

# **Cross-wiki content propagation**

**Help small wikis grow by  
translating new sections  
on mobile and desktop**

# Problem statement

Millions of speakers of less supported languages have limited access to knowledge. They have access to **few articles with little coverage**.

Translation has helped medium and large wikis, but had limited effect on small wikis so far.

## Goal

Provide a fluent and engaging way to expand knowledge anytime by translating.

# Approach

**Increase content coverage on small wikis** by facilitating translation as a way to expand articles with new sections.

**Increase the number of translators** by supporting their activities on both desktop and mobile.

**Mobile support** enables to translate when it was not possible before.

**Article sections** seem a convenient translation unit to transfer and manipulate

**Bengali**

**Malayalam**

**Tagalog**

**Javanese**

**400 Million native  
speakers**

**Less than 100K  
Wikipedia articles**

# Audience

Our core audience is composed by new and experienced multilingual editors of small Wikipedias, on different devices.

**Eko**

New editor

**Adi**

Casual editor

**Pal**

Experienced editor

**These are proto-personas** based on our own hypotheses and previous research in different contexts. Specific research is needed to confirm these, and detail further. See [https://www.mediawiki.org/wiki/Personas\\_for\\_product\\_development](https://www.mediawiki.org/wiki/Personas_for_product_development)

Speaks Javanese,  
Indonesian, and  
English.

Lives in Jakarta.

Architecture student.

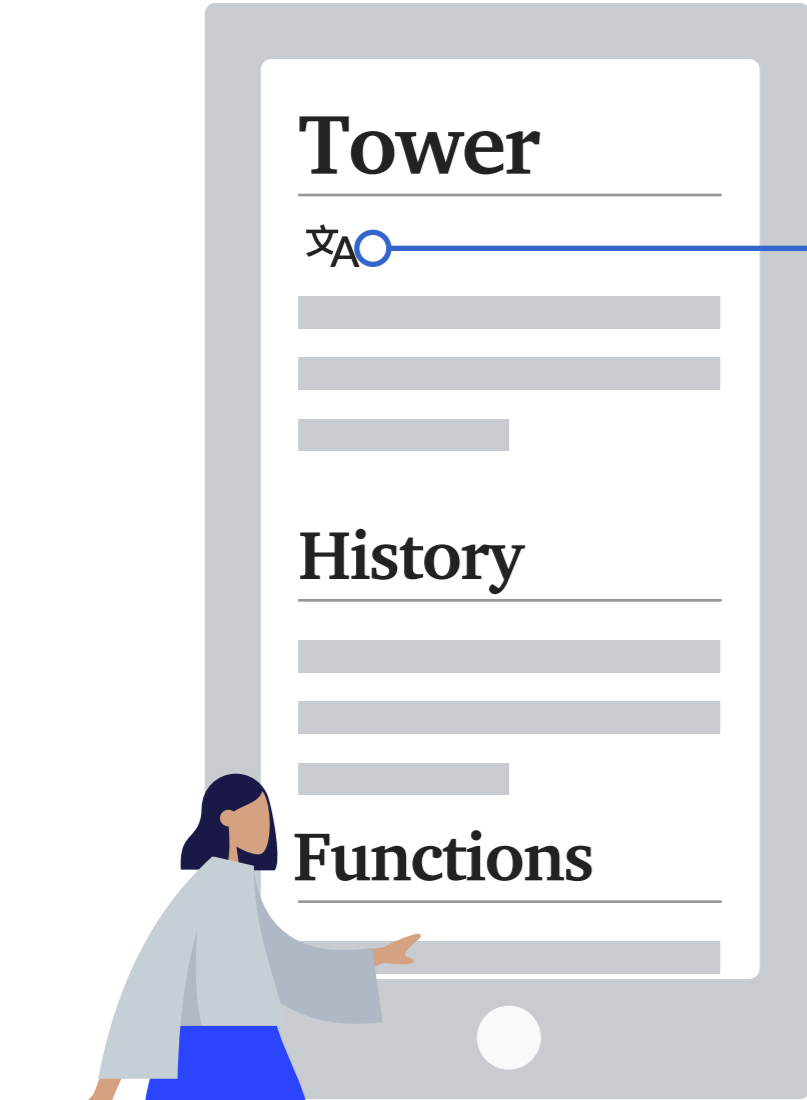

Often reads Wikipedia  
on mobile but has not  
contributed yet.

## Eko, the new editor

**Discover translation while reading.** Eko looks for information about towers and finds that the Javanese “Menara” article is incomplete compared to the English “Tower” version. She wants to expand the article and finds an easy way to translate the History section into Javanese.

**Find interesting sections to expand.** Happy after translating her first section, she looks for other topics in the architecture field that she can help expand. She can easily find interesting options, check what is currently missing and translate the missing parts based on either the English or the Indonesian version.

