THE ROGERS UPRIGHT PIANO CO.

(Copyright, 1876, by The Rogers Upright Piano Company.)
(Incorporated under the Laws of Massachusetts, December 20, 1874.)

C. H. BACON, President.

Prof. B. F. BAKER, Treasurer.

Our Piano requires much less space, is easily moved from one room to another, and is elegant in form; hence it must be everywhere preferred, as it has been earnestly desired.

This instrument is constructed on entirely new principles, and the most earnest and careful attention is called to the Elliot Patent Tuning Arrangement, consisting of a slide, string-pin, and set-screw, held in place by a block or knob cast on the iron frame, by which positive accuracy of pitch, and reliability of tune are attained. It is not only capable of being tuned perfectly, more easily and readily than any other Piano, but after the stretch is once out of the string there is no possible chance for the instrument to get out of tune.
