Wirbelthiere

(*Animalia vertebrata*)

und

Nachträge zu Catalog V & VI

aus den übrigen

Thierklassen.

L. Friederichsen & Co.

Land- & Seekartenhandlung.

Geographische und nautische Verlagshandlung.

HAMBURG, Mai 1879.

Im Verlage von L. Friederichsen & Co. in Hamburg
ist erschienen:

Journal des Museum Godeffroy. Geographische, ethnographische und naturwissenschaftliche Mittheilungen. Gr. Quart.
Heft I. 9 Bogen mit 1 Holzschnitt u. 8 Tafeln. 15 M.

INHALT: 1. Topographie der Schiffer-Inseln von Dr. E. Gräfle,
nebst 2 Karten der Schiffer-Inseln von L. Friederichsen. 2. Die
Lagune von Ebon nach J. Kubary, von Dr. E. Gräfle. 3. Ueber
eine Sendung Vögel aus Huahine von Dr. E. Gräfle. 4. Ein
Beitrag zur Farnflora der Palaos- und Hervey-Inseln von Dr.
Chr. Luerssen. 5. Untersuchungen über Diatomaceen-Gemische
von O. N. Witt.

Journal des Museum Godeffroy. Heft II. 13 Bogen mit 5
Holzschnitten, 2 Karten und 10 Tafeln. 30 M.

INHALT: 1. Die meteorologischen Erscheinungen in Samoa
Dr. E. Gräfle. 2. Die Carolinen-Insel Yap nebst den Matelotas-,
Mackenzie-, Fais- und Wolea-Inseln, nach A. Tetens und J. Knbel
von Dr. E. Gräfle. 3. Auf der Insel Yap gesammelte Schmetter-
linge und deren Verwandlungsgeschichte, von Georg Semper.
4. Neue Nacktschnecken der Südsee, malaeologische Unter-
suchnngen, von Dr. G. Bergh. 5. Entwickelungsformen der
Schwertfische von Dr. A. Günther.

Journal des Museum Godeffroy. Heft III. **Andrew Garrett's
Fische der Südsee**, beschrieben und redigirt von **Albert
C. L. G. Günther**, Vorstand des zoolog. Departemens des
Britischen Museums. Heft I. 3 Bogen mit 20 lithogr Tafeln
in Farbendruck und Handcolorit. 60 M.

Auf Basis einer Sammlung von 470 Abbildnugen von Mr. Andrew
Garrett nach dem Leben gemalter Fische der Südsee und mit
Hülfe des vereinigten Materials des Britischen und Godeffroy
Museums wird eine vollständige Bearbeitung dor Südseefische in
10 Heften mit je 20 colorirten Tafeln zum Preise von 60 M.
pr. Heft beabsichtigt. Die Hefto werden so rasch auf einander
folgen, als es möglich ist, die Tafeln von den Künstlern aus-
geführt zu erhalten. In ca. 2 Jahren soll dies Fischwerk als
ein integrirender Theil des Journals des Museums Godeffroy,
jodoch selbstständig paginirt, beendet sein.

Journal des Museum Godeffroy. Heft IV. 15 Bogen mit
2 Holzschnitten, 1 Karte und 14 Tafeln. 30 M.

INHALT: 1. Die Pelau-Inseln in der Südsee von J. Kubary, nebst
einer Karte von L. Friederichsen. 2. Beiträge zur Kenntniss
der Fidsehi-Inseln von J. W. Spengel. 3 Description de
quelques Crustacés, nouveaux ou peu connus, par le Dr. A.
Milne-Edwards. 4. Weitere Mittheilungen über junge Schwert-
fische von Dr. A. Günther. 5. Beitrag zur Lichenenflora der
Südsee-Inseln, von Dr. A. v. Krempellhuber. 6. Ueber Südsee-
Diatomaceen von Otto N. Witt. 7. Verschiedenes. a) Eine
Bank in den Gewässern der Tonga-Gruppe. b) Die Wandernng
von Danais-Erippus, Cramer nach den Südsee-Inseln, Anstralien
und Celebes von G. Semper.

Vorwort.

