## THEMATIC LISTS

### 1. Part II - Structure

The USG Glossary is separated into two parts (I - alphabetization of terms, and II - thematic lists.) The requirement is on the reader to analyze individual terms by viewing the original source placed in the document following each term and definition before comparing with similar terms or using in other documents. Part II's four thematic lists are categorized as follows to expose readers to terms and definitions related to foreign and domestic activities:

1) **Domestic Support - All-Hazard Emergency Management** which includes:

- law enforcement; fire and medical health services related to preparedness, protection, mitigation, response, recovery and continuation of essential public and private services

2) **Domestic Support - Homeland Security** which includes:

- terrorism, intelligence, cybersecurity, critical infrastructure protection, national all-hazard emergency planning and response to include civil-military coordination

3) **Foreign Support - Humanitarian and Sustainable Development Assistance** which includes

- foreign disaster response and humanitarian relief, youth, resilience and climate change as well as sectoral: health, agriculture, education, et al.

4) **Foreign Support - Stabilization and Security Assistance** which includes:

- fragility, defense and governance, counterterrorism, counter violent extremism, peace keeping operations, atrocity prevention, civil-military coordination and transition

Thematic lists are accompanied by two coordination mechanisms figures that show arranged interaction and potential cooperation between workforces:

- 1) Domestic Coordination - National Response Framework Emergency Support Functions, the following figure shows the domestic mandated interaction between USG workforces for all hazards emergency management and homeland security:

