上海輸入貨物關價指數表說明書

財政部駐滬調查貨價處主任 盛 俊

編製指數之物價。其大別有三。曰市價、曰包價、曰關價。零躉市價指數。本處另編有上海生活費、(註一)上海躉售物價、上海輸出入物價、及增補上海輸入物價等表凡四種。包價根據長期採購之合同。如機關、學校、醫院、軍營等所訂立。故亦稱合同價。通常低於零售。而高於躉售。不足以代表普通之物價。故除意國亞般梯Alberti及法國樂瓦修 Lerasseur 二氏所編指數外。罕有採用之者。關價循用較繁。今踵行之。用備一格。

關價云者。即海關貿易冊所載之進出口貨價也。就進口言。其別亦有二。一為估價。係起岸實價之平均價格。例如美國對於進口貨價。須以輸出地美國領事簽字之發票 Consular Invoice 為憑。而認為不盡可靠者。關員仍得酌量增損。以期切實。是謂估價平均法。The Method of Value Estimation 一為報價。係商人申告之平均價格。此項價格。完全錄自報單。不加訂正。或即有訂正之權。而實際上無從行使。是謂報價平均法。The Method of Value Declaration 吾國之關價性質。蓋屬於此類。(註二)按約、海關徵收官吏認為申告價格與市價不符時。原可令其改正。

(註一)生活費指數在編製中。其零售物價。業已按期在貨價季刊發表。

(註二)海關進口貨價表所載各口之每季或每年價目。即該期內進口之總量。除總價值後所得之商數也。

(註三)由香港進口之洋貨常無發票。

(註四)(上略)現如變更辦法。改照上岸之價值完稅。則海關有時以該商呈驗之貨單載價不實。應即收驗所運何等貨物。再按該貨調查市價。查明後即按此價以定該貨完稅公平之價值。而商人若謂既按上岸之價值完稅。與市價自屬無關。海關只應憑所呈之貨單以徵稅款。如此則海關別無對待辦法。惟有將該商之貨單作偽情形。控由該國領事官裁判。按照各國律例凡人民為造各項單簿。以為騙人之據者。懲治極嚴。現既指控商人偽造貨單。罪名所關。該領事官自不能不向海關索取該商作偽之確據。而海關則何能得有實據。以為該單作偽之憑證。既無確據可以證明。該領事官必以現經審明貨單並無作偽情形等詞。予判結。如此。海關只可仍按該單所載之價值徵稅。(下略)

(註五)按即從量課稅品之價。

或飭令呈驗發票。進口稅則善後章程第一款載。『凡洋貨由外國某處運來如有某處所給價值憑單。海關如令繳出。自應遵照呈驗。不得故為隱匿』但有進口貨物。並無發票。(註三)或有而不盡可靠者。在領事裁判權尚未撤消以前。須由海關向該商所屬之領事署控告。手續既繁。事實上尤不易校正。今江海關稅務司賴發洛於六年十一月所提出之考查貨價意見書中。曾詳言之(註四)故貿易總分冊於進口洋貨價值表上均冠有『按則徵稅之貨價。僅能以報單所開者。作為統計標準。故所印貨價。未能視為完全無缺。』又民國七年三月總稅務司所遞關於修改稅則之節略。亦稱『海關貨價。係依據商家之言所厘訂。殊不可靠。其關於訂定稅率之價。(註五)尤不可靠』各等語。足知吾國進口之關價。僅屬名義上之起岸價。商人申告既欠翔實。而表載身骨等級。前後又不一致。且洋貨乃以金價為準。而吾國尚為用銀之國。其與標準物價表之根據市場成交價者。自難相提並論。本表之作。不過利用現成材料。取與上海輸出入物價指數及增補上海輸入貨價指數互相印證已耳。

關價指數之作。始於法之福維爾氏。A. de Foville 自一八二七年後。法國定例。逐年核算進出口總值。其法即取是年之平均物價。乘所核年份之進出口數量。作為各該年份之進出口總值。如是者凡二十年。至一八四七年頃。

