 spot on clover, (66) 149.
 spp., host range and intertransmissibility, (69) Iowa 60.
 spp. on clovers and alfalfa, synonymy, (67) 402.
 spp., studies, (61) 240; (67) 42.
 vaginae, notes, (66) P.R. 237.
 viticola on grapes, (63) 145.

Cercosporella—

- albo-maculans, synonymy, (61) 240.
 brassicae, notes, (61) 240.
 caryigena, notes, (65) Fla. 440; (67) 147.
 herpotrichoides, notes, (64) Oreg. 346.
 theae, notes, (64) 847.

Cereal—

- anthracnose, (67) Ind. 536.
 black rust problems, (68) 54.
 black stem rust, notes, (64) Mont. 229.
 breakfast foods, nutritive value, (62) 891; (63) 390; (64) 578.
 browning root rot, (67) 139.
 chemistry, terms used in, meaning, (70) 9.
 crops, productive, for northern Wisconsin livestock farms, (69) Wis. 791.
 crops, relative feeding values, (67) Ohio 30.
 diet, high, deficient in vitamin A, syndrome produced by, (68) 707.
 diet, high, effect on infants, (61) 892.
 diseases, descriptions, (67) Mich. 542.
 diseases, field method of insuring positive attack, (66) 440.
 diseases in Prussia, (65) 535.
 diseases in Quebec, (63) 245.
 diseases in Russia, (63) 47.
 diseases, studies, (61) Kans. 144; (62) 534; (65) Mich. 745; (68) 53, Mich. 340; (69) 526.
 diseases, tests of remedies, (63) N.Dak. 833.
 drill, new type of force-feed, test, (68) 836.
 drills, cup-feed and force-feed, comparison, (70) 843.
 experiments, sampling technic, (66) 325.
 extracts, effect on calcium in blood, (64) 289.
 foot rot, notes, (64) Mont. 229; (67) 542; (70) 637.
 industry, oxidative rancidity, studies, (70) 8.
 leaf rusts, (67) Ind. 536.
 mixture, new, containing vitamins and minerals, (64) 391.
 mixture, special, value in children's diet, (67) 484.
 porridge, cooking, (67) 337.
 products, analyses, (63) Conn.State 788.
 products, photographing, basic principles, (64) 281.
 proteins, effect of heat on biological value, (65) 789.

Cereal—Continued.

- root rot, forms and control, (67) 403.
 rotation tests, (61) Ohio 423.
 rust diseases, prize for best memoir on, (64) 700.
 rust fungi, infection conditions, (61) 534.
 rust infection, relation to carbon dioxide in air, (67) 691.
 rust resistance, osmotic characters conditioning, (63) 246.
 rusts—
 control, (69) 812.
 control by Kolo dust, (68) Minn. 53.
 control, history, (63) 840.
 cytological studies, (67) Calif. 535.
 dissemination, papers on, (69) 372.
 effect of seeding time, (63) 245.
 favoring conditions, (66) 833.
 in Australia, (68) 342.
 loss from, (62) 147.
 origin of physiologic forms, (69) 63.
 production by hypodermic injection of inoculum, (61) 445.
 races, (69) 372.
 rate of fall of spores, relation to epidemiology, (70) 193.
 scab development, progress report, (67) 691.
 scab, studies, Ind., (67) 536; (69) 60.
 seed dusting, apparatus for, (63) 246.
 seedling blight, seed treatments for, (63) 839.
 seeds—
 broken, (67) 522.
 certification in Germany, (62) 220.
 electrolysis, (70) 473.
 microphotography, (69) 363.
 on tubers of potato, seedling and growth, (62) 821.
 symbiotic fungi of, relation to proteins, (61) 22.
 smut—see also Grain smuts, Smut(s), and specific hosts.
 control, (62) 534; (63) Idaho 648.
 control, history, (63) 840.
 resistant races, experiments, (70) 792.
 stinking, in Siberia, (63) 47.
 smuts, control in Great Britain, (67) 541.
 smuts, physiologic specialization in, (62) 643.
 smuts, production by hypodermic injection of inoculum, (61) 445.
 stem rust resistance, studies, (66) U.S.D.A. 642.
 stem rust, studies, (64) 231.
 stripe rust, relative susceptibility of cultivated and native hosts in Alberta, (69) 666.
 Synonym Committee, decisions, (69) 201.
 white tip disease, notes, (66) 643.

- Cereals—*see also* Barley, Oats, Wheat, *etc.*
 accomplishments of station with, (69) Alaska 36.
 accumulation of dry matter in, factors affecting, (70) 596.
 analytical yield studies, (68) 755.
 and mineral metabolism, (64) 391.
 and weeds, competitive efficiency, (70) 772.
 antirachitic activation of, (62) 898.
 as forage crops, (69) Wash.Col. 790.
 competition with other crops, (68) Wash.Col. 755.
 culture experiments, (62) 130.
 dipterous larvae infesting, bionomics and structure, (70) 811.
 duty of water experiments, (61) Oreg. 27.
 effect on calcium-phosphorus metabolism in chickens, (66) 660.
 effect on teeth decay in children, (68) 280.
 feeding value, comparison, (63) Ohio 824.
 fertilizer and liming tests, (69) Wis. 791.
 floral development, (68) 169.
 for winter pasture, (68) Okla. 609.
 germinating, vitamins B and C in, variation, (61) 295.
 germination and development, effect of calcium sulfite and sulfate, (66) 723.
 growing and stored, insects affecting, (62) 852.
 in Lena Valley, weeds in, (67) 384.
 inheritance studies, (64) Wash.Col. 644.
 irradiation value, (63) 495.
 long and short cooked, starch digestion in vitro, (70) 865.
 losses due to delay in harvesting, (66) N.Dak. 131.
 losses from standing uncut after maturity, (63) N.Dak. 823.
 manganese in, (63) 108; (65) Wis. 491.
 milled, insects in, electric sterilizer for killing, (65) Conn.State 451.
 no-growth patches, cause, (68) 489, 490.
 of North China, iodine in, (64) 581.
 poisoning of human beings by weeds in, (70) 382.
 polyploidy in, (62) 511.
 problem, solution, relation to improvement of agriculture, (65) 582.
 production tests, Alaska, (62) 127.
 production under irrigation, (63) Wash.Col. 633.
 rickets-producing effect, (63) 295.
 structure and composition, (67) 472.
 studies, (61) Calif. 328.
 Thysanoptera attacking, (67) 284.
 transplanting, technic, (62) 220.
 varieties for combining, (64) S.Dak. 626.
 varieties, registration in Germany, (68) 755.
 variety survey, (64) Oreg. 734.
- Cereals—Continued.
 variety test plats, plan for laying out, (65) 626.
 variety tests, (68) Nebr. 320.
 vitamin B (B₁) in, (67) 186.
 vitamins B and G in, (65) Ill. 589.
 vitamins in, (62) Ill. 390; (63) 895; (69) 898.
 winter, meteorological conditions of growth, (62) 712.
 yield, census studies, (66) 329.
 yield, estimation by sampling methods, (63) 824.
 yields, studies, (63) 437.
- Cerebral cortex, respiratory quotient in B (B₁) deficiency, (70) 134.
 Ceresa bubalus, *see* Buffalo treehopper.
 Ceresa spp., control in orchards, (63) U.S.D.A. 53.
 Ceresan—
 for barley stripe disease, (65) Iowa 145.
 fungicidal value, (64) Ohio 644, Ill. 843; (65) N.C. 146, Mich. 149.
 phenol coefficient value, (64) Ohio 644.
 value for tomato stem rot, (64) Del. 640.
 Cereus schottii Fusarium disease, notes, (70) Ariz. 790.
 Cereus speciosus, self-sterility in, (66) 143.
 Ceric acid, studies, (61) Ohio 445.
 Ceriman, propagation, (67) Hawaii 385.
 Cerobates spp. larvae, description, (63) 358.
 Ceromasia—
 lepida, notes, (63) 257.
 sphenophori, introduction into Guam, (63) Guam 152.
 sphenophori, notes, (64) Guam 849; (65) 497.
 Ceroplastes spp. in Australia, (68) 785.
 Cerotoma trifurcata, *see* Bean leaf beetle.
 Certified Milk Producers' Association of America, proceedings, (61) 563; (63) 368; (67) 165.
 Cestodaria and Cestoda of Canadian animals, (69) 425.
 Cestodes—
 in parts of New York State, survey, (70) 241.
 nomenclature, (61) 350.
 occurrence in this country, (69) 544.
 of birds, (69) 545.
 of birds in China, (68) 778.
 of birds, new host records for, (63) 573.
 of fowls, (62) 548; (70) 248.
 of wild turkeys, (66) 670.
 studies, technic, (68) 64.
 Cestrum parqui, poisoning of ruminants by, (65) 378.
 Ceutorhynchus—
 assimilis, broccoli seed pest, (70) 207.
 tau on onion and garlic in Texas, (68) 351.
 Chabertia ovina—
 feeding habits and pathogenic action, (66) 571.
 notes, (61) Oreg. 768; (64) 243; (67) 601; (69) 590; (70) 245.

- Chaetexorista—
 javana, notes, (70) U.S.D.A. 362.
 javanica, parasite of oriental moth,
 (69) 78.
- Chaetocnema—
 aridula, injurious to cereals, (66) 847.
 concinna, biology, (63) 260.
 tibialis, notes, (65) 651.
- Chaetodacus tryoni, heat treatment for, (66)
 352.
- Chaetomella raphigera—
 asexual fructifications, (67) 702.
 n.sp., description, (67) 702.
- Chaetomium kunzeanum, notes, (70) 638.
- Chaetophlepsis orbitalis n.sp., description,
 (65) 656.
- Chaetopsis—
 aenea, notes, Iowa, (61) 353; (64)
 852.
 fluvifrons, notes, (63) 257.
- Chaetoptelius vestitus, natural enemies,
 (68) 649.
- Chaetostricha new species, description, (67)
 443.

- Cheat hay, cost of production, (61) Oreg.
 685.
- Cheese—
 adjustment to changes in outside air
 temperatures, (67) 164.
 American Cheddar, in diets, calcium re-
 tention on, (67) 625.
 American, standardization of milk for,
 (65) Wis. 374.
 and butter, treatise, (64) 69.
 blends, studies, (70) 733.
 body of, relation to calcium in, (66)
 570.
 boxes, reinforced and unreinforced,
 strength, (61) 279.
 brick, methods of improving, (69) Wis.
 848.
 calcium in, (67) 625.
 Canadian, potassium nitrate in, (62)
 873.
- Cheddar—
 alcohol-soluble proteins from, (69)
 418.
 chemical changes during ripening,
 (68) N.Y.State 524.
 distribution of salt in, (70) 673.
 effect of additions to milk for, (61)
 Idaho 869.
 effect of colon group bacilli, (70)
 524.
 manufacture, standardization of
 milk for, (69) Idaho 848.
 metallic discoloration, (64) 555.
 of New Zealand, discoloration in,
 (70) 88.
 pasteurized milk for, (70) 379.
 quality, effect of starters, (70) 238.
 rancid flavor in, (67) 163.
 ripening, (68) 242; (70) 379.

Cheese—Continued.

- Cheddar—Continued.
 ripening, role of aroma of starters, N.Y.State, (68) 524, 525.
 rusty spot in, (70) 380.
 standardization of milk for, (64) Idaho 69.
 cold storage holdings, (65) U.S.D.A. 784.
 cottage—
 control of quality and uniformity, (70) 90.
 effect of sunlight, (67) Calif. 593.
 low-acid rennet-type, manufacture, (66) U.S.D.A. 369.
 making, improved methods, (69) Wis. 848.
 making on the farm, (61) Kans 468.
 making, shortening method, (70) 90.
 manufacture, (67) Mo. 448; (69) S.C. 854.
 manufacture and marketing, (65) Iowa 667.
 manufacture, improving, (68) W.Va. 806.
 manufacture with dry skim milk, (68) 665.
 preparation and marketing, (62) 555.
 properties, relation to dry skim milk, (69) Mo. 574.
 sweet-curd, effect of gelatin, (63) Mo. 769.
 sweet-curd, rennet-coagulated, manufacture, (66) W.Va. 569.
 cream, manufacture, (62) N.Y.State 464.
 cream, properties, factors affecting, (66) Mo. 368.
 cream, use of dry skim milk in, (65) N.Y.State 374.
 demand for, effect of business depression, (68) 690.
 demand for, factors affecting, (69) Wis. 881.
 Edam, effect of pasteurizing temperature of milk, (62) 166.
 effect of amount of salt and method of salting, (61) 369.
 effect of curd character of milk, Utah, (63) 671; (66) 170; (68) 242.
 Emmental, manufacture and handling, treatise, (64) 376.
 factories, economic study, (63) Wis. 84.
 factories in Wisconsin, (64) Wis. 278.
 factories, started preparation for, (67) Oreg. 736.
 factory, establishment, (61) U.S.D.A. 67.
 freezing, effect on flavor, (63) Wis. 70.
 fresh unripened, from skim milk, (61) 767.
 from pasteurized milk, microbiology, (61) 672.

Cheese—Continued.

- Gorgonzola-type, manufacture, (67) Calif. 593.
 Gouda, subsequent blowing, (65) 867.
 Holland, effect of feeding clover silage, (65) 372.
 industry, foreign type, in Wisconsin, (65) Wis. 83.
 industry in Oklahoma, place, (68) Okla. 662.
 making, heating curd in, new process, (61) Wis. 171.
 making in New Zealand, milk for, (62) 556.
 making, slow development of acidity in, (61) 266.
 making, standardization of milk for, Idaho, (63) 569; (68) 369.
 making, treatise, (61) 267; (63) 869.
 manufacture, composition, and consumption, (68) 666.
 marketing, in England and Wales, (65) 386.
 New Zealand export, rate of ripening, (70) 378.
 of Puerto Rico, vitamin A in, (70) 725.
 process, color defect, (62) 556.
 process, improvement, (63) Wis. 70.
 process, manufacture, (61) Wis. 170.
 processed, body and texture, (67) 736.
 processed, effect of acidity, (67) Wis. 731.
 processed, use of emulsifiers, (64) 172.
 removal of undesirable flavors, (70) Mo. 230.
 ripening in sealed package, (68) 525.
 ripening room, control, (70) 673.
 ripening studies, (68) 242; (69) 263; (70) 88.
 Romadur, ripening, bacteriological analyses, (61) 672.
 salt in, estimation, (70) 446.
 sandiness in, (64) 472.
 soft, making, treatise, (70) 88.
 sour, causes and prevention, (69) Wis. 848.
 spreads, quality, (69) Wis. 848.
 spreads, tests, (68) 242.
 standardized, and analyses, (64) 414.
 starters, preparation, use, and advantages, (70) 524.
 studies, (62) N.Y.State 464; (66) Va. 569.
 sweet curd cottage, (65) 867; (68) Okla. 662.
 Swiss, quality, effect of different starters, (68) 664.
 Swiss, texture, relation to pH, (62) 464.
 tendency to early gassy fermentation, factors in, (69) 419.
 treatise, (69) 419.
 types, calcium and phosphorus in, (69) Kans. 304.
 types, growth-promoting property and digestibility of proteins, (70) Ill. 716.
 yield per pound of butterfat, (62) 556.

- Cheesecloth, production of summer annuals under, (68) 196.
- Cheliospirura—
hamulosa, developmental stages, (65) U.S.D.A. 181.
hamulosa in Quebec, (68) 824.
hamulosa, new intermediate host for, (69) 268.
spinosa, developmental stages, (65) U.S.D.A. 181.
- Chelmatobia brumata, notes, (69) 72.
- Chelidonium—
brevicornis, notes, (65) 547.
cinctum of south India, (61) 455.
- Chelonus—
annulipes, biology and morphology, (67) U.S.D.A. 582.
chilonis, parasitic on Asiatic rice borer, (68) 507.
texanus, notes, (69) 398.
- Chemical—
analysis—
 applied inorganic, treatise, (63) 804.
 magneto-optic method, (66) 803.
 micro methods, (69) 488.
 photometric, treatise, (68) 729.
 potentiometric volumetric method, (61) 308.
 quantitative, effect of degree of pulverization and weight of samples, (66) 204.
 quantitative, theory and technic, (63) 711.
discoveries, effect on use of fruits and vegetables, (69) U.S.D.A. 652.
laboratories, construction and equipment, (63) 712.
microscopy, handbook, (63) 7.
research, relation to agriculture and home economics, editorial, (68) 717.
structure and optical rotation, (67) 198.
- Chemicals—
and drugs, analyses, treatise, (65) 314.
aromatic, tests as codling moth bait, (65) N.Mex. 244.
effect on decomposition of sewage sludge, (61) N.J. 480.
effect on mosquitoes, (63) N.J. 258.
toxicity to living organisms, effect of concentration, (69) U.S.D.A. 380.
- Chemistry—
agricultural—
 bacteriological, (61) Wis. 107.
 bibliography, (67) 12.
 laboratory of Chinese Eastern Railway, notes, (61) 600.
 studies, (62) Calif. 716.

- Chlorides—
 determination, (61) 413; (69) 330.
 effect on penetration of dye into Nitella sap, (61) 120.
 in soils, electrometric determination, (69) 12.
- Chlorine—
 and compounds, germicidal efficiency, (69) 272.
 as disinfectant, (69) 106; (70) 103.
 assimilation in sugarcane and other plants, (69) Fla. 188.
 disinfectants, preparation, testing, and use, (66) Kans. 570.
 effect on quality of tobacco, (61) Conn. State 136; (63) 134; (69) 649.
 fixation by water, role of ammonia in, (70) 113.

Chlorine—Continued.

- gas for disinfection of wells, (67) 331.
- germicidal efficiency, (63) 370.
- in fertilizers, effect on chlorine and quality of tobacco, (68) Ky. 318.
- in fertilizers, effect on cotton yield, (65) 631.
- in swimming pools, orthotolidine test for, (61) Mich. 411.
- in tobacco, (62) Ky. 218.
- in tobacco, relation to grade, (64) Ky. 536.
- in turpentine, determination, (66) 809.
- poisoning in connection with weed control, (66) 643.
- solutions, effect on pot plants, (66) 142.
- sterilization of beekeeping equipment, (69) Minn. 246.
- traces, determination with benzidine, (68) 440.

Chloroform—

- effect on rate of photosynthesis in detached leaves, (69) 507.
- negative variation in *Nitella* produced by, (68) 461.
- value for botfly larvae, (66) Ill. 271.

Chlorophyll—

- and iron in green and chlorotic pear leaves, relation, (69) 637.
- and iron in plant tissues, relation, (67) U.S.D.A. 86.
- as index of productive capacity of corn, (70) 766.
- characters in sorghum, inheritance, (67) Tex. 515.
- chemistry of, (61) 625.
- content and rate of photosynthesis, (64) 326.
- decomposing enzyme in orange rinds, (65) Ala. 437.
- deficiencies in sorghum, (68) 750.
- deficiencies induced in cotton by radiations, (67) Tex. 638.
- deficiencies, inheritance, (70) 459.
- deficiency in new world cottons, inheritance, (67) 227.
- determination, new method and instrument, (69) 772.
- determination, quantitative, (62) 616.
- development, effect of selective solar irradiation, (64) 22.
- development of soybean seedlings, (63) 622.
- distribution in variegated plants, (61) 214.
- effects in diet of rat, (69) Ga. 464.
- effects on animals, (66) Ga. 763.
- formation in plants, effect of phosphorus content, (67) 116.
- in albino rat diet, effects, (70) 369.
- in evergreens, periodical variations, (62) 24.
- in grain sorghum, (70) 613.
- in green leaves, extraction and separation, (62) 616.
- in leaves, relation to oil sprays, (61) 544.

Chlorophyll—Continued.

- in plants exposed to ultra-violet rays, formation, (67) 20.
- in tobacco, effect of mosaic, (66) 445.
- pigment in corn, studies, (65) 24.
- preparation, (63) 23.
- synthesis, formation of formic aldehyde during, (66) 722; (68) 600.
- variations in mulberry leaf, (67) 661.

Chloropicrin—

- as soil insecticide for wireworms, (69) 84.
- bibliography, supplement, (64) U.S.D.A. 157.
- germicidal properties, (70) 835.
- use against coccids of orange and date, (62) 155.
- value for citrus fumigation, (61) 350.

Chloroplast pigments—

- effect of fertilizers, (65) 25.
- in soybeans, development, effect of minerals, (61) 324.

Chloroplasts in potatoes, formation and division, (68) 311.

Chlorops taeniopus—

- bionomics, (67) 716.
- on wheat varieties, (67) 284.

Chlorosis—

- and soil studies, (63) Idaho 540.
- cause and control, (63) Utah 344.
- effect of iron salt solutions, (61) Calif. 322.
- in crops, cure by manganese, (63) 813.
- in plants, control, (67) N.Mex. 43, 539.
- in rice, cause, (62) Ark. 844.
- in rose houses, control, (65) Mich. 745.
- in trees, (66) Idaho 235.
- in Utah, treatment, (62) 849.
- in yellow lupine on limed soils, iron for, (70) 795.
- infectious, in plants, (62) 146.
- infectious, of roses, (66) 843.
- lime-induced—
 - composition of shoots, (64) 450.
 - due to manganese deficiency, (61) 533.
 - treatment, (65) Calif. 150.
- nature, cause, and control, (68) Utah 205.
- of corn, cause, (61) Mass. 843.
- of fruit trees, treatment, (61) 243; (65) N.Mex. 234.
- of oats and cowpeas, (66) S.C. 627.
- of pear trees, treatment, (61) Calif. 342.
- of plants, effect of iron sulfate and iron citrate, (61) N.Mex. 236.
- of plants on neutral or alkaline soils, (66) Va.Truck 738.
- of trees, shrubs, and plants, Idaho (61) 847; (68) 342.
- of variegated plants, nature and transmission, (68) 627.
- 2-Chloropentane as anthelmintic, (65) 874.
- Chlumetia transversa* on mango in Philippines, (67) 707.
- Choanotaenia infundibulum*, notes, (67) 746.

- Chocolate—
 cake, color, effect of variation in ingredients, (63) 390.
 containing dextrose, estimation of sugars in, (70) 299.
 eclairs, food poisoning from, (68) 282.
 ice cream—
 methods of improving, (64) Ill. 874.
 qualities, (69) Mo. 576.
 sirups, composition, (64) 876.
 studies, (67) Mo. 448; (69) Kans. 257.
 type of flavoring, (65) 68.
 milk, fat test for, (66) Pa. 206.
 moth pests in, (64) 55.
 pericarp color in corn, inheritance and linkage in, (65) 521.
 products, added lecithin in, detection, (66) 808.
- Choeostrongylus pudendotectus—
 life history, (66) 668.
 notes, (63) 875.
- Chokecherry pollinated with other species of Prunus, breeding, (67) N.Dak. 673.
- Cholam mite on sorghum, (69) 399.
- Cholera serum and virus, production, (65) Ind. 174.

- Chortophila cilicrura, *see* Seed-corn maggot.
- Christmas—
 tree industry, (63) Ohio 44.
 tree plantation, care, (63) Ind. 539.
 trees as cash crop, (65) U.S.D.A. 743.
- Chromaphis juglandicola, *see* Walnut aphid.
- Chromic acid, action on gossypol derivatives, (61) 802.
- Chromium—
 in food and biological material, bibliography, (69) 752.
 plating for farm machinery, value, (61) Mich. 772.
 steel vessels, applicability to analytical purposes, (66) 203.
- Chromocryptus mesorufus n.sp., notes, (62) 860.
- Chromon repentinus, notes, (67) 288.
- Chromosome—
 closed X, of Drosophila, genetic behavior, (68) 747.
 complex, somatic, (69) 194.
 configuration in hybrids of Oenothera, fulfillment of predictions, (68) 745.
 conjugation of dwarf apples, (66) 725.
 fragmentation in tomato, (62) 724.
 pairing, absence of, heterotypic phases in, (62) 511.
 relations in Pomoideae, (68) 178.
 rings in corn and Oenothera, differences, (68) 602.
 translocations produced by X-rays in Drosophila (62) 124.
 X, in Drosophila, cytological map, (68) 747.
 X, locus of four factors in, (62) 822.
 Y, in Drosophila, aberrations, (62) 822.
- Chromosomes—
 aberrations in Drosophila, genetic and cytological correlation, (68) 747.
 aberrations in due to transgenation, (68) 747.
 anatomy, (68) N.Y.State 618.
 and phylogeny in Crepis, (66) 623; (68) 745.
 association of nonhomologous parts in corn, (70) 603.
 attached X, experiments, (68) 746.
 balance as factor in duration of life, (65) 724.
 behavior and variation in strawberry, (68) 749.
 behavior in Pomoideae, (66) 126.
 behavior in potatoes, (64) 619.
 behavior in Triticum hybrids, (62) 621.
 configurations in Oenothera species and crosses, (68) 314.
 determination of heredity and sex by, (62) 321.
 doubling, constant breeding hybrids resulting from, (63) 217.
 duplicating fragments, change in dominance of genes in, (68) 746.
 in Acer and Staphylea, (70) 604.
 in apples, constitutions, (68) 464.
 in corn, (68) 747.
 in corn, structural changes, (68) 461, 745.
 in cotton and related genera, (69) 190.
 in Cucurbita, (66) N.Y.State 725.
 in fowls, (69) 195.
 in grass sorghums, (67) 374.

Chromosomes—Continued.

- in males, selective segregation, (62) 512.
- in pigeon hybrids, (62) 123.
- in pigeons, characteristics, (70) 32.
- in rat and mouse, comparison, (70) 319.
- in *Sciara*, selective segregation, (68) 748.
- in *Sciara*, sex, genetic identification, (62) 512.
- in teosinte and corn, crossing over between, (68) 462.
- in turkeys, studies, (67) 24
- linkage in *Oenothera* hybrids, (66) 127.
- morphological individuality, conservation, (68) 747.
- multiple association and fragments in *Rosa*, (68) 746.
- multiple pairing, hybridity, and fragments in roses, (69) 347.
- nonhomologous, of corn, interchange between (65) 818.
- number—
 - and mating capabilities in wheat hybrids, (63) 24.
 - and morphology in conifers, (70) 604.
 - and morphology in *Nicotiana*, (67) 224.
 - and mutation rate under X-ray treatment, (62) 510.
 - and relations in *Magnoliales*, (70) 604.
 - in *Agropyrons*, (61) 721.
 - in *Althaea rosea*, (67) 225.
 - in angiosperms, (65) 522; (66) 25; (70) 459.
 - in apple and grape, (61) 24, 517.
 - in apple seedlings, (69) N.Y.State 347.
 - in apples, (62) 321.
 - in *Baptisia*, *Thermopsis*, and *Lathyrus*, (68) 602.
 - in *Betulaceae*, (63) 724.
 - in *Capsicum*, (63) 724.
 - in corn, (69) 639.
 - in crown gall and cancer tissues, (67) 513.
 - in *Cucurbitaceae*, (63) 724.
 - in flax, (70) 315.
 - in grapes, (64) 23.
 - in Indian cotton, (61) 629.
 - in *Iris*, (61) 24.
 - in man, (64) 23; (65) 217.
 - in peanuts, (67) 24.
 - in *petunia*, (63) 429.
 - in phlox, (67) 374.
 - in pineapple varieties, (66) 126.
 - in plants, (64) 726.
 - in rogues of peas, (63) 217.
 - in *Scirpus palustris*, (62) 322.
 - in *Ulmus*, (66) 623.
 - in *Vitis* and *Pyrus*, (61) 24.
 - in wheat crosses, (63) 429, 624.
 - value in taxonomic studies, (66) 623.

Chromosomes—Continued.

- of parthenoproduced *Tettigidae*, demonstration, (65) 217.
- poleward movement, factors involved, (68) 31.
- ring-shaped, in variegated corn plants, correlation, (68) 750.
- somatic, number in sugarcane, (69) 517.
- somatic, of sorghum, (66) 725.
- stability in rhododendrons, (63) 725.
- structure, effect on metabolism, (65) 725.
- structure in *Drosophila*, (68) 747.
- structure, regional differences in crossing over as function of, (68) 747.
- translocations in *Drosophila*, (62) 422; (64) 23.
- translocations induced by X-rays, (62) 214.
- variation in *Crocus*, (68) 179.
- variations in, (61) Calif. 326.
- X and X', in *Sciara*, crossing over, (65) 525.
- Chronaxia* in horses, measurement, (70) 827.
- Chrysanthemum*—
 - aphid, toxic spray for, (61) Md. 656.
 - bacterial disease, (63) 349.
 - caterpillar pest, life history notes, (62) 545.
 - diseases, (65) N.J. 352.
 - karyogenesis in, (70) 758.
 - leaf spot diseases, comparison, (61) 654.
 - leaf spot, notes, (70) 800.
 - leafy gall, (70) 200.
 - plants, hardening off, Mich., (65) 641; (68) 328.
 - production and photoperiodism, (70) 784.
 - seedlings, description, (64) Can. 538.
 - Verticillium* wilt, (68) Wash.Col. 769.
- Chrysanthemums*—
 - bank sand as medium, (70) 630.
 - breeding, (61) Mich. 41; (67) Iowa 385.
 - culture, (63) 739; (64) Ohio 635.
 - culture in greenhouse, (62) Ohio 143.
 - flowering, effect of abbreviation of day length, (70) N.Y.Cornell 783.
 - improved varieties, breeding, (69) Iowa 48.
 - photoperiod effects on blooming, (69) N.Y.Cornell 57.
 - photoperiodism, (68) 197; (70) 631.
 - pompon, growth under cloth, (70) 784.
 - reducing day length for early blooms, (68) 196; (70) 631.
 - shading, effect on time of blooming, (65) Ohio 641.
 - treatise, (62) 143.
- Chrysobothris*—
 - femorata*, see Apple tree borer, flat-headed.
 - fragariae* n.sp., description, (64) 753.

- Chrysobothris*—Continued.
 succedanea, structure, generic classification, and life history, (70) 651.
- Chrysocharis elongatus*, notes, (61) 856.
- Chrysochroa fulgidissima*, structure, generic classification, and life history, (70) 651.
- Chrysoclista* spp. infesting hawthorn, biology, (69) 389.
- Chrysocoma tenuifolia* poisoning in Angora goats, (69) 421.
- Chrysomela* beetles, liberation, (64) 549.
- Chrysomela* spp., notes, (68) 499.
- Chrysomelidae*—
 of Kansas, (70) 365.
 of Oregon, catalogue, (68) 648.
- Chrysomphalus*—
 aonidium, *see* Red scale, Florida.
 aurantii, *see* Red scale, California.
 dictyospermi—
 biology and control, (69) 690.
 in New Orleans, (70) 499.
 on avocados, (66) 759.
 parasites attacking, (62) 252.
 ficus, biology in Egypt, (67) 289.
 obscurus, *see* Scale, obscure.
 personatus in Egypt, (70) 809.
- Chrysomyia*—
 albiceps, notes, (64) 248.
 rufifacies—
 life history, nutritional requirements, and fecundity, (70) 657.
 notes, (65) 551.
 synonymy and distribution, (70) 811.
 spp., notes, (68) 647.
 spp. on sheep in Queensland, (67) 154.
- Chrysomya demandata*, breeding in corn silage, (67) 291.
- Chrysopa*—
 californica, notes, (65) Calif. 156.
 chrysops, studies, (62) 649.
 oculata, relation to oriental peach moth, (65) 655.
 plorabunda, control of oriental fruit moth by, (68) 69.
 ramburi, description and biology, (67) Calif. 432.
 rufilabris, control of oriental fruit moth by, (68) 69.
 sp., notes, (61) Calif. 351, 549.
- Chrysopidae*, Japanese, studies, (67) 286.
- Chrysopidae* of Canada, (69) 237.
- Chrysopilus ferruginosus*, notes, (66) P.R. 247.
- Chrysops*—
 dispar, transmission of buffalo disease by, (63) 847.
 flaviventris, anthrax transmission experiments, (62) 168.
 generic keys, (64) 248.
 parvulus, notes, (63) Ark. 754.
 sequax, relation to spread of anaplasmosis, (64) Okla. 748.
- Chufa, industrial uses, (68) 470.
- Chufas, dry lot feeding and grazing of pigs, (69) Fla. 248.
- Church, negro, in rural Virginia, (64) Va. 91.
- Church, rural, *see* Rural.
- Churches—
 in town-country communities, activities, (68) Mich. 269.
 rural and urban, comparison, (65) Mich. 785.
- Churns—
 as source of molds in butter, (67) 68.
 contamination of butter from, (64) Ark. 470; (66) Iowa 169.
 microorganisms in, (69) Iowa 575.
 sanitation, (61) 672; (67) 68; (69) Iowa 98.
- Chyliza erudita*, food habits, (63) 457.
- Chylomicron content and total lipids of blood plasma in dogs, (66) 195.
- Cicada, periodical, studies, (61) Conn.State 547; (68) S.C. 780.
- Cicadas* damaging *Asparagus plumosus*, (64) 545.
- Cicadella circellata*, studies, (65) Calif. 53.
- Cicadellidae* of Brazos County, (65) Tex. 899.
- Cicadellidae* of New Hampshire, (70) N.H. 504.
- Cicadidae*—
 geraniol bait as attractant, (62) 653.
 of Kansas, biology, (62) 245.
- Cicadula divisa*, *see* Leafhopper, six-spotted.
- Cicadulina mbila*—
 as vector of streak disease of corn, (70) 343.
 inheritance of ability to transmit a plant virus, (68) 466.
 mechanism of transmission of plant viruses, (70) 218.
 transmission of plant virus by, inheritance, (66) 156.
- Cicadulina* spp., notes, (62) 237.
- Cicer arletinum* leaf disease, notes, (64) 230.
- Cicinnobolus cesatii*, notes, (66) 751.
- Cider—
 apple, clarification, (64) N.Y.State 713.
 clarification results, (67) Mich. 10.
 filter, description, (69) Mich. 3.
 manufacture, technical processes, (66) Can. 827.
- Ciders, sulfurous acid in, determination, (62) 206.
- Cigar—
 case bearer, new in Utah, (67) 427.
 case bearer, notes, (63) Utah 251.
 smoke, ammonia content, relation to tobacco fertilization, (65) 226.
- Cigarette beetle, *see* Tobacco beetle.
- Cigars, hydrocyanic acid gas fumigation with sustained and dissipated vacuum, (69) 75.
- Cimex lectularius*, *see* Bedbugs.
- Cimex* spp., studies, (63) 848.
- Cinara—
 apini villosa n.v., description, (67) 53.
 n.spp., description, (68) 784.

- Cinchona—
 diseases, notes, (68) 769.
 efficiency for avian coccidiosis, (64)
 Ohio 679.
 ledgeriana diseases, notes, (65) 441.
 seedling infection, notes, (64) 230.
- Cingilia catenaria, *see* Chain-spotted geom-
 eter.
- Cinnabar moth for control of ragwort, (62)
 247.
- Cirphis latiuscula, control, (69) Fla. 232.
- Cirphis unipuncta, *see* Army worm.
- Cirrhosis of liver in bovines, cause, (63) 76.
- Cirrhosis of liver in horses, (62) 876; (67)
 596; (69) 591.
- Citellus tridecemlineatus, hibernation, (62)
 151.
- Citranequans—
 as rootstock for Satsuma orange, (63)
 Fla. 635.
 notes, (66) Tex. 35.
- Citranges—
 as rootstock for Satsuma orange, (63)
 Fla. 635.
 notes, (61) Calif. 341; (66) Tex. 35.
- Citrateae, phylogenetic relations, (62) 436.
- Citric acid—
 decomposition by soil, (62) 816.
 determination, (66) 410.
 fermentation of *Aspergillus niger*, ef-
 fect of iron, (67) 645.
 in fruits and products, determination,
 (64) 511.
 in milk, (70) 446, 671.
 method for estimation of milk solids,
 (70) 299.
 milk for infant, (63) 290.
 modification of milk for infant feeding,
 (61) Wis. 191.
 production by *Aspergillus niger*, (62)
 24.
 titration in presence of ferric and cupric
 salts, (67) 203.
 use in starter cultures, (61) 564.
 utilization by *Salmonella pullorum*,
 (66) R.I. 375.
- Citricola scale—
 predacious coccinellid on, (69) 73.
 studies, (61) Calif. 350; (63) 162, 848.
- Citripestis sagittiferella, life history and
 habits, (67) 153.
- Citrobacter freundii n.comb., (67) 662.
- Citrobacter, new genus, proposed, (67) 661.
- Citron—
 feeding value, (66) S.C. 664.
 Fusarium wilt, notes, (65) Fla. 440.
 mal secco disease in Sicily, (68) 495.
- Citrus—
 and Mangifera, apogamy in, importance,
 (67) 532.
 and poncirus hybrids, first generation,
 ancestral characters in, (68) 748.
- aphid—
 food plants of, (62) 246.
 green, biology and control, (61)
 548, Fla. 754; (63) Fla. 651.
 green, infestation, (65) Fla. 451.
- Citrus—Continued.
 aphid—continued.
 green, notes, Fla., (67) 559; (69)
 231.
 infection by *Empusa fresenii*, (62)
 Fla. 345.
 notes, (62) Fla. 351.
 relation to *Empusa fresenii*, (63)
 Fla. 644.
- aphids, control, (67) 559.
- aphids, diseases of, studies, (65) Fla.
 438.
- autotetraploids in, fruit characteristics,
 (68) 746.
- blast bacteria and allied organisms,
 (63) 747; (67) 278.
- blast, organisms from, (65) Calif. 743.
- blight, notes, (62) Fla. 344; (65) Fla.
 438.
- borer, large, of south India, (61) 455.
- boron requirements, (65) Calif. 722;
 (66) 336.
- bug, larger horned, in Queensland, (68)
 784.
- bug, larger horned, life history, (67)
 288.
- byproducts, new uses for, (68) U.S.D.A.
 17.
- cambium miner, new, from Puerto Rico,
 (69) 72; (70) 364.
- canker—
 control, (62) Fla. 344; (70)
 U.S.D.A. 486.
 from herbarium specimens of Citrus,
 (70) 495.
 on lime twigs and fruits, (67) 264.
 organism, invasion of fruit tissues
 by, (62) 51.
 studies, (63) Fla. 644; (65) Fla.
 438; (66) 842; (67) Fla. 535.
- chlorosis and decline, (70) Ariz. 790.
- collar rot, notes, (64) 448.
- collar rot, types, (68) 61.
- coloring, recent developments, (67) 532.
- constituents, cytological study, (61)
 322.
- culture, (63) P.R. 141; (69) Fla. 209,
 Hawaii 652; (70) 629.
- culture experiments, (67) Miss. 35.

 tabescens, notes, (62) Fla. 344.
- Clonorchis sinensis, parasite of rats, (64) 237.
- Clonostachys araucaria, notes, (63) 349.
- Clostridium—
 acetobutylicum—
 breakdown products, (63) 202.
 composition of cells, (63) 412.
 fermentation by, (67) 5.
 formation of methylglyoxal by, (69) 166.
 notes, (69) P.R. 771.

Clostridium—Continued.

botulinum—

B and C cultures, atoxic, (66) 468.

B type, notes, (63) 597.

behavior in frozen fruits and in vegetables, (70) 715.

C and D types, bacteria of, (64) 771.

C type in duck disease, (64) 776; (70) 686.

C type, notes, (67) 322.

in soils, determination, (66) Colo. 613.

in vegetables, effect of freezing on survival and toxicity, (68) 560; (70) 127.

toxicity of sodium benzoate to, (62) Calif. 787.

toxins, cause of duck sickness, (68) 383.

butyricum in fertility plats, (64) Ohio 614.

chauvoei, heat-stable antigen, value as immunizing agent, (69) 423.

chauvoei, studies, (61) Kans. 172; (62) 558; (67) 740; (69) 711.

hemolyticus bovis, notes, (62) 261, 264.

nigrificans n.sp., notes, (61) Iowa 611.

oedematoides—

and Bacillus sordellii, comparison, (62) 261; (69) 270.

and Bacillus sordellii, serologic agglutination, (66) 868.

immunity maternally transmitted, (62) 667.

n.sp., description, (62) 261.

parabotulinum—

antigenic substances of, (70) 830.

distribution, (63) 170.

type A, notes, (62) 597.

pasteurianum—

nitrogen fixation and sugar utilization by, (67) 118.

notes, (64) 524.

sp., notes, (70) 680.

spp. in sheep spleens, (63) Colo. 571.

tetani, immunization of horses against, (64) 561.

tetani spores, thermal death point, (65) 568.

welchii—

group, multiple toxins produced by, (70) 383.

infection in fowl, (64) 563.

relation to Bacillus ovitoxicus, (70) 826.

spores, thermal death point, (65) 569.

strain causing fatal dysentery in lambs, (69) 859.

types in lamb dysentery, (68) 673.

Cloth, properties, effect of weave, (70) 428.

Clothes moth—

case-bearing, susceptibility of animal and vegetable fibers to, (69) 79.

Clothes moth—Continued.

tests of moth-proofing material, (61) 853.

unusual invasion, (69) 391.

webbing—

biology and control, (69) N.Y.Cornell 72.

cage for, (68) 351.

control, (66) N.Y.Cornell 647.

duration of Eulan protection against, (69) 391, 833; (70) 656.

effect of yeast, (68) 636.

Eulan Neu tests for, (69) 391, 833.

length of adult life, (67) 54.

naphthalene for, (69) 237.

notes, (70) N.Y.Cornell 802.

predator of tick larvae, (67) 284.

scientific name, (70) 213.

susceptibility of animal and vegetable fibers to, (69) 79.

Clothes moths—

and carpet beetles, (69) N.J. 242.

and house moths, life history, habits, and control, (69) 391.

control with propylene dichloride mixture, (70) Mich. 62.

fish meal as food for, (69) 692.

immature stages, fumigation, (67) 566.

in homes, important breeding place, (66) 851.

paradichlorobenzene as fumigant, (65) 457.

repellents against, (62) 156.

Clothing—

and textiles, (63) U.S.D.A. 898.

and textiles, Government publications, selected list, (62) U.S.D.A. 785.

and textiles, studies at Bureau of Home Economics, (70) U.S.D.A. 573.

and textiles, textbook, (67) 349.

class, ninth-grade, instruction in, (62) 488; (67) 768.

construction, (69) Ill. 765.

ensembles for little boys and girls, (64) U.S.D.A. 97.

for farm families, cost, (64) Nebr. 190.

for women, treatise, (63) 298.

of farm women, relation to economic status, (64) Okla. 298.

relation to health, bibliography, (62) U.S.D.A. 695.

textbook, (69) 303.

Clove bush, Botrytis disease of, (63) 49.

Clove tree, pests of, (65) 547.

Clover—

acidity studies, (64) Del. 622.

alfalfa, and timothy mixture on meadows, tests, (69) Ohio 38.

alsike and timothy mixtures, analyzing and labeling, (62) 136.

alsike, in combinations for hay, (62) West.Wash. 518.

alsike, production tests, (68) Alaska Col. 182.

Clover—Continued.

- and timothy, comparison, (70) Ind. 321.
 and timothy hay, quality, effect of soil acidity, (64) Pa. 120.
 anthracnose, fungi causing, (65) 539.
 anthracnose, notes, (66) 147, 149.
 anthracnose resistant strains, (65) Ind. 144.
 assimilation of fixed nitrogen by, (70) 322.
 bacterial leaf spot, notes, (66) 149.
 blossom odor, attraction for bees, (66) 856.
 bur, digestibility, effect of exposure to sunlight and rain, (65) Calif. 658.

 germination, effect of chemicals, (69) 782; (70) 331.
 glyceride fatty acids from, (69) 487.
 nationality trials, (68) 319.
 tiller and root development, factors affecting, (68) 319.
- Cocoa—
 disease, notes, (63) 245.
 keeping in suspension in chocolate milk, (68) Okla. 662.
 moth pests in, (64) 55.
 shells as bedding for cattle, (70) Vt. 231.
 stabilizing in chocolate milk, (67) N.J. 594.
- Coconut—
 bitten leaf, notes, (64) 448.
 black beetle, habits and control, (67) 155.
 bud rot, control, (64) 448.
 caterpillar, parasite of, life history and habits, (62) 455, 457.
 Committee entomological report, (68) 781.
 disease, control, (64) 448.
 diseases, notes, (64) 230; (67) 400.
 fiber, attributes and preparation, (70) 468.
 leaf miner—
 effect on production of coconut trees, (67) 154.
 fungus disease of, (67) 435; (69) 832.
 in Philippines, (64) 461; (67) 435.
 studies, (68) 782.
 leaf roller parasite, hosts of, (68) 507.
 meal as protein supplements, (67) Ohio 65.
 meal, feeding value, (62) Ohio 696; (63) Guam 165; (66) Guam 458.
 meal, fertilizing value, (64) Guam 836.
 meal in dairy ration, effect, (66) Ohio 67.
 milk, composition, preparation, and value for infants, (70) 130.
 moth in Fiji, parasitic control, (64) 460.
 oil, Philippine, duty on, effects on American agriculture, (68) 691.
 oil soap, germicidal efficiency, (64) 473.
 oil utilization by rats and dogs, (62) 291.
 palm diseases, notes, (65) 344.
 palm diseases, role of lightning in, (67) 400.
 palm, dwarf, in Malaya, (62) 142.
 palm wilt diseases in Trinidad, (63) 50; (67) 47.
 palms, culture, botany, and use, (62) 231.
 palms, culture experiments, (63) V.I. 136.
 palms, damage from dynastid beetles, (65) 58.
 palms, fertilizer experiments, P.R., (62) 738; (65) 741; (67) 532; (69) 798.
 palms, moths affecting, (64) 546.
 palms, production, variation in, (66) P.R. 536.
 palms, salt requirements of seedlings, (67) 40.
 scale control with Trinidad coccinellids, (61) 659.
 scale, notes, (63) Guam 152.
 scale, studies, (68) 782.
 seedlings, relation to shape of nuts, (70) 630.
 spike moth, importance and control, (67) 433.
 spike moth, studies, (68) 781.
 water, vitamin B complex in, (68) 279.

Coconuts—

 - strains resistant to insecticides, (70) 500.
 - studies, (61) Oreg. 52, Oreg. 53; (62) Mo. 54, 248, 852; (63) Ohio 50, N.H. 251, N.Mex. 454; (64) Kans. 852; (66) Pa. 246, S.C. 653; (68) S.C. 780; (69) Kans. 232.

Codling moth—Continued.

- toxicological studies, technic, (69) 240.
- treatments, thermal constant for timing, effect of electromagnetic waves, (65) N.J. 848.
- tropisms and sense organs, (61) 660.
- winter mortality, (66) Mo. 346.

Cod-liver meal—

- antirachitic value, (61) 63.
- bone-building value for poultry, (66) Pa. 261.
- feeding value for poultry, (65) N.H. 64.
- v. cod-liver oil, feeding value, (63) N.H. 267.
- vitamin value, (67) 158.

Cod-liver oil—

- acid content as index to value, (67) Wis. 723.
- and good hay, similar factors in, (65) Mich. 765.
- and irradiated ergosterol, differences in action, (63) 297.
- and malt extract emulsions, composition, (61) 387.
- and milk, supplements for substandard workers, (69) 150.
- and ultra-violet rays, effect on growing organism, (69) 703.
- and viosterol, comparison, (63) 794; (66) 297.
- antimony trichloride and ultra-violet absorption tests, (67) 102.
- antimony trichloride reaction for vitamin A in, (62) 112; (64) 113.
- antirachitic action in parathyroidectomized and thymectomized rats, (64) 591.
- as source of vitamin D for chicks, (69) Wash.Col. 845.
- commercial samples, variation in color test value, (64) 709.
- concentrate, clinical effectiveness, (70) 728.
- concentrate, effect of feeding to cows, (68) Ohio 809.
- digestion rate, (62) N.Y.Cornell 788.
- dilution curve with antimony trichloride reagent, (63) 708.
- effect on calcium metabolism of women, (65) Mich. 794.
- effect on calves, (65) N.J. 865; (66) 367.
- effect on cows (63) N.J. 367.
- effect on egg production, (62) Mo. 67; (63) Ind. 562; (64) 764.
- effect on egg production and fertility, (62) Ark. 868.
- effect on egg production, hatchability, and fertility, (66) Ark. 566.
- effect on egg production in winter, (67) Minn. 730.
- effect on eggs, (68) Ark. 653.
- effect on fat percentage of milk, (68) 809.
- effect on growth in chicks, (61) 668.
- effect on phosphorus and calcium metabolism of infants, (61) 496.

Cod-liver oil—Continued.

- effect on poultry, (61) N.C. 764, Idaho 861; (62) S.C. 661; (64) Ark. 465, N.Y.Cornell 666, S.C. 668; (68) Ky. 363, Ill. 654, S.C. 796; (69) Ky. 704; (70) 372.
- effect on rickets, (66) Nebr. 362.
- effect on sheep on calcium deficient ration, (69) 564.
- effect on wool yield of Angora rabbits, (62) 462.
- effects as influenced by oyster shell feeding to hens, (66) 262.
- emulsions, vitamin A in, (69) 759.
- feeding, (66) Ill. 260.
- fluorescence, measurement, (61) 292.
- for growing pigs, (61) 666; (63) La. 364, 764; (65) 567; (67) La. 295.
- for leg weakness in chicks and poult, (63) N.Dak. 875.
- for reproduction and lactation, (64) 591.
- from various sources, value, (64) 694.
- high acid, toxic properties, (65) 258.
- in animal feeding, bibliography, (62) 693.
- in cow's ration, effect on milk composition, (61) 264.
- in diet, effect during lactation, (63) 490.
- in stored feed, antirachitic value, (64) 765.
- inhibitor of antimony trichloride test for vitamin A in, (69) 773.
- irradiated, effect on production and fertility of eggs, (64) 468.
- of varying acidity, response of growing chicks to, (66) Pa. 262.
- spectrographic data, (65) 804.
- stearin, vitamin D in, (61) Ind. 365.
- test for reduction of lost time in industry, (69) 149.
- toxic effects, (65) 95.
- treatment with charcoal, effect, (69) Ind. 150.
- unsaponifiable matter, extraction, (65) 501.
- utilization by rats and dogs, (62) 291.
- v. cod-liver meal, feeding value, (63) N.H. 267.
- v. irradiated milk as source of vitamin D, (62) 692.
- v. sunlight, effect on growth of chicks, (68) N.C. 511.
- v. ultra-violet irradiation for rickets prevention, (61) 294.
- vitamin A concentration, relation to age of cod, (70) 876.
- vitamin A determination, (67) 200; (68) 434.
- vitamin A in, (61) 894; (68) 277, 659; (69) 630.
- vitamin A in, permanence, (63) 9.
- vitamin A in, variations in color test, (63) 9.
- vitamin D concentrate from, use, (69) 154.

- organizations in United States, papers on, (68) 849.
- organizations in Virginia, economic study, (68) Va. 268.
- productions, marketing, pooling, and financing, (65) 87.
- purchasing and marketing organizations in New York State, (68) N.Y.Cornell 847.
- purchasing associations, farmers' local, business practices, (62) Pa. 86.
- purchasing associations, farmers', membership problems, (66) Pa. 86.
- societies, producers' and consumers', relations in England and Wales, (69) 737.

Cooperia—

- curticei in sheep of New South Wales, (69) 550.
 - memasteri n.sp., description, (68) 251.
 - oncophora in calves, (67) 317.
 - spp., notes, (69) 590.
- Cooperioides kenyensis n.g. and n.sp., description, (69) 590.
- Copidosoma nanellae, notes, (63) 554.
- Copper—
- absorption by plants, (67) Calif. 500.
 - administration with oyster diet, (67) 91.
 - alloys, corrosion rate in vinegar, (65) Calif. 709.
 - analysis, modifications in, (65) 92.
 - and cadmium, quantitative separation, (66) 505.
 - and iron, effect on growth and reproduction in rats, (70) 130.
 - and iron supplements in exclusive milk diet for calves, (69) Ohio 99.
 - and iron treatment of anemia in children, (65) 690; (67) 485.
 - and mercury, specific action as plant poisons, (67) 540.
 - as iron supplement for hemoglobin regeneration, (61) Wis. 193, 590; (62) 689; (63) 597; (65) Wis. 491; (67) 348; (68) 129, 859.
 - as iron supplement for hemoglobin regeneration, specificity, (66) 688.
 - atmospheric corrosion, (67) 464.
 - Carb, fungicidal value, (64) Iowa 844.
 - carbonate as Natal fruit fly poison, (67) 427.
 - carbonate for greenhouse crops, (66) Colo. 639.
 - carbonate for smut control, (65) Mich. 745; (67) 404.
 - carbonate, fungicidal value, (64) Ohio 644, Iowa 844; (65) Mich. 149.
 - carbonate grades, value, (64) Kans. 845.
 - carbonate, toxicity to Mediterranean fruit fly, (66) 652.
 - colorimetric determination, (62) 807.
 - compounds for sweetpotato black rot, (65) N.C. 147.
 - compounds for tomato seed treatment, (64) N.Y.State 847.
 - deficiency, effect on fruit trees, (68) 193.
 - deficiency, relation to exanthema in pears, (70) 336.
 - dusts, time of application to potato plants, (61) Ohio 444.
- effect on—
- anemia of rats, (66) 295.
 - anemia of rice disease, (62) 596.
 - burned soils, (63) Fla. 613.
 - growth of molds and yeasts, (66) Ky. 119.
 - hemoglobin regeneration in dogs, (63) 897.
 - iron assimilation by rat tissues, (69) 616.
 - iron metabolism, (68) 128, 702, 703; (70) 274.

Copper—Continued.

- effect on—continued.
oats, (64) 723.
plants and animals, (62) Ky. 203.
vitamin A deficiency, (66) W.Va. 560.
yeast growth, (68) 174.
equipment, effect on milk and dairy products, (63) Wis. 71.
erythropoietic action, role of iron in, (68) 413.
essential for plant growth, (65) 516.
feeding to anemic pigs, new methods, (65) Wis. 459.
feeding to cows, effect on milk, (62) Ill. 369.
fluorine compound spray, notes, (70) Tenn. 192.
fluorine, inefficiency for control of cherry yellow leaf, (68) Tenn. 204.
for anemia treatment, quantitative variations in, (66) 597.
functioning in animal body, (63) Wis. 91.
fungicides, classification, (66) 343.
fungicides on celery seedlings, value, (65) N.Y.Cornell 137.
fungicides, studies, (69) 664.
fungicides, supplements for, (62) Mass. 47.
fungicides, value against cucurbit downy mildew, (65) Fla. 439.
in animal nutrition, function, (67) 340.
in beef and hog tissue, (64) 392.
in Bordeaux-lead arsenate mixtures, determination, (66) 411; (68) 442.
in daily diet, (70) 131.
in dairy products, (67) 653; (69) 463; (70) 445, 670.
in dairy products, solubility, (62) 556; (65) Wis. 469; (67) 67.
in egg yolk, (70) Ky. 219, 820.
in eggs, effect of hens' diet, (62) 789.
in feeding stuffs, (62) 457.
in fish, (69) 752.
in food and biological material, bibliography, (69) 148.
in foods, (65) 690.
in hemoglobin formation, specificity, (65) 92.
in hog ration, effect, (63) Wis. 62.
in liver and liver extracts, (69) 463; (70) 717.
in milk and other dairy products, (67) 653; (69) 463; (70) 445, 670.
in milk, effect of cow's diet, (62) 463, 892.
in normal nutrition, (62) 585.
in organic substances, determination, (61) 612; (63) 12; (66) 505; (69) 148; (70) 12.
in pasteurized milk, (62) Calif. 769.
in plant and animal foods, (62) 190.
in plant leaves and shoots, (64) 581.
in plants, relation to additions to soil, (67) 775.
in poultry ration, value, (63) Wis. 64.

Copper—Continued.

- in powdered whole milk, nutritional value, (61) 491, 565.
in presence of iron, determination, (63) 205.
in serving portions of common foods, (66) 292.
in the organism, physiological aspects, (62) 690.
in urine of normal individuals, (70) 130.
metabolism of rats, (62) 689, 691.
mixtures for pine needle drop control, (70) 202.
nitrate as herbicide for mustard, strength, (61) N.H. 127.
paste, colloidal, for control of fruit spot, (62) Del. 746.
poisoning in sheep, (68) 816.
powders for bunt prevention, (61) 534.
red oxide of, as seed treatment for damping-off, (68) N.Y.State 627.
reduction values of mannose, (69) 174.
relation to growth, (70) N.Y.Cornell 752.
relation to reticulocyte response in anemic rats, (70) 872.
relation to yeast effect on lactation, (61) 92.
requirements of green plants, (68) 174.
residues on cranberry vines, effect, (69) Mass. 663.
role in blood regeneration, (64) 581; (67) 87; (69) 406; (70) 872.
role in plant growth in soils of Everglades, (65) Fla. 417.
salts as precipitants for blood proteins, (66) 808.
salts, effect on hemoglobin in chicks, (63) 864.
significance in nutrition, (68) Ky. 413.
spray, colloidal home-made, (69) Me. 373.
spray, new, (70) N.J. 489.
sprays v. copper dusts for grape diseases, (67) 701.
stimulating action on erythropoiesis, (70) 872.
storage in body, effect on hemoglobin building, (62) 391.
sulfate—
and tobacco infusion, anthelmintic value, (62) 877.
application to muck soils, (68) Mich. 734.
as herbicide for mustard, strength, (61) N.H. 127.
effect on color and thickness of onion scales, (68) 45.
effect on growth of *Piricularia oryzae*, (69) 66.
effect on potato leafhopper, (63) 754.
efficiency against stomach worms, (69) 717.
feeding to pigs, value, (64) Iowa 866.

Copper—Continued.

- sulfate—continued.
 for exanthema control, (66) 343.
 medium for isolation of *Brucella abortus* from milk, (65) 265.
 monohydrate dust for tomato seed treatment, (68) N.Y.State 209.
 preparation and effectiveness as fungicide, (62) Mass. 440.
 treated wrappers for Botrytis rot of pears, (66) U.S.D.A. 47.
 use against termites in timber, (65) 246.
 use in Kjeldahl digestion, (63) 313.
 supplementary value for milk diet, (61) 490.
 welding technic, (66) 281.
- Copper-iron-salt mixture for cattle and swine, (69) Fla. 248.
- Copra, Philippine, duty on, effects on American agriculture, (68) 691.
- Coprinus disseminatus*, studies, (69) 372.
- Copris minutus*, notes, (65) U.S.D.A. 181.
- Coppophagy—
 as source of vitamin B (B_1), (67) 632; (69) 469.
 effect on assay of vitamins, (68) 866.
- Coptosoma cribrarium*, egg parasite of, (63) 359.
- Coptotermes curvignathus*, notes, (70) 202.
- Coralberry root rot, notes, (69) U.S.D.A. and Tex. 528.
- Corcyra cephalonica* in stored cacao, (68) 498.
- Cordia* spp., paper on, (62) 647.
- Coreidae of Kansas, (62) 245.
- Corethra plumicornis*, effect of Dalmatian insect powder, (67) 285.
- Corium of hoof of horses and claws of bovines, comparison, (65) 567.
- Corizoneura longirostris*, bionomics and anatomy, (65) 656.
- Corns, importation into Canada, condition, (65) 542.

Corn—

- acre values, (69) Minn. 201.
 acreage, survey, Iowa, (64) 826; (65) 125.
 adaptation to upland and bottom land soils, (67) 127.
 aluminum in, detection, (61) Mich. 712.
 aluminum toxic to, minimum concentrations, (68) 741.
 amino acid deficiencies, for growth in rats, (67) 627.
 and beans, interplanting, Miss., (61) 433; (63) 28.
 and corn products, use in home, (66) U.S.D.A. 888.
 and cotton, rotation experiments, (65) Ala. 428.
 and grain sorghums, comparison, Tex., (66) 27; (67) 668; (70) 173.
 and hay yields, (65) Ohio 481.
 and hog ratio in the State, (69) Okla. 737.

Corn—Continued.

- and hog surplus of Corn Belt, (68) 843.
 and hybrids, chlorophyll as index of productive capacity, (70) 766.
 and kafir in rotations, comparisons, (62) Mo. 31.
 and kafir stubble, decomposition rates, (61) 620.
 and legumes, interplanting, (63) Miss. 28; (64) Ark. 431; (66) S.C. 627, Miss. 730; (68) Miss. 34, Miss. 319, Ark. 608.
 and legumes, interplanting, losses from, (66) Ark. 526.
 and *Oenothera*, chromosome rings in, differences, (68) 602.
 and peas, hogging down, N.Dak., (61) 763; (63) 860.
 and rape, hogging down, (61) U.S.D.A. 761.
 and sorghum, comparison, (63) Kans. 433; Tex. 435.
 and sorghum, drought resistance, comparison, (65) 223.
 and soybean mixture as sole roughage for milk production, (68) S.C. 806.
 and soybean rations, effect of yeast and casein supplements, (67) 295.
 and soybean rations for hogs, improvement, (69) Ind. 89.
 and soybeans—
 deficiencies as complete ration, (61) Ind. 366.
 for silage, (69) N.Y.Cornell 202.
 hogging down, (62) Miss. 63.
 interplanting, (61) Miss. 433, Miss. 435; (63) La. 330, Ohio 525; (67) La. 233; (68) 41, N.C. 468, Ohio 610; (69) Ohio 39; (70) N.C. 762.
 production with mechanical power, (67) La. 322.
 yields, (63) La. 130.
 and tankage, feeding value for pigs, (68) 228.
 and teosinte, fertile tetraploid hybrid, (64) 428.
 and teosinte hybrids, studies, (64) 428; (68) 462; (70) U.S.D.A. 464.
 and *Tripsacum* hybrids, genetic and cytological studies, (68) 747.
 anomaly in, inheritance, (69) 344.
 anticarcinogenic factor in, development and destruction, (69) Wis. 890.
 antirachitic properties, (69) 755.
 argentic chlorophyll pattern in, studies (70) 169.
 as green manure, (69) Ohio 17.
 as silage crop, (70) Ill. 220.
 as sugar plant in Russia, (61) 828.
 ash content, factors affecting, (61) Utah 409.
 asynapsis in, (63) N.Y.Cornell 624.
 bacterial disease, (67) 544.
 bacterial stalk rot at Pusa, (68) 492.

Corn—Continued.

 data and 1930 outlook, (62) U.S.D.A. 887.
 date-of-planting, relation to Thysanoptera infestation, (64) 544.
 date-of-planting tests, (69) Okla. 356.
 differences in seedling stands, determination, (61) 437.
 diseases—
 and insects affecting, (65) Mo. 330.
 important in Tennessee, control, (61) Tenn. 147.
 in Egypt, (61) 536; (64) 449.
 in Uganda, (65) 646.
 monograph, (69) 374.
 seed-borne, control, (66) Ga. 744.
 seed-borne, seed treatment for, Miss., (61) 446; (63) 48; (68) 34.
 studies, (63) Ga. 143, Fla. 649; (67) U.S.D.A. 44.

Cotton—Continued.

- disks, dry, for milk strainers, (65) Mich. 664.
 distribution by grades, staple length, and tenderability on future contracts, (66) Ark. 584.
 dusting and spraying experiments, (61) 658.
 dusting with calcium arsenate for boll weevil control, (61) Ala. 453.
 earliness in, factors affecting, (66) 327.
 early history, (61) 635.
 early maturity in, (62) 520.
 early planting, value, (66) S.C. 641.
 economical production, factors in, (62) N.C. 732.
 effect of—
 activated sludge on, (64) 724.
 ammonia and nitrate nitrogen for, (66) Ga. 732.
 concentrated fertilizers, (61) N.C. 622.
 different doses of nitrogen, (69) 792.
 fertilizers, (69) 792.
 green manure, (62) Calif. 727.
 irradiation, (67) Tex. 668.
 irregular fertilizer distribution, (67) 519.
 lime, (62) S.C. 508.
 phosphorus, (66) 20.
 preceding crop, (63) La. 130; (65) Miss. 31.
 radiation, (70) Tex. 173.
 sulfur, (63) Tex. 121.
 winter legumes, (68) Ark. 608.
 X-ray treatment, (63) 323.
 Egyptian, effects of topping, (69) 204.
 fabrics—
 artificial soiling for laundering studies, (62) 398.
 characteristics, relation to price, (68) Ohio 135.
 durability and color, effect of Texas sunlight, Tex., (63) 497; (67) 781.
 durability, effect of laundering, Mo., (63) 796; (67) 493.
 effect of laundering, (61) 897.
 effect of Texas sunlight, (70) Tex. 286.
 protective value, (61) Kans. 196.
 strength and color, factors affecting, (69) Tex. 316.
 white and colored, durability, Mo., (66) 394; (70) 286.
 farm prices, relation to quality, (65) U.S.D.A. 684.
 farmers, credit problems, (61) Ga. 685; (64) Okla. 784; (65) Okla. 278.
 farmers, social life among, (69) Okla. 614.
 farms in High Plains area, organization and management, Tex., (67) 757; (70) 265.
 farms, mechanization, (65) 579.

 - feeding standards, (70) 519.
 - gestation table, (70) Ohio 669.
 - iodine feeding, (63) Ohio 67.
 - milk yield, (61) 671.

Cows—Continued.

- dairy—continued.
 mineral metabolism, factors affecting, (64) Kans. 872.
 minimum protein for, (69) N.Y. Cornell 99.
 nutritive requirements, (69) 406.
 pasture for, (62) Miss. 69.
 seasonal effect on yield, (69) 849.
 shelter v. open range for, (70) Guam 814.
 utilization of nutrients, effect of nutritional plane, Vt., (62) 370; (65) 561.
 weight variation, factors affecting, (61) U.S.D.A. 671.
 digestion experiments, recovery of excreta for, (68) N.H. 75.
 diseases and sanitary regulatory measures, (69) 426.
 diseases of the reproductive organs, (61) Mich. 468.
 drying off, comparison of methods, (69) 850.
 effect of—
 arsenical dipping on milk yield, (69) 258.
 calcium-deficient roughages, (70) Fla. 82.
 calving interval, (63) 867.
 fly sprays, (69) Calif. 97.
 irradiation of udders and feed, (66) Wash.Col. 768.
 of plane of feeding on milk production, (61) U.S.D.A. 670.
 fat, carcass studies, (67) Mo. 445.
 feces, coliform organisms in, (70) 86.
 fed irradiated yeast, antirachitic value of milk from, (68) 132.
 feed energy, transformation into milk energy, (69) 413.
 feeding, (63) U.S.D.A. 268; (67) 731.
 feeding experiments, (64) Nev. 169, Mont. 259; (68) Miss. 370.
 feeding methods, (61) Nev. 561.
 feeding on alfalfa hay alone, (69) U.S.D.A. 848.
 feeding principles, (64) W.Va. 170.
 fermented feed for, value, (61) Wis. 169.
 fly sprays for, (67) 576.
 Galloway-Holstein, feeding and breeding, (69) Alaska 88.
 grading up by use of purebred sires, (64) 66.
 grain or no grain for, (70) Wyo. 822.
 grinding grains for, value, (69) Ind. 849.
 heavier v. lighter, income from, (63) U.S.D.A. 269.
 heavily milking, calcium and phosphorus metabolism, (65) 260.
 hemoglobin and phosphorus in, (66) 464.
 hemoglobin in blood, (63) Ohio 67.
 Holstein-Friesian, gestation period, (67) 123; (68) 86.

Cows—Continued.

- home grown feeds for, (66) Miss. 768.
 iodine feeding, value, (68) 229.
 Jersey, length of gestations in, (64) 170.
 lactating and nonlactating, constituents of blood and serum, (70) 241.
 lactating and nonlactating, plasma lipids in, (67) 304.
 lactating, dietary fat and phosphorus in blood, (66) 864.
 lactating, mineral metabolism, (68) 227.
 lactating, on rations of varying fat content, blood sugar, (69) 849.
 lactating, phosphorus distribution in blood, (66) N.Y.Cornell 662.
 lactating, ration for, (67) Tex. 731.
 length of calving interval and milk yield, (66) 366.
 length of gestation and service record, (70) Ohio 823.
 live weight, variations in, (65) Iowa 169.
 loose pens for, effect on labor and cost for bedding, (69) Mass. 737.
 mammary system, relation to production, (68) Wash.Col. 806.
 mated to proven sires, productive ability, (62) Mo. 70.
 metabolism, (63) N.H. 268.
 milk production, *see* Milk production.
 milking at three eight-hour intervals, effect, (65) 66.
 mineral metabolism, factors affecting, (61) Kans. 166.
 native v. grade and purebred, (62) P.R. 768.
 negative to agglutination test for abortion, breeding efficiency, (62) 263.
 nutritive requirements, (68) 227.
 on pasture, high-protein v. low-protein rations for, (70) Mich. 82.
 on pasture, supplements for, (61) Ind. 368; (66) S.C. 663.
 pregnant and nonpregnant, acetone in blood, (65) 567.
 pregnant, effect of damaged sweetclover, (63) N.Dak. 871.
 pregnant, effect of milking before calving, (62) Mo. 70.
 pregnant, ovarian hormone in urine, (63) 26.
 prices, (70) Me. 119.
 producing ability, relation to conformation and anatomy, (62) S.C. 664.
 protein requirements, N.Y.Cornell, (62) 766; (66) 662.
 records, *see* Dairy herds.
 recovery of tubal ova from, (66) 324.
 reproductive organs, diseases, (68) 92.
 roots as feed for, (66) W.Va. 568.
 scrub, grading up, (68) Okla. 662.
 shelters for, N.Dak., (63) 866; (67) 731.
 Shorthorn, milk from typical herd, (70) 520.
 sprayed with fly repellent, milk production, (66) Ala. 863.

Cows—Continued.

- spraying with fly repellent, (65) N.J. 864.
 sterility in, prophylaxis and therapy, (66) 467.
 suffering from fluorosis, plasma phosphatase in, (69) 414.
 transmitting ability, effect of forced production records, (70) Mo. 230.
 udders, *see* Udder.
 unground v. ground grain for, (70) Tex. 231.
 uterus, conceptions in right and left horn, (66) Idaho 219.
 utilization of cod-liver oil vitamins, (61) Wis. 168.
 Von Lochow herd, inheritance of milk and fat production, (67) 119.
 water consumption, (68) Idaho 369.
 watering, drinking cups v. outside tank, (68) Iowa 239.
 weight, relation to length of stall platform, (64) Iowa 885.
 wintering, (68) Utah 512.

Coyotes—

- autumn food habits, (70) 60.
 control, papers on, (64) 154.
 ranging and control, (70) U.S.D.A. 498.
 trapping, (63) U.S.D.A. 650.

Coyotillo, feeding tests with, (63) Tex. 477.

Crab apple seedlings—

- description, (64) Can. 538.
 French, variability, (62) N.Y.State 431.
 notes, (67) S.Dak. 36.

Crab apples—

- American species and varieties, (69) N.Y.State 367.
 American wild, hybridization, (61) 430.
 breeding, (66) Can. 827.
 culture experiments, (61) N.Dak. 735; (64) S.Dak. 636.
 culture, origin and varieties, (61) Ohio 527.
 Flame, new variety, (70) 777.
 Japanese flowering, and hybrids, (70) N.Y.State 333.
 jellying studies, (63) N.Dak. 891.
 large-fruited type, origin, (61) 427.
 of Japan, (61) 230.
 seedling, description, (70) S.Dak. 777.
 varieties, (61) N.Y.State 340.

Crab meal, feeding value for pigs, (68) N.C. 511.

Crabgrass control by shading, (69) Ohio 38.

Crabs, vitamin A in, (69) 150.

Cracca virginiana—

- insecticidal properties, (65) 547, 846.
 roots, rotenone and related compounds in, (69) 551.
 rotenone in, (70) U.S.D.A. 501.

Crackers—

- autoxidation of shortenings in and keeping quality, (69) Minn. 167.
 keeping quality, (70) 8.

Crambinae, Japanese, paper on, (61) 55.

Crambus—

- hortuellus, *see* Cranberry girdler.
 spp., control, (67) 435.
 teterrellus in turf, (70) 506.
 teterrellus, studies, (63) U.S.D.A. 54.

Cranberries—

- and cranberry products, utilization studies, (67) Mass. 473.
 bog irrigation, pollination, and varieties, (69) Mass. 652.
 canned and raw, vitamin C in, (64) 590.
 chemical study, (64) Mass. 442.
 color increase after removal from vines, (64) N.J. 442.
 composition, (69) Mass. 652.
 culture, (61) Wash.Col. 141.
 culture in Netherlands, origin and development, (61) 235.
 effect on urinary acidity and blood alkali reserve, (70) 866.
 fertilizer experiments, N.J., (63) 340; (67) 524.
 food value, (70) 867.
 growing in New Jersey, (65) N.J. 342.
 harvested, ripening changes, (63) N.J. 340.
 injury, relation to oxygen in flooding water, (69) Mass. 663.
 insects affecting, (61) N.J. 751, Mass. 849; (67) Mass. 428; (69) Mass. 687.
 mineral constituents, (61) 491.
 nutrient requirements and histology, (67) 40; (68) 481.
 nutritive value, (69) 142.
 photosynthetic studies, (67) Mass. 385.
 raw and cooked mountain, vitamin C in, (68) 861.
 spraying experiments, (66) Wash.Col. 757.
 spraying experiments and storage, (69) Mass. 663.
 stomatal apparatus, (68) 195.
 storage rots, (66) 751.
 studies (61) N.J. 739, Mass. 832; (63) Wash.Col. 236, Mass. 532; (65) Mass. 339, N.J. 834; (69) Mass. 747.
 thickness of cuticle in, (68) 50.
 variety tests, (67) Mass. 385.
 vitamin C in, (69) 890.
 vitamins in, effect of manufacturing and preserving processes, (70) Mass. 278.

Cranberry—

- black bug, life history, (61) Mass. 850.
 blossom worm, studies, (62) 855.
 bogs, damage by *Sclerotinia oxycocci*, (68) Wash.Col. 769.
 bogs, June flooding for, (69) Mass. 687.
 bogs, lead arsenate studies on, (61) N.J. 451.
 bogs, leafhoppers in, life history notes, (62) 853.
 bogs under ice, oxygen deficiency in water of, (68) 621.
 bogs, water on, (70) N.J. 482.

- Cranberry—Continued.
 diseases, studies, (66) U.S.D.A. 548.
 false blossom—
 and its insect vector, (65) 357.
 bogs, regeneration, (69) Mass. 663.
 control, N.J., (69) 377; (70) 495.
 effect on annual crop production,
 (70) 789.
 inoculation experiments, (69) 378.
 relation to blunt-nosed leafhopper,
 (62) N.J. 756.
 resistant strains, development,
 (69) Mass. 663.
 spread, (62) 645, 854; (65) U.S.
 D.A. 49.
 studies, (61) Mass. 846.
 varietal resistance, (70) 495.
 fireworm, control, Wash.Col., (66) 757;
 (68) 780.
 fireworm, spray tests, (63) Wash.Col.
 252.
 fruit worm, control, (66) Wash.Col. 757.
 fruit worm, effect of nicotine sulfate,
 (69) Mass. 687.
 fruit worm, notes, (67) Mass. 428.
 fruit worm, parasite of, (63) Wash.Col.
 253.
 girdder, notes, (67) Mass. 428.
 industry, value of birds to, (69) 543.
 insects, injurious and beneficial, (65)
 Mass. 356.
 insects, notes, (64) Wash.Col. 654;
 (65) N.J. 849; (66) Wash.Col. 756.
 land, effect of fertilizers, (64) N.J. 140.
 plant and associated mycorrhiza, (67)
 N.J. 524.
 plant, mycorrhiza on roots, (65) N.J.
 830.
 plants, respiration, relation to water
 injury, (69) 343.
 products, manufacture and preserva-
 tion, Mass., (61) 889; (63) 590;
 (65) 394.
 root grub, notes, Mass., (61) 850; (65)
 357; (69) 687.
 root worm as apple pest, (65) 58; (68)
 N.Y.State 637.
 root worm, notes, (64) N.Y.State 455.
 roots, injury from copper on sanded
 bogs, (61) N.J. 747.
 rot, control, N.J., (61) 747; (63) 349.
 spittle insect, control, (69) Mass. 687.
 storage rots, notes, (61) 244.
 vines, growth, effect of Bordeaux spray
 residue, (69) Mass. 663.
 white grub, control, (61) Mass. 850.
 Crane flies of northern Florida, ecological dis-
 tribution, (69) 558.
 Crane fly larvae, control, (69) 393.
 Crapemyrtle—
 breeding, (66) Tex. 34.
 pollination experiments, (67) Tex. 673.
 powdery mildew, new, affecting, (70)
 799.
 powdery mildew, perfect stage, (70)
 496.
 Crassisoma sp., notes, (66) P.R. 571.
- Cratacanthus dubius, notes, (63) 573.
 Crataegus oxyacantha, leaf spot, notes, (61)
 841.
 Crate and box construction, principles, (63)
 U.S.D.A. 585.
 Craterocephalus fluviatilis, notes, (64) 247.
 Crates, wooden, strength and rigidity, de-
 sign factors in, (68) U.S.D.A. 685.
 Crawfish—
 as second intermediate host of lung
 flake, (66) 571.
 meal, feeding value, (67) 589.
 studies, Miss., (62) 54, 152.
 Cream—
 acidity, effect on keeping quality of but-
 ter, (62) U.S.D.A. 258.
 acidity in, effect on fat losses in butter-
 milk, (67) Iowa 447.
 acidity, standardization for butter mak-
 ing in South Africa, (64) 554.
 action of viscogen on, (63) 869.
 anaerobic bacteria in, (64) 376.
 Babcock test for, limits of error, (63)
 669.
 bitterweed, removal of bitter flavor
 from, (62) Tenn. 769.
 bottled, milk serum separation from,
 (68) 374, Mich. 805.
 bottled, watery layer in, (70) 90.
 buying by grade, (68) Ill. 661.
 buying, factors involved in, (63) Mo.
 588.
 churning time, effect of pH value, (65)
 374.
 commercial sour, manufacturing process,
 (62) Pa. 258.
 cooling at buying station and keeping it
 cool in transit, (69) Ind. 853.
 cost of handling in country plants, (61)
 N.Y.Cornell 183.
 data of U. S. Tariff Commission, (62)
 482.
 deodorization for butter manufacture,
 (67) Mo. 448.
 deterioration, effect of air, (65) Ind.
 172, 666.
 digestion rate, (62) N.Y.Cornell 788.
 factory tests, (61) Idaho 808.
 farm-skimmed, enzymes in, Ind., (63)
 568; (65) 172.
 fast frozen, (67) 162.
 fat clumping, relation to feathering and
 heat stability, (67) 161.
 fat dispersion and casein stability, ef-
 fect of homogenization, Pa., (62) 373;
 (64) 171; (66) 268.
 fat globules, substances adsorbed on,
 relation to churning, (69) 853.
 feathering, factors affecting, (63) Ill.
 670.
 first-grade, production, (62) 166.
 foaming, (63) U.S.D.A. 269.
 for butter making, deodorization, (66)
 Mo. 369.
 for butter making, grading, (68) Wash.
 Col. 89.

Cream—Continued.

for butter making, marketing, Ind., (65) 171; (70) 87.
 frozen, metallic flavor in, (62) Vt. 259.
 frozen, sugar for improving keeping quality, (67) Wis. 731.
 frozen, use in ice cream, (63) Mass. 569; (64) Mass. 770; (68) 374.
 grading on four day delivery plan, (69) Ind. 138.
 grading plan, (66) Ill. 267.
 homogenization, (69) Pa. 851.
 homogenization, incorporation of air during, (68) 810.
 in shipment, effect of type of can, (68) W.Va. 806.
 in storage, effect of minerals and acidity, (67) Wis. 731.
 increase in nonlactic acidity in, control, (70) 89.
 increasing viscosity, temperature treatment, (68) N.Y.State 240.
 keeping quality, (62) Vt. 259.
 line formation, (63) W.Va. 71; (64) Pa. 171; (65) N.Y.State 373; (66) Pa. 268; (68) Pa. 518.
 manufacture, composition, and consumption, (68) 666.
 market, quality in Illinois, improvement, (70) Ill. 858.
 marketing, (70) Ill. 695.
 neutralized, detection in ice cream, (68) Okla. 662.
 neutralizing, for butter making, (67) N.Dak. 731.
 of high quality, production, (63) Kans. 475.
 pasteurized, methods of cooling, effect, (69) Calif. 97.
 plug, cause, (65) Wis. 468.
 potato-flavored, studies, (64) Ill. 874.
 producers' method of disposing of, (61) Ind. 380.
 production, comparative advantage of New England and Middle West, (65) 86.
 puffs, food poisoning from, (68) 282.
 quality and butter quality, correlation, Wash.Col., (64) 675; (66) 769.
 quality, judging, (65) 865.
 raw and pasteurized, holding, (70) S.Dak. 822.
 refrigeration experiments, (62) 872.
 refrigeration on the farm, effect on quality of butter, (68) Oreg. 241.
 separator, handling to avoid fat losses, (61) Okla.Panhandle 170.
 separator, operation and care, (64) Idaho 770.
 separators, design, construction, and testing, (70) 548.
 separators, effect of variations in speed on fat test, (69) Calif. 97.
 separators, efficiencies, new testing process, (67) 177.
 serum separation in, prevention, (67) Mo. 448.

Cream—Continued.

single and double homogenization, effect on coagulation, (67) 161.
 skimming efficiency, effect of separation temperature, (63) 770.
 sour, neutralizing agents for, (62) Ark. 872.
 sour, pimples in, cause, (67) N.J. 594.
 sour, studies, (66) Pa. 269.
 standardization tables, (66) U.S.D.A. 770.
 stations, efficiency in cream collection, (68) Idaho 404.
 sterilization for market, (64) 260.
 studies, (68) Mich. 370.

 sweetened, frozen, effect on swell in ice cream, (67) 309.
 tallowness in, biological factors, (69) Ill. 417.
 temperature, proper, for overcoming whipping trouble, (70) Ill. 669.
 testing, (70) U.S.D.A. 671.
 tests, variation in, causes, (61) Okla. Panhandle 67.
 unpasteurized, microscopic appearance, (61) N.Y.State 562.
 viscosity, factors affecting, (66) U.S. D.A. 170; (69) 852.
 water cooling, (66) Ark. 579.
 whipped, properties, factors affecting, (66) Mo. 368.
 whipped, taint in, prevention, (65) 68.
 whipping—
 ability, effect of milk salts, (67) Wis. 731.
 ability, seasonal variation, (69) Wis. 848.
 factors in, (63) N.Y.State 670.
 properties, (68) Ill. 661.
 properties, effect of freezing and thawing, (69) 706.
 Cream of tartar in baking powder, (64) 513.
 Creameries—
 cooperative, essentials in, (67) S.Dak. 181.
 cooperative, notes, (68) Okla. 686.
 cooperative, operating costs, (66) Vt. 681.
 cooperative, organization and operation, (68) Kans. 552.
 cooperative, use of steam in, (68) Vt. 391.
 cooperative work with, (65) Iowa 172.
 starter preparation for, (67) Oreg. 736.
 Creamery—
 buildings, cost, (65) Iowa 183.
 inspection, (64) N.J. 676.
 license division, report, Ind., (61) 265; (62) 665; (65) 67; (66) 570; (69) 104.
 operation, cooperative, in Vermont, (66) Vt. 783

- Creamery—Continued.
 operation, essentials for, (61) U.S.D.A. 67.
 organization and construction, (63) Iowa 584.
- Creatine—
 and creatinine, (67) 769.
 creatinine production during growth, relation to arginine in diet, (70) 870.
 of muscle in nutritional muscular dystrophy of rabbit, (68) 564.
 output, effect of arginine feeding, (62) 693.
- Creatinine—
 and creatine, (67) 769.
 excretion and creatinuria of women, (61) 191.
 excretion in rats, (70) Mo. 70.
 output, effect of arginine feeding, (62) 693.
 preparation, use of ammonium creatinine picrate in, (63) 309.
- Credit Company, International Agricultural Mortgage, scope and organization, (69) 604.
- Creeping Jennie—
 control, S.Dak., (68) 754; (70) 763.
 spread and control, Iowa, (67) 378; (69) 38.
- Cremastogaster—
 lineolata, notes, (69) 388.
 rogenhoferi, Coccidae associated with, (62) 452.
 sp., notes, (61) 847.
- Cremastus—
 carpocapsae n.sp., notes, (62) 860.
 cookii, notes, (67) 571.
 hymeniae in Hawaii, hosts of, (68) 507.
 hymeniae, notes, (61) 357.
 interruptor, notes, (64) 362.
 interruptor, primary larvae, parasitic on European pine shoot moth, (67) 290.
 minor, notes, (64) 751; (70) N.Y.State 507.
 minor, parasite of oriental fruit moth, (69) Mich. 561.
 rhyacioniae n.sp., notes, (62) 860.
- Crenosoma vulpis, mechanical removal from foxes, (69) 105.
- Creniades debilis, effect on cotton plant, (62) 655.
- Cresote—
 applied to gipsy moth egg clusters, brush for, (67) U.S.D.A. 53.
 treatment of Douglas fir, (62) 672.
- Crepis—
 chromosomes, number and morphology, (62) Calif. 723.
 dioscoridis, genetics, (67) Calif. 512.
 evolutionary processes in, (66) 218.
 genetic and taxonomic studies, (66) 623.
 genetic studies, Calif., (61) 326; (69) 48.
 hybrids, cytological studies, (66) 623.
 nicaeensis and Crepis setosa hybrids, and derivatives, (68) 746.
- Crewood oil for control of mites in poultry houses, (67) La. 313.
- Cricetulus griseus, oestrous cycle, (66) 818.
- Cricket—
 black field, notes, S.Dak., (61) 53; (63) 50.
 California tree, studies, (65) Calif. 53.
 field, control, (68) 216.
 Haitian coffee tree, notes, (67) 288.
 Mormon, life history, habits, and control, (62) U.S.D.A. 654.
 Mormon, notes, (62) 154; (69) Mont. 232; (70) U.S.D.A. 499.
 Mormon, outbreak and parasites, (61) Mont. 153.
 snowy tree—
 control, (61) Calif. 351.
 in California fruits, (67) 423.
 injurious to raspberries, (65) Calif. 52.
 life history, (62) Calif. 751.
- Cricket-locusts of China, (65) 547.
- Crickets—
 as cotton pest, (66) 249.
 control, (67) N.Dak. 705.
 in Utah, (66) Utah 648.
 on cotton in California, (61) U.S.D.A. 754.
 tree, egg parasite of, (64) 251.
- Crime problem, rural, (70) 712.
- Crioceris asparagi, *see* Asparagus beetle.
- Crioceris duodecimpunctata, *see* Asparagus beetle, spotted.

N.Y.State 148.
seed-borne, control, (63) Ga. 147.
downy mildew—
cause and source of infection, (68)
Mass. 206.
control, (63) 457, Mass. 542.
notes, (62) Fla. 344; (67) Mass.
399; (69) Mass. 663.
spraying and dusting experiments,
(66) Fla. 443.
studies, Mass., (61) 839; (65) 344.
extracts, antiscorbutic action, (69) 8.
fruit rot and angular leaf spot, relation,
(65) 45.
fruit rot, notes, (62) Fla. 344.
gall, notes, (63) 247.
insects, notes, (62) N.Y.State 449.
leaf spot and fruit rot, relation, (65)
45.
mildew, control, (62) Tex. 642; (69)
P.R. 810; (70) 195.
mosaic—
aphis transmission, (65) 237.
control, (62) N.Y.State 439.
menace to tobacco, (69) Wis. 810.
reaction of Chinese variety to, (67)
547.
resistance, breeding for, (67) 547.
resistance in Chinese cucumber,
(65) 237.
resistant strains, (65) N.Y.State
149.
studies, (62) Ky. 233.
tissue, intracellular bodies in, (61)
843.
transmission studies, (61) 549;
(63) Wis. 45; (65) 248.
transmission to spinach, (69) 671.
transmission to tobacco by green
peach aphid, (70) 654.
white and green, notes, (66) Ky.
146.
pickles, vitamin C in, (62) 398.
plants, covering with paper caps, effect,
(64) Can. 538.
powdery mildew, control, (68) 363.
powdery mildew control in greenhouses,
(66) 747; (67) Ohio 43.

Cucumber—Continued.

root knot, control, (67) 273.
seed, disinfection, (63) N.J. 342.
treatments, relative toxicity, (67) Ohio
43.
wilt resistant strains, (65) N.Y.State
149.

Cucumbers—

bitter, cause, (63) Mass. 533.
breeding, (65) 40; (66) Can. 828.
Chinese Long, immunity to white pickle
mosaic virus, (67) Iowa 399.
consumption, supplies, and prices, (70)
848.
cost of production, (67) N.J. 613.
culture experiments, (63) Utah 639;
(67) La. 244.
culture for pickling, (63) U.S.D.A. 138.
culture in electrically heated soil, (69)
Calif. 51.
culture with artificial light, (69) 124.
dusting experiments, (63) 457; (70) Ill.
648.
dying after excessive use of nitrate of
soda, (68) Colo. 626.
effect of excess nitrates, (66) Colo. 639.
effect of phosphorus, (68) Mont. 760.
fermentation studies, (68) Mich. 731.
fertilizer experiments, (62) Ohio 42, Ill.
337; (67) La. 130, La. 244; (68) Ill.
617.
Florida, grading, packing, and stowing,
(69) Fla. 50.
galerucid pest, biological study, (70)
651.
Geneva, characteristics, (63) N.Y.State
138.
Geneva, seedless strain, (66) N.Y.State
535.
greenhouse, genetics, (61) Mass. 833.
hothouse, chlorosis of, (67) 694.
insects affecting, (70) Conn.[New
Haven] 893.
intra-State competition in Florida, (66)
Fla. 881.
monograph, (68) 475.
new, for inheritance studies, (63) Mass.
533.
new inbred strains, (64) Ohio 634.
nitrogen requirements, (64) Ohio 816.
nodal sequence of flower type in, (70)
618.
paper mulch experiments, (61) Mich.
37, Ohio 440; (64) Ky. 138; (65)
Ohio 435; (66) Can. 828.
parthenocarpy in, (67) 675.
pickling, new strain, (65) Mich. 738.
prices, relation to quality, (62) 576.
quality, effect of fertilizers, (64) Ala.
137.
response to fertilizers, (67) 36.
seed decay and damping-off, control,
(65) N.J. 842.
shipments, (65) Fla. 481.
shipments from Florida and competing
areas, (65) Fla. 886.
spray schedule for, (61) 753.

Cucumbers—Continued.

spraying and dusting, (69) N.Y.Cornell
61.
studies, (63) Tex. 444.
varieties, (68) N.Y.State 617.
varieties and culture in Genesee County,
New York, (70) N.Y.Cornell 44.
varieties, sex expression, seasonal varia-
tion in, (67) 247.
variety tests, (62) U.S.D.A. 40; (63)
R.I. 638; (64) Ala. 337; (67) La.
130.
vitamin C in, (62) 398; (68) 861.
water requirement, effect of Bordeaux
mixture and oil emulsion, (70) Ohio
791.
Cucumis africanus, notes, (63) 171.
Cucumis myriocarpus, toxic properties, (63)
171.
Cucurbit—
diseases, control, (69) Ga. 668.
downy mildew, control, (61) Ga. 144;
(63) Ga. 143, Fla. 644; (65) Ga. 142,
Fla. 439; (67) Fla. 535.
galerucid pest, biological study, (70)
651.
insects, studies, (64) N.Y.State 455.
mildew, notes, (65) 345.
Cucurbitaceae—
cytological and phylogenetic studies,
(69) 638.
microsporogenesis in, (63) 816.
Cucurbits—
breeding, (66) 326; (67) Iowa 385;
(69) Iowa 48.
chromosome numbers in, (63) 724; (65)
120; (66) N.Y.State 725.
dimensional traits, genetic basis, (68)
748.
electrically induced hybrids, (63) 125.
fruit shape changes during development,
(68) 603.
fruit shape in, determination, factorial
balance in, (65) 624.
fruit shapes, developmental history,
(61) 429.
sex ratio and sex expression in, (66)
25.
species crosses in, (62) Iowa 43; (63)
24.
varieties, (62) N.Y.State 431.
Culex—
fatigans and associates, breeding habits,
(62) 454.
fatigans, transmission of yellow fever
virus by, (70) 811.
mosquitoes, effect of paris green diluted
with charcoal, (69) 393.
piptiens—
biological races, (65) 250.
biology and histophysiology, (69)
833.
irradiation of larvae and pupae,
effects, (68) 788.
larva and pupa, effect of chemicals
at various temperatures, (68)
788.
life history, (70) 66.

- Culex*—Continued.
 quinquefasciatus, transportation by air-plane, (67) 437.
 spp., transmission experiments by, (68) 639.
 spp., winter breeding and activity at New Orleans, (67) 55.
 whitmorei, notes, (62) 454.
- Culicidae, notes, (63) 355.
- Culicoides dovei n.sp., description, (68) 503.
- Cullum Geographical Medal, award, (63) 100.
- Cultipacker, use on spring grain, (63) Idaho 523.
- Cultivators—
 efficiency study, (61) N.C. 776.
 knife sled, modifications, (68) Okla. Panhandle 681.
- Culture—
 collection, American type, (64) 379.
 media—see also Nutrient solutions.
 and reagents, treatise, (62) 311.
 aseptic distribution, device for, (65) Mich. 623.
 change of reaction in, (61) 627.
 effect of renewal of nutrient solutions on plant growth, (67) 21.
 Esmarch, mechanical spinner for, (68) 8.
 for microorganisms, formulas, (67) 373.
 insolation, (62) 321.
 oxidation-reduction potential, method of poisoning, (66) 112.
 physiologically balanced with stable H-ion concentration, (70) 311.
 solid, pH determination, (62) Pa. 311.
 technic, bacteriological, (62) 311.
 used for *Ophiobolus miyabeanus*, effect on another fungus, (69) 25.
 medium for *Ustilago zeae*, (64) 146.
- Cultures and enzymic digests, control of reaction, (62) 109.
- Culvert pipe—
 cast-iron, strength tests, (70) U.S.D.A. 541.
 cast-iron, under rock fills, loads on, (67) 77.
 earth pressure experiments, (62) U.S.D.A. 475.
- Cunninghamella elegans, notes, (65) 320.
- Cupressus—
 arizonica, galls on, (68) Ariz. 768.
 lusitanica, suitable tree for east Texas, (70) 633.
- Curculio—
 and weather, (67) 427.
 caryae, see Pecan weevil.
 control, (65) Tenn. 850; (67) 560.
 control, present status of knowledge, (64) 239.
 dusts for, (64) Ohio 634.
 haroldi, description, (61) 359.
 in Illinois, (64) 239.
 jarring sheet, new, (66) 456.
 rectus, see Chestnut weevil.
- Curculionidae—
 new, from cacao and camphor, (63) 260.
 new injurious, (66) 538.
 on alfalfa, (64) Kans. 852.
- Curculios—
 dates of emergence, (62) Del. 754.
 on chestnuts, (62) U.S.D.A. 251.
- Currant—
 anthracnose, notes, (66) 147.
 anthracnose, varietal resistance to, (66) 147.
 black, seedling, notes, (67) S.Dak. 36.
 fruit fly, notes, (61) Calif. 659; (64) Oreg. 356; (65) 57.
 golden, Botrytis disease of, (63) 49.
 leaf fall, notes, (63) 245.
 leaf marginal disease, potassium sulfate for, (69) 69.
 leaf scorch, notes, (63) 746.
 leaf spot, control, (64) 151; (67) 414.
 leaves, leaching with cold water, (62) 838.
 powdery mildew in Manitoba, (63) 839.
 rust, control, (65) 543.
 worm, biology, (67) 441.
 worm, imported, (69) Conn.State 546.
 worm, imported, biology, (70) 659.
- Currants—
 aphids affecting, key, (63) 256.
 black—
 breeding, (62) 139.
 named seedlings, description, (69) 799.
 reversion causes and eradication, (62) 51.
 reversion, symptoms and diagnosis, (61) 348.
 rogue varieties, (66) 336.
 root growth under different fertility conditions, (69) 654.
 vitamin C in, (68) 861.
 capsid bugs on, control, (65) 653, 654.
 culture, (61) N.Y.State 644.
 culture experiments, (62) Alaska 137; (64) Okla. 738.
 diseases and insect pests, (70) 58.
 dried, vitamin C in, (63) 861.
 fertilizer experiments, (67) Ohio 36, 388.
 lepidopterous enemy of, (65) 550.
 reversion in, (66) 643.
 selection and testing, (68) Alaska Col. 191.
 spray residue on, (63) N.J. 338.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 varieties, identification, (68) 194.
 variety resistant to white pine blister rust, (64) 745.
 vitamin C in, (68) 861.
- Current meters, rating and use, (69) Colo. 871.
- Cuscuta—
 epilinum in Ural region, (67) 384.
 monogyna, physiological studies, (61) 818.
 sp., notes, (65) 345.

- Custard apple collar rot, notes, (64) 846.
 Cuterebra fontinella, notes, (64) 365.
 Cutfoot Experimental Forest, notes, (67) 95.
 Cut-over lands—
 alfalfa on, (63) Idaho 334.
 clearing methods, (62) Idaho 77.
 Douglas fir, vegetative changes and grazing use, (66) 234.
 in Great Lakes States, land settlement in, (65) U.S.D.A. 278.
 management, (70) 633.
 of northern Idaho, (62) Idaho 82.
 of northern Idaho, crops for, (65) Idaho 222.
 utilization in Lake States, (65) 79.
 Cuttings, rooting tests, (62) N.Y.Cornell 736.
 Cutworm—
 army, catalase activity in moths, (68) 644.
 army, control, (64) Mont. 241.
 army, moths, unidirectional flight, relation to estivation, (68) 787.
 bait poisons, tests, (62) 655.
 black, control, (69) Fla. 232.
 black, in Egypt, (68) 502.
 black, injury to potatoes, (64) 358.
 black, larval instars and feeding, (69) 391.
 black, notes, (65) 56.
 brown, control, (64) 461.
 brown, ecological discussion, (65) 56.
 brown, life history, habits, and control, (64) 247.
 dingy, oviposition habits, (65) 655.
 granulate, control, (69) Fla. 232.
 moths, light trap work with, (65) Tenn. 851.
 pale western—
 and army, forecasting outbreaks, (62) 242.
 bioclimatic zonation for study, (63) 151.
 life history and control, (68) Okla. Panhandle 787.
 notes, (62) 856; (63) Mont. 159, Utah 251; (64) Mont. 241.
 prediction of increase in Montana, (68) 357.
 spotted, in southern Minnesota, (68) 644.
 variegated, notes, (69) Kans. 232.
 white, life history, (64) 358.
 Cutworms—
 climbing, key, (68) 70.
 climbing, notes, (68) Mich. 351.
 control, (61) Mass. 849; (63) 255; (64) Tenn. 357; (66) 760; (67) Fla. 559.
 damage to tobacco, (63) Wis. 51.
 detection in the field, (61) Wis. 154.
 increase in western Canada, (67) 283.
 methods of study, (62) 647.
 notes, (61) Iowa 353; (63) Utah 251; (64) Iowa 851; (68) Fla. 67, Me. 497, Mont. 780; (70) Tenn. 206.
 on blueberries, (65) Me. 757.
 on golf greens, control, (62) 545.
 Cutworms—Continued.
 outlook in 1933, (69) Mont. 232.
 parasite of, mass rearing, (69) 234.
 poison bait for, (61) Mich. 450.
 Cyanamide—
 as orchard fertilizer, (69) Ohio 49.
 as source of nitrogen for sugarcane, (69) La. 648.
 properties and uses, (61) U.S.D.A. 815.
 Cyanide—
 effect on respiration of potatoes, (67) 510.
 fumigation following Bordeaux spray, effect on plants, (63) N.H. 243, 543.
 value for citrus fumigation, (61) Calif. 350.
 Cyanides, method of action on cysteine oxidation, (67) 196.
 Cyanogen product, new, for ship fumigation, (66) 758.
 Cyanophyceae, thermophily in, (65) 120.
 Cyathosoma, new genus, erection, (62) 671.
 Cyclamen—
 mite as strawberry pest, (69) 548.
 mite, control, (62) Ill. 353; (64) Ill. 851; (66) Ill. 245; (67) 559; (70) Minn. 368, U.S.D.A. 499, U.S.D.A. 659.
 seed germination, improvement, (61) N.J. 734.
 Cyclohexane, oxidation, (69) 730.
 Cyclohexene, oxidation, (69) 730.
 Cycloneda sanguinea—
 notes, (61) 549.
 parasite, new to Puerto Rico, (69) 73.
 Cydia nigricana, notes, (65) 246.
 Cydia pomonella, *see* Codling moth.
 Cydnidae of Cuba, (69) 387.
 Cydonia japonica, witches' broom on, (61) 654.
 Cylas formicarius, *see* Sweetpotato weevil.
 Cylicostomes, N-butylidene chloride for, (69) 106.
 Cyllindrocladium macrosporium n.sp., description, (62) 645.
 Cyllindrogasteridae, new family, formation, (70) 356.
 Cyllindrosporium caryigenum, notes, (67) 147.
 Cyllene robiniae, *see* Locust borer.
 Cymatodera aethiops, predator of codling moth, N.Mex., (65) 245; (67) 50.
 Cymodusa mississippiensis, notes, (63) U.S.D.A. 54.
 Cyperus, cytological studies, (62) 321.
 Cyperus, edible, industrial uses, (68) 470.
 Cyphagogus corporaali pupa, description, (63) 358.
 Cyprine canker disease, control, (67) 48.
 Cypress—
 American, uses, (66) 218.
 Arizona, notes, Tex., (63) 445; (66) 35.
 bald, durability, (62) Calif. 742.
 buttresses and knees, relation to water and air, (70) 787.
 culture, (62) Tex. 641.

- Cypress—Continued.
 scale, honeydew from, (69) 555.
 species, classification and description,
 (66) 145.
- Cyrnea colini in quail, (63) 777.
- Cyrtacanthacrinae grasshoppers, control,
 (68) S.Dak. 780.
- Cyrtogaster dineutes, life history, (69) 697.
- Cyrtopeltis varians, predaceous habit, (63)
 751.
- Cyrtorhinus mundulus, notes, (65) 497.
- Cyrtotrachelus longimanus, notes, (64)
 161.
- Cysteine—
 action of alkali on, (65) 108.
 and carbon monoxide reactions with
 compounds of metals, (61) 502.
 arsenic derivatives, (65) 201.
 as substitute for cystine, (66) 389.
 breakdown by exposure to light, (66)
 305.
 cobaltous, oxidation, (67) 4.
 gasometric determination, (65) 206.
 hydrochlorides, preparation, (65) 201.
 new color test for, (69) 12.
 o-quinone test for, (69) 632.
 oxidation with iodine, (70) 292.
 sensitive reaction for, (66) 114.
 spontaneous oxidation, (65) 201; (67)
 196.
 thiohydantoins from, (65) 11.
- Cysticercosis in the Netherlands, (66) 871.
- Cysticercus—
 fasciolaris in rats, protection, (69) 426.
 ovis, notes, (69) 268.
 tenuicollis, notes, (70) 355.
- Cystine—
 absorption spectrum and chemical char-
 acteristics, (65) 201.
 action of alkali on, (65) 108.
 action of sulfite on, (69) 165.
 alkaline decomposition, (61) 107.
 behavior with silver salts, (63) 309.
 breakdown by exposure to light, (66)
 305.
 content of glutelins, (69) 165.
 deamination, (64) 109.
 deficiencies, problem, paired-feeding
 method in study, (63) 393.
 deficiency in pea and potato proteins,
 (64) 533.
 deficiency of foods in, (62) Ill. 391.
 determination, (66) 114.
 dietary, relation to growth and cys-
 tine in hair of rat, (67) 628.
 effect of alkalies, (63) 501; (69) 483.
 effect on kidney, relation to vitamin B
 complex, (69) 152.
 estimation in proteins, (63) 206.
 gasometric determination, (65) 206.
 in biological material, determination,
 (70) 444.
 iron-free, preparation, (65) 201.
 l-, barium salt of, preparation and
 properties, (68) 433.
 l-, crystallized alkali salts of, prepara-
 tion and properties, (66) 711.
- Cystine—Continued.
 limiting factor in nutritive value of
 alfalfa proteins, (67) 723.
 mercury derivatives, (64) 708.
 metabolism, (69) 145.
 method of action on cysteine oxida-
 tion, (67) 196.
 oxidation in acid solution, (68) 434.
 reduction, kinetics of, (64) 109.
 relation to sugar in animal hairs, (62)
 609.
 separation from histidine, (63) 502.
 substituents in nutrition, (66) 389.
 thiohydantoins from, (65) 11.
 yield and sulfur in wool, (64) 505.
- Cystitis of cows, epidemiology, (63) 874.
- Cytochrome and yeast iron, (69) 632.
- Cytology—
 introduction to, treatise, (66) 725.
 recent advances in, (68) 749.
 studies, (66) N.Y. Cornell 624.
- Cytophaga spp. in Italian soils, (70) 17.
- Cytospora canker of apple trees, (66) 241.
- Cytospora corylicola, notes, (70) 351.
- Cytospora sp., notes, (70) 642.
- Cytosporina ludibunda, notes, (70) 58.
- Dactylis glomerata, growth, effect of cut-
 ting, (68) 320.
- Dactylopius—
 longispinus on grapes, (62) 246.
 tomentosus for control of pricklypear
 in Ceylon, (64) 245.
- Dacus oleae, *see* Olive fruit fly.
- Dadap diseases, (64) 847.
- Daedalea quercina, notes, (66) U.S.D.A.
 234.
- Dahlia—
 cuttings, root formation and flowering,
 effect of length of day, (65) 518.
 disease, new, (70) 201.
 leaf spot, notes, (62) 149.
 mosaic and related diseases, (69) 677.
 mosaic, relation to stunt, (69) 823.
 sports, fixation, (62) 421.
 stunt disease, cause, (63) Ohio 45.
- Dahlia—
 culture, varieties, and breeding, (67)
 N.J. 397.
 fertilizer experiments, (67) Conn.State
 523.
 insects affecting, (67) N.J. 561.
 planting experiments, (63) Ohio 638.
 spraying and dusting experiments, (67)
 568.
 value of muslin coverings, (69) N.Y.
 Cornell 57.
 varieties, (70) N.C. 774.
 variety tests, (64) West.Wash. 638.

 low, inherited causes, (62) N.J. 69.
 maintaining through periods of severe cold, use of heat for, (65) Mich. 778.
 monthly costs and receipts, (61) N.J. 367.
 of daughters, relation to hatchability of dams, (70) 667.

Egg—Continued.

- production—continued.
 of fowls vaccinated with pigeon and fowl pox virus, (64) 776.
 of poultry flocks, (66) N.H. 63.
 of pullets, effect of first laying date, (62) Mo. 68.
 of pullets, effect of time of hatch, (64) S.C. 667.
 of pullets, vitamin A requirements for, (69) Tex. 95.
 of pullets, with and without artificial light, (62) Miss. 67.
 per hen in central Utah, (70) 857.
 profitableness, (63) N.J. 267.
 quantity and quality, methods for improving, (66) N.J. 364.
 rations, most economical, (69) 569.
 records, statistical study, (62) 514.
 production, relation to—
 date of hatch and first egg, (67) Iowa 444.
 date of sexual maturity, (63) Mo. 766.
 duration of annual molt, (63) Mass. 667.
 plumage changes, Pa., (68) 511; (70) 371.
 skull measurements, (68) 660.
 temperature, (65) Okla. Panhandle 464.
 time of hatching, Mo., (63) 765; (70) 219.
 weight at sexual maturity, (69) 847.
 production—
 rhythm, effect of disturbances, (64) 621.
 role of date of sexual maturity, (70) Mo. 219.
 second year, effect of pullorum disease, (64) 680.
 stimulation by surgery, (66) Ill. 260.
 studies, (62) V.I. 256; (69) Iowa 89.
 time factor in, (61) 668; (62) W.Va. 663.
 variability, factors affecting, (69) Mass. 96.
 wheat in rations for, (66) Mo. 363.
 winter, effect of all-night lights, Ohio, (62) 369; (65) 560.
 winter, effect of artificial heat, (66) Mich. 166.
 winter, effect of artificial light, Mo., (62) 68; (70) 219.
 winter, effect of sunlight and cod-liver oil, (61) Wis. 165.
 winter, factors affecting, (63) Ohio 898; (64) Nebr. 81; (69) 90.
 winter, increasing, (63) Ohio 563.
 yearly, estimation, (62) Miss. 66.
 products, dehydrated, use in ice cream, (61) N.J. 767; (62) 465.
 proteins, molecular size of carbohydrates, (63) 412.

Egg—Continued.

- proteins, value for reproduction and lactation, (64) 583.
 supply, effect of refrigeration, (66) 688.
 triple yolk, occurrence, (68) 516.
 weight, mean annual, relation to mean weight of first ten, (70) 667.
 yolk—
 and white, osmotic pressure, (68) 366.
 antirachitic properties, (63) Ohio 63; (64) Ky. 196.
 carotenoid pigments in, (69) 466.
 color, (70) N.J. 517.
 color, consumer preferences for in New York City, (70) Mo. 710.
 color, effect of alfalfa feeding, Idaho, (63) 561; (66) 260.
 color, effect of feed, (64) Oreg. 373; (70) 373.
 color, relation to yellow pigment, (63) Idaho 562.
 coloring matter in, review of literature, (68) 235.
 dehydrated, action in ice cream, (63) N.J. 368.
 desoxycholic acid compound of vitamin A from, (65) 501.
 in ice cream, use, (62) 166.
 index, relation to quality factors and to candlers' scores, (69) 571.
 iron and copper in, Ky., (70) 219, 820.
 pH changes during incubation, (62) 827.
 proteins, studies, (67) 645.
 vitamin B in, (66) Ill. 296.

Egg-laying—

- contest—
 blood test of hens in, (68) 97.
 cost analysis study, (69) Mich. 158.
 in Michigan, Mich., (64) 399; (67) 64.
 Panhandle, report, Okla. Panhandle, (62) 69, 461, 766; (64) 169; (66) 567.
 Utah intermountain, rules and regulations, Utah, (61) 764; (63) 667.
 contests, report, N.J., (61) 367; (62) 663; (63) 566; (64) 470; (66) 364.
 contests, role in flock improvement, (66) N.J. 64.
 trials, papers on, (64) 766.

Eggplant—

- bacterial wilt in Puerto Rico, (68) 346.
 blossom drop, causes, nature, and prevention, (70) N.Y. Cornell 775.
 disease, new, notes, (70) 492.
 flea beetle, biology, (64) Ky. 155.
 flea beetle, life history, (63) Ky. 655.
 fruit rot, control, (65) N.J. 838.
 leaf miner in tomatoes shipped from Mexico, (62) 241.
 leaf miner, notes, (69) 80.

Eggplant—Continued.

- Verticillium wilt, effect of pH, (61) N.J. 743.
 Verticillium wilt, notes, (69) Wis. 810.
 vitamin A in, (69) 617.
 weevil in Arizona, (63) 756.
 wilt, cause, (70) 640.
 wilt, notes, (61) Utah 45, Mass. 840; (63) N.J. 342, Mass. 542; (65) Mass. 343, N.J. 838; (66) 746; (67) Mass. 399; (69) Mass. 663.

Eggplants—

- abortion and intersexual flowers in, (65) 738.
 analyses, (68) 271.
 anatomical structure, (67) 131.
 breeding, (64) Can. 538; (69) R.I. 210.
 California, composition and time for cooking, (67) 770.
 car-lot shipments from Florida and competing areas, (65) Fla. 886.
 composition at different stages, relation to preparation and use, (70) 714.
 culture experiments, V.I., (62) 227; (63) 137.
 effect of irrigation, (64) Oreg. 339.
 fertilizer experiments, (63) Ill. 534; (64) R.I. 839.
 Florida, grading, packing, and stowing, (69) Fla. 50.
 hybrid vigor in, (64) 529.
 inheritance of color in, (67) 525.
 intervarietal crosses, breeding in Japan, (63) 818.
 intra-State competition in Florida, (66) Fla. 881.
 market diseases, identification, (67) U.S.D.A. 405.
 paper mulch experiments, (61) Ohio 440; (66) W.Va. 537.
 shipments, (65) Fla. 481.
 shipments to New York City, returns from, (65) V.I. 737.
 taxonomy, (69) Mass. 652.
 varieties, (62) N.Y. State 431.
 varieties injured by potato leafhopper, (66) 249.
 variety, new, (66) Can. 827.

Eggs—

- and egg products, deterioration during storage, (70) U.S.D.A. 518.
 and egg products, tariff data, (61) 584.
 and milk, evaporated and pasteurized, vitamin G (B₂) in, comparison, (68) 133.
 and poultry, outlook charts, (66) U.S.D.A. 285.
 and starches, relative thickening quality, (70) U.S.D.A. 557.
 bacteria in, (69) 596.
 birds', artificial incubation, (70) N.Y. Cornell 815.
 blue color in, (70) 319.
 brown and white, vitamin D in, (70) Mo. 277.

Eggs—Continued.

- buying and using, consumers' preferences and practices, (70) R.I. 411.
 clean market, production, (69) N.Y. Cornell 90.
 cold storage, (61) U.S.D.A. 787.
 cold storage holdings, (65) U.S.D.A. 784.
 commercial cold storage, (68) S.C. 796.
 composition, from commercial egg-breaking establishments, (69) 487.
 cooperative marketing, (66) 886; (68) 850.
 cooperative shipping, Ind., (67) 589, 764; (69) 89.
 cost and efficiency in production, (65) Oreg. 885.
 cost of production, (61) Okla. Panhandle 464; (65) 465; (66) Ohio 783; (67) N.H. 613; (69) Mich. 158; (70) Ariz. 266.
 date of first relation to maturity and production, (64) Iowa 373.
 decomposition of lecithin in, (68) 434.
 demand in selected chain stores of New York, (68) 847.
 determination in ice cream, (64) 414.
 developing, biochemistry and biophysics, N.Y. Cornell, (64) 257; (70) 819.
 developing, embryological biochemistry, (65) 524.
 development, embryonic, yolk and albumen assimilation, (69) 702.
 development from genetic standpoint, (66) 523.
 dozen, feed required for production, (66) Okla. Panhandle 768.
 during storage, watery whites in, (69) Calif. 88.
 effect on hemoglobin regeneration, (63) 897.
 feed purchasing power, (65) Pa. 279.
 fertility, (70) Ark. 79, N.Y. Cornell 815.
 fertility and hatchability, effect of irradiated cod-liver oil, (64) 468.
 fertility and hatchability, effect of time of laying, (64) 621.
 for storage, value, factors affecting, (61) N.Mex. 284.
 foreign trade in, (62) U.S.D.A. 388.
 formation, (66) 460.
 four-ounce, from Manchuria, (66) 819.
 fresh and storage, pH of, (69) Ky. 571.
 fresh, antineuritic and antipellagric vitamin in, (64) Ohio 667.
 fresh first, price at New York, 1919-28, (65) 84.
 fresh, testing pH, (68) Ky. 363.
 fresh, use in ice cream, (69) Kans. 257.
 from hens fed massive doses of activated ergosterol, antirachitic potency, (69) 703.
 future trading in, (70) 846.
 graded, buying in Iowa, (67) Iowa 765.
 grades and labels, (68) Conn. State 271.
 grades and marketing problems, (68) 551.

Eggs—Continued.

- grades and prices, (70) Mo. 264.
 grading on the farm, (65) N.J. 465.
 hatchability, (61) 64, Ohio 463, Mich. 763; (63) Ohio 63, N.C. 666; (64) 622; (69) Ohio 90; (70) Ark. 79, U.S.D.A. 513, N.Y. Cornell 815.
 effect of age and holding temperatures, (69) Kans. 249, 847.
 effect of age of dam, (68) 804.
 effect of coefficients of inbreeding, (62) 552.
 effect of consanguinity of stock, (61) 864.
 effect of gravity and air-hunger, (66) 861.
 effect of green feed substitutes, (62) 553.
 effect of high and low egg production, (63) La. 365.
 effect of humidity, Idaho, (63) 561; (66) 260; (68) 363.
 effect of inbreeding, (64) 763.
 effect of mercurial ointment, (70) 536.
 effect of moisture, Iowa, (61) 366; (64) 868.
 effect of pullorum disease in hens, (67) 318.
 effect in vitamin D, (68) 659.
 effect of winter lights, (68) Okla. 654.
 genetic factors determining, (69) Conn. Storrs 511.
 inheritance, (62) Pa. 368; (64) 764; (66) 861.
 nutritional factors, Ohio, (64) 667; (67) 58.
 hatching, factors involved in, (63) Conn. Storrs 125.
 hatching, flock improvement through selection, (64) N.J. 761.
 hatching results, effect of heavy laying, (67) La. 295.
 heavier, breeding studies for, (66) Guam 496.
 high-quality, Chicago requirements, (66) Ill. 261.
 household storage, effect on antirachitic value, (61) Wis. 195.
 in ice cream, effect, (65) 68.
 incubation, *see* Incubation.
 indexes of prices, quantities, and cash incomes of Minnesota, (66) Minn. 480.
 infected with *Salmonella pullorum*, (65) 382.
 infected with *Salmonella pullorum*, sterilization, (63) 481.
 infertile, as source of protein for baby chicks, (65) Wis. 462.
 inoculated with avian tubercle bacilli, effect on rabbits, (64) 565.
 iodine in, (64) Ohio 667; (67) Ohio 58; (70) 517.
 iron and copper in, effect of hens' diet, (62) 789.

Eggs—Continued.

- January and June, vitamins in, (67) Mo. 480.
 June, vitamin A in, (66) Mo. 390.
 keeping quality, (70) 229.
 labor income and costs, (69) Del. 126.
 Louisiana, storage studies, La., (63) 365; (68) 82.
 malposition head in small-end-of-egg, time and manner of determination, (70) 373.
 marketing, (61) Iowa 381; (62) S.Dak. 85; (64) 765, 766.
 marketing in Los Angeles, (66) Calif. 479.
 marketing on graded basis, (61) Ind. 380; (63) Ind. 686; (69) 442.
 Mississippi, cold storage experiments, Miss., (65) 65; (66) 766.
 mustiness in, new species of bacteria causing, (68) 805.
 nonfertile incubator, sterilization, (62) Pa. 380.
 number and weight, relation to body weight, (63) W. Va. 265.
 nutritive value, effect of feeding cod-liver oil to hens, (68) Ky. 363.
 nutritive value, effect of vitamin D in rations of hens, (66) Ky. 165.
 of hens receiving cod-liver oil, vitamins in, (62) N.Y.Cornell 788.
 of North China, iodine in, (64) 581.
 of one hen, feed purchasing power, Mo., (62) 68; (63) 765; (66) 362; (70) 219.
 off-flavor, cause, (70) 517.
 oil absorption of shells, (66) 860.
 orientation in uterus and during laying, (68) 804.
 outlook chart, (61) U.S.D.A. 887.
 phosphoric acid in, determination, (66) 808.
 preservation, (61) 560; (62) S.C. 661.
 preservation by freezing, merits of sucrose, dextrose, and levulose in, (65) 411.
 preserved, vitamin D in, (67) 490.
 preserving until marketed, (63) Ind. 563.
 price variations, effect on farm income, (63) N.J. 267.
 prices, (67) Mass. 471; (69) Kans. 288; (70) Me. 119.
 prices, 1866 to 1929, (63) Ill. 689.
 prices in Cleveland territory, factors affecting, (68) 551.
 prices in South Dakota, 1890-1930, (66) S.Dak. 189.
 principles of cookery and recipes, (61) U.S.D.A. 291.
 quality—
 and prices, (68) Mass. 119.
 and prices in New York City, (69) N.Y.Cornell 127.
 demand and supply, (64) Ill. 868.
 individuality as factor, (61) 863.
 interior, measuring, (63) 766.

Eggs—Continued.

- quality—continued.
 on terminal markets, variation, (70) 406.
 preservation, role of mineral oil in, (70) 820.
 relation to candling appearance, (70) Calif. 667.
 relation to feeds, (68) Okla. 654.
 studies, Calif., (62) 764; (65) 763.
 selection for exhibition, (66) N.J. 661.
 shape and size, determination, (66) 461.
 size, effect of position in egg cycle, (70) Mo. 219.
 size, effect of temperature, (70) 80.
 size, of pullets, rapidity of increase, (64) West.Wash. 669.
 soft-shelled, and vitamin D, (61) Wis. 165.
 source for Providence housewives, (63) R.I. 681.
 southern, cold storage, (66) 383.
 standardization, progress in, (61) 688.
 statistical data, (69) R.I. 288.
 storage of antirachitic factor in, effect of vitamin D sources, (70) 372.
 storage on farm, refrigeration for, (67) 331.
 storage quality, effect of cottonseed meal, (70) Tex. 220.
 storage quality, effect of feeding ground soybeans, (69) 846.
 storage quality, effect of rations, (66) Tex. 64.
 storage studies, (61) N.Mex. 261; (62) N.Mex. 257; (66) N.Mex. 384; (67) La. 295.
 stored, deterioration in, measurement, (66) Calif. 364.
 stored in carbon dioxide, effect, (65) Calif. 764.
 stored oil-treated, flavor in, (70) 518.
 summer, maintaining quality, (69) Idaho 839.
 time of laying and embryonic mortality, relation, (70) 373.
 turning during hatching, (68) W.Va. 797.
 ultra-violet irradiation, effect on embryo development, (68) Conn.Storrs 803.
 United States, foreign markets for, (61) 887.
 variation in, causes, (65) 524.
 variation in hatchability, (62) Tex. 662.
 variations in local prices, (65) Mo. 485.
 vitellin in, (68) 721.
 washed, abraded, and oiled, detection, (69) 256.
 watery whites, (66) Wash.Col. 767.
 weight—
 analysis, (66) 860.
 and annual production, nonlinear relation, (64) 469.
 average annual, estimating, (67) 302.

Eggs—Continued.

weight—continued.

- economic significance, (61) N.J. 560.
 factors affecting, (61) 864; (63) Mass 563; (65) 523; (68) 82, W.Va. 797; (70) 79, Ark. 79.
 inheritance, (61) 326, R.I. 821.
 records of year, (65) N.J. 863.
 relation to body weight of hens, (64) Okla.Panhandle 373.
 relation to production, (64) 373.
 total monthly and yearly estimation, (68) 82.
 variations in, (64) 764.
 western, in Boston market, prices, (69) Mass. 737.
 whipping and coagulation, (65) 891.
 work and publications by U. S. Department of Agriculture, (68) 802.

Eggshell—

- bird's, permeability of gases through, method and apparatus for study, (70) 820.
 color, consumer preferences for in New York City, (70) Mo. 710.
 formation, calcium carbonate carriers for, (64) S.Dak. 668.
 percent of, relation to breaking strength, (68) 516.
 porosity, variability, (66) Calif. 363.
 texture, (68) 366.
 thickness, effect of vitamin D, (62) Ky. 256.
 weight, relation to egg weight, (64) 764.

Eggshells, cracking strength, effect of oiling, (69) 256.

Egyptianella pullorum, *see* Aegyptianella.

Eimeria—

- acervulina n.sp., notes, (62) 266.
 avium life cycle, prepatent and patent periods in, (62) 171.
 avium, morphology and development, (69) 594.
 avium, studies, (67) 451.
 bukidnonensis n.sp. from cattle, (65) 266.
 canis in dogs, (69) 277.
 caviae infections, allergy and immunity, (67) 310.
 dispersa n.sp., notes, (62) 266.
 ellipsoidalis n.sp., description, (61) 373.

 spp. in gallinaceous birds, (62) 267.
 spp. in swine, (64) 773.
 spp. in woodchucks, (65) 353.
 spp., notes, (63) 774; (65) Va. 774, 875.
 stiedae sporozoites, infection of liver by, (70) 249.
 tenella—
 control in chickens, (68) Mich. 252.
 in soil, viability, (70) 100.
 infections of fowls, analyses, (67) 74.
 notes, (62) 266; (64) 383.
 oocysts, effect of physical and chemical agents, (67) 457.
 truncata in United States, (70) 249.
 truncata, notes, (62) 267.
 zürnii as cause of bovine coccidiosis, (63) 76.
 Elachiptera costata, notes, (61) 240.
 Elaioplasts, nature and functions, (65) 119.
 Elaphroptera dimidiata, introduction into New Zealand, (69) 549.
 Elasmopalpus lignosellus, *see* Cornstalk borer, lesser.
 Elasmus flabellatus, notes, (65) 552.
 Elasmus johnstoni n.sp., notes, (62) 861.
 Elateridae—
 diseases, (68) 73.
 fermenting baits for trapping, (68) 782.
 genitalia, comparative anatomy, (67) 706.
 of China, catalogue and generic synopsis, (67) 717.
 predatory enemies, (65) 551.

Elder borer—

biology and morphology, (69) U.S.D.A. 389.

parasites of, bionomic notes, (62) 545.
Elder leaf tier, parasites of, bionomic notes, (62) 545.

Elderberries, cooked and raw, vitamin C in, (68) 861.

Electric—

brooders, *see* Brooders.

burglar alarm for poultry houses, (68) Mich. 384.

charge of milk, (63) Wis. 70.

cookery, (69) Me. 477.

cooking stove, special type, (66) 495.

dairy sterilizers, (61) Oreg. 75.

dairy utensil sterilizer, new, (67) 611.

energy, amounts used in different farm operations, (66) Ill. 277.

fans for barn ventilation, (64) 887.

hay hoisting experiments, (61) Oreg. 75.

hay hoists, design, (63) 881.

heaters for poultry drinking vessels, (69) Ind. 125.

heating, treatise, (67) 191.

hotbeds, development and use, (65) 576.

household refrigeration on farms, (61) N.H. 897, Nebr. 898.

incubation and brooding, (61) Wash. Col. 379.

laundry equipment on farms, (63) N.H. 697.

light and power distribution systems, lightning protection, (69) 728.

light on farms, (69) 120, 878.

light supplementing daylight, effect on greenhouse crops, (69) Ind. 49.

lighting plants, wind, for farm household, (69) Iowa 597.

lights, effect on chick growth, (65) Ind. 167.

lights for biologically effective ultraviolet light, (70) 402.

lights, use in cultivation of plants, (67) 115, 609, 659.

lights, use in greenhouse, Ind., (67) 523; (69) 48.

lines, rural, analysis of costs, (68) 833.

motor for pumping water, selecting, (65) Mich. 697.

motors for forage grinding and chopping, (68) 683.

motors for the farm, (62) Pa. 382; (66) Idaho 277, 675.

motors for ventilation of dairy barns, (65) Iowa 183.

motors, small, adaptation to farm use (63) Nebr. 676.

motors, small, use (61) Pa. 880.

plant, individual, summary, (62) 571.

plants, isolated, costs (68) 833.

plants, unit, for farms, (61) Nebr. 879.

plants, wind-driven, studies, (65) Nebr. 878.

Electric—Continued.

plowing in Europe, (67) 609.

power from windmills in Oklahoma, (69) 877.

reaction and excitability in plant cells, (63) 516.

service, rural, from central stations, revenue and consumption, (61) Nebr. 879.

sterilizer, efficiency, (67) Md. 594.

stoves, ovens of, (65) Ind. 196.

ventilation system for stables, (63) 382.

water heaters, tests, (68) Idaho 384.

water-vapor sterilizers, tests, (64) Oreg. 384.

wiring for the farm, (61) 880, 881; (65) 575, 576.

Electrical—

charge of fowl pox virus and rous sarcoma, (66) 874.

conductivity of soil suspensions, measurement, (68) 305.

current, effect on cohesive properties of soil, (70) 540.

equipment and appliances, current consumption of, (61) 478.

equipment for farms, (61) N.H. 178.

equipment on movable bridges, (66) U.S.D.A. 379.

response, mechanism, (69) 188.

statistics for California farms, (62) Calif. 382.

trap for use against Japanese beetle, (63) 463.

treatment of plants and seeds, (68) 104.

Electricity—

consumption on farm operations, (69) Ind. 126.

costs and uses on farms, (62) Mo. 77, S.Dak. 272; (69) 728.

effect on plant growth, (61) 426, 427; (63) 427; (69) 877.

effect on root of gram seedlings, (66) 723.

for agriculture near Bologna, (69) 727.

for cooking, (68) Me. 571.

for dairy stable ventilation, (67) 330.

for dairy utensil sterilizers, (70) Pa. 692.

for farm refrigerators, (61) S.Dak. 75.

for heating hotbeds, greenhouse soils, and propagating benches, (67) Mass. 329, Mass. 386, Md. 524; (68) Oreg. 257, Idaho 834; (69) Mass. 652; (70) 258, 689.

for heating hotbeds, methods of supplying, (68) Minn. 834.

for heating hotbeds, operating costs, (65) Mo. 881.

for heating purposes in dairies, (69) 598.

for heating soil, (62) 672; (67) Calif. 605; (69) 287; (70) 402.

for home electric refrigerators, costs, (62) S.Dak. 99.

for incubators designed for kerosene, (65) Mich. 479.

Electricity—Continued.

- for lighting of dwellings and animal shelters, (61) 881.
- for milk pasteurization, (70) 692.
- for poultry houses, (64) 272; (68) Wash.Col. 835; (69) 287.
- for poultry houses, winter lighting, (68) 257.

spread, (67) 284.

spread by elm cambium beetles, (69) 245.

status, (70) 201.

symptoms, (68) Mich. 214.

symptoms and distribution in New Jersey, (70) N.J. 496.

transmission by elm beetle, (70) 651.

disease, new, organism and disease characteristics, (66) 843.

Elm—Continued.

disease, notes, (61) 349; (64) Conn. State 842; (65) 352.

leaf beetle—

infestation, effect of climatic conditions, (65) 454.

new host for, (68) 779.

notes, (62) Ark. 851; (64) Mich. 240; (68) 68.

outbreak, Conn.State, (68) 65; (69) 157.

parasite reared from, (69) 232.

toxic spray for, (61) Md. 656.

leaf spots, control in nurseries, (70) 800.

mite, control, (64) 855.

moth, notes, (63) 356.

scale, control, (64) Mich. 240.

scale, European, control, (65) 456.

scale, European, summary, (62) 56.

scurfy scale, control, (61) Ind. 353; (64) Mich. 240.

seeds, germination, effect of storage conditions, (68) 197.

spanworm, damage to hardwoods in Pennsylvania, (68) 639.

tree disease, notes, (61) 841.

Verticillium disease, (68) 62.

wood, structure, relation to properties, (65) 233.

Elms, American, fertilization, (61) 837.

Elms, fungus affecting, (67) Conn.State, 535.

Elodia—

flavipalpis n.sp., description, (69) 393.

subfasciata n.sp., description, (69) 393.

Elsince—

canavallae, notes, (64) 742, 743.

of lima beans, identity and host relations, (70) 793.

piri, synonymy, (67) 554.

Elymus canadensis as host for Hessian fly, (65) 457.

Elytrosomes in mosaic diseased sugar beet leaves, (68) 59.

Emasculatome, use for docking lambs, (68) Tenn. 229.

Embelin, anthelmintic value, (67) 597.

Embryo size in fowls and rabbits, effect of breed, (66) 422.

Embryology—

and genetics, scientific concepts, (65) 623.

chemical, treatise, (66) 523.

Embryonic segregation, role in life history, (62) 511.

Embryos—

growth and implantation after early ablation of ovaries, (62) 126.

of cattle, development of pigment in, (65) 524.

of chicks, effect of endocrine substances, (61) 632.

of eight days' gestation in mice, variations, (61) 632; (62) 125.

of fowls, variation, causes, (65) 524.

Emenadia cucullata, economic value, (62) 546.

- Emesis of bovines, (69) 580.
 Emmer—
 and wheat cross, morphologic characters and rust resistance, relation, (67) 140.
 and wheat hybrids, partly fertile, (67) 664.
 for dairy cows, (67) S.Dak. 159.
 for feed, seeding experiments, (63) N.Dak. 823.
 variety tests, (62) N.Dak. 129.
 yields from nineteen years of rotations, (70) S.Dak. 36.
- Emotion, effect on digestive tract, (62) 189.
- Emphysema—
 of rumen in a sheep, (61) 69.
 subcutaneous, in operated and unoperated fowl, (65) 381.
- Empididae of New Zealand, (61) 357.
- Empidigeron, new genus, erection, (68) 504.
- Empoasca—
 abrupta, notes, (69) N.Mex. 232.
 canavalia n.sp., description, (69) 72; (70) 211.
 fabae, see Potato leafhopper.
 fabalis n.sp., description, (63) 654.
 fabalis, notes, (69) 72.
 gossypii n.sp., description, (69) 72; (70) 211.
 maligna, see Apple leafhopper.
 new species, description, (68) 500.
 spp., American, north of Mexico, revision, (65) U.S.D.A. 54.
 spp., closely related, biology, (67) 710.

 - antirachitic principle, (62) 590.
 - antirachitic value for chicks, (64) 467.
 - antirachitic vitamin from, (66) 709.
 - biological and physical assay, value, (61) 596.
 - by ultra-violet rays v. cathode rays, antirachitic potency, (61) 495.
 - chemistry of, (66) 7.
 - effect of large doses, (61) 391; (62) 196, 197, 296, 591, 592; (67) 89.
 - effect of small doses on serum calcium, (69) 312.
 - effect on calcium absorption, (69) 312.
 - effect on calcium and phosphorus metabolism, (63) 695; (65) 558; (69) 311, 312.
 - effect on dogs, (70) 883.
 - effect on growth of rats, (61) 896.
- irradiated, excessive doses—
 - calcification of tissues by, (70) 883.
 - effect on bone calcium in rats, (66) 96.
 - effect on fowls, (65) 96.
 - effect on rabbits, (70) 230.
 - effects, (64) 296, 498.
 - source of increased calcium, (61) 295; (69) 312.
 - toxicity for animals, (63) 594; (64) 296; (69) 764.
 - vitamin degradation product, (64) 504.

Ergosterol—Continued.

- irradiated—
 - feeding, effect on vitamin D in milk, (64) Ohio 673; (66) 463, 493; (68) 663, 714.
 - feeding value, (66) N.H. 63.
 - for rickets, (61) 596, 795; (62) 590.
 - for tetany, (62) 590.
 - in rabbits, action, (62) 590.
 - induction of hypercalcemia by, (63) 297; (66) 893.
 - induction of hyperphosphatemia by, (66) 893.
 - monomolecular films of, (62) 606.
 - notes, (67) N.J. 587.
 - requirements of chicks, (70) 79.
 - stability, (65) 614.
 - standard solution for estimation of vitamin D, (64) 295.
 - studies, (62) 898; (68) 726.
 - toxicity, (62) 96; (64) 592; (67) 779.
 - with natural light, vitamin D activity, (70) 284.
 - irradiation, effect of wave length, (64) 592.
 - irradiation, formation or destruction of vitamin D during, (61) 695.
 - irradiation, relation to antirachitic vitamin, (61) 195.
 - irradiation, studies, (61) 92, 93.
 - isolation and identification from *Aspergillus fischeri*, (69) 166.
 - isomerization, (64) 709.
 - new color reaction, (64) 113.
 - new esters, (63) 202.
 - photochemical reactions, (62) 502, 804.
 - properties, (69) 631.
 - radiation products, effects of further irradiation, (66) 9.
 - remarkable stability, (62) 588.
 - specific color reaction for, (61) 416.
 - structural formula, (70) 443.
 - studies, (69) 151.
 - unimolecular films, surface potentials, (68) 726.
- Ergot—
- biology and physiology, (67) 119.
 - poisoning by rye bread, (61) 888.
 - sterols of, (63) 202.
- Ergothioneine—
- as substitute for histidine, (61) 90.
 - synthesis, (70) 440.
 - ultra-violet absorption spectra, (64) 502.
- Ergotism of cattle in Kansas, (68) 670
- Eriodendron anfractuosum*, notes, (67) 426.
- Erioglaucine A*, new indicator, (61) 501, 502.
- Eriogreen B*, new indicator, (61) 501, 502.
- Eriophorum*, cytological studies, (62) 321.
- Eriophyes*—
- essigi*, notes, (67) 425; (69) Wash.Col. 561; (70) U.S.D.A. 499.
 - gossypii*, see Cotton blister mite.
 - lowi* new to Britain, (62) 360.

- Eriophyes—Continued.
lowi, notes, (70) 497.
 mite on Evergreen blackberries, (64) West.Wash. 654.
pyri, see Pear leaf blister mite.
ulmi, control, (64) 855.
- Eriophyidae of New York, (64) N.Y.State 59.
- Eriosoma—
lanigera, see Apple aphid, woolly.
 n.sp. on pear roots, (65) 851.
- Ermine moth—
 biology, (62) 542.
 morphology, biology, and control, (68) 785.
 notes, (62) 852.
 on apple and cherry, (62) 156.
 parasites and hyperparasites, (69) 246; (70) 218.
 parasites, host relations, (62) 860.
- Erodium botrys*, nutritive value, effect of leaching, (65) Calif. 658.
- Erosion, see Soil erosion.
- Erostrotheca multififormis* n.sp., life history studies, (66) 753.
- Erthrosina fullo*, food habits, (64) 244.
- Eruptive fever—
 infection and immunity, (70) 527.
 virus, experimental transmission, (69) 582.
- Erwinia—
amylovora and pathogenic fluorescent group, comparison, (69) 68.
carotovora, proposed name, (66) Minn. 241.
 sp., notes, (61) 246.
- Erycia—
basifulva, notes, (64) 750.
myoidea, notes, (64) Iowa 851.
- Erysipelothrix rhusiopathiae—
 cause of arthritis in lambs, (64) 773.
 infection in lambs, (69) 430.
 notes, (69) 276, 432.
 of ovine and porcine origin, serological identity, (69) 270.
- Erysiphaceae—
 biological-morphological studies, (61) 655.
 conidia, germination, (65) 442.
- Erysiphe—
carpophila rubicola on *Rubus* in New Zealand, (63) 747.
- cichoracearum—
 control, (62) 145; (70) 195.
 control in greenhouses, (66) 747.
 notes, (65) 345; (66) 147; (68) 363.
graminis hordei, physical forms, studies, (68) 770.
graminis hordei, studies, (67) U.S.D.A. 266.
graminis infection, effect of nutrition of grain, (67) 691.
graminis, notes, (63) 47; (67) 538.
lagerstroemiae n.sp., description, (70) 496.
polygوني conidia, germination, (65) 442.
- Erysiphe—Continued.
polygوني, notes, (63) 839; (64) 743; (66) 149, 152, Va.Truck 746.
- Erythraspides pygmaea*, see Grape sawfly.
- Erythrina corallodendron* as interplant for citrus, (64) P.R. 340.
- Erythrocytes—
 formation, role of dietary factors in, (67) 635.
 number in fowls, relation to gonadal condition, (64) 730.
 reduction in dogs, (69) 710.
 regeneration, (62) 596.
- Erythroleucosis, spontaneous, in fowls, (68) 253.
- Erythroneura—
cassavae n.sp., description, (64) 361.
 comes, see Grape leafhopper.
dowellii n.sp., description, (69) 238.
hartii, notes, (63) 458.
lawsoniana on apple in Kansas, (70) 360.
lubiae n.sp., description, (65) 359.
maculata maculata, notes, (62) Del. 754.
obliqua, control, (69) 384.
omani n.sp. on apple in Kansas, (70) 360.
pallidifrons, biology, (67) 431.
pleua, notes, (65) 453.
 spp., studies, (66) U.S.D.A. 349; (67) Va. 51.
vitis, notes, (62) Del. 754.
- Erythropoiesis, stimulating action of copper on, (70) 872.
- l-Erythrose, crystal structure, (67) Calif. 500.
- Esca, notes, (61) 50.
- Esca of grapevines, (62) 849.
- Escarole, intra-State competition in Florida, (66) Fla. 881.
- Escherichia—
astheniae, status, (70) 91.
coli and *Aerobacter aerogenes*, differentiation, (67) 662.
coli as indicator of efficient pasteurization of milk, (61) 867.
coli, effect of hydrogen peroxide, (65) Wis. 471.
coli, effect of irradiation, Pa., (62) 320; (67) 452.
coli, germicidal efficiency of lye against, (69) 107.
coli infection in chicks, (64) Kans. 880.
coli, notes, (65) Mich. 175; (69) Ky. 111.
coli resistance to bacteriostatic and germicidal effects of cations, (68) 29.
coli surviving pasteurization, effect of lactose, (64) 68.
coli suspensions, effect of low voltage X-rays on, (68) 288.
 communior or *E. coli*, proposed names, (70) 91.
- Escherichia-Aerobacter group—
 defects in milk and cream due to, (70) 824.
 in butter, (68) 524.
 survival after pasteurization in ice cream, (64) 473.

