Title 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 42—STANDARDS FOR CONDITION OF FOOD CONTAINERS

A notice of proposed rule making covering issuance of United States Standards for Condition of Food Containers was published in the FEDERAL REGISTER of March 2, 1963 (28 F.R. 2034) and afforded interested parties 90 days to submit written data, views, and arguments in connection therewith.

After consideration of all relevant matters and suggestions and based upon currently available technical information, the following tentative United States Standards of Condition for Food Containers are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946, as amended (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.).

Statement of consideration leading to the tentative standard. The condition of containers in which food products are packed greatly affects the marketability and consumer acceptance of the product. There is a need for a uniform yardstick to measure the acceptability of a lot whenever condition of the exterior of filled food containers are requested as a part of a sales transaction.

These tentative standards satisfy this need and provide a convenient reference that may be used voluntarily by government agencies and other applicants for USDA inspection and grading services.

The tentative U.S. Standards provide:

- (1) Uniform acceptance and rejection criteria for containers;
- (2) Known sampling risks to the vendor and buyer;
- (3) Uniform inspection and acceptance procedure within the Agricultural Marketing Service;
- (4) Uniform guidelines to interested parties;
- (5) Various acceptable quality levels that may be adopted by Government procurement agencies and other interested persons.

The tentative standards, as hereinafter set forth, recognize comments, views, and suggestions submitted in response to the March 2 proposal and contain the following significant changes from the notice of proposed rule making:

(1) Inspection would be limited to visual examination of the exterior of filled food containers. Thus, internal defects are not covered by the sampling plans and acceptance criteria. This also precludes its application to determine compliance with definitive test requirements of component parts, such as amount of tin plate, bursting strength of fiber, etc.

(2) Refinements have been made in the definition of terms and words.

(3) Three AQL's (0.065, 0.10, and 10.0) have been added to those contained in the original proposal.

(4) The schedule of defects has been augmented to obtain more comprehensive coverage of the many types of food containers.

(5) Editorial changes have been made to clarify the standards and promote ease of reference.

These standards are issued in tentative form to afford interested parties ample time to utilize and study them and offer their further comments.

The tentative standards are as follows:

AUTHORITY: §§ 42.101 to 42.110 issued under sec. 203, 205, 60 Stat. 1087, as amended, 1090, as amended; 7 U.S.C. 1622, 1624.

Subpart A—Definitions

§ 42.101 Meaning of words.

Words used in this part in the singular form shall be considered to import the plural, or vice versa, as the case may demand.

§ 42.102 Definitions, general.

For the purpose of this part, unless the context otherwise requires, the following terms shall be construed, respectively, to mean:

Acceptable Quality Level (AQL). The AQL is expressed in terms of percent defective or defects per 100 units. Lots having a quality level equal to a specified AQL will be accepted approximately 95 percent of the time when using the sampling plans prescribed for that AQL. (See operating characteristic (OC) curves in Subpart C, § 42.110.)

Acceptance Number (Ac). The number in a sampling plan that indicates the maximum number of defects permitted in a sample in order to consider a lot as meeting a specific requirement.

Administrator. The Administrator of the Agricultural Marketing Service of the Department or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

Condition. The degree of acceptability of the container with respect to freedom from defects which affect the merchantability, including appearance as well as usability of the container for its intended purpose.

Defect classifications. The terms used to denote the severity of a defect. The terms are as follows:

(1) **Critical defect**—A critical defect is a defect that seriously affects, or is likely to seriously affect, the usability of the container for its intended purpose. (For a special provision relating to critical defects see § 42.107(a)(2).)

(2) **Major defect**—A major defect is a defect, other than critical, that materially affects, or is likely to materially affect, the usability of the container for its intended purpose.

(3) **Minor defect**—A minor defect is a defect that materially affects the appearance of the container, but is not likely to affect the usability of the container for its intended purpose.

Department. Means the United States Department of Agriculture.

Double sampling. A sampling inspection scheme which involves use of two independently drawn but related samples, a first sample and a second sample which is added to the first to form a total sample size. A double sampling plan consists of first and total sample sizes with associated acceptance and rejection criteria. The first sample must be inspected first and, if possible, a decision as to acceptance or rejection of the lot made before an additional sample is inspected.

Lot. An identifiable group of containers whose units are of the same size, type and style, containing a product manufactured, under essentially the same conditions.

Operating characteristic curve (OC curve). A curve that gives the probability of acceptance as a function of a specific lot quality level.

Primary container. The immediate component in which the product is packed and which serves to protect, preserve and maintain the quality and market shelf life of the product. It may be metal, glass, fibre, wood, textile, plastic, paper or any other suitable type of material and may be supplemented by liners, overwraps, or other protective materials.

Random sampling. A process of selecting a sample from a lot whereby each unit in the lot has an equal chance of being chosen. Ordinary haphazard or seemingly purposeless choice is generally insufficient to guarantee randomness when carried out by human beings. Devices such as tables of random sampling numbers are used to remove subjective biases inherent in personal choice.

Rejection number (Re). The number in a sampling plan that indicates the minimum number of defective items in a sample that will cause a lot to fail a specific requirement.

Sample. Any number of sample units which are to be used for inspection.

Sample size (n). The number of sample units which are to be included in the sample.

Sample unit. The individual container including any component parts.

Sampling. The act of drawing or selecting containers from a given lot.

Sampling plan. Any plan stating the sample size or sizes, acceptance number or numbers, and rejection number or numbers. The rejection number is not always stated in a sampling plan where it is obvious once the acceptance number is given.