Mit gegeuwärtiger Ausgabe unserer Cataloge (No. VII) übergeben wir den zweiten der **Specialecataloge** der Oeffentlichkeit, der ausser einem vollständigen Verzeichniss aller an Wirbelthieren vorhandenen Doubletten, auch eine Uebersicht solcher Arten aus den übrigen Thierklassen enthält, die entweder für unsere Sammlungen völlig neu, oder von denen sich neuerdings Doublettenmaterial ergeben hat. Die systematische Anordnung ist dieselbe wie in unseren Catalogen V und VI geblieben.

In der Bestimmung der aufgeführten Arten wurden wir ausser von den in unseren frühen Catalogen genannten Autoren, neuerdings von den folgenden in der, der beigesetzten Thiere freundlichst unterstützt:

- Herr Léon Fairmaire, Paris
» Dr. Chapuis, Verviers } Coleopteren.
» E. Wehneke, Harburg }
» G. Semper, Altona; Rhopaloceren v. Australien.
» Dr. E. Kohlrausch, Hannover; Seolopendriden.
» Prof. C. Semper, Würzburg; Onchidien.
» Prof. C. Heller, Innsbruck; Ascidiens.
» Prof. K. Möbius, Kiel; Foraminiferen.

Betreffs der Beschreibungen der neuen Arten beziehen wir uns auf die im Journal des Museum Godeffroy, den Abhandlungen der k. k. Academie der Wissenschaften in Wien,

Proceedings of the Zoolog. Soc. of London, Annales de la Société entomologique de France u. a. a. O. erschienenen Arbeiten der genannten Autoren.

Auch die im gegenwärtigen Cataloge aufgeführten Doubletten haben sich mit geringen Ausnahmen aus den Sendungen unserer Reisenden ergeben. Besonders empfingen wir von Herrn Th. Kleinschmidt interessante Sammlungen von dessen Reisen im Viti-Archipel und harrt davon, zumal an Arthropoden, noch ein reiches Material der Bearbeitung.

Herr F. Hübner hatte sich Ende 1876 vom Tonga-Archipel nach dem Neu-Brittannia-Archipel begeben und dort im Laufe des Jahres 1877 interessante Sammlungen an Vögeln, Inseeten, Conehylien und ethnographischen Gegenständen, sowie anthropolog. Material zusammen gebracht. Umsomehr beklagen wir den schon am 31. Deebr. 1877 an den Folgen eines Sonnenstiches erfolgten Tod dieses jungen, vielversprechenden Forschers.

Herr Kubary hat inzwischen die Erforschung des Carolinen-Archipels weiter gefördert und sind interessante Sammlungen desselben theils hier schon angelangt, theils zu erwarten.

Aus den eben erwähnten Sammlungen werden wir die Arthropoden zuerst zur Bestimmung und Bearbeitung vorbereiten und hoffen wir gegen Ende dieses Jahres mit der Veröffentlichung eines Specialecataloges über Arthropoden vorgehen zu können.

Hamburg, Mai 1879.

Die Verwaltung des Museum Godeffroy:

J. D. E. Schmeltz.

Abkürzungen.

t. neben der Nummer bedeutet „trocken“ conservirt.

† neben der Nummer bedeutet, dass die betreffenden Arten sowohl trocken, als auch in Spiritus conservirt vorhanden sind.

Bemerkungen

über den Verkauf der nachstehenden Arten.

Preise sind in deutscher Reichswährung berechnet.
1 Mark = 100 Pfennige = 1 Fr. 25 Ct. = 1 sh. sterl.

Um eine Vereinfachung der in unserem Institut stets anwachsenden Arbeiten herbeizuführen, ist uns eine möglichst glatte Abwicklung der Geschäfte erwünscht und bewilligen wir daher für comptante Zahlung 5 % Decort.

Unter Addenda sind (S. 92 & ff.) eine Anzahl Doubletten aus, uns während des Drucks zugegangenen Sendungen aufgeführt.

Ueber Doubletten der ethnograph.-anthropol. und der botan. Sammlung findet sich auf S. 97 & 98 das Nähere mitgetheilt.

Für Bestellungen wolle man sich des einl. Blattes bedienen und die Nummern nach Reihenfolge des Cataloges darauf eintragen.

Bestellungen werden auf Rechnung und Gefahr des Empfängers unfrankirt expedirt unter billigster Berechnung der Kisten und Emballage.

VIII

Für Schulen und Gymnasien werden Preisermässigungen bewilligt, wenn dem Unterzeichneten die Wahl der Arten überlassen wird.