- Eserine salicylate as ruminatoric, experimental study, (63) 75.
- Eskimos, metabolism studies, (61) 87; (67) 87; (69) 464.
- Estigmene acraea, *see* Caterpillar, salt-marsh.
- Ethanol, production from molasses, (69) P.R. 771.
- Ether—
 effect on rate of photosynthesis in detached leaves, (69) 507.
 purification and preservation, (62) 310.
 value for botfly larvae, (66) Ill. 271.
- Ethereal-oil plants, medicinal principles in, variations, (66) 412.
- Ethers, thio, readily split by alkali, (69) 4.
- Ethoxyl group, determination, (67) 206.
- Ethyl alcohol—
 and hydrochloric acid, simultaneous effect on wood, (63) 308.
 antifreezing properties, relation to methanol, (70) 547.
 effect on germicidal efficiency of phenols, (66) 369.
 effect on growth of seedlings, (61) 514.
 effect on turgor pressure in Spirogyra, (63) 623.
 production from corn, fermentation methods, (61) Wis. 107.
 solubility in gasoline, (70) 253.
- Ethyl trichloracetate, anthelmintic value, (62) 877.
- Ethylene—
 chlorohydrin, effect on amylase activity, (70) 28.
 coloring of oranges with, (63) 835.
 dichloride—
 and carbon tetrachloride for fumigation of clothes moths and carpet beetles, (67) 566.
 and carbon tetrachloride for fumigation of gladiolus corms, (67) 430.
 and carbon tetrachloride fumigation process for dried fruit, (62) 454.
 bibliography, (67) U.S.D.A. 6.
 gas, effect on apples, (63) Ind. 531.
 gas, effect on blanching of celery, (61) N.J. 734.
 gas, effect on coloring and ripening of apples and pears, (67) 392.
 gas, effect on ripening bananas, (61) 517; (67) 136.
 gas, effect on roses, (66) 437.
 gas, effect on wheat seedlings, (70) Pa. 313.
 gas for ripening of fruits, (61) Mich. 424.
 gas for ripening of fruits and vegetables, (61) Minn. 38.
 gas for ripening tomatoes, (61) N.J. 734; (63) 237, Ind. 531; (65) 534.
 gas, physiological effect on celery, tomatoes, etc., (63) Mich. 40.
 gas tests for control of storage scald, (61) Ind. 337.
- Ethylene—Continued.
 oxide as fumigant for foods, (63) 458; (66) N.Y.Cornell 647; (69) N.Y.Cornell, 72.
 oxide, fumigation, effect on fresh fruits, (66) 853.
 oxide, new fumigant for dried fruits, (67) 287.

- Exoascus deformans, notes, (67) 410.
- Exobasidiaceae, histological studies, (61) 818.
- Exobasidium vexans, notes, (68) 62.
- Exochomus quadripustulatus, notes, (61) Calif. 351; (65) 549.
- Exorista achracea, parasite of codling moth, (61) U.S.D.A. 453.
- Exorista pyste, notes, (67) 571.
- Exosmosis of dissolved substance from storage tissue into water, (61) 212.
- Exosporium palmivorum, notes, (65) 344.
- Exostosis, multiple, in deer, (69) 578.
- Exotelela dodecella, notes, (66) 347.
- Experiment—
 fields of Indiana, reports, (67) Ind. 16.
 station—
 an institute for research in rural affairs, (62) 88.
 and agricultural schools of Nicaragua, plan for, (61) 400.
 Central, of Cuba, (63) 499.
 director, relationships and responsibilities, (62) 88.
- Experiment—Continued.
 station—continued.
 proposed at Tsinghau University, China, (69) 768.
 Swedish Central, history and work, (65) 198.
 work in the Transvaal, (61) 799.
- Station Record—
 general indexes, editorial, (69) 1.
 monthly issues, editorial, (67) 193.
 new policies, editorial, (66) 401.
- stations—see also Alabama, Arizona, etc.
 and institutions developing agriculture in warm regions, (66) 88.
 bulletins, inadequate distribution to foreign countries, (69) Minn. 318.
 bulletins, 1927 and 1928, list, (62) U.S.D.A. 795.
 bulletins, 1929 and 1930, list, (66) U.S.D.A. 599.
 in Albania, notes, (61) 500.
 in 1930, editorial, (65) 702.
 in 1931, editorial, (67) 641.
 in 1932, editorial, (69) 625.
 in temperate countries, handbook, (69) 621.
 in temperate countries, handbook, editorial, (69) 481.
 insular, changes in, editorial, (67) 353.
 organization list, U.S.D.A., (61) 290; (63) 89; (65) 190; (67) 85; (69) 142.
 papers on, (63) 485.
 projects, classified list, U.S.D.A., (64) 599; (67) 612.
 publications, distribution in foreign countries, editorial, (66) 601.
 report, (61) 96, 699; (64) 97; (65) 796; (67) 782; (69) 766.
 report, editorial, (61) 601.
 State, in New York, Ohio, and Massachusetts, fiftieth anniversary, editorial, (66) 701.
 work, (70) U.S.D.A. 731.
- Explosives, care and use, (66) 473.
- Explosives, use in agriculture, (70) 544.
- Extension—
 agencies, relation to readjustment of agriculture, (65) 888.
 agronomist, important contacts, (63) 329.
 campaigns, planning and conducting, (61) U.S.D.A. 87.
 education, effect on seasonal surplus milk problem, (66) Vt. 790.
 effect of economic trends, (65) 888.
 methods and relative effectiveness, (61) U.S.D.A., 188.
 methods, costs, (61) U.S.D.A. 789; (62) 89.
 papers on, (63) 485.
 program for soil erosion control work, (65) 320.

- Extension—Continued.
 program, standards of living as basis, (65) 888.
 programs in home economics, dairying, and forestry, (62) U.S.D.A., 90.
 service of University of Illinois, (68) Ill. 407.
 service, relation to cooperation, (62) 681.
 Service, report of director, (67) U.S.D.A. 619.
 Service Review, editorial, (63) 1.
 Service Review, notes, (63) U.S.D.A. 89.
 system, editorial, (63) 101.
 system of United States, (63) 188.
 teaching, (61) 258; (63) 361.
 work—
 and rural church, (61) U.S.D.A. 87.
 cooperative, in agriculture and home economics, (64) U.S.D.A. 578.
 cooperative, 1926, (61) U.S.D.A. 189.
 cooperative, 1927, (62) U.S.D.A. 287.
 cooperative, 1929, (65) U.S.D.A. 488.
 effect on rural life, (62) 88.
 in agriculture and home economics, U.S.D.A., (67) 619; (70) 712.
 in agriculture and home economics in Iowa, (70) 862.
 in cooperative marketing, (65) U.S.D.A. 190.
 papers on, (61) 258, 285.
 relation to land utilization, (67) 469.
 workers, programs, (68) U.S.D.A. 122.
 Extraction apparatus, improved Soxhlet, (68) 586.
 Extractor—
 for biological products, apparatus, (66) 610.
 large-scale Soxhlet, (66) 508.
 Extractors, simple, construction, (62) 607.
 Eye—
 characters, sex influence, (68) 748.
 color in *Drosophila*, genes for, developmental system affected by, (68) 748.
 color in man, inheritance, (68) 746.
 defects in mice, (68) 748.
 defects in rabbits, (62) 217.
 gnat, breeding media, development, and stages, (68) 789.
 gnat, studies, (69) 266.
 gnats, box-type trap for control, (68) U.S.D.A. 789.
 Eyeworm, Manson's—
 of poultry, (61) Fla. 876.
 of poultry, sparrows as distributors, (68) 500.
 Eyeworms in dogs in United States, (66) 668.
- Fabaceae, insecticidal species, chemical relationship, (69) 683.
 Fabrics—*see also* Textiles.
 coordinating research committee, report, (63) 696.
 cotton, wearing quality, effect of laundering, (62) Mo. 97.
 in still and moving air, protective value, (63) 697.
 penetration of ultra-violet rays, (61) 698.
 physical testing, bibliography, (70) U.S.D.A. 139.
 piled or napped, measuring thickness, (65) 696.
 protective value, Kans., (61) 196; (64) 898.
 stiffness from starches and sizing mixtures, (69) 764.
 stiffness in, from different starches, (61) U.S.D.A. 497.
 testing, (66) 97.
 Factory workers of New York State, weekly earnings, index numbers, (66) Ohio 477.
 Fairs in England and Wales, (63) 388.
 Fairy ring fungus, studies, (61) Mass. 846.
 Fallow for row crops, merits, (69) Kans. 201.
 Fallow, methods of preparing and cultivating, (68) Mont. 754.
 Fallowing—
 effect on wheat, (64) Mont. 216.
 response of crops to, (67) U.S.D.A. 30.
 Families—*see also* Farm families(y).
 cost of living on farm and in small towns, (66) Ill. 494.
 economic problems, (69) 765.
 farm and city, income and expenditures, (62) Minn. 389.

 plants, composition, (66) 122.
 powdery mildew, description, (64) 743.
 prices of South Dakota, 1890-1930, (66) S.Dak. 189.
 production in Argentina, (66) N.Dak. 733.
 research in India, (66) 131.
 response to different soil preparations, (68) Mont. 754.
 rotation and tillage experiments, (69) U.S.D.A. 789.
 rotation experiments, (69) U.S.D.A. 789.
 rust, studies, (65) 347.
 seed bed preparations, (69) Kans. 200.
 seed, variety tests, (69) Oreg. 354.
 seed, variety yields in Michigan, (69) Mich. 621.
 seeding experiments, (61) Oreg. 26; (62) Calif. 727.
 seedlings, histology, anatomy, and regeneration, (70) 455.
 strains, correlation studies, (68) 38.

Flax—Continued.

- straw for cattle, (64) S.Dak. 658.
 straw, physical and chemical characteristics, (62) 830.
 straw v. alfalfa hay for cattle, (67) S.Dak. 58.
 treatise, (68) 873.
 varieties, (63) N.Dak. 822.
 varieties, oil in seed, (67) N.Dak. 667.
 varieties, physiologic forms of *Phlyctaena lincicola* on, (68) Minn. 55.
 variety and spacing tests, (68) S.Dak. 754.
 variety on peat land, (69) Minn. 201.
 variety tests, (61) Oreg. 26, N.Dak. 726; (62) N.Dak. 129; (63) S.Dak. 31, N.Dak. 820, N.Dak. 823, 824; (64) Mont. 216, Oreg. 334, Wash.Col. 626, Alaska 731; (65) N.J. 824; (66) N.Dak. 131, Alaska 626; (67) Wyo. 30, Iowa 378, N.Dak. 667; (68) Ill. 608, Mont. 753, Wash.Col. 754; Wyo. 755; (69) Alaska 36, Calif. 37, Iowa 37, Kans. 200; (70) S.Dak. 763, Wyo. 763.
 water requirements, (65) 128.
 water requirements at different growth stages, (67) S.Dak. 30.
 wilt and flax-sick soils, fungi associated with, (68) N.Dak. 344.
 wilt resistance, inheritance, (63) Wis. 46; (68) 33.
 wilt resistant varieties, (67) N.Dak. 695.
 wilt, studies, (63) N.Dak. 841.
 yellow pine, toxicity, (64) 474.
 yellow-flowered, dehiscence of bolls, (66) 823.
 yields from nineteen years of rotations, (70) S.Dak. 36.
- Flaxseed—
 and safflower seed, oil content, (65) Wyo. 127.
 carbohydrates, calorific value, (63) 163.
 constituents, variation in, (68) 310.
 data of U. S. Tariff Commission, (62) 482.
 effect on milk, (61) N.J. 765.
 feeding value, (62) Ohio 66.
 ground, value in pork production, (70) S.Dak. 816.
 market and tariff, (69) Mont. 606.
 meal, vitamin B in, (70) N.C. 879.
 moisture relations, (62) 427.
 new form of *Botrytis cinerea* on, (67) 695.
 oil in, development, (68) 472.
 oil in, factors affecting, (68) 186.
 oil tests for, (67) U.S.D.A. 84.
 prices, factors affecting, (70) N.Dak. 120.
 production by power farming methods, (64) U.S.D.A. 336.
 response to environment, (70) U.S.D.A. 464.
 treatment, tests, (67) Iowa 378.

- Flea beetle—
 black, insecticides tested against, (61) Ind. 353.
 pale-striped, on seedling onions, (66) 652.
 southern, on tobacco, control, (65) Conn.State 356.
- Flea beetles—
 as vectors of potato diseases, (65) Nebr. 348.
 attacking tobacco, (63) Wis. 51.
 biology, (63) 260.
 control, (65) N.J. 838.
 new nematode parasitic in the body cavity, (69) 695.
 on cruciferae, biology, (61) 354.
 pale-striped and banded, notes, (61) Va. 753.
 parasites of, (65) 552.
- Flea larva, chalcidoid parasite from, (62) 159.
- Fleas—
 breeding, apparatus for, (68) 71.
 control, (66) 849; (70) Ill. 648.
 hatching of eggs, (65) 244.
 mite infesting, (70) 69.
 multiplication of virus of Mexican typhus fever in, (66) 850.
 of rats and other hosts in Kenya, (70) 214.
 on rodents and insectivores in Nigeria, (62) 358.
 sound apparatus, (62) 649.
 suslik, reservoirs of plague virus during winter, (70) 214.
 transmission of typhus fever by, (65) 657.
- Fleming, S. T., necrology notes, (67) 639.
- Flesh fly larvae, nutrition, (69) 394.
- Flies—
 and fly sprays, effect on cattle, (68) 647.
 and mosquitoes about Michigan homes, (68) Mich. 223.
 aquatic, in a filter plant, (63) Conn. State 453.
 bee-killing robber, (64) 160.
 biting, of Adirondacks, (67) 716.
 black, *see* Black flies (γ).
 bloodsucking and nonbloodsucking, relation to human welfare, (69) 243.
 control, (62) 449.
 effect on milk production, (70) N.J. 520.
 European scavenger, breeding in corn silage, (67) 291.
 exposed to pyrethrum sprays, reproductivity, (65) 453.
 house, *see* House flies.
 important in forest entomology, (67) 285.
 injurious to cereals, biology, (67) 716.
 muscoid, in Iowa, wintering habits, (65) 250.
 muscoid, parasites of, (62) 860.
 on cattle, repellent spray for, (66) 849.
 on mushrooms, biology and control, (67) 565.
- Flies—Continued.
 photographic atlas, (62) 156.
 reared in laboratory, apparatus and methods, (61) 848.
 relation to spread of anaplasmosis, (64) Okla. 748.
 repellents for, (62) Tex. 666.
 scavenger, on hides, (67) 437.
 Spalangia parasites of, methods for rearing, (64) Guam 849.
 two-winged, new species, (67) Tex. 576.
 white, *see* Whiteflies.
- Floats, fertilizing value, (70) N.Y.Cornell 453.
- Flood—
 and mosquito problem in Passaic Valley, (64) 159.
 control reservoir sites, field examinations of, (65) 272.
 flows, frequencies and magnitudes, treatise, (66) 377.
 irrigation, (65) 879.
 of 1931 in China, (67) 471.
 protection and land drainage, treatise, (64) 777.
 silt soils, characteristics, (61) N.H. 116.
 water farming, (67) 462.
 water flow over railway and highway embankments, (63) U.S.D.A. 279.
- Floods—
 and droughts, British, treatise, (62) 314.
 in mountain streams, barrier system for control, (70) U.S.D.A. 687.
 New England, of November, 1927, (63) 78.
 origin, cause, and prevention, (64) Utah 778.
 types in middle Rio Grande valley, (68) 101.
- Floors—
 durable finishes for, (69) Mich. 621.
 wood, over concrete subfloors, conditions for laying, (69) 120.
- Flora—*see also* Vegetation, Plants, *etc.*
 changing, in Southwest, (67) 720.
 in central Kansas, factors affecting, (65) 422.
 of Philippines, introduced cultivated element, relation to insects, (61) 753.
 thermal, origin, (65) 120.
- Florida—
 fauna and flora, when primeval wilderness, (69) 381.
 Station, notes, (61) 198, 499; (62) 400; (63) 97, 899; (64) 300; (66) 900; (67) 351, 639; (69) 910.
 Station, report, (62) 399; (63) 698; (65) 496; (67) 638; (69) 317.
- Florists' stocks, storage, commercial, (70) U.S.D.A. 183.
- Flossonotus univittatus, control in orchards, (63) U.S.D.A. 54.
- Flotation process, (69) 323.
- Flour—*see also special kinds.*
 acidity in, determination, (67) 366.
 and wheat studies, (66) 408.
 ash, hygroscoy in, (63) 112.

Flour—Continued.

- ashing, new aids in, (62) 710.
 baking quality relation to pH (61) 586; (62) 288.
 baking quality relation to protein in, (64) Mich. 215.
 baking strength, effect of quality of dry skim milk, (67) 339.
 baking test, standard, (62) 488.
 baking tests, (61) Ind. 386.
 baking tests, separation of gassing power (diastatic activity) from strength, (67) 338.
 beetle, confused—
 biology, (69) 395.
 effect of humidity on value of fumigants, (67) 578.
 effects of dry heat, (66) 352.
 growth and development, (65) 248.
 growth of population, mathematical theory, (69) 396.
 insecticides for, comparison, (64) 549.
 method of trapping, (66) 456.
 notes, (70) U.S.D.A. 499.
 population growth, (67) 579; (68) 359.
 toxicity of gaseous pyridine and nicotine to, (68) 505.
 beetle, rust-red—
 biology, (69) 395.
 notes, (63) S.C. 752; (70) U.S.D.A. 499.
 beetles, control, (66) N.Y.Cornell 648.
 beetles, notes, (63) S.C. 752.
 bleaching, detection, (62) 205.
 carotene in, determination, (68) Minn. 17.
 chemical treatments, (68) 585.
 chemistry, studies, (61) Kans. 107.
 color in, measurement, (70) 581.
 commercially and experimentally milled, comparison, (64) 412.
 composition, relation to crumb texture and color, (67) 473.
 diastatic activity in, determination, (61) 808.
 diastatic power, relation to crust color, (62) 288.
 English, grading and marking, (62) 285.
 ether extract of, vitamin A in, (69) 168.
 examination, methods, (66) 407.
 family, studies, (66) 686.
 from Purkof wheat, baking tests, (63) Ind. 590.
 from Wyoming hard wheat, baking qualities, (65) Wyo. 191.
 given volume, variation in weight, (69) 460.
 heat of hydration, (67) 357.
 Illinois soft-wheat, bread-baking qualities, (70) Ill. 713.
 in 140-lb. bags, penetration of hydrocyanic acid gas into, (70) 359.
 international trade, statistics, (65) 686.

Flour—Continued.

- keeping quality, factors affecting, (67) Ind. 620.
 leguminous, new kinds, (61) 88.
 lima bean, cooking tests, (68) 559.
 loaf volume under prolonged fermentation, (62) 489.
 milling, physical science of, treatise, (66) 80.
 mills, inspection, (64) Okla. 748.
 mixtures, baking at high altitudes, Colo., (65) 90, 91; (70) 713.
 moisture content, effect on heat of imbibition of bread dough, (66) 291.
 moisture in, estimating, (63) 111.
 moth, Mediterranean—
 affecting cocoa and confectionery, (64) 55.
 and parasite, differential effect of environmental factors, (70) 367, 812.
 bacteria isolated from, (64) 751.
 biology, (61) 254.
 breeding for experimental work, (70) 810.
 effects of desiccation, (67) 570.
 geographical origin, (64) 544.
 growth and development, (65) 248.
 parasite of, (62) 154.
 parasite of, biology, (64) 358.
 parasite of, embryonic development, (70) 649.
 parasitic diseases, (63) 846.
 sporozoan disease of larvae due to *Thelohanian ephestiae*, (69) 247.
 other than wheat for cakes and muffins, (69) 892.
 overgrinding, effect on dough fermentation, (68) Minn. 11.
 overgrinding, effect on keeping quality of bread, (65) 890.
 pH determination, (61) 807.
 prices, 1866 to 1929, (63) Ill. 689.
 protein and ash in, effect of severe weathering, (63) 232.
 protein and loaf volume, effect of potassium bromate, (67) 365.
 protein extractions, comparison of solutions for, (67) 357.
 protein in relation to loaf volume, (64) 610.
 proteins, peptizing effect of inorganic salts, (68) 9.
 proteolytic enzymes of, (67) 358.
 quality, factors affecting, Kans., (61) 190; (69) 200.
 quality, testing by recording dough mixer, (69) 460.
 quick ashing, method, (67) 365.
 self-rising and phosphated, ash content, determination, (67) 365.
 self-rising, stability of leavening in, (65) 890.
 self-rising, use of toasted wheat germ in, (66) 192.
 soft and hard wheat, composition and baking qualities, (68) Ill. 697.

Flour—Continued.

- soft wheat, baking tests and chemical analyses, (66) Ill. 290.
 soft wheat, fermentation, (67) Mich. 620.
 soft wheat, testing, (64) 281; (69) 460.
 starch in, determination, (65) 13.
 stored, march of acidity in, (63) 109; (66) 408.
 suspensions, plasticity, (63) 109.
 tests, protein peptization in, (64) 609.
 types and grades, buffer intensities of water extracts, (62) 709.
 types, suitability for pastry, (70) 865.
 variability of loaf volume from, (66) 291.
 variations in local prices, (65) Mo. 485.
 wheat and bread, popular papers on, (63) 890.
 wheat, carotinoid pigments in, (70) 12.
 wheat, export trade of United States, (65) 582.
 wheat, keeping quality, (69) Ind. 3.
 wheat, properties for cake baking, (70) Ill. 713.
 whole wheat, composition of samples, (64) 411.
 whole wheat, value, (62) 583.
 Wyoming, baking qualities, effect of storage, Wyo., (67) 85; (68) 854; (70) 126.
 Wyoming, baking studies, (61) Wyo. 192.
- Flour-water suspensions, viscosity, factors affecting, (66) 408.
- Flower—
- beds and bedding plants, treatise, (63) 447.
 bulb plants, mosaic disease, (66) 842.
 gardens, fungus disease affecting, (61) 347.
 gardens, insects of, control, (61) 450.
 pot composition, effect on plant growth, (66) Mass. 538.
 seedlings, damping-off control, (67) Ohio 43.
 seeds, radiomagnetic treatment of seed bed, (68) 104.
 seeds, starting, (67) Ohio 36.
- thrips—
 control, (63) Fla. 651.
 Florida, notes, (69) Fla. 231.
 notes, (62) Fla. 352.
 on peach, (66) Mich. 154.
 studies, (67) Calif. 559, Fla. 559.
 western, life history and distribution, (69) 827.
- Flowering plants, *see* Plants, flowering and ornamental.
- Flowers—
 and insects, treatise, (66) 846.
 carbon dioxide storage, (65) 412.
 cell sap of, pH value, (61) 720.
 culture, (62) Can. 637; (69) Ohio 807.
 culture experiments, Alaska, (62) 137; (69) 47.
 cut, keeping, effect of low temperature, (70) N.Y.Cornell 783.

Flowers—Continued.

- cut, preservation, (66) 143.
 fertilizer and varietal tests, (70) Ga. Coastal Plain 773.
 fertilizer studies, (61) Ohio 439.
 for ornamental planting, (63) Kans. 433.
 for Panhandle country, (61) Okla. Panhandle 442.
 garden, seed producing capacity, (64) P.R. 340.
 garden, sterility in, (66) 142.
 new, (68) S.Dak. 761.
 nutrient needs, (69) Ohio 49.
 propagation by cuttings and seeds, (66) Ohio 233.
 response to temperature, (61) 837.
 studies, (69) Kans. 210.
 summer cut, production under cloth, (70) 783, 784.
 time of bloom, effect of supplementing daylight with electric lights, (69) Ohio 49.
 varietal and cultural studies, (66) Can. 827.
 variety tests, (62) Alaska 137.
 vascular anatomy, (66) N.Y.Cornell 619.
 wild, of North Dakota, (70) N.Dak. 25.
- Fluids—
 biological—
 ammonia determination in, (69) 172.
 estimation of bromides in, (64) 802.
 H-ion concentration, determination, (63) 414.
 sixty cycle conductivity assembly for, (64) 802.
 passage through stomach of animals, (67) 165; (68) 815.
 small quantities, colloid osmotic pressures in, (69) 488.
- Fluke—
 disease, (70) 240.
 infestation of ruminants in India, (70) 679.
 large American, new intermediate host of, (70) 829.
- Flukes—
 in livers of sheep and goats, (63) Oreg. 673.
 infestation of ducks and chickens, (67) 585.
 of human blood, life history film, (62) 241.
- Flume—
 design, experiments with fumed regulator, (65) 675.
 repair materials, (68) Wash.Col. 827.
- Flumes, Parshall, data, (67) Colo. 606.
- Fluorescence—
 devices for perfecting observation of, (63) 113.
 of *Lolium* seedlings in ultra-violet light, (69) 345.
- Fluoride residues on fruit, (70) U.S.D.A. 501.

- Fluorides—**
 feeding, effect on composition of teeth and bones, (70) 887.
 in water supplies, role in mottled enamel of teeth, (68) Ariz. 413.
 ingestion by rats, effect, (67) Iowa 473.
- Fluorine—**
 and arsenical insecticides, relative toxicity, (67) 428.
 as insecticide, (64) 52.
 compounds and residue problem, (67) 50.
 compounds as substitutes for lead arsenate, (67) 425.
 compounds, commercially available, composition, (68) 637.
 compounds, efficiency, (68) Wash.Col. 780.
 compounds for codling moth control, (70) U.S.D.A. 809.
 compounds, relative toxicity as stomach insecticides, (69) 824.
 compounds, value as lead arsenate substitute, (66) 760.
 containing insecticides, status, (70) 205.
 copper compound spray, notes, (70) Tenn. 192.
 determination, Mich., (68) 720; (69) 489.
 determination, effect of forms of silica, (66) 804.
 effect on calcium metabolism of rats and bone composition, (66) 160.
 effect on fowls, (70) 373.
 effect on growth and bone development in pigs, (67) Ohio 58.
 effect on nutrition of swine, (69) 843.
 effect on reproduction and lactation in swine, (69) Ohio 90.
 effect on tobacco plant, (69) 649.
 estimation, Travers' method, (66) 411.
 feeding, effect on dairy cattle, Mich., (61) 65; (65) 766.
 feeding, effect on health and osteoid tissue, (68) Mich. 370.
 in drinking water, effect on teeth, (67) 93; (70) Ariz. 887.
 in phosphates, determination, (63) 111.
 in phosphatic materials, (66) 804.
 phosphoric acid ratio in phosphate rock, (64) 12.
 physiological effects, (69) 754.
 poisoning of dairy cows, plasma phosphatase in, (69) 414.
 residues on apples, (68) 636.
 volumetric determination, (68) 293.
- Fluorosis of cattle, (70) 827.**
- Fuosilicates—**
 compatibility with arsenates, (62) 653.
 incompatibility with lime, (65) 51.
 solubilities in water, (64) 243.
- Fly—**
 attack and animal coloration, (62) 647.
 larvae in snuff, (65) 852.
 repellents, effect on milk production, N.C., (65) 171; (68) 518.
- Fly—Continued.**
 repellents for dairy cattle, value, Kans., (61) 168; (64) 873.
 spraying machines, development, (70) U.S.D.A. 499.
 sprays for dairy cows, effect, (66) Ala. 863; (67) 576.
 sprays, studies, (69) Calif. 97, Iowa 98; (70) U.S.D.A. 503.
 survey of Punjab, (62) 377.
- Flycatchers, field key, (67) N.J. 49.**
- Flytrap, catches of insects in, (68) 666.**
- Foal, two-week-old Belgian, vulvulus of small intestine, (66) 274.**
- Foals, entropion operation in, (69) 592.**

 auctions, services to cooperatives, (68) 850.
 bacterial spot, (69) Del. 60.
 bats of Australia, (67) 352.
 beetle, dried, in stored food products, (62) 243.

Fruit—Continued.

- beetle, dried, odors of microorganisms for control of, (69) 233.
- beetles, carriers of yeast and bacteria to fruits, (62) Calif. 744.
- blossoms, insect visitors, (69) 73, 76.
- branches, artificial winter tests for, (69) 212.
- bud development, effect of sprays of high oil concentration, (68) Ill. 626.
- bud formation, factors in, (62) 139; (66) N.Y.Cornell 636; (68) 478.
- bud formation in apples, effect of thinning, (68) 332.
- bud formation in strawberries, (67) Mass. 385.
- bud formation, studies, (63) 138.
- bud mutations, survey, (68) 745.
- bud studies of Sultana grapes, (67) 395.
- buds, differentiation and development, (70) 780.
- coats which respond to light during germination, role, (66) 123.
- containers, capacity, testing, (63) U.S.D.A. 445.
- crop destroyed by low temperatures, (61) N.Mex. 228.
- crops, effect of the March freeze of 1932, (69) Ga. 209.
- cuttings, soft and hardwood, rooting, (68) 46.
- diseases, control, (65) Mich. 745; (67) N.J. 536; (69) N.Y.Cornell 61.
- diseases, control by new method, (69) U.S.D.A. 652.
- diseases in Prussia, (65) 535.
- diseases, studies, 834.
- farm at Union, Nebraska, establishment, (66) Nebr. 334.
- farm, organization studies, (69) N.H. 445.
- farming in British Columbia, (62) 481.
- farms, investment and income, (70) Ill. 695.
- farms, profits from, (62) N.Y.Cornell 781.
- flies—
 - control, (64) 52.
 - control by refrigeration, (68) 504.
 - larvae and pupae, characters, (61) 357.
 - new bait for, (67) 291.
 - notes, (65) 246; (70) U.S.D.A. 499.
 - of New York, (65) 56.
 - of Queensland, (62) 858.
 - of the genus *Rhagoletis*, North American species, revision, (67) 154.
 - possible serious pests in California, identification, (61) Calif. 659.
 - South African, biological notes, (64) 359.
 - South African, records and new species, (69) 686.
- fly affecting bug-tree, (64) 462.

Fruit—Continued.

- fly, Mediterranean—
 - control, (66) 652.
 - control experiments with glass bait traps, (65) 651.
 - control in Florida, (62) 157.
 - eradication from Florida, (67) 560.
 - eradication work, (62) 546.
 - importance in Hawaii, (69) 385.
 - in Brazil, (62) 455.
 - in Cyprus, (63) 853.
 - in Florida, (61) 659, 854, 855; (62) 57; (64) 358.
 - in Florida, heat treatment, (66) 352.
 - in Hawaii, parasitism, (63) U.S.D.A. 53.
 - in Portici, (63) 852.
 - infestation of avocados by, (62) 852.
 - measures to prevent introduction, (62) 157.
 - morphology and biology, (68) 504.
 - notes, (62) 451, 852; (63) N.Mex. 455.
 - papers on, (61) 657; (62) 358.
 - possible future distribution and abundance, (66) 454.
 - probable distribution in United States, (65) 250.
 - search for, (62) S.C. 650.
 - situation, (63) 53, 852.
 - summary, (61) 659.
 - value of trapping in, (69) 559.
- fly, Mexican—
 - control, (64) 52; (70) U.S.D.A. 501.
 - in Texas, (68) 779.
 - new name for orange maggot, (70) 500.
 - studies, U.S.D.A., (69) 82; (70) 499.
 - survival, relation to temperature and humidity, (69) 634.
 - thermal death points, (70) U.S.D.A. 214.
- fly, Natal—
 - control, (62) 546.
 - olfactory reactions and nonarsenical poisons for, (67) 426.
 - reactions to fermenting baits, (64) 359.
 - wintering, (64) 548.
- fly problem in Mexico, (62) 647.
- fly, Queensland, heat treatment for, (66) 352.
- fly surveys in Argentina, Spain, and Canary Islands, (62) 157.
- fly, West Indian—
 - control, (70) 649.
 - in Puerto Rico, (62) 153.
 - notes, (66) P.R. 247.
- fly, white-banded, notes, (63) Mich. 160.
- industry—
 - Empire, (67) 677.
 - export, of South Africa, (69) 450.

Fruit—Continued.

- industry—continued.
 of British Columbia, report, (63) 887; (65) 886.
 of State, seasonal variations, (69) Kans. 288.
 trend toward higher quality production, (69) U.S.D.A. 652.
 Washington, economic aspects, (63) Wash.Col. 588.
- injuries, relation to insects, (69) 245.
- insects in Hudson Valley, (64) N.Y.State 455.
- insects in Japan, (66) U.S.D.A. 154.
- insects in 1928, (61) Conn.State 547.
- insects, notes, (62) N.Y.State 449; (64) 238, 242; (67) Fla. 559.
- jellies, *see* Jellies.
- juice filter, muslin tube, description, (69) Mich. 3.
- juices—
 clarification, pasteurization, and preparation, (70) N.Y.State 740.
 effect of concentrating by freezing (66) 688.
 enzymic clarification, (66) N.Y. State 115.
 jellation, factors affecting, (69) Del. 3.
 jellying power, effect of micro organisms, (69) Mass. 633.
 pasteurization studies, (70) 301.
 quick freezing, (67) 622.
 sterilization, (68) N.Y.State 576.
 sterilization with heat developed by resistance to alternating electric current, (69) Iowa 143.
 strongly colored, containing phosphoric acid, potentiometric titration, (70) 300.
 utilization studies, (67) Mass. 472.
- June drop, relation to leaf surface of secondary shoots, (61) Ohio 439.
- mites, injurious and beneficial, (68) 652.
- moth, oriental—
 American parasite, introduction into France, (68) 652.
 as orchard pest in Ohio, (62) 540.
 bait trapping, large scale, (66) 651.
 bait traps for, (63) 461; (65) 249; (67) 54; (68) 69; (69) 831.
 baits for, (61) 252; (62) 353.
 biological studies, (66) S.C. 53; (70) N.Y.State 507.
 bionomics and control, (69) Del. 71.
 cocoon parasites, (69) 390.
 control, (61) 552; (62) 248; (63) Ind. 548, 849; (64) 52, 358, Conn.State 849; (65) Ind. 52, 55; (66) Ill. 245, Va. 552, S.C. 653; (67) 425, Ind. 560.
 control of wintering larvae, (63) 460.
 control, value of parasites, (67) 442.
 effect of artificial illumination, (67) 572.

Fruit—Continued.

- moth, oriental—continued.
 egg parasite of, (64) U.S.D.A. 365.
 expectations from in 1932, (69) 385.
 factors affecting infestation, (63) 460; (64) 460; (66) 347.
 factors limiting control, (61) 251.
 growth, relation to temperature, (62) 58.
 habits, (65) 56.
 importance of sex ratio in parasite breeding, (66) 558.
 in Georgia, (64) 543; (67) 705.
 in Illinois, (61) Ill. 252, 547.
 in Japan, new parasite, (69) 246.
 in Kentucky, (67) 560.
 in Michigan, (69) 547.
 in New Jersey, status, (64) 155.
 in New York State, (67) 427, 572.
 in Niagara Peninsula, history, (69) 548.
 in Ohio, (67) 424.
 in Ohio, status of native and introduced parasites, (70) 356.
 in Pennsylvania, (61) 851.
 in South Carolina, (68) 222.
 insecticide and parasite control, (67) N.J. 560.
 insecticides for, tests, (61) N.J. 750; (65) 55.
 laboratory rearing, (62) 58.
 larvae, time of leaving fruit, (67) 713.
 larval parasites, (65) N.J. 54; (70) 217.
 lead arsenate v. fluorine compounds for, (65) Tenn. 851.
 life history, (63) Va. 655.
 life history and control, (69) 390.
 life history at Riverton, New Jersey, (63) U.S.D.A. 552.

 diseases in Ontario, (64) 745.
 diseases in Quebec, (63) 245.
 growth, response to soil complex
 reached by roots, (70) Mich. 48.
 leaf beetle on cherry, (64) Oreg.
 356.

Fruit—Continued.

tree leaf roller—

- control, (61) Calif. 351, Idaho 848; (63) Wis. 51; (65) 854; (66) N.Y.State 551; (68) Mich. 780.
- damage to hardwoods in Pennsylvania, (68) 639.
- maggots in soil, (68) Conn.State 65.
- major enemy of apples and pears, (65) Mich. 756.
- notes, (64) N.Y.State 455; (66) Mich. 154; (68) 351.
- reactions to light, N.Y.State, (63) 155; (66) 551.
- studies, (68) Mont. 780.
- summary, (61) N.Y.State 155.

tree—

- leaf scorch in Victoria, (68) 775.
- leaf scorch, studies, (63) 746.
- leaves, leaching with cold water, (62) 838.
- pests, control, (63) 549.
- root development and soil profile, relation, (67) Mich. 37.
- roots, winter injury, nature and cause, (69) N.Y.Cornell 53.
- rootstocks, propagation methods, (63) 832.
- rootstocks, studies, (68) Pa. 474.
- rosette or little leaf, effect of zinc, (70) 494.
- rosette or little leaf, notes, (65) Calif. 735; (68) 210, Wash.Col. 760; (69) Calif. 60.
- seeds, afterripening and germination, effect of drying, (70) 621.
- seeds, afterripening, relation to catalase activity, (70) 777.
- shoots, transpiration rates, (62) Ill. 839.
- sour sap, cause, (67) 700.
- sour sap in California, (63) 348.
- spider in Great Britain, (64) 543.
- stocks, budding experiments, (70) 625.
- stocks, standardization, (66) 433.
- wilt of stone fruits, causes, (70) 643.

trees—

- and shrubs of the Crimea, (68) 477.
- asexual propagation, (68) N.Y.State 618.
- bridge grafting, (66) Ill. 434.
- composition, effects of bark ringing, (67) 133.
- dates of fertilizer application, (62) Can. 836.
- delayed foliation, (65) Calif. 744.
- dormant, lubricating oil sprays for, (66) U.S.D.A. 450.
- effect of cover crops, (64) Mo.Fruit 839.
- effect of drought and excess moisture, (66) N.Y.Cornell 635.
- effect of lime-sulfur, (68) 61.
- effect of phosphate and potassium deficiencies, (70) 476.

Fruit—Continued.

trees—continued.

- effect of straw mulch, (61) Okla. Panhandle 525.
- effect of substances in solution, testing, (66) 334.
- fertilizer experiments, (62) Miss. 39, 839; (65) 638.
- fertilizer requirements, (69) Oreg. 365.
- flowering time, individual effect, (68) 589.
- fungi parasitic on, (63) 451.
- gall midges affecting, (69) 73.
- grafting and budding, (68) Ohio 330.
- hemcellulose in, character, (70) 621.
- in Baluchistan, new coccid affecting, (67) 152.
- in Illinois, epidemic diseases, (67) 410.
- in West Virginia, pollination, (69) W.Va. 212.
- Indian, sterility in, (62) 622.
- injury from cold, (65) 26.
- irrigation, (67) 249.
- leaf relations, (68) 761.
- mites infesting, (61) 354.
- mulching, amount, (69) N.J. 803.
- nutrition, (64) 539.
- nutrition, relation of nitrogen to potassium, (67) 133.
- of South Africa, pollination requirements, (65) 40.
- ornamental dwarf, culture, (62) 838.
- planting and care, (65) Wyo. 739.
- pollen quality, (65) 26.
- pollination, (65) 636; (67) N.Y. State 677, Ohio 524.
- potassium deficiency, (66) 433.
- pruning, (63) Nebr. 636; (64) Ill. 836; (66) N.Y.Cornell 636; (67) Ohio 524.
- pruning and transplanting studies, (70) N.Y.Cornell 777.
- response to fertilizers and pruning, (68) Utah 191.
- response to pruning, (62) N.Y.Cornell 737.
- ringing, (68) Pa. 474.
- rodent injury, (61) Ohio 836.
- root and crown injury due to freeze, (62) N.Y.Cornell 746.
- rooting habit on different soils, (70) 47.
- rootstock-scion effect, chemistry, (66) 334.
- spraying and dusting experiments, (67) 274.
- spraying, cost of summer and winter washing, (67) 411.
- spraying, cost of winter washing, (64) 151.
- stock and scion relation, (69) 522.

Fruit—Continued.

trees—continued.

- tar distillate sprays for, (70) Va. 804.
- top working, (64) W.Va. 540.
- toxic effect of boron on, (66) 420
- training, (64) Okla. 738; (66) Ill. 229.
- tropical, grafting, (69) Hawaii 524.
- vegetative propagation, (64) 539.
- whitewashing, effect, (64) Ohio 840.
- winter injury, (61) Oreg. 36; (64) Okla. Panhandle 342.
- winter moth caterpillar on, (69) 72.
- yields, variation in, relation to planning of future experiments. (68) Calif. 477.
- young, fruit setting, (65) Ind. 133.
- young, pruning, (62) Mich. 229.
- young, pruning and training, (62) Utah 838.
- washer, experimental, (69) Wash. Col. 880.
- washers, studies, (64) Oreg. 338.
- worm, control, (64) Wash. Col. 655.
- worm, Mexican, in Texas, (68) 779.
- worm, well-marked, life history and habits, (66) 649.
- worms, oriental, hibernating, distribution, (68) 222.

Fruits—

- acclimation tests, (70) Alaska Col. 332.
- acidity, effect of carbon dioxide, (69) 50.
- adaptability studies, (70) Tenn. 182.
- air-cooled v. iced storage room for, (65) Ind. 135.
- American, auctions, (68) U.S.D.A. 846.
- American dried, marketing in Europe, (68) U.S.D.A. 406.
- American, production and marketing calendar, (68) U.S.D.A. 405.
- and products, l-malic acid in, determination, (70) 445.
- and products, summary, (62) U.S.D.A. 312.
- and products, tartaric acid determination in, (64) 512.
- and seeds, biology, (63) 429.
- and soils of Wisbech area, (63) 446.
- and vegetables, marketing, treatise, (61) 584.
- arsenical residue on, studies, (63) N. Mex. 443.
- artificial ripening, (61) Minn. 38.
- as an adjunct to farms, (61) 884.
- Australian, exported to England, wastages in, (62) 850.
- blooming data, (67) N.J. 524.
- blooming, foliation, fruit setting, etc., (63) N.J. 338.
- bramble, irrigation, (69) Oreg. 364.
- breeding (61) S.Dak. 39; (64) N.Y. State 440, Ill. 836; (68) Mich. 328, N.Y. State 618; (69) 799.

Fruits—Continued.

- breeding activities, survey, (67) S.Dak. 36.
- breeding at New Jersey Experiment Stations, (70) N.J. 481.
- breeding, importance of parental genotype, (68) 749.
- breeding, progress in, (62) 139.
- breeding, recording and analyzing data, (67) 677.
- buying guide for consumers, (70) U.S. D.A. 412.
- California fresh, oriental markets, (63) 388.
- canned, determining tenderness, apparatus, (65) U.S.D.A. 190.
- canning, *see* Canning.
- carbohydrate transformation in, (68) 327.
- carbon dioxide storage, (65) 412.
- car-lot shipments, (62) U.S.D.A. 887; (67) Tex. 757; (70) U.S.D.A. 554.

 vitamins in, (62) 395.
 winter injury, (66) Wash.Col. 741.
 yield, relation to fertility, (68) 477.
 Fuchsias, horticultural history and varieties, (70) 784.
 Fuchsia conspicua, notes (62) 537.
 Fuel—
 blends, alcohol-gasoline, results from, (69) 729; (70) 400.
 briquet from southern pine sawdust, (67) 465.
 for power motors, use of wood gas, (68) 833.
 motor, use of alcohol as, (70) 253, 690.
 oils, commercial standard, (69) 729.
 research, measuring detonation, (69) 121.
 Fuels—
 and lubricants, survey, (67) 325.
 antiknock values, action of oils on, (65) 76.
 effect of knock-suppressing and knock-inducing substances, (62) 272.
 engine, of antiknock quality, detonation characteristics, (62) 882.
 for cooking in rural homes, Ind., (61) 394; (63) 597; (64) 97.

Fuels—Continued.

- for curing tobacco, comparison, (69) Conn.State 519.
- for tractor and motor vehicle engines, (64) 79.
- liquid, saturation pressure, measuring, (68) 103.
- motor, knock rating, (65) 675.
- motor, volatility, (67) 465.
- multiple, in an injection motor, tests, (69) 876.
- tests in tractor engines, (68) 832; (69) Mich. 597, 731.

Fumigants—

- and air, densities of mixture, (64) 542.
- effect on seed germination, (62) 510.
- for greenhouse pests, (67) Mass. 424.
- maximum weights in vapor form in inclosed space, (61) 545.
- new, for insect pests of foodstuffs, (66) 848.
- tests, U.S.D.A., (63) 153; (70) 501.
- toxicity, measuring, (66) 155.

Fumigation—

- gas concentrations under tents, (64) 243.
- house, with ethylene oxide-liquid carbon dioxide mixture, (67) 50.
- methods, research in, (65) Fla. 454.
- of highly adsorptive commodities, carbon dioxide as aid, (63) 458.
- of ships, new cyanogen product for, (66) 758.
- of woodwork of buildings, apparatus for, (67) 429.
- problems, protective stupefaction, application and limitations, (66) 449.
- research in Florida, (66) 758.
- use of carbon dioxide in, (62) 152.
- with cyanide, effect of Bordeaux mixture on greenhouse plants, (63) N.H. 243.

Fundella cistipennis, notes, (65) 457; (69) P.R. 825.

Fungi—

- affecting grasses of Gold Coast, control, (64) 230.
- and bark beetles, interrelations, (69) 560.
- blackroot, in Hevea, (65) 649.
- blue-staining, associated with pine bark beetle damage, (66) 645.
- blue-staining, in lumber yards, (67) 704.
- comparative morphology, treatise, (61) 513.
- cultivation, (69) 372.
- cultures, enzyme yield in, estimation, (66) 805.
- decomposition of hemicelluloses by, (66) 10.
- edible and poisonous, (67) 23.
- effect on nitrogen in soil, (61) Wis. 115.
- entomogenous, in Egypt, (70) 650.
- entomogenous, notes, (69) 372.

Fungi—Continued.

- entomophytous, action on European corn borer, (70) 810.
- film-forming, studies, (62) Calif. 504.
- growth, effect of magnesium, (70) 29.
- heterothallism and hybridism in, (69) 372.
- hyphae of, composition, (63) 722.
- in butter, (70) 238.
- in cacao beans, (64) 451.
- in cultures, ecological relations, (66) 124.

- mutations in, (63) 124.
- mycorrhiza-forming, identity, determination, (67) 512.
- new, in Province of North Dvina, (66) new, on corn in Illinois, (67) 694.
- of North America, host index, (64) 228.
- of plants in Argentina, (67) 264.
- on sugarcane borer, (63) 157.
- parasitic, of Iowa, (67) 263.
- parasitic, of Iowa, supplementary list, (69) 811.
- parasitic, in greenhouse soils, eradication, (61) Mass. 840.
- parasitic on plants, biology, (67) 401.
- parasitic, studies, (67) 690.
- pathogenic, physiologic specialization, (63) 741; (65) 442.
- phytopathogenic, genetics, (68) 748.
- plant disease, racial specialization, lecture on, (61) 741.
- precipitin-ring test, (70) 310.
- reaction to various wave lengths of light, (66) 832.
- relation to health in man and animal, (70) 382.
- relation to stored hay and corn cob meal, (69) Iowa 27.
- role in decomposition of plant material, (64) 124.
- saprophytic, facultative parasitism, (63) 243.
- sexuality in, (61) 818.
- soil, in Iowa soils, occurrence and activities, (69) Iowa 16.
- species, differentiation, (61) Mich. 443.
- spore discharge, (65) 442.
- spore excretions, solvent action on copper fungicides, (63) N.Y.Cornell 647.
- structure and development, (61) 513.
- symbiotic, of cereal seeds, relation to proteins, (61) 22.
- tropical root disease, nomenclature, (65) 537.
- variation in, (65) 522.
- virulence, effect of nutrient medium, (70) 635.

- Fungi—Continued.
 wood-destroying—
 effect of steam sterilization, (70) 354.
 in oak stumps, (66) Pa. 236.
 in timber, effect of season of felling, (69) 372.
 life conditions, (66) 844; (67) 419.
 on fallen trees, (61) U.S.D.A. 143.
 on timber of buildings, effect of fillers, (69) 680.
 on wood coated with paints and varnishes, effect, (69) 681.
 oxidases in, (67) 48.
 studies, (61) 343, 542.
 toxic chemical control, (63) 482.
 yeastlike, from gallinaceous birds, (70) Conn.Storrs 586.
- Fungicide-insecticide combinations, new, (62) 646.
- Fungicides—*see also* Sprays and specific kinds.
 against *Sphaerotheca humuli*, (62) 532.
 analyses, (61) Me. 228; (62) N.J. 524; (63) Me. 137; (65) N.J. 40, Me. 137; (66) Oreg. 336; (67) N.J. 36, Me. 674; (68) N.J. 618; (69) Me. 520; (70) N.J. 616.
 compatibility with oil emulsion-cresylic acid sprays, (69) 684.
 composition, (61) Conn.State 355; (62) Oreg. 524; (69) Conn.State 234.
 corrosive, secondary effects, (66) 835.
 determination of sulfur in, (66) 207.
 direct effect on wheat, (69) 668.
 dust, activation by external factors, (67) 690.
 dust, for control of seed-borne diseases of wheat and oats, (69) Iowa 60.
 for quick steeping of seed grains, (67) 43.
 preparation and use, (62) Oreg. 839.
 studies, (63) N.Y.Cornell 647; (67) 690; (70) Tenn. 192.
 tests for peach bacterial spot, (62) Ill. 346.
 tolerated or toxic dosage, (67) 266.
- Fungus and insect pests of the farm, treatise, (64) 228.
- Fungus—
 disease of flower gardens, (61) 347.
 diseases, clinico-mycological test, (70) 90.
 flora of soils, (65) 320.
 products, injury to plant tissues, (66) 439.

Gladiolus—Continued.

- effect of mulch paper, (64) N.Y.Cornell 632.
 forcing by lengthening day, (63) Mass. 543.
 growth, effect of storage conditions, (64) 40; (70) 631.
 hard rot, control, (63) N.J. 342.
 hard rot, corm treatments for control, (61) N.J. 743.
 juice, sulfur-reducing reaction, effect of oxidase, (66) 306.
 mosaic disease, (62) 645.
 scab, control, (61) Miss. 446; (64) Miss. 641; (66) 152; (69) Ohio 61; (70) 496.
 thrips—
 control, (67) Ohio 50, 430, 705; (68) Mich. 780; (69) N.Y.Cornell 57, 547, 827.
 control in field and greenhouse, (69) 688.
 in California, (69) 73.
 life history studies, (69) 688.
 natural protection of gladiolus corms from, (68) 351.
 new species, description, (67) 709.
 notes, (67) Ohio 50; (68) Conn.State 65; (69) N.Y.Cornell 72, Ohio 72.
 on corms in storage, control, (69) 688.
 papers on, (69) 387.
 status in United States, (69) 688.
 studies, (69) Mich. 76; (70) U.S.D.A. 499, N.Y.Cornell 803, N.Y.State 803.
 varieties, (61) Ohio 645.
 varieties, sugar content and nectar yield, (63) 757; (65) Iowa 153.
 variety tests, (70) Ill. 630.
 winter forcing, length of day as factor, (62) Ill. 337.

Glanders—

- and bone lesions, (70) 99.
 and epizootic lymphangitis, mixed infections, in Philippine ponies, (64) 477.
 bacillus, strains, (64) 379; (66) 867.
 diagnosis, (62) 167.
 in Great Britain, data, (62) 260.
 outbreak in South Manchuria, (66) 70.
 serodiagnosis for, (69) 578.

Glands—

- germ, transplantation experiments, (67) 27.
 transplantation in sheep, effect on wool growth, (67) 27.

Glandular therapy, notes, (68) Ky. 375.

Glass—

- color standards for colorimetric determination of phosphorus, (66) 609.
 electrode, description and use, (63) 312.
 electrode potentials, measuring, (64) 712.
 electrode, theory, (68) 289.
 substitute, Cel-O-Glass as medium for ultra-violet radiation of chicks, (61) N.J. 763.

Glass—Continued.

- substitute, durability, (62) 462.
 substitute, Vitaglass, for rickets prevention, (61) 94.
 substitutes, effect on rickets in growing chicks, (65) 258.
 substitutes on hotbeds and coldframes, (63) Ohio 339.
 substitutes, use, (67) N.J. 524.
 substitutes, value for raising vegetable plants, (63) Ohio 638.
 substitutes, value for transmitting sunlight to chicks, (61) Wis. 165.
 types, experiments with, (63) 445.
 ultra-violet ray, experiments, (63) 237; (67) 386.
 ultra-violet transmitting, effect on *Digitalis*, (61) 628.
 ultra-violet transmitting, types, (61) 795; (68) 192.

Gleocapsa, Azotobacter, and Oscillaria, symbiosis between, nitrogen fixation by, (70) 591.

Giricidia—

- maculata collar rot, notes, (64) 846.
 sepium as interplant for citrus, (64) P.R. 340.
 sepium as shade plant for coffee, (66) P.R. 536.

Globidium—

- gilruthi, development, (61) 272.
 invasion in the calf, (70) 676.
 sp. in sheep, (63) 573.

Globulin—

- crystalline, in banana seeds, (65) 11.
 from *Fusarium lini*, specificity, (69) 27.
 of cantaloupe seed, characteristics, (68) Minn. 10.

Gloeodes pomigena, notes, (70) Va. 494.

Gloeosporium—

- amygdalinum, notes, (70) 59.
 blight of raspberry, (61) 348.
 caulivorum and *Colletotrichum trifolii*, comparison, (65) 539.
 caulivorum, notes, (63) 245; (66) 149.
 disease of oaks, (63) 452.
 kiotoense n.sp., description, (61) 647.
 limeticolum, notes, (67) 47, 399, 400.
 musarum, notes, (61) 654; (65) 344.
 perennans, notes, (61) Oreg. 49; (69) 536.
 perennans, physiological studies, (68) 210.
 perennans, relation to woolly aphids, (61) Oreg. 540.
 pestis, proposed name, (67) 143.
 piperatum, notes, (69) 373.
 sp., notes, (64) 846.
 sp. on rose, (68) 488.
 trifoliorum n.sp., description, (66) 833.

Glomerella—

- cingulata, notes, (67) 556; (68) 62; (69) 228.
 cingulata perithecial production under ultra-violet irradiation, relation to nutrients, (68) 313.
 sp., notes, (69) 526.

- Glossina**—
 distribution in Bechuanaland protectorate, (69) 420.
 morsitans, relation to rinderpest virus, (70) 658.
 pallidipes, bionomics and control, (69) 694.
 pallidipes, trypanosome infections, (69) 420.
 palpalis, transmission of trypanosomes to fowls by, (69) 596.
- Glover's scale**, notes, (69) Tex. 384.
- Gluconic acid**, production on semiplant scale, (64) 9.
- Glucose**—
 acidic property, (68) 721.
 adsorption by fuller's earth and norit, (61) 12.
 biological estimation, (63) 207.
 dehydrogenase, preparation and properties, (70) 441.
 determination, (61) 13, 109, 311.
 effect on permeability of cell membranes to sugar molecules, (66) 621.
 fermentation by nodule bacteria, (62) 414.
 fermentation by organisms from tomato products, (62) N.Y.State 10.
 fermentation by yeast, effect of imine-forming amines, (66) 606.
 fructose, and mannose mixtures, alcoholic fermentation, (66) 112.
 in corn tissues, (67) Ohio 29, 208.
 in plant extracts, determination, (69) 174.
 loss from dried peas on soaking, (67) 621.
 oxidation by alkaline copper solutions in presence of boric acid, (61) 415.
 semi-macro quantities, modification of Hagedorn-Jensen method for, (66) Ala. 807.
 tolerance in avitaminosis, (64) 294; (68) 417.
- Glucoside formation in the commoner monoses**, (69) 166.
- Glucosides**, cyanogenetic, behavior in cherry-laurel during starvation, (61) 818.
- Glucuronic acid**—
 as growth factor in guinea pigs, (69) 616.
 production in scurvy, (69) 762.
- Glutamic acid**—
 as iron supplement for nutritional anemia, (67) 91.
 conductivity data, (64) 801.
 solubility in water and organic solvents, (70) 292.
- Glutamine** in presence of asparagine, estimation, (69) 492.
- Glutathione**—
 and ascorbic acid in animal tissues, (69) 471.
 behavior in yeast, (65) 310.
 concentration and hereditary body size in rabbits, (69) 787.
 crystalline, oxidation catalysis, (67) 197.
- Glutathione**—Continued.
 cuprous, preparation, (69) 484.
 in liver of rabbits, effect of vitamin B, (70) 727.
 in potatoes after treatment to break rest period, (70) 314.
 in substances used in treatment of pernicious anemia, (68) 569.
 iodometric titration, (66) 311.
 of blood, determination, (69) 172.
 preparation from yeast and liver, (64) 9.
 structure, (65) 11.
 studies, (63) 503; (65) 610.
- Glutathiones of liver**, microdetermination, (66) 310.
- Glutelin physicochemical properties**, (62) 202.
- Glutelins**—
 of cereal, preparation, Nebr., (67) 500; (69) 484.
 of rye and barley, (61) 801.
 studies, (65) 108; (69) 165.
- Gluten**—
 formation in wheat, effect of environment, (68) 759.
 proteins in wheat types, (63) N.Dak. 821.
 proteins, new characterization, (70) 6.
 quality, factors affecting, (69) Kans. 200.
- Glutenin of wheat**, nature and identity, (63) 408.
- Glyceride oils**, action on eggs of *Lygus pabulinus*, (68) 637.
- Glycerides of single fatty acids**, sparing action for vitamin B(B₁), (67) 779.
- Glycerine**—
 effect on germicidal efficiency of phenols, (66) 369.
 in veal broth, relation to potency of tuberculin, (69) 105.
- Glycerol**—
 administration, effect on glycogen in liver of rats, (62) 693.
 freezing and flow points for, (69) 122.
 synthesis, (63) 11.
- Glycine**—
 cupric complexes, (69) 632.
 determination, (67) 364.
 ethyl ester, apparent dissociation constant, (64) 109.
 from cells without liquid junction, acid and base constants, (65) 609.
 N-chloro derivatives, effect on anthrax spores, (63) 370.
- Glycinin**—
 A, physicochemical properties, (62) 202.
 B, physicochemical properties, (62) 202.
 of soybean varieties, differences in amino acid content, (69) 4.
- Glycocol oxidation by alkaline copper solutions** in presence of boric acid, (61) 415.
- Glycogen**—
 adsorption and hydrolysis, (70) 292.
 behavior in organism in absence of vitamin B complex, (68) 867.

Glycogen—Continued.

- extraction from fresh rabbit livers, (65) 202.
 formation in rats after administration of various acids, (70) 871.
 formation, review of literature, (70) 879.
 hydrolysis, (67) 198.
 in liver, effect of administration of glycerol, (62) 693.
 in liver of rabbits, effect of vitamin B, (70) 727.
 in tissues, determination, (67) 207.
 physiology, (62) 595.
- Glycol-ether-lignin, studies, (64) 8.
- Glycollic acid, titration in presence of ferric and cupric salts, (67) 203.
- Glycol-lignin, studies, (64) 8.
- Glycuronic acid and methylornarcotine mixture, antiscorbutic activity, (70) 426.
- Glycyl-tyrosine, titration constants, (69) 5.
- Glyoxalase, properties, (69) 485.
- Glyoxaline derivatives, antineuritic properties, (63) 196.
- Glypta—
leucotretae n.sp., notes, (66) 559.
mutica, parasite of grape berry moth, (62) Del. 754.
rufiscutellaris, notes, (63) 461; (64) 158, 751; (65) N.J. 54; (66) S.C. 653; (69) 837; (70) N.Y.State 507.
rufiscutellaris, parasite of oriental fruit moth, (63) Conn.State 159; (67) 442; (69) Mich. 561; (70) N.Y.State 813.
- Glyptocelis squamulata* control, (61) Calif. 350.
- Gnathotrichus sulcatus*, notes, (63) 161; (70) 812.
- Gnats, notes, (70) U.S.D.A. 499.
- Gnomonia—
erythrostoma, notes, (61) 348.
pseudoplatani n.sp. on maple leaves, (67) 557.
- Gnorimoschema—
glochinea, see Eggplant leaf miner.
lycopersicella, see Tomato pinworm.
operculella, see Potato tuber worm.
tuberosella n.sp., description, (65) 655.
tuberosella, new potato pest, (67) 49.
- Goat—
 butter and cream, digestion rate, (62) N.Y.Cornell 788.
 grass as weed pest in wheat fields, (62) 137.
 grass, eradication, (61) 227.
 grass, notes, (61) Calif. 328.
 grass situation in California, (63) 233.
 industry, Angora, economic survey, (64) Oreg. 368.
 lice, dipping experiments, Tex., (63) 477; (67) 705.
 lice, notes, Tex., (62) 666; (66) 70; (70) 207.
 scab, notes, (66) 866; (70) Tex. 207.
 skins, factors affecting economic value, (63) 872.
 Society, British, yearbook, (61) 859.

Goats—

- Angora—
 and mohair industry, (62) U.S.D.A. 460.
 body and fleece weights, (62) Tex. 659.
 coat of, (64) 552.
 industry, (66) Oreg. 61.
 inheritance of ridgeling characteristic, (62) Tex. 625.
 inheritance of type in, (66) Tex. 25.
 clearing brush land with, (61) Oreg. 60.
 cryptorchidism in, inheritance, (63) Tex. 126.
 diploid chromosome number, (70) Tex. 170.
 diseases in Nigeria, (66) 573.
 duration of gestation in, variation, (62) 664.
 experiments, (63) Tex. 468.
 experiments at Beltsville farm, summary, (61) U.S.D.A. 457.
 fleece weight, relation to skinfolds, (67) Tex. 723.
 foot rot in, treatments, (61) Oreg. 68.
 in Britain, helminth parasites, (64) 243.
 inheritance studies, (62) 29; (67) Tex. 665.
 lactating, fat metabolism in, (68) 664.
 lactation in, effect of specific fats, (70) N.Y.Cornell 822.
 meat infested with *Hypoderma crossi* as human food, (62) 773.
 milk, breeding and feeding, (70) U.S. D.A. 513.
 milk, British breeds, (70) 85.
 milk, improvement, N.Mex., (61) 263; (63) 473; (69) 193.
 milk secretion stimulation, (69) N.Y. Cornell 36.
 monthly treatment with tetrachlorethylene, (64) 477.
 nervous condition, (65) 426.
 new nematode parasite, (68) 75.
 parasites of, (66) P.R. 571; (69) V.I. 585.
 parasitic diseases, (61) Oreg. 68.
 pasture tests, (70) Tex. 220.
 poisoning with *Baileya multiradiata*, (70) 389.
 poisoning with *Chrysocoma tenuifolia*, (69) 421.
 poisoning with laurel, (65) U.S.D.A. 177.
 poisoning with milkweed, (64) 73.
 production in range country, (62) U.S. D.A. 160.
 ridgeling characteristic and type of lock, inheritance, (70) Tex. 170.
 scabby mouth of, (65) 71.
 secretion of parotids, (70) 826.
 serum, *Haemonchus contortus* proteins in, detection, (70) 680.
 sore mouth of, (63) Tex. 477.

- mildew, notes, (63) 839.
- seedlings, notes, (64) Ill. 837.

Gopher—

- pocket, control, (70) U.S.D.A. 498.
- pocket, food of, (70) U.S.D.A. 498.
- pocket, habits and status, (65) U.S.D.A. 49.
- prairie pocket, habits, (64) 154.

Gophers—

- in Manitoba, parasitological survey, (70) 646.
- susceptibility to *Mycobacterium tuberculosis*, (65) 570.

Gossyparia—

- spuria, *see* Elm scale, European.
- ulmi, control, (65) 456.

Gossypol—

- Carruth's D, nature of, (61) 9.
- effect on animals and products, (68) Okla. 654.
- feeding, effect, (68) Mich. 805.
- from raw crushed cottonseed, effect on dairy cattle, (68) Mich. 370.
- in cottonseed, variation during growth, (65) 631.
- poisoning, susceptibility of animals, (67) Ohio 58.
- studies, (61) 9, 802.
- toxicity, (67) 296.

Gourd and pumpkin hybrids, fertile, inheritance of factors, (68) 463.

Gourd mosaic, notes, (66) 152.

Gourds for bird houses and other purposes. (61) U.S.D.A. 449.

Government—

- cost in Massachusetts, (63) Mass. 585.
- costs, reduction, (69) Wis. 881.
- Federal, State, and local, cost in United States, (68) La. 402.
- local, cost in Larimer County, (63) Colo. 586.
- local, costs, (67) Ohio 80.
- services and system of public finance, (70) 553.

Governments, county and township, receipts and expenditures, (70) 553.

Gracilaria—

- azaleella, notes, (70) 208.
- syringella, *see* Lilac leaf miner.

Graft unions—

- defective in pear and apple, (61) Mich. 525.
- faulty, cause, (62) Mich. 434.

Grafting—

- materials and methods, (69) Ohio 49.
- methods to prevent formation of callus, (69) Iowa 48.
- preliminary budding in, (62) Mich. 434.

Grafting—Continued.

- recent successes in, (63) 518.
- study of water movement in relation to, (65) Oreg. 738.
- waxes, comparative merits, (69) Iowa 48.

Grafts—

- and buds, new wrapping material for, (61) 229.
- stand, effect of position of top bud of scion on, (67) 132.

Grain—

- acreage survey, (65) Iowa 125.
- and chopped roughage, mixed v. unmixed, (61) Ohio 457.
- and grain products in major markets, import duties, (67) 335.
- and legumes in combinations, variety tests, (67) Mich. 31.
- and roughage, mixing for cows, (61) Ohio 465.
- aphid, English, feeding habits, mechanical factors affecting, (68) 641.
- artificially drying, equipment, (64) Ill. 885.
- as food and as seed, (70) 37.
- beetle, saw-toothed—
 - biology, (68) Ark. 636.
 - in rice mills, (62) Ark. 851.
 - natural enemies, (64) 359.

 for reseeding, (68) Mont. 753.
 forage—
 culture, (63) Guam 129; (65) Hawaii 730; (69) Wash. 790.
 cutting tests, (70) Guam 762.
 fertilizer experiments, (63) Guam 129.
 glyceride fatty acids from, (69) 487.
 of Belgian Congo, (67) 125.
 production and palatability tests, (69) V.I. 512.
 tests, (69) Hawaii 643.
 trials with pedigree strains, (68) 755.
 varieties, (61) Oreg. 26; (63) V.I. 130.
 variety tests, (61) Hawaii 723; (62) 32; (63) Hawaii 223; (64) Okla. 732, Guam 823; (65) Wyo. 127; (66) Guam 426, Wash.Col. 730; (67) Wyo. 31, N.Dak. 667; (68) Wyo. 755; (69) Fla. 199, P.R. 790; (70) Wyo. 763.
 yield and composition, (62) Vt. 252.
 fungus parasites of, (61) Mass. 840.
 grown in various ways, nitrogen and minerals in, (69) 644.
 growth, factors limiting, (68) 172.
 growth, role of interspecific competition in, (68) 35.
 Helminthosporium giganteum on, (61) 746.
 Helminthosporium injury, (64) Conn. State 842.
 herbage, self- and cross-fertility and flowering habits, (68) 601.
 identification, key, (68) Kans. 468.
 in mixtures for hay and pasture, (70) N.Y.Cornell 762.
 in prairie sod, effect of frequent clipping, (70) 465.
 in Samara, (67) 706.
 in Scotland, effect of environment, (68) 468.
 Indian, and grasslands, (62) 425.
 insects affecting, (69) Kans. 232.
 introduced, notes, (65) V.I. 730.
 introduced varieties compared to native, (70) Guam 762.
 irrigated pasture, manuring experiments, (61) Kans. 126.

Grasses—Continued.

- Johnson and Sudan, difference in spikes, (63) 227.
 key for identification, (68) 610.
 lawn and pasture, tests, Fla., (62) 325; (63) 626; (69) 199.
 mixtures, tests, (65) Wyo. 127.
 nationality and strain tests, (61) 518; (68) 320.
 native, nutrient constituents, (67) Calif. 533.
 notes, (61) Ga. 125.
 of Central America, (62) 628.
 of genus Paspalum in North America, (62) 131.
 of Indiana, (62) 213.
 of Maryland, (65) Md. 129.
 of South Africa, (66) 326.
 of Southern Rhodesia, list, (68) 183.
 on alkaline v. acid plats, (65) R.I. 527.
 palatability test, (64) Guam 869.
 pasture—
 adaptability to soils of Everglades, (69) Fla. 248.
 and hay, composition, (63) N.Dak. 824.
 chemistry, (69) Mass. 705.
 comparison, (64) Miss. 432.
 composition, (68) 320.
 composition and yield, Vt., (62) 252; (65) 561.
 composition and yield, effect of fertilizers, (67) 234.
 composition, in Vermont, (70) Vt. 375.
 early, notes, (63) N.Dak. 822.
 effect of intensity of grazing, (69) 402, 403, 404.
 effect of nitrogen, (63) Ohio 31.
 feeding value during growing season, (64) Kans. 827.
 fertilizer and lysimeter studies, (67) Fla. 516.
 fertilizer experiments, (68) Okla. 609.
 grazed, fed green, hay or silage, comparison, (70) U.S.D.A. 231.
 increasing protein in, (62) 425.
 mineral-deficient, effect, (69) 403.
 notes, (61) Miss. 433; (63) V.I. 130.
 pure stands, carrying capacity, (68) Wash.Col. 806.
 seasonal composition, (70) 231.
 seasonal growth, (66) U.S.D.A. 863.
 seasonal variation in yield and composition, (63) S.C. 754.
 studies, (69) Fla. 199.
 v. hay, nutritive value, (61) 857.
 variety tests, (66) S.C. 627; (68) S.C. 754; (70) Alaska Col. 321, Ill. 609, Ga.Coastal Plain 792.
 vitamin A in, Idaho, (68) 369, 414; (69) 898.
 pedigree, for seed production, fertilizing, (68) 320.

Grasses—Continued.

- perennial, culture experiments, (68) Wash.Col. 755.
 pests of, (70) 356.
 prairie hay, of Nebraska, identification, (69) Nebr. 28.
 production tests, Alaska, (62) 127; (68) 182.
 proteins in, (68) 720.
 proteins in, effect of cutting, (65) 33.
 range, behavior, (63) N.Mex. 434.
 range bunch, composition and digestibility, (69) 405.
 range, nutritive value, Wash.Col., (66) 765; (68) 796.
 range, of Hawaii, (69) Hawaii 793.
 range, studies, (65) N.Mex. 221.
 response to nitrogen forms, (63) Mass. 525.
 rooting, (70) N.J. 575.
 seed production affected by gall midge larvae, (66) 157.
 seed studies, (70) U.S.D.A. 464.
 seed, suction-force measurements, (68) 320.
 sod-forming, root systems, (63) Fla. 226.
 solid and hollow stemmed, of southern New Mexico, (70) 321.
 studies, (61) Calif. 327.
 tests, (63) V.I. 130.
 Texas, treatise, (70) 465.
 turf—*see also* Golf.
 experiments, (63) N.J. 225.
 fertilizer experiments, (69) Mass. 643.
 growth, relation to soil acidity, (64) Pa. 120.
 nitrogen carriers, (67) Ohio 29.
 studies, N.J., (61) 725; (65) 824.
 variety tests, (70) Pa. 321.
 varieties for golf putting greens, (67) R.I. 233.
 varieties for interior Alaska, (70) Alaska 172.
 variety tests, (61) Tenn. 127, Idaho 823; (62) N.Dak. 129, V.I. 219, Tex. 627; (63) Wyo. 130, Tex. 435, Okla.Panhandle 437; (64) Oreg. 334, West.Wash. 627, Alaska 731, Kans. 826; (65) Ala. 428, V.I. 730; (66) Tex. 27, Idaho 220, P.R. 223, Alaska 626, Ga.Coastal Plain 626; (67) La. 233, Fla. 516, Tex. 668; (68) Okla. 609; (69) Kans. 200, Oreg. 354, Wyo. 791; (70) Tex. 173.
 Wallaby and teff, for range improvement, (70) Colo. 609.
 water requirements, (65) 822; (67) 234.
 weedy, injurious to livestock, (61) Iowa 873.
 wheat and quack, seeds, comparison, (62) 136.
 wild pasture, composition at successive stages, (62) 131.
 yield and composition, factors affecting, (69) Fla. 199.

Grasshopper—

- bait poisons, relative toxicity, (69) 238.
 baits, evaluation of stomach poisons for, (68) 353.
 baits, notes, (69) N.Mex. 232.
 Chinese, insect enemies, (66) 448.
 clear-winged, effect of temperature and moisture, (62) Mont. 755.
 differential, devastation of large area by, (67) 567.
 differential, growth and nutrition, (70) 807.
 lesser migratory, studies, (63) U.S.D.A. 752; (66) Utah 649.
 long-horned, notes, (68) 502.
 long-horned, on pineapples in Hawaii, (68) 500.
 meadow, new raspberry pest, (63) 458.
 problem on ranges, (68) Ariz. 782.
 red-legged, notes, (66) Utah 649; (70) Tenn. 206.
 two-striped, catalase content of females, (68) 644.
 two-striped, devastation of large area by, (67) 567.
 two-striped, feeding habits and control, (63) Colo. 254.
- Grasshoppers—
 activities, (62) 647.
 affecting tobacco, (61) Wis. 154; (63) Wis. 51; (65) Conn.State 356.
 American, control, (69) Fla. 231; (70) Tenn. 206.
 and locusts, handbook, (61) 54.
 and parasite *Sarcophaga kellyi*, notes, (68) Utah 215.
 as intermediate hosts of nematodes, (65) U.S.D.A. 181.
 as vectors of potato diseases, (65) Nebr. 348.
 bait-poisoned, arsenic in, (69) 73.
 contact angles of insecticides, (68) N.H. 216.
 control, (62) 544; (66) S.Dak. 248; (67) U.S.D.A. 151; (68) Colo. 636; (69) Kans. 232; (70) Colo. 648.
 control by plowing, (70) N.Dak. 209.
 control, fungus and bacterial diseases in, (70) 359.
 control in Canada, (68) 500.
 cyrtacanthacrine, notes, (67) S.Dak. 51.
 destruction by skunks, (66) 247.
 effect of temperature and moisture, (62) Mont. 755.
 egg deposition, poisons, attractants, and parasites, (69) Iowa 72.
 feeding habits and control, (63) Colo. 254.
 fluctuation in Manitoba and sun spot periodicity, correlation, (68) 783.
 food preferences, (65) 851.
 in Cyprus, (64) 459.
 in Mongolia, (65) 244.
 in north central Montana, (62) 155.
 in northwestern Arkansas, relative importance of species, (70) 503.

Grasshoppers—Continued.

- in northwestern Florida, control, (67) 709.
- in Nyasaland, (64) 156.
- in South Dakota, studies, (64) S.Dak. 653.
- in Utah, (66) Utah 648.
- in western Canada, increase, (67) 283.
- in western Iowa, control by airplane, (67) 567.
- injurious, in Manitoba, habits, (69) 553.
- injuriously to crops, (67) N.Mex. 50.
- nonmigratory, notes, (68) 640.
- notes, (61) S.Dak. 53; (66) Ind. 238; (69) Mont. 232; (70) U.S.D.A. 499.
- outbreak in Minnesota, (67) 567.
- outbreak in 1932, (69) 76.
- outbreak in Tennessee, (69) 73.
- outbreak in Utah, (68) 497.
- parthenogenesis and haploidy in, (68) 748.
- poison bait for, Mich., (61) 450; (68) 217.
- poisoning campaign, (67) 423.
- quantity of bait eaten by, (69) Iowa 71.
- relation to alfalfa seed production, (67) Utah 287.
- studies, (67) Mo. 424; (68) Mont. 780.
- tracheal ventilation, effect of gases, (67) 567.
- transmission of potato spindle tuber by, (65) 238; (66) 443.
- v. salt, (63) 751.
- Grassland—*see also* Grasses, Meadows, and Pastures.
- and forest soils in Rocky Mountains, nitrogen in, (70) 451.
- botanical composition, effect of treading, (65) 222.
- establishment, fertilization, and use, (68) 319.
- experiments, (63) 332.
- fertilizer experiments, (67) 124, Mass. 367.
- improvement, (65) 527; (70) 610.
- management, effect on turf, (69) 320, 792; (70) 38, 765.
- management, intensive system, (61) 257; (62) 131; (63) Mass. 361; (65) 254; (67) 157, 297; (69) 249.
- nitrogenous fertilizers for, (67) 125.
- of New Zealand, reseeding experiments, (61) 632.
- problems, (62) 424, 425.
- research in New Zealand, technic, (70) 465.
- Gravel—*see also* Road materials.
- and sand industry, simplification of sizes in, (62) U.S.D.A. 882.
- Gravitation, effect on root tips, (65) 423.
- Grazing—*see also* Range.
- and irrigated crops region of North America, (66) 881.
- areas in Alaska, surveys, Alaska, (62) 179.
- in Arizona, relation to jack rabbits, (70) Ariz. 203.

Grazing—Continued.

- lands, (69) Calif. 37.
- more profitable methods, (69) U.S.D.A. 644.
- papers on, (70) 467.
- possibilities in Alaska, survey, (64) Alaska 782.
- possibilities of Moose Pass region, (69) Alaska 157.
- privilege in national forests in Utah, (65) U.S.D.A. 141.
- relation to land planning, (69) 444.
- rotational, effect of varying rest period, (69) 644.
- rotational, efficiency, (66) Wash.Col. 769.
- rotational, efficiency in western Washington, (68) Wash.Col. 806.
- studies, (67) Ind. 533; (70) U.S.D.A. 731.
- studies, values and limitations of clipped quadrats, (70) 465.
- systems, effects, size of quadrat for studying, (64) 133.
- young or old cattle, advantages, (65) 883.
- Greases, low pressure characteristics, testing, (70) 843.
- Greece, statistics on agriculture, population, and food supply, (68) U.S.D.A. 555.
- Green bottle fly—
- chemotropic responses, (66) U.S.D.A. 454.
- larvae as therapeutic agent, (68) 646.
- larvae, photoreceptive organs, (70) 214.
- maggots, production for surgical use, (69) 267.
- Green bug—
- biology, (67) 706.
- ecology, (66) 555.
- injury caused by, (62) 544.
- notes, (61) Mich. 450.
- Green manure—
- bacteriological effects, (62) Miss. 506.
- crops, culture, (65) Hawaii 730.
- crops, diseases of unknown nature, (62) 47, 236.
- crops for corn, comparison, (65) N.J. 824.
- crops for sugarcane plantations, (67) 672.
- crops in Cotton Belt, (65) U.S.D.A. 223.
- crops, leguminous and nonleguminous, tests, (61) N.J. 715.
- crops, tests, (61) R.I. 614; (62) V.I. 219; Fla. 325; (63) V.I. 130, Hawaii 223, N.J. 331; (65) V.I. 730; (70) N.J. 452.
- crops, value, (64) Okla. 716; (69) Wis. 791.
- crops, variety tests, (69) Hawaii 643.
- effect on carbon and nitrogen in soil, (62) 816.
- effect on nitrogen fixation, (70) 16, 452.
- effect on soil composition, Fla., (65) 416; (69) 178.
- effect on soil moisture, (62) 815.

- Green manure—Continued.
 effect on tobacco, (65) 531.
 fertilizing value, (64) Ill. 809; (70) Tex. 173.
 grown on soil and added, decomposition, (66) 317.
 in citrus groves, (67) Fla. 523.
 insects affecting, (67) 565.
 plants of Dutch East Indies, insect enemies, (62) 450.
 substitute for stable manure, (69) R.I. 178.
 use, (69) N.Y.Cornell 50.
 v. manure for cotton, (68) S.C. 754.
 vetch, decomposition, relation to surrounding soil, (67) 112.
- Green manures, (63) Fla. 613.
- Green manuring—
 experiments at Woburn, (67) 17.
 project, (66) Va. 515.
 role in scab control, (64) 233.
 studies, (62) 212, Fla. 317; (63) Utah 617; (67) 124; (68) 319.
 value, (62) Calif. 727.
- Green scale—
 hydrocyanic acid gas concentration for control, (67) 711.
 notes, (62) 542; (67) 711.
 on coffee, (67) 151.
- Greenbank, W. K., obituary note, (63) Ohio 397.
- Greenheart, British Guiana, damage by marine borers in Rangoon River, (68) 500.
- Greenhouse—
 centipede, losses from and control, (61) Ind. 353.
 crops, diseases affecting, (66) Colo. 639.
 flower thrips, notes, (68) Conn.State 66.
 heating plants, design and improvement, (69) U.S.D.A. 124.
 leaf tier—
 control, (62) Ill. 353; (64) Ill. 851; (66) Ill. 245; (68) Fla. 356.
 effect of temperature on feeding, (64) 857.
 life history and habits, (66) 851.
 notes, (68) Fla. 67; (70) U.S.D.A. 499.
 on celery, control, (66) Mich. 452; (70) 803.
 spined soldier bug reared on, (65) 53.
 orthezia hosts, (68) 784.
 pests, (63) 549.
 pests, economic loss from, (70) Ill. 648.
 plants, thrips as pests, (68) 783.
 production, financial aspects, (70) 848.
 thrips, egg parasite of, (68) 507.
 thrips, notes, (66) 450; (68) 783.
 thrips on dahlias, (68) 68.
- Greenhouses—
 artificial illumination for, (67) 609.
 fumigation, (61) N.Y.Cornell 155.
 fumigation with naphthalene solutions, (70) 650.
 management, (63) Mass. 542.
 treatise, (69) 124.
- Greenhouses—Continued.
 vegetable, root knot nematodes in, (63) Ohio 452.
 Greensand, fertilizing value, (66) Tex. 17.
 Gregarines in yellow meal worm, effect on growth, (70) 215.
 Gretchena bolliana, see Pecan budmoth.
 Grevillea robusta for shade in coffee plantations, armillaria affecting, (68) 488.
 Grinder, small farm feed, description, (65) 677
 Grippe of man, influenza of horse, and distemper of dog, comparison, (68) 377.
 Gristmilling industry in Kentucky, (68) U.S.D.A. 696.
 Ground beetle as host of fowl tapeworms, (70) 248.
 Ground hogs, protection of fruit trees from, (61) Ohio 836.
 Groundsel, poisonous to cattle, (70) Tex. 530.
 Groundsels, American, poisonous to livestock, (69) 272.
 Grouse locust—
 color patterns, hybrid emergence in, (68) 747.
 color patterns, inheritance, (65) 217.
 inheritance studies, Kans., (61) 123; (64) 819.
 parthenogenesis and inheritance of color patterns, (62) 422.
- Grouse—
 of Wisconsin, studies, (65) 243.
 Pasteurella tularensis from, (69) 271.
 ruffed, flagellates, classification, (62) 671.
 ruffed, host of spirurids, (65) U.S.D.A. 182.
 ruffed, New York, investigation and propagation, (70) 355.
 ruffed, parasite of, intermediate host, (63) U.S.D.A. 155.
 sage, new species of nematode worm from, (66) 577.
 sage, survey, (70) Utah 498.
- Grove Karl Gilbert loan fund, notes, (65) 105.
- Growth—
 and nutrition, physical measures of, (62) 687.
 and salt concentration, (61) 213.
 and tryptophane, (63) 91.
 biochemical aspects, (67) 769.
 effect of raw v. pasteurized milk, (66) Ohio 689.
 effect of vitamin B, (67) 484.
 factor, new, for rats, (62) 589.
 function, application to individual and to group, (68) 746.
 in infancy, composition, (62) 393; (67) 475.
 in rabbits, hereditary size limitation, (62) 216.
 in rats, relation to acid-base balance of ration, (67) 627.
 in rats, vitamin B requirements, (64) Ill. 895.

Growth—Continued.

- intermittency, as index of health, (68) 562.
 material and growth, (64) 326.
 nature and mechanism, (69) 464.
 of parts, relation to whole in animals, (62) 822.
 processes, stimulation, (63) 427.
 rate, control, inherent defect in theory, (64) 326.
 rate, effect of diet, (67) 772.
 rate, relation to diet, (61) 291.
 records of preschool children, (63) Ohio 90.
 retarded, phenomena, (66) 891.
 studies, (66) Mo. 355; (69) 899.
 studies with liver, (62) 493.
- Grubs, root-eating scarabaeid, in cane fields, control, (62) 646.
- Grubs, white, *see* White grubs.
- Gryllotalpa—
 gryllotalpa, notes, (62) 154.
 vulgaris, results of control work, (68) 781.
- Gryllus assimilis, *see* Cricket, field.
- Gryllus domesticus, *see* Cricket, house.
- Guam Station—
 notes, (67) 639.
 report, (63) 197; (64) 899; (66) 496; (70) 893.
- Guanidine in blood of cow in milk fever, (62) 264; (66) 174.
- Guanine, ultra-violet absorption spectra, (64) 502.
- Guar as cover crop, (61) Calif. 328.
- Guava, constituents, (63) Fla. 691.
- Guava fruit rot, notes, (66) 147.
- Guava juice, canned, use, (61) Hawaii 790.
- Guggenheim Fellowships in Agricultural Science, notes, (61) 99.
- Guignardia bidwellii, notes, (64) Ark. 446.
- Guignardia sp., notes, (63) 150.
- Guinea fowl lacking flight feathers, description, (68) 466.
- Guinea fowls—
 castration, effect, (69) 198.
 feather pattern formation in, (69) 788.
 heredity in, (68) 746.
 parasite of, (65) 877.
 raising, (68) 661.
 sexual uniformism in, (68) 318.
 susceptibility to Brucella disease, (66) 276.
 tapeworm infecting, (70) 248.
- Guinea grass—
 and sorghum silage, comparison, (61) 558.
 feeding value, V.I., (62) 220; (69) 572.
 fertilizer experiments, (70) 611.
- Guinea pig—
 diseases, (70) 675.
 embryo, development, (70) 320.
- Guinea pigs—
 albino v. colored, for experimental use, (65) 625.
 atavistic reappearance of digits in, (66) 128.

Guinea pigs—Continued.

- cellular debris in vaginal smears, origin, (68) 464.
 coat color, gaging, (64) 530.
 color factors, effects in combination, (61) 218.
 different color races, Dopa reaction in, (63) 431.
 epidemic disease of, (68) 376.
 female, artificial insemination, (62) 125.
 fertility in, relation to age at first breeding, (70) U.S.D.A. 462.
 gestation period and conception in, (70) 827.
 growth differentiation in, genetic, (65) U.S.D.A. 26.
 hair growth in, (66) 129.
 hereditary and growth factors, correlation, (67) U.S.D.A. 27.
 hybrids, transplantation of tissues in, (66) 817.
 inbred families, persistence of differentiation, (61) U.S.D.A. 218.
 infectious disease, (70) U.S.D.A. 526.
 inheritance of spotting in, (66) 817.
 irradiation of ovaries, effect on oestrous cycle, (66) 423.
 lead poisoned male, effect on descendants, (68) 753.
 litter, size, weights, and mortality, relation, (61) 257; (63) 360.
 male, accessory glands of reproduction, (65) 122.
 modifying factors in, (68) 746.
 paratyphoid epidemics, (69) 869.
 parthenogenetic development of ova in, (64) 26.
 relation between expressions of fertility and vigor in, (64) 821.

 842.
 spp. growth, factors affecting, (67) 42.
 spp. on barley, (67) 403.
 stenospilum n.sp., notes, (65) 46.
 stenospilum, notes, (66) P.R. 237, 748.
 tetramera, notes, (68) 769.
 tritici-vulgaris n.sp., description, (64)
 350, 448.
 turcicum, notes, (63) 246; (68) 769;
 (69) 373.
 vagans, notes, (63) N.J. 226.
 vagans on Kentucky bluegrass, (63)
 146.
 yamadai n.sp., description, (64) 448.
 zeicola, notes, (67) 694.
 zizaninae n.sp., description, (64) 448.

Helminths—

- action on hosts, (61) 71.
 from South African Chiroptera, (69)
 420.
 in farm animals, economic importance,
 (70) 249, 675.
 new, from bushbuck in Zululand, (64)
 771.
 of livestock in British West Indies, (64)
 243.
 parasitic, of Canadian animals, (69)
 425.
 parasitic, of dogs in Marseilles, (69)
 719.
 parasitic, relation to human disease in
 Rhodesia, (69) 544.

Helodrilus caliginosus trapezoides, notes,
 (64) Kans. 882.

Helopeltis—

- bergrothi, effect on tea, (69) 555.
 bergrothi in Nyasaland, (61) 658.
 bergrothi, notes, (70) 808.
 in Sumatra, effect of relative humidity,
 (63) 783.
 theivora, notes, (61) 753.

- Hemadas nubilipennis, notes, (68) 651.
 Hemagglutininus, preparation from navy
 beans, (63) 409.
 Hematological diagnosis, treatise, (69) 709.
 Hematological investigations, comparative,
 results, (70) 91.
 Hematology, clinical, of domestic animals,
 treatise, (67) 310.
 Hematuria of native cattle in Formosa, (61)
 570.
 Hemerobius sp., notes, (61) 549.
 Hemerocallis, pollen tube behavior in, (69)
 504.
 Hemerocampa pseudotsugata, life history
 and habits, (68) 642.
 Hemerophila pariana, *see* Apple and thorn
 skeletonizer.
 Hemicellulose—
 butyric acid and butyl alcohol fermenta-
 tion, (70) 441.
 extract of apple twigs, (70) 623.
 in developing apples, (68) 334.
 in fruit trees, character, (70) 621.
 in woody plants, (65) 25.
 Hemicelluloses—
 decomposition by microorganisms, (66)
 10.
 genesis, (64) 503.
 studies, (66) 111; (67) 4.
 Hemichionaspis aspidistreae, *see* Fern scale.
 Hemileia—
 on coffee, (65) 644.
 sp., notes, (65) 344.
 vastatrix, notes, (63) 843; (65) 344;
 (69) 526.
 vastatrix, seasonal periodicity, (67) 146.
 Hemileuca oliviae, *see* Range caterpillar.
 Hemimaticera basifulva, notes, (64) 750.
 Hemiptera—
 biology, (63) 848.
 of filbert nut tree in Sicilia, (68) 783.
 of Utah, Utah, (66) 156; (70) 63.
 Hemisarcoptes coccisugus, enemy of oyster-
 shell scale, (67) 283.
 Hemispherical scale, notes, (62) 542.
 Hemiteles—
 cheboyanensis n.sp., description, (69)
 697.
 cushmani n.sp., description, (69) 697.
 hemipterus, notes, (67) 157.
 humeralis, biology, (64) 250.
 hungerfordi, life history, (69) 697.
 Hemlock—
 drought injury in Connecticut, (69)
 660.
 forest soils, microorganisms in, (68) 23.
 fruit cast, studies, (61) 349.
 in cleared stand, (66) N.Y.Cornell 638.
 light requirements, (61) 42.
 looper on balsam in Quebec, (66) 448.
 looper, studies, (66) 453.
 seed, germination, (70) 788.
 seed germination, effect of afterripening
 treatment, (64) 344.
 seedling analysis in field, inaccuracy,
 (67) 534.

Hemlock—Continued.

- spanworm, natural enemies, (67) 284.
- understory, in western white pine type, treatment, (69) 660.
- western, layering habit in, (65) 643.
- western, properties relation to uses, (62) U.S.D.A. 641.

Hemocytometer, Prym's, use, (69) 579.

Hemoglobin—

- and blood picture of nursery school children, (64) N.Y.Cornell 693.
- building and synthetic rations, (65) 893.
- building properties of soybean products, (68) 858.
- building, utilization of iron in, effect of manganese and copper, (62) 391.
- concentration by nursing rats, effect of maternal diet, (61) 792.

in blood—

- manometric determination, (65) 206.
- of anemic and healthy cattle, (69) 413.
- of cattle, (66) 464; (68) 371; (69) Kans. 257.
- of chicks, effect of confinement, (65) 259.
- of chicks, effect of iron and copper salts, (63) 864.
- of cows, (63) Ohio 67.
- of infants, (70) 561.
- of infants, rapid fall in first week of life, (69) Wis. 890.

in nutritional and hemorrhagic anemia, effect of copper and iron on, (66) 295.

maintenance on synthetic diets, (62) 190; (65) 92.

muscle, effect of diet, (61) 392.

of rats, factors affecting, (66) 490.

production—

- copper as supplement to iron, (61) Wis. 193; (67) 348.
- in rats, relation to diet proteins and vitamins, (61) 193.
- manganese as factor, (61) 90; (65) 297.
- manganese-copper-iron complex as factor, (61) 791.
- on specific proteins, (67) Iowa 473.
- relative value of inorganic and organic iron in, (67) 479.
- role of copper in, (64) 581; (67) 87.
- studies, (65) 289, 597.
- value of amino acids, (67) 92.

regeneration—

- effect of iron and copper in, (70) 872.
- effect of iron plus supplements, (67) 346, 348.
- effect of various elements, (68) 134.
- food factors in, (68) 412; (69) 145.
- in albino rats, effect of whole wheat, (61) 589.
- in anemic rats on vitamin G-deficient ration, (70) 137.

Hemoglobin—Continued.

regeneration—continued.

- in anemic rats with dietary supplements, (69) 473.
- in nutritional anemia, (61) 590.
- in nutritional anemia, effect of inorganic elements, (62) 695.
- in severe anemia, (61) 392, 393. notes, (62) 596; (67) 348, 628.
- synthesis in chicks, relation of iron and copper to, (62) 689.

Hemoglobinemia—

- production by inorganic elements, (67) 347.

puerperal, of bovines, (65) 775.

Hemoglobins in chironomid larvae, propagation and significance, (62) 241.

Hemoglobinuria—

- bacillary, immunization of cattle against, (62) 264.
- bovine bacillary, (62) 668.
- of cattle, (65) 378.

Hemophilia in men and women, (69) 508.

Hemophilus ovis, notes, (69) 717.

Hemopoiesis in liver and bone marrow of carrier pigeon, (67) 451.

Hemorrhage in spinal cord of lamb, paralysis from, (67) 168.

Hemorrhagic—

- disease in cattle, Nev., (62) 76; (63) 572; (65) 775.
- eschar type of skin lesions, etiology, (65) Ala. 471.
- septicemia, *see* Septicemia.

Hemp—

- as new crop with new uses, (66) Ill. 221.
- breeding experiments, (61) 29.
- experiments, (65) Can. 825.
- fertilizer experiments, (63) 720.
- fibers, (68) 187.
- improved variety, (63) Wis. 32.
- improvement, (67) Wis. 669.
- research in India, (66) 131.
- Russian, culture, (70) Ill. 609.
- seed, culture experiments, (66) Va. 527.
- sex in, (65) 424.
- sex in, effect of age of pollen, (64) Mich. 214.
- stalks, physical and chemical characteristics, (62) 830.
- stems, morphological and microscopic studies, (61) 826.
- sun, diseases affecting, (64) 350.
- variety tests, (68) Ill. 608.

Hempseed meal, feeding value, (66) U.S.D.A. 863.

Hen—

- double sex reversal in, (64) 821.
- ovariotomized, effect of yolk injections on plumage, (63) 328.
- with variable plumage color, (66) 422.

Hendersonia mali, perfect stage, (61) 653.

Hendersonia togniniana, notes, (67) 264.

Henequen—

- adaptation to different soil types, (70) Guam 762.

Henequen—Continued.
 as fiber crop for binder twine, (66) U.S.D.A. 225.

Hencospilus parasite, biological studies, (61) 557.

Henry, W. A., editorial, (68) 429, 430, 431, 432.

Hens—*see also* Chickens, Fowls, and Poultry.

cock-feathered laying, studies, (61) 630.

confining to screened porch, (64) Ky. 168.

cost of production, (63) Mo. 781.

costs and incomes, (64) Ill. 889.

effect of continuous light, (68) Okla. 654.

egg production, *see* Egg production.

egg-laying type, (70) 226.

feeding with corn smut, effect, (64) 469.

function of parts of oviduct, (66) 460.

hatching power, constancy, (68) 517.

judging for egg production, molting factor in, (63) N.Y.Cornell 564.

laying—*see also* Egg production.

all-mash ration for, (62) Ky. 256; (64) S.C. 668.

and nonlaying, wing and throat blood, constituents, (66) 174.

annual production, index, (68) W.Va. 797.

barley v. corn in ration, (67) N.Dak. 722.

blood as index of health and body functions, Idaho, (66) 260; (68) 375.

calcium metabolism in (62) Ky. 68.

calcium requirements, N.Y.Cornell, (69) 90; (70) 815.

causes of mortality, (61) Mich. 73.

charcoal in ration, (66) Miss. 766.

clutch size as measure of intensity, (68) Mass. 81.

confinement without succulent green feed, (69) Del. 89.

effect of all-night lights for, (67) Ohio 58.

effect of confinement, (61) Ohio 863.

effect of feeding hydrolized feathers, (61) Kans. 164.

effect of forced molting, (65) Ala. 464.

effect of forcing, (64) Okla. 763.

effect of mutilation of ovarian tissue, (68) Ill. 603.

effect of poultry house ventilation and temperature, (61) 258.

feeding experiments, (61) 862; (62) Ky. 368; (63) Ohio 862; (67) Wyo. 59.

feeding methods, (66) Wash.Col. 63.

free choice of whole grain and mash concentrate for, (67) Ohio 593.

heavy straw insulation and all-night dim lights in housing, (70) Wyo. 816.

Hens—Continued.

laying—continued.

in winter, use of electric lights for, (68) 257.

kept in wire cages, (67) Ohio 303.

metabolism of calcareous materials by, (67) S.Dak. 58.

mortality in, causes, (65) Mich. 473.

peanut meal as protein source, (66) Va. 566.

pen heating, (64) S.Dak. 668.

phosphorus requirements, (70) N.Y. Cornell 815.

protein sources for, (62) Miss. 66.

rations for, (61) Iowa 367; (66) Ala. 859; (67) Ohio 302; (68) Miss. 364.

reproductive organs, pH of, (62) 125.

rice and byproducts for, value, (66) Ark. 565; (70) La. 517.

selection, (65) 64.

short-time egg yield records, significance, (70) 225.

sunlight requirements, (62) N.Y. State 68.

vitamin D requirements, (68) Wash.Col. 797.

wheat v. barley for, (69) Calif. 88.

Michigan, rating in contest, (63) Mich. 598.

molting, hopper feeding grain to, (64) Miss. 465.

mongrel, grading, (68) Ky. 363.

nutrition on rations of varying protein content, (63) N.J. 365.

pullorum-infected and noninfected, hatchability of eggs and livability of chicks, (67) 318.

self-selection of feeds by, (66) Del. 767.

susceptibility to paratubercle bacillus, (66) 576.

variations in local prices, (65) Mo. 485.

weight, relation to weight of eggs, (64) Okla.Panhandle, 373.

White Leghorn, characteristics, W.Va., (61) 165, 863.

White Leghorn, molt, biometric study, (70) 666.

yearling v. pullets for egg production, (68) Wyo. 797.

Hepaticola hepatica—
 parasite of rats, (64) 237.
 structure and relationships, (67) 149.

Hepatitis—
 enzootic, of young pigs, (69) 579.
 enzootic, studies, (67) 451.
 idiopathic hemorrhagic, of swine, (69) 432.
 infectious necrotic, of sheep in Australia, (61) 373; (63) 874; (64) 773.
 pyemic, of sheep, (69) 110, 580.

Heptylresorcinol and hexylresorcinol, anthelmintic properties, comparison, (67) 310.

- Herbicides, fire hazards from, (69) 797.
 Hercotrips fasciatus, notes, (66) 450.
 Hercotrips spp., notes, (70) 356.
 Herculia psammioxantha attacking soybean hay, (66) 250.
 Herd improvement with foundation cow, (61) Mich. 498.
 Herediscope demonstration of dairy cattle improvements, (62) 823.
 Hereditary—
 experiment with rats, (66) 423.
 statistics and variation, treatise, (63) 816.
 Heredity—
 accepted theory, (66) 467.
 and bean anthracnose, (61) 843.
 and development, theoretical discussion, (65) 623.
 and environment, interdependence, (65) 520.
 and milking function, (68) 238.
 and natural resistance to disease, (62) 322.
 and reproduction, studies, Kans., (61) 123; (64) 819.
 and sex, (62) 624.
 and variability in beets, (68) 748.
 chromosomal theory, relation to meiosis problem, (68) 748.
 correlated, in wheat crosses, (62) 27.
 general formula, (70) 169.
 genetical interpretation of statistics, (67) 24.
 human, studies, (62) 514; (66) 523; (69) 32, 508.
 in a constant hybrid between *Aegilops* and *Triticum*, (66) 322.
 in a wheat cross, (61) 723.
 in albino cattle, (61) Wis. 123.
 in animals, (69) Kans. 193.
 in Asiatic cotton, (65) 724.
 in barley, (61) 629; (67) 375; (68) 748; (69) 190, 344.

- of morphological characters in poultry, (63) Conn.Storrs, (63) 125.
- of multiple characteristic in sheep, (70) N.H. 170.

Heredity—Continued.

- of natural immunity in animals, (63) 219.
- of oat blast resistance, (67) 267.
- of oat smut resistance, (66) W.Va. 545.
- of pea wilt resistance, Wis., (63) 46, 147.
- of piebald patterns and wall eyes, (69) 640.
- of pigments in killifish, (61) 820.
- of plant disease resistance, (64) 430.
- of plumage and skin color in fowls, (63) 327.
- of plumage characteristics in poultry, (64) Kans. 820.
- of polydactyly in guinea pigs, (69) 32.
- of polydactyly in poultry, (66) 422.
- of polymastia in cattle, (62) 823.
- of polythelia in dairy cattle, (67) Mo. 448.
- of premature germination in corn, (63) Tex. 436.
- of production of excess of either sex in fowls, (68) 78.
- of pubescence in soybeans, (61) 723.
- of reaction of corn to *Gibberella saubinetii*, (68) Minn. 55.
- of reaction of corn to smut, (68) W.Va. 462.
- of reaction to stem rust and barbing in barley, (70) 30.
- of resistance and susceptibility to pul-lorum disease, (66) Ill. 272.
- of resistance to bean anthracnose, (68) 748.
- of resistance to corn seedling blight, (67) 544.
- of resistance to Danysz bacillus, (62) 514.
- of resistance to fowl paralysis, (67) 321; (70) 247, 606.
- of resistance to hog cholera, (61) 257.
- of resistance to oat smut, (68) 343.
- of resistance to wheat stinking smut, (68) 342.
- of rust resistance, (66) 239.
- of rust resistance in a wheat cross, (66) 440.
- of rust resistance in beans, (70) Va. 460.
- of semisterility in corn, (64) 428.
- of sex in oysters, (68) 745.
- of shank-feathering in fowl, (64) 726.
- of shape in Cucurbita, (68) 603.
- of short branch in cotton, (64) 126.
- of size, (69) 193.
- of size and shape in tomatoes, (67) Iowa 385.
- of size in rabbits, (62) 323; (68) 751; (70) 758.
- of size limitation, (62) 216, 822.
- of size, linkage in, (67) 231; (68) 316.
- of skull defect in swine, (62) 625.
- of slipped tendons in poultry, (69) Kans. 249.

Heredity—Continued.

- of smut resistance in oat hybrids, (66) 440.
- of smut resistance in oats, (66) 747.
- of soft starch in corn, (65) 521.
- of sorghum tassel in corn, (6) 122.
- of spangling in fowls, (69) 195.
- of spotting in guinea pigs, (66) 817.
- of stem rust reaction and correlation of characters in wheat crosses, (70) U.S.D.A. 317.
- of stem rust reaction in wheat, (70) 31.
- of structural anomalies in rats, (66) 423.
- of swirl hair in pigs, (64) Okla. 726.
- of thyroid size, (62) 823.
- of thyroid size and structure in pure-bred dogs, (68) 748.
- of ticking factor in hounds, (61) 820.
- of trail barking propensity in dogs, (63) 219.
- of tricoloring in cattle, (70) 33.
- of tumor susceptibility in mice, (68) 747.
- of twin bunch characteristics in bananas, (63) 125.
- of twisted nose in mice, (62) 824.
- of type in Angora goats, (66) Tex. 25.
- of udder abnormality in cattle, (68) 316.
- of umbilical hernia in cattle, (66) Idaho 270.
- of variations in skull of rabbits, (68) 317.
- of vitamin A distribution in corn, (63) 816.
- of waxy endosperm in sorghum, (69) 784.
- of wheat stinking smut in crosses, (67) 140.
- of wheat stinking smut resistance, (62) 846; (67) Conn.State 535.

powdery mildew—
action of sulfur in various forms, (68) 341.
control, (61) 648.
resistant varieties, grafting experiments, (64) 232.
studies, (69) 222.
virus diseases, transmission, (62) 536.
wilt, notes, (65) 614.
- Hoplocampa—
flava, biology, (70) 68.
flava, notes, (70) 814.
minuta, notes, (64) 543.
testudinea, biology and control, (68) 652.
testudinea, control, (68) 781; (69) 561.
- Hoplocerambyx spicicornis—
epidemic attacks, (61) 757.
studies, (61) 255.
- Hoplochaitophorus, new genus, erection, (69) 388.
- Hops, fertilizer deficiencies in, symptoms, (70) 327.
Hops, fertilizer experiments, (68) 200.
Horák, Joseph, Fund, notes, (65) 600.
Horismenus depressus n.sp., description, (63) 554.
- Hormodendrum—
cladosporioides in butter, (63) Minn. 670.
cladosporioides, notes, (62) 538.
microsporium n.sp., notes, (62) 538.
- Hormone—
action following injection of pregnancy urine, external evidence, (69) 352.
female, from human pregnancy urine, effect on dogs, (65) 427.
female, in fowls, plumage and oviduct response to, (65) 28.
female, of mares, injection into immature rats, (64) 731.
follicular, chemical nature, (63) 326.
follicular, in urine of pregnant cows, (63) 326.
from urine of pregnant women, effect on immature ovaries, (62) 826.
gonadotropic, from normal urine and urine of pregnancy, preparation, (68) 607.
gonadotropic, preparation, properties, and filtration, (69) 33.
gonad-stimulating—
absence in blood and urine of patients with pituitary tumor, (69) 350.
in hypophysectomized animals, (69) 350.

Hormone—Continued.

- ground-stimulating—continued.
 in the pituitary and stage of oestrous cycle, correlation, (62) 324.
 male, chemical nature, (63) 326.
 male, standardization, (63) 222.
 male, studies, (64) 729.
 of anterior pituitary and ovarian grafts, (62) 217.
 oestrum-producing—
 and oestrum-inhibiting, in ovary of cow, (62) 516.
 effect on growth of mammary gland, (64) Mo. 214.
 in urine of cows, (64) Mo. 215.
 of anterior hypophysis for diagnosing pregnancy, (62) Calif. 726.
 of human placental origin, effect on oviduct of ovariectomized fowl, (65) 220.
 ovarian, recovery from urine of injected monkeys, (62) 325.
 plant growth, action, (70) 755.
 test, electric ejaculation, in guinea pigs, (63) 432.
 testicular—
 assay, castrated rats for, (69) 351.
 effect of freshness of testes and of desiccation of testicular tissue, (69) 352.
 preparations, assay, (69) 351.
 response of castrated male rats to injection, (69) 351.

Hormonema dematioides n.g. and n.sp., notes, (62) 538.

Hormones—

- and vitamins, relationship, (69) 465.
 corpus luteum and follicular, interaction, (62) 127.
 effect on formation of hen's eggs, (66) 860.
 gonadotropic ρ -factors, purification and properties, (69) 351.
 hypophyseal, effect on mammary glands, (63) 327; (66) Mo. 424.
 hypophyseal, impairment of birth mechanism by, (63) 326.
 hypophyseal, stimulation of placentoma reaction in virginal endometrium, (63) 326.
 oestrogenic crystalline, properties, (69) 352.
 wound, in plants, (61) 514.

Horn fly, developmental stages, length, (65) 50.

Hornet—

- bald-faced, nesting habits, (63) 359.
 European, increase in Maryland and other States, (65) 59.

Hornets, population of nest, (67) 581.

Hornets, tentative synopsis, (68) 74.

Hornworms, damage to tobacco, (63) Wis. 51; (66) Tenn. 450.

Horse—

- and tractor power, costs, (63) 280; (70) Ill. 854.

Horse—Continued.

- and zebra cross, notes, (63) 219.
 blood, mineral composition, (70) 826.
 botfly, *see* Botfly, horse.
 brain, senile changes of, (65) 869.
 business, needs of, (63) 360.
 hours and equipment cost on Missouri farms, (62) Mo. 82.
 husbandry, problems, (63) 360.
 labor, costs, (70) 848.
 leech invasion of throat of large domestic animals in Bulgaria, (69) 710.
 meat meal and Manamar, comparison, (68) Ariz. 795.
 nose flies, control, (65) 56.
 sickness, African, studies, (67) 74.
 sickness, immunization against, (64) 771.
 sickness in Southern Rhodesia, (70) 828.
 sickness, notes, (67) 452.
 sickness, papers on, (63) 872.
 sickness, prophylactic vaccination, (64) 677.
 spasm of diaphragm in, (63) 171.
 tachycardia and partial heart block in, (70) 92.
 work on farms, cost, (64) Ohio 686.
 Horsechestnut, gummosis in, (63) 250.
 Horseflies—
 Arkansas, studies, (63) Ark. 753.
 biology, (66) Ark. 549.
 biology and control, (68) Ark. 636.
 bionomics, (64) 247.
 Bourgault's trap for, (69) 73.
 of Minnesota, (67) Minn. 574.
 studies, (64) Ark. 454.
 transmission of anaplasmosis by, (67) 453.
 Horsefly—
 black, life history, (69) 243.
 black, notes, (63) La. 369.
 striped, biology, (66) 557.
 Horsemint, culture for honey production and for oil, Tex., (66) 51; (67) 705; (70) 207.
 Horseradish—
 bacterial leaf spot, description, (61) 240.
 leaf beetle in Finland, (68) 781.
 vitamin C in, (68) 861.
 Horses—
 acropachy in, (70) 92.
 anemic condition proving fatal, (65) Ind. 174.
 animal parasites of, symptoms and treatment, (66) Ill. 274.
 big-team hitches, (69) 875.
 big-team outfits, demonstrating, (69) 405.
 blood, bilirubin in after carbon tetrachloride administration, (69) 710.
 blood groups in, (68) 90; (69) 580.
 blood, in health and disease, (69) 578.
 blood, iron percentage, (69) 592.
 blood, new piroplasm found in, (69) 248.
 blood pressure in, (67) 71.

Horses—Continued.

- Bohemian, fossil remains, (62) 515.
 brain disease, (69) Calif. 104.
 breeding and breeds, (65) 27.
 breeding and feeding, (70) U.S.D.A. 513.
 breeding by artificial insemination, (65) 27.
 breeding diseases, (61) 73; (70) Ky. 240.
 breeding, health control of, (62) 260.

 budgets in money, time, and energy, standards, (69) 765.
 buying by farm families, (70) N.Y. Cornell 574.
 care and cleaning, (70) Ill. 892.
 equipment, studies, (66) Va. 598.
 insects and pests, control, (62) 355; (65) 53; (67) 428; (69) Tenn. 76.
 insects, notes, (70) U.S.D.A. 499.
 linen and clothing expenditures of rural families, (66) Miss. 694.
 machinery, electric, current consumption, (69) Ind. 156.
 pests, control, (62) 355; (65) 53; (67) 428; (69) Tenn. 76.
 tasks, energy cost, Wash.Col., (68) 874; (69) 907.

Houses—

- farm and village, foundations for, (67) U.S.D.A. 350.
- five-room, size of rooms in, (67) 350.
- insulation, economics and application, (67) 782.
- light frame, construction, (65) 780.
- ready-cut, five-room, size of rooms in, (67) 350.

Housework and marketing manual, (63) 486.

Housing—

- American, effect of social and economic conditions, (63) 497.
- and malaria, critical summary, (70) 657.
- farm and village, (68) 854.

Howardula phyllotretae n.sp., description, (69) 695.

Huber loan fund, establishment, (70) 735.

Huckleberries, insects affecting, (65) Me. 756.

Hulstia undulatella, notes, (63) Utah 251.

Human nature, biological basis, treatise, (63) 724.

Humans, fasting data, (69) Mo. 95.

Humbert-Marie José prize in agricultural economics, (64) 799.

Humic—

- acid, adsorption by, (66) 416.
- acid sol, titration curves, (70) 20.
- acid stimulation of Azotobacter growth, nature, (68) 165.
- acids, natural and artificial, (68) 451.
- matter of soil, nature and origin, (68) 451.
- substances in wood decomposition, (61) 720.

Humidification for residences, (66) 495.

Humidity—

- apparatus, description, (64) 542.
- as factor in control of leaf diseases, (61) Ohio 444.
- atmospheric, and evaporation from meal worm, (66) 853.
- atmospheric and harmattan, (62) 713.
- atmospheric, effect on death points of insects, (68) 635.
- biological effects on storage of fruit, (69) 538.
- controlling for testing textiles, (66) 394.
- effect on evaporation rate, (70) 600.
- effect on milk production, (61) N.J. 765.
- effect on superoptimal and thermal death temperatures of cotton, (70) 600.
- in air and wood in fresh-air chambers, control, (65) 323.
- measurement and control, relation to entomological problems, (66) 548.
- methods of regulation, (69) 233.
- of climate of Sweden and effects, (66) 714.
- relation to forest fires, (62) 313.
- relative, chemical control of, (69) 783.
- relative, instrument for testing, (65) 520.

Humidity—Continued.

- relative, tables, (68) U.S.D.A. 18.
- relative, thermometer for measurement, (65) 808.

Humification, estimation, hydrogen peroxide for, (66) 205.

Humine nitrogen, chemical nature, (66) 502.

Humming birds, bionomics, (68) 63.

Humus—

- chemical nature, (67) N.J. 505.
- chemical nature and origin, (68) 163; (70) 450.

compounds in soils, (70) U.S.D.A. 448.

cover in New York forests, types, (64) N.Y.Cornell 612.

electrodialyzed, reactions, (63) 211.

formation, (68) 163.

formation and decomposition of organic matter, (69) Iowa 16.

formation, comparative values of green manures, (64) Pa. 120.

formation, course, and forest litter, (66) N.Y.Cornell 613.

investigations, (65) Iowa 113.

layers in forest soil, types, (68) 299.

marine, chemical nature and origin, (70) 18.

studies, (64) Iowa 810.

type in forests of northeastern United States, (66) N.Y.Cornell 613.

Hunterellus hookeri, colony of, (66) 856.

Hunting—

- and fishing in Rhode Island, (70) 355.
- field and turf, diseases and accidents referable to, (70) 675.

Huntley Field Station, work, U.S.D.A., (61) 797; (69) 909.

Hurricane grass, control, (67) V.I. 518.

Hurricanes, West Indian, of 1932, (68) U.S.D.A. 732.

Husker-shredders, operating with electric motors, (64) Ind. 182.

Hyacinth bulbs, production, (63) U.S.D.A. 340.

Hyacinth diseases, notes, (65) 542.

Hyacinths—

effect of temperatures during flower formation, (64) 213.

forcing with artificial light, effect, (68) 192.

periodicity in, shifting, (69) 27.

Hyalomma mauritanicum, transmission of theileriosis by, (61) 175; (65) 776.

Hyalopterus—

arundinis, *see* Plum aphid, mealy.

atriplicis, vector of bean mosaic virus, (69) 387.

Hybla maculata n.sp., from Puerto Rico, (69) 72.

Hyblaea puera, notes, (67) 562.

Hybrid—

constant, of three species, synthesis of, (69) 508.

sterility and incompatibility, (66) 817.

tri-generic, of Zea, Tripsacum, and Euchlaena, (69) 345.

- Hybrid vigor—
 basis of, (68) 602.
 factor in tetragid parthenogenesis, (66) 728.
 in corn, (63) 325.
 in cotton, (64) 428; (66) Ark. 521.
 in eggplants, utilization, (64) 529.
 in kernel weight of wheat crosses, (65) 634.
 in oats, (64) 429.
 in poultry, (62) 215.
 in rats, (62) 622.
 in wheat, (65) 624.
- Hybridization—*see also* Breeding, Animal breeding, Plant breeding, and *specific animals and plants*.
 in red clover, (69) 192.
 in Ribes, (61) 429.
 in Ustilago zeae, (63) Minn. 625.
 interspecific and intergeneric, relation to plant breeding, (67) 662.
 nodules on cruciferous plants, (65) 539.
 plant, before Mendel, (64) 213.
- Hybrids—
 cytology, (66) 726.
 reciprocal interspecific, difference in success, (63) 817.
 reciprocal, paper on, (61) 215.
- Hydatid disease in Australia, control, (61) 267.
- Hydnum ochraceum, notes, (66) Pa. 237.
- Hydrangea—
 bluing and chlorosis, (69) 823.
 effect of soil reaction, (64) Ohio 635.
 flower color, effect of aluminum, (69) N.Y. Cornell 57.
 flower color, factors affecting, (67) 685.
 flower color, modification, (70) N.Y. Cornell 783.
 hortensis, Oidium affecting, (66) 842.
- Hydraulic machinery, treatise, (69) 874.
- Hydrolic acid, boiling, action on gossypol, (61) 802.
- Hydrocarbon gases, unsaturated, initiation and stimulation of adventitious roots by, (70) 27.
- Hydrocarbons—
 action on eggs of *Lygus pabulinus*, (68) 637.
 aliphatic olefin, detonation characteristics, (66) 280.
 analysis by combustion, (66) 507.
 chlorinated alkyl, anthelmintic tests, (66) 175.
 oxidation, (69) 730.
 paraffin, detonation characteristics, (65) 274.
 pure, knock ratings, (61) 379.
- Hydrocephalus—
 hereditary character in mice, (69) 194.
 in rats on stock diets, (66) Ala. 893.
- Hydrochloric acid—
 and ethyl alcohol, simultaneous effect on wood, (63) 308.
 for Bordeaux spray removal from oranges, (70) 645.
 solutions, refractive indices for determination, (68) 154.
- Hydrocyanic acid—
 evolution from calcium cyanide, (62) 448.
 for insect pests, (62) 449.
 gas concentration, determination, (61) 546.
 gas concentration, relation to kill of scale insects, (67) 711.
 gas, diffusion, (66) 753.
 gas, effect on California red scale, (69) 388.
 gas, forcing plant growth with, (63) 428.
 gas fumigation for household insects, (67) U.S.D.A. 428.
 gas fumigation of pecan nursery stock, effect, (68) 782.
 gas, fumigation with sustained and dissipated vacuum, (69) 75.
 gas, maximum weights in inclosed space, (61) 545.
 gas penetration into 140-lb. bags of flour, (70) 359.
 gas, toxicity, increasing with auxiliary gases, (70) 503.
 producing plants, poisonous to livestock, (67) U.S.D.A. 165.
 sprayer, air jet, (66) 758.
 toxicity, (61) 656.
- Hydroecia micacea, *see* Potato stem borer.
- Hydroferrocyanic acid, manganometric determination, (61) 501.
- Hydrofluoric acid in factory smoke, effect on grazing cattle, (69) 578.
- Hydrogen—
 as a fuel, (70) 254.
 cyanide fumigation, covers for confining gas, (62) Tex. 652.
 cyanide fumigation, effect on foods, (64) 582.
 cyanide, penetration into living cells, (61) 121.
 determination in gas mixtures, (69) 171.
 electrode vessels, Clark, shaker for, (61) 12.
- Hydrogen-ion—
 apparatus, portable, description, (62) 11.
 concentration—
 determination, method, (61) 309.
 determination, use of wide-range indicators for, (66) 503.
 equation, nomogram for solving, (68) 727.
 in butter, determination, (66) 409.
 in soils, (66) Vt. 615.
 in soils, determination methods, (68) 293.
 measurement, (63) 312.
 measurement, problem of dilution in, (66) 503.
 measurement, treatise, (63) 609.
 monograph, (61) 610.
 photometric determination, two-color indicators for, (66) 308.
 studies of water, peat, and soil in swamp land, (66) 124.

- Hydrogen-ion—Continued.
 concentration—continued.
 variation with carbon dioxide pressure, (64) 10.
 determination—
 and importance in chemistry, treatise, (62) 707.
 in solid media, methods, (62) Pa. 311.
 with glass electrode, potentiometer for, (62) 607.
 in ionic exchange and hydration, (70) Mo. 157.
 phenomena in plants, (69) 26.
- Hydrogen—
 ionization, role in insect control, (65) 651.
 ions, adsorption, effect on gelatin, (61) 502.
 peroxide—
 determination, (70) 296.
 effect on soil organic matter, (68) 304.
 for estimating humification, (66) 205.
 germicidal value, effect of sulfates, (65) Wis. 471.
 in complex mixtures, determination, (69) 485.
 rate of decomposition, effect of copper and lead ions, (65) 504.
 replaceable, determination in manganese dioxide-free soils, (66) 315.
 semimicro determination, (70) 297.
 sulfide, production by *Salmonella pulorum*, effect of temperature, (64) 775.
 swells in canned fruits, prevention, (64) 282.
- Hydrometer—
 for estimating total solids in irrigation water and soil extracts, (70) 443.
 for soil analysis, new type, (67) 212.
 method of analysis, graphical solution of data, (66) U.S.D.A. 279.

Insulating—

- board, production from cornstalks, (66) 182; (69) 120.
- material for buildings, tests (61) Colo. 177.
- materials, methods of testing, (63) 180, 181.
- materials, tests, (62) 675.
- materials, thermal conductivity, (70) 548.

Insulation—

- economical thickness, (62) 572.
- for house construction, (70) 549.
- of buildings, (63) 181.
- of storage houses, (62) Pa. 81.
- on the farm, (69) 600.
- thermal, survey, (70) 264.
- thermal conductivity, (70) 262.

Insulin—

- action in normal persons, (61) 297.
- and pituitrin, interaction, (61) 567.
- commercial, vitamin B in, (61) 694.
- effect on gastric motility in vitamin B deficiency, (61) 193; (63) 394.
- role in carbohydrate metabolism, (62) 595.

Insulin-like substance of yeast, nonidentity with insulin, (63) 311.

Insurance—

- agricultural, in Canada, (69) 610.
- fire, *see* Fire.

Insurance—Continued.

- mutual, papers on, (66) 887.
- of farm families, (69) Mich. 746.

Intelligence in man, inheritance, genetical formula, (69) 32.

Inter-American Conference on Agriculture, Forestry, and Animal Industry, notes, (62) 400.

International—

- Agricultural Mortgage Credit Company, scope and organization, (69) 604.
- agricultural statistics, terminology and bases for, (62) 582.

Association of Dairy and Milk Inspectors, report, (64) 70; (65) 865; (69) 708.

Association of Milk Dealers, proceedings, (63) 869; (65) 259; (70) 89.

cattle atlas, (65) 660.

Commission of Agriculture, annals, (64) 567.

Conference of Agricultural Economists, editorial, (63) 601.

Conference of Agricultural Economists, proceedings, (63) 883; (65) 78.

Conference on the Rat, (67) 420.

Congress of—

Agriculture, meeting at Budapest, Hungary, (70) 736.

Agriculture, papers, (62) 276; (65) 581.

Entomology, proceedings, (62) 646; (63) 845.

Genetics, editorial, (67) 497.

Genetics, notes, (65) 500; (66) 200.

Genetics, proceedings, (68) 745.

Plant Sciences, papers, (61) 327.

Soil Science, guide-book for excursion, (64) 796.

Soil Science in Russia, (63) 799.

Soil Science, notes, (62) 300.

Congresses in 1930, (61) 100.

Cooperative Congress, proceedings, (65) 87.

Country Life Commission, report, (62) 486; (65) 586.

Dairy Congress meeting in 1931, notes, (63) 400.

Horticultural Congress, notes, (62) 500.

Institute of Agriculture, administration and control, (65) 79.

Institute of Agriculture, monograph, (66) 87.

Road Congress, program for, (63) U.S.D.A. 677.

Society of Sugarcane Technologists, proceedings, (65) 530.

Soil Congress, notes, (61) 100, 800.

trade in citrus fruits, (63) 284.

yearbook of agricultural legislation, (61) 289.

yearbook of agricultural statistics, (61) 289; (62) 582.

Zoological Congress, papers at, (62) 241.

Intersexuality, mammalian, new type, (62) 30.

Intestinal—

- canal of animals, pH value on vitamin B-deficient diet, (61) 794.
- contents, pH of, effect of lactose and acid base value of diet, (66) Mich. 489.
- disorders, diet for, (66) 490.
- flora, human, effect of exclusive meat diet, (64) 579; (66) 690.
- flora of rachitic rats before and after ultra-violet ray treatment, (69) 473.
- permeability for bacteria, effect of vitamin A deficiency, (67) 483.
- putrefaction, Bergeim test for, (62) 298.
- tract of chickens, pH values, (70) 78.
- tracts of rachitic rats, motility, (62) 298.
- worms in poultry, iodine for, (61) Mich. 469.
- worms in poultry, prevention, (61) Ill. 772.
- worms in sheep and goats, control methods, comparison, (67) 601.

Intestine, small, role in nutrition, (64) 92.

Intestines—

- bacterial flora and pH value, effect of vitamin deficiency, (67) 483.
- of horse, surgical operations on, value, (69) 710.
- of rats, pH of, (61) 388.

Inulan and inulin, (63) 310.

Inulin—

- and inulan, (63) 310.
- effect on meristem in roots of Compositae, (66) 520.

Invertase—

- adsorption of, (65) Mich. 413.
- distribution in normal and potassium-starved bean plants, (70) 754.
- properties and activity, effect of pH, (68) 13.

Invertin, liberation from yeast, (70) 742.

Investor's stake and his attitude, (69) Mo. 601.

Iodide—

- in blood, food, and urine, determination, (69) 633.
- salts, continued administration, effects, (61) 393.

Iodine—

- absorption of serum lipids of rats, (70) 274.
- addition to milk, effect on bacterial growth, (69) Ohio 99.
- and goiter in Far East, (70) 889.
- and goiter problems in New Zealand, (69) 315.
- and mercurochrome, germicidal value, (67) 165.
- application as index to maturity of apples, (61) 527.
- as disinfectant, (70) 103.
- colloidal—
 - daily feeding to poultry, value, (66) Mich. 173.

Iodine—Continued.

colloidal—continued.

- for animal parasites, Mich., (61) 768; (64) 261; (65) 772.
- for blackhead control in turkeys, (66) Mich. 173.
- for dairy calves, (65) N.Y. 864.
- distribution in nature, relation to goiter, (64) 599.
- distribution, potato as index, (62) 893.
- effect of crops, (64) Oreg. 317.
- effect on abortion development, (68) 229.
- effect on growth, (66) W.Va. 560.
- effect on growth and development, (63) 760.
- effect on hemoglobin regeneration in dogs, (63) 897.
- effect on mosquito larvae, (67) 55.
- effect on nitrogen fixation, (70) 306.
- effect on yield of head lettuce, (61) Oreg. 18.
- fed pregnant ewes, effect on offspring, (67) Iowa 444.
- feeding to dairy cows, (63) Ohio 67.
- fertilizing value, (62) S.C. 615.
- for avian coccidiosis control, (64) 776.
- for foot-and-mouth disease, (68) 668.
- for goiter in newborn lambs, (64) Ohio 678.
- for livestock in central Pennsylvania, (68) 229.
- in Alberta, distribution, relation to goiter, (68) 713.
- in blood, determination, (64) 713; (65) 314.
- in butterfat, determination, (68) 156.
- in eggs, Ohio, (64) 667; (67) 58.
- in Florida grown crops, Fla., (65) 434; (67) 505.
- in human skim milk, (70) 138.
- in Kentucky soils, (68) Ky. 297; (69) 497.
- in *Laminaria digitata*, mode of combination, (63) 203.
- in limestone and soil, (66) Ky. 119.
- in Maryland waters, relation to goiter, (61) 393.
- in milk, (67) Ohio 65; (70) Ky. 230.
- in nutrition, (61) 590.
- in nutrition in coastal Mid-China, (69) 463.
- in nutrition in North China, (64) 581.
- in Pennsylvania vegetables, (68) Pa. 474.
- in plants, (62) 509.
- in plants, effect of iodine manuring, (63) 723.
- in plants, factors affecting, (64) S.C. 617.
- in red clover, (66) Ky. 131.
- in soils, (70) Ky. 156.
- in thyroid glands, factors affecting, (65) 97.
- in thyroid glands of sheep, seasonal variation, (62) 254.

Iodine—Continued.

- in thyroid of fowl, relation to age and sex, (63) 726.
 numbers of serum lipids in rats on fat-free diets, (70) 274.
 occurrence, relation to endemic goiter in New Zealand, (67) 487.
 organic, for abortion control, (65) N.J. 872.
 oxidation of cysteine with, (70) 292.
 preparations, anthelmintic value, (66) Mich. 173.
 requirement of rats, (70) 888.
 requirements of sheep, (61) Iowa 362.
 samples containing traces of, ashing apparatus for, (68) 587.
 selected references on, (70) U.S.D.A. 559.
 starch reaction, factors affecting, (65) 313.
 survey of Nebraska, (62) 191.
 survey of New Zealand livestock, (70) 515.
 test for field corn, (67) 208.
 toxicity for tubercle bacillus cells, (69) 425.
 traces, determination, (62) 807.
 use in veterinary practice, (62) 770.
 vermicial action, (62) 173.
 vermicial value, Mich., (61) 469; (65) 176.
 Ion antagonism, (68) Minn. 6.
 Ionenes, synthesis and vitamin A structure, (68) 723.
 Ionization, variation of antitoxic quality as function, (63) 516.
 Ions—
 divalent, migration data and theory of complete dissociation, (61) 708.
 intake and exosmosis, (70) 311.
 selective absorption, (70) 455.
 Iowa—
 Beekeepers' Association, papers, (67) 156.
 College, notes, (61) 199, 598; (62) 697; (63) 97, 398; (64) 300, 698; (65) 300; (66) 200, 696; (67) 351; (68) 284; (69) 319, 478; (70) 431, 732.
 Farm Bureau Federation, aims and activities, (66) 482.
 Station, notes, (61) 199; (62) 697; (63) 97, 398; (64) 300; (65) 300, 900; (66) 200, 696; (68) 284; (69) 319, 478; (70) 732, 894.
 Station, report, (61) 394; (64) 899; (65) 198; (67) 494; (69) 158.
 Ipecac for treatment of blackhead of turkeys, (63) Idaho 577.
 Ipidology, international union, founding, (64) 544.
 Iprobracon—
 granadensis, notes, (62) 154.
 parasites of moth borers, (63) 257, 552.
 rimac as sugarcane borer parasite, (67) 715.
 rimac, collecting in South America, (67) 57.
 spp., notes, (69) U.S.D.A. 692.

Ipomoein from sweetpotatoes, (67) 3.

Ips—

- cembrae, biology and ecology, (65) 852.
 pini, larval development, (69) 835.
 spp., hibernation habits, (69) 73.
 typographus, notes, (67) 426.
 Iridomyrmex humilis, *see* Ants; Argentine.
 Irodomyrmex iniquus, establishment in United States, (61) 256.
 Iris—
 ascorbic acid from, method of obtaining, (69) 773.
 borer, control, (64) Mich. 240.
 borer eggs, development, (64) Iowa 851.
 borer, natural enemies, (62) 856; (66) 351.
 borer, studies, (63) 52.
 Botrytis rhizome rot, (69) N.Y. Cornell 61.
 breeding, (67) Tex. 673.
 chromosome number in, (61) 24.
 culture experiments, (62) S.C. 636.
 diseases, (65) N.J. 352, 542.
 hybrids, cytological study, (62) 215.
 insects affecting, (64) 358.
 leaf spot, notes, (66) 152.
 mosaic disease, control, (61) Oreg. 44.
 mosaic, transmission, (64) Oreg. 346.
 new *Heterosporium* parasitic on, (65) 242.
 notes, (66) Can. 828.
 of southern California, (62) 143.
 resistance to *Heterosporium gracile*, (61) 841.
 response to soil reaction, (68) 485.
 rhizome, morphological structure and reproduction, (67) 261.
 rust, notes, (63) Ind. 541; (67) 556.
 sclerotial rot, notes, (66) 152.
 seedlings, description, (64) Can. 538.
 soft rot, notes, (66) 152.
 stem nematode affecting, (62) West. Wash. 532.
 variety tests, (65) N.C. 136; (67) Tex. 673; (69) Kans. 210.
 Irish Free State, agricultural education and research in, notes, (61) 500.
 Iron—
 absorption by plants, role of lime in, (66) 121.
 absorption from highly organic acid soils, (70) N.C. 746.
 accumulation in nodes of corn plant, (61) Ohio 445.
 added to dried milk, effect on hemato-poietic properties, (64) 493.
 addition to diet, effect, (64) 581.
 and aluminum, effect on mortar strength, (62) 271.
 and aluminum, movement in soils, (63) N.J. 317.
 and amino acids, mode of combination, (65) 10.
 and chlorophyll in green and chlorotic pear leaves, relation, (69) 637.
 and copper and salt mixture for cattle and swine, (69) Fla. 248.

Iron—Continued.

- and copper, effect on growth and reproduction in rats, (70) 130.
- and copper supplements in exclusive milk diet for calves, (69) Ohio 99.
- and copper treatment of anemia in children, (65) 690; (67) 485.
- and other substances, effect on blood regeneration, (61) 590.
- and proteins, mode of combination, (65) 10.
- assimilation by tissues of rats, effect of copper sulfate, (69) 616.
- availability, effect of calcium and magnesium carbonates, (63) 813.
- availability, effect of liming, (68) 456.
- availability in cereals, (69) Wis. 890.
- balance in plant metabolism, (62) 618.
- calcium determination in presence of, (63) 415.
- cast—
 - alloyed, characteristics, (67) 324.
 - corrosion, (62) 881.
 - effect of under-stressing, (65) 75.
 - elastic properties, (62) 880.
 - fatigue properties, (62) 880.
 - heat treatment, (62) 882.
 - impact testing, (62) 881.
 - machineability, (62) 881.
 - physical properties, factors affecting, (62) 880.
 - pipe, mechanical joints for, (70) 400.
 - plain and alloy, static strength, (62) 880.
 - static and fatigue properties, (63) 278.
 - wear testing, (62) 881.
 - welding technic, (66) 281.
- catalysis, mechanism in certain oxidations, (66) 711.
- catalyzing action of manganese on, (69) N.Y.Cornell 25.
- complexes of thiol acid with, (63) 312.
- copper determination in presence of, (63) 205.
- corrosion and colloids, (69) 323.
- deficiency, effect on citrus growth, (68) Calif. 459.
- deficiency in rats and mice, (66) 490.
- deficient diets, effect on rats, (69) 698.
- dialyzed, precipitation of proteins with, (63) 206.
- distribution in plants, (67) N.J. 508.
- effect on anemia of rats, (66) 295.
- effect on anemia of rice disease, (62) 596.
- effect on citric acid fermentation of *Aspergillus niger*, (67) 645.
- effect on nitrogen fixation, (70) 306.
- for anemia treatment, (64) 795; (66) 597; (68) Ill. 653.
- for yellow lupines on limed soils, (70) 795.
- fractions in plant tissues, variation, (63) N.J. 323.
- galvanized, solubility in milk, (65) Wis. 469.

Iron—Continued.

- gray, physical properties, effect of sulfur, (63) 379.
- in biological material, determination, (64) 712; (66) 310; (70) 154.
- in blood, determination, (67) 105; (68) 730.
- in Chinese foods, (61) 589.
- in dairy products, determination, (70) 445.
- in diet, calculation, (61) U.S.D.A. 191.
- in diet of children, value, (67) 484.
- in dry milk, (65) 290.
- in egg yolk, (70) Ky. 219, 820.
- in eggs, effect of hens' diet, (62) 789.
- in feeding stuffs, (68) 442.
- in fish, (69) 752.
- in liver and liver extracts, (69) 463; (70) 717.
- in milk and other biological materials, determination, (69) 493.

- in nutrition, (61) 70; (62) 190, 688.
- in organs and body fluids, determination, (65) 312.
- in plant tissue fluids, studies, (61) N.J. 718.
- in plants, distribution, relation to pH of sap, (68) 175.
- in plants, factors affecting, (63) 723.
- in protein foods, utilization, (67) 185.
- in rats at different ages, (61) 790.
- in serving portions of common foods, (66) 292.
- in submerged soil solutions, (64) 16.
- in vegetable leaves and shoots, (64) 581.
- in vegetable tissues, Miss., (62) 111; (64) 493.
- in vegetables and fruits, (67) U.S.D.A. 85.
- in vegetables, conservation, (64) Mo. 691; (65) Miss. 891.
- in vegetables, variation in, (64) Miss. 692.
- inorganic, supplementary value for milk diet, (61) 490.
- inserted into tree trunks, effect, (66) Idaho 235.
- intraperitoneal injections, effect of nutritional anemia, (69) 904.
- loss in cooking broccoli, (69) 615.
- metabolism, action of copper and other elements in, (70) 274.
- metabolism, action of copper in, (68) 128, 702, 703.
- metabolism, research on, results, (65) 690.
- necessity for growth of Lemma minor, (69) N.Y.Cornell 25.
- of meats v. iron of other protein foods, utilization, (61) 791.
- open-hearth, effect of under-stressing, (65) 75.

Iron—Continued.