<b>assistance</b> - The President is authorized to provide assistance, including providing such assistance through international or nongovernmental organizations, for programs in developing countries to provide basic care and services for orphans and other vulnerable children. Such programs should provide assistance.	DOS
<b>assistance</b> - the provision of, or the provision of access to, information (including communication contents, communications records, or other information relating to a customer or communication), facilities, or another form of assistance.	DOD/ DHS
<b>assistance</b> - the provision of, or the provision of access to, information (including communication contents, communications records, or other information relating to a customer or communication), facilities, or another form of assistance.	ODNI/ CIA/ DOD
<b>assistance</b> - the transfer of anything of value for a public purpose of support or stimulation that is— (A) authorized by a law of the United States; (B) provided by the United States Government through grant or contractual arrangements (including technical assistance programs providing assistance by loan, loan guarantee, or insurance); and (C) not an annual payment by the United States Government to the District of Columbia government.	Treasury
<b>attack geography</b> - description of the geography surrounding the improvised explosive device (IED) incident, such as road segment, buildings, foliage, etc.	DHS
<b>attack method</b> - manner and means, including the weapon and delivery method, an adversary may use to cause harm on a target.	DHS
<b>barometric sensor</b> - sensor that acts as a switch by the measurement of atmospheric (air/ water) pressure.	DHS
<b>base floodplain</b> - area subject to inundation from a flood of a magnitude that occurs once every 100 years on the average a flood having a 1 percent chance of being equaled or exceeded in any given year.	DHS
<b>behavioral health aftercare</b> - those activities and resources used to support recovery following inpatient, residential, intensive substance abuse, or mental health outpatient plan has been developed with the client. An aftercare plan may use such resources as a community-based therapeutic group, transitional living facilities, a 12-step sponsor, a local 12-step or other related support group, and other community-based providers or outpatient treatment. The purpose is to help prevent or deal with relapse by ensuring that by the time a client or patient is discharged from a level of care, such as outpatient treatment, an after care.	DOI
<b>benefitting species</b> - I) increasing the hydroperiod and water depth of a stream or wetland beyond what would naturally occur; (II) improving waterfowl habitat conditions; (III) establishing water level management capabilities for native plant communities; (IV) creating mud flat conditions important for shorebirds; and (V) cross fencing or establishing a rotational grazing system on native range to improve grassland nesting bird habitat conditions; and (ii) an activity conducted to shift a native plant community successional stage, including— (I) burning an established native grass community to reduce or eliminate invading brush or exotic species; (II) brush shearing to set back early successional plant communities; and (III) forest management that promotes a particular serial stage. machines, blasting galvanometers, and det cord.	
<b>blasting agent</b> - explosive material which meet prescribed criteria for insensitivity to initiation.	DHS
<b>blasting cap/ detonator</b> - device containing a sensitive explosive intended to produce a detonation wave can be either electric or non-electric (plain).	DHS
<b>booby trap</b> - explosive or non-explosive device or other material deliberately placed to cause casualties when an apparently harmless object is disturbed or a normally safe act is performed.	DHS
<b>bulk-power system</b> - (A) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (B) electric energy from generation facilities needed to maintain transmission system reliability.	DOI
<b>burial site</b> - any natural or prepared physical location, whether originally below, on, or above the surface of the earth, into which as a part of the death rite or ceremony of a culture, individual human remains are deposited.	DOI
<b>cache</b> - A predetermined complement of tools, equipment, and/ or supplies stored in a designated location, available for incident use.	DHS/ FEMA
<b>cache improvised explosive device incident</b> - improvised explosive device (IED) incident that involves the discovery and/ or recovery of unarmed devices, improvised explosive device (IED) components, and improvised explosive device (IED) paraphernalia that involves long-term storage in a permanent, fixed location.	DHS
<b>canine inspection</b> - use of a dog team to detect specific substances or the presence of property or persons that may pose a threat, are not in compliance with laws, or are at risk.	DHS
<b>capital improvement</b> - a structure, a fixture, or nonremovable equipment provided by a concessioner pursuant to the terms of a concession contract and located on land of the United States within a System unit.	DOI
<b>career law enforcement officer</b> - a person hired on a permanent basis who is authorized by law or by a State or local public agency to engage in or supervise the prevention, detection, or investigation of violations of criminal laws.	DHHS/ HUD/ EPA/ FEMA
<b>cast explosive</b> - manufactured explosive poured in liquid form and allowed to harden.	DHS
<b>catastrophic emergency</b> - Any incident, regardless of location, that results in extraordinary levels of mass casualties, damage, or disruption severely affecting the U.S. population, infrastructure, environment, economy, or government functions.	DOS/ USAID
<b>catastrophic event</b> — Any natural or man-made incident, including terrorism, which results in extraordinary levels of mass casualties, damage, or disruption severely affecting the population, infrastructure, environment, economy, national morale, and/ or government functions.	DOD

appropriate organizations, operational plans, and supporting agreements, the recruitment and training of personnel, the conduct of research, the procurement and stockpiling of necessary materials and supplies, the provision of suitable warning systems, the construction or preparation of shelters, shelter areas, and control centers, and, when appropriate, the non-military evacuation of the civilian population). (B) Measures to be undertaken during a hazard (including the enforcement of passive defense regulations prescribed by duly established military or civil authorities, the evacuation of personnel to shelter areas, the control of traffic and panic, and the control and use of lighting and civil communications). (C) Measures to be undertaken following a hazard (including activities for fire fighting, rescue, emergency medical, health and sanitation services, monitoring for specific dangers of special weapons, unexploded bomb reconnaissance, essential debris clearance, emergency welfare measures, and immediately essential emergency repair or restoration of damaged vital facilities).