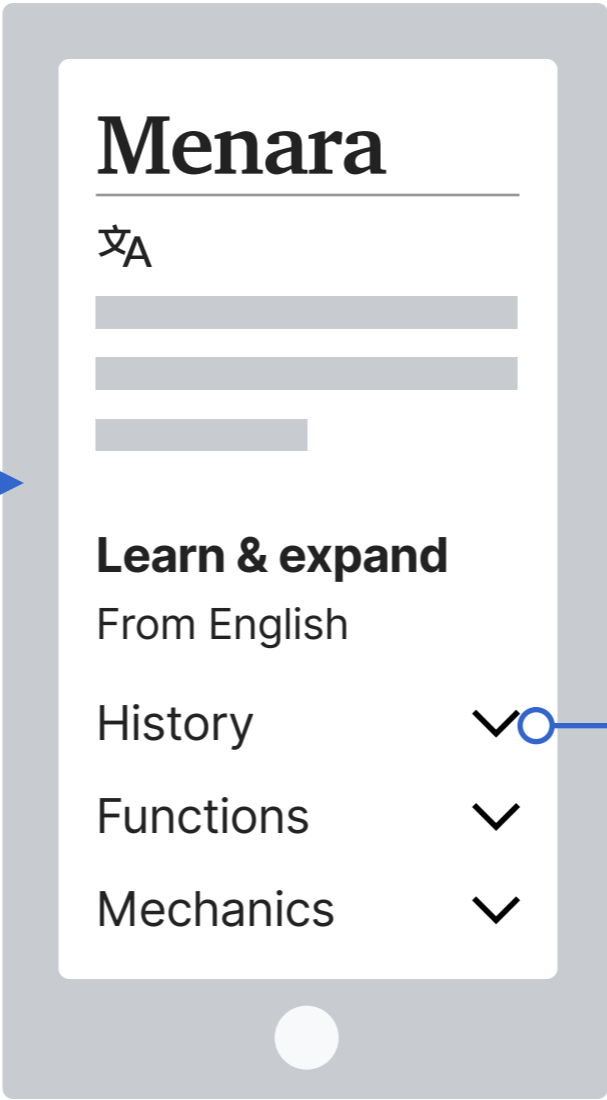

# Discover translation while reading

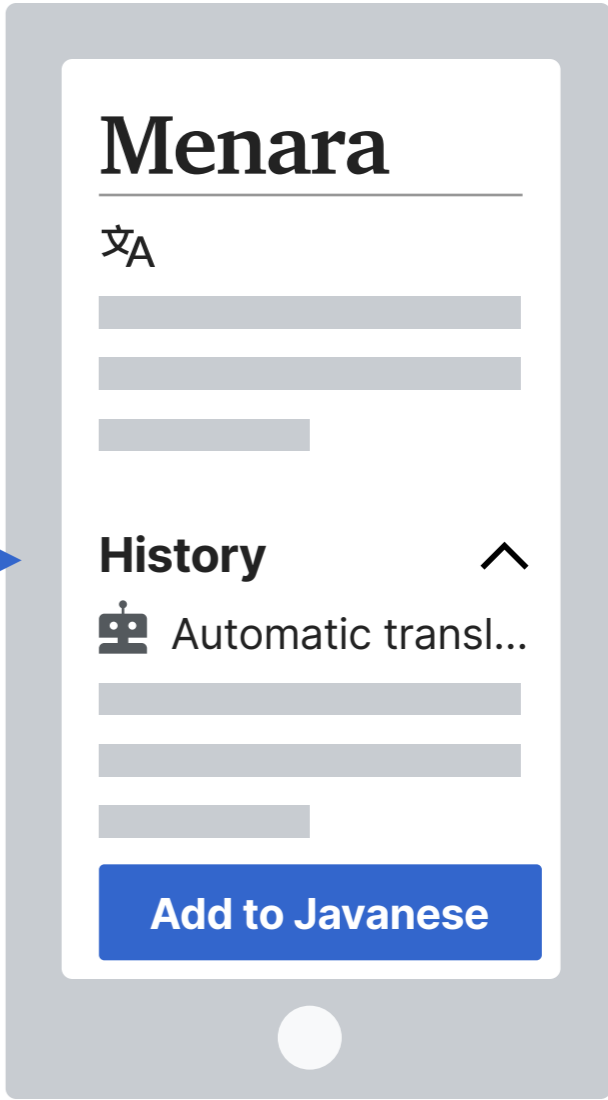

Reads English version.

**Eko**  
New editor

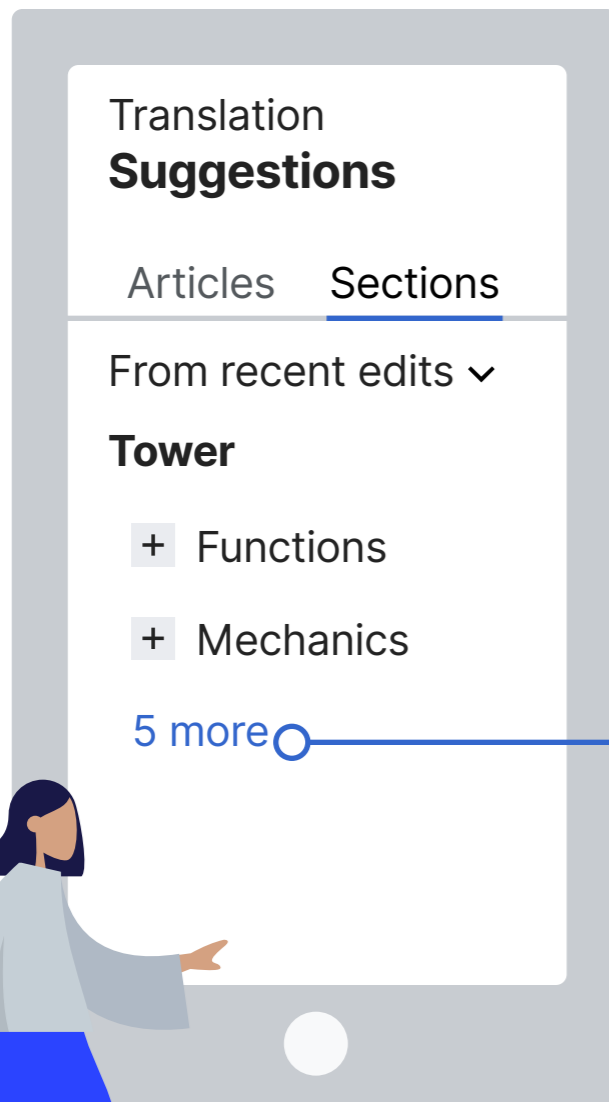

Explores sections to expand the brief Javanese article.

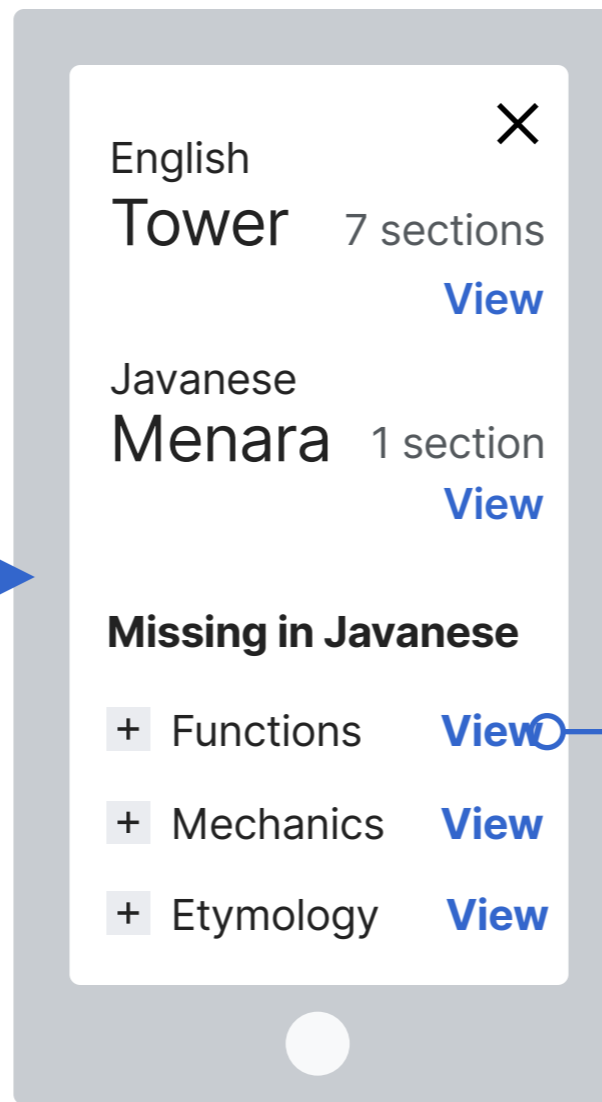

Reads the automatic translation and starts a new translation.

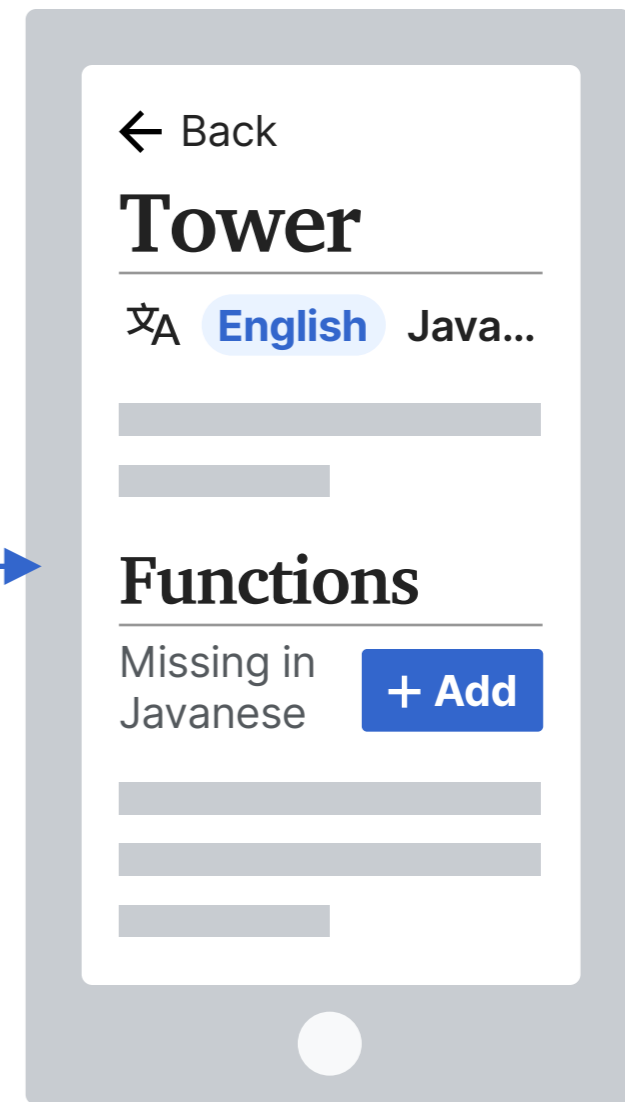

# Find interesting sections to expand

Finds relevant suggestions

Explores missing sections.