Screening inspection. The complete inspection of a group of containers, and the rejection of all items or portions found defective. It is also known as total inspection or 100 percent inspection.

Shipping case. The container in which the product or primary container is placed to protect, preserve, and maintain the quality of the product in transit or storage.

Single sampling. A sampling inspection scheme where the decision to accept or reject an inspection lot with respect to a specified requirement is made after the inspection of a single sample. A single sampling plan consists of a single sample size with associated acceptance and rejection criteria.

Total defects. The sum of critical, major and minor defects.

Subpart B—Condition Inspection Procedures

§ 42.103 Purpose and scope.

This subpart outlines the procedure to be used to establish the condition of containers in lots of packaged foods. The subpart may be used to determine the acceptability of a lot based on specified acceptance levels included in the plan outlined in § 42.105 or any alternative plan which is approved by the Administrator. The subpart will be applied when a Government agency or private user of the service specifically requests that filled containers or shipping cases be examined for condition.

§ 42.104 Sampling plans and defects.

(a) **Tables I and I-A—Sampling Plans.** Tables I and I-A specify the minimum number of containers to examine for condition in relation to lot size ranges. Any other sampling plan in Tables I or I-A with a larger first sample size than that indicated by the lot size range may be used at the discretion of the inspector or when specified. A combination of single and double sampling plans has been used to minimize the required first sample size for each range of lot sizes. Tables I and I-A also provide acceptance (Ac) and rejection (Re) numbers for lot acceptance (or rejection) based on the number and type of defects present in the sample.

(b) **Table II—Defects.** The table enumerates and classifies defects according to the degree to which the individual defect affects the merchantability, including appearance as well as usability, of the container for its intended purpose.

§ 42.105 Basis for selection of sample.

(a) **Identification of lot:** Selection of proper sample requires sufficient information to identify the lot; such information includes, but is not limited to the following:

- (1) Lot size;
- (2) Type and size of container;
- (3) List of code marks or other identification marks and the number of containers represented by each mark; and
- (4) Original or reoffered lot.

(b) **Acceptable Quality Levels (AQL's):** Unless otherwise specified the AQL's for the respective classes of defects will be as indicated in § 42.107(a) (1).

(c) **Preliminary scanning of lot to determine if any segments or portions are abnormal with respect to wet cases, blown cans, top layer rust, leaking bags, etc.:** If such segments or portions noted are of any consequence, the lot may be rejected for condition of containers without sampling.

(d) **Determination of the number of containers to check for condition:**

(1) Refer to Tables I and I-A (sampling plans) and find where the lot size (number of individual containers) fits into the column headed "Lot Size Ranges".

(2) Select the appropriate sample size for the corresponding lot size range as indicated in the next column headed "Sample Size". These sample sizes are minimum for the corresponding lot size ranges. A larger sample may be used but it must be one of the listed plans in the table. The sample size cannot be an interpolation of one of the plans.

(3) Any lots rejected for unatisfactory condition of container may be subsequently sampled after being reconditioned or reworked. Such lots or resulting portion of a lot may be sampled as a reoffered lot providing the reoffered portion is separately identifiable. When the lot to be inspected is a portion, or the entire amount, of a previously rejected lot, the sampling plan shall be at least two plans higher than the minimum plan indicated for the reoffered lot size. Unless otherwise approved by the Administrator, it is not permissible to reinspect a previously rejected lot until it has been reconditioned or reworked.

(e) Select samples from the lot presented in accordance with either of the following two procedures as may be applicable. A lot offered for inspection will be accepted or rejected in its entirety regardless of the method used to select the sample.

(1) **Proportional random sampling.** When the number of codes or other identifying marks within the lot and the approximate number of cases or containers per code are known, select sample units at random within each mark and in a number proportionate to the number of containers represented by such mark.

(2) **Simple random sampling.** When there are no code or other identifying marks, or when the number of codes or identifying marks within the lot and/or approximate number of cases or containers per mark are not known, select sample units at random from the entire lot.

(f) If the lot is cased, predetermine the number of containers to draw from each case as well as the position within each case. Do not restrict the sampling to the top or bottom layers or to the corners. The best sample is one selected from all the various positions in the shipping case. It is desirable but not mandatory to limit the number of sample units to a single container from any one case. Multiple sample units may be taken from a single case but not in excess of the following plan:

(1) When containers are packed twelve or less to a case, draw a maximum of six sample units from any one case; and

(2) When containers are packed more than twelve to a case, draw a maximum of twelve sample units from any one case.

§ 42.106 Classifying and recording defects.

(a) Examine each sample unit for the applicable type of defects listed in Table II, scoring each unrelated defect separately and each related defect according to whichever type is the most serious.

(1) The lot acceptance portion of this procedure is based on "the number of defects per 100 containers", rather than "percent defective containers". It is necessary to determine if the defects on any one container are "related" defects or "unrelated" defects. A container having more than one class of unrelated defects is scored for each such type of defect. A container with related defects is scored once for the most serious of the related defects, and is also scored for each unrelated defect.

(2) Related defects are defects on a single container that are related to a single cause. If the initial incident causing one of the defects had not occurred, none of the other related defects on the container would be present. As an example of related defects, a can may be a leaker and also seriously rusted because of the packing medium rusting the tin plate. In this case, the container is scored only once for these two defects since the rust condition can be attributed to the leak. Score the container according to whichever condition is the most serious. In this example, score as a "leaker" and not as "seriously rusted".