<b>emergency preparedness</b> — Measures taken in advance of an emergency to reduce the loss of life and property and to protect a nation’s institutions from all types of hazards through a comprehensive emergency management program of preparedness, mitigation, response, and recovery. Also called EP.	DOD
<b>emergency response providers</b> - Federal, State, and local governmental and nongovernmental emergency public safety, fire, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel, agencies, and authorities.	DHS
<b>emergency services sector</b> - A system of preparedness, response, and recovery elements that form the nation's first line of defense for preventing and mitigating the risk from physical and cyber attacks, and manmade and natural disasters. The sector consists of emergency services facilities and associated systems, trained and tested personnel, detailed plans and procedures, redundant systems, and mutual-aid agreements that provide life safety and security services across the Nation via a first-responder community comprised of federal, state, local, tribal, territorial and private sector partners.	DHHS
<b>Emergency Support Function Annexes</b> - Present the missions, policies, structures, and responsibilities of Federal agencies for coordinating resource and programmatic support to States, tribes, and other Federal agencies or other jurisdictions and entities when activated to provide coordinated Federal support during an incident. Also called ESF Annexes.	DHS/ FEMA
<b>Emergency Support Function Coordinator</b> - The entity with management oversight for that particular ESF. The coordinator has ongoing responsibilities throughout the preparedness, response, and recovery phases of incident management. Also called ESF Coordinator.	DHS/ FEMA
<b>Emergency Support Function Primary Agency</b> - A Federal agency with significant authorities, roles, resources, or capabilities for a particular function within an ESF. A Federal agency designated as an ESF primary agency serves as a Federal executive agent under the Federal Coordinating Officer (or Federal Resource Coordinator for non-Stafford Act incidents) to accomplish the ESF mission. Also called ESP Primary Agency.	DHS/ FEMA
<b>emergency support functions</b> - Used by the Federal Government and many State governments as the primary mechanism at the operational level to organize and provide assistance. ESFs align categories of resources and provide strategic objectives for their use. ESFs utilize standardized resource management concepts such as typing, inventorying, and tracking to facilitate the dispatch, deployment, and recovery of resources before, during, and after an incident. Also called ESFs.	DHS/ FEMA
<b>emergency support functions</b> — A grouping of government and certain private-sector capabilities into an organizational structure to provide the support, resources, program implementation, and services that are most likely to be needed to save lives, protect property and the environment, restore essential services and critical infrastructure, and help victims and communities return to normal, when feasible, following domestic incidents. the manufacture of improvised explosive device components to include explosives.	
<b>improvised explosive device container</b> - item or vessel that commonly houses the whole improvised explosive device (IED) or principle components of an improvised explosive device.	DHS
<b>improvised explosive device enhancement</b> - optional additional component deliberately added as opposed to a secondary hazard that modifies the effects of the improvised explosive device.	DHS
<b>improvised explosive device explosion incident</b> - improvised explosive device (IED) incident that results in a partial or complete functioning of an improvised explosive device occurs when gaseous products are rapidly produced from a single substance (high explosives or low explosives with a fuel and oxidant).	DHS
<b>improvised explosive device incident atmospherics</b> - description of the demeanor of the civilian population at an IED event to include mood, absence or presence, changes in previously experienced interactions, etc.	DHS
<b>improvised explosive device incident geometry</b> - description of how the improvised explosive device (IED) system was emplaced, including the angle of the device, the distance to target, line of sight (if necessary), etc.	DHS
<b>improvised explosive device intended outcome</b> - immediate and direct goal or objective of an enemy's improvised explosive device (IED) attack objectives include anti-armor, anti-vehicle, anti-infrastructure, anti-personnel, anti-aircraft, tactics - techniques - procedures (TTP) identification, and criminal.	DHS
<b>improvised explosive device main charge</b> - bulk explosive component of an improvised explosive device (IED) capable of providing an explosion by its own energy when initiated.	DHS
<b>improvised explosive device post blast analysis</b> - process of systemic photographing and collecting forensic material involved in an improvised explosive device (IED) incident.	DHS
<b>improvised explosive device power source</b> - source of power – that either stores or releases electrical energy – for the initiation of an improvised explosive device (IED) or improvised weapon.	DHS
<b>improvised explosive device related incident</b> - occurrence that involves one or more of the following types of improvised explosive device-related actions/ activities: Improvised Explosive Device, Explosion, Find, Cache, False, Hoax.	DHS
<b>improvised explosive device sourcing</b> - process of determining the origination point (such as a production facility or person, a geographic location, or a specific country of origin) for IED components.	DHS
<b>improvised explosive device tactical characterization</b> - description of how an improvised explosive device (IED) incident was conducted or planned (tactical design) to be conducted provides context for how a specific device is used/ intended (purpose of device) to be used.	DHS
<b>improvised explosive device tactical design</b> - specific design of an improvised explosive device (IED) attack includes but not limited to: position of the IED, the type of IED, method of actuation, intended target, type of road segment used, concealment technique, use of secondary devices, the time of day, etc.	DHS
<b>improvised explosive device technical categorization</b> - description of an improvised explosive device (IED) using a hierarchical construct to identify its key components.	DHS
<b>improvised grenade</b> - improvised weapon, military or homemade, designed to explode when a restraint is removed (usually handheld, but can be projected).	DHS