Checks content in different languages to find what's worth translating.

**Eko**

New editor

Speaks Malayalam and English.

Lives in Alappuzha.

Musician.

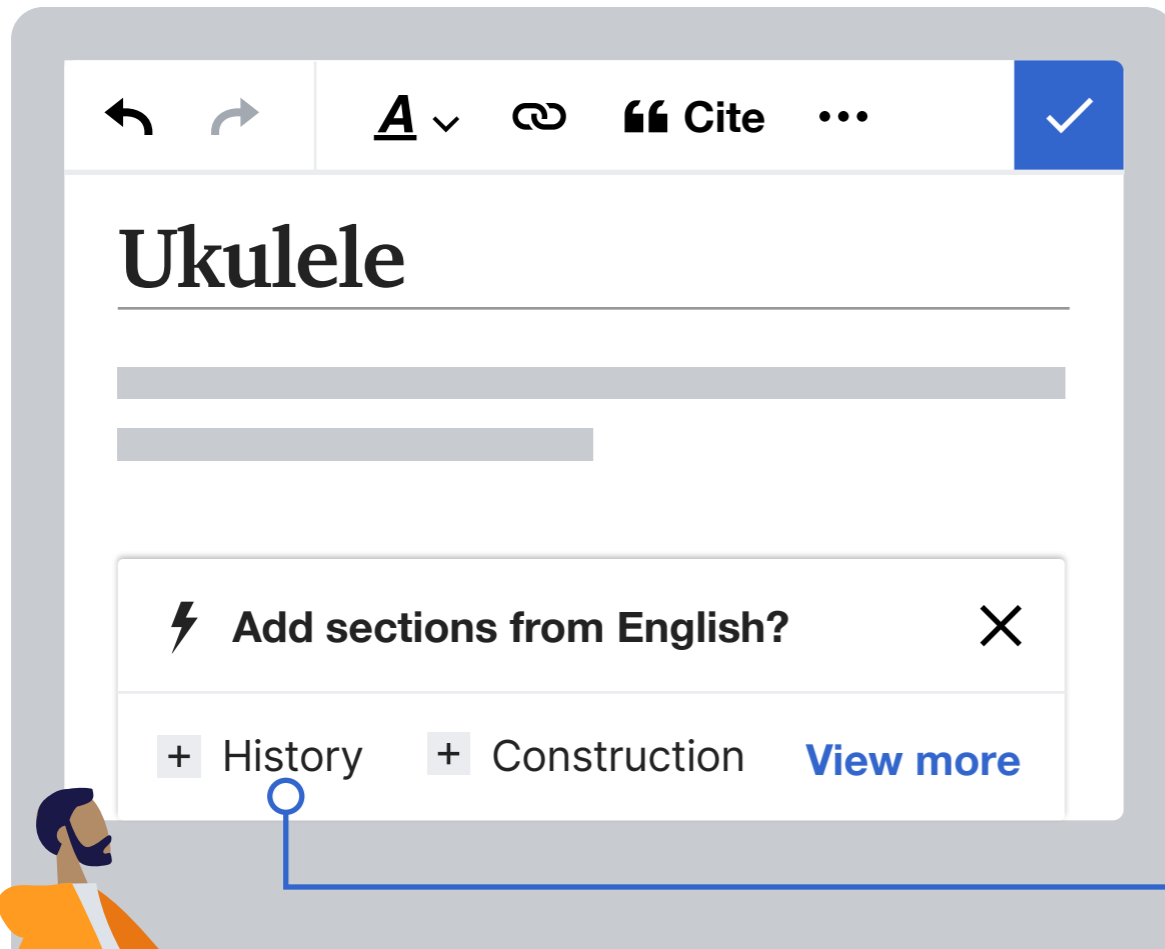

Contributes on music-related articles from time to time, using mobile and desktop.

## Adi, the casual editor

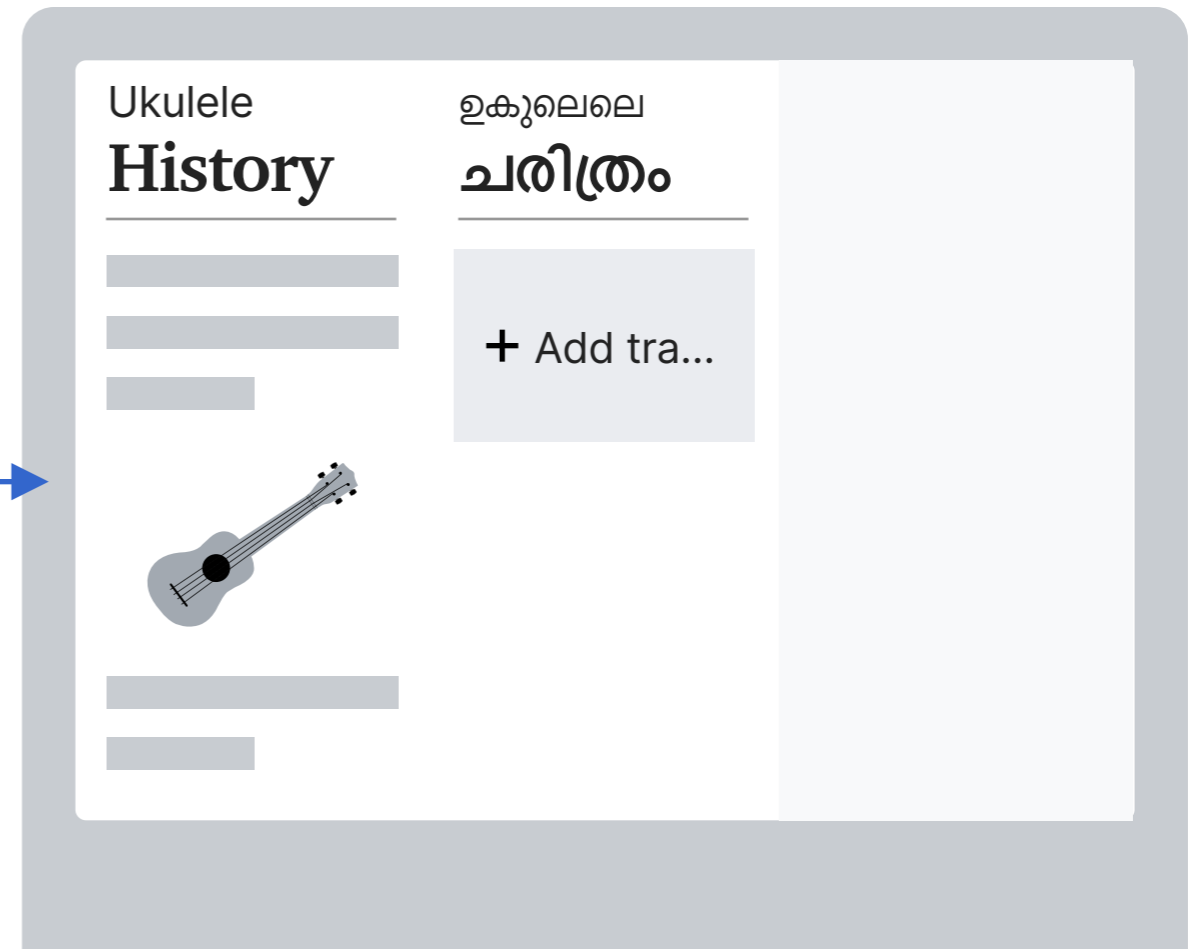

**Expanding a stub.** Adi is editing the Ukulele article in Malayalam, which is a very short one. He can easily identify missing sections that are available in English and translate them to expand the Malayalam version.