覺照此核出之虛價。與實價相去過遠。乃特組常設評價委員會。專司調查進出口貨價之職。所用專家。多至百餘人。所調查者。非當年之時價。而為去年之實價。其貨物花色、進出口數量。均本諸海關之報告。但所估之價。該委員會得自由裁量。不受發票之拘束。計自一八四七年至一八六二年。每年編有進出口總值表兩種。一即仍舊照虛價編製。一則以各貨實價為根據者也。例如一八八〇年之進出口數量。於次年一月間。由該委員會將一八七九年之價格相乘。作為臨時總值。閱數月後。一八八〇年之各貨實價既經確定。乃另行核算。求出一八八〇年之正式總值。福氏之指數。即係利用此臨時與正式總值之平均中數。以求得各年之指數。繼凡而起者。不少概見。茲錄其較著名者如下。

Board of Trade	
1. 英國商部指數	自一九〇二年起
Board of Trade	
2. 英國商部指數	自一九二〇年起
Department of Statistics	
3. 丹麥統計局指數	自一九〇六年起
Commonwealth Statistician	
4. 澳洲聯邦統計官指數	自一九一三年起
Customs Board	
5. 芬蘭稅務處指數	自一九一三年起
Office of Census & Statistics	
6. 南非統計局指數	自一九一三年起

14. 12. 19
寄贈

Department of Statistics

7. 印度統計局指數 自一九一三至一四年起

以上各種指數。雖同以關價為依據。而作法不盡相同。如英之第一指數。其進口係根據申告之平均價格。而第二指數則為起岸價。並包含稅餉在內。又比重標準。大抵以某年度內之進出口數量為基礎。惟澳洲及英國第一指數獨為例外。前者根據一九〇六至一九一〇年之全國消費額。即全國生產額加進口額。減出口額。而後者則為一九〇七年之生產額。其編製時期、及計算、分類方法。亦互有出入。

本表所選標準年度及比重價額均為一九二二年。與增補上海輸入物價指數同。其理由即以現行進口稅則。係於是年九月低修改完竣。於次年一月十七日起施行。循此推算。則現行稅率究屬實抽幾何。庶可以窺見一斑。而國家稅收之盈虧若何。亦不難藉此估計也。

關價指數之分類法。凡有二途。(一)按加工程度。如印度、南非是。(二)依各貨性質。如澳洲芬蘭是。但本表宗旨。重在估算稅率。並與增補上海輸入物價指數相印證。故不得不變通成法。改以進口稅則之分類為準則。按現行進口稅則。計分類十五。有系以子目者。及亦有不分子目者。茲表列如左。

- 1. 棉花及棉貨類
 - a. 本色棉布品
 - b. 漂白或染色棉布品
 - c. 印花棉布品
 - d. 染紗織棉布品
 - e. 棉花, 棉線, 棉紗及棉製品
- 2. 火麻, 細麻, 絲, 呢絨貨類
 - a. 亞麻, 火麻, 縐麻貨品
 - b. 絲貨及絲兼雜貨貨品
 - c. 毛棉呢品

- d. 毛及呢絨品
- 3. 五金類
- 4. 食品, 飲料, 草藥類
 - a. 魚介, 海產品
 - b. 葷食, 罐頭食物, 日用雜貨品
 - c. 雜糧, 藥品, 藥材, 料, 香料, 菜蔬品
 - d. 糖品
 - e. 酒, 啤酒, 燒酒, 飲水等品
- 5. 煙草類
- 6. 化學產及染料類
 - a. 化學產品
 - b. 染料, 顏色品
- 7. 燭, 膠, 油, 皂, 漆, 蠟等類
- 8. 書籍, 地圖, 紙, 及木造紙質類
- 9. 生熟獸畜產類
 - a. 生皮, 熟皮, 皮貨品
 - b. 骨, 毛羽, 髮毛, 角, 介殼, 筋, 長牙等品
- 10. 木材, 木, 竹, 藤類
 - a. 木材品
 - b. 木, 竹, 藤品
- 11. 煤, 燃料, 瀝青, 柏油類
- 12. 磁器, 搪磁器, 玻璃等類
- 13. 石料, 及泥土製成物類
- 14. 雜貨類
 - a. 石棉品
 - b. 袋, 席, 地席品
 - c. 鈕扣品
 - d. 扇, 傘, 禦日傘品
 - e. 鏢, 針品
 - f. 火柴及製造火柴材料品
 - g. 五金線品
 - h. 雜貨品
- 15. 未列名貨類