<b>Incident Command</b> - Entity responsible for overall management of the incident. Consists of the Incident Commander, either single or unified command, and any assigned supporting staff.	DHS/ FEMA
<b>Incident Command Post</b> - The field location where the primary functions are performed. The ICP may be co-located with the incident base or other incident facilities. Also called ICP.	DHS/ FEMA
<b>Incident Command System</b> - A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. ICS is a management system designed to enable effective incident management by integrating a combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, designed to aid in the management of resources during incidents. It is used for all kinds of emergencies and is applicable to small as well as large and complex incidents. ICS is used by various jurisdictions and functional agencies, both public and private, to organize field-level incident management operations. Also called ICS.	DHS/ FEMA
<b>Incident Commander</b> - The individual responsible for all incident activities, including the development of strategies and tactics and the ordering and the release of resources. The Incident Commander has overall authority and responsibility for conducting incident operations and is responsible for the management of all incident operations at the incident site.	DHS/ FEMA
<b>incident driven activity</b> - specific action to stop, interdict, or otherwise respond to an incident.	DHS
<b>incident environmental condition</b> - description of the ambient surrounding conditions to include weather conditions such as temperature, precipitation, fog, dust, etc.	DHS
<b>incident management</b> - management and coordination of prevention, protection, and emergency management activities associated with a specific threat, or an actual occurrence includes, for example, major disasters, emergencies, terrorist attacks, specific threats of terrorist attacks, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, cyber attacks, and any other occurrences. <b>incitement of terrorism</b> - Incitement with intent to cause bodily harm renders an alien inadmissible under INA if he or she has incited terrorist activity under circumstances indicating an intention to cause death or serious bodily harm. Incited in the context of INA is speech that induces or otherwise moves another person to undertake terrorist activity. Normally speech will not rise to the level of inciting unless there is a clear link between the speech and an actual effort to undertake the terrorist activity. It connotes speech that is not merely an expression of views but that directs or induces action, typically in a volatile situation. The applicant may have incited terrorist activity even if a terrorist attack does not actually occur (e.g., because an attempt to commit such activity was thwarted). An applicant who has incited terrorist activity must also have acted in circumstances indicating an intention to cause death or serious bodily harm to be inadmissible under INA. In other words, the aliens speech must not only have induced others to undertake terrorist activity, but it must also have been made with the specific intent that such activity would result in death or serious bodily injury. Incitement and the requisite intent to cause bodily harm could be inferred in the following situations - (a) Widespread opposition to Country A's policies and actions lead to a series of protests, some violent, outside Country As embassy in Country B. The applicant goes to the embassy, stands on a box, and shouts to the crowd to join him in standing up to Country A and humiliating it. Shortly afterwards, when he sees an embassy vehicle approaching, he yells - Don't let them in! Make them pay for what they have done! The crowd blocks the car and removes occupants (including a diplomat working at Country As embassy), from the car, beating them severely and taking them hostage. Analysis - Diplomatic hostage-taking and violent attacks on diplomats are terrorist activities. Given the aliens urging the crowd to stop the embassy vehicle and make them pay, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The aliens make them pay statement, when viewed against the backdrop of previous violent protests and his general comments about standing up to Country A and humiliating it, would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. (b) The applicant is an ardent nationalist whose opinions voiced to a particular audience regularly blame foreigners for his country's problems and who argues that the only solution to these problems is that foreigners should be driven out of the country. Press reports say that some of those in the targeted audience have been purchasing weapons and seeking to obtain and manufacture explosives. Police notify the applicant or those associated with the applicant that they are investigating several of those in the targeted audience for weapons-related offenses. At the end of a week of particularly strong anti-foreign sentiment, the applicant gives a special speech entitled A Call to Action. With the knowledge that those under investigation are in the audience, the applicant begins his speech with - The time has come for action! He then reiterates throughout his speech that The only solution to the country's problems is to purge our great land of these foreigners once and for all through whatever means necessary. Shortly thereafter, some of those in the target audience detonate a truck bomb outside a restaurant frequented by foreign nationals, killing several foreign nationals and injuring many restaurant employees. Analysis - The use of any explosive with intent to endanger, directly or indirectly, the safety of one or more individuals or to cause substantial damage to property is a terrorist activity. In the example, the applicant helps foster anti-foreign sentiments and then, during a particularly tense period, urges students to act to drive foreigners from the country through whatever means necessary. Under these circumstances, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The fact that the applicant knew that several students likely had access to weapons and/ or explosives and that those students were in attendance at his special lecture would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. assigned.	
<b>joint harbor operations center</b> - operational command and control facilities focused around a single port and on coordinating operations and information sharing staffed by the Navy and Coast Guard, as well as other port centric stakeholders.	DHS
<b>joint information center</b> - An interagency entity established to coordinate and disseminate information for the public and media concerning an incident. JICs may be established locally, regionally, or nationally depending on the size and magnitude of the incident. Also called JIC.	DHS/ FEMA
<b>joint information system</b> - Mechanism that integrates incident information and public affairs into a cohesive organization designed to provide consistent, coordinated, accurate, accessible, timely, and complete information during crisis or incident operations. The mission of the JIS is to provide a structure and system for developing and delivering coordinated interagency messages; developing, recommending, and executing public information plans and strategies on behalf of the Incident Commander; advising the Incident Commander concerning public affairs issues that could affect a response effort; and controlling rumors and inaccurate information that could undermine public confidence in the emergency response effort. Also called JIS.	DHS/ FEMA
<b>joint operations center</b> - An interagency command post established by the Federal Bureau of Investigation to manage terrorist threats or incidents and investigative and intelligence activities. The JOC coordinates the necessary local, State, and Federal assets required to support the investigation, and to prepare for, respond to, and resolve the threat or incident. Also called JOC.	DHS/ FEMA
<b>joint task force</b> - Based on the complexity and type of incident, and the anticipated level of Department of Defense (DOD) resource involvement, DOD may elect to designate a JTF to command Federal (Title 10) military activities in support of the incident objectives. If a JTF is established, consistent with operational requirements, its command and control element will be co-located with the senior on-scene leadership at the Joint Field Office (JFO) to ensure coordination and unity of effort. The co-location of the JTF command and control element does not replace the requirement for a Defense Coordinating Officer (DCO)/ Defense Coordinating Element as part of the JFO Unified Coordination Staff. The DCO remains the DOD single point of contact in the JFO for requesting assistance from DOD. Also called JTF.	DHS/ FEMA
<b>Joint Task Force Commander</b> - Individual who exercises operational control of Federal military personnel and most defense resources in a Federal response. Some Department of Defense (DOD) entities, such as the U.S. Army Corps of Engineers, may respond under separate established authorities and do not provide support under the operational control of a JTF Commander. Unless federalized, National Guard forces remain under the control of a State Governor. Close coordination between Federal military, other DOD entities, and National Guard forces in a response is critical. Also called JTF Commander.	DHS/ FEMA
<b>Joint Terrorism Task Force</b> - multi-jurisdictional task forces established to conduct terrorism-related investigations.	DHS
<b>joint worldwide intelligence communications system</b> - network designed to meet the requirements for secure (TS/ SCI) multimedia intelligence communications worldwide.	DHS
<b>jurisdiction</b> - A range or sphere of authority. Public agencies have jurisdiction at an incident related to their legal responsibilities and authority. Jurisdictional authority at an incident can be political or geographical (e.g., Federal, State, tribal, and local boundary lines) or functional (e.g., law enforcement, public health).	DHS/ FEMA
<b>jurisdictional agency</b> - The agency having jurisdiction and responsibility for a specific geographical area, or a mandated function.	DHS/ FEMA