(3) Unrelated defects are defects on a single container that result from separate causes. If the incident that caused one of the defects had not occurred, the other unrelated defects on the container would still be present. As an example of unrelated defects, a can may be seriously rusted, may have a bad dent along the seam, and the label may also be detached from the can because of improper gluing. In this case it is unlikely that any of the three defects exist because of a common cause. Therefore, they are considered unrelated defects and should be scored as three defects.

(b) Record on a worksheet the number, type, and class (minor, major, or critical) of defects on each sample unit.

(c) Add the number of defects in each class. Then add the number of minor, major, and critical defects to obtain the total defects.

§ 42.107 Lot acceptance criteria.

(a) The acceptability of the lot is determined by relating the number and class of defects enumerated on the worksheet to the acceptance and rejection numbers shown in Tables I or I-A for the respective sample size and Acceptable Quality Level (AQL).

(1) Unless otherwise specified, use the following AQL's for the respective class of defects:

Defect class:	AQL
Critical	0.15
Major	1.0
Total	6.5

(2) Every container in a lot may be inspected when there is evidence that defective containers are so prevalent or serious as to present a hazard by their use. Any lot may be rejected if a sample

drawn therefrom contains critical defects of such nature that they indicate that the product would or could be unsafe for use.

(b) Refer to the appropriate sample size and AQL and compare the number of defects found in the sample with the acceptance (Ac) and rejection (Re) numbers in the sampling plan.

(1) Accept the lot after examining the first sample when all of the following conditions are met:

(i) The number of critical defects does not exceed the applicable acceptance number (Ac) for critical defects, and

(ii) The number of major defects does not exceed the applicable acceptance number (Ac) for major defects, and

(iii) The total number of critical, major and minor defects does not exceed the applicable acceptance number (Ac) for total defects.

(2) Reject the lot after examining the first sample when any one or more of the following conditions occur:

(i) The number of critical defects equals or exceeds the applicable rejection number (Re) for critical defects, or

(ii) The number of major defects equals or exceeds the applicable rejection number (Re) for major defects, or

(iii) The total number of critical, major and minor defects equals or exceeds the applicable rejection number (Re) for total defects.

(3) If a double sampling plan is being used, select and examine the prescribed second sample when the lot can neither be accepted nor rejected on the first sample. Accept the lot if the accumulated defects of the first and second samples meet conditions of subparagraph (1) of this paragraph, otherwise reject the lot.

Subpart C—Miscellaneous

§ 42.110 Operating Characteristic (OC) curves.

(a) Table III in this section contains the Operating Characteristic (OC) curve for each of the sampling plans given in Table I. The OC curves and the corresponding sampling plans are listed by AQL.

(b) The curves show the ability of the various sampling plans to distinguish between good and bad lots. This can be illustrated by examining OC curve 4 for an AQL of 0.15 defects per hundred units. If the quality of the lots submitted for inspection is considerably worse than the AQL of 0.15 defects per hundred units, a small percentage of the lots will be accepted. For example, OC curve 4 shows that when the quality of lots submitted for inspection is 0.6 defects per hundred units, only 30 percent of the lots are expected to be accepted. Conversely, when the quality of the lots submitted for inspection are better than the AQL of 0.15 defects per hundred units, a large percentage of the lots are expected to be accepted. For example, OC curve 4 shows that when the quality of lots submitted for inspection is 0.10 defects per hundred units, about 99 percent of the lots are expected to be accepted.

(c) The sampling plans that correspond to OC curve 4 can be found in Table III for an AQL of 0.15 defects per hundred units. An examination of this table reveals that there are one single and two double sampling plans that have OC curves comparable to OC curve 4. The first plan listed is a single plan requiring the inspection of 800 individual containers. Under this plan, the lot is accepted as meeting the requirements for an AQL of 0.15 if there are 3 or less defects in the sample or rejected if there are 4 or more defects in the sample.

(d) If more than one AQL has been specified, different acceptance and rejection criteria are to be used for each AQL. The criteria for each AQL must be obtained from Table I for the given lot size.

(e) The next plan that is listed in Table III in the column headed 4 for an AQL of 0.15 is a double sampling plan that requires the initial inspection of 456 individual containers. The lot will be accepted as meeting the requirements of an AQL of 0.15 if there are no defects in the sample, and rejected if there are 4 or more defects in the sample. In the event that the number of defects is between the acceptance (0) and rejection (4) numbers, additional containers must be inspected. In this case, the table indicates that a total of 864 containers must be inspected before a decision can be made to either accept or reject the lot. This will require the inspection of 408 more containers (864-456=408).

If there are 3 or less defects in the total sample, the lot will be accepted. If there are 4 or more defects in the total sample, the lot will be rejected. The other double sampling plans operate in a similar manner with the only differences being the sample sizes and acceptance and rejection numbers.

The foregoing tentative standards differ, as indicated above, from the proposal set forth in the notice of rule-making. The differences are due to changes made pursuant to comments received concerning the notice and it appears that further notice and other rule-making procedure on the standards would not make additional information available to the Department. Therefore under section 4 of the Administrative Procedure Act (5 U.S.C. 1003) it is found

upon good cause that such further procedure is unnecessary.

The tentative standards shall become effective 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C. this 3d day of July 1963.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

[Lemon Reg. 69, Amdt. 1]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act by tending to establish and maintain such orderly marketing conditions for such lemons as will provide, in the interest of producers and consumers, an orderly flow of the supply thereof to market throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish under the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the *FEDERAL REGISTER* (5 U.S.C. 1001-1011) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of lemons grown in California and Arizona.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 910.369 (Lemon Regulation 69, 28 F.R. 6728) are hereby amended to read as follows:

(ii) District 2: 511,500 cartons.