- organic and inorganic, in hemoglobin formation, (67) 479.
 organic, effect on rice soil, (68) Ark. 24.
 oxidative titration, bianisidine as internal indicator, (68) 581.
 oxide, feeding to pigs, value, (64) Iowa 866.
 parenterally administered, effect, (70) 885.
 percentage of horse blood, (69) 592.
 permanganate titration, (61) 502.
 phosphate, availability for plant nutrition, (68) Ariz. 307.
 plus supplements, effect on hemoglobin regeneration, (67) 346, 348.
 reduced, for cultivation of anaerobes, (69) 866.
 relation to growth stimulation by humic acid, (68) 164.
 relation to reticulocyte response in anemic rats, (70) 872.
 relation to tyrosinase, (69) 486.
 replaceable, in soils, (66) 417.
 requirements of children, (65) 290; (67) 475.
 retention by pregnant women, (68) 412.
 retention during growth and utilization, (61) 257.
 role in blood regeneration, (70) 872.
 salts as precipitants for blood proteins, (66) 808.
 salts, different, relative effects on young rice, (67) 23.
 salts, effect on hemoglobin in chicks, (63) 864.
 salts for lime-induced chlorosis, (65) Calif. 150.
 saturated soils, effect on biochemical processes, (70) 592.
 sulfate, effect on citrus rots, (69) 676.
 sulfate, use in Connecticut orchards, (68) 496.
 supplements for pigs, effect on blood, (62) Ill. 365.
 supplements in poultry ration, value, (63) Wis. 64.
 supplements in treatment and prevention of nutritional anemia, (67) 346.
 systems, complex, potentiometric studies, (65) 204.
 therapeutic activity, effect of copper and manganese, (68) 859.
 therapy, optimum, for anemia, (63) 896.
 tolerance limit of seedlings for, (68) 30.
 v. liver extract for anemias of infancy, (68) 127.
 wrought, effect of phosphorus in, (64) 779.
 yeast, and cytochrome, (69) 632.
- Ironing napkins, energy cost, (68) Wash. Col. 874.
- Irons, electric, current consumption, (69) Ind. 156.

Irradiation—

- effect on calcium and phosphorus utilization, (69) 406.
 effect on foot-and-mouth disease virus, (62) 668.
 of feeds of dairy cows, effect, (66) Wash.Col. 768.
 of food products on commercial scale, feasibility, (61) Wis. 195.
 of udders of dairy cows, effect, (66) Wash.Col. 768.
 types, effect on growth of chicks, (68) Idaho 363.
- Irrigation—
- and drainage, (68) Utah 255, Idaho 384; (70) U.S.D.A. 686.
 and drainage districts, financial rehabilitation, Ariz., (69) 720; (70) 837.
 and drainage of rice fields, papers on, (65) 628.
 and water supply, (61) 381.
 by use of deep wells, (64) Oreg. 385.
 canal structures, (67) 751.
 canals, weed control in, (61) 830.
 canvas hose system, (69) 873.
 channels, measuring water in, (66) U.S.D.A. 672.
 companies, commercial, (63) U.S.D.A. 389.
 cost of pumping for, (67) Colo. 173, 606.
 deliveries in Punjab, measuring, (64) 778.
 development under Reclamation Service, (64) 276.
 District, farmers', of Nebraska, (70) U.S.D.A. 849.
 District, Merced, incomes and expenses on properties, Calif., (69) 293, 881; (70) 550.
 districts in California, (61) 877.
 districts, organization, operation, and financing, (66) U.S.D.A. 77.
 districts, refinancing, (69) 444.
 districts, rehabilitation, (63) 275.
 Division, Special, of Bombay, research work, (65) 383.
 effect on alfalfa white spot, (65) 44.
 effect on arid soil, (67) 16.
 effect on berry crops, (65) Oreg. 740.
 effect on farm machinery design and development, (65) 575.
 effect on rice soils, (62) Ark. 811; (64) Ark. 417; (65) 212.
 effect on soil fertility, (69) Idaho 871.
 efficiencies in, (67) 322.
 engineering works, suitability of soils, (66) 472.
 enterprises, defaulting, financial settlements, (61) U.S.D.A. 785.
 experiments—see also special crops.
 (63) Utah 677; (64) Oreg. 334, Kans. 829; (67) Can. 463; (68) 827; (69) 437.
 relation to permanent wilting percentage, (67) 322.

Irrigation—Continued.

- farming, costs, (62) Colo. 281.
 for forage crops, (67) Mont. 518.
 for rice in Calauan, Laguna, (65) 879.
 hydraulics, standard symbols and glossary of terms, (67) 750.
 in Java, importance, (65) 530.
 in western Oregon, (66) 377.
 information for beginners, (68) U.S.D.A. 255.

 methods, effect on fruits, (66) Wash.Col. 742.
 need for, (66) Mich. 472.
 of cotton in the Sudan, (68) 38.
 of desert soils, (67) Nev. 462.
 on demonstration farm unit, cost, (61) Oreg. 684.
 orchard, sprinklers in, (64) Wash.Col. 685; (64) Wash.Col. 776; (67) 175, 425.
 pipes, studies, (62) U.S.D.A. 778.
 practice and engineering, treatise, (69) 720.
 practices in Hawaii, developments in, (68) 99.
 principles and practices, treatise, (68) 537.
 project, Flathead, economic analysis of production problems, (64) Mont. 782.
 project, Newlands, economic history, (64) Nev. 186.
 project, Salt River Valley, studies, (62) 282.
 projects, (61) 285.
 projects, Federal, payment of construction costs, (69) 442.
 projects, water shortages on, alleviating, (67) 322.
 pump, costs and returns, (68) Nebr. 100.
 pump, power, and piping requirements, (67) Mich. 463.
 pump, problems, (70) Nebr. 104.
 pump, studies, Nebr., (61) 877; (69) 596.
 pumping plants, (61) Colo. 276.
 pumping plants, installation and operation, (67) Idaho 463.
 requirements of arid and semiarid lands, U.S.D.A., (63) 580; (70) 539.
 requirements of Columbia River Basin, (64) U.S.D.A. 269.
 research, (67) N.Mex. 76.
 residual effects on succeeding crops, (68) Colo. 608.
 residues, stream pollution by, (69) 117.
 rice, duty of water for, (63) 177.
 rotations under, (69) Nebr. 512.
 service, Venturi meter for, (64) 886.
 sewage, (67) N.J. 605.
 soil survey, (68) 736.
 spray, symposium, (70) 104.
 spray, tests of equipment, (66) U.S.D.A. 580.
 statistics of California, index to State sources, (66) U.S.D.A. 189.

Irrigation—Continued.

- studies, (61) Utah 75, N.Mex. 275, Calif. 378; (63) Wash.Col. 275, N.Mex. 482; (65) N.Mex. 272, Calif. 778; (66) Idaho 277; (68) Mich. 384, Colo. 679, Wash. 827; (69) Calif. 16, N.Mex. 282; (70) U.S.D.A. 538.
 subterranean, (64) 521.
 supplemental, on Atlantic coast, (63) 275.
 supplemental, 25 years of experiments, (67) Oreg. 750.
 surface, in Eastern States, (64) U.S.D.A. 181.
 system for farm garden, Okla.Panhandle, (61) 177.
 systems on rice farms, (64) La. 684.
 use of windmills in, (63) Okla.Panhandle 482.
 v. dry farming, (64) Mont. 269.
 v. dry farming under the ditch, (67) 322.
 water—
 annual charges in upper San Joaquin Valley, (69) 452.
 application, (61) Idaho 876.
 boron in, (66) U.S.D.A. 622.
 cost in California, (69) 451.
 depth for lowland rice, (62) 474.
 duty of, Oreg., (61) 27; (64) 385.
 evaporation, (68) 740.
 loss, well-plugging program for, (70) 688.
 measurement, (61) Utah 774.
 quality, (70) 688.
 quantity of salts carried, (70) U.S.D.A. 448.
 requirements of citrus and avocados, (63) Calif. 579.
 salinity, measuring with Wheatstone bridge, (68) U.S.D.A. 15.
 solids in, hydrometer for estimating, (70) 443.
 units of measurement and application, (62) Wash.Col. 271.
 with alkali water, (70) 251.
 works exposed to water, soil suitability for, (68) 255.
 Isaria farinosa, notes, (70) 810.
 Isariopsis griseola, notes, (66) 147.
 Isoagglutinins in blood of cattle, papers on, (62) 667.
 Isoergosterol, heat of combustion, (62) 693.
 Isoergosterols, relation to vitamin D, (64) 504.
 Iso-hemagglutinogens in rabbits, inheritance, (69) 509.
 Isopods as intermediate hosts of nematodes, (65) U.S.D.A. 181.
 Isorotenone, toxicity of goldfish, (65) 547.
 Isoleucine, apparent dissociation constants, (67) 196.
 Isospora lacazei affecting sparrows, (62) 267.
 Ithycerus noveboracensis, *see* New York weevil.
 Ittys new species, description, (67) 443.
 Ivy bacterial leaf spot, (69) N.Y.Cornell 61

Ixodes—

- auritulus in North America, (70) 218.
- holocyclus, cause of paralysis in dogs, (68) 252.
- ricinus, *see* Castor-bean tick.
- sculptus, life history and habits, (69) 697.

Ixodiphagus caucurtei—

- latent parasitism, (65) 59.
- paper on, (61) 656.

Ixodoidea of Argentina, (66) 160.

Jaagsiekte in sheep, papers on, (63) 171.

Jack fruit mold, notes, (65) 344.

Jack fruit, notes, (66) P.R. 228.

James Turner Research Institute, notes, (67) 640.

Japanese beetle—

- contact sprays for, (70) U.S.D.A. 215.
- control, (64) 52; (70) U.S.D.A. 501.
- control by soil treatment, (62) 157.
- control in rose greenhouses, (69) 83.
- control of larvae in lawns and golf courses, (68) U.S.D.A. 72.
- control on fruit and shade trees, (68) U.S.D.A. 72.
- control with soaps, (62) 656.
- digestive tract, anatomy and physiology, (63) 755.
- distribution, (67) 577.
- distribution in 1929, (63) 853.
- distribution in United States in 1930, (65) 57.
- effect of feeding on geraniums, (61) 555.
- electrical trap for killing, (63) 463.
- flight duration, (67) 577.
- funnel traps for, (70) 651.
- glucose content, changes in, (69) 695.
- growth curves, effect of temperature, (67) 716.
- grubs, predacious insects attacking, (61) 358.
- immature, hot-water treatment for, effect on plants, (61) 546.
- imported parasite of, (66) 158.
- in Connecticut, Conn.State, (65) 451; (68) 65; (69) 546.
- in New Jersey, (64) 248.
- in 1932, economic status, (69) 245.
- in Pennsylvania, summary, (61) 662.
- in soil, hot-water treatment, effect on plant roots, (67) U.S.D.A. 56.
- in South Carolina, (66) S.C. 652.
- in Virginia, (69) 386.
- injury, (61) 555.
- larva, digestive secretions, analysis, (64) 549.
- larvae, pH of digestive tract, effect of soil acidity, (66) 852.
- latest control measures, (61) 849.
- metamorphosis, weight and metabolism changes, (66) 852.
- natural enemies in China and India, (70) U.S.D.A. 511.
- natural enemies in Far East, (67) U.S.D.A. 582.
- new nemic parasite of, (62) 861.

Japanese beetle—Continued.

- new towns infested, (67) Conn.State 559.
- notes, (63) Conn.State 651; (68) 68; (70) U.S.D.A. 499.
- on shade trees, community spraying for, (61) 855.
- parasite, cultivation, (66) 559.
- parasite, establishment and colonization, (63) 462.
- parasite, studies, (65) U.S.D.A. 157.
- parasites, establishment in United States, (65) 458.
- pathogenic nematode of, (69) 266.
- population, changes in, (65) 57.
- present status and control, (64) 549.
- quarantine, Conn.State, (62) 599; (66) 496.
- quarantine, relation to Delaware, (63) 751.
- reactions to spray deposits on foliage, (68) U.S.D.A. 71.
- repellency of extracts from immune plants to, (67) U.S.D.A. 155.
- repellents, smudges as, (63) 462.
- repellents, tests, (63) 160.
- scouting and quarantine enforcement, Conn.State, (61) 547; (63) 453.
- situation in 1931, (67) 565.
- soil treatment for, (63) 853.
- spread, (64) Conn.State 849.
- status and control, (62) 648.
- studies, (68) S.C. 780; (69) Mich. 83.
- summary, (61) 555; (64) 753.
- toxicity of castor-bean plant to, (69) 73.
- traps, Coleoptera captured in, (69) 73.
- traps for, (61) 555; (64) U.S.D.A. 58; (65) 57; (66) 247; (68) U.S.D.A. 72.
- traps, liquid bait tests, (69) 245.
- traps, wire receptacle for, (66) 853.

Japanese—

- cane, effect of irrigation with sewage effluent, Fla., (63) 632, 633.
- mealybug, biological control, (65) Calif. 156.
- quince seedlings, characteristics, (67) 37.
- weevil injury, (68) 215.

Japygidae, postembryonal development, (62) 650.

Japyx sp., notes, (66) 247.

Jardine, J. T., editorial, (65) 701.

Jardine, W. M., envoy to Egypt, (63) 400.

Jarosite as soil correctives, (63) Wyo. 121.

Jasmine withertip, notes, (67) 47.

Jatrophobia brasiliensis, parasites, (64) 365.

Jaundice—

- in dogs, cause, (65) 567.
- in experimental coccidiosis of rabbits, (65) 73.

Jays and crows, studies, (62) 240.

Jays, intelligence of, (68) 777.

Jellies, role of pectin in, Del., (61) 610; (65) 407.

Jelly juices, fruit, preparation, (68) 275.

Jelly strength tester, new, (68) 587.

Jenkins—

- E. H., obituary notes, (66) 5.
- laboratory, dedication, (69) Conn.State 318.

Jerusalem-artichokes—

- apical dominance in tuber, (68) 322.
 - as sugar plant in Russia, (61) 828.
 - bibliography, (68) 757.
 - breeding, (70) Ill. 609.
 - change in ash content during storage and cooking, (61) Kans. 190.
 - chemical composition, (62) 330.
 - culture experiments, (61) Utah 27; (62) Alaska 137, 632; (63) Nebr. 627; (64) Oreg. 335; (68) Miss. 319, Ill. 608; (70) Ill. 609, Ill. 610.
 - drying, (62) 228.
 - fertilizer experiments, N.J., (63) 331; (65) 824; (67) 517.
 - improvement, N.J., (65) 824; (67) 517.
 - length of rest period, (68) 321.
 - sprout formation, relation to seed piece size and sprout removal, (68) 321.
 - storage, (64) 607.
 - storage rots, (66) 149; (68) Minn. 56.
 - studies, (61) Oreg. 32.
 - sunflowers, and swedes, comparison, (68) Mich. 319.
 - tests, (69) Oreg. 354.
 - utilization by a diabetic patient, (61) 195.
 - variety tests, Ill., (68) 608; (70) 609.
- Jessamine, willow-leaved, poisoning of ruminants by, (65) 278.

Jewish—

- agricultural colonies in Palestine, (61) 381.
- cooperative movement in Palestine, (62) 486.
- poisonous to livestock, (65) Ind. 70.
- poisonous to sheep, (64) Ky. 173.

John's disease—

- account, (66) 176.
- bacillus, lesions produced in peritoneal cavity, (63) 479.
- bacillus, susceptibility of hens to, (66) 576.
- control, (69) 108, 273.
- control and eradication, (67) 454.
- diagnosis, (68) 527; (69) 108.
- in cattle, (65) 71.
- in dairy herd, control, (62) Miss. 170.
- in experimentally infected herd, (69) 428.
- in Sumatra, (66) 668.
- intradermal test for detecting, (68) 671.
- johnin test, (61) Wis. 173.
- johnin v. avian tuberculin as diagnostic agent, (61) 675; (62) 260.
- liver lesions in, (63) 480.
- of cattle, intradermal test for, (67) Ohio 69.
- of livestock, (63) U.S.D.A. 75.
- or paratuberculosis of cattle, (70) 675.
- pathology, (69) 856.
- studies, (62) 875.

Johnin—

- preparation, (70) 528, 826.
- v. avian tuberculin as diagnostic agent for John's disease, (62) 260.

Johnson grass—

- control, (63) N.Mex. 434, 732; (65) N.Mex. 221; (67) N.Mex. 29; (69) Kans. 200.
- crushing in connection with curing, (68) Miss. 384.
- cutting experiments, (65) Ala. 428.
- for hay and pasturage, (62) U.S.D.A. 35.
- hay v. timothy hay for horses and mules, (62) Ala. 764.
- hay, value for mules, (68) Miss. 364.
- poisoning, (68) 528.
- rootstocks, effect of top-cutting treatments, (63) 227.
- somatic chromosome number, (66) 725.
- time of cutting for hay, (66) Ala. 820.
- toxicity for sheep, (68) 94.
- value for hay, (65) Ala. 331.

Joint-ill in foals of horses of heavy breeds, (63) 480.

Jointworm flies, distribution and damage in Utah, (69) Utah 837.

Jointworms in Utah, (68) 651.

Jordan, W. H., editorial note, (65) 101, 102, 107.

Jordan, W. H., tribute to, (69) Me. 477.

Journal of Agricultural Research, policy and functions, (65) 889.

Jowar—

- disease, notes, (68) 769.
- grain smut, control, (64) 232.
- pests in Punjab, (64) 359.

Joyeuxia fuhrmanni, parasite of cats, (70) 382.

Juglans crown rot in California, (66) 645.

Juglone, toxicity to alfalfa and tomato, (66) Va. 545.

Jujube anthracnose, notes, (67) Tex. 555.

Jujubes—

- culture experiments, (62) Tex. 637.
- mineral content, (62) 584.
- notes, (63) Fla. 635; (64) Ga.Coastal Plain 631;
- varietal and cultural notes, (65) Fla. 435.
- variety tests, (70) Ga.Coastal Plain 773.

June beetles—

- crop selection for egg laying, (65) 458.
- green, notes, (65) N.Mex. 245.
- importance in Michigan, (69) Mich. 559.
- notes, (65) Iowa 153; (69) Wis. 825.

Juniper—

- aphid, new, from Utah, (62) 155.
- blight, control, (63) N.J. 343.
- blight, notes, (63) Ohio 45.
- webworm, control, (64) 855; (65) N.J. 850.

Junipers—

- freezing injury in Kansas, (70) 785.
- value, (64) Ark. 439.

Jute—

- and cotton as bale covering materials, comparison, (69) U.S.D.A. 514.
- flower and pollen, development, (69) 794.
- growth and manufacture, (62) 695.
- treatise, (65) 34.

Kabatiella caulivora and Colletotrichum trifolii, comparison, (65) 539.

Kafir—

- and corn stubble, decomposition rates, (61) 620.
- and milo hybrid, notes, (63) Tex. 436.
- and milo response to variations in spacing, (61) 518.
- culture experiments, (64) Okla. 733.
- culture in Lawton, Oklahoma, region, (68) U.S.D.A. 467.
- culture under dry-farming conditions, (65) N.Mex. 527.
- dwarf mutation in, (70) 315.
- fodder, value in different forms, (63) Kans. 362.
- hay, feeding value, Kans., (68) 231; (70) 221.
- in various forms, feeding value, (66) Kans. 355.
- inheritance of head characters in, (63) Tex. 436.
- mutation in, (69) 28.
- planting tests, (66) Mo. 326.
- plants, tenuous, (62) 513.
- residue, effect on crop yields, (67) 31.
- seeding experiments, (66) Tex. 28.
- smut, notes, (61) 539.
- Sunrise, seed selection in, (67) 670.
- threshed, feeding value, (64) Okla. 759.
- v. sorgo for dairy calves, (61) Kans. 167.
- varietal comparisons, (61) Kans. 126.
- variety tests, (64) Ariz. 823; (67) U.S.D.A. 30.
- yields, effect of culture methods, (66) U.S.D.A. 222.

Kafirs as forage sorghums, (61) Okla. Pan-handle 32.

Kahweol, preparation and properties, (69) 167.

Kainite—

- for control of mustard in oats, (63) N.H. 233.
 - for killing poison ivy, (69) N.H. 651.
- Kakothrips robustus, studies, (69) 549.

Kala-azar—

- infantile, in Italy, sand flies in endemic foci, (65) 361.
- Mediterranean, transmission by Rhipicephalus sanguineus, (65) 553.
- transmission by brown dog tick, (66) 667.

Kale—

- chemical composition, effect of seasonal temperatures, (67) 131.
- cost of production, (61) Oreg. 784.
- effect on clay soil, (61) Oreg. 19.
- fertilizer experiments, (62) West.Wash. 508.

Kale—Continued.

- iron in, (67) U.S.D.A. 85.
- Jersey, white flowered plants, (62) 323.
- marrow stem, feeding value, (69) 257.
- pellagra preventive value, (70) 282.
- v. corn silage for milk production, Oreg., (64) 375, 873.
- variety tests, Ala., (64) 337; (65) 434.
- vitamin B in, (64) Ky. 195.
- vitamins in, (62) Ky. 293.
- yellows, notes, (63) Calif. 649.

Kalimat B, value as disinfectant, (67) 44.

Kalmia, alpine, poisonous to livestock, (70) U.S.D.A. 242.

Kalotermes—

- minor, association with fungi, (69) 553.
- tectonae, bionomics, (63) 549.

Kamala—

- anthelmintic value, (62) 173; (66) Ark. 576; (67) 746; (68) 536.
- for tapeworms, (61) 273, Va. 768; (67) Ohio 69, N.Dak. 739; (70) 103.

toxicity for chickens, (64) Ohio 679.

Kangaroo rat, burrowing on desert soils in Arizona, effect, (67) 280.

Kangaroos—

- parasites of, (63) 170, 171.
- streptothrix disease in, (62) 167.

Kansas Collège, notes, (61) 97, 395, 899; (62) 698; (64) 200, 698; (65) 497, 698, 798; (66) 200, 696; (67) 639; (68) 572, 875; (69) 319, 622, 910; (70) 288, 431, 895.

Kansas Station—

- notes, (61) 97, 395, 899; (62) 698; (64) 200, 698; (65) 497, 698, 798; (66) 300, 696; (67) 639; (68) 572, 875; (69) 622, 910; (70) 288, 431.
- publications, (62) 795; (64) 599; (68) 571; (70) 142.
- report, (61) 197; (64) 899; (69) 317.
- Tribune Branch, report, (63) 498.

Kaoliang and soybean cake, digestion experiment with poultry, (70) 78.

Kapok, new weevil pest, (67) 426.

Kapselvaccin, new vaccine against strangles, (64) 379.

Katakilla, insecticidal value, (67) 152.

Kawishiwi Experimental Forest, notes, (67) 96.

Keel disease in ducklings in Britain, (64) 78.

Kefir, manufacture, composition, and consumption, (68) 665.

Keithia thujina, symptoms and course of disease in Thuja, (63) 844.

Keitt single-spore method, modified procedure, (65) Tex. 899.

Kellogg Institute of Animal Husbandry, notes, (67) 95.

Kelp—

- and fish meal for cows, (63) Ohio 66.
- and fish meal v. cottonseed meal, feeding value, (67) Ohio 65.

- Kelp—Continued.
 as mineral supplement for hogs, (63) Ind. 559.
 feeding value, Ohio, (64) 662; (67) 58, 591.
 for farm animals, fellowship for study of, (66) 398.
- Kenaf, culture, (63) 335.
- Kentronothrips, new genus, erection, (61) 850.
- Kentucky—
 Station, notes, (61) 199, 598; (63) 398, 599; (65) 900; (66) 396; (67) 639; (69) 159.
 Station, report, (61) 498; (62) 299; (64) 199; (65) 99; (66) 199; (68) 138, 425; (70) 287, 430.
 University, notes, (61) 199, 598; (63) 398, 599; (65) 900; (66) 396.
- Keratin—
 decomposition by soil microorganisms, (68) 167.
 from decomposition of wool fiber as bait for blowflies, (67) 575.
 molecule, constitution, (69) 315.
 of eggshell, analyses, (70) 292.
- Keratins, basic amino acids in, (67) 9.
- Keratitis—
 in sheep, (66) Tex. 70.
 outbreak, (68) Utah 243.
 papers on, (65) 869, 870.
 ulcerosa in dogs, (69) 579.
- Keratomalacia, association with other deficiency diseases, (64) 397.
- Keratosis of skin in cattle, (70) 828.
- Kerlee, R., obituary account, (61) 656.
- Kermes of Japan, (68) 502.
- Kerosene—
 alcohol, and gasoline as fuel for tractor engines, (66) 876.
 and coal tar emulsion, use as insecticide, (69) 825.
 as medicine, danger, (62) 467.
 cook stoves, performance, (69) Nebr. 156.
 cook stoves, relation of draft to burner performance, (67) Nebr. 637.
 cook stoves, studies, Nebr., (64) 197, 198.
 on pyrethrum powders, extractive efficiency, (69) 74.
 safe use and storage on the farm, (67) U.S.D.A. 174.
 tractor engine test with, (68) 832.
 value for botfly larvae, (66) Ill. 271.
- Ketones—
 chemical constitution and germicidal activity (61) 410.
 of blood and urine of livestock, (69) 715.
 semicarbazones, optical properties, (64) 511.
- Ketosis—
 and nitrogen and water balance studies, significance in obesity diets, (69) 895.
 during fasting in Eskimos, (69) 464.

Lecanium—Continued.

- scale in British Columbia, parasite of, (70) 68.
- scale, oil emulsion spray for, (67) 425.
- scale on shade and orchard trees, (64) West.Wash. 654.
- sex determination in, (62) 646.

Lechuguilla fever of sheep and goats, (66) 74.

Lecithin—

- added to chocolate products, detection, (66) 808.
- and allied substances, treatise, (63) 8.
- decomposition in eggs, (68) 434.
- effect on butterfat determinations, (61) 204.
- effect on fat test with buttermilk, (68) 17.
- effect on sex ratio in albino rats, (65) 426.
- effect on stability of serum proteins, (65) 803.

Lecithin-caseinogen complexes, studies, (61) 306.

Leeches—

- role in rinderpest transmission, (67) 315.
- transmission of surra by, (67) 743.

Leek leaf beetle in south Manchuria, life history, (67) 293.

Leeks—

- varieties, (62) N.Y.State 431.
- vitamin B (B₁) in, (67) 634.
- vitamin C in, (68) 861.

Left-handedness, inheritance, (61) 820.

Legislation, agricultural and social, in New Zealand, (65) 79.

Legume—

- bacteria, supplementing, value, (62) 628.
- bug, proposed name, (69) Idaho 828.
- cover crops, tests, (66) Guam 426, P.R. 528; (68) S.C. 754.
- cover crops, variety tests, (64) Guam 823.
- hay, feeding value, (62) Ark. 866.
- hay for brood sows, (63) 360.
- hay for dairy heifers, (61) 257; (62) Ark. 869.
- hay for dairy heifers during lactation, (64) Ark. 471.
- hay plants, drying, (68) Minn. 34.
- hays, comparison, (64) Ohio 672.
- pasture for pigs, quantity of feed and proteins for, (62) Ohio 763.
- pod borers in Puerto Rico, distribution, life history, and food plants, (65) 457.
- seeds, certification in Germany, (62) 220.
- seeds, hard, value and treatment, (66) Mont. 224.
- seeds, microphotography, (69) 363.
- seeds, poisonous principle, (66) 666.
- seeds, stored, acidity changes in, (62) 431.

Legumelin, physicochemical properties, (62) 202.

Legumes—

- accomplishments of station with, (69) Alaska 36.
- and corn, interplanting, losses from, (66) Ark. 526.
- and corn, interplanting tests, (64) Ark. 431; (66) S.C. 627, Miss. 730; (68) Miss. 34, Miss. 319, Ark. 608.
- and grains in combinations, variety tests, (67) Mich. 31.
- and grasses for pasture, tests, (66) Idaho 264.
- and grasses, mixtures, for hay, (68) Ky. 318.
- and mixtures, variety tests, (70) Ill. 609.
- annual, on heavy soils, (63) Okla.Panhandle 437.
- annual, place in cropping system of high plains, (64) Okla-Panhandle 831.
- as cover crops, (61) N.C. 725; (68) S.C. 754.
- as forage crops, (63) V.I. 130; (69) Wash.Col. 790.
- as green manure for potatoes, (67) La. 233.
- as green manure, tests, (63) V.I. 130; (64) Ill. 809; (67) Iowa 378; (68) Ill. 609; (69) Iowa 38.
- as nitrogen-fixers, (65) Hawaii.Pineapple Cannery 813.
- as soil builders, value, (64) Okla. 716.
- bacteroid-like form and immunity in, (61) 327.
- behavior, (63) N.Mex. 434.
- breeding, (65) V.I. 730; (66) 326.
- carbon dioxide and elemental nitrogen assimilation in, relation, (69) 183.
- comparison for soil building, (69) Iowa 16.
- cross-inoculation studies with *Rhizobium* spp., (68) 185.
- culture, (62) 220; (63) Miss. 28.
- culture experiments, (62) Ark. 828.
- culture in Sumatra, ascomycete affecting, (66) 838.
- culture under dry land conditions, (62) N.Mex. 32.
- diseases affecting, (63) N.Y.Cornell 742.
- distribution in Oklahoma, (61) 330.
- effect of fertilizers, (65) Calif. 735.
- effect on corn, (63) Tenn. 132, Ohio 824.
- effect on following crops, (62) Ark. 816.
- effect on following wheat crop, (64) Mont. 216.
- effects, relation to economical crop production, (66) N.Y.State 119.
- experiments, (63) Ala. 525; (66) Ill. 223.
- feeding value for lambs, (63) Ind. 557.
- fertilizer experiments, (64) Ala. 332; (68) S.C. 754.
- fertilizing value, (63) R.I. 618.
- for hay, (63) N.Mex. 434.
- for hay and pasture, Iowa, (67) 378; (69) 37.

Legumes—Continued.

- for nematode control in pineapple fields, (62) Hawaii. Pineapple Cannery 445.
- for soil erosion control, (70) U.S.D.A. 464.
- for soil improvement, (61) Ind. 207.
- for winter pasture, (68) Okla. 609.
- forage, behavior, (61) Md. 823.
- forage, variety tests, (69) Oreg. 354.
- growth, effect of fresh straw, (63) 334.
- growth under bacteriologically controlled conditions, (64) 528.
- in agriculture, monograph, (68) 755.
- in Bahia, insects affecting, (66) 756.
- in mixtures for hay and pasture, (70) N.Y. Cornell 762.
- in pastures, permanency, (68) 319.
- in rotations, effect on yields of corn and wheat, (70) Ky. 172.
- in rotations, value, (61) Miss. 433; (63) N.Y. Cornell 33; (68) Ill. 609; (69) U.S.D.A. 789.
- injury from potato leafhopper, (61) 649.
- inoculants—
 - inspection, N.J., (61) 437; (63) 136; (65) 39; (67) 35; (69) 363.
 - sale, State laws concerning, N.J., (62) 523; (65) 634.
 - tests, (64) Ill. 830; (66) Ill. 224, N.Y. State 736.
 - types, comparison, (70) Ill. 609.
- inoculation, (63) Mo. 225; (64) Iowa 810; (67) N.C. 666; (68) Okla. 609, Miss. 610; (69) Mo. 202.
 - effect of stock and scion, (61) 325.
 - effect on soil conditions, (65) Iowa 114.
 - relation to soil acidity, (70) 174.
 - role of calcium in, (62) 518.
 - service of the station, (70) N.Y. State 43.
 - status, (62) N.Y. State 731.
 - value of commercial cultures, (69) Iowa 16.
 - wet and dry methods, (69) Ohio 513.
- leafhopper injury to, (61) 250; (65) 43.
- merits, (61) Oreg. 27.
- nitrogen compounds effused from root nodules, use by nonlegumes, (69) 781.
- nitrogen content during germination, (70) 456.
- nitrogen fixation by, (64) Oreg. 317.
- nodule formation, effect of number of bacteria in culture, (63) 729.
- nodule forming and nonnodule forming, for green manure, (64) 18.
- nurse crops for, (67) Iowa 378.
- pasture, chemical composition, (69) 405.
- plastids in cotyledons of, inactivity, (63) 517.
- production tests, (62) Alaska 127.
- relation to nitrogen fixation, (65) Mass. 317.
- research in, (64) Ill. 829.
- residual effect on yield of bluegrass, (70) Ky. 172.
- residual values, (69) 320, 793.

Legumes—Continued.

- resistance to homopterous insects, (67) 53.
- root tubercles, relation to immunity and morphology, (62) 821.
- seeded in corn, tests, (61) Va. 717.
- self- and cross-fertility and flowering habits, (68) 601.
- small-seeded, nurse crops for, (69) Iowa 38.
- soil improvement with, (64) Ark. 416.
- spring, effect on productivity of soil, (68) 609.
- square yard harvests, directions for making, (70) U.S.D.A. 403.
- studies, (61) Calif. 327.
- summer, as cover crops, (65) Calif. 727.
- tests, (61) 220; (66) Guam 426; (69) Hawaii 643.
- tests on Missouri soil types, (70) 732.
- time for seeding, (70) Va. 764.
- use on neglected hay lands, (67) N.H. 505.
- utilization of atmospheric nitrogen, effect of temperature, (70) 456.
- v. nonlegumes, effect on microbiological activities in soil, (69) 502.
- v. nonlegumes for soil improvement, (61) N.J. 715.
- value on rice land, (66) Ark. 526.
- varieties, (61) Oreg. 26.
- variety tests, (61) Kans. 125; (62) Ill. 328, S.C. 625, Tex. 627, Ark. 828; (63) Ohio 31, Guam 129, Wyo. 130, Tex. 435, Ohio 823; (64) Ala. 332, Kans. 826; (65) Wis. 431, V.I. 730; (66) Tex. 27, P.R. 223, Alaska 626, Ga. Coastal Plain 626; (67) La. 233, Tex. 668; (69) Fla. 199, Kans. 200, V.I. 512; (70) Tex. 173.
- vitamin C in during germination, (61) 295.
- winter—
 - breeding, (65) Ala. 428.
 - culture experiments, (63) Fla. 626; (66) Miss. 730.
 - date-of-planting and turning under, (69) Fla. 199.
 - fertilizer experiments, (65) Ala. 428, Fla. 429.
 - for green manure in Cotton Belt, (65) U.S.D.A. 223.
 - for soil improvement, (64) Miss. 432.
 - in crop rotations, (69) Fla. 199.
 - nitrogen production, (63) Ga. 129.
 - response of cotton to, (68) Miss. 34.
 - tests, (62) Miss. 31, Miss. 128, Fla. 325; (63) Fla. 626.
 - use in Southeastern States, (70) U.S.D.A. 37.
 - variety tests, (63) Miss. 28, N.C. 629; (64) Miss. 623; (65) Miss. 35, Ala. 428; (67) Miss. 29.
- yield and dependability, (69) Okla. Pan-handle 790.

- Leguminosae, nodule bacteria of, nomenclature, (66) 124.
- Leis conformis—
 food habits, (70) 510.
 introduction and study, (69) Fla. 231.
 notes, (61) Calif. 351.
- Leishmaniasis, visceral, sand flies in endemic foci, (65) 361.
- Leisure—
 of homemakers, effect on standards of living, (68) U.S.D.A. 137.
 use in selected rural areas, (63) S.C. 187.
- Lema—
 melanopa in Great Britain, bionomics, (63) 260.
 oryzae, morphology and ecology, (69) 560.
 spp., injurious to cereals, (66) 847.
- Lemna—
 major, stimulation by organic matter, (65) 514.
 minor, iron requirement for growth, (69) N.Y.Cornell 25.
 minor, manganese requirement, (66) 419.
- Lemon—
 die-back, experimental reproduction, (67) 279.
 juice—
 decitrated, reprecipitation of anti-scorbutic factor, (66) 113.
 indophenol reducing capacity, relation to vitamin C activity, (69) 327.
 milk, feeding to infants, effect, (63) 790.
 pectin in, degree of esterification, (64) 502.
 phenolindophenol reducing capacity, nonspecificity, (69) 9.
 reducing substance in, reversibility of oxidation of, (69) 8.
 reducing substance, relation to vitamin C, (69) 7, 8.
 vitamin C concentrates from, preparation and properties, (62) 501.
 vitamin C concentrates from, preparation and storage, (66) 708.
 vitamin C in, (62) 804.
 vitamin C in, concentration and chemical nature, (65) 503.
 vitamin C in, preservation, (63) 609.
 vitamin C in, stability, (62) 803.
 vitamin C preparation from, (69) 774.
 leaves, sap concentration and inorganic constituents, (65) Calif. 232.
 leaves, water-solubility of dry matter in, (63) 123.
 mal secco disease, (69) 540.
 mal secco disease, fungus causing, systematic position, (68) 212.
 mal secco disease in Sicily, (68) 495.
 oil, analyses and composition, (67) U.S.D.A. 100.
- Lemon—Continued.
 pectic acid, *d*-galacturonic acid from, preparation, (64) 710.
 peel peroxidase, inactivation temperature, effect of pH, (65) 214.
 red blotch, simulation, (62) Calif. 744.
 scab, control, (67) 417.
 seedlings, effect of boron on, (66) 420.
 trees, axial gradient of growth in, (61) Calif. 322.
 trees, canker and die-back affecting, (68) 488.
 trees, declined, effect of inarching, (67) 532.
 trees, effect of boron, (62) 142, 819.
 trees, growth, effect of rootstock, (65) Calif. 734.
- Lemons—
 Armillaria sp. on roots, (68) 488.
 Chinese Dwarf, notes, (66) P.R. 228.
 culture, (67) U.S.D.A. 35.
 culture experiments, (62) Calif. 734; (63) Miss. 38.
 effect of freezing temperature, (61) Miss. 438.
 Eureka, pruning, effect, (69) 660.
 internal decline, (64) 51.
 Meyer, adaptability studies, (70) Tex. 182.
 mutations in, (69) 28.
 pink-fruited, description, (67) 260.
 propagation studies, (61) Calif. 335.
 respiratory activity, (68) 330.
 ripening process in, (61) 529.
 seed germination, (65) Fla. 435.
 studies, (67) Calif. 526.
 variety, notes, (66) Tex. 35.
 variety tests, Tex., (64) 741; (67) 673.
- Lentil—
 meal as protein supplement for pigs, (68) 366.
 seeds, poisonous principle, (66) 666.
- Lentils—
 botanic-agronomical monograph, (66) 630.
 characteristics and culture, (61) 222.
 research in India, (66) 131.
- Lentinus—
 lepidus, notes, (70) 354.
 tigrinus growth, effect of temperature, (69) 680.
- Lenzites—
 betulina, notes, (66) Pa. 237.
 sepiaria growth, effect of temperature, (69) 680.
 sepiaria, notes, U.S.D.A., (61) 143; (62) 239.
- Leopard moth—
 as apple orchard problem, (65) N.J. 848.
 notes, N.J., (63) 352; (67) 560.
 status, (62) 647.
- Lepidota—
 irrorata, life history studies, (66) 756.
 pruinosa, life history studies, (66) 756.
 pruinosa, notes, (67) 562.

- Lepidocyrtus*—
 cyaneus, biology and control, (66) Pa. 756.
 violentus, notes, (63) 253, La. 545; (64) 52; (66) 247.
- Lepidoptera*—
 British, hymenopterous parasites, (70) 814.
 female reproductive organs, (62) 450; (67) 284.
 food plants of larvae, (70) 648.
 number of eggs, effect of temperature, (62) 647.
 nutrition physiology, (62) 450.
 of California, (67) 423.
 of federal district of Brazil, (64) 749.
 of Japan, (61) 55.
 tropisms and sense organs, (61) 660.
- Lepidopterous larvae*—
 action of contact insecticides on, (65) 852.
 spitting habit, (64) 56.
- Lepidosaphes*—
 beckii, *see* Purple scale.
 gloveri, *see* Glover's scale.
 ulmi, *see* Oyster-shell scale.
- Lepisma saccharina*, *see* Silverfish.
- Lepisma* sp., notes, (66) P.R. 247.
- Lepra opposiva* of orange trees, (70) 645.
- Leptinotarsa decemlineata*, *see* Potato beetle, Colorado.
- Leptocera* spp., reared in laboratory, (61) 848.
- Leptocoris trivittatus*, *see* Boxelder bug.
- Leptocoris*—
 acuta, bionomics and control, (65) 247.
 varicornis in Ceylon, control, (65) 247.
- Leptocryptus bellulus*, notes, (67) 157.
- Leptoglossus*—
 gonagra, notes, (65) 851.
 oppositus, notes, (68) U.S.D.A. 68.
 phyllopus, *see* Leaf-footed bug.
 spp., notes, (62) 241.
 zonatus, notes, (62) 544; (68) 488.
- Leptographium lundbergii* n.g. and n.sp., notes, (62) 538.
- Leptomastidea abnormis*—
 notes, (65) Calif. 156.
 parasite of citrus mealybug, (69) 829.
 rearing, (68) 362.
- Leptosylla musculi*, notes, (61) 660.
- Leptosphaeria*—
 coffeicola, notes, (68) 488.
 coniothyrium, notes, N.C., (63) 647; (65) 147; (70) 58.
 herpotrichoides, notes, (63) 247; (67) 268, 542.
 n.sp., notes, (68) 488.
 sacchari, notes, (65) 344; (66) P.R. 237; (67) 265.
 salvinii, ascigerous stage of *Helminthosporium sigmoideum*, (70) 636.
 salvinii, notes, (70) Ark. 796.
 spp., notes, (67) 400, 694.
- Leptosphaerulina vignae* n.sp., description, (66) 442.
- Leptospira icterohaemorrhagiae*—
 human strain in horses, (63) 373.
 in Oxford rats, (62) 240.
 in rats in Trinidad, (65) 353.
 in wild rats, (61) 872.
 studies, (64) 747.
 transmission experiments, (63) 153.
- Leptothrix* sp., notes, (66) 842.
- Leptothyrium*—
 nervisudum n.sp., morphology and physiology, (70) 59.
 zeae, notes, (67) 694.
- Lepus americanus*, color changes in, (62) 514.
- Leskiomima jaynesi*, notes, (69) U.S.D.A. 692.
- Lespedeza*—
 and alfalfa hay, comparison, (70) N.C. 822.
 as supplementary pasture, N.C., (68) 518; (70) 822.
 breeding experiments, (61) Tenn. 127.
 characteristics and culture, (70) U.S. D.A. 611.
 culture experiments, (62) Ky. 218, P.R. 731; (63) Ohio 823, Ohio 824; (68) Tenn. 182; (70) Tenn. 172.
 fertilizer experiments, (62) Miss. 128.
 in agriculture, (69) 320.
 Kobe, notes, (61) Ga. 125.
 Kobe, seeding experiments, (63) Ga. 129.
- Korean*—
 adaptability, (63) Mo. 228.
 and Japanese, value for pastures, (67) Ohio 239.
 characteristics, adaptation, and cultural needs, (67) Kans. 239.
 culture, (66) Ky. 131.
 for pastures and soil improvement, (70) Va. 764.
 hard seed in, (69) 359.
 merits, (70) U.S.D.A. 609.
 seed size, relation to germination and hard seed, (69) 360.
 response to inoculation, Ill., (68) 609; (70) 609.
 seed studies, (70) U.S.D.A. 464.
 sericea, studies, (66) Tenn. 824.
 varieties, (63) Ohio 824; (70) Va. 764.
 varieties, adaptation studies, (69) Ind. 37.
 varieties, new, (63) Tenn. 34.
 variety tests, (61) Tenn. 127, Miss. 433; (63) Ohio 31, Tex. 435, Ohio 823; (64) Tenn. 335, S.C. 625, Kans. 826; (65) N.C. 126, Tenn. 825; (66) Tex. 27, Va. 527, S.C. 627, Miss. 730; (67) Tex. 668; (68) Tenn. 182, N.C. 468, S.C. 754; (69) Ga.Coastal Plain 37; (70) Tenn. 172, Tex. 173, Ill., 609, Ga.Coastal Plain 762.
- Lespedezas* in Ohio, (70) Ohio 768.
- Lesquereila lepidota* n.sp., description, (65) 817.

Lettuce—

- acidity response, (66) N.Y.Cornell 634.
 aluminum in, detection, (61) Mich. 712.
 and cabbage, different response to fertilizers, (64) Miss. 631.
 arsenical residues on, (69) Conn.State 209.
 bacterial rot, (68) Ariz. 768.
 Bel-May, notes, (63) Mass. 533.
 boron requirements, (69) 366.
 bottom rot, control, N.Y.Cornell, (66) 640; (67) 44; (69) 61.
 breeding, (62) Pa. 339; (63) Hawaii 234; (66) 326; (67) Hawaii 385; (69) R.I. 210.
 brown blight disease, (67) 269.
 calcium retention on a diet containing, (70) 717.
 copper and manganese in, relation to mineral additions to soil, (67) 775.
 culture, (61) N.Mex. 228; (67) U.S.D.A. 35.
 culture experiments, (62) P.R. 737; (63) Colo. 529; (64) Mont. 223; (68) Mont. 760.
 culture on muck soils, (70) N.Y.Cornell 45.
 disease-resistant, breeding, (70) U.S.D.A. 474.
 diseases, notes, (64) N.Y.Cornell 642, West.Wash. 645.
 downy mildew, notes, (61) Mass. 839; (62) Calif. 745; (63) Mass. 542; (69) N.Y.Cornell 61, Mass. 663; (70) N.Y.Cornell 791.
 drop disease, resistant stock, (64) Kans. 839.
 effect of length of day, (69) 652.
 effect of phosphorus, (68) Mont. 760.
 effect of rye and oat straws, (69) 183.
 effect of soil acidity, (66) Va.Truck 738.
 effect of superphosphates, (66) Va.Truck 738.
 fertilizer experiments, (61) Kans. 138; (62) West.Wash. 523; (63) N.Mex. 444, Ill. 533; (64) Fla. 224, West. Wash. 638; (65) R.I. 534; (67) Ill. 36; (68) N.C. 474, Mont. 760, Wash. Col. 760; (70) N.Y.Cornell 775.
 Florida, decline in production, cause, (69) Fla. 50.
 grading, packing, and stowing, (69) Fla. 50.
 green and white, vitamin A in, (62) 397.
 growth and soil reaction, relation, (67) 37.
 growth, boron as factor in, Ky., (68) 328; (70) 182.
 growth, effect of electric illumination, (63) Ind. 578.
 growth, effect of soil reaction, (66) Ky. 16.
 head, adaptation and strain tests, (68) Miss. 328.
 head and seed production, effect of fertilizers, (70) 618.

Lettuce—Continued.

- head, improvement, (64) Okla. 738; (68) Pa. 475.
 head, production, (65) West.Wash. 138; (67) N.H. 676.
 head, shipments to Boston market, (63) N.H. 235.
 head, variety tests, Hawaii, (61) 733; (69) 643.
 heading variety, (61) N.J. 734.
 hybrid seedlings, notes, (65) Hawaii 737.
 Iceberg, culture, N.H., (66) 34; (67) 524.
 improvement, (69) Calif. 48, Mass. 652.
 inheritance in, (61) 429; (64) Ill. 24.
 inheritance of heading characteristics, (67) 248.
 inner and outer leaves, vitamins in (67) 88.
 intra-State competition in Florida, (66) Fla. 881.
 irrigation studies, (64) Ariz. 840.
 leaves, necrotic tissue in, (62) West. Wash. 532.
 new hard heading variety, (61) Mass. 833.
 New York, strain tests, (69) Conn. State 209.
 paper mulch experiments, (61) Mich. 37, Ohio 440.
 pH requirements, (66) Va.Truck 739; (70) N.Y.Cornell 775.
 production, (62) U.S.D.A. 340.
 production under Vitaglass, (65) Mass. 339.
 respiration rate, (67) 675.
 seed, germination, (61) Calif. 335; (70) N.Y.State 773.
 seed bed, irrigation, (70) Ariz. 773.
 seed bed irrigation under high temperature conditions, (66) Ariz. 332.
 selection studies, (64) Pa. 138.
 shipments, (65) Fla. 481.
 shipments from Florida and competing areas, (65) Fla. 886.
 tipburn resistant varieties, development, Colo., (66) 632; (70) 615.
 tipburn, studies, (61) N.C. 735; (65) N.C. 136; (69) N.Y.Cornell 61.
 tissues, green, nitrate in, (62) 432.
 top-root ratio, studies, (61) 522.
 unsaponifiable lipids in, (65) 203; (66) 92.
 unsaponifiable lipids of, fractionation and antioxidant, (66) 608.
 value in nutritional anemia, (68) 281.
 varieties, (62) Pa. 339.
 varieties and culture in Genesee County, New York, (70) N.Y.Cornell 44.
 varieties, superior strains, (66) Pa. 227.
 variety tests, (61) N.Dak. 735; (65) Ala. 434; (67) Conn.State 523; (68) N.C. 474.
 vitamin A in, relation to soil fertility, (62) 193.

- Lettuce—Continued.
 vitamin B (B₁) in, (66) Ill. 296.
 vitamin B (B₁) in, effect of sunlight, (63) Iowa 93.
 vitamin B complex in, (65) 590.
 vitamin C in, (68) 861.
 yellow, host plants, (66) N.Y.Cornell 640.
 yellows, identity and transmission, (61) Calif. 238.
 yields under ultra-violet glass, (61) 834.
- Leucites in soil, degree of solubilization, (68) 593.
- Leucochloridium carus, parasitic in birds from northern Michigan, (68) 778.
- Leucocyte—
 count and differentiation with Pryn's hemocytometer, (69) 579.
 count, effect of vitamin deficiency, (69) 617.
 formula of blood of bovines, (63) 480.
- Leucocytes—
 in blood of cattle, ameboid forms, (68) 815.
 in blood of normal and cholera-infected pigs, (68) 381.
 in blood of rats, effect of vitamin A deficiency, (66) 196.
 in milk, significance, (61) N.Y.State 562; (68) 816.
 number in blood of birds, (62) 564.
- Leucocythemia and anemia in fowls, comparative pathology, (64) 75.
- Leucocytozoon—
 anatis, cytology and control, (69) 267.
 anatis, life history, (69) 267, 281.
 anatis of ducks, (64) 565; (69) 281.
 smithi infection in turkeys, transmission, (68) 825.
- Leuconostoc—
 and Streptococcus species, differentiation, (67) N.Y.State 224.
 genus, studies, (64) N.Y.State 427.
 pleofructi in spoiled tomato products, (62) N.Y.State 9.
- Leucopholis irrorata—
 biology and control, (67) 155.
 life history studies, (66) 756.
 notes, (67) 439, 562.
 tachinid fly parasite of, (66) 352.
- Leucopis—
 americana, notes, (61) 549.
 bella, notes, (65) Calif. 156.
 obscura, notes, (67) 285.
- Leucoptera coffeella, notes, (62) 542.
- Leucosis—
 fowl, case report, (70) 536.
 of fowls, notes, (67) 321, 747; (69) 280, 710.
 of fowls, spontaneous, pathology, (69) 595.
 of fowls, transmissible agent, nature of, (66) 374.
 of fowls, transmissible, susceptibility, relation to age, breed, and species, (69) 113.
- Leucostoma leucostoma—
 and Valsa japonica, comparison, (67) 145.
 morphological studies, (66) 751.
- Leucotermes flavipes—
 in buildings, (65) Mich. 153.
 notes, (63) Mich. 549.
- Leukemia—
 bovine, experimental studies, (61) 270.
 in fowls, (64) 564; (65) Mo. 72, 270, 381; (67) Mo. 457, 747; (69) 595, 711; (70) Mo. 240.
 in fowls, new transmissible strain, (65) 381.
 in fowls, symptoms and pathology, (63) Ind. 571.
 in fowls, transfusion experiments with blood, (70) 247.
 in fowls, transmission experiments, (64) 268.
 in mice, (68) 747.
 myeloblastic, (67) 596.
- Leunaphos, preparation and properties, (66) U.S.D.A. 213.
- Leunasalpeter, preparation and properties, (66) U.S.D.A. 213.
- Levuana iridescens—
 notes, (64) 460.
 relation to Malaysian coconut zygaenid, (61) 753.
- Levulose—
 determination of dextrose in presence of, (66) 507.
 determination with cupro-potassium carbonate solution, (64) 510.
 fermentation products, (69) Iowa 3.
 in honey, determination by iodine-oxidation method, (66) 609.
 properties and determination, (67) 208.
 value for preservation of eggs by freezing, (65) 411.
- Libato, vitamins A and B in, (63) 692.
- Libertella affinis on Hibiscus, (68) 488.
- Libraries—
 of South Carolina, S.C., (68) 854; (70) 557.
 rural, in Montana, (61) Mont. 488.
- Library service—
 county, to rural schools, (64) 280.
 for rural schools, State direction, (63) 890.
- Lice—
 control, (63) N.Dak. 875; (66) 849.
 head, control, (65) 453.
 mites, and other pests of poultry, control, (61) N.J. 451.
 on poultry in Hawaii, (61) 856.
 plant, evolution of cycles and origin of heteroecy, (61) 550.
- Life—
 and reproduction, treatise, (62) 515.
 duration, chromosome balance as factor, (65) 724.
 insurance companies, farm mortgage experience, (69) S.Dak. 446.
 materials of, treatise, (63) 608.

Life—Continued.

- mutation, and evolution, physicochemical aspects, (62) 420.
 processes, temporary depression, (63) 427.
 tables, biological, (68) 746.
 zones, ecology, and failure of temperature summing, (68) 634.
- Light—see also Sunlight.
 all-night, effect on egg production, Ohio, (62) 369; (65) 560.
 artificial—
 application in the home, treatise, (70) 141.
 effect on codling moth behavior, (64) 251.
 effect on egg production, (61) S. Dak. 62; (62) Miss. 67; (67) Ohio 58, Wyo. 59.
 effect on plant growth, (67) 659; (68) 835; (70) 601.
 effect on winter egg production, (62) Mo. 68.
 for forcing greenhouse crops, (70) Ind. 44.
 forcing plants with, (66) Ohio 437.
 plant culture in, (63) 427.
 treatise, (65) 195.
 as attractant to codling moth, (65) Calif. 752.
 box for photographing diseased fruits, (67) 374.
 colored, response of leafhoppers to, (67) 568.
 continuous, effect on poultry, (70) 229.
 daily period, response of plants to, (62) 624; (68) 617.
 effect on development of pigs, (64) 553.
 effect on development of root systems, (61) 424.
 effect on hardening process in alfalfa, (69) 354.
 effect on washable silks, (64) Ohio 696.
 exposure, breakdown of cystine and cysteine from, (66) 305.
 importance in germination, (67) 509.
 intensities, effect on growth in virgin Norway pine forest, (67) 262.
 intensity, effect on plant anatomy, (68) 171.
 intensity, effect on soybean growth, (61) 324.
 intensity in two vegetation types, photochemical measurements, (66) 412.
 monochromatic, production of vitamin D by, (64) 504.
 of different wave lengths, effect on plant growth, (63) 122.
 of different wave lengths, effect on stomatal opening, (65) 215.
 red, effect on antirachitic substances in poultry rations, (69) Me. 410.
 red, effect on cannibalism in poultry, (68) Me. 516.
 reflection from leaf surfaces, (65) 518.
 requirements of forest species, (61) 42.

Light—Continued.

- therapy, present status, (67) 492.
 trap catches, effect of location, (63) 847.
 traps in orchards, results, (68) 787.
 utilization, effect on leaf structure, (61) 324.
 wave length, effect on seed germination, (61) 515.
 wave length, reaction of fungi to, (66) 832.
 wave length transformation, effect on climate of air layers near soil, (66) 207.
- Lighting systems for farms, (68) 835.
 Lightning protection of distribution systems and transformers, (69) 728.
 Ligniera vascularum, life history, (65) 349; (69) 534.
 Lignification, physiological significance, (61) 628.
 Lignin—
 alkali, synthetic resins from, (65) 409.
 and related compounds, (64) 8.
 behavior in decomposition of plants, (61) 803.
 determination in plant materials, (67) 206.
 hydrolysis, (68) 291.
 in plant material, decomposition, (64) 321.
 in wheat straw, relation to lodging, (66) 305.
 in wood decomposition, (61) 720.
 new uses for, (68) U.S.D.A. 17.
 preparations from pine wood, (61) 202.
 properties and uses, (65) Va. 40.
 relation to cellulose in wood, (67) 646.
- Ligustrum spp., notes, (64) Ark. 439.
 Ligyrus—
 beetle grubs, destruction by robber fly, (62) 250.
 ebenus in British Guiana, (63) 853.
 ebenus, notes, (70) 366.
- Lilac—
 forcing experiments with calcium cyanide, (61) 837.
 graft blight, studies, (69) 378.
 hybrids, precocious, (62) 529.
 leaf miner, morphology and biology, (61) 550.
 phytoptosis in Czechoslovakia, (70) 497.
 pollen, effect of sprays, (63) 137.
 seedlings, description, (64) Can. 538.
 tineid, morphology and biology, (61) 550.
- Lilacs—
 culture, (63) 240.
 new, at Ottawa, (66) Can. 828.
 treatise, (69) 524.
- Liliaceae, family, discussion, (65) Tex. 817.
 Liliaceae, Uredineae in, biology, (61) 349.
 Lilies—
 artificial propagation, (70) 53.
 hybridization, (70) 785.
 of southern California, (62) 143.
 propagation by seed, (70) 785.
 sterility in, (70) 785.

Lilies—Continued.

- treatise, (61) 530.
- vegetative propagation, (70) 784.
- Lilies-of-the-valley, forcing, (61) 837; (67) U.S.D.A. 398.

Lilium—

- candidum stalk rot, (70) 646.
- formosum mosaic, notes, (62) 145.
- genus, hybridity in, (67) 514.
- longiflorum—
 - fruiting, factors affecting, (68) Ark. 616.
 - giganteum, self-sterility in, (66) Ark. 531.
 - pollination studies, (64) Ark. 437.
 - virus disease, (61) 654.
- spp., effect of radium emanation, (66) 624.

Lily—

- Botrytis blight, control, (66) N.Y.Cornell 640.
- bulbs, dusting with mercury compounds, effect, (66) N.Y.Cornell 641.
- bulbs in Pacific Northwest, thrips affecting, (68) 354.
- bulbs, production, (63) U.S.D.A. 42.
- disease, causal parasite, (64) 745.
- disease investigation fellowship, (67) 417.
- disease investigation fellowship 1932, report, (70) 646.
- diseases, N.Y.Cornell, (69) 61; (70) 791.
- diseases in United States, (67) 418.
- golden-banded, Botrytis blight, (66) 152.
- mosaic, notes, (64) N.Y.Cornell 642; (67) 417.
- seedlings, description, (64) Can. 538.
- soils, survey, (70) 784.
- Lima bean pod borer—
 - distribution, life history, and food plants, (65) 457.
 - in California, (66) 753.
 - notes, (64) 238; (65) 457; (69) P.R. 825; (70) U.S.D.A. 499.

Lima beans, *see* Beans, lima.

Limacodidae—

- on coconut palms, (64) 546.
- on tea in Ceylon, (68) 642.

Limax flavus eggs, hatchability, effect of dehydration, (69) 382.

Limax maximus, control, (61) 546.

Limbs, hereditary abnormalities, (63) 328.

Lime—*see also* Liming.

- analyses, N.J., (61) 21; (63) 19; (65) 23; (67) 115; (69) 24.
- and fertilizer tests, (61) N.J. 715.
- chlorinated, new type, (62) 609.
- effect on alfalfa and corn, (63) N.J. 318.
- effect on cigar tobacco, (65) 46.
- effect on deteriorated tropical soil, (61) 511.
- effect on mobilization of soluble phosphates, (63) 721.
- effect on nitrogen recovery in field crops, (66) 120.
- effect on Norfolk sand, (64) S.C. 616.
- effect on oxidation of pyrite and sulfur, (64) 426.

Lime—Continued.

- effect on potato scab, (68) Me. 493.
- effect on potatoes, (61) N.C. 715.
- effect on sheep on calcium deficient ration, (69) 564.
- effect on soil microorganisms, (69) 184.
- effect on soil moisture, (61) 207.
- effect on soil reaction, (67) 658.
- effect on soil reaction and alfalfa composition, (66) 315.
- effect on sweet corn and beans, (68) Me. 474.
- effect on vegetables, (63) N.J. 120.
- experiments in Leningrad region, (63) 120.
- fertilizing value, (62) Pa. 318.
- fixation of potassium of green manure by, (63) 321.
- for spraying purposes, (69) Mich. 520.
- hydrated, as control for oriental fruit moth, (62) 248.
- hydrated, limestone, and dolomite, availability, (69) 503.
- in animal production, (64) P.R. 372.
- in Bordeaux mixture, abrasive effect, (70) 844.
- in rations, effect on bone development, (66) Tex. 793.
- in soils, duration, (65) Mich. 718.
- incompatibility with fluosilicates, (65) 51.
- kinds and amounts, effect on Iowa soils, (67) Iowa 113.
- niter, *see* Calcium nitrate.
- nitrogen, *see* Calcium cyanamide.
- on acid soils, crop response to, (61) 209.
- penetration after surface application to pastures, (61) 209.
- phosphate, value on dairy farms, (67) Wis. 657.
- products, analyses, (63) Mass. 122.
- products, inspection, Mass., (61) 322; (63) 122; (65) 23; (67) 114; (69) 25.
- protective role for scab spores in lime-sulfur sprays, (63) 347.
- relation to iron absorption by plants, (66) 121.
- requirement studies, (70) Ga.Coastal Plain 746.
- requirements for chicks, (68) Tex. 516.
- requirements of soils, *see* Soils, lime requirements.
- resources of Kenya Colony, (69) 341.
- row method of application, (61) Mich. 418.
- sensitivity of plants to, (66) 519.
- sources for mineral supplements of dairy cattle, (65) Mich. 765.
- status, assessing, use of *p*-nitrophenol for, (69) 490.
- supplements for laying hens, (70) S.Dak. 816.
- surface applied, penetration in pasture soil, (70) Conn.Storrs 323.
- surveys, (61) 624.
- symposium on, (61) 624.
- use of small amounts in row, (64) 618.

- Lime—Continued.
 v. superphosphate for different soil types, (61) Kans. 117.
 value on loam soils, (69) N.C. 341.
- Lime-magnesia problem, (70) Tenn. 157.
- Lime (fruit)—
 blossom blight, control, (64) 448.
 juice, fresh, antiscorbutic value, (69) 804.
 red root disease of, (63) 245.
 sour, canker and gummosis on, (69) 373.
 tree withertip, control, (64) 448.
 tree withertip, notes, (64) 353; (65) 344; (67) 399, 400.
 twigs and fruit, canker on, (67) 264.
 twigs, *Meliola butleri* on, (67) 265.
- Limes (fruit)—
 in California, (68) 765.
 production in Florida, (70) 782.
 storage behavior, (70) 52.
 vitamin C in, (69) 310.
- Limestone—
 application, lasting results, (66) Ill. 211.
 cumulative benefits from, (68) Ill. 590.
 decomposition in soil, (63) Ohio 16.
 degrees of fineness, relative value, (66) N.Y.Cornell 613, N.Y.Cornell 815; (69) Iowa 16; (70) Pa. 304.
 disintegration in soil, effect of season, (64) 723.
 dolomite, and hydrated lime, availability, (69) 503.
 dolomitic, lime-magnesia ratios in, (62) 818.
 effect on cotton, Ga., (65) 123; (66) 729.
 effect on orchard vegetation, (69) Ohio 49.
 effect on pastures, (61) Conn.Storrs 431.
 effect on soybeans, (65) N.C. 127.
 feeding value for cattle, (64) Okla. 758.
 fertilizing value, (64) Ill. 808.
 fine, value, (64) Okla. 715.
 fineness of grinding, Mo., (63) 719; (70) 157.
 flour, feeding value, (70) Tex. 220.
 ground, for fattening cattle, (69) 405.
 ground, value of coarser particles, (69) Ohio 38.
 impurities and agricultural value, (69) Ohio 17.
 judging, score card for, (66) Ill. 211.
 phosphatic, as mineral supplement, (61) 257; (64) N.Y.Cornell 656.
 powdered, drilling, (69) 439.
 role in soil building and crop yields, (66) Ill. 18.
 spreader, home-made, specifications, (61) Oreg. 20.
 use, (62) Ill. 315; (66) S.C. 614.
 v. slag, effect on acid soil, (64) 325.
 value in calf rations, (63) Kans. 464.
 value in cattle ration, (62) Kans. 363.
 value in crop rotations, (67) Va. 668.
- Limestones, waters, and forage crops, (68) Ky. 297.
- Lime-sulfur—
 and new types of sulfur spray, comparison, (69) Wis. 810.
 and sulfur dusts, fungicidal value, (67) 540.
 dilution, sulfide sulfur content as basis, (62) Colo. 55.
 dips, (69) 421.
 dry, for apple scab control, (66) Mo. 330.
 dry, solutions from, composition, (66) 654.
 dry, value as spray, (65) Mo. 340.
 effect on fruit trees, (68) 61.
 for gooseberry mildew, cause of defoliation, (69) 228.
 for San Jose scale control, (70) 356.
 fungicidal value, (65) Mo. 340.
 in steel drums, storage, (62) 653.
 injury, effect of casein spreader, (69) 685.
 lead arsenate spray, modification, (64) 50.
 liquid and dry, oxidation rates, (68) 216.
 relation to scale insects, (63) N.H. 550.
 solutions, fungicidal properties, (66) 440.
 spray adherence to pine needle scale, (70) 211.
 spray for apple scab, (65) Wis. 440; (69) N.Y.State 377, 821.
 spray residues, effect on canned peaches, (61) 612.
 sprays, modified, (68) 496.
 substitute for summer spraying, (67) 699.
 v. Bordeaux mixture for apple scab, (65) Tenn. 150.
- Limicolae of North America, (68) 777.
- Liming—*see also* Lime.
 and soil acidity, (61) Nebr. 812; (69) R.I. 178.
 effect on apple trees, (67) 250.
 effect on availability of manganese and iron in soil, (68) 456.
 effect on onion culture, (65) Ohio 338.
 effect on reaction and relation to availability of phosphorus fertilizers, (69) Wis. 791.
 effect on soil conditions, (65) Iowa 114.
 effect on solubility of soil magnesium, (65) N.C. 114.
 effect on tobacco, (61) Conn.State 135.
 effect on yield and quality of soybeans, (69) Iowa 515.
 effects, (64) Iowa 810.
 experiments, (61) R.I. 614, Va. 716, Va. 727; (63) 721; (64) N.C. 20; (65) N.C. 115; (66) Va. 516, W.Va. 528; (68) Tenn. 182, Ky. 298.
 injury from excess, (70) Vt. 157.
 material effect on sulfur drainage from soil, (61) 624.
 material, Kentucky marl beds as source, (61) 624.

Liming—Continued.

- materials, (64) N.Y.State 409.
- materials, choice of, (62) Ohio 22.
- materials, comparison, Ind., (61) 623; (63) 515; (70) 303.
- materials, finely divided, rates of reaction with acid soils, (70) 24.
- materials, neutralizing values and rates of reaction, (63) 322.
- of Dekalb soils, (70) Pa. 304.
- sandy soils, effect, (65) Fla. 415.
- tests with different crops, (68) S.C. 754.
- value, (68) W.Va. 734.

Limnea—

- brazieri, bionomics, (62) 563.
- cubensis as host of liver fluke, (62) P.R. 771.
- limosa, chironomid parasite of, (69) 683.
- spp., hosts of liver fluke, (61) Oreg. 68.
- viatrix, intermediate host of liver fluke, (69) 270.

Limonius—

- agnus on tobacco, (65) Conn.State 356.
- californicus, fumigants for, (70) 511.
- spp., reaction to aromatic compounds, (68) 358.

Limothrips cerealium, life history, habits, and enemies, (69) 553.

Linden, assimilation in, effect of acids, (70) 597.

Linden Verticillium disease, (68) 62.

Linebreeding, meaning, (69) Iowa 507.

Linen—

- fabrics, effect of laundering, (61) 897.
- table, for hotel use, (70) 573.

Linguatula rhinaria, pathological changes caused by, (69) 579.

Linkage—

- and criteria of independence of genes in *Cenothera*, (68) 748.
- and dominance, correlation, (64) 330.
- and inheritance relations of chocolate pericarp in corn, (65) 521.
- autosomal, in poultry, (63) 818.
- between blood-group genes and other genes of rabbits, (69) 195.
- chromosomal, in peas, (66) 726.
- groups in poultry, (65) 328.
- in barley, (61) 629.
- in corn, (61) 216; (64) 428; (66) Iowa 23.
- in mice, (66) 820.
- in sheep, (66) 423.
- in silkworms, (62) 620.
- in size inheritance, (67) 231; (68) 316; (70) 759.
- in sweet peas, (68) 179.
- intensities, calculating, formulae and tables, (62) 623.
- intensities, calculating from F_3 data, (68) 747; (70) 757.
- of a higher order, (61) 215.
- of characters albinism and shaker in mice, (62) 215.
- of genes for crest and frizzle in fowls, (68) 317.
- relations in barley, (66) Minn. 126.

Linkage—Continued.

- relations in brown midrib in corn, (66) 727; (69) 29.
- relations in corn of glossy character, (67) 119.
- relations in poultry, (64) 764.
- sex, within a breed of poultry, (64) 821.
- theory, (63) 431.
- values, calculation, (63) 24.

Linoleic acid—

- and ferrous iodide in vitamin A deficiency, (68) 415.
- and ferrous iodide in vitamin A deficiency, criticism, (68) 416.
- oxidation, effects of carotene and of vitamin A, (68) 131.

Linolenic acid, acid number, determination, (68) 586.

Linopodes antennaepees—

- biology and control, Pa., (66) 246, 756.
- notes, (70) Ill. 648.
- on mushrooms, (63) 549; (64) 60.

Linotoxin, use of term, (64) 474.

Linseed—

- cake, feeding value, (63) 163; (68) Colo. 512.

meal—

- as protein supplements for cattle, (63) Kans. 465.
- effect on feces of dairy cattle, (62) 554.

- feeding value, (62) Ohio 65; (63) Nebr. 859; (64) S.Dak. 660; (66) Ind. 863.

proteins, (64) Ill. 859.

proteins, nutritive value for pigs, (66) 361.

v. alfalfa seed screenings for dairy cows, (69) Idaho 848.

v. cottonseed meal for calves, Okla. Panhandle, (61) 559; (63) 466.

v. cottonseed meal for steers, (61) Wis. 161.

v. ground soybeans for heifers, (65) Ind. 169.

v. pea meal for milk production, Idaho, (66) 263; (68) 369.

v. soybeans for milk production, (61) Kans. 166.

value for lambs, (65) Minn. 62; (68) Pa. 511; (70) Pa. 371.

oil—

and its fatty acids, acid number, determination, (68) 586.

ovicidal action, (62) 241.

soap, germicidal efficiency, (64) 473.

sulfonated, for protection of orchards against rodents, making, (69) 229.

tariff data, (62) 576.

proteins v. cottonseed proteins, nutritive value, (66) Ill. 258.

Liothrips—

- urichi in Trinidad, notes, (64) 365.
- vaneckeii on lily bulbs, (68) 354.

- Liparis dispar*, bionomics and external structures, (69) 690.
- Lipase**—
 activity, acceleration by vitamin A, (62) 587.
 in dairy products, inactivation, (68) 241.
 microbial, activity, copper soap formation as test, (69) 325.
 pancreatic, activating effects of compounds compared with their inhibiting effects on liver esterase, (68) 435.
 pancreatic, inactivation by heat, (66) 112.
- Lipemia*, vitamin B (B_1), v. inanition lipemia in lactating rats and young, (67) 486.
- Lipeurus tropicalis* n.sp., description, (65) 548.
- Lipids**—
 plasma, in lactating and nonlactating animals, (67) 304.
 unsaponifiable, in lettuce, (65) 203.
 unsaponifiable, of beef liver, (70) 9.
- Lipin-protein complexes**, studies, (61) 306.
- Lipins**—
 effect on fat test of buttermilk, (66) 409.
 treatise, (63) 8.
- Lipochromes**, vitamin A action of, (61) 793.
- Lipoid and amide**, relations, (61) 818.
- Liponyssus**—
bacoti, see Rat mite, tropical.
silviarum, control, (61) 546.
silviarum, notes, (65) 757; (66) 247.
silviarum, parasite of fowls, (64) N.J. 178.
silviarum, treatment with nicotine sulfate, (64) 858.
- Lippia* spp., toxicity, (70) 828.
- Liquid junction potentials**, (68) 288.
- Liquid particles**, small, spontaneous dispersion, (69) 323.
- Liquids**—
 continuous extraction, apparatus for, (66) 308.
 in test tubes, evaporation apparatus, (64) 711.
 interfacial tension, measurement, double capillary method, (68) 580.
 potentials at interfaces, measurement, (68) Minn. 7.
 spreading on solid surfaces, (69) 284.
 total solids in, determination, (61) 309.
- Liquor amni** of domestic animals, pH and ferment in, (65) 869.
- Lissonota* sp., notes, (63) 356.
- Lissorhoptrus simplex*, see Rice water weevil.
- Listroderes**—
obliquus, see Vegetable weevil.
praemorsa, studies, (62) 158.
- Listronotus**—
latusculus, notes, (67) 579.
rudipennis, notes, (67) 579.
- Litchi**, culture experiments, (69) Hawaii 652.
- Lithiasis**—
 and bitter pit of pears, (61) 653.
 urinary, in cattle, (67) 596.
- Lithium**—
 aluminate, formation, (68) 293.
 compounds, effect on chick embryo development, (62) 460.
 pyruvate, preparation, (68) 730.
- Litter size and latitude**, (65) 725.
- Liver**—
 aluminum in, (62) 586.
 and blood sausage, effect on hemoglobin regeneration, (63) 897.
 and iron for secondary anemia, (64) 795.
 and liver extracts, iron and copper in, (69) 463; (70) 717.
 autolyzed, for treatment of pernicious anemia, (68) 281; (69) 314.
 beef, unsaponifiable lipids of, (70) 9.
 cirrhosis in horses, (62) 876.
 desiccated fetal calves', for secondary anemia, (64) 297.
 dietary principle stimulating growth and lactation, (68) 860.
 diets, specific effect on growth and fat deposition, (62) 760.
 disease, enzootic, of equines in South Africa, (67) 70.
 dog, effective in pernicious anemia, amount, (70) 885.
 effect on anemia of rice disease, (62) 596.
 extract as source of vitamins B and G, (65) 492, 493, Ala. 493.
 extract, Minot's, blacktongue preventive value, (64) 594.
 extract preparation for pernicious anemia, (62) 191.
 extract v. iron for anemias of infancy, (68) 127.
 extracts, oxidation capacity, (67) 482.
 extracts, vitamin B_1 in, (66) 197; (67) 187.
 extracts, vitamin G (B_2) in, (67) 187.
 fatty degeneration in dogs, (62) 695.
 fish, for pernicious anemia, (68) 712.
- fluke**—
 bionomics, (62) 563.
 control, (62) 467; (67) 450.
 development in final host, (61) 372.
 development in *Limnea peruvia*, (64) 163.
 in California, control, (68) 531; (70) 96.
 in cattle, P.R., (64) 378; (66) 272.
 in Cuba, (70) 677.
 in rabbits, longevity, (67) 605.
 in sheep and goats, Oreg., (61) 68; (64) 377.
 in sheep of Australia, (62) 563.
 in South Wales, summary, (61) 675.
 intermediate host, (61) 856; (62) P.R. 771; (69) 270.
 large American, life history, (64) 251.

Liver—Continued.

- flake—continued.
 miracidia, securing for laboratory work, (70) 647.
 studies, (61) Oreg. 768; (64) 747; (66) P.R. 571; (68) 90.
 treatment with carbon tetrachloride, (70) Guam 825.
 function test in sheep, (69) 109.
 glutathione in, microdetermination, (66) 310.
 growth factors in, (62) 493; (69) 899.
 hemoglobin regenerating potency, (69) 473.
 human, vitamin A in, quantity, (68) 706.
 human, vitamin A reserves in health and disease, (68) 706, 707.
 in puerperal sepsis, vitamin A content, (68) 707.
 in various forms, nutritional value, (64) 580.
 of dog, carotenase in, (67) 647.
 of ruminants after splenectomy, nodules in, (63) 171.
 oils and vitamin A, spectrographic data, (65) 804.
 oils, antimony trichloride and ultra-violet absorption tests, (67) 102.
 oils, chromogenic constituents, new conception, (67) 341.
 oils, color tests for vitamin A, (63) 92.
 pig's, carotin in, tests for, (61) 491.
 preparation of glutathione from, (64) 9.
 preparations, purified, vitamin G potency, (70) 137.
 rot in sheep, studies, (62) 875.
 sheep, vitamin C in, effect of freezing and storage, (68) 566.
 subacute atrophy, (65) 567.
 tribasic acid in, (67) 199.
 v. whole wheat and bran for hemoglobin regeneration, (69) 145.
 value for reproduction and lactation, (64) 291.

Livers—

- hard yellow, in sheep and cattle, (70) Tex. 241.
 vitamin G in, (70) 424.

Liverworts as vegetative pioneers on volcanic ash, (69) 336.

Livestock—*see also* Animals, Cattle, Sheep, *etc.*

- and livestock products, Kansas, marketing, (61) Kans. 180.
 and meat industry of Union of South Africa, (69) 450.
 and poultry diseases, treatise, (63) 476.
 atlas, international, (65) 660.
 atlas, international, correction, (68) 230.

 559, 571; (68) Conn.State 65,
 226; (69) Conn.State 546, Mich.
 561; (70) N.Y.State 507.
 transferring to oriental peach moth,
 (62) 655.

delicatus and *M. ancylivorus*, differen-
 tiation, (66) 558.

delicatus, notes, (64) Ohio 651; (65)
 N.J. 54; (67) 443; (70) 217.

gifuensis—

notes, (63) 257.

parasite of European corn borer,
 (65) U.S.D.A. 156.

polyembryonic development, (64)
 162.

harrisi n.sp., description, (65) 59.

n.sp., notes, (70) 364.

spp., notes, (64) 751; (66) Del. 551.

Macrodaetylus subspinosus, see Rose chafer.
Macromeigenia genus, synopsis, (65) Tex.
 899.

Macronoctua onusta, see Iris borer.

Macrophoma—

pachysandrae n.sp., description, (67)
 402.

phaseoli, notes, (62) Miss. 145.

phaseoli, renamed, (63) 144.

sp., notes, (64) 846; (69) 526.

theae, notes, (63) 150; (69) 526.

theicola, notes, (64) 847.

Macrophomina phaseoli—

notes, (63) 843; (64) 846; (65) 441;
 (69) 373; (70) 201.

parasitism and physiology, (69) 527.

pycnidial stage of *Rhizoctonia batati-*
cola, (63) 144.

studies, (68) 340.

Macrostrongylus baylisi n.sp., notes, (66)
 867.

Macropsis—

Nearctic species, (69) 238.

trimaculata, transmission of peach yel-
 lows by, (69) 386.

Macrorileya oecanthi—

life history, habits, and economic sig-
 nificance, (64) 251.

notes, (65) Calif. 53.

Macrosiagon—

cutellata, economic value, (62) 546.

pusillum, notes, (67) U.S.D.A. 582.

Macrosiphoniella sanborni, see *Chrysanthem-*
mum aphid.

Macrosiphum—

ambrosiae, feeding habits, mechanical
 factors affecting, (68) 641.

ambrosiae, vector of bean mosaic virus,
 (69) 387.

dirhodum, notes, (61) 244.

gei as transmission of potato leaf roll,
 (64) 244.

gei, carrier of potato mosaic, (64) 233.

gei, notes, (63) 256; (66) 350; (69)
 239.

gei, vector of virus of breaking in tulips,
 (65) 247.

gei, vector of yellow dwarf, (68) 502.

granarium, see Grain aphid, English.

matsumuraeanum, biological studies,
 (67) 286.

red, on lettuce, description, (65)
 Va.Truck 156.

solanifolii, transmission of tobacco mo-
 saic by, (62) 854.

solidaginis, control, (68) Conn.State 65.

Macrosporium—

carotae, control, (66) N.Y.Cornell 640.

carotae, notes, (68) Ohio 771.

cucumerinum, notes, (62) 145.

herculeum, notes, (70) N.Y.Cornell 791.

leaf spot on clover, (66) 149.

parasiticum, notes, (61) 345.

porri, studies, (61) 345.

ricini, notes, (66) 842.

sarcinaeforme, notes, (66) 149.

sarcinula, notes, (66) 148.

solani, notes, (65) N.J. 838; (67) 407;
 (68) Colo. 626; (70) Colo. 642.

sp., notes, (62) Mo. 46; (63) 44.

sp. on onion and garlic, (67) 265.

Mad itch—

and pseudorabies, identity of viruses
 causing, (69) 266.

of cattle, (64) 476.

relation to pseudorabies, (65) 872.

studies, (69) 860; (70) 677.

Maggots, sterile, for treatment of infected
 wounds, (68) 645, 646; (69) 83; (70)
 U.S.D.A. 509.

Maggots, sterile, production for surgical use,
 (69) 267.

Maglicada (*Tibicina*) septendecim, see Ci-
 cada, periodical.

Magnesia—

deficiencies of sandy soil types, (65)
 N.C. 114.

effect on quality of tobacco, (61) Conn.
 State 136.

relation to burning qualities of cigar
 leaf tobacco, (65) Conn.State 336.

requirements of tobacco, (69) Conn.
 State 518.

toxic action on sugarcane, (68) 312.

Magnesia-lime problem, (70) Tenn. 157.

Magnesian materials, comparison, (64) 325.

Magnesium—

and calcium—

absorbed and exchangeable, in soils,
 (62) 818.

Magnesium—Continued.

- and calcium—continued.
 - in soil, effect of moisture and cropping, (61) 511.
 - ratio in soils, relation to crop growth, (70) 23.
 - relations in animals, (62) 458.
 - separating, method, (61) 711.
- and manganese, effect, (69) R.I. 178.
- arsenate insecticides, properties, (64) 52.
- arsenate, use against Mexican bean beetle, (66) Conn.State 761.
- arsenate, value as spray, (62) Mo. 40.
- availability and base exchange in rice soil, (62) Ark. 811.
- carbonate, effect on anemia of rice disease, (62) 596.
- carbonate in diet of chicks, effect, (68) 80.
- chlorate as substitute for sodium chlorate, (61) 227.
- compounds, effect on chick embryo development, (62) 460.
- coprecipitation in calcium oxalate, (68) 581.
- deficiency—
 - cause of corn chlorosis, (62) 441.
 - effect on apple trees, (62) 839.
 - effect on fruit trees, (64) 539; (65) 638.
 - in animals, (70) 560.
 - in animals, symptomatology, (68) 130, 701.
 - in cotton, control, (66) S.C. 614.
 - in crops, symptoms, (68) S.C. 734.
 - in soils, (70) U.S.D.A. 448.
 - of sandy soils, N.C., (61) 718; (63) 614.
 - of soil types, (68) N.C. 452.
- determination, McCrudden method, accuracy, (70) 298.
- determination with 8-hydroxyquinoline, (65) 504.
- effect on calcium assimilation of calves, (68) Mich. 805.
- effect on growth of fungi, (70) 29.
- effect on oxidation of pyrite and sulfur, (64) 426.
- effect on potato soil types, (70) 327.
- effect on solubility of potassium in soil and subsoil, (64) 425.
- electrometric estimation, use of anti-mony electrode in, (68) 154.
- feeding of plants via leaves with, (67) 22.
- forms in serum and milk, (70) 873.
- in animal and plant nutrition, significance, (64) 283.
- in avocado leaves, (62) Calif. 745.
- in blood, determination, (68) 16.
- in bones, colorimetric estimation, (70) 826.
- in Chinese foods, (61) 589.
- in feeding stuffs and excreta, determination, (68) Minn. 17.
- in mixtures, determination, (70) Me. 752.

Magnesium—Continued.

- In New England soils, (68) Conn.State 445.
 - in pea plants, variations, (62) 415.
 - in rations of calves, effects, (66) 863; (68) Mich. 370.
 - in soils, determination, (63) 504.
 - in submerged soil solutions, (64) 16.
 - in zeolitic soils, (61) Ariz. 618.
 - lake of curcumin, (66) 508.
 - microanalysis, (62) 167.
 - relation to calcium, phosphorus, and vitamin D in ration of dairy cattle, (68) Mich. 805.
 - requirements of crops, (67) Mass. 367.
 - requirements of tobacco, (62) 721; (68) 188.

Mandarins—

- notes, (61) Calif. 341; (66) Tex. 35.
- vitamin C in, (68) 861.

Manganese—

- and magnesium, effect, (69) R.I. 178.
- arsenate as control for codling moth, (61) 552.
- arsenate, commercial, properties, (63) 847.
- as factor in hemoglobin building, (61) 90, 791; (63) 597.
- as soil amendment for tomatoes, (65) Fla. 434.
- availability, effect of calcium and magnesium carbonates, (63) 813.
- availability, effect of liming, (68) 456.
- availability in soils, (68) 307, 456.
- chloride, effect on nitrification, (61) 623.
- deficiency—
 - disease of oats, (66) 148.
 - effect on citrus growth, (68) Calif. 459.
 - effect on growth and sugar in plants, (70) 597.
 - effect on oats and cowpeas, (66) S.C. 627.
 - in a lime-induced chlorosis, (61) 533.
 - in crops, symptoms, (68) S.C. 734.
 - in soils at Florence, (68) S.C. 734.
 - in soils, effect on crop yields, (68) 307.
 - in soybean plants, (65) N.C. 115.
 - relation to Pahala blight of sugarcane, (66) 748.
- determination—
 - after oxidation by periodate, (66) 807.
 - in animal materials, (65) 12.
 - in presence of silica, (62) 203.
 - method of oxidizing and dissolving soil for, (65) 312.
- dioxide in soil, detection and significance, (61) 512.
- dioxide in soil, effect on accuracy of quinhydrone electrode, (61) 203.
- effect on burned soils, (63) Fla. 613.
- effect on cobalt polycythemia, (69) 754.
- effect on crops, (64) Oreg. 317.

Manganese—Continued.

- effect on hemoglobin regeneration in dogs, (63) 897.
- effect on mold growth, (66) Ky. 119.
- effect on nitrogen fixation, (70) 306.
- effect on oats, (64) 723.
- effect on plants and animals, (62) Ky. 203.
- effect on reproduction, (68) 702.
- effect on yeast growth, (66) Ky 119; (68) 174.
- electrometric titration, (61) 712.
- estimation, new and simplified colorimeter for, (69) 330.
- for anemia treatment, quantitative variations in, (66) 597.
- free diet, effect on reproduction in rats, (68) 859.
- high intake, effect on rats, (68) 702.
- in biological material, determination, (64) 802.
- in cereals and cereal mill products, (63) 108.
- in *Chlorella* sp. growth, necessity and function, (66) 419.
- in fish, (69) 752.
- in food and biological material, bibliography, (69) 752.
- in foods, (61) 590; (65) Wis. 491.
- in foods, distribution, (66) 889.
- in green and etiolated leaves, comparison, (69) 755.
- in Malayan soils, (70) 354.
- in milk, (64) Ohio 672; (69) 415.
- in milk, effect of rations, (66) 890.
- in nutrition, (62) 585; (65) 192; (66) 689; (67) Wis. 769; (68) Ky. 413.
- in plants, determination methods, (66) 806.
- in plants, distribution and value, (67) 118.
- in plants, factors affecting, (63) 723.
- in serving portions of common foods, (66) 292.
- in soil and plant, effect of soil reaction, (66) Ky. 16.
- in submerged soil solutions, (64) 16.
- in Texas soils, relation to crops, (66) Tex. 211.
- in vegetable greenhouses, use, (64) Ohio 817.
- in vegetable leaves and shoots, (64) 581.
- inserted into tree trunks, effect, (66) Idaho 235.
- metabolism of rats, (65) 490.
- metabolism studies, technic, (67) 91.
- relation to plant growth, (65) 119; (68) 27; (69) N.Y.Cornell 25.
- requirement of green alga, (66) N.Y.Cornell 622.
- requirement of *Lemna* minor, (66) 419.
- role in nutritional anemia, (65) 297.
- role in therapeutic activity of iron, (68) 859.
- salts, fertilizing value, (63) R.I. 616.
- storage in body, effect on hemoglobin building, (62) 391.

Manganese—Continued.

- sulfate, effect on nitrification, (61) 623.
- sulfate, effect on soils, (65) Mass. 22.
- sulfate for tomato chlorosis, (63) Ohio 40.
- sulfate, standard stock solutions, (64) 803.
- toxicity in tobacco, (62) 620.

- side tongue grafting, (61) Hawaii 732.
- spraying experiments, (67) 400.
- varietal notes, (66) P.R. 228.
- vitamin C in, (69) 310.
- vitamins in, (69) 307.

Mangosteen disease, notes, (65) 344.

Manioc meal, feeding value, (64) Oreg. 370.

Mankind and forests, treatise, (62) 843.

Mannite utilization by *Azotobacter*, (67) Mass. 367.

Mannitol—

- effect on growth of microorganisms, (62) 94.
- effect on nodule formation by clover, (70) 39.
- isolation and identification from *Aspergillus fischeri*, (69) 166.

Mannose—

- and first sugar of photosynthesis, (68) 148.
- copper reduction values, (69) 174.
- glucose, and fructose mixtures, alcoholic fermentation, (66) 112.

d-Mannose from culture medium of tubercle bacilli, (65) 205.

Mansonia—

- mosquitoes, locating larvae, (66) 557.
- perturbans, biology, (68) 789.

Mansonioides africanus as yellow fever carriers, (63) 258.

Mantis—

- Chinese, notes, (68) Conn.State 66; (69) 77.
- new oriental, in United States, (69) 238.
- religiosa, morphology and biology, (68) 783.

Manure—see also Cow manure.

- and artificial fertilizers, comparison, (65) R.I. 511; (70) N.Y.Cornell 746.

artificial—

- effect on soils and crops, (64) Iowa 322.
- from straw, (62) Mo. 17, N.Y. State 21.
- humification by hydrogen peroxide, (69) 185.
- production, (61) Iowa 318, 620, 621; (64) Iowa 120, Iowa 809; (65) Iowa 113.

as supplement to commercial fertilizers for tobacco, (65) Conn.State 335.

care, use, and economic value, (65) Oreg. 815.

composted, and spent mushroom soils, decomposition rate, (68) 597.

composting with sulfur and rock phosphate, (62) Ga. 21.

cost of carting, (70) 848.

decomposition by *Agaricus campestris*, (66) 316.

Manure—Continued.

decomposition, chemical and microbiological principles, (62) 814.

decomposition in soil, microbiology, (68) 300.

disposal on poultry ranch, (67) 450.

distribution, (70) 837.

effect on calcareous soil, (64) 722.

effect on fertilizing value of floats, (70) N.Y.Cornell 453.

effect on microbiological activities in virgin peat, (67) 221.

effect on *Nicotiana rustica*, (65) 632.

effect on soil nitrogen, (61) Wis. 118.

effect on wheat, (64) Utah 434.

fertilizing value, (61) Oreg. 20; (63) Utah 617.

in hotbeds, cornstalks as substitute, (70) 615.

in rotations, value, (69) Ind. 37, U.S.D.A. 789.

mulches, injury to greenhouse-grown tomatoes, (63) Ohio 39.

nitrogen availability under field conditions, (65) 515.

nitrogen in, conservation and availability, (65) 514.

nitrogen losses from, (70) 751.

obligate anaerobic microflora, (70) 592.

organic, microbiological investigation, (70) 592.

organic, use, (63) Utah 617.

piles, reinfestation of corn borer from, (66) U.S.D.A. 453.

preservation under arid conditions, (65) N.Mex. 118.

requirements for vegetables, (64) R.I. 839.

storage tests, (65) N.Mex. 221.

substitutes in greenhouses, (67) Ind. 523.

substitution of green manures for, (69) R.I. 178.

synthetic, for mushroom growing, (62) 138.

use under semiarid conditions, (62) Okla.Panhandle 211.

v. green manure for cotton, (68) S.C. 754.

value on sandy soil, (65) Ind. 124.

value per ton on poor and good soil, (62) Ill. 315.

Manuring experiments and rotation of crops, (65) Utah 627.

Maoricoris n.g. and n.spp., descriptions, (70) 210.

Maple—

bigleaf, utilization, (68) U.S.D.A. 52.

black leaf spots and premature loss of foliage, (70) 353.

bladder gall mite, control, (65) N.Y. Cornell 53.

bladder gall, notes, (66) 247.

flavor, source for ice cream, (67) 737.

gummosis in, (63) 250.

leaf disease, studies, (63) Conn.State 650.

 papers on, U.S.D.A., (61) 111, 313, 613; (62) 16, 208, 505, 808; (63) 314, 611, 809; (64) 205, 516; (65) 15, 316, 618, 807; (66) 312, 611; (67) 11, 366; (69) 176, 177, 332, 776; (70) 303, 446, 745.
 problems, (66) 116.
 relation to soil physics, (68) 296.
 studies, (62) 611.
 textbook, (67) 654.
 treatise, (65) 713.

- Meteoros**—
 autographae, notes, (69) 398.
 hypophloei n.sp., description, (66) 160.
 nigricollis, notes, (66) 160.
- Meters**—
 fluid, theory and application, (61) 476.
 for farm equipment, (65) 675.
- Methanes**, optically active trisubstituted containing phenyl group, (67) 198.
- Methanol**—
 and other antifreeze agents, comparison, (70) 547.
 freezing and flow points for, (69) 122.
 synthetic, as motor fuel, (70) 255.
- Methemoglobin**—
 crystalline, preparation and properties, (65) 202.
 determination, (70) 298.
- Methionine**—
 amino acid, constitution and synthesis, (61) 201.
 apparent dissociation constants, (67) 196.
 in proteins, determination, (68) 438.
 isolation from casein by hydrolysis, (68) 721.
 metabolism, (69) 145.
 role in animal organism, (69) 617.
- Methoxyl**—
 determination in plant materials, (67) 206.
 group, determination, (67) 206.
 in food plants, (69) 494.
- Methyl**—
 anabasine, toxicity against mosquito larvae, (69) 242.
 chloride poisoning experiments, (63) 497.
 red as adsorption indicator, (68) 153.
- Methylamine**, N-chloro derivatives, effect on anthrax spores, (63) 370.
- Methylene blue**—
 determination, (63) 113.
 photodynamic action on viruses, (69) 272.
 reduction in milk, changes in oxidation-reduction potential, (66) 807.
 reduction in milk, effect of light, (66) 807.
 reduction test of milk, (64) 204, 502.
 reduction test of milk, modified, (65) 866.
 reduction test, value in estimating keeping quality of milk, (65) 373.
 substitutes in reductase test, (68) Mich. 288.
- Methylglyoxal**—
 color and precipitation reactions, (67) 100.
 determination, (67) 100.
 formation by *Clostridium acetobutylicum*, (69) 166.
- Methylnornarcotine** and glycuronic acid mixture, antiscorbutic activity, (70) 426.
- Methylpyrrolidine** toxicity to mosquito larvae, effect of pH, (64) 56.

 Akhissar spotting, (70) 32.
 albino, age at sexual maturity, (61) 327.
 albino and colored strains, age of attainment of puberty, (68) 605.
 albino, protein requirements, (69) 144.
 affecting watermelons, (69) Fla. 231.
 as pests of watermelons, (67) Fla. 559.
 autosomal recessive coat form character in, (69) 510.
 birth weight, morphogenetic relation to mature body weight, (69) 193, 194.
 blood of, studies, (67) 70.
 cataract and allied eye defects in, (68) 748.
 crosses, mammary cancer in, (68) 605.
 destruction of larch sawfly larvae by, (62) 251.
 developmental anomalies in special strain, (65) 725.
 differentiated by two diseases, genetic constitution, (70) 606.
 dwarf, studies, (62) 323.
 eradication methods, (66) Mich. 153.
 female, sexual maturity in, (69) 196.
 field, breeding, (68) 777; (69) 32; (70) 203.
 flexed tailed, (68) 746.
 genetics of ear, (68) 746.
 grasshopper, life history and habits, (62) U.S.D.A. 446.
 growth rate, innate limitations, (62) 216.
 hairless character in, (66) 522.
 harelip, a new mutation in, (68) 179.
 hereditary, brain anomaly in, (68) 465.
 hereditary resistance to specific bacterial infection, (65) 328.
 hound-eared, (70) 462.
 hybrids, tumors in, (68) 747.
 hybrids with different numbers of tail rings, (67) 377.
 in orchards, control, (68) 63.
 infection following instillation of vesicular stomatitis virus, (70) 390.
 inheritance in, (64) 727.
 inheritance of silver gray in, (66) 819.
 inheritance of weight in an interspecific cross, (68) 746.
 injury to trees and grass protection, (66) Mich. 139.
 interspecific cross of, inheritance in, (65) 328.
 interspecific cross of, stillbirths in, (65) 328.
 laboratory, expectation of life, (66) 525.
 laboratory, origin, heredity, and culture, (65) 650.

Mice—Continued.

- lactating, effect of pregnancy urine injection, (69) 196.
 leaden, recent color mutation in, (68) 747.
 linkage between shaker character and pink eye, (66) 820.
 male, fertility, effect of X-rays, (68) 748.
 maturation phenomena in, (70) 32.
 new mutation to dominant spotting, (67) 376.
 new mutation to white-belly in, (68) 465.
 nutrition studies, (63) 94.
 outbreak in Kern County, California, (61) 350.
 parted parietals in, (64) 820.
 pigmentation in, reverse mutation from dilute to intense, (66) 129.
 protection of fruit trees from, (61) Ohio 836.
 reproductive rate, effect of removal of litter, (68) 752.
 shaker, a new mutation, (62) 822.
 short tail in, morphological study, (68) 745.
 size factors in, nature, (66) 820.
 suckled by rats, growth, (61) 258.
 tail mutations in, preliminary symbols, (69) 510.
 tumor susceptibility in, inheritance, (68) 747.
 twisted nose in, inheritance, (62) 824.
 vitamin B requirements, (62) 894; (67) 634.
 wildness and tameness in, inheritance, (70) 606.
 X-rayed—
 abnormalities of offspring, (63) 328; (64) 331; (66) 422; (68) 465.
 anatomical defects in descendants, inheritance, (68) 745.
 effective sterilization dose, index, (64) 331.
 effects, (62) 215.

Michigan—

- College, notes, (61) 200, 397, 599; (62) 698, 900; (63) 398, 899; (64) 98, 200, 797, 900; (66) 396; (68) 572; (69) 622; (70) 732.
 Station, notes, (61) 200, 397, 599, 899; (62) 498, 600, 900; (63) 899; (64) 98, 200, 797, 900; (65) 799; (66) 396; (69) 622.

 treatment of pastures, (62) 131.
 Mineralogy and chemistry, etymological dictionary, (64) 201.
 Minerals—
 absorption by plants, (68) 174; (69) 188.
 as soil correctives, (63) Wyo. 121.
 colloidal, paper on, (69) 323.
 consumption by pigs, effect of place of feeding ear corn, (65) 255.
 deposition in bones of calves on rachitic and antirachitic rations, (64) Pa. 164.
 effect on chloroplast pigments in soybeans, (61) 324.
 effect on egg production and fertility, Ark., (62) 868; (66) 566.
 effect on wool yields of Angora rabbits, (62) 462.
 feeding, effect on eggs, (68) Ark. 653.
 feeding to livestock, (70) Ill. 220.
 feeding to range cattle, (69) 405; N.Mex. 249.
 for chicks, (63) Ohio 63; (68) Idaho 363.
 for dairy cattle, (62) Pa. 370; (63) Ohio 669; (66) Fla. 59, Ala. 863.
 for fattening steers, (65) Iowa 159.
 for feeding with corn, (61) Ohio 463.
 for pigs, (62) Ohio 66; (63) N.C. 661; (64) Ohio 661, Okla. 760; (65) N.C. 164, 255; (67) 299.
 for poultry, effect, (64) Ark. 465.
 for poultry, sources, (61) S.Dak. 62.
 for raising draft colts, (65) Iowa 166.
 function in nutrition, (69) 406.
 high-priced, value for pigs, (66) Ill. 258.
 in Alberta soils, leaching, (68) 448.
 in canned peas, (63) Wis. 91.
 in grains, (61) Utah 409.
 in juice and whole apple, comparison, (61) 310.
 in leaves, effect of fertilizers, (65) 25.
 in milk, (70) 671.
 in pasture grasses of North Wales, (69) 644.

Mineral—Continued.

- in pastures, intensively treated, (67) 297; (69) 251.
- in pineapple bran, (62) Hawaii.Pineapple Cannery's 457.
- in serum, physical status, determination, (66) 309.
- in soil and plants grown on the soil, relation, (66) S.C. 615.
- in soil, effect on quality of onion scales, (69) N.Y.Cornell 51.
- in winter ration of beef cattle, (70) Wyo. 816.
- in winter rations for breeding ewes, (63) Ohio 59.
- nonmetallic, and products, standards and specifications, (67) 465.
- role in growth and disease resistance, (69) 464.
- v. protein supplements for fattening pigs, (61) N.C. 762.

Mines, *Armilaria mellea* in, (67) 280.

Minks—

- American, lung flukes in, (65) 73.
- distemper in, (69) 596.
- feeding and breeding, (66) 845.
- raising, treatise, (64) 66; (66) 463.

Minnesota—

- State Testing Mill, activities and equipment, (68) 326.
- Station, notes, (62) 698; (63) 98, 198; (64) 900; (65) 300, 599; (66) 200, 300, 497; (67) 95, 351, 783; (68) 572, 875; (69) 159, 622, 911.
- Station, report, (61) 699; (62) 696; (65) 99; (68) 138; (69) 318.
- University, notes, (61) 299; (62) 100, 698; (63) 98, 198; (64) 900; (65) 599; (66) 200; (67) 95, 351; (68) 875; (69) 911.

Mint—

- cuttings, effect of nitrates on growth, (62) 836.
- fllea beetle, habits and control, (61) Mich. 358, 749.
- fllea beetle, notes, (69) Ind. 71.
- hay v. alfalfa for milk production, (68) Mich. 236.
- Japanese, as source of natural menthol, (70) U.S.D.A. 339.
- rust, notes, (64) 43.

Minuticornicus gravidis n.g. and n.sp., description, (62) 155.

Miridae—

- feeding on cotton, effects, (62) 655.
- of Ohio, (61) 356.

Miris dolabratus, see Meadow plant bug.

Misocyclops marchali, establishment in New Zealand, (63) 851.

Mississippi—

- College, notes, (61) 397; (63) 599; (65) 698; (66) 697; (67) 96.
- River system, drainage areas and river distances, (70) U.S.D.A. 838.
- River traffic, 1918-1930, analysis, (66) 585, 883.

Mississippi—Continued.

- Station, Raymond Branch, report, (61) 498; (63) 96; (65) 99; (68) 138.
- Station, report, (62) 99, 199; (64) 498, 697; (66) 798; (68) 425.
- Station, South Branch, report, (61) 498; (63) 96; (65) 99; (67) 94.
- waterway, (61) 285.

Missouri—

- Fruit Station, report, (61) 797; (64) 899; (69) 621.
- Station, notes, (61) 299, 899; (62) 699, 797; (65) 698; (66) 697; (69) 622; (70) 288, 431, 732.
- Station, report, (62) 99; (63) 797; (66) 394; (67) 494.
- Station, work, 1932, (70) 287.
- University, notes, (61) 599, 899; (62) 699, 797; (65) 698; (66) 98, 697; (69) 622; (70) 288, 431, 732.

Mistletoe family, tree destroyers of, (68) 634.

Mite—

- broad, notes, (70) U.S.D.A. 499.
- tropical fowl, in Ohio, (61) Ohio 456.

Mites—

- affecting evergreens, (61) 753.
- affecting poultry, control, (61) Nebr. 175; (67) La. 283, La. 313.
- and other animal pests of medical importance, relation to public health, (65) 244.
- and other animal pests of medical importance, treatise, (62) 542.
- control, (63) N.Dak. 875.
- gall midge enemies of, (70) 66.
- in greenhouses, (65) Conn.State 451.
- in rubber nurseries, control, (62) 457.
- infesting fruit trees, (61) 354.
- infesting raspberries, control, (69) 247.
- injurious and beneficial, on top and soft fruits, (68) 652.
- injurious to privet, (69) Md. 686.
- lice, and other pests of poultry, control, (61) N.J. 451.
- notes, (69) Fla. 231.
- on *Ardisia* plants, (67) N.J. 561.
- on citrus, biology and control, (62) 647; (68) Calif. 498.
- on dried fruit, (61) 850.
- on small fruits, control, (66) Ill. 245; (68) N.Y.State 637.
- on snakes in the museum, (66) 849.
- orchard, control, (67) 283.
- Pacific coast, notes, (65) Calif. 753.
- redberry, on blackberry, (67) 425.
- spinning, new on raspberry in Michigan, (67) 443.
- two-spotted, on asparagus fern, (66) Fla. 254.

Mites—Continued.

woolly, on cotton, (62) 548.

Mitochondria, variations of resistance to osmotic action, (65) 119.

Mitogenetic rays (M-rays), experiments, (68) 30.

Mitosis—

and meiosis in diploid and triploid Asiatic cotton, (69) 638.

of plant cells, nucleolar behavior in, (68) 31.

Mohair—

fineness, relation to age of animal, Tex., (66) 61; (70) 220.

growth studies, (67) Tex. 723.

industry and Angora goats, (62) U.S. D.A. 460.

industry in South Africa, (69) 450.

industry in Texas, (67) Tex. 333.

production, disposition, and price, (63) U.S.D.A. 689.

Texas, grades and shrinkages, determination, Tex., (66) 61; (67) 723.

Mohave Desert region of California, (62) 474.

Moisture—

changes, effect on building materials, (62) 672.

determination by distillation with tetrachlorethane, (63) 204.

determination in substances high in fat, (61) 310.

determinations in subsoil, (66) Ky. 119.

determinations, systematic and random errors in, evaluation, (70) 580.

distribution in apple twigs, (61) Minn. 39.

in flour, estimating, (63) 111.

in materials, dielectric methods for measuring, (70) 260.

in plant tissue, (61) R.I. 615; (64) 21.

penetration in exterior walls, (67) 464.

permeability of paint films to, (70) 544.

studies of combined grains, (62) S.Dak. 779.

Moko disease in Trinidad, (61) 648.

Molasses—

and beet pulp v. corn silage for milk production, (64) Ohio 767.

as fertilizer, (69) 516.

as soil amendment, value, (68) 613.

baits for codling moth, (65) 853.

baits, types for olive fly, (68) 504.

beet pulp, dried, feeding value, (68) Utah 237.

blackstrap, effect on nutritional anemia, (66) Miss. 793.

blackstrap, feeding value, (67) La. 295.

blackstrap, for work mules, (68) 228, La. 234, Miss. 364; (69) 405.

butanol, acetone, and ethanol production from, (69) P.R. 771.

cane and beet, antianemic potency, (64) Ohio 163.

cane, for fattening cattle, (65) Minn. 365.

Molasses—Continued.

cane, for finishing calves, (61) Iowa 759.

cane, for poultry, (62) 551; (70) Hawaii 227.

cane, v. corn chops for milk production in Puerto Rico, (62) 165.

effect on production and reproduction of dairy cows, (69) Hawaii 698.

estimation in mixed feeds, Tex., (65) 615; (66) 207.

feeding value, (63) Colo. 557; (64) Ohio 368; (67) N.Mex. 298; (68) 228, Tenn. 229.

fermentation efficiency of yeasts exposed to ultra-violet light, (70) 156.

final, experiments with, (62) 808.

for chicks, (69) Hawaii 698.

for fattening lambs, (67) Ohio 58.

for fattening steer calves, (66) Ohio 656.

for pigs, (69) Ohio 90.

for work mules, (63) La. 364.

mixed feeds for fattening geese, (70) 821.

nicotine soap sprays, insecticidal value, (65) 50.

role in cookie making, (63) 890.

sugar beet pulp, feeding value for pigs, (66) 459.

v. beet pulp for milk production, (69) P.R. 849.

v. ground shelled corn, feeding value, (70) Tenn. 219.

vitamin E in, (61) 597.

Mold—

and yeast counts in butter, relation to keeping quality, (62) 464.

blue, notes, (70) N.C. 791.

count in butter, effect of media, (70) 237.

cultures, enzyme yield, determination, (66) 805.

fungi, growth, inhibitory action of certain substances, (69) 373.

growth in soil, effect of vegetable material added, (61) 510.

media, standardization, (70) 671.

products, results of research, (69) Wis. 771.

red, nonsurvival at baking temperature, (70) 866.

Molds—

as causes of abortion in cattle, (64) 380.

classification, treatise, (69) 189.

effect on temperature of stored grain, (67) 662.

growth, effect of manganese, copper, and zinc, (66) Ky. 119.

in bottled beverages, heat destruction, (62) Calif. 787.

in bread, (69) Minn. 462.

in bread, male and female races, (64) 818.

in bread, mechanically sliced ultra-violet rays for prevention, (68) 275.

- Molds—Continued.
 in butter, churn as source, (67) 68.
 in butter, determination methods, (67) 162.
 in butter, factors affecting growth, (63) Minn. 670.
 in butter, unsalted, (64) 70.
 in grape juice plant, thermal death point, (70) 300.
 in respiratory tract of chickens, (67) 746.
 in soil, phosphorus assimilation by, (63) 216.
 on oranges, disinfection experiments, (70) 351.
 on rice seeds and seedlings, (67) 267.
 sterol production and antirachitic activity, (65) 398.
 yeasts, and Actinomycetes, treatise, (68) 742.
 yeasts, and bacteria in the home, (68) 275.
- Mole cricket—
 control, (62) P.R. 751.
 notes, (70) U.S.D.A. 499.
 poisoned potatoes as bait for, (66) W.Va. 554.
 results of control work, (68) 781.
- Mole draining, development and status, (63) 379.
- Moles—
 as predators of wireworms on chick beetles, (65) 551.
 control, (70) U.S.D.A. 647.
 control in Iowa, (67) Iowa 704.
 parasites of, key catalogue, (68) 350.
 trapping, (62) 151.
- Molluscum—
 contagiosum and fowl pox inclusion bodies, comparison, (65) 270.
 in hens, virulicidal serum against, (61) 677.
- Mollusks, chironomid parasite of, (69) 683.
- Mollusks, edible, of Manila, (69) 303.
- Molybdic acid—
 as precipitant for blood proteins, (61) 807.
 solution, method of making up, (61) 12.
- Monarthropalpus buxi, *see* Boxwood leaf miner.
- Monarthrum spp., notes, (63) 161.
- Monetary—
 conditions, relation to agricultural depression, (65) 78.
 inflation, (69) Iowa 603.
 reform, relation to farm relief, (69) Okla. 288.
- Moniezia benedeni, new host in Philippines, (66) 574.
- Moniezia expansa—
 eggs, studies, (69) 267.
 immunity, development in sheep, (66) 872.
 in cattle and goats, status, (69) P.R. 105.
 in cattle, intermediate host, (66) P.R. 571.
- Moniezia expansa—Continued.
 in sheep and goats, control, (67) 602.
 life history, (63) 171; (65) 752; (68) 779.
 life within the sheep, (66) 872.
 manner of transmission, (66) 872.
- Monilia—
 and Sclerotinia species, taxonomic position, (61) 845.
 cinerea, biologic forms, (63) 451.
 cinerea, notes, (61) 348.
 fmicola, notes, (70) 55.
 nigra, notes, (61) 250.
 sitophila group non-survival at baking temperature, (70) 866.
 sitophila, notes, (70) 55.
 spp. from gallinaceous birds, (70) Conn. Storrs, (70) 536.
- Moniliasis, proposed term, (70) Conn. Storrs 537.
- Moniliformis moniliformis in wild rat, intermediate host, (63) 573.

 in Delaware, (69) Del. 81.
 in rural Singapore, (63) 153.
 in Uganda, (69) 549.
 Institute, British, report, (65) 361.
 papers on, (64) 159, 160.
 with mosquito traps in New Jersey, (70) N.J. 509.
 culicine—
 relative toxicity of larvicides, (69) 242.
 susceptibility to bird malaria, (69) 243.
 winter breeding and activity at New Orleans, (67) 55.
 effect of color, (62) 648.
 effect of pH on toxicity of larvicides, (64) 56.
 effect of poisons on, (67) 55.
 engorging culicine, effect of light, (69) 243.
 eradication, Connecticut laws concerning, (66) Conn.State 496.
 eradication from coastal marshes, (61) N.H. 153.
 fatal to livestock, (69) 82.
 feeding blood meals to, (66) 351.
 feeding tests with leguminous plants, (66) 652.
 fowl pox virus in, (66) 178.
 grasserie in, (63) 356.
 house, biological races, (65) 250.
 in Adirondacks, (67) 716.
 in Canada during 1931, (69) 547.
 in Canadian prairies, biology, (62) 856.
 in China and human disease, (62) 647.
 in New Hampshire, life history and control, (61) N.H. 854.
 in Philippines, daytime resting places, (67) 291.
 in St. Croix, survey, (63) 553.
 in the Americas, (61) 55.
 larvicidal effects of arsenicals, (68) 644.

Mosquitoes—Continued.

- larvicide for, (70) N.J. 509.
 larvicides, charcoal as diluent for dust sprays, (67) 715.
 maintaining cultures through the winter, (66) N.H. 251.
 malarial, egg-laying capacities, (62) 249.
 malarial, geographical distribution, (62) 545.
Mansonia, locating larvae, (66) 557.
 mountain, control, (61) Calif. 352.
 natural enemies in Colorado, (65) 656.
 oviposition, effect of heat, (68) 780.
 papers on, (62) 649, 650; (70) 213.
 Paris green on charcoal as larvicide, (68) 644.
 relation to human welfare, (69) 243.
 species in Montana, (64) Mont. 241.
 species in Montana, correction. (64) Mont. 853.
 studies, (61) Mont. 153; (62) Mo. 54; (63) Conn.State 651; (67) N.J. 560; (68) Mont. 780; (70) U.S.D.A. 499.
 survey, (69) Del. 71.
 survey in South Africa, (62) 57.
 thermotopism in oviposition, (65) 656.
 transmission of dengue by, (64) 753.
 transmission of epithelioma contagiosa by, (65) 250.
 transmission of fowl pox by, (61) 274; (62) 774; (63) 775; (64) 383; (65) 876; (68) 645; (70) N.Y.Cornell 803.
 transmission of surra by, (62) 454.
 transmission of tularemia by, (68) 645.
 transported by airplanes, staining method of determining, (67) 436.
 yellow fever, *see* Yellow fever.

Moth—

- borer control in British Guiana, (62) 647.
 borer, giant, of sugarcane, (62) 854.
 borers, characteristics and distribution, (65) 246.
 borers, parasitic control, (63) 552.
 eggs, method of obtaining, (62) 241.
 oecophorid, attacking book bindings, (67) 289.
 pest of wheat and oats, (67) 714.
 pitch-ball making, of jack pine, notes, (61) Mich. 450.
 preparations, tests, (70) U.S.D.A. 503.

Mothproofing materials—

- patented, index, (65) U.S.D.A. 359.
 tests, (61) 853.

Moths—*see also* Clothes moth.

- and butterflies, carnivorous, (68) 497.
 cochlidionid, in Japan, (66) 556.
 fruit-piercing, (61) 550.
 house, studies, (67) 573; (69) 391.
 in upholstered furniture, control, (64) U.S.D.A. 752.
 of New Zealand, (61) 755.
 of Puerto Rico, (67) 573.
 of South Africa, (69) 557.
 of three families, life histories. (69) 392.

Moths—Continued.

owlet, on blueberries, (65) Me. 757.
zoophilous, in Argentina, (61) 55.

Motion pictures—

of plant movements and development,
(69) 188.
of seeding action in seed drill, (62) 673.
of U. S. Department of Agriculture,
U.S.D.A., (65) 688; (68) 697.

Motor—

and aviation fuels, volatility, (67) 465.
bus, impact reactions, (65) U.S.D.A.
478.
fuel, alcohol and gasoline mixtures for,
(69) Idaho 871; (70) 254, 400, 401,
545, U.S.D.A. 538.
fuel, alcohol for, (70) 253, 690.
fuel from palm oil, (68) 681.
fuel performance, effect of increasing
octane number, (70) 400.
fuels, antiknock rating, effect of engine
conditions, (66) 183.
fuels, knock rating, (65) 675.
fuels, knock ratings, effect of jacket and
valve temperatures, (68) 831.
fuels, technical aspects, (69) 876.
oils, examination, (69) Me. 437.
oils, properties, effect of use, (66) 780.
oils, worn-out, use for San Jose scale
control, (69) 232.
quarter horsepower portable, on the
farm, (65) 675.
tourist traffic in Michigan, (68) U.S.D.A.
831.
truck—
 impact, factors affecting, (63)
 U.S.D.A. 879.
 impact tests, calibrations of accel-
 erometers, (63) U.S.D.A. 677.
 legislation, (68) 849.
 marketing of fruits and vegetables,
 (66) U.S.D.A. 479.
 marketing of fruits and vegetables
 to greater New York, (64) N.J.
 88.
 marketing of Michigan fruits and
 vegetables, (68) Mich. 845.
 marketing of Michigan livestock,
 (69) Mich. 741.
 transportation, (70) S.Dak. 553.
trucks—
 effect on marketing of agricultural
 products, (65) 883.
 factor in farm freighting, (67)
 U.S.D.A. 77.
 on Louisiana rice farms, (64) La.
 688.
 on New York farms, N.Y.Cornell,
 (62) 781; (64) 187.
 operation and production in con-
 crete paving, (65) 74.
 reporting shipments by, (68) 850.
 role in livestock marketing, (62)
 Ohio 183.
 transportation of livestock by, (68)
 Ky. 393.

Motor—Continued.

vehicle—

accidents in California, (65)
U.S.D.A. 478.
regulation, problems, (68) U.S.D.A.
680.
taxes, basis for apportioning, (63)
U.S.D.A. 482.
vehicles—
 air cleaners for, (64) Calif. 685.
 and tractors, treatise, (62) 673.
 registrations and receipts, U.S.D.A.,
 (63) 279; (65) 478.
 stopping, new regulations regard-
 ing, (65) Conn.State 451.
 windlasses, description, (63) 380.

Motors—

current consumption of, (61) 478.
electric, adaptation to farm operations,
(66) 675.
farm, V-belt drives for, (69) Idaho 285.
high speed, compression, combustion,
and expansion in, diagram represent-
ing, (70) 544.
power, wood gas or fuel for, (68) 833.
Mountain lions, trapping, (69) U.S.D.A. 381.
Mouse—
 color mosaic in, (68) 605.
 waltzing, case of superfetation in, (69)
 641.
Mouth diseases in small animals, (70) 241.
Mower—
 new type, tests, (65) 577.
 power requirements, effect on different
 speeds, (61) 682.
Mowers, adjustment and repair, (70) 844.
Mowing machines—
 built in auxiliary motors in, (70) 548.
 draft tests, (67) 327.
 value of oil bath construction, (67)
 176.
Muck—
 and sand fill, stabilization by drainage,
 (67) U.S.D.A. 608.
 crops, frost injury to, prevention, (70)
 Mich. 775.
 crops, irrigation, (69) Ohio 49.
 grades for soil improvement, (70)
 U.S.D.A. 164.
 soil, effect on potatoes, (64) 629.
 soil problems, (61) N.C. 713.
soils—
 celery growing on, (65) N.Y.
 Cornell 137.
 chemical and botanical studies,
 (66) N.Y.Cornell 613.
 chemical composition, (67) N.Y.Cor-
 nell 214.
 correcting unproductiveness for
 vegetables, (70) N.Y.Cornell 24.
 effect of organic residues in, (66)
 N.Y.Cornell 613.
 experiment, (65) Ind. 112.
 fertilizer requirements, N.C., (63)
 614, 615.
 growing vegetables on, (68) 617.

Muck—Continued.

soils—continued.

- lettuce culture on, (70) N.Y. Cornell 45.
- management, (68) Mich. 734.
- nitrogen relations, (66) N.Y.Cornell 210.
- of Everglades, plant development in, role of copper, (65) Fla. 417.
- of New York, (68) 617.
- of Sanpete Co., (65) Utah 117.
- pasture studies on, (69) Fla. 199.
- physicochemical studies, (70) N.Y.Cornell 746.
- productivity, (65) N.C. 114.
- studies, (65) Mich. 719; (69) N.Y.Cornell 16.

Mucor—

- botryoides, notes, (69) U.S.D.A. 692.
- in Egypt, (70) 650.
- in soil flora, (65) 320.
- racemosus, notes, (64) 848.
- syllvaticus in butter, (63) Minn. 670.

Mucoraceae, parasitic member, (63) 449.

Mucors—

- in bread, male and female races, (64) 818.
- on sugar beets, (66) 342.

Mucosa of genital tract of cows, cyclic changes, (65) 525.

Mucuna pruriens sclerotial disease, (68) 344.

Mud jack operations, selection of materials suitable for, (70) U.S.D.A. 689

Muellerius capillaris, notes, (64) 243.

Muffin batters, carbon dioxide evolved in measurement, (66) 191.

Muffins without wheat, (69) 892.

Muffle furnace operation, economical, (70) 582.

Mulberries, varieties and pests, (63) 846.

Mulberry—

- blight, Diaporthe associated with, (68) 632.
- disease, cause, (63) 248.
- leaf, variations of chlorophyll in, (67) 661.
- notes, (66) P.R. 228.
- rust in Japan, (68) 775.
- tree, new beetles affecting, (64) 249.
- trees, cold resistance, (68) 337.
- trees in nursery, effect of defoliation and pinching back, (67) 531.

Mule, fertile mare, account, (62) 29.

Mules—

- brain disease, Calif., (66) 76; (69) 104.
- feeding and nutrition studies, (67) La. 294.
- feeding experiments, (62) Miss. 66, Miss. 163, Miss. 550; (64) S.C. 665; (66) Miss. 766; (68) Miss. 364.
- fertile, early instances, (66) 728.
- immunization with formalized horse sickness virus, (69) 420; (70) 382.
- internal pests, (68) Ill. 666.
- intestinal parasites in, (67) 169.
- outlook for 1930, (62) Okla. 784.

Mules—Continued.

- parasites affecting, (69) V.I. 585.
- production, disposition, and price, (63) U.S.D.A. 689.
- pulling power, (64) Ill. 884.
- statistics, (65) U.S.D.A. 486.

Mull and duff as biotic equilibria, (68) 299.

Multiceps gaigeri in goats, generalized infection, (63) 170.

Multiple partition coefficient, theory of penetration, (69) 187.

Mundulea suberosa, insecticidal properties, (68) 67.

Mung bean hay, feeding value, Okla., (64) 768; (68) 662.

Mung beans—

- in China, proteins in, biological value, (64) 583.
- phosphorus in, variation, (64) 410.
- tests, (68) Ark. 608.
- types in India, (69) 795.
- varieties, (63) Okla.Panhandle 437.
- variety tests, (68) Okla. 609.

Munzar, Joseph, Fund, notes, (65) 600.

Murgantia histrionica, see Harlequin bug.

Murrina of equines, transmission experiments with bats, (69) 592, 712.

Musca—

- domestica, see House flies.
- inferior, transmission of buffalo disease by, (63) 847.
- ventrosa, notes, (68) 647.

Muscidae—

- of New Zealand, biology and economic status, (69) 244.
- studies, (61) 55.

Muscina spp., notes, (62) 856.

Muscle—

- extractives, nitrogenous, (67) 769.
- hemoglobin concentration during growth, effect of diet, (61) 392.
- hexosemonophosphoric acid, sugar residue in, (64) 710.
- tissue, color in, factors affecting (63) Mo. 761.
- vitamin G in, (70) 424.

Muscles—

- dystrophy in guinea pigs and rabbits, cause, (66) 796.
- dystrophy in guinea pigs, nerve endings in, (66) 797.
- skeletal, pathological changes in, (63) 291.
- voluntary, dystrophy of, (63) 291.

Muscid flies, new North American species, (65) Tex. 899.

Muscovite in soil, alteration, (62) U.S.D.A. 120.

Muscular—

- activity of man, source of energy for, (66) 597.
- dystrophy, creatine of muscle in, (68) 564.
- efficiency on high carbohydrate and high fat diets, (61) 693.
- exercise, long-continued, effect on cattle tissues, (69) 700.

- Muscular**—Continued.
 exercise, nature of foods as source of energy in, (69) 464.
 work, effect on protein metabolism, (68) 563.
- Museum**, regional, problems, (62) 650.
- Museums and expert specialists**, mutual relations, (62) 647.
- Mushroom**—
 beds, nematode as disease agent, (69) 375.
 collembola, (64) 544.
 disease, cause, (70) 490.
 insects and mites, rearing, (62) 154.
 insects, studies, Pa., (62) 354; (64) 155; (66) 246, 756.
 pest, new, notes, (61) 354.
 soils, spent, and composted manure, decomposition rate, (68) 597.
 spawn, new type, development, (70) Pa. 332.
- Mushrooms**—
 control of mites on, (70) Ill. 648.
 cultivated, plaster molds in beds, (70) 55.
 culture, (61) U.S.D.A. 140; (62) Pa. 338.
 description and key, (65) U.S.D.A. 138.
 edible and poisonous, of North Dakota, (70) N.Dak. 45.
 edible, in Japan, ergosterin in, (70) 571.
 edible, vitamins in, (67) 629.
 effect of excess carbon dioxide, (70) 476.
 from artificial manure, (62) 138.
 growing in United States, (68) U.S. D.A. 761.
 important enemies of, (70) 61.
 insects affecting, (67) 565; (70) Pa. 356, U.S.D.A. 499.
 maggots affecting, (68) Mich. 504.
 mites affecting, (63) 549; (64) 60.
 new truffle in beds of, (67) 695.
 nutrients for, (70) N.J. 476.
 nutrition, (67) N.J. 505.
 sterol production and antirachitic activity, (65) 398.
 vitamin C in, (68) 862.
- Musk oxen in Canada**, conservation, (64) 746.
- Muskmelon**—
 bacterial wilt, notes, (66) 147.
 diseases, (69) Del. 60.
 downy mildew, notes, (63) Ga. 143; (66) Ga. 745; (67) Tex. 690; (69) Ga.Coastal Plain 60, Ga. 221, Ga. 668.
 downy mildew or leaf blight, infection experiments, (62) Del. 746.
 downy mildew, spraying for, (70) Ga. Coastal Plain 791.
 Fusarium wilt in Minnesota, (69) U.S. D.A. 669.
 gray rot and charcoal rot, (70) Tex. 192.
- Muskmelon**—Continued.
 leaf blight, notes, (63) 44; (64) Ark. 446.
 mildew, studies, (61) Calif. 341; (63) Guam 143; (65) Calif. 744.
 mosaic, notes, (66) 147.
 powdery mildew—
 control, (62) 145, Calif. 744; (65) Calif. 148.
 immune varieties, (62) Calif. 735.
 nature, (65) Calif. 148.
 notes, (69) Calif. 60.
 seedlings, available food, relative growth, and duration of life, (70) 595.
 seedlings, effect of treating seeds with ethyl alcohol, (61) 514.
 seedlings, growth in absence of exogenous food and light, (63) 19.
- Muskmelons**—
 breeding, (66) Tex. 34; (67) N.H. 524, Calif. 525, Tex. 673; (70) Tex. 182.
 correlation studies, (67) 247.
 culture, (62) Can. 638; (63) U.S.D.A. 535; (67) U.S.D.A. 35.
 culture and marketing, (69) Ill. 51.
 disease-resistant, breeding, (70) U.S. D.A. 474.
 effect of freezing, (66) Ga. 740.
 effect of paper mulch, (66) Can. 828, N.Y.Cornell 634.
 effect of phosphorus, (64) Ark. 438.
 effect of sulfur, Tex., (66) 44; (70) 192.
 fertilizer experiments, (61) Ill. 37; (62) Mo. 39, Ark. 835; (63) Mo. 735; (64) Ill. 739; (66) Ark. 532.
 growing and marketing, (63) Mich. 534.
 growth curve under field conditions, (63) 20.
 inbreeding studies, (70) 619.
 marketing, (63) Del. 685.
 marketing, consumer demand, (65) Del. 783.
 paper mulch experiments, (64) Ky. 138, N.Y.Cornell 633; (68) 43.
 source-of-seed tests, (66) Mo. 331.
 spraying experiments, (66) Ga.Coastal Plain 639.
 storage tests, (70) Ariz. 773.
 strain tests, (62) Mo. 39.
 summary, (62) 138.
 value of cover crops for, (69) Calif. 37.
 varieties, (66) Tex. 35.
 variety tests, (63) R.I. 638, Mo. 735; (65) Ala. 434; (66) S.C. 634; (68) S.C. 760; (70) Ariz. 773.
 vitamin A in, Ga., (61) 193; (63) 192.
 vitamins in, (66) Ga. 196.
 yields and costs, (63) Colo. 529.
- Muskrat diseases**, (64) 179.
- Muskrat industry of Maryland**, (62) 462.
- Musk rats**—
 destruction by *Bacillus typhi murium*, (70) 647.
 food in summer, (67) 420.

Muskrats—Continued.

- habits, (69) Md. 681.
- history, biology, and control, (70) 647.
- in Germany, (69) 70.
- in natural habitat, notes, (70) U.S.D.A. 498.
- new host for *Paragonimus*, (67) 585.
- summary, (62) 462; (65) 242.

Mussel poisoning, outbreak in San Francisco, (66) 598.

Mustard—

- acid-sensitive, studies, (61) 719.
- black, soluble ferments in, (63) 517.
- control, N.H., (61) 127; (63) 529.
- culture experiments, (62) P.R. 737.
- fertilizer experiments, (63) 720.
- greens, California, composition and time for cooking, (67) 770.
- greens, effect on nutritional anemia, (64) Miss. 695.
- greens, iron in, (67) U.S.D.A. 85.
- greens, oxalic acid in, (64) 580.
- greens, pellagra-preventive value, (70) 282.
- greens, vitamin B in, (64) Ky. 195.
- greens, vitamins in, (62) Ky. 293.
- in oats, control, (63) N.H. 233.
- plants, composition, (66) 122.
- plants, water balance at different stages, (66) 621.
- use against sheep parasites, (61) 675.
- varieties newly recorded in Canada (70) 43.
- variety tests, (67) Tex. 673.

Mutation—

- and evolution, nature of genes in relation to, (68) 746.
- blue, in rats, (62) 822.
- called "waved" in hair of young mice, (69) 510.
- color, in mice, (65) 425; (68) 747.
- flexed tail, in house mouse, (62) 215.
- hairless, in rats, (69) 194.
- in dwarf banana, (69) 29.
- in mice, (62) 822.
- in sorghum, (69) 28.
- in tomato, (62) 724.
- in *Ustilago zeae*, (63) Minn. 625.
- origin of dominance in response to, (62) 512.
- rate induced by irradiation, (63) Mo. 728.
- rate of corn and barley, effect of aging and heat, (70) 169.
- rate of *Drosophila*, variability, (61) 218.
- recessive, in rabbit, (62) 28.
- recurrent, role in evolution, (69) 190.
- short-tailed, in mice, lethal action in, (69) 348.
- spontaneous, in mice, (62) 512.
- theory and systematic biology, (62) 821.
- thread-leaved, in tomato, genetics, (69) 29.

Mutation—Continued.

- yellow leafed bud, of Johnson peach, (68) 750.

Mutations—

- effect of varying duration of X-ray treatment, (63) 24.
- effects of aging of X-rayed males, (62) 214.
- from variegation to self color in corn, (61) 722.
- fruit, in horticultural plants, (69) 28.
- heat-induced chlorophyll in corn, (67) 226.
- in deciduous fruits, (69) 799.
- in *Drosophila*, (62) Calif. 723.
- in fungi, (63) 124.
- in gray Norway rats, (68) 747.
- in oats and wheat, effect of X-rays, (62) 510.
- limit of radiation frequency effective in, (62) 512.
- new, in fowls, (68) 746.
- produced by electromagnetic induction, (69) 28.
- production by high temperature, (68) 748.
- production by X-rays, (61) 820; (62) 214, 322, 725; (69) 28.
- progressive, produced by X-rays, (64) 531.
- rate, breeding methods for determining, (69) 640.
- studies, (62) 28.
- tail, in mice, preliminary symbols, (69) 510.
- visible, following radium irradiation, (62) 214.

Mutisicæ, corollas of, (66) N.Y.Cornell 619.

Mutton—

- cost of production, (66) Ohio 782.
- demand for, effect of business depression, (68) 690.
- foreign trade in, (63) U.S.D.A. 589.
- frozen, transportation from New Zealand, (66) 457.

- marketing in England and Wales, (68) 116.
- qualities in sheep, (67) 298.
- roast, shrinkage and cooking time, (70) U.S.D.A. 557.

Mycetophilid larvae, outbreak in commercial greenhouse, (64) 358.

Mycobacterium—

- paratuberculosis, isolation and cultivation, (66) 772.
- tuberculosis—
 - germicidal efficiency of ortho-phenylphenol, (65) 671.
 - in colostrum and milk, thermal death point, (62) Mo. 72.
 - notes, (67) 316.
 - of bovines, longevity, (68) 248.
 - studies, (64) 771.

- Mycobacterium*—Continued.
 tuberculosis—continued.
 susceptibility of gophers to, (65) 570.
 use of Kendall's media in, (70) 389.
- Mycogone nigra* in alkaline soil, (65) 321.
- Mycological nomenclature*, (69) 372.
- Mycology*—
 applied in dairying, (70) 670.
 field, treatise, (65) 746.
 Portuguese glossary, (68) 487.
- Mycorrhiza*—
 formation, (67) 512; (68) 623.
 in cranberry cultures, effect, (67) 40.
 in vicinity of La Fayette, Indiana, (66) 124.
 of fruit trees around Ann Arbor, Michigan, (68) 460.
 of Mont Alto nursery stock, (68) 460.
 of southern pines, (61) 819.
 of sugarcane, relation to root disease, (62) 645.
 of trees and shrubs, (66) 520; (69) 637.
 of *Vaccinium*, (65) 520.
 relation to conifer seedlings, (67) 373.
 role in plant growth, (61) 514; (69) 343.
- Mycosis*—
 in chicks, severe outbreak, (69) 113.
 of fowls, (68) Ariz. 811.
 of turkeys, (67) 749.
- Mycosphaerella*—
 caryigena n.comb., notes, (67) 147.
 dendroides n.comb., notes, (63) 451.
 dendroides, notes, (65) Fla. 440.
 disease, host range, (65) Ala. 438.
 fragariae, notes, (62) Fla. 345; (66) La. 48; (68) 632.
 gossypina, notes, (65) 646.
 lethalis, notes, Ky., (70) 192, 194.
 personata n.sp., description, (63) 145.

- Mynah birds as potential pests in California, (64) 746.
- Myosalvarsan* in horse and rabbit, elimination and decomposition, (69) 710.
- Myosis*, physostigmine and philocarpine, in equine and bovine, comparison, (65) 870.
- Myriococcus praecox*, notes, (70) 55.
- Myrmecophila oregonensis*, notes, (63) 354.
- Mystrosporium* sp., notes, (64) 230; (68) 769.
- Myxobacteriaceae*, morphology and cytology, (69) 372.
- Myxomatosis* of rabbits, pathological changes induced by virus, (63) 877.
- Myzocallis*—
 discolor coloradensis n.v., description, (67) 53.
 fumipennellus, see Pecan aphid, black.
- Myzus*—
 cerasi, see Cherry aphid, black.
 circumflexus—
 as transmitter of potato leaf roll, (64) 244, 245.
 notes, (62) 854; (65) 248; (70) 196.
 on *gladiolus* corms, (68) Conn.State 65.
 role in transmission of potato leaf roll, (66) 350.
 persicae, see Peach aphid, green.
 persicae-niger, see Peach aphid, black.
 pseudosolani—
 notes, (63) Wis. 45; (65) 248; (69) 239.
 role in leaf roll infection, (68) 345.
 transmission of plant viruses by, (65) 853.
 transmission of tobacco mosaic by, (62) 854.
 spp., role in transmission of potato leaf roll, (66) 350.
 spp., transmission experiments with virus diseases, (61) 651; (67) Oreg. 696.
- Nabis ferus*, predator of beet leafhopper, (67) 569.
- Naganol*—
 and Germanin, comparison, for trypanosomal and spirochetal infection, (61) 569.
 and Höchst 4002, treatment for surra, (66) 469.
 specific in treatment of surra, (66) 373.
- Nails, roofing, development and use, (69) 287.
- Nairobi quarantine disease, (64) 677.
- Nairobi sheep disease and abscesses in brain, (64) 677.
- Nandina domestica*, anthracnose of, (70) Tex. 192.
- Nanophyetus salmincola*—
 anatomy and systematic position, (68) 528.
 notes, (61) Oreg. 69; (65) 72; (66) 776.

- Nanophyetus salmincola*—Continued.
 pathogenicity of metacercariae for fish hosts, (69) 267.
 role in salmon poisoning, (68) 91.
- Naphthalene—
 and paradichlorobenzene, comparison of toxicity to confused flour beetle, (64) 549.
 as fumigant for clothes moths, (62) 156; (69) 237.
 as fumigant for greenhouse pests, (67) Mass. 424; (69) Mass. 686; (70) 650.
 as fumigant for peach borer and sod insects, (69) 830.
 as insecticide, (68) N.Y.State 637.
 dust for control of apple sawfly, (69) 561.
 for carrot rust fly, tests, (69) N.Y.Cornell 72.
 for garden pests, (62) 448; (63) 653.
 for midge larvae in tobacco seed beds, (69) 232.
 for onion thrips, control, (69) 76.
 for red spider control, (61) Mass. 849.
 fumigation at controlled concentrations, (63) 847.
 maximum weights in inclosed space, (61) 545.
 tolerance of plants to, (61) 545.
 2-sulfonic chloride and thiol compounds, reaction, (70) 440.
- Naphthoresorcinol, reaction with alduronic acids, (67) 104.
- Napier grass—
 controlled grazing, (68) S.C. 754.
 effect of irrigation with sewage effluent, Fla., (63) 632, 633.
 irrigation experiments, (62) Fla. 325.
- Narcissi, variety tests, (65) N.C. 136.
- Narcissus—
 basal rot, control, (67) Miss. 147.
 basal rot due to *Fusarium* sp., (67) 556.
 basal rot, relation to hot-water treatment, (67) 556.
 bulb diseases, control, (69) Fla. 221.
 bulb fly, biology and control, (69) 243.
 bulb fly, control, (64) Oreg. 356.
 bulb fly, notes, (70) U.S.D.A. 499.
 bulb pests, control in California, (61) 248.
 bulbs and flowers, production, (64) U.S. D.A. 142.
 bulbs, disinfectant for, (64) Miss. 447.
 bulbs, fungi affecting, (68) 495.
 bulbs, hot-water treatment, (62) West. Wash. 59, 145; (63) U.S.D.A. 641.
 bulbs, sterilization, (69) 823.
 bulbs, treatment, vapor-heat method, (68) 353; (69) 687.
 culture, monograph, (61) 529.
 culture, treatise, (67) 261.
 culture under different nitrogen treatments, (63) N.J. 339.
 diseases, notes, (65) 542; (68) Oreg. 213.
 dwarfing and malformation, (69) 69.
- Narcissus—Continued.
 flower development during summer storage, (70) 631.
 forcing with artificial light, effect, (68) 192.
 leaf blight, notes, (62) Mo. 46.
 leaf scorch, (70) 497.
 leaf yellow blotch disease, (65) 542.
 mite, notes, (61) 547.
 mosaic and fire, N.Y.Cornell, (69) 61; (70) 791.
 mosaic, notes, (61) Oreg. 44.
 mosaic, transmission, (64) Oreg. 345.
 nematodes affecting, (70) U.S.D.A. 501.
 paper white, biochemical studies, (61) N.J. 734.
 paper white, date of flowering, effect of storage temperature, (68) 623.
 paper white, under different planes of nitrogen nutrition, (65) N.J. 836.
 pests, summary, (68) 499.
 root rot, control, Miss., (61) 446; (62) 145; (64) 641; (66) 745.
- Narcosis—
 chloral hydrate, of horses, (65) 567.
 of dogs, (70) 827.
 possibility of interrupting and shortening, (70) 827.
- Narcotine—
 and derivatives as antiscorbutics, (67) 648.
 and vitamin C, relation, (69) 9, 10, 772.
 as precursor of vitamin C, (67) 648.
 isolation from vegetables, (67) 649.
- Naringin in marmalade from South African grapefruit, (66) 791.
- Narra, culture experiments, (64) Guam 836.
- Nasal—
 catheter for removal of bronchial mucus, (65) 870.
 granuloma, bovine, (67) 451.
 granuloma of cattle in India, (61) 472; (64) 176.
 granuloma or schistosomiasis in cattle, (69) 715, 858.
- Nasturtium mosaic, notes, (65) 345.
- Natada spp., on tea, (68) 499.
- National—
 agricultural policy, basis for, (61) 285.
 Association of Marketing Officials, proceedings, (61) 688; (65) 585.
 Association of Young Farmers' Clubs, report, (63) 590.

 forests, *see* Forests, national.
 fruit and vegetable programs, (65) 585.
 Grange, attitude toward tariff, (61) 285.
 Institute for Research in Dairying, report, (61) 561.
 Institute of Agricultural Botany, variety trials, methods, (67) 31.