**Continue a previous contribution.** Adi started an article in English a few months back about the Tanpura, a musical instrument. Now he discovers that a new section was recently added to the English version that is missing in Malayalam. After translating the section, he easily finds another missing section, and he is motivated to continue expanding the article.

# Expanding a stub

Finds missing sections to add by translating as an alternative.

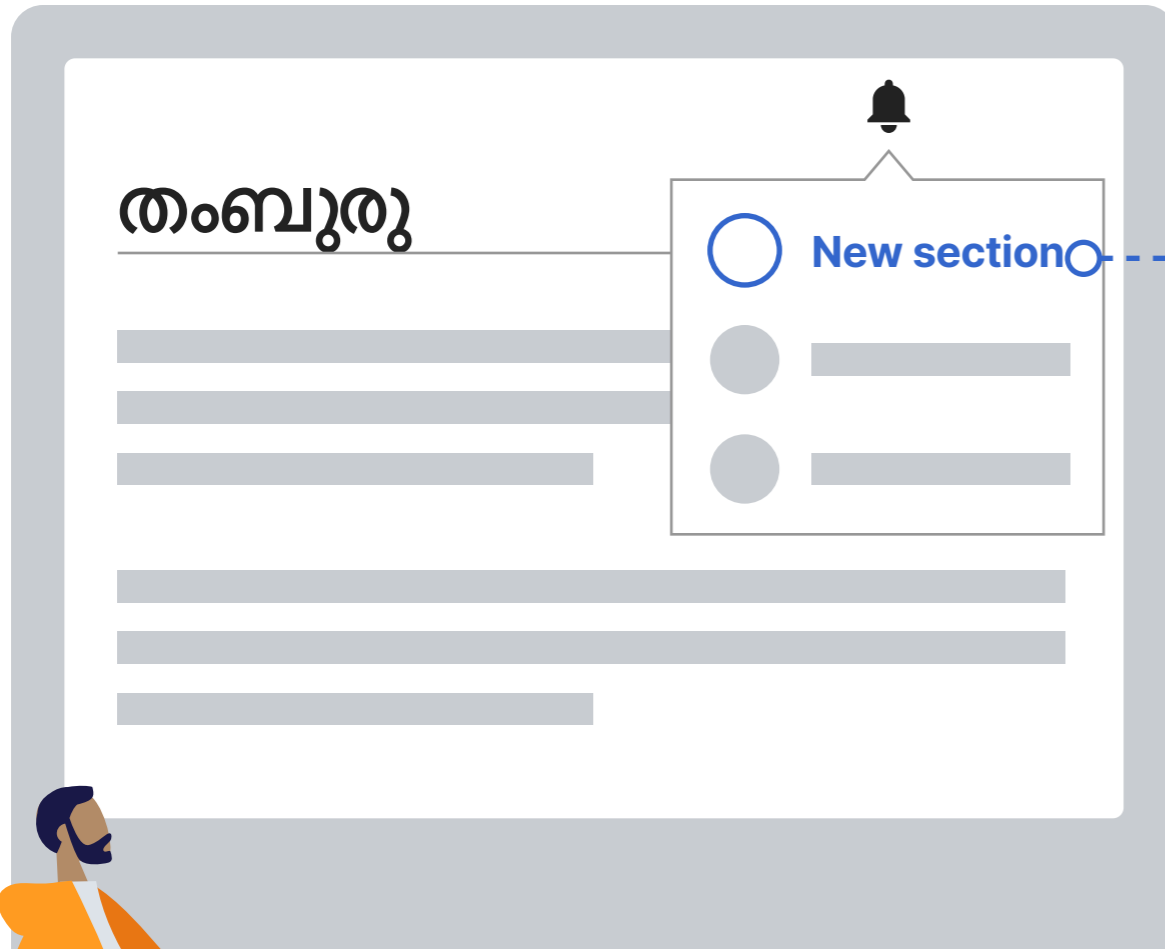

Content translation is used on desktop to translate a single section in the usual way