[Bartlett Pear Reg. 1]

PART 917—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

Regulation by Grades and Sizes

§ 917.332 Bartlett Pear Regulation 1.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the Bartlett Pear Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of Bartlett pears, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the *FEDERAL REGISTER* (5 U.S.C. 1001-1011) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than July 10, 1963. A reasonable determination as to the supply of, and the demand for, Bartlett pears must await the development of the crop and adequate information thereon was not available to the Bartlett Pear Commodity Committee until June 27, 1963; recommendation as to the need for, and the extent of, regulation of shipments of such pears was made at the meeting of said committee on June 27, 1963, after consideration of all available information relative to the supply and demand conditions for such pears, at which time the recommendation and supporting information were submitted to the Department; shipments of the current crop of such pears are expected to begin on or about July 10, 1963; and this section should be applicable to all shipments of such pears in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a.m., P.s.t., July 10, 1963, and ending at 12:01 a.m., P.s.t., January 1, 1964, no shipper shall ship any Bartlett pears unless:

(i) Such pears grade not less than U.S. Combination with at least 75 percent of such pears grading at least U.S. No. 1, except that (a) the percentage of such pears grading at least U.S. No. 1 may be reduced not more than 10 percentage points below 75 percent for pears which are damaged but not seriously damaged by hail, and (b) such pears may fail to be fairly well formed only because of short shape, but shall not be seriously misshapen; and,

(ii) Such pears are of a size not smaller than the size known commercially as size 180..

(2) Section 917.143 of the rules and regulations, as amended (7 CFR 917.100 et seq.), sets forth the requirements with respect to the inspection and certification of shipments of Bartlett pears. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(c) *Definition.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order.

(2) "Size known commercially as size 180" means a size Bartlett pear that will pack a standard pear box, packed in accordance with the specifications of a standard pack, with five tiers, each tier having six rows with six pears in each row, and with the twenty-one smallest pears weighing not less than five pounds.

(3) "Standard pear box" means the container so designated in section 828.3 of the Agricultural Code of California.

(4) "U.S. No. 1," "U.S. Combination," "fairly well formed," "seriously misshapen," and "standard pack" shall have the same meaning as when used in the United States Standards for Pears (Summer and Fall), §§ 51.1260-51.1280 of this title.

§ 1421.2101 Purpose.

This supplement contains additional program provisions which, together with the applicable provisions of the General Regulations Governing Price Support for the 1963 and Subsequent Crops and any amendments thereto, apply to loans and purchase agreements for 1963-crop wheat.

§ 1421.2102 Availability of price support.

Price support loans and purchase agreements will be available from harvest through January 31, 1964.

§ 1421.2103 Compliance requirements—cooperators.

(a) *General.* A producer shall not be eligible for price support on wheat produced in 1963 if the 1963 wheat acreage on the farm on which such wheat is produced is in excess of the wheat acreage allotment: *Provided,* That if the producer has an interest in the 1963 wheat crop produced on any other farm in the same county, he must be entitled to receive a marketing certificate for each such farm in order to be eligible for price support. If the producer is engaged in the production of wheat in more than one county (in the same State or in two or more States) and the State or county committee has determined to apply the requirements of § 728.1157 of this title (26 F.R. 4716) and any amendments thereto to such multiple farm producers, he must be entitled to receive a marketing certificate for each such farm,

wherever situated, in order to be eligible for price support on his 1963-crop of wheat.

(b) *Effect of unknowingly exceeding the acreage allotment.* The acreage of wheat on a farm shall not be deemed to be in excess of the acreage allotment unless the operator knowingly exceeded such allotment. If the acreage allotment is in fact exceeded, such allotment shall be considered as having been knowingly exceeded unless the operator of the farm establishes to the satisfaction of the county committee in accordance with subparagraph (1), (2), or (3) of this paragraph that the farm allotment has not knowingly been exceeded and the determination of the county committee is approved by the State Executive Director.

(1) *Erroneous notice of acreage allotment.* An otherwise eligible producer shall not be ineligible for price support if the farm is not considered overplanted under the provisions of § 728.1184 of this title (26 F.R. 4733) and any amendments thereto, because of reliance on an erroneous notice of allotment.

(2) *Erroneous notice of measured acreage.* An otherwise eligible producer shall not be ineligible for price support if the farm is not considered overplanted under the provisions of § 718.10 of this title (24 F.R. 4228, and any amendments thereto) because of reliance on an erroneous notice of measured acreage.

(3) *Failure to timely measure acreage or notify operator.* The acreage allotment for the farm will not be considered to be knowingly exceeded if (i) through no fault of the farm operator or any producer on the farm the acreage was not measured or the farm operator was not notified of the measured acreage in time to dispose of the excess acreage prior to the final date for the disposition of the excess acreage, (ii) the excess acreage was relatively small, and (iii) the farm operator establishes that because of the relative smallness of the excess and the unavailability to him of any recent measurements of the field acreages on the farm, he had no reason to believe the acreage was in excess of the farm acreage allotment. Nothing in this paragraph shall affect any producer's liability for penalties on excess wheat determined under the wheat marketing quota regulations for 1961 and subsequent crop years (§§ 728.1140 to 728.1186 of this title; 26 F.R. 4716), and any amendments thereto.