National—Continued.

Livestock and Meat Board, report, (61) 664.

Livestock Marketing Association, program, (65) 585.

mark, paper on, (64) 274.

parks of United States, fauna, (69) 681.

Research Laboratory of Canada, notes, (63) 99.

Natural—

history notes on Dunedin, Florida, (68) 63.

resources, conservation, treatise, (63) 384.

selection, genetical theories, comparison, (64) 330; (66) 521.

Nature—

in farming, treatise, (61) 489.

upsetting balance, in Kansas and Great Plains, (68) 352.

Naval stores—

industry, practices and methods, (65) U.S.D.A. 233.

practices, experiments in, (67) U.S.D.A. 535.

tapping pine trees for, principles and practice, (61) U.S.D.A. 443.

Navel-ill, *see* Joint-ill.

Neanura muscorum, notes, (63) 253.

Nebraska—

Station, notes, (62) 300; (65) 498, 699; (66) 396; (67) 495, 783; (68) 284; (70) 432.

Station, report, (61) 898; (63) 698; (65) 899; (67) 638; (69) 621.

University, notes, (62) 100, 300; (64) 798; (65) 498, 699; (66) 799; (68) 284.

Necator americanus, third-stage larvae, anatomy, (68) 812.

Necator suillus, studies, (62) P.R. 772.

Necrobacillosis—

in a horse, (69) 434.

of calves, summary, (66) Wyo. 273.

of liver in a steer, (70) 387.

susceptibility of anemic pigs to, (61) Ind. 370.

Necrobia rufipes, *see* Ham beetle, red-legged.

Necrology, notes, (61) 399; (63) 800; (64) 500; (65) 800; (66) 699, 799; (67) 351; (69) 768.

Nectar—

and pollen plants of California, (66) Calif. 353.

floral, variation in concentration, (63) 757.

sugar concentration in, effect of humidity, (62) 160.

sugar content, (64) Iowa 851.

Nectarines—

breeding, (62) N.Y.State 431; (66) 326.

carotenoid content, relation to light, (67) 245.

new variety, (62) N.Y.State 431.

of Japan, (61) 230.

pollination studies, (62) N.Y.State 739.

studies, (67) Calif. 526.

Nectarines—Continued.

varieties and species, classification, (69) N.J. 368.

Nectria—

canker, infection, (67) 43.

canker of basswood and apple, (70) N.Y.Cornell 791.

cinnabarina, notes, (68) 62.

cinnabarina on apricot, notes, (66) 147.

coccinea and beech scale, (69) 232.

fungus disease on beech following scale insect, (70) 362.

galligena, notes, (66) 840.

sp., notes, (63) 150; (68) 769.

spp., oxidases in, (67) 49.

Negro—

children, weight, height, and age, relations, (62) 792.

church in rural Virginia, (64) Va. 91.

organizations and leadership in rural Virginia, (70) Va. 122.

Negroes—

agricultural education among, status, (67) U.S.D.A. 336.

migration from middle Georgia counties, (65) 390.

social and economic conditions, (64) 576.

Neleucania albilinea, *see* Army worm, wheat head.

Nematode—*see also* Root knot nematode.

as carrier of disease in mushroom beds, (69) 375.

attack, resistance to, (68) 63.

disease of potato, (64) 149; (66) 643.

disease of sweetpotatoes, (61) N.C. 447; (68) Miss. 340.

disease of wheat and rye, (62) U.S.D.A. 349.

eggs and larvae, development in cattle dung, (67) 70.

infestations, effect on metabolism of host, (70) 826.

new parasitic, of Formosan duck, (66) 70.

new parasitic on *Aptinotrips rufus*, (68) 75.

ova in sheep dung, methods of counting, (63) 261.

parasite in eyes of dogs, (64) 562.

parasite, new, of ducks, description, (69) 437.

parasite of insects, cultivation, (66) 559.

parasites in foals, (64) Ky. 173.

parasites in mammals, (70) 60.

parasites in pigs in Bengal, (64) 561.

root knot of potatoes, (68) N.Y.State 626.

scab of potatoes, (67) 407.

Nematodes—

affecting cereals in South Australia, (68) 488.

affecting clover, (66) 149.

affecting cotton, (66) S.C. 641; (67) 406.

affecting mushrooms, (66) Pa. 756.

Nematodes—Continued.

- affecting narcissus, (68) 499; (69) 823; (70) U.S.D.A. 501.
 affecting peas, (69) Ariz. 65.
 affecting plants, (62) 355.
 affecting sugarcane, (63) 48; (70) 358.
 affecting watermelons, (69) Fla. 231.
 and cotton soreshin, (68) S.C. 772; (69) U.S.D.A. 670.
 and their larvae, studies, (62) 560; (63) 480.
 beet and oat, identity, (67) 694.
 beet, control, (61) 542.
 beet, notes, (63) 245.
 beet, stimulatory control, (68) 773.
 beet, stimulatory physiology, (67) 693.

 State Station, report, (62) 497; (64) 498; (66) 599; (68) 715; (70) 893.
 State Veterinary College, report, (62) 260.
 weevil, injury to apple trees, (65) Conn.State 451.

Newcastle disease—

- in England and avian pest in Philippines, (66) 576.
 of poultry, (61) 275; (68) 376; (69) 595.

Newlands Field Station, work, (62) U.S.D.A. 99.

Nezara viridula, *see* Stink bug, southern green.

Nicandra physalodes, utilization, (67) 384.

Nickel—

- added to iron, effect on blood regeneration, (61) 590.
 atmospheric corrosion, (67) 464.
 in food and biological material, bibliography, (69) 752.
 in plants, (64) 10.
 solubility in milk, (65) Wis. 469.
 sulfide, quantitative precipitation, (65) 615.

Nicoletia sp., notes, (66) P.R. 247.

Nicotiana—

- alata grandiflora*, somatic chromosomes and nondisjunction in, (67) 224.
 chromosomal aberrants and gene mutations in, (65) 121.
 chromosome number and morphology, (67) 224.
 chromosome unbalance and asynaptic condition in, (68) 746.
digluta synthetic species hybrids with parents *glutinosa* and *tabacum*, (67) 375.
 effects of X-rays and radium, (62) 215.
 haploid and diploid merogony, (67) 376.
 hybrid, fertile triple, studies, (65) 521.
 hybrid, heteroploid progeny, (67) 225.
 hybrid, partially fertile triple species, (68) 750.
 hybrids, embryo development in, (69) 345.
 hybrids, ontogeny, genetics, and cytology, (66) 25.
 hybrids, tumors and other malformations on, (68) 630.

Nicotiana—Continued.

- interspecific hybridization in, (67) 375, 376.
 male sterility in, (68) 745.
 monosomic derivatives in, (68) 745.
paniculata-rustica hybrid, (67) 376.
rustica, fertilizer experiments, (65) 632.
rustica, monosomics in, inheritance, (68) 749.
rustica, nicotine in and yield, factors affecting, (65) 632.
 seeds, germinating conditions, (62) 318.
 self-sterility allelomorphs, (61) 721.
 species, compatibility, (68) 749.
 spp. hybrids, pollen abortion in, (69) 30.
suaevolens, poisonous to sheep, (69) 580.
sylvestris-tomentosa-tabacum hybrid triangle, (67) 376.
tabacum—
 fertilizer experiments, (65) 632.
 haploids, diploidy and partial diploidy in root tips, (67) 224.
 inheritance in, (69) 191.
 photoperiods, significance, (62) 320.
 triploid in, behavior, (69) 639.
 X-rayed sex cells, variant plants produced from, (65) 625.
 triple hybrid cytogenetics, (68) 747.

Nicotine—

- action against *Aphis rumicis*, (66) 248.
 activators, tests, (64) 854.
 and oil combination, history of, (66) 449.
 and potassium oleate, insecticidal value, (65) 50.
 and rotenone, relative toxicity to *Aphis rumicis* and mosquito larvae, (65) 846.
 and Tuba comparison, (61) 549.
 bentonite as carrier, (61) 249.
 comparison with other insecticides, (64) 854.
 concentrations in tobacco, effect on fowls, (65) 382.
 concentrations in tobacco, effect on roundworms in chicks, (66) Pa. 274.
 content of tobacco, factors affecting, (66) Can. 135.
 dusts, use against vegetable insects, (61) 849.
 effect on growth and development of fowls, (64) Pa. 177.
 fixation, new development in, (69) 683.
 for control of avian coccidiosis, (67) Ohio 69.
 for roundworms of fowls, (70) Pa. 381.
 forms, for control of pineapple yellow spot, (68) 349.
 in metabolism of tobacco plant, (66) 19.
 in paint for woolly aphid, (64) 456.

Nicotine—Continued.

- in tobacco, factors affecting, (61) 333.
- insecticidal unit charge, increasing effectiveness, (62) 851.
- insecticide from, (69) Hawaii 683.
- insecticides, analyses, (65) 651.
- maximum weights in inclosed space, (61) 545.
- molasses soap sprays, insecticidal value, (65) 50.
- oil combination for codling moth control, (63) 459; (64) 748.
- penetrol as activator for, (63) 457.
- poisoning by absorption through skin, (69) 581.
- production for insecticides, role of beet leafhopper in, (61) 250.
- sprays on potatoes, effect, (63) 458.
- sprays, use against vegetable insects, (61) 849.
- spreaders and activators, increasing toxicity, (64) Ohio 650.
- substitutes for, heterocyclic bases, (64) 544.
- sulfate—
 - and barium fluosilicate, incompatibility, (67) 49, 558; (68) 636.
 - as vermifuge for poultry, (70) 391.
 - effect on cranberry fruit worm, (69) Mass. 687.
 - for poultry ectoparasites, (64) 858.
 - for roundworms, (61) Va. 768.
 - insecticidal value, (61) N.J. 750; (66) S.C. 654.
 - lime dusts, tests, (63) Fla. 651.
 - mineral oil activator for, (68) Conn.State 65.
 - poisoning of chicks by, (70) 240.
 - sprays v. pyrethrum sprays for bean jassid, (65) Fla. 451.
 - v. anabasine sulfate, toxicity for aphids and leafhoppers, (69) Conn.State 546.
- supplements for aphids, spray value, (70) N.Y.State 361.
- tannate—
 - and lead arsenate as codling moth poisons, (67) 713.
 - corrective and sticker for, (65) 847.
 - efficiency, (68) Wash.Col. 780.
 - for control of onion thrips, (69) N. Mex. 232.
 - for cranberry pests, (68) Wash.Col. 780.
 - sprays, injury to apples, (70) 501.
 - v. lead arsenate for codling moth control, (65) 55.
- toxicity against mosquito larvae, (69) 242.
- toxicity to mosquito larvae, effect of pH, (64) 56.
- toxicity to red spider, (67) 722.
- unit charge of nicotine, reducing, (63) 459.
- use against poultry parasites, (65) 675.
- volatility, (67) 100.

- Nicotine-soap preparations, deterioration, (61) 544.
- Nicotrol spray, insecticidal value, (66) S.C. 654.
- Niger seed, formation of oil in, (70) 314.
- Night blindness in United States and vitamin A deficiency, (70) 877.
- Nightshade—
 - mosaic tissue, intracellular bodies in, (61) 843.
 - poisonous to livestock, (65) Ind. 70.
- Nilaparvata oryzae, new parasite of, (67) 710.
- Ninhydrin test, interference of reducing sugars in, (68) 441.
- Niptus hololeucus, *see* Spider beetle, golden.
- Nitella—
 - accumulation of dye in sap, mechanism, (61) 513.
 - cell sap, accumulation of halogens in, (64) 22.
 - concentration effect in, (64) 327.
 - death wave in, (64) 123.
 - direct current resistance, (68) 600.
 - injury by sodium chlorate, (66) 520.
 - negative variations in, (68) 461.
 - phauloteles, effects on mosquito larvae, (62) 857.
 - protoplasm and cell sap, potentiometric determinations, (61) 120.
 - sap, penetration of dahlia into, (61) 120.
- Nitrate—
 - changes in fertile soil, (63) 215.
 - compounds, effect on crops, (66) N.J. 517.
 - nitrogen—
 - absorption by plants at different growth stages, (65) 322.
 - assimilation by plants, (70) 475.
 - concentrations, (61) R.I. 614.
 - in Alberta soil, seasonal fluctuations, (63) 811.
 - in fertilizer materials, determination, (68) 584.
 - in market garden soils, (65) 514.
 - in soil and other extracts, spot-plate test for, (64) 805.
 - income from rain water, (64) Okla.Panhandle 521.
 - of soil and vegetable crops, (65) R.I. 511.
 - of ammonia, *see* Ammonium nitrate.
 - of lime, *see* Calcium nitrate.
 - of potash, *see* Potassium nitrate.
 - of soda, *see* Sodium nitrate.
 - research award, notes, (66) 100.
- Nitrates—
 - accumulation—
 - and movement in soil, (67) Okla. 368.
 - effect on time of plowing for wheat, (61) Utah 28.
 - in soil, effect of alfalfa and sweet clover, (63) 419.
 - under various treatments, (67) 218.
 - unusual in 1931, (69) Ohio 17.
 - and vegetable crops, (69) R.I. 178.

Nitrates—Continued.

- assimilation by bacteria, (68) 450.
- assimilation in soils, Iowa, (65) 20; (69) 16.
- availability, relation to nitrifying capacity of soils, (70) 591.
- availability to tomatoes, effect of soil moisture, (70) 46.
- behavior in soil, relation to organic matter, (61) Colo. 115.
- detection, removal of bromide and iodide for, (68) 583.
- determination, (67) 362.
 - by electrolytic reduction, (67) 361.
 - elimination of corrections for nitrates, (68) 583.
 - in arable soil, (64) 507.
 - in green plant tissues, (61) N.J. 719.
- disappearance under timothy, (62) N.Y.Cornell 720.
- distribution, effect of plant growth, (66) 317.
- effect on growth and composition of tobacco leaves, (66) 123.
- effect on transpiration ratio in plants, (70) 312.
- excessive in soil, Colo., (63) 513; (70) 592.
- formation and removal from soil, (68) Okla.Panhandle 24.
- formation, comparative values of green manures, (64) Pa. 120.
- hydroxylamine as reduction product, (69) 165.
- in biologic fluids, determination, (63) 506.
- in plant as indexes of nitrogen needs, (62) 416.
- in plant solutions, (61) 13, R.I. 614; (65) R.I. 512.
- in plants, field tests, (67) 362.
- in rain water, (66) 312.
- in sap, effect of soil type and fertilizers, (61) Mich. 717.
- in sap of grain, effect of soil type and fertilizers, (63) 728.
- in soil—
 - as guide to nitrogen needs of vegetables, (62) 416; (64) Ohio 816.
 - containing decomposing cellulose, effect of temperature, (68) 736.
 - effect of crop residue decay, (69) 636.
 - effect of cultivation methods, (67) Ark. 368.
 - effect of green manure, (67) 17.
 - effect of mulch, (70) 16.
 - effects of carbon disulfide treatment, (61) 510.
 - factors affecting, (66) Ohio 415.
 - periodicity of, (63) 419.
 - studies, (64) Okla. 716; (67) Mass. 367; (68) Colo. 594; (69) Oreg. 354, Mass. 635.
 - with soluble organic matter, determination, (67) 204.

Nitrates—Continued.

- in South Australian soil, fluctuations, (64) 423.
- physiological reaction, (62) 119.
- production, effect of crude petroleum, (61) 317.
- production in soils, Mo., (62) 17; (63) 719.
- production in soils, effects of cultivation, (62) Ark. 814.
- reduction by Azotobacter, (70) 17.
- reduction by bacteria in semisolid media, (68) 436.
- reduction to nitrites by Salmonella spp., (63) 77.
- Nitric acid determination, (68) 438.
- Nitrification—
 - activity in fall and winter, (67) 658.
 - capacity, low, of soils, causes, (68) 737.
 - effect of Bacillus mycoides, (69) 779.
 - effect of calcium cyanamide, (68) 455.
 - effect of legume or nonlegume crops, (69) 502.
 - effect of sulfate and chloride of manganese, (61) 623.
 - in forest soils, (66) N.Y.Cornell 614.
 - in Iowa soils, (69) Iowa 16.
 - in Nebraska soils, Nebr., (61) 811; (63) 614; (65) 809.
 - in New England soils, (68) Conn.State 445.
 - in orchard soils, changes in, (61) Calif. 420.
 - in presence of cane trash, (66) P.R. 210.
 - in soil, effect of thallium sulfate, (70) 28.
 - in soil, microbiological aspects, (68) 455.
 - in soil, photochemical process, (70) 16.
 - in soils of India, effect of alkali salts, (67) 218.
 - in soils, problem, (65) 418.
 - of ammonium sulfate, (63) Tex. 417.
 - relation to changes in soil microflora, (68) 301.
 - studies, Tex., (62) 614; (70) 157.
 - studies, significance of pH in, (64) 208.
- Nitrifying bacteria, isolation and study, (61) Idaho 810.
- Nitrite-oxidizing organism—
 - isolation, (62) 417.
 - use of term, (61) Idaho 810.
- Nitrites—
 - determination in very dilute solutions, (66) 311.
 - effect on iodine-starch reaction, (65) 313.
 - hydroxylamine as reduction product, (69) 165.
 - in biologic fluids, determination, (63) 506.
 - in soils, (63) Tex. 620.
 - production by cowpea and soybean organisms, (64) 527.
 - production in soils, (65) Tex. 813.
 - reduction by bacteria in semisolid media, (68) 436.

Nitrogen—

absorption—

- and retention of guinea pigs, (61) 296.
- and utilization by rice, (68) Ark. 590.
- by plants from nitric acid and ammonia, relative rates, (61) N.J. 719.
- effect of vitamin A-deficient diet, (68) 864.
- from culture solutions, (69) 500, 501.
- rates by plants, (63) N.J. 323.
- accumulation and loss in cropped soils, (70) 160.
- accumulation in soil, effect of cropping system, (69) 499.
- amino and residual, in blood, determination method, (61) 503.
- ammonia, in plant extracts, determination, source of error in, (66) 805.
- ammoniacal, in fertilizers, determination without distillation, (69) 491.
- ammonium and nitrate, for cotton plants, comparison, (69) Ga. 199.
- and carbon in same sample, colorimetric determination, (70) 297.
- and potash, reciprocal effect, (68) 454.
- and water relations of crops in rotations, (64) N.Y.State 422.
- applications, physiology, (64) 328.
- assimilation by grasses and clovers, (69) Mass. 643.
- assimilation by pure cultures of anaerobic bacteria, (67) 118.
- assimilation by tobacco, (66) 226.
- atmospheric, utilization by germinating seeds, (70) 455, 456.
- autumnal migration in apple trees, (68) Mo. 46.
- availability in based and unbased ammonium sulfate and ammonium phosphate, (64) 323.
- availability in fertilizers, (63) Mass. 121; (65) N.J. 811; (67) N.J. 507.
- availability, studies, (61) N.J. 715.
- availability, vegetation pot experiment for study, (65) Mass. 22.
- balance in pigs fed cottonseed meal, (68) 228.
- balance in semiarid Kansas soils, (62) 813.
- balance of Kansas soils, effect of legumes, (64) Kans. 810.
- carriers, comparison, (70) Va. 764.
- carriers for turf grasses, comparison, (67) Ohio 29.
- carriers, spring top-dressing experiments with, (65) Ind. 124.
- changes in stored alcoholic extracts of plant tissues, (69) 492.
- changes produced by Azotobacter, (68) 166.
- combined, effect on growth and nitrogen fixation by Azotobacter, (65) 211.

Nitrogen—Continued.

- compounds, effect on nodule formation by clover, (70) 39.
- compounds, organic, of soil, nature, (68) 451, 452.
- concentration in peach twigs under sandhills conditions, (67) 529.
- conservation under semiarid conditions, (68) Okla.Panhandle 24.
- cycle in soil, (68) 163, 451.
- date and rate of top-dressing wheat with, (70) Ind. 304.
- deficiency, buckwheat as indicator crop, (65) R.I. 512.
- deficiency, effect on fruit trees, (64) 539.
- depletion in soils, (62) Mo. 16.
- determination—
 - in tissues, effect of trichloroacetic acid, (67) 205.
 - iodometric and manometric, (67) 104.
 - micro-Dumas method, (68) 438.
 - micro-Kjeldahl method, (66) 504.
 - use of selenium oxychloride in, (67) 203.
- digestible, partition in growing dairy cattle, (70) Mo. 71.
- distribution in apple twigs, (61) Minn. 39, Mo. 40.
- distribution in gelatin, (64) 509.
- distribution in milk, (70) 670.
- distribution in plant extracts with high concentration of nitrate nitrogen, (66) 711.
- effect of chloroplast pigments, (65) 25.
- effect on—
 - apples, (61) Mass. 832.
 - botanical composition of pastures, (70) 467.
 - efficiency of phosphorus, (68) 454.
 - grassland herbage, (69) 251.
 - nodulation of soybeans, (63) Wis. 31.
 - peach growth and production, (61) Ark. 835.
 - potatoes, (66) 30.
 - quality of apples, (64) 36, 38.
 - reaction and replaceable bases of Norfolk sand, (64) 424.
 - yield and nicotine in *Nicotiana rustica*, (65) 632.
- endogenous urinary, excretion in rats, (70) Mo. 70.
- equilibrium on low protein diet, (67) 478.
- evolution from proteins treated with hypobromite solutions, (63) 308.
- excessive, effect on wheat leaf rust susceptibility, (65) Ind. 143.
- exchange on a one-sided diet of fowls, (61) 293.
- excretion, effect of highly purified cellulose, (70) N.Y.Cornell 865.
- fall applications to apples, value, (66) Can. 827.

Nitrogen—Continued.

- fecal, index of digestive ability, (70) Ill. 717.
- fertilization, effect, (69) 185.
- fertilization, effect on carbohydrates in apples, (65) 229.
- fertilizers, effect on firmness and composition of strawberries, (64) Ohio 441.
- fertilizers, fall applications, effect, (62) Mo. 39.
- fertilizers, fifty years of experiments with, (69) Mass. 23.
- fertilizers for apples and currants, (66) N.Y.State 534.
- fixation—
- and dextrose metabolism, (62) N.Y.Cornell 719; (67) 118.
 - by Azotobacter, (68) 166.
 - by Azotobacter, effect of combined nitrogen, (65) 211.
 - by Azotobacter, effect of temperature, (67) 112.
 - by bacteria on artificial media, (61) 214.
 - by legumes, (64) Oreg. 317; (70) 452.
 - by legumes, effect of carbon dioxide, (69) Wis. 776.
 - by legumes under controlled conditions, (66) 210.
 - by Rhizobium spp., (64) 522.
 - by Rhizobium trifolii on red clover plants, (65) Wis. 422.
 - by root nodule bacteria, (63) 214.
 - by symbiotic bacteria, (65) Hawaii. Pineapple Cannery 813.
 - commercial processes, (66) U.S.D.A. 213.
 - effect of copper, manganese, and iron, (69) Del. 16.
 - effect of green manure and organic residues, (70) 16, 452.
 - in presence and absence of legumes, (67) Mass. 367.
 - in six soil types, (69) Mich. 23.
 - in soils, factors affecting, (62) Del. 719; (64) Del. 613, Wash.Col. 618; (66) Del. 514, Wash.Col. 718; (70) 306.
 - legumes v. nonlegumes, (69) Mass. 635.
 - nonsymbiotic, (61) Oreg. 19.
 - notes, (70) Ky. 156.

 - infection, effect of hulling, (62) Ill. 346; (64) 146.
 - notes, (67) Calif. 535, Wis. 690, 692; (68) N.C. 487; (69) Kans. 221.
 - reaction, inheritance, (70) 602.
 - resistance, breeding for, (63) 247; (68) W.Va. 755.
 - resistance, inheritance, (66) W.Va. 545, 747.
 - resistance, tests, (66) Ga. 729.

Oat—Continued.

smut—continued.

- resistant varieties, (62) 643; (65) Mich. 149; (70) Pa. 343.
- seed treatment, (68) Ark. 608.
- specialized races, (67) 139.
- studies, (61) Kans. 145; (63) Mich. 336; (64) Wash.Col. 645.

smuts—

- biology, (69) 666.
- control, (64) Iowa 844.
- hybridization and segregation in, (69) Minn. 222.
- notes, (62) 535.
- physiologic races, (61) 842.
- resistance of hybrids to, (69) 663.
- resistance of hybrids to, inheritance, (66) 440.

spot blotch, control, (65) Mich. 745.

stem rust—

- in Australia, (68) 343.
- in Canada, forms, (63) 247.
- in Mississippi Valley, relation to weather, (67) 541.
- notes, (65) Mich. 149.
- physiologic forms, uredinial and telial stages, (70) 637.
- resistant variety, (62) Calif. 727; (63) 743.

straw, antirachitic value, (70) Pa. 83.

straw as bedding for cattle, (70) Vt. 231.

straw, breaking strength, (67) 670.

straw, effect on vegetables, (69) 183.

straw, production of artificial manure from, (61) 621.

white tip disease, notes, (66) 643.

Oatgrass yields, (66) W.Va. 528.

Oatmeal—

effect on hemoglobin regeneration, (68) 412.

extract, rickets-producing factor in, (62) 594.

mill feed v. wild hay for dairy cows, (68) S.Dak. 806.

Oats—

aberrant and false wild types, studies, (61) Kans. 125.

acre values, (69) Minn. 201.

acreage survey, (65) Iowa 125.

alkali-sensitive, studies, (61) 719.

amino acid deficiencies, for growth in rats, (67) 627.

and barley mixtures, tests, (67) Ohio 517.

and black mesdag hybrids, inheritance of smut resistance, (68) 748.

and oat products for pigs, (70) 664.

and other forage crops, comparison, (63) Pa. 662.

and vetch, green forage yields, (64) Alaska 731.

and vetch, production operations and costs, (70) Alaska Col. 321.

and wheat as crops, comparison, (64) Ohio 625.

Oats—Continued.

anthesis under Australian conditions, (67) 239.

as forage crop, (62) Mont. 219.

as hay crop, (65) Ala. 331.

as partial substitute for mixed hay, (66) Pa. 266.

as sole ration for horses, (69) 405.

as substitute for bran and middlings for chicks, (69) Ind. 89.

as substitute for roughage in cows' ration, (70) S.Dak. 519.

as tobacco cover crop, (65) Conn.State 335.

ash content, factors affecting, (61) Utah 409.

asynaptic dwarf, meiosis in, (69) 783.

at different stages of growth, constituents, (68) 320.

behavior in grinding, (67) 177.

beneficial effect of potatoes in rotations, (68) Mont. 324.

 evonymi japonicae conidia, germination, (65) 442.
 heveae, notes, (70) 59, 202.
 hortensii, notes, (63) 245.
 leaf disease of rubber, (68) 62, 349; (69) 379.
 lini, notes, (64) 743.
 quercinum conidia, germination, (65) 442.
 quercinum, notes, (64) 51.
 sp. from gallinaceous birds, (70) Conn.Storrs 536.
 sp., notes, (63) 349; (64) 350, 448, 846; (69) 373.
- Oil—
 accumulation in oilseed plants, factors affecting, (66) 122.
 and nicotine combination, history of, (66) 449.
 and sulfur spray, effect on peach, (66) Ill. 236.
 and sulfur spray, injury from, (63) N.J. 353.
 associations, cooperative, in Minnesota, (62) U.S.D.A. 579.
 barren nontoxic, in coal tar creosote, (69) 665.
 burner for domestic heating, (62) U.S.D.A. 97.
 cakes and extracted meals, feeding value, (66) 457.
 cakes, artificially dried and pressed, feeding value, (69) 258.
 cakes, effect on milk production, (64) 67.
 cakes, Niger, digestibility and nutritive value, (70) 76.
 cakes, use for bacon production, (65) 555.
 dusts for peaches and potatoes, (68) Ill. 637.
 emulsion-cresylic acid sprays, compatibility with fungicides, (69) 684.
 emulsion sprays for San Jose scale control, (70) 356.
 emulsion sprays, tests, (64) Mich. 240, Wash.Col. 645.
 emulsion, white, for European elm scale, (65) 456.
 emulsions—
 and acid lead arsenate, compatibility, (67) 425.
 as insecticides, (66) U.S.D.A. 155; (67) 561.
 brief survey, (64) 238.
 efficiency for oriental fruit moth, (70) Del. 363.

Oil—Continued.

- emulsions—continued.
 insecticidal, casein ammonia as emulsifying agent, (69) 826.
 mineral, use, (64) Oreg. 337.
 studies, (66) 753; (70) U.S.D.A. 501.
 filters for crank cases, (62) Calif. 777.
 from rubber seed, characteristics, (65) 410.
 in cottonseed, variation during growth, (65) 631.
 injecting into udder before milking, effect, (67) Iowa 447.
 lubricating, sprays in Ontario, status, (69) 548.
 meals as protein supplements, (67) Ohio 65.
 mineral, effect on absorption and utilization of vitamin A, (65) 793; (66) Pa. 297.
 miscible, and lubricating oil emulsion, relative covering power, (64) 154.
 palm plantations, cover crops for, (61) 529.
 palms, caterpillar pests on, control, (69) 76.
 palms, new moth attacking in Belgian Congo, (64) 55.
 palms, studies, (61) 529.
 penetration into respiratory siphons of mosquito larvae, relation to toxicity, (64) 159.
 plant seeds, effect of carbon disulfide and chloropicrin, (67) 706.
 plants, genetics and improvement, (70) 459.
 pollution, menace of, (68) 64.
 rape beetle, paper on, (62) 649.
 refining, applications of hydrogenation in, (66) 675.
 rye, germ, analysis, (68) 149.
 seed plants of Punjab, breeding, (66) 329.
 seeds, Indian, studies, (62) 633; (65) 530, 817.
 seeds, structure and composition, (67) 472.
 spray experiments for red scale, (66) 850.
 spray injury, lessening, (70) Ill. 635.
 spray mixtures, oil depositing qualities, (66) 449.
 spray project, western cooperative, (68) Idaho 351.
 sprays—
 accumulation in citrus trees, (70) 337, 503.
 chemistry, Wash.Col., (63) 250; (64) 656; (66) 757; (68) 780.
 dormant, use, (66) Idaho 243.
 effect on apple trees, (68) Wash.Col. 760.
 effect on foliage, (61) Oreg. 35; (65) N.J. 849.
 effect on fruit trees, (63) Wash.Col. 236; (66) 155.

Oil—Continued.

- sprays—continued.
 effect on opening of leaf buds, (66) Ill. 230.
 effect on oranges, (65) Ala. 450; (68) 352.
 effect on respiration of apple shoots and foliage, (63) Ill. 536.
 effect on transpiration of apple and grape leaves, (68) Okla. 616.
 effectiveness, factors in, (68) 356.
 experiments, (63) Wash.Col. 252; (65) Mo. 340.
 for citrus trees, (62) Calif. 751.
 for codling moth control, (64) Ill. 850; (68) 333.
 for dormant use, (65) Wash.Col. 154.
 for red scale control, (66) 156.
 for San Jose scale control, (65) N.Mex. 245.
 for summer use, (65) Wash.Col. 652.
 formation and dispersion, (68) 258.
 increasing insecticidal efficiency, (68) 355.
 miscible, preparation from lubricating oils, (69) Mass. 686.
 mixing and application, (62) 851.
 notes, (65) Mass. 358.
 petroleum, characteristics and uses, (62) 647.
 physiological action, (68) 352.
 preparation, (61) N.Mex. 355; (69) 73, Oreg. 73.
 present trend, (66) 448.
 properties, (67) 504.
 selection and compatibility, (65) Conn.State 451.
 standardized, (66) 248.
 studies, (64) Wash.Col. 653, Wash.Col. 654; (69) Oreg. 384, Mass. 686.
 summer, effect on apple trees, (63) N.J. 353.
 summer, use, (66) Wash.Col. 737.
 systematic study, (67) Mass. 424.
 tank-mixture method of use, (63) 154, 750; (64) 543; (67) Calif. 563; (68) 353; (69) Calif. 71.
 tests, (61) Wash.Col. 551; (68) 496.
 triethanolamine oleate preparation, (62) 543.
 use, (61) N.Mex. 355; (63) 457; (66) Mo. 331; (67) 283; (68) 496.
 treatment, effect on quality preservation of eggs, (70) 820.
 Oiled paper, shredded, in apple storage, (68) W.Va. 760.
 Oil-nicotine combination for control of apple insects, (61) 252.
 Oils—*see also Fats and specific oils.*
 acidity in, potentiometric titration, (68) 586.

Oils—Continued.

- Orchesella ainsliei, notes, (63) 253.
- Orchestes pallicornis, *see* Apple flea weevil.
- Orchid—
 - bacterial soft rot, cause, (67) 147.
 - embryos, utilization of leucine, glycerine, and aspartic acid by, (69) N.Y.Cornell 25.
 - scale, habits and control, (67) N.J. 561.
 - seed germination, physiological studies, (65) 119.
 - seedlings, effect of pH of water and nutrients, (70) 631.
 - seedlings, growth, effect of day length, (70) 785.
 - seedlings, sources of carbohydrate for germination and growth, (70) 632.
 - weevil, habits and control, (67) N.J. 561.
- Orchids—
 - germination, nonsymbiotic, (62) 529.
 - of southern California, (62) 143.
 - symbiosis and asymbiosis relative to, (61) 819.

- Orchitis, a rare sequela to mercuric iodide treatment for lymphangitis, (62) 774.
- Orcus australasiae*, notes, (61) Calif. 351.
- Oregma lanigera*—
biological control, (65) 355.
notes, (67) 562.
- Oregon—
College, notes, (61) 599; (65) 599, 699; (66) 498, 698; (68) 284; (70) 895.
Station, notes, (65) 200, 699; (66) 498; (70) 734.
Station, report, (61) 96; (64) 399; (69) 477.
- Organic—
acids and phosphorus compounds in plants, functional relations, (67) 116.
acids, formation by mold fungi, mechanism, (68) 722.
acids, formation in water-logged soils, (63) 511.
acids, hydroxy, titration in presence of ferric and cupric salts, (67) 203.
acids in green plants, physiology, (62) 24.
acids in plants, effect of darkness and light, (63) 123.
acids, role in plant metabolism, (70) 754.
acids, utilization by algae, (63) 515.
compounds, interfacial energy and molecular structure, (68) Minn. 5.
compounds, structure, relation to inhibiting effect on liver esterase, (69) 168.
constituents of soil having base-exchange properties, origin, nature, and importance, (67) 215.
materials, base exchange in, (69) 182.
matter—
and pineapple production, (65) Hawaii. Pineapple Cannery's 640.
apparatus for destructive oxidation of, (66) 504.
as factor in orchard fertility, (65) Pa. 229.
carbon in, determination, (68) 440.
changes in dry farming regions, (67) 219.
composition and decomposition in soil, (62) 414.
composition, effect on rate of decomposition, (69) 496.
copper determination in, (66) 505.
decomposition, electrical effects, (67) 115.
decomposition, principles underlying, (61) 620.
destruction by perchloric acid, (61) 13.
distribution in sea bottom, (70) 18.
effect on carbon and nitrogen in soil, (61) 207.
effect on soil, (64) 612.
effect on soil moisture, (61) 207.
for soil, sources, (65) R.I. 511.
formation from forest, range, and pasture growths, (69) Fla. 178.
- Organic—Continued.
matter—continued.
in eastern Washington soils, maintenance, (68) Wash.Col. 734.
in Hawaiian pineapple soils, (64) 423.
in New York State soils, (65) 620.
in phosphate rock, (69) 487.
in plants, movement, (68) 26.
matter in soil, (61) Mich. 18; (63) R.I. 616.
accumulation, relation to carbon-nitrogen ratio, (65) 514.
and temperature relations in eastern United States, (65) 513.
base-exchange properties, (63) Ariz. 619; (65) 417.
carbon-nitrogen ratio, (68) 162.
composition and decomposition, (63) 812.
decomposition, (67) Nebr. 505.
decomposition, effect of pH, (68) 304; (70) 749.
decomposition, rate, (68) 155.

 (70) 499.
- Otiobrychus—
 cribricollis, bionomics, (70) 652.
 cribricollis, notes, (65) 657.
- Otiobrychus—Continued.
 ligustici, new to United States, (69)
 685.
 ligustici, notes, (70) N.Y.Cornell 802.
 ovatus as conifer pest, (68) 224.
 ovatus, notes, (61) Utah 54; (63)
 Mich. 55.
 singularis damage to conifer seedlings,
 (63) 55.
- Otodectes cynotis in ears of foxes, (62) 471.
- Otospermophilus douglasii, seasonal activity
 and growth, (66) 153.
- Ouabain, cumulative poisoning by, (70) 93.
- Outcrossing in columbine, (69) 216.
- Outlook statements, accuracy and timeliness,
 (69) Idaho 131.
- Ova—
 extratubal, in albino rats, (65) 219.
 human embryonic, maturation, (63) 127.
 human tubal, ovaries, and tubes, (62)
 324.
 in albino rat, developmental stages,
 (70) 319.
 internal migration, (62) 325; (65) 218.
 mammalian, development, (66) 818.
 of mammals, size, (62) 827.
 of rats in fallopian tubes, viability,
 (69) 642.
 tubal, in cow, first findings, (66) 818.
 tubal, recovery from cows, (66) 324.
- Ovarian—
 activity, effect of corpus luteum ex-
 tracts, (66) 625.
 cycle, regulation, (65) 626.
 development, effect of theelin, (66) 625.
 dynamics, new developments in, (63)
 726.
 extract, effect on ovariectomized mon-
 keys, (62) 325.
 extract, use in treatment of sterility
 in cattle, (62) 562.
 follicle in mice, prepubertal growth,
 (66) 818.
 graft in spayed heifer, (63) Mo. 726.
 grafts, differential reaction to, (63)
 222.
 hormone—
 crystalline, preparation, (64) 710.
 effect on mammary growth and
 milk secretion, (65) 329.
 effect on ovariectomized monkeys,
 (66) 130.
 effects in immature monkeys, (61)
 631.
 in urine of pregnant cow, (63) 26.
 production of premenstrual en-
 dometrium in castrated monkeys
 by, (64) 26.
 hypertrophy in females united with
 gonadectomized males and females,
 (66) 523.
 regeneration, possibility of, (62) 516.
 responses to prolactin and anterior pitui-
 tary in hypophysectomized rabbits,
 (70) 464.

Ovarian—Continued.

tissues, human, hormone content, (64) 128.

Ovaries—

human, development from birth to sexual maturity, (69) 349.

hypertrophy after unilateral X-ray sterilization, (63) 26.

immature, stimulation by hypophyseal implants, (62) 825, 826.

mammalian, fertilization experiments and parthenogenesis in, (61) 631.

multiple, and oestrous cycle in rats, (64) 822.

multiple, in mice, (70) 320.

of cows, changes in during pregnancy, (65) 525.

of guinea pigs, irradiation, effect on oestrous cycle, (66) 423.

of sexually immature monkey, luteinization, (69) 642.

relation to maintenance of pregnancy, (65) 427.

transplantation experiments, (62) 217; (67) 27.

transplantation for reproduction and for endocrine effect during pregnancy, (62) 826.

without corpora lutea, ingestion, effect on gonads of cock and boar, (70) 827.

X-rayed, effect on subsequent pregnancy, (68) 181.

Ovariotomy—

and transplantation, effect on pregnant albino rats, (65) 427.

bilateral, in Leghorn fowl, effects, (62) 423.

complete, regeneration following, (62) 827.

effect on breeding females, (67) 377.

effect on fat distribution and quantity in rats, (67) 773.

effect on menstruation in monkeys, (62) 423; (69) 36.

effect on pregnant guinea pigs, (62) 826.

in fowls, spermatogenesis following, (62) 325; (63) 128.

Ovary-stimulating extracts, fractionation and dilution, (66) 728.

Oven utensils, speed and efficiency, (65) 697.

Ovens—

gas and electric, comparison, Ind., (67) 637; (69) 156.

used for domestic cooking, (65) Ind. 196.

Overweight, reduction by dieting, (68) Ill. 697.

Ovogenesis in mammals, (63) 127.

Ovulation—

and implantation in cats, mechanism, (61) 631.

artificial induction in ewes, (70) 464.

during gestation, (64) 531.

Ovulation—Continued.

effect of fat-free diet, (63) 595.

in rabbits, (63) 432; (65) 28.

in rabbits, humoral mechanisms concerned in, (65) 28.

in rabbits induced by injection of anterior hypophysis, (67) 120.

in rabbits, mechanism, (64) 128; (67) 28; (68) 607.

induced by anterior-hypophyseal tissue of mature and immature rabbits, (68) 180.

search for neurological mechanisms in, (69) 787.

size of Graafian follicle at, (67) 121.

spontaneous, in monkeys, (69) 196.

Owls—

in east-central Illinois, food of, (64) 237.

in Ohio, protection, (68) 778.

protection of poultry from, (70) U.S.D.A. 391.

Ox blood pressure, (67) 71.

Ox, humped Indian, ciliates of, (70) 70.

Ox suprarenal, antiscorbutic activity, (69) 904.

Ox warble flies—*see also* Cattle grubs, Hypoderma, and Warble flies.

control, (68) Ill. 637.

reproductive system, (62) 455.

studies, (62) Va. 756, 857.

Ox warbles—

dressing cattle for extermination, (64) 547; (67) 291.

summary, (61) Ohio 55, U.S.D.A. 757.

Oxalate, adsorption by fuller's earth and norit, (61) 12.

Oxalic acid—

in plants, (62) 24.

in vegetables used as greens, (64) 580.

poisoning, chronic, (62) 167.

production by *Aspergillus niger*, (62) 24.

titration in presence of ferric and cupric salts, (67) 203.

Oxen, musk, introduced, (70) U.S.D.A. 498.

Oxidase—

activity, effect of pH value, (69) 26.

activity of fruit, factors affecting, (65) 214.

inhibiting effect on reduction of sulfur by potato and gladiolus juice, (66) 306.

Oxidation-reduction—

potentials, monograph, (61) 610.

systems, rate of autoxidation and relation to free energy, (69) 170.

Oxides, insecticide action, (67) 426.

Oxpecker, red-billed, food of, (70) 647.

Oxya chinensis, insect enemies, (66) 448.

Oxyflavin compounds in aleurone grains of Gramineae, (70) 597.

Oxygen—

absorption in soils, (69) 338.

and carbon dioxide, simultaneous determination, apparatus for, (66) 494.

- Oxygen—Continued.
 consumption of small animals, chamber for measuring, (67) 297.
 determination in blood sample, (69) 172.
 in gas mixtures, determination, (69) 171.
 in water, effect on root growth of cuttings, (66) 333.
 in water, methods of determination, (68) 621.
 inhalation and injection, therapeutic value, (69) 579.
 use in quick determination of ash, (67) 361.
- Oxygrapha schalleriana, notes, (70) 208.
- α -Oxyphenazine, formation of semiquinones as intermediary reduction products from, (67) 197.
- Oxypleurites serratus, notes (64) N.Y. State 60.
- Oxyspirura mansonii, description, (64) Guam 849.
- Oxytactor, use of term, (65) 651.
- Oxyurids, reptilian, of South Africa, (70) 382.
- Oxyuris—
 equi, fourth stage larva, biology, (64) 559.
 equi, N-butylidene chloride for, (69) 106.
 polyoon, generic position, (64) 771.
- Oyster—
 drill snails, salinity death-points, (65) 243.
 drill snails, trapping, (65) N.J. 243.
 larvae, movements and distribution, (65) N.J. 751.
 shell, feeding to hens, effect, (66) 262.
 shell flour as source of calcium for fattening hogs, (68) Miss. 364.
- Oysters—
 a means of copper administration, (67) 91.
 analyses, (70) Me. 128.
 antianemic potency, (67) 91; (68) 868.
 culture, problems in, (70) N.J. 575.
 diamino acids in, (65) 310.
 fattening in shoal water, (63) N.J. 350.
 in Barnegat Bay, problems, (65) N.J. 751.
 inspection, (61) Me. 693.
 nutritive value, (70) 128.
 sex in, inheritance, (68) 745.
 Stewart Island, seasonal variations, (61) 692.
 studies, N.J., (61) 748; (67) 558.
- Oyster-shell scale—
 control, (61) Ind. 353; (64) Wash.Col. 654; (65) Mich. 456.
 dormant spray experiments for, (66) Wash.Col. 756.
 notes, (61) Mich. 450; (67) 283.
 on cranberries, spray tests, (63) Wash. Col. 252.
- Ozolaimus megatypblon, notes, (70) 382.
- Ozone—
 effect on engine knock, (70) 545.
- Ozone—Continued.
 production, intermittent, apparatus for, (66) 620.
- Pachimeter, Rothamsted, description, (68) 255.
- Pachycoris torridus, parasite of eggs of, (61) 856.
- Pachyma hoelen, sclerotia of, (68) 627.
- Pachymerus quadrimaculatus in seed grain, control, (70) 69.
- Pachynematus—
 laricivorus n.sp., description, (67) 157.
 nigricorpus n.sp., description, (67) 157.
- Pachypsyllini nymphs, notes, (63) 848.
- Pachyschelus psychotriæ n.sp., description, (65) 657.
- Pachytylus migratorioloides, biology, (68) 783.
- Paddy fly in Ceylon, control, (65) 247.
- Paederus fuscipes, notes, (69) 695.
- Pagoda tree, fruiting sprays, insect inhabitants, (65) 546.
- Pahute weed, feeding value, (69) Calif. 37.
- Paint—
 and varnish products, colloidal phenomena in, (69) 324.
 and varnish removers, colloidal aspects, (69) 324.
 behavior, effect of wood structure, (66) 182.
 coatings, durability, relation to wood properties, (66) 674.
 films, permeability to moisture, (70) 544.
 preparations, effect on bark tissue, (64) Iowa 844.
 service on wood, evaluation, (65) 76.
 thinners, (66) 582.
- Painting—
 and wood surfaces for holding paint, (64) U.S.D.A. 182.
 house, methods, treatise, (66) 581.
- Paints—
 and painting, (61) 282.
 brushing and flowing properties, (62) 570.
 cold water, value as wood protectors, (65) Mich. 778.
 durability, effect of priming methods, (67) 79.
 durability, effect of resin in longleaf pine, (66) 581.
 effect on moisture absorption by wood, (70) 543.
 examination, physical methods for, (68) 685.
 exterior, drying, (66) 674.
 for prevention of corrosion, (68) 680.
 from synthetic resins, experiments with, (66) 474.
 hiding power, brush-out test for, (64) 888.
 hiding power measurement, (65) 76.
 house, special primers for, (67) 80.
 outside white, roof exposure tests, (66) 880.
 sheep branding, scouring out of wool, (65) Wyo. 195.
 use, (68) Mich. 826.

- Paints—Continued.
varnishes, lacquers, and colors, treatise, (70) 690.
- Palarus saishiuensis, notes, (67) U.S.D.A. 582.
- Palestine—
agricultural colonization and horticultural possibilities, (61) 381.
sanitary survey, (61) 381.
Survey Commission, Joint, reports submitted to, (61) 381.
- Palm—
beetle, notes, (70) Tex. 207.
bud rot, notes, (62) 145; (64) 448.
disease, notes, (62) Calif. 744.
diseases in Malaya, (64) 152.
diseases, studies, (67) Calif. 535.
heart rot, notes, (70) Ariz. 791.
kernel cake, carbohydrates, calorific value, (63) 163.
leaf spot, notes, (62) 645.
oil as source of motor fuel, (68) 681.
oil, red, vitamin A activity of carotin in, (63) 91.
oil, red, vitamin D in, (68) 280.
plantations, storm-devastated, restoration, (67) 279.
seed scolytids in Hawaii, (61) 855.
- Palmer worm, notes, (66) 347.
- Palmetto weevil, notes, (63) 151.
- Palmo Midds, feeding value, Ohio, (62) 696; (63) 659.
- Palmodes laeiventris, notes, (61) Mont. 153; (62) U.S.D.A. 654.
- Palms—

 effect on normal and vitamin B-deficient animals, (63) 394.
- Parathyroid—
 deficiency theory of cause of milk fever, (65) 267.
 extract, effect on rickets, (63) Wis. 64.
 extract, response to, factors affecting, (63) 396.
 glands, absence of, growth, reproduction, and lactation in, (70) 884.
 glands, literature review, (68) 131.
 glands of chicks, development, effect of radiant energy, (65) 463.
 glands of horses, anatomical position, (69) 421.
 glands, role in calcification, (64) 594.
 hormone, effect on calcium and phosphorus metabolism, (69) 311.
- Paratrioza cockerelli—
 habits, (66) 555; (69) 828.
 length of adult life, (69) 685.
 life history studies, (63) Utah 654; (64) 244; (66) 555.
- Paratrioza cockerelli—Continued.
 notes, (61) Utah 45, Utah 54; (63) Utah 251, Utah 647; (69) 225, N.Mex. 232; (70) Colo. 648.
 predators, (70) 205.
 relation to psyllid yellows of potatoes, (63) 550; (65) 238; (68) Colo. 636.
- Paratuberculosis, *see* Johne's disease.
- Paratylenchus besoekiana n.sp., notes, (69) 228.
- Paratylotropidia beutenmuelleri captures, data, (68) 500.
- Paratyphoid—
 avian, studies, (61) N.J. 769.
 B, transmission by stable fly, (68) 647.
 dysentery in lambs, (63) 76.
 enteritidis infections of rodents, carriers among, (62) 875.
 in pigeons of Rumania, immunization, (69) 582.
 in pigs, (69) 421; (70) 97, 534.
 infection in calves, diagnosis, (61) 69.
 infection in pigeons, (63) 776; (66) 174.
 infection in the drake, (69) 710.
 infection in turkeys, (69) 281.
 organisms, avian, studies, (63) N.J. 374.
 resistance in mice, genetic basis, (68) 748.
- Paratyphoid-like fever in children, (69) 582.
- Paratyphosis in calves, bacteriological and serological work, (70) 680.
- Paratyphus in calves, pathological anatomy, (65) 567.
- Parent-teacher associations, papers on, (66) 483.
- Paresis, parturient, complicated case, (69) 587.
- Parietal bones, parted, in mice, (64) 820.
- Paris green—
 as Anopheles larvicide, (64) 56; (66) 351.
 colloidal, action on Culex larvae, (67) 574.
 diluents, new portable screener for, (66) 849.
 diluted with charcoal, effect on mosquito larvae, (67) 715; (68) 644; (69) 393.
 dilution for mosquito control, (62) 454; (69) 393.
 dusting device for mosquito control, (62) 274.
 for malaria control, automatic distribution, (69) 242.
- Parkinsonia microphylla cells, two and a half centuries old, studies, (66) 214.
- Parkway features of interest to highway engineer, (61) U.S.D.A. 379.
- Parlatoria—
 date scale, control, (70) U.S.D.A. 501.
 date scale fumigation with chloropicrin, (62) 156.
 date scale in Arizona, introduction, (67) 423.

- Farlatoria—Continued.
oleae, life history and control, (63) 459.
pergandei, see Chaff scale.
- Parodiella spegazzinii on legumes in Sumatra, (66) 838.
- Paroniella magniumida n.sp., description, (63) 573.
- Paroxya clavuliger, new intermediate host for Cheilospirura hamulosa, (69) 268.
- Parrot—
disease communicable to man, (65) 471.
tribe, exudative typhus or avian plague in, (64) 777.
- Parrots—
and parakeets, virus disease differing from psittacosis, (67) 743.
diseases liable to be confused with psittacosis, (69) 271.
- Parsley—
culture experiments, (62) P.R. 737.
disease, (64) 744.
fertilizer experiments, (63) Ill. 533.
iron in, (67) U.S.D.A. 85.
vitamin C in, (68) 861.
yellows, transmission, Calif., (65) 753; (68) 491.
- Parsnip—
downy mildew, notes, (64) 43.
seed, quality on sale in New York, (67) N.Y.State 130.
webworm, notes, (61) Mich. 450.
wild, poisonous to livestock, (66) Alaska 666.
yellows, transmission, (63) Calif. 491.
- Parsnips—
change in ash content during storage and cooking, (61) Kans. 190.
culture experiments, (63) Utah 639.
fertilizer experiments, (63) N.H. 235.
varieties, (62) N.Y.State 431.
vitamin B (B₁) in, (67) 634.
- Parthenogenesis—
geographic, (62) 241.
in Hymenoptera, (70) 659.
in mammalian ovary, (64) 730.
in Tettigidae, cytological aspects, (66) 728.
- Partridge—
damage law, revision, (69) 384.
disease, causes, (68) 825.
Hungarian, experimental tularemia in, (69) 271.
Hungarian, parasite of, (65) 878.
- Partula genus, importance for problem of heredity and environment, (68) 745.
- Parturition, role of posterior hypophysis in, (68) 465.
- Paspalum—
dilatatum ergot, notes, (64) 448.
North American species, (62) 131.
scrobiculatum smut, notes, (64) 230.
- Passalurus ambiguus, anatomy, (61) 543.
- Passion fruit—
chemical composition, (70) 630.
culture experiments, (69) Hawaii 652.
- Paste-like samples, ether extract method for, (68) 441.
- Pastes, relative plasticity, measuring, (68) Minn. 123.
- Pasteurella—
and Brucella organisms, absence of serological relations, (69) 423.
and Brucella organisms, interagglutinability, (64) 556.
aviciida—
and Brucella infections, comparison, (66) Ala. 866; (68) 95.
in laboratory populations of fowls, spread, (66) 873.
in turkeys, (61) Idaho 874.
persistence in blood and organs of fowls, (67) 171.
studies, (62) 172, 473, 670; (63) 576; (67) 320.
transmission studies, (64) 251.
avisepticum infection of poultry, (61) 770.
bovisseptica—
cultivation on mineral mixture agar, (63) 873.
notes, (64) 879.
relation to pleuropneumonia, (67) 315.
studies, (64) 73.
group organism, relation to infectious pneumonia of sheep, (66) 74.
homolytica, proposed name, (67) 745.
ingestion, infection and vaccination of fowls by, (68) 383.
pseudotuberculosis rodentium, studies, (68) 669.
sp. cause of mastitis in ewes, (68) 381.
strains, serological relations, (62) 169.
tularensis—
induction of avirulence in, (68) 669.
infection of grouse by, (69) 271.
- Pasteurellosis—
in mice, (65) 773.
paresis of cattle in Paraguay, (69) 273.
- Pastries, tenderness in, from flours of varying strengths, (70) 865.
- Pasture—
analysis, methods, (70) 325.
and hay region, North Pacific, (66) 382.
crops and hay, (63) 825.
crops, comparison for dairy cows, (67) S.Dak. 158.
crops for pigs, (64) Mont. 217.
crops for producing market lambs, (65) Ind. 61.
crops for spring pigs, (64) Mont. 664.
crops, studies, (61) Wis. 128.
crops under drought conditions, tests, (65) Mich. 634.
crops, yield and composition for bottom land, (69) 354.
grasses, see Grasses.
herbs, composition, (68) 320.
land and crop land, income from, (62) 178.
land, vegetation on, (64) Ky. 131.
land, white grubs in, (65) Wis. 452.
pests, (63) Guam 129.

Pasture—Continued.

 and plum virus disease, (68) Ky. 211.
 aphid, black—
 and Anuraphis amygdali, comparison, (69) 239.
 and Brachycaudus amygdali, comparison, (69) 239.
 aphid, green—
 as agent in virus transmission, (61) 549.
 control, (61) 549.
 life history, habits, and control, (65) Va.Truck 156.
 notes, (64) N.Y.State 455; (69) 239.

Peach—Continued.

- aphid, green—continued.
 on cauliflower seed beds, (66) N.Y. State 552.
 on potato, (67) N.Y. State 710.
 on tobacco, (62) 451; (63) 752.
 role in potato leaf roll, (65) 757; (66) Ind. 238, 350; (68) 345; (70) 56.
 spraying experiments, (69) 689.
 sudden appearance and injury in north Bihar, (69) 388.
 toxic spray for, (61) Md. 656.
 transmission of cucumber mosaic by, (69) 671; (70) 654.
 transmission of virus A of potatoes by, (70) 196.
 vector of bean mosaic virus, (69) 387.
 vector of potato mosaic, (64) 233.
 vector of tobacco mosaic, (61) Wis. 149.
 vector of virus of breaking in tulips, (63) 256; (65) 247.
 vector of yellow dwarf, (68) 502.
 aphid, transmission of mosaic by, (63) Wis. 45.
 bacterial leaf spot, control, (68) Ill. 626.
 bacterial spot—
 control, (64) Ill. 843; (68) N.C. 487; (70) Ill. 635.
 new spray for, (67) 700.
 notes, (62) Ill. 346, Del. 746; (66) 147, Ill. 236, Del. 543; (67) U.S.D.A. 145, 275, 414, 551; (70) N.C. 791.
 overwintering of causal organism, (70) 494.
 blight, control, (68) 61.
 blight, *Coryneum*, symptoms and control, (67) Mich. 45.
 borer, biology, (66) 250.
 borer, biology in eastern Tennessee, (68) 221.
 borer, control, (62) Miss. 137; (65) Mich. 456; (67) Ohio 38; (68) Ill. 637.
 borer, control, fall v. spring applications of paradichlorobenzene, (67) 50.
 borer control, new method, (68) 220.
 borer control with paradichlorobenzene in solution, (61) 252.
 borer injury and control, (62) Okla. Panhandle 656.
 borer, lesser, control, (63) 849; (66) U.S.D.A. 57, Mich. 154; (67) S.Dak. 51; (69) Ohio 78.
 borer, naphthalene as fumigant, (69) 830.
 borer, notes, (66) Mich. 154; (70) U.S.D.A. 499.
 borer, paradichlorobenzene treatment, modifications, (63) 251.
 borer, protection of peach trees from, (70) Ill. 648.

Peach—Continued.

- brown rot—
 and transit rot, control, (68) 775.
 apothecia, two fungi on, (61) 348.
 control, (64) Okla. 738; (67) 275.
 estimated losses from, (70) 789.
 in United States, (68) U.S.D.A. 632.
 infection, source, (64) Tenn. 348.
 studies, (61) Tenn. 147, 347; (63) 44; (66) 147.
 buds, abscission, (70) 480.
 buds, hardiness, effect of cultural practices, (68) W.Va. 761.
 buds, hardiness, freezing apparatus for study, (61) Mass. 832.
 buds, hardiness of varieties, (70) Ohio 779.
 buds, hardy, (63) 239.
 buds, killing from low temperatures, varietal differences, (61) N.J. 733.
 buds, resistance to freezing temperatures, (63) W.Va. 737.
 canker and spot caused by arsenate injury, (68) N.C. 487.
 canker or die-back, causal fungi, morphological studies, (66) 751.
 chlorosis, treatment, (62) Calif. 745, 849.
 curculio, control, (66) 251, 347.
 curculio, spraying and dusting experiments, (66) 251.
 curculio, studies, (70) 652.
 die-back disease in Japan, fungi causing, (67) 145.
 disease, little, (69) Del. 60.
 diseases—
 and insects, control, (62) N.Y. Cornell 740; (68) 481.
 control with calcium sulfide, (61) Va. 347.
 epidemic in Illinois, (67) 410.
 notes, (64) 449.
 virus, symptoms, (68) Mich. 211.
 drops, burying for plum curculio control, (65) 453; (67) 558; (68) 215.
 foliage injury from sprays, (66) Del. 543.
 foliage, poisonous to livestock, (65) Ind. 70.
 fruit buds, hardiness, (61) W.Va. 233.
 fruit buds, hardiness, apparatus for study, (63) Mass. 532.
 inheritance of characters in, (69) 803.
 insects, attractants for, (61) 248.
 kernels, carbohydrate changes in, (61) Calif. 335.
 leaf curl control, (63) Mo. 735; (64) Ill. 843; (66) 147, Ill. 236, Ill. 245; (68) 61.
 leaf silver mite, (69) Mich. 550.
 leaves, transpiration rate, effect of oils, (64) Ill. 540.
 mosaic, new virus disease, (67) 701.
 mosaic, notes, (70) Tex. 192.
 moth, parasitism and winter control, (67) 423.

Peach—Continued.

- nematode-resistant rootstocks for, (64) Tenn. 348.
 nematodes, (70) U.S.D.A. 486.
 orchards, cultivation v. sweetclover cover crops, (64) Ill. 836.
 orchards, Hudson Valley, new insect pest, (67) 705.
 peroxidase, inactivation temperature, effect of pH, (65) 214.
 phony disease, description, (67) 700.
 phony, eradication, (70) U.S.D.A. 486.
 pollen, duration of viability in, (67) Calif. 512.
 root knot, studies, (65) Tenn. 840; (70) Ariz. 790.
 rootstocks, tests, (66) 434.
 rosette, inoculation experiment, (63) Ga. 143.
 rosette, studies, (61) Ga. 144; (65) Ga. 142; (66) Ga. 745; (70) Mich. 798.
 rot, *Tranzschelia punctata*, life history and control, (61) Calif. 341.
 rust, control, (64) 50; (67) 701.
 scab, dust v. sprays for, (64) Miss. 446.
 scale, control, (66) Ill. 236.
 scale, white, parasites attacking, (62) 252.
 seedlings—
 as brown rot menace, (66) 147.
 developed by station, (65) Iowa 135.
 effect of soil acidity, (63) N.J. 337.
 in sand cultures, (63) N.J. 337.
 studies, (61) N.Y.State 524; (64) S.C. 636; (65) N.J. 831.
 variations in, (68) S.C. 760.
 seeds, afterripening and germination, effect of drying, (70) 621.
 seeds, afterripening, germination, and storage, (66) 431.
 seeds, development, (70) N.Y.State 774.
 shoots, wetting, effects of humidity and temperature, (68) 336.
 silver leaf mite, notes, (68) Mich. 351.
 stock, one-year-old and June-bud, comparison, (64) Miss. 841.
 tree sour sap, cause, (67) 700.
 trees—
 effect of additional nitrogen, (65) N.C. 136.
 fruiting habit, effect of pruning, (66) Mich. 38.
 Heterodera radicolica affecting, (62) 145.
 longevity, (69) Ga. 209.
 newly planted, effect of sodium nitrate, (64) Kans. 839.
 nitrogen sources, relative value, (64) Del. 630.
 nitrogen sources, relative value, correction, (65) Del. 436.
 pruning system, (70) Ohio 625.
 rejuvenation and pruning, (61) Md. 831.
 rejuvenation studies, Md., (66) 38; (67) 524.

Peach—Continued.

- trees—continued.
 susceptibility to winter injury, effect of fertilizers, (61) N.C. 734.
 winter injury, Ill., (66) 236; (68) 618.
 twig borer—
 control, (67) 705.
 notes, (63) Utah 251; (68) 783.
 spitting habit, (64) 56.
 twig growth, studies, (61) N.J. 733.
 twig moth, parasites and predators, (69) Calif. 71.
 twigs, nitrogen concentration under sandhills conditions, (67) 529.
 worm, striped, notes, (62) 241.
 yellows—
 carriers of, tests, (62) Del. 746.
 control, (67) 551.
 dissemination by periodical cicada, (69) Del. 60.
 insect transmission, (69) 386.
 notes, (66) Del. 543.
 Peaches—
 arsenical injury, (67) 563; (69) 658.
 Babcock, new hybrid, (69) Calif. 55.
 blooming dates, (65) N.J. 832.
 breeding, (61) 430, N.J. 733; (62) Ill. 335, N.Y.State 431; (63) N.J. 338; (64) Ill. 836; (65) N.C. 136; (66) 326; (67) Iowa 385, Tex. 673; (68) Ill. 618; (69) Iowa 48.
 bud variation in, (67) U.S.D.A. 134.
 bud variation in, correction, (67) U.S. D.A. 680.
 California clingstone, suitability for Michigan, (65) Mich. 436.
 California, supply, demand, and prices, (69) Calif. 294.
 canned, cause of swelling cans, (61) 612.
 canning and drying, effect of irrigation, (62) Calif. 777.
 canning quality, (64) U.S.D.A. 39.
 canning quality, effect of late irrigation, (61) Calif. 378.
 carbohydrate changes in, (68) 327.
 carotenoid content, relation to light, (67) 245.
 cat-facing, cause, (61) Ind. 353.
 characteristics and composition, effect of nitrogen fertilization, (63) N.J. 41.
 clingstone, effect of irrigation, (62) Calif. 786.
 codling moth infestation, (62) 156.
 cold resistance, (62) Mo. 39.
 cold resistance and fruit setting, (65) N.J. 832.
 cost of production, (63) Wash.Col. 588.
 cover crops for, (70) Ky. 182.
 cull, causes, (61) Ga. 137.
 cultivation methods, (62) Miss. 38.
 culture, (64) Okla. 738; (70) N.J. 118.
 culture and fertilization, (70) Tex. 182.
 culture experiments, (61) Ind. 338; (66) Tex. 34, Tex. 35; (67) Miss. 35.
 cut, drying, (63) Calif. 189.
 delayed foliation, (65) Calif. 723.

Peaches—Continued.

delayed foliation character, nature of inheritance, (67) Calif. 512.
dependable, (70) Ohio 184.
dessert and keeping quality, effect of storage temperatures, (70) 480.
development and ripening, N.J., (64) 139; (66) 335.
Diplodia spp. affecting, (65) Fla. 439.
dried, moisture content, (68) Conn. State 271.
dried, vitamins in, (64) 495.
dropping, nature and causes, (69) Del. 48.
dropping of flowers and immature fruits, (62) Del. 749.
effect of freezing, (66) Ga. 740.
effect of iron sulfate, (61) Calif. 342.
effect of late thinning, (65) Calif. 735.
effect of nitrogen fertilizers, (66) Ky. 137.
effect of nitrogen from different sources, (69) Del. 48.
effect of pruning and thinning, (61) N.C. 735.
effect of temperature, (70) N.J. 480.
effect of thinning, (66) Wash.Col. 736.
effect of time of harvesting, (64) Wash. Col. 637.
effect on acidity of urine, (70) 866.
Elberta—
 composition, and fruit bud formation, correlations, (69) 656.
 growth and yield, effects of time and rate of nitrate fertilization, (67) 529.
 hardiness studies, (69) N.J. 804.
 leaf area and size of fruit, correlations, (69) 656, 657.
 stomatal behavior and fruit growth, effect of soil moisture, (69) 656.
fertile Hale, description, (69) Mich. 55.
fertilizer experiments, (61) N.H. 139, Mass. 833, Ark. 835; (62) Ohio 40, 526; (63) N.C. 636; (64) Ill. 837; (66) Ark. 532, Del. 533, S.C. 633; (67) Md. 524; (68) Ky. 328, N.C. 474, S.C. 760; (70) Mich. 51.
fertilizer requirements, (69) N.H. 364.
from different sources, effect of nitrogen, (62) Del. 735.
frost injury, (62) Tex. 637.
frost-resistant variety, (62) Tex. 637.
frozen, vitamins in, (65) Ga. 192.
fruit bud set, standard for classifying, (69) N.J. 368.
fruit development period, (65) N.J. 41.
fruit growth and stomatal behavior, (68) 50.
fruit size, relation to shoot growth, (68) Ky. 328.
Gage, growth and characteristics, (61) 233.
genetic composition, Mass., (67) 385; (69) 652.
genetic studies, (61) Calif. 326.

Peaches—Continued.

Georgia Belle, fruit development, relation to soil moisture and leaf area, (67) 528.
Georgia, marketing, (62) Ga. 85.
Golden Jubilee, origin, (70) N.J. 480.
grades, (67) Ga. 135.
grading and packing, (61) Ill. 738.
growth, (67) N.J. 524.
growth and development, (70) U.S.D.A. 474.
growth and fruiting, effect of nitrogen, (68) Miss. 328.
growth study of fruit, (69) 655.
hardiness, N.J., (70) 480, 575.
hardy varieties and seedlings, (63) Mo. 734.
harvesting and storage, (68) Wash.Col. 760.
harvesting studies, (69) Utah 368.
heat requirements, (67) 256.
Hiley, composition and growth rate, (69) 656.
imported Canadian, wastage types, (67) 411.
insect pests, (70) Mich. 500.
insects affecting in Tennessee, (67) 561.
internal composition of shoots, relation to tree response, (67) 527.
irrigated, canning quality, (62) Calif. 527.
J. H. Hale, ar parent in peach crosses, (69) 804.
J. H. Hale, pollination, (62) Calif. 734.
landscape and windbreak tests, (69) Fla. 209.
leaf area, relation to set, size, and composition, (68) Wash.Col. 760.
management, (68) Ill. 618.
marketable and cull, records, (65) Ga. 184.
marketing, (68) Ill. 686.
mutation in, (68) 750.
nematode-resistant stocks, (61) Calif. 335.
new seedling, Halehaven, (68) Mich. 760.
new variety, N.Y.State, (62) 431, 738.
nitrogen sources, effects, (66) Del. 533.
nutrition and leaf efficiency, (68) N.C. 474.
of Fergana Valley, growing, (68) 477.
oil dusts for, (68) Ill. 637.
on plum stocks, graft affinity tests, (61) 234.
Oriole and Valiant, description, (69) N.Y.State 367.
Phillips Cling, gumming, (69) 658.
picking maturity tests, (61) Utah 37.
pollination, (61) Mich. 230; (62) N.Y.-State 739; (66) Wash.Col. 738, 829; (67) 249; (69) W.Va. 212; (70) 625.
pollination and pollen viability, (67) N.J. 524.
pollination requirements, (65) 41.

Peaches—Continued.

- preparing for market, (69) U.S.D.A. 523.
- preservation by freezing, (64) Ga. 191.
- preservation by freezing, varietal adaptability, (70) 50, 481.

 slime disease, rotation test, (62) 50.
 virus disease, studies, (62) 237.

Peanuts—

- breeding, (61) Va. 726; (62) Fla. 325, Tex. 627; (63) Tex. 435, N.C. 629; Fla. 626; (65) N.C. 126, 225, Fla. 429; (66) Tex. 27, Va. 527; (67) Fla. 516, Tex. 668; (68) N.C. 468; (69) Fla. 199; (70) Tex. 173, U.S.D.A. 464, U.S.D.A. 609, N.C. 762.
 breeding for disease resistance, (69) Ga. 221.
 chromosome number in, (67) 24.
 correlations of branches, flowers, pods, and yield, (69) 784.
 culture, (65) U.S.D.A. 225.
 culture experiments, (62) Fla. 325, S.C. 625, Ark. 828; (63) Tex. 435; (64) S.C. 625; (65) N.C. 126; (66) Tex. 27, Ga.Coastal Plain 626; (68) N.C. 468; (69) Fla. 199; (70) Ga.Coastal Plain 762, N.C. 762.
 effects of dusts and sprays, (70) N.C. 762.
 efficiency for growth in pigs, increasing, (61) U.S.D.A. 462.
 experiments, (65) Ark. 633.
 feeding value for steers, (65) Ga. 159.
 fertilizer experiments, (62) Fla. 325, S.C. 625, Ga.Coastal Plain 729; (63) Fla. 626; (65) N.C. 126, Fla. 429; (66) Ga.Coastal Plain 626; (67) Fla. 516, Va. 668; (69) Ga.Coastal Plain 37, Fla. 199; (70) Tex. 173, Ga. Coastal Plain 762.
 for grazing of pigs, (69) Fla. 248.
 for nuts and hay, (67) U.S.D.A. 30.
 germination and growth, (70) 469.

Peanuts—Continued.

- germination and yield, effect of cold storage and age of seed, (68) U.S.D.A. 39.
 in China, proteins in, biological value, (64) 583.
 liming experiments, (64) N.C. 20; (66) Va. 527.
 outlook for 1930, (62) Okla. 784.
 production and utilization in South Africa, (69) 450.
 production, approved practices, (69) N.C. 43.
 proteins in, (63) 108.
 root development, (70) 763.
 seed, inoculation, effect, (66) Ala. 821.
 shelled, advantages of planting, (69) Ga. 221.
 soil amendment studies, (69) Fla. 199.
 spacing tests, (65) N.C. 126.
 tariff data, (61) 584.
 value for growing pigs, (66) N.C. 361.
 varieties, (62) Ga.Coastal Plain 728.
 varieties, classification, (70) 470.
 varieties, treatment with land plaster, (67) Fla. 516.
 variety tests, (62) Tex. 626, Ark. 828; (63) Tex. 435, Fla. 626; (64) Ga. Coastal Plain 622, S.C. 625; (65) N.C. 126; (66) Tex. 27, Ark. 525, Ga. Coastal Plain 626, Miss. 730; (67) Miss. 29, Tex. 668, Va. 668; (68) N.C. 468; (69) Ga.Coastal Plain 37, Fla. 199; (70) Tex. 173, Ga.Coastal Plain 762, N.C. 762.
 Virginia-type, varieties and strains, (70) U.S.D.A. 40.

Pear—

- anthracnose, causal organism, (67) 553.
 bacterial disease, new, (67) 146.
 bark miner, biology and control, (67) 579.
 bark miner, life cycle and habits, (64) 461.
 bitter pit and lithiasis, (61) 653.
 black end in selected orchards, (68) 211.
 black end, studies, (61) Calif. 355.
 black spot disease in Japan and Chosen, (70) 643.
 black spot or scab in Western Australia, (67) 413.
 blight—
 control, (61) Tenn. 146; (62) Ky. 234; (64) Ind. 137; (70) Ill. 635.
 epidemic in Illinois, (67) 410.
 insect transmission, (65) Calif. 753.
 new hosts, (65) Calif. 744.
 resistant trees, (62) Ill. 346.
 resistant varieties, (70) Pa. 343.
 resistant varieties, breeding, (64) Ill. 843.
 studies, (61) Oreg. 50; (64) Ala. 337, Oreg. 347, Ark. 446.
 value of Bordeaux mixture, (61) 526.

Pear—Continued.

- blister mite, control, (67) Calif. 559.
 brown bark spot or measles, notes, (66) 147.
 brown rot, notes, (61) 653.
 canker, studies, (61) 653.
 chlorosis, lime-induced, notes, (64) 450.
 chlorosis, treatment, (62) Calif. 745.
 diseases and insects, control, (62) N.Y. Cornell 740.
 diseases, notes, (62) 149; (64) 449; (67) Calif. 535.
 diseases under overhead irrigation, (67) 554.
 fire blight—
 overwintering and modes of infection, (61) Mich. 448.
 resistance, studies, (64) Tenn. 348; (66) Ill. 230.
 resistant varieties, (62) Pa. 347; (65) 351.
 studies, (65) Tenn. 840; (66) N.Y. Cornell 642; (68) Ark. 626.
 summary, (70) N.Y. Cornell 57.
 flower bud weevil, biology, (67) 293.
 fruit bud differentiation, (63) 138.
 fruit rot, notes, (67) 553.
 fruits, stone cells of, (65) Mich. 739.
 inarches, growth, (68) 49.
 industry, status and trends, (69) Mich. 743.
 leaf blister mite—
 in the West, biology, (68) 363.
 injury, (67) Calif. 584.
 notes, (67) 705.
 leaves, green and chlorotic, chlorophyll and iron in, (69) 637.
 leaves, leaching with cold water, (62) 838.
 leaves, transpiration rate, effect of oils, (64) Ill. 540.
 little leaf, notes, (64) Oreg. 345.
 midge, abundance, relation to shelter, (67) 574.
 midge, biological control, (63) 851.
 midge, control, (66) 348, N.Y. State 552; (67) N.Y. State 715; (68) N.Y. State 637.
 midge, leaf curling, notes, (66) N.Y. State 552.
 midge, notes, (64) N.Y. State 455; (65) 56; (67) 427; (70) N.Y. State 803.
 mite, notes, (67) 705.
 new variety, (62) N.Y. State 431.
 orchard, effect of fertilizers, (64) Oreg. 339.
 orchards, plant bugs affecting, (67) 709
 peroxidase, inactivation temperature, effect of pH, (65) 214.
 pollen, effect of sprays, (63) 137.
 powdery mildew, control, (67) 554.
 products, canned, uses, (61) Calif. 387.
 psylla, control, (61) Mich. 749; (62) N.Y. State 449; (64) Mich. 240; (66) N.Y. State 552; (68) N.Y. State 637.
 psylla control, reducing cost, (64) 856.

Pear—Continued.

- psylla, dormant oil sprays for, (67) N.Y. State 710.
 psylla infestation, relation to environment, (64) 855.
 psylla, notes, (64) N.Y. State 455.
 psylla nymphs, toxicity of sprays, (63) 458.
 psylla problem, (62) 648.
 rootstocks, cold resistance, (70) 621.
 rootstocks, tests, (64) Oreg. 339.
 rot, new disease, (66) Wash. Col. 746.
 rot, notes, (66) 147.
 scab, control, (61) 541; (67) 553; (68) 61.
 scab control, methods, (64) Oreg. 346.
 scab control, spraying experiments, (70) 798.
 scab in East Anglia, (70) 643.
 scab, notes, (62) 238; (65) 345.
 scab organisms, overwintering, (70) 58.
 scab, seasonal succession of stages, (70) 199.
 scab, spraying experiments, (65) 351; (67) 414; (70) 199.
 scald and Anjou scald, differentiation and control, (65) Oreg. 750.
 scale, Italian, range, (66) 754.
 seedlings, characteristics, (67) 37.
 seedlings, description, (63) S. Dak. 40.
 seedlings, imported, value, (64) N.Y. State 440.
 seedlings, root branching, (64) N.Y. State 440.
 seedlings, studies, (61) N.Y. State 524.
 seeds, afterripening, germination, and storage, (66) 431.
 seeds, handling, (66) N.Y. State 534.
 shoots, Bartlett, composition and growth initiation, effect of temperature, (62) 526.
 shoots, Bartlett, nitrogen in, (67) 255.
 shoots, fractionation of water insoluble nitrogen, (68) 335.
 shoots, nitrogen in, seasonal changes, (65) 639.
 soils, studies, (64) Oreg. 338.
 stocks, (61) Oreg. 36.
 stocks, oriental, tests, (64) Mich. 343.
 target canker, studies, (61) 244.
 thrips, control, irrigation and flooding in, (69) Calif. 71.
 thrips, emergence, (70) Calif. 653.
 thrips, experiments with, (64) Oreg. 356.
 thrips, notes, (66) 450.
 thrips on prune, control, (61) Oreg. 52.
 tingids, new enemy, (67) 285.
 tissue, electrical resistance as index of maturity, (67) Oreg. 680.
 tree chlorosis, treatment, (61) 243, Calif. 342.
 trees, effect of soil moisture, (70) 479.
 trees, effect of sulfur, (68) 61.
 trees, Japanese, new canker disease, (69) 68.

Pear—Continued.

- trees, pruning, (64) N.Y.State 440; (67) 254.
- trees, rootstocks of, identification, (65) Calif. 736.
- trees, tracheal sap, seasonal changes in, (62) 433.
- trees, winter-injured, relation to rootstocks, (64) Oreg. 346.
- trees, winter pruning experiments, (63) 834.

Pears—

- Anjou, pollination studies, (61) Oreg. 232.
- Australian, exported to England, wastage in, (62) 850.
- baking, (65) Oreg. 787.
- Bartlett—
 - breakdown in, relation to acetaldehyde, (62) 341.
 - bud variation in, (66) 140.
 - effect of branches tied down to horizontal position, (61) Ohio 439.
 - for eastern shipment, maturity standards, (61) Calif. 737.
 - keeping qualities, effect of fertilizers, (63) 738.
 - nitrogenous compounds in current year's growth, seasonal changes, (68) 173.
 - ripening and storage behavior, (62) U.S.D.A. 230.
 - sectorial chimera, somatic segregation in, (69) 786.
 - sterility in, causes, (62) Vt. 339.
 - variations in shape, (68) 336.
- bean thrips on, (61) 249.
- Beirschmitt, notes, (64) Iowa 838.
- Beurre Diel, ripening, effect of stocks, (63) 239.
- black end, notes, (69) Calif. 60.
- blight resistant, (64) Miss. 631.
- breeding, (61) S.Dak. 39; (62) N.Y. State 431; (64) 25; (66) 326; (67) Iowa 385; (69) Iowa 48.
- breeding for blight resistance, (64) Ill. 843.
- budding stocks, importance of leafspot in selection, (61) 232.
- canned, corrosion of cans, (62) Calif. 786.
- chromosome numbers in, (66) 624.
- cold resistance, (70) 621.
- cold storage experiments, (68) 330.
- coloring and ripening with ethylene gas, (67) 392.
- Comice, physiological changes in storage, (70) 50.
- composition on tree and in storage, (65) 833.
- copper sulfate treated wrappers for Botrytis rot, (66) U.S.D.A. 47.
- cork or drought spot in, (69) 820.
- cost of production, (63) Wash.Col. 588.
- cultivation v. heavy mulching, (63) Mass. 532.

Pears—Continued.

- culture experiments, (66) Tex. 35, Ga. 741; (67) Ohio 35.
- cut, drying, (63) Calif. 189.
- defective graft unions in, (61) Mich. 525.
- dependable, (70) Ohio 184.
- development, effect of moisture, (64) 139.
- dihydroxyphenyl derivative and specific enzyme in, (66) 306.
- earliness and productivity, effect of limb bending, (68) 762.
- effect on acidity of urine, (70) 866.
- exanthema control in, (66) 343.
- fall and winter, harvesting and handling, (67) U.S.D.A. 134.
- faulty grafts in, (62) Mich. 434.
- fertilizer experiments, (61) Mass. 832; (62) Can. 638; (66) Wash.Col. 738; (67) 387.
- free or seedling rootstocks for, (70) 778.
- freezing injury, variation, (65) Oreg. 535.
- from southern Oregon, notes, (62) Miss. 38.
- fruit development, relation to seed formation, (64) 740.
- fruit size and quality, relation to foliage, (65) Wash.Col. 138.
- gas storage, (68) 336.
- grafting, preliminary budding in, (62) Mich. 434.
- growing with selected buds, (61) 527.
- growth and fruit bud formation, (68) 331.
- growth on different rootstocks, (68) N.Y.State 618.
- harvesting and handling, (61) Oreg. 35; (68) Calif. 49.
- harvesting, storing, and ripening, (62) Oreg. 44.
- home and commercial canned, vitamin values, (62) 396.
- home storage, (68) 391.
- imported Canadian, wastage types, (67) 411.
- in bushel baskets, cold storage holdings, (65) U.S.D.A. 784.
- in cold storage, peculiar freezing trouble, (65) Oreg. 750.
- in Ontario, (63) 834.
- in storage, changes in composition, (64) Oreg. 338.
- in warehouse precoolers, tests, (61) Calif. 335.
- inhibitory substance in, effect on potato growth, (69) Kans. 189.
- injury from dormant oils, (64) Oreg. 357.
- injury from paper liners impregnated with sodium silicate, (70) 186.
- insect and mite enemies, (65) Mich. 652.
- irrigation problems and projects, (69) Oreg. 365.

Pears—Continued.

- Kieffer, grit cell formation, (68) Mich. 328.
- Kieffer, storage, handling, and utilization, (70) U.S.D.A. 474.
- maturity in, determination, (68) 621.
- named seedlings, description, (69) 799.
- new bacterial disease, cause, (69) N.Y. Cornell 61.
- new seedling, (61) Iowa 338.
- new, tests, (64) Oreg. 339.
- Ovid and Willard, description, (69) N.Y.State 367.
- Pacific coast, supply and prices, (62) Calif. 578.
- Packham Triumph, pollination, (70) 336.
- Parker, new variety, (70) 777.
- Pineapple, dying, (67) La. 143, 263.
- Pineapple, notes, (61) Miss. 438.
- Polteau, parthenocarpy in, (69) 654.
- pollen viability, (61) 527.
- pollination, (61) Oreg. 36, Mich. 230, 526; (62) 434, N.Y.State 738; (64) Wash.Col. 637; (65) 41, 636; (66) Vt. 634, Wash.Col. 738, Wash.Col. 742, 829; (67) 249, N.Y.State 677; (69) Calif. 47, W.Va. 212, Oreg. 364, Oreg. 365; (70) 779.
- precooling, (70) U.S.D.A. 474.
- production, cost and efficiency, (63) Oreg. 684.
- production problems, (69) Oreg. 365.
- production survey in United States and Canada, (62) 140.
- ripening with ethylene gas, (61) Minn. 39.
- root growth under different fertility conditions, (69) 654.
- rootstock production, (70) N.Y.State 774.
- seedling, description, (70) S.Dak. 777.
- seedling stocks, (62) N.Y.State 432.
- seedling, winter hardiness studies, (65) Iowa 135.
- spray residue removal from, (61) U.S.D.A. 40, 233, 756; (66) U.S.D.A. 231.
- spray schedules for, (61) W.Va. 442; (67) N.J. 38.
- sterility in, causes and nature, (68) Vt. 336.
- storage in artificial atmosphere, (62) 841; (68) 480.
- storage, studies, (63) 745.
- stored, chemical changes in, (64) Oreg. 338.
- studies, (67) Calif. 526.
- table, varieties, (65) 230.
- tarnished plant bug damage, (66) 450.
- time of picking tests, (61) Oreg. 36.
- tracheal sap, variations in composition, (61) Calif. 336.
- transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
- trends in purchasing power and cost of production, (66) Mich. 286.

Pears—Continued.

- varietal and cultural notes, (65) Fla. 435.

 handling in storage, (70) N.Y.Cornell 775.
 harvesting, combine reel for, (69) 123.
 harvesting with combine, (66) Idaho 277; (67) 327.
 hogging off, (62) N.Dak. 162, N.Dak. 367; (63) N.Dak. 860; (64) Mont. 256; (66) Wash.Col. 766.
 improvement, (64) Okla. 738.
 improvement and fertilization, (63) Tenn. 191.
 improvement project, progress, (61) Colo. 136.
 inorganic injuries to, (61) 515.
 intra-State competition in Florida, (66) Fla. 882.
 iron in, (67) U.S.D.A. 85.
 irrigation experiments, (61) Utah 27.
 lighter colored, resistance to aphid injury, (69) Wis. 825.
 linkage in, (66) 726.
 manufacture and distribution, (61) Md. 383.
 merits for food and forage, (64) P.R. 336.
 mosaic-infected, pod deformation, (70) 795.
 nutritive value, (66) 485.
 of New York, monograph, (61) N.Y. State 640.

Peas—Continued.

- origin, (67) 131.
- paper mulch experiments, (61) Ohio 440.
- pigeon, *see* Pigeon peas.
- planting, and oats cutting with same operation, (64) Ala. 384.
- preservation in frozen state, (68) 328.
- production and marketing, (61) N.Y.Cornell 783.
- production, economic study, (61) Md. 583.
- production operations and costs, (70) Alaska Col. 321.
- quality, effect of fertilizers, (68) N.Y. State 617; (70) U.S.D.A. 474.
- quick freezing for market, (68) N.Y. State 698.
- research in India, (66) 131.
- rogue plants, chromosome number, (63) 217.
- rotation experiments, N.Y.State, (64) 441; (68) 617.
- seed treatment, (66) Idaho 220.
- seeding experiments, (61) Idaho 823; (62) N.Dak. 138; (63) Idaho 523; (65) Idaho 222; (66) Idaho 30.
- sensitivity to unfavorable conditions, (64) N.Y.State 447.
- shelled, deterioration, (68) 329.
- shelled green, carbohydrate changes in, (69) N.Y.State 343.
- shipments from Florida and competing areas, (65) Fla. 886.
- small-sized, wrinkled, (66) Can. 827.
- spacing experiments, (62) Can. 836.
- specific gravity, (70) N.Y.State 773.
- spray schedule for, (61) 753.
- strains resistant to homopterous insects, (67) 53.
- structure, composition, and quality, effect of nutrient solutions, (67) 131.
- superior strains, (63) Colo. 529.
- testing tenderness, device for adding load at steady rate, (67) 770.
- time of planting, (61) Md. 831.
- transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
- transition region, anatomy, (67) 132.
- uptake of nutritive material by, (67) 661.
- value in rotations, (63) N. Y. Cornell 34.
- varieties and culture in Genesee County, New York, (70) N.Y.Cornell 44.
- varieties and production practices, (68) Mich. 757.
- varieties for cut-over land, (65) Idaho 222.
- varieties for interior Alaska, (70) Alaska 172.
- varieties for mountain districts, (63) Colo. 529.
- varieties, hardshell seeds in, (67) N.Y. State 674.
- varieties, yield, (69) Me. 364.
- variety on peat land, (69) Minn. 201.

Peas—Continued.

- variety tests, (61) Mich. 432, Miss. 438, N.Dak. 726, Idaho 822; (62) N.Dak. 129, Tex. 627, Ga.Coastal Plain 728; (63) Tex. 435, Idaho 523, Utah 630, N.Dak. 823, 824; (64) Ga.Coastal Plain 622, Alaska 731; (65) Miss. 39, Mass. 330, Ala. 434; (66) Tex. 27, N.Dak. 131, Idaho 220, N.Y.State 535, Ga.Coastal Plain 626, Miss. 730; (67) Mass. 378, N.Dak. 667; (68) Miss. 43, Idaho 318, Miss. 329, Colo. 608, Colo. 616, N.Y.State 617; (69) Ga.Coastal Plain 48, Oreg. 354, Mass. 643; (70) Ga.Coastal Plain 762, Wyo. 763.
 - viability after treatment, (62) 136.
 - vitamin A in, seasonal variation, (65) Mich. 793.
 - vitamin C in during germination, (61) 295.
 - western v. homegrown, quality, (66) N.Y.Cornell 634.
 - winter, culture experiments, (70) Tex. 173.
 - winter field—
 - culture experiments, (69) Ga. Coastal Plain 37.
 - cutting tests, (62) Ga.Coastal Plain 729.
 - variety tests, (69) Ga.Coastal Plain 37.
 - with oats, yields, (65) Calif. 727.
 - yield and quality, factors affecting, (61) Md. 641.
 - yields, factors affecting, (61) Md. 831.
- Peat—
- and muck soils, response to copper sulfate and lime, (68) N.C. 452.
 - as nitrogen carrier, (70) U.S.D.A. 448.
 - as nitrogen carrier and source of organic matter, (70) AlaskaCol. 308.
 - biological decomposition, (69) Mich. 22.
 - composition, (61) 507.
 - composting with phosphate, effect, (63) 119.
 - deposits of New York, character, (70) N.Y.Cornell 306.
 - extracts, decolorization, (67) 360.
 - fertilizers for, (61) Iowa 319.
 - formation and decomposition, role of microorganisms in, (62) 814.
 - grades for soil improvement, (70) U.S. D.A. 164.
 - land hay as roughage for cattle, (65) Minn. 365.
 - lands, crop experiments on, (69) Minn. 201.
 - lands, durability, (67) 323.
 - lands, irrigation studies, (62) 173.
 - lands, subsidence, (67) 323; (69) Calif. 16.
 - lands, subsidence, measurements of, (67) Calif. 504.
 - lowmoor, rapidity of decomposition, effect of moisture, (68) 736.
 - marshes in White Russia, fertilizer problems, (63) 116.

Peat—Continued.

- mats for germination tests of forest tree seeds, (69) 58.
 moss as bedding for cattle, (70) Vt. 231.
 moss as manure substitute in greenhouse, (69) Ind. 48.
 moss, pH of, correcting with limestone, (70) N.Y.State 774.
 moss, uses and distribution in United States, (66) U.S.D.A. 18.
 moss v. shavings as bedding in stables, (63) N.J. 366.
 mulch, effect on blueberries, (66) Can. 827.
 mulches, tests, (67) Ohio 36.
 organic colloids in, (67) 112.
 pH of, factors affecting, (69) 22.
 products, hydrolytic, decomposition, (70) U.S.D.A. 307.
 profiles, characteristics, (64) U.S.D.A. 207.
 profiles in Maine, composition and morphological features, (61) 618.
 soil—*see also* Moor soils.
 drained, relation between plant growth and water table, (61) 327.
 durability of concrete tile in, (65) Wis. 477.
 fixation of phosphate by, (63) 215.
 for lettuce, correction of unproductivity, (70) 19.
 for soil improvement, (63) 116.
 temperatures, relative to summer frosts, (65) 509.
 types, proteins of, (63) 510.
 soils—
 acidity and base exchange in, (67) Wis. 657.
 Azotobacter in, (70) N.Y.Cornell 307.
 buffer capacity, (69) N.Y.Cornell 337.
 fertilizers for, (61) Wis. 118; (65) Iowa 113.
 management, (63) Iowa 18.
 microorganisms in, (68) 24.
 of Everglades, plant development in, role of copper, (65) Fla. 417.
 of Florida Everglades, composition, (62) 412.
 of Travancore, origin and nature, (68) 591.
 organic matter, relation to organic carbon in, (67) 656.
 pasture studies on, (69) Fla. 199.
 sugar beets on, (65) Calif. 728.
 utilization, (64) Oreg. 317.
 virgin, chemical study, (68) 303.
 studies, research in, (63) 213.
 uronic acid complexes in, (67) 16.
 use in greenhouse, (63) Mich. 18.
 use in horticulture, (66) 137.
 virgin, establishment of pasture on, (68) 36.
 virgin, microbiological activities, effect of fertilizers, (67) 221.

Pecan—

- aphid, black, identity, (69) 239.
 aphid, black, notes, (64) 459; (70) U.S.D.A. 499.
 black pit, cause and control, (68) U.S. D.A. 67.
 bud wood, storage and seasoning, (70) Tex. 190.
 budmoth, notes, Miss., (64) 454, 649; (66) 754.
 case bearer, control, (63) Fla. 652; (64) 52; (68) 786.
 cigar case bearer, notes, Fla., (67) 559; (69) 231.
 Cytospora canker, (68) Ariz. 768.
 disease in southern States, (66) U.S. D.A. 242.
 diseases, studies, (62) Fla. 345, S.C. 642.
 downy spot disease, notes, (67) 147.
 foliage diseases in Louisiana, control, (70) 351.
 industry, economic study, (68) U.S.D.A. 394.
 insects, studies, Miss., (62) 53; (68) 351.
 leaf blotch, life history and control, (63) 451.
 leaf case bearer, control, (61) 553; (64) 55, 750.
 leaf injury, notes, (65) Fla. 440.
 leaf spot, new, (61) 654; (65) 241.
 nursery stock, effect of hydrocyanic acid gas fumigation, (68) 782.
 nut case bearer—
 control, (66) Tex. 50; (69) Fla. 231.
 injury, (65) Fla. 452.
 notes, (67) Tex. 705; (70) Tex. 207, U.S.D.A. 499.
 parasites, (63) 457; (69) Fla. 231.
 spraying experiments, (62) Fla. 352.
 nuts, artificial coloring, (70) U.S.D.A. 630.
 nuts, causes of failure to fill, (68) Ariz. 759.
 nuts, composition, effect of fertilizers, (70) 339.
 nuts, composition, effect of fertilizers and soil types, (69) Fla. 209.
 oil, chemical and nutritive study, (70) 875.
 orchards, fertilizers and cover crops in, (69) Fla. 209.
 Phylloxera, notes, (64) 457; (68) Okla. 637; (70) U.S.D.A. 499.
 pistillate flowers, morphological differentiation, (64) 141.
 rosette, control, (69) 823; (70) 351, Ariz. 773.
 rosette, effect of zinc treatment, (70) 495.
 rosette, studies, (62) Fla. 344; (65) Fla. 440; (69) Ariz. 379.
 scab, control, (64) Miss. 641; (68) 213, Miss. 340.
 scab, notes, (65) Fla. 440.

Pecan—Continued.

- seedlings, sand burn of, (61) 245.
- shoots and buds, anatomical structure, (64) 141.
- shoots, chemical composition, (64) Ala. 137.
- shoots, productiveness, physiological factors, (68) 195.
- shuck worm, notes, (70) Fla. 64.
- shuck worm, studies, (62) Miss. 53.
- soils, fertilizers for, (64) U.S.D.A. 443.
- spittle insect, control, (61) N.C. 752.
- Texas root rot, notes, (70) Ariz. 790.
- trees, fertilizer experiments, (63) Miss. 38.
- trees, selected, variation of seedlings from, (70) 783.
- trees, top-working, value, (64) Okla. 737.
- vein spot, studies, (70) 59.
- weevil, control, (64) 749; (66) 252.
- weevil larvae, diseases of, (66) 247.
- weevil, life history studies, (64) Miss. 454; (65) Ala. 450; (66) Ala. 847.
- weevil, notes, (70) U.S.D.A. 499.
- weevil on nut trees, cage for confining, (69) 85.
- weevil, studies, Miss., (62) 152; (66) 754.

Pecans—

- abnormalities in flowers and nuts, (63) 141.
- budding, (66) Mo. 331.
- cold storage experiments, (70) 53, 339.
- cover crops for, (63) Fla. 636; (65) Fla. 435; (69) Ga.Coastal Plain 48.
- culture, (67) Miss. 35, U.S.D.A. 35, La. 130 Fla. 523; (68) Miss. 329.
- culture, relation to soil fertility and fertilizers, (64) 141.
- development of embryo and endosperm, (67) 685.
- dichogamy in, (67) Tex. 533.
- dropping, (64) 142.
- dusting experiments, (64) Ala. 345.
- effect of cultural practices on yield, size, and quality, (70) 338.
- fertilizer experiments, (62) Fla. 335; (63) Fla. 635; (64) Miss. 631; (65) Ala. 434, Fla. 435; (67) Fla. 523; (68) 196, 622.
- filling, relation to foliage, (68) 196; (70) U.S.D.A. 474.
- flowering habit, (64) 141; (65) Ga. 141.
- food storage and growth in, relation to nitrogen absorption, (69) Fla. 209.
- fruit development, physiological study, (70) 783.
- fruit setting in, (65) 232.
- fruiting habit, (64) 141.
- fruiting, relation to terminal growth, (65) 835.
- germination of seed, effect of storage conditions, (70) 782.
- grafting and budding, instructions, (63) Miss. 42.

Pecans—Continued.

- growth and reproduction, relation to nitrogen absorption and storage, (67) Fla. 523.
- growth habits, (64) 141.
- in Arizona, (68) Ariz. 51.
- in North Carolina, (70) 337.
- infected with *Nematospora coryli*, (70) 799.
- insects affecting, (64) U.S.D.A. 749; (67) 150.
- morphology and anatomy of fruit, (67) 261.
- obscure scale on, biology and control, (70) U.S.D.A. 808.
- oil content, (68) 587.
- pollination, (61) Ga. 137; (68) Ariz. 759.
- pollination control, period of receptivity, and pollen viability, (70) 338, 783.
- pollination, relation to setting, (70) Ariz. 773.
- premature dropping, (68) 196.
- production in Texas, (62) 143.
- propagation, (63) Tex. 444; (64) Miss. 439; (66) Tex. 34; (68) Ga. 765; (69) Ga. 209.
- propagation by patch budding, (63) Mo. 734.
- pruning, (67) Miss. 35; (70) 52, 338.
- pruning, effect, (68) 623.
- rancidity in, prevention, (69) Fla. 303.
- research in Texas, (70) 782.
- response to soil type and locality, (69) Fla. 209.
- root observations, relation to cultural practice, (64) 141.
- root system, relation to nursery and orchard practices, (70) Ga. 52.
- rootstock and breeding studies, (70) Tex. 182.
- seedlings and varieties, (61) N.C. 735.
- set of, factors affecting, (63) Tex. 444.
- spraying, prepollination, (70) 339.
- stocks for, (63) La. 136; (69) Fla. 209; (70) 337.
- stomatal movements in, (69) 806.
- storage studies, (61) Ga. 137; (66) Ala. 826.
- structure and function of the staminate organs, (63) 538.
- studies, (63) La. 136; (67) La. 136; (68) Okla. 616; (70) Mo. 182, N.C. 774.
- top working, (64) Miss. 631.
- tree performance, (68) N.C. 474.
- varietal yields, (63) N.C. 637.
- varieties, anatomical differences, (67) 684.
- varieties and culture, (66) Ga. 741.
- varieties, characteristics, (67) 684.
- varieties in North Carolina, performance records, (67) 684.
- varieties, number of nuts per pound, (63) Miss. 38.

Pecans—Continued.

variety tests, (64) 141, Ga.Coastal Plain 630; (65) Miss. 39, N.Mex. 227; (66) Ga.Coastal Plain 633; (67) Miss. 35, La. 130, Tex. 673; (69) Ga.Coastal Plain 48, Fla. 209, N.Mex. 210; (70) Ga.Coastal Plain 773.

varying susceptibility to *Cladosporium effusum*, (61) 245.

vitamin A in, (67) 777; (70) Tex. 131. winter injury, (64) Okla. 738.

yield and quality, effect of fertilizers, (65) 835.

yields, (61) N.Mex. 228.

Pectase in plant tissue, studies, (61) 720.

Pectic—

acid determination, (68) 586.

changes in ripening fruit, (63) 138.

substances, (69) 324.

substances, chemical relations, (61) Md. 803.

substances in plants, (68) 29.

Pectin—

chemistry of, (68) N.Y.State 576.

enzymic relations, (61) 720.

extraction, (61) Del. 610.

extraction, effect of temperature, (65) Del. 407.

extraction from citrus fruits, (63) Fla. 691.

from stored apple pomace, (66) N.Y. State 502.

grape, studies, (70) 7.

hydrolysis by microorganisms, (64) 7.

in apples at various stages of maturity, (62) 434.

in flax, bacterial decomposition, (68) Mich. 288.

in fruit juices, decomposition, effect of microorganisms, (69) Mass. 633.

in Philippine fruits, (69) 748.

properties, (69) Del. 3.

studies, (64) 502.

substances and breakdown by enzymes, (62) 310.

Pectinase in plant tissue, studies, (61) 720.

Pectinophora—

gossypiella, see Bollworm, pink.

scutigera, validity of species, (63) 257.

Pectosinase in plant tissue, studies. (61) 720.

Pediculoides ventricosus, see Straw itch mite.

Pediculus humanus humanus, see Lice, head.

Pedology, use of term, (64) 611.

Pegomyia—

brassicae, see Cabbage maggot.

ceparum, see Onion maggot.

fusciceps, see Seed-corn maggot.

hyoscyami, see Spinach leaf miner.

Pejibaye palm, culture experiments, (69) Hawaii 652.

Pelargonium zonale leaf disease, capsid associated with, (65) 247.

Pelicans, removal of bothriocephalids with kamala, (68) 536.

Pellagra—

among natives of South Africa, (63) 196.

an iron-deficiency disease, (64) 595; (66) 490.

and alcoholism, results of liver treatment, (67) 780.

and dermatitis in rats, comparison, (66) 692.

and food supply of South Carolina farm families, (68) U.S.D.A. 421.

control, (68) 134.

endemic, in cotton-mill villages of South Carolina, (61) 597.

etiology, (63) 196, 794; (66) 595; (67) 636.

etiology and pathologic anatomy, (67) 349.

etiology, relation to solar radiation, (67) 488.

etiology, theories, (70) 890.

experimental, in rats, (64) 595; (70) 281.

increasing prevalence, (64) 795.

iron deficiency hypothesis, (68) 282.

prevention, work, (62) 97.

preventive action of foods, (67) 488; (70) 282.

relation to diet, (68) 420.

relation to vitamin G deficiency, (65) 93.

role of iron deficiency, (67) 92.

skin lesions in, (70) 138.

studies, (69) 155.

summary, (61) 496.

toxin, chemical nature, (67) 488.

treatment, (67) 488.

treatment with parenteral liver extract, (70) 890.

Pellagra-like disorder in rats on diets high in raw egg white, (69) Wis. 890.

Pellicularia koleroga, notes, (64) 230; (67) 400.

Penethrum, insecticidal value, (64) Wash. Col. 655.

Penetrol—

as activator for nicotine, (63) 457

as insecticide, contact angles, (68) N.H. 216.

in sprays, effect, Del., (62) 746; (64) 641.

tests, (64) Wash.Col. 654.

use of term, (62) Md. 243.

Penicillium—

biforme, notes, (62) 538.

biochemistry, (65) 566.

corm rot of gladioli, (65) 542.

corymbiferum on tulip bulbs, (63) 350.

crustaceum as potential agent of root rot, (69) 672.

digitatum and *P. italicum*, antagonism in nature, (69) 664.

digitatum, notes, (69) 676, 677.

expansum, notes, (61) 245; (63) 349.

expansum on apples, (67) Wash.Col. 699.

gladioli, notes, (66) 147.

- Penicillium**—Continued.
 glaucum growth, effect of magnesia, (70) 29.
 glaucum, hydrolytic action on pectin, (64) 7.
 glaucum, notes, (63) 243; (67) 746.
 group, classification, treatise, (69) 189.
 in soil flora, (65) 320.
 injury to corn seedlings, (62) 644.
 italicum and *P. digitatum*, antagonism in nature, (69) 664.
 mixed inoculum for citrus fruits, effect, (61) 747.
 oxalicum on corn, (66) 547; (67) 694.
 roqueforti, action on butter, (64) Ark. 470.
 rot effect on *Pseudomonas citri*, (62) 52.
 sclerotia, occurrence and behavior, (61) 533.
 sp., notes, (64) Guam 849; (65) 344; (66) 149.
 spp., effect on jelling power of fruit juices, (69) Mass. 633.
 spp., effect on oranges in storage, (69) 538.
 spp. growth, relation of temperature, (61) 245.
 spp. in butter, (63) Minn. 670.
 spp. in tissues, histological studies, (62) Calif. 744.
 spp., notes, (61) Calif. 341; (66) 752; (67) 47.
Penitentiaries, United States, diets in, (67) 474.
Pennsylvania—
 Association of Dairy and Milk Inspectors, report, (62) 554; (64) 71.
 College, notes, (61) 99, 393, 799; (62) 700; (63) 300, 799; (64) 98, 798; (65) 400, 499, 700; (67) 96, 192, 495; (69) 479, 768, 912; (70) 734, 895.
 Station, notes, (61) 398; (62) 700; (63) 300, 799; (64) 98, 500; (65) 499, 700; (67) 96, 192, 495; (69) 479, 912; (70) 895.
 Station, report, (62) 399; (64) 199; (66) 299; (68) 571; (70) 430.
Pentachlorethane, anthelmintic value, (62) 877.
Pentalonia nigronervosa—
 life history notes, (66) 841.
 notes, (63) 550; (67) 702.
Pentas carnea stem disease, notes, (64) 846.
Pentastomum denticulatum in cattle, distribution in Russia, (69) 579.
Pentathionic acid—
 injury to foliage, (63) 449.
 preparation and properties, (69) 383.
Pentatomidae of Cuba, (69) 387.
Pentosans—
 determination, (67) 364.
 development with formation of pectins in ripening fruits, (61) Md. 803.
 storage in seeds, (65) Iowa 119.
Pentoses—
 determination, (67) 364.
 fermentation possibilities, (61) Wis. 107.
Pentstemon, effect of change of altitude, (66) 214.
Peonies—
 culture, (64) Ill. 838; (66) N.J. 142.
 fertilizer experiments, Ill., (62) 338; (66) 232; (68) 623.
 fertilizers and cutting methods, (68) 197.
 nomenclature, (62) Ill. 338.

 chemotropic responses, (66) U.S.D.A. 454.
 dermal myiasis caused by, (61) 757.
 fertility in, (68) 505.

Phormia regina—Continued.

for use in treatment of osteomyelitis,
(67) 437.

olfactory response, (69) 557.

sterile maggots, production, (69) 267.

Phorocera—

claripennis, notes, (66) 157.

pumilio n.sp., description, (69) 393.

tortricus, notes, (64) Kans. 852.

Phosphatase in growth and disease of bone,
(68) 130.

Phosphate—

acid-soluble, in soils, effect of cropping,
(61) Calif. 317.

activated, preparation, (64) 525.

Anaconda, toxicity, Mich., (61) 718;
(64) 211.

availability of bone dust, increasing,
(66) 418.

buffer mixtures, behavior with various
cations, (66) 307.

buffer mixtures, pH of, effect of neutral
salts, (63) 413.

carriers, choice, related to soil type,
(68) Ill. 590.

colloidal calcium, of milk, (70) 234.

colloidal, use, (64) Me. 526.

compounds in soil, identification, (69)
181.

fertilization, studies, (67) Calif. 504.

fertilizer materials, comparison, (62)
121.

fertilizers, value for apples, (65) 699.

fixation by peat soil, (63) 215.

fixation in soils, nature, (69) 21.

ion and viosterol, comparison for anti-
rachitic value, (69) 471.

materials, availability, determination,
(66) 407.

mixtures, pH determination, (61) 309.
monocalcium, feeding value, (70) Kans.
222.

of blood plasma of dairy cows, relation
to calcium, (65) 261.

of lime, *see* Calcium phosphate.

readily soluble, in soils, studies, (69)
498.

requirements of Cherokee silt loam,
(61) Kans. 117.

rock—

analysis, (61) 109.

and sulfur, composting, (63) Tex.
417.

as mineral feed, safe limits, (67)
Wis. 723, 731.

availability indicated by phos-
phorus assimilation of plants,
(67) 223.

composition and distribution, (69)
U.S.D.A. 780.

composting, (62) Ga. 21, Tex. 614.
continued feeding to pigs, effect,
(64) Ohio 662.

effect on bone development in
swine, (63) Ohio 61, 360.

Phosphate—Continued.

rock—continued.

effect on calcium retention of pigs,
(65) 366.

fed to chicks, effect on growth,
(68) 80.

feeding value, (69) Wis. 839.

fertilizing value, Ill., (62) 316;
(64) 809.

fluorine in, determination, (66) 804.

fluorine-phosphoric acid ratios in,
(64) 12.

quantitative experiments, (70) Ind.
304.

silica determination in, (64) 509.

sulfur, organic matter, nitrogen, and
water in, (69) 487.

v. bone meal as source of calcium
and phosphorus, (68) Mich. 370.

v. bone meal for dairy cattle, (65)
Mich. 766.

studies in solution cultures, (64) 19,
Ala. 315.

Phosphates—*see also* Superphosphates.

absorption, (63) R.I. 617.

availability—

and efficiency, (65) Ind. 112.

determining degree of, (64) 524.

effect of associated soil treatments,
(64) 723.

in alkaline calcareous soils, (69)
499.

in soils, (65) 506; (67) 219, Ariz.
370; (68) 728.

in soils and fertilizers, (69) R.I.
179.

in soils, determination from corn
sap, (68) W.Va. 734.

to tomatoes, effect of soil moisture,
(70) 46.

values, Neubauer method, (67) 106.

comparison, (61) Iowa 318; (62) Ill.
316, Tenn. 508; (63) S.Dak. 19, N.C.

615, 721; (64) Ill. 809; (66) Ind.
17; (67) Ind. 656; (68) Ariz. 308;

(69) Ind. 16, Ind. 776; (70) Ind. 304,
Pa. 304.

deficiency in Montana soils, Mont., (65)
19; (67) 370.

di- and tricalcium, citrate-insoluble phos-
phoric acid in, (68) 439.

earthy, toxic effect on livestock, (64)
Iowa 859.

effect on—

hemoglobin regeneration in dogs,
(63) 897.

phosphoric acid in plants, (67) 507.

seed plants, (66) 20.

soil reaction, (67) 658.

experiments, (66) Ill. 211.

fertilizing value, (66) Va. 516; (70)
Mont. 163.

fixation and penetration in soils, (70)
Vt. 22.

fluorine in, determination, (63) 111.

Phosphates—Continued.

- in blood during milk fever, (61) 570.
- in blood, effect of vitamin B deficiency, (65) 95.
- in citrus groves, accumulation and availability, (70) 304, 305.
- in Kentucky soils, distribution, availability, and nature, (69) 181.
- in plant solutions, determination, (61) 13.
- in plants, field test, (67) 362.
- in rice, effect of parboiling and milling, (69) 469.
- in soils—
 - field test for, (62) Ill. 13.
 - industrial fellowship for study, (66) 398.
 - physicochemical relations, (68) Ariz. 308.
- in solution cultures, studies, (66) Ala. 814.
- in water, determination, (68) 584.
- movement and fixation in pasture fertilization, (66) 212.
- natural, mechanical analysis, (64) U.S. D.A. 210.
- natural soft, composition, (65) 420.
- need in Middle West, (68) U.S.D.A. 26.
- of iron and aluminum in calcareous soils, studies, (68) Ariz. 307.
- of potash, obtaining, thermic method, (63) 203.
- of Russian deposits, mineralogical characteristics, (63) 119.
- penetration in field soils, (66) 213.
- penetration into pasture soil, (61) Wis. 128.
- phosphorus in, methods of extracting, (63) 111.
- profits from, increasing, (64) Tenn. 525.
- raw, effect of roasting, (63) 119.
- raw, limit of effectiveness, (63) 119.
- raw, new cycle of acidulating, (63) 204.
- retention by hydrated alumina, (61) 208.
- solubility in calcareous soils, Ariz. (66) 718, 719.
- solubility in neutral ammonium citrate solution, (66) 406.
- soluble, in Oklahoma soils, (68) Okla. 309.
- solvents for, citric acid v. neutral ammonium citrate, (67) 205.
- sources, (67) 17.
- surface applied, penetration in pasture soil, (70) Conn.Storrs 323.
- unavailability in acid soil, (69) Wis. 776.
- vegetation pot experiment for study, (65) Mass. 23.
- water-soluble, in soils, tests, (62) Mich. 12.

Phosphatic—

- fertilizer requirements, (64) Mont. 211.
- fertilizers, availability, (64) 425; (69) Ark. 780.

Phosphatic—Continued.

- fertilizers, effect on forage plants, (62) Mont. 210.
- limestone as mineral feed, (64) N.Y.-Cornell 656.
- limestone, effect on growth and bone development, (66) N.Y.Cornell 856.
- manures in soil, changes, (70) Tenn. 157.
- materials, reactions, (65) 420.
- slag, blast furnace, as source of agricultural lime, (70) Pa. 304.
- slag, phosphorus in, methods of extracting, (63) 111.
- slag v. limestone, effect on acid soil, (64) 325.
- slag, water solubility, (69) 186.
- slags, fluorine in, determination, (66) 804.
- Phosphazote, preparation and properties, (66) U.S.D.A. 213.
- Phospholipid—
 - metabolism, (67) 774.
 - metabolism, effect of dietary deficiencies, (68) 704.
 - oxidative determination, (63) 414.
- Phosphorescent light, effect on plants, (70) 26.
- Phosphoric acid—
 - absorption by plants, effect of colloidal silica, (64) 23.
 - absorption by plants from air-dried and heated soils, (63) 320.
 - and plant diseases, (67) 401.
 - availability, effect of roasting rock phosphate, (63) 119.
 - citrate soluble, determination, (66) 212.
 - effect on potatoes, (66) 30.
 - fixation, (61) Va. 717.
 - in colloidal phosphate, citrate-soluble, (64) 508.
 - in eggs, determination, (66) 808.
 - in fertilizers, determination, (68) 584.
 - in rations, effect on bone development, (66) Tex. 793.
 - in soil extracts, determination, (64) 312.
 - in soils, determination, (64) 115; (68) 583.
 - in soils, root soluble, determination, (64) 508.
 - insoluble in fertilizers, determination, (70) 443.
 - methods of extracting, (63) 111.
 - mobilization in soil, effect of lime, (63) 721.
 - requirements for chicks, (68) Tex. 516.
 - role in nutrition of plum trees, (67) 45.
 - soil capacity to supply plants, methods for estimation, (69) 328.
 - soluble, in cultivated soils, determination, (70) 12.
 - studies, (70) U.S.D.A. 448.
 - utilization, effect of peat, (63) 119.

- Phosphoric esters in metabolism, significance, (69) 307.
- Phosphorites—
 in soil, degree of solubilization, (68) 593.
 Polish, comparison with other phosphates, (62) 121.
- Phosphorus—
 absorption by wheat, effect of pH, (69) 363.
 ammoniated, experiments with apple trees, (70) 48.
 and calcium—
 amounts, effect on dairy cattle, (63) W.Va. 69.
 determinations, rabbit as experimental animal, (67) 296.
 in bone formation in pigs, (61) Ohio 456.
 intake, relation to hypercalcemia, (63) 295.
 ratio for chicks, (61) Ohio 456; (62) 461; (63) Wis. 64; (64) 467; (68) 802.
 ratio of diet, effect on growth and bone changes, (64) 391.
 ratio of pig ration, effect, (70) 371.
 relation, effect on growth, calcification, and blood composition of rats, (69) 147.
 relation to growth and rachitic leg weakness in chickens, (69) 570.
 and sulfur, experiments, (61) S.Dak. 20.
 as factor in alfalfa culture, (61) Wis. 119.
 assimilation—
 by barley plants, (69) 186.
 by cows, (66) S.C. 664; (68) 227, S.C. 806.
 by cows on native grown feeds, (64) S.C. 673.
 by plants as indication of availability of rock phosphate, (67) 223.
 by rye seedlings, (67) 118.
 by soil microorganisms, (65) 419.
 by soil molds, (63) 216.
 from different mineral compounds and effect on range cattle, (70) N.Mex. 73.
 availability, Ky., (68) 297; (70) 157.
 and greenhouse pot tests, (66) Ala. 814.
 determination, comparison of methods, (68) 294.
 in alkaline calcareous soils, methods for estimating, (69) Colo. 328.
 in Iowa soils, (69) Iowa 16.
 in rice soils, effect of irrigation, (64) Ark. 417; (65) 212.
 in soils, determination, (64) 312.
 in soils, determination, field methods, (69) 491.
- Phosphorus—Continued.
 availability—continued.
 in soils, determination, Niklas and Truog methods, comparison, (67) 652.
 relation to crop yields, (68) 740.
 balance of cows through lactation and gestation, (68) Vt. 370.
 balance of heavily milking cows, (65) 260.
 balance of milking cows, (61) 257.
 compounds and organic acids in plants, functional relations, (67) 116.
 compounds in blood, determination, (62) 864.
 concentration in soil solutions, (64) Ala. 119.
 deficiency—
 effect on metabolism of tomatoes, (66) 828.
 factor in experimental rickets, (69) 473.
 in cattle rations, (70) Minn. 233.
 in forage grasses of Montana, (61) 58.
 in soils, diagnosis, (67) Ind. 651, 652.
 of fruit trees, effect, (70) 476.
 turnips as indicator crop, (65) R.I. 512.
 deficient diets, effect on dental disease, (70) 886.
 deficient ration, effect on heifers, (66) W.Va. 567.
 determination—
 colorimetric, (65) Calif. 708; (67) 6; (68) 729.
 glass color standards for, (66) 609.
 in feeding stuffs and excreta, (68) Minn. 17.
 in tissues, effect of trichloroacetic acid, (67) 205.
 method of oxidizing and dissolving soil for, (65) 312.
 distribution in blood cells and plasma, effect of excess irradiated ergosterol, (70) 230.
 downward movement and fixation in soils, (66) Vt. 616.
 effect in hastening maturity of vegetables, (68) Mont. 760.
 effect in reducing the effects of soil acidity on plant growth, (70) 593.
 effect on—
 botanical composition of pastures, (70) 467.
 chloroplast pigments, (65) 25.
 clover, (70) Ark. 161.
 fruit bud formation in apples, (69) N.H. 364.
 fruiting of cotton, (67) Ark. 669.
 nodulation of soybeans, (63) Wis. 31.
 plant growth, (67) S.Dak. 30.
 plant growth, research fellowship for, (63) 400.

Phosphorus—Continued.

- effect on—continued.
rickets, (64) 596.
wheat leaf rust susceptibility, (65) Ind. 143.
efficiency, effect of nitrogen, (68) 454.
elementary, effect on rickets, (65) 695.
evaluation in rickets-producing diet, (70) 727.
excretion, effect of excessive doses of irradiated ergosterol, (64) 397.
excretion, effect of highly purified cellulose, (70) N.Y.Cornell 865.
fecal, effect of bulk in diet, (66) 90.
fertility, studies, (69) Wis. 791.
forms in soil, (63) 120.
from milk and milk products, utilization, (69) Kans. 304.
in acid soil extracts, determination, (64) 507.
in alfalfa from land treated with calcium phosphate, (68) Wyo. 797.
in blood—
and tissues, microdetermination, (66) 309.
effect of excessive doses of irradiated ergosterol, (62) 197.
of cattle, (66) 464.
of chickens, effect of diet, (68) 367.
of pigs, (68) 228.
relation to tooth decay, (66) 792.
studies, (70) 873.
in casein, (69) 11.
in cell sap, (61) Mich. 418.
in citric acid extracts of soils, determination, (69) 174.
in corn sap as measure of available soil phosphorus, (69) 20.
in crops, relation to that in soil, (64) Wash.Col. 19.
in diet, calculation, (61) U.S.D.A. 191.
in feces, relation to pH, (62) 198.
in forage crops, effect of fertilizers, (62) 549.
in growing mung beans, changes in, (64) 410.
in hays of Quebec, (62) 549.
in milk, mechanism of secretion, (62) 871.
in Oklahoma soils, solubility, (68) Okla. 590.
in plant materials, determination, (68) 584.
in plants, effect on physiological functions, (67) 116.
in raw milk and in ice cream, utilization, (66) 390.
in saliva, relation to dental caries, (68) 870.
in serum of Indians and Europeans, (63) 194.
in soil and plant, effect of soil reaction, (66) Ky. 16.
in soil solution, relation to plant growth, (64) 721.

97514—37—32

Phosphorus—Continued.

- in soils, studies, (61) Mich. 418; (64) S.Dak. 618.
in soybean plant, (66) Ohio 734.
in tissues of plants and animals, (62) 122.
in vegetables of Alabama, (66) Ala. 889.
in wheat during growth, (69) 637.
in wrought iron, effect, (64) 779.
inorganic—
and calcium in human and cow's milk, comparison, (70) 419.
concentration in blood of rats, factors in, (68) 129.
forms in human and animal sera, (70) 418.
in blood of heifers, method of study, (68) 809.
in blood serum, determination, (66) 308.
intake by infants, relation to excretion and retention, (70) 563.
intake, effect on oestrous cycle and reproduction, (64) Calif. 757.
metabolism—
effect of irradiated ergosterol, (65) 95; (69) 311.
effect of parathyroid hormone, (69) 311.
in artificially fed infants, (61) 496.
in chickens, (65) 877.
in dairy cattle, (62) 870; (67) 731, 732; (68) 809.
in infants, (67) 340, 476.
in late gestation under specified diet, (66) 195.
in late lactation and during subsequent reproductive rest, (66) 387.
in rats, (61) 793.
in rats during pregnancy and lactation, (63) 795.
in rats, effect of irradiated ergosterol in large doses, (67) 89.
of pre-school children, (70) 559.
studies, (66) 388.
studies, significance to clinical medicine, (63) 790.
minimum requirement in children, (63) 893.
movement and fixation in soils, (68) Vt. 298.
movement in soil, (69) 184.
needs of Montana soils, (68) Mont. 734.
nitrogen and potassium absorption, reciprocal effects, (66) 814.
of blood of cattle, variations in, (64) 258.
of brain in rickets and tetany, (69) 155.
of cheese of several types, (70) 238.
of grains, (63) 108.
of greensand, availability, (66) Tex. 17.
of navy beans, utilization by adults, (68) 274.
partition in blood of rachitic and non-rachitic calves, (69) 258.

Phosphorus—Continued.

- ration, low, effect on dairy heifers, (65) Mich. 766.

- Physoderma—
 on corn, notes, (63) Fla. 644.
 zeae-maydis, notes, (65) Fla. 439; (67) Fla. 536; (69) Fla. 221, 223.
 zeae-maydis sporangia, germination, (70) 487.

Physokermes—

- abietis, notes, (61) Mich. 450.
- piccae, control, (64) Mich. 239.

Physomerus grossipes, studies, (62) 853.

Phytalus—

- problem in Mauritius, search of parasites in Madagascar, (70) 366.
- smithi on sugarcane, (65) 361.
- smithi, percentage of parasitism by parasites, (69) 686.

Phytodietus burgessi, parasite of codling moth, (62) Del. 754.

Phytomonas—

- berberidis n.sp., description, (65) 750.
- citri, activities, (63) Fla. 644.
- citri, notes, (69) 526.
- citri, studies, (63) 747; (65) Fla. 438.
- dissolvens, notes, (68) 492.
- insidiosum, notes, (65) Calif. 727; (67) 693; (68) Calif. 490.

medicaginis—

- notes, (68) Calif. 491.
- phaseolicola, notes, (69) 812.
- phaseolicola, varietal susceptibility of beans to, (69) N.Y.Cornell 61.
- pruni, overwintering on peach, (70) 494.
- pruni, sensitivity to colloidal sulfur, (68) Ohio 342.

- rhizogenes n.sp., description, (64) 150.
- rubrilincans, notes, (63) 745; (67) 272.
- rubrisubalbicans n.sp., notes, (63) 745.
- solanaceara, notes, (66) P.R. 237; (68) 346.

spp. and Erwinia amylovora, comparison, (69) 68.

spp., notes, (63) N.Y.Cornell 450; (69) 223.

spp., progeny of single-cell isolations, (64) 150.

- stewarti, life history, (70) 795.
- tumefaciens, notes, (70) 488.
- tumefaciens on a conifer, (69) 678.
- vignae, notes, (61) Mich. 443.
- vignae, overwintering, (65) Mich. 746.

Phytomyza—

- aquilegiae, see Columbine leaf miner.
- aquilegiana n.sp., description, (64) 753.
- ilicis, notes, (67) 284.
- spp., notes (67) 753.
- spp., parasites of, (61) 856.

Phytonomus—

- punctata, notes, (64) Kans. 852.
- variabilis, notes, (65) 651.

Phytopathological and botanical research methods, treatise, (70) 454.

Phytopathology—

- and plant protection, history, (62) 144.
- etiological, (70) 486.
- Portuguese glossary, (68) 487.

Phytophaga—

- destroyer, see Hessian fly.
- from South Africa, (66) 156.
- in China, keys, (70) 651.
- sp., notes, (65) Mich. 153.

Phytophthora—

- cactorum, notes, (65) N.J. 839; (66) 147, Wash.Col. 746; (67) 279; (69) 539; (70) Ariz. 493.

cactorum on snapdragons, (69) 823.

cinnamomi, notes, (64) P.R. 347.

colocasiae, notes, (69) 373.

cultures, heterothallic, (66) W.Va. 546.

diplanetic species, on potato tubers, (67) 548.

distribution of genus, (69) Mo. 528.

erythropectica, notes, (69) 817.

faberi, control, (63) 144.

faberi on cacao pods, pathogenicity of strains, (61) 847.

faberi secretions, nontoxicity, (64) 452.

genus, notes, (70) Mo. 192.

genus, repetitional diplanetism in, (63) 145.

genus, studies, (66) Mo. 338.

genus, taxonomy, (65) Mo. 841.

hibernalis, notes, (65) 345.

infections on pepper plants and fallen grapefruit, (62) P.R. 747.

infestans—see also Potato blight, late. biological specialization in, (70) 193.

in potato tubers, (66) 147.

on tomato, (61) 845; (62) 148.

unknown form, (70) 636.

zoospores, action of chemicals on, (65) 539.

nicotianae, notes, (63) Fla. 644; (65) 350; (66) P.R. 237; (67) 550.

paeoniae n.sp., description, (66) 842.

palmivora, notes, (64) 448; (66) P.R. 237.

parasitica on cotton and guava, (66) 147.

parasitica, rot due to, (70) Tex. 192.

pini antirrhini n.var., notes, (65) 241.

richardiae n.sp., notes, (61) 46.

richardiae, notes, (69) 378.

root rot of calla, (64) 152.

sp., inoculation tests, (62) Calif. 744.

sp., notes, (61) 842; (62) Fla. 345; (64) 229, 230; (65) 441; (68) 769.

sp. on honeydew melons, (67) 548.

sporangia, comparative value of size, (62) 48.

spp., cause of germination loss of pine seeds, (64) 848.

spp., notes, (61) Calif. 341; (65) 344; (67) 399, 400.

spp., paragnynous antheridia, (65) 541.

syringae, notes, (67) 553.

terrestria on tomatoes in transit, (68) U.S.D.A. 347.

Phytoplankton, vitamins in, (64) 291.

Phytoptus thujae, notes, (66) Mich. 154.

Phytorus pinguis—

- notes, (63) Guam 152.
- on nursery stock, (66) Guam 456.

Phytozoology and genetics in France, (66) 426.

- Pica* in cattle, relation to trypanosomiasis, (66) 772.
- Pickle**—
brine, mycoderma scums on, prevention, (67) Mich. 494.
worm in chayote in Puerto Rico, (65) 851.
worm, outbreak in Connecticut, (68) Conn.State 65.
worms, notes, (64) Tenn. 357.
- Pickles**, spoilage studies, (68) Mich. 731.

 depth of planting experiments, (64) 226.
 grading seed to color, (63) 539.
 mycorrhizal relationships, (68) 460.
 pollination experiments, (68) 339.
 seedlings infected with *Lophodermium pinastri*, regeneration, (69) 679.
 white pine weevil affecting, (69) 245.
 scrub, ecological study, (68) 201.
 second-growth southern, growth rate, (64) U.S.D.A. 142.
 seed beds, damping-off in, effect of superphosphate, (67) 41.
 seed, longleaf, storage, (65) 233.
 seed, Oregon grown slash, (70) 485.
 seed stored in metal cans, germination studies, (62) U.S.D.A. 843.
 seedlings—
 damaged by clay weevil, (63) 55.
 damping-off, control, (63) Ohio 45.
 effect of fertilizers, (64) U.S.D.A. 42.
 effect of shade, (64) Pa. 142.
 effect of soil reaction, (69) 370.
 effect of zinc sulfate treatment for grass in nursery, (62) U.S.D.A. 843.
 injury from strawberry root weevil, (63) Mich. 55.
 root development, relation to soil texture, (70) 633.

Pine—Continued.

- seeds, germination loss due to parasites, (64) 848.
 seeds, hastening germination, (62) 844; (66) 337.
 seeds, polyembryonic, germination, (66) 743.
 shoot moth, European—
 control, (64) 855; (65) Conn.State 451, N.J. 850; (68) Conn.State 66; (69) 80, Conn.State 231; (70) Conn.[New Haven] 893.
 early stages, (68) 643.
 in Eli Whitney Forest, (70) 211.
 in Michigan, (64) Mich. 362.
 in Niagara Peninsula, (64) 358.
 in red pine plantations, (68) 70.
 notes, (64) 358; (66) Mich. 154, Conn.State 496; (67) Conn.State 559, N.J. 561, 565.
 parasites, (64) 362; (67) 290.
 primary larvae of parasites, (67) 290.
 shoot moth in Canada, (69) 547.
 shoot moth, studies, (62) 855.
 short branch in, (67) 557.
 shortleaf, studies, (66) U.S.D.A. 145.
 slash, for reforestation in Coastal Plain, (63) S.C. 836.
 slash, growth in Texas, (65) 233.
 slash, gum yield, (62) U.S.D.A. 843.
 slash, methods of chipping, (62) U.S.D.A. 843.
 southern—
 minor stains, (68) 214.
 mycorrhiza on, (61) 819.
 of Mississippi bottomland, volume tables, (68) 768.
 planted, survival and early growth, (63) 142.
 planting, (61) U.S.D.A. 532.
 seed, studies, (66) 438.
 species in forest arboretum at Wooster, (66) Ohio 338.
 species, resistance of current season's shoots to blister rust infection, (70) 497.
 species resistant to blister rust, (61) U.S.D.A. 51.
 spinner, normal food, (69) 233.
 spittle bug, damage to Scotch pine in Pennsylvania, (68) 639.
 stands, accelerated growth rate after thinning, (62) U.S.D.A. 843.
 stands, loblolly, selectively logged, damage in, (70) 789.
 stands, thinning, (66) N.H. 40.
 summer wood relationships, (69) 370.
 survival, effect of grazing and burning, (62) U.S.D.A. 843.
 tar oil, refined, as insecticide and fungicide, (65) 846.
 tip beetle, notes, (70) 205.
 tip moth, control, (63) 462.
 tip moth, paper on, (62) 649.
 tortoise scale in Nebraska, (63) 848.

Pine—Continued.

- tortoise scale, natural v. artificial control, (66) Minn. 452.
- tree planting trials at North Platte. (69) Nebr. 520.
- tree treasures, (65) U.S.D.A. 233.
- trees in Mexico, sawfly affecting, (69) 561.
- trees of United States, identification by needle structure, (66) 337.
- trees, tapping for naval stores, (61) U.S.D.A. 443.
- tube moth in Yellowstone National Park, (67) U.S.D.A. 707.
- 27-year-old jack, thinning results, (65) 837.
- value, (61) Mich. 740.
- Virginia, in Pennsylvania, (70) Pa. 788.
- volume tables to fixed top diameters, (70) 634.
- volume, yield, and stand tables for. (62) U.S.D.A. 343.
- weevil, northern, notes, (63) N.H. 56
- western yellow—
- adaptation to heavy soils, (61) Kans. 141.
 - and Jeffrey, biochemical variations. (66) 831.
 - effect of partial cutting in virgin stand, (68) Calif. 486.
 - forests of Oregon and Washington, slash disposal, (66) U.S.D.A. 438.
 - form and volume, effect of release. (66) 438.
 - increment in cut-over stands, (64) 344.
 - modification of root systems, (61) 740.
 - natural reproduction, (63) 836.
 - notes, (66) Tex. 35.
 - seed extraction, (66) 541.
 - seedling recovery from injury by grazing, (66) 337.
 - seedlings, relation to reaction of culture solution, (68) 486.
 - suitability of brush lands in intermountain region, (66) U.S.D.A. 41.
 - taper study, (65) Calif. 742.
 - turpentine experiments in California, (63) 740.
 - variation of crown lengths or widths and stand density, (65) 837.
- white, *see* White pine.
- wood lignin, (61) 202.
- Woodgate rust, control, (70) U.S.D.A. 486.
- yellow, sterilization of seed beds, (62) 640.
- yield tables, (62) 532.

Pineapple—

- bran, cane molasses, and barley, comparative feeding value, (61) 666.
- bran, feeding value, (61) 262, 666; (66) Hawaii 58.

Pineapple—Continued.

- bran, vitamin and mineral content, (62) Hawaii.Pineapple Cannery 457.
- crosses, seeds from, (64) P.R. 340.
- fields, nematode control in, (62) Hawaii.Pineapple Cannery 445.
- fruit, imperfections, (63) 249.
- fruiting, effect of smoke and ethylene, (69) N.Y.Cornell 53.
- industry in Formosa, (65) Hawaii.Pineapple Cannery 835.
- leaves, spotting, cause, (69) 829.
- marbled fruit disease, (63) 149.
- parasites and saprophytes, heat resistance, (65) Hawaii.Pineapple Cannery 844.
- planting material, vacuum fumigation, (66) 449.
- plants—
- behavior in water cultures of varying pH, (62) Hawaii.Pineapple Cannery 437.
 - composition, factors affecting, (63) Hawaii.Pineapple Cannery 641.
 - decomposition rate, (65) Hawaii.Pineapple Cannery 622.
 - effect of aluminum, (62) Hawaii.Pineapple Cannery 419.
 - growth and composition, effect of salt concentration, (63) 622.
 - physiological and pathological studies, (62) Hawaii.Pineapple Cannery 418.
 - populations of mealybugs on, (68) 218.
 - root system, (62) Hawaii.Pineapple Cannery 437.
 - yellowing, control, (66) Guam 432.
- residues as green manure, value, (65) Hawaii.Pineapple Cannery 640.
- residues, composting, (65) Hawaii.Pineapple Cannery 622.
- root disease, notes, (64) 846.
- root failure, cause, (67) 558.
- root rots, studies, (68) 213.
- roots, development of root knot nematode in, (65) Hawaii.Pineapple Cannery 844.
- roots, physiological studies, (68) 170.
- roots, Scolopendrellidae attacking, (61) 850.
- side rot, studies, (63) 149.
- soils, analyses, (65) Hawaii.Pineapple Cannery 620.
- soils, Hawaiian, nitrogen and organic matter in, (64) 423.
- wilt, factors affecting, (63) 149.
- wilt, transmission by mealybugs, (66) 249.
- yellow spot—
- effect of tobacco dust, (65) Hawaii.Pineapple Cannery 844.
 - nicotine forms for control, (68) 349.
 - transmission by onion thrips, (65) 548, Hawaii.Pineapple Cannery 852; (67) 567; (68) 217.

Pineapples—

- accession of seedlings and new forms for future breeding, (69) P.R. 49.
 anatomy and effect of close planting, (65) Hawaii. Pineapple Cannery 835.
 average weights, (63) Hawaii 234.
 chlorosis in, iron sulfate for prevention, (67) V.I. 525.
 control of time of blooming, (69) P.R. 49.
 experiments, (70) 782.
 fertilizer experiments, (62) Hawaii. Pineapple Cannery 342.
 forcing, (66) N.Y. Cornell 637.
 fruiting, effect of smoke and ethylene, (67) 532.
 genetic studies, (66) 126.
 Hawaiian canned, food value, (62) Hawaii. Pineapple Cannery 489.
 Hawaiian, field soil temperature, relation to nematodes, (69) 822.
 hybrid, characteristics of canned fruits. (65) Hawaii. Pineapple Cannery 641
 hybrids, reserves in seeds, (70) 753.
 in Hawaii, mite infesting, (68) 508.
 indexes to maturity, (62) P.R. 738.
 influencing time of blooming, (67) P.R. 525.
 insects affecting in Hawaii, (68) 499.
 morphology and biochemistry, (70) 753.
 notes, (66) P.R. 536.
 plant selection, (62) P.R. 738.
 Puerto Rican, distribution survey, (63) 387.
 ripening period, effect of short day length, (62) P.R. 737.
 ripening with ethylene gas, (61) Minn. 39.
 selection of planting stock, (62) Hawaii. Pineapple Cannery 342.
 Smooth Cayenne, persistence of characters, (62) Hawaii. Pineapple Cannery 437.
 tests, (69) V.I. 520.
 triploid, characteristics, (68) 745.
 triploid, morphological and cytological characteristics, (69) 786.
 vitamin C in, (68) 861; (69) 310.
- Pinene in turpentine, evaluation, (67) U.S.D.A. 9.
 Pineol soluble, tests, (63) N.J. 352.
 Pining in livestock, herbage causing, (63) 723.
 Pink bollworm, *see* Bollworm, pink.
 Pink eye in sheep, (66) Tex. 70.
 Pink, hardly, anthracnose, notes (66) 152.
 Pinus—*see also* Pine.
 merkusii, distribution and growth, (61) 43.
 radiata in New Zealand, insect enemies, (67) 566.
 strobilus, fate in Europe, (66) 844.
 thunbergii on Nantucket, (64) 226.
- Pinworms—
 in man, control, (65) Mich. 772.
 life history studies, (70) 812.