<b>risk assessment</b> - product or process evaluating information based on a set of criteria and assigns values to risks for the purpose of informing priorities, developing or comparing courses of action, and informing decision making appraisal of the risks facing an entity, asset, system, network, geographic area or other grouping <sup>3</sup>	DHS
<b>risk assessment</b> - The identification and assessment of hazards (first two steps of risk management process). Also called RA.	DOD
<b>risk assessment</b> - The process of identifying risks to organizational operations (including mission, functions, image, or reputation), organizational assets, individuals, other organizations, and the Nation, arising through the operation of an information system.	DOS/ USAID
<b>risk assessment</b> - The process of identifying the risks to system security and determining the probability of occurrence, the resulting impact, and additional safeguards that would mitigate this impact. This is part of risk management and synonymous with risk analysis.	DOS/ USAID
<b>risk assessment methodology</b> - set of methods, principles, or rules used to identify and assess risks and to form priorities, develop courses of action, and inform decision-making	DHS
<b>risk assessment tool</b> - activity, item, or program that contributes to determining and evaluating risks.	DHS
<b>risk avoidance</b> - strategies or measures taken that effectively remove exposure to a risk	DHS
<b>risk communication</b> - exchange of information with the goal of improving risk understanding, affecting risk perception and/ or equipping people or groups to act appropriately in response to an identified risk.	DHS
<b>risk control</b> - deliberate action taken to reduce the potential for harm or maintain it at an acceptable level.	DHS
<b>risk data</b> - information on key components of risk that are outputs of or inputs to risk assessments and risk analyses.	DHS
<b>risk exposure</b> - contact of an asset, system, or geographic area with a potential hazard.	DHS
<b>risk governance</b> - actors, rules, practices, processes, and mechanisms concerned with how risk is analyzed, managed, and communicated.	DHS
<b>risk group [infectious biological agents]</b> - categorization of infectious biological agents based on their relative risks, using following criteria: i) pathogenicity; ii) mode of transmission and host range; iii) availability of effective preventive measures, such as vaccines; iv) availability of effective treatment, including antibiotics; and v) other factors as appropriate	DHS
<b>risk identification</b> - process of finding, recognizing, and describing potential risks <sup>3</sup>	DHS
<b>risk indicator</b> - Definition: measure that signals the potential for an unwanted outcome as determined by qualitative or quantitative analysis.	DHS
<b>risk management</b> - process of identifying, analyzing, and communicating risk and accepting, avoiding, transferring or controlling it to an acceptable level considering associated costs and benefits of any actions taken.	DHS
<b>risk management</b> - The process of identifying, assessing, and controlling risks arising from operational factors and making decisions that balance risk cost with mission benefits. Also called RM. See also risk.	DOD
<b>risk management</b> - the program and supporting processes to manage risk to agency operations (including	White