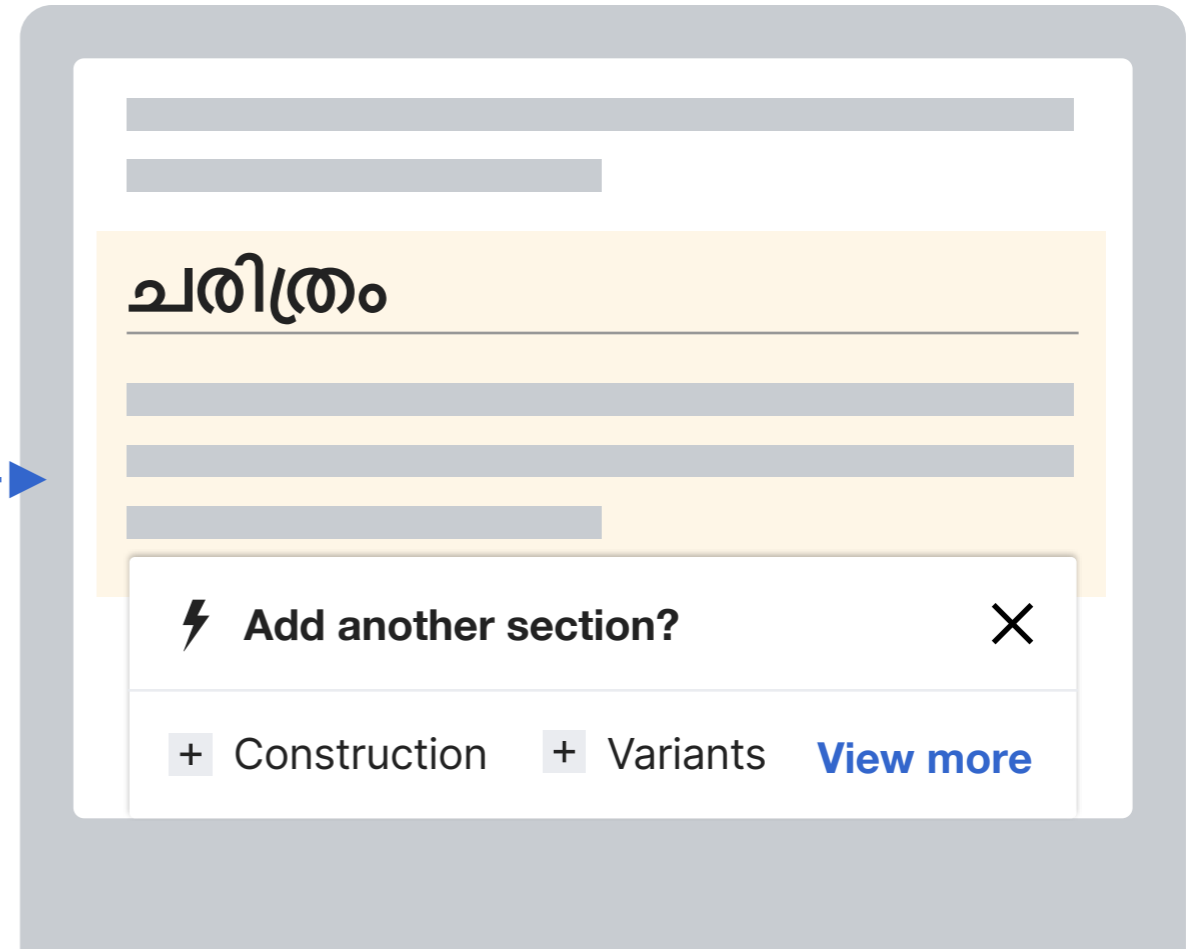

**Adi**

Casual editor

# Continue a previous contribution

Notification shows that a new section was added to a relevant article.

After completing the translation, options to translate the next section surface.

**Adi**

Casual editor

Speaks Bengali and English.

Lives in Philadelphia.

Scientist.

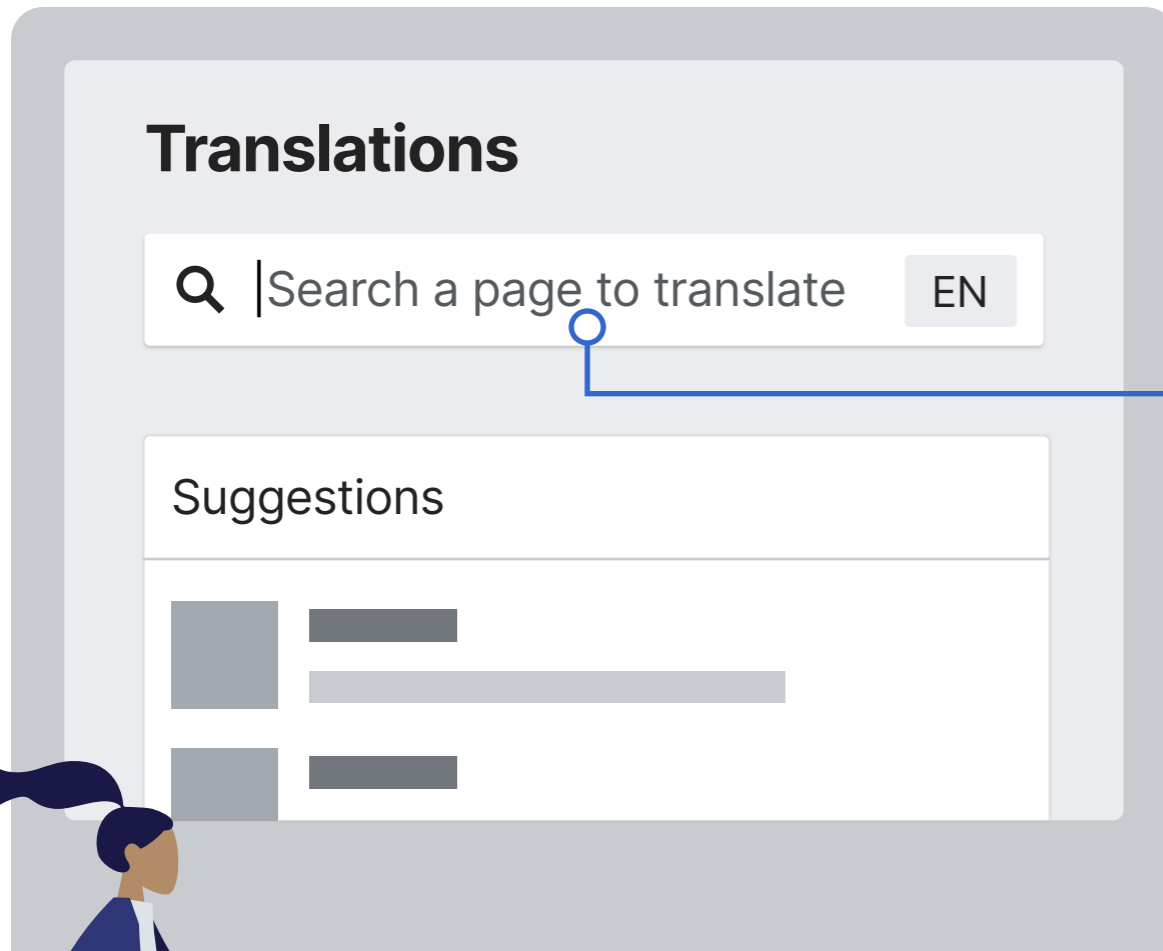

Contributes regularly to scientific topics, mainly on desktop.