Pionnotes betae as potential agent of root rot, (69) 672.

Pipe—

- cast iron, mechanical joints for, (70) 400.
 concrete-lined clay, supporting strength, (66) 377.
 creosoted wood stave, taste in water from, elimination, (66) 580.
 culvert, cast-iron, strength tests, (70) U.S.D.A. 541.
 culvert, earth pressure experiments, (62) U.S.D.A. 475.
 culverts, rigid, supporting strength, (69) 723.
 flow measurement by coordinate method, (61) 378.
 joints, welded, tests of strength and design, (62) 173.
 lines, corrosion, relation to soil characteristics, (66) 672.
 vine caterpillar, notes, (68) Conn. State 66.
- Piper beetle wilt, notes, (64) 230; (65) 441; (68) 769.
- Pipes—
 carrying capacity, (62) U.S.D.A. 778.
 water flow in, solution of special problems, (68) 828.
- Pipunculus spp., Rocky Mountain, notes, (70) 509.
- Piricularia—
 oryzae—
 growth, effect of copper sulfate, (69) 66.
 internal infection of rice seeds, (69) 66.
 studies, (61) 842; (68) 57; (69) 225, 534.
 spp., notes, (61) 539; (62) Ark. 845.
- Piroplasma—
 bigeminum—
 bovis, notes, (67) 743.
 control, (69) 587.
 immunization, (64) 773; (69) 588.
 in northern Queensland, (69) 867.
 in Rhipicephalus bursa, hereditary transmission, (66) 774.
 notes, (64) 175; (67) 600; (69) 718.
 transmission by ticks, (61) 175; (63) 555.
- caballi—
 infection, studies, (62) 548.
 notes, (69) 592.
 symptomatology and therapy, (68) 252.
 in poultry in Egypt, (65) 475.
 revision of genus, (66) 372.
- Piroplasmoses—
 and splenectomy, (70) 92.
 bovine, in North Africa, experimental chemotherapy, (69) 587.
 in Greece, (69) 592; (70) 244.
 of Algeria, relation to ticks, (61) 175.
 of bovines in Turkey, (67) 600.

- Piroplasmoses**—Continued.
of sheep in France, (63) 373.
treatment with T. 21, (67) Wyo. 70.
- Piroplasmosis**—
and gall sickness in Southern Rhodesia, (70) 828.
- bovine**—
blood filtrates of, (70) 382.
experimental production, (63) Wash.Col. 274.
experimental transmission, (64) 266.
immunity, relation to spleen, (63) 170.
immunization, (64) 773.
in British Columbia, etiology, (69) 588.
in Central Russia, (64) 175; (65) 870.
in Costa Rica, (69) 588.
in Egypt, (63) 872.
in Germany, (65) 870.
in Hokkaido, (61) 673.
inoculation against, (68) 667.
leucocyte formula of blood, (63) 480.
studies, (61) 270; (62) West.Wash 558; (63) U.S.D.A. 172; (64) 381; (66) Wash.Col. 771.
types, (66) P.R. 571.
- canine**, treatment, (63) 170.
equine, control, (69) 579; (70) 535.
in a bullock, treatment, (70) 530.
in Egyptian fowls, (62) 566, 775; (65) 877.
in Indian cattle, diagnosis, (67) 450.
in livestock, (67) 313.
infection studies in horses, (62) 548.
new drug for, (64) 773.
notes, (66) 866.
of fowls in Greece, (69) 595.
of poultry in Egypt, (63) 872.
survey, (69) 866.
transmission through foot-and-mouth disease serum, (69) 578.
treatment with ichthargan, (67) 743.
types in Egypt, (67) 743.
- Piropalms of domestic animals**, classification, (64) 772.
- Pise de terre**—
use, (70) U.S.D.A. 538.
value as building material, (64) P.R. 385.
- Pissodes**—
approximatus, notes, (63) N.H. 56.
deodarae, synonymy and notes, (66) 252.
nematode parasites of, (62) 547.
nemorensis, synonymy and notes, (66) 252.
rotundatus, notes, (66) Mich. 154.
strobi, see White pine weevil.
- Pistache**—
adaptability tests, (63) Tex. 444.
Chinese, culture, (62) Tex. 641.
- Pistachio roots**, *Heterodera radicolica* on, (62) 145.
- Pistacia spp.**, self- and interfertility, (61) 215; (63) 835.
- Pistol case bearer**—
control, (66) W.Va. 553.
notes, (68) Mich. 351.
outbreak in West Virginia, (63) 461.
- Pituitaries**—
of horses, gonadotropic activity, (70) 34.
of rats, weight at various stages of oestrus cycle, (70) 34.
- Pituitary**—
and gonads, reciprocal influence, (68) 180.
- anterior**—
acid extract, long continued injections, effects, (69) 350.
and gonads, relation, (65) 29; (66) 728.
and human pregnancy urine, differences, (70) 34.
and pregnancy urine, gonad-stimulating properties, (66) 625.
and urine of pregnancy, specificity in action, (69) 197.
avian, injection into fowls, effect, (69) 198.
crystals from, effect on sexual maturity, (63) 128; (65) 219.
cyclic variation in capacity to induce ovulation, (67) 120.
effect on immature ovaries, (62) 825.
effect on menstruation, (65) 29.
effect on milk secretion, (70) U.S.D.A. 464.
effect on ovulation in hypophysectomized rabbits, (70) 464.
extracts, effect on sexually immature monkeys, (69) 350.
gonad-stimulating power, effect of oestrin, (64) 332.
gonadotrope actions, (69) 197.
growth and gonad-stimulating hormones, (70) 760.
hormone, (67) 232.
hormone content, sex difference, (62) 826.
hormone, control of special secretion of the crop gland in pigeons by, (67) 122.
hormone, relation to prolactin, (67) 233.
in livestock breeding, (66) Mo. 323.
of pigs, follicle-stimulating effect, (67) 377.
relation to lactation, (68) 227.
replacement of gonadotropic action in hypophysectomized rat, (70) 34.
sex hormone, effect on normal and semicastrated rats, (69) 350.
therapy and uterine motility in rabbits, (69) 643.
two types in different animals, (70) 33.

Pituitary—Continued.

- body, growth in female rabbit, (68) 180.
 cellular characteristics, relation to inbreeding in guinea pigs, (70) U. S. D. A. 462.
 extract, effect on lactating mammary gland, (63) 768; (64) 822; (65) 329.
 extract, effect on milk yield, (62) Mo. 71.
 grafts, implantation in mice, effects, (68) 180.
 hormone and vitamin E, (70) 607.
 implants, effect on immature ovaries, (62) 826.
 implants, effect on reproductive capacity of mice, (63) 329.
 implants, homeoplastic, effect on sex characters in fowls, (69) 197.
 injections, effect on blood calcium, (68) 180.
 injections, responses of rat gonads to, (65) 427.
 of rat, effect of castration, (70) 33.
 of rats, experimental studies, (69) 512.
 ovarian stimulating properties, effect of placental extracts, (64) 331.
 posterior, nonessentiality in parturition, (68) 465.
 regulation by the testicle, (67) 120.
 secretions, role in menstruation, (65) 427; (67) 120.
 transplanting from guinea pigs to mice, effect, (62) 324.
 tumors, effect on gonad-stimulating hormone in blood and urine, (69) 350.
 volume of lobes during pregnancy, (69) 197.
- Pituitrin—**
 and insulin, interaction, (61) 567.
 effect on hibernation, (63) 478.
- Pityogenes chalcographus**, life history, (63) 253.
- Pityoktelnes sparsus—**
 larval development, (69) 835.
 notes, (61) Mich. 450.
- Pityophilus**, new genus, erection, (61) 662.
- Pityophthorus—**
 and allies in North America, revisional study of genus, (65) 551.
 new genus and new species, revisional study, (61) 359, 661.
 pulicarius, notes, (70) 205.
 spp. on white pine, (64) Mich. 241.
- Placenta—**
 character in monkey embryo, (62) 726.
 mouse, kyogenic substance in, (69) 196.
- Placental extracts—**
 effect on mammary glands of male guinea pigs, (61) 631.
 effect on ovarian stimulating properties of anterior hypophysis, (64) 331.
- Plaesus javanus**, notes, (66) P.R. 247.
- Plagiodera versicolora**, notes, (69) 232.
- Plagiognathus—**
 arbustorum, hymenopterous parasite of, (69) 399.
 repetitus, notes, (65) Mass. 357.

Plague—

- avian, in Psittaci, (64) 777.
 bubonic, relation to ships' rats and fleas, (61) 543.
 disease of man and rats, international conference on, (69) 229.
 perpetuation among wild rodents, (63) 152.
 rats, and fleas in Kenya, (70) 214.
 transmission by *Xenopsylla* spp., (63) 152.
 virus, role of ticks in transmission and preservation, (70) 218.
- Planets and sun spots**, relation to weather, (69) 175.
- Plankton—**
 marine, vitamins in, (64) 291, 591.
 sterols, studies, (64) 295.
- Planorbis quadeloupensis**, notes, (62) P.R. 771.
- Plant—**
 anatomy and vegetative propagation, (62) U.S.D.A. 509.
 anatomy, effect of light intensity and soil moisture, (68) 171.
 and animal symbiosis, (64) 454.
 and water relations, treatise, (64) 724.
 ash, acid-base balance in, (64) 113; (65) R.I. 512.
 behavior, integration, (69) 188.
 biology, treatise, (68) 697.
 breeding, (64) Conn.State 835; (68) 32; (70) 459.
 activities at Vineland, Ontario, (61) 527.
 at Landsberg, Prussia, (63) 436; (66) 629.
 disease resistant varieties (61) 327.
 handbook, (62) 827.
 in Great Britain, (62) 518.
 in India, (61) 518; (66) 822.
 in New South Wales, (66) 326; (68) 468.
 in Uruguay, (61) 825.
 new varieties, methods, (69) 212.
 on theoretical basis, treatise, (66) 626.
 recent advances in, treatise, (70) 608.
 Russian experiments, (67) 234.
 work, review, (61) S.Dak. 517.
- bud development**, inhibiting action of growth substance, (70) 595.
- bug, green**, of Schilcher vine in Styria, (65) 851.
- bug injury to fruits**, (61) Conn.State 547.
- bug, tarnished**, see Tarnished plant bug.
- bugs, larger**, on citrus and truck crops, (67) Fla. 559.
- bugs on citrus fruit**, (63) Fla. 652.
- bugs on citrus, pecan, and truck crops**, (69) Fla. 231.
- cankers**, relation to animal and human cancers, (61) 46.

Plant—Continued.

- cell—
 membranes, acids in, (61) 815.
 plasts, variations of resistance to osmotic action, (65) 119.
 sap, active acidity and susceptibility to infection, (66) 832.
 wall, chemistry, (61) 815; (64) 202.
 wall, structure, (65) N.C. 119.
- cells—
 activities in, (69) 188.
 colloidal protein in, (63) 516.
 current of injury in, (67) 373.
 diseased, vacuolar changes in, (67) 538.
 effect of one ion on accumulation of another, (63) 21.
 electric reaction and excitability in, (63) 516.
 food storage in, (61) 23.
 killing by freezing, (67) 245.
 life of, inclosures of living matter, (67) 659.
 living, penetration by weak acids, (67) 372.
 middle lamella, use of term, (66) 722.
 mitosis, nucleolar behavior in, (68) 31.
 osmotic quantities, (65) 119.
 pathology, treatise, (66) 832.
 protoplasmic layers in, studies, (61) 625.
 reaction to fungus haustoria, (67) 689.
 resistance to insect injury, (61) Kans. 153.
 suction tension, (62) 616.
 turgor and movement, effect of pH, (65) 213.
 two and half centuries old, studies, (66) 214.
- climate and microclimate, treatise, (65) 413.
- competition, treatise, (66) 321.
- compounds, structure and solubility, (61) 625.
- containers—
 region of root distribution, relation to nutrient factors, (69) Mass. 652.
 relation to growth, (62) Pa. 433.

 copper absorption, (67) Calif. 500.

Plants—Continued.

- copper requirements, (68) 174.
 cross-fertilizing, breeding, (67) 228.
 cultivated, improvement, (66) 125.
 cultivated, origin, (61) 327.
 cultivated, systematic investigation, methods, (68) 169.
 cultivated, water relations, (64) 327.
 cultivation in artificial light, (63) 427; (69) 27.
 culture, effect of electricity, (69) 877.
 culture, propagation, and pollination, (63) Hawaii 233.
 culture, under controlled environment, apparatus for, (66) 724.
 culture under sterile conditions, method, (67) 115.
 day-length and artificial illumination affecting, (70) 26.
 decomposition, behavior of lignin in, (61) 803.
 desert, *see* Desert plants.
 difficult and unusual, propagation, Iowa, (67) 385; (69) 48.
 dispersal throughout world, treatise, (69) 187.
 diversity and feeding value, (70) Tex. 220.
 drenched to cattle and sheep, (68) 666.
 dried, inorganic nitrogen in, determination, (63) 505.
 drought resistance, (64) Kans. 817.
 drought resistance of, physiological nature, (65) 120.
 dwarf, from unafterripened embryos of seeds, (69) 26.
 dye adsorption by, (67) N.H. 536.
 effect of—
 cyanide fumigation following Bordeaux spray, (63) N.H. 543.
 illuminating gas, (67) 386.
 manganese, copper, zinc, and boron in, (62) Ky. 203.
 phosphorescent light, (70) 26.
 potassium deficiency, (63) N.J. 428.
 pyrethrum extract, (63) 463.
 radioactivity, (65) 119.
 stimulation, (61) 516.
 ultra-violet and infra-red radiations, (67) 386.
 ultra-violet radiation, (68) 312
 X-rays, (69) N.Y.Cornell 25.
 electrical illumination, cost, (67) 609.
 electrical treatment, (68) 104.
 environmental complexes as dynamic systems, treatise, (65) 212.
 examination for insecticidal principles, (66) 347.
 experimental taxonomy in, (66) 214.
 feeding power, (67) 659.
 feeding via leaves with salt solution, (67) 22.
 fertilizer requirements, determination, (61) 13.
 fiber, *see* Fiber.
 fish poisoning and insecticidal, (65) U.S.D.A. 846; (68) 67.

Plants—Continued.

- flowering—
 - growth in limed and acidified soil, (68) 196.
 - growth under cloth, (69) Ohio 49.
 - in greenhouse, value of modified light conditions, (68) Ohio 484.
 - indoor and outdoor, needs, (68) 484.
 - types of sterility, (66) 137.
- flowerless condition, relation to unfavorable lengths of day, (66) 218.
- food, of muskrats, (67) 420.
- for test for insecticidal principles, (67) 284.
- forcing with artificial light, (68) 192.
- fungi of Iowa parasitic on, (67) 263.
- grafting, recent successes in, (63) 518.
- green, role of vitamins in, (64) 818.
- greenhouse—
 - diseases, (68) Ill. 626.
 - effect of fertilizers, (67) Ohio 36.
 - leafhopper affecting, (67) 431.
- growing, automatic watering system with recorder, (62) 820.
- grown in dry or in moist air, peculiarities, (61) 424.
- grown under glass and glass substitutes, composition, (63) Wis. 40.
- hardening, factors affecting, (70) 167.
- hardening, time and temperature factors, (64) 35.
- hardiness—
 - equipment for study, (66) 21.
 - index to, (65) Wis. 422.
 - measuring, (68) 30.
- hardy perennial, in pots, treatment with lead arsenate, (70) U.S.D.A. 501.
- herbage, breeding, (67) 518.
- heritable differences in transpiration between ecotypes, (64) 725.
- honey-producing, (67) Tex. 705.
- honey-producing, of State, N.C., (65) 153; (70) 803.
- host and parasite, histological reactions between, (62) 821.
- host and parasites, summary, (61) 532.
- house, care, (62) N.J. 45, Ohio 639.
- hydrogen-ion phenomena in, (69) 26.
- hydrophytic, root development, relation to aeration and water in, (68) 29.
- immunization in, (63) 243.
- imported, for testing, U.S.D.A., (61) 24, 325; (62) 213, 321; (63) 324, 518; (64) 126; (65) 324, 623; (66) 22; (67) 24, 115; (68) 175, 461; (69) 504; (70) 459.
- in arid regions, daily water balance, (69) 189.
- in closed containers, effects, (62) 23.
- inheritance studies, (63) 217.
- injury due to asphalt or tar, detection, (67) 373.
- insect resistance in, (68) 747.
- internal treatment for insect control, (67) 284; (70) 649.
- iodine in, (62) 509; (64) S.C. 617.

Plants—Continued.

- iodine in, effect of iodine manuring, (63) 723.
- iron absorption by, role of lime in, (66) 121.
- iron distribution in, (67) N.J. 508.
- iron in, relation to pH of sap, (68) 175.
- irradiation, compared with animal irradiation, (66) 595.
- landscape and windbreak tests, (69) Fla. 209.
- living, *Calotermes* in, control, (62) 853.
- longevity in, (63) 21; (65) 517.
- lower, sexuality in, (63) 223.
- manganese in, determination methods, (66) 806.
- manganese in, distribution and value, (67) 118.
- mineral constituents, effect of variations in nutrient media, (69) Ark. 781.
- minerals absorbed by, relation to soil problems, (68) 174.
- moisture equilibrium at and below wilting percentage, (63) Ariz. 511.
- monocotyledonous, resistance to *Phymatotrichum* root rot, (69) Tex. 528.
- mosaic-diseased, scolecosomes and similar bodies in, (65) 443.
- motor mechanism, treatise, (66) 518.
- movement of material in, (64) 212; (68) 26.
- new, introductions, list, (66) P.R. 228.
- nickel and cobalt in, (64) 10.
- nitrate, phosphate, and potassium in, field tests, (67) 362.
- nitrogen metabolism, effect of deficiencies, (61) 323.
- nomenclature, treatise, (69) 504.
- noxious, eradication, action of toxic agents, (66) 531.
- nursery, hot-water treatment, (61) 546.
- nutrient ions and enzymic activity, (69) 188.
- of Argentina, fungi affecting, (67) 264.
- of Central Asia, osmotic values, (64) 212.
- of insecticidal value in India, (64) U.S.D.A. 854.
- of Puerto Rico, common and scientific names, (66) P.R. 321.
- oil-bearing and capacity of definite areas for bee population, (70) 659.
- oilseed, studies, (66) 122.
- organic acids in, effect of darkness and light, (63) 123.
- organic acids in, physiology, (62) 24.
- origin of species, effect of earth radiations, (62) Calif. 723.
- ornamental—
 - adaptability studies, (70) Tex. 182.
 - as honey plants, (65) Iowa 153.
 - blooming data, (67) N.J. 524.

Plants—Continued.

- ornamental—continued.
 blooming foliage, fruit setting etc., (63) N.J. 338.
 breeding, (67) Tex. 673.
 cooperative cultural and varietal tests, (65) N.Mex. 227.
 culture, (62) 138, 530; (67) Ohio 525.
 diseases, (61) Miss. 445, N.J. 743; (62) Colo. 52; (68) Ohio 495.
 diseases and control, (67) Fla. 536, N.J. 536.
 effect of electric light supplementing daylight, (69) Ind. 49.
 experiments with, (67) N.Mex. 35.
 flowering, infected with curly top. list, (69) U.S.D.A. 677.
 for home grounds, (61) Va.Truck 740.
 for Panhandle landscape, (66) Okla.Panhandle 143.
 growth in quartz sand, (70) 632.
 importation into Canada, condition, (65) 542.
 insecticides and fungicides for. (67) 565.
 insects affecting, (64) 855; (67) N.J. 561; (70) N.Y.State 803.
 introductions, (63) V.I. 136.
 new diseases, (70) 800.
 phenological data, (61) N.J. 733.
 pollen, effect of sprays, (63) 137.
 propagation, (62) Ohio 42.
 propagation and acclimation tests. (70) Alaska Col. 332.
 propagation of softwood cuttings. (68) 52.
 response to soil reaction, (70) 632.
 soft scale injury to, (63) Mich. 356.
 studies, (62) Can. 524.
 tests, (63) N.Dak. 829; (66) Tex. 35; (67) Fla. 523, Nebr. 524, N.Dak. 673, Tex. 673; (69) V.I. 520; (70) Tex. 182.
 use, (63) Tex. 444.
 varietal and cultural studies, (66) Can. 827; (70) Tenn. 182.
 varieties, (70) N.C. 774.
 winter injury, (66) Tex. 34.
 pectic substances in, (68) 29.
 perennial—
 hardy, for landscape planting, (65) Mich. 642.
 herbaceous, propagation, (61) Va.Truck 740.
 origin, history, and culture, (62) 842.
 treatise, (67) 261.
 variety tests, (65) N.C. 136.
 periodicity in, shifting, (69) 27.
 permeability in, *see* Permeability.
 phosphoric acid in, effect of phosphates. (67) 507.

Plants—Continued.

- phosphoric acid supply of soils, methods for estimation, (69) 328.
 phosphorus compounds and organic acids in, relations, (67) 116.
 photoperiodic adaptation in, (63) 19.
 photoperiodic response to reduction of light, (67) Ohio 36.
 photosynthesis in, *see* Photosynthesis.
 physiological functions, effect of phosphorus and day length, (67) 116.
 plagiotropic growth in, (63) 815.
 poisonous—*see also* Livestock poisoning and specific animals and plants.
 eradication from pastures, (70) 826.
 for goldfish, (67) 51.
 in Australia, fatal dose for sheep, (64) 264.
 in Kansas, (64) Kans. 877.
 in Kenya, (64) 677; (67) 452.
 in New Jersey, (68) N.J. 815.
 in North Dakota, (69) N.Dak. 580.
 in South Africa, (63) 74, 171, 872; (70) 382.
 in Tanganyika, (68) 667.
 in Union of South Africa, (67) 70; (69) 421.
 in Wyoming, (65) Wyo. 176.
 on ranges, (62) Nev. 74.
 range livestock losses from, (68) Ariz. 810.
 to cattle and sheep in Northern Rhodesia, (68) 667.
 to livestock, (61) Utah 69; (65) Ind. 70, Nev. 772; (67) Tex. 740; (70) Tex. 241, U.S.D.A. 526, Ariz. 825, Wyo. 829.
 to livestock in Australia, review, (65) 568.
 polarity in, (68) 744.
 pollination, *see* Pollination.
 polymitotic, studies, (65) N.Y.Cornell 216.
 potassium absorption by, (70) 450.
 potted, nitrogen fertilizers for, (68) Miss. 329.
 precipitin reaction in, (70) 309, 458.
 precocity in, persistence, (63) 520.
 preserving in natural form and color, (70) 602.
 races and varieties, physiological characteristics, (66) 18.
 radioexcitation and radioinjury, (68) 601.
 reaction to soil density, (70) 590.
 relation to cations fully saturating soil exchange capacity, (65) 812.
 relative size attained by shoot and root, (66) 618.
 resistance to—
 insect injury, (64) 747, Kans. 852.
 parasitism and enzymatic activity, (68) 170.
 wilting and drying, (67) 508.
 resistant to cotton root rot, (62) Tex. 637.

Plants—Continued.

- response to—
 - electrical stimulation, effect of temperature, (63) 428.
 - length of day, (62) 611, 612; (70) 26.
 - water deprivation, (67) 116.
- rest period, shortening, (65) 24.
- ringing experiments, (63) 517.
- role of the rarer elements in, (65) 628.
- rubber-producing, in Crimea, (70) 25.
- self absorption by, (70) 455.
- self-sterility and cross-sterility in, (69) 33.
- senescence and rejuvenescence in, (66) 617, 618.
- senescence in, role of magnesium, (62) Vt. 319.
- senile degeneration, old and new standpoints, (66) 432.
- senility in, cause, (69) 26.
- sensitivity to lime in presence of humus and in absence of clay, (66) 519.
- sex chromosomes in, bibliography, (66) 25.
- sex determination in, (62) 726.
- sex in, detecting, (64) Oreg. 338.
- sodium in, (63) 517.
- soil solution as nutrient medium, (62) 23.
- soil-binding, for reclaiming gullies in the South, (69) U.S.D.A. 59.
- solanine determination in, with aid to *Cladosporium fulvum*, (70) 601.
- species hybrids in, (66) 521.
- starting inside for earliness, (61) Okla Panhandle 37.
- starting under glass, treatise, (61) 522
- stimulation in, (61) 626.
- sugar content, effect of manganese deficiency, (70) 597.
- sulfur determination in, Benedict-Denis method, (63) 506.
- summer annuals, growth under cheese cloth, (68) 196.
- susceptibility to parasites, effect of nutrition, (62) 146.
- susceptibility to sulfur dioxide gas, (67) 386.
- susceptible to mosaic, list, (69) 527.
- swelling in and plasmolysis, (69) 187.
- tannin in, state and role of, (66) 319.
- tannin-producing, (70) 25.
- testing, propagation, and distribution, (63) Guam 136.
- tolerance to naphthalene, (61) 545.
- transpiration, *see* Transpiration.
- transport of metabolites and salts in, (69) 188.
- tropic movements, treatise, (66) 518.
- tropical—
 - and subtropical agricultural, treatise, (69) 28.
 - cultivated, diseases and pests, (65) 644.
 - photosynthetic activity relation to water and chlorophyll in leaves, (70) 755.

Plants—Continued.

- tropical—continued.
 - respiration studies, (61) 816; (66) 619, 722.
 - studies, (66) 722.
 - water balance in, (66) 621.
 - two-salt mixture of minimum toxicity for, (63) 516.
 - uptake of mineral constituents, mechanism, (64) 212.
 - uptake of nutritive material by, (67) 661.
 - upward movement of inorganic solutes in, (69) 342.
 - uronic acids and methoxyl in, (69) 494.
 - useful, of warm countries, (66) 22.
 - useful to man, treatise, (70) 25.
 - utilization of adsorbed ions by, (70) Mo. 157.
 - variegated, infectious chlorosis in, nature and transmission, (68) 627.
 - variegated, metabolism in, (66) 19.
 - variegated, studies, (61) 214.
 - varietal differences in, (66) 732.
 - varietal resistance to insect attacks, (69) 71.
 - vegetative propagation, (68) Md. 327.
 - water balance, factor in insect resistance, (63) 748.
 - water loss, effect of foliage sprays, (63) 426.
 - water movement in, (68) 171.
 - water relations, (65) 24.
 - water relations, effect of Bordeaux and oil sprays, (69) Ohio 61.
 - water utilization, (62) 820; (66) 121.
 - wilting, relation to foliar water content, (61) 627.
 - wilting, relation to soil absorptiveness, (62) 122.
 - wilting, soil moisture studies, (62) 614.
 - winter hardiness studies, Chibnall's method, (68) 169.
 - winter hardiness test by artificial refrigeration, (69) Minn. 211, 212.
 - woody, *see* Woody plants.
 - wound compensation, transplantation, and chimeras in, treatise, (70) 458.
 - wound hormones in, (61) 514.
 - X-ray stimulation, (61) 213.
 - yield and composition, effect of different nutrients, (62) 121.
 - zinc essential to normal growth, (62) 619.
- Plasma—
- diffusibility of proteins, (67) 196.
 - pH determination, quinhydrone electrode in, (64) 712.
 - phosphates from birth to maturity, (70) 873.
 - volume in dairy cattle, determination, (66) Mo. 464.
- Plasmodiophora—
- brassicæ, bacteria associated with, (67) 690.
 - brassicæ, notes, (64) 149; (67) 545.
 - solani, description, (69) 816.

- Plasmodiophora—Continued.
 tabaci, role in tobacco mosaic, (61) 242.
 vascularum, life history, (65) 349; (69) 534.
 vascularum spores in sugarcane, development, (67) 549.
- Plasmolysis—
 and permeability to water, course, (69) 187.
 and swelling in plant cells, (69) 187.
 form and time elements in, (68) 599.
- Plasmopara—
 halstedii, notes, (63) 839.
 nivea, notes, (64) 43.
 viticola, conditions of infection, (66) 752.
 viticola, notes, (63) 839.
 viticola oospores, germination and cytology, (66) 752.
- Plastein, nature, (69) 484.
- Plastering and moisture in woodwork, (70) 689.
- Plastids, nature and functions, (65) 119.
- Platanaceae flower and inflorescence, morphology and anatomy, (66) N.Y.Cornell, 619.
- Plataspidinae species, egg parasite of, (63) 359.
- Platinum electrodes in oxidation and reduction reactions, polarization, (68) 289.
- Platyedra—
 gossypiella in Punjab, (61) 253; (65) 655.
 gossypiella, notes, (62) 453, 647; (65) 246.
 new chalcidoid parasites, (62) 861.
- Platyfish, pattern genes in, (66) 818.
- Platygaster hiemalis, notes, (69) 693.
- Platymetopius—
 frontalis, notes, (61) N.J. 751.
 hyalinus, introduction and distribution, (61) 249.
 magdalensis, life history notes, (62) 853.
 magdalensis, transmission experiments of cranberry false blossom, (65) 358.
 spp., food plants, (68) 784.
- Platynota chiquitana, notes, (61) Calif. 351.
- Platyopocilus maculatus, pattern genes in, (66) 818.
- Platysoma punctigerum, studies, (63) 553.
- Plebeius acmon, notes, (64) 54.
- Plectodiscella—
 piri and P. veneta, comparison, (67) 412.
 piri, synonymy, (67) 553.
 veneta, notes, (64) 51; (65) 644; (66) 643; (67) 415; (68) Ky. 211; (70) N.C. 58, 199.
- Plectosphaerella cucumeris, notes, (67) 694.
- Plectospora gemmifera n.sp., description, (61) 237.
- Plectroscelis concinna, biology, (63) 260.
- Plectrothrips, new species, (70) 504.
- Plegaderus nitidus, studies, (63) 553.
- Plenodomus melliloti, notes, (69) 535.
- Pleosphaerulina—
 briosiana, notes, (63) 839.
 zeicola, notes, (67) 694.
- Pleospora—
 attacking Rosa banksiae, (63) 249.
 herbarum, notes, (66) 148.
 herbarum on aster seed, (65) N.Y.State 741.
 mali n.sp., description, (66) 446.
 teres, notes, (63) 245.
- Plesiocoris rugicollis—
 control, (61) 356; (63) 255; (64) 544; (65) 54, 653, 654; (66) 347; (67) 284, 567; (68) 637; (69) 73.
 on black currants, (68) 781.
- Pleuropneumonia—
 contagious, in cattle, (65) 568.
 equine, distemper of dog, and gripe of man, comparison, (68) 377.
 in cattle, (69) 421.
 antigen for complement fixation test in, (61) 570.
 control, (68) 250, 671, 812; (69) 108.
 detection, (65) 567.
 diagnosis, (61) 372.
 infectivity of blood in, (66) 573.
 morphological study of virus, (61) 675.
 studies, (61) 372, 870; (63) 871; (64) 379, 677, 771; (66) 70, 867; (67) 312, 315, 451.
 value of systemic alkalization in, (68) 668.
 in goats of East Africa, (63) 872.
 in goats of Greece, (70) 681.
 notes, (69) Kans. 265.
 role of shelter and feeding practices in, (64) Kans. 879.
 studies, (70) U.S.D.A. 526, 675.
 treatment with sodium bicarbonate, (63) 480.
 virus, growth and metabolism, (69) 108.
- Pleurotropis—
 benefica, notes, (67) 157.
 n.sp., biology, (64) 250.
- Pleximeter, new, (69) 711.
- Plodia—
 interpunctella, see Indian-meal moth.
 study of genus, (69) 390.
- Plow—
 bottom shapes, method of comparison, (67) 175.
 for use in heavy brush land, description, (63) Wis. 81.
 moldboard design, method of analysis, (68) 388.
 stubble, power consumption, (61) 682.
- Plowing—
 accessories, (69) Ind. 116.
 and cultivating in stony ground, (68) Pa. 536.
 and plows, (64) 780.
 depth of, studies, (67) S.Dak. 30.
 electric, in Europe, (67) 609.

Plowing—Continued.

- equipment, experiments with, (64) Ala. 180.
- experiments, (64) Ala. 384.
- fall v. spring, (65) Utah 222.
- in stony ground, accessories for, (66) Pa. 278.
- or listing, fall and winter v. spring, (67) U.S.D.A. 30.
- tests, (66) Va. 579.
- types and costs, (61) Pa. 777.
- types, effect on weeds, (63) 380.

Plows—

- and plowing, (64) 780.
- coverage test in corn borer control, (65) Ind. 182.
- draft, (67) Ohio 75, Iowa 462.
- draft, effect of manuring silt loam soil, (62) Mo. 77.
- draft for corn borer control, U.S.D.A., (63) 581; (67) 755.
- draft tests, procedure, (70) U.S.D.A. 403.
- moldboard, efficient use, (67) U.S.D.A. 755.
- tests, (63) 380.
- tests in Oderbruch soil, (62) 673.
- 2-bottom, value on terraced land, (68) 540.

Plowshares—

- stelliting, (68) Mich. 826.
- treatment by farm smiths, (67) 176.
- treatment with a steel alloy or high speed steel, tests, (65) Mich. 778.

Plum—

- and peach virus disease, (68) Ky. 211.
- aphid, mealy, control, Calif., (61) 352; (67) 559; (69) 71.
- aphid, mealy, life history and control, Calif., (62) 752; (65) 753.
- bacteriosis, notes, (65) 644.
- black knot, notes, (69) 537; (70) Tex. 192.
- borer, American, notes, (70) U.S.D.A. 499.
- brown rot, notes, (63) 839; (64) Okla. 738.
- chlorosis—
 - due to potassium deficiency, (64) 450.
 - lime-induced, notes, (64) 450.
 - treatment, (62) Calif. 745.
- curculio—
 - activity, relation to temperature, (69) 384.
 - bionomics and control, (64) Del. 649, 858; (69) Del. 71.
 - control, (66) 448; (68) 225, Ill. 637.
 - control by burying peach drops, (65) 453.
 - in apples, relation to temperature, (69) 245.
 - in Georgia peach belt, life history, (64) U.S.D.A. 58.
 - larvæ in peach drops, effect of sun, (65) 851.

Plum—Continued.

curculio—continued.

- late, notes, (67) N.J. 560.
- life history and habits, (67) Del. 439.
- life history studies, (63) 751; (64) 239; (66) Del. 550.
- new sheet used in jarring, (66) 456.
- notes, (64) Ohio 650; (69) Mass. 686; (70) U.S.D.A. 498, Ill. 648, N.Y.State 803.
- on apples, activity and control, (68) Mass. 73.
- on apples, control, (61) Conn.State 359; (64) Ill. 850; (65) Mass. 354; (67) N.Y.State 150, 424, Mass. 424; (68) 496.
- on apples, life history, habits, and control, (61) Mass. 454.
- on apples, poison experiments, (63) Mass. 548.
- on peach drops, control, (67) 558.
- on peach drops, disposition, (68) 215.
- on peaches, (64) 59, Ill. 850.
- outbreak in Virginia, (63) 463.
- sex differentiation, (68) 225.
- spraying recommendations, (61) Mass. 849.
- studies, (66) Va. 553; (67) 283.
- survey in southern Illinois, (67) 56.
- cuttings, rooting tests, (66) 333.
- die-back, studies, (62) 444; (64) 352.
- disease, new, (69) 228.
- diseases and insects, control, (62) N.Y. Cornell 740.
- diseases, control, (69) 537.
- diseases, epidemic in Illinois, (67) 410.
- fruit bud differentiation, (63) 138.
- hybrids, self- and cross-sterility in, (69) 804.
- jelly juice, preparation, (68) 275.
- kernels, carbohydrate changes in, (61) Calif. 335.
- leaves, leaching with cold water, (62) 838.
- leaves, transpiration rate, effect of oils, (64) Ill. 540.
- Marianna, as rootstock for peach, (65) Tenn. 840.
- pollen, effect of sprays, (63) 137.
- pollen handling for long distance shipment, (61) 527.
- pollen viability, (61) 527.
- pollen, viability and germination, (69) 804.
- sawfly, biology, (70) 68.
- sawfly, notes, (64) 543; (70) 814.
- scab, notes, (64) 43.
- scale, morphology, biology, and control, (68) 785.
- seedling, notes, (67) S.Dak. 36.
- seedlings, studies, N.Y.State (61) 524; (66) 534.
- seeds, wild, germination and storage, (67) 255.

Plum—Continued.

- stocks for peaches, graft affinity tests, (61) 234.
 tree borer, studies, S.Dak., (61) 53; (63) 50; (64) 653; (67) 50.
 trees, bacteriosis in, (64) 50.
 trees, caterpillar enemies in France, (61) 658.
 trees, Japanese, exanthema in, (67) 414.
 trees, premature mortality, cause, (67) 45.
 trees, winter injury, (69) 537.
 withertip, notes, (63) 451.
- Plumage of Silver Spangled fowls, studies. (63) Conn.Storrs. 520.
- Plums—
 breeding, (62) 139, N.Y.State 431; (66) Ill. 229, 326; (67) Iowa 385, Nebr. 524, Tex. 673; (69) Iowa 48.
 Bruce, culture experiments, (62) Tex. 636.
 Burbank, self sterility in, (69) 804.
 codling moth infestation, (62) 156.
 cold resistance, (70) 621.
 cold storage experiments, (68) 330.
 commercially canned, effect on reaction of urine, (69) Wis. 890.
 culture experiments, (61) N.Dak. 735; (62) Tex. 637; (66) Tex. 35; (67) N.Y.State 681.
 curculio-injured fruits in, (62) Ill. 335.
 dependable, (70) Ohio 184.
 effect of iron sulfate, (61) Calif. 342.
 effect on reaction of urine, (67) Wis. 769.
 fruitfulness in, (61) 526; (67) 135; (68) 620.
 fungi parasitic on, (63) 451.
 greengage, vitamin C in, (68) 861.
 hardy variety, (64) Ark. 439.
 hybrid, pollen germination, (69) 804.
 imported Canadian, wastage types, (67) 411.
 insect pests, (70) Mich. 500.
 landscape and windbreak tests, (69) Fla. 209.
 maturity in, determination, (68) 621.
 Methley, notes, (66) Tex. 34; (68) Tenn. 191.
 named seedlings, description, (69) 799.
 new or noteworthy varieties, (62) N.Y. State 738.
 new seedling, (61) Iowa 338.
 notes, (61) Miss. 439.
 pollen development, (69) 799.
 pollination, (61) Mich. 230, 526; (62) 434, N.Y.State 738; (63) 41, 636; (66) 829; (67) N.Y.State 677; (69) Calif. 47, W.Va. 212; (70) 51, 626.
 preservation in frozen state, (68) 328.
 President, pollination, (65) 41.
 propagation, (62) N.Y.State 431, Can. 524; (64) N.Y.State 440.
 pruning, (64) N.Y.State 440; (66) W.Va. 537.
 root growth, (70) 47.
 Sierra, pest of, (70) 206.

Plums—Continued.

- spray schedules for, (61) W.Va. 442; (65) N.J. 42; (67) N.J. 38.
 storage, studies, (63) 745.
 thinning, (67) 681; (68) Mich. 328.
 thinning, residual effects, (65) Mich. 639.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 trends in purchasing power and cost of production, (66) Mich. 286.
 varieties, (61) N.H. 139, N.Y.State 340; (64) Okla. 738; (65) Nebr. 829.
 blooming time, (69) Ind. 48.
 characteristics, (63) Ohio 637.
 for Iowa, (66) Iowa 139.
 in West Virginia, (62) W.Va. 228.
 new, (66) N.Y.State 534.
 variety tests, (61) N.Dak. 735, N.Mex. 738; (66) Tex. 35, Ga.Coastal Plain 633; (67) Ind. 673, Tex. 673; (69) Ga.Coastal Plain 48, Fla. 209; (70) Ga.Coastal Plain 773.
 Victoria, growth and fruit bud formation, (68) 763.
 Victoria, thinning, (66) 335.
 winter injury, (66) Wash.Col. 741.
 worm pests of, (61) 658.
 yields, (61) Kans. 138.
- Plutella maculipennis, *see* Diamond-back moth.
- Pneumococcus antiserum (type I), curative action in mice, (68) 247.
- Pneumoenteritis in sheep, epizootic in Persia, (68) 673.
- Pneumonia—*see also* Pleuropneumonia.
 among children, relation to nutrition, (61) 392.
 brooder, in baby chicks, (62) Ill. 379.
 brooder, in chicks, relation to pullorum disease, (64) Ill. 880.
 contagious equine, blood pressure in, (69) 580.
 contagious, in sheep, (66) 74.
 cryptococcus, in Equidae, (66) 76.
 in chicks, (64) 478; (66) N.H. 76.
 in foals, Corynebacterium equi in, (67) 169.
 in sheep, (66) 666.
 bipolar organisms in, (67) 744.
 progressive, (61) Utah 69.
 role of sheep nostril fly in, (66) 348.
 verminous bronchial, iodine compounds for, (70) 92.
 in swine, organism isolated from, (63) 76.
 mycotic, of chickens, (68) 820.
 of bovines, (64) 73.
 resistance, relation to vitamin A in liver, (69) 900.
 virus in animals, similarity to influenza and bronchopneumonia in man, (69) 424.
- Pnyxia scabiei—
 in Ohio, (69) 558, Ohio 693.
 notes, (61) Ohio 450, 554; (63) Ohio 50.

- Poa bulbosa*—
 distribution and adaptation, (68) 323.
 studies, (61) 224.
 taxonomic study, (65) 633.
 unproliferated florets in, (66) 733.
- Pod borer, Indian, studies, (66) 759.
- Podalonia luctuosa*, behavior, (61) 756.
- Podisus—
maculiventris, see Soldier bug, spined.
serieiventris in Nova Scotia, biology, (70) 653.
- Podophyllum scoparium*, toxicity, (70) Tex. 241.
- Podosphaera leucotricha*, notes, (65) 345; (67) 410.
- Podosphaeras* in Pomaceae, biology and classification, (61) 215.
- Podsol soils in Québec, characteristics, (61) 206.
- Podsolized soils, studies, (64) 522.
- Poecilocoris latus*, notes, (64) 244.
- Poecilognathos thwaitesii*, biological studies, (61) 557.
- Poeciloscytus basalis*, effect on cotton plant, (62) 655.
- Poecilus lucublandus*, notes, (61) Mich. 359.
- Pogonomyrmex*—
barbatus, see Harvester ant, red.
occidentalis, relation to habitat, (67) 581.
- Poinsettia*, *Diplodia* spp. affecting, (65) Fla. 439.
- Poison—
 acquired, specific, supersensitivity, inheritance, (69) 349.
 bait, dried, use against locusts, (63) 255.
 bait, use for cutworms and grasshoppers, (61) Mich. 450.
 baits for insect control, (64) 358.
 baits for wireworms, field experiments, (69) 84.
 ivy, control by kainite, (69) N.H. 353, 651.
 ivy, eradication, (66) 531.
- Poisonous plants, see Plants, poisonous.
- Poisons—
 effect on fowls, (68) 383.
 effect on mosquito larvae, (67) 55.
 for ants, methods of use, (66) Ariz. 353.
 metallic and nonarsenical, larvicidal effects on mosquitoes, (68) 644.
 nonarsenical, for Natal fruit fly, (67) 426.
- Pokeweed berries, ripe, effect on chickens, (65) 574.
- Polarimeter, half-shadow, illumination, (65) 713.
- Polarity in plants, (68) 744.
- Poles—
 and logs, use in farm construction, (65) U.S.D.A. 479.
 treated and untreated, service records, (70) 107.
- Polia oleracea*, biology, (62) 242.
- Polietes* spp., notes, (63) 553.
- Poliomyelitis*, experimental acute anterior, (70) 92.
- Polistes—
 as pests in bird houses, (62) 547.
canadensis n.v., description, (68) 497.
hebraeus, notes, (61) 357.
- Pollen—
 abortion in species hybrids, (69) 30.
 and nectar plants of California, (66) Calif. 353.
 antagonism in cotton, (67) 227.
 cytology and germinability in small fruits, (61) 427.
 distribution by bees, device to facilitate, (67) 359.
 freezing, effect, (67) 245.
 germination tests in sugar solutions, (63) 446.
 grains of *Glycine* spp., developmental processes, (70) 758.
 handling for long distance shipment, (61) 527.
 longevity and viability, (62) 525.
 morphology and biology, (66) 319.
 physiological research on, (68) 457.
 production in potatoes, (64) 619.
 sterility, genes in corn for, (67) 514.
 sterility in apples, cytological studies, (67) 119.
 sterility of *Collinson* avocado, (62) 842.
 sterility of dwarf apples, (66) 725.
 tube growth and sterility in *Datura*, (61) 24.
 tube growth at various temperatures, (61) 214.
 tube growth in *Datura*, transmission of genes affecting, (68) 745.
 tube growth in diploid and polyploid fruits, (69) 799.
 tubes behavior in self-incompatibility, (67) 514.
 tubes in self- and cross-pollination, behavior, (61) 427.
 viability and fertility in fruits, (61) 526.
- Pollenia—
hasei, studies, (62) 450.
rudis, see Cluster fly.
- Pollens, biological studies, (64) 818.
- Pollination—see also *specific plants*.
 and fertilization of celery, (61) 427.
 by bees, (67) 424, 427.
 by bees, comparative value of colonies, (67) 581.
 by bees, device as aid to, (69) 799.
 effect of sprays, (63) 137.
 effect on fruit yields, (67) Md. 524.
 hand, possibilities on commercial scale, (66) N.Y.Cornell 637.
 of citrus fruits, (62) 436.
 problem in fruits and nuts, (61) 526.
 problem of fruits in South Africa, (65) 40.
 problem, relation to insect population, (64) 755.

- Pollination—Continued.
 problems, (63) Mo. 237.
 self, of staminate plants, progeny resulting, (61) 428.
 stigma as factor in, (63) 236.
 studies, (61) 428, 643; (62) 434, N.Y. State 738, N.Y.Cornell 739; (66) 334; (68) 480; (69) 212.
- Polyarthrititis—
 in lambs, cause, (67) Calif. 595.
 infection in sheep, (69) Calif. 104.
- Polychlorides, tests against *Polyphylla fullo* and *Melolontha hippocastani*, (70) 805.
- Polychrosis—
 botrana, biology, (62) 242.
 botrana in German vineyards, (62) 648.
 viteana, *see* Grape berry moth.
- Polycyrtus, new species, descriptions, (65) 552.
- Polycythemia—
 cobalt, in rats, (69) 754.
 experimental, production with cobalt, (67) 488.
 on milk-iron-copper diet supplemented by cobalt, (68) 129.
 production by inorganic elements, (67) 347.
- Polydactylism—
 dominance in man, (69) 508.
 in man, recessive factor for, (62) 514.
- Polydactyly—
 in fowls, (62) 725.
 in guinea pigs, inheritance, (69) 32.
 in poultry, irregular inheritance, (66) 422.
- Polyembryony—
 in insects, (62) 649.
 in pine, (66) 743.
 relation to delayed implantation in mammals, (65) 218.
- Polygonum lapathifolium*, host of *Puccinia polygoniamphibii*, (64) 43.
- Polyhalite, potash in, availability to plants, (67) Tex. 507.
- Polyhedral diseases of insects, (62) 543.
- Polymastia in cattle, inheritance, (62) 823.
- Polymitotic, a recessive Mendelian factor in corn, (65) N.Y.Cornell 216.
- Polyorphism, carpel, theory of, refutation, (66) N.Y.Cornell 619.
- Polynema—
 eutettixi, notes, (63) N.Mex. 455.
 saga, parasite of leafhoppers, (62) 457.
- Polyneuritis—
 avian, site of biochemical lesion, (68) 867.
 in rats, experimental, (63) 895.
 use of quinoline and glyoxaline derivatives for, (63) 196.
- Polyphylla fullo* tests of larvicides, (70) 805.
- Polyplax—
 serrata, hatching of eggs, (65) 244.
 spinulosa, notes, (64) 237.
 spinulosa, transmission of Mexican typhus virus by, (66) 850.
- Polyploidy—
 in *Sphaerocarpos*, (68) 745.
 relation to cereal crops, (62) 511.
- Polyporaceae of Pennsylvania, (70) Pa. 487.
- Polyporus—
 annosus on conifers, results, (61) 542.
 balsameus, notes, (62) 538.
 gilvus, biology, (62) 150.
 microporus, synonymy, (63) 150.
 schweinitzii, notes, (67) U.S.D.A. 280.
 species and varieties in Pennsylvania, (70) Pa. 487.
 spp., notes, (66) U.S.D.A. 234.
 sulphureus, oxidases in, (67) 49.
 versicolor, notes, (66) Pa. 237.
- Polysaccharides, studies, (63) 310.
- Polyscelis modestus*, seasonal history and morphology, (67) 443.
- Polystictus—
 abietinus, notes, (62) U.S.D.A. 239.
 spp., notes, U.S.D.A., (61) 143; (66) 234.
 versicolor growth, effect of temperature, (69) 680.
- Polythelia* in dairy cattle, Mo., (67) 448; (70) 230.
- Polythionic acids, toxic factors in sulfur, (61) Ohio 444.
- Polythrincium trifolii*, notes, (66) 149.
- Polytrichum commune*, toxicity of nitrates to, (67) 35.
- Pomace flies—
 duration of life, effect of temperature, (61) 358.
 genetic studies with, (62) 822.
 miniature-gamma gene in, mutability, (62) 822.
 notes, (61) Calif. 659; (62) 852.
 variation in mutation rate, (61) 218.
 X-ray experiments, (65) 425.
- Pome family, seedling differences, (67) 37.
- Pomegranate fruit—
 anthracnose, notes, (64) 846.
 spot, notes, (62) 145.
- Pomegranates—
 composition, commercial maturity, and by-products, (62) U.S.D.A. 842.
 vitamin C in, (61) 595; (69) 310.
- Pomoideae—
 chromosome behavior in, (66) 126.
 chromosome relations, (68) 178.
- Pomology, textbook, (66) 333.
- Pomosis, use in ice cream, (67) N.J. 594.
- Poncirus* and citrus hybrids, first generation, ancestral characters in, (68) 748.
- Ponera trigona opacior*, notes, (64) S.C. 653.
- Ponies, inheritance of piebald patterns and wall eyes in, (69) 640.
- Pontia brassicae*, control, (61) 354.
- Poor in Great Britain, adequate nourishment for, (70) 275.
- Pop corn—
 breeding, (67) N.H. 524; (69) Kans. 200; (70) Tex. 173, U.S.D.A. 464.
 culture and use, (70) Mich. 769.

- Pop corn—Continued.
 culture, marketing and popping qualities, (66) U.S.D.A. 225.
 downy mildew, notes, (61) Iowa 344.
 earliness and yield, effect of seed source, (68) S.C. 760.
 experiments, (64) Okla. 733.
 variety tests, Kans., (61) 125; (64) 826; (69) 200.
- Popillia japonica, *see* Japanese beetle.
- Poplar—
 canker, notes, (70) 202.
 Carolina, as prevention for shifting sand, (65) Mich. 742.
 Carolina, nemic fauna of slime flux, (64) 153.
 trees, chlorotic, control, (63) N.Mex. 448.
 tulip, seedling growth, effect of varying amounts of nitrogen, (69) 808.
 yellow, characteristics, growth, and management, (69) U.S.D.A. 808.
 yellow, establishment and survival following clear cutting, (67) 687.
 yellow, nectar secretion, (69) 87.
 yellow, planting v. direct seeding, (66) 437.
 yield tables, (62) 532.
- Poplars, hybridizing project, results, (70) 340.
- Poppies, Iceland, wilt affecting, (61) 347.
- Poppy—
 bacterial blight, (62) 646.
 California, self-sterility in, (66) 143.
 Mexican, feeding tests, (61) 71.
- Population—*see also* Rural population.
 centers of State and number of farms under health inspection, (69) Ohio 127.
 density of insects, effect on rate of reproduction, (68) 779.
 flow, relation to rural and urban economic inequality, (65) 285.
 increase, outlook for, (65) 686.
 movement, back-to-the-land, urban and rural interest in, (69) Mo. 601.
 occupational and residential mobility in the Cotswolds, (69) 444.
 of Iowa, composition and changes, (65) Iowa 87.
 of Missouri, sources, changes, and composition, (70) Mo. 413.
 of New England, American Geographical Society's studies, (61) 283.
 pressure of in India, effects on rural economy, (68) 121.
 problems, paper on, (63) 883.
 trends in Michigan, (69) Mich. 744.
 trends in New York State, (69) N.Y.Cornell 140.
 trends, relation to land utilization, (65) 79.
 trends in United States, treatise, (69) 458.
- Porcellio—
 laevis, affecting mushrooms, (66) Pa. 756.
- Porcellio—Continued.
 scaber, host of nematodes, (65) U.S.D.A. 181.
 scaber, intermediate host of bird parasite, (63) 573.
- Porcupines—
 control in West, (63) U.S.D.A. 350.
 parasites of, (70) 355.
- Poria—
 hypolateritia, notes, (64) 452, 847.
 hypolateritia on tea plant, treatment (65) 241.
 incrassata, notes, (70) 354.
 spp., notes, (65) 537.
 subacida, notes, (62) 538.
- Pork—
 and pork products, international trade in, (62) U.S.D.A. 578; (63) Iowa 589.
 antineuritic value, (61) 390.
 carcasses and fresh pork cuts, market classes and grades, (70) U.S.D.A. 819.
 cheapening cost of production, (70) Ill. 661.
 cost and value, effect of type and grain ration, (61) Ohio 463.
 cost of production, (62) Ill. 386; (64) Ill. 889; (66) Ohio 783.
 cured, cooking, (66) U.S.D.A. 89.
 curing, effect on palatability, (70) N.C. 815.
 curing on farm, (66) Tenn. 460.
 curing with ice, (68) Ala. 657.
 cuts, relative economy, (61) Ill. 691.
 cuts, selection and use, (61) Minn. 789.
 cuts, yield, factors affecting, (61) 257.
 demand for, effect of business depression, (68) 690.
 firm, from light lard-type hogs, (70) Ill. 661.
 firmness, effect of rations, (69) Nebr. 562.
 from barrows and gilts, comparison, (66) Ill. 256; (69) 406.
 in preferred ways, (62) U.S.D.A. 90.
 loin, roasting temperature studies, (70) U.S.D.A. 537.
 preparation on farm, (70) N.Dak. 816.

- situation, (70) 848.

Potato—Continued.

- spindle tuber—
 control, (63) Mont. 744.
 infection experiments, (65) Nebr. 348.
 studies, (61) Kans. 146, Idaho 838; (63) 245, Fla. 644, Nebr. 644.
 symptoms, (64) Nebr. 47.
 transmission, (65) Fla. 439.
 transmission by grasshoppers, (65) 238; (66) 443.
 sprain, studies, (63) 824, 841.
 spraying, efficiency, (70) N.Y.Cornell 791.
 sprouts, amputation of mother-tubers, effect, (64) 220.
 sprouts, feeding to cattle, effects, (63) N.Dak. 870.
 sprouts for production of red scale for insectary, (65) Calif. 756.
 sprouts, growth inhibition by volatile apple products, (66) 723.
 stalk borer, notes, (65) Mich. 153.
 starch and refection, (67) 485.
 starch gels, studies, (66) 201.
 starch, heat of hydration, (67) 357.
 starch hydrolysis, dextrans from, (63) 311.
 starch, properties, (66) Hawaii 201.
 starch, stiffness in fabrics produced by, (61) U.S.D.A. 497.
 stem borer as hop pest, (61) 354.
 stem-end rot, varietal susceptibility, (65) 843.
 stem rot, control, (63) N.C. 646.
 storages, control of air conditions in, (64) 482.
 streak disease, notes, (63) 245.
 sun-scald, factors affecting, (68) 324.
 Synonym Committee, report, (63) 728; (67) 31; (69) 201.
 tip and margin burn, (66) Ark. 542.
 tip and margin burn, relation to insects, (65) 238.
 tuber—
 composition, effect of Phytophthora rot, (67) 696.
 defects at harvest time, causes and prevention, (70) 327.
 defects in western New York, (68) 324.
 defects, relation to millipedes and scab gnats, (69) N.Y.Cornell 72.
 diseases, (64) 148.
 diseases, control, (61) Idaho 823.
 indexing, (68) Mont. 754.
 moth on tomatoes, (66) 760.
 moth, relation to climate, (67) 714.
 rot, cause, (70) 796.
 rot, studies, (64) Tenn. 351.
 wet canker, cause, (68) 206.
 tuber worm—
 control, cultural practices for, (69) 78.

Potato—Continued.

- tuber worm—continued.
 in Uruguay, biology, (65) 655.
 moths, vectors of tobacco blue mold, (64) 158.
 on tobacco, (64) 752.
 studies, (68) Mich. 502.
 tubers—
 and seed pieces, rots of, Me. (68) 487; (69) 372.
 breaking dormancy, effect of sulfur compounds, (68) 757.
 carbon dioxide storage v. breaking dormancy, (70) 612.
 dormancy, effect of sulfur compounds, (69) 341.
 dormancy, studies, (62) Calif. 745.
 dormant, carbon dioxide and oxygen in, (62) Calif. 722.
 dormant, chemical treatments, effect, (62) 225; (69) 507.
 host anatomy and blight susceptibility, correlation, (65) 446.
 infestation by green peach aphid, relation to virus diseases, N.Y. State, (64) 856, 857.
 insect and other injuries, (70) N.Y. Cornell 208.
 loss in weight, effect of prestorage and storage, (68) 325.
 number, shape, and weight, effect of fertilizers, (66) 30.
 pathogenicity of bacteria to, (66) 748.
 rest period, (61) 720.
 thiourea for control of size, (62) 224.
 unmottled curly dwarf, description, (61) Nebr. 841.
 Verticillium wilt in New Zealand, (70) 196.
 Verticillium wilt, notes, (69) Wis. 810.
 virus, combining with tomato mosaic virus, (65) Ind. 144.
 virus, effect on tomatoes, (66) Wash.Col. 749.
 virus, Jimson weed as carrier, (61) Ind. 342.
 virus on peppers, (61) 346.
 warehouse ventilation, (65) Mich. 778.
 wart—
 control, role of sulfur in, (64) 234.
 disease, infection tests, (64) 47.
 disease, test for immunity or susceptibility to, (67) 537; (69) 533.
 fungus, effect of sulfur, (68) 493.
 immune varieties, (62) 223; (64) 234.
 in Belgium, (65) 45.
 organism, new hosts, (67) 536.
 wet rot, notes, (68) 56, 769.
 wilt disease, morphological characters, (70) 491.
 yellow dwarf, notes, (68) Mich. 768.

Potatoes—

- accomplishments of station with, (69) Alaska 36.
- adaptation of types to muck soil and new strains, (69) N.Y.Cornell 38.
- affected with *Synchytrium endobioticum*, biochemical study, (70) 195.
- American varieties, origin, (65) 827.
- analyses, (65) Conn.State 789.
- as best food staple, (62) 223.
- blackening after cooking, (67) 183.
- blue discoloration, (69) 65.
- breaking rest period, (68) 324.
- breeding, (61) Oreg. 26, Utah 27, Va. 726; (62) N.Y.Cornell 731; (63) 224, Wash.Col. 224, Nebr. 627; (64) N.Y. Cornell 623, Wash.Col. 627; (65) N.C. 126, Nebr. 822, 827; (66) 326, Va. 527, N.Y.Cornell 626, Wash.Col. 730; (67) Mo. 378, Iowa 385, N.Dak. 667; (68) Idaho 318, N.C. 468, Colo. 608, Wash.Col. 754; (69) Iowa 37, N.Y. Cornell 38; (70) U.S.D.A. 464, N.C. 762.
- breeding in France, (66) 426.

- disinfecting surfaces, (64) Oreg. 345.
- dried California, composition, (66) 587.
- dried, effect of ingestion, (69) Wis. 890.
- dried, grading, (61) Oreg. 738.
- dried, quality, relation to specific gravity, (67) Calif. 255.
- dried, standardization, (66) Oreg. 39.
- dried, vitamins in, (64) 495.
- effect on reaction of urine, (67) Wis. 769.
- exanthema control in, (66) 343.
- French, seasonal absorption of nutrient salts, (69) 55.
- fresh, improving quality, (64) Oreg. 338.
- grading, flotation system, (64) Oreg. 339.
- harvesting and handling studies, (61) Oreg. 35.
- Italian, variability in maturing, (68) 481.
- laxative principle in, (70) 866.
- maturity and storage studies, Idaho, (63) 239; (68) 328; (69) 214.
- new type of pressure tester for, (67) 392.
- production in Yugoslavia, (62) U.S.D.A. 576.
- quality, effect of irrigation, (69) 659.
- standardization, (61) Oreg. 35.
- storage and maturity studies, Idaho, (63) 239; (68) 328; (69) 214.
- storage experiments, (61) Idaho 831.
- studies, (67) Calif. 526.
- Sugar, biennial bearing habit, (64) Calif. 740.
- sugar in, effect of potassium, (67) 392.
- surplus, utilization, (62) Calif. 489.
- use in confections, (61) Oreg. 89.
- vitamin C in, effect of drying and sulfuring, (64) 789.
- vitamins in, (67) 776.
- Pruning—see also *special trees and shrubs*.
- fruit plants, (63) Kans. 446.
- studies, (69) N.Y.Cornell 53.
- study of water movement in relation to, (65) Oreg. 738.
- treatise, (63) 446.

Prunus—

- rootstocks, cytology, (68) 749.
- silvestris, natural hybridization, (68) 477.
- species crosses, fruit and leaf characters in, (69) 785.
- tomentosa, improvement, (64) 39.
- tomentosa, self-unfruitfulness in, (67) 682.
- trees, souring diseases of, (63) 348.
- Pryeria sinica*, life history, (61) 851.
- Psallus—
- biguttulatus, notes, (70) 210.
- pictipes, notes, (70) 210.
- seriatus, see Cotton flea hopper.
- Pseudaonidia duplex*, see Camphor scale.
- Pseudobalsamia microspora* n.sp., description, (67) 695.
- Pseudocneorrhinus setosus*, notes, (68) 215; (69) Conn.State 546.
- Pseudococcobius terryi*, parasite of sugarcane mealybug, (68) 351.
- Pseudococcus—
- adonidum, see Mealybug, long-tailed.
- boninsis, Hawaiian parasite of, (68) 351.
- brevipes, see Mealybug, pineapple.
- citri, see Mealybug, citrus.
- comstocki, notes, (61) Va. 752; (65) Conn.State 451; (67) 565.
- comstocki parasites, (70) 813.
- gahani, see Mealybug, citrophilus.
- kraunhiaie, biology, (66) Miss. 754.
- lilacinus, notes, (63) 846; (64) 245, 749; (70) 649.
- maritimus, see Mealybug, grape.
- sequoiae, parasite of, (68) 792.
- sp., new encyrtid parasites from Eritrea, (68) 794.
- spp., biological control, (65) Calif. 156.
- spp., studies in Kenya, (68) 784; (70) 655.
- virgatus, new parasite of, (67) 57.
- Pseudodioscosia dianthi*, notes, (66) 152.
- Pseudoepameibaphis glauca* n.g. and n.sp., description, (68) 354.
- Pseudo-fowlpest—
- in Java and avian pest in Philippines, (66) 576.
- proposed name, (61) 74.
- Pseudolynchia maura*, see Pigeon fly.
- Pseudomonas—
- aeruginosa, cause of mastitis outbreak, (67) 167.
- campestris, notes, (64) 448; (65) 345.
- cerasus, production of agglutinins by, (65) 840.
- citri, see Citrus canker.
- citriputeale, notes, (65) 345.
- endiviae n.sp., notes, (67) 694.
- fluorescens, effect on spore forming bacteria of soils, (66) 124.
- fluorescens, notes, (65) 360; (66) 149; (68) Minn. 56.
- hyacinthi, notes, (65) 542.
- malvacearum in cotton plant, development, (65) 646.

Pseudomonas—Continued.

- malvacearum, notes, (62) Fla. 343; (65) 345.
 medicaginis, notes, (66) 147.
 non-liquefaciens, notes, (65) 360.
 oryzae, description, (64) 47.
 oryzae, notes, (69) 225.
 pisi, studies, (61) 240; (67) 405
 pruni, notes, (67) 410.
 pycocyanea, factor in disease of chickens, (64) 77.
 rhizogenes, notes, (69) 811.
 savastanoi nerii n.v., description, (66) 344.
 sesami, Bacterium sesami and B. sesamicola, comparative studies, (69) 67.
 spp., cause of mustiness in eggs, (68) 805.
 suis n.sp., description, (63) 76.
 tumefaciens—
 biological studies and related non-pathogenic organisms, (67) 265.
 culture experiments, (67) 374.
 longevity in soils, (65) 234.
 lytic principle, potency and specificity, (67) 539.
 pathogenic and nonpathogenic strains, (66) 238.
 strains, prevalence in soils, (65) 234.
 studies, (67) 415, 538; (70) 487.
 weed host of, (65) 43.
 utiformica n.sp., description, (67) 146.
 utiformica n.sp. on pears, (69) N.Y. Cornell 61.

Pseudomugil signifer, notes, (64) 247.

Pseudoperonospora—

- cubensis, notes, (61) Mass. 840; (62) 145.
 humull, notes, (62) 532; (63) 451; (64) 230, West Wash. 646; (67) 695.
 humuli zoosporae, action of chemicals on (65) 539.
 urticae, notes, (64) 230.

Pseudopeziza—

- medicaginis, notes, (65) 345; (68) Calif. 490.
 ribis, notes, (64) 151.
 tracheiphila on grape stocks, biology and control, (68) 61.

Pseudopityophthorus, revisional study of genus, (65) 551.

Pseudopregnancy in albino rats, (64) 129.

Pseudorabies—

- and mad itch, identity of viruses causing, (69) 266.
 of dogs in Cairo, (64) 268.
 studies, (70) 677.

Pseudosuccinea collumella as intermediate host for sheep liver fluke, (70) 60.

Pseudosynonycha japonica, biology, (69) 560.

Pseudotelenomus pachycoris n.g. and n.sp., description, (61) 856.

Pseudotuberculosis—

- and tularemia, similarity, (68) 669.
 in guinea pigs, outbreak, (67) 598.

Pseudotuberculosis—Continued.

of sheep, (69) 110.

use of term, (63) 669.

Psila nigricornis as chrysanthemum pest, (69) 558.

Psila rosae, see Carrot rust fly.

Psilocaulon absimile as stock poison, (70) 828.

Psilocephala haemorrhoidalis, notes, (61) Mich. 359.

Psilochasmus oxyurus, notes, (65) 353.

Psilopholis grandis, notes, (70) 202.

Psittaci, exudative typhus or avian plague in, (64) 777.

Psittacidae diseases liable to be confused with psittacosis, (69) 271.

Psittacosis—

in Argentina, (64) 559.

pathology, (70) 528.

studies, (64) 175; (65) 471; (70) 92.

Psocids, outbreak of, (63) 846.

Psorophora columbiae, studies, (69) 82.

Psoroptes ovis, see Sheep scab mite.

Psorosis on tangerine trees, (65) Fla. 438.

Psychophagus omnivorus, notes, (63) 356.

Psychotria carthaginensis, notes, (65) 657.

Psylla nymphs, internal parasite, (64) N.Y.-State 455.

Psylledontus insidiosus, notes, (64) N.Y.State 455.

Psyllia—

mall, see Apple sucker.

pyricola, see Pear psylla.

spp., nematode parasite of, (66) 850.

Psyllidae—

attacked by gall midges, lists, (64) 365.
 studies, (62) 154; (63) 848.

Psyllids—

of California, (67) 423.

South African, new species, (69) 686.

Psyllodes—

affinis, transmission experiments with virus diseases, (61) 651.
 chrysocephala, naphthalene for, (63) 653.

spp., biology, (63) 260.

Pterandrus rosa—

notes, (62) 546; (67) 426.

wintering, (64) 548.

Pteromalus alboannulatus, notes, (62) 545.

Pteronidea—

leucotrochus, biology, (67) 441.

ribesii, see Currant worm, imported.

Pterostichus—

lucublandus, notes, (66) Ill. 245.

madidus, life history and habits, (66) 557.

niger larva, parasite of, (62) 648.

permundus, notes, (66) Ill. 245.

vulgaris, life history and habits, (66) 557.

Pterygophorus analis, cattle poisoning from larvae, (67) 441.

Ptilineurus marmoratus attacking Japanese rush mats, (66) 558.

Ptinus—

raptor in beehives, (63) 846.

Ptinus—Continued.

- tectus, biology, (62) 450; (69) 233.
 tectus, notes, (69) 685.
 tectus on paprika, (63) 846.

Ptochostola microphaella, notes, (67) 714.

Ptychanatis axyridis, biology, (70) 365.

Ptychomyia remota, notes, (64) 460.

Ptychostoma, new genus, erection, (62) 671.

Ptycopoda herbariata, morphology and biology, (68) 786.

Public finance, relation to agriculture, research in, (65) 388.

Public health, *see* Health.

Public relations, policies regarding, (62) 682.

Public speaking, course in, (62) 89.

Publicity, cooperative, papers on, (66) 886.

Publilia modesta, control in orchards, (63) U.S.D.A. 54.

Puccinia—

anomala, studies, (63) 839; (67) U.S.D.A. 266.

antirrhini, studies, (65) 543; (66) 152.

arenariae, notes, (61) 841.

cordiae, notes, (67) 48.

coronata—

avenae, physiologic specialization in, (61) 343.

epidemics, eradication of hosts, (65) 49.

heterothallism in, cytological study, (68) 487.

on oats, cytological study, (61) 239. studies, (65) Calif. 744.

dispersa, microscopic study, difficulty in, (65) Calif. 744.

glumarum—

in Alberta, (65) 537.

notes, (61) Idaho 839; (67) 538, 692.

on rice, (68) 488.

tritici, breeding for immunity to, (67) 693.

graminis—

aecial stage, development, (68) U.S.D.A. 205.

biological forms in northwest Russia, (67) 691.

heterothallism in, (63) 145; (70) 54.

notes, (64) 231; (68) 488.

origin of physiologic forms, (69) 63.

secalis, physiologic specialization, (68) 342.

graminis tritici—

color mutations in, (61) 237.

notes, (65) 345.

physiologic forms, variation, (65) 236.

physiologic resistance to, (64) Minn. 646.

urediospores, tropic response in germ tubes, (70) 792.

helianthi, notes, (63) 47.

heterospora, notes, (70) Tex. 192.

iridis, studies, (65) 542; (67) 556.

liliacearum, notes, (66) 152.

malvacearum, notes, (66) 152.

Puccinia—Continued.

menthae, notes, (64) 43.

mirabilissima, notes, (63) 245; (66) 643.

phragmitis, notes, (64) 43.

polygami-amphibii, host of, (64) 43.

purpurea, notes, (64) Kans. 845; (66) 147.

schroeteri, notes, (61) 349.

sorghi, notes, (63) 839.

sorghi on corn, resistance to, (61) 535; (65) 45.

sorghi, physiologic specialization, (66) 239.

spp., infection conditions, (61) 534; (68) 53.

spp., notes, (61) 445; (62) 147.

spp., pycnia and aecia in, (62) 643.

triticultura—

form XI, nuclear phenomena in, (65) 444.

Heterothallism in, (67) 543.

notes, (63) 47.

physiologic specialization in, (67) U.S.D.A. 692.

Pucciniastrum—

americanum on raspberries, (69) N.Y. Cornell 61.

myrtilli, possible alternate stage, (66) 447.

Puerperal—

hemoglobinemia of bovines, (65) 775.

infection and dietary deficiencies, (66) 897.

septicemia, diet as prophylactic agent, (66) 896, 897.

Puerto Rico—

Insular Station, notes, (62) 600.

Insular Station, report, (62) 99, 199; (66) 299; (69) 909.

scientific survey, (67) 573.

Station, notes, (61) 200; (63) 699; (67) 495.

Station publications, list and analytical index, (63) 698.

Station, report, (62) 796; (64) 399; (66) 599; (67) 638; (69) 158.

Pullet—

egg size, rapidity of increase, (64) West. Wash. 669.

thyrogenous dwarf, description, (64) 728.

Pullets—

all-mash method of feeding, (62) Del. 765.

body size relation to size of eggs, (61) 669.

body weight and age at sexual maturity, relation, (69) 846.

calcium utilization by, (63) 862.

coarse v. fine mash for, (63) Ohio 563.

confinement without succulent green food, (64) Del. 665.

cost of production, (67) Mich. 64. N.H. 613; (68) Mich. 841; (69) Mich. 97; (70) Ariz. 266.

Pullets—Continued.

- cost of putting into lay, (63) N.C. 666.
 effect of cod-liver oil, (69) Ky. 704.
 egg production—
 effect of confinement, (62) Del. 765.
 effect of time laying starts, (62) Mo. 68.
 effect of time of hatch, (64) S.C. 667.
 feeding, all-mash method, (64) Del. 665.
 feeding methods, (70) N.Y. Cornell 815.
 finishing, protein levels, (68) 79.
 free range rearing, (67) N.J. 63.
 from hen v. pullet eggs, (69) Ohio 90.
 growth, calcification, and parathyroids in, effect of fluorine, (70) 373.
 individual laying cages for, (70) N.J. 516.
 labor income and costs, (69) Del. 126.
 laying, effect of management during growth, (69) Ohio 90.
 management, (62) 552.
 mortality in, (69) Calif. 88; (70) 99.
 pedigreed, cost of raising, (66) 862.
 protein requirements, (61) Ind. 365; (63) Ohio 563; (65) Ind. 167, 257; (67) Ind. 588; (69) Ind. 89.
 raising, (61) N.J. 367.
 rations for, (69) Del. 89.
 summer management, (63) Ohio 366.
 summer shelter for, (62) N.J. 80.
 v. yearling hens for egg production, (68) Wyo. 797.
 vitamin A requirements, (69) Tex. 95.
 White Leghorn, feeding methods, (64) Wash. Col. 669.

Pullorin—

- for detection of pullorum infection, (63) 776.
 reaction of fowls to, (64) 775.

Pullorum disease—

- agglutination and intradermal tests, comparison, (65) 73.
 agglutination test—
 constancy, (66) 775.
 intermittent reactors, N.C., (61) 770; (65) 180; (68) 526.
 modification, (64) 775.
 notes, (64) Pa. 177, Kans. 881.
 one-tube, for, (61) Mich. 768.
 rapid, modification, (67) 749; (68) Mont. 811.
 simplified, (62) 670.
 tube method, (64) Mont. 263.
 tube, v. whole-blood test with stained antigens, (70) 102.
 value, (69) 114.
 agglutination tests, comparison, (61) Wis. 173; (64) 76; (67) 603.
 and fowl typhoid, (66) 467.
 and intestinal parasites in poultry, (69) Idaho 865.
 and related diseases of chickens, (63) Ky. 674.
 antigen, production, (65) Ind. 174.
 bacteriology and pathology, (65) 382.

Pullorum disease—Continued.

- carriers, apparatus for testing, (62) 671.
 carriers, detection, (62) Calif. 471; (63) Calif. 175; (64) Ark. 478, Kans. 881; (65) 574; (70) 535.
 chronic, in adult hen, (67) 74.
 chronic, in adult turkey, (68) 678.
 control, (61) 74, 572; (62) 260; (63) 77, N.J. 374, N.Dak. 875; (64) 176, 177; (65) Mass. 375, 567, 870; (66) Idaho 270, 373; (69) Ind. 104; (70) Ill. 674, Ariz. 825.
 control and eradication, (67) 450.
 control and heredity of resistance to, (68) Ill. 666.
 control, short interval testing, (65) N.C. 180.
 detection, (63) Ohio 72; (65) Ohio 475; (70) 676.
 detection, accuracy of three cooperating laboratories, (66) 178.
 diagnosis, (61) Oreg. 69; (62) 471, 565, Calif. 771, 776, 878; (63) Conn. Storrs 169, 375; (64) 75; (69) 280.
 by agglutination and pullorination, (61) 73; (68) 820.
 cloudy reaction in, (62) 775.
 cloudy reaction in, prevention, (64) 564.
 comparison of tests, (66) Ill. 271, Miss. 775; (68) 677.
 modified antigens for avoidance of cloudy reactions, (62) 775.
 stained antigen for rapid whole blood test, (66) 276; (69) 114; (70) U.S.D.A. 526.
 effect of brooding temperatures, (70) 102.
 effect of dark brooding on spread, (61) Ohio 473.
 effect on distribution of first year egg production, (63) 876.
 epizootological behavior, (69) Nebr. 578.
 eradication, (61) Mass. 677; (63) Mass. 577; (65) Mass. 776; (68) Mass. 821; (69) N.H. 420; (70) Mass. 392.
 field test, (66) 276.
 fresh blood agglutination test for, (68) 383, 812.
 hereditary resistance to, (64) Ill. 880; (69) 862.
 importance in poultry industry, (66) 470; (68) Okla. 675.
 in adult fowls, (67) 169, 318; (68) 383.
 in adult stock, transmission, (64) 478, 775.
 in British Columbia, control, (61) 274.
 in chicks, intestinal flora, (67) 318.
 in England, post-mortem examinations, (63) 876.
 in Finland, studies, (67) 604.
 in incubators, control, (61) Kans. 176; (63) 481; (64) Kans. 882; (66) Ill. 271, Kans. 275; (69) Ill. 115.
 in incubators, transmission, (62) 879.

- Pullorum disease—Continued.
 in Japan, (62) 565.
 in New Brunswick, control, (68) 822.
 in pheasants, (62) 171.
 in poults, (62) 170, 472; (67) 459.
 in South Africa, (61) 375.
 in turkeys, (64) 565; (66) 174.
 in young ducks, (62) 671.
 incubator-disseminated, suppression and control, (69) 435.
 infection of leg joints in baby chicks, (68) 677.
 intradermic test for, (63) 776.
 lesions from, (61) 73.
 monograph, (63) Conn.Storrs 820.
 mortality per cent, (67) 604.
 nature, diagnosis, and control, (63) West.Wash. 875.
 new type of pullorin for detection, (63) Wis. 73.
 notes, (61) 70; (63) N.H. 273; (68) 383, 811.
 organism in egg and agglutinins in blood, (70) 248.
 pathology, studies, (61) Ind. 371.
 post-mortem examinations, (61) N.H. 176.
 prevention by disinfecting poultry yard soils, (64) Tenn. 383.
 prophylaxis for, (62) 171.
 rare mode of transmission, (68) 677.
 regulatory work in Oregon, (61) 74.
 relation to hemorrhagic septicemia, (69) 578.
 report of European Conference on, (67) 604.
 resistance and susceptibility, inheritance, (66) Ill. 272.
 resistance to, in crossbreeds, (68) Ill. 603.
 septicemic, in adult fowls, (65) 382.
 studies, (61) Kans. 172, Kans. 173, Mich. 469, 474, Va. 677, Va. 768, N.C. 770, 874, Idaho 874; (62) Ky. 266, Ill. 379, 471, West.Wash. 557, Ark. 874; (64) Mich. 262; (65) 271, Wis. 470; (66) N.H. 76; (67) Mass. 457, N. H. 596; (68) Idaho 375, Ky. 375, Mich. 376; (69) Calif. 104, Mass. 709, Wis. 865.
 summary, (61) Ky. 273; (63) Calif. 77; (68) Mass. 96; (70) Oreg. 686.
 test, bleeding birds to obtain serum for, method, (63) 170.
 test methods, (61) 273; (68) 96.
 test methods, diagnostic efficiency, (67) 459.
 test, slide-method, factors in, (63) 776.
 transmission, (62) 268; (63) 481, 776.
 whole blood test for, (65) Calif. 771.
 Pullus sp., notes, (61) Calif. 351.
 Pulmonary disease, spontaneous in rats, etiology, (64) 479.
 Pulp-timber resources of southeastern Alaska, (61) U.S.D.A. 42.
- Pulpwood—
 crops in Northeast, (63) U.S.D.A. 241.
 growing full stands, (62) 144.
 lands in Northeast, reproduction on, (65) U.S.D.A. 141.
 Pulse complex, basal, (68) 699.
 Pulse seeds, germinating, utilization of atmospheric nitrogen, (70) 456.
 Pulses—
 germinated, vitamin C in, (69) 310.
 in Java, agromyzid flies of, (65) 656.
 Indian, studies, (61) 222; (66) 630; (69) 191, 192, 795.
 Pulverator, tests, (63) N.Dak. 878.
 Pulvex as Natal fruit fly poison, (67) 427.
 Pulvinaria vitis, *see* Maple scale, cottony.
 Pummelo, double, of Banda and Ambon, (62) 529.
 Pumping—
 for drainage in upper Mississippi Valley, costs, (68) U.S.D.A. 386.
 machinery, Ariz., (68) 826; (70) 837.
 machines and their motors, (67) 79.
 plants and wells, economic design, (70) 688.
 plants, drainage, design and operation in upper Mississippi Valley, (70) U.S.D.A. 838.
 plants, economic design, (67) 322.
 plants, irrigation, design, (61) Colo. 276.
 tests, (67) Mass. 385.
 Pumpkin—
 and gourd hybrids, inheritance of factors, (68) 463.
 anthracnose, spread, (68) 57.
 bacterial leaf spot, (62) 849.
 bugs, notes, (67) 559.
 curly top, studies, (70) 635.
 diseases, notes, (66) 147.
 Pumpkins—
 and squashes, crossing experiments, (61) Iowa 339.
 as sugar plant in Russia, (61) 828.
 canning quality, Ind., (67) 523; (69) 48.
 composition, effect of growing season, (70) N.Y.State 774.
 composition, variation in, (66) N.Y.State 533.
 inbred lines, value, (64) Iowa 838.
 insects affecting, (70) Conn.State 893.
 Phytophthora citrophthora affecting, (61) Calif. 341.
 size and shape in, independence of genetic factors governing, (66) 624.
 vitamin C in, (68) 861, 862.
 Pumps, low-lift, (67) Mass. 462.
 Puncture—
 tester for determining canning quality of peas, (64) N.Y.State 440.
 vine in California, (67) Calif. 523.
 vine, new pest in Idaho, (63) Idaho 829.

- Pupipara—
of China, (65) 546.
ricketsia-like microorganisms from,
(68) 64.
- Purchasing, cooperative, (66) 887.
- Purdue University, notes, (61) 395, 598;
(63) 398; (65) 798; (66) 696; (67) 95;
(69) 159.
- Purine compounds produced by rotting in
plant organisms, (67) 661.
- Purslane, water requirements, (65) 128.
- Putnam's scale—
control, (64) Wash.Col. 654.
dormant spray experiments for, (66)
Wash.Col. 756.
- Pyagra spray, insecticidal value, (66) S.C.
654.
- Pycnanum ponderosum, bionomics, (66) 758.
- Pycnaulacus, new genus, erection, (62) 860.
- Pycnoscelus surinamensis, *see* Roach, Suri-
nam.
- Pyelonephritis of cows, (63) 372, 874.
- Pyloric obstruction in rats, (70) 569.
- Pyobacillosis of sheep, (61) 374; (64) 74.
- Pyocyanine—
formation of semiquinones as intermedi-
ary reduction products from, (67)
197.
potentiometric study, (65) 202.
- Pyogenic infection of sheep, cause, (66) 573.
- Pyometra in bitches, (66) 174.
- Pyralinae, Japanese, paper on, (61) 55.
- Pyrameis cardui as agricultural pest in
Hungary, (62) 241.
- Pyrausta—
ainsliei, *see* Smartweed borer.
nubilalis, *see* Corn borer, European.
penitalis, life history studies, (61) Iowa
354.
- Pyraustinae, Japanese, notes, (67) 286.
- Pyrenopeziza medicaginis, notes, (68) Calif.
491.
- Pyrenophora teres, notes, (67) 538.
- Pyrethrin—
and rotenone, relative toxicity, (68)
216, 638.
for control of verminous bronchitis of
bovines, (66) 469.
in pyrethrum flowers, (66) 554; (70)
Colo. 53, Tenn. 151.
I and II, insecticidal value, (62) 244.
sprays for greenhouse pests, (67) 558.
use of term, (70) 205.
- Pyrethrum—
active principles, new solvents for, (62)
851.
and soap, incompatibility, (63) 749.
- Pyrethrum—Continued.
and soap sprays, use against Mexican
bean beetle, (66) Conn.State 761.
as mosquito larvicide, (64) 160; (65)
656, N.J. 847; (68) 789.
comparison with other insecticides, (64)
854.
cultivation in England, (65) 547.
culture, (64) Tenn. 341; (65) Tenn.
830; (70) Ill. 609.
culture, effect of acetic acid, (66) Ky.
137.
dust for cabbage worms, (70) Mich. 809.
dust, tests, (69) Mass. 687.
emulsion spray, experiments, (66) 348.
emulsion sprays and dust, tests, (67)
284.
estimation of pyrethrin in, (62) 244.
experiments, (63) 251.
extract, concentrated, manufacture, (68)
638.
extract, effect on wireworms and in-
fested plants, (63) 463.
extracts for control of *Lygus* and *An-*
testia, (68) 784.
extracts, insecticidal value, (67) Va.
Truck 150.
extracts, permanence of toxicity and sta-
bility of emulsions, (66) 348.
extracts, petroleum distillates as bases
for, (69) 551.
fields of Dalmatia, account, (69) 683.
flowers, pyrethria in, (66) 554; (70)
Colo. 53, Tenn. 151.
flowers, use as insecticide, (70) 650.
for control of *Mineola scitulella*, re-
sults, (68) 357.
grades, relative insecticidal value, (63)
U.S.D.A. 748.
insecticidal value, (61) N.J. 751, 849;
(65) 547; (69) N.J. 383; (70) Mo.
206.
kerosene extracts, (65) 851.
kerosene extracts, estimation, (64) 854.
kerosene extracts, insecticidal efficiency,
(69) 824.
location of potent principle, (66) 347.
plants, spacing, (68) Tenn. 191.
powder for control of lice and sheep
ticks in winter, (69) Mich. 581.
powders, extractive efficiency of kerosene
on, (69) 74.
powders, pyrethrin I content as index
of insecticidal power, (66) 449.
products, toxicity, effect of soap on, (65)
51.
propagation and culture, (63) Tex. 444.
soaps, insecticidal value, (61) Md. 655.
solutions for determining insects on golf
greens, (70) 499.
spacing and propagation, (70) Tenn.
182.
spray fluid, preparation, (62) 448.
spray, insecticidal value, (66) S.C. 654.
spray, notes, (66) 347.
sprays for cranberries, (66) Wash.Col.
757.

- Pyrethrum—Continued.
 sprays for leaf tiers, (68) Ill. 637.
 sprays for raspberry beetle control, (64) 754.
 sprays, insecticidal value, (64) Wash. Col. 655.
 sprays v. nicotine sulfate sprays for bean jassid, (65) Fla. 451.
 studies, (69) 235.
 tests, (61) 354, Hawaii 723; (69) V.I. 520.
 undiluted paraffin extract, field spraying of coffee trees with, (69) 551.
 vapors, effect on insects, N.J., (63) 352, 353.
 vapors, toxicity to honeybees, (63) 555.
 white oil extract, insecticidal value, (61) N.J. 750; (65) 55.
- Pyrethroids and pyrethrometric measurements, (66) U.S.D.A. 810.
- Pyridine—
 and nicotine, gaseous, relative toxicity to confused flour beetle, (68) 505.
 and quinoline-carboxylic acids, condensation with amino acids, (65) 710.
 derivatives, insecticidal action, (63) 547.
 soil treatment with, (62) 245.
 solution, oxygen equivalent, (63) 503.
 toxicity to mosquito larvae, effect of pH, (64) 56.
- Pyridylpiperidines, isomeric, and neonicotine, (65) 547.
- Pyrilla spp., notes, (67) 286.
- Pyrites, cupriferos, treatment of soils, effect on plant growth, (64) 325.
- Pyrocalciferol—
 properties, (67) 201.
 use of term, (66) 709.
- Pyroderces—
 falcata, notes, (62) 542.
 rileyi, notes, (63) S.C. 752.
- Pyrogallol alkaline solutions, carbon monoxide from, (64) 609.
- Pyroligneous acid as soil disinfectant, (67) Mass. 399, 540; (69) Mass. 663.
- Pyronine, effect on agglutinin titer in abortion infected cows, (69) 108.
- Pyrophosphoric acid, separation and determination, (61) 501.
- Pyrrolidine derivatives, insecticidal action, (63) 547.
- Pyrus, chromosome balance in, primary and secondary, (66) 521.
- Pyruvic acid—
 and vitamin B₁ deficiency, (69) 902.
 determination, (62) 205; (68) 730.
- Pythiaceae structure and phenol coefficient study, (67) Ohio 43.
- Pythiacystis citrophthora—
 cause of germination loss of pine seeds, (64) 848.
 mycelium, enzymes of, (61) 237.
 notes, (66) 752; (67) 47.
 treatment, (65) 351.
- Pythium—
 aphanidermatum, notes, (61) 45; (63) 147; (66) 147.
- Pythium—Continued.
 aphanidermatum on Opuntia, (65) 240.
 arrhenomanes, notes, Mo., (63) 742; (66) 338.
 artotrogus, notes, (64) 848; (69) 531.
 butleri on beans in shipment, (69) 813.
 debaryanum, control, (66) P.R. 237.
 debaryanum pelargonii, notes, (61) 46.
 graminicolum n.sp., description, (62) 535.
 growth curves, (69) 187.
 intermedium, notes, (61) 46.
 irregulare n.sp., description, (61) 46.
 mamillatum n.sp., description, (67) 697.
 megalacanthum, notes, (61) 46; (64) 744.
 root rot in Hawaii, (67) 272.
 root rot, notes, (62) 146.
 root rot of corn and sugarcane in Philippines, (68) 627.
 root rot phase of Labaina growth failure, (63) 148.
 sp., hydrolytic action on pectin, (64) 7.
 sp., notes, (62) Mo. 47; (67) 265.
 splendens, notes, (61) 46.
 spp., cause of germination loss of pine seeds, (64) 848.
 spp., notes, (63) La. 545.
 spp. on rice, (70) 348.
 spp. on sugarcane, (63) La. 341.
 strains, comparative virulence for confers, (66) 242.
 tracheophilum on lettuce, (70) N.Y.-Cornell 791.
 ultimum, notes, (64) 848; (66) Ohio 749.
- Quack grass—
 control, (61) Mich. 34, Miss. 436, Ohio 640; (63) Idaho 523, N.Dak. 821, Ohio 824; (64) Oreg. 335; (65) N.Dak. 39, Iowa 125; (66) Ill. 221; (67) Ohio 30, N.Dak. 667; (68) Mich. 319, Wyo. 755; (69) Oreg. 354; (70) Ill. 609, Wyo. 763.
 control in potato fields, (65) Mich. 496.
 eradication, (63) S.Dak. 31.
 treatment with chlorates, optimum time, (65) 635.
- Quadruplets—
 bovine, (66) 525.
 human, incidence, (64) 329.
- Quail—
 as source of tularemia in man, (61) 871.
 Bacterium tularense from, (69) 271.
 bobwhite—
 disease affecting, (69) 864.
 habits, preservation, and increase, treatise, (65) 544.
 host of spirurids, (65) U.S.D.A. 182.
 in Ohio, abundance and conservation, (69) 381.
 in Ohio, helminths and coccidia from, (69) 268.

Quail—Continued.

bobwhite—continued.

of Wisconsin, nesting and life equation, (70) 355.

wintering in Wisconsin, (69) 682.

Eimeria spp. affecting, (62) 267; (65) 876.

gambel, progress report, (70) Utah 498. in Wisconsin, (67) Wis. 704.

nematode parasites of, (63) N.J. 375. of California, (65) 352.

Oklahoma, winter food, (67) 281.

parasite of, (63) 77.

propagation, (66) 846.

restoration in Massachusetts, (70) 355.

severe epizootic on, (63) 573.

studies, (65) Wis. 449.

toxicity and palatability of *Crotalaria* seed, (69) Fla. 248.

typhoid in, (67) 455.

value to potato grower, (62) 351.

winter, study, (69) 824.

Quarantine, early, in Puerto Rico, (68) 215.

Quarantines—

against cotton pests, enforcing in Mississippi, (62) 650.

and work of Kansas Entomological Commission, (61) 354.

Quartz, crushing and fine grinding, (69) 323.

Questionnaire response, stability in, (66) 586.

Quince—

curculio, control, (66) N.Y.State 552.

curculio on pears, control, (68) N.Y. State 637.

diseases and insects, control, (62) N.Y. Cornell 740.

fire blight, control, (65) Tenn. 840.

fire blight, overwintering and modes of infection, (61) Mich. 448.

fire blight resistant varieties, (65) 351. overgrowths and hairy root on nursery stock, (65) 48.

raw and cooked, vitamin C in, (68) 861.

rust on apples resistant to cedar rust, (65) Tenn. 840.

stocks, field propagation, granulated peat moss in, (67) 249.

stocks, rooting, (66) N.Y.State 535.

Quinces—

cold resistance, (70) 621.

pollination requirements, (65) 41.

varieties, (61) N.Y.State 340.

Quinhydrone-collodion electrode, description, (67) 202.

Quinhydrone electrode—

accuracy, effect of manganiferous soils, (61) 203.

adaptability to cereal work, (63) 112.

applicability to unsaturated acids, (64) 10.

drift in potential, (61) Ohio 418.

for pH determinations, (61) 309.

improved form, (63) 413.

Quinhydrone electrode—Continued.

inaccuracy in Kentucky soils, (64) 717.

role in determining keeping qualities of milk, (61) Mass. 867.

use in pH determination of blood serum and plasma, (64) 712.

Quinine—

action on *Bacillus abortus*, (65) 869.

action on bovine uterus, (65) 869.

action on metabolism of glucides by *Aspergillus niger*, (70) 29.

adsorption by fuller's earth and norit, (61) 12.

effect on toxicity of strychnine, (66) 411.

nephelometric determination, new reagent, (61) 204.

Quinizarinsulfonic acid as precipitating reagent, (63) 11.

Quinoline—

and pyridine-carboxylic acids, condensation with amino acids, (65) 710.

derivatives, antineuritic properties, (63) 196.

Quinones, action on proteins and amino acids, (64) 501.

Rabbit—

blood, serum calcium in, variations, (70) 229.

cottontail, new primary host of liver fluke, (70) 250.

diseases and their post-mortem inspection, (70) 393.

diseases, summary, (66) 472.

embryo, growth, effect of breed, (65) 725.

hutch, treatise, (62) 164.

liver, glycogen extraction from, (65) 202.

meat, composition, (67) 620.

myxoma, (62) 558.

ova, living developing, cinematographs, (62) 424.

ova, living, studies, (65) 28.

pox, pandemic, (70) 393.

recipes, (64) U.S.D.A. 91.

semen, pH value, (61) 821.

spermatozoa, effect of temperature on survival, (64) 728, 729.

stomach worm, life history, (67) 461.

tick, transmission of Rocky Mountain spotted fever by, (70) 69.

wild, *Microfilaria* from blood, (66) 671.

Rabbits—

acquired resistance to intestinal nematode by repeated infection, (68) 826.

and hares, crossing experiments, (64) 728.

Angora, treatise, (69) 572

Angora, wool production, (66) 166.

Angora, wool yield, effect of cod-liver oil and minerals, (62) 462.

as experimental animals for calcium and phosphorus determinations, (67) 296.

as insectivorous animals, (63) 650.

black pigment production, (64) 530.

Rabbits—Continued.

- blood group inheritance in, (69) 195.
 blood groups in, (69) 510.
 body color and eye color, genetic relation, (69) 509.
 breed variability in, (69) 787.
 breeding, feeding, and development of skin and hair, (70) U.S.D.A. 518.
 breeding, handbook, (67) 420.
 brown-and-black, characteristics, (63) 220.
 castorrex, linkage studies, (62) 623.
 chinchilla, hereditary variation of, (68) 317.
 composition of carcasses, (69) 572.
 different color races, Dopa reaction in, (63) 431.
 effect of alcohol on germ cells, (69) N.Y.Cornell 35.
 embryo size, effect of breed, (66) 422.
 experimental coccidiosis of, (65) 73.
 eye defects in, (62) 217.
 feeding and management, (68) Mich. 364.
 feeding experiments, Mich., (66) 462; (67) 64.
 feeding experiments with damaged sweetclover, (63) N.Dak. 871.
 fertility in, inheritance, (68) 746.
 for food and fur, treatise, (65) 663.
 frozen, yellowing of abdominal fat, (67) 587.
 furless, (69) 641.
 genetics and sex physiology, bibliography, (66) 219.
 genetics of, (64) 530; (68) 751.
 glutathione concentration and hereditary body size, (69) 787.
 growth rates and racial size, (68) 318.
 hair eating in, (67) Fla. 620.
 helminth parasites, (66) 776.
 immature, effect of phyone injections, (69) 643.
 immunization, (68) 526.
 immunization to *Brucella abortus*, (70) 675.
 infected with fixed rabies virus, specific antibodies in serum, (65) 568.
 infected with *Taenia serrata*, skin reactions in, (66) 671.
 injury to forest trees, (67) N.H. 533.
 Jack, life histories and ecology, (70) Ariz. 203.
 lilac, rexing, (69) 509.
 myiasis in, (66) 776.
 naked, a recessive mutation, (62) 28.
 new disease in, (68) 97.
 nutritional requirements, Mo., (63) 758; (66) 355; (67) 445, 480.
 on barley or alfalfa, effect, (68) 797.
 origin of races, (62) 822.
 ovulation, effect of urine injections from pregnant women, (63) 222.
 ovulation in, (63) 432.
 ovulation mechanism, (64) 128; (67) 28; (68) 607.
 pigment formation in, (63) 818.

Rabbits—Continued.

- pigmentation of fur, effect of thyroid, (66) 728.
 production, papers on, (64) 766.
 protection of fruit trees from, (61) Ohio 836.
 raising, (63) N.J. 267; (70) U.S.D.A. 498.
 raising and marketing, (68) 369.
 repellents against, (62) 228; (70) Mich. 801.
 rex type, linkage relations, (62) 623.
 size inheritance in, (62) 323; (68) 751; (70) 758.
 size, inheritance, relation to sulfhydryl concentration, (69) 509.
 snowshoe, *Bacterium tularense* in, (65) 267.
 snowshoe, in western Canada, abundance, relation to helminth parasitism, (69) 382.
 stock, pseudotuberculosis in, (64) 777.
 treatise, (69) 847.
 variations in skull, inheritance, (68) 317.
- Rabies—
 complement fixation reaction in, (63) 771.
 control in Japan, (61) 372.
 experimental, of rabbits, (69) 579.
 immunization, (64) 267; (67) 451.
 in Bengal, (68) 90.
 in dogs, immunization, (65) 674.
 in South Africa, (69) 420; (70) 382.
 papers on, (63) 872.
 protective inoculation of domestic animals against, (66) 466.
 research, (70) 675.
 summary, (62) 875.
 vaccine, chloroform-treated, value, (64) 562.
 vaccine, notes, (64) Ill. 877; (67) 450.
 vaccines, experimental studies, (62) Ill. 376; (63) 75.
 virulence, sources, (62) 564.
 virus, intraplantar inoculation, (63) 771; (66) 867; (67) 451.
 virus, viability in raw and in pasteurized milk, (70) 675.
- Rabies-like disease in dogs, (63) 872.
 Race classification, serologic, laws, (66) 523.
 Raccoon dog, spermatogenesis, (66) 818.
 Radiant energy, physiological effects, (69) 897.
 Radiation—*see also* Solar radiation.
 sources and characteristics, (67) 90.
 Radiations from quartz mercury vapor lamp, effect on plants, (61) 515.
 Radiators—
 direct steam, heating efficiency, (65) 297.
 enclosures and shields for, (62) 674.
 types, effect on air temperatures in room heating, (62) 884.
- Radio—
 Research Board of Australia, report, (69) 495.

Radio—Continued.

- use by land-grant institutions, (63) 485.
- waves, effect on insects, (69) 685.
- waves, effect on insects and plants, (65) 454; (67) N.J. 560.
- waves, effect on insects in stored products, (65) 652.
- waves, effect on internal temperatures of insects, (69) 230.
- waves, high frequency, effect on insects, (61) 655.

Radioactive substances, effect on vitamins, (67) Mo. 480.

Radioactivity—

- and plant propagation, (66) 217.
- effect on plants, (65) 119.

Radiomorphosis, use of term, (61) 515.

Radiosensitivity of *Vicia faba*, (65) 26.

Radish—

- bacterial spot, (67) 548.
- mosaic, notes, (63) 44.
- roots, morphology and anatomy, (63) 138.

Radishes—

- bud pollination, (70) 616.
- change in ash content during storage and cooking, (61) Kans. 190.
- effect of phosphorus, (64) Ark. 438.
- effect of potassium deficiency, (61) N.H. 116.
- fertilizer experiments, (63) Ill. 534.
- photoperiodic and temperature responses, (68) 329.
- production under Vitaglass, (65) Mass. 339.
- seed production, effect of fertilizers, (63) Mich. 41.
- subjected to intermittent drying, modifications of reserve functions, (70) 27.
- top-root ratio, studies, (61) 522.
- variety tests, (68) Okla. 616.
- vitamin C in, (68) 861.
- yields under ultra-violet glass, (61) 834.

Radium—

- effect on metabolism of bacteria concerned with cycle of nitrogen, (66) 421.
- effect on *Nicotiana*, (62) 215.
- effect on seed germination, (67) 20.
- emanation, effect on microsporogenesis of lilies, (66) 624.
- irradiation of *Drosophila*, mutations from, (62) 214, 621.

Raffinose, enzymic synthesis, (65) 310.

Rafters, laminated bent, tests, (67) 324; (70) 262.

Ragi—

- enzyme, saccharifying power, (63) 311.
- genetic studies, (69) 784.
- inheritance of characters in, (67) 25; (69) 29.

Ragweed—

- control, (66) Tex. 28; (69) U.S.D.A. 651.
- disease, notes, (70) Tex. 192.
- giant, host of stalk borer, (66) W.Va. 554.

Ragweed—Continued.

- great, chemical composition at various stages, (65) 629.
- pollen, allergically active substance in, (67) 199.

Ragwort—

- blue stem borer injury, (67) 154.
- chemical control, (62) 635.
- control by spraying, (65) 533.
- control through insects, (62) 247.
- eradication, (62) 431.
- poisonous to cattle, (62) 876; (69) 581.

Rahar wilt—

- and leaf spot, notes, (68) 769.
- notes, (64) 230; (65) 441.

Raillietina—

- cesticillus, notes, (63) 573; (67) 746.
- comparative investigations, (62) 548.
- magninumida* n.sp., description, (63) 573.
- magninumida*, notes, (70) 248.

Rain forest in Panama, general and successional ecology, (61) 531.

Rain water—

- composition, (66) 312.
- composition at Geneva, N. Y., (67) N.Y.State 220.
- in Western Australia, salinity, (64) 516.
- nitrogen in, (66) Okla.Panhandle 517.
- soil nitrogen income from, (64) Okla. Panhandle 521.

Rainfall—see also Precipitation.

- amount from hourly records, (66) 509.
- and crop yields in Transvaal, (64) 14.
- and deforestation, relation, (66) 207.
- and forests, (64) 806.
- and forests in Japan, relations, (62) 232.
- and frost data, (65) Utah 299.
- at Los Angeles, 1850 to 1877, (67) U.S.D.A. 10.
- British, long-range predictions, (65) 509.
- characteristics, relation to soils and runoff, (62) 409.
- chart of the world, new, (63) 713.
- desert, (69) 14.
- effect on—

- barley yield, (65) 223.
- corn yields in Kansas, (65) 510.
- sirup production in sorgho, (61) Ark. 828.
- spring- and autumn-dressed wheat, (66) 735.
- strawberries, (65) Ala. 434.
- forecasting, long range, (62) 409.
- maps of Wisconsin, (62) 409.
- measurement in agricultural climatology, (67) 210.
- monthly, maps of Wisconsin and adjoining states, (63) 416.
- of Malta and long-period forecasting, (69) 178.
- of New England, (63) 713.
- of North America, 1881-1930, (68) 732.
- of northern New England, tables, (61) 205.

Rainfall—Continued.

- of Ohio, 1930, and corn and hay yields, (65) Ohio 481.
- of southern Rhodesia, (67) 108.
- of Western Cape Province, (68) 587.
- on valley floors, water supply from, (61) 475.
- origin and fate, (64) 15.
- past, deduced from growth rings of long-lived trees, (70) 301.
- predictions for California, 1931-32, (68) 158.
- relation to grape leafhopper outbreaks, (66) 555.
- relation to mosquito control, (64) 160.
- reliability in Australia, (68) 158.
- seasonal, over Europe, distribution, (62) 114.

Raininess charts of United States, (69) U.S. D.A. 332.

Rains, heavy summer, erosive effects, (68) Wash.Col. 101.

Raisin moth, notes, (70) U.S.D.A. 499.

Raisins—

- effect on urinary acidity, (68) 562.
- lye dip, effect of oils in, (62) Calif. 786.
- production, (69) 883.
- sales and prices, factors affecting, (66) Calif. 788.
- use in candy and ice cream, (64) 282.

Ram, hairless, account, (66) 820.

Ram—

- fiber-yielding plant, (61) U.S.D.A. 729.
- process of extraction, (62) Calif. 727.

Ramphastos brevicarinatus, life history in Canal Zone, (62) 240.

Rams—

- aged, effect of diet and hormones on mating desire, (70) Mo. 171.
- breed, factor in lamb production, (66) W.Va. 561.
- dehorning, (63) Ohio 72.
- foul sheath infection, (69) Idaho 865.
- function of dartos muscle, (70) Mo. 171.
- of different breeds for producing market lambs, (61) 259; (69) Calif. 88.
- Romney, analysis of fleeces, (61) Calif. 260.
- selection, (62) 550.
- swelled-head in, (62) 167.

Ramularia—

- areola, notes, (62) 145; (65) 646.
- sp., notes, (66) 643.
- vallisumbrosae, notes, (68) Oreg. 213.

Ranch industry on Great Plains, growth and decline, (64) 276.

Ranches—

- management, success in, (70) S.Dak. 699.
- mountain valley, of Wyoming, cattle production on, (70) Wyo. 699.
- organization and management, (63) N.Dak. 884.
- organization and operation in northern Great Plains, (61) U.S.D.A. 581.

Ranches—Continued.

- planning for greater profit, (63) Tex. 682.
- types and operating practices, (65) Mont. 583.

Rancidity—

- chemical studies, (69) Minn. 167; (70) 8.
- light factor in, (68) 125.
- photochemical action as cause, (68) 698.
- studies, (67) 359.

Range—see also Grazing.

- and forest resources of Utah, (64) U.S. D.A. 343.
- carrying capacity, (70) Tex. 220.
- caterpillar in New Mexico, natural control, (69) 830.
- caterpillar, New Mexico, parasite of, equipment and methods of rearing, (69) 836.
- caterpillar, notes, (70) U.S.D.A. 499.
- cattle, see Cattle, range.
- conditions in Wood Buffalo Park of Canada, (69) 681.
- ecology, symposium on, (67) 124.
- forage, Arizona, nutritional deficiencies, (70) Ariz. 814.
- grasses, see Grasses.
- grasshopper problem, (68) Ariz. 782.
- herds, calf crop in, (66) 467.
- improvement, (67) N.Dak. 667.
- industry, publications useful to, (62) U.S.D.A. 160.
- land in public land State, factors affecting use, (69) U.S.D.A. 601.
- land investigations, (65) Can. 825.
- lands, St. Johnswort affecting, (64) Calif. 737.
- lands, western mountain, artificial reseeded, (66) U.S.D.A. 326.
- livestock producer, problems, (65) 253.
- livestock projects, (63) 361.
- management, studies, (70) Tex. 265.
- nutrition in California, (65) 254.
- operations, (70) U.S.D.A. 632.
- plants, harmful, control, (70) Tex. 241.
- plants not poisonous to livestock, (61) U.S.D.A. 70.
- plants, poisonous, see Plants, poisonous.
- plants, tests, N.Mex., (67) 29; (69) 200.
- reseeding tests, (61) Utah 27.
- resources of San Luis Valley, (61) Colo 512.
- sheep production in Arizona, (64) Ariz 891.
- studies, (68) Ariz. 753.
- utilization research in northern Great Plains, (65) 253.
- vegetation, effect of climate, soil, and grazing, (70) Ariz. 761.
- vegetation, effects of systems of grazing, (66) Colo. 26.

Ranges—

- effect of climate, (63) N.Mex. 611.
- of New Mexico, artificial reseeded, (65) N.Mex. 32.
- plant succession on clay soils, (66) 720,

Ranges—Continued.

- reseeding experiments, (68) Utah 183.
- soil and plant cover relation to run-off and erosion, (66) 315.
- spring-fall, in Utah, effect of heavy grazing and of burning, (68) 183.

Ranikhet disease—

- in India and avian pest in Philippines, (66) 576.
- of fowls, (66) 371, 374.

Rape—

- and alfalfa pasture for pigs, (61) Mich. 459.
- and other forage crops, comparison, (63) Pa. 662.
- black rot, notes, (66) 147.
- feeding value for pigs, (66) W.Va. 564.
- for summer pasture, (64) Oreg. 369.
- oil, effect on iodine index of pig's fat, (70) 224.
- pasture for pigs, (61) Oreg. 61; (63) S.Dak. 62, Mich. 559; (64) Oreg. 370.
- pasture for pigs, protein supplements, (62) Ohio 763.
- pasture, full and limited feeding for pigs, (67) Ohio 592.
- v. alfalfa pasture for pigs, Mich., (64) 255; (65) 164.
- varieties of Japan, varietal distinctions, (68) 612.

Rapeseed press cake, decomposition, (70) 592.

Raphanus—

- and Brassica hybrids, sexual incompatibility, (69) 508.
- growth curves, (69) 187.

Raritan River pollution, studies, (62) N.J. 572.

Rasmussen, F., necrology notes, (67) 192.

Raspberries—

black—

- and red, virus disease susceptibility, (64) West.Wash. 645.
- breeding, (67) Iowa 385.
- control of virus diseases, (64) Ohio 644.
- cost of production, (67) Ohio 36.
- disease free variety, (66) N.Y.State 543.
- elongation of canes, factors affecting, (65) 231.
- fertilizer experiments, (63) Mich. 537.
- growth and fruit production, effect of fertilizers, (67) 530.
- hybridization, (69) Iowa 48.
- inbreeding studies, (63) Conn. State 635.
- industry, production and economic survey, (64) Md. 541.
- layering, (62) Ohio 41.
- New Logan variety, (67) Mich. 39.
- new variety, (70) 734.
- plant selection, (68) Mich. 328.
- propagation, (67) 258.
- propagation, value of selection in, (65) Mich. 639.

Raspberries—Continued.

black—continued.

- pruning, (63) Ohio 835.
- studies, (65) Mich. 140.
- tipping, (63) Ohio 637.
- transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
- transpiration rates and suction forces, (70) Mich. 51.
- variety, new, (44) Ohio 841.
- variety tests, (64) Ky. 138.
- virus diseases, N.Y.State, (65) 447; (66) 751.
- breeding, (62) 139, Ill. 337; (64) Ill. 837; (65) Tenn. 830; (67) 258, Conn.State 523; (68) N.C. 474, Wash. Col. 760; (70) Tenn. 182, N.C. 774.

- growing in West Virginia, (69) W.Va. 215.
- growth studies, (67) 530.
- hardiness, (61) N.Dak. 735.
- harvesting and handling studies, (61) Oreg. 35.
- in Michigan, new spinning mite on, (67) 443.
- inheritance of sex, color, and hairiness, (66) 435.
- insects affecting, (63) 254; (70) Ill. 648.
- insects as aid to fruit setting, (61) Mich. 41.
- Latham, winter protection, (68) Mont. 760.
- length of fruit developmental period, (67) N.J. 524.
- marketing, (61) Minn. 85.

Raspberries—Continued.

- mites affecting, control, (69) 247.
 mulching experiments, (70) N.J. 474.
 Naples black, description, (69) N.Y. State 367.
 native, qualities, Hawaii, (63) 233; (65) 737; (67) 385.
 new and old canes, transpiration in, (67) 530; (68) Minn. 50.
 new cane growth, effect of removal of fruiting canes, (70) 626.
 new pest on, (68) Mich. 505.
 new variety, (62) N.Y.State 431, N.Y.State 738; (70) 734.
 new variety, Viking, (70) Mich. 780.
 nitrogen fertilization, (70) 626.
 open-pollinated seedlings, (68) Tenn. 191.
 pollination technic, (67) 682.
 Potomac, description, (69) U.S.D.A. 56.
 preservation in frozen state, (68) 328.
 production, (61) Mo. 836.
 production, cultural factors in, (67) 395.
 propagation from seed, (64) Conn.State 835.
 pruning, (63) 446, Colo. 529; (64) Ohio 634; (69) 215.
 pruning, effect of different heights, (62) 230.
 pruning methods, effects, (67) 258.
 quality in, chemistry of factors promoting, (70) N.Y.State 774.
 seed and berry size, (67) 394.
 seedling, variation in, (66) Ill. 231.
 selection and testing, (68) Alaska Col. 191.
 senescence in, (64) Minn. 638.
 size of berries and yield, effect of pruning height, (67) Minn. 39.
 studies, (66) Wash.Col. 737.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 Van Fleet, culture, propagation, and use, (63) Tenn. 42.
 Van Fleet, notes, (61) Miss. 438.
 varieties, (70) 51.
 varieties, identification, (64) Minn. 140.
 varieties imported for breeding and culture, (65) Hawaii 737.
 varieties, improved, (70) Ill. 621.
 varieties, promising, (67) 258.
 varieties, seasonal tests, (70) 626.
 varieties, self and cross fertility in, (67) 682.
 variety, new, (64) Ohio 841; (66) N.Y.State 534.
 variety tests, (61) Ga. 136, N.Dak. 735; (62) S.C. 635; (63) Nebr. 636; (64) Ky. 138, Tenn. 340; (65) Mass. 340, Tenn. 830, N.J. 833; (67) 135, N.Dak. 673; (68) Mont. 760, S.C. 760; (69) Mass. 652; (70) Ky. 182, 777.
 vitamin C in, (68) 861.
 winter hardiness trials, (67) Wis. 674.
 winter-killing, (62) N.Dak. 138.

Raspberry—

- and loganberry beetle, control, (66) 348.
 anthracnose, control, N.J., (61) 741; (63) 342.
 anthracnose, notes, (66) 147, 643.
 anthracnose resistant variety, (62) Ky. 227.
 anthracnose, varietal resistance to, (66) 147.
 aphids, studies, (62) Minn. 451.
 basal canker, cause, (64) Oreg. 345.
 beetle, control, (64) 754; (67) 284; (68) 66; (69) 695.
 beetle, habits and control, (68) 648.
 blue stripe wilt, notes, (65) 644.
 bluestem, notes, (64) West.Wash. 645.
 bramble disease, control, (62) Ill. 347.
 cane borer, notes, (67) Mich. 438.
 cane spot, notes, (61) 846; (65) 644.
 canes, hardness, effect of oil sprays, (67) Mo. 386.
 chlorosis, lime-induced, notes, (64) 450.
 crosses, (63) Tex. 444.
 crosses, susceptibility to yellow mosaic, (64) N.Y.State 447.
 crown borer, ovicides for, (65) N.J. 832.
 crown borer, studies, N.J., (61) 758; (67) 524.
 crown gall, studies, (61) Wis. 148; (65) Wis. 440; (67) Ohio 43.
 diseases and injury by cold and mammals, (70) 343.
 diseases and insect pests, (70) 58.
 diseases, control in Quebec, (69) 378.
 diseases, studies, (62) Ohio 645; (64) 50; (67) 415.
 diseases, virus, in Washington, (67) 554.
 diseases, virus, studies, (63) Wash.Col. 244; (64) Mich. 229; (67) Ohio 43; (69) Ohio 61.
 fruit worm, notes, (62) West.Wash. 540; (65) Mich. 153; (66) Mich. 154, N.Y. State 552; (70) U.S.D.A. 499.
 gall tissue on canes, cause, (63) Wis. 47.
 Gloeosporium blight, (64) 348.
 gray bark, relation to anthracnose, (68) Ill. 211.
 horntail, studies, (65) Calif. 53.
 infection with cane spot fungus, (70) 199.
 leaf rust, (69) N.Y.Cornell 61.
 leaf scorch, notes, (63) 746.
 mite, notes, Mich., (66) 154; (67) 57; (68) 351, 780.
 mites, advances in control, (70) Ill. 648.
 mosaic, control, (70) 199.
 mosaic in Great Britain, symptoms and varietal susceptibility, (70) 644.
 mosaic, notes, (62) N.Y.State 439, West. Wash. 532; (64) N.Y.State 447; (65) 644; (68) Mich. 348, N.Y.State 626, Wash.Col. 769.
 mosaic, streak, and anthracnose, (70) N.Y.State 791.
 mosaic, symptoms, (67) 554.

Raspberry—Continued.

- mosaic tissue, intracellular bodies in, (61) 843.
- orange rust, notes, (61) Mich. 449; (69) N.J. 373.
- plants, selected, value, (61) Mich. 498.
- powdery mildew, notes, (63) 44; (66) 751.
- root borer, control, N.J., (61) 758; (63) 359; (65) 832.
- root borer, studies, (65) Calif. 53.
- sawfly, notes, (68) Mich. 351.
- seedlings, new varieties, (69) 212.
- spur blight, notes, (65) 644.
- stock, certified, and inspection, (65) 834.
- Verticillium wilt, studies, (61) Oreg. 44; (62) West.Wash. 532; (64) Oreg. 346.
- weevil in Sweden, (65) 552.

Rat—

- baits, canned, (67) Mass. 420.
- bite fever spirochete, drug refractoriness, (62) 260; (69) 421.
- fla, oriental—
 - in Kenya, (70) 214.
 - in Puerto Rico, (67) 438.
- multiplication of typhus fever virus, (67) 577.
- notes, (61) 543, 660.
- transmission of typhus fever by, (66) 760, 761; (67) 438; (68) 224, 635.
- typhus virus in and duration of infectivity, (67) 438.
- fla survey—
 - of Peking, (62) 250.
 - of port of Norfolk, (61) 660.
 - of San Juan, Puerto Rico, (62) 858; (65) 361; (67) 438.
 - of St. Thomas, Virgin Islands, (67) 438.
- fla, transmission of typhus fever by, (66) 850, 852; (67) 577.
- fla, notes, (64) 237.
- fla of ships, relation to bubonic plague, (61) 543.
- fla, transmission of plague by, (63) 152.
- fla, unfed, survival, effect of temperature and humidity, (68) 71.
- lice, transmission of Manchurian typhus by, (68) 635.
- lice, transmission of Mexican typhus virus by, (66) 850.
- mites, relation to typhus fever, (70) U.S.D.A. 499.
- mites, tropical, cause of skin eruption of man, (64) 757.
- mites, tropical, vectors of endemic typhus, (67) 282, 722.
- moles, Bosnian-Herzegovinian, studies, (61) 449.
- poison fatal to pigs, (62) Calif. 753.
- proofing buildings and premises, (64) U.S.D.A. 648.
- tailless, description, (68) 605.

Ration, scorbutic, description, (62) 198.

Rations—

- effect on health, reproduction, and ability to rear young, (63) N.C. 656.
- energy value, comparison to energy values of components, (66) 763.
- nutritive value, net energy as measure, (69) 405.
- size, effect on digestibility, (63) 167.
- Rats—see also Rodents.
 - a world menace, (64) 154.
 - albino, heat production, (62) 192.
 - albino, hydrocephalous skulls in, (62) 625.
 - albino, prenatal growth, (68) 752.
 - and antirat operations in Punjab, (64) 359.
 - and fleas, survey in Kenya, (70) 214.
 - and parasites in Soochow, China, (64) 237.
 - and reindeer in the Antarctic, (67) 148.
 - as carriers of disease, (70) 204.
 - at different ages, iron in, (61) 790.
 - blood, composition, (63) 789.
 - blue mutation in, (62) 822.
 - bred for vitamin tests, stock diet for, (68) 564.
 - British, classification and description, (67) 49.
 - control by red squill powders, (62) U.S.D.A. 446.
 - control in Punjab, (67) 286.
 - cytogenetic studies, (69) 194.
 - destruction in Cyprus, (70) 207.
 - effect of amount of sexual indulgence on longevity, (62) 517.
 - effect of breeding rate on offspring, (62) 127.
 - eradication methods, (66) Mich. 153.
 - experimental, high temperature deaths among, (62) 192.
 - feeding experiments, equipment for, (65) 897.
 - gray Norway, mutations in, (68) 747.
 - growth and form, effect of diet, (62) 894.
 - growth and reproduction on vitamin C-free diet, (61) 194.
 - growth, effect of phosphatic limestone, (66) N.Y.Cornell 856.
 - growth, food requirements, (61) 597; (65) 690.
 - growth on fat-free and fat-containing diets, (64) 494.
 - growth studies, (67) N.J. 587, 772.
 - helminth parasites of, (66) 776.
 - hypophysectomized and ovariectomized, comparative sensitivity to follicular hormones, (68) 464.
 - in Canton, China, animal parasites of, (69) 544.
 - in Philippines, worm parasites transmissible to man, (67) 282.
 - in rice fields, control, (62) 446.
 - in vitamin A tests, variation in growth response, (68) 565.
- International Conference, (67) 420.

Rats—Continued.

- International Conference and Colonial Congress on, (69) 229.
 learning ability, and vitamin B deficiency, (62) 897.
 litter size, effects of nutrition and heredity, (67) 587.
 longevity and optimum growth, compatibility, (69) 752.
 notes, (69) Kans. 232.
 nursing young, effect of vitamin B deficiency, (63) Ark. 693.
 nursing young, vitamin B requirements, (61) 696.
 on low-protein diet, changes in weight, (67) 477.
 on ships, relation to bubonic plague, (61) 543.
 on unfavorable diets, maze performance, (68) 708.
 parathyroidectomized, susceptibility to viosterol, (64) 594.
 pregnant, effect of male or female gonadectomized parabiont on, (66) 524.
 rachitic, resistance to infection, effect of sunlight, (61) 595.
 resistance to *Bacterium abortus*, effect of diet, (62) 876.
 scaly tail condition, relation to fat-free diet, (65) 895.
 segmentation of tail, (65) 794.
 spontaneous activity, comparison with ability to learn, (62) 516.
 stock albino, improved growth rate, (61) 694.
 structural anomalies in, inheritance, (66) 423.
 suckling, development on milk diet, (62) 895.
 Texas rice, life history, (66) 153.
 toxic baits for, tests, (69) Mass. 682.
 toxicity of hydrocyanic acid for, (61) 656.
 type of blindness in, (68) 655.
 types of hair and arrangement, (66) 729.
 utilization of food, effect of baking powders, (64) 283.
 vegetarian, growth on omnivorous diet, (65) 692.
 vitamin B (B₁) requirement, (67) 634.
 vitamin E-deficient, intrauterine changes in, (67) 485.
- Ratti seeds, poisonous to horses, (67) 745.
- Rayon—
 bactericidal effectiveness of home laundering methods, Wash.Col., (66) 798; (68) 135.
 history and process of manufacture, (67) Ohio 637.
 identification, (61) 96.
 industry, treatise, (62) 598.
 manufacture and fiber research, (68) 423.
 regenerated cellulose and cellulose acetate, quantitative estimation, (69) 476.

Rayon—Continued.

- types, effect of heat and light, (63) 298.
 yearbook, (61) 96.
- Reagents and culture media, treatise, (62) 311.
- Real estate—
 problems, (63) 280.
 problems of Minnesota department of rural credits, (69) 443.

 Federal, economics of, (70) 849.
 policies in Pacific States, (65) 580.
 projects, relation to agricultural depression, (61) 285.
- Reconstruction in Asia, government and rural, (68) 547.
- Recreation as land use, (65) Wis. 481.
- Recreational uses of land in Massachusetts, (69) Mass. 291.
- Recurrent fever—
 in Spanish Africa, new agent in transmission, (70) 513.
 tick transmission, (70) 218.
- Recurvaria—
condignella n.sp., description, (61) 550.
 nanella, *see* Bud moth, lesser.
- Red Arrow, toxicity, effect of soap on, (65) 51.
- Red Clover, *see* Clover, red.
- Red mite—
 as parasite of field cricket, (61) U.S.D.A. 754.
 control, (65) N.J. 848; (69) 73.
 European—
 biology, (61) U.S.D.A. 157.
 commercial control, (63) Ohio 50.
 control, (61) Mass. 848; (63) Mass. 548, 751, Ohio 838; (66) Wash.Col. 755.
 notes, (61) Ohio 450; (64) Mich. 240; (67) 424.
 overwintering eggs, combined sprays for, (61) N.J. 452.
 spray tests, (63) Conn.State. 453.
 on apple, control, (65) 757.
 studies, (70) N.Y.State 803.
- Red scale—
 California—
 control, (68) 355, 356.
 effect of hydrocyanic acid gas, (69) 388.
 effect of severe winter, (66) Tex. 51.
 in New South Wales, (63) 550.
 life history, (66) 649.
 life history, habits, and control, (68) Tex. 219.
 notes, (67) Tex. 706; (69) Tex. 384; (70) U.S.D.A. 499.
 on citrus, (62) Tex. 652.
 on citrus trees, effect of fertilization, (70) 655.
 tolerance to insecticides, (70) 500.

Red scale—Continued.

California—Continued.

variation in population density in hilly lemon grove, (69) 829.
control, (61) 755; (67) Calif. 559.
control, efficiency of sprays and HCN gas, (67) 423.
control, papers on, (62) 449.
control, progress in, (69) 690.
control with oil sprays, (66) 156.

Florida—

control, (70) 69.
fumigation with chloropicrin, (62) 156.
in Egypt, (67) 289.
insecticides for control, (69) Calif. 71.
oil spray for, (65) 850.
on citrus, lural-sumac as source of infestation, (69) 77.
problem, (65) 549.
protective stupefaction, (63) 157.
reproduction and control, (63) Tex. 456.
resistant, studies, (62) 448.
Spanish, injury to avocado and citrus, (64) 245.

Red spider—

aliphatic alcohols and formates, toxicity toward, (68) 653.
and other vine troubles, (67) 705.
and tar-distillate washes, (62) 252.
chemically treated bands for, (67) 49.
control, (61) 546; (64) 748, 854; (66) Wash.Col. 755; (67) 425, 558; (70) 208.
control in greenhouses, (61) Mass. 849; (66) 457; (68) Ill. 637.
control on greenhouse cucumbers, (67) Ohio 43; (68) 363.
control with naphthalene, (65) Mass. 344.
development, effect of temperature, (69) Mass. 686.
fruit tree, on plum, control, (67) 157.
in San Joaquin Co., California, (66) 753.
injury to deciduous fruits, (61) Calif. 351.
mite, fumigation experiments, (64) 241.
mite, new, in Tulare, (64) 238.
mite, notes, (62) Fla. 351.
notes, (61) Ohio 450; (68) Fla. 67; (69) Tex. 384; (70) Tex. 207.
on Asparagus plumosus, (67) Fla. 559.
on bush fruits, (62) 541.
on citrus, (66) Tex. 52.
on strawberries, control, (63) 751.
or Pacific mite in San Joaquin Co., California, (64) 238.
Pacific, control, (67) Calif. 559.
studies, (61) Oreg. 53; (64) 241; (65) Calif. 53.
sulfur as insecticide for, (70) Tex. 207.
tests of insecticides for, (67) 722.

Red squill—

canned, as rat bait, (69) Mass. 682.
powder for rat control, (64) U.S.D.A. 648.

Red weevil of coconuts, notes, (62) 456; (67) 426.

Redbud borer, control, (64) 247.

Redox indicators, (64) 111.

Redtop—

as tobacco cover crop, (63) Mass. 524.
cost of production and prices, (70) Ill. 695.
fertilizer experiments, (65) Conn.Storrs 727.

Reducease—

in vegetables, factors affecting, (65) N.J. 830.
role in apple trees, (67) N.J. 524.
seasonal distribution in apple tree organs, (67) 39.

Reducylin, use of term, (70) 881.

Redwater—

and African coast fever, studies, (64) 677.
in cattle, (64) Wash.Col. 676.
Rhodesian, *see* African coast fever.

Redwood—

- in infants, maintenance of blood phosphate level, (63) 296.
- in infants, prevention by irradiation, (61) 94.
- in infants, readily hydrolizable phosphorus in blood, (68) 567.
- in infants, treatment with milk from cows fed irradiated ergosterol, (68) 714.
- in infants, value of salmon oil, (68) 714.
- in mice, experimental production, (63) 94.
- in pigs, butter v. oleomargarine for, (63) W.Va. 62.
- in pigs, studies, (61) 257; (66) Nebr. 361.
- in rats, (62) 694; (63) 695; (66) 692.
- in rats, behavior of epiphyseal cartilages during, (70) 890.
- in rats, calcium and phosphorus content of brain in, (69) 155.
- in rats, calcium in striated muscles, (65) 553.
- in rats, curative action of dried and condensed milk, (62) 898.
- in rats, effect of acidophilus milk, (67) La. 345.
- in rats, effect of diet, (68) 871.
- in rats, effect of lactose, (70) 728.
- in young turkeys, (68) 517.
- indirect ray therapy, papers on, (65) 5.
- infra-red radiation experiments, (63) 196.
- late effects of, (66) 898.
- light therapy in, evaluation, (65) 193.
- local factor in pathogenesis and cure, (62) 694.
- low phosphorus, mechanism of healing, (65) 893.
- magnesium, studies, (69) 155.
- modern therapy for, (62) 496.
- prevention, (68) 713.
- and cure, (69) 474.
- cod-liver oil v. ultra-violet light, (61) 294.
- effect of New Orleans sunshine, (69) 313.
- value of Colorado sunshine in, (65) 96.
- preventive tests with irradiated milk, (67) 489.
- preventives in chicks, (67) Iowa 444.

Ricketts—Continued.

- producing diets which promote satisfactory growth, (69) 474.
- producing factor in cereals, nature, (62) 594.
- production in chicks, ration for, (66) 595.
- prophylaxis, (61) 95.
- quantity of ultra-violet radiation relation to area of skin exposed, (67) 636.
- quartz lamp therapy in, (61) 896.
- relation to preen gland of birds, (64) 65.
- simple and renal, differences, (67) 489.
- treatise, biochemical part, (68) 668.
- treatise, pathological part, (67) 593.
- treatment with dried yeast, (68) 133.
- treatment with irradiated ergosterol, (61) 596, 795.
- ultra-violet irradiation for, amount, (65) 296; (69) 314.
- ultra-violet treatment, effect on intestinal flora, (69) 473.
- value of California summer sunshine in treatment and prophylaxis, (65) 695.

Rickettsia—

- diseases and filtrable virus, (61) 269, 568, 871; (62) 169, 467.
- manchuriae, hosts and disseminators, (68) 634.
- melophagi, notes, (70) 681.
- psittachi in tissues of man and animals, distribution, (70) 528.
- ruminantium, studies, (64) 677.
- sp., cause of tick-bite fever, (63) 480.

Rickettsia-like—

- microorganism in beet leafhopper, (63) 551.
- organism in conjunctiva of sheep, (67) 70.

Rictularia aethechini n.sp., notes, (64) 771.

Rift Valley fever, research, (70) 675.

Rigor mortis, physiology, (66) 457.

Rinderpest—

- benign inapparent form, (61) 871.
- blood, formalized virulent, use as vaccine, (66) 772.
- blood, virulence, (68) 378.
- chronic, unusual case, (69) 583.
- clinical syndrome in goats in India, (69) 868.
- complement fixation reaction in, (62) 260.
- control, (67) 72.
- control in Philippines, (66) 572.
- dissemination, role of leeches in (67) 315.
- forms, differentiation, (67) 451.
- immunization, (62) 469; (68) 91.
 - improved vaccine for, (63) 170.
 - of cattle, serum-simultaneous method, (65) 670.
 - use of goat virus, (61) 673.
- in Bengal, (68) 90.
- in Egypt, (61) 871; (63) 874.
- in Federated Malay States, (68) 667.
- in India, (65) 571.
- in Indo-China, (67) 315.

Rinderpest—Continued.

- in large dairy herd in Shanghai, control, (70) 531.
 - in Tanganyika, (68) 667.
 - in Uganda, (68) 667.
 - infected cattle, shade-dried hides from, infectivity, (66) 772.

 - virus, convalescent sera of Sao Paulo exanthematic typhus against, (69) 869.
 - virus recovered from dog tick, (68) 814.
 - virus, sexual transmission in the wood tick, (69) 400.
- Rocky Mountain wood tick, Bacterium tularensis of low virulence isolated from, (69) 712.
- Rodent pests, notes, (65) Ind. 153.
- Rodenticides, composition, Conn.State, (61) 355; (69) 234.
- Rodents—*see also* Rats, Mice, *etc.*
- burrowing on desert soils in Arizona, effect, (67) 280.
 - control, (62) Tex. 652.
 - control by poisoning, (64) Okla. 748.

Rodents—Continued.

- control with thallium, (65) U.S.D.A. 151.
 injurious, control, (61) Kans. 153.
 injurious, information for field men controlling, (65) U.S.D.A. 242.
 injury to orchards, control, (67) Ohio 38.
 injury to trees, sprays for, (68) Minn. 46.
 insectivorous, enemies of iris borer, (62) 856.
 losses and baits, (70) U.S.D.A. 498.
 native, male genital apparatus, (65) 217.
 of Colorado, control, (62) 539.
 of France, classification and control, (69) 381.
 prevalence and control, (69) Fla. 232.
 under field and village conditions, (67) Fla. 559.

Rodolia cardinalis, see *Vedalia*.

Roentgen rays, see X-rays.

Rogas granulata n.sp., description, (65) 59.

Rogas sp., notes, (62) 855.

Rollers, use on terraced land, (68) 541.

Romaine, intra-State competition in Florida, (66) Fla. 881.

Rompers for babies, (66) U.S.D.A. 199.

Rondaniocestrus apivorus, parasite of bees, (64) 248.

Roof construction, gothic, for barns, description, (70) 840.

Roof, masonry arch, waterproofing, (64) Iowa 885.

Roof, tile, waterproofing, (65) Iowa 183.

Roofing—

materials, studies, (64) 482.

prepared, (67) Iowa 462.

sheets, galvanized, production and use, (67) 324.

Roofings, prepared roll, durability, (68) 838; (70) Iowa 110.

Roofs and bridges, graphic statics, textbook, (67) 754.

Rooks as source of gapeworm infection of poultry, (63) 376.

Root—

aphid, control, (70) Ill. 648.

bacterioids, reproduction, (65) Wis. 422.

borers, giant, studies, (68) S.C. 780.

crops—

cost of production and financial returns, (63) 280.

diseases, (69) 526.

for forage, (66) Mich. 134.

for livestock, culture and harvesting, (69) U.S.D.A. 354.

in Scotland, effect of environment, (68) 468.

production tests, Alaska, (62) 127.

tests, (61) Utah 27.

varieties, (61) Ore. 26.

variety tests, Mich., (61) 432; (65) 729.

development relation to soil moisture, (62) Calif. 778.

Root—Continued.

duff, proposed name, (66) N.Y.Cornell 613.

growth, role of lead in, (68) 174.

hairs, growth in solutions, (61) 626, 816; (68) 311.

knot nematode—

activity, effect of environment, (67) 273.

biological studies, (65) Calif. 754.

control, (62) Fla. 344; (67) 273.

control with carbon disulfide emulsion, (69) Mass. 220.

development in root tissues, (65) Hawaii.Pineapple Cannery 844.

development, relation to temperature, (69) Calif. 542.

effect of sunlight and drying, (67) 557.

in greenhouses, control, (63) Ohio 452.

in tobacco seed beds, (63) 248.

notes, Tenn., (68) 204; (70) 192.

of gladiolus bulbs, (62) 145.

on pineapple and other crops, (67) 558.

plants attacked by, list, (69) U.S.D.A. 681.

reproduction without males, (69) Calif. 542.

studies, (67) 402.

knot, studies, (63) 250, Fla. 648; (67) Fla. 559; (69) Fla. 231.

louse on truck crops, (66) Tex. 51.

maggots, notes, (61) 450; (64) Iowa 851.

nematodes, control, (66) 643.

overgrowths caused by hairy root and crown gall, use of tape for, (67) Wis. 690.

pests in Puerto Rico, (64) 242.

rot due to *Pythium* and *Aphanomyces*, (62) 146.

rot, fungi accompanying rotting as potential agents, (69) 672.

rot, notes, (69) N.Mex. 222.

rot, resistance of plants to, (69) 528.

rot, studies, (63) Tex. 449.

rots caused by *Phycomycetes*, (61) 46.

stocks, raising from seed in United States, (66) 139.

studies, (69) 654.

systems, development, effect of colloidal substances, (66) 319.

systems, development, effect of light relations, (61) 424.

systems of sod-forming grasses, (63) Fla. 226.

tips, growth, sources of sulfur affecting, (70) 313.

tips, sensitive to gravitational stimulus, (65) 423.

Roots—

absorption of carbon dioxide by, (66) 722.

adventitious, effect of hydrocarbon gases, (70) 27.

Roots—Continued.

- anatomical structure, effect of leafage removal, (67) 661.
 and microorganisms, association, (68) 166.
 and tops of plants, development, effect of length of day, (65) 215.
 as absorbing organs, (68) 599.
 cell division and elongation in, (61) 626.
 dead, intake of water through and relation to absorption by transpiring plants, (70) 599.
 development and soil moisture, (61) Calif. 620.
 development, effect of nutritive conditions of seeds and cuttings, (66) 332.
 development, relation to bacteria, (67) 698.
 effect of hot water treatment for Japanese beetle, (67) U.S.D.A. 56.
 evaporation, transpiration, and oxygen consumption, (70) 599.
 feeding value, (64) 62; (66) W.Va. 568; (69) 257, W.Va. 848; (70) Wyo. 822.
 formation, substance causing, (67) 661.
 growth, (64) 212.
 growth and stimulative movement in, (65) 723.
 growth-promoting substance and elongation, (70) 27.
 metabolism, (62) Mo. 23.
 neoformations in, effect of rare earths, (65) 26.
 of perennial weeds, winter activity, (61) 626.
 of staple crops, insects affecting, (64) Kans. 852.
 regenerative organ formation in, (69) 341.
 resistance to filtration, (66) 320.
 studies, (68) 762.
 tropisms in, photodynamically induced, (70) 601.
 Rootstock weevils, black and brown, proposed names, (68) 793.
 Rope, knots, hitches, and splices, strength tests, (62) 174.
 Rope, wire, effects of bending, (67) 78.
 Rosa banksiae, Pleospora attacking, (63) 249.
 Rosaniline hydrochloride use in isolating nitrite-oxidizing organisms, (62) 417.
 Rose—
 anthracnose, description, (68) 350.
 beetle, Fuller's, studies, (63) Conn.State 453; (65) Calif. 53.
 black spot, cane infections from, (63) N.J. 342.
 black spot, control, (63) Ohio 45; (64) Ill. 843; (66) N.Y.Cornell 640.
 black spot, notes, (65) N.J. 839; (66) 152.
 brown canker, control, (63) N.J. 342.
 brown canker, development, (65) 352.
 bug, control, (61) N.J. 750.
 canker, notes, (65) N.J. 839.