mission, functions, image, reputation), agency assets, individuals, other organizations, and the Nation, and includes: establishing the context for risk-related activities; assessing risk; responding to risk once determined; and monitoring risk over time.	House
<b>risk management</b> - the systematic application, by the owner or operator of a pipeline facility, of management policies, procedures, finite resources, and practices to the tasks of identifying, analyzing, assessing, reducing, and controlling risk in order to protect employees, the general public, the environment, and pipeline facilities.	DOT
<b>risk management</b> - The total process of identifying, controlling, and mitigating IT system-related risks. It includes risk assessment; cost benefit analysis; and the selection, implementation, test, and security evaluation of security controls. This overall system security review considers both effectiveness and efficiency, including impact on the mission and constraints due to policy, regulations, and laws.	DOS/ USAID
<b>risk management alternatives development</b> - process of systematically examining risks to develop a range of options and their anticipated effects for decision makers.	DHS
<b>risk management cycle</b> - sequence of steps that are systematically taken and revisited to manage risk.	DHS
<b>risk management methodology</b> - set of methods, principles, or rules used to identify, analyze, assess, and communicate risk, and mitigate, accept, or control it to an acceptable level at an acceptable cost.	DHS
<b>risk management plan</b> - document that identifies risks and specifies the actions that have been chosen to manage those risks.	DHS
<b>risk management strategy</b> - course of action or actions to be taken in order to manage risks proactive approach to reduce the usually negative impacts of various risks by choosing within a range of options that include complete avoidance of any risk that would cause harm or injury, accepting the risk, controlling the risk by employing risk mitigation options to reduce impacts, or transferring some or all of the risk to another entity based on a set of stated priorities.	DHS
<b>risk management strategy</b> - the description of how an agency intends to assess risk, respond to risk, and monitor risk, making explicit and transparent the risk perceptions that organizations routinely use in making both investment and operational decisions.	White House
<b>risk matrix</b> - tool for ranking and displaying components of risk in an array.	DHS
<b>risk mitigation</b> - application of measure or measures to reduce the likelihood of an unwanted occurrence and/ or its consequences.	DHS
<b>risk mitigation option</b> - measure, device, policy, or course of action taken with the intent of reducing risk.	DHS
<b>risk perception</b> - subjective judgment about the characteristics and/ or severity of risk.	DHS
<b>risk profile</b> - description and/ or depiction of risks to an asset, system, network, geographic area or other entity.	DHS
<b>risk reduction</b> - decrease in risk through risk avoidance, risk control or risk transfer.	DHS
<b>risk response</b> - accepting, avoiding, mitigating, sharing, or transferring risk to agency operations, agency assets, individuals, other organizations, or the Nation.	White House
<b>risk score</b> - numerical result of a semi-quantitative risk assessment methodology numerical representation that gauges the combination of threat, vulnerability, and consequence at a specific moment.	DHS

