2. Purpose:

This report is an analysis of the activity of the Shiga Prefectural Board of Education to evaluate the effectiveness of their work.

3. Analysis:

See annexed papers.

4. Conclusion:

A study of the minutes of the School Board indicates the following:

a. An average of five meetings per month have been held to date. This indicates that there have been too many plenary sessions.

DECLASSIFIED E.O. 12065 SECTION 3 402/NNSC NO. _____

319.1 16 March 1949
SUBJECT: Study of Boards of Education

b. School Board members have been undertaking executive duties normally the function of the Superintendent of Schools.

c. The school board members are influenced by the decisions of the national and other prefectural boards. For example, the board of education passed a proposal favoring a sum of 3,000 yen for renumeration of its members after the other prefectures had passed a similar proposal.

d. The board members are afraid of setting a precedent in education policy. This indicates that confidence is lacking among board members in making policy decisions.

e. Board members are not acting as a body; individual influence is predominant. Problems are presented to individuals of the board by the citizens rather than to the board before an open meeting.

f. Certain members of the board hold strong provincial attitudes. They will vote against any proposal which does not favor the school of their district rather than accepting an education policy which will benefit the prefecture as a whole.

g. The Board of Education has displayed very little effort to make education efficient through effective use of: 1) human resources, 2) material resources, 3) funds.

h. The School Board has not developed healthy relations with the public through effective use of publicity.

5. Recommendations:

The following recommendations of the school board were made in conference with MG, Shiga Prefectural Board of Education Secretariat members and teachers.

a. School Board Law Article 44 should be clarified so that there will be no misinterpretation in the organization of the Secretariat.

b. School Board Law should stipulate ineligibility of active teaching personnel from candidancy for board positions.

DECLASSIFIED E.O. 12065 SECTION 3 402/NNBS NO.

319.1 16 March 1949
SUBJECT: Study of Boards of Education

c. The School Board Law stipulates that the School Board is an executive body. This is a misinterpretation of the law by the Japanese. It is recommended that the words "guiding and advisory" be strongly emphasized in the law.

d. The Japanese feel that there are too many national and regional board conferences. They should be minimized. They have pointed out that MG has called them for meetings which were unnecessary or were duplications of former meetings.

e. The Japanese have interpreted the School Board Law to mean that there should only be seven members in attendance at the board meetings. There have been instances in which the Superintendent of Schools have been completely left out of the meetings. This law should stipulate clearly that the Superintendent of Schools should be an ex-officio member of the Board.

f. The members of the secretariat have recommended that only 5 members are needed for the prefectural school board. Seven candidates for board positions would allow each candidate to be elected if he carried the votes of his district.