Die in unseren Catalogen V und VI für Wirbelthiere notirten Preise treten mit dem Erscheinen des gegenwärtigen Cataloges VII ausser Kraft. —

~~~~~

Briefe, Gelder und etwaige Anfragen werden frameo erbeten an das

„Museum Godeffroy“

1344 S. *Cryptochiton Stelleri* ||  
 Middend. de Castries Bay || 18,00

Doubletten  
der  
ethnograph. anthropol. Sammlung.

**I. Gyps-Abgüsse von folgenden Rasse-Schädeln:**

- 1) Vitianer (dolichocephal).
- 2) L'Echiqier-Ins. (No. 9774).
- 3) Mortlock-Ins. (No. 9785).
- 4) Tonga-Ins. (No. 10226).
- 5) Gilbert-Ins. (No. 12852).
- 6) Panmotu-Ins. (No. 9783).
- 7) Samoa-Ins. (No. 13749).
- 8) Nen-Britannier (No. 14704).

Die ganze Serie kostet incl. Emballage M. 50,00, einzelne Abgüsse werden à M. 7,50 abgeben.

**II. Photographien von Eingeborenen und Landschaftsbilder von verschiedenen Inseln des stillen Oceans.**

Auswahlsendungen stehen zu Diensten. Preise nach Ueber-einkunft!

**III. Waffen, Geräthe etc. von vielen Inseln des stillen Oceans.** Zu Auswahlsendungen sind wir hier ebenfalls bereit; Preisverzeichnisse franco gegen franco.

## Verkäufliche Herbarien.

---

Aus den Doubletten der Pflanzensammlungen können abgegeben werden:

### Pflanzen

von

Brisbane River, Rockhampton und Port Maekay, Queensland, N. O. Australien,  
gesammelt von *Frau A. Dietrich.*

### Moose

von

der Colonie Queensland, N. O. Australien.

### Flechten, Algen & Farne

von

den Samoa-, Viti- und Tonga-Inseln,  
gesammelt von *Herrn Dr. Ed. Gräffe.*

### Preis der Centurie

von

### Moosen, Flechten, Algen und Farnen

im gewöhnl. Format M. 36.—, im grossen Format M. 50.—,  
der der übrigen Pflanzen M. 30.—

## Errata.

Pag. 6, Zeile 16 von unten lies: „Tatare“ statt: „Tartare“.

„ 14, „ 17 „ oben „ „7,00“ „ „7,09“.

„ 15, „ 1 „ „ „Carpophaga“ statt: „Charpophaga“.

„ 15, „ 19 und 20 sind nach Zeile 4 zu lesen.

„ 22, „ 11 von unten lies: „4547“ statt: „4057“.

„ 38, „ 18 „ „ „ „leptacanthus“ statt: „leptacanthus“.

„ 90, „ 14 „ „ „ „Monteverdes“ „ „Montdeverdes“.

J. F. Richter (H. G. Voigt's Buchdruckerei).

**Journal des Museum Godeffroy.** Heft V. **Andrew Garrett's Fische der Südsee**, beschrieben und redigirt von **Albert C. L. G. Günther**. Heft II. 4 Bogen Text und 20 lithogr. Tafeln in Farbendruck. 60 M.

**Journal des Museum Godeffroy.** Heft VI. 17 Bogen mit 7 Holzschnitten und 75 Tafeln. 30 M.

INHALT: 1. Verzeichniss der von Frau Amalie Dietrich in den Jahren 1863—1873 an der Nordostküste von Neuholland gesammelten Pflanzen, nebst allgemeinen Notizen dazu von Dr. Chr. Luerssen. 2. Algen der Fidschi-, Tonga- und Samoa-Inseln, gesammelt von Dr. E. Gräfle, beschrieben von A. Grunow. 3. Musci polynesiae praesertim Vitiani et Samoani Graeffeani Anetore Carlo Müller Halensi. 4. Nene Nacktschnecken der Südsee von Dr. R. Bergh. 5. Nachtrag zu den Beiträgen zur Kenntniss der Fidschi-Inseln von Dr. J. W. Spengel. 6. Samoa- oder Die Schiffer-Inseln von Dr. E. Gräfle. Dritter Abschnitt: Notizen über die geologischen Verhältnisse Samoa's. 7. Die Ruinen von Nauvatal auf der Insel Ponapé (Ascension) nach J. Kubary's brieflichen Mittheilungen.