(c) *Application for review and request for reconsideration.* Any producer who is dissatisfied with any determination with respect to compliance with his acreage allotment may appeal under the provisions of Part 711 of this title (26 F.R. 10204) and any amendments thereto.

§ 1421.2104 Compliance requirements—participating producers.

A producer on a farm on which the operator has elected to participate in the 1963 Wheat Stabilization Program shall not be eligible for a loan or purchase agreement with respect to wheat produced on such farm unless he is eligible under the 1963 Wheat Stabilization Program Regulations (27 F.R. 12430 and

amendments thereto) to receive a price support payment on wheat produced on such farm.

§ 1421.2105 Eligible wheat.

The wheat must meet the requirements of this section in addition to other eligibility requirements of the program in order to be eligible for a loan or purchase agreement.

(a) *Production.* The wheat must have been produced in the commercial wheat-producing areas designated in § 278.1204, of this title, 26 F.R. 4141, May 13, 1961, in the United States in 1963 by an eligible producer, except that wheat produced on any farm which receives an increased allotment under the provisions of 7 U.S.C. 1334(i) applicable in Modoc and Siskiyou Counties in California, shall not be eligible for price support.

(b) *Grade requirements.* Wheat when placed under loan, and wheat under purchase agreement which is in approved warehouse-storage prior to notification by the producer of his intention to sell to CCC, must meet the requirements set forth below.

(1) The wheat must be (i) wheat of any class grading No. 3 or better; (ii) wheat of any class grading No. 4 or 5 on the factor of "test weight" and/or because of containing "Durum" and/or "Red Durum" but otherwise grading No. 3 or better; or (iii) wheat of the class Mixed wheat, consisting of mixtures of grades of eligible wheat as specified in subdivision (i) or (ii) of this subparagraph provided such mixtures are the natural products of the field. In addition, wheat may have the special grade designations "Garlicky" and/or "Smutty".

(2) Wheat must not grade Tough, Weevily, Ergoty, or Treated except (i) wheat represented by a warehouse receipt which shows the wheat grades "Tough" or "Weevily" will be eligible if the warehouse receipt is accompanied by a supplemental certificate which indicates the warehouseman will deliver wheat of an eligible grade and quality which does not contain such designation(s). The grade, grading factors, quality factors, and the quantity shown on such supplemental certificate must be as specified in § 1421.2109.

(c) *Moisture requirement.* In addition to the grade requirements prescribed above, the ASC State committee may establish a lower moisture requirement as a condition of eligibility for a farm-storage loan where it determines this is necessary for the safe storage of the wheat.

(d) *Poisonous substances.* The wheat must not contain mercurial compounds or other substances poisonous to man or animals.

(e) *Sanitation requirements.* The wheat must not contain one or more rodent pellets, or comparable amounts of other filth, per pint of wheat (liquid measure), or 1 percent or more by weight of kernels visibly damaged by weevils or other insects.

(f) *Purchase agreements—predelivery inspection.* Except as otherwise provided in § 1421.23(b)(3), wheat under purchase agreement stored in other than approved warehouse storage must meet

the grade and quality requirements of paragraphs (b) (1) and (2), (c), (d), and (e) of this section on the basis of predelivery inspection.

§ 1421.2106 Determination of quality.

(a) *Regular grading factors.* The class, subclass, grade, grading factors and all other quality factors shall be based on Official Grain Standards of the United States for Wheat, whether or not such determinations are made on the basis of an official inspection. See § 1421.2107 for sedimentation and protein determinations.

(b) *Sanitation.* Determinations with respect to sanitation requirements specified in § 1421.2105(e) shall be made in accordance with instructions issued by CCC.

(c) *Smut.* In the States of California, Idaho, New Mexico, Nevada, Oregon, Utah, Washington, and the counties in Montana where it is a normal practice to determine smut on a percentage basis, the quantity of smut shall be stated in terms of half percent when smut dockage is present in a quantity equal to less than one percent, and in terms of whole percent when present in a quantity equal to one percent or more. A fraction of a half percent shall be disregarded when smut dockage is present in a quantity equal to less than one percent, and a fraction of a percent shall be disregarded when smut dockage is present in a quantity equal to one percent or more. Elsewhere the smut conditions of the wheat shall be determined on a degree basis. Where applicable the words, "Light Smutty" or "Smutty" shall be added to, and made a part of the grade determination.

(d) *Garlicky.* The garlicky condition of the wheat shall be made a part of the grade designation by addition of the words "Light Garlicky" or the word "Garlicky".

§ 1421.2107 Sedimentation and protein determinations.

Sedimentation and protein tests are required on hard wheat placed under loans and acquired under purchase agreements and shall be made as provided in this section. Both tests shall be made on the same representative sample.

(a) *Farm storage loans and deliveries of purchase agreement wheat to other than approved warehouses.* ASCS State offices will provide sedimentation and protein tests on wheat to be placed under farm storage loans and on purchase agreement wheat delivered to other than approved warehouses.

(b) *Warehouse-storage loans and purchase agreement wheat delivered to or stored in approved warehouses.* Sedimentation and protein tests on wheat to be placed under warehouse storage loans and on wheat delivered to or stored in approved warehouses under purchase agreements shall be made as follows: (1) In the case of sedimentation tests, the sedimentation value shall be determined on the basis of certificates issued by an inspector licensed or authorized by the United States Department of Agriculture under the Agricultural Marketing Act of 1946, as amended, and the regulations thereunder (Part 68 of this

title), and (2) in the case of protein, the tests shall be made by a protein laboratory approved by CCC. The certificates issued under (1) and (2) are referred to herein as official sedimentation and protein certificates, respectively, and the producer will be credited with \$2.50 for obtaining the certificates for each loan or purchase agreement.