以上分類十五。分目二十八。但第十五類各貨。為稅則所不載。又第一類中之第四目染紗織棉布品。已見他目。均應剔除。故實得十四類。二十七目。此即本表之類別也。按稅則分類。粗疎陳腐。久為識者所不滿。如石棉品、五金線品。每年全國進口。無過十萬兩左右。今各獨立一目如故。而大宗進口貨如機件、電器材料、橡皮製品等。始終未

見採入。又原料與製品雜糅。藥材與雜糧、菓品同類。凡此皆與科學的分類方法及貿易發展之趨勢相乖迕。然本處為求推算稅率之確切起見。終不得不與稅則採一致之步調也。

關價指數。通例每年編製一次。如印度、丹麥、南非等皆是。惟英國第二指數獨為每季。今倣行之。緣海關進口貨價表除每年價格外。並列有每季價格也。

指數之計算。採比重算術平均法。與上海輸出入物價指數及增補上海輸入物價指數同。其公式為

$$\text{指數} = \frac{\sum P_0 Q_0 \frac{P_1}{P_0}}{\sum P_0 Q_0}$$

P₀為標準其間之基本價格。即一九二二年之全年平均價格。P₁為擬算指數各季之價各。Q₀為標準年度之比重數量。即一九二二年之進口數量。

海關進口貨價表所載各貨。其在一九二二年全國進口在關銀五十萬兩以上者。均行採入。其標準與增補上海輸入物價指數同。而比上海輸出入物價指數之範圍為寬。所除外者。為富於季節性、及冷僻不常輸入各貨。但為整齊類目計。其進口價額不及五十萬兩者。亦酌量選錄。如骨、毛羽、髮毛、角、介殼、筋、長牙類及石棉、五金線諸目是。

海關進口貨價表所載各貨。以花色、重量、長度、國別等等之不同。其下每系以項。項或又系以目。今悉遵用之。總計全表。凡得物品一百零六。物價二百八十四。但海關貿易總冊所載各貨進口數量。大抵祇列總數。不列細數。其列有細數者。亦與貨價表所系項目不符。故計算時。不得不將各項目之價格先行平均。求得各個物品之價格。其進口價額之列有細數者。亦分別歸併。蓋非如此。不足以便比重也。上海輸入貨物關價指數表、上海輸入貨物關價表(此表又分甲乙兩種)一併附載於後。用資攷核。

The various quotations of retail prices and Customs valuation table of retail prices in Shanghai; the index of Contract prices, being official institutions, such as Lerasseur in France.

THE INDEX NUMBER OF CUSTOMS IMPORT PRICES IN SHANGHAI
BY T. SHENG, CHIEF DIRECTOR, MINISTRY OF FINANCE, BUREAU OF MARKETS

The various quotations used in the compilation of price index numbers are three in number, namely, the market quotation, contract prices and Customs valuation. Market quotations are used in the index number of the cost of living in Shanghai (Now under compilation), the table of retail prices having been successively published in the "Shanghai Market Prices Report", in the index number of wholesale prices in Shanghai; the index numbers of import and export prices in Shanghai and in the supplementary index number of import prices in Shanghai. Contract prices, being always lower than retail but higher than wholesale, are based on long period purchase contracts such as those used by official institutions, schools, hospitals and the military. They are rarely employed except in the index number compiled by Alberti in Italy and Lerasseur in France. Customs valuations have a wider application and hence we choose them for an example.

Customs valuations are based on the import and export prices contained in the "Returns of Trade" published by the Maritime Customs. Of import valuations there are two distinct types, one of which is the average of actual c. i. f. value. For instance, in the United States, import quotations are based upon consular invoices signed by the U. S. Consul in the country of export. The customs officials, if dissatisfied with an invoice produced by a merchant, are authorized to make any changes in the statement. This is termed method of value estimation.

The other is the average of valuations compiled from applicants' statements. The customs officials make no change whatever in the applicant's statement. Although they are authorized to make certain revisions, yet in fact they lack the means to carry out this provision. It is a matter of regret that our method of customs valuation is similar to the latter. (See Note I)

Under the Treaties, Customs officials reserve to themselves the right to demand corrections in the applicant's statement or presentation of invoice as laid down in Rule I: which runs: "In all cases invoices, when available, must be produced, if required by the Customs." However, certain imports provide no invoice (See Note II) or are unreliable in their statement.