Rose—Continued.

- cankers caused by Coniothyrium, (63) 452.
 chafers, notes, (69) Fla. 231.
 chlorosis, notes, N.J., (61) 744; (63) 342.
 curculio, notes, (61) Mich. 450.
 cuttings, composition, (68) N.Y.State 618.
 diseases and insects, control, (69) Va. Truck 678.
 diseases, studies, (65) 352; (67) 418; (69) N.Y.Cornell 61; (70) 201, 352, N.Y.Cornell 791.
 foliage, adhesiveness of sulfur fungicides to, (70) 201.
 hips, reducing material in, purification, (70) 294.
 hips, vitamin C in, (68) 861.
 leafhopper, control, (69) 384.
 leafhopper on apple leaves, (66) Va. 553.
 mildew, control, (64) Ill. 843.
 perfume, production, studies, (64) Oreg. 338.
 pollen, effect of sprays, (63) 137.
 powdery mildew, notes, (66) 152.
 root knot, notes, (64) Tenn. 348.
 rust, control, (70) 352.
 scale, parasites attacking, (62) 252.
 seedlings for Tennessee conditions, (65) Tenn. 840.
 seeds, afterripening, germination, and storage, (66) 431.
 stem girdler, notes, (65) Conn.State 451; (66) Mich. 456.
 thrips on greenhouse plants, (68) 783.
 Roselle, constituents, (63) Fla. 691.
 Rosellinia—
 arcuata, notes, (64) 452, 847; (68) 62.
 arcuata, parasitism, (63) 150.
 bunodes, notes, (65) 649; (68) 776.
 sp., notes, (64) 229; (67) 399, 400.
 Roses—
 annual treatise, (63) 835; (69) 369.
 Botrytis stem rot of, (63) 349.
 breeding, (61) S.Dak. 39; (64) N.Y. Cornell 623; (67) Iowa 385.
 budded, value, (64) Ohio 635.
 budded, vigor and winter resistance, (63) Ohio 638.
 carbon dioxide storage, (65) 412.
 chromosomes, multiple pairing, hybridity, and fragments in, (69) 347.
 climbing, notes, (66) Can. 828.
 composition of cuttings, relation to rooting, (68) N.C. 474.
 culture, (64) 41; (67) Miss. 35, N.J. 685.
 culture and varieties, (67) Mich. 533.
 culture experiments, (64) S.Dak. 636.
 culture in Bulgaria, (61) 837.
 culture, treatise, (62) 438, 639.
 cytology of triploid, aneuploid, and partially sterile individuals, (67) 514.
 Diplodia spp. affecting, (65) Fla. 439.

Roses—Continued.

- Dorothy Perkins and American Pillar, comparison, (70) 483.
 effect of ethylene and illuminating gas, (66) 437.
 effect of paraffining, pruning, and other storage treatments, (68) 191.
 effect of plant nutrients, (69) Mass. 652.
 flower production on limed and acidified soils, (70) 632.
 greenhouse, *Peronospora sparsa* on, (67) 280.
 greenhouse, sugarcane beetle injury, (70) 215.
 growth, relation to pH of soil, (66) 142.
 growth under glass, effect of nutrients, (67) Mass. 385.
 hardy, for South Dakota, (62) S.Dak. 231.
 in storage, control of molds on, (61) N.J. 743.
 infectious chlorosis of, (66) 843.
 maturing before digging, value, (64) N.Y.State 440.
 new *Chaetomella* on, (67) 702.
 new variety, (68) S.Dak. 761.
 polyantha, descriptions, (64) Can. 539.
 propagation, (61) Va.Truck 740.
 propagation of multiflora rootstocks, (66) N.Y.State 436.
 pruning, (67) Miss. 35.
 red, cause of blueing in, (62) 820.
 response to fertilizer applications in nursery, (66) N.Y.State 538.
 rootstocks, comparison, (67) 397.
 sand culture studies, (67) N.J. 524.
 seed germination in, (66) 336.
 seedling, description, (70) S.Dak. 777.
 seedling stocks, (62) N.Y.State 432.
 stocks for, (61) Tenn. 140.
 summer-budded v. winter-grafted, Ill., (62) 338; (64) 41, 838.
 treatise, (63) 240; (67) 397.
 varieties, (70) N.C. 774.
 varieties on different rootstocks, growth and flowering, (66) 142.
 variety tests, (65) Miss. 39, N.C. 136; (67) Miss. 35.
 wild, cytological conditions and evidences for hybridity, (61) 217.
 wild, sterility in, (64) 529.
 yield and quality, effect of position on the bench, (66) 142.
- Rosettes, distribution on chorion of pigs, (65) 218.
- Rosinduline—
 as oxidation-reduction indicator, (65) 204.
 formation of semiquinones as intermediary reduction products from, (67) 197.
- Rosy rustic moth as hop pest, (61) 354.
- Rotation of crops, (61) Oreg. 26, Utah, 27, Kans. 116, Tenn. 127, Miss. 433, W.Va. 518, N.C. 715, N.C. 725, Va. 716, Va. 727,

Rotation of crops—Continued.

- and manuring experiments, (65) Utah 627.
 as aid to soil productiveness, (68) N.C. 182.
 at San Antonio (Texas) Field Station, (66) U.S.D.A. 628.
 during drought, Okla.Panhandle, (61) 825.
 effect of clover and alfalfa, (65) Colo. 717.
 effect on anchorage of corn plants, (69) Va. 41.
 fertilizer experiments, (62) S.C. 507; (66) Tex. 27.
 for eastern Canada, (67) 234.
 insect factor in, (63) Ohio 631.
 legume and nonlegume, (70) N.Y.State 305.
 legume and nonlegume, nitrogen and water relations, (64) N.Y.State 422.
 on dry land and under irrigation, (67) Nebr. 517; (68) Mont. 754.
 on heavy soils, fertilizer treatment, (66) Mich. 120.
 place of manure in, (70) Ind. 304.
 role of legumes in, (63) N.Y.Cornell 33.
 suggestions for, (61) Iowa 884.
 under irrigation, U.S.D.A., (62) 128; (66) 730.
 value for grains, (64) Ill. 808.
 value in Coastal Plain area, (69) N.C. 128.
 with and without wheat, (67) Ohio 29.
 yields and financial returns, (68) R.I. 467.
- Rotenone—
 and croton, toxicity, (70) U.S.D.A. 501.
 and nicotine, relative toxicity to *Aphis rumicis* and mosquito larvae, (65) 846.

Rotenone—Continued.

- and pyrethrin, relative toxicity, (68) 216, 638.
- and related compounds as stomach insecticides, (67) 50.
- as canine insecticide, (70) 241.
- as insecticide, (68) 638; (70) 208.
- as moth-proofing agent, (64) 543.
- chemistry of, (68) 782.
- comparison with other insecticides, (64) 854.
- containing preparations, insecticidal value, (65) 51.
- deposits, loss in toxicity when exposed to light, (69) 234.
- effect on mammals, (64) 543.
- for northern cattle grub, (70) 365.
- in Derris and Lonchocarpus species, (70) 359.
- in derris root and other plant materials, (61) 543; (69) 234.
- in Malayan tuba root, (69) 75.
- in solution and suspension, change in toxicity, (65) 52.
- in solution, decomposition, (65) 246.
- in species of Fabaceae, chemical relationship, (69) 683.
- insecticidal value, (64) 458, Wash.Col. 655; (69) N.J. 383.
- new parasiticide, (69) 423.
- papers on, (64) 747.
- solubility, (64) 747.
- structural formula and efforts to synthesize, (70) U.S.D.A. 648.
- synthesis, (70) U.S.D.A. 501.
- toxicity to goldfish, (65) 547.
- toxicity to red spider, (67) 722.

Roughage—

- and grains, mixing for cows, Ohio, (61) 457, 465.
- chopping v. grinding, (61) Ohio 457.
- effect on growth, (62) 688.
- fed in different forms, value, (62) Kans. 362.
- production, (69) N.H. 445.
- single and mixed, comparison, (69) 699.

Roughages—

- carbonaceous, comparison, N.C., (63) 658; (65) 159.
- cost of processing, (70) Mo. 219.
- fed to cows, effect on butter quality, (64) Miss. 675.
- feeding value, (62) Miss. 161.
- for beef calves, (64) Mich. 367.
- for dairy heifers, sun-cured v. dehydrated, (70) Pa. 374.
- for fattening steers, (65) Iowa 159.
- for finishing steers, comparison, (64) Miss. 551.
- grinding, (64) Ohio 682.
- grinding for dairy cows, (61) S.Dak. 66.
- grinding, value, (63) S.Dak. 67, S.Dak. 855; (65) 677.
- in dairying, limitations, (70) U.S.D.A. 731.

Roughages—Continued.

- marketing through livestock, (68) Mich. 230.
 - mineral elements, relation to minerals in soil, (64) S.C. 617.
 - processing for dairy cows, (65) Ohio 467.
 - processing for winter stock calves, (67) Mo. 445.
 - production in New Hampshire, (70) N.H. 265.
 - sun-cured v. dehydrated, nutritional value, (68) Pa. 518.
- Roundworm ova, development and survival, (65) Minn. 151.
- Roundworm parasite of chickens, new, (62) 474.
- Roundworms—
- in chicks, control, (62) 566.
 - in chicks, effect of various concentrations of nicotine, (66) Pa. 274.
 - in poultry, control, (61) Ill. 772; (64) N.J. 178, Mont. 262; (66) Guam 472.
 - in poultry, effect of vitamin A in diet, (64) 680.
 - in poultry, life histories, (64) 177.
 - in poultry, nicotine for, (70) Pa. 381.
 - in sheep and goats, control, (63) Tex. 477.
 - intestinal, collecting, technic, (62) 467.
 - intestinal, importance and control, (64) 177.
 - resistance of chickens to, (64) Ohio 679.
 - specific identity, (62) 670.
- Roup—
- complex and fowl paralysis, (65) 270.
 - immunity, relation to vitamin A in feed, (61) Kans. 164.
 - immunization, (63) Wyo. 776; (65) Mich. 176.
 - in pigeons, control, (61) Calif. 370.
 - studies, (68) Mich. 376.
 - use of bacterin for, (65) Mich. 772.
- Royal—
- Agricultural Society of England, first award of gold medal, (70) 896.
 - Grain Inquiry Commission, report, (65) 385.
 - Veterinary College, report, (62) 260.
- Rubber—
- anatomy and physiology, (67) 398.
 - black stripe, notes, (67) 400.
 - blackroot fungi affecting, (65) 649.
 - brown bast, treatment, (68) 349.
 - buddings, disease of, (68) 349.
 - cortex, formation of internal fissures in, (69) 189.
 - diseases and pests in Netherlands Indies, (63) 748.
 - diseases, notes, (65) 344; (70) 202.
 - genetics and improvement, (70) 459.
 - improvement of yield, (64) 445.
 - in goldenrod species, (70) 190.
 - latex, total solids in, determination, (61) 309.
 - milkweed as source, (62) 419.

Rubber—Continued.

- Oidium leaf disease, (63) 144; (68) 62, 349; (69) 379.
 patch canker, notes, (67) 400.
 plantations, lightning damage, (70) 354.
 producing plants in Crimea, (70) 25.
 root disease, relation to cover crops, (62) 239.
 seed meal, feeding value for cows, (63) Va. 567.
 seed oil, characteristics, (65) 410.
 stem disease, notes, (64) 846.
 termites affecting, (64) 244.
 tree caterpillar, notes, (66) 157.
 yield records, relation to Oidium heveae, (70) 59.
- Rubner, Max, tribute to life and work, (68) 407.
- Rubus—
 chamaemorus, morphological and biological studies, (63) 140.
 cytological studies, (70) Tex. 182.
 orange rust, cytological studies, (68) Mich. 768.
 rosette, studies, (67) La. 143, La. 263.
 spp., cytology and breeding, (70) 316.
 spp., wintering and vegetative reproduction, (68) 477.
 variety tests, (61) Ga. 136.
- Ruffin, E., gentleman farmer, treatise, (67) 336.
- Rugopharynx australis, notes, (66) 367.
- Rugs, hooked, cotton as new foundation material for, (68) U.S.D.A. 135.
- Rumex crispus, weed host of Pseudomonas tumefaciens, (65) 43.
- Ruminants—
 effect of feeding concentrates alone, (68) Mich. 805.
 parasites, (70) U.S.D.A. 526.
 passage of fluids through stomach, (67) 165.
- Rumplessness in fowls, (62) 324.
- Run-off—
 and erosion experiments in Texas, (61) 574.
 and watershed losses, relation to snow melting characteristics, (66) Utah 11.
 conservation, (64) Okla. 716.
 divisor for taking aliquots of, (69) 721.
 effect of forest litter, (63) 739.
 estimating from mountain snows, (62) 409.
 from small agricultural areas, estimation, (62) 475.
 history of a watershed, computing, (67) 606.

 - from nasal passages of fowls, (63) 577.
 - growth on culture media, (66) 375; (67) 596.
 - hydrogen sulfide production by, effect of temperature, (64) 775.
 - in eggs from reactor hens, (65) 382.
 - in eggs, significance, (61) Pa. 572.
 - in incubators, formaldehyde gas for, (61) 874; (66) Ill. 271.
 - infected eggs, sterilization, (63) 481.
 - infection of fowls, (63) Idaho 576.
 - intracellular toxin in, (67) 459.
 - isolation, brilliant green in culture media, (63) 577.
 - isolation from chicks, (63) 375.
 - isolation, medium for, (65) Mich. 772.
 - nodular lesions caused by, (61) 676.
 - production of gas by, (62) R.I. 564.
 - relation to chick pneumonia, (64) 478.
 - studies, (61) 73, Mich. 469; (62) 171, Pa. 380; (67) 318.
 - type organism causing new disease of fowls, (64) 382.
 - utilization of citric acid and of sodium citrate by, (66) R.I. 375.
 - utilization of citric acid as source of carbon, (65) R.I. 572.
 - variants, (67) 170, 748.
 - virulent strain, (65) Mass. 375.
- schottmülleri* infection in pigeons, (62) 269.
- species, classification, (68) 378.
- spp., feeding to anemic and nonanemic pigs, (67) 73.
- spp. infection of rodents, carriers of, (62) 875.
- spp. nutritional poisoning caused by, (66) 868.
- spp., reduction of nitrates to nitrites by, (63) 77.
- sulpestifer—**
- agglutinins for, (61) 73.
 - bacteriophage lysates, antigenic properties, (69) 869.
 - cause of fatal human infection, (61) 372.
 - human case of bacteremia caused by, (63) 480.

Salmonella—Continued.

- sulpestifer—continued.**
- in pigs, (69) Ind. 104.
 - infection in children, (69) 582.
 - infections in man, (70) 91.
 - notes, (70) 534.
 - sterile, phenolized, saline suspension for infected pigs, (67) 73.
- Salmonellosis, bovine, in Sao Paulo, (68) 378.
- Salpingogaster nigra*, notes, (70) 63.
- Salsify—**
- fertilizer experiments, (63) Ill. 533.
 - iron in, (67) U.S.D.A. 86.
 - seed, quality on sale in New York, (67) N.Y.State 130.
- Salt—**
- absorption of plants, (70) 455.
 - added to moistened alfalfa hay, effect on bacterial growth, (65) 629.
 - applications to sugar beets, effect, (65) Mich. 729.
 - brands for butter making, comparison, (66) Idaho 266.
 - concentration and growth, (61) 213.
 - copper-iron mixture for cattle and swine, (69) Fla. 248.
 - estimation in mixed feeds, Tex., (65) 615; (66) 207.
 - for curing meat, quantity, (65) N.C. 165.
 - for growing chicks, Ind., (63) 562; (67) 588.
 - in cheese, estimation, (70) 446.
 - in soil flooded by sea water, (70) 734.
 - iodized, controversy on use, (64) 599.
 - ions and enzymes, (70) 754.
 - marsh vegetation, relation to mosquito breeding, (64) 160.
 - medicated, as fly repellent, (63) 360.
 - mixture, modified Osborne-Mendel, (67) 183.
 - mixture, Osborne-Mendel, with only inorganic constituents, (67) 774.
 - mixtures of minimum toxicity for plants, (63) 516.
 - organisms in, relation to reddening of salted hides, (70) U.S.D.A. 151.
 - requirements of chicks, (69) Wis. 839.
 - requirements of work mules, (62) Miss. 163.
 - River Valley project in Arizona, economic survey, (62) 281.
 - sick, cause and prevention, (66) Fla. 59.
 - solutions—
 - and sea water, corrosion of metals in, (69) 724.
 - effect on pot plants, (66) 142.
 - evaporation from, (69) 722.
 - for wheat growth, toxicity, additive effects, and antagonism, (61) 818.
- Saltbush—**
- Australian, composition and digestibility, (62) Colo. 60.
 - species in South Australia, culture, (68) 472.

Salts—

- acids, and bases; electrolytes; stereo-chemistry, treatise, (62) 310.
effect on gelatin, (68) N.Y.State 576.
effect on proteins, (66) N.Y.State 501.
in soil, movement under irrigation, (68) 739.
- Salvarsan, injuries resulting from intravenous administrations, (69) 710.
- Salvia, development of the hilum in, (62) 136.
- Salviastrum dolichanthum n.sp., description, (65) Tex. 817.
- Samia cecropia spread, (62) 242; (63) 151.
- Sampling theory, phases, (66) 803.
- San Jose scale—

- a serious menace, (64) 239.
- control, (61) Oreg. 53, Kans. 137, N.Mex. 247, Idaho 848; (62) Mo. 40; (64) Oreg. 357, Okla. 738, Mo.Fruit 839; (66) Ill. 245; (67) 283, 708; (68) Ill. 637; (69) 232; (70) Ill. 648.
- control, community action in, (70) 356.
- control, effect of Bordeaux mixture on efficiency of oil emulsions, (61) Ind. 353; (63) 355.
- control, efficiency of tar distillate sprays, (69) 239.
- control in Northwest, (66) U.S.D.A. 52; (69) 545.
- control with oil sprays, (65) N.Mex. 245.
- importance, (67) 705.
- in Georgia, effect of low temperature, (69) 685.
- in Maryland, (67) 565.
- in Union of South Africa, (69) 556.
- notes, (69) N.Mex. 232, 547, Idaho 824; (70) U.S.D.A. 499.
- oil emulsions for, (63) N.Mex. 455.
- on peach trees, control, (66) U.S.D.A. 155.
- return to Michigan, (67) Mich. 53.
- sterility in, (62) 653.
- tests of spray materials, (67) 561.
- tests with paradichlorobenzene-oil emulsion, (65) 50.
- tolerance to insecticides, (70) 500.
- winter mortality, (66) Mo. 346.

Sand—

- and calcium bentonite mixture as growth medium in pot culture, (69) 782.
- and gravel industry, simplification of sizes in, (62) U.S.D.A. 882.
- blows, inland, control, (63) Mich. 96.
- cherry seedlings, description, (63) S.Dak. 40.
- culture apparatus, large, (65) 208.
- flies, notes, (70) U.S.D.A. 499.
- flies of Italian foci of visceral leishmaniasis, (65) 361.
- flies, salt marsh, studies, (69) 243, 267.
- flies, studies, new method in, (69) 243.
- for concrete on farm, test for impurities in, (64) 779.

Sand—Continued.

- hills, plant ecological features, (63) N.C. 647.
- injury to leaves and fruits, (70) 168.
- lands, study by Iowa Station, (70) 732.
- Norfolk, reaction and replaceable bases, effect of nitrogen, (64) 424.
- organic impurities in, measurement, (69) 327.
- shifting, prevention, (65) Mich. 742.
- traps, vortex-tube and raffle-deflector, development, (70) Colo. 687.
- washed, use in greenhouse culture, (67) Ohio 36; (68) 192.

Sandal—

- physiology, (66) 724.
- seedling damping-off, notes, (67) 265.
- spike disease, (69) 380.
- entomological investigations, (70) 358.
- intracellular bodies in, (66) 447; (67) 264.
- papers on, (67) 48.

- Sandy lands, crop experiments on, (69) Minn. 201.

Sandy soils—

- effect of manure, (67) Wis. 657.
- growth of pine in, (65) 233.
- humus-poor, treatment with peat soil, (63) 116.
- liming, effect, (65) Fla. 415.
- magnesia deficiencies, N.C., (61) 718; (65) 114; (70) 746.
- success with, (63) Wis. 513.

- Sanitation, importance in prevention and control of bovine tuberculosis, (65) 267.

Santonin—

- and chenopodium oil, relative toxicity, (64) 474.
- as anthelmintic for swine, (65) 572.

Sap—

- ascent in plants, method for tracing, (61) 627.
- ascent, relation to living cells, (66) 215.
- movement in plants, (64) 212.
- pressure and movements, (70) 756.

- Saperda candida, *see* Apple tree borer, round-headed.

- Sapodilla, culture experiments, (64) Guam 835.

Saponin—

- as insecticide, contact angles, (68) N.H. 216.
- hemolysis, effect of H-ion concentration, (63) 412.

- Saponins, poisonous action, (67) 452.

- Saprophytism and parasitism, relation, (63) 243.

- Sarcocystis blanchardi in Philippine carabao, (64) 267.

Sarcoma—

- of fowls, studies, (70) 526.
- rous, cells and filtrates, production of tumors in pheasants, (68) 825.
- rous, in fowls, pH of blood, (69) 115.

Sarcoma—Continued.

rous virus, electrical charge, (66) 874.
spindle-cell, involving spinal cord of pig,
(70) 682.

Sarcomata of fowls, studies, (68) 244.

Sarcophaga—

diatraeae, notes, (63) 257.
haemorrhoidalis, notes, (64) 248.
kellyi, notes, (63) U.S.D.A. 752.
sima, notes, (66) Ala. 847.
spp., notes, (62) 856; (63) 257; (68)
647.

Sarcophagia, use of term, (70) 388.

Sarcosporidia—

critical review, (63) 573.
hemotoxin in, (63) 771; (65) 772.
in Korean cattle, (62) 167.
of bovines in Switzerland, (69) 715.

Sarcosporidiosis in ducks, (63) 777; (66)
179.

Sarcostemma australe, poisonous to livestock,
(67) 597.

Sardine—

meal, feeding value, (65) Calif. 764.
oil, antirachitic value for chicks, (69)
845.
oil as source of vitamin D, (67) Calif.
588; (68) Wash.Col. 796; (70) 233.
oil, comparison with cod-liver oil as to
vitamin content, (65) 397.

Sardines, dried, vitamin D and proteins in,
effect of methods of drying, (69) Me. 410.

Sarson, breeding, (66) 329.

Satin moth—

control, (64) 52; (70) U.S.D.A. 501.
control by spraying in alternate years,
(66) U.S.D.A. 351.
European, host adaptation, (63) 354.
in British Columbia, (64) 358.
in maritime provinces, (66) 347.
natural enemies in central Europe, (66)
U.S.D.A. 54.
notes, (63) 354, Conn.State 651.
parasite, biology and habits, (65) 758.
quarantine, Conn.State, (62) 599; (66)
496.
quarantine, change in, (68) Conn.State
65.
spread, Conn.State, (63) 453; (64) 849;
(65) 451; (68) 65; (69) 546.

Saturnioids, American, taxonomic observa-
tions, (62) 650.

Satyrid, variable palearctic, (62) 647.

Sauerkraut—

canned, vitamin C in, (63) Wis. 94;
(70) 570.
commercial, quality, (68) N.Y.State 443.
commercially canned, vitamins in, (63)
693.
effect of inoculation on quality, com-
position, and bacterial flora, (70)
N.Y.State 442.
fermentation, changes in flora, (64)
N.Y.State 414.
fermentation rate, relation to tempera-
ture, (68) N.Y.State 442.
fresh, and juice, vitamin C in, (62) 588.

Sauerkraut—Continued.

home-made, (66) N.Y.State 115.
home-made, vitamin C in, (61) Wis. 194.
making, gas production in, (61) 712.
manufacture, (65) N.Y.State 807.
quality and composition, effect of pure
culture inoculation, (64) N.Y.State
415.
quality, effect of fermentation tempera-
ture, (62) 11.
quality, effect of washing cabbage, (63)
Wis. 13.
research, fellowship for, (63) 400.
studies, (70) N.Y.State 740.
vitamin C in, (64) 695; (68) 861.

Sausage—

composition, (68) U.S.D.A. 122.
inspection, (61) Me. 693.

Sawdust briquets from waste wood, (67)
465.

Sawflies—

infesting Ribes, biology, (67) 441.
leaf-mining, new parasites of, (68) 507.
new, in forests of Canada, (69) 561.
of subfamily Dolerinae, (65) 657.

Sawfly—

affecting pines in Mexico, (69) 561.
birch leaf-mining, life history and
morphology, (69) Conn.State 399.
black-male, bionomics, (64) 463.
cattle-poisoning, notes, (67) 441.
European, on spruce, (68) 74.
European wheat stem, parasite of,
morphology and life history, (66)
354.
larch, and forestry, (62) 648.
larch, as indicator of mouse abundance,
(62) 251.
larch, control, (67) 157.
larch, in Canada, status, (65) 553.
larvae, contact angles of insecticides,
(68) N.H. 216.
new species on pine, (67) 441.
new tachinid parasitic on, (64) 548.
western grass-stem, on small grains,
(62) U.S.D.A. 548.
western wheat stem, effect on spring
wheat crop in Canada, (61) 452.
wheat, European, parasite of, morphol-
ogy and life history, (66) 354.
wheat stem—
control, (64) 358.
increase in western Canada, (67)
283.
parasites of, (67) 156.
value of trap crops, (62) 541.
white birch leaf mining, in northeast-
ern States, (67) 721.

Sawmill, portable band, new type for lob-
lolly pine, (68) U.S.D.A. 768.

Sawmilling industry in Kentucky, (68)
U.S.D.A. 696.

Scab—

control, new and old materials for,
comparison, (69) Mich. 68.
gnats, relation to potato tuber defects,
(70) N.Y.Cornell 803.

- Scab—Continued.
infection in greenhouse, control, (63) Wis. 46.
spraying for, success and failure in, (70) 356.
- Scabby mouth in sheep and goats, (65) 71.
- Scabies, eradication, (70) U.S.D.A. 526.
- Scaeva pyrastris, notes, (63) Wis. 52.
- Scale insect—
honeydew from incense cedar, (69) 555.
new, on beech, (68) Conn.State 66.
- Scale insects—
and Septobasidium, biological relation, (69) 372.
bionomics and control, (61) 250.
California soft, characteristics, (64) 238.
control, innovation in, (63) 848.
fungal parasite of, (62) 360.
new conifer-infesting, from Japan, (67) 711.
on citrus, control, (63) Tex. 456; (66) 449.
on citrus in China, (62) 650.
on citrus in Egypt, new spray for, (63) 256.
on citrus, timing sprays for, (70) 211.
on cranberries, spray tests, (63) Wash. Col. 252.
on fruit trees, control, (67) 561.
on pine, biotic control, (66) 452.
protective stupefaction, (63) 157.
resistance and population density, (67) 570.
studies, Miss., (62) 54, 152; (68) 351.
timing of oil sprays for control, (66) Ala. 846.
- Scale—
masked, in Egypt, (70) 809.
menace to Virginia orchards, (69) 386.
obscure, notes, (70) U.S.D.A. 499.
obscure, on pecans, biology and control, (70) U.S.D.A. 808.
pustule, control, (65) V.I. 737.
soft brown, notes, (69) Tex. 384.
soft, injurious to deciduous ornamentals, (63) Mich. 356.
- Scalectide, insecticidal value, (64) Mich. 239.
- Scales—
control with dormant sprays, (68) Wash.Col. 780.
visited by ants, control, (65) 60.
white wax, in Australia, (68) 785.
- Scapanes australis on coconut palms, (65) 58.
- Scaptomyza graminum, notes, (61) 240.
- Scarabaeidae—
Chinese, list, (68) 506.
morphology, taxonomy, and biology, (64) 161.
- Scarabanema cylindricum n.g., and n.sp., description, (65) 361.
- Scello calopteni, notes, (63) U.S.D.A. 752.
- Sceliphron caementarium, metamorphosis, pH changes of body fluids during, (69) 696.
- Scelodonta vitis, notes, (66) 156.
- Schistocerca—
gregaria—
biology and control, (65) 359.
control, (62) 56.
control, flame throwers for, (66) 450.
in Armenia, (62) 542.
in east Africa, (70) 63.
in Egypt, (69) 688.
invasion of Palestine, (62) 853.
notes, (63) 845; (68) 640.
summary, (63) 355.
peregrina, control in Transjordan, (63) 848.
shoshone, notes, (66) Utah 648.
spp., studies, (61) 54.
- Schistosoma—
bovis and matthei, bilharzia complement fixation reaction, (70) 533.
bovis and matthei in Iraq, (68) 378.
haematobium eggs, development in cattle and sheep, (68) 378.
indicum in equines in India, (69) 860.
japonicum, parasite of rats, (64) 237.
mansoni, notes, (62) P.R. 771.
n.sp., life history notes, (63) 171.
nasalis n.sp., notes, (69) 858.
of human blood, life history film, (62) 241.
spindalis, notes, (69) 587.
- Schistosomes in bovine nasal granuloma tissue, (69) 588.
- Schistosomiasis in man and animals, control, (63) 171.
- Schistosomum turkestanicum—
in cattle, lesions caused by, (66) 70.
in Manchurian cattle, (66) 867.
- Schizocerocephala leiby, notes, (62) Va.Truck 859.
- Schizocercus spp., synonymy, (62) Va.Truck 859.
- Schizophyllum commune, notes, (63) N.C. 646.
- Schoenobius bipunctifer—
in China, (69) 234.
notes, (67) 286.
- Schoenobius incertellus—
effect of low temperatures, (69) 391.
egg parasite of, (63) 261.
life history, (64) 247.
notes, (61) 357.
- School—
administration, county unit in, (63) 691.
children, see Children.
courses in home relations, objectives, (65) 90.
education, public, constitutional basis, (66) 484.
financing and taxation in Colorado, (66) Colo. 86.
financing in Michigan, (65) Mich. 82.
government, local units, criteria for selection, (68) 548.
library service, rural, State direction of, (63) 890.

School—Continued.

lunch, hot, equipment and procedure, (64) 284.
revenue from income taxes, (63) 888.

Schools—

agricultural, *see* Agricultural schools.
elementary, feeding in, (67) Mass. 477.
elementary, new course of study for, (66) 483.
elementary rural, food service in, (63) Mass. 593.
elementary, school feeding and transportation, (61) Mass. 891.
folk high, of Denmark and development of farming community, (62) 187.
high, for farm boys and girls, (63) S.Dak. 787.
preparatory, physical unfitness in, (69) 306.
public, home economics in, statistical survey, (69) 459.
public, state taxation systems, (61) 287, 883.
rural—

county library service, (64) 280.
curriculum revision, (61) 579.
fundamental needs, (64) 689.
high, living conditions of boarding students in, (64) Miss. 692.
high, number and size in United States, (64) 280.
high, vocational trends, (64) U.S.D.A. 190.
organization in Michigan, (69) Mich. 302.
relation to county child welfare program, (68) 548.
studies, (63) S.Dak. 86.
support for, rank of Delaware, (66) Del. 584.

Sciara—

chromosomes, selective segregation in, (68) 748.
coprophila, sex studies, (62) 512.
eggs, chromosome elimination during cleavage in, (68) 746.
larvae control, (61) 354.
nitidicollis, structure and life history, (65) 250.
pullula larvae, nematode parasite, (69) 838.
sex determination in, (61) 822; (63) 28.
spp., biology and control, (66) Pa. 756.
unisexual progenies and sex chromosome mechanism, (63) 27, 28.

Science—

and the farmer, (61) 285.
application to crop production, treatise, (62) 701, 796.
related to home, teaching, (69) 142.
serving agriculture, (70) U.S.D.A. 142.
Scientific Society of the Hygiene of Nutrition, (62) 597.

Scirpophaga—

auriflua, injury to sugarcane, (65) 355.
auriflua intacta, studies, (70) 357.

Scirpophaga—Continued.

innotata, control, (70) 212.
intacta, notes, (67) 562.

Scirtothrips—

batatae n.sp., description, (64) 749.
citri, *see* Citrus thrips.
dorsalis, notes, (68) 783.
in Egypt with key to species of world, (70) 807.

longipennis in San Francisco, (66) 754.
mangiferae n.sp., description, (70) 807.

Sclerophoma—

entoxylina n.sp., notes, (62) 538.
magnusiana n.sp., description, (65) 751.

Sclerospora—

graminicola, notes, (61) Iowa 344.
graminicola setariaeitalicae, studies, (70) 489.
macrospora, notes, (69) 534.
philippinensis on teosinte, (62) 443.
sp., notes, (68) 769.

Sclerotinia—

americana—
notes, (69) 537.
proposed name, (65) 540.
two fungi on apothecia, (61) 348.
and Monilia species, taxonomic position, (61) 845.
bulborum, notes, (65) 542.
candleana, notes, (64) 236.
cinerea, notes, (61) 348; (65) 540; (67) 410.
cinerea pruni, notes, (64) Oreg. 346.
fructicola, notes, (68) U.S.D.A. 632.
fructigena, cause of apple canker, (69) 376.
fructigena, notes, (61) 653; (64) 48; (65) 540.
gladioli, notes, (68) Oreg. 213.
gladioli, sexual function of microconidia in, (69) N.Y.Cornell 61.
hyphae, structure and composition, (63) Ohio 45.
libertiana, notes, (61) 841.
oxycoeci damage to cranberry bogs, (68) Wash.Col. 769.

sclerotiorum—

effect of acids, (63) 243.
hyphae, outer covering, (64) Ohio 644.
notes, (63) 245, 839; (64) West. Wash. 646; (69) N.Y.Cornell 61, Tex. 541.
on beans in shipment, (69) 813.
on carrots, (68) 54.
spores, overwintering, (65) Calif. 744.
sp., notes, (63) N.C. 646, 839.
trifoliorum, notes, (63) Idaho 523; (64) 743; (70) Ky. 192, Ky. 794.
tuberosa, notes, (67) 690.

Sclerotium—

bataticola, notes, (64) 230; (70) Tex. 192.
cepivorum, notes, (62) 536; (67) 405.
coffeicolum, notes, (61) 648; (67) 400.
delphinii, notes, (70) 646.

- Sclerotium—Continued.
 disease of coffee in British Guiana, (68) 633, 634.
 disease of tomato and pepper, (61) 651.
 disease of wheat, (68) Idaho 340.
 dry rot of gladiolus, notes, (63) 44.
 fumigatum, morphology and cultural characters, (69) 664.
 gladioli n.sp., description, (66) 344.
 gladioli, notes, (65) 542, Mich. 745.
 oryzae, ascigerous stage, (70) 636.
 oryzae, notes, (62) Ark. 845; (65) 344; (67) La. 268; (69) 225, 534; (70) Ark. 796.
 rhizodes, notes, (61) Mass. 840.
 rolfsii—
 notes, (62) 535; (63) Tex. 448; (64) 350, Tenn. 351, 846; (65) Ga. 142, 542; (66) 147; (67) Tex. 546; (68) Oreg. 213, 344, 769.
 on beans in shipment, (69) 813.
 on peppers, control, (61) Ga. 144.
 on strawberry roots, (69) Fla. 221.
 on sweetpotato sets, (63) Fla. 644.
 studies, (61) 650, 651, 842.
 spp., notes, (66) 152; (68) 57.
 tulparum, notes, (65) 542.
- Scolecosomes and similar bodies in mosaic-diseased plants, (65) 443.
- Scolia—
 formosa, notes, (65) 59.
 manilae, notes, (65) 497.
- Scoliidae, natural enemies, (67) U.S.D.A. 582.
- Scolopendrellidae, biological notes, (61) 850.
- Scolothrips sexmaculatus, notes, (61) U.S. D.A. 157; (66) Fla. 254.
- Scolytid beetles, spread of Dutch elm disease by, (67) 284.
- Scolytids, biology, (62) 242.
- Scolytus—
 amygdali, biology, (68) 649.
 destructor, nematode infesting, (65) 551.
 destructor, notes, (69) 560.
 multistriatus, notes, (70) 651.
 quadrispinosus, *see* Hickory bark beetle.
 rugulosus, *see* Shot-hole borer.
 scolytus, relation to Dutch elm disease, (69) 70, 245.
 spp., biology, (70) 201.
 spp., vectors of Dutch elm disease, (70) U.S.D.A. 512, 646.
- Scopelodes venosa, notes, (68) 499.
- Scorias spongiosa, notes, (66) 147.
- Scotorythra paludicola, notes, (68) 499.
- Scouring rush, poisonous to livestock, (65) Ind. 70.
- Scours in sheep and goats, (61) Oreg. 768.
- Screeners, portable, for use with Paris green diluents, (66) 849.
- Screens, electrified, on farm buildings, (66) 654.
- Screw threads, friction, (69) 120.
- Screw worms, notes, (70) U.S.D.A. 499.
- Scrip and barter in United States, bibliography, (69) U.S.D.A. 139.
- Scrotum of swine, characteristic hemangioma in, (65) 568.
- Scurfy scale—
 control, (67) 708.
 oil emulsions for, (69) 824.
- Scurvy—
 and antiscorbutic vitamin, (67) 491; (68) 414.
 development, relation to adrenal cortex, (69) 475.
 diagnosis, review of methods, (70) S. Dak. 880.
 effect on adrenals, (69) 619, 620.
 epidemic, treatment, (70) 426.
 experimental—
 blood formation in, effect of vitamin C diet, (68) 419.
 criterion of hemorrhagic diathesis, (66) 795.
 nitrogen balance and C/N coefficient of urine, (61) 296.
 production, (69) 105.
 studies, (63) 896.
 tooth growth in, (63) 696.
 following an ulcer diet, (66) 494.
 glucuronic acid in, (69) 762.
 in adults, effect of food rich in vitamin C, (64) 590.
 in guinea pigs, production, (62) 198.
 in man, sensitive test for, (70) 728.
 lesions in skeletal muscles, (63) 695.
 loss of potency of suprarenals in, (70) 426.
 metabolism in, (61) 296.
 recovery from, source of intercellular substance in, (70) 880.
 studies, (61) 595.
- Scutigera immaculata, *see* Centipede, garden.
- Scymnus—
 smithianus, notes, (68) U.S.D.A. 219.
 sp., notes, (61) 549.
- Sea bottom, organic matter distribution in, (70) 18.
- Sea water—
 concentration effect with, (68) 461.
 effect on mold in cacao beans, (61) 847.
- Seal, fur, of California islands, (65) 352.
- Seasons, beginning, length, and progress, guides to, (68) 588.
- Seaweed, edible, iodine in, (70) 839.
- Secodella acrobasis, notes, (63) 151.
- Secotium acuminatum, sterol production and antirachitic activatability, (65) 398.
- Sectonema, new genus, erection, (64) 153.
- Sedge, native, analyses, (69) Alaska 36.
- Seed—
 bed preparation studies, (64) Kans. 828; (67) Tex. 668; (70) Tex. 173, Wyo. 763.
 beds and forcing frames, electricity for, (70) 258.
 caterpillar on clover in Oregon, (65) 758.
 cleaners and scarifiers, (70) U.S.D.A. 538.

Seed—Continued.

- coat color in beans, inheritance, (66) 727.
- coats which respond to light during germination, role, (66) 123.
- commissioner, report, (66) Idaho 32.
- control, (62) Mont. 219.
- control, papers on, (62) 135, 136.
- control station, Hungarian, in Budapest, activities, (61) 639.
- counter, description, (61) U.S.D.A. 34.
- disinfectants—
- for corn, relative efficiency, (65) 235.
 - for hull-less barley, (65) 235.
 - for oat smut, (65) Mich. 149.
 - tests, (61) 842.
- drill, movements of seeds and fertilizers in, apparatus for motion pictures of, (62) 673.
- extracts, properties, (70) 598.
- flax, variety tests, (70) Ill. 609.
- flight in Douglas fir region, (63) 739.
- improvement program, (63) 329.
- laboratories, working libraries of, (62) 136.
- law of Colorado, text, (66) Colo. 735.
- law of Idaho, text, (67) Idaho 384.
- law of Massachusetts, text, (61) Mass. 334.
- laws and regulations of Maryland, (69) Md. 520.
- laws, papers on, (62) 135, 136.
- protein, peptizing effect of inorganic salts, (68) Minn. 10.
- proteins, physicochemical properties, (62) 202.
- repellents for wireworms, studies, (64) Pa. 155.
- stocks injured by prolonged drought, vitality, (68) N.Y.State 617.
- testing—
- and inspection, (69) Mont. 46.
 - and miscellaneous studies, (68) Mont. 754.
 - botany of, (62) 136.
 - laboratory, work, (62) N.Y.State 430.
 - methods, European and American, (62) 136.
 - papers on, (67) 522.
 - station for England and Wales, report, (63) 732; (65) 533; (69) 208; (70) 615.
 - station of New Zealand, work, (63) 233; (65) 533.
 - statistical methods in, (62) U.S.D.A. 227.
 - trends in, (63) 337.
- tests, (62) N.H. 334; (63) N.Dak. 820; (64) N.H. 337, N.Y.State 433; (66) N.H. 330; (67) Iowa 378, Me. 673; (68) N.H. 327; (69) Iowa 38, Me. 519; (70) N.H. 473, Vt. 473.
- treated with cathode rays, effect, (62) 136.

Seed—Continued.

- treatment, (63) Wash.Col. 244; (66) 643; (70) N.J. 475.
- beneficial effects, (66) Ill. 235.
 - dry, new preparations for, (67) 266.
 - for control of plant diseases, (64) U.S.D.A. 349.
 - tests for cotton, (61) Miss. 446.
 - use of hot water and organic mercurials, (66) N.Y.State 151.
- treatments of wheat, comparison, (61) Utah 47.
- weevil, notes, (63) Mo. 750.
- weevils, morphology and biology, (65) 551.
- Seed-corn maggot—
- and bacteria, relation, (65) 360.
 - biology and control, (68) 791.
 - effect on potato seed pieces, (65) Me. 748.
 - life cycle and habits, (64) 462.
 - notes, (61) Kans. 146, Iowa 353; (64) Mich. 240; (66) Mich. 154; (68) Mich. 351.
 - on spinach, (70) Tex. 207.
 - on tobacco, (65) Conn.State 356.
 - on young tomato plants, (65) Tenn. 851.
 - relation to potato blackleg, (62) Me. 644; (65) 360; (66) Minn. 241; (68) Minn. 56.
 - studies, (69) 694.
 - unreported habit, (69) 824.
- Seedlings—
- assimilation of ammonia, effect of carbohydrates, (64) 328.
 - growth, effect of pH of nutrient solutions, (61) 627.
 - growth, effect of polarized light, (63) 815.
 - growth in light and in darkness, relation to food reserve, (65) 517.
 - mineral nutrition and chlorophyll development, (63) 622.
 - mutilated, regeneration in, (69) 782.
 - root development, effect of nutrient conditions, (66) 332.
 - root development, relation to soil texture, (70) 633.
- Seeds—
- Act of Canada, amendments and regulations, (68) 616.
 - analysis, (61) Vt. 34, 334; (62) Vt. 733; (63) 732; (65) 532, Vt. 532; (66) Vt. 631; (67) 242; (69) 208.
 - and fruits, biology, (63) 429.
 - autolysis in, (65) 423.
 - bibliography, (67) 522.
 - carbohydrate storage in, (65) Iowa 119.
 - certification in Germany, (62) 220.
 - certification work, (65) Tenn. 825.
 - collecting for Norway pine, new principle, (65) 643.
 - coniferous, germinative energy, (62) 618.
 - effect of heat, (62) Mo. 54.

Seeds—Continued.

- electrical treatment, (68) 104.
 embryos removed from, germinative capacity, (67) 660.
 enzymes in, distribution and isolation (67) Iowa 373.
 exposure to high-voltage X-rays, effects, (69) 638.
 farm, quality, (66) Ill. 221.
 germinating—
 fatty, translocation of fats, (61) 323.
 physiology, (64) 212.
 production of carbon dioxide, temperature characteristics, (68) 744.
 utilization of atmospheric nitrogen, (70) 455, 456.
 germination, (67) N.J. 524.
 action of alkaloids on, (67) 660.
 after years of storage, (69) 363.
 and growth of seedlings, effect of ultraviolet radiation, (69) 506.
 bibliography of, (62) 834.
 biochemistry, (70) 312.
 biology, (67) 509.
 effect of calcium cyanamide, (68) 455.
 effect of crude petroleum, (61) 317.
 effect of disinfectants, (65) 44.
 effect of fumigants, (62) 510.
 effect of light of different wave lengths, (61) 515.
 effect of long-continued soaking, (65) 423.
 effect of radium, (67) 20.
 effect of selective solar irradiation, (64) 22.
 effect of temperature alternation, (61) 515.
 importance of light in, (67) 509.
 influencing, (65) 24.
 new method, (69) 188.
 oxygen-supplying power requisite for, (61) 11.
 papers on, (62) 135, 136.
 physiology, (67) 522.
 studies, (65) 24.
 variations in soil during, (63) 420.
 hard, studies, (62) Mont. 219; (65) 39; (67) 522.
 heating, quickness of killing in, (61) 629.
 imported, for testing, U.S.D.A., (61) 325; (65) 623; (66) 22; (67) 24, 115; (68) 175, 461.
 in fleshy fruits, germination, (67) 21.
 infection in different years, (63) 47.
 inspection, (61) Me. 226, Mass. 334, N.J. 437, Ind. 732; (62) Ind. 834; (63) Mass. 136, Me. 136, N.J. 136; (65) Ind. 38, Mass. 38, N.J. 39, Me. 133; (66) Ind. 735; (67) N.J. 35, Mass. 522, (68) Ind. 615, Vt. 615; (69) Mass. 363, N.J. 363.
 intermittent germination, (70) 594.

Seeds—Continued.

- investigation and valuation in German experiment stations, (61) 610.
 light-sensitive, germination, effect of oxygen, (62) 23.
 mixture problems, (61) 518.
 of garden plants, insects affecting, (65) 246.
 of northern Caucasus, weed seeds in, (67) 384.
 oil, *see* Oil seeds.
 organic reserves in, utilization by seedlings, (68) 310.
 packet, quality, N.Y.State, (61) 441; (64) 739; (69) 210.
 pretreatment, vernalization method, (70) 166.
 production and marketing, weed problems in, (63) 732.
 production and trade in Hungary, (64) 32.
 rosaceous, afterripening, germination, and storage, (66) 431.
 sale, State laws, N.J., (62) 523; (65) 634.
 scarified, germination tests, (62) 136.
 size, relation to germinability and pH in, (67) 372.
 soil medium for, (66) Ohio 233.
 stimulation, (65) 119.
 stimulation through increase or decrease of pressure, (67) 660.
 stimulation with dry media, (63) 427.
 storage tests, (70) U.S.D.A. 464.
 symbiotic association of bacteria, (66) 622.
 toxic and tolerable dosage of Uspulun, (67) 539.
 treatise, (66) 330.
 vegetable, germination, effect of fertilizers, (69) Ga. 209.
 vegetable, weed seeds in, (68) N.Y.State 617.
 viability, (70) 772.
 catalase activity as measure, (70) 752.
 determination (62) 135.
 experiment, fiftieth year, (68) 31.
 measurements of conductance and reduction, (62) 617.
 relation to phenolase activity, (68) 170.
 weed, *see* Weed seeds.
 Segregation, moment of, in higher plants, (64) 818.
 Segregations, Mendelian, seasonal effects, (64) 531.
 Selus—
 pomi, notes, (69) Wash.Col. 562.
 quadrifilis, notes, (66) Fla. 254.
 sp., notes, U.S.D.A., (61) 157; (69) 691.
 Selago corymbosa, control, (67) 243.
 Selection—
 effects on abnormalities in descendants of X-rayed mice, (66) 422.

Selection—Continued.

Haldane's theory, (61) 630.
 natural and artificial, mathematical
 theory, (63) 326; (64) 728.

Selenium—

as catalyst in Kjeldahl digestion with
 natural gas heat, (67) 204.
 as insecticide, danger from, (70) 208.
 in cereal grains, toxicity for rats, (70)
 U.S.D.A. 557.
 in wheat and soils, (70) 295.
 injury to wheat, inhibition by sulfur,
 (70) 757.
 oxchloride as catalyst in nitrogen de-
 termination, (67) 203.

Self-feeders—

for calves, (61) S.Dak. 561.
 for fattening lambs, value, (65) Minn.
 62.
 for hogs, (64) S.C. 663; (65) Wis. 64.
 for lambs, relation to high mortality,
 (64) Ohio 660.
 use in wintering dairy heifers, (63)
 W.Va. 268.

Sematuridae of South Africa, (69) 557.

Semen, human, biochemical studies, (65) 27.

Semesan Jr., fungicidal value, (64) Iowa
844; (65) N.Y.State 148.

Seminal vesicles—

histological structure, effect of castra-
 tion, (63) 432.
 of rats as indicators of testicular
 hormone, (69) 512.

Semi-wild breeding law of New Jersey, re-
sults, (70) 355.

Senecio—

riddellii, poisoning of horses by, (61)
 Nebr. 869, 768.
 spp., effect on bovines, (63) 76.
 spp., poisonous to livestock, (69) 272.
 spp., toxicity, (70) Tex. 241, 530.

Sepaloidy and sterility in *Sesamum indicum*,
(70) 462.

Sephilus formosanus, notes, (64) 249.

Sepsis, puerperal, vitamin A in liver, (68)
707.

Septic sore throat—

epidemics, bacteriology, (68) N.Y.State
 668.
 of men, gargety cows as carriers, (65)
 Wis. 470.

Septic tanks—

and sanitary privies for France, (69)
 736.
 farm, studies, (66) 81; (67) Calif. 605.
 operation, (64) Ill. 884.
 size, (68) Ill. 679.
 sludge accumulation in, (62) Ill. 381.
 studies, (69) N.J. 287.

Septicemia—

apoplectiform, in turkeys, (68) 536.
 fatal, in man, (61) 372.
 hemorrhagic—
 atypical case in carabaos, (68)
 380.
 in Bengal, (68) 90.
 in East Prussia, (65) 868.

Septicemia—Continued.

hemorrhagic—continued.

notes, S.Dak., (68) 811; (70) 825.
 of cattle, (67) 596; (68) 376; (70)
 675.

of reindeer, (69) 710.

organisms, variability, (67) 451.
 prophylactic vaccine against, (70)
 91.

relation to pullorum disease, (69)
 578.

of honeybees, (62) 649.

of pigs, (69) 580.

puerperal, treatment, (62) 294, 560.

Septicemias of young mules, cause, (70) 247.

Septicemic disease of fowls, (65) N.J. 874.

Septicemic infection, fatal, of goats, (66)
573.

Septobasidium—

and scale insects, biological relation,
 (69) 372.

bogoriense, notes, (64) 847.

Septomyxa affinis on tobacco, (67) 550.

Septoria—

apii, control, (64) Ohio 350.

apii, notes, (69) 532.

apii-graveolentis, notes, (68) Mich. 491.

azaleae in Japan, (69) 229.

callistephi on aster seed, (65) N.Y.State
 741.

callistephi on China aster, (69) 229.

chrysanthemella and Septoria obesa,
 comparison, (61) 654.

gaillardiae, notes, (67) 264.

gladioli, notes, (61) N.J. 743; (65) 542.

glycines, studies, (66) 147, Del. 543.

graminum, notes, (61) 841.

leaf spot on tomato, (61) Ind. 342;
 (64) Kans. 846.

melissae, notes, (61) 841.

obesa and Septoria chrysanthemella,
 comparison, (61) 654.

sp., notes, (65) 646.

spp. in Japan, new or noteworthy, (69)
 229.

spp., notes, (67) 694.

tritici, notes, (67) 537; (69) 64.

Serica—

brunnea, control in coniferous nursery
 stock, (67) 293.

similis, distribution and abundance in
 New York, (61) 556.

Sericulture, see Silk and Silkworms.

Serine, alkaline decomposition, (66) 711.

Serological-botanical studies, (69) 343.

Serratia marcescens as indicator of efficient
pasteurization of milk, (61) 867.

Serrrodes partita, notes, (61) 550.

Sesame—

meal as protein supplements, (67)
 Calif. 588.

meal v. cottonseed meal and peanut
 meal for lambs, (68) 228.

production tests, (70) Ariz. 761.

research in India, (66) 131.

wilt, notes, (64) 230.

- Sesamia—
 cretica, notes, (70) 356.
 inferens, life histories, (64) 247.
 inferens, notes, (67) 562.
 nonagrioides in France, (65) 249.
- Sesamum—
 breeding experiments, (61) 29.
 indicum, biology and types, (65) 530.
 indicum, malformation and proliferation, (64) 230; (65) 441.
 indicum, summary, (68) 758.
- Sesamums, Burmese, classification, (70) 472.
- Sesbania—
 for green manure, planting tests, (68) Ariz. 753.
 root rot resistance, (66) Tex. 43.
- Setaleyrodus new genus, erection, (67) 432.
- Setaria—
 labiata-papillosa from udder of cow, (69) 268.
 spp., new, of deer and reindeer, (62) 269.
- Seurocyrnea colini, developmental stages, (65) U.S.D.A. 181.
- Seurocyrnea colini, notes, (69) 268.

- rationing to cows, (69) 705.
- rye, for dairy cows, (68) Mont. 806.
- sorghum and guinea grass, comparison, (61) 558.
- sorghum, as source of vitamin A for cows, (69) Tex. 100.
- sorghum, cost of producing and storing, (64) Ala. 386.
- sorgo, effect of stage of maturity, (69) Kans. 257.
- sorgo, feeding value, (61) Kans. 167.
- sorgo, varieties for milk production, (69) Kans. 257.
- soybean, feeding value, (65) Fla. 467.
- soybean, for dairy cows, (67) Fla. 593.
- spoilage prevention by covering cut corn, (64) Ill. 870.
- stover, feeding value, (62) Ill. 362.
- stover, with oats, feeding value, (64) Ill. 862.
- studies, (61) Kans. 168; (64) Kans. 873; (66) Colo. 162.
- sunflower, feeding value, (70) Mont. 822.
- sunflower, measurements, (68) Wyo. 806.
- sunflower, proteins in, biological value, (62) 657.
- sunflower, v. swedes for lactating dairy cows, (68) Mich. 236.
- v. beet pulp and molasses mixture for cows, (63) Ohio 668.
- v. mixed hay, (64) Ill. 862.
- weight determinations, (69) Kans. 257.
- without hay for dairy cows, (70) Ohio 669.

Silica—

- determination of manganese in presence of, (62) 203.
- effect on determination of plant ash constituents, (66) 806.
- forms, effect on determination of fluorine, (66) 804.
- gel, absorption of calcium ions by, (63) 423.
- gel, addition to Portland cement mortars, effect, (62) 569.
- gel, adsorption, theory and applications, (69) 323.
- gel, density of water films adsorbed on, (65) 504.
- gels, sorption phenomena in, (67) 110.
- hydrated, calcium hydroxide absorption by, nature, (63) 423.
- in forage crops, effect of fertilizers, (62) 549.
- in phosphate rock, determination, (64) 509.
- in tissue, micro gravimetric determination, (69) 170.

Silicates—

- fertilizing value, (64) 122.
- soluble, in industry, treatise, (62) 707.

Silicic acid—

- precipitated, dehydration by ignition, (62) 806.
- sol, titration curves, (70) 20.
- use as fertilizer, (68) 742.

Silk—

- air permeability, effect of weighting, (67) 781.
- bactericidal effectiveness of home laundering methods, Wash.Col., (66) 798; (68) 135.
- fabric, weighted, studies, (61) 95; (62) 793.
- fibroin, basic amino acids in, determination (67) 9.
- fibroin, changes caused by tin weighting, (69) 906.
- filaments, tensile properties, (69) 315.
- manufacture, technology and fiber research, (68) 423.
- natural, dispergation and aggregation in aqueous solutions of neutral salts, (69) 324.
- of different origins, regain, (69) 315.
- quantitative estimation, (69) 476.
- swelling, (69) 315.
- washable, effect of laundering and exposure to light, Ohio, (64) 196, 696; (67) 93; (68) 282.
- weighted and unweighted—
 - breaking and bursting strength, (65) Ohio 696.
 - breaking strength, effect of storage in dark, (67) 492.
 - effect of artificial perspiration, (67) 781.
 - effect of dry cleaning, (62) 794.
 - effect of home laundry methods, (62) 794.
 - properties, effects of light and air, (67) 492.

Silkworm—

- broods, grasserie in, (63) 356.
- eggs, preservation, (67) 286.
- eggs, spring, qualities, (67) 286.
- muscardine, pathogeny, (62) 544.

Silkworms—

- and parasites in New Caledonia, (64) 455.
- artificial parthenogenesis, (70) 655.
- color relation to environment, (62) 648.
- culture in Punjab, (64) 359.
- development, effect of humidity, (70) 649.
- disease in, effect on cocoons, (67) 711.
- diseases affecting, (61) 55; (66) P.R. 247.
- double cocoon formation in, (62) 648.
- effect of light and temperature, (70) 506.
- eri or castor oil, introduction from India into Egypt, (67) 433.
- flacherie disease, (67) 152.
- life history and growth, (63) 356.
- linkage in, (62) 620.
- relation of blood constituents to flacherie, (62) 452.
- solubility of acid lead arsenate in the alimentary tract, determining, (64) 855.
- studies, (63) 846; (67) 286, 433.
- susceptibility to lead arsenate, (67) 563.
- toxicity of coal-tar dyes for, (68) 220.
- voltinism of, (62) 620.
- wild, life history, (65) 547.

Silo—

- laboratory, type for test of new forage, (70) 513.
- other uses than storing corn, (70) Ohio 669.
- walls, preservative treatments, (69) 733, 734.
- walls, thermal conductivity and surface treatment, (70) Iowa 110.
- walls, treatment, (67) Iowa 462.

Silos—

- and silage, newer developments, (68) Ohio 510.
- construction, and silage, (63) U.S.D.A. 584.
- ensilage, and silage in Kenya, (69) 840.
- filling—
 - data, (66) Mo. 376.
 - ensilage harvester method, (70) Pa. 393.
 - labor requirements, (65) Conn-Storrs 781.
 - methods and costs, (65) Mo. 676.
 - tests, (64) Oreg. 384.
 - with field silage harvester, (69) Minn. 123, 440.
 - with electric motor, (61) 881; (62) 571; (64) Nebr. 183.
- inexpensive, for Kansas, (68) 838.
- pit, construction, (63) U.S.D.A. 584.
- steam, for potatoes, construction and operation, (66) 380.

- Silos—Continued.
trench—
and upright, comparison, (70) U.S.D.A. 263.
construction, (65) Ala. 479; (66) Colo. 162, 476; (67) 611.
construction and use in humid regions, (65) 254.
construction, filling, and use, (66) Colo. 184.
design, construction, and use, (64) 272.
inexpensive machine for filling, (68) Ala. 261.
- Silt sampler, new type for water studies, (70) 539.
- Silvanus surinamensis—
natural enemies, (64) 359.
on dried fruit, (61) 850.
- Silver—
leaf, cause and control, (68) 494.
mite on prunes, (69) Idaho 824.
nitrate-potassium cyanide solution in vacuo for bulb sterilization, (69) 823.
spot, notes, (63) 44.
sulfate and various dithio acids, reaction, (65) 204.
- Silverberry bush, feeding value, (62) Alaska 160.
- Silverfish—
as household pest, (65) U.S.D.A. 757.
notes, (66) Idaho 244.
- Silviculture—
research needs for future in, (70) 633.
upon ecological foundations, treatise, (63) 447.
- Simaethis—
nemorana, morphological and biological notes, (68) 786.
pariana, notes, (64) 358.
- Simmondsia californica seeds, liquid wax oil, (70) 439.
- Simuliidae in Hannover, control, (70) 92.
- Simulium—
occidentale, transmission of Leucocytozoon smithi in turkeys by, (68) 825.
sp. attacking horses and cattle, (69) 105.
spp. in Michigan, biology, (67) 715.
venustum, transmission of Leucocytozoon anatis in ducks by, (69) 281.
virgatum, notes, (63) 354.
- Sinalbin as indicator, (69) 489.
- Sipha—
flava, notes, (61) 539; (62) 153.
minuta n.sp., description, (68) 784.

and other agave fibers, (66) 427.
as fiber crop for binder twine, (66) U.S.D.A. 225.
diseases in Kenya Colony, (64) 145.
diseases, notes, (67) 401; (68) 488.
production, (62) 831.
production and preparation, (68) 612.
waste, use as source of power alcohol, (62) 672.
- Sitao, vitamins A and B in, (63) 692.
- Sitodrepa panicea, *see* Drug-store weevil.

Sitona—

- hispidula, *see* Clover root curculio.
- lineata, monograph. (67) 293.
- spp., biology, (69) 233.

Sitones hispidulus, notes, (64) Kans. 852.

Sitophilus—

- granaria, *see* Granary weevil.
- oryzae, *see* Rice weevil.

Sitotroga—

- automatic collection, (64) 543.
- cerealella, *see* Angoumois grain moth.
- production, (69) 232.

Size—

- inheritance in rabbits, relation to sulf-hydril concentration, (69) 509.
- inheritance, linkage in, (68) 316.
- inheritance studies, (69) 193.
- of xenoplastically induced organs, relation to size of host, (68) 748.

Skeletal anomalies, human, inheritance, (61) 630.

Skim milk—

- acid coagulation, effect of pasteurization temperature, (69) 261.
- as feed for dairy cows, (67) 303.
- chemical changes during storage, (63) Conn.Storrs 168.
- condensed, use of dextrose in, (69) 854.
- cultured, wheying-off properties, effect of viscolization, (61) N.J. 767.
- curd for poultry feeding, preservation, (68) Ariz. 805.
- dry, analysis, (64) 472.
- dry, as spreader for sprays, (68) 499.
- dry, effect of method of manufacture on baking quality, (61) 386.
- dry, effect on fermentation and pH of doughs, (61) 586.
- dry, effect on water absorption of dough, (63) 109.
- dry, feeding value, (63) Wis. 68; (64) N.Y.Cornell 671, Wash.Col. 674; (70) 227.
- dry, for calves, (61) Ohio 169; (65) 254; (66) Wash.Col. 769; (68) Wash. Col. 85, 807; (69) Del. 98; (70) Md. 663.
- dry, for chicks, (65) Ind. 167; (68) 234; (70) 227.
- dry, for poultry fattening, Mo., (63) 766; (67) 301.
- dry, for weanling pigs, (66) 460.
- dry, relation to baking strength of flour, (67) 339.
- dry, use in cottage cheese manufacture, (68) 665; (69) Mo. 574.
- dry, use in cream cheese, (65) N.Y.State 374.
- dry, use in cultured buttermilk, (70) Ala. 381.
- dry, use in ice cream, (64) Pa. 171; (65) N.Y.Cornell 173, N.Y.State 374, Mich. 769; (66) Pa. 269, Pa. 770; (68) Pa. 518.
- dry, v. blood flour rations for calves, (66) Pa. 266.

Skim milk—Continued.

- dry, v. dried buttermilk for calves, (68) Idaho 369.
- dry, vitamin B and G in, (69) 418.
- drying, (61) Wis. 181.
- factory tests, (61) Idaho 808.
- fat losses in, effect of agitation before separation, (69) 851.
- feeding value, (70) Mont. 823.
- feeding value for pigs, (68) Pa. 511.
- feeding value for pullets, (62) Pa. 368.
- foam formation, (67) Calif. 593.
- forms, effect on ice cream, (66) U.S.D.A. 171
- fresh unripened cheese from, (61), 767.
- high heat treated, for ice cream, (61) 369.
- liquid, for calves, (66) Idaho 263.
- powder, addition to Cheddar cheese, (61) Idaho 869.
- powder, processing in cottage cheese, (70) Mo. 230.
- powder v. blood flour for calves, Ohio, (67) 65; (69) 99; (70) 669.
- precipitation of proteins, effect of storage, (63) Conn.Storrs 168.
- substitutes for calves, (64) Oreg. 376.
- use in hog ration, (69) Wis. 839.
- v. meat scrap as cottonseed meal supplements, (65) S.C. 557.
- value for pigs on pasture, (70) Mich. 819.
- with and without foam for calves, S.Dak., (67) 65; (68) 806.

Skin—

- flora of white rats, (65) Ala. 471.
- grafts, development in fowls, (63) 327.
- infection of horses and mules in Philippines, (64) 267.
- lesions, bovine, studies, (61) 873.
- temperature, factors affecting, (61) 591.

Skins, *see* Hides.

- Skipper, giant, notes, (66) Mich. 154.
- Skrjabinema ovis, studies, (64) 243.
- Skrjabinia cesticillus, notes, (63) 573.
- Skull defect in swine, inheritance, (62) 625.

Skunks—

- as grasshopper destroyers, (66) 247.
- eastern, winter food, (62) 151.

Sky radiation—

- in Baltimore, annual variation, (65) 96.
- in Colorado, annual variation, (65) 97.

Skyshine of New Orleans, seasonal variation in efficiency toward rickets, (64) 597.

Slag, *see* Phosphatic slag.

Slaughterhouse waste, feeding value, (62) 255.

Sleepy grass poisonous to livestock, (62) U.S.D.A. 74.

Slough grass, notes, (61) Iowa 354.

Sludge—*see also* Sewage.

- activated, fertilizing value, (64) 724.
- activated, microflora, effect of sulfur-oxidizing organisms, (63) 425.
- activated, sulfur-oxidizing organism from, (63) 425.

- Slugs**—
 as intermediate hosts of tapeworm of chickens, (64) West.Wash. 654.
 attacking tobacco, (63) Wis. 51.
 control, (61) Calif. 352.
 ecology and control, (66) 345.
 garden, alum spray treatment for, (62) Calif. 753.
 notes, (69) Calif. 71.
- Smallpox**—
 and sheep pox, etiological relations, (61) 372.
 vaccine, fluid and dried, virulency, (68) 376.
- Smartweed borer**—
 bionomics, (64) Iowa 851.
 in Kansas, (70) 364.
 life history studies, (61) Iowa 354.
 parasites, (64) Kans. 852.
- Sminthurus viridis**—
 biological control, (69) 552.
 distribution in South Australia, (70) 652.
 injurious to alfalfa, (67) 429; (68) 639.
- Smithsonian Institution laboratory for study of growth and behavior of plants, (68) 428.**
- Smoke and industrial fumes, damage to Inatna State Park trees, (69) 638.**
- Smudges as repellents for Japanese beetle, (63) 462.**
- Smut**—*see also* Cereal smut(s), Grain smuts, and *specific hosts*.
 fungi, physiology and genetics, (69) 372.
 resistance, inheritance in oat and black mesdag hybrids, (68) 748.
 stinking, control, (64) 145.
- Smuts, sorghum and wheat, effect on poultry, (68) Okla. 654.**
- Smuttox, fungicidal value, (64) Ohio 644, Ill. 843, Kans. 844; (65) N.C. 146, Mich. 149.**
- Snail, European brown**—
 control, (62) 448.
 in California, (66) Calif. 345.
- Snails**—
 damage to potatoes, (66) N.Y.Cornell 648.
 giant, in Netherland East Indies (70) 205.
 injurious to vegetables in Japan, (69) 682.
 notes, (69) Calif. 71.
- Snakeroot, white**—
 poisonous to livestock, (62) U.S.D.A. 75; (65) Ind. 70.
 variation in toxicity, (64) Ohio 677.
- Snakes**—
 of the world, treatise, (67) 282.
 of Utah, (64) Utah 51.
- Snapdragon**—
 diseases, (65) N.J. 352.
 root decay, (64) P.R. 348.
- Snapdragon**—Continued.
 rust, breeding for resistance, (69) Mass. 652.
 rust, control, (61) Ind. 342.
 rust, notes, (66) 152.
 rust resistant hybrids, (66) Va. 545.
 rust resistant strains, (63) Ind. 541.
 rust, studies, (65) 543.
 wilt of greenhouse plants, (69) Tex. 541.
- Snapdragons**—
 breeding, (67) Mass. 385.
 Phytophthora disease of, (69) 823.
 radiomorphosis in, (61) 515.
 soil reaction for, (65) Mass. 339.
- Snout beetle**—
 European, new to United States, (69) 685.
 imbricated, notes, (64) Kans. 852.
 notes, (70) N.Y.Cornell 802.
- Snow**—
 courses, establishing, (64) Utah 516.
 cover, amount, relation to survival of grape berry moth, (61) 253.
 cover, effect on soil temperature, (61) 808.
 cover on mountains, measuring (62) 409.
 cover, winter-long, relation to conifer disease, (66) 344.
 melting characteristics, (66) Utah 11.
 rot, studies, (66) 643.
 sampler and scales for measuring water in snow, (67) Utah 654.
 surveying, principles and possibilities, (70) 302.
 surveys, making, (64) Utah 516.
 water content, new spring balance for measuring, (66) Utah 117.
- Snowberry**—
 anthracnose, notes, (66) 446; (67) 556; (69) N.Y.Cornell 61.
 propagation, (69) N.Y.Cornell 57.
 seeds, dormancy in, (69) 189.
- Snowfall, Rocky Mountain, relation to subsequent weather, (65) 616.**
- Snyder, H., biographical sketch and list of publications, (63) 890.**
- Soap**—
 and arsenate of lead, effect on conifers, (65) 50.
 and pyrethrum, incompatibility, (63) 749.
 and pyrethrum sprays, use against Mexican bean beetle, (66) Conn.State. 761.
 detergent action, (61) 897.
 effect on toxicity of pyrethrum product, Red Arrow, (65) 51.
 nicotine preparations, deterioration, (61) 544.
 soft, home-made, as insecticide, (70) Mo. 206.
 solutions, killing efficiency for insects, relation to evaporation, (63) 847.
 solutions, properties, (64) 543.

Soaps—

- effect on dress gingham, (62) 794.
- effect on lead arsenate in spray mixtures, (69) 74.
- germicidal efficiency, (64) 473.
- insecticidal properties, (62) 656.
- pure, effect on bactericidal properties of phenolic germicides, (61) 804.

Social—

- activities of families in older rural area of State, (69) Pa. 614.

 - for bindweed eradication, (62) Wash.Col. 37.
 - for Johnson grass control, (63) 732.
 - for weed control, (62) Ohio 334; (63) 733; (64) Oreg. 335; (65) Iowa 125, Wis. 432; (66) Tex. 29, Wash.Col. 730; (67) 243; (68) N.Y.Cornell 616; (69) Ohio 38, 797; (70) 773.
 - mixtures as herbicides, fire hazards from, (69) 797.
 - on *Nitella*, toxic action, (66) 520.
 - spray for quack grass, (61) Mich. 34.
 - substitutes for killing bindweed, (61) 227.
 - toxicity, (70) 382.
 - toxicity for cattle, (62) 562.
- chloride—*see also* Salt.
 - effect on *Nitella*, (67) 511.
 - effect on rice, (61) 719.
 - in concrete as frost protection, (63) 178.

Sodium—Continued.

- chloride—continued.
 in irrigation water, effect on plants, (63) 124.
 tolerances of crops to, (70) 251.
 citrate use in starter cultures, (61) 564.
 citrate, utilization by *Salmonella pul-
 lorum*, (66) R.I. 375.
 cyanide, injurious to plant growth, (64)
 Kans. 852.
 cyanide, reactions of sulfuric acid on,
 (67) 705.
 determination, (68) 439.
 determination by uranyl method, (63)
 804.
 determination in biological material,
 uranyl zinc acetate method, (67) 7.
 determination, new volumetric method,
 (64) 311.
 diethylthiocarbamate reaction for cop-
 per determination, (70) 12.
 effect on properties of ice cream mix,
 (61) 565.
 exchangeable in soils, determination,
 (68) 155.
 fluoride—
 continued feeding to pigs, effect,
 (64) Ohio 662.
 effect on bone development in
 swine, (63) Ohio 61, 360.
 mechanism of absorption by roaches,
 (70) 504.
 poisoning, accidental, (69) 235.
 fluosilicate—
 as fruit fly poison, (67) 426.
 as house fly poison, (62) 241.
 efficiency against stomach worms,
 (69) 717.
 for *Locusta migratoria migratori-
 oides*, (69) 238.
 insecticidal value, (68) 216.
 toxicity to farm animals, (65) 358,
 669.
 v. borax in controlling house flies,
 (65) 458.
 germanate added to iron, effect on blood
 regeneration, (61) 590.
 hexosediphosphate, action of *Aspergil-
 lus niger* on, (68) 722.
 hydroxide—
 and soap, germicidal efficiency,
 (64) 473.
 as herbicide for mustard, strength,
 (61) N.H. 127.
 as sterilizing agent, (68) Ill. 661.
 bound by casein and paracasein, ef-
 fect of salts, (68) Minn. 11.
 effect on cystine, (69) 483.
 effect on germicidal efficiency of
 phenols, (66) 369.
 effect on hog cholera virus, (66)
 177.
 germicidal efficiency, (64) 883;
 (69) 423.
 solutions, refractive indices for de-
 termination, (68) 154.

Sodium—Continued.

- hypobromite for oxidation of organic
 matter in soil analysis, (67) 7.
 hypochlorite for sterilizing dairy equip-
 ment, (61) 564.
 hypochlorite, germicidal value, effect of
 alkalis, (67) Mich. 5.
 in biological materials, determination,
 new method, (68) 16.
 in blood serum, determination, (69)
 331.
 in organic substances of high potas-
 sium content, determination, (67)
 105.
 in plants, (63) 517.
 in soils, new method for estimating,
 (70) 581.
 laurate as insecticide, contact angles,
 (68) N.H. 216.
 nitrate—
 and ammonium sulfate, lysimeter
 experiments with, (70) 22.
 and ammonium sulfate on lawns,
 comparison, (69) R.I. 200.
 application to crops, rate and time,
 (64) S.C. 616.
 as herbicide for mustard, strength,
 (61) N.H. 127.
 effect on apples, Ohio, (64) 633;
 (65) 833.
 effect on field crops, (70) Mo. 162.
 effect on flax, (65) 529.
 effect on Indiana soils, (68) 741.
 effect on pastures, (63) 227.
 effect on trees in cultivation, (63)
 Mass. 532.
 excessive, effect on young apple
 trees, (67) N.H. 679.
 fall applications, effect on apples,
 (66) Md. 36.
 fertilizing value, (61) Iowa 319;
 (62) Tex. 614; (65) Iowa 113.
 for corn on Iowa soils, (64) 533.
 for wheat on Iowa soils, (64) 537.
 nitrogen availability, factors af-
 fecting, (61) N.J. 714.
 preparation and properties, (66)
 U.S.D.A. 213.
 rate and time of application, ex-
 periments, (67) S.C. 222.
 responses of peach to, (67) 529.
 toxicity for moss species, (67) 35.
 treatment of crops, effect of time
 and rate of application, (61)
 S.C. 119.
 use in watering transplanted to-
 bacco plants, effect, (66) Ky.
 130.
 v. ammonium sulfate for apples,
 (67) W.Va. 678.
 v. ammonium sulfate for sod
 orchard, (63) Pa. 339.
 value for apples, (66) Ill. 229.
 nitrates from various sources, compari-
 son, (68) S.C. 734.
 of soils, determination, critical exam-
 ination of methods, (70) 742.

Sodium—Continued.

- oleate as insecticide, contact angles, (68) N.H. 216.
- oleate soap, insecticidal value, (61) N.J. 751.
- orthophenylphenate, new disinfectant, (70) U.S.D.A. 674.
- orthophenylphenate, parasitocidal value, (66) Mich. 173.
- pellets, precision cutter for, (68) 579.
- phosphate, effect on rickets, (64) 597.

 greenhouse—
 eradication of nematodes and fungi, (61) Mass. 840.
 reaction, (61) 610; (66) Ohio 39.
 steaming, (66) Ill. 232.
 hardpan formation, effect of pure coniferous stands, (66) 540.
 hardpan, properties and formation, (63) 418.
 Hawaiian, physical properties, (65) Hawaii 715.
 Hawaiian pineapple, determination of replaceable hydrogen, (66) 315.
 heating by electricity, (62) 672; (67) 175, 329, Calif. 605; (68) Idaho 834; (69) Ind. 116, 287; (70) 402.
 heating, experiments, (70) 540.
 heating for greenhouse and hotbed, (70) 689.
 heavy, moisture problems, (62) Okla. 210.
 heavy plains, nitrogen conservation in, (68) Okla. 590.
 heavy-textured, improvement of permeability, (61) Oreg. 18.
 H-ion concentration, effect of air drying, (67) U.S.D.A. 111.
 ideal, capillary pull, (63) 509; (68) 160.
 impermeable, effect of acidifying amendments, (70) N.Mex. 163.
 impervious, leaching, (62) U.S.D.A. 20.
 in plastic state, (64) 15.
 ion exchange capacity, determination, (68) 739.
 iron in, replaceable, (66) 417.
 iron-saturated, effect on biochemical processes, (70) 592.
 irrigated, changes in, (63) 210; (64) Wash.Col. 618; (66) Wash.Col. 718.
 irrigated, maintenance of permanent fertility, (70) 745.
 irrigated, replaceable bases of, (63) 422.
 isoelectric precipitates, (64) 418.
 leaching of plant food through, (61) Va. 713.

Soils—Continued.

- lime requirement—
 chemical determinations, correlation with field results, (66) 718.
 determination, (63) 424; (67) N.H. 653; (70) 749.
 determination, antimony electrode for, (62) 407.
 determination by addition of calcium carbonate, (66) 418.
 determination for definite pH values, (64) Ala. 119.
 determination, titration methods, (63) 512.
 effect of seasonal variation of pH in, (69) 503.
 electrometric method for measuring, (61) 203; (70) 749.
 field method, (66) 417.
 indicator, potassium nitrate method, (62) Mo. 17.
 of Cherokee silt loam, (61) Kans. 117.
 studies, (63) Conn.State 612; (65) Miss. 126.
 tests, (62) Mo. 22.
 loess of North China, pH values, (67) 15.
 low nitrification capacity, causes, (68) 737.
 low-land, effect of temperature on exchange-acidity, (66) 414.
 manganese availability in, (68) 307.
 manipulation, effect on structure, (67) 323.
 market garden, nitrates in, (65) 514.
 measurement of size frequency distribution in, (69) Ohio 17.
 measurements of rolling weights, methods, (68) 446.
 microchemical tests, (67) Conn.State 105.
 mineral, behavior of water content and cations, (68) 593.
 mineral deficiencies, determination, (65) 19; (68) Colo. 168; (70) 21.
 mineral, drainage, drain-line spacing in, (63) 378.
 moor, *see* Moor and Peat.
 movement of fertilizers in, (69) 184.
 muck, *see* Muck.
 nature and properties, treatise, (62) 810.
 nitrate assimilating power, (65) Iowa 20.
 nitrates and moisture in, effect of corn cultivation, (68) Ark. 608.
 nitrates in, factors affecting, (66) Ohio 415.
 nitrifying capacity, relation to availability of ammonia and nitrates, (70) 591.
 nitrite production in, (65) Tex. 813.
 nitrogen and carbon accumulation or depletion, (70) Mo. 157.
 nitrogen content, *see* Ammonification.
 Nitrification, *and* Nitrogen.

Soils—Continued.

- nutrient availability, pH and base exchange, correlation, (65) Vt. 513.
 nutrient deficiencies, diagnosis by plant symptoms, (65) 322.
 of Afghanistan, (68) 592.
 of Alberta—
 leaching of mineral matter in, (68) 448.
 replaceable bases, hydrogen, and base-holding capacity, (68) 448.
 sulfur oxidizing power, (66) 815, 816.
 of Arabia, (68) 592.
 of Arizona, microbiological study, (70) Ariz. 745.
 of Asia, (68) 592.
 of Asia Minor, (68) 592.
 of California, San Diego, classification and evaluation, (69) Calif. 635.
 of Chehalis series, utilization, (67) Oreg. 655.
 of China, Mongolia, and Indo-China, (68) 592.
 of Colorado, effect on nitrogen balance of Tennessee soil, (70) 587.
 of Connecticut, studies, (64) Conn.State 206.
 of Cuba, new types, (68) 445.
 of dry regions, classification, organic matter as factor, (67) 657.
 of Everglades, effect of fertilizers and special elements in, (69) Fla. 178.
 of Everglades, studies, (67) Fla. 505.
 of Hawaii, Kona district, studies, (63) Hawaii 208.
 of Illinois—
 Calhoun Co., (67) Ill. 506.
 Coles Co., (62) Ill. 118.
 Fayette Co., (67) Ill. 506.
 Ford Co., (69) Ill. 778.
 Fulton Co., (66) Ill. 811.
 Jackson Co., (69) Ill. 778.
 Macon Co., (62) Ill. 716.
 Macoupin Co., (66) Ill. 811.
 Morgan Co., (61) Ill. 17.
 response to treatment, (64) Ill. 523.
 Wayne Co., classification, (65) Ill. 811.
 of India, (68) 592.
 of India, effect of alkali salts on nitrification, (67) 218.
 of Indiana—
 Blackford Co., management, (70) U.S.D.A. 448.
 management, U.S.D.A., (63) 508, 509.
 Miami Co., management, (66) U.S.D.A. 510.
 of Iowa, plant food content and lime requirements, (69) Iowa 16.
 of Italy, distribution of cellulolytic aerobes in, (70) 17.
 of Japan, (68) 592.

Soils—Continued.

- of Kansas—
 origin and characters, (68) Kans. 452.
 replaceable cations and anions, (69) Kans. 179.
 of Kent, field work, (63) 824.
 of Kentucky, phosphates in, (69) 181.
 of Kenya, (66) 715.
 of Las Vegas Valley, nitrogen value studies, (62) Nev. 18.
 of Libyan oases, (62) 811.
 of Malay Archipelago, (68) 592.
 of Manchuria, (68) 592.
 of Maryland, productivity classification, (70) Md. 586.
 of Massachusetts, mineral deficiencies, determination, (69) Mass. 635.
 of Michigan—
 Graying sand type, (61) Mich. 113.
 organic matter in, (61) Mich. 18.
 of Missouri, (61) Mo. 810.
 of Montana, phosphate deficiency, Mont., (65) 19; (67) 370.
 of Natal, studies, (64) 418.
 of Nebraska, management, (66) 314.
 of Nevada, Moapa Valley, nitrogen value, (62) Nev. 18.
 of New Jersey, (64) N.J. 568.
 of New York—
 adaptability for fruit growing, (70) N.Y.Cornell 777.
 composition, (64) N.Y.Cornell 522.
 Genesee Co., (70) N.Y.Cornell 14.
 Monroe Co., relation to fruit growing, N.Y.Cornell, (68) 591; (70) 47.
 of North Dakota—
 Cass Co., composition, (62) U.S.D.A. 413; (65) N.Dak. 618.
 McHenry Co., composition, N.Dak. (64) 813; (65) 618.
 of Ohio, color, (64) Ohio 615.
 of Oklahoma, soluble phosphates in, (68) Okla. 309.
 of Oregon—
 effect of liming, (61) Oreg. 20.
 Grand Ronde Valley, maintaining fertility, (70) Oreg. 161.
 replaceable bases in, Oreg., (61) 18; (64) 317.
 sulfur in and loss through drainage and cropping, (61) 210.
 of Palestine, (68) 592.
 of Persia, (68) 592.
 of Philippines, (68) 592.
 of pine forests, insect larvae in, identification, (70) 651.
 of Punjab, (62) 413.
 of Quebec, chemical microbiological factors, (70) 304.
 of Scotland, potassium availability, (64) 319.
 of South Carolina, lime requirements, (64) S.C. 617.

Soils—Continued.

- of Tennessee, effects of additions of Colorado soils, (70) 587.
- of Texas—
 - composition, Tex., (66) 209; (67) 109.
 - manganese in, relation to crops, (66) Tex. 211.
 - map, (66) Tex. 209.
 - typical, analyses and descriptions, (70) Tex. 586.
- of the Trans Nzoia, (69) 335.
- of Upper Peninsula, fertilization, (68) Mich. 734.
- of Vermont, fixation and penetration of phosphates in, (70) Vt. 22.
- of Willamette series and utilization, (61) Oreg. 422.
- of Willamette Valley, colloidal properties, (62) 411.
- orchard, phosphorus distribution and acidity, (69) Ohio 21.
- orchard, sampling for nitrates, (68) 192.
- organic carbon determination in, (64) 312.
- organic matter in, *see* Organic matter.

- relation to grain growing in thirteenth century, (69) 320.
- replaceable bases—
 - and effect of lime, (67) 215.
 - apparatus for determining, (67) 106.
 - determination, (64) 310.
 - effect of crop growth, (61) 208.
- residual effect of alfalfa, (61) Kans. 116.
- response to phosphate fertilizers, (63) 120.
- rich in sulfate, microflora, (64) 815.
- role of the rarer elements in, (65) 628.
- salt water flooded, of Virginia, studies, (70) 587.
- sandy loam, potash-lime deficiency in, (67) 250.
- saturation capacity and degree of saturation, determination, (66) 15.
- secular and seasonal changes in, (65) Calif. 318.
- selenium in, (70) 295.

Soils—Continued.

- semiarid, organic matter changes in, (67) 219.
 separation by electro dialysis of similarly charged ions, (68) 22.
 settling volume, (70) 747.
 size-frequency distribution in, determination, (66) 314.
 slick-spot, analyses, (62) Nev. 18.
 slick-spot, studies, (63) Idaho 513.
 solid phase, solubility in water, (69) 18.
 sorption phenomena in, (67) 110.
 sour, modification, (65) R.I. 511.
 state of unsaturation, relation to field behavior and lime requirement, (64) 320.
 sterilization—
 by electricity, (69) 598; (70) N.J. 540.
 by forcing steam through tile in greenhouse soil, (61) Ohio 444.
 by steam, U.S.D.A., (63) 442; (70) 538.
 in greenhouses, (66) 813.
 sterilized greenhouse, reinoculation, (67) Ohio 35.
 stickiness, measurement, (68) 829.
 structure, movement of gases as criterion, (68) Ariz. 21.
 structure relationships, elutriator as means of determining, (68) 828.
 structure, studies, (67) 213.
 studies, (61) Ohio 417; (62) Ill. 314; (63) Wis. 16, Conn.State 612; (65) Utah 207, Fla. 416, Calif. 718; (66) Alaska 612; (67) Ohio 16, Wyo. 16, R.I. 214, Hawaii 366, Calif. 504, Conn.State 504; (68) Tenn. 158, Utah 159, Ill. 590, Ariz. 734; (69) Calif. 16, Iowa 16, Oreg. 339, Nebr. 495; (70) Ky. 156.
 studies and valuation in German experiment stations, (61) 610.
 studies, green manure project, (62) Fla. 317.
 studies, technic of box experiment, (68) 449.
 submerged, cause of pH drift in, (64) Ark. 409.
 submerged, chemical phases, (64) 16.
 submerged, nitrogen in, (68) Ark. 590.
 subsoil variation, root as indicator, (69) 188.
 suction force in, (61) 315; (64) 521.
 sugarcane, studies, (69) 516.
 suitability, field and laboratory verification, (70) 540.
 suitability for irrigation engineering works, (66) 472.
 sulfate content, (68) 740.
 swamp, *see* Swamp.
 temperature of air layers near, (69) 14.
 treated with various cations, effect of dilution on pH, (65) 811.
 treatise, (66) 810.

Soils—Continued.

- tropical—
 Fusarium spp. in, (70) 344.
 saturation capacity in, determination, (68) 302.
 single value soil properties, (69) 17.
 studies, (68) 294.
 ultimate natural structure, (62) 410.
 uncemented, shear values, (68) 387.
 under fertilizer and crop control, base-exchange modifications, (69) 19.
 unproductiveness in, and use of calcium arsenate, (68) 609.
 upper plastic limit, measuring, Troemner balance for, (68) 447.
 urea decomposition in, (64) 424.
 uronic acid complexes in, (65) 505; (67) 16.
 variation in base-holding capacity, (64) Ill. 808.
 vertical expansion after spading and hoeing, (67) 79.
 virgin, in Armenia, effect of alfalfa on, (63) 334; (64) 721.
 volcanic, of Sakurajima, Japan, microbiological studies, (62) 118.
 volume-weight determination, methods, (65) 715.
 water-covered, classification, (66) Mich. 118.
 water flow in, coordination of research, (67) 322, 323.
 water-logged, biochemistry, (63) 511.
 zeolite, magnesium and calcium in, (61) Ariz. 618.
 Soil-subsoil, 6-foot column, base interchange induced by nitrates in, (69) 18.
 Soilvita, tests, Iowa, (61) 319; (62) 32.
 Solanaceae in Puerto Rico, bacterial wilt of, (68) 346.
 Solanine in plants, determination with aid of Cladosporium fulvum, (70) 601.
 Solanum—
 auriculatum, fruit fly affecting, (64) 462.
 bacterial wilt, breeding resistant types, (66) P.R. 237.
 sisymbriifolium, insects affecting, (70) 499.
 spp., hybridization experiments, (69) 521.
 Solar—
 activity, secular periods, (69) U.S.D.A. 775.
 cycles and weather cycles, (64) 315.
 energy for heating water, equipment for utilizing, (65) Ala. 476.
 energy, heating water by, (67) 608.
 heaters, design, (61) Calif. 779.
 radiation—
 and pellagra in southern United States, (67) 488.
 effect of atmosphere, (68) 732.
 in Colorado, annual variation, (65) 97.

Solar—Continued.

- radiation—continued.

- Soldier beetle, notes, (62) Del. 754.
- Soldier bug, spined, on celery leaf tier, (65) 53.

Solenopsis geminata, see Fire ants.

Solenotus viridis, notes, (61) 856.

Solidago serotina, toxicity, (70) Tex. 241.

Solids, wetting by liquids, (69) 323.

Solikamsk salts, experiments with, (63) 720.

Solution, association and dissociation theory, (70) 150.

Solutions—

formation, temperature changes in, (65) 309.

nutrient, see Nutrient.

Somatic variations induced in *Drosophila* by X-rays, cause, (63) 217.

Soot, removal from furnaces and flues by use of salts, (70) 693.

Sophora scundiflora, toxicity, (70) Tex. 241.

Sordaria uvicola, notes, (61) 50.

Sore mouth—

- in feeder lambs, cause, (70) 834.
- of kids and lambs, Tex., (62) 667; (66) 70; (70) 241.
- of sheep and goats, Tex., (67) 740; (68) 251.

Sore shin, notes, (62) 145.

Sorghum—see also Kafir, Milo, etc.

and corn, comparison, (63) Kans. 433, Mo. 728, Tex. 435; (64) Ariz. 757.

and corn, drought resistance, comparison, (65) 223.

and Sudan grass hybrids, (62) 633.

and sugarcane hybrids, (68) 32; (69) 517.

anthesis and pollination, (66) 824.

bacterial leaf spot, (67) 548.

bacterial streak disease, (63) 545.

bacterial stripe disease, (61) 48.

biometric studies, (70) 612.

breeding, (61) Kans. 125; (70) U.S.D.A. 464.

combined, safe storage, (64) Kans. 885.

cost of production and storing of silage, (66) Ala. 881.

crosses of brown-seeded and white-seeded, inheritance of seed color in, (70) 603.

culture experiments, (61) Kans. 125; (67) Nebr. 517; (70) Kans. 770.

culture under dry land conditions, (62) N.Mex. 32.

Sorghum—Continued.

disease, new, destructive to milo, (62) Tex. 642.

diseases, control, (61) Okla. Panhandle 447; (66) 147.

effect of albinism in, (63) 430, Tex. 435.

effect of seed treatment, (65) 333.

effect on following crop, (65) Calif. 727.

feeding value for dairy cows, (69) V.I. 572.

fields, insect survey, (61) Kans. 152.

for grain and forage, (69) Okla. 205.

forage, yields, (66) U.S.D.A. 628.

genus, cytological study, (66) 725.

grain—

adaptation and cultural needs, (63) Mo. 728.

and corn, comparison, (70) Tex. 173.

breeding, (61) Calif. 328; (62) Tex. 627; (63) Tex. 435; (64) Okla. 732, Kans. 826; (66) Tex. 27; (67) Calif. 516, Tex. 668;

(68) Okla. 609; (69) Calif. 37, Kans. 200; (70) Tex. 173.

chlorophyll content, (70) 613.

culture experiments, (62) Tex. 627; (63) Tex. 435; (64) Kans. 826;

(66) Tex. 27; (67) Tex. 668; (68) Okla. 609; (69) Kans. 200;

(70) Tex. 173.

drought resistance, (69) U.S.D.A. 644.

effect of green manure, (62) Calif. 727.

effect of time of planting, (61) Calif. 328.

effect on following crops, (66) Tex. 28.

effect on spring oats, (70) Tex. 173.

exhibiting and scoring, (63) Okla.-Panhandle 590.

feeding value, (64) Okla. 63, Okla. 761; (67) Tex. 723.

feeding value and methods of feeding, Tex., (63) 469; (66) 62.

fertilizer experiments, Tex., (63) 435; (66) 27.

for harvesting with combine, culture, (69) Kans. 514.

harvesting methods, (62) U.S.D.A. 132, Calif. 332.

harvesting with combine, (69) Kans. 281.

inheritance studies, Tex., (62) 627; (63) 435; (66) 22; (67) 515, 668; (70) 173.

introduced varieties compared to native, (70) Guam 762.

irrigation requirements, (69) Kans. 200.

keeping quality, effect of moisture in, (69) Kans. 200.

 varieties in California, (67) Calif. 516.
 varieties, new, (64) Okla. Panhandle 336.
 variety tests, (61) Kans. 125; N.Mex. 219, Miss. 433; (62) Tex. 626; (63) Kans. 433, N.Mex. 434, Tex. 435; (64) Ark. 430, Okla. 732, Kans. 826; (65) N.Mex. 221; (66) Tex. 27, Ark. 525, Miss. 730; (67) U.S.D.A. 28, N.Mex. 29, La. 123, La. 233, Mo. 378, Tex. 668; (68) Miss. 34, Utah 183, Nebr. 320, Ark. 608, Okla. 609; (69) Fla. 199, Kans. 200, N.Mex. 200, V.I. 512; (70) Mo. 172, Tex. 173, Ariz. 761.
 yields, variability, (64) 534.
 grass, chromosomes in, (67) 374.
 harvesting and threshing with wheat combine, (64) Kans. 885.
 harvesting by root cutting and combining, (62) 273.
 hybrids, production and detection, (63) 725.
 in Nyasaland, insects affecting, (64) 156.
 inheritance of waxy endosperm in, (69) 784.
 inheritance studies, (64) Okla. 732; (68) 750; (70) 461.
 insects affecting, (64) Kans. 852.
 kernel smut, belated development, (70) 348.
 kernel smut, control, Kans., (61) 145; (64) 845.
 kernel smut, physiologic forms, (66) 839.
 leaf spot, notes, (68) 346.
 leaf stripe susceptibility, variation, (64) Kans. 845.
 long smut in India, (70) 797.
 loose kernel smut, germination of spores, (70) 492.
 midge parasite, studies, (61) 254.
 minimum concentrations of aluminum toxic to, (68) 741.

Sorghum—Continued.
 multiple seeded spikelets in, (67) Tex. 520.
 planting, (69) Kans. 201.
 planting and spacing tests, (67) U.S.D.A. 30.
 plants, effect on biological activities in soil, (66) 415.
 propagation by cuttings, (68) 187.
 recurving in, (68) 40.
 residues, effect on crop yields, (67) 31.
 resistance to insect injury, (69) Kans. 232.
 root development, relation to soil moisture, (62) Calif. 727.
 roughage and grains, preparation for lambs, (66) Tex. 60.
 roughage, preparing for calves and lambs, Tex., (62) 659; (63) 468.
 roughages with limestone flour, feeding value, (70) Tex. 220.
 rust, notes, (64) Kans. 845; (66) 147.
 rust, varietal susceptibility, (67) 697.
 sap extraction and localization of sugars, (64) 30.
 seed, low germination in, cause, (67) 522.
 seed rots, control, (61) Okla. Panhandle 447.
 seed treatment, (63) Tex. 435; (64) 222; (67) Tex. 668; (68) Okla. 609; (70) Tex. 173.
 seed treatment with dry soil conditions, (67) Okla. 270.
 seeds in storage, insects infesting, (61) Kans. 152.
 seeds, microphotography, (69) 363.
 shocked, v. corn silage for cows, (63) N.C. 667.
 silage, *see* Silage.
 silage quality, effect of thick planting, (62) Miss. 69.
 sirup, effect on anemia in rats, (66) 295.
 sirup, effect on nutritional anemia, Miss., (64) 695; (66) 793.
 smut spores, viability, effect of digestive processes, (61) 445.
 smuts, (70) 492.
 smuts, control, (61) Okla. Panhandle 447.
 smuts, effect on chicks, (64) Okla. 763.
 smuts, notes, (62) 535.
 smuts, toxicity tests, (62) 876.
 smutted, feeding to livestock, effect, (64) Kans. 845.
 sugary exudation from, (70) 641.
 tassel in corn, inheritance, (61) 122.
 tissue fluids, freezing point depression and specific conductivity, (64) 817.
 varieties, forage yields, (65) V.I. 730.
 varieties, new, (69) Okla. Panhandle 45.
 varieties, yields and characters, (63) Okla. 229.
 variety tests, (62) V.I. 219 (66) S.C. 627.
 vitamin E in, (61) 597.

- Sorghum—Continued.
 webworm, notes, (69) Mo. 79; (70) Tex. 206.
 yield and dependability, (69) Okla. Pan-handle 790.
 yields, effect of alfalfa in rotation, (61) Kans. 126.
- Sorgo—
 and kafir as forage crop, (67) U.S.D.A. 30.
 as sugar plant in Russia, (61) 828.
 Atlas, feeding value, (69) Kans. 701.
 Atlas, v. corn for fattening pigs, (64) Kans. 867.
 breeding, (62) Tex. 627; (63) Tex. 435; (66) Tex. 27, 326; (67) Tex. 668; (70) Tex. 173, S.Dak. 763.
 culture, (70) Kans. 770.
 culture experiments, (63) Tex. 435; (66) Tex. 27; (67) Tex. 668; (69) Kans. 200, Nebr. 512; (70) Tex. 173.
 culture in Lawton, Oklahoma, region, (68) U.S.D.A. 467.
 fodder and sorgo silage, comparison for milk and butterfat production, (69) Kans. 257.
 for sirup and forage, merits, (61) Ark. 827.
 for sirup, culture, harvesting, and handling, (62) U.S.D.A. 733.
 for sirup, variety and fertilizer experiments, (68) Ky. 318.
 for sirup, variety tests, (66) Ark. 525; (68) Ark. 608; (70) Ky. 172.
 improved strains, (70) Colo. 609.
 irrigation requirements, (69) Kans. 200.
 seeding experiments, (66) Tex. 28.
 silage and fodder, comparative nutritive value, (69) Kans. 248.
 sirup, manufacture, (62) Ark. 829; (64) 30.
 v. kafir for dairy calves, (61) Kans. 167.
 varietal standardization and seed selection, (61) U.S.D.A. 729.
 varieties, (69) Okla. 205.
 variety tests, (61) N.Mex. 219, Miss. 433; (62) Tex. 626; (63) N.Mex. 434, Tex. 435; (64) Ark. 430, Okla. 732, Ariz. 823, Kans. 826; (65) N.Mex. 221, Nebr. 822; (66) Tex. 27, S.C. 627, Miss. 730; (67) U.S.D.A. 28, N.Mex. 29, U.S.D.A. 30, La. 123, La. 233, Iowa 378, Fla. 516, Nebr. 517, Tex. 668; (68) Miss. 34, Miss. 319, Okla. 609; (69) Iowa 37, Fla. 199, Kans. 200, N.Mex. 200, V.I. 512; (70) Mo. 172, Tex. 173.
 water requirements, (65) 128.
- Sorosporium—
 paspali, notes, (64) 230; (65) 441; (67) 403.
 reilianum, notes, (63) 246.
 reilianum, physiology and cytology, (67) 544.
- Sour grass, control, (66) Tex. 28.
 Sourbug on figs, (66) Tex. 51.
- Soursobs, poisoning of sheep by, (62) 167, 170.
 South Africa, alleged desiccation, (64) 315.
- South Carolina—
 Agricultural Loan Association, analysis, (65) U.S.D.A. 682.
 Food Research Commission, organization and activities, (62) 893.
 Station, history, editorial, (65) 405.
 Station, history, notes, (65) 496.
 Station, notes, (64) 798; (66) 900; (67) 96; (69) 480.
 Station, report, (62) 696; (64) 697; (66) 695; (68) 874.
- South Dakota—
 College, notes, (61) 599; (62) 498; (63) 900; (64) 200; (65) 700; (66) 200; (69) 623.
 State College, history, treatise, (65) 189.
 Station, notes, (63) 900; (64) 200, 798; (66) 200; (68) 876; (69) 623; (70) 288.
 Station, report, (61) 96; (63) 96; (64) 697; (67) 94; (68) 874; (70) 893.
- Southwest Conference on Soil and Water Conservation, proceedings, (64) 566.
- Soviet Institute for Plant Protection, establishment, (65) 600.
- Sowbug, host of parasite of ruffed grouse, (63) U.S.D.A. 155.
- Sowbugs affecting mushrooms, (66) Pa. 756.
- Sowbugs, control, (69) 548.
- Sows—see also Pigs and Swine.
 Berkshire, basal energy requirements, (69) N.H. 406.
 blood, Brucella abortus agglutinins in, (65) 269.
- brood—
 calcium requirement, (67) Mo. 590.
 feeding and management, (69) Alaska 88.
 labor cost of caring for, (62) Mo. 82.
 mineral requirements, (63) Ind. 559.
 ration for, (65) Ind. 162.
 self-feeding, (70) Tex. 220.
 winter rations, (61) S.Dak. 61; (66) Del. 563; (69) Del. 89, Oreg. 407.
 wintering, (63) S.Dak. 62.
- Brucella-reacting, exposing cows to, (67) 71.
 dressed yields, (67) Ohio 58.
 on good rations, effect on production, (61) Ind. 363.
 pregnant, food needs, (62) Ill. 365.
 pregnant, mineral requirements, (69) 255.
 pregnant, on high and low calcium diet, effect, (66) 564.
 production, (67) 60.
- Soybean—
 and corn mixture as sole roughage for milk production, (68) S.C. 806.
 and corn rations, effect of yeast and casein supplements, (67) 295.

Soybean—Continued.

- bacterial pustule disease, notes, (61) N.C. 744; (67) 548.
 bacterial pustule disease, varietal resistance, (62) 443.
 brown spot, notes, (66) 147.
 cake and kaoliang, digestion experiment with poultry, (70) 78.
 cake carbohydrates, calorific value, (63) 163.
 caterpillar in Louisiana, (66) 649.
 cultures, inoculating inefficiency, (64) Ohio 625.
 curd in China, proteins in, biological value, (64) 583.
 diets, bone building potency, (68) 123.
 diets, calcium metabolism experiments on, (68) 559.
 diseases, (63) N.C. 645; (66) Del. 543; (69) Del. 60.
 diseases of foliage, (62) Del. 746.
 flour for cakes and muffins, (69) 892.
 flour for infant feeding, (70) 563.
 food preparation for infants, (62) 584.
 forage, feeding value, (65) S.C. 661.
 frog-eye leaf spot, (61) N.C. 744.
 harvesters, (70) Mo. 250.
 hay—
 and seed production, (62) U.S.D.A. 226.
 artificial drying, (67) 328.
 artificially dried, digestibility, (67) La. 295.
 as source of vitamin A, (69) Ind. 98.
 chopping for dairy cows, (64) Wis. 859.
 cut at different stages, feeding value and yields, (68) Ill. 661.
 early v. late cut, for milk production, (63) Ind. 566.
 effect of time of cutting, (66) Ind. 66.
 feeding value, (64) Ala. 370; (65) Ala. 461; (66) Iowa 163, Ill. 257, Ala. 858.
 for milk and butterfat production, (67) Ind. 593.
 ground v. unground, for dairy cows. (62) Md. 870.
 harvesting with binder, (68) Mich. 753.
 intermediate v. late, for milk and fat production, (65) Ind. 169.
 machine dried v. field cured, for beef steers, (69) 405.
 objections for beef cattle, (70) Colo. 661.
 pyralid moth attacking, (66) 250.
 v. alfalfa hay for milk production, (61) Kans. 167.
 yield and cost per acre, (67) Md. 613.
 yields, variation in experimental plats, (69) 198.
 leaf wrinkle, studies, (70) 197.

Soybean—Continued.

- meal—
 and ground soybeans, relative feeding value, (69) Ohio 99.
 as source of protein in poultry ration, (68) Okla. 654; (69) Wis. 839.
 feeding value, (61) Mo. 860; (66) S.C. 458.
 for chicks, (69) N.H. 406.
 for hens, (64) Ill. 867.
 for pigs, (68) N.C. 511.
 nitric acid, (69) Mass. 634.
 nitrogen activity, (64) Conn.State 426.
 value for egg production, (63) Mo. 765.
 vitamin B in, (70) N.C. 879.
 mildew, control, (61) N.C. 744.
 milk—
 and whole milk, dietary properties, comparison, (67) 481.
 composition, preparation, and value for infants, (70) 130.
 for infant feeding, (69) 305.
 for infants, metabolism experiments, (61) 190.
 for infants, nitrogen metabolism, (66) 791.
 for infants, nutritive value, (64) 584.
 nutritive properties, (63) 193.
 powder, adaptation to infant feeding, (66) 293.
 oil as human food, (68) Ill. 697.
 oil, characteristics, (69) 4.
 oil meal as protein supplement for chicks, (61) Ind. 365; (68) Ill. 654; (70) Ill. 661.
 oil meal as protein supplement for pigs, (63) Ohio 560.
 oil meal, effect of processing method, (70) Ill. 661.
 oil meal, effect on pork quality, (65) Ill. 367.
 oil meal proteins for fattening pigs, (70) Ill. 661.
 oil meal v. cottonseed meal for pasture-fed steers, (68) Ill. 653.
 oil, studies, (68) Miss. 319.
 oil, use in paints, (70) Ill. 610.
 organisms, nitrite production by, (64) 527.
 paste as emulsifying agent, (69) 748.
 pasture, value in pork production, (68) Miss. 364.
 plant, fertility value in, (62) Ill. 316.
 plant, life history and composition, (66) Ohio 733.
 plants, composition at various stages related to rate of decomposition, (68) Mo. 302.
 plants, leaf retention, device for testing, (66) W.Va. 735.
 plants, nitrogen distribution at different growth stages, (61) 520.

Soybean—Continued.

- products, hemoglobin building properties, (68) 858.
 purple stain, notes, (61) Ind. 342.
 seed treatments, (62) Del. 746.
 seedlings, damping-off, studies, (66) Mo. 313.
 seeds, germination, transformation of nitrogenous compounds during, (65) 24.
 seeds, poisonous principle, (66) 666.
 specimens, threshing, grille for, (61) Ga. 778.
 v. alfalfa hay for milk production, (66) W.Va. 568.
- Soybeans—
 abortive seeds in, (63) 230.
 acidity studies, (64) Del. 622.
 acreage, yields, and use, (66) Ill. 282.
 amino acid deficiencies, for growth in rats, (67) 627.
 analyses for iodine number, oil, and protein, (68) Okla. 609.
 and corn for silage, (69) N.Y.Cornell 202.
 and corn, interplanting, (61) Miss. 433, Miss. 435; (63) Ohio 525; (67) La. 233; (68) 41, N.C. 468, Ohio 610; (69) Ohio 39; (70) N.C. 762.
 and corn, production with mechanical power, (67) La. 322.
 and milk, comparison of vitamin B₁ and B₂ in, (68) 131.
 and small grain rotation by use of mechanical power, (66) S.C. 627.
 and soybean oil meal, relative feeding value, (70) Ohio 669.
 and soybean products, supply and marketing, (68) Ill. 844.
 and wheat, feeding value for swine, (69) 405.
 as corn supplement, Ind., (63) 555; (65) 158; (67) 589.
 as green manure, (70) Ill. 584.
 as green manure for sugarcane plantations, (67) 672.
 as hay crop, (65) Ala. 331; (67) N.J. 379.
 as national food in Italy, (61) 586.
 as nurse crop, effect, (64) Ohio 625.
 as protein source for brood sows, Ill., (62) 366; (64) 865.
 as protein supplement for pigs, (63) Ohio 560; (65) Del. 763.
 as soil improvement crop, (69) Kans. 179.
 as source of protein for chicks, (61) Ind. 366.
 as tankage substitute for pigs, (64) Ind. 167.
 breeding, (61) Ga. 125, N.J. 724, N.C. 725, Va. 726; (62) Miss. 31, Mo. 31, Miss. 128, N.Y.Cornell 731; (63) Ga. 129, N.C. 629, Mo. 728; (64) Miss. 432, Miss. 623, Kans. 826; (65) N.C. 126; (66) Mo. 326, Va. 527, Miss. 730; (67) La. 233, Mo. 378; (68)

Soybeans—Continued.

- breeding—continued.
 N.C. 468, Ill. 608, W.Va. 755; (69) Ind. 37, Iowa 37, Ga. 199, Kans. 200; (70) Mo. 172, Ill. 609, N.C. 762, N.Y.Cornell 762.
 carbohydrate-nitrogen relation, effect of fertility, (67) 660.
 chloroplast pigments development, effect of minerals, (61) 324.
 classification, (63) Mo. 336.
 combine harvesting, (66) U.S.D.A. 80.
 composition, changes in, relation to green manuring value, (66) 119.
 composition, effect of soil type and fertilizers, (63) 336.
 cost of production, Ill., (62) 386; (64) 889.
 cotyledon color types, genetic relations, (64) 430.
 culture, (63) N.C. 35; (66) W.Va. 328.
 culture experiments, (61) Kans. 125; Tenn. 127, Va. 726; (62) Miss. 31, Miss. 128, Fla. 325, Ark. 828; (63) Ohio 525, Ohio 823, Ohio 824; (64) Ark. 430, Kans. 826; (65) N.C. 126; (66) Ark. 525; (67) N.Mex. 29, La. 233, Nebr. 517, Ohio 517; (68) Tenn. 182, Idaho 318, Ark. 608, Ill. 608; (69) Ga.Coastal Plain 37, Kans. 200; (70) Ill. 609, Ga.Coastal Plain 762.
 cutting tests, (61) Kans. 125; (64) Miss. 432, Miss. 623.
 defective seed coat character in, (63) 817.
 drying for hay, (68) Minn. 35.
 effect of fertilizers applied with seed, (61) Va. 726.
 effect of inoculation and liming, (69) Iowa 515.
 effect on following wheat crop, (66) N.Y.Cornell 626; (70) Va. 764.
 effect on hardness of fat in hogs, S.C., (64) 663; (66) 659; (68) 796.
 effect on pork quality, (64) S.Dak. 664; (65) Ill. 367.
 ensiled during three consecutive years, chemical study, (69) 563.
 feeding, effect on milk and butterfat production, (69) Ind. 98.
 feeding in definite proportions, effect on pork quality, (61) 257.
 feeding value, (61) Ohio 463, Ind. 664, Mo. 860; (62) Ill. 366, Ohio 764, Ark. 866; (64) S.C. 663, Ill. 865; (68) Ark. 653.
 feeding with corn to avoid soft pork, (70) S.Dak. 816.
 fertilizer experiments, (61) Ind. 329, N.C. 715, Va. 716; (64) Ga.Coastal Plain 622; (65) N.C. 126, N.C. 127; (66) Ga.Coastal Plain 626, S.C. 627; (68) S.C. 754; (69) N.H. 353.
 for feed and fertility, (63) 329.
 for hay and seed, (67) Md. 517; (68) Ark. 608; (69) Ind. 789; (70) Pa. 321.

Soybeans—Continued.

- for hay, fertilizers for, (65) N.C. 115.
- for hay, time of cutting test, (66) Ill. 265.
- for hay, varieties and strains, (63) La. 330; (65) N.C. 126; (67) N.J. 123.
- for hay, yields, (64) Ky. 131.
- for Oklahoma, (63) Okla. 36.
- for pigs, (66) Ark. 562.
- for pigs, limitations, (69) Ohio 90.
- for seed, variety tests, (65) N.C. 126.
- for silage, (69) Fla. 257.
- for silage and hay, (63) W.Va. 35.
- genetics, (69) 192.
- germination, effects of storage, (70) Ill. 609.
- germination, reduction due to damage during threshing, (67) Ohio 29.
- germination studies, (68) 40, Ill. 609; (70) Ill. 609.
- green, as forage for hogs, (69) S.C. 254.
- ground, and soybean oil meal, relative feeding value, (69) Ohio 99.
- ground, effect on cold storage quality of eggs, (69) 846.
- ground, effect on market milk and butter, (62) S.C. 665.
- ground, feeding value, (66) Ind. 863; (68) S.Dak. 796; (70) S.Dak. 816.
- ground, for poultry, Del., (64) 665; (66) 566; (69) 89, 846.
- ground, v. linseed meal for heifers, (65) Ind. 169.
- ground, value for egg production, (63) Mo. 765.
- grown under Vitaglass, (63) Wis. 40.
- growth, effect of boron, (61) N.J. 719.
- growth, effect of light intensity, (61) 324.
- harvesting, grain losses in, (66) Ill. 278.
- harvesting, low cutting attachments for combines, (65) Ind. 182.
- harvesting tests, (69) Kans. 200.
- harvesting with combine, Va., (61) 772; (66) 580.
- Illini, description, (61) Ill. 828.
- improvement, genetics and breeding in, (68) Ill. 463.
- in adequate supplements for pigs, (61) Ind. 363.
- income per acre, (70) Ill. 695.
- inheritance of ability to become inoculated, (68) Ill. 608.
- inheritance of pubescence in, and relation to pod color, (61) 723.
- inoculated, v. red clover as soil builder, (68) Ill. 590.
- inoculation, (61) Iowa 319; (62) Miss. 31, Miss. 128; (64) Miss. 623, Ill. 830; (65) Iowa 125; (66) Ill. 223.
- inoculation and growth, calcium and pH in, (68) 325.
- intercropping, (68) S.C. 754.
- irradiation by ultra-violet light, effects, (65) Mich. 722.
- liming experiments, (64) N.C. 21.

Soybeans—Continued.

- lodging, (65) 35.
- Manchurian, wild and cultivated, cytogenetical studies, (70) 758.
- merits for food and forage, (64) P.R. 336.
- mineral deficiencies, Ind., (61) 363; (63) 559; (65) 158; (69) 89.

- michauxiana, notes, (61) Iowa 354.
- townsendii, origin, (65) 819.
- Spasmophilia, adult, in India, (65) 398.
- Spathimeigenia aurifrons n.sp., description, (64) 548.
- Spathius sp., biology, (64) 250.
- Spatulicraspeda castaneiceps, notes, (68) 499.
- Spavin in horses, radiographic and patho-histologic study, (65) 869, 870.
- Spear grass fodders, feeding value, (66) 858.
- Spearmint and peppermint as farm crops, (61) U.S.D.A. 140.
- Species—
- concept, formulation, (65) 520.
- problem in light of genetics, (62) 214.
- specificity, relation to differentiation, (65) 218.
- Spectral energy distribution, measurement, (67) 608.
- Spectrophotometric development for biological and photochemical investigations, (68) 437.
- Speltz, feeding value, (64) S.Dak. 673.
- Spermatogenesis—
- avian, research fellowship for, (63) 400.
- in ground squirrel, (65) 218.
- in guinea pigs, effect of X-rays, (62) 516.
- in mice, (69) 35.
- in ovariectomized fowls, (62) 325; (63) 128.
- of the goat, chromosomes in, (64) 430.
- Spermatozoa—
- activity and production by White Leghorn males, variation, (64) 468, 621.
- activity, effect of dilution, (63) 726.
- activity, effect of egg secretions, (63) 726.
- dimorphism, (62) 124, 726.
- duration of life in female tract of animals, (62) 515.
- duration of motility in reproductive tract of Merino ewe, (70) 382.
- from posterior and anterior end of epididymis, comparison, (65) 218.
- human, microdissection studies, (62) 424.
- human, transformation period, diagrams, (65) 122.

Spermatozoa—Continued.

- in fowls, survival, (70) 464.
- in uterine tract, transportation, (70) U.S.D.A. 463.
- mammalian, behavior, (63) 26.
- mammalian, improved fluid for suspensions, (69) 35.
- mammalian, problems in physiology of, (62) 125.
- migration through cervix, (67) 232.
- motility, energy of, (67) 121.
- motility in portions of male reproductive tract of rats, (65) 426.
- of bull, size and forms, (62) Mo. 29.
- of cattle, duration of life, factors affecting, (68) 606.
- of cock, longevity, (64) 764.
- of horse and rabbit, optimum pH for vitality, (61) 821.
- of rabbits, survival, effect of temperature, (64) 728.
- production in horses, (63) 127.
- senescence, (63) 726.
- transportation in rats, (65) 27.
- Spermophagus subfasciatus*, morphology and biology, (65) 551.
- Spermophiles, behavior, (63) 650.
- Sphaceloma—
 - fawcettii*—
 - development, (65) 447.
 - notes, (67) 47.
 - on leaves of citrus, histology of lesions, (66) 344.
 - perseae* n.sp., notes, (70) 799.
 - rosarum* n.comb., description, (68) 350.
 - symphoricarpi* n.sp., description, (66) 446.
 - symphoricarpi* of snowberry, (67) 703.
- Sphacelotheca—
 - cruenta*, physiologic forms, (69) Kans. 222.
 - cruenta*, physiologic specialization, (70) 348.
 - sorghii*, forms, (64) Kans. 845.
 - sorghii*, notes, (61) 539; (64) 232.
 - sorghii*, physiologic forms, (66) 839; (69) Kans. 222.
 - spp., heterothallism and hybridization in, (68) 340.
- Sphaerella heveae*, notes, (65) 344.
- Sphaeridium* species from Orient, (65) 546.
- Sphaeropsidales, effect of ultra-violet irradiation, (68) 314.
- Sphaeropsis—
 - heterospora on mulberry branches, (68) 488.
 - malorum*, notes, (69) 540.
- Sphaerostilbe—
 - repens*, notes, (64) 846; (68) 62; (70) 202.
 - sp., notes, (63) 245; (64) 229.
- Sphaerotheca—
 - humuli*—
 - conidia, germination, (65) 442.
 - control, (61) 648.
 - notes, (62) 532; (64) 231, 232; (66) 751.

Sphaerotheca—Continued.

- mors-uvae*, notes, (63) 839.
- pannosa* conidia, germination, (65) 442.
- pannosa rosae*, notes, (66) 152.
- Sphagnum, anaerobic decomposition, (63) 812.
- Sphegidae of South Africa, (62) 861; (66) 558.
- Sphenophorus, *see* Corn billbug.
- Sphenoptera *gossypii*, notes, (67) 286
- Sphex *aegyptiacum*, notes, (70) 63.
- Sphingomorpha *chlorea*, notes, (61) 550.
- Spicaria *prasina*, notes, (66) 649.
- Spices—
 - bibliographical summary, (62) U.S.D.A. 312.
 - insects affecting, (63) 846.
- Spider—
 - beetle, golden, anatomy, (62) 450.
 - beetle, golden, studies, (61) Mont. 153; (62) 250, 859.
 - bite poisoning in Kansas, (61) 663.
 - black widow—
 - notes, (64) 239.
 - parasite of, (64) 756.
 - toxin of, (68) 508.
 - mite, *see* Red Spider.
 - mite, green, studies, (65) Fla. 452.
 - venomous, in Philippines, (68) 794.
- Spiders—
 - of Oklahoma, (68) 794.
 - of Puerto Rico, (62) 548.
- Spillman, W. J., editorial, (65) 601, 604.
- Spilocryptus *exannulatus*, notes, (67) 571.
- Spilographa—
 - alternata*, notes, (65) 246.
 - electa*, notes, (64) 155; (67) 564.
 - electa* oviposition, effect of talc, (63) 462.
 - setosa*, notes, (67) 705.
- Spilonota *ocellana*, *see* Bud moth, eye-spotted.
- Spinach—
 - acidity response, (66) N.Y.Cornell 634.
 - aphid, role in leaf roll transmission, (66) Ind. 238.
 - Bloomdale, vitamins in, (66) Mo. 391.
 - canned—
 - effect of storage on vitamin value, (62) 93.
 - pellagra-preventive value, (67) 488.
 - vitamin A loss in, (70) 420.
 - vitamin C in, S.Dak., (61) 92; (63) 94; (66) 198.
 - vitamin C in, stability relation to copper content, (69) 153.
 - copper and manganese in, relation to mineral additions to soil, (67) 775.
 - culture and handling, (69) Ill. 52.
 - damping-off, control, N.Y.Cornell, (70) 56, 791.
 - downy mildew in Manitoba, (63) 839.
 - dried, in tightly closed jar, vitamin A in, (65) 193.

Spinach—Continued.

- effect of cooking method on vitamin B in, (62) Mo. 94.
 effect of rye and oat straws, (69) 183.
 effect of soil acidity, (64) N.Y.Cornell 632.
 effect on hemoglobin regeneration, (63) 897.
 fertility maintenance for, (61) Md. 622.
 fertilization with synthetic nitrogen salts, (61) Va.Truck 736.
 fertilizer experiments, (62) Ill. 337; (63) Ill. 533, R.I. 616; (64) Ohio 635, R.I. 839; (65) R.I. 534; (67) Ill. 36.
 for canning, quality, (63) Md. 445.
Fusarium solani affecting, (66) Tex. 44.
 growth, relation to pH of nutrient solutions, (61) 642.
 hemoglobin regenerating potency, (69) 473.
 inbreeding studies, (63) Conn.State 635.
 inorganic elements for nutritional anemia, (62) 297, 695.
 iron in, (67) U.S.D.A. 85.
 leaf deformation, (67) 545.
 leaf miner—
 life history and control, (64) 853; (70) 214.
 notes, (61) Ohio 450.
 on beets, bionomics and control, (70) 365.
 on beets in Belgium, (70) 67.
 treatise, (67) 291.
 leaves, vitamin A in, relation to size, (62) 791.
 mildew, notes, (66) N.Y.Cornell 640.
 mosaic and beet mosaic, reciprocal transmissibility, (61) 45.
 New Zealand—
 composition, (61) 524.
 methods of germinating, (67) 522.
 nutritive value, (63) 188.
 oxalic acid in, (64) 580.
 paper mulch experiments, (61) Ohio 440.
 pH of sap, relation to pH of soil, (66) Idaho 235.
 resistant, breeding, notes, (61) Va. 753.
 response to change in photoperiod, (67) 248.
 root rot, control, (64) N.Y.Cornell 642.
 spray schedule for, (61) 753.
 studies, (63) Tex. 444.
 transmission of cucumber mosaic to, (69) 671.
 under irrigation in Texas, (68) Tex. 476.
 value in nutritional anemia, (68) 281.
 varieties, (62) Md. 340; (68) Mich. 45; (69) 211.
 varieties for canning, (61) Md. 642.
 varieties, vitamins in, (67) 630.
 variety tests, (64) Ala. 337; (67) Conn. State 523; (70) Ill. 616.

Spinach—Continued.

- viruses affecting and insect transmission, (69) 671.
 vitamin A assimilation, effect of mineral oil, (70) 878.
 vitamin A in, (64) 789; (70) Tex. 131.
 vitamin A in, effect of fertilizer treatment, (64) Pa. 195.
 vitamin B complex in, (65) 590.
 vitamin C in, (62) Mo. 95; (64) S.Dak. 693; (66) S.Dak. 198; (68) 861.
 vitamin C in, under varying conditions, (68) S.Dak. 867.
 yellows, notes, (70) Tex. 192.
 yields under ultra-violet glass, (61) 834.
- Spindle worm—
 biology and morphology, (69) U.S.D.A. 389.
 bionomics, (64) Iowa 851.
 notes, (61) Iowa 354, Mich. 450; (63) 356.
- Spiny caterpillar of cotton, pentatomid predator of, (66) 849.
- Spirea aphid, control, (64) 854.
- Spirillosis, avian, in the Levant, (68) 677.
- Spirillum fetus, cause of outbreak of abortion in sheep, (69) 717.
- Spirocerca sanguinolenta—
Gymnopleurus sinnatus as intermediate host of, (61) 676.
 intermediate host of, (66) 867.
- Spirochaeta—
 anserina, life cycle, (63) 370.
 anserina, notes, (68) 823.
 gallinarum, attempted transmission to fowls, (62) 172.
 ictero-uraemiae canis, notes, (65) 567.
 morsus muris, arsenic refractoriness, (69) 421.
 morsus muris, drug fastness, (62) 167, 260.
 theileri transmission by ticks, (63) 555.
 turicatae n.sp., agent of recurrent fever, (70) 218.
- Spirochetes—
 in chickens, (65) 73.
 in domestic animals, pathogenic significance, (63) 771.
 in swine, Calif., (62) 771; (63) 175.
 of rat bite fever, drug fastness, (62) 167.
- Spirochetosis—
 avian, studies, (68) 823.
 icterohemorrhagic, experimental, (69) 590.
 of fowls, ducks, and geese, (69) 580.
 of fowls in Egypt, (63) 872.
 of fowls in Northern Caucasus, (65) 777.
 of pigs, (67) 452.
- Spirogyra, turgor pressure, effect of ethyl alcohol, (63) 623.
- Spiroplasma caeci-gallorum n.sp., description, (65) 73.
- Spiruridae, intermediate host, (61) 676.
- Spiruroidea, parasitic in poultry, developmental stages, (65) U.S.D.A. 181.

Spittle bug, notes, (65) Me. 757.
 Spleen, ox, vitamin G in, (70) 424.
 Splenectomy—
 and piroplasmoses, (70) 92.
 effect on fowls, (65) 674.
 effect on resistance of rats to trypano-
 somiasis, (66) 668.
 in ruminants, effects, (64) 771.
 sequelae, (63) 872.
 Splices, hitches, and knots, strength tests,
 (62) 174.
 Splitworm, a tobacco insect new to Wiscon-
 sin, (67) Wis. 706.
 Spodoptera mauritia, *see* Army worm, nut-
 grass.
 Spondylocladium atrovirens, notes, (67) 407.
 Sponges, diamino acids in, (65) 310.
 Spongospora subterranea, notes, (62) 536;
 (64) 43; (67) 696.
 Spores, bacterial, thermal resistance as af-
 fected by age and environment, (61) 214.
 Sporotrichum—
 bassiana, notes, (66) Ala. 847.
 citri, notes, (64) 846; (67) 47, 400.
 malorum, notes, (63) Ind. 541.
 narcissi, n.sp., notes, (68) 495.
 radicolum, notes, (68) 495.
 schenckii, transmission to plants and
 animals, (67) 599.
 Sportsman's club, present day, (70) 355.
 Sportsman's problem as the landowner sees
 it, (70) 355.
 Spray—
 baits, attraction of insects to, (67) 564.
 chemicals, feeding to albino rats, effect,
 (69) Mo. 552.
 circles in Annapolis Valley, (66) 448.
 coverage, (63) 751.
 coverage, loss, causes, (66) Wash.Col.
 755.
 fluids, action on containers, (61) 343.
 for insect control in empty grain bins,
 (69) 824.
 injury and fruit set, (63) Ohio 340.
 injury on apples, (63) 251; (67) 425.
 Long Ashton, field experiments, (61)
 356.
 machines and equipment, descriptions,
 (70) 691.
 materials, (69) Del. 60, Mass. 652.
 chemical reactions, (66) N.Y.State
 501.
 cost and quantity, (67) 425.
 effect on activity of leaf, (70) N.Y.
 Cornell 777.
 effect on pollination, (63) 137.
 fungicidal properties, (65) 537.
 new, value, (66) 247.
 tests, (64) Conn.State 842; (67)
 Ohio 36.
 waste sulfite as emulsifying agent,
 (65) Va. 40.
 mixtures, adhesion, studies, (61) N.J.
 751.
 new, for citrus scale insects, (63) 256.
 nonarsenical, for cabbage moth control,
 (67) 152.

Spray—Continued.

oil emulsion and sulfur, properties, (64)
 542.
 outfit for applying small quantities of
 material, (65) 847.
 outfits, incorrectly designed, loss of
 pressure, (68) Mich. 328.
 procedures, new, (65) 50.
 program, measuring efficiency, (64) 44.
 residue, arsenical—
 adherence and distribution, (68)
 W.Va. 780.
 effect of sprinklers, (67) 425.
 excessive amounts on food products,
 inspection for, (70) Conn.State
 271.
 on apples, (62) N.Y.State 740; (65)

 removal, (63) Wash.Col. 235, Idaho
 530; (64) 748; (67) Idaho 254,
 423, 425, N.Y.State 526, 560, Ind.
 673.
 removal, effect of oils in spray,
 (64) Wash.Col. 637.
 removal from apples, (61) N.Mex.
 227, Va. 736; (65) Va. 739; (66)
 Ky. 137; (68) Wash.Col. 760;
 (69) 684.
 removal from grapes, (70) 629.
 removal, new solvents for, (62)
 433.
 sampling apples for, (66) Wash.Col.
 741.
 studies, (61) Oreg. 53.
 tolerance, (67) 560.
 residue—
 lead in, qualitative detection, (69)
 493.
 on apples, determination, (68)
 Conn.State 271.
 on peaches, (68) Tenn. 215.
 on vegetables, (69) 210.
 problem, (65) Mass. 355; (67)
 Mass. 424, 427, N.J. 524; (69)
 384, Mass. 686.
 reduction, (69) N.H. 385.
 relation to spraying and dusting
 practice, (61) 526.

Spray—Continued.

- residue removal, (64) Oreg. 338, Ohio 634; (65) 52, 454; (66) Idaho 226; (69) Oreg. 364; (70) N.J. 477.
 from apples, (65) 230, 342, Ohio 638, Va. 739, N.J. 833; (66) Ind. 37; (69) Ind. 798; (70) Oreg. 624, Wash.Col. 185.
 from apples and cherries, (66) N.Y.State 534.
 from apples and pears, (66) U.S.D.A. 231.
 from fruits, (61) Oreg. 35, U.S.D.A. 40, Oreg. 44, 233, 756, Idaho 830; (62) 245, 648, N.Y.State 740, N.Y.State 741; (70) 208.
 from fruits, new method, (66) 655.
 from pears, (70) Oreg. 624.
 from waxy or oil-covered fruit, (64) 855.
 future of, (67) 561.
 residue, studies, (61) N.J. 734, Mass. 848; (70) 208, U.S.D.A. 501.
 russetting due to arsenic, (66) Va. 553.
 schedules, (62) N.J. 840; (65) N.J. 42; (66) Wash.Col. 755.
 defects in, (67) 427.
 for canners' crops, (61) 753.
 for fruits, (67) N.J. 38, Ohio 38.
 for Kansas, (61) 354.
 for 1931, (66) 347.
 for 1932, (67) 560.
 for northwest, (67) 283.
 service, (67) N.H. 560.
 systems, stationary, improvements in, (69) 440.
 tank, efficient agitation in, (70) 501.
- Sprayer—
 accessories affect efficiency of equipment, (65) Mich. 478.
 air-blast type, efficiency, (67) 705.
 air jet, for application of hydrocyanic acid, (66) 758.
 compressed air driven power, (61) Mass. 848.
- Sprayers, orchard, tank agitation in, (63) 154.
- Spraying—*see also* Dusting and special crops.
 and dusting experiments, (63) Ohio 830; (67) 410, Ind. 523.
 citrus foliage, oil retained by, (63) 610.
 equipment and materials, (61) Kans. 141.
 equipment, improvements in, (63) 457.
 experiences, (67) 560.
 experiments, (65) Mo. 340; (69) Nebr. 520.
 experiments for codling moth control, (61) Wash.Col. 550.
 experiments in New Zealand, (69) 549.
 for diseases and insects, (69) Kans. 212.
 for scab and codling moth, success and failure in, (69) Mich. 212.
 methods, comparison, (67) Mich. 526.
 modern developments, (67) 561.
 operations, hazard from power lines during, (67) 705.

Spraying—Continued.

- plants, stationary, (62) 571; (64) 239, Ohio 634, W.Va. 780, Ill. 885; (68) Ill. 679; (70) Ill. 687.
 and portable, cost study, Ind., (67) 673; (69) 116.
 for orchards, design, (66) Ill. 278.
 in Georgia, (69) 599.
 in West Virginia, (61) 683.
 operation and cost, (64) Ind. 137.
 place in Virginia, (69) 386.
 power consumption, (67) Ind. 605.
 survey, (67) 329.
 v. portable, (69) Ind. 48.
 problems from new angles, (67) 427.
 v. dusting for fruit trees, (63) Ind. 531.
- Sprays—*see also* Insecticides, Fungicides, and specific kinds.
 application, factors in, (66) 850.
 colorless, for Delaware grapes, (62) Del. 745.
 combination insecticide and fungicide, (61) Ohio. 140.
 dormant oil, for pear psylla, (67) N.Y. State 710.
 effect on air temperature surrounding sprayed potato plants, (70) 492.
 effect on water loss from plants, (63) 426.
 fish oil as adhesive for, (61) 248.
 for cattle flies, methods of testing, (69) 75.
 for fruit trees, tests, (62) Mo. 40.
 for ornamental evergreens, tests, (67) N.J. 561.
 for potato late blight, (63) 245.
 for protection of trees against sunscald and rodent injury, (68) Minn. 46.
 fungicidal properties, (68) 340.
 lead arsenate, fish oil as adhesive, (61) U.S.D.A. 356.
 liquid, applying by airplane, (70) 501.
 new combination, for codling moth control, (63) 460.
 new, for apple scab, tests, (63) Mich. 546.
 nonpoisonous, effect on insects, (62) 450.
 oil, chemistry of, (63) Wash.Col. 250.
 oil, mixing and application, (62) 851.
 oil, preparation and use, (61) N.Mex. 355.
 oil pyrethrum containing copper oleate, effect on apple trees, (65) N.J. 849.
 orchard, comparison, (68) 496.
 poisonous, on fruits or vegetables, (70) 274.
 power requirement for agitation, (66) 380.
 preparation and use, (62) Oreg. 839.
 recommendations for Idaho, (67) 283.
 spreader for, value of skim milk, (68) 499.
 summer and tar-distillate, (68) N.Y. State 637.
 summer oil, effect on apple trees, (65) 51.

Sprays—Continued.

- surface tension relation to wetting and quantity of lead arsenate deposited, (63) 457.
 tar distillate, efficiency, (67) 708.
 tests against thrips, (66) S.C. 654.
 time for application, (61) 532.
 timing for control of scale insects, (70) 211.
 toxicity tests for pear psylla, (63) 458.
 winter, ovicidal action, (68) 637.
- Spraying materials, elastic behavior, (65) 76.
 Springs, heavy helical, stresses in, (64) 79.
 Springtail, clover, attacking predatory mite, (68) 500.
- Springtails—
 damage by, (70) 209.
 in soil, abundance, (68) Conn.State 65.
 injurious to alfalfa, (67) 429; (68) 639.
 on mushrooms, (67) 565; (68) Pa. 497.
 on sugarcane roots, (63) La. 351.
- Sprinklers for orchard irrigation, description, (68) Wash.Col. 537.

Spruce—

- Adirondack, experimental cutting, (70) 341.
 Adirondack, sustained yield, (69) 217.
 and fir land, removal of hardwoods, value, (69) Mich. 525.
 and pine, growth differences on poor soil, (65) 342.
 annual increment, (64) N.Y.Cornell 639.
 areas, losses from logging operations, (69) Mich. 59.
 as source of pulpwood, (61) Mich. 740.
 assimilation in, effect of acids, (70) 597.
 black, handling, use of clear cut strips in, (66) 540.
 black v. white, growth rate, (65) Mich. 742.
 black, volume determination, (61) Minn. 740.
 blight on seedlings, control, (63) Ohio 45.
 blighting by Phacidium sp., (67) 557.
 blueing in, (62) 538.
 bud scale, notes, (61) Mich. 450.
 bud worm, host selection by, (61) 756.
 bud worm, notes, (61) Mich. 450.
 Colorado and Engelmann, distinguishing, (66) 541.
 Engelmann, effect of fertilizers, (64) U.S.D.A. 42.
 gall aphid—
 as forest pest, (70) 361.
 as nursery pest, (65) 455.
 control, (64) Mich. 239, 854; (65) 51, N.Y.Cornell 53; (66) N.Y. State 552.
 notes, (61) Mich. 450; (64) N.Y. State 455; (68) N.Y.State 637; (70) N.Y.State 803.
 gall, long, description and control, (70) Mich. 808.

Spruce—Continued.

- girdling hardwoods to release, (62) 844.
 height growth in, (66) 438.
 in New Zealand, enemies of, (67) 569.
 kermes, control, (64) Mich. 239.
 merchantable-sized, releasing through girdling, (66) 832.
 mite, notes, (64) N.Y.State 455; (65) Mich. 153.
 needle miner, control, (65) N.J. 850.
 needle rusts in Minnesota, (70) 353.
- Norway—
 cones and seeds, (63) 539.
 for shelter belts, growth, (61) Ohio 443.
 photosynthetic activity, (70) Vt. 191.
 seed germination, effect of summer temperature, (64) 226.
 seedlings, mycorrhizae on roots, (67) 373.
 plantations, Phacidium blight in, spread and control, (69) 380.
 red, alcohol separation of empty seed and effect on germination, (67) 41.
 red, change in form after logging, (68) 339.
 red, histological studies, (61) 646.
 reproduction, effect of soil moisture, (65) 836.
 reproduction, relation to direction of exposure, (69) 808.
 sawfly, notes, (64) 358.
 sawfly, yellow-headed, notes, (69) 548.
 second-growth, yields, (62) U.S.D.A. 531.
 seed beds, damping-off in, effect of superphosphate, (67) 41.
 seeding experiments, (65) Ind. 141.
 seedlings, effect of soil reaction, (69) 370.
 seedlings, injury from strawberry root weevil, (63) Mich. 55.
 seedlings, mineral soil requirements, (63) Mich. 43.
 Sitka, layering habit in, (65) 643.
 Sitka, timber decay, cause, (68) 63.
 Sitka, yellowing of, (63) 843.
 stands, management in Northeast, (64) U.S.D.A. 445.
 sterilization of seed beds, (62) 640.
 tortrix, notes, Mich., (61) 450; (68) 351.
 varieties at Wooster Arboretum, list, (66) Ohio 743.
 white, volume table, (61) Mich. 43.
 wood lignin, isolation, (64) 8.
- Sprue, etiology, possible factor in, (69) 687.
 Sprue-like symptoms in dogs, effect of vitamin G-deficient diets, (69) 470.
- Spuler, A., necrology notes, (67) 192.
- Spurge—
 leafy, as weed pest, (65) Iowa 125.
 leafy, distribution in United States, (70) 44.
 leafy, life history and habits, (69) N. Dak. 364.