§ 1421.2108 Determination of quantity.

(a) *In warehouse.* The quantity of wheat in an approved warehouse on which a warehouse-storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse under a farm-storage loan or purchase agreement shall be the net weight specified on the warehouse receipt, or on the supplemental certificate if applicable.

(b) *On farm.* The quantity of wheat placed under farm storage loan may be determined either by weight or by measurement. The quantity acquired under a farm storage loan or a purchase agreement shall be determined by weight. When the quantity is determined by weight, a bushel shall be 60 pounds of wheat free of dockage. In determining the quantity of sacked wheat by weight, a deduction of $\frac{3}{4}$ of a pound for each sack shall be made.

(c) *Adjustment for test weight.* When the quantity is determined by measurement, a bushel shall be 1.25 cubic feet of wheat testing 60 pounds per bushel. The quantity determined for wheat of a different test weight shall be adjusted by the applicable percentage in the following table:

Test weight (pounds per bushel) :	Percent
65 or over.....	108
64.0 to 64.9.....	107
63.0 to 63.9.....	105
62.0 to 62.9.....	103
61.0 to 61.9.....	102
60.0 to 60.9.....	100
59.0 to 59.9.....	98
58.0 to 58.9.....	97
57.0 to 57.9.....	95
56.0 to 56.9.....	93
55.0 to 55.9.....	92
54.0 to 54.9.....	90
53.0 to 53.9.....	88
52.0 to 52.9.....	87
51.0 to 51.9.....	85
50.0 to 50.9.....	83

(d) *Safety margin.* A safety factor as established by the State committee shall be deducted from the net quantity as determined by measurement when wheat is offered for a farm-storage loan.

(e) *Dockage.* The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the wheat in determining the net quantity available for loan or purchase.

(f) *Smut.* In the States of California, Idaho, New Mexico, Nevada, Oregon, Utah, Washington, and the counties in Montana where it is a normal practice to determine smut on a percentage basis, the quantity of smut determined in pounds by applying the percentage factor to the total quantity shall be deducted from the weight of the wheat after deduction of dockage.

§ 1421.2109 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase

agreement must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and quality of wheat.

(b) *Entries (all wheat).* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Gross weight and net bushels, (2) class and subclass, (3) grade (including special grades), (4) test weight, (5) dockage, (6) any other grading factor(s) when such factor(s) and not test weight determine the grade and (7) whether the wheat arrived by rail, truck or barge. If the warehouse receipt indicates the wheat is ineligible because of grading "Tough" or "Weevily" the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.2105(b) (2) in order for the wheat to be eligible for price support. The grade, grading factors and the quantity to be delivered must be shown on the supplemental certificate as follows: (i) When the warehouse receipt indicates "Weevily" and the wheat has been conditioned to remove the "Weevily" designation, the supplemental certificate must show grade and grading factors as good as or better than those on the warehouse receipt and the same quantity as on the warehouse receipt. (ii) When the warehouse receipt indicates "Tough" and the wheat has been dried or processed, the supplemental certificate must show the grade, grading factors and quantity after drying or processing. (iii) Such supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. (iv) In the case of conditions (i) and (ii) above, the grade and grading factors and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipts.

(c) *Sedimentation and protein entries and certificates for hard wheat.* In the case of hard wheat, entries for sedimentation value and protein content must be shown on the warehouse receipt or the supplemental certificate or both. Warehouse receipts must be accompanied by both official sedimentation certificates and official protein certificates or copies thereof.

(d) *Liens.* The warehouse receipts may be subject to liens for warehouse charges only to the extent indicated in § 1421.2110(a). Warehouse receipts shall not be subject to liens for charges in connection with the making of sedimentation or protein tests.

(e) *Freight bill requirements.* Warehouse receipts representing wheat which has been shipped by rail or water from a country shipping point to a designated terminal point, or shipped by rail or water from a country shipping point to a storage point and stored in-transit to a designated terminal point, must be accompanied by registered freight bills or by a certificate containing similar information. These registered freight bills or certificates must be representative as to origin and date of movement of the wheat and must reflect the total freight

rate from origin to designated terminal point including penalty for out-of-line haul, if any. The form of the certificates will be prescribed by the ASCS commodity office and shall be signed by the warehouseman and may be made a part of the supplemental certificate.

§ 1421.2110 Warehouse charges.

(a) *Handling and storage liens.* Warehouse receipts and the wheat represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the wheat is deposited in the warehouse for storage. Warehouse receipts and the wheat represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. In no event shall a warehouseman be entitled to satisfy the lien by sale of the wheat when CCC is holder of the warehouse receipt.

(b) *Deduction of storage charges—UGSA warehouses.* The table shown below provides the deduction for storage charges to be made from the amount of the loan or purchase price in the case of wheat stored in an approved warehouse operated under the Uniform Grain Storage Agreement. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipt that all warehouse charges except receiving and loading out charges have been prepaid through the applicable loan maturity date, no storage deductions shall be made. If such written evidence is not submitted, the date to be used for computing the storage deduction on wheat stored in warehouses operating under the Uniform Grain Storage Agreement shall be the latest of the following: (1) The date of deposit, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid. If the foregoing dates are not shown, the date of the warehouse receipt shall be used.