The remedy for this can only be obtained by appealing to the consulate to which the applicant belongs. The difficulty of this procedure was clearly exposed by Mr. L. A. Lyall, Commissioner of Customs in Shanghai, in his proposal on November, 1917, concerning the investigation of prices. (See Note III)

Consequently, all tables concerning the value of imports given in the Customs' Trade Returns have the following explanation: "Valuations of specific-duty-paying goods are compiled from applicants' statement, and, in the absence of the right to demand production of duly certified invoices, are published with reserve." In his proposal regarding tariff revision in March, 1918, the Inspector General of Mari-

time Customs also emphasized that Customs valuations which are compiled from applicants' statement are unreliable especially for the revision of the tariff. (See Note VI)

Thus we know our customs valuations of imports are only nominal c. i. f. values. Moreover, the commodities contained in these tables cannot be indentified in quality and grade among the successive publications. A further drawback exists in the use of silver quotations in the applicant's statement for commodities which were originally quoted in gold. Being very different from other standard tables of prices compiled by this Bureau, all basing on market quotations, this index number furnishes merely a certain ground of comparability with the index numbers of import and export prices in Shanghai and the supplementary index number of import prices in Shanghai.

Customs valuations were first applied in the making of index numbers by A. de Foville. In France, since 1827 the total values had been compiled by taking the quantities each year at the average prices of 1827. By 1847 the discrepancies between real values and official values became very marked. Then there was established the Commission Permanente des Valeurs de Douane, charged with the duty of ascertaining each year the average prices of the preceeding year. This commission consisted of over one hundred members, who, as experts, fix upon the actual prices of goods, irrespective of the invoices. The quantities and descriptions are taken from the declarations to the customs officials. Up to 1862 the commission recorded not only the actual but the official values (the latter being computed according to the manner in use before 1847.) Each January (e. g. 1881) a provisional total value is obtained by computing the quantities of the preceding year (e. g. 1880) at the prices of the year before (e. g. 1879); then a few months later, the definitive average prices (e. g. 1880) are obtained, and the correct value is published. The proportional variations between these two sets of valuations provide a means of obtaining the change in the level of prices in each year. On this basis De Foville prepared his index number of changes in prices for French imports and exports. After this, numerous similar index numbers having respective opening dates as the above were compiled in different countries:

1. British Board of Trade Monthly Index Number, 1902
2. British Board of Trade Journal Quarterly Index Number, 1920
3. Danish Department of Statistical Index Number, 1906
4. Australian Commonwealth Statistician Index Number, 1913
5. Finland Customs Board Index Number, 1913
6. South Africa office of Census and Statistics, 1913
7. Department of Statistics of India, 1913-14

The above index numbers, while all employing customs average declared values, differ in certain respects in compilation. For instance,

the Board of Trade import and export values shown exports, but except for imports, but except for Trade. The weights whereas the weight valuation as well as in which is taken as the index number is to revenue, it is approved effect on January 1

The index number and South Africa, of present tariff and into fifteen groups

Cotton and C
Cotton
" "
" "
" "
Cotton
Hemp, Linen
Flax
Silk
Wool
Wool

the Board of Trade Monthly Index Number uses average import and export declared values before 1920 while the quarterly index number of import and export values, compiled by the Board of Trade and published since 1920 in the "Board of Trade" Journal, employs import and export values shown in the trade returns, imports being c. i. f. including duties. Weighting is all based upon the value of exports and imports, but exceptions exist in the number of the Australian Commonwealth Statistician and that compiled monthly by the British Board of Trade. The weights of the former are based on the consumption (i. e. production plus imports, minus exports) during the years 1906-1910, whereas the weighting of the latter is based on the result of the census of production in 1907. Differences are seen also in the date of compilation as well as in the methods of calculation and classification, the weights of this index number are based upon the value of imports in 1922 which is taken as the basic year similar to the supplementary index number of import prices in Shanghai. Since our aim in compiling this index number is to ascertain the actual percentage of duty according to the present tariff and throw some light on its effect upon our customs revenue, it is appropriate to choose as the base the year when the last tariff revision took place. As we know, the present tariff came into effect on January 17, 1923.