Spurge—Continued.

leafy, spread and control, Iowa, (67) 378; (69) 38.

petty, feeding experiments, (62) 467.

Squab flesh, distribution of proteins in, (64) 764.

Squash—

bacterial leaf spot, (62) 849.

beetle, notes, (61) Va. 752.

beetle, toxic spray for, (61) Md. 656.

borer, control, (64) Mich. 362.

borer, control, spray formulas, (67) N.Y.State 714.

bug contact angles of insecticides, (68) N.H. 216.

bug, notes, (61) Utah 54; (63) Utah 251; (67) N.Mex. 50.

bug of economic importance, studies, (61) U.S.D.A. 754.

bugs, control, (61) N.J. 751.

changes in carbohydrate content, (65) 227.

curly top resistant variety, (64) Oreg. 345.

curly top, studies, (70) 635.

downy mildew or leaf blight, infection experiments, (62) Del. 746.

seed-borne diseases, control, (63) Ga. 147.

seedlings, growth and nitrogen metabolism, (62) 837.

summer, and gourd hybrids, inheritance of factors, (68) 463.

vine borer, studies, (63) Conn.State 651; (65) Conn.State 549; (66) W.Va. 554.

Squashes—

analyses, (68) 271.

and pumpkins, crossing experiments, (61) Iowa 339.

breeding, (63) N.Dak. 829.

breeding and selection, (67) N.Dak. 673.

buttercup, origin and use, (68) N.Dak. 273.

California, composition and time for cooking, (67) 770.

canning tests, (67) Ind. 523.

composition, effect of growing season, (70) N.Y.State 774.

composition, variation in, (66) N.Y. State 533.

culture experiments, (63) Utah 639.

dusting experiments, (70) Ill. 648.

effect of irrigation, (64) Oreg. 339.

effect of mulch paper, (64) Ky. 138.

effect of phosphorus, (68) Mont. 760.

feeding value, (66) Guam 458.

fruit shapes, developmental history, (61) 429.

Hubbard, development of cotyledons, (67) 676.

improvement, Mass., (63) 533; (69) 652.

in rotation, yields and returns, (68) R.I. 467.

Squashes—Continued.

in storage, chemical changes, (70) N.Y. Cornell 775.

inbreeding studies, (63) Conn.State 635.

insects affecting, (70) Conn.State 893.

intra-State competition in Florida, (66) Fla. 881.

new variety, cooking and canning qualities, (63) N.Dak. 891.

Phytophthora citrophthora affecting, (61) Calif. 341.

seed improvement studies, (67) Mass. 386.

storage studies, (66) N.Y.Cornell 635.

Table Queen, inbreeding, (61) 642.

thinning and fertilizer needs, (69) N.H. 364.

variety, notes, (66) N.Y.State 535.

variety tests, (63) R.I. 638; (67) Conn. State 523.

vitamin A in, (69) 617.

Squill derivatives, cumulative poisoning by, (70) 93.

Squill powders, red, as raticides, (62) U.S.D.A. 446.

Squirrel fleas, reservoirs of plague virus during winter, (70) 214.

Squirrels—

American gray, ecology, (64) 453.

American gray, in the British Isles, treatise, (67) 148.

Douglas ground, seasonal activity and growth, (66) 153.

fluctuations in numbers, (69) 543.

gray, in British Isles, (64) 746.

ground, action of strychnine on, (67) Colo. 148.

ground, germ cells and somatic tissues, (65) 218.

ground, laboratory reproduction studies, (66) 153.

ground, poisoning, (63) Colo. 153.

male genital apparatus, (65) 217.

notes, (69) Kans. 232.

red, injury to pine, (61) 647; (70) 633.

red, life history and habits, (62) 240.

thirteen-lined ground, early life, (70) 204.

thirteen-lined ground, hibernation, (62) 151, 539; (63) 478.

Wyoming ground, life history studies, (65) Colo. 650.

St. Ives Research Station for study of greens-keeping problems, (63) 499.

St. Johnswort—

entomological control, (64) 549; (68) 499.

immature, effect on sheep, (62) 558.

on range lands, (64) Calif. 737.

studies, (69) Calif. 37.

toxic effect on livestock, (64) U.S.D.A. 73.

toxic principle, (62) 558.

- St. Lawrence—
 navigation and power project, (62) 280;
 (63) 783.
 navigation and power project, rejoinder,
 (65) 285.
 waterway, (61) 285.
- Stable fly—
 biology, (66) 557.
 enemy of cattle and horses in Rumania,
 (64) 160.
 notes, (70) 530.
 parasites, distribution, (66) Guam 448.
 parasites, notes, (70) Guam 802.
 surra transmission by, (62) 467.
 toxic spray for, (61) Md. 656.
 transmission of buffalo disease by, (63)
 847.
 transmission of paratyphoid B by, (68)
 647.
- Stables—
 dairy, temperatures in, (69) 441.
 ventilating with electric power, (63)
 382.
 ventilation, (70) 111.

- Stink bug**—
 green, economic status, (69) 689.
 green, life history, (66) Va. 553.
 green, notes, N.Y.State, (68) 637; (70) 803.
 injurious to citrus in south China, (61) 753.
 litchi, studies, (65) 757; (67) 431.

Stink bug—Continued.

- southern green—
 - anatomical studies, (70) 808.
 - biomics, (66) 758.
 - egg parasite, (67) 442.
 - injury by, (62) Fla. 351.
 - notes, (68) U.S.D.A. 68; (69) Fla. 231.

Stink bugs, notes, (68) N.Y.State 637.

Stinkwood, poisonous to cattle, (64) 266.

Stinkwort, feeding tests, (61) 71.

Stipa pulchra, carbohydrate metabolism, (64) Calif. 435.

Stirrer, bicycle-chain, description, (68) 578.

Stock—

- and scion relations, (64) 539; (68) N.Y.State 618.
- foods, *see* Feeding stuffs.
- markets in North Devon and North Cornwall, (70) 848.

Stocks—

- breeding, (67) Calif. 525.
- doubling of flowers, (63) Ohio 642.
- effect of liming, (65) Mass. 339.

Stomach—

- desiccated, for pernicious anemia, (64) 297.
- emptying mechanism, (63) 392.
- poison insecticides, toxicity, methods for estimating, (63) 749.
- preparations, vitamin B (B_1) and G (B_2) in, (67) 187.
- response to cereal foods, (64) 578.
- tissue for pernicious anemia, (62) 398; (63) 597; (64) 795.

Stomach worms—

- control, (63) 360; (68) N.C. 526.
- control by sanitation and drenching, (65) N.C. 179.
- in cattle, P.R., (66) 570; (69) 105.
- in lambs, control, (67) U.S.D.A. 168, Ind. 596; (69) Ind. 104, N.C. 859; (70) 533.
- in lambs, potential infestation curves, (68) 674.
- in lambs, sanitation and drenching for, (70) N.C. 825.
- in lambs, treatment, (63) Ohio 72.
- in range animals, (66) Tex. 70.
- in sheep and goats, (61) Oreg. 68; (62) Tex. 666; (66) Tex. 69; (67) Tex. 168, 601.
- in sheep, control, (61) Mich. 469, N.C. 768, 874; (62) 378; (63) N.C. 672; (64) Mich. 261, Oreg. 378, Kans. 879; (65) Mich. 175; (67) 72, 601, Tex. 740, U.S.D.A. 168; (68) W.Va. 811; (69) 276, 717.
- in sheep, effect of nutritional state, (69) 320.
- prevention, nutrition v. treatment, (61) Ohio 472.
- tetrachlorethylene as vermifuge, (63) Tex. 477.
- treatment with carbon tetrachloride, (70) Guam 825.

Stomata—

- aperture in wilting leaves, (61) 425.
- behavior in peaches (68) 50.
- cellophane for determining degree of aperture, (61) 425.
- density in citrus leaves, (66) 21.
- guard cells, mechanism, (63) 23.
- movement, regulation and regulatory role, (61) 121.
- number and distribution in citrus leaves, (62) Calif. 734.
- of leaves, examining, ultropaque microscope equipment for, (69) 799.
- opening in citrus, changes in, (63) 426.
- opening in different wave lengths of light, (65) 215.
- openings in gray birch, effect of 1932 eclipse, (69) 343.

Stomatitis—

- infectious papular, of cattle in Manchuria, (68) 244.
- vesicular—
 - and equine encephalomyelitis viruses, comparison, (70) 390, 834.
 - and foot-and-mouth disease, (67) 167.
 - passive immunization of small animals in, (67) 454.
 - pathogenicity of virus, (66) 871.
 - studies, (70) 390, U.S.D.A. 526.
 - virus virulence and properties of immune sera, (68) 247.

Stomatorrhina lunata, notes, (70) 63.

Stomoxinae, classification and new species, (62) 450.

Stomoxys—

- and mechanical transmission of trypanosomes, (66) 866.
- calcitrans, *see* Stable fly.
- nigra, notes, (64) 248.
- nigra, surra transmission by, (62) 358; (65) 56.

Stone—

- cells of pears, (65) Mich. 739.
- formation in kidney, gall, and bladder, relation to diet, (63) 297.
- quarrying industry in Kentucky, (68) U.S.D.A. 696.

Stonefly, new species, (65) 546.

Stones, removal from farm lands, (61) Minn. 774.

Stopcocks, removing frozen plugs from, device for, (68) 578.

Storage—

- houses for fruits and vegetables, insulation, (62) Pa. 81.
- houses, insulation, (70) Pa. 332.
- tissue substance, exosmosis into water, (61) 212.

Storages—

- air-cooled, construction and management, (67) Mich. 611.
- natural and cool air, (67) Iowa 385.
- underground, for fruit and vegetables, construction, (66) Ohio 476.

- Stovarsol specific for contagious agalaxia, (62) 170.
- Stove, electric, special type, (66) 495.
- Stoves, electric—
 energy consumption, (66) Ill. 277.
 studies, (70) Nebr. 730.
 surface units in, thermal efficiency, (65) 697.
 utensils for, Wash.Col., (68) 874; (69) 908.
- Stoves, kerosene—
 selection and management, (64) Nebr. 198.
 studies, (64) Nebr. 197.
- Strain gage, improved recording, (70) U.S.D.A. 689.
- Strangles—
 new vaccine against, (64) 379.
 serum and antiviral treatment, (70) 92.
 streptococci infection, protective value of strangles bacterin, (69) 592.
 streptococcus, specificity, (63) 771.
- Strategus—
 julianus, notes, (70) Tex. 207.
 simson and related West Indian species, synopsis, (68) 647.
- Straussia longipennis, *see* Sunflower maggot.
- Straw—
 and hay, blowing stackers for, studies, (61) 478.
 artificial manure from, (62) Mo. 17, N.Y. State 21.
 breaking strength, instrument for testing, (65) 734.
 carbohydrates, calorific value, (63) 163.
 cellulose determination in, (65) 314.
 effect on crop yield, (63) 717.
 effect on soil productivity, (62) Ill. 317.
 feeding value, (68) S.Dak. 365.
 fertilizing value, (68) Ill. 609.
 for soil improvement, value, (63) Ind. 515; (70) Ill. 609.
 fresh, effect on noodule production, (63) 334.
 furfuraldehyde-yielding substances in, nature and role, (63) 307.
 insulation for poultry house floor, (68) Md. 391.
 itch mite, notes, (69) 396.
 mulch, effect on fruit trees, (64) Mo. Fruit 839.
 mulch, effect on potatoes, (61) Nebr. 824; (66) 530.
 mulch, effect on strawberries, (64) Ark. 439.
 mulch, effect on tomatoes, (61) Nebr. 833.
 mulch, effect on vegetables, (69) Nebr. 521.
 mulch for early potatoes, (63) Ohio 35.
 mulch for orchards, (61) Okla.Panhandle 525.
 mulch v. cultivation for apple trees, (61) Kans. 137.
- Straw—Continued.
 piles and other residues, manurial value, (68) Ill. 590.
 residues, effect on loss of nitrogen, (66) Ill. 212.
 utilization, decrease, (68) U.S.D.A. 17.
- Strawberries—
 Aberdeen and Washington, description, (68) Ohio 481.
 analyses and handling qualities, effect of fertilizers, (67) 674.
 aphid resistant varieties, breeding, (65) 640.
 as source of yeast and molds in ice cream, (67) Nebr. 594.
 Blakemore and Premier, comparative merits, (68) Ky. 328.
 breeding, (61) N.J. 733; (62) 139; (64) Can. 538, Conn.State 835; (65) Tenn. 830; (66) 326, Wash.Col. 737; (67) Conn.State 523, N.J. 524; (68) Wash. Col. 760; (69) Conn.State 209; (70) Tenn. 182, U.S.D.A. 474.
 breeding, best parents in, (67) 682.
 breeding, effect of increasing daily light period of winter, (61) 528.
 canned, vitamin C in, stability relation to copper content, (69) 153.
 Cato, Clermont, and Culver, description, (69) N.Y.State 367.
 central market prices, relation to production planning, (68) Ark. 265.
 chemical composition, relation to shipping quality, (68) Okla. 616.
 cold-packed, microflora, (65) Calif. 768.
 composition, changes during growth and ripening, (70) N.Y.State 774.
 composition, effect of fertilizers, (68) 621.
 conference on, report, (70) N.C. 187.
 cost of production, (62) Ark. 885; (63) N.J. 385, N.C. 680.
 cost of production and marketing, (62) Md. 387.
 culture, (62) Ohio 527; (63) West. Wash. 537; (65) Tenn. 830; (66) 336, Kans. 540; (70) N.J. 118.
 culture experiments, (62) Alaska 137; (68) Tenn. 191, N.C. 474; (70) Ariz. 773.
 culture in Eastern United States, (70) U.S.D.A. 481.
 culture in Louisiana, (67) 394.
 cytological studies, (63) 218; (70) Tex. 182.
 dependable, (70) Ohio 184.
 descriptive notes, (62) N.Y.State 431.
 Dorsett and Fairfax, descriptions, (69) U.S.D.A. 56.
 Dunlap, fruit bud differentiation, (67) 136.
 effect of—
 electrical treatment, (68) 104.
 fertilizers, (64) Ala. 337.
 fertilizers and grass mulch, (70) 780.
 freezing, (66) Ga. 740.

Strawberries—Continued.

- effect of—continued.
 green manuring with sweetclover, (66) Ky. 137.
 irrigation, Oreg. (64) 338; (65) 740.
 liming, (61) N.C. 735.
 nitrogenous fertilizers, (70) 627.

 fertilizer requirements, (69) Oreg. 365.
 firmness and composition, relation to nitrogen, (64) Ohio 441.
 firmness and flavor, effect of fertilizers, (67) 393.
 flower production and yield, effect of age of plant, (67) 682.
 for ice cream manufacture, (66) Iowa 664.
 for West Virginia farms, (69) W.Va. 659.
 frozen, retention of vitamin C in, (69) Mass. 747.
 frozen, value, (64) 282.
 greenhouse, nutrients for, (65) N.J. 832.
 growth and development, (64) 39.
 growth in sand and in soil, effect of pH, (66) Ky. 539.
 growth, yield, and decay, effect of fertilizers, (70) 627.
 handling qualities, effect of fertilizers, (68) Okla. 616.
 hybrid, culture, (64) Alaska 737.
 hybrid, yields, (61) Nebr. 833.
 hybridization experiments, (66) 24.
 important character in, variety classification, (61) 528.
 improvement, (66) Alaska 632.
 in Florida, (61) Fla. 729.
 inbreeding studies, (63) Conn.State 635.
 inflorescence types, (62) 435.
 inheritance in, (68) Tenn. 191.
 insects affecting, (62) West.Wash. 541; (67) Mo. 424.

Strawberries—Continued.

- interplanted with blueberries, (61) Mass. 832.
 intra-State competition in Florida, (66) Fla. 881.
 introductions, (63) V.I. 136.
 irrigation, (67) Tex. 674; (70) Ill. 621.
 length of fruit developmental period, (67) N.J. 524.
 Louisiana, financing production and marketing, (64) La. 688.
 market diseases, (67) U.S.D.A. 146.
 marketing, (64) Ark. 483.
 maturity, determination, (63) N.J. 337.
 McClintock, new variety, tests, (68) Tenn. 191, 337.
 Missionary, cold storage studies, (67) Fla. 523.
 mites on, injurious and beneficial, (68) 652.
 mulching, value, (62) Mich. 435.
 Narcissa, new variety, characteristics, (68) Oreg. 621.
 Narcissa, notes, (69) U.S.D.A. 56.
 new variety, (62) N.Y.State 431.
 nitrogen applications, value, (63) Ohio 39.
 outlook for 1930, (62) Okla. 784.
 paternal and maternal inheritance, (66) 817.
 planting, (69) N.J. 523.
 preserved by frozen pack methods, varietal behavior, (70) 481.
 pressure tests, (61) N.J. 734.
 production and marketing, (62) Md. 341.
 production, costs and practices, (61) Oreg. 685.
 production under continuous light in Alaska, (70) 600.
 propagation, variety, and culture tests, (67) La. 130.
 quality, effect of fertilizers, (64) Ala. 137.
 quality, effect of nitrogen, (64) Ohio 634.
 quality, effect of rainfall, (65) Ala. 434.
 quality, factors affecting, (66) 141.
 refrigerated carloads, air circulation and temperature in, (68) Ill. 107.
 refrigeration, in transit, (61) Ill. 836.
 respiration, (63) 140; (64) Wash.Col. 637; (65) 640; (66) Wash.Col. 737; (68) 170, 330.
 respiration intensity relation to fertilizers, (67) 393.
 rest period in, photoperiodism as cause, (69) 659.
 ripening, formation of pectins in, (61) Md. 803.
 runner formation, (63) Ohio 39.
 shipments, (65) Fla. 481.
 shipments from Florida and competing areas, (65) Fla. 886.
 shipping quality, studies, (66) Ala. 826.
 shipping tests, (64) Tenn. 340.

Strawberries—Continued.

- soil reaction for, (70) N.J. 481.
 spacing experiments, (62) West.Wash. 524.
 stunting, studies, (64) Ohio 644.
 time of bud differentiation in, (70) 626.
 transit diseases, effect of carbon dioxide, (68) U.S.D.A. 203.
 transpiration in, (67) 393.
 transportation studies, (63) Ill. 640.
 variation and chromosome behavior in, (68) 749.
 varietal notes, (66) P.R. 228.
 varieties, (61) N.Y.State 340; (64) Miss. 140, Okla. 738; (65) Nebr. 829; (68) Colo. 616; (69) Ohio 49.
 cost of production, (61) Utah 37.
 identification, (62) 140.
 length of fruit development period, (67) 394.
 new, (66) N.Y.State 534, U.S.D.A. 637.
 promising, (67) 258.
 root and top development, comparison, (67) 259.
 variety, new, (64) Ohio 341.
 variety tests, (61) Oreg. 36, N.C. 735; (62) S.C. 636; (63) Nebr. 636, N.C. 637; (64) Oreg. 339, Ark. 439, Miss. 439, Ga.Coastal Plain 631; (65) N.C. 136, Tenn. 830; (66) Ga. Coastal Plain 633; (68) N. C. 474; (69) Ga.Coastal Plain 48, Mass. 652; (70) 777.
 vitamin C in, (68) 861; (69) 891; (70) 282.
 winter hardiness trials, (67) Wis. 674.

Strawberry—

- and raspberry bud weevil, (69) 72.
 anthracnose, causal organism, (63) Fla. 644.
 black root injury, (70) 200.
 black root, studies, (63) Mich. 49; (65) Tenn. 840; (67) Mich. 46.
 Blakemore, description, (62) U.S.D.A. 140.
 blossom weevil, effect of pyrethrum, (68) 637.
 buds of triploid form, cytological studies, (63) 816.
 chlorosis, noninfectious, nature, N.J., (63) 348; (67) 524.
 chlorosis, notes, (65), N.J. 832.
 club manual, (61) Ill. 489.
 crimp disease, (66) Fla. 446.
 crinkle disease, description, (70) Oreg. 799.
 crinkle disease, transmission, (70) 362.
 crown borer, biology and control, Mo., (62) 54; (63) 751.
 crown borer, spraying for, (70) Mo. 206.
 crown moth in Oregon, (63) 157.
 crown moth, life history and habits, (67) Oreg. 712.

Strawberry—Continued.

- crown moth, studies, (64) Oreg. 356; (65) Calif. 53.
 disease, grafting as method for study, (68) 481.
 disease, Lanarkshire, studies, (61) 846; (62) 238; (64) 236; (66) 645; (67) 555.
 disease, mosaic-like, studies, (68) N.Y. State 626.
 disease, notes, (63) 348; (64) 451; (65) Fla. 439.
 diseases and insect pests, (70) 58.
 diseases, important in Florida, (67) Fla. 535.
 diseases, studies, (62) Fla. 345; (67) La. 143, La. 263.
 dwarf disease, description, (66) 343.
 dwarf disease, studies, (63) La. 341; (66) U.S.D.A. 48; (70) U.S.D.A. 799.
 eelworm, relation to diseases, (64) 151.
 French bud, crimps, or brier bud disease, (67) Fla. 535.
 French bud disease, studies, (63) Fla. 644.
 fruit bud differentiation, (61) 234; (63) 139.
 fruit bud differentiation, relation to age and position of plant, (67) 394.
 fruit bud formation, Mass., (63) 532; (67) 385; (69) 652.
 fruit bud formation in southeastern States, (66) 830.
 fruit rot, notes, (69) 539.
 gold disease, notes, (67) Mass. 399.
 gold leaf, notes, (69) Mass. 663.
 ice cream—
 off-flavor in, control, (69) 707.
 tallowy flavor in, cause, (70) 525.
 vitamin C in, (70) 282.
 vitamin C in, retention, (69) Mass. 747.
 industry—
 economic problems, (69) 737.
 in United States, (62) U.S.D.A. 179.
 Lanarkshire, problems, (62) 238.
 tables and charts, (63) U.S.D.A. 589.
 leaf and stem nematode, eradication, (61) Oreg. 44.
 leaf areas, measuring, (68) 481.
 leaf beetle, control, (64) Oreg. 356.
 leaf blights, control, (66) La. 48.
 leaf diseases, (68) 632.
 leaf roller—
 biology and habits, (67) 570.
 control on bearing plants, (70) Mich. 64.
 ecology, life history, and parasites, (64) Kans. 852.
 notes, (64) Del. 649; (69) Kans. 232.
 parasites, (69) Md. 686.
 leaf scorch, control, (63) 746, Fla. 644.
 leaf spot and leaf scorch, control, (63) La. 341.

Strawberry—Continued.

- marketing associations, cooperative, Ky., (64) 189; (66) 683.
 mite, notes, (64) 756.
 new or noteworthy variety, (62) N.Y. State 738.
 pest, new, (69) 824.
 plant certification, system, (68) 284.
 plants, carbohydrate composition, (65) 231.
 plants, flowering and fruit production, relation to age, (68) N.C. 474.
 plants for establishing new beds, (65) N.J. 832.
 plants, mineral deficiencies, (65) 25.
 plants, new buprestid affecting, (64) 753.
 Rhizoctonia disease, control, (67) Oreg. 276.
 root and shoot growth, (62) 638.
 root aphid, notes, (61) N.J. 754; (65) Fla. 439; (70) U.S.D.A. 499.
 root infection, (69) Del. 60.
 root injury, causes, (64) Oreg. 346.
 root rot, cause and control, (61) Oreg. 44.
 root rot, notes, (63) La. 341; (66) Ill. 231, Del. 543; (70) Ill. 635.
 root rot, role of soil conditions in, (68) Ill. 626.
 root weevil as conifer pest, (63) Mich. 55; (68) 224.
 root weevil control, (61) Oreg. 52, Oreg. 53; (64) 52; (65) 552.
 root weevil, notes, (61) Utah 54; (63) Mich. 55, Utah 251; (65) Mich. 153; (66) N.Y.State 552; (68) N.Y.State 637; (70) N.Y.State 803.
 root weevils, life history and control, (64) Oreg. 355.
 root weevils on Taxus and nursery plants, (68) 793.
 roots, decay, cause, (69) Fla. 221.
 rootworm on raspberries, (61) Calif. 351.
 rootworm, studies, (65) Calif. 53.
 runners, studies, (62) Ohio 41, U.S.D.A. 44.
 seed beetle, life history and habits, (66) 557.
 seedlings, new varieties, (69) 212.
 seedlings, tests, (65) N.J. 832.
 tarsonemid mite in England, (66) 354.
 Verticillium wilt, (67) Calif. 554.
 virus disease, studies, (69) 676.
 weevil, notes, (65) Conn.State 451; (66) Ark. 549; (68) Ark. 636.
 weevil, rough, studies, (65) Calif. 53.
 wilt or crown rot, notes, (69) Fla. 221.

Stream—

- discharge, relation to precipitation, (61) Utah 75.
 flow and forests, (68) 253.
 levels and precipitation, correlations, (66) 412.
 pollution by irrigation residues, (69) 117.

Streams—

- mountain, floods in, barrier system for control, (70) U.S.D.A. 687.
 mountain, use of check dams on, (66) 181.
 of Texas, silt load, (70) U.S.D.A. 393.
 pollution and natural purification, (68) N.J. 102.
 Street and highway intersections, design, (67) U.S.D.A. 754.
 Streptocara crassicauda nematode in gizzard of Formosan duck, (61) 574.
 Streptococci—
 causing septic sore throat in man, research fellowship for, (63) 400.
 differentiation, (70) Ky. 240.
 hemolytic—
 grouping by agglutination, (68) 669.
 human and equine strains, studies, (69) 424.
 lactic acid production by, (69) 487.
 of animals, relation to those of man, (70) Ky. 243.
 serological differentiation, (69) 581.
 in freshly drawn milk, (69) 855.
 in milk, (70) 93.
 in milk, examination for, (70) Mich. 94.
 in milk, viability, (70) 675.
 isolation, technic, (68) 90.
 lactic, in milk, growth and metabolism, (70) 523.
 notes, (68) Ky. 375.
 relation to encephalitis of fox, (65) 271.
 role in human and animal disease, (64) 474.
 role in scarlet fever, (65) 266.
 serologic specificity, (62) 559.
 Streptococcus—
 agalactiae—
 and S. equi, differentiation, (69) 719.
 infection of udder, (68) 672.
 notes, (69) 274, 429, 715.
 alpha from genital organs of cattle, properties, (64) 559.
 and Leuconostoc species, differentiation, (67) N.Y.State 224.
 bronchitis n.sp., notes, (68) 819.
 citrovorus and S. paracitrovorus—
 as starters in butter making, (70) 524.
 products formed by, (69) Iowa 98.
 cremoris, notes, (64) 69.
 epidemicus—
 and S. pyogenes, identity, (70) 94.
 cause of mastitis, (64) 476.
 filtrate, intradermal injection, (67) 312.
 in cows, (63) 372; (67) Wis. 740.
 notes, (65) Wis. 471.
 of human and animal origin, differentiation, (68) 527.

- Streptococcus**—Continued.
epidemicus—continued.
of monkeys and cows, experimental infection, (65) 70; (66) 371.
stock cultures, diversity of types in, (70) 678.
use of term, (69) 714.
equi—
and *S. agalactiae*, differentiation, (69) 719.
notes, (69) 714.
specific bacteriological entity, (70) 243.
fecalis, notes, (69) 274.
filter-passing strain, from a case of bovine mastitis, (69) 430.
genitulum, notes, (62) Ky. 263.
hemolytic infection of udder, (68) 672.
infection in man from milk of infected udders, (68) 814.
infection in rabbits, experimental, chemotherapy, (63) 377.
infections, milk-borne, epidemiology, (69) 709.
lactis—
proteolysis by, (63) Iowa 568.
proteolytic action, (61) 563.
strains, variations in, (65) 564.
variations in, (63) 768.
low grade, infections in udder, (68) 93.
mastitidis, relation to other streptococci, (69) 274, 429, 715.
mitis, notes, (69) 274, 429, 715.
paracitrovorus and *S. citrovorus*, products formed by, (69) Iowa 98.
pyogenes—
and *S. epidemicus*, identity, (70) 94.
notes, (66) 73.
role in milk-borne epidemic, (64) N.Y.State 476.
relation to milk-borne infection, (67) 313.
salivarius, notes, (69) 274.
spp. in milk, chemical changes from, (66) N.Y.State 465.
subacidus, notes, (66) Idaho 270.
types and strains associated with mastitis, (69) 429.
- Streptopharagus geosciuri** n.sp., notes, (64) 771.
- Streptothricosis** in a bovine, pulmonary, (62) 559.
- Streptothrix** disease in kangaroos, (62) 167.
- Striga** spp., control on sugarcane, (69) 534.
- Stripe rust** in Alberta, (65) 537.
- Strongyloidosis** in horses, treatment, (66) 177; (69) 277.
- Strongyloides**—
avium n.sp. of chickens, (62) 474.
eggs and larvae, effect of various temperatures, (70) 830.
from primate and human hosts, (69) 869.
parasitic in swine, (62) 670.
stercoralis, studies, (62) 560; (63) 480.
- Strongyloides**—Continued.
suis, notes, (61) 571.
westeri, studies, (63) 580.
- Strongyloidosis intestinalis** in Formosa, (61) 571; (63) 170.
- Strongylosis**, equine, treatment, (69) 105.
- Strongylus**—
equinus, third stage larva, (64) 559.
infestation in horses, (69) 405.
spp., effect of butylidene chloride on, (64) 562; (69) 106.
vulgaris in foals, (64) Ky. 173.
- “Struck” of sheep on Romney Marsh, (69) 716.
- Structural frames**, continuous, of reinforced concrete, treatise, (69) 120.
- Structures**, stresses in, treatise, (69) 120.
- Struthanthus concinnus** on bamboos in Brazil, (67) 557.
- Strychnine**—
action on ground squirrels, (63) Colo. 153.
action on metabolism of glucides by *Aspergillus niger*, (70) 29.
for control of ground squirrels, (67) Colo. 148.
toxicity, effect of presence of quinine, (66) 411.
- Strymax**, study of genus, (69) 390.
- Strymon melinus**, see Cotton square borer.
- Stubble decay**, fertilizer applications for, (68) Wash.Col. 734.
- Student Conference**, A.C.L.A., (68) 547.
- Students**—
college women, changes in stature, weight, and body build during eighteen years, (66) 488.
entering college, physical unfitness in, (69) 306.
- Student's method** and Bessel's formula, comparison, (65) 31.
- Stumpage and log prices**—
for 1928, (65) U.S.D.A. 43.
for 1929, (66) U.S.D.A. 744.
for 1930, (67) U.S.D.A. 137.
- Sturmia inconspicua**, parasite of gipsy moth, (68) 223.
- Stymphylium** sp., notes, (62) Fla. 344.
- Sublimation**, analytical, studies, (64) 505.
- Subsoils**—
colloidal fraction, Del., (69) 16; (70) 589.
exposed, nitrogen accumulation in, (66) Mo. 313.
fertility, (63) Ind. 515.
- Subulura strongylina**, notes, (69) 268.
- Suckfly**—
control, (66) Tex. 52.
on tomatoes, (64) 154.
- Sucrose**—
acidic property, (68) 721.
and corn sirup, value in preservation of fruits and vegetables, (70) 558.
in plant extracts, determination, (69) 174.

- Sucrose—Continued.
- in sugarcane, effect of nitrogen, (61) 34.
 - v. honey in bread making, (65) 394.
 - value for preservation of eggs by freezing, (65) 411.
- Sudan grass—
- and other forage crops, comparison, (63) Pa. 662.
 - and sorghum hybrids, (62) 633.
 - as emergency pasture crop, (70) Mich. 42.
 - as hay crop, (67) N.J. 379.
 - as hog pasture, (63) Mo. 764.
 - as pasture crop, (63) Ind. 566; (65) Mich. 634; (66) Idaho 264; (67) Ohio 30, U.S.D.A. 30, Tenn. 129, S.Dak. 158, Ohio 380.
 - breeding, (66) 326; (69) Calif. 37.
 - culture, (69) Ohio 45; (70) Kans. 770.
 - culture experiments, (64) Okla. 732; (65) N.Mex. 221; (67) N.Mex. 29; (70) Ill. 609.
 - cutting experiments, (65) Ala. 428.
 - diseases, notes, (66) 147.
 - effect on sheep, (64) 559.
 - feeding value, (69) U.S.D.A. 413, V.I. 572; (70) Tex. 220.
 - fertilizer experiments, (70) Tenn. 172.
 - for hay, seed, and pasture, (61) Tex. 521.
 - hay, curing experiments. (66) Mich. 430.
 - hay, effect of sodium nitrate, (66) Ala. 820.
 - hay, yield and protein content, effect of nitrates, (65) Ala. 429.
 - hay yields, variation in experimental plats, (69) 198.
 - in orange orchards, effect on coloring of fruit, (65) Calif. 735.
 - in rotation, effect on corn yield, (67) Iowa 378.
 - pasture studies, (64) Ohio 625.
 - pasture, supplementing for dairy cows, (65) Ind. 169.
 - pasture, test, (69) Ohio 99.
 - seed bed preparations, (69) Kans. 200.
 - sweetclover, and alfalfa pastures, comparison, (70) S.Dak. 822.
 - tillering in, (67) Tex. 668.
 - time of cutting for hay, (66) Ala. 820.
 - v. native grass for heifers, Okla.Pan-handle, (61) 66; (63) 261.
 - water requirements, (65) 128.
 - yields, (66) U.S.D.A. 628.
- Sudan III, behavior when fed with carbohydrate, (64) 582.
- Sugar beet—*see also* Beet and Beet sugar.

 - root necrosis, (66) 341.
 - root rot, control, (64) Ohio 744.
 - root rot, effect of manure, (61) Utah 28.
 - root rot, new, (67) 697.
 - root rot, relation to soil fertility, (65) 843.
 - seed, annual production, N.Mex., (65) 221; (67) 29; (69) 200.

Sugar beet—Continued.

- seed disinfection, (64) 744.
 seed, germination, effect of sulfuric acid treatment, (66) 631.
 seed, production, (63) N.Mex. 434.
 seed, production in southern New Mexico, (69) N.Mex. 362.
 storage pits, fungi in, effect of gaseous reagents, (66) 342.
 strains, tests, (70) 610.
 tops and pulp, feeding value, (64) 63.
 tops, fattening value, (63) Colo. 556.
 water mold, studies, (61) 236.
 webworm, *see* Beet webworm.
 wireworm, fumigants for, (70) 511.
- Sugar beets—
 and byproducts, injurious effects on livestock, (63) Utah 656.
 beneficial effect of potatoes in rotations, (68) Mont. 324.
 blocking and spacing experiments, (65) Calif. 728.
 blocking, spraying, and irrigation, (70) U.S.D.A. 464.
 breeding, (63) Utah 630; (64) Mich. 215; (67) La. 233, Calif. 516; (70) U.S.D.A. 464, U.S.D.A. 609
 breeding for resistance to curly top, (63) Calif. 451; (69) N.Mex. 200.
 composition, effect of potassium, (66) Ark. 513.
 cross-blocking by machine, (70) U.S. D.A. 258.
 cultivation, (68) Utah 183.
 cultivation, effects of spacing, (66) 530.
 culture, (62) Calif. 727; (65) Utah 226.
 culture experiments, (61) Utah 27, U.S.D.A. 724, Mich. 720; (63) Wyo. 130, Utah 630; (64) Mich. 215; (65) Wyo. 127; (67) Wyo. 31; (68) 319, Mich. 319; (69) Iowa 37, Nebr. 512.
 culture experiments in west midlands, (64) 30.
 culture, improvements in machinery for, (63) 180.
 culture in eastern England, returns from, (65) 385.
 culture in humid area of United States, (64) U.S.D.A. 222.
 culture under irrigation, (64) U.S.D.A. 834.
 decay in storage pits, peculiarities, (66) 341.
 delay in harvesting, effect, (63) La 341.
 development, effect of stimulation, (64) 327.
 effect of carbon dioxide increase, (64) 328.
 effect of phosphorus, (66) Mont. 426.
 effect of soil handling on results of fertilizer application, (70) Mich. 770.
 entry into farm economy, (61) 884.
 experiments, (63) 230.
 experiments in England, (65) 225.

Sugar beets—Continued.

- feeding, effect on livestock, (68) Utah 229.
 feeding value for pigs, (66) 459.
 fertilizer experiments, (63) 332, 333; (64) Mich. 535; (67) Ohio 30, Wyo. 31, 123, 124; (68) Utah 183, Utah 319, Ark. 608; (69) U.S.D.A. 789; (70) U.S.D.A. 464, U.S.D.A. 448.
 fertilizer experiments, analysis of variance illustrated in, (67) 672.
 field cleaning and mechanical loading, (63) 881.
 field experiments, size and shape of plot in, (67) 521; (70) 472.
 for fattening geese, (70) 821.
 from experimental plots, estimation of yield, (66) 530.
 green capsid bug on, (63) 848.
 growth, composition, and enzymic activities, factors affecting, (64) Mich. 534.
 in Irish Free State, (68) 473.
 in Netherlands, growth and content, effect of weather, (68) 589.
 in Palestine, (61) 225.
 in rotations, effect on potato yield, (68) Mont. 323.
 inbreeding effects, (70) Utah 42.
 insects affecting, (65) 52.
 irrigation, residual effects, (68) Colo. 608.
 irrigation studies, (61) Utah 27, Utah 28 (63) Utah 630; (67) Can. 463; (69) Kans. 200; (70) 770.
 labor costs, 1924-1931, (70) 848.
 manuring experiments, (61) Kans. 126.
 mechanical blocking, (61) 331.
 on sandy soils, (63) N.J. 331.
 overgrowth, anatomy, (68) 773.
 overwintered in field, seed production from, (65) U.S.D.A. 36.
 planting season, (67) Calif. 381.
 plowing depths and fertilizers for, (65) Mich. 433.
 plowing studies, (61) Mich. 432.
 pollination, control, (63) 231.
 production, (70) U.S.D.A. 538.
 rate of decay by strains of *Phoma betae*, (66) 839.
 research work in England, (65) 482.
 resistant to *Cercospora* leaf spot, breeding, (69) Iowa 60.
 response to superphosphates, Wyo., (68) 755; (70) 763.
 rotation experiments, U.S.D.A., (61) 724; (69) 789.
 rotation experiments under irrigation, (62) U.S.D.A. 128.
 sampling, analysis, and composition, (66) 134.
 sampling technic, (67) 520.
 seed production, (61) N.Mex. 219; (63) 337.
 seed, test yields, (61) Mich. 33.
 seed treatment, effect, (68) 41.
 seeding experiments, (65) Calif. 728.
 seeding rates in France, (61) 225.

Sugar beets—Continued.

- seedling color and yield, (67) 34.
seedling stands, effect of fertilizers, (69) Ohio 38.
selection characters, (63) 134.
shepherd spider or harvestmen eggs on, (64) 544.
side dressing for, (64) Ohio 625.
storage diseases from hook injury, (66) 839.
storage losses, relation to type of top-ping, (66) Utah 150.
storage studies, (67) 239.
structure, relation to sugar content and type, (63) 441.
studies, (62) 518.
suberization and wound-cork formation in, (70) 613.
sugar in, (68) Mich. 720.
thinning test, (61) 225; (69) U.S.D.A. 789.
time of planting, (61) Calif. 328.
transplanting, (65) U.S.D.A. 35.
variety tests, (62) N.Dak. 129; (63) Tex. 435, Utah 630; (64) Okla. 732; (65) N.Mex. 221; (66) Tex. 27; (67) 31, Tex. 668; (69) 201.
variety tests in Czechoslovakia, (65) 530.
washing and halving for sugar and purity determinations, (67) 672.
water requirements, (65) 128.
yield and sugar in, (65) Utah 222.
yield and sugar in, relation to weather, (62) 712.
yield, effect of manure, nature of, (64) 722.
yield, in different rotations and on different preparations, (69) Ohio 38.
yield, relation to density of stand and plant food, (70) 770.
yield under irrigated rotations, (66) U.S.D.A. 731.

Sugar—

- crystallization, symposium, (69) 517.
diets, high, effect on rat growth and structure, (64) 584.
effect on calcium metabolism of milking cows, (66) 366.
for increasing palatability of swine rations, (67) Hawaii 444.
house machinery and methods, (69) 517.
hydrolysis as affected by yeast, effect of imine-forming amines, (66) 606.
in apple juice and tissue, (63) 831.
in cottonseed, variation during growth, (65) 631.
in plants, enzymatic condensation of formaldehyde to, (63) 22.
industry, colloid chemistry in (69) 323.
industry of Java, (63) P.R. 231.
industry of Louisiana, decline and renaissance, (65) 531.
industry of Puerto Rico, (69) 516.
industry of Queensland, (70) 771.
industry, South African, agricultural practice in, (69) 515.

Sugar—Continued.

- manual of Puerto Rico, (65) 633.
Mellon Institute fellowship on, (64) 799.
metabolism, stimulating effect of amino acids, (63) 123.
of milk, manufacture, composition, and consumption, (68) 666.
Philippine, probable effects of a United States tariff on, (69) 607.
plants of technical value in Russia, (61) 828.
policy of British Empire, (69) 295.
production—
 crisis, papers on, (62) 277.
 from sugar beets, Oxford process, (61) 881.
 in British colonies, (63) 883.
 in Cuba, Haiti, and Louisiana, (63) 828.
 in India, (66) 131.
raw, feeding value for hogs, (69) Hawaii 698.
shifting demand for, (68) 689.
statistics, U.S.D.A., (65) 486; (68) 120.
tariff on, (69) 448.
technology, abstracts in, (64) 500.
terms in twelve languages, dictionary, (69) 361.
white, yeast-growth stimulants, (70) 441.
- Sugarcane—
 and sorghum hybrids, (63) 827; (69) 517.
 and sorghum hybrids, early characters, (63) 32.
 aphid, biological control, (62) 646.
 aphids in Peru, (62) 246.
 as interplant for grapefruit, (66) P. R. 228.
 bacterial red stripe in the Pacific countries, (67) 271.
 bacterial stripe diseases in Louisiana, (63) 745.
 bagasse, production of alcohol from, (63) La. 314.
 beetle—
 borer, notes, (63) Guam 152.
 control, (70) 365.
 damage to sugarcane, (66) 251.
 in Louisiana, (68) 224.
 injury to greenhouse roses, (70) 215.
 studies, (67) La. 283; (70) Tex. 207.
 bibliography, (70) 321.
 borer—
 abundance, methods of studying, (70) 357.
 Argentine parasites for, (61) 256.
 biological control, (64) 361; (69) 556.
 biological control in India, (70) 659.
 control, (62) 252, 544, 646; (63) 261, La. 351, 462; (64) 749; (67) 156, La. 283; (70) 357.

Sugarcane—Continued.

borer—continued.

- control and status, (67) 714.
- control by *Trichogramma* colonization, (69) La. 80, 81, 836.
- control in Barbados, (67) 154.
- damage, effect of colonization of parasites, (67) 57.
- destruction, (61) 254.
- effect on seed cane, (70) La. 211, 365.
- egg parasites, breeding, (61) 256.
- eggs, percentage destroyed by *Trichogramma*, (68) 794.
- fungi attacking, (63) 157.
- imported from Venezuela, parasite, (62) 154.
- in Cuba, summary, (61) 550, 851; (63) 850.
- in south Florida, control, (69) Fla. 232.
- larval mortality in Antigua, (70) 357.
- loss caused by, estimating, (61) 663.
- new, in Argentina, (64) 364.
- notes, (64) 455; (70) U.S.D.A. 499.
- original habitat and hosts, (68) 638.
- parasite, biology, (64) 548.
- parasite in Argentina, identity, (63) 257.
- parasite, most important, biology, (69) 244.
- parasites, collecting in South America, (67) 57, 714.
- parasites in Argentina and Peru, introduction into United States, (69) U.S.D.A. 692.
- parasites in Barbados, (69) 548.
- parasites in Cuba, (63) 257.
- parasites, receiving in Louisiana, (67) 57.
- parasitic nematodes of, (63) 157.
- pupal parasite of, (63) 457.
- tachinid parasite of, (63) Fla. 651.
- borers in Antigua, (70) 506.
- borers, Mexican, and parasite, (63) 854.
- borers, parasites, (61) 256.
- breeding, (61) 29, 330; (63) V.I. 130; (64) P.R. 335; (65) 531, V.I. 729; (66) 131, P.R. 223; (67) Fla. 516; (69) Fla. 199, V.I. 512; (70) U.S.D.A. 464.
- breeding in different countries, (69) 517.
- brown stripe in Cuba, (65) 46.
- brown stripe, notes, (66) 748.
- burned, harvesting, (62) 133; (67) 240.
- chlorosis, notes, (61) 648.
- culture, deficiencies of agricultural implements, (67) La. 322.
- culture experiments, (61) 330.
- culture in Puerto Rico, (62) 32.
- cuttings, treatment with lime-magnesium solution, (63) 828.

Sugarcane—Continued.

- cyanamide as source of nitrogen, (69) La. 648.
- cytology, (69) 785.
- depth of plowing and of planting, (70) 613.
- disease, new bacterial, prevention, (68) 60.
- diseases, (61) 829; (63) La. 341; (66) P.R. 342; (67) 400; (68) 347; (69) P.R. 810.
- and culture, papers on, (69) 515, 534.
- field identification, key, (64) 745.
- in Hawaii, (70) 492.
- in Kenya Colony, (64) 145.
- in Mauritius, (64) 448; (68) 60.
- in Philippines, (65) 644.
- in Puerto Rico, (65) 349.
- in Queensland, (64) 230; (65) 441.
- downy mildew, notes, (68) 769.
- effect of soil reaction, (67) La. 233.
- electrocultural treatment, effect, (68) 104.
- experiments, (67) P.R. 517; (69) P.R. 790.
- experiments in Leeward Islands, (61) 332.
- experiments in Queensland, (62) 522.
- eyespot disease, studies, (66) 748.
- eyespot fungus, toxic substance produced by, (65) 238.
- eyespot in Cuba, (65) 46.
- eyespot, notes, (68) 769.
- failure, relation to insect attack, (61) 658.
- farms, organization and financial returns, (66) La. 83.
- farms, organization and power utilization, (64) La. 568.
- fertilizer experiments, (61) 330, La. 636, 829; (62) 129, V.I. 219, Fla. 325; (63) La. 330, Fla. 626, 824; (67) La. 233, Fla. 516, 521; (69) Fla. 199; (70) U.S.D.A. 448.
- fertilizer requirements, (69) 45.
- field experiments, (63) 442.
- fields in Formosa, beetles affecting, (64) 249.
- Fiji disease, transmission, (70) 63.
- flower and seed, development, (61) 628.
- flowering habit, pollen, and seed germination, (61) 29.
- for sirup production, (70) U.S.D.A. 473.
- froghopper blight in Trinidad, (67) 151.
- froghopper, natural enemies, (68) 641.
- froghopper, parasite for, (62) 360.
- froghopper, studies, (70) 63, 654.
- frosted, causes and effects, (70) 614.
- fuzz viability and December rainfall, (62) 522.
- germination, effect of low-temperature storage, (61) 121.
- germination studies, (61) 829.
- growers, entomological hints to, (61) 658.

Sugarcane—Continued.

- growth and sugar content, factors affecting, (61) 332, 636.
- growth in Mauritius, relation to weather factors, (66) 116.
- gumming and leaf scald, (67) 271.
- gumming disease, studies, (64) 351; (65) 46, 348; (67) 263; (69) 225.
- hauling by wagon, (68) La. 113.
- high-fibered, milling, (63) La. 377.
- hopper, parasite of, (70) 217.
- in Cuba, insects affecting, (70) 358.
- in Cuba, root habits, (68) 312.
- in Hawaii, relation of invertebrates to, (66) Hawaii. Sugar Planters' 154.
- in Louisiana, new barine curculionid affecting, (68) 793.
- in Mauritius, beetle grubs attacking, (65) 361.
- industry, papers on, (65) 530.
- injury by small weevil, (64) 462.
- insects—
 - affecting, (61) 658; (62) 245, 542, 648; (65) 246, 355, 657, 756; (66) 159.
 - biological control, (70) 357.
 - control, (64) 456; (70) 651.
 - in Hawaii, control, (68) 498.
 - in Negros, (64) 242; (65) 547; (66) 848.
 - in Peru, (61) 247; (63) 52.
 - in Philippines, (67) 562.
 - of world, development of manual, (70) 357.
- irrigation practices in Hawaii, (68) 99.
- juice—
 - phosphoric acid in, precipitation, (67) P.R. 500.
 - quality, effect of fertilizers, (61) 29.
 - quality, effect of nutrients, (66) 131.
 - sampling for hand refractometer, (66) P.R. 528.
 - vitamins in, (64) 495.
- Lahaina disease, studies, (63) 148, 149.
- leaf spot, notes, (65) 344; (67) 265.
- leafhopper, introduction and distribution, (61) 249.
- leafhopper, notes, (70) 63.
- mealybug, Hawaiian parasite of, (68) 351.
- mealybug, pink, insect enemies, (66) 448.
- methods of testing new types, (70) 473.
- mildew or leaf stripe in Queensland, (68) 347.
- milling and freezing, (67) La. 322.
- milling yield, tests for, (70) 771.
- mosaic—
 - artificial transmission, (69) 672.
 - behavior in certain varieties in Louisiana, (68) 347.
 - changes induced in cells by, (69) 226.
 - control, (68) 774.

Sugarcane—Continued.

- mosaic—continued.
 - control in various countries, (67) 549.
 - in Barbados, (65) 446.
 - in India, (61) 841; (64) 149; (67) 408.
 - in Peru, (61) 539; (63) 745.
 - in Trinidad, (68) 207.
 - mechanical transmission, (67) 272.
 - method for artificial transmission, (67) 142.
 - notes, (64) 230; (65) 441; (68) 769; (69) 526, 535.
 - of new P. O. J. canes, (64) 351.
 - pathological effects, (64) 235; (66) 150.
 - relation to new varieties, (67) P.R. 549.
 - relative resistance of native and imported varieties, (69) P.R. 67.
 - resistant varieties, (62) Miss. 146; (63) La. 341; (69) Fla. 221; (70) P.R. 178.
 - studies, (67) 399, 408, La. 263.
 - transmission, (62) 153, 536; (70) 358.
- mosaic-like condition, (67) 263.
- moth borer, notes, (70) Tex. 207.
- moth borer parasites, rearing and distribution, modifications, (67) 443.
- moth stalk borer, prevalence and control, (67) Fla. 559.
- mycorrhizae, relation to root disease, (62) 645.
- nematodes affecting, (63) 48.
- new method of planting in Luzon, (63) 828.
- new root feeding pests on, (66) P.R. 247.
- Pahala blight, relation to manganese deficiency, (66) 748.
- pests—
 - biological control, (69) 384.
 - control, (65) 59; (67) 286.
 - in British West Indies and British Guiana, ecological research, (70) 357.
 - in Hawaii, (68) 498.
 - in Punjab, (64) 359.
 - in Queensland, (67) 150.
 - in tropical America, original habitat and hosts, (68) 638.
- pineapple disease, studies, (67) 265.
- pineapple rot, cause, (66) P.R. 237.
- planting tests, (65) U.S.D.A. 132.
- pokkah boeng and twisted top in Cuba, (65) 349.
- pokkah boeng, studies, (62) P.R. 747; (66) 150, 151; (67) La. 263; (69) 534.
- pollen fertility, relation to anther color, (69) 796.
- pollen, longevity, (67) 374.
- pollen shedding, (67) 240.
- potassium deficiency in, (66) 419.

Sugarcane—Continued.

- production in Philippines, papers on, (61) 828.
- propagating, interregional movement, relation to quarantine, (65) 530.
- quarantine, protective, report, (69) 535; (70) 358.
- ratoon, cultivation under unirrigated conditions, (69) 122.
- red stripe disease, (69) 535.
- research—
- Conference, Imperial, proceedings, (66) 824.
 - in Cuba, (68) 612.
 - in Hawaii, (68) 612; (69) 206.
 - in India, (66) 131.
 - in Queensland, (68) 613.
- ripening experiments, (61) 829.
- root borer at the Isabela Substation, (69) P.R. 825.
- root borer, control, (69) 548.
- root caterpillar in Puerto Rico, (64) 242.
- root caterpillar, notes, (62) 153; (66) P.R. 247.
- root development, (67) La. 233.
- root disease in Cuba, (68) 774.
- root disease, notes, (61) 648.
- root grubs, life history studies, (66) 756.
- root rot and red rot, studies, (67) La. 263.
- root rot, factors affecting, (63) La. 545; (67) 272.
- root rot in Philippines, (68) 627.
- roots, insect damage to, (70) 357.
- roots, parasite of, (61) 237.
- roots, soil animals injurious to, (63) 253, La. 351; (64) 52.
- roots, studies, (63) 337; (65) La. 828.
- rootstock weevils, (67) La. 283; (68) 793.
- rot and bacterial diseases, (69) 535.
- sampling in field, (63) 731.
- seed, preservation, (70) 771.
- seed, viability tests, (64) P. R. 335.
- seedling selection work, use of refractometer, (65) 36.
- seedlings, damping-off control, (69) Fla. 221.
- seedlings, Mayaguez, tests, (70) P.R. 178.
- sets, protection against white ants, notes, (64) 359.
- sirup, effect on nutritional anemia, (64) Miss. 695; (66) 295, Miss. 793.
- sirup, manufacture, (66) P.R. 502.
- soil animals attacking, (66) 247.
- soils, management, P.R., (62) 720; (66) 515.
- soils of Java, properties, (68) 591.
- spacing experiment, (62) V.I. 219.
- spindle top or needle top in Queensland, (61) 844.
- stilt bug, biology and control, (62) 57.
- storage tests, (70) U.S.D.A. 464.

Sugarcane—Continued.

- studies, P.R., (66) 223, 527; (69) 39.
- sucrose in, effect of nitrogen, (61) 34.
- tassels, preserving for breeding purposes, (61) 637.
- Technologists, International Society, proceedings, (65) 530; (69) 515.
- thrips, notes, (68) 783.
- tonnage and juice in Pusa, effect of mosaic, (70) 641.
- top rot, different forms, (67) 272.
- top rot in Queensland, (61) 844.
- top rot, notes, (68) 769.
- toxic action of magnesia, (68) 312.
- trash, decomposition, effect of additions of nitrogen, (68) 450.
- trash, nitrification in presence of, (66) P.R. 210.
- trash, turning under, effect, (63) La. 318.
- twisted top, studies, (66) 150, 151.
- utilization of nitrogen compounds by, (68) 173.
- varieties, (61) 829; (66) P.R. 223.
- analyses, (67) P.R. 500.
 - comparison, (62) 129.
 - improvement, (67) 129.
 - in Java, (61) 332.
 - in Puerto Rico, census, (68) P.R. 41.
 - mosaic-free, and drought resistance, (66) 150.
 - new, data on, (67) P.R. 34.
 - resistant to gumming disease, (69) 535.
 - stem epidermis, (64) 618.
 - windrowing qualities, (70) U.S.D.A. 614.
- varieties, P. O. J.—
- in Louisiana, (61) 225.
 - rate of deterioration of sugar in, (62) U.S.D.A. 333.
- variety P. O. J., relation to insect damage, (69) 550.
- variety P. O. J. 213, behavior, (69) 535.
- variety P. O. J. 2878—
- composition and chemical behavior of juice, (69) P.R. 3.
 - gummosis in, (67) 272.
 - minor diseases, (66) 150.
- variety tests, (61) 330, Miss. 433, La. 636; (62) V.I. 219, U.S.D.A. 333; (63) Miss. 28, V.I. 130, La. 330, La. 435, Tex. 435, Fla. 626, 824; (65) Miss. 31, U.S.D.A. 132, 531, V.I. 729; (66) La. 32, U.S.D.A. 429, P.R. 528, Miss. 730; (67) Miss. 29, La. 233, Fla. 516; (68) Miss. 319; (69) Fla. 199, V.I. 512; (70) U.S.D.A. 328.
- variety tests in Louisiana, (68) U.S. D.A. 188.
- wagons, draft, (67) La. 322.
- weevil borers, notes, (66) 159.
- weevil in Argentina, (66) 855.
- weevil, New Guinea, notes, (63) Guam 152.
- windrowing for mill, (63) La. 331.

- Sugars—*see also* Glucose, Sucrose, *etc.*
 acidic property, (68) 721.
 aldose estimation by titration with iodine and alkali, (66) 206.
 and starch, microbiology, treatise, (63) 801.
 combination of for control of sandiness in ice cream, (67) 69.
 hexose, interconversion by means of phosphates, (66) 202.
 in biological fluids, Molisch reactions in study, (67) 207.
 in corn tissues, determination, (67) 208.
 in plant extracts, determination, (67) N.H. 653; (69) 174.
 in solutions, response of corn ear worm moths to, (69) 80.
 oxidations induced by, (67) 198.
 precipitation, as copper barium complex, (64) 13.
 produced by tubercle bacilli, (63) 772.
 rare, reducing equivalents for, (64) 116.
 reducing—
 action on organic nitro compounds, (66) 802.
 determination, cupro-potassium carbonate solution in, (65) 508.
 determination, micro time method, (63) 414.
 in food products, determination, (68) 585.
 interference in ninhydrin reaction for amino acids, (68) 441.
 powers for ferricyanide reagent, (63) 506.
 produced by bacteria, (63) 201.
 storage in seeds, (65) Iowa 119.
 utilization by bacteria, (70) 441.
 Suits for the small boy, (62) U.S.D.A. 298.
 Sulco V. B., spraying tests, (67) 400.
 Suleima helianthana, notes, (63) Mo. 750.
 Sulfarsenol and 309 treatment for surra, (61) 73.
 Sulfate—
 content of orchard soils, changes in, (61) Calif. 420.
 in tobacco, relation to grade, (64) Ky. 536.
 of ammonia, *see* Ammonium sulfate.
 of iron, *see* Iron sulfate.
 of potash, *see* Potassium sulfate.
 water, effect on concrete, U.S.D.A., (65) 575; (69) 725.
 Sulfates—
 action on Portland cement, (62) 568; (67) 753.
 as barium sulfate, estimation, (66) 504.
 effect on closely cut turf, (68) 35.
 in biological material, determination, (68) 15.
 injection into Valonia, (64) 123.
 Sulfemul tests, (70) 69.
 Sulfhydryl—
 compounds, oxidation-reduction potentials, (64) 710; (65) 204.
 concentration, relation to size inheritance in rabbits, (69) 509.
 Sulfide sulfur content as basis for diluting lime-sulfur, (62) Colo. 55.
 Sulfides—
 minerals, in arable soils, (68) 594.
 quantitative precipitation in buffered solutions, (65) 614.
 Sulfinic acid, formation, (70) 292.
 Sulfite—
 action on cystine, (69) 165.
 pitch, properties and uses, (65) Va. 40.
 Sulfonic acids and thiol acids, simultaneous production from dithio acids by silver sulfate, (65) 203.
 Sulfosan for mildew control, (66) 842.
 Sulfur—
 action as fungicide and acaricide, (61) 545.
 administration to sheep, effect, (70) 96.
 and oil emulsion spray, properties, (64) 542.
 and phosphate rock, composting, (63) Tex. 417.
 and phosphorus, experiments, (61) S.Dak. 20.
 and pyrite oxidation, effect of lime and magnesia, (64) 426.
 and sulfur compounds as fungicides, (67) Tex. 690.
 as fungicide, action, (69) 372.
 as insecticide, (63) 162; (67) Tex. 705.
 as limiting factor of crop production, (62) 418.
 as soil amendment, (64) Tex. 21.
 biochemistry, (66) 389.
 biological oxidation, (63) 425.
 chemistry of toxic factor, (67) 540.
 colloidal, toxicity and its enhancement, (69) Ohio 61.
 composting with different soils, (62) Tex. 614.
 composting with manure, effect, (62) Ga. 21.
 compounds—
 effect of dormancy of potato tubers, (68) 757.
 effect on molt of White Leghorn hens, (70) 666.
 effect on potato tubers, (69) 341.
 organic bibliography, (64) 411.
 soluble organic, new color reaction, (67) 8.
 deficiency, effect on metabolism of tomato, (68) 476.
 derivatives, bactericidal efficiency, (68) Ohio 341.
 determination in insecticides and fungicides, (66) 207.
 determination in organic compounds, (62) 608, 609.
 dioxide—
 determination, methods, (68) 582.
 effect on sugar beets in storage pits, (66) 342.
 effect on vitamin C in fruits, (62) 295.

Sulfur—Continued.

- dioxide—continued.
 - for treatment of grapes, (61) Calif. 739.
 - gas fumigation of grapes, effect, (70) 628.
 - germicidal properties, (70) 835.
 - in dried fruits, determination, (61) 312.
 - in foods, determination, (61) 312.
 - injury to plants, (67) 386.
- distribution in proteins, (68) 433.
- drainage, effect of lime from soil, (61) 624.
- dust, effect on apple pollination, (62) N.Y.Cornell 840.
- dust mixtures, adhesiveness, (61) Ohio 444.
- dusting and spraying, aspects of, (63) 347.
- dusting for wheat rust, (63) 840.
- dusting in California, (63) 254.
- dusts, fineness, (63) N.Y.State 450.
- dusts in apple scab control, cause of failure, (61) Ohio 151.
- economy of animal fiber production, (69) 315.
- effect on—
 - alfalfa, (64) Oreg. 317; (65) Mont. 528.
 - alfalfa hay, (61) Oreg. 20.
 - cantaloupes, (66) Tex. 44.
 - citrus trees, (68) 62.
 - crop yield, (63) Tex. 121.
 - deciduous trees, (68) 61.
 - Merino sheep and their resistance to potassium cyanide poisoning, (69) 420.
 - properties of gray iron, (63) 379.
 - spread of root rot, (66) Tex. 43.
 - tobacco, Conn.State, (61) 135, 136.
 - wheat, (63) 322.
 - wireworms, (68) 359.
- fertilizing value, (62) Ill. 316; (66) Idaho 212, Va. 516.
- flotation, for apple scab control, Ill., (64) 843; (68) 626.
- flotation, in spray combinations, value, (65) Mass. 354.
- flotation, spraying with, (70) Tenn. 192.
- for control of cotton leaf bugs, (63) Miss. 156.
- for gray citrus scale, (66) 452.
- fungicidal action, (62) 532, 533; (67) 401.
 - effect of spreader, (68) 341.
 - interaction with fungi, (64) 349.
 - movement through space, (64) 349.
 - toxicity of sulfuretted hydrogen, (64) 349.
- fungicidal property, factors affecting, (65) 537.
- fungicides—
 - adhesiveness to rose foliage, (70) applied during bloom, effect on set of apple fruits, (69) 802.
 - 201.

Sulfur—Continued.

- fungicides—continued.
 - effects on orchard trees, (62) N.Y. State 439.
 - greenhouse experiments, (65) Wis. 440.
 - injury caused by, (68) N.Y.State 626.
- hydrolysis, relation to fungicidal activity, (68) 341.
- in Oregon soils and losses through drainage and cropping, (61) 210.
- in phosphate rock, (69) 487.
- in plants, determination, Benedict-Denis method, (63) 506.
- in proteins, (63) 501; (69) 483.
- in soil, studies, (64) S.Dak. 618.
- in turpentine, determination, (66) 809.
- in wool, relation to cystine yield, (64) 505.
- inferior brands, isolation with sieve, (64) N.Y.State 440.
- injurious effect on foliage, nature, (64) N.Y.State 447.
- Koppers flotation, test for apple scab control, (69) 821.
- lability in cysteine, mechanism, (69) 4.
- linkage in wool, (64) 10.
- metabolism, effect on pathologic effects of solar irradiation, (67) 488.
- metabolism of yeast, (61) 23.
- micro-determination by fusion, (62) 608.
- mixtures, adhesiveness, (67) 540.
- molten, effect on wood decay, (69) Ark. 875.
- oxidation, (67) 19.
 - by bacteria during ammonification, (63) 517.
 - in Alberta soils, (66) 815, 816.
- oxidizing microorganisms, longevity, (64) Oreg. 317.
- reclamation of black alkali with, (64) Oreg. 317.
- relation to cystine in animal hairs, (62) 609.
- rendering wettable, (61) 648.
- role in soil formation, (63) 216.
- solubilization products, separation, (63) 812.
- sources affecting growth of root tips, (70) 313.
- spray materials, new types, v. liquid lime-sulfur, (69) Wis. 810.
- sprays, effect on gooseberries, (64) 542.
- sprays for mites on small fruits, (68) Ill. 637.
- sprays, injury, comparison, (67) Mo. 386.
- sprays, use in hot weather, caution, (67) Wis. 690.
- toxic property, (61) 709.
- toxicity tests, (61) Ohio 444.
- toxicity to spores of *Sclerotinia cinerea*, (63) 449.
- toxicity to *Synchytrium endobioticum*, (68) 493.

Sulfur—Continued.

treatment of soil and potato wart disease, (64) 234.

types for apple spraying, (66) Ill. 230. wettable, and lime-sulfur sprays, comparative adhesiveness, (68) N.Y.State 626.

Sulfuric acid—

as herbicide for mustard, strength, (61) N.H. 127.

for weed control, (68) 474.

for weed control in growing grain, (67) 610.

Sulfurous acid in apple musts and ciders, determination, (62) 206.

Sulfurs, soluble, notes, (64) 238.

Sulphydryl compounds, autooxidation, action of carbon monoxide, (61) 307.

Sumac, laurel, source of red scale infestation of citrus, (69) 77.

Summers, warm and cool, prediction in east Hungary, (67) 210.

Sun—

altitude, relation to antirachitic effect, (61) 391.

baths and air, effect on metabolism, (62) 290.

in Puerto Rico, ultra-violet light intensity, (66) 493.

parlors for chicks, (63) Ohio 564.

spot period, 11-year, (69) U.S.D.A. 775.

spot periodicity and grasshopper fluctuation in Manitoba, correlation, (68) 783.

spots and crop yields, relation, (63) 518.

spots and precipitation in north Germany, correlations, (67) 108.

spots and weather, (69) 175; (70) 301.

spots, relation to atmospheric pressure and precipitation, (65) 714.

yards and sun porches for chickens, (67) Ohio 303.

Sun Yat-Sen Memorial Park, (63) 500.

Sunflower—

diseases, control methods, (69) 222.

diseases in Russia, (63) 47.

leaves, change of substances in during vegetation, (67) 372.

maggot, notes, (65) Conn.State 451.

plants, composition, (66) 122.

silage, *see* Silage.

stem and root, buffers of, (61) 211.

weevil, notes, (68) Ill. 637.

weevil parasites, (63) 457; (65) 453; (69) 696.

Sunflowers—

as silage crop, (61) Wis. 128.

at various growth stages, composition, (62) 263.

bibliography of, (63) U.S.D.A. 635.

breeding, (62) N.Y.Cornell 731; (68) Wash.Col. 754.

fertilizer experiments, (63) 720.

germination and growth, effect of pH, (69) 188.

insects affecting, (63) Mo. 750.

insects affecting in Ukraine, (62) 853.

Sunflowers—Continued.

process of accumulation of nutritive substances, (68) 172.

swedes and Jerusalem-artichokes, comparison, (68) Mich. 319.

variety tests, (64) Oreg. 334, Alaska 731.

Sunlight—

antirachitic value, seasonal variation, (64) N.Y.Cornell 666.

daily, intensity, measurements, (67) 20.

direct, effect on egg production and hatchability, (65) Calif. 764.

effect on—

cattle, (67) S.Dak. 65.

dairy heifers, (64) S.Dak. 674.

growth and health in calves, (63) S.Dak. 68.

growth of calves, (61) S.Dak. 66.

methylene blue in milk, (64) 502.

poultry, (64) N.Y.Cornell 666.

rickets, (66) Nebr. 362.

susceptibility of rachitic rats to infection, (61) 595.

vitamin B in vegetables, (63) Iowa 93.

importance in forestry, (62) 530.

requirements of hens, (62) N.Y.State 68.

Texas, effect on durability and color of cotton fabrics, Tex., (63) 497; (67) 781; (70) 286.

through glass substitutes, effect on growth in chicks, (61) 668.

through ultra-violet transmitting glass, clinical value, (62) 593.

type S-1 lamp (G.E.) therapy in human rickets, (63) 496.

ultra-violet component, daily measurement, (69) 620.

v. cod-liver oil, effect on growth of chicks, (68) N.C. 511.

value for pigs, (61) Wis. 163.

winter—

effect on bone formation in chicks, duration, (66) 165.

effect on growth in pigs, (61) 666.

effect on rickets in growing chicks, (65) 258.

in Boston, antirachitic value, (63) 794.

in Chicago, behind ultra-violet glass, antirachitic efficiency, (67) 490.

through Cel-O-Glass, antirachitic effect, (63) 794.

Sunshine—

antirachitic effect, seasonal variation, (62) N.Y.Cornell 765; (67) 490.

bright, effect on tomatoes under glass, (62) 139.

duration and soil temperature, correlations, (66) 412.

of Arkansas, antirachitic potency, seasonal variation, (67) 780.

of Colorado, high antirachitic potency, (65) 96.

- Sunshine—Continued.
 of New Orleans—
 antirachitic efficiency, (69) 313, 474.
 efficiency for chicks, (69) 410.
 seasonal variation in efficiency toward rickets, (64) 597.
 temperature, and wind, (61) U.S.D.A. 313.
 through window glass, effect on resistance to infection, (69) 313.
 urban, loss of actinic intensity due to air pollution, (64) 398.
 winter—
 and summer, in Albany, N. Y., antirachitic potency, (69) 313, 314.
 and summer, in Colorado, antirachitic effects, (65) 96.
 in southern Wisconsin, ultra-violet potency, (65) Wis. 463.
 source of vitamin D, (61) Ind. 366.
- Sunt die-back, notes, (65) 246.
- Supella supellectilium as household pest in Nebraska, (61) 546.
- Superb plant bug, relation to flower drop in alfalfa, (68) 497.
- Superior School of Agricultural Cooperation in Czechoslovakia, organization, (68) 121.
- Superphosphate—
 ammoniation, reactions during, (65) 421.
 and ammonium sulfate mixture, nitrogen availability, (64) 323.
 availability, effect of depth of placement, (70) 454.
 effect on flax, (65) 529.
 effect on soil reaction and alfalfa composition, (66) 315.
 effectiveness, effect of colloidal soil materials, (70) U.S.D.A. 308.
 fixation by soils, (64) Ala. 316.
 heavy applications, effect on vegetables, (66) Va.Truck 738.
 rate and degree of fixation by Black Belt soils, (66) Ala. 814.
 treble, preparation and properties, (66) U.S.D.A. 213.
 v. lime for different soil types, (61) Kans. 117.
 value for pastures, (61) Conn.Storrs 432.
 value on limed soils, (70) Va. 764.
 variations in local prices, (65) Mo. 485.
- Superphosphates—
 ammoniated, availability, (68) Ark. 590.
 ammoniated, chemical nature and solubility, (66) 212.
 application to apples and peaches, (69) Calif. 47.
 availability, (66) Ark. 513.
 effect on corn germination, (63) 826.
 effect on damping-off in seed beds of evergreens, (67) 41.
 effect on tomatoes, (64) N.Y.State 441.
 fertilizing value, (63) N.Dak. 821, N.Dak. 823; (66) Va. 516.
- Supply curves, statistical, nature, (69) 443.
- Suprarenal—
 cortex and vitamin C, (69) 904.
 glands, effect of vitamin deficiency, (62) 197.
 glands, hexuronic acid from, vitamin C activity, (69) 10.
- Surface—
 area determinations, significance, (64) 298.
 energy studies, (61) Utah 11.
 films, structure, (62) 606.
- Suricat, new nematodes from, (67) 70.
- Surophosphat, comparison with other phosphates, (62) 121.
- Surra—
 control in Dutch East Indies, (65) 70.
 experimental, treatment, (61) 73.
 in equines, treatment with Bayer 205, (69) 861.
 in Mauritius, transmission, (62) 358; (65) 56.
 outbreak in wild deer, (70) 528.
 problem, zoological contributions, (61) 660; (62) 454, 467.
 prophylaxis, (67) 450.
 studies, (62) 377.
 transmission by land leech, (67) 743.
 transmission by *Tabanus* spp., (63) 480.
 treatment, (64) 561; (66) 373, 469.
 treatment in Philippines, (67) 169.
- Susliks, temperature regulation, (69) 248.

- induction in rachitic rats, (64) 597; (65) 794.
- of fasting in experimental rickets, (61) 495.

Tetrachlorethane, anthelmintic value, (62) 877.

Tetrachlorethylene—

- and carbon tetrachloride, comparison, (67) 452.
- anthelmintic value, (61) 678; (62) 877; (63) Tex. 477; (65) 874.
- pharmacology and toxicology, (61) 678.

Tetracnemus—

pretiosus—

- description and biology, (67) Calif. 432.
- for control of *Pseudococcus gahani*, (66) 451.
- n.sp., description, (61) 758.
- parasite of *citrophilus mealybug*, (65) Calif. 755.
- sp., notes, (61) Calif. 351.

Tetraethyl lead—

- dope, effect on piston lubrication, (70) 256.
- effect on rate of combustion, (62) 570.

Tetrameres—

americana—

- developmental stages, (65) U.S.D.A. 181.
- distribution in New Jersey, (69) 864.
- life history, (62) 381.
- of poultry, intermediate host for, (67) 288.
- parasite of fowls, (64) N.J. 178.

crami n.sp., description, (69) 437.

paradisea n.sp. from Stanley cranes, (69) 420.

pattersoni n.sp. from bobwhite, (69) 268.

Tetranychus—

bimaculatus—

- n.sp., control, (67) Mich. 57.
- studies, (65) Fla. 452.

medanieli—

- n.sp., control, (67) Mich. 57.
- new mite on raspberries, (67) 443.
- notes, (68) Mich. 351, Mich. 780; (69) 247.

pacificus—

- in San Joaquin Co., California, (66) 753.
- notes, Calif., (61) 351; (62) 752; (65) 753; (67) 559.

telarius, *see* Red spider.

Tetrastichus—

- crassinervis, notes, (69) 247.
- giffardianus, parasite of Mediterranean fruit fly, (63) U.S.D.A. 53.
- haitiensis, notes, (69) P.R. 825.
- sp., notes, (67) Colo. 719.

Tetroda histeroides—

- biomics, (66) 758.
- new pest of rice, (62) 853

Tetropium—

- gabrieli, notes, (67) 584.
- spp., life history and biomics, (63) 253.

Tettigidae, genetics, (62) 321.

Texas—

- College, notes, (61) 500, 600.

- fastness to light and washing, (67) Ohio 93.
- manual, (66) 97.
- popular information, (62) Ill. 198.
- testing, controlled humidity room for, (66) 394.
- wool-cotton, analysis, (70) 429.

- Thallium—
 effect on tobacco growth, (67) 511.
 pharmacology and use in rodent control, (65) U.S.D.A. 151.
 poisoning in sheep, (63) 575.
 salts, effect on molting mechanism of fowls, (65) 764.
 sulfate, effect on plant growth and nitrification, (70) 28.
 sulfate, toxicity, (64) 264.
 toxicity and deposition in game birds, (70) 103.
 toxicity, distribution, and excretion, (69) 436.
- Thamnotettix—
 nigrifrons, notes, (68) U.S.D.A. 501.
 smithi, notes, (61) N.J. 751.
 spp., life history notes, (62) 853.
- Thanatos flavidus attacking bedbugs, (62) 246.
- Thatcher and Thompson, passing of, editorial, (70) 289.
- Thaumetopoea processionea in Pieve forests, (67) 285.
- Theelin—
 action on fowls, (70) 36.
 crystallographic description, (64) 710.
 effect on growth of mammary gland, (68) 464, 607.
 effect on immature guinea pigs, (69) 352.
 effect on ovarian development, (66) 625.
 injections, attempted induction of labor by, (69) 353.
 preparation, (64) 710.
- Theelol—
 administration to immature pullets, effect, (69) 198.
 effect on growth of mammary gland, (68) 607.
 purification and constitution, (69) 484.
- Theileria—
 annulata, notes, (67) 743.
 dispar, transmission by ticks, (61) 175.
 genus in Palestine, (70) 92.
 mutants in northern Queensland, (69) 867.
 mutants, longevity in blood of cow, (61) 269.
 parva and T. annulata, differentiation, (64) 71.
 parva in Rhipicephalus appendiculatus, life cycle, (67) 314.
 spp., notes, (67) 600.
- Theileriasis, papers on, (66) 467.
- Theileriosis, bovine, transmission in North Africa, (65) 776.
- Thelastoma—
 macramphidum n.sp., description, (65) 361.
 papilliferum n.sp., description, (65) 361.
- Thelazia—
 californiensis, description, (64) 562.
 californiensis, differentiation from other species, (66) 668.
 key to species, (66) 668.
 Thelephora laciniata, notes, (63) Ohio 45.
 Thelohania pesthiae, cause of disease of Mediterranean flour moth, vector of, (69) 247.
 Theobaldia annulata, oviposition, (67) 284.
 Theobroma bicolor, notes, (67) 399.
 Theobromine, ultra-violet absorption spectra, (64) 502.
 Therioaphis n.sp., description, (68) 784.
 Thermobia domestica, *see* Fire brat.
 Thermocouple for measuring body temperatures of animals, (64) 263.
 Thermograph bulbs, method of installing in cottonseed sterilizers, (70) U.S.D.A. 501.
 Thermometers, resistance, to measure relative humidity, (65) 808.
 Thermopile for temperature determinations in entomology, (66) 549.
 Thermopsis, chromosome numbers in, (68) 602.
 Thermostat, low-temperature, (66) 803.
 Thespesia populnea, cell deviation in root-tip, behavior of nucleus, (65) 520.
 Thielavia basicola, notes, (62) 145; (63) Mass. 542; (64) 848; (66) Mass. 45, 152; (68) N.C. 487.
- Thielaviopsis—
 basicola, notes, (66) Ky. 146; (70) 799.
 ethaceticus, notes, (67) 265.
 paradoxa, notes, (62) 238; (64) 448; (65) 344; (66) P.R. 237; (67) 147.
 paradoxa on date palm, (70) Ariz. 59.
 paradoxa, perfect stage of, (65) 535.
 sp., notes, (67) 400.
- Thiobacillus thiooxidans in peat soils, (68) Minn. 24.
- Thiocyanate, effect of amylase activity, (66) 710.
- Thiocyanates—
 aliphatic, insecticidal activity, (70) 208.
 aliphatic, insecticidal value against aphids, (67) 53.
 effect on iodine-starch reaction, (65) 313.
- Thioglycolic acid, oxidation-reduction potentials, (65) 204.
- Thiohydantoins—
 action of alkali on, (65) 11.
 from cystine and cysteine, (65) 11.
- 2-Thiohydantoins, preparation, (69) 485.
- Thiol—
 acids and sulfonic acids, simultaneous production from dithio acids by silver sulfate, (65) 203.
 compounds and naphthalene-2-sulfonic chloride, reaction, (70) 440.
 disulfide system, (63) 312.

- 2-Thiohistidine, new synthesis, (70) 440.
- Thionine, effect on agglutinin titer in abortion infected cows, (69) 108.
- Thiourea for potato seed treatments, (62) 224, 847.
- Thirst, effect on weight of internal organs, (64) 291.
- Thistle butterfly, notes, (68) Conn.State 66.
- Thistle, Canada—
 characteristics and control, (62) Colo. 37.
 control, (61) Ohio 640; (63) Ohio 30, Idaho 523, Ohio 824; (64) Oreg. 335, Ill. 825; (66) Ill. 221; (69) Ohio 38.
 control with chlorate sprays, Ohio, (67) 29, 30.
 eradication, relation to organic food reserves, (62) Ohio 136.
 shoot formation by, (70) 330.
 sodium chlorate for, (61) Miss. 436.
- Thistle, Russian—
 control and utilization, (70) 331.
 water requirements, (65) 128.
- Thlaspi arvense, effect on dairy products, (64) 472.
- Thomasiina oculiperda, control, (64) 247.
- Thompson and Thatcher, college presidents, passing of, editorial, (70) 289.

 - in Palestine, (67) 313.
 - infestation in coastal tract of North Kanara District, (67) 450.
 - infesting a house in Canal Zone, (67) 294.

Ticks—Continued.

- notes, (70) U.S.D.A. 499.
 nymphal, resistance in arsenical dips,
 (62) 263.
 of East Indian Archipelago, (69) 400.
 on horses, persistence of parasite in,
 (66) 774.
 pajaroello, anatomy, (68) 795.
 relation to piroplasmoses of Algeria,
 (61) 175.
 sheep, control, (67) 576.
 South African, notes, (63) 171.
 transmission of relapsing fever by, (65)
 657.

Tiger beetles of Minnesota, key, (61) Minn.
 358.

Tikitiki—

- as source of vitamin B, (66) Ill. 295.
 extract, analyses, (69) 761.
 extract, vitamin B and G in, (69)
 Hawaii 747.

Tile—

- drains, efficiency, effect of joint space,
 (67) Ohio 75.
 hollow load-bearing wall, fire resistance,
 (61) 281.
 roof, waterproofing, (65) Iowa 183.

Tillage—

- and soil moisture problems, (63) Wash.
 Col. 210.
 deep, value, (67) Wis. 657.
 distribution of mechanical power in,
 (61) 682.
 electric, (69) 122.
 equipment, duty and cost, (69) Idaho
 871.
 experiments, (64) Mont. 218; (67)
 N.Dak. 667.
 experiments at San Antonio (Texas)
 Field Station, (66) U.S.D.A. 628.
 implements, draft studies, (66) Ala. 874.
 implements, new types and designs, (68)
 U.S.D.A. 113.
 implements, soft center and solid steels
 for, (63) 880.
 machinery, (61) Iowa 377, Idaho 876;
 (67) N.J. 605.
 practices, (69) Kans. 201.
 problem from engineering viewpoint,
 (64) 79.
 studies, (61) Kans. 114; (66) Wash-
 Col. 777.
 tools, chromium plating on, tests, (61)
 Mich. 772.

Tilletia—

- horrida, notes, (62) Ark. 845.
 indica n.sp., notes, (68) 769.
 infection and speltoid characters, par-
 allel occurrence, (70) 194.
 levis, new physiologic forms, (66) 441.
 physiologic specialization, relation to
 epiphytotics of bunt, (68) Minn. 54.
 spp., effect on vegetative organs of
 wheat, (64) 231.
 spp., stunting of wheat by, (66) 240.

Tilletia—Continued.

tritici—

- and *T. levis*, heterothallism and
 hybridization in, (66) 834.
 and *T. levis*, physiologic specializa-
 tion in Pacific Northwest, (70)
 193.
 development, action of temperature
 and soil, (61) 343.
 germination and infection, condi-
 tions for, (61) 534.
 new physiologic forms, (65) 236;
 (66) 441.

Timarcha sp., control, (64) Oreg. 356.

Timber—see also Lumber and Wood.

- and cut-over lands in Oregon and Wash-
 ington, taxation, (66) U.S.D.A. 382.
 as a crop, (61) Va. 885.
 as money crop for farmers in northern
 States, (66) U.S.D.A. 638.
 borers, control, (61) 358.
 cleavage tests, (66) 379.
 cruising, modified plat method, (70)
 634.
 damage by termites, (68) 500.
 decay, diagnosis, (69) 542.
 design and construction, treatise, (64)
 566.
 drying, chemical aspect, (64) 505.
 green, cause of shakes and rift cracks
 in, (69) 661.
 growing and cutting in lodgepole pine
 region, (62) U.S.D.A. 45.
 growing and logging practice in North-
 east, (63) U.S.D.A. 240.
 growing and logging practice in south-
 ern Appalachians, (66) U.S.D.A. 40.
 growing in southern pine region, (64)
 U.S.D.A. 144.
 heat sterilization, (61) 855.
 in buildings, insects emerging from, (65)
 355.
 Indian, preservation by open tank proc-
 ess, (67) 174.
 Indiana, marketing, (63) Ind. 687.
 lands, utilization, (69) N.H. 445.
 of buildings, effect of fillers on wood-
 destroying fungi, (69) 680.
 planted, returns from, (70) Mich. 847.
 privileges in national forests in Utah,
 (65) U.S.D.A. 141.
 production, breeding for, (68) 745.
 protection against termites, (65) 246.
 resistance to wood-destroying fungi, ef-
 fect of season of felling, (69) 372.
 sales from submarginal farms, (68)
 Ark. 623.
 soils and grass in Big Horn Mountains,
 (64) 611.
 structures, strength of joints in, (66)
 875.
 testing, methods, (66) 145.
 tests of West African forest species,
 (66) 145.
 tree volume, logarithmic expression,
 (70) 634.

- Timber—Continued.
 utilization of land for, in New England, (61) 283.
 wind-thrown, on Olympic Peninsula, deterioration, (61) U.S.D.A. 143.
- Timbers—
 ambrosia insects in, effect of kiln temperatures and air-seasoning, (70) 812.
 commercial, of India, (68) 485.
 farm, preservative treatment, (61) U.S.D.A. 679.
 hardwood, in Great Britain, insect damage, (68) 782.
 home grown, structure, relation to properties, (65) 233.
 Malayan, durability, (66) 234.
 resistant to Tereido, (69) 247.
 strength, notes, (64) 779.
 structural, tests, (63) U.S.D.A. 79.
- Time—
 leisure, use by farm, village, and city families, (61) Mich. 787.
 use in farm homes, (61) Nebr. 196; (62) Oreg. 496; (69) Mont. 477.
- Timothy—
 alfalfa, and clover mixture on meadows, tests, (69) Ohio 38.
 and alfalfa as crops, comparison, (64) Ohio 625.
 and alfalfa hay, comparison, (66) Va. 567.
 and alsike clover mixtures, analyzing and labeling, (62) 136.
 and clover, comparison, (70) Ind. 321.
 and clover hay, quality, effect of soil acidity, (64) Pa. 120.
 as tobacco cover crop, (63) Mass. 524.
 breeding, (62) N.Y.Cornell 731; (63) 224.
 effect on following tobacco crop, (65) Wis. 333.
 establishment, effect of seed rate, (61) 29.
 fertilizer experiments, (63) Ohio 29.
 for hay seeded in wheat, times and rates, (61) Ohio 637.
 grass fly pest, (70) 214.
 harvesting studies, (70) U.S.D.A. 464.
 hay—
 and oat feed for dairy cows, (67) Wis. 731.
 chopping for work horses, (64) Wis. 860.
 cut at different stages, (69) N.H. 406.
 cut at different stages, feeding value, (70) N.H. 231.
 cut at different stages, vitamins in, (69) Ohio 90.
 digestion coefficients, (68) Va. 662.
 early cut and fertilized with nitrogenous fertilizer, value for dairy cows, (70) N.Y.Cornell 822.
 effect of liberal nitrogenous fertilization, (69) N.Y.Cornell 38.
- Timothy—Continued.
 hay—continued.
 for pregnant and nursing ewes, (69) 406.
 for wintering ewes, Ohio, (63) 59; (64) 659; (67) 58; (69) 90.
 predigesting for work horses, (64) Wis. 860.
 v. alfalfa hay for horses, (61) Iowa 364.
 v. Johnson grass hay for horses and mules, (62) Ala. 764.
 hays of Quebec, calcium and phosphorus in, (62) 549.
 Huron, tests, (70) U.S.D.A. 179.
 in rotations, value, (63) N.Y.Cornell 33.
 infusion, effect on tobacco, (65) 47.
 meadows, fertilizer experiments, (63) Ohio 36.
 optimum soil reaction for, (66) Del. 526.
 production tests, (62) Alaska 127.
 strains, reaction to *Ustilago striaeformis*, (67) 697.
 under continuous cropping, yield, (70) Mo. 172.
 varieties and strains, (67) N.J. 123.
 varieties, behavior, (65) N.J. 31.
 variety tests, N.J., (63) 331; (65) 824; (67) 517.
 yields, (66) W.Va. 528.
- Tin coated metals, solubility in milk, (65) Wis. 469.
- Tin, reductor apparatus for detecting, (66) 506.
- Tin weighting of silk fabrics, effect, (62) 793.
- Tinea pellionella, *see* Clothes moth, case-bearing.
- Tineola—
 biselliella, *see* Clothes moth, webbing.
 uterella, food habits, (70) 810.
- Tingidae attacked by gall midges, lists, (64) 365.
- Tipburn, control, (61) Miss. 445.
- Tiphia—
 parallela, notes, (69) 686.
 popilliavora—
 activity and development, temperature as factor, (66) 856.
 establishment and colonization, (63) 462.
 parasite of Japanese beetle, (65) U.S.D.A. 157.
- Tipula—
 mingwe, notes, (66) Mich. 154.
 spp., control, (69) 393.
- Tiracola plagiata—
 life history notes, (63) 850.
 notes, (63) 551.
 studies, (65) 248.
- Tirathaba—
 rufivena—
 importance and control, (67) 433.
 new parasites, (62) 360.
 notes, (64) 750.
 trichogramma, studies, (68) 781.

Tobacco—Continued.

- fungus diseases, control with formaldehyde, (68) 60.
 grades, chlorine in, (62) Ky. 218.
 grades, relation to mineral content, (64) Ky. 536.
 gray mold, notes, (66) 46.
 Growers' Cooperative Association, business analysis, (62) U.S.D.A. 285.
 growing in Gujarat, improvement, (65) 531.
 growth and quality, effect of calcium and magnesium, (68) 188.
 growth, effect of boron, (61) 213, 719.
 growth, effect of thallium, (67) 511.
 harvesting test, (66) Va. 527.
 Havana, effect of cropping systems, (70) Mass. 180.
 high-nicotine—
 culture, (61) N.Y.State 333.
 production trial, (62) Tex. 627.
 strains, breeding, (64) Pa. 131.
 hornworm, notes, (70) U.S.D.A. 499.
 improved variety, (63) Wis. 32.
 in Deli, insects affecting, (69) 550.
 in Nyasaland, insects affecting, (64) 156.
 in Puerto Rico, undescribed symptoms, (63) 208.
 in South Africa, (63) 846.
 Indian cigarette, improvement by hybridization, (66) 824.
 Indian, types, (68) 758.
 industry, American, competition in, (69) 457.
 industry of New England, economic research, (61) 283.
 insects affecting, (61) 657; (63) Wis. 51; (65) Conn.State 336, Conn.State 356; (66) 348; (67) 150; (69) 549, Conn.State 550.
 insects in Japan, (66) U.S.D.A. 154.
 insects in Palestine, report, (61) 248.
 interchanges between plant and culture solution, (62) 319.
 investigations, (61) Conn.State 134.
 kroepoek, two types, (69) 673.
 kromnek disease in eastern Cape Province, (70) 641.
 land in Deli, vegetation of fallow, (61) 332.
 leaf curl, studies, (70) 344.
 leaf disease, new in Rumania, (69) 536.
 leaf spot, an after symptom of mosaic, (68) 208.
 leaf spot, cause, (70) Tenn. 192.
 leaf spotting in seed beds, (68) 774.
 leaf, structure and development, (70) 614.
 leaf thickness, (65) Wis. 431.
 leaves—
 change of substances in during vegetation, (67) 372.
 differently aged, properties, (65) 216.
 green, nonvolatile organic acids in, (66) 801.

Tobacco—Continued.

- leaves—continued.
 growth and composition, effect of nitrates, (66) 123.
 Mimaulus sulcatifrons affecting, (66) 558.
 nonvolatile organic acids, (65) Conn.State 9.
 organic acids, effect of curing process on, (69) Conn.State 771.
 shade, burn tests, (65) Fla. 430.
 liming experiments, (64) N.C. 21.
 magnesium and calcium requirements, (62) 721.
 manganese toxicity, (62) 620.
 manufactured, source of inoculum for mosaic, (70) 493.
 marketing, (68) Ky. 393.
 marketing, cooperative, outlook for, (70) 846.
 mixed seed problem, (65) Wis. 432.
 mosaic—
 carbohydrate variations in, (68) 208.
 control, (65) 47.
 control, roguing for, (70) 493.
 disease, virus precipitation, (67) 697.
 distribution of antigenic substance in host plants, (70) 197.
 effect on anatomy of host plant, (69) 819.
 effect of curing process, (65) N.C. 145.
 effect on chlorophyll content, (66) 445.
 effect on growth of Bacillus aroidae, (68) 774.
 effect on yield and quality, (61) 243, Md. 447; (68) Ky. 318; (70) 493.
 infection from tobacco users, (62) Ky. 233.
 intracellular inclusions in, (65) 645.
 isolation of yellow mosaic viruses from, (70) 798.
 juice, effect of formalization and trypsinization, (68) 208.
 local lesions in, (65) 750.
 local symptoms in leaves of some species, (67) 550.
 notes, (64) 846; (67) 264; (68) N.C. 487; (70) Ky. 192, N.C. 791.
 on potatoes, (61) 241.
 outbreaks, (65) 648.
 plant juice, double refraction exhibited by, (69) 673.
 role of Plasmodiophora tabaci in, (61) 242.
 stomatal infection with virus, (70) 797.
 strains in Kentucky, (65) 239.
 studies, (63) Wis. 45, N.C. 645; (65) Wis. 431; (66) Ky. 146.

Tobacco—Continued.

- mosaic—continued.
 studies, inoculating methods, (65) 843.
 tissue, intracellular bodies in, (61) 843.
 transmission by aphids, (62) 854.
 transmission, role of onion thrips in, (64) 750.
- mosaic virus—
 and tomato spotted wilt virus, inoculation experiments, (69) 672.
 attenuation, (65) 645.
 concentrations, accuracy in comparing, (65) 47.
 cultivation in vitro, (67) 273.
 electrophoresis, (63) Calif. 546.
 inactivants for, (68) W.Va. 769.
 movement in host, (69) 673.
 notes, (70) Mo. 192.
 overwintering, (62) Wis. 350.
 properties, (61) 540; (69) 819.
 rod-shaped particles in, (69) 673.
 studies, (65) 843.
 thermal death rate, (70) 493.
 transmission experiments, (61) 550; (65) 248.
- new bacterial leaf disease in Philippines, (66) N.Y.Cornell 644.
- nicotine in, (61) 333; (69) Hawaii 633.
- nitrogen—
 assimilation by, (66) 226.
 compounds for, (63) Mass. 523.
 distribution in, (69) 207.
 nutrition and sulfur fertilization, (70) U.S.D.A. 464.

- leaf mold—
 - control, (61) Ohio 444, Mass. 839; (67) Ohio 43, Wis. 690; (69) 226.
 - control in greenhouses, (61) Mass. 448; (66) 151.
 - in greenhouse, effect of air circulation, (65) Mass. 344.
 - relation to greenhouse conditions, (64) Ohio 643.
 - studies, (63) 346; (64) 43.
- leaf roll, notes, (67) 264.
- leaf spot, control, (62) 148; (64) Kans. 846; (68) Tenn. 191.
- leaf spot, studies, (64) Tenn. 348.
- leaves, pruning, effect, (64) Ohio 634.
- mosaic—
 - and streak, notes, (66) 147.
 - and stripe disease, (63) 346.
 - causes and symptoms, (70) Md. 57.
 - in greenhouse soils, (63) Wis. 47; (65) 540.
 - physiological studies, (70) 198.
 - plants, separation of toxins from, (67) 697.
 - studies, (62) Ky. 233; (69) 226, 227, Md. 663.
 - tissue, intracellular bodies in, (61) 843.
 - transmission, role of insects in, (66) Ind. 238.
 - two types, (61) Utah 45.
 - virus, combining with potato virus, (65) Ind. 144.
 - virus, purification and properties, (61) 243; (67) 697.

Tomato—Continued.

- mutant, thread-leaved, genetics, (69) 29.
- nailhead blight, spraying for, (69) Ga. Coastal Plain 60.
- nailhead rust, control, (63) Fla. 644.
- nailhead spot during transit and marketing, (61) 48.
- nailhead spot, studies, Fla., (65) 439; (67) 535; (69) 221.
- paste, tariff data, (63) 283.
- peroxidase, inactivation temperature, effect of pH, (65) 214.
- pinworm, description and injury, (69) 80.
- pinworm, new pest in Pennsylvania, (67) 50.
- pinworm, notes, (66) 760.
- pistils, histological study, (67) 142.
- plant beds, forced ventilation for, (61) Ind. 346.
- plant, mineral constituents, relation to culture medium, (64) Ark. 437.
- plant production, glass v. cloth in, (64) Tenn. 341.
- plants—
 - absorption of nitrogen by, (67) N.J. 508.
 - amylase and invertase activity, factors affecting, (69) Ind. 48.
 - analysis, (62) 432.
 - anatomical variations, (66) Ark. 533.
 - Bacterium tumefaciens migration in tissue, (66) 445.
 - composition and growth, effect of boron, (61) 524.
 - double-stemmed, yields, (66) W.Va. 537.
 - effect of frost protectors, (68) Mich. 199.
 - effect of lightning on, (70) 184.
 - effect of phosphorus deficiency, (62) 837.
 - frost protection in field, (64) Mich. 223.
 - Georgia grown, tests in Delaware, (66) Del. 542.
 - growth habit, linkage relations, (70) 604.
 - growth in various containers, (62) S.C. 636.
 - holding in pots after reaching planting size, effect, (67) Ohio 524.
 - in flat, nutrients for, (64) N.Y. State 441.
 - large overgrown, use, (67) Ohio 36.
 - maturation period, (63) 736.
 - mineral constituents, effect of variations in nutrient media, (69) Ark. 781.
 - shipped, diseases in, (64) Del. 640.
 - southern-grown, handling, (62) Del. 745.

Tomato—Continued.

- plants—continued.
 - staking, effect, (64) Mont. 223.
 - time of planting, (65) N.Mex. 227.
 - transplanted and field-sown, (63) N.Mex. 443.
- pockets, classification of symptomatic types, (65) 843.
- pockets, development, (70) Tex. 182.
- pockets, effect of fertilizers, (67) Tex. 673.
- pollen, studies, (64) Ark. 438.
- pomace, dried, feeding value, (66) Del. 568.
- pomace, dried, in dairy rations, (69) Del. 98.
- products, spoilage, studies, N.Y.State, (62) 9, 10.
- products, vitamins in, (65) 293.
- psyllid, life history studies, (63) Utah 654; (64) 244.
- psyllid, notes, (61) Utah 54.
- pulp and ketchup, spoilage, (70) N.Y. State 740.
- pulp, color, effect of vegetative conditions of plants, (65) N.J. 831.
- pulp, dried, vitamin A in, (65) 193, Wis. 492.
- quality, studies, color of different regions, (61) 643.
- ripe rot, effect of radiant energy, (67) 409.
- root knot, control, (67) 273.
- rot and breakdown, (70) 343.
- Sclerotium disease, notes, (61) 651.
- seed bacterial canker, prevention, (70) U.S.D.A. 486.
- seed, disinfection, (62) Del. 746.
- seed, Marglobe, production, (65) V.I. 738.
- seedling diseases, control, (69) Del. 60; (70) Ga.Coastal Plain 791.
- seedlings, damping-off, causes and control, Ohio, (66) 749; (67) 43.
- seedlings, tests, (63) N.J. 337.
- seedlings, treatment with Bordeaux mixture, (66) Ga. 745.
- seeds, treatment, (65) N.J. 838.
- Septoria leaf spot, notes, (63) 44; (65) Ind. 144; (66) 147.
- Septoria rots, notes, (66) 147.
- sleepy disease, control, (63) 347.
- spotted wilt—
 - new hosts, (67) 551.
 - studies, (61) 845; (65) 345; (70) 198.
 - transmission, (64) 359; (67) 430.
 - virus and tobacco mosaic virus, inoculation experiments, (69) 672.
- stem rot, notes, (66) 147.
- stem rot, seed treatment for, (64) Del. 640.
- Stemphyllium leaf spot, (67) 551.
- stems inoculated with Bacterium tumefaciens, rate of migration in, (65) 47.

Tomato—Continued.

streak—

- cause, (66) Wash.Col. 746.
- experiments, (65) 648.
- in greenhouse soils, control, (63) Wis. 47.
- notes, Wash.Col., (63) 244; (64) 645.
- soil transmission in greenhouse, (65) 540.
- transmission experiments, (63) Ind. 541.

stripe disease—

- relation to mosaic, (69) 820.
- studies, (70) 193.

suck fly, control, (66) Tex. 52.

tetraploid seedling, genetic studies, (61) Calif. 326.

tissues, green, nitrate in, (62) 432.

tracheoalternariose, (68) 210.

transplants, studies, (64) Mont. 223.

Verticillium wilt—

- in New Zealand, (70) 196.
- notes, (67) Ohio 43; (69) Wis. 810.
- vines injured by a mirid, (65) 50.

virus from tissue of diseased plants, obtaining, (65) Ind. 144.

wilt—

- and root rot, control, (70) N.C. 791.
- due to Verticillium, (64) Ohio 643.
- northern and southern type, (66) Tex. 34.
- notes, (61) 347; (65) 344; (69) Fla. 221.
- organism, studies, Mo., (62) 50; (63) 742.
- resistance, breeding for, Ill., (64) 541; (66) 229.
- resistance, studies, (61) Miss. 445; (63) Mo. 734; (66) Mo. 331, Ga. 744.
- resistant varieties, (63) La. 341, Tex. 444; (64) Miss. 447; (67) Ind. 523, Tex. 673; (68) Ill. 617.
- resistant variety, (63) Ga. 143.
- studies, (61) N.J. 742; (65) N.C. 146; (67) La. 263; (69) Ga. 221.

worm—

- insecticide efficiency for, factors affecting, (65) 357.
- studies, (67) Mich. 433; (68) S.C. 780.
- tartar emetic as poison for, (69) 78.

yellows—

- chemical changes accompanying, (68) 60.
- control, (63) U.S.D.A. 745.
- proposed name, (61) 243.
- resistance, studies, (62) Calif. 723.
- under different light conditions, (67) 274.

Tomatoes—

- aborted blooms on, (64) Ark. 438.
- analyses and handling qualities, effect of fertilizers, (67) 674.
- anthesis and blossom drop, relation to temperature, (67) 142.
- artificially v. naturally ripened, vitamins in, (61) 494.
- Bonny Best, nutrition study, (64) Can. 538.
- Break o' Day, origin and characteristics, (67) U.S.D.A. 387.
- breeding, (61) Ga. 144; (62) Miss. 38, Miss. 137, N.Y.State 431; (63) Wash. Col. 235, Ind. 531; (64) Can. 538, Miss. 631, Wash.Col. 638, Ill. 837; (65) N.J. 831; (66) N.H. 33, Pa. 227, 326, Wash.Col. 737, Can. 828; (67) N.H. 524, N.J. 524, Tex. 673; (68) Wash.Col. 760; (70) N.J. 474.
- breeding and selection, (63) Ga. 143; (67) N.Dak. 673.
- buying on grade, Ind., (61) 690; (63) 685.
- calcium nutrition, (67) N.J. 524.
- canned—
 - and fresh, vitamin C, in, (63) 395.
 - color, effect of processing temperatures, (68) 199.
 - color, effect of sterilization, (67) Ind. 523.
 - effect of storage on vitamin A in, (69) Iowa 148.
 - factors affecting wholeness, (70) 714.
 - industry and distribution in United States, (69) 743.
 - tariff data, (63) 283.
- cannery, marketing, Ohio, (66) 678; (67) 80; (68) 115.
- cannery, variety tests, (62) Md. 838.
- canning—
 - composition, (69) Calif. 52.
 - culture, (70) N.J. 118.
 - experiments, (70) N.Y.State 774.
 - fertilizer experiments, (65) Mich. 719.
- carbohydrate content, (68) 476.
- carotenoid content, relation to light, (67) 245.
- chemical composition, relation to shipping quality, (68) Okla. 616.
- chromosome mutant forms, (62) Calif. 723.
- color studies, (63) Ind. 531.
- composition, (62) Calif. 787.
- consumption, supplies, and prices, (70) 848.
- cost of production, (61) N.J. 781; (63) N.J. 385; (66) Tex. 34; (67) N.J. 613.
- cultivation experiments, (65) N.Y. Cornell 635.
- culture, (62) Ohio 41; (66) Ky. 137,

Tomatoes—Continued.

- culture experiments, (61) N.Dak. 735; (62) V.I. 227, P.R. 737; (63) V.I. 137, Utah 639; (64) Alaska 737; (66) Tex. 35; (67) N.Mex. 35; (68) Tenn. 191; (69) Ga.Coastal Plain 48; (70) Ga.Coastal Plain 773.
- culture in Kansas, (70) Kans. 620.
- damping-off, cuprous oxide for control, (68) N.Y.State 626.
- December v. January sowing, (61) Ohio 440.
- decoloration, ripening, and coloration with ethylene gas, (69) 211.
- development, effect of removal of alternate flower clusters, (65) 227.
- diploid and tetraploid, vitamin C in, (70) 426.
- distribution of vitamins in, (66) 491.
- dusting experiments, (61) Ind. 342.
- earliness and total yields, effect of fertilizers and rotation, (69) N.Y.State 211.
- earliness and yield. effect of seed source, (68) S.C. 760.
- early-ripening varieties, (62) West. Wash. 523.
- effect of—
- boron, nature, (63) 830.
 - calcium deficiency, (66) 828.
 - continuous cropping, (66) N.Y. State 535.
 - ethylene treatment, (61) Minn. 39, Mich. 424, N.J. 734; (65) 534; (67) 244; (70) U.S.D.A. 475.
 - freezing, (66) Ga. 740.
 - hours of sunshine and heating the soil, (67) 244.
 - manganese, (61) Ind. 338; (65) Fla. 434.
 - phosphorus, (64) N.Y.Cornell 632.
 - potassium deficiency, (61) N.H. 116; (63) N.J. 428.
 - potato and tobacco viruses, (66) Wash.Col. 749.
 - pruning and staking, (62) Mont. 227; (64) N.Y.Cornell 632.
 - removing apical bud, (62) Pa. 338.
 - soil moisture on availability of mineral nutrients, (70) 46.
- ethylene-treated, vitamins in, (61) Wis. 194; (63) 492.
- ethylene treatment, effect, (63) Mich. 41, 237, Ind. 531.
- fertility maintenance for, (61) Md. 622.
- fertilization, effect of different ratios, (69) Va.Truck 653.
- fertilizer experiments, (61) Ill. 37, Tenn. 140, Miss. 438, N.J. 734, Nebr. 833; (62) Ohio 41, Miss. 39, Miss. 138, Fla. 334, N.Y.State 431, Ark. 835; (63) Miss. 37, Miss. 41, R.I. 616; (64) Fla. 224, Ark. 438, Miss. 439, N.Y.State 441, Ga.Coastal Plain 630, Miss. 631, Okla. 738, Ill. 739; (65) Miss. 39, R.I. 534; (66) N.Y. State 535, Tex. 739; (67) Miss. 35,

Tomatoes—Continued.

- fertilizer experiments—continued.
- Ill. 36, Mo. 386, Tex. 674; (68) Miss. 43, Tenn. 182, Miss. 329, N.Y. State 617; (69) Ga.Coastal Plain 48; (70) Tex. 183; Ga.Coastal Plain 773.
- field seeding v. transplanting, (61) N.Mex. 228.
- Florida, grading, packing, and stowing, (69) Fla. 50.
- for canneries, cost and returns to growers, (67) Ohio 470.
- forcing experiments, (67) R.I. 244.
- fruit size and fruit shape, correlation, (66) 726.
- germination and growth, effect of pH, (69) 188.
- grading, value, (63) Ind. 531.
- greenhouse—
- Cladosporium leaf mold of, control, (67) 551.
 - culture, (67) Ohio 132.
 - effect of ammonium sulfate, (64) Ohio 634.
 - effect of carbon dioxide, (64) 35.
 - effect of soil moisture, (69) Ohio 49.
 - effect of sunshine, (62) 139.
 - fertilization, (61) R.I. 640; (68) Ill. 617; (69) R.I. 210; (70) Ill. 616.
 - freezing in transit, (70) U.S.D.A. 776.
 - inflorescence and fruiting habits, (67) N.Y.Cornell 676.
 - mechanical pollination, (61) 835.
 - organic supplements for, (68) R.I. 476.
 - production, (65) Wis. 40.
 - top-dressing, (63) Ohio 638.
 - variety tests, (64) Oreg. 339; (68) Mich. 198.
 - yield, effect of leaf pruning, (67) 249.
 - yield, effect of soil treatment, (68) Tenn. 191.
- grown under Vitaglass, (63) Wis. 40.
- growth—
- and fruiting, effect of ringing, (68) 46.
 - and fruiting, effect of temperature and nutrient deficiencies, (63) Ark. 616.
 - and fruiting, factors affecting, (66) Ark. 36.
 - and nutrition, (70) Ky. 182.
 - and yield, relation to salts in petioles, (68) Ky. 328.
 - effect of electricity, (69) 877.
 - effect of soil reaction, (66) Ky. 16.
 - in sand, (69) N.H. 364.
- handling qualities, effect of fertilizers, (68) Okla. 616.
- haploid plants in, (68) 747.
- home-canned, vitamin C in, (66) 795.
- hybridization experiments, (69) 521.

Tomatoes—Continued.

- improvement, (64) Ohio 634; (66) Ill. 228, Miss. 736; (67) Calif. 525; (69) Calif. 48; (70) Ill. 616.
- in storage, changes in pectic constituents, (70) 333.
- Indiana, marketing, (69) Ind. 48.
- inheritance of fruit size and shape, (67) Iowa 385.
- inheritance in, trisomic, (67) Calif. 512.
- inherited characters in, self-pruning habit, (68) 463.
- injury from chlorates, (64) 329.
- injury in commercial nursery, (63) 347.
- insect damage in southern California, (66) 760.
- insects affecting, (69) N.Mex. 232.
- intra-State competition in Florida, (66) Fla. 881.
- irradiation by ultra-violet light, effects, (65) Mich. 722.
- leaf pruning, (63) Ohio 638.
- locally grown, quality, (66) N.Y.Cornell 635.
- macrosporogenesis and development of macrogametophyte, (66) 623.
- manufacture and distribution, (61) Md. 383.
- Marglobe, pruning, topping, and staking, (70) 620.
- market diseases, identification, (67) U.S.D.A. 405.
- marketing by grade, (67) Ind. 613.
- metabolism, effect of sulfur deficiency, (68) 476.
- metabolism, effect of temperature, (70) 184.
- methods of watering, (67) 246.
- mulching, effects, Ohio, (63) 829, 830.
- narcotine in, (67) 649.
- new pink, for greenhouse use, (63) Ohio 39.
- nitrogen requirements, (64) Ohio 816.
- nitrogen sources, (67) 246.
- nutrition studies, (66) Ark. 531.
- paper mulch experiments, (61) 228; (62) N.Y.Cornell 737; (63) Tex. 445, Ohio 830; (64) Ky. 138, N.Y.Cornell 633; (65) Ohio 435, R. I. 534; (66) N.Y.Cornell 634; (67) 246; (68) 43; (70) 620.
- phosphorus deficiency, effect on metabolism, (66) 828.
- plant selection work, (62) Ill. 337.
- plat technic trials, (67) Tex. 673.
- pollinating, electrically operated device for, (66) Can. 828.
- pollination experiments, (61) N.Y.Cornell 140.
- potassium requirements, (61) 320; (63) N.J. 337.
- potted v. trowel-set, (67) Ohio 35.
- prices, relation to quality, (62) 576.
- Pritchard, new variety, (68) U.S.D.A. 198.

Tomatoes—Continued.

- processed, effect of heating on color pigment, (69) Ind. 48.
- production, economic study, (61) Md. 582.
- pruning, (66) Ark. 532.
- pruning and mulching experiments, (61) Ohio 440.
- pruning and staking, (62) N.Y.Cornell 737, Ark. 835, Can. 836.
- pruning and training, (70) Ark. 46.
- puffing, notes, Tex., (66) 44; (67) 673; (70) 192.
- qualitative and quantitative characters in, (68) 745.
- quality, relation to outer and inner wall region, (61) Ind. 441.
- reducase in, effect of length of day, (65) N.J. 829.
- resistant to Cladosporium leaf mold, (69) N.Y.Cornell 61.
- respiration, (62) 837; (65) 215.
- response to fertilizers, (67) 36.
- ripening, development of vitamin A during, (62) 93.
- ripening, effect of ethyl alcohol, (70) 776.
- rogues, in genetics and cytology, (67) 514.
- root-stem transition region, vascular anatomy, (69) 504.
- rotation experiments, N.Y.State, (64) 441; (68) 617.
- seed selection, (69) Ind. 48.
- selection studies, (63) Pa. 237; (67) Mo. 386.
- self-pollinating capacities of varieties, (61) Oreg. 35.
- shipments, (65) Fla. 481.
- shipments from Florida and competing areas, (65) Fla. 886.
- shipments to New York City, returns from, (65) V.I. 737.
- shipping tests, (62) Miss. 138.
- soil preparation and fertilizers for, (67) Mich. 37.
- spacing experiments, Tex., (62) 637; (67) 674.
- spoilage in transit, (68) U.S.D.A. 347.
- spray schedule for, (61) 753.
- spraying, detrimental effect of Bordeaux mixture, (68) Ohio 775.
- spraying, effect, (64) N.Y.State 447.
- staking and pruning, (62) N.Y.Cornell 737, Ark. 835, Can. 836.
- staking, effect, (63) Ohio 829, Ohio 830; (64) Ark. 439; (68) Ark. 616.
- statistical data, (69) R.I. 288.
- storage, acidity and color changes in, (65) 340.
- storage and ripening, effect of temperature, (66) U.S.D.A. 739.
- stored, pectin changes in, Iowa, (67) 385; (69) 48.
- strain tests, (62) Ill. 337; (67) Ohio 524.

Tomatoes—Continued.

- studies, (61) Ind. 337; (63) Tex. 444.
 style length, relation to fruitfulness, (68) Ark. 616.
 sulfur dust injury, (66) 147.
 tests, (69) V.I. 520.
 tetraploid, from different origins, (68) 747; (69) 785.
 time of sowing experiments, (66) N.Y. State 535.
 top-root ratio, studies, (61) 522.
 training tests, (68) Mont. 760.
 translocation of potassium in, (61) 339.
 treated, vitamin A in, (61) 495.
 tropically-grown, storage, (68) 477.
 under continuous light in Alaska, (70) 302, 600.
 value in nutritional anemia, (68) 281.
 variations in, hereditary radium-induced, (69) 508.
 varieties, (62) Pa. 339, N.Y. State 431; (63) Miss. 37, N.Dak. 829; (64) Tenn. 341, Miss. 631, S.C. 636.
 and culture in Genesee County, New York, (70) N.Y. Cornell 44.
 characteristics, (61) Ga. 137; (65) Tenn. 830.
 for Lower Rio Grande Valley, (66) Tex. 739.
 nomenclature, (61) Ohio 835.
 style length in, (66) Ark. 532.
 yields, (66) Miss. 736; (69) N.Mex. 210.
 variety and strain tests, (67) 246.
 variety, new winter setting, (63) Wis. 40.
 variety tests, (61) Miss. 438, N.Dak. 735, 834; (62) Miss. 39, U.S.D.A. 40, Miss. 138, N.Dak. 138, Tex. 636, Tex. 637; (63) R.I. 638; (64) Ky. 138, Tenn. 340, Miss. 439, Ga.Coastal Plain 630, West.  caeci-gallorum n.sp., description, (65) 73.
 podovis n.sp., notes, (61) 571.
- Trialeurodes vaporariorum, *see* Whitefly, greenhouse.
- Triaspis curculionis—
 notes, (61) Conn.State 360; (66) Del. 550.
 parasite of boll weevil, (62) U.S.D.A. 359.
- Triatoma—
 geniculata, notes, (67) 431.
 protracta, Trypanosoma cruzi from intestine, (69) 425.
- Tribolium—
 confusum, *see* Flour beetle, confused.
 ferrugineum, *see* Flour beetle, rust-red.
 navale in stored rice, (62) 542.
- Tribulosis ovis, notes, (63) 171.
- Tribulus genus, lethal factor in certain members, (70) 828.
- Tricalcium phosphate, availability, (68) W.Va. 734.
- Tricaproin ingestion, effect on rats, (63) 760.
- Trichina extracts injected into pigs, skin reactions, (64) 561.
- Trichinella—
 inspection, time required for, (70) 92.
 spiralis—
 encysted, effects of low temperatures, (69) 591.
- Trichinella—Continued.
 spiralis—continued.
 extracts, failure to immunize rats to trichinosis, (69) 267.
 human infection with, prevalence, (69) 267.
 in hogs, resistance to, (69) 267; (70) 682.
 in musculature of chicks, (70) 836.
 in rabbits, treatment with neutroflavine, (66) 376.
- Trichinosis—
 account, (61) U.S.D.A. 471.
 experimental, in chicks, (70) 836.
 in Dutch East Indies, (63) 480.
 in pigs, skin reactions in, (62) 563.
- Trichloroacetic acid, effect on nitrogen and phosphorus determinations, (67) 205.
- Trichlorethylene, anthelmintic value, (62) 877.
- Trichobaris trinotata, *see* Potato stalk borer.
- Trichoderma—
 in soil flora, (65) 320.
 sp., notes, (67) La. 268.
- Trichogramma—
 barathrae n.sp., biology, (61) 354.
 colonization in Louisiana, (69) 836.
 control of pests by, complications, (65) 856.
 control of pests, discussion of fad, (66) 652.
 erosicornis, control, (66) 756.
 evanescens—
 biology, (70) 66.
 experiments, (63) 849.
 notes, (62) 545; (64) 362.
 japonicum, introduction into Hawaii, (66) 448.
 liberations, evaluation, (64) 456.
 mass production, (70) 68.
 mass production, technic, (69) 234, 836.
 minutum—
 artificial rearing and colonization, (65) 458.
 avoiding destruction in sugarcane fields, (70) 217.
 behavior in field liberations, (67) 583.
 breeding, (61) 256; (63) 758.
 breeding and field colonization, (63) 462.
 breeding, importance of sex ratio in, (66) 558.
 breeding, technic, (69) 246, 548.
 colonization, (67) 156; (69) La. 80, 81; (70) 357.
 colonization, effect on sugarcane borer damage, (67) 57.
 control, (70) 213.
 distributing, (67) Conn.State 559.
 for control of orange tortrix, (65) Calif. 756.
 for control of sugarcane borer, (62) 252; (64) 361; (70) 506, 659.
 for control of velvetbean caterpillar, (70) 216.

Trichogramma—Continued.

- minutum—continued.
 life cycles, relation to temperature, (66) 558.
 life history and habits, (64) U.S.D.A. 365; (70) Conn.State 216.
 mass breeding in Barbados, (67) 154.
 mass liberations and colonizations, (68) 361.
 mass liberations, results, (67) 583.
 mass production, (62) 647; (63) Calif. 554.
 notes, (61) Ind. 353, 357, 798; (62) N.Y.State 449, S.C. 651, Del. 754; (63) 256, 257, 261, La. 351, 457, 461; (64) 158, N.Y.State 455, Wash.Col. 655, 749, Conn.State 849; (66) S.C. 54, Md. 55, Ill. 245, Va. 553, 653, Wash.Col. 757; (68) Conn.State 65, Fla. 67, Colo. 636, Ill. 637; (69) Mo. 79, 241, 242, U.S.D.A. 692; (70) Colo. 648.
 overwintering and refrigeration, (68) Conn.State 66.
 parasite of oriental peach moth, (63) Conn.State 159.
 parasitism by, percentage, (68) 794.
 races, (64) 550.
 rearing and distribution, (61) 256; (67) 443.
 refrigeration of, (66) 457.
 status in Barbados, (70) 357.
 successful shipments, (62) 241.
 sulfur a repellent to, (62) 653.
 temperature relations as basis for identification, (65) Calif. 361.
 usefulness, (62) 650.
 nanum, notes, (64) 247.
 notes, (69) 232, Conn.State 546.
 parasites in orchards, (67) 705.
 possible utilization for codling moth, (64) 157.
 pretiosa, notes, (70) Conn.State 216.
 production, developments in, (64) 463.
 species in North America, (63) 359.
 Trichogrammatid egg parasites, new, descriptions, (67) 443.
 Trichogrammatoidea nana, notes, (64) 460.
 Trichomonad disease of cattle and vaginal catarrh problem, (69) 430.
 Trichomonads, relation to abortion in cattle, (69) 712, 713.
 Trichomonas—
 bovis, cultivation, (70) 830.
 bovis, description, (69) 712.
 bovis, notes, (69) 713.
 diversa n.sp., role in disease of turkeys, (64) 565.
 infections in cattle, (70) 95.
 phasiani, new flagellate from ring-necked pheasant, (68) 536.

Trichomoniasis—

- in cattle, (68) 530.
 of upper digestive tract of fowls, (70) 240.
 Trichonema spp., effect of butylidene chloride on, (64) 562.
 Trichophyton faviform album—
 in calves, (61) 870.
 in cattle, (63) 771.
 Trichopoda pennipes, notes, Fla., (62) 351; (63) 652.
 Trichosporium tingens n.sp., notes, (62) 538.
 Trichostrongylosis in sheep, (61) 374; (70) 96.
 Trichostrongylus—
 australis n.sp., notes, (66) 867.
 axei in New York State, (69) 425.
 calcaratus, acquired resistance to, in rabbits, (68) 826.
 calcaratus in rabbits, fatal infections, (69) 267; (70) 830.
 capricola, notes, (64) 243.
 colubriformis in jack rabbits, (67) 749.
 dissimilis n.sp., notes, (66) 867.
 extenuatus, description, (61) 374.
 gallinarium, notes, (63) 573.
 hamatus, n.sp., description, (69) 590.
 pietersei n.sp. of sheep and goats, (68) 674.
 rugatus in mountain sheep, (63) 573.
 sp. in young sheep, effects, (70) 388.
 spp., free living stages, bionomics, (64) 771.
 spp. in fat sheep, (70) 834.
 spp., notes, (61) Oreg. 768; (69) 590.
 spp., pure infestations with, establishing, (70) 681.
 tenuis, notes, (68) 825.
 vitrinus, description, (61) 374.
 Trichothecium—
 roseum, relation to Cephalothecium roseum, (67) 275.
 spp., notes, (66) 342.
 Trichuriasis, treatment with hexylresorcinol pills, (68) 527.
 Trichuris—
 depressusculus, notes, (62) 266.
 ovis in a calf, (63) V.I. 172.
 ovis, notes, Oreg., (61) 768; (64) 243.
 proteins of, cutaneous tests with, (61) 174.
 Triethanolamine—
 emulsions, (65) 52.
 oleate as insecticide, contact angles, (68) N.H. 216.
 oleate for oil sprays, (62) 543.
 Trifidaphis phaseoli, notes, (69) 232.
 Trimeromicrus maculatus, notes, (69) 696.
 Trimethylamine, isolation from spores of Tilletia levis, (69) 165.
 Trimethylene glycol, bacteria producing, (67) 661.

- Trinity mixture—
 feeding value, (64) Iowa 865; (65) Iowa 163, Wyo. 166.
 v. other protein supplements for hogs, (67) Ohio 58.
- Trio mixture as supplements for pigs, (63) Ohio 61.
- Triomata coccotroctes n.g. and n.sp., description, (66) 158.
- Trionycha of Puerto Rico, (62) 548.
- Trionymus sacchari—
 biological control, (67) 53.
 biology, (68) 784.
 insect enemies, (66) 448.
 notes, (67) 562; (70) 63.
- Triozoa—
 alacris, notes, (65) 247.
 spp., notes, (67) 284.
 viridula, biology and distribution in Sweden, (62) 355.
- Triphenylmethyl derivative of vitamin C, (69) 773.
- Triphleps insidiosus, notes, (61) U.S.D.A. 157.
- Triplets—
 human, incidence, (64) 329.
 in relatively homozygous family, (62) 625.
- Triposporium stapeliae n.sp., notes, (70) 800.
- Tripsacum and corn crosses, studies, (67) Tex. 513; (68) 747.
- Trisodium—
 arsenite and arsenious acid, relative toxicity to house fly, (69) 244.
 phosphate, germicidal efficiency, (64) 883.
- Trissoleus euschisti, notes, (69) 689.
- Tristeza of bovines, (64) 381.
- Triticum—
 and Aegilops crosses, cytological studies, (67) 119.
 cross, resistant to stem rust, (64) 231.
 hybrids, chromosome behavior in, (62) 621.
 triple hybrid, cytogenetics, (68) 747.
- Tritoxa flexa, notes, (61) Iowa 353; (64) Iowa 852; (67) 705.
- Trochorrhopalus strangulatus, notes, (67) 562.
- Trogaspidia minor, notes, (67) 562.

 biology and natural enemies, (63) 853.
 bionomics and control, (69) 694.
 problem, aspects, (63) 871.
 survey of Zululand, (64) 771.
- Tuba root—
 botany, cultivation and chemistry, (61) 549.
 Malayan, rotenone content, (69) 75.

Tubercle bacilli—

avian—

and mammalian, variable pathogenicity, (64) 176.

in udder of cow, (63) 873.

infection of udder of a goat with, (66) 74.

life cycle, (68) 823.

longevity in soil, (63) N.Dak. 870.

bovine—

culture method, (62) 560; (65) 567; (69) 271.

growth on Long's synthetic medium, (64) 475.

infection in man, (62) 560.

carbohydrates produced by, (63) 772.

cultures, ammonium malate as source of nitrogen for, (65) 773.

excretion from udder, (67) 313.

filtrable form, (66) 866.

group, filtrability, (68) 247.

human and avian types, recovered from swine, (69) 718.

human and bovine types, use of rabbit for distinguishing, (68) 814.

in cow manure on pasture land, viability, (65) 377.

in eggs, (64) 265; (69) 271.

in mice on vitamin A-deficient diet, effect of carotene, (67) 778.

in milk, destruction, (68) N.Y.State 522.

in milk, effect of alternating electric current, (61) 471; (66) 174.

isolating for identification checked by animal inoculation, (70) 92.

life cycle phenomena and filtrability, (69) 711.

new medium for isolation, (69) 425.

precipitin tests with Anderson phosphate fractions, significance, (69) 271.

specific carbohydrate, (69) 487.

synthetic media, dextrose in, (65) 773.

types, (62) 560.

types in livestock sanitary control work, (69) 275.

types, pathogenicity, (61) 870.

variability, (66) 176; (67) 599.

virus, modification by vitamin A-rich diet, (70) 133.

Tubercle bacillus—

B. C. G., microbial dissociation, (69) 583, 584.

cells, toxicity of iodine for, (69) 425.

Tuberculariaceae, new genus in, on coconut, (68) 488.

Tuberculin—

and double intradermal test, (70) 826.

and mallein, studies, (70) U.S.D.A. 526.

avian, as diagnostic agent for Johne's disease, (61) 675.

avian, specificity of reactions, (67) 74.

avian, v. Johnin, as diagnostic agent for Johne's disease, (62) 260.

Tuberculin—Continued.

hypersensitiveness, (66) 867.

nature, (61) 569.

subcutaneous lesions inducing, (61) 569; (66) 174.

in horses affected with infectious anemia, nonspecific reactions, (70) 91.

old, and tuberculoprotein, comparative value, (70) 831.

possession and use, restrictions, (67) 450.

potency, relation to glycerine in veal broth, (69) 105.

sensitivity of fowls, (70) 103.

sensitization of cattle to, (63) 75.

sensitization of cattle to, by other than tubercle bacilli, (64) 475.

synthetic and standard, field trials, (70) 826.

test, application in Egypt, (70) 679.

test, intravenous, value, (62) 560.

test reactors, absence of lesions, (62) N.Y.State 469.

test reactors, no-lesion, examination, (61) Wis. 173.

test reactors, skin lesions in, (61) Utah 69; (70) 95.

test, reliability, (62) U.S.D.A. 377.

testing methods, (62) 76.

tests, intradermal, of cattle with necropsy findings, (67) 450.

Tuberculina maxima for control of white pine blister rust, (67) 48.

Tuberculosis—

accredited freedom from in North Carolina, (61) 70.

anatomy and pathogenesis, (70) 827.

avian—

and bovine, comparison of effects of viosterol, (68) 528.

control, (67) 167, 461, N.Dak. 739; (70) 248.

distribution of lesions in, (61) Kans. 172.

following artificial inoculation of eggs, (64) 565.

in cattle, (65) 269; (67) 450.

in cattle in Great Britain, (69) 109.

in dogs, histopathological study, (65) 570.

in farm animals and man, (61) Nebr. 869.

in mammals not swine, (64) Nebr. 474.

in muscovy ducks, (69) 115.

in Nebraska, (62) 474.

in normal and vaccinated rabbits, (66) 469.

in striped gophers, (65) 570.

in swine, (65) 567.

lung lesions in, (64) 77.

studies, (62) 269, Ill. 379.

transmission to man, (64) 265.

Tuberculosis—Continued.

- B. C. G.—
 experiments with guinea pigs, (70) 92.
 vaccine, effect on swine, (68) 380.
 bone, in children, vitamin D in, (67) 88.
 bone, treatment, (64) 496.
 bovine—
 and B. C. G. culture, (69) Calif. 104.
 blood picture, (65) 869.
 control in California, (70) 240.
 control work of 38 years, (63) 874.

 in Puerto Rico, (66) P.R. 272.
 organism, culture medium for, (65) 570.
 relation to acid-fast skin infections, (61) 270.
 sensitization, (63) N.Dak. 870.
 serological diagnosis, (65) 869; (69) 710; (70) 827.
 studies, (62) 377, 875; (63) Wyo. 172; (65) Wis. 470; (69) 275.
 subcutaneous, with no other demonstrable foci, (68) 816.
 transmissibility to humans, (61) 70.
 causative organism, recent research, (67) 455.
 chemotherapy, (67) 769.
 cockroach as carrier, (70) 528.
 control and research work, (61) 174.
 endocardial and myocardial, case of, (69) 580.
 eradication, (62) 555; (63) N.Dak. 875.
 calf segregation method, (67) 450.
 cooperative, (67) 455.
 cooperative, in United States, status, (65) 267.
 economic benefits, (62) U.S.D.A. 773.
 in Pennsylvania, (64) 71.
 in United States and in Canada, (68) 811.
 papers on, (61) 70.
 experimental—
 avian, pathology, (69) 720.
 use of iodine and iodine compounds, (69) 425.
 vaccination with heat-killed and formalinized tubercle bacilli, (69) 869.
 filtrable virus, (62) 76.
 human, caused by avian tubercle bacillus, (63) 370.
 human, types of tubercle bacilli in, (69) 425.

Tuberculosis—Continued.

- immunization—
 against, (62) 875.
 of calves against, (61) Calif. 369; (68) 526.
 with B. C. G. vaccine, (61) 271, 570; (62) 169, 470, Calif. 770; (63) Calif. 172, 773; (65) 571, Calif. 770; (67) 167, 316, Calif. 595; (68) 379; (69) 105, 272, 584, 588; (70) 678.
 in a cowbird, (62) 377.
 in animals, (66) 870; (68) 379.
 in birds, (65) Wyo. 176.
 in Canada raccoon, (68) 814.
 in domestic animals—
 papers on, (65) 267.
 pathological anatomy and pathogenesis, (69) 578.
 role of avian tubercle bacilli, (63) Nebr. 672.
 studies, (69) 578, 579, 580.
 in Fiji, (68) 812.
 in goats in India, (67) 745.
 in poultry, (63) Ill. 176; (64) 176; (65) Iowa 179; (68) 811; (70) U.S. D.A. 834.
 in poultry, immunization with B. C. G. vaccine, (63) 376.
 in rats, effect of vitamin A deficiency, (68) 706.
 in swine, (67) 596; (68) 811; (70) U.S.D.A. 834.
 due to avian type of tubercle bacillus, (69) 719.
 in Holland, immunization, (68) 526.
 types of tubercle bacilli, (63) 373; (66) 867.
 vaccination with B. C. G., (68) Calif. 674.
 intestinal, relation to vitamin C deficiency, (70) 881.
 no-lesion reactors in, (67) Wis. 740.
 of bovine origin in Great Britain, survey, (68) 379.
 of human origin in Amazon parrot, (70) 528.
 of reproductive organs of bovine, (65) 869.
 of sugar beets, notes, (68) 773.
 of turkeys, (67) 749.
 of udder in cows, (69) 588.
 papers on, (66) 466.
 prevention, newer aspects, (65) 267.
 pulmonary, effect of dietary measures, (67) 489.
 research problems, (62) 772.
 skin, of cattle, bacteriology, (67) 315, 455.
 skin, of cattle, relation to the disease in chickens, (65) Wyo. 176.
 skin, of swine, (69) 580.
 studies, (69) Nebr. 578; (70) U.S.D.A. 526.
 transmissibility, infectivity, and sensitivity, (61) 72.

- Tuberculous—**
 animals, immunological response, attempts to transfer, (68) 248.
 children, effect of increased vitamin B and minerals in diet, (70) 729.
 lesions, subcutaneous, (64) 72.
- Tuberculachnus viminalis**, notes, (66) Utah 156.
- Tularemia—**
 and pseudotuberculosis, similarity, (68) 669.
 and tick paralysis, paper on, (61) 656.
 contracted from a coyote, (62) 876.
 from a fox squirrel in Illinois, (65) 70.
 from ingestion of insufficiently cooked rabbit, (68) 669.
 from opossums, (62) 561.
 in birds, experimental, (69) 271.
 in British Columbia, (65) 267.
 in fur-bearing animals, (68) 669.
 in grouse, (69) 271.

 in tooth carp hybrids, (62) 824.
 of small animals, (70) 241.
 on feet of wild birds, (65) Mich. 475.
 peritoneal, in fowls, (66) Ala. 866.
 reducing substance in, (70) 881.
 reducing substances in, chemical test for, (70) 579.
 so-called, studies, (65) 870.
 spontaneous, in mice, origin, (65) 217.
 transmissible, of fowls, (69) 436.
 transplantation, genetic studies, (68) 745.
- Tuna fish oil**, comparison with cod-liver oil as to vitamin content, (65) 397.
- Tuna meal**, vitamins A and D in, (70) 277.
- Tuna oil** as source of vitamin D, (70) 283.
- Tung oil—**
 as anthelmintic, (65) 874.
 branches, *Diplodia* spp. affecting, (65) Fla. 439.
 culture, (66) Ga. 743.
 experiments, (62) Fla. 335.
 in Yangtze Valley, (64) 445.
 industry, development, (68) 51.
 tree, bacterial disease, (68) 350.
- trees—**
 culture experiments, (62) Tex. 636; (68) Miss. 329; (69) Fla. 209.
 fertilizer experiments, (65) Fla. 435; (68) Miss. 329; (69) Fla. 209.
 fruit bud development, (61) 645.
 propagation and culture, (67) Fla. 523.
 resistance to winter injury, (69) Ga. 209.
 studies, (64) Fla. 639.
 variation in, (68) Fla. 51.
 variety tests, (69) Ga.Coastal Plain 48.
 winter injury, (66) Tex. 34.
 yield, (63) Fla. 635; (64) Ala. 337.
 varieties, (63) Tex. 445.
- Turf—**
 closely cut, botanical composition, effect of forms of nitrogen, (68) 610.
 closely cut, effect of ammonium and ferrous sulfates, (68) 35.

Turf—Continued.

- effect of grassland management, (70) 38, 765.
- grasses, experiments, (63) N.J. 225.
- management, (65) 628.
- production, fertility factor in, (67) 235.
- protecting from injury by beetle larvae, (68) U.S.D.A. 72.
- studies, (64) Kans. 828; (67) N.J. 517.

Turkey—

- breeds, color factors in crosses, revised terminology, (65) 328.
- disease in Maryland resembling fowl cholera, (67) 605.

eggs—

- artificial incubation, (69) Idaho 839.
- fertility following mating, (68) Okla. 654.
- hatchability, effect of age and holding temperature, (69) Kans. 249, 847.
- hatching, (67) Nebr. 447.
- incubation, (68) Okla. 654; (69) Kans. 249.
- loss in weight during incubation, (69) Nebr. 562.
- weight loss, variations and growth rates of poults, (67) Nebr. 589.
- embryo, development, (69) Kans. 249; (70) Ky. 219.
- flocks in Maryland, economic study, (70) Md. 852.
- hens, extent and prevention of injury during breeding season, (68) Okla. 654.
- industry, need of accurate feeding standards, (70) Ill. 661.
- poults, protein requirements, (65) Calif. 764.
- poults vaccinated for fowl pox, new sales idea, (68) 819.
- rations, effect of fiber in, (68) Okla. 654.

Turkeys—

- affected with enterohepatitis, fertility and hatchability of eggs, (69) 437.
- breeding and rearing in confinement, (68) Okla. 654.
- breeding, feeding, and management, (66) 462.
- breeding for high fecundity, (65) Calif. 764.
- Bronze and White Holland, growth rate, (64) 554.
- Bronze, blood analyses, (69) 847.
- Bronze, raising, (67) N.Dak. 722.
- cecal pouches, pathology and physiology, (63) Mo. 481.
- chromosome studies, (67) 24.
- cost of growing and managing, (62) 553.
- cost of wintering, (63) N.Dak. 861.
- crooked breast bones in, (65) Wyo. 168, Nev. 662; (70) Wyo. 816.
- dressing and packing for market, (68) U.S.D.A. 517.

Turkeys—Continued.

- dressing shrinkage, (63) N.Dak. 861.
- early, by stimulated egg production, (70) 81.
- effect of sex on utilization of feed, (70) 668.
- effect of varying amount of protein in rations, (67) Mich. 64.
- Eimeria spp. affecting, (62) 267; (65) 876.
- electric brooding of, (63) Oreg. 585.
- experiments with, (61) Ind. 366.
- feed consumption and growth rate, (65) Ind. 167.
- feed cost and growth rate, (63) N.Dak. 861.
- feeding, (63) Wyo. 166.
- feeding standards, (68) Ill. 654.
- in confinement, (64) 765.
- in Montana, (62) 164.
- inflammation of sinuses and respiratory disturbances, (69) Calif. 104.
- kamala as teniacide for, (70) 103.
- Leucocytozoon smithi infection, transmission, (68) 825.
- management, (66) Idaho 260; (69) Nebr. 562.
- Pasteurella avicida in, (61) Idaho 874.
- pedigree breeding, (69) Calif. 88.
- poisoning by eucalyptus wood ashes, (69) Calif. 104.
- production, marketing, and diseases, (70) 669.
- protein requirements, (67) Ind. 589.
- raising, (61) 669, Nebr. 862; (63) Nebr. 665; (64) Kans. 869; (65) Nebr. 862; (68) Pa. 511, Mont. 796; (69) Ind. 89, Kans. 249, Nebr. 847.
- feed consumption and costs, (63) Pa. 471.
- in confinement, (63) Ill. 566; (67) Okla. 303; (69) Hawaii 698.
- in France, (64) 766.
- in semi-confinement, (69) N.Mex. 705.
- in Texas, (65) 561.
- in Wisconsin, (62) 554.
- supplemental value of green feeds and protein mash, (69) Oreg. 412.
- treatise, (64) 66; (68) 661; (69) 704.
- record of merit, (64) 766.
- staphylococcal arthritis in, (69) 115.
- susceptibility to Brucella disease, (63) 775; (64) 77.
- vaccination with fowl pox virus, (64) Oreg. 883.
- young, feeding, (63) Idaho 562.
- young, milk in feed for, (66) 263.