## Pal, the expert editor

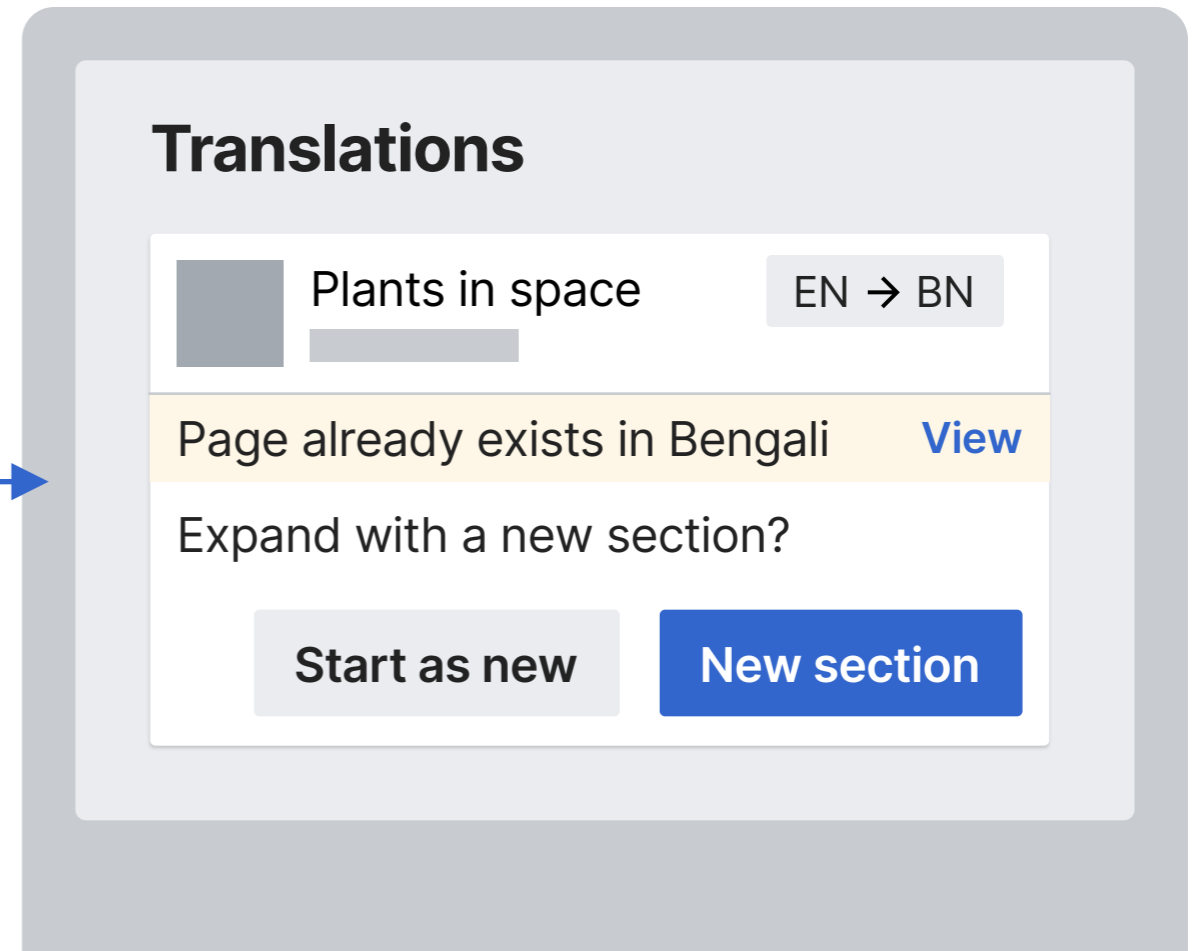

**Expand a specific article.** Pal, after reading the news on a recent space mission, looks for the plants in space article in Bengali to expand it with the new discoveries. She is able to easily transfer the relevant information including references, and review that the translation is accurate and reads natural, making further edits to polish the final result.

**Start a new article on the go.** Pal is in her commute when she finds that an article on the Jupiter's moon "Io" is missing in Bengali. Despite not being a frequent mobile contributor, she is able to translate the lead section of the article to make an initial contribution. Later at home, she expands the initial article created by translating a few new sections.