<b>imminent danger to the health and safety of the public</b> - the existence of any condition or practice, or any violation of a permit or other requirement of this chapter in a surface coal mining and reclamation operation, which condition, practice, or violation could reasonably be expected to cause substantial physical harm to persons outside the permit area before such condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not expose himself or herself to the danger during the time necessary for abatement.	DOI
<b>incitement of terrorism</b> - Incitement with intent to cause bodily harm renders an alien inadmissible under INA if he or she has incited terrorist activity under circumstances indicating an intention to cause death or serious bodily harm. Incited in the context of INA is speech that induces or otherwise moves another person to undertake terrorist activity. Normally speech will not rise to the level of inciting unless there is a clear link between the speech and an actual effort to undertake the terrorist activity. It connotes speech that is not merely an expression of views but that directs or induces action, typically in a volatile situation. The applicant may have incited terrorist activity even if a terrorist attack does not actually occur (e.g., because an attempt to commit such activity was thwarted). An applicant who has incited terrorist activity must also have acted in circumstances indicating an intention to cause death or serious bodily harm to be inadmissible under INA. In other words, the aliens speech must not only have induced others to undertake terrorist activity, but it must also have been made with the specific intent that such activity would result in death or serious bodily injury. Incitement and the requisite intent to cause bodily harm could be inferred in the following situations - (a) Widespread opposition to Country A's policies and actions lead to a series of protests, some violent, outside Country As embassy in Country B. The applicant goes to the embassy, stands on a box, and shouts to the crowd to join him in standing up to Country A and humiliating it. Shortly afterwards, when he sees an embassy vehicle approaching, he yells - Don't let them in! Make them pay for	DOS/ USAID