The index number based on customs valuations may be classified either according to the stage of manufacture, as in the case of India and South Africa, or to quality, as in the instance of Australia and Finland. Because our aim is to give an estimation of the value of the present tariff and to furnish a comparison with the supplementary index number of import prices in Shanghai, this index number is classified into fifteen groups with either separate sections or none in accordance with the present tariff. The following is a list of these:—

Cotton and Cotton Goods:—

Cotton Piece Goods, Grey
 " " " White or Dyed
 " " " Printed
 " " " Yarn-dyed

Cotton, Raw; Cotton Thread, Cotton Yarn, and Manufactures of Cotton

Hemp, Linen, Silk, and Woollen Goods:—

Unenumerated Goods

The above contains altogether fifteen groups and twenty-eight sections but the fifteenth group giving no enumeration of the goods and the cotton piece goods, yarn-dyed, contained in the fourth section of the first group having already appeared in the other groups are both dropped out.

The method of classification of the present tariff has long been criticised by the public owing to its excessive brevity and out-of-date treatment. For instance, asbestos and metal thread having a total import value of less than HK\$100,000 in a year are classified under separate groups, while staple imports like machinery, electrical supplies and rubber goods remain unenumerated. Moreover, it mixes raw materials with manufactures such as in the case of cereals, fruits and medicinal substances. All these are in disagreement with scientific treatment and contrary to the tendency of trade. This Bureau follows the tariff merely for the purpose of giving an estimate of the exact value of the present tariff.

Customs value index numbers are usually compiled annually e. g. in India, Denmark and South Africa, but quarterly publications are assumed by the British Board of Trade for its index number of import and export values. This Bureau adopted the latter plan in view of the joint publication of quarterly and annual valuation lists by the Maritime Customs.

The weighted arithmetical average is used in calculation similar to the index numbers of import and export prices in Shanghai and the supplementary index number of import prices in Shanghai. Its formula is:—

$$\text{Index Number} = \frac{\sum P_1 Q_0}{\sum P_0 Q_0}$$

P_0 = price in the basic period, i. e. the annual average quotations in 1922

P_1 = price in any given period

Q_0 = quantity in the basic year, being the total quantity of import in 1922

Nearly all commodities whose total value of import in the whole country exceeded HK\$500,000 in 1922 have been included except high seasonable articles and infrequent goods. Certain commodities like bones, feathers, hair, horns, shells, sinews and tusks, asbestos and gold thread being less than HK\$500,000 in their total import value are chosen as an exception for the sake of uniformity among groups.

The commodities contained in the customs valuation lists are divided, owing to the difference in description, weight, magnitude and country, into sections and items. All are retained in this table making a total commodities 166 and quotations, 284.

However, as the "Trade Returns" contain only a total value for a single commodity and differs in sections and items, with the Import Valuation Lists, the various quotations of imports under a single commodity are averaged first for the sake of convenience in weighting. The Table of Customs Import Prices in Shanghai, (a & b) and The Index Number of Customs Import Prices in Shanghai, are given below:

Note I. Commodity values at various ports as contained in the annual or quarterly "Import Valuation List" of the Maritime Customs are obtained by dividing the total value with the total quantity of each commodity.

Note II. Imports from Hongkong frequently lack an invoice.

Note III. In case of a modification of the present method by imposing duties according to the c. i. f. value, the Customs House ought to examine the quality of the cargo and decide on its duty-paying value by investigating the real market price of that commodity, when any falsehood is found in the invoice produced by the merchant. However, if the merchant should insist that as the duty of a cargo is to be calculated on c. i. f. value according to Treaty, the Customs House ought to take the invoice produced by him as the only authentic base for ascertaining its duty paying value, having no relation whatever with the market price. Under such circumstances, the Customs House is unable to do anything toward the merchant and could only appeal to the Consul of that merchant for producing false documents. According to laws in different countries a severe penalty can be inflicted on a merchant who "declares" falsely. In view of the fact that in such instances the Consul would naturally demand substantiating testimony from the Customs House of the incorrect declarations of the merchant, and because the Customs House is unable to produce same, the Consul will naturally declare that it is a bona fide invoice and give the decision in favor of the merchant. In consequence of this, the Customs House is only able to charge duties according to the applicant's statement. (This extract is from Mr. Lyall's original article from a Chinese text.)

Note VI. Referring to specific-duty-paying goods.