# Expand a specific article

Searches for a page on the translation dashboard

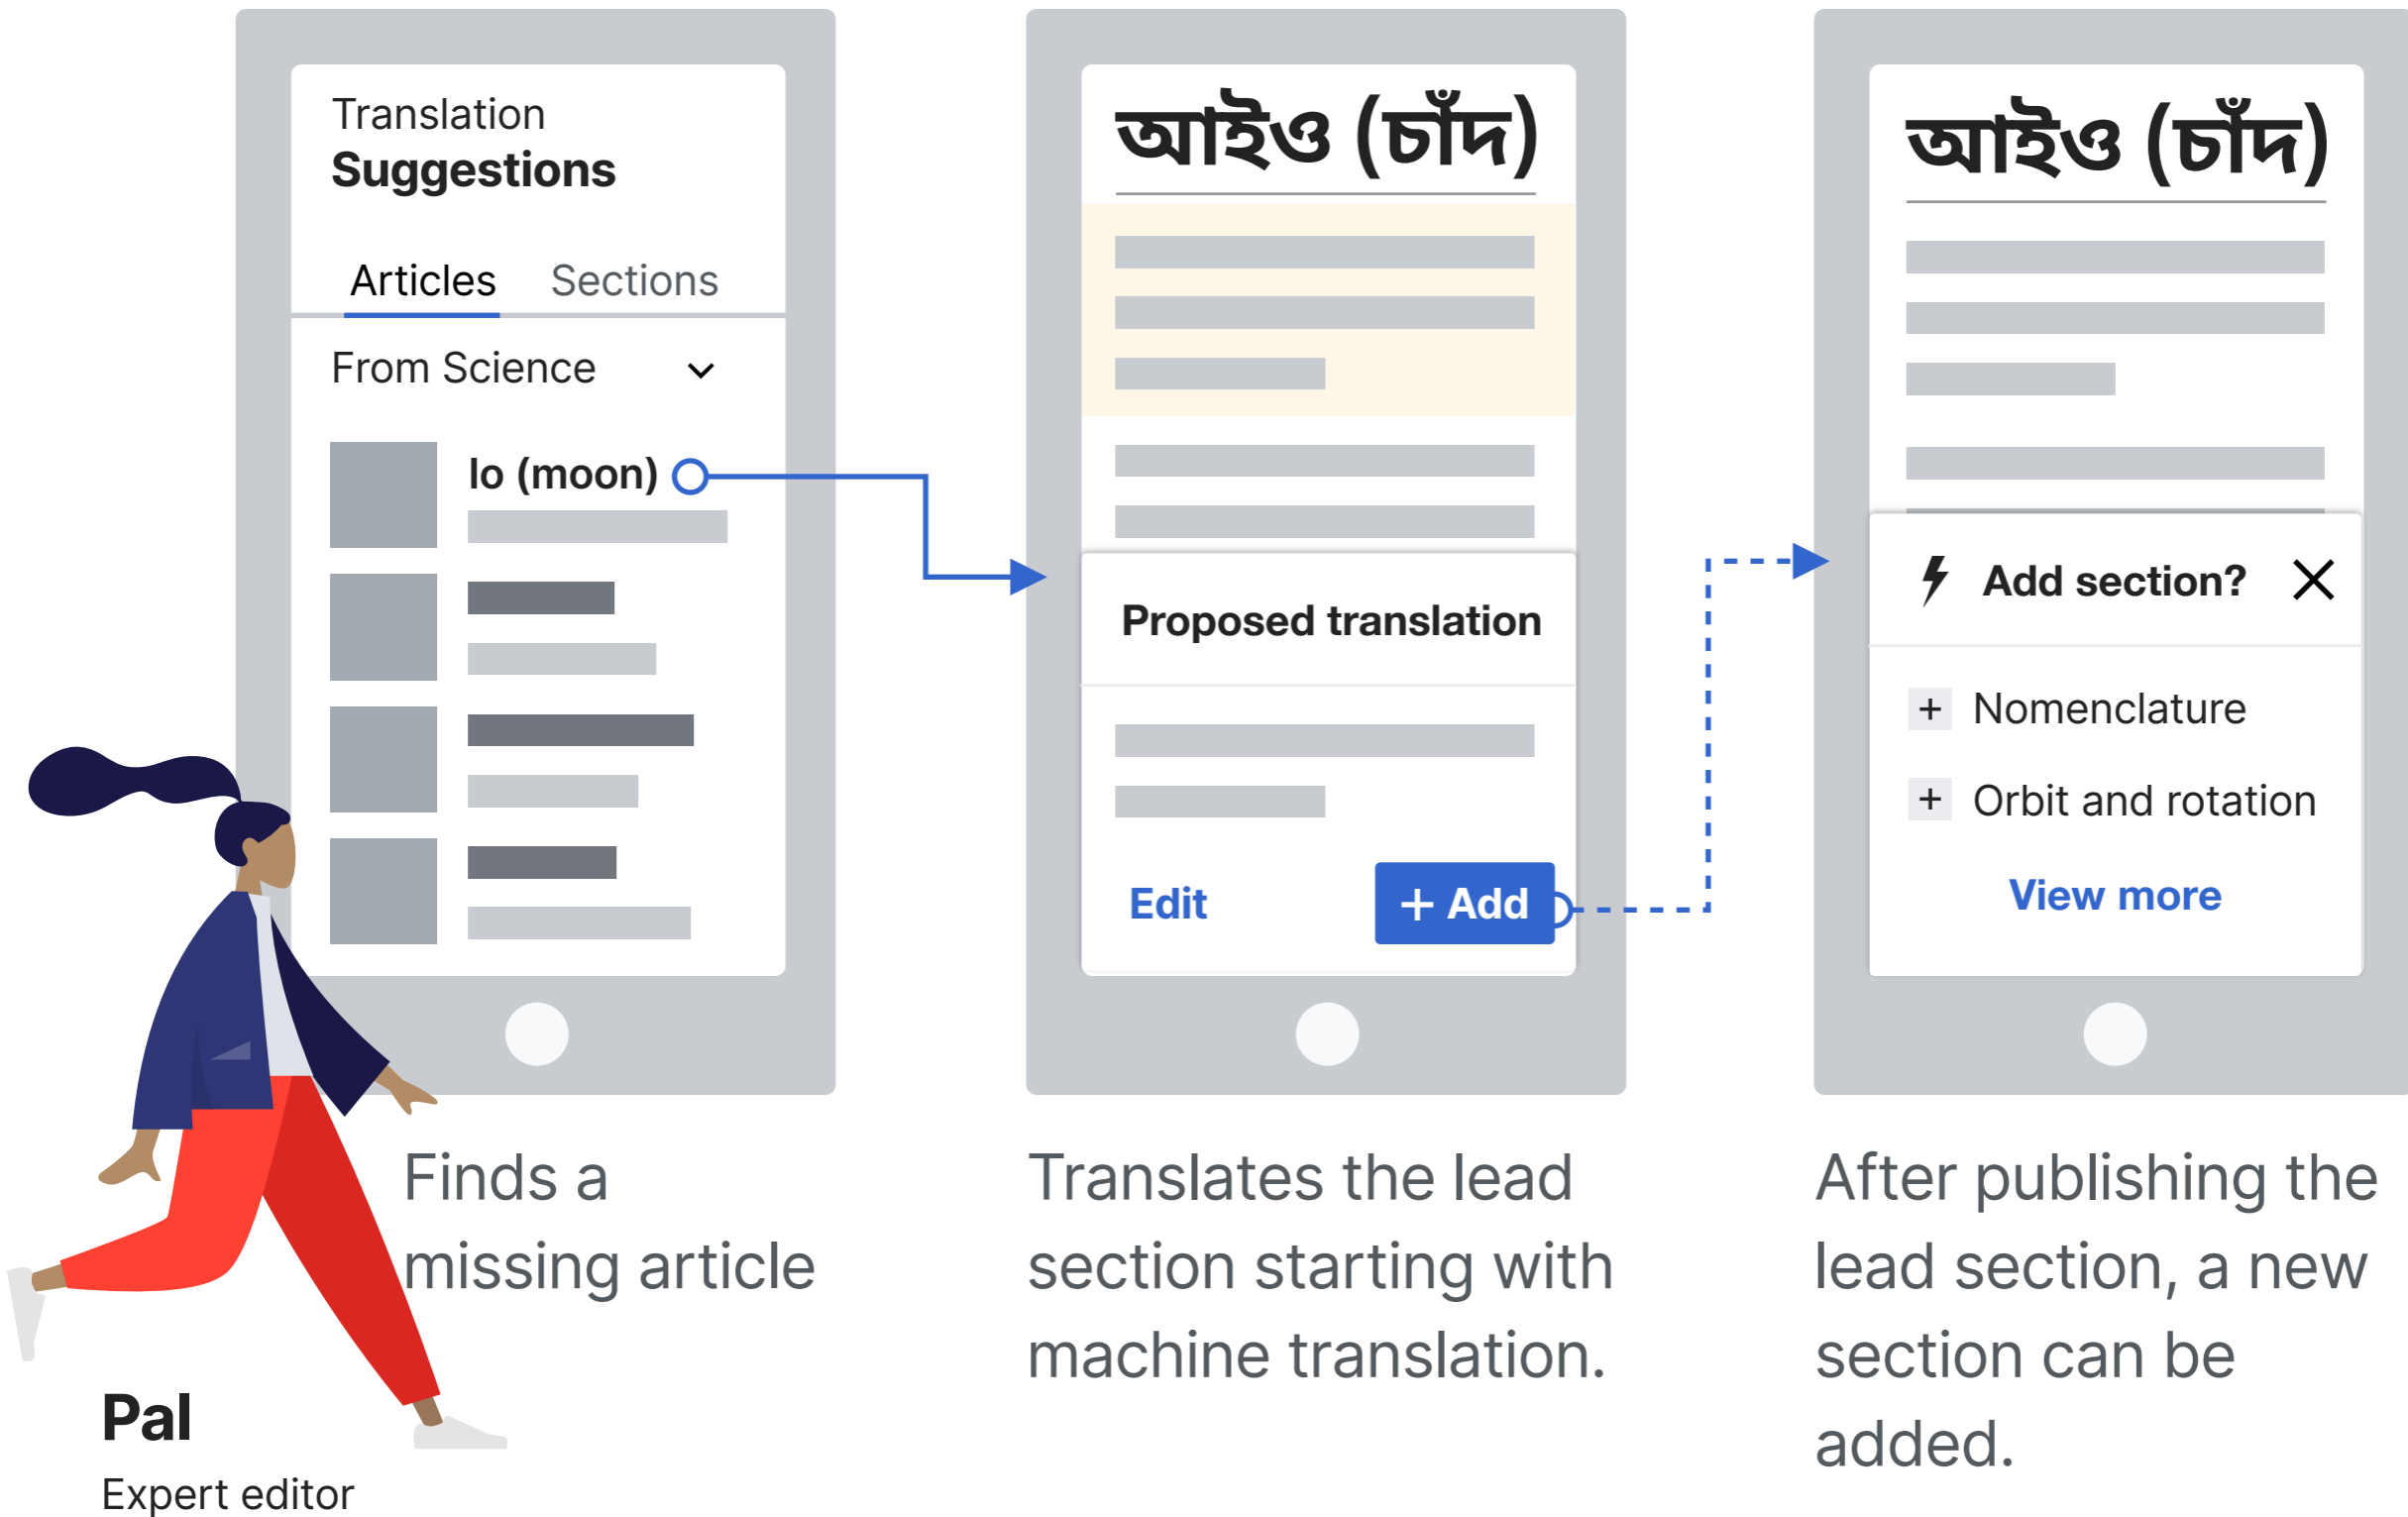

Since the page exists, options to expand it with new sections are provided.