what they have done! The crowd blocks the car and removes occupants (including a diplomat working at Country As embassy), from the car, beating them severely and taking them hostage. Analysis - Diplomatic hostage-taking and violent attacks on diplomats are terrorist activities. Given the aliens urging the crowd to stop the embassy vehicle and make them pay, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The aliens make them pay statement, when viewed against the backdrop of previous violent protests and his general comments about standing up to Country A and humiliating it, would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. (b) The applicant is an ardent nationalist whose opinions voiced to a particular audience regularly blame foreigners for his country’s problems and who argues that the only solution to these problems is that foreigners should be driven out of the country. Press reports say that some of those in the targeted audience have been purchasing weapons and seeking to obtain and manufacture explosives. Police notify the applicant or those associated with the applicant that they are investigating several of those in the targeted audience for weapons-related offenses. At the end of a week of particularly strong anti-foreign sentiment, the applicant gives a special speech entitled A Call to Action. With the knowledge that those under investigation are in the audience, the applicant begins his speech with - The time has come for action! He then reiterates throughout his speech that The only solution to the country’s problems is to purge our great land of these foreigners once and for all through whatever means necessary. Shortly thereafter, some of those in the target audience detonate a truck bomb outside a restaurant frequented by foreign nationals, killing several foreign nationals and injuring many restaurant employees. Analysis - The use of any explosive with intent to endanger, directly or indirectly, the safety of one or more individuals or to cause substantial damage to property is a terrorist activity. In the example, the applicant helps foster anti-foreign sentiments and then, during a particularly tense period, urges students to act to drive foreigners from the country through whatever means necessary. Under these circumstances, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The fact that the applicant knew that several students likely had access to weapons and/ or explosives and that those students were in attendance at his special lecture would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm.

## ADMINISTRATIVE INSTRUCTIONS

### 1. Supersession

a. This document is the inaugural edition of the *USG Glossary*. The terms and definitions will be updated according to standing operating procedure with modifications, deletions, or additions that have been approved in accordance with this document.

b. The following terms provide a baseline for usage in this glossary:

Term	Action	Source
Glossary	a list that provides definitions for the difficult or unusual words used in a book; specialized vocabulary with definitions but does not provide other information about the words.	Merriam-Webster; Dictionary.com
Lexicon/ Vocabulary	the vocabulary of a language; a stock of terms used in a particular profession, subject, or style; a vocabulary.	Merriam-Webster; The Free Dictionary
Nomenclature	a system or set of terms or symbols especially in a particular science, discipline, or art	Merriam-Webster
Ontology	a branch of metaphysics concerned with the nature and relations of being <i>Ontology deals with abstract entities</i>	Merriam-Webster
Taxonomy	the study of the general principles of scientific classification	Merriam-Webster
Taxonomy versus ontology	On the technical side, ontologies imply a broader scope of information. People often refer to a taxonomy as a ‘tree’, and extending that analogy I’d say that an Ontology is often more of a “forest”. An ontology might encompass a number of taxonomies, with each taxonomy <u>organizing a subject in a particular way</u>	
Terminology	the technical or special terms used in a business, art, science, or special subject	Merriam-Webster
Thesaurus	a book of words or of information about a particular field or set of concepts; <i>especially</i> : a book of words and their synonyms	Merriam-Webster
Topic map	A standard for the representation and interchange of knowledge, with an emphasis on the findability of information. Similar to concept maps and mind maps in many respects, though only Topic Maps are ISO standards. Topic Maps are a form of semantic web technology similar to the Resource Description Framework	Merriam-Webster