¹ Dates storage charges start, all dates inclusive.

(c) *Deduction of storage charges—Eastern common carriers.* In the case of wheat stored in an approved warehouse operated by an Eastern common carrier, there shall be deducted in computing the loan or purchase price the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through the applicable maturity date unless written evidence is submitted with the warehouse receipt that such charges have been prepaid. The county office shall request the ASCS commodity office to determine the amount of such charges. Where the producer presents evidence showing the elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 1421.2111 Maturity of loans.

Loans mature on demand but not later than February 29, 1964, on wheat stored in the States of Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, and West Virginia, and mature not later than March 31, 1964, on wheat stored in all other States.

§ 1421.2112 Settlement.

Notwithstanding the provisions of § 1421.25, the following shall apply:

(a) *Deliveries of farm-storage loan hard wheat.* In the case of hard wheat under farm-storage loan delivered to CCC, the same sedimentation value and protein content used in making the loan shall be used in settlement.

(b) *Sanitation requirements—all wheat.* If the wheat delivered is of a quality which does not meet the sanitation requirements of section 1421.2105, the wheat shall be sold for uses other than for human consumption. The settlement value shall be the same as the sales price, except that if CCC is unable to sell the wheat for the use specified above, the settlement value shall be the market value determined by CCC, as of the date of delivery.

§ 1421.2113 Support rates.

The support rate for the quality of wheat placed under a loan or acquired under a loan or a purchase agreement shall be the applicable basic support rate adjusted in accordance with the provisions of this section, and in the case of settlement of loans and purchase agreements as further provided in §§ 1421.25 and 1421.2112.

(a) *Support rates at designated terminal markets.* (1) The support rates established for designated terminal markets apply to wheat shipped on a domestic interstate freight rate basis. The support rate at the designated terminal market for any wheat shipped at other than the domestic interstate freight rate shall be reduced by the difference between the rate of freight paid and the domestic interstate freight rate.

(2) The support rates established for designated terminal markets also apply

to wheat which has been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges. In the event the amount of paid-in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate, if any, from the terminal market to a recognized market determined by the appropriate ASCS commodity office, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate. If the wheat is stored at any designated terminal market and neither registered freight bills nor registered freight certificates are presented, the support rate shall be equal to the terminal rate minus the actual amount of paid-in freight required to guarantee the proportional outbound rate from the terminal market to a recognized market determined by the appropriate ASCS commodity office.

(3) The support rate for wheat received by truck and stored at any designated terminal market shall be determined by deducting from the terminal rate 3.25 cents per bushel plus the actual amount of paid-in freight required to guarantee the proportional outbound rate from the terminal market to a recognized market determined by the appropriate ASCS commodity office.

(4) Notwithstanding the foregoing provisions, the support rate for wheat shipped by rail or water and stored at any of the following terminal markets shall be equal to the applicable terminal rate, less the transportation cost, if any, as determined by the appropriate ASCS commodity office, for moving the wheat to a tidewater facility located within the same switching limits:

- Long Beach, Los Angeles, Oakland, San Francisco, Stockton, and Wilmington, California.
- Baton Rouge and New Orleans, Louisiana¹
- Baltimore, Maryland
- Duluth, Minnesota
- Astoria and Portland, Oregon
- Albany and New York, New York
- Philadelphia, Pennsylvania
- Beaumont, Galveston, Houston, Corpus Christi and Port Arthur, Texas
- Norfolk, Virginia
- Kalama, Longview, Seattle, Tacoma and Vancouver, Washington
- Superior, Wisconsin

(5) Notwithstanding the foregoing provisions of this paragraph, the support rate for wheat received by truck and stored at any of the terminal markets listed in subparagraph (4) of this paragraph shall be determined by making a deduction of 3.25 cents per bushel from the terminal rate, plus the transportation cost, if any, as determined by the appropriate ASCS commodity office, for moving the wheat to a tidewater loading facility located within the same switching limits.

¹ For use in determining the support rate for wheat grown only in the commercial wheat-producing area.

(b) Support rates for wheat in approved warehouse storage at other than designated terminal markets. Except for the States designated in paragraph (e) of this section, the support rate for wheat which is shipped by rail or water and which is stored in approved warehouses (other than those situated in the designated terminal markets) shall be determined by deducting from the rate for the appropriate designated terminal market, as determined by CCC, an amount equal to the transit balance, if any, of the through-freight rate from the point of origin for such wheat to such terminal market: *Provided*, That on any wheat shipped at other than the domestic interstate freight rate, the support rate shall be further reduced by the difference between the freight rate paid and the domestic interstate freight rate from the point of origin of such wheat to the point of destination or appropriate terminal market: *And provided further*, That in the case of wheat stored at any railroad transit point, taking a penalty by reason of out-of-line movement to the appropriate designated market, or for any other reason, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing wheat in such position.

(c) Support rates in approved warehouse storage determined by the ASCS commodity office. In the States of Delaware, Kentucky, Maryland, New Jersey, North Carolina, Tennessee, Virginia, and West Virginia, the ASCS commodity office shall, upon request of the county committee, determine the support rate for wheat stored in approved warehouses (except those situated at designated terminal markets) which was shipped by rail in the movement of natural market direction as approved by CCC, by adding to the county rate for the county from which the wheat was shipped an amount per bushel equal to the receiving and loading-out charges computed in accordance with the applicable rates of the Uniform Grain Storage Agreement in effect at the time the loan is made and an amount equal to the transit value of the freight paid from the points of origin to markets designated by CCC. The warehouse receipts must be accompanied by the original paid freight bills or a certificate signed by the warehouseman as set forth in § 1421.-2109(e). If the wheat is stored in approved warehouses located at transit points, taking a penalty by reason of backhaul, or out-of-line of normal market movements, such penalty or other costs by reason of such movement, as determined by CCC shall be deducted from the support rates as determined in this paragraph.