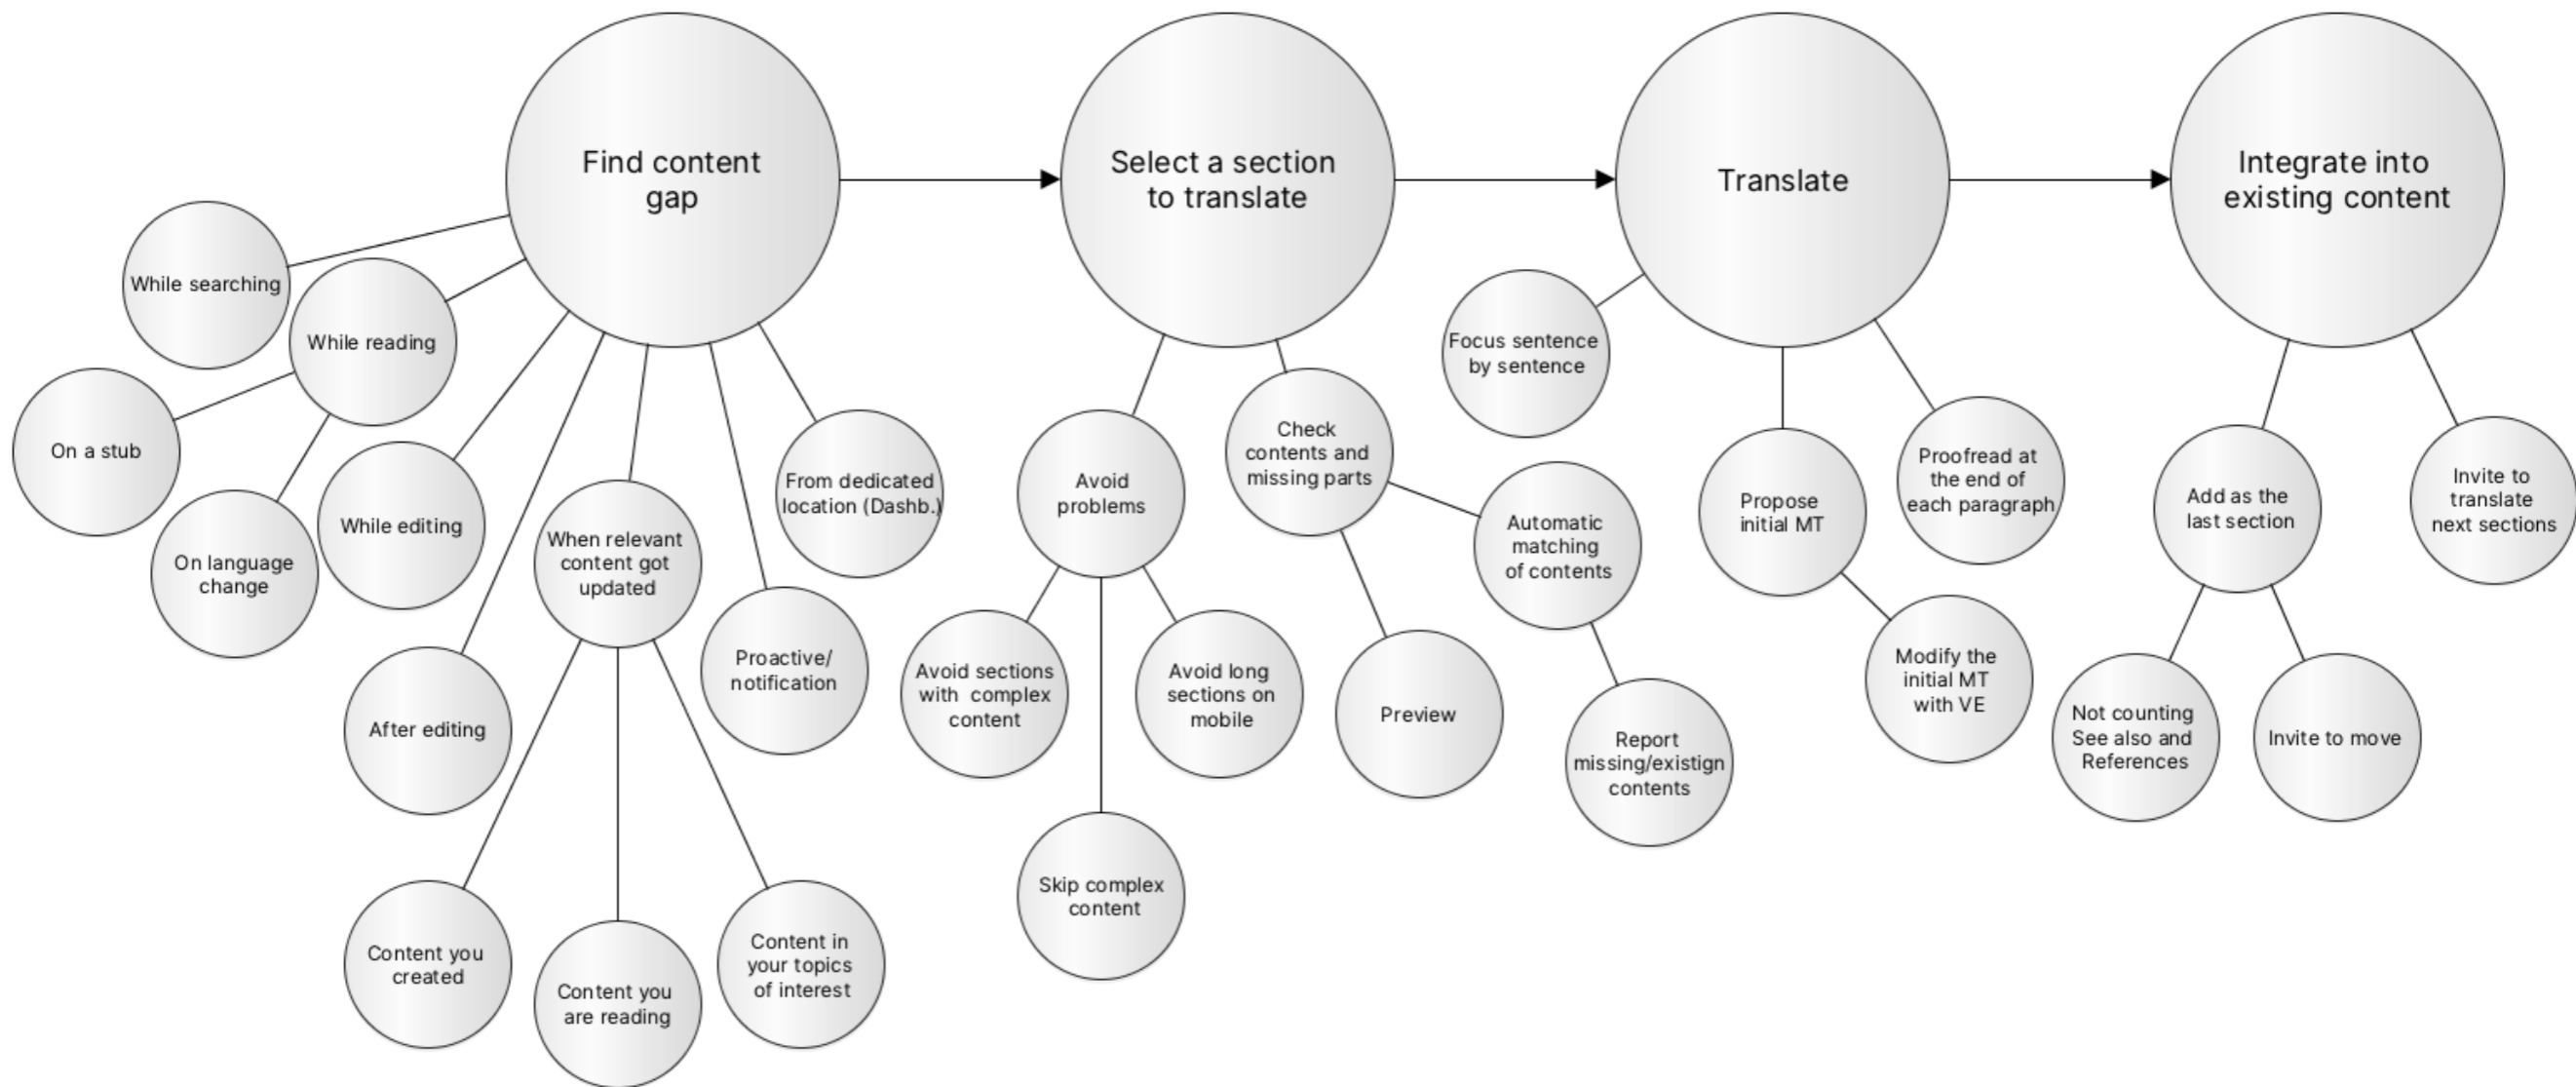

**Pal**

Expert editor

# Start a new article on the go