Turnip—

- aphid, control, (62) Tex. 652; (63) Tex. 456; (64) 854; (67) Tex. 705.
- aphid infestation, relation to wind distribution of winged forms, (68) 217.
- aphid, life history, habits, and control, (65) Va.Truck 156.

Turnip—Continued.

- aphid, notes, (66) Tex. 51.
 bacterial spot, (67) 548.
 beetle, red, paper on, (62) 649.
 dry rot, cause and control, (62) 148.
 dry rot, notes, (66) 342.
 dry rot, symptoms and development, (70) 349.
 gray leaf spot, notes, (66) 147.
 greens—
 canned, pellagra-preventive value, (67) 488.
 effect on nutritional anemia, (64) Miss. 695; (66) Miss. 793, Ga. 794.
 iron in, (67) U.S.D.A. 86.
 value in nutritional anemia, (68) 281.
 vitamin C in, Ga., (61) 193; (63) 192.
 vitamins in, (66) Ga. 196; (67) 88.
 juice, source of vitamin C for infant feeding, (61) 193.
 Rhizoctonia rot in stored crop, (61) 49.
 root aphid, control, Tex., (62) 652; (66) 51.
 root rots, notes, (70) N.Y.Cornell 791.
 webworm, control, (66) Ala. 846.
 weevil, broccoli seed pest, (70) 207.

Turnips—

- breeding, (63) 224.
 California, composition and time for cooking, (67) 770.
Catoptes spp. affecting, (66) 558.
 change in ash content during storage and cooking, (61) Kans. 190.
 color inheritance, relation to identification of stocks, (68) 179.
 culture, (62) P.R. 737; (64) Alaska 737.
 effect of preceding crop, (65) R.I. 527.
 effect on quality of milk and butter, (61) Oreg. 67.
 fertilizer experiments, (63) Ill. 534.
 for livestock, culture and harvesting, (69) U.S.D.A. 354.
 internal breakdown, (69) Mass. 663.
 maggot injury, (65) Me. 749.
 preparation for market, (61) U.S.D.A. 834.
 varieties, (66) Mich. 134.
 varieties for interior Alaska, (70) Alaska 172.
 varieties, new, (64) Oreg. 334.
 variety tests, (64) Oreg. 334, Ala. 337; (69) Alaska 36, Oreg. 354.
 vitamin A in, (70) Tex. 131.
 vitamin B complex in, (67) 343.

Turpentine—

- and linseed oil, anthelmintic value, (62) 877.
 beetle, red, in Golden Gate Park, control, (69) 560.
 beetle, red, method of control, (69) 836.
 borer, control, (68) U.S.D.A. 72.

Turpentine—Continued.

- gum spirits of, fractionation, (67) U.S.D.A. 9.
 sulfur and chlorine in, determination, (66) 809.
 testing, (63) U.S.D.A. 13.

Turpentine—

- French system v. American, (65) 343.
 operations, lower chipping in, U.S.D.A., (66) 337, 744.
 practices in southern pine region, (64) U.S.D.A. 144.

Tuskegee Institute, notes, (65) 497.

Tussock moth, fir, life history and habits, (68) 642.

Twig girdler—

- notes, Fla., (67) 559; (69) 231.
 studies, Miss., (62) 53, 152.

Twin and triplet birth ratios, (63) 221.

Twinning—

- diagnosis of type, (62) 422.
 relation to delayed implantation in mammals, (65) 218.

Twins—

- and double monsters, amount of external mirror imagery, (62) 824.
 conjoined, differences, (67) 232.
 finger prints, comparison, (65) 220.
 from hereditary point of view, (61) 518.
 human, incidence, (64) 329.
 human, relation to latitude, (65) 725.
 identical, mental and physical traits, (62) 517.
 identical, reared apart, differences in, (68) 747.
 in cattle, morphological similarity, comparison with full and half sisters, (70) 32.
 in Jersey cattle, (63) 219.
 production in rodents, (62) 517.
 production, inheritance, (65) Wis. 425.

Tylenchinema—

- oscinella*, life history and effect on host, (65) 360.
oscinellae, nematode parasite of frit fly, (67) 292.

Tylenchorhynchus spp., notes, (69) 228.

Tylenchus—

- aptini* n.sp., new nematode parasite, (68) 75.
contortus laricis n.sp., description, (62) 547.
contortus typographi, description, (62) 547.
devastatrix v. *T. dipsaci*, notes, (66) 844.
devastatrix, varietal resistance of rye to, (64) 146.
dipsaci—
 effect of vapor heat treatment of bulbs, (69) 687.
 in soil, barley as detector crop, (69) 811.
 life history, (68) 495.

Tylenchus—Continued.

dipsacil—continued.

notes, (62) West.Wash. 59, 145;
(65) 542; (68) Oreg. 213; (69)
69.

on onions, (69) N.Y.Cornell 61.
on potato, (64) 149.

v. T. devastatrix, notes, (66) 844.

dispar cinerei n.sp., description, (62)
547.

musicola from diseased banana roots,
(67) 277.

pratensis, notes, (66) 643.

scandens, notes, (69) 526.

similis, notes, (63) La. 545.

similis on sugarcane, (63) 48.

sp., control, (63) 250.

sp., notes, (69) 228.

Tylocladia fragariae, see Strawberry crown
borer.

Tyloses in sections of heartwood, micro-
chemical studies, (70) 633.

Tympanitis, infectious, in young rabbits,
(68) 97.

Typha insects and parasites, (64) 544.

Typhlocyba—

australis in New South Wales, (63)
551.

pomaria, see Apple leafhopper, white.
rosae, see Rose leafhopper.

solani, transmission experiments with
virus diseases, (61) 651.

sp., introduction and distribution,
(61) 249.

xanthippe, notes, (61) Ohio 450.

Typhula—

elegantula, synonymy, (66) 644.

graminum—

notes, (61) Idaho 839.

pathogenicity, (67) 403.

studies, (66) 643.

Typhus—

canine, possible causative bacillus, (61)
273.

endemic, transmission in southeastern
Atlantic States, (63) 255.

exudative, in Psittaci, (64) 777.

fever—

endemic, of United States, (68)
224, 528.

endemic, rat flea as vector, (66)
850, 852; (67) 438, 577; (70)
67.

endemic, transmission, (67) 282,
438, 722; (68) 814.

experimental transmission, (66)
761; (69) 582.

in United States, summary, (70)
527.

infection and immunity, (70) 527.
Manchurian, hosts and dissemina-
tors, (68) 634.

Mexican, multiplication of virus in
fleas, (66) 850.

Mexican, rats as carriers, (66) 469.
Mexican, transmission of virus by
Polyplax spinulosus, (66) 850.

Typhus—Continued.

fever—continued.

relation to rat mites, (70) U.S.D.A.
499.

South African, and tick bite fever,
cross-immunity, (68) 248.

transmission by fleas, (65) 657.

virus from rat fleas, (66) 760.

virus in feces of infected fleas, (67)
438.

virus, multiplication in oriental rat
flea, (67) 577.

Typhus-like fevers conveyed by ticks, (63)
152.

Typhus-Rocky Mountain spotted fever group,
(65) 59.

Tyrannidae of New Jersey, (67) N.J. 49.

Tyria jacobaeae for control of ragwort,
(62) 247.

Tyroglyphus lintneri—

biology and control, (66) Pa. 756.

notes, (70) Ill. 648.

Tyrophagus putrescentiae—

infesting fleas, (70) 69.

notes, (67) 150.

Tyrosinase—

iron in, (69) 486.

mode of action, (65) 311.

production by Rhizobium and related
organisms, (70) 165.

Tyrosine—

in cocoons, (69) 4.

in glutelins, (69) 165.

in proteins, determination, (61) 807.

splitting off from casein digested with
papain-cyanohydrin, (65) 711.

Tyrosyl-tyrosine, titration constants, (69) 5.

Uba cane as forage crop, (62) P.R. 731.

Udder—

abnormality inherited in cattle, (68) 316.
infections, Idaho, (61) 873; (63) 566;
(68) 375.

papers on, (67) 313.

relation to human health, (64) 70.

relation to milk-borne epidemics,
(64) N.Y.State 476.

inflammation, vaccination against, (68)
529.

streptococcus infections, (65) 259; (68)
93.

relation to Brucella abortus, (70)
675.

vaccination for, (65) Mich. 175.

Udders—

amputated, characteristics, (68) 520.

amputated, quantity and composition
of milk from, (68) 371.

bacterial flora before and after death
of cow, (65) 378.

bacteriology, (69) 855.

bacteriology and pathology, (65) Mich.
70.

individuality of four quarters, (66) Mo.
365.

of cows, histopathology and bacteri-
ology, (65) Mich. 771.

relation to milk production, (68) 520.

- Venothron, insecticidal value, (64) Wash. Col. 655.
 Ufens new species, description, (67) 443.
 Ufens osborni, notes, (69) P.R. 825.
 Ulcer diet, (68) 126.
 Ultracentrifuge, field of research, (68) 437.
 Ultrasonic radiation, effect on indicators, (68) 154.
 Ultra-violet—
 absorption spectra—
 of amino acids and serum proteins, (61) 306.
 of liver oils, (65) 804.
 of purines, (64) 502.
 and cathode rays for including antirachitic activity in ergosterol, comparison, (61) 495.
 and infra-red radiation, sources, (67) 90.
 component of sunlight, daily measurement, (69) 620.
 component of sunlight of Portland, Oregon, (62) 592.
 irradiation—
 and mutations, (62) 512.
 effect on Ascomycetes, Sphaeropsidales, and Hyphomycetes, (68) 314.
 effect on baked products, (70) 881.
 effect on calcium metabolism of women, (65) Mich. 794.
 effect on dermatitis preventing vitamin, (69) Mo. 152.
 effect on embryo development of eggs, (68) Conn.Storrs 803.
 effect on frequency of colds, (61) 795, 796; (65) 897.
 effect on hens fed oyster shells, (66) 262.
 effect on magnesium in rats, (63) 694.
 effect on milk, (66) 393.
 effect on milk production, (67) 175.
 effect on nutritive value of hardened oils, (64) 592.
 effect on perithelial production of *Glomerella cingulata*, (68) 313.
 effect on plant metabolism, (68) Mich. 340.
 effect on plants, (68) 312.
 effect on soybeans and tomatoes, (65) Mich. 722.
 excessive, effect on nutrition and endocrine glands, (65) 695.
 for mastitis, (66) Idaho 269.
 for pigs, (67) La. 295.
 for rickets, (61) 896; (65) 193.
 for rickets in growing chicks, (65) 258.
 for rickets, minimal amount, (65) 296.
 fungicidal action, (61) 50.
 heavy, effect on pigs, (66) Ga. 765.
 of bees, physiological effects, (70) 367.
 of cows' udders and flanks, effect, (66) Wash.Col. 776.
- Ultra-violet—Continued.
 irradiation—continued.
 of farm stock and foodstuff, development, (69) 879.
 of foods, effect on antirachitic property, (64) 395.
 of foods, patent grants dealing with, (67) 491.
 of ice cream, value, (61) N.J. 767.
 of milk, (70) 136.
 of plants, effect on chlorophyll formation, (67) 20.
 of poultry, (69) 256, 287.
 of preschool children, effect, (67) 780.
 of school children, (62) 593.
 of soybean oil, antirachitic value, (64) 196.
 v. cod-liver oil for rickets prevention, (61) 294.
- light—
 absorption by lacquer films, (66) 675.
 and cod-liver oil, effect on growing organism, (69) 703.
 and swelling of agar-agar, (61) 120.
 and vitamin D in nutrition, treatise, (63) 294.
 biologically effective, electric lights for, (70) 402.
- light, effect on—
 Bacillus radicolica, (62) Mo. 17.
 blood formation in pigs, (61) 861.
 calcium and phosphorus metabolism, (63) 864.
 children, (63) 496.
 dermatitis-preventing vitamin, (70) Mo. 277.
 fermentation efficiency of yeast, (70) 156.
 germination and growth of *Ribes*, (64) 540.
 growth and respiration of pea seeds, (67) 387.
 growth in chicks, (61) 668.
 intestinal flora of rachitic rats, (69) 473.
 nutrition, (68) 567.
 oils, (63) 203.
 pigs, (61) 257, 666.
 plants, (61) 834.
 poultry, (64) N.Y.Cornell 666, 764; (65) 560.
 poultry, Mazda CX lamp as source, (66) Va. 566.
 soil bacteria, (69) 343.
 viability of foot-and-mouth disease virus, (61) 568.
 vitamin A in butter, Ind., (67) 631; (69) 150.
- light—
 exposure of soil, effect on plant growth, (66) 117.
 fluorescence reaction in *Lolium* spp., (69) 345.
 for prevention of molds on mechanically sliced bread, (68) 275.

Ultra-violet—Continued.

light—continued.

in California summer sunshine, effect on rickets, (65) 695.

ossifying power, (62) 396.

penetration through fabrics, (61) 698.

penetration through tracing cloth, (61) 391.

radiated by carbon arc lamps v. quartz mercury lamps, (65) Wis. 462.

transmission through window glass, (69) 845.

light transmitting glass—

antirachitic efficiency for winter sunlight of Chicago, (67) 490.

effect on foxglove, (61) 628; (64) 22.

experiments, (67) 386.

for vegetables in coldframes, (68) 192.

in windows, use, (61) 94.

solarization, (69) 148.

types, (61) 795.

light, use in agricultural production, (69) Idaho 871.

light, value against mastitis, (69) 108.

light wave lengths, effectiveness in curing rickets, (61) 865.

radiation—

effect on seed germination and early growth, (69) 506.

effect on seed plants, (69) 782.

for rickets, quantity relation to area of skin exposed, (67) 636; (69) 314.

injurious effects on plants, (67) 386.

measuring, zinc sulfide method, (62) 592.

solar, actinic measurement, (61) 697.

solar, data, (62) 479.

solar, in Puerto Rico, intensity, (66) 493; (69) 474.

sources and characteristics, (62) 592.

spectrum, distribution of stimulative efficiency for bees, (66) 353.

Uncinaria stenocephala—

anatomy, (68) 812.

notes, (70) 537.

Uncinula necator, notes, (65) 345.

Underclothing, infants', fabrics used in, (63) 298.

Underdrainage principles, treatise, (64) 270.

Undulant fever—

an occupational disease, (61) 175.

blood samples for Brucella abortus, (63) Conn.Storrs 169.

cases in Poland, (61) 372.

diagnosis, (65) 571, 871.

epidemic, (69) 270.

epidemic in Georgia, (64) 175.

experimental infection, (62) 668.

Undulant fever—Continued.

Huddleson slide test v. macroscopic tube test, (66) 871.

Huddleson slide test v. two tube test, (69) 584.

immunity, relation to phagocytosis of Brucella, (68) 380.

in man, (61) 268, 471.

in man, relation to livestock sanitation, (61) 70.

Venturi—

- flume installation in Fort Lyon irrigation canal, (64) 779.
- flume, water measurements, (63) Colo. 580.
- meters, installation in irrigation district, (64) 886.

Venturia—

- chlorospora on willow, (67) 703.
- inaequalis—
 - ascigerous stage, studies, (66) 343.
 - ascospore discharge, relation to environment, (69) 377.
 - in Maryland, discharge of ascospores, (67) 275.
 - monoclonial cultures, variability, (70) 800.
 - notes, (69) 820.
 - perithecia development, (65) 445.
 - perithecia production, effect of fungus extract, (61) 533.

pyrina—

- control, (61) 541.
- in Western Australia, (67) 413.
- notes, (62) 149; (65) 345; (70) 199.
- spraying tests, (67) 414.

Verbena bud moth in iris seed pods, (63) 52.

Vermicularia and Colletotrichum, identity, (65) 535.

Vermicularia capsici, notes, Ga., (63) 841; (65) 142; (66) 744.

Vermifuges for poultry, Ark., (66) 576; (68) 677.

Vermont—

- Commission on Country Life, (62) 885.

Station—

- notes, (61) 200; (65) 499; (70) 734.
- publications, classified list, (63) 797.
- report, (61) 96; (62) 399; (65) 598; (66) 695; (68) 425; (70) 287.

- University, notes, (61) 200; (64) 699; (65) 499; (67) 784; (68) 572; (70) 432.

Vernalization or pretreatment of seeds, (70) 166.

Veronica clone, effect of magnesium salts on fertility, (66) 127.

Verruga peruviana, transmission by Phlebotomus, (61) 55.

Verticillium—

alboatrum—

- effect of pH of medium, (61) N.J. 743.
- notes, (61) Mass. 840; (64) Ark. 446, West.Wash. 645; (66) Miss. 745; (67) 547.
- on cotton, description, (67) U.S.D.A. 44.

dahliae, notes, (64) 51; (65) 644; (70) 640.

foexii n.sp., description, (63) 345.

hadromycosis, nature and cross inoculations, (65) Calif. 147.

on shade trees, (68) 62.

sp., notes, (64) 848; (65) 644; (66) 342; (68) 769.

tubercularioides on Citrus malta, (67) 46.

wilt of eggplant, tomato, and potato, (69) Wis. 810.

wilt of raspberries, studies, (64) Oreg. 346.

wilt of tomatoes, (63) 347; (64) Ohio 643.

Vespa—

crabro germana, increase in Maryland and other States, (65) 59.

maculata, nesting habits, (63) 359.

maculata, population of nest, (67) 581.

Vespinae, tentative synopsis, (68) 74.

Vespula maculata, *see* Hornet, bald-faced.

Vetch—

and oat hay, cost of production, (61) Oreg. 685.

and peas sown with Kanota oats for hay, (67) Calif. 516.

and rye combinations for grain hay, (65) Idaho 222.

and wheat, feeding value, (65) Idaho 222.

as cover crop, (66) Ark. 533; (70) S.C. 173.

as cover crop in pecan orchards, (62) Fla. 335.

as green manure, effect, (63) 620.

as green manure for cotton, (65) Ga. 123.

as tobacco cover crop, (65) Conn.State 335.

as winter cover crop, (66) W.Va. 528.

as winter cover crop for corn, (70) Va. 764.

Ascochyta affecting, (65) Ala. 437.

bird, analyses, (69) Alaska 36.

breeding, (67) Calif. 516.

calcarata, for soil improvement, (65) Calif. 727.

composition, effect of fertilizers, (68) S.C. 734.

culture experiments, (64) Ga.Coastal Plain 623; (66) Ga.Coastal Plain 626; (68) Okla. 609; (69) Ga. Coastal Plain 37; (70) Ga.Coastal Plain 762.

Vetch—Continued.

- cutting with binder or mower, (69) Alaska 36.
 effect of soil acidity, (63) N.J. 337.
 fertilizer experiments, (69) Fla. 199, Ga. 199.
 flowering, poisonous to livestock, (65) Wyo. 177.
 for hay, tests, (69) Alaska 36.
 green manure, decomposition, relation to surrounding soil, (67) 112.
 hairy, as cover crop, (62) S.C. 33.
 hairy, legumes for winter use, (63) Fla. 636.
 hairy, new disease on, (65) Ala. 438.
 hairy, value, (61) N.C. 725.
 hairy, with oats, yields, (65) Calif. 727.
 in rotation, merits, (61) Miss. 433.
 leaf spot, notes, (66) 147.
 monantha, characteristics and value, (65) U.S.D.A. 37.
 mosaic tissue, intracellular bodies in, (61) 843.
 new Botrytis in, (67) 410.
 poisonous to livestock, (70) Wyo. 829.
 production operations and costs, (70) Alaska Col. 321.
 production tests, (68) Alaska Col. 182.
 seed, dormancy in, causes, (61) N.Y. Cornell 132.
 seed studies, (70) U.S.D.A. 464.
 seeding experiments, (62) West.Wash. 518, Ga.Coastal Plain 729.
 seeds, hard, germination, (62) 135.
 sensitive joint, as forage crop, (65) N.C. 158.
 timber milk, effect on sheep, (67) Wyo. 70.
 value in rotations, (63) N.Y.Cornell 34.
 varieties, blooming date, (65) Ala. 429.
 varieties for interior Alaska, (70) Alaska 172.
 variety tests, (62) Tex. 627, Ga.Coastal Plain 728; (63) Tex. 435; (64) Oreg. 334, Ga.Coastal Plain 622, Alaska 731; (65) Miss. 126, Mass. 330; (66) Tex. 27, Ga.Coastal Plain 626; (67) Mass. 378; (68) Miss. 319; (69) Ga.Coastal Plain 37, Oreg. 354, Mass. 643; (70) Alaska Col. 321, Ga.Coastal Plain 762.
 vitamin C in, during germination, (61) 295.
 Vetches, poisonous, (67) Wyo. 738.

 report, (62) 467, 558.
 service in Cameroon, (63) 872.
 surgery, Dollar's, treatise, (66) 369.
 Vibrio—
 foetus, cause of abortion in South Africa, (67) 70.
 foetus ovis in rams, (66) 867, 873.
 jejuni n.sp., proposed name, (65) 673.
 septicus, notes, (67) 455.
 Vibrion septique and Bacillus chauvaei, bivalent vaccine against, (67) 70.
 Vibrios associated with intestinal disorders of cattle, (65) 673.
 Vicia—
 faba, inheritance in, (66) 24.
 faba, radiosensitivity, (65) 26.
 interspecific hybrids, (68) 748.
 Vigantol, use of term, (63) 297.
 Vigna—
 catjang as cover crop for palms, (61) 529.
 hosei, insect pests, (62) 450.
 oligosperma, disease of, (63) 742.
 Vigor in soybeans, relation to inhibition of pubescence, (63) 817.
 Vigor, inheritance in poultry, (64) 764.
 Village—
 and family in India, (69) 302.
 and surrounding territory, sociology, (65) N.Y.Cornell 785.
 community, life and activity, (68) 558.
 in dairy farming section of southern New York, sociological study, (63) N.Y.Cornell 589.
 service agencies of New York, (62) N.Y. Cornell 683.

Villages—

American agricultural, (70) 556.
and farmers, cooperation in local government, (68) 548.

Vim Oat Feed, digestibility, (70) 370.

Vine weevil, black—

biology and control, (68) U.S.D.A. 359.
control, (64) 855.
in soil of perennial beds, (65) Conn. State 451.
injury to Primulas, (63) 354.
on Japanese yew, (69) 548.
on strawberries, (66) N.Y.State 552.
on Taxus and nursery plants, (68) 793.
studies, (63) 854; (65) Calif. 53; (68) N.Y.State 637; (70) N.Y.State 803.

Vinegar—

analyses, Mich., (61) 498; (64) 299; (65) 198; (68) 288.
flies, carriers of yeast and bacteria to fruits, (62) Calif. 744.
for control of coccidiosis in fowls, (70) 100.
making from citrus and blackberries, (67) Fla. 620.
manufacture, treatise, (64) 314.

Vines—

climbing, of South Dakota, (67) S.Dak. 533.
injured by frost, physiological derangements, (67) 117.
water consumption under irrigation, (61) Calif. 378.

Vineyard—

insects, control, (62) 540.
posts, steel and wood, comparison, (64) Ark. 479.

Vineyards—

bearing, cultural methods in, (63) Mich. 140.
young, planting and care, (61) Mich. 739.

Viola canina, cytologically irregular species, theory, (66) 726.

Violet—

midge in southern Italy, (62) 154.
root disease, notes, (69) 526.
root rot in Texas, (67) Tex. 556; (69) U.S.D.A. and Tex. 528.
species hybrids, chromosome relations, (68) 746.

Violets, North American, studies, (65) Vt. 641.

Viosterol—

and cod-liver oil, comparison, (63) 794; (66) 297.
and phosphate ion, comparison for antirachitic value, (69) 471.
as source of vitamin D for calves, (68) Mich. 805.
effect on avian and bovine tuberculosis, (68) 528.
effect on serum calcium of parathyroid-ectomized rats, (64) 593.
excessive doses, effects, (64) 396, 397.
inadequate amounts, effect on healing of rickets, (65) 893.

Viosterol—Continued.

intraperitoneal administration to mice, (70) 884.
massive doses, potency in seasonal hay fever and related conditions, (70) 284.
production, (65) 806.
prophylactic and therapeutic dosage, (64) 395.
therapeutics, newer aspects, (64) 396.
toxicity, relation to calcium and phosphorus in diet, (64) 592.
use of term, (62) 590; (63) 296.

Virgin Islands—

scientific survey, (67) 573.
Station, notes, (64) 798; (65) 200.
Station, report, (62) 299; (63) 197; (65) 797; (67) 638; (69) 621.

Virginia—

College, notes, (62) 600; (64) 500; (65) 700; (69) 480.
economic and civic, treatise, (70) 861.
Polytechnic Institute, notes, (65) 499; (70) 288.
Station, notes, (62) 600, 799; (63) 900; (64) 500; (65) 700; (66) 397; (68) 284; (69) 480, 912; (70) 895.
Station, report, (61) 797; (66) 599.
statistical study, (62) 582.
Truck Station, notes, (63) 99; (64) 300; (66) 98, 397; (67) 192; (70) 734.

Viroses, classification, (65) 757.

Viruses—

A of potatoes, insect transmission, (70) 196.
disease, new, of fowls in Egypt, (61) 572.
diseases observed by Allison V. Armour expedition, (65) 645.
diseases, studies, (67) 537; (70) 193.
diseases, transmission studies, (63) Ind. 541.
filtrable, and Rickettsia diseases, (61) 269, 568, 871; (62) 169, 467.
fixe, experiments, (63) 771; (66) 867.
of diseased plants, preparation, (70) Mo. 192.
transmission by peach aphid, (61) 549.

Viruses—

filtrable, in vitro cultivation, (69) 865.
filtrable, lecture on, (61) 741.
physicochemical studies, (67) Ind. 539.
protein-free suspensions, (66) 868.
ultramicroscopic, infecting animals and plants, (61) 469; (63) 241.

Viscogen, action on milk and cream, (63) 869.

Viscolizer, operation, ammeter and pressure gauge comparisons, S.Dak., (67) 79; (68) 806.

Viscosimeter—

torsion pendulum, viscosity determined by, (62) 871.
value in commercial flour mill laboratory, (62) 710.

- Viscosity index, charts and lubricating problems, (70) 400.
- Viscum orientale, studies, (68) 634.
- Visibility maps constructed with slide rule, (68) 766.
- Vitaglass—
 clinical value of sunlight through, (62) 593.
 composition of plants grown under, (63) Wis. 40.
 effect on growth of melons, (64) Can. 538.
 efficacy in rickets prevention, (61) 94.
 plant development under, (66) 21.
 sunlight through, effect on resistance of rachitic rats, (64) 597.
- Vitality, relation to underweight and overweight, (62) 290.
- Vitamin A—
 absence from carotene, (64) 393.
 absorption—
 and retention in young children, (65) 295.
 effect of use of mineral oil, (65) 793.
 spectrum, (62) 113; (63) 708.
 spectrum at low temperatures, (69) 772.
 acceleration of lipase activity by, (62) 587.
 action of lipochromes, (61) 793.
 activity in fruits, effect of light, (70) 279.
 activity of butter from Ayrshire and Guernsey breeds, (70) 237.
 activity of carotene, effect of dietary modifications, (63) 92.
 adsorption on silica gel, (64) Pa. 112.
 and antimony chloride reaction, (67) 501.
 and carotene—
 distribution in body of rat, (66) 592.
 in yellow corn, (69) 898.
 relation, (62) 492, 587; (63) 8, 393, 791, 792; (64) 96, 293, 393, 503, 588, 801; (65) Wis. 491, 612, 804; (67) 200, 482, 501, 630, 646; (69) 151, 467.
 relative velocities of photochemical reactions, (70) 152.
 and carotenoids, (69) 150.
 and fats, spectrographic data, (65) 805.
 and growth-promoting action of egg yolk, (69) 466.
 and liver oils, spectrographic data, (65) 804.
 and oxidation of fats and oils, (61) 291.
 and streptococcal antitoxic immunity, (63) 792.
 and vitamin D, differentiation, (64) 791.
 and vitamin E, relation, (64) 591.
- Vitamin A—Continued.
 antimony trichloride test, (62) 207, 208; (63) 8, 110, 708; (64) 204, 803; (65) 501, 806; (68) 434.
 interpretation of color match, (67) 646.
 substances interfering with, (70) 294.
 use of 7-methylindole in, (68) 724.
 as anti-infective agent, (62) 294; (63) 791, 792, 793; (66) 896, 897; (68) 705, 706.
 assay, (62) 208.
 assay, pitfalls in, (68) 705.
 assays of fish oil, comparison, (62) 111.
 assays, relation to yeast used as source of vitamin B, (66) 296.
 assimilation in presence of mineral oil, (62) Pa. 397; (70) 878.
 association with greenness in plant tissue, (61) 494.
 carotene, and xanthophyll, distinguishing, (64) 309; (68) 724.
 characterization, biological experiments, (67) 631.
 characterization, spectroscopic evidence, (67) 501.
 chemistry of, (61) 709; (63) 608; (66) 710; (69) 756.
 color tests for, (64) 293.
 containing fats, fluorescence, measurement, (61) 292.
 containing substances, oxidation capacity, (67) 482.
 conversion from carotene, (64) 393, 588; (65) 894; (66) 607; (70) 234.
 deficiency—
 and resistance against specific infection, (64) 589.
 and xerophthalmia and night blindness, (70) 877.
 cause of infections, (69) 151.
 clinical features, (68) 414.
 diseases associated with, (64) 397.
 early stages, (68) 278.
 effect of arsenic, ferrous sulfate, and copper sulfate, (66) W.Va. 560.
 effect of modified Fowler's solution, (66) W.Va. 560.
 deficiency, effect on—
 albumin-globulin ratio of blood, (68) 705.
 blood clotting mechanism, (67) 486.
 blood of rats, (66) 196.
 carbohydrate metabolism, (64) Ark. 497, 792.
 concentration of blood lipids, (69) 618.
 development of tuberculosis, (70) 133.
 hematopoietic function, (62) 297.
 incisor teeth of laboratory animals, (68) 710; (70) 725.
 intestinal flora and pH value, (67) 483.

Vitamin A—Continued.

- deficiency, effect on—continued.
 - intestinal permeability to bacteria, (67) 483.
 - male rats, (68) 865.
 - monkeys, (65) 92.
 - nervous system of white rat, (69) Ohio 99.
 - oestrous cycle of rats, (61) 794; (64) 293.
 - reproduction in range cattle, (70) Calif. 662.
 - resistance to paratyphoid infection, (68) 862.
 - teeth of rats, (70) 421.
- deficiency—
 - in castrated male rats, (69) 759.
 - in cattle, relation to cottonseed meal feeding, (65) N.C. 158.
 - in chickens, effect, (64) 774.
 - in chicks, (68) 368.
 - in dogs, (69) 759; (70) 567.
 - in infants, effect, (66) 593.
 - in mice, (66) 592.
 - in rats, cornified vaginal cells as index, (69) 759.
 - in rats, development of lesions, (68) 705.
 - in rats, effects, (61) 292, 492; (63) 493.
 - infection of accessory sinuses in, (69) 467.
 - lesions of nervous system in, (69) 311.
 - of fowls, histology of eye alterations in, (69) 710.
 - pathological changes in rats, (68) 278.
 - pathology, (66) 593.
 - recovery from, epithelial repair in, (70) 875.
 - relation to respiratory troubles in tuberculous rats, (69) 901.
 - role in cutaneous lesions in man, (67) 482.
 - studies, (66) 198.
- deficient diet—
 - effect, (67) Calif. 588.
 - effect on blood cholesterol in dogs, (69) 468.
 - effect on nitrogen and fat absorption, (68) 864.
 - effect on poultry, (61) Kans. 164; (65) N.J. 863.
 - effect on testes of rats, (68) 865.
 - high cereal, syndrome produced by, (68) 707.
- deficient rations, effect on pigs, (69) 406.
- deficient rats, bacteria in nasal cavities and middle ear, (62) 493; (63) 493, 494.
- destructive action of finely divided solids, (65) 410.
- destruction in baled alfalfa hay during storage, (70) Ariz. 814.
- detection, (61) 710.

Vitamin A—Continued.

- determination, (65) 588.
- and expression in international units, (70) 877.
- effect of basal diet, (70) 422.
- improvements in basal ration for, (69) Iowa 148.
- in foods, paired feeding method, (70) 423.
- technic, (63) 493.
- vaginal smear method, (69) 630.
- development during ripening of tomatoes, (62) 93.
- effect on antirachitic potency of irradiated ergosterol (66) 660.
- effect on calcium-phosphorus metabolism in chickens, (66) 660.
- effect on disease resistance and antibody production, (69) 149.
- effect on linoleic acid oxidation, (68) 131.
- experiments, diet for breeding rats for, (65) 589.
- ferrous iodide as substitute, (68) 415.
- for cows, sorghum silage as source, (69) Tex. 100.
- for growing chicks, (68) 368; (70) 372.
- formation from carotene, (70) 878.
- free casein, preparation, new technic, (67) 647.
- from plant sources, behavior, (65) 803.
- from plant sources, stability, (65) 193.
- function, (66) 392.
- further purification, (70) 579.
- highly active, characteristics, (69) 325.
- in alfalfa—
 - as supplement to sorghum-grain rations, (65) 363.
 - effect of curing, (63) 856; (68) Ariz. 753.
 - exposed to sunshine in curing process, (69) 251.
 - hay, (61) Ohio 456.
 - hay cut at different stages, (69) Ind. 98.
 - hay, effect of artificial drying, (65) Ind. 158; (67) 59.
 - leaves cured by different methods, (63) N.J. 365.
 - meal, (69) N.H. 406.
 - products for laying hens, (70) 228.
 - yellow pigments, (63) Fla. 692.
- in animal nutrition, (62) Fla. 397.
- in annatto, (67) 481.
- in apples, Washington-grown, (68) Wash.Col. 862.
- in apples, white-tissued and yellow-tissued, (69) 758.
- in apricots, (67) 776; (69) 757.
- in avocados, (62) 193.
- in barley, (70) 369.
- in blueberries, (70) 277.
- in butter—
 - and other fatty foods, (62) 111.
 - cookies, (63) Wis. 92.
 - cookies, loss on baking, (66) 297; (69) Wis. 890.

Vitamin A—Continued.

- in butter—continued.
 - effect of exposure to radioactive substances, (66) Mo. 390.
 - effect of heating processes, (66) 794.
 - effect of ultra-violet light, (67) Ind. 631.
 - estimation, (64) 410; (66) 607.
- in butterfat, (69) 418; (70) 877.
 - effect of mineral oil, (66) 592.
 - irradiated, (66) 491.
- in canned peas, (61) Mich. 793.
- in canned ripe and green olives, (68) 415.
- in canned sauerkraut, (63) 693.
- in canned tomatoes, effect of storage, (69) 148, Iowa 148.
- in canned vegetables, (65) Mich. 793.
- in carotene, (61) 793, 794.
- in carotene, activity, (63) 109.
- in carotene of red palm oil, (63) 91.
- in carrots, effect of storage and canning, (69) Mont. 898.
- in cherries, (64) Kans. 897.
- in cherries, frozen, (68) Wash.Col. 862; (69) 465.
- in cod-liver oil, (61) 695, 894; (68) 277; (69) 630.
 - antimony trichloride test, (62) 112.
 - determination, (64) 694; (67) 200.
 - emulsions, stability, (69) 759.
 - inhibitor of antimony trichloride test for, (69) 773.
 - permanence, (63) 9.
 - relation to age of cod, (70) 876.
 - variations in color test, (63) 9.
- in Concord grapes, (68) 414.
- in corn—
 - and number of genes for yellow pigmentation, relation, (65) 216.
 - distribution, (63) 816.
 - milling products, distribution, (62) 492.
 - red, (61) Ind. 366.
 - relation to intensity of yellow color, (63) N.J. 365, Tex. 464; (65) Ind. 158; (67) Ind. 589.
 - variations, (65) Tex. 294.
 - yellow, (62) Ill. 391; (63) N.J. 365, Tex. 464; (65) Ind. 158; (67) Ind. 589.
 - yellow, and sorghums, (63) 556.
 - yellow, exposed to air, (67) Ind. 589.
 - yellow, meal, (69) N.H. 406.
 - yellow, stored, (61) Ohio 456.
- in corpora lutea from cows, (69) Ohio 99.
- in cranberries, (69) 143.
- in crude and refined olive oil, (62) 791.
- in dates, (66) Ariz. 391.
- in diet, effect on resistance of chickens to parasitism, (64) 680.
- in disease, (64) 294.
- in eggs of hens receiving cod-liver oil, (62) N.Y.Cornell 788.

Vitamin A—Continued.

- in ether extract of wheat flours, (69) 168.
- in field-cured and artificially cured alfalfa hay, (68) Nebr. 655.
- in figs, (67) 776.
- in fish-liver oils, (68) 150, 151.
- in fish-liver oils, methods of assay, (70) 566.
- in fish meals, (67) 589.
- in fish oils, (65) 397.
- in fish oils of Philippines, (69) 150.
- in foods, (62) Tex. 692; (64) 789.
 - and feeding stuffs, (70) Tex. 131, 220.
 - distribution, (62) U.S.D.A. 293.
 - dried, effect of storage, (70) 131.
 - oriental, (61) 592.
 - unit value, (68) U.S.D.A. 131.
- in fruits, effect of drying and sulfur dioxide, (64) 495.
- in ghee, (63) 791.
- in grapes, (66) 896.
- in green leaves, nature, (62) 206.
- in halibut liver oils, (67) 777.
- in Helioctin, (62) 396.
- in herrings, (66) 492.
- in human—
 - blood serum, (68) 862.
 - body, relation to carotene, (70) 132.
 - fetuses, (62) 692.
 - liver, quantity, (68) 706.
 - milk, (61) 494.
- in June eggs, (66) Mo. 390.
- in kippered herrings, (64) 292.
- in kudzu hay, effect of curing method, (66) 857.
- in lettuce, green and white, (62) 397.
- in lettuce, relation to soil fertility, (62) 193.
- in liver in puerperal sepsis, (68) 707.
- in liver oils, tests for, (63) 92.
- in malt extract and cod-liver oil emulsions, (61) 387.
- in mango varieties, (69) 307.
- in margarines, (61) 390; (66) 591.
- in marine plankton, (64) 291.
- in milk, (67) 159, Nebr. 594; (70) N.J. 522.
 - effect of heating, (69) 466.
 - effect of pasture, (64) Ohio 673.
 - irradiated by various carbon arcs, (70) 279.
 - of various cattle breeds, Nebr., (63) 669; (65) 262; (69) 572.
- in mushrooms, (67) 629.
- in muskmelons, (63) Ga. 192.
- in Nitzschia closterium, (64) 587.
- in nut margarines, (70) 279.
- in oats, (62) Ill. 391; (65) 397.
- in oil of West Indian sharks, (70) 725.
- in oils, determination, (70) 152.
- in oysters, determination, (61) 692.
- in pasteurized milk and cheese, (70) 725.

Vitamin A—Continued.

- in pasture plants, (68) Idaho 369, Idaho 414; (69) 412, Idaho 898.
- in pears, (70) 565.
- in pecans, (67) 777.
- in Philippine foods, (63) 692.
- in pimiento peppers, (69) 308.
- in plant tissue, association with greenness, (66) 91.
- in plant tissue, function and estimation, (66) Ga. 196.
- in plants as associated with supplied nutrients, (69) Iowa 48.
- in retinal tissue of pigs, (66) 691.
- in salmon oil, (67) 481.
- in soybean hay, (69) Ind. 98.
- in spinach, (63) 188.
- in spinach, effect of fertilizer treatment, (64) Pa. 195.
- in spinach leaves, relation to size, (62) 791.
- in spinach varieties, (67) 630.
- in sweetpotatoes, (67) Mo. 480.
- in sweetpotatoes, effect of fertilizers, (69) Iowa 148.
- in sweetpotatoes, Nancy Hall, (69) 756.
- in the retina, (70) 877.
- in tomato pulp, (65) Wis. 492.
- in tomatoes, (65) 293; (66) 491.
- in tomatoes, artificially and naturally ripened, (61) 494.
- in tuna meal, (70) 277.
- in vegetables, losses on drying, (70) 420.
- in vitaminized margarine, (62) 895.
- in vitro, oxidation, (68) 151.
- in water cress, (63) 392; (64) 586.
- in watermelon, (64) 586.
- in white and yellow yams, (68) 278.
- in yellow plant pigments, (67) Fla. 619.
- in yellow potatoes, (70) U.S.D.A. 557.
- injury from, (70) 132.
- international standards for, (67) 776.
- intestinal absorption, effect of bile, (64) 588.
- molecular weight, (66) 113.
- nutritive functions, (69) 756.
- plant pigments as sources, (69) Fla. 303.
- potency and carotene in plant tissue, relation, (68) 863.
- preparations—
 - highly active, characteristics, (68) 723.
 - highly concentrated, (68) 150.
 - purification, (70) 442.
- production by *Corynebacterium* sp., (68) 415.
- prophylactic acid in helminthiasis, (69) 268.
- protective function in infection, (68) W.Va. 862.
- quantitative determination, (61) 710; (68) 14.
- quantitative distribution, charts, (70) W.Va. 420.

Vitamin A—Continued.

- relation to—
 - feeding cottonseed meal and hulls, (70) N.C. 815.
 - infections, (70) 565.
 - nutritive value of cottonseed meal, (66) Pa. 265.
 - rickets in rabbits, (63) 393.
 - urinary calculi, (70) 875.
 - yellow pigments in corn, (63) Ind. 555.
- requirements of—
 - beef cattle, (68) N.C. 511.
 - chicks, N.H., (66) 63; (67) 592.
 - pullets, (69) Tex. 95.
- reserves in livers of native mine laborers, (69) 900.
- reserves of rats, effect on vitamin B (B_2) deficiency, (67) 188.
- review of literature, (63) 393; (69) 148.
- rich diet, effect on tuberculosis infection, (70) 133.
- role in photosynthesis, (64) 818.
- sources for chicks, (68) 659.
- standard and unit, (66) 690.
- standardized preparations, (68) 565.
- structure, (68) 722.
- structure and synthesis of ionenes, (68) 723.
- studies, (63) 92, N.C. 658; (69) Ind. 150.
- substances derived from, absorption spectra, (68) 724.
- successive diminutions in food, effect on rats, (64) 790.
- summary, (67) 769.
- synthesis in plants, (66) 590.
- (taurocholic acid compound)—
 - preparation, (62) 93.
 - studies, (65) 501.
- technic, (69) 148.
- technic, effect of potency of yeast, (62) Pa. 397.
- test, accuracy, effect of length of test period, (70) 876.
- testing for, methods, (66) 590.
- tests, specificity in, (67) 341.
- tests, variation in growth response of rats, (68) 565.
- transmission from parents to young, (68) 863.
- treatment in infancy, (69) 900.
- treatment of bone tuberculosis, (64) 496.
- utilization in presence of mineral oil, (66) Pa. 297.
- value of cod-liver oil, increasing, (69) 466.
- value of fish body and liver oils, (64) 194.
- values, quantitative measurement, (66) 391.
- vitamin D-sparing properties, (66) Pa. 261; (68) 659.

Vitamin—

activity of carotene, (64) 709.
alleged new, in milk for poultry, (64) 467.

antineuritic—*see also* Vitamin B.

assay, (66) 393.
concentrates, evaluating potency, (63) 291.

from oryzanin, (66) 691.
isolation experiments, (65) 805.
isolation from brewers' yeast, (61) 710.

of brewers' yeast, activity and nitrogen in, (62) 711.

of milk, effect of heat, (62) 294.
sparing action of fat on, (61) 92.
studies, (61) 293.

antirachitic, *see* Vitamin D.

Vitamin B—

adsorption of active factors by fuller's earth, effect of pH, (61) 91.

antipellagric factor of, (62) 97.

biochemical studies, (61) 390.

composite nature, (62) 587.

composite nature, new factor Y in, (65) 592.

deficiency—

and cod-liver oil toxicity, (65) 95.
effect on calcium, proteins, and phosphorus in blood of dogs, (65) 95.

effect on hematopoietic function, (62) 297.

effect on rats, (62) 587.

effect on weight of internal organs, (64) 291.

gastric motility in, (63) 394.

hyperglycemia in, relation to gastric motility, (61) 193.

in infants, (61) 293.

in rats, changes in blood, (63) 394.
in rats, pathologic changes, (65) 494.

relation to bradycardia morales, (65) 595.

distribution in foods, (62) U.S.D.A. 293.

effect on reproduction in pigs, (63) 360.

excretion by artificially fed infants, (66) 297.

factor, routine administration to infants, (61) 593.

for pigs, Ark., (64) 464; (66) 562.

in cereals, (62) III. 390.

in germinating cereals and seedlings, (61) 295.

nomenclature, (61) 592; (62) 94.

relation to effect of protein-rich diets on kidneys in rats, (65) 794.

specific effect on lactation, growth, and water metabolism, (65) 793.

Vitamin balance and hypervitaminosis, (61) 297; (62) 196; (63) 194.

Vitamin B (B_1)—*see also* Vitamin, antineuritic.

action, (65) 894.

adsorption by Lloyd's reagent, (63) 803.

adsorption by plant tissues, (70) 569.
adsorption experiments, (70) 10.

and adenine hydrochloride, crystal structure, (70) 741.

and G, differentiation, (61) 710; (62) 113; (66) 92; (69) Mo. 152; (70) 10.

and liver glycogen, (70) 879.

and protein requirements, relation, (70) Mo. 133.

assay, (62) 195.

assay, concentration and solubility, (67) 502.

assay, effect of coprophagy, (68) 866.

biochemical studies, (65) 109.

chemical nature, (67) 102.

chemical nature and nutritive functions, (69) 756.

chemistry, (69) 6, 150, 151.

concentrate and minerals in diet, effect on tuberculous children, (70) 729.

concentrate free from B_2 , preparation, (65) 613.

concentrate, large scale preparations, (70) 153.

concentrates from yeast, preparation and behavior, (66) 707.

concentrates, preparation from rice polishings, (68) III. 704.

concentration, (63) 9; (65) 296; (67) 647, 779.

coprophagy as source, (69) 469.

crystalline preparation from yeast and rice bran, (69) 326.

crystalline preparations, (67) 101, 102; (70) 153.

crystalline preparations, ultra-violet absorption, (70) 442.

crystals, properties and structure, (67) 502.

deficiency—

and inanition, independence, (68) 867.

and learning ability, (62) 897.

and lipemia, (67) 486.

and pyruvic acid, (69) 902.

biochemical lesions in, (67) 344.

blood sugar level in, (67) 635.

effect on carbohydrate metabolism, (62) 896.

effect on differential count of rats, (68) 417.

effect on differential leucocyte count during lactation, (69) 617.

effect on glycogen in organs, (68) 867.

effect on respiratory quotient of cerebral cortex, (70) 134.

in nursing young, production, (62) 494.

in pigeons, (61) 594.

Vitamin B (B₁)—Continued.

- deficiency—continued.
 - lipemia as symptom, (66) 492.
 - mechanism of action in young rats, (70) 280.
- pH determinations in organs of pigeons, (69) 761.
- studies, diet for, (66) 197.
- deficient—
 - diets, effect on nervous system in rats, (61) 495.
 - pigeons, brain localization of lactic acidosis, (64) 497.
 - pigeons, localized lactic acidosis in, (63) 494.
 - ration, (69) 761.
 - rats, ability to discriminate between diets containing and lacking vitamin, (70) 564.
- determination in foods, paired feeding method, (70) 423.
- determination, technic, (62) 897; (65) 296.
- determination, use of cockroach as test animal, (70) N.Y.Cornell 865.
- effect on—
 - consumption and use of food, (69) 899.
 - glycogen and glutathione in rabbit liver, (70) 727.
 - growth, (67) 484.
 - lactation, (67) 484.
 - lactation and growth, (69) Ark. 760.
- extraction from a fuller's earth adsorbate, (66) Ala. 895.
- extraction from dried brewers' yeast, (70) 10.
- for lactation, milk as source, (62) 896.
- for treatment of anemia, (67) 485.
- formula, (70) 740.
- fractional precipitation, (62) 711.
- from rice bran and polyneuritis in experimental animals, (69) 326.
- from rice polishings, concentration and purification, (69) 325.
- from yeast, crystalline preparations, (68) 725.
- from yeast or rice bran extracts, (65) 311.
- function and estimation in plant materials, (66) Ga. 196.
- heat stability, (69) 844.
- highly potent concentrate, preparation, (69) 168.
- identity with bacterial growth-promoting factor, (65) 93.
- in alfalfa and timothy hay cut at various stages, (69) Ohio 90.
- in apple varieties, (64) N.Y.Cornell 694.
- in autoclaved yeast, effect of pH control, (62) 113.
- in banana powder, (70) 279.
- in beef and pork, (61) 390.
- in beef and pork, effect of cooking and canning, (67) N.Dak. 778; (69) 406, 468.

Vitamin B (B₁)—Continued.

- in body tissues of rats, (69) 469.
- in broccol, (69) 308.
- in carrots, effect of storage and canning, (69) Mont. 898.
- in cereal products and green and bleached lettuce, (70) U.S.D.A. 557.
- in cereals, Ill., (62) 390; (64) 896; (65) 589.
- in commercial liver extract, (65) 492, 493, Ala. 493.
- in cranberries, (69) 143.
- in dates, (66) Ariz. 391.
- in diet of children, value, (67) 484.
- in different milling products, (69) Kans. 308.
- in dry skim milk and whey, (69) 418.
- in foods, (70) Ill. 717.
- in fresh coconut water, (68) 279.
- in fruits and vegetables, (67) 624.
- in fruits, distribution, (67) 632.
- in grapes, (66) 896.
- in grapes, Concord, (68) 414.
- in hay, factors affecting, (69) Ohio 839.
- in Indian rice, (70) 280.
- in kale and mustard greens, (64) Ky. 195.
- in leafy vegetables, (65) 590.
- in liver and stomach preparations, (67) 187.
- in liver extracts, (66) 197.
- in milk, (64) Ohio 672; (67) 159.
- in milk, boiled, (67) 779.
- in milk derivatives, (66) 594.
- in milk, effect of rations, (66) 865.
- in milk, effect of yeast feeding, (69) Ohio 99.
- in Nancy Hall sweetpotatoes, (69) 756.
- in oats, (64) Ill. 896.
- in organs of white rats, (69) 308.
- in peanuts, distribution, (67) 778.
- in pinto beans, (67) N.Mex. 88.
- in pork and lean beef, effect of cooking and canning, (67) N.Dak. 778; (69) 406, 468.
- in rice, (69) 761.
- in rice bran bread, (67) Hawaii 473.
- in rice, curative activity, (65) 593.
- in rice, effect of parboiling and milling, (69) 469.
- in rice kept four years in carbon dioxide-filled and air-tight containers, (61) 895.
- in rice polishings, (61) 895.
- in root vegetables, (67) 343.
- in soybeans and milk, comparison, (68) 131.
- in spinach, Bloomsdale, (66) Mo. 391.
- in spinach varieties, (67) 630.
- in swedes, effect of storage, (69) Mont. 899.
- in tikitiki, (64) Ill. 895.
- in vitro effect, (67) 634.
- in water cress, (64) 586.
- in watermelon, (64) 586.
- in wheat bran, (67) 483.

Vitamin B₁—Continued.

- in wheat, effect of fertilizers, (63) Ohio 57.
 in yeast, (65) 295; (68) 708.
 in yeast, fresh and dried, (70) 727.
 international standard for, (67) 776; (68) 866.
 isolation, (62) 607; (64) 294.
 isolation from rice polishings, (69) 148.
 origin, as result of coprophagy and refection, (67) 632.
 photochemical synthesis, (68) 725.
 physiological function, (67) 344.
 precipitation, relation to pH value, (65) 502.
 preparations, comparative potency, (69) 326.
 preparations, curative value for pigeons and rats, (65) 593.
 preparations, value in anemia treatment, (70) 886.
 quantitative determination, (63) 95; (66) 410.
 quantitative distribution, (66) Ill. 295.
 quantitative measurement, (68) Okla. 704.
 relation to carbohydrate metabolism, (64) 294; (66) Ala. 895.
 relation to maintenance nutrition in pigeons, (65) 593.
 relation to renal enlargement in rats on high protein diets, (62) 493.
 relation to the clinic, (68) 414.
 removal of impurities, (67) 503.
 requirement and protein, interrelation, (66) Mo. 390.
 requirement, relation to high-fat diets, (65) Ala. 494.
 requirements, effect of food consumption, (69) 148.
 requirements for lactation, (66) 393.
 requirements for lactation, effect of fat in diet, (69) 618.
 requirements of albino mice, (62) 894.
 role in lactation and fertility, (63) Ark. 693.
 role in utilization of fats, (69) 760.
 separation from vitamin G, (63) 710.
 solubility in alcohol, (61) 592, 593.
 sparing action of fat on, (62) 293; (67) 778; (69) 468.
 specific effect on growth, (68) 705.
 specific effect on lactation, (66) 94.
 stability to heat and alkalinity, (69) Mich. 152.
 standard and unit, (66) 690.
 studies, use of chick in, (69) 844.
 studies, use of mice as test animals, (67) 343.
 ultra-violet absorption spectrum and chemical structure, (69) 325.
 values of foods, comparative, (62) 294.

Vitamin B₂, see Vitamin G.Vitamin B₃—

- and bios, properties and differentiation, (65) 296.
 heat stability, (69) 844.

Vitamin B₃—Continued.

- studies, (64) 294; (65) 592.
 Williams-Waterman, and nutritional vitamin of Randoin and Lecoq, identity, (66) 393.
- Vitamin B₄—
 and adenine, (70) 741.
 assay, (65) 594.
 concentrate, large scale preparations, (70) 153.
 from yeast, crystalline hydrochloride of, (68) 726; (69) 902.
 further evidence, (68) 279.
 notes, (65) 592; (70) 884.
- Vitamin B₅, distinguishing characteristic, (65) 594.
- Vitamin B complex—
 a second thermolabile factor from, (62) 589.
 chemistry, (69) 150.
 composite nature, nutritional significance, (61) 694.
 constituents, (67) 483.
 deficiency and intestinal resorption, (70) 879.
 deficiency, anorexia and polyneuritis in, effect of water administration, (70) 726.
 deficiency, effect on—
 blood clotting mechanism, (67) 486.
 concentration of nonprotein nitrogen of blood, (68) 704.
 intestinal flora and pH value, (67) 483.
 lipid metabolism, (68) 705.
 lipid metabolism and glycogen in liver, (68) 417.
 maze performance, (68) 708.
 resistance to paratyphoid infection, (68) 862.
 vitamin A reserve in rats, (67) 188.
 deficiency of lactating mother, effect on young rats, (61) 696.
 deficiency, pathological conditions following, (64) Ala. 394.
 deficiency, relation to cutaneous lesions in dogs, (61) 895.
 deficient diet, effect on pH of intestinal canal, (61) 794.
 deficient dogs, changes in blood, (63) 93.
 effect of nitrous acid, (65) 311.
 effect on appetite and utilization of food, (66) 93.
 effect on growth, (67) 484.
 effect on resistance of rats to enteritidis, (67) 778.
 factor for cure of heart block, (65) 596.
 factors composing, (61) Ohio 456; (63) 292; (64) Ohio 694; (65) 397; (66) Ala. 893.
 factors in autoclaved yeast, effect of pH control, (62) 113.
 for reproduction and lactation, soybeans as source, (64) 585.

Vitamin B complex—Continued.

- formation, detection, (62) 94.
- heat-stable factor, experiments, (61) 592.
- in avocados, (61) 293.
- in bread, (67) 483.
- in bread baked with large amounts of yeast, (61) 293.
- in canned peas, (61) Mich. 793.
- in canned vegetables, (65) Mich. 793.
- in commercial insulin, (61) 694.
- in diet, effect on resistance of chickens to parasitism, (64) 680.
- in food plants, effect of soil composition and treatment, (61) N.J. 710.
- in fruits, (61) Kans. 193.
- in infant feeding, importance, (62) 692; (65) 694.
- in meals from high-oil-bearing seeds, (70) N.C. 879.
- in milk, (67) 159.
- in milk, effect of rations, (67) Ohio 65.
- in peanuts, distribution, (67) 778.
- in Philippine foods, (63) 692.
- in raw and evaporated milk, relative quantities of heat-stable and heat-labile fractions, (68) 416.
- in red kidney beans and polished rice, (63) 895.
- in rice polishings, differentiation of factors, (61) 92.
- in ripe and germinating wheat, (62) 792.
- in spinach, (63) 188.
- in spinach, effect of method of preparation, (62) Mo. 94.
- in string beans, effect of method of preparation, (62) Mo. 94.
- in sugarcane juice, (64) 495.
- in tomatoes, (65) 293.
- in tomatoes, artificially and naturally ripened, (61) 494.
- in vegetables, (63) Iowa 93.
- in water cress, (63) 392.
- in yeast, third factor in, (65) 94; (70) 568.
- in yellow yautia and plantain, (65) 397.
- partial depletion, effect on learning ability in rats, (67) 188.
- relation to fowl paralysis, (68) 253.
- relation to infection and immunity, (69) 269.
- relation to renal enlargement, (69) 152.
- requirement of animals, (67) 633.
- requirement of pigeons, effect of induced hyperthyroidism, (70) 726.
- requirements in infancy, (62) 397.
- review and discussion, (62) 493.
- role of components in appetite stimulation, (66) 93.
- source in assay of vitamin A, (64) 804.
- sources, (67) Mo. 480.
- studies, (64) Ala. 394, 589; (67) Ohio 88; (69) Ohio 152; (70) 567.
- third factor in, (64) 195; (68) 279.
- three vitamins in, (70) 11.

Vitamin B complex—Continued.

- trends in current research, (67) 769.
 - utilization, effect of proteins, (68) 866.
- Vitamin C—
- and aqueous humor, properties, comparison, (70) 727.
 - and ascorbic acid, identity, (69) 11, 169, 774, 902; (70) 153, 741.
 - and glutathione in animal tissues, estimation and distribution, (69) 471.
 - and narcotine, relation, (69) 9, 10, 772.
 - and suprarenal cortex, (69) 904; (70) 426.
 - as activator for cathepeptic enzyme, (70) 443.
 - assay, improvement, (62) 607.
 - chemical identification, (67) 650.
 - chemical nature, (63) 608; (67) 649; (68) 152; (69) 8, 9, 10, 170, 631, 756, 774, 902.
 - chemical reactions of, (69) 170.
 - chemical test for, (70) 579.
 - concentrates from lemon juice, preparation and properties, (62) 501.
 - concentrates from lemon juice, preparation and storage, (66) 708.
 - conservation in foods, (69) 902.
 - deficiency, effect on blood, (67) 486.
 - deficiency, relation to bowel disease, (61) 194.
 - deficiency, relation to intestinal tuberculosis, (70) 881.
 - deficient diet, effect on peptic ulcers, (70) 570.
 - deficient diet for scurvy study, (62) 198, 588.
 - detection, (62) 113.
 - determination, (67) 189.
 - disappearance from adrenals during scurvy, (69) 619.
 - immediate physiological action, (61) 296.
 - in adrenal gland, (69) 903.
 - in adrenal glands of human fetus, (70) 880.
 - in adrenals of guinea pigs, (70) 880.
 - in apples, (62) Mo. 95; (64) 497, 498; (65) 895, 896; (66) 623; (67) Mass. 473.
 - in apples, Baldwin, (69) 902.
 - in apples, Baldwin and McIntosh, distribution, (69) 903.
 - in apples, Washington-grown, (68) Wash.Col. 862.
 - in apples, Winesap, effect of fertilizers, (69) 470.
 - in apricots, (67) 776.
 - in apricots, fresh and dried, (69) 757.
 - in avocados, (64) 587.
 - in banana powder, (70) 279.
 - in blood and urine, (70) 879.
 - in blueberries, (70) 277.
 - in canned citrus products, (69) 309.
 - in canned fruits, (67) Mass. 473.
 - in carrots, effect of storage and canning, (69) Mont. 899.

Vitamin C—Continued.

- in carrots, home-canned, (66) 795.
- in carrots preserved by canning and cold storage, (67) S.Dak. 88.
- in celery, (64) 395.
- in coffee, (66) 794.
- in Concord grapes, (68) 414.
- in cranberries, (69) 143, 890.
- in cranberries, effect of preserving processes, (70) Mass. 279.
- in cucumbers, fresh and pickled, (62) 398.
- in diet, relation to mottled enamel of teeth, (68) 870.
- in ensiled grass, (62) 165.
- in figs, (67) 776.
- in foods, (62) U.S.D.A. 293; (70) 741.
- in foods, preserved, (64) 590.
- in foods, unit value, (68) U.S.D.A. 131.
- in germinating cereals and seedlings, (61) 295.
- in grapefruit, (67) 344.
- in grapefruit juice, frozen, (70) 135.
- in grapes, (66) 896.
- in green tea, (62) 295; (63) 194; (64) 590.
- in kale and mustard greens, (62) Ky. 294.
- in legumes during germination, (61) 295.
- in lemon juice, preparation and properties, (62) 804.
- in lemon juice, preservation, (63) 609.
- in lemon juice, stability, (62) 803.
- in lime juice, (69) 904.
- in liver of sheep, effect of freezing and storage, (68) 566.
- in mango varieties, (69) 307.
- in milk, determination, (69) 309.
- in milk, effect of rations, (69) Kans. 257.
- in milk, factors affecting, (70) 579.
- in milk in presence of metals, effect of pasteurization, (66) 595.
- in milk, relation to reducing properties, (70) 136.
- in mushrooms, (67) 629.
- in orange juice, commercial, (68) 418.
- in orange juice, frozen, (70) 134, 135.
- in orange juice, frozen, stability during storage, (70) 136.
- in orange juice, relation to reducing values, (69) 618.
- in oranges, (65) Hawaii 793; (67) 344.
- in oranges, effect of lead arsenate spray, (68) 418.
- in oranges, Hawaiian, (67) Hawaii 473.
- in oriental fruits and vegetables, (61) 595.
- in pears, (70) 565.
- in pears and peaches, (61) Kans. 193.
- in plant materials, function and estimation, (66) Ga. 196.
- in potatoes, (61) Idaho 896; (64) 395; (68) Idaho 414.
- in potatoes, effect of storage, Wyo., (68) 854; (70) 866.

Vitamin C—Continued.

- in potatoes, Idaho, Idaho, (63) 594; (66) 298.
- in potatoes, Idaho Russet Burbank, (69) Idaho 898.
- in potatoes, two varieties, (64) 219.
- in prunes and apricots, effect of drying and sulfuring, (64) 789.
- in rhubarb, (62) Mo. 95.
- in sauerkraut, (64) 695.
- in sauerkraut, canned, (63) Wis. 94, 693.
- in sauerkraut, commercially canned, (70) 570.
- in sauerkraut, fresh, (62) 588.
- in sauerkraut, home-made, (61) Wis. 194.
- in spinach, (62) Mo. 95; (64) S.Dak. 693.
- in spinach, Bloomsdale, (66) Mo. 391.
- in spinach, canned, S.Dak., (61) 92; (63) 94.
- in spinach under varying conditions, (68) S.Dak. 867.
- in spinach varieties, (67) 630.
- in strawberries, (69) 891.
- in strawberries, fresh and frozen pack, (70) 282.
- in swedes, effect of storage, (69) Mont. 899.
- in Swiss chard, S.Dak., (63) 94; (64) 693.
- in tomato juice, retention in commercial preparation, (65) 613.
- in tomatoes, (63) 395; (65) 293, Hawaii 793.
- artificially and naturally ripened, (61) 494.
- diploid and tetraploid, (70) 426.
- effect of ethylene gas, (61) Wis. 194.
- home-canned, (66) 795.
- in turnip greens, canned, (63) Ga. 192.
- in vegetables, (66) S.Dak. 198.
- in vegetables, canned, (61) 295.
- in vegetables, oriental, (61) 595.
- in watermelon, (64) 586.
- inexpensive sources for infants in China, (61) 193.
- injected parenterally, effect on guinea pigs, (63) 896.
- international standard for, (69) 618.
- isolation and identification, (67) 650.
- narcotine as precursor, (67) 648.
- nutritive functions, (69) 756.
- preparation from lemon juice, (69) 774.
- production by germination, (64) 395.
- qualitative test for, (70) 283.
- quantitative determination, (68) 14.
- quantitative distribution, charts, (70) W.Va. 420.
- recent work, critical review, (69) 9.
- relation to reducing capacity of plant food material, (69) 7; (70) 294.
- relation to reproduction in guinea pigs, (64) 822.
- requirements of dogs, (69) 105.

Vitamin C—Continued.

- requirements of rats, (61) 194; (64) 590.
- rich food, effect on blood formation, (64) 590.
- role in nutrition of calves, (62) 554.
- sources in India, (69) 310.
- stability, relation to copper in canned foods, (69) 153.
- standard and unit, (66) 690.
- storage in the body, (63) 94.
- studies, (63) 294.
- testing for, methods, (66) 590.
- triphenylmethyl derivative, (69) 773.

Vitamin concentrates, activity, (66) 590.

Vitamin D—

- absence from carotene, (63) 92.
- absorption, role of bile in, (70) 883.
- absorption spectrum, (61) 392; (62) 114.
- action, (61) Iowa 361; (65) 896; (67) 345; (69) 105; (70) 882.
- action and identity, (65) Iowa 193.
- action, nature, relation to parathormone action, (68) 863.
- action, parathyroid theory, (68) 280.
- activity of ergosterol irradiated with natural light, (70) 284.
- administration, (70) 882.
- and antirachitic activation of foods, (64) 395.
- and calcium conservation in adults, (70) 427.
- and fecal reaction, (62) 296.
- and oxidation of fats and oils, (61) 291.
- and related compounds, crystal structures, (67) 201.
- and resistance of chickens to parasitism, (61) 474.
- and structure of teeth, (61) 392.
- and ultra-violet light in nutrition, treatise, (63) 294.
- and vitamin A, differentiation, (64) 791.
- as antiinfective agent, (66) 897.
- assay, effect of changes in weight of test rats, (62) 197.
- biological assay and chemistry, (64) 295.
- chemical nature, (64) 113; (65) 205; (66) 710; (69) 756.
- chemical reaction, (62) 114; (64) 504.
- concentrate from cod-liver oil, use, (69) 154.
- crystalline, (67) 201, 503.
- crystalline preparation, inactive contaminant in, (66) 709.
- crystalline preparations, (69) 151.
- deficiency, effect of vitamin A-rich rations, (66) Pa. 261; (68) 659.
- deficiency, effect on—
 - blood, (67) 486.
 - carbohydrate metabolism of rats, (64) 792.

Vitamin D—Continued.

- deficiency, effect on—continued.
 - concentration of blood lipids, (69) 618.
 - differential leucocyte count during lactation, (69) 617.
 - egg production and hatchability, (63) N.J. 366.
 - growth of skeleton and internal organs, (67) 729.
 - resistance to paratyphoid infection, (68) 862.
 - teeth and bones, (68) 709.
- deficiency, histology of bone growth in, (68) W.Va. 862.
- deficiency in calves, effect, (69) Wis. 705.
- deficiency in whale liver fat, (66) 492.
- deficiency, relation to anemia, (69) 624, 762.
- deficiency, studies, (66) 199, 898.
- depression of intestinal reduction by, (67) Iowa 473.
- determination, (68) 152, 279; (69) 762; (70) 882.
- determination by growth-promoting property, (69) 631.
- determination, line test, (65) 595.
- determination, line test, degree of accuracy obtainable by, (70) 882.
- determination, line test, modification, (68) 867.
- determination, methods, (62) 897; (67) 636.
- different intakes, responses to, (62) 494.
- distillation, (66) 8.
- distribution in animal after administration by mouth, (70) 883.
- effect on—
 - bone tuberculosis in children, (67) 88.
 - calcium-phosphorus metabolism, (65) 558; (66) 660; (69) 406.
 - disease resistance and antibody production, (69) 149.
 - eggshell thickness, (61) Wis. 165; (62) Ky. 256.
 - flora of digestive tract, (64) Iowa 897.
 - growth in pigs, (61) 666.
 - hatchability and egg production, (68) 659.
 - overdosage, (62) 792.
 - response to parathyroid extract, (63) 396.
- estimation by radiography, (68) 132.
- excess of, toxic action, (61) 896.
- excess, relation to bradycardia in rats, (65) 595.
- excessive dosage and vitamin balance, (61) 297.
- excessive dosage, relation to calcium-phosphorus intake, (63) 295.
- for chicks, (70) 372.

Vitamin D—Continued.

- for chicks, sardine oil as source, (68) Wash.Col. 796.
- formation by monochromatic light, (64) 504.
- formation or destruction by irradiation of ergosterol, (61) 695.
- fortified milk, protective value for infants, (69) 153, 154.
- from sterols of mummified Egyptian brain, (62) 588.
- function and estimation in plant materials, (66) Ga. 196.
- importance in British Isles, (70) 724.
- in alfalfa, effect of curing, (63) 856; (68) Ariz. 753; (69) 252.
- in alfalfa hay, (61) Wis. 168.
- in avocados, (64) 587.
- in blood and feces of infants receiving antirachitics, (70) 137.
- in burbot-liver oil, (62) 95.
- in butter, standardization, (61) 297.
- in butter, variations in, (61) 695.
- in butterfat, effect of cow's ration, (63) Ohio 66.
- in cacao bean, (69) 310.
- in canned peas, (61) Mich. 793.
- in canned vegetables, (65) Mich. 793.
- in cherries, (64) Kans. 897.
- in cod-liver oil, (61) 695, 894; (64) 694.
- and related products, (68) 277.
- potency, effect of age, (64) Kans. 869.
- potency, effect of storage conditions, (70) 570.
- stability, effect of storage in mash mixture, (62) N.Y.Cornell 759.
- stearin, (61) Ind. 365; (63) 864.
- variations in, (61) 695.
- in corn, (66) 796.
- in cranberries, (69) 143.
- in dogfish-liver oil, (63) 294; (65) 595.
- in egg yolks, sources, effect, (70) 372.
- in eggs, brown and white, (70) Mo. 277.
- in eggs, effect of household storage, (61) Wis. 195.
- in eggs of hens receiving cod-liver oil, (62) N.Y.Cornell 788.
- in eggs, preserved, (67) 490.
- in ergot of rye, (62) 588.
- in fish-liver oil, cartilaginous, (64) 295.
- in fish-liver oils compared with irradiated products, reaction of chicks to, (68) 368.
- in fish oils, (65) 397.
- in fruits and vegetables, (67) 629.
- in Helioctin, (62) 396.
- in ice cream, (62) 95.
- in irradiated ergosterol poisoning, specificity, (62) 196.
- in irradiated milk, (67) 490.
- in kale and mustard greens, (62) Ky. 293.
- in kippered herrings, (64) 292; (66) 492.

Vitamin D—Continued.

- in Manamar, (63) Ohio 66.
- in mango varieties, (69) 307.
- in margarines, (61) 390; (66) 591.
- in marine plankton, (64) 291.
- in menhaden fish oil, (70) N.C. 816.
- in milk, (62) 495; (69) Mich. 574.
- effect of cow's ration, (61) Ohio 170.
- effect of exposure to sunshine, (67) S.Dak. 65.
- effect of feeding cod-liver oil concentrate, (68) Ohio 809.
- effect of irradiated ergosterol feeding, (64) Ohio 673; (67) Ohio 65, Ohio 448; (68) 663.
- effect of irradiated yeast feeding, (62) 495.
- effect of sunlight, (68) S.Dak. 806.
- effect of yeast feeding, (63) Wis. 68.
- effect on calves, (66) 367.
- from cows exposed to sunlight, green grass, and no sunlight, (70) S.Dak. 822.
- increasing, (66) 463, 493; (69) Ohio 99, N.J. 705.
- variations in, (61) 695.
- in mushrooms, (67) 630.
- in pasture grasses artificially dried, (68) Wash.Col. 806.
- in plants, effect of ultra-violet rays compared with irradiation of animals, (66) 595.
- in poultry, formation and function, (61) N.J. 764.
- in production of hatchable eggs, limitations, (64) 765.
- in rabbit fish liver oil, (64) 295.
- in red palm oil, (68) 280.
- in salmon oil, (67) 481; (69) Ohio 90.
- in sardine oil, (67) Calif. 588; (70) 283.
- in shrimp meal and sun-dried shrimp, (67) La. 341.
- in tomatoes, (66) 491.
- in tuna meal, (70) 277.
- in tuna oils, (70) 283.
- in vitaminized margarine, (62) 895.
- international standards for, (67) 776.
- intestinal iron reduction test for and synthesis, (69) Iowa 148.
- irradiated milk v. cod-liver oil as source, (62) 692.
- large doses, effect on dogs, (68) 868.
- line tests, photographic records, (69) 775.
- material, appraisal in terms of rat and clinical units, (70) 136.
- milk, studies, (70) Ohio 669.
- nutritive functions, (69) 756.
- optical rotation, (67) 103.
- overdosage, disease caused by, (63) 95.
- overdosage, effects, (66) 596.
- photochemical formation, (68) 726.
- photosynthesis by ultra-violet radiation of short wave-lengths, (61) 92.

Vitamin D—Continued.

- potency, fecal pH test as measure, (61) 94.
 preparation and properties, (67) 201.
 preparations, (61) 93.
 preparations, evaluation, (62) 296; (65) 496.
 preparations, stability, (68) 153.
 preparations, standardization, (68) 132.
 problem, (62) 502, 804.
 production, (62) 606.
 production in a glow discharge, (68) 14.
 quantitative determination, (68) 14.
 rate of formation in irradiated milk, (68) 523.
 relation to calcium deposition in bones, (63) 295, 395.
 relation to rickets and dental caries, (70) 565.
 relation to rickets in rabbits, (63) 393.
 relation to urinary calculi, (70) 875.
 requirements for calcification of teeth and later resistance to disease, (68) 869.
 requirements of adult rats, (68) 566.
 requirements of calves, (65) Wis. 465; (66) Mich. 162; (68) Pa. 518.
 requirements of poultry, (68) Wash.Col. 797.
 research, (66) 7.
 review of literature, (69) 148.
 role in nutrition of calves, (68) 227.
 role in nutrition of pigs, (70) 223.
 source from winter sunshine, (61) Ind. 366.
 sources, comparative value, (65) Wis. 463.
 stability, effect of heat and exposure to air, (62) 662.
 standard and unit, (66) 690.
 standard for comparative estimation, (64) 295.
 standardization by line test, (67) 345.
 standardized preparations, (68) 565.
 studies, (68) 414.
 studies with chickens, (66) Ky. 165.
 subcutaneous administration, (66) 795.
 supplements, determination of value, (69) 774.
 supplements, effect on egg production, (63) N.J. 366.
 supplements for calves deprived of legume hay, (67) Wis. 731.
 supplements for chickens, (64) Ky. 168.
 supplements for laying hens, (64) Ky. 64; (69) Wis. 839; (70) Ky. 219.
 survey of progress, (70) 11.
 synthesis, (62) 590.
 synthesis by the cod, (68) 419.
 synthesis in plants, (66) 590.
 testing for, methods, (66) 590.
 toxicity, (64) 498; (68) 868.
 treated feed, effect on milk, (65) 399.
 treatment of acne vulgaris, (69) 762.
 treatment of bone tuberculosis, (64) 496.

Vitamin D₁—

- characteristics, (66) 709.
 crystallized, studies, (66) 709.

Vitamin D₂—

- and Calciferol, identity, (67) 201.
 characteristics, (66) 709.
 studies, (66) 709; (68) 726.

Vitamin deficiency—

- effect on breastbone of chickens, (63) Wis. 64.
 effect on suprarenal gland in rats, (62) 197.
 potential, of adults, studies, (66) 393.
 relation to disease resistance, (61) 495.

Vitamin E—

- action on ovarian function, (62) 899.
 and anemia, (61) 297.
 and oxidation of fats and oils, (61) 291.
 and pituitary hormone, (70) 607.
 and prolans A studies, (70) 608.
 and vitamin A, relation, (64) 591.
 deficiency—
 and intrauterine changes in rats, (67) 485.
 effect, (68) 419.
 effect on hematopoietic function, (62) 297.
 effect on lactation, (67) 485.
 effect on poultry, (70) Ill. 661.
 destructive effect of fats on, (66) 94.
 destructive effect of ferric chloride on, (66) 95.
 effect on reproduction in pigs, (63) 360.
 in a ration, destruction, (61) 95.
 in avocados, (64) 587.
 in field-cured and artificially cured alfalfa hay, (68) Nebr. 655.
 in honey, (61) 597.
 in milk, (65) Wis. 459.
 in molasses, (61) 597.
 in poultry feeds, (66) Ill. 261.
 in sorghum, (61) 597.
 in water cress, (64) 586.
 in wheat embryo, (69) 898.
 relation to xanthophyll, (69) 467.
 requirements of breeding fowls, Ill., (64) 867; (68) 654.
 requirements of poultry, (62) 552.
 review of literature, (69) 904.
 specificity for testis, (64) 591.
 studies, (68) 414.

Vitamin F, see Vitamin B (B₁).Vitamin G (B₂)—

- adsorption by Lloyd's reagent, (63) 803.
 adsorption experiments, (70) 10.
 alcohol solubility, (65) 502.
 and B (B₁), differentiation, (61) 710; (62) 113; (63) 710; (66) 92; (69) Mo. 152.
 and B (B₁) separation from dried brewers' yeast, (70) 10.
 and pellagra, (66) 595.
 and protein intake, (69) 472.
 assay, effect of coprophagy, (68) 866.
 chemistry of, (65) 612.
 concentration, (63) 709; (67) 779.

Vitamin G (B₂)—Continued.

- deficiency—
 and iron deficiency, relation, (70) 137.
 clinical aspects, (68) 414.
 effect on carbohydrate metabolism of rats, (64) 792.
 in rats, pathologic changes, (65) 495.
 new symptom complex in, (69) 472.
 nitrogen balance in, (66) 594.
 pathological changes in rats, (64) Ark. 498.
 role in pellagra, (65) 93.
 studies, (66) 199.
 deficient diets, effect on nervous system of rats, (61) 495.
 deficient diets, production in dogs of syndrome similar to sprue by, (69) 470.
 differentiation of factors, (65) 494.
 effect on carbohydrate metabolism, (68) 566.
 effect on consumption and use of food, (69) 899.
 factor in pernicious and related anemias, (68) 280.
 feeding in graded amounts, effect on growth, (61) 593.
 for reproduction and lactation, soybeans as source, (64) 585.
 from egg white, pernicious anemia treated with, (70) 425.
 function and estimation in plant materials, (66) Ga. 196.
 heat stability, (63) 710; (64) 589; (69) 844.
 historical survey, (68) 414.
 in alfalfa and timothy hay cut at various stages, (69) Ohio 90.
 in apple varieties, (64) N.Y.Cornell 694.
 in autoclaved yeast, effect of pH control, (62) 113.
 in banana powder, (70) 279.
 in beef and pork hearts, (70) U.S.D.A. 558.
 in beef and veal, (66) 794.
 in beef extract, (63) 594.
 in body tissues of rats, (69) 469.
 in broccoli, (69) 308.
 in cereals, (62) Ill. 390; (64) Ill. 896; (65) 93, Ill. 589; (70) U.S.D.A. 557.
 in coconut water, (68) 279.
 in corn kernel, (70) Ill. 717.
 in cranberries, (69) 143.
 in dry skim milk and whey, (69) 418.
 in egg white, (65) 591.
 in foods, assay, (66) 596.
 in foods, distribution, (62) 194.
 in fruits, (67) 632; (70) 425.
 in grapes, (66) 896; (68) 414.
 in hay, factors affecting, (69) Ohio 839.
 in lettuce, green and bleached, (70) U.S.D.A. 557.
 in liver extracts, (65) 492, 493, Ala. 493; (66) 197; (67) 187.

Vitamin G (B₂)—Continued.

- in liver preparations, purified, potency, (70) 137.
 in meats and meat byproducts, (63) 793; (70) 424.
 in milk, (64) Ohio 672; (67) 159.
 effect of rations, (66) 865.
 effect of yeast feeding, (69) Ohio 99.
 mixed human, (67) 624.
 pasteurized and evaporated, and eggs, comparison, (68) 133.
 protein-free, factors affecting, (67) Mich. 359.
 in mushrooms, (67) 629.
 in oats, (64) Ill. 896.
 in oriental foods, (61) 894.
 in peanuts, distribution, (67) 778.
 in plantain and pigeonpea, (68) 708.
 in potatoes, (67) La. 341; (68) Idaho 414; (69) Idaho 898.
 in rice polishings, (61) 895.
 in soybeans and milk, comparison, (68) 131.
 in stomach preparations, (67) 187.
 in tomatoes, orange juice, and carrots, comparison, (68) Ill. 704.
 in vegetables, leafy, (65) 590.
 in vegetables, root, (67) 343.
 in water cress, (64) 586.
 in watermelon, (64) 586.
 in yeast, (65) 295; (68) 708.
 new factor in, (68) 568.
 origin as result of coprophagy and refection, (67) 632.
 quantitative determination, (66) 410; (68) Okla. 704.
 quantitative distribution, (66) Ill. 295.
 relation to bios, (63) 708; (65) 296.
 relation to effects of protein-rich diets on kidneys in rats, (65) 794.
 relation to growth factor in tomato juice, (68) 133.
 relation to renal enlargement in rats on high protein diets, (62) 493.
 requirement, relation to high fat diets, (65) Ala. 494.
 requirements for laying hens, (69) Wis. 839.
 requirements in lactation, (66) 393.
 requirements of albino mice, (62) 894.
 requirements of chicks, (69) N.Y.Cornell 90, Ohio 90.
 role in erythrocyte formation, (67) 635.
 solubility in alcohol, (61) 592, 593.
 sources, stability and chemistry, (67) 188.
 stability, (65) Ala. 492.
 stability, effect of pH, (66) 893.
 studies, improvement in method, (69) 469.
 studies, use of chick in, (69) 844.
 treatment with nitrous acid, effect, (61) 711; (65) 311, 612.
 two substances in, (66) Ala. 894.

Vitamin—

- requirements of—
 - cattle and pigs during growth, (69) 563.
 - growing fetus, (62) 692.
 - nursing young, (61) 696, 697.
- salts, crystals, microphotographs, (69) 6.
- supplements for chicks, (67) Mo. 445.
- therapy, intensive, in measles, (69) 151.

Vitaminismus, use of term, (62) 96.

Vitamins—

- action, (70) 874.
- action of radioactive substances on, (66) Mo. 390; (67) 646; (70) Mo. 277.
- aid reduction of lost time in industry, (69) 149.
- and hormones, relationship, (69) 465.
- and infections, (69) 757.
- association with nutritional conditions in plants, (67) Iowa 385.
- bibliographical survey, (68) 703.
- chemistry of, (63) 109; (66) 7; (68) 722; (69) 630; (70) 11.
- deficiency—
 - effect on dental tissues, (70) 284.
 - effect on gastric secretion, (70) 134.
 - relation to anemia, (69) Ark. 758.
 - tissue reactions in, (67) 189.
- destruction by oxidation, (61) 291.
- effect on anemia of rice disease, (62) 596.
- effect on digestion, (64) Okla. 790.
- effect on maintenance and survival periods in rats on different diets, (67) 185.
- excess of, toxic action, (61) 896.
- experiments with poultry, (61) N.C. 764.
- fat-soluble—
 - functions, (65) 205.
 - in milk, (64) 495.
 - nutritional economy, effect of mineral oil, (66) 592.
 - significance in nutrition, (70) 565.
 - studies, (64) 769, 793; (65) 372; (66) 491.
- feeding experiments, statistical method for data, (64) 585.
- in alfalfa hay, changes in, (69) Colo. 840.
- in apples, Jonathan, (63) Mo. 790.
- in cereals, (63) 895.
- in Chinese cabbage, (67) Hawaii 473.
- in cod-liver oil, permanency in stored feeds, (65) 559.
- in cod-liver oil, utilization by cows, (61) Wis. 163.
- in cranberries, effect of preserving processes, (70) Mass. 278.
- in eggs, January and June, (67) Mo. 480.
- in field-cured and artificially cured hay, (67) Nebr. 594.

Vitamins—Continued.

- in fish meals, (66) N.Y.Cornell 655.
- in food products, need for coordination in study, (70) 131.
- in foods, (62) U.S.D.A. 293; (67) Pa. 185.
- in foods, canned, (62) 93, 396; (67) 480; (69) 619.
- in foods of Georgia, (61) Ga. 193.
- in foods of Germany, (62) 395.
- in foods of Hawaii, (69) 756.
- in fruits, (69) Mass. 747.
- in fruits and vegetables, Kans., (61) 193; (64) 896.
- in health and disease, treatise, (69) 897.
- in honey and honeycomb, (62) 93.
- in milk, cow's and human, for infant feeding, (61) 493.
- in milk, effect of nickel container for pasteurization, (65) 92.
- in milk, goat's, (70) U.S.D.A. 513.
- in milk, human, variability, (61) 292.
- in milk, preserved, (63) 287.
- in milk, raw and evaporated, (63) 396.
- in nutrition, importance and methods of measuring, (68) U.S.D.A. 131.
- in oats, (66) W.Va. 564.
- in pears, effect of canning methods, (62) 396.
- in pineapple bran, (62) Hawaii.Pine-apple Cannery 457.
- in plant tissues, availability, (69) 617.
- in practical experience, significance, (70) 724.
- in rations of laying hens, value, (69) Kans. 570.
- in sweetpotatoes, Puerto Rican, (69) Ga. 308.
- in vegetables, canned v. fresh, (67) 88.
- isolation, (67) 200.
- monograph, (68) 564.
- nature and function, (68) 704.
- photochemistry, (67) 500, 501.
- physiological functions, (63) 292; (69) 148.
- physiology, (61) 193; (63) 93, 394, 895; (66) 198, 692; (67) 633; (68) 417; (70) 726.
- present status of knowledge, (68) 414.
- properties, function, and occurrence, (70) W.Va. 420.
- relation to hemoglobin production in rats, (61) 193.
- review of literature, (61) 694; (63) 291.
- role in growth and disease resistance, (69) 464.
- role in treatment of cervical hypersensitiveness, (70) 874.
- standards, international, (66) 690, 691; (67) 480, 776; (68) 564.
- studies, (61) 90; (62) 587; (63) Ga. 192; (64) S.Dak. 693; Ill. 895; (66) Mo. 390, 493; (67) Mo. 480, Wis. 776; (68) 860; (69) 307, Hawaii 747; (70) Ariz. 875.

- Vitamins**—Continued.
 studies. Bezssonoff reaction, (69) 630.
 studies in Canada, (63) 294.
 supplying to poultry, (69) Calif. 88.
 synthesis, effect of light, (66) 590.
 terminology, problems, (70) 874.
 terminology, proposed, (61) 90.
 terminology, proposed, criticism, (61) 90.
 tests, caseinogen for, (66) 591.
 tests, effect of kinds of casein, (63) 193.
 treatise, (65) 587.
 unscrambling, (69) 756.
- Vitasterols, D-**, studies, (61) 297.
- Vitavose**, routine administration to infants, (61) 593.
- Vitellin** in eggs, (68) 721.
- Vitex**, Chinese, introduced into Haiti, (65) 50.
- Vitex**, effect of feeding to cows, (68) Ohio 809.
- Vitula saissetiae** n.sp., description, (61) 550.
- Viviania** n.sp., description, (65) Tex. 899.
- Vivipary** in corn, (67) 225.
- Vlei poisoning**, (63) 171.
- Vocational education**—*see also* Agricultural education, vocational.
 Federal Board for, report, (62) 89, 685.
 in home economics, (64) 389.
 in home economics under George-Reed Act, (62) 89.
 in United States, (65) 89.
 objectives and problems, symposium, (62) 186.
 progress in, (65) 190.
- Vocational trends** in a rural high school, (64) U.S.D.A. 190.
- Volcanic**—
 ash, liverworts as vegetative pioneers on, (69) 336.
 ash, microflora of, (68) 738.
 ash soil, lime status, effect on tobacco leaf quality, (68) 758.
 soils of Sakurajima, Japan, microbiological studies, (62) 118.
- Volck**—
 efficiency for oriental fruit moth, (70) Del. 363.
 oil, insecticidal value, (61) N.J. 750.
 oil, special emulsion number two, as animal insecticide, (66) 849; (70) 359.
- Voles**—
 British, cycles in numbers, (63) 650.
 in Mongolia, (65) 244.
 transmission of louping-ill to, (69) 712.
 water, destruction by *Bacillus typhi murium*, (70) 647.
- Volutella**—
 dianthi, notes, (66) 152.
 pachysandrae n.sp., description, (67) 402.
- Vultures** in Ohio, abundance and food habits, (68) 778.
- Vulvovaginitis** in hogs, (62) Ill. 375.
- Wachter, Henry M.**, biographical note, (63) Ohio 96.
- Wages**—
 changes in, (66) Mich. 286.
 purchasing power, (69) N.Y.Cornell 127.
- Wagons**—
 German farm, treatise, (68) 105.
 steel parts in construction, (68) 390.
 tractive resistance, (61) 681.
- Wahi disease** in cattle, (61) 571.
- Waite Institute for Agricultural Research**, South Australia, notes, (61) 600.
- Walking disease**—
 among horses and cattle, summary, (62) 877.
 of horses, nature and cause, Nebr., (61) 768, 869.
- Walking, energy cost of**, (69) 465.
- Walkingstick**, woodland defoliated by, (65) Conn.State 451.
- Wall tile**, hollow load-bearing, fire resistance, (61) 281.
- Wallace Memorial**, (66) 482.
- Walls**—
 deposition of dust on, (66) 674.
 heat storage capacity, (70) 262.
 heat transfer through, (66) 673.
 masonry, moisture penetration, (67) 464.
 rammed earth, protective coverings for, (69) 438.
 retaining, design, (70) 261, 398.
 retaining, stability, (62) U.S.D.A. 567
- Walnut**—
 aphid, dusky-veined, notes, (61) 246 851; (64) Oreg. 356.
 aphids, control, (70) 206.
 bacteriosis, notes, (65) 644.
 bean, pinhole damage to heartwood, (68) 793.
 blight, notes, (61) Calif. 342; (64) Oreg. 345, Oreg. 346; (69) Calif. 60.
 canker, notes, (63) 699; (65) 543; (68) W.Va. 769.
 canker, symptoms, control, and losses, (64) W.Va. 542.
 case bearer, notes, Fla., (65) 452; (69) 231.
 caterpillar, life history studies, Miss., (62) 53, 152.
 caterpillar, notes, (67) 563; (69) Fla. 231.
 chlorosis, treatment, (62) Calif. 745.
 crown rot—
 notes, (61) Calif. 341; (65) Calif. 744; (66) 645; (69) Calif. 60, 541.
 organism, inoculation tests, (62) Calif. 744.
 relation to *Phytophthora*, (67) 279.
 Cytospora canker, (68) Ariz. 768.
 dehydraters, thermal, efficiency and cost, (67) Calif. 611.

Walnut—Continued.

- diseases, studies, (67) Calif. 535.
 fly, studies, (61) 255; (66) 753.
 husk fly—
 control, (64) 52; (66) 158; (67) 423, Calif. 559; (69) Calif. 71, 833.
 diapause phenomenon in, (66) 447.
 life history and control, (62) 455; (63) 160; (69) 395.
 notes, (61) 255, Calif. 350, Calif. 659; (62) 751; (65) 57, Calif. 755.
 seasonal history, effect of host resistance and temperature, (69) 833.
 spread, water courses as factor, (66) 760.
 oil, California, composition, (62) 109.
 orchards, establishing in Oregon, (70) Oreg. 851.
 pests, notes, (61) Calif. 350.
 sapwood, age, (62) 641.
 trees, composition, effect of saline irrigation water, (65) 519.
 trees, growth studies, (62) Pa. 342.
 trees, spraying, (62) Calif. 745.
 trees, tank experiments, (62) Calif. 744.
 yellows or rosette, notes, (62) Calif. 744.
 yellows, relation to ash constituents, (69) 541.

Walnuts—

- black—
 culture and handling, (66) U.S. D.A. 832.
 effect of dormant oil sprays, (65) 50.
 growth and survival, (68) Ky. 328.
 harmful effects on jack pine growth, (70) Pa. 340.
 notes, (68) Ohio 623.
 tolerance to insecticides, (67) 566.
 top-working, (66) Mo. 331.
 toxic effect, (64) Pa. 142.
 twigs, formation of chambered pith in, (64) 228.
 vegetative propagation, (66) Mich. 232.
 breeding, (68) 623.
 breeding for timber production, (68) 745.
 culture in New York State, (70) N.Y. Cornell 483.
 development of embryo and endosperm, (67) 685.
 English—
 new pest in California, (61) 246.
 production in Oregon, (61) Oreg. 442.
 winter injury, (66) Wash.Col. 741.
 yields, (61) N.Max. 228.
 in Wooster Arboretum, list, (69) Ohio 217.

Walnuts—Continued.

- injuries in dehydration process, detection, (65) Calif. 722.
 insects and pests affecting, (67) 565.
 moldy, relation to picking frequency, (69) Calif. 47.
 mutations in, (69) 28.
 of western Kopet-Dagh, (68) 477.
 pollination, (70) U.S.D.A. 474.
 production, dichogamy, important factor in, (69) 807.
 production, increasing by artificial pollination, (69) 807.
 propagation by cleft grafting, (63) Mo. 734.
 propagation, vegetative, (63) 835.
 starch cycle in, (61) Calif. 336.
 storing, (70) 630.
 studies, (67) Calif. 526; (70) Mo. 182.
 supply and price situation, (62) Calif. 179.
 variety and stock tests, (69) Fla. 209.
 variety tests, (65) N.Mex. 227.
 winter injury, (64) Okla. 738.
 Warble flies—*see also* Cattle grubs, Hypoderma, and Ox warble.
 in North Wales, control, (64) 547.
 studies, (63) 53; (64) 248; (68) 811.
 Warble fly, new species in Cyprus, (66) 557.
 Ward, F. E., obituary notes, (70) 736.
 Warts on cattle, (62) 470; (65) U.S.D.A. 673.
 Wash bottle flask, nonspattering semi-automatic, description, (61) 108.
 Washing—
 bottle for gas chain measurements, description, (61) 412.
 colloid chemistry, (69) 324.
 compounds, efficiency in milk plants, (65) 259.
 machines, current consumption, (69) Ind. 153.
 machines for milk cans, (61) 479.
 machines, studies, (65) Nebr. 898; (66) Va. 598.
 powders, germicidal properties, (61) 411.
 Washington—
 College, notes, (61) 500, 900; (62) 700; (63) 199, 600, 799; (64) 400, 798; (65) 100, 799; (67) 495; (68) 284; (69) 623.
 College Station, notes, (61) 500, 900; (62) 700; (63) 600, 799; (64) 400, 798; (65) 100, 499, 799; (67) 192, 495.
 College Station, report, (63) 299; (64) 697; (66) 798; (68) 874.
 George, and agriculture, list of annotated references, (66) U.S.D.A. 191.
 George, the master farmer, (67) Mich. 494.
 Station, notes, (68) 284; (70) 735.
 Station, Western, report, (62) 599; (64) 697.
 Wasmannia auropunctata, establishment in United States, (61) 256.

Wasp—

- digger, and its inquiline flies, habits, (64) 756.
- digger, notes, (65) 355.
- pipe organ, nest building habits, (61) Conn.State 547.

Wasps—

- cockroach-hunting, habits (68) 507.
- jungle, of largest island in Gatún Lake, (69) 560.
- mud, of tobacco leaves, (67) 150.
- of family Sphegidae, monograph, (62) 861.
- paper, as pests in bird houses, (62) 547.
- paper, of Utah, (68) 497.
- parasitic, effect of X-rays, (62) 214, 457.
- scoliid, parasitic on sugarcane grubs, (70) 357.
- seed-infesting chalcid, of West Indies, (69) 72; (70) 217.
- siricid wood, in Great Britain, (62) 359.
- solitary, behavior, (61) 58.
- witchery of, (67) 581.
- wood, biology and technical significance, (69) 234.

Waste—

- products of agriculture, utilization as humus, treatise, (66) 318.
- treatment, colloidal aspects, (69) 324.

Wastes, dairy, treatment and disposal, (66) 381.

Water—*see also* Irrigation water.

- absorption by aerial parts of plants, (69) 25.
- action of chlorine in, importance of ammonia, (70) 113.
- added to milk, detection, (62) 312; (66) 610.
- adsorbed on silica gel, density, (65) 504.
- analysis for sanitary and technical purposes, (68) 729.
- and nitrogen relations of crops in rotations, (64) N.Y.State 422.
- and organic matter in soils, combined, determination, (70) 581.
- and plant relations, (65) 24.
- and plant relations, treatise, (64) 724.
- and soil conservation, national program, (65) 320.
- artesian, ground reservoir, drainage of land overlying, (69) Utah 118.
- artesian, supply of Memphis, (65) 879.
- bacteriological examination, (64) 781; (68) Mich. 288.
- bacteriology, elements, treatise, (66) 476.
- balance, daily, of plants in arid regions, (69) 189.
- balance in tropical plants, (66) 621.
- boron determination in, (66) 207; (68) 440.

Water—Continued.

- bound and free, in insects, determination, (66) 447.
- bound, in plant tissue, determination, (67) 504; (70) 599.
- bound, notes, (67) 559.
- bowls, effect on water consumption of cattle, (65) Iowa 169.
- bowls, use in dairy barn, (68) Iowa 239.
- buffaloes—
 - determination of age, (62) 658.
 - infection with muscle parasite, (64) 267.
 - malignant catarrhal fever in, (63) 773.
 - tapeworm parasites from (66) 574.
- capillary rise through soils, (66) 118, 413; (67) Hawaii 366.
- carried for household purposes on farms, (61) Nebr. 882.
- chestnut, vitamin C in, (61) 595.
- chlorination in combating yellow fever, (61) 854.
- colored natural, decolorization, (67) 360.
- combined in soils, determination, (68) 727.
- composition and mosquito breeding, (61) 55.
- conduction in lemon twigs and fruits, (64) 51.
- conduction in plants, method for study, (65) Oreg. 738.
- conduction in trees, (70) 777.
- consumption—
 - and requirements of cattle, (68) Idaho 369.
 - of cattle, relation to method of watering, (67) U.S.D.A. 65.
 - of dairy cattle, (66) W.Va. 568.
 - of sheep and goats, (61) Oreg. 60.
- content of leaves, relation to wilting, (61) 627.
- control in soils, (69) Fla. 281.
- diluting, effect on biochemical oxygen demand, (65) 881.
- dilution, selection for bacteriological examinations, (70) 251.
- disinfection, (68) Mich. 720.
- dispersion of soil colloids in, (66) 15.
- distilled, effect on colony formation on petri plates, (61) 265.
- distribution by spraying devices under different wind velocities, (61) 476.
- drinking, preparation with Carbosteril, (69) 117.
- drinking, purification by filtration, (68) 828.
- drinking, saline and alkaline, (68) 797.
- economy in agricultural plants, (64) 526.
- effect in pig's ration, (64) Oreg. 371.
- examination, standard methods, (69) 330.
- exchange, total, of human being, measurement, (65) 792.

Water—Continued.

- flow—
 around bends and bridge piers, (61) U.S.D.A. 379.
 in flumes, (70) U.S.D.A. 838.
 in open channels, uniform, discharge diagram, (64) 566.
 in pipe, solution of special problems, (68) 828.
 in riveted steel and analogous pipes, (62) U.S.D.A. 778.
 in silt-laden canal gaged by contracted flume, (64) 779.
 in soils, coordination of research, (67) 322, 323.
 through fine screens, head loss in, (67) 606.
 through groups of sluices, (68) 385.
 through notch weirs of different types, (68) 827.
 for livestock, heating during zero weather, (66) 476.
 for stock and poultry, electrical heating, (64) 82.
 forms and functions in soil, (67) 219.
 gardens, construction and plant materials for, (64) Ohio 142.
 gardens, treatise, (69) 216.
 grass, control, (62) Calif. 777.
 grass in rice fields, control, (61) Calif. 378.
 ground—
 in Pomperaug Basin of Connecticut, (61) 476.
 of Middle Rio Grande Valley, relation to drainage, (64) N.Mex. 269.
 rate and cause of rise in Mesilla Valley, (69) N.Mex. 282.
 structures for control, design, (70) 839.
 studies, (61) Utah 76; (70) Ariz. 837.
 heaters, electric dairy, (69) Ind. 116.
 heaters, electric, for poultry, (61) Ind. 377.
 heaters, solar, studies, Calif., (61) 375, 779.
 heating by solar energy, (67) 608.
 heating studies, (66) Va. 598; (69) 598.
 hot, for seed treatment, effect, (66) N.Y.State 151.
 hyacinth seedlings in Burma, (69) 797.
 ices, use of grapes and raisins in, (64) 282.
 ices, use of honey in, (65) 488.
 in colloidal and living systems, state of, (68) Minn. 5.
 in living organisms, nature, (69) Minn. 318.
 in north-central Tennessee, (68) 536.
 in phosphate rock, (69) 487.
 in soil, dynamics, (66) 419.
 in soils, movement, (66) P.R. 210.
 in swimming pools, orthotolidine test for free chlorine, (61) Mich. 411.

Water—Continued.

- in winter-flooded bogs under ice, oxygen in, (68) 621.
 intake, deficient, effect on rats, (65) 792.
 level investigation, (62) 567.
 level, underground, relation to drought of 1930, (68) 158.
 lilies, treatise, (69) 216.
 loss from fruit, internal factors in, (68) 334.
 loss from plants, effect of foliage sprays, (63) 426.
 losses, run-off, relation to crop production, (62) Tex. 614.
 measurement and evaporation, (70) Colo. 687.
 measurement for cement briquet tests, (64) U.S.D.A. 271.
 measurement on Venturi flume, (63) Colo. 580.
 metabolism, aspects, (67) 769.
 movement—
 and porosity of soil, (70) 105.
 in Gila clay, effect of head, (63) 878.
 in permeable earth bodies, (69) 118.
 in plants, (68) 171.
 in soils, (63) 378.
 of Colorado River in 1928-30, quality, (68) 384.
 of Maryland, iodine in, relation to goiter, (61) 393.
 of North China, iodine in, (64) 581.
 of Virginia, chemical character, (69) 117.
 oxygen in, methods of determination, (68) 621.
 passing through creosoted wood stave pipe, elimination of taste in, (66) 580.
 penetration into logs, mode, (63) 837.
 percolation rates in soils, measuring, (63) 421.
 pH determination in, (64) 506.
 phosphates in, determination, (68) 584.
 plan, State, of California, (69) 442.
 plants and water soils, relation, (69) Mich. 495.
 polluted, natural purification in, (70) 251.
 pollution, bacterial and chemical, underground travel, (68) 630.

 top-dressing with nitrogen, (69) Ind. 776.
 toxicity of selenium to, effect of sulfur, (70) 757.
 trade, organization in India, (69) 295.
 treatise, (63) 782.
 trends in purchasing power and cost of production, (66) Mich. 286.
 two series of hard red spring, comparison, (68) 189.
 under continuous cropping, yield, (70) Mo. 172.
 upland v. bottom land for, (61) N.C. 725.
 used as fuel, calorific value, (69) Idaho 871.
 v. corn for lamb feeding, (66) Ill. 257.
 v. corn for milk production, (67) Ohio 65.
 v. corn for pigs, (66) Ky. 164.
 v. milo for dairy cows, (70) Tex. 233.
 v. wheat and tankage for fattening pigs, (67) Okla. Panhandle 301.
 value for dairy cows, (67) N.Dak. 731.
 value for steers, (66) Ill. 255.
 variation in quality in replicate plats, (64) 31.
 variations in local prices, (65) Mo. 485.
 varietal comparisons, (61) Kans. 126.
 varietal mixture, effect on milling and baking quality, (67) 129.
 varieties, (61) Ind. 328; (62) Ga. Coastal Plain 728; (63) N.Dak. 822, Ohio 824; (64) Oreg. 734; (66) Wash. Col. 32; (70) Va. 764.
 adaptation in Pacific Northwest, (68) 615.
 and classes, distribution, U.S.D.A., (61) 638; (70) 771.
 baking qualities, (62) Ill. 390.
 behavior records of, immunity against parasites, (66) 339.
 cold resistance in, (69) Kans. 200.
 commercial, comparison, (66) Mich. 431.
 cooperative evaluation of quality, (64) 31.
 culture and selection, (68) Ark. 188.
 differences in breaking strength, (70) 173.

Wheat—Continued.

- varieties—continued.
 for Columbia River Basin, (69) Oreg. 208.
 grown in Morocco, (63) 828.
 growth, effect of *Tilletia* spp., (64) 231.
 hereditary physiological characters, (66) 18.
 Hessian fly-resistant qualities, Mo., (66) 346; (67) 424.
 home-grown, in England, quality, (67) 31.
 improved, registration, (61) 226; (62) 523; (67) 130; (68) 614.
 in Australia, (70) 473.
 in eastern Washington, comparison, (70) Wash. 771.
 new, (64) Oreg. 334.
 of Saskatchewan, comparison, (66) 136.
 of South Australia, classification, (68) 189.
 on high plains of Oklahoma, (66) Okla. 136.
 purification, (67) Calif. 516.
 resistance to sprouting in shocks, (68) 189.
 under irrigation, (64) Mont. 436.
 white, (70) U.S.D.A. 614.
 yields, (63) 438; (64) Mich. 399.
 variety-cultural experiments, (69) Iowa 37.
 variety-date-of-seeding experiment, (61) Calif. 328; (62) 220.
 variety tests, (61) West. Wash. 29, Kans. 125, N.Mex. 219, Ind. 329, Mich. 432, N.J. 724, N.C. 725, N.Dak. 726, Va. 726, Nebr. 824; (62) Mo. 31, N.C. 37, Alaska 127, S.C. 625, Tex. 626, Calif. 727, Del. 728, Ark. 828; (63) S.Dak. 31, Ohio 31, Wyo. 130, Wyo. 135, N.J. 331, Tex. 435, Ohio 525, N.C. 629, Mo. 728, N.Dak. 820, N.Dak. 823, Ohio 823, 824, Ohio 824; (64) W.Va. 133, Ark. 430, Ga. Coastal Plain 37, Md. 643, Idaho 788; (70) Mo. 172, Tenn. 172, Tex. 173, Ind. 321, Ariz. 761, Ga. Coastal Plain 762, N. C. 762.
 variety tests, border effect in, (66) Idaho 29.
 water requirements, (65) 128.
 weak and strong, digestibility for poultry, (62) 868.

Wheat—Continued.

- weight per bushel, effect of temperature, (63) N.Dak. 820.
- white, texture relation to protein in, (61) Mich. 731.
- whole, and bran, effect on hemoglobin regeneration, (68) 412.
- whole, and bran v. liver for hemoglobin regeneration, (69) 145.
- whole and cracked, cooking and using, (66) Ill. 485.
- whole, for hemoglobin regeneration, value, (61) 589.
- whole, home preparation and use in cooking, (66) Okla.Panhandle 88.
- whole, vitamin A in, (70) Tex. 131.
- wild, eradication, (61) 227.
- winter—
 - acre values, (69) Minn. 201.
 - and spring, biological differences, (61) 829.
 - as forage crop for pigs, (68) Idaho 363.
 - breeding, (63) Nebr. 627; (65) Nebr. 822; (68) Mont. 753; (70) S.Dak. 763.
 - breeding for rust resistance, (68) S.Dak. 754.
 - cold resistance in, (67) 508.
 - cold resistance in, physiology, (70) 314.
 - culture, (68) Mont. 753.
 - culture experiments, (63) Idaho 523, 728; (68) Wash.Col. 755, Wyo. 755.
 - culture in Lawton, Oklahoma region, (68) U.S.D.A. 467.
 - culture in South Dakota, (70) S.Dak. 43.
 - decrease in hardiness, factors affecting, (69) 638.
 - development, climatological study, (66) 207.
 - dry-land culture, (61) U.S.D.A. 724; (65) N.Mex. 527; (69) Nebr. 789.
 - effect of date of seeding, (61) 334.
 - effect of preceding crop, (61) Kans. 126.
 - effect of subfreezing temperatures, (64) Kans. 826.
 - grazing, (61) Okla.Panhandle 131.
 - hard red, breeding, (62) U.S.D.A. 134.
 - hard red, varieties, (62) U.S.D.A. 37.
 - hardness, 61 Iowa 329; (62) Ill. 327.
 - hardy and nonhardy, root development, (68) 189.
 - hardy strains, (64) Mich. 215.
 - harvest period, (61) Iowa 329.
 - improved sorts, (69) Md. 643.
 - in rotation, cause of failure, (67) 17.
 - nitrogen as a limiting factor in production, (64) 32.

Wheat—Continued.

- winter—continued.
 - pasture yield and utilization, (65) Okla.Panhandle 129.
 - pasturing with horses, (61) Kans. 126.
 - physical measurements at various stages, (62) 522.
 - response to dates of planting and methods of soil preparation, (69) N.Mex. 200.
 - response to top-dressing with nitrogen, (67) Nebr. 505.
 - rotation and tillage experiments, (69) U.S.D.A. 789.
 - seed bed preparation, (65) Wyo. 127; (66) Tex. 27; (68) 105; (69) Kans. 201.
 - seeding date, effect on development and hardiness, (61) 830.
 - seeding experiments, (61) Kans. 126; (62) Mont. 219; (64) Utah 433; (65) Idaho 222.
 - sowing sweetclover in, (67) Ohio 240.
 - tillage experiments, (63) Nebr. 628.
 - tillage methods, (61) Wyo. 130.
 - uptake of nutritive material by, (67) 661.
 - v. spring, comparison, (67) Ohio 30.
 - varietal resistance to low temperature, (70) Kans. 322.
 - varieties, (61) 226, N.J. 521; (62) 130; (64) Minn. 134, Utah 433.
 - varieties, acre yields, (66) Ind. 27.
 - varieties and strains, (67) N.J. 123, Kans. 240.
 - varieties for cut-over land, (65) Idaho 222.
 - varieties for Ohio soils, (67) Ohio 521.
 - varieties, hardiness and yield, (64) U.S.D.A. 436.
 - varieties in Nebraska, (70) Nebr. 42.
 - varieties, registration in Germany, (68) 755.
 - varieties, resistance to Hessian fly, (66) Kans. 556.
 - varieties, yields, (67) Ind. 667; (70) Ill. 609.
 - variety tests, (61) Oreg. 26, Utah 27, Idaho 822; (62) Ind. 30, Ill. 327; (63) Wash.Col. 224, Kans. 433, Idaho 523, Nebr. 627, Utah 630; (64) Ind. 130, Mont. 216, Oreg. 334, Wash.Col. 626, Alaska 731; (65) Utah 627, Nebr. 822; (66) Wash.Col. 730; (67) N.Mex. 29, Nebr. 517; (68) Utah 183, Nebr. 320, Ill. 608, Mont. 753, Wash.Col. 754, Wyo. 755; (69) Kans. 200, N.Mex. 200, Me. 353, Oreg. 354, Nebr. 512, Ind. 789, U.S.D.A. 789; (70) Wyo. 763, Ill. 609, 610.

Wheat—Continued.

winter—continued.

- vitamins B and G in, (65) Ill. 589.
- winter resistance, (67) Iowa 378.
- yield, (63) N.Dak. 822.
- yield, forecasting, (68) 688.
- yield, relation to soil moisture at seeding time, (64) 135.
- yields, effect of *Fusarium nivale*, (63) 145.
- yields from nineteen years of rotations, (70) S.Dak. 36.
- yields in various locations in Oregon, (66) 825.
- yields on fallow and following various crops, (66) U.S.D.A. 221.
- winterkilling, (64) Ill. 825.
- wireworm, control, (63) 754.
- wireworm on potatoes, (70) N.Y.Cornell 803.
- world, milling and baking qualities, (64) U.S.D.A. 136.
- X-ray mutations in, (65) 325.
- yellow rust—
 - and stinking smut, relation, (64) 231.
 - resistant strains, (62) 147.
 - varietal behavior toward, (67) 692.
- yellow spot disease, notes, (64) 350.
- yield—
 - and composition, effect of different nutrients, (62) 121.
 - and composition, effect of fertilizers, (64) 536.
 - and cost per acre, (67) Md. 613.
 - and dependability, (69) Okla.Panhandle 790.
 - and quality, relation to weather, (64) 14.
 - and tree growth in southern Saskatchewan, (69) U.S.D.A. 178.
- yields, (63) 437; (64) Ky. 131, Alaska 731, Kans. 826; (66) Okla.Panhandle 29, N.Dak. 131; (69) Ind. 789.
- analysis, (61) 521.
- at Woburn, (67) 123; (68) 319.
- determination, technic, (65) 628.
- effect of drought, (67) Ohio 30.
- effect of fertilizers, (63) 332.
- effect of leaf rust, (63) 145.
- effect of lime and legumes, (61) N.C. 725.
- effect of phosphorus, (66) Mont. 426; (68) S.Dak. 754.
- effect of preceding crop, (63) S.Dak. 31.
- effect of seed disinfectants, (66) Ill. 235.
- effect of sulfur, (63) 322.
- effect of terracing dry land, (68) Okla. 609.
- following soybeans at various intervals, (66) W.Va. 528.
- for feeding purposes, (63) N.Dak. 823.
- forecasting, (61) 688; (65) 111.

Wheat—Continued.

yields—continued.

- in Canada and exporting and importing countries, (68) 687.
- in China, field technic, (63) 442.
- in dry farming areas, (65) N.Mex. 222.
- relation to sun spots, (63) 518.
- relation to weather, (62) 611; (67) 123.
- relation to weather in India, (63) 14.
- variation in experimental plats, (69) 198.

Wheatgrass—

crested—

- description, (67) U.S.D.A. 518.
- effect of shelter belt and manuring, (70) Wyo. 763.
- factors affecting production, (69) Wyo. 791.
- life history and habits, (68) 321.
- water requirements, (65) 128.
- slender and crested, clipping experiments, (63) N.Dak. 825.
- tests, (67) N.Mex. 29.
- western, range, effects of systems of grazing, (66) Colo. 26.
- western, water requirements, (65) 128.
- yields, (64) Mont. 218.

Wheat-rye hybrids—

- prophases of heterotypic division in, (62) 511.
- studies, (61) 217.

Wheel type, effect of impact reaction, (61) U.S.D.A. 775.

Wheels, stresses in, (66) 475.

Whey—

- as pasture supplement for pigs, (62) 163.
- dried, feeding value for poultry, (68) S.C. 796.
- dried, growth promoting value for chicks, (68) 234.
- dried, vitamin B and G in, (69) 418.
- drying, evaporating and preheating apparatus, (68) 243.
- feeding value, (69) Calif. 88.
- proteins from normal and abnormal udders, (70) 151.

Whipworms—

- anthelmintics for, tests, (65) 874.
- in dogs, treatment, intra-cecal method of injection for, (66) 669.
- n-butylidene chloride test for, (69) 106.

White ants, *see* Termites.

White grubs—

- control with rotary plow, (67) 577.
- in eastern Canada, (66) 347.
- in lawns and flower gardens, (64) Ohio 650.
- in lawns and golf courses, control, (63) 357.
- in Michigan, (63) Mich. 357.
- in pasture land, (65) Wis. 452.
- in sugarcane fields, control, (69) 826.
- injurious to sugarcane in British Guiana, (70) 366.

White grubs—Continued.

- injury to bluegrass, effect of environment, (67) 292.
 - injury, reduction by Bordeaux mixture, (68) 215.
 - natural enemies, (67) 562.
 - nervous system, (65) 546.
 - new habits, (67) Wis. 706.
 - notes, (64) Iowa 851; (65) Mich. 153; (68) Ill. 637; (69) Iowa 71, Wis. 825; (70) U.S.D.A. 499.
 - on pineapple, control, (66) Guam 448.
- White House Conference on Child Health and Protection, committee report on milk, (66) U.S.D.A. 89.
- White in cattle, types, (63) 25.
- White pine—
- afforested area, hardwood invasion, (69) 58.
 - and birch forest, soil temperatures and evaporation, (69) 58.
 - bark aphid, control, (67) 566.
 - blight on seedlings, control, (63) Ohio 45.
 - blister rust—
 - and piñon rust, differentiation, (62) 750.
 - biological control, (67) 48.
 - cankers, *Dasyscypha agassizii* on, (67) 418.
 - control, (63) Conn.State 350; (64) Conn.State 842; (65) 543; (69) Conn.State 217; * (70) U.S.D.A. 486.
 - damage at Waterford, Vermont, (70) 353.
 - eradication work, (62) 150.
 - European v. North American, (61) U.S.D.A. 51.
 - infection, determining age, (69) 679.
 - mode of entrance and periods in life cycle, (70) 800.
 - need for reeradication work, (67) Conn.State, 535.
 - notes, (70) U.S.D.A. 486.
 - resistance of a currant variety to, (64) 745.
 - resistance of new shoots of *Pinus monticola*, (70) 497.
 - sporidia, field inoculations with, (69) 679.
 - change in form after thinning, (68) 339.
 - cones and seeds, (63) 539.
 - dominance in, early expression, (69) 371.
 - even-aged stands, survival table for, (68) 767.
 - growth rate, (64) N.Y.Cornell 639.
 - in southern Appalachians and New England, growth rate, (70) 484.
 - investigations, (61) N.H. 142.
 - light requirements, (61) 42.
 - new moth affecting, (67) 435.
 - northern, in southern Appalachians, (68) 485; (69) 660.

White pine—Continued.

- photosynthetic activity, (70) Vt. 191.
 - plantations, notes, (61) Mich. 442.
 - plantings, (66) Ga. 743.
 - reproduction, effect of thinning, (69) Vt. 809.
 - reproduction on burned lands, (68) 339.
 - root growth, (66) 743.
 - scale, control, (64) Mich. 239.
 - scale, toxicity of petroleum oils to, (64) 54.
 - second-growth, value, (63) Wis. 836.
 - seed, one-year storage, (63) 642.
 - seedling analysis in field, inaccuracy, (67) 534.
 - seedlings, germination and development, effect of soil temperature, (66) Vt. 638.
 - seedlings, mycorrhizae on roots, (67) 373.
 - slash decay in southern New England, (62) U.S.D.A. 239.
 - snow mold, notes, (66) 147.
- weevil—
- attack on Scotch pine, (69) 245.
 - biology and control, (63) 358.
 - biology and parasites, (64) 250.
 - control, (68) 793.
 - in Eli Whitney Forest, (64) 754.
 - in Michigan, (66) Mich. 159.
 - life history studies, N.H., (61) 153; (63) 56.
 - natural history, (62) 648.
 - nema associated with, (63) 655.
 - new host record, (64) 154.
 - notes, (64) N.Y.Cornell 639.
 - summary, (67) U.S.D.A. 439.
 - western, second-growth, yield, stand, and volume tables, (68) U.S.D.A. 339.
- White scours—
- of calves, (68) 812; (70) Nebr. 96.
 - of cattle, (64) Oreg. 378.
- White top borer—
- of sugarcane in Java, control, (65) 355.
 - studies, (70) 357.
- Whitefish, dried, vitamin D and proteins in, effect of methods of drying, (69) Me. 410.
- Whiteflies—
- new species of Formosa, (67) 432.
 - notes, (66) Ind. 238.
 - of Egypt, (68) 784.
 - of India, (66) 351; (67) 151.
 - parasites, identity and descriptions, (68) 794.
 - vectors of cotton leaf crinkle, (64) 361.
 - vectors of zinnia leaf curl, (69) 828.
- Whitefly—
- citrus—
 - and *Dialeurodes kirkaldyi*, distinguishing characters, (69) 690.
 - campaign in California, (62) 448, 449.
 - control, (64) 52.
 - food plants, (69) 689.
 - in California, (67) 423.
 - notes, (64) Ala. 354.

Whitefly—Continued.

- citrus—continued.
 - original description in 1883, (68) 641.
 - parasite of, (62) 360.
 - progress, (67) 705.
- greenhouse—
 - biological control, (65) 361.
 - carrier of potato mosaic, (64) 233.
 - life history, (67) 432.
 - life history and control, (61) 356.
 - on cotton in Punjab, (65) 654.
 - rhododendron, notes, (61) 357.
 - sugarcane, notes, (67) 562.
 - toxic spray for, (61) Md. 656.
 - woolly, undescribed parasites of, (68) 794.

Whitewash—

- use, (68) Mich. 826.
- value as wood protector, (65) Mich. 778.

Wild life—*see also* Animals, wild, Birds, and Game.

- conservation in Wyoming, (63) 250.
- cyclic losses, (70) U.S.D.A. 498.
- in Alaska, Federal laws relating to, (70) U.S.D.A. 498.
- of forest, research, (70) U.S.D.A. 498.
- of Oregon, parasites, (70) 355.
- on northern farms, winter feeding, (70) U.S.D.A. 202.
- reservations, national, (62) U.S.D.A. 52.

Willow—

- as prevention for shifting sand, (65) Mich. 742.
- beetle outbreak, (61) Wis. 154.
- cuttings, rooting and callusing, (61) 737.
- leaf beetle, European, notes, (68) 68.
- leaf beetle, imported, notes, (69) 232.
- scab fungus, biological studies, (67) 703.
- scab fungus, studies, (61) Conn.State 349.
- scab, notes, (64) Conn.State 842.
- weeping, *Cytospora* canker, (68) Ariz. 768.
- weevil, control, Calif., (62) 752; (67) 559.
- weevil, life history studies, (65) Calif. 753.

Willows—

- basket, cambium miner, (70) 67.
- basket, culture, (62) 144.
- basket, *Physalospora* disease, (65) 544.
- insects affecting, (63) 751; (67) 284.
- new fungus on, (67) Conn.State 535.
- two *Marssonina* diseases on, (69) 542.

Wilson, E. H., biographical sketch, (67) 262.

Wind—

- and central station power in Germany, (67) 467.
- effect on plant growth, (64) Okla. 717, 725.
- effect on spread of mosquitoes, (62) 249.
- electric plant, (69) Iowa 597.

Wind—Continued.

- electric power of Oklahoma, (69) 877.
- farm building losses in Iowa due to, (67) 612.
- injury to citrus and persimmons, avoiding, (69) Calif. 47.
- injury to forests in Switzerland, (69) 14.
- injury to leaves and fruits, (70) 168.
- losses to farm buildings, prevention, (65) Iowa 677.
- protection of forests and crops against, (70) 744.
- resistant construction for farm buildings, (68) U.S.D.A. 838.
- roses, upper-air, and resultant winds for eastern United States, (70) U.S.D.A. 744.
- stresses in buildings, treatise, (63) 881.
- temperature, and sunshine, (61) U.S. D.A. 313.
- Windlass tractors, description, (63) 380.
- Windmills, use in irrigation on high plains, (63) Okla.Panhandle 482.

parasitic wasps, (62) 214, 457.
plant neoplasms, (62) 122.
plants, (69) N.Y.Cornell 25, 638.
spermatogenesis, (62) 516.
genetic mutations produced by, (69) 28.
high-voltage, effect on seeds, (69) 638.
high-voltage, exposure of seed to, effect on plants, (70) 314.
inducing somatic variations in *Drosophila*, cause, (63) 217.
mutations induced by, (61) 820; (62) 322.
relation to chromosome translocations in *Drosophila*, (62) 124.
Xylan, fermentation products, (69) Iowa 3.
Xylaria mali, notes, (67) 410.
Xyleborinus sp., notes, (70) 812.
- Xyleborus*—
genus, studies, (64) 249.
germanus, notes, (67) 559.
hirsutus, notes, (68) 793.
- Xyleutes ceramicus*, notes, (67) 562.
- Xylococcus macrocarpae*, honeydew from, (69) 555.
- Xylocopa* species, life history, (67) 441.
- Xylocrius agassizii*—
life history and control, (61) Oreg. 52.
notes, (64) Oreg. 356.
- Xylodrepa quadripunctata*, notes, (63) 846.
- Xylomyces* I, notes, (62) 538.
- Xylonomus* spp., biology, (67) 584.
- Xylose, fermentation by nodule bacteria, (62) 414.
- Xylotrechus*—
quadrimaculatus, notes, (70) 205.
quadripes, chalcid parasite in Indochina, (69) 561.
- Yacca, eradication, (65) 533.
- Yak and zebu hybrids, (67) 377.
- Yak-Galloway hybrids, carcass tests, (69) Alaska 88.
- Yaks and hybrids, histological structure of testes, (64) 430.
- Yam beetle, life history and control, (64) 249.
- Yams—
breeding, P.R., (67) 517; (69) 39.
in Nigeria, insects affecting, (61) 450.
intercropping cotton with, (65) 528; (66) 823.
trellis tests, (70) Guam 762.

Yams—Continued.

trellised and nontrellised, variety tests, (64) Guam 823.
 variety tests, Guam, (66) 426; (70) 762.
 watery disease of, (65) 345.
 white, analyses, (68) 271.
 white and yellow, vitamin A in, (68) 278.

Yarns, testing, (66) 97.

Yautias—

culture, P.R., (62) 731; (64) 336.
 fertilizer experiments, P.R., (67) 517; (69) 39.
 introduced varieties compared to native, (70) Guam 762.
 tests, (66) P.R. 527.
 variety tests, (66) P.R. 223; (69) P.R. 790; (70) Guam 762.
 yellow and white, analyses, (68) 271.
 yellow, vitamin B complex in, (65) 397.

Yeast—

and mold counts in butter, relation to keeping quality, (62) 464.
 antianemic potency, (63) 897.
 ash, vitamin B in, (66) Ill. 296.
 autoclaved dried, pellagra preventive value, (70) 282.
 brewers', extraction of vitamin B (B₁) from, (70) 10.
 brewers', purification of antineuritic vitamin from, (61) 710.
 cells, effect of growth-promoting substances, (63) 217.
 cells, lethal effect of alternating current on, (69) Calif. 6.
 count in butter, effect of media, (70) 237.
 crystalline concentrates of vitamin B₁ from, (70) 153.
 dried, for treatment of rickets and osteomalacia, (68) 133.
 dried, wheat germ, and rice bran, comparison for vitamin B content, (69) Hawaii 747.
 effect on chick rations, (69) Wis. 839.
 effect on lactation, relation to copper, (61) 92.
 ergosterol in, factors determining, (64) 708.
 extract, a second thermolabile factor from, (62) 589.
 extract, effect on rickets, (64) 597.
 extract medium for examination of milk, Mich., (69) 102, 103.
 feeding, effect on vitamin B and vitamin G in milk, (69) Ohio 99.
 feeding to hens, effect, (64) 468.
 feeding value for fattening pigs on rape pasture, (69) Iowa 89.
 foods, analyses, (67) 365.
 forms from *Eutettix tenellus*, (61) 250.
 fresh and dried, as sources of vitamin B, (70) 727.
 glutathione behavior in, (65) 310.
 growth, effect of manganese, copper, and zinc, (68) 174.

Yeast—Continued.

growth-promoting value for chicks, (67) 729.
 hemoglobin regenerating power, (63) Ohio 66.
 in bottled beverages, heat destruction, (62) Calif. 787.
 in butter, determination methods, (67) 162.
 in diet, effect during lactation, (63) 490; (65) 398.
 in fermenting honey, characteristics, (66) 10.
 in grape juice plant, thermal death point, (70) 300.
 in ration of laying pullets, (63) N.Dak. 861.
 ingestion, effect on composition of urine and feces, (69) 146.
 invertase, diffusion through colodion membranes, (64) 111.
 irradiated—
 antirachitic value, (63) 495; (67) 89.
 effect on antirachitic value of milk, (64) 793.
 effect on calcium and phosphorus metabolism, (63) 865.
 effect on cows, (69) 259.
 feeding to cows, effect on milk, (63) Wis. 68; (65) 372; (66) 463, 493; (68) 132.
 feeding value, (66) N.H. 63.
 liberation of invertin from, (70) 742.
 media, standardization, (70) 671.
 molds, and bacteria in the home, (68) 275.
 nitrogen in, determination, (62) 312.
 nutrients necessary to impart vitamin potency, (70) Ky. 282.
 nutrition factors other than vitamins, (67) 186.
 pathogenic for man and animals, (65) 872.
 potency, effect on vitamin A technic, (62) Pa. 397.
 preparation of glutathione from, (64) 9.
 preparations, pests in, (61) 753.
 proteins, biological value for rats, (61) 790.
 role in life history studies of apple maggot, (64) 858.
 samples, vitamin B and G in, (65) 295.
 sulfur metabolism, (61) 23.
 supplements, effect on corn and soybean rations, (67) 295.
 vitamin B (B₁) concentrates, preparation and behavior, (66) 707.
 vitamin B (B₁) crystalline preparations from, (68) 725.
 vitamin B (B₁) in, (68) 708, 866.
 vitamin G (B₂) in, (68) 708.

Yeasts—

Actinomycetes, and molds, treatise, (68) 742.

- Yeasts—Continued.
 growth, effect of manganese, copper, and zinc, (66) Ky. 119.
 key for, (61) 819.
- Yellow aphid, notes, (62) 153.
- Yellow fever—
 in South America, studies, (62) 856.
 mosquito larvae, effects of freezing, (70) 656.
 mosquito larvicides, tests, (66) 760.
 mosquitoes—
 and fowl pest, transmission, (67) 171.
 dispatched from Sumatra to Amsterdam, transmission of dengue by, (65) 550.
 effects of heat and cold, (68) 787.
 in Puerto Rico, parasite of, (63) 160.
 infection with dengue virus, (63) 259.
 irradiation of larvae and pupae, effects, (68) 788.
 notes, (62) 454.
 rearing and manipulating, (70) 656.
 survival of microorganisms in gastrointestinal tract, (64) 159.
 transmission of buffalo disease by, (63) 847.
 transportation by airplanes, (67) 437.
 winter breeding and activity at New Orleans, (67) 55.
 preventive, chlorination of water for, (61) 854.
 transmission—
 by mosquito excreta, (62) 249.
 by ticks, (70) 661.
 experiments, (63) 258.
 experiments with bedbugs and Brazilian mosquitoes, (68) 639.
- vectors, geographical distribution, (69) 393.
- virus—
 hereditary transmission by mosquitoes, (62) 857.
 in the mosquito, filtrability, (62) 857.
 in ticks, survival, (70) 660.
 transmission, (62) 249.
 transmission by *Culex fatigans*, (70) 811.
 without *Aedes aegypti*, (70) 656.
- Yellow jackets, tentative synopsis, (68) 74.
- Yellow rattle as weed pest, (66) 631.
- Yellow scale—
 in California, imported parasite for, (65) 549.
 studies, (63) Tex. 456.
- Yellow stripe, a chlorophyll deficiency in corn, (61) 216.
- Yellowstone Park, animal life in, (64) 237.
- Yerba maté, insect enemies, summary, (61) 248.
- Yesca, notes, (61) 50.
- Yew poisoning in domestic animals, (70) 826.
- Yolk injections, effect on plumage of ovari-otomized hen, (63) 328.
- Youngberries, cold storage studies, (67) Fla. 523.
- Youth in rural areas, play and recreation, (66) S.C. 86.
- Yucca tribe, discussion, (65) Tex. 817.
- Zabrotes subfasciatus, morphology and biology, (65) 551.
- Zadiprion rohweri n.sp., description, (67) 441.
- Zamia palm seeds, poisoning of sheep by, (65) 571.
- Zatropis incertus—
 notes, (67) Colo. 719; (69) 696.
 parasite of boll weevil, (62) U.S.D.A. 359.
- Zauschneria, effect of change of altitude, (66) 214.
- Zebra and horse cross, notes, (63) 219.
- Zebu—
 and yak hybrids, (67) 377.
 cattle possibilities in North Australia, (68) 655.
 infection with piroplasms, (69) 718.
 intersexuality in, (69) 35.
- Zemiotes nigricollis, notes, (66) 160.
- Zenillia roseanae, notes, (61) U.S.D.A. 57.
- Zeolites—
 base-exchange material, nature, (64) 420.
 base-exchange reactions, equilibria, (67) 14.
- Zeuzera—
 coffeae, notes, (68) 499.
 pyrina, *see* Leopard moth.
- Zinc—
 ammonium phosphate precipitation, effect of pH, (62) 608.
 atmospheric corrosion, (67) 464.
 chloride, effect on fire resistance of wood, (65) 780.
 chloride for fire blight cankers, (68) Ohio 494.
 chloride treatment for fire blight, (65) Tenn. 150.
 corrosion, effect of temperature, (66) 581.
 deficiency in soils, (70) U.S.D.A. 448.
 effect on citrus, (67) Calif. 278.
 effect on crops, (64) Oreg. 317.
 effect on growth of molds and yeasts, (66) Ky. 119.
 effect on hemoglobin regeneration in dogs, (63) 897.
 effect on oats, (64) 723.
 effect on plants and animals, (62) Ky. 203.
 effect on yeast growth, (68) 174.
 essential nature for plant growth, (62) 619.
 in biological material, determination, (68) 15.
 in food and biological material, bibliography, (69) 752.

Zinc—Continued.

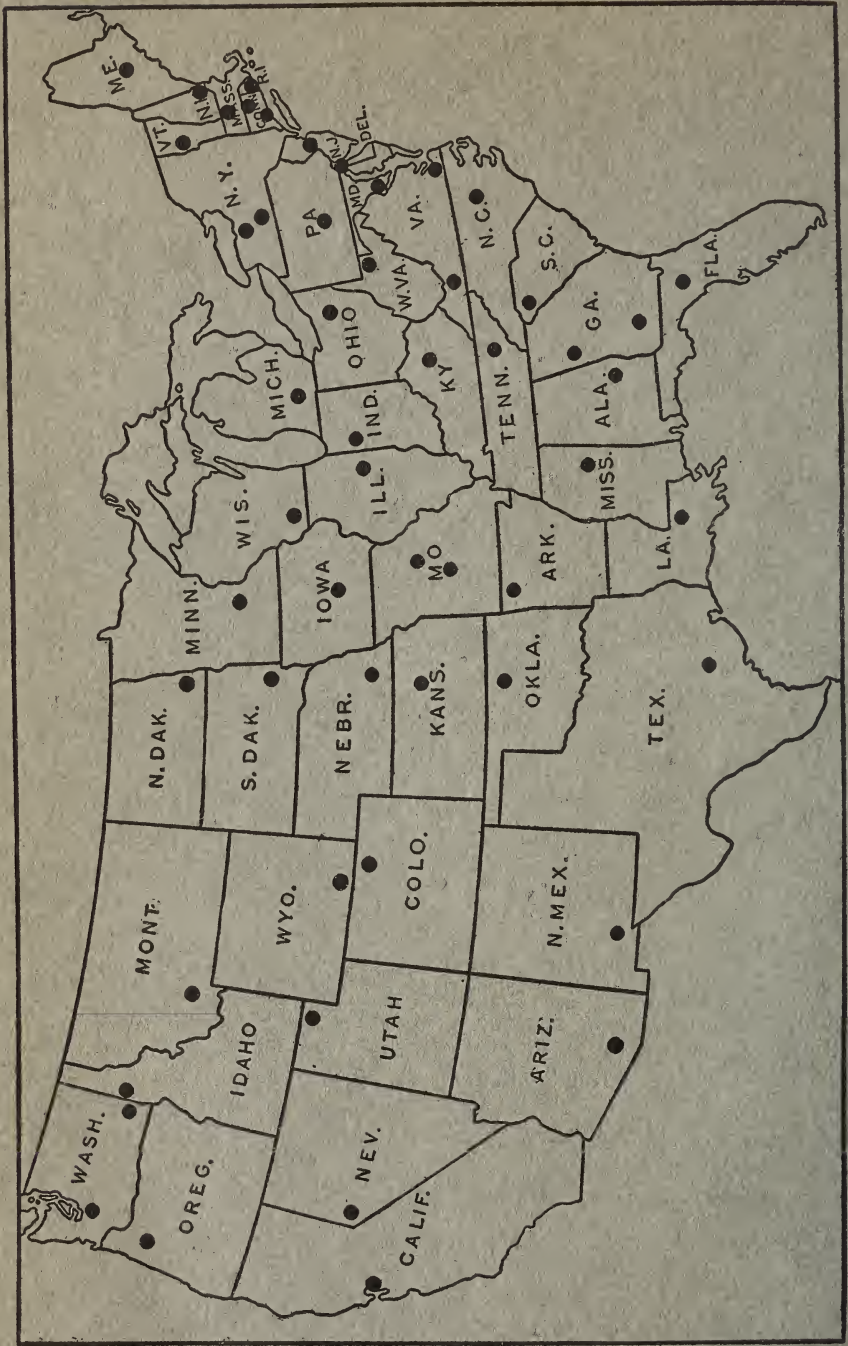

- in milk, (69) 415.
- in normal nutrition, (62) 585.
- in vegetable foods, (61) 388.
- requirements of plants, (61) 23.
- Rinnmann's green test for, (68) 581.
- role in nutrition, (70) 717.
- significance in nutrition, (68) Ky. 413.
- solubility in milk, (65) Wis. 469.
- sulfate—
 - for weed control, (62) U.S.D.A. 743; (65) Ind. 141.
 - new treatment for mottle leaf, (70) 350.
 - use against weeds, (69) Mich. 525.
 - with hydrated lime as peach spray, (67) 700.
- sulfide method of measuring ultra-violet radiation, (62) 592.
- titration with potassium ferrocyanide, (68) 581.
- treatment for pecan rosette, (70) 495.
- Zinnia—
 - croepoek, studies, (69) 673.
 - leaf curl, transmission, (70) 201.
 - leaf curl, whitefly as vector, (69) 828.
 - leaf spot, notes, (66) 147.
 - new angular leaf spot disease, (69) 70.
- Zinnias, fertilizer experiments, (67) Conn. State 523.
- Zirconic acid, preparation, (66) 310.
- Zonitoides arboreus, notes, (63) 253; (66) 247.
- Zooecidia of plants in South and Central America, (69) 382.
- Zoogeography of Java, (62) 539.

Zoology—

- agricultural and forest, fundamentals and laws, treatise, (67) 419.
- agricultural, of Malay Archipelago, (62) 538.
- applied, and fur farming, (62) 241.
- applied, treatise, (61) 350.
- economic, textbook, (65) 242.
- experimental, textbook, (62) 213.
- in Eberswalde—100 years in retrospect, (65) 852.
- International Congress, proceedings, (69) 543.
- medical and veterinary, index-catalogue, (68) U.S.D.A. 526.
- textbook, (61) 847; (62) 538.
- vertebrate, treatise, (70) 646.
- Zoomastigina, revision, (62) 671.
- Zooplankton, vitamins in, (64) 291.
- Zootermopsis—
 - angusticollis, association with fungi, (69) 553.
 - species of, (70) 652.
- Zophodia—
 - franconiella, notes, (61) Utah 54.
 - grossulariae, see Gooseberry fruit worm.
- Zwitterions, studies, (66) 109.
- Zygaenidae of Japan, life history, (61) 851.
- Zygina pallidifrons, carrier of potato mosaic, (64) 233.
- Zygorhynchus in soil flora, (65) 320.
- Zyklon—
 - fumigation against anobium, (65) 852.
 - fumigation of ships, (66) 758.
- Zymase fermentation, studies, (64) 125.