(d) Basic support rates (Terminals). Basic support rates for loan and settlement purposes for grade No. 1 wheat stored in approved warehouses at the terminal markets listed below are as follows:

Terminal market	Rate per bushel
Astoria, Oregon	\$2.00
Portland, Oregon	2.00

(1) Basic county support rates per bushel for loan and settlement purposes for farm-stored and country warehouse-stored wheat are established for wheat grading No. 1 and are as specified below in this paragraph. Farm-storage loans and country warehouse storage loans, except as otherwise provided in paragraphs (b) and (c) of this section will be based on the support rate established for the county in which the wheat is stored.

(2) If two or more approved warehouses are located in the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

On March 21, 1963, a notice was published in the FEDERAL REGISTER (28 F.R.

2824) stating that the Federal Aviation Agency was considering an alteration to the Hunter-Liggett, Calif., Restricted Area R-2513 which would reduce the overall size approximately 50 square miles and lower the designated altitudes from "Surface to 40,000 feet MSL" to "Surface to 24,000 feet MSL". Further, it was proposed to delete the reference to R-2513 contained in the description of VOR Federal Airway No. 27 since the proposed reduction to R-2513 would eliminate the encroachment of the restricted area upon the airway. In addition, it was also proposed to designate R-2513 as a joint use area with the Oakland ARTC Center the controlling agency. Such actions are taken herein.

No adverse comments were received regarding the proposed amendments.

Although not stated in the notice, action is being taken herein to include R-2513 in the continental control area.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendment having been published and for the reasons stated in the notice, the following actions are taken:

1. In § 73.25 California (28 F.R. January 26, 1963), R-2513 Hunter-Liggett, Calif., is amended to read:

R-2513 Hunter-Liggett, Calif.

2. Section 71.123 (27 F.R. 220-6, November 10, 1962, 27 F.R. 12438, 28 F.R. 721) is amended as follows: In V-27 "the airspace within R-2513, R-2516, R-2520 and W-289," is deleted and "the airspace within R-2516, R-2520, and W-289," is substituted therefor.

3. Section 71.151 (27 F.R. 220-54) is amended to include R-2513 Hunter-Liggett, Calif.

PART 200—ORGANIZATION; CONDUCT AND ETHICS, AND INFORMATION AND REQUESTS

Subpart G—Plan of Organization and Operation Effective During Emergency Conditions

The Securities and Exchange Commission has adopted a plan to provide basic organization and methods of operation which may be needed by the Commission to perform its essential functions in the event of (i) a national emergency such as an armed attack upon the United States, (ii) official notification of the likelihood of imminence of such attack, or (iii) other authorization by the President, whichever may first occur.

The provisions of this plan are designed to assure continuity of essential governmental functions to be performed by the Commission under the specified conditions. It is published to inform all interested persons of the circumstances and ways in which the Commission will organize and proceed in such an emergency.

When operative, the plan's provisions supersede all inconsistent organizational, administrative, or procedural requirements theretofore observed by the Commission in discharging its functions.

The text of the Commission action follows:

Pursuant to the Securities Exchange Act of 1934, particularly sections 4 and 23 thereof, and to Public Law 87-592 approved August 20, 1962 (76 Stat. 394), the Commission hereby adopts a new Subpart G to Part 200 of Title 17, as follows:

Sec.	
200.200	Purpose.
200.201	Emergency conditions, effective date, and duration.
200.202	Offices, and information and submittals.
200.203	Organization, and delegations of authority.
200.204	Personnel, fiscal, and service functions.
200.205	Effect upon existing Commission organization, delegations, and rules.

AUTHORITY: §§ 200.200 to 200.205 issued under secs. 4 and 23, 48 Stat. 885, as amended, and 901, 15 U.S.C. 78d and 78w; Act of August 20, 1962, 76 Stat. 394, 15 U.S.C. 78d-1; Reorganization Plan No. 10 of 1950, 64 Stat. 1265.

§ 200.200 Purpose.

This subpart describes the plan of organization and operation which will be observed by the Securities and Exchange Commission in discharging its duties and responsibilities in the event of a national emergency as defined in the following section.

§ 200.201 Emergency conditions, effective date, and duration.

For the purposes of this subpart, emergency conditions shall be deemed to commence at the time of an armed attack upon the United States, its territories and possessions, at the time of official

notification of the likelihood or imminence of such attack, or at a time specified by the authority of the President, whichever may first occur, and shall continue until official notification of cessation of such conditions. The provisions of this subpart shall become operative as at the commencement of emergency conditions and continue until cessation of those conditions, or until the Commission shall by notice or order resume its normal organization and operations.

§ 200.202 Offices, and information and submittals.

(a) During emergency conditions, the location or headquarters of the Commission shall be as designated by the Chairman or his successor. The location of each Regional and Branch Office of the Commission, if different from the normal location, shall be as designated by the Chairman of the Commission or his successor, or in the absence of communications with him, by the Regional Administrator for the area or his acting successor.

(b) During emergency conditions, all formal or informal requests, filings, reports or other submittals shall be delivered to the Commission at designated offices or addressed to the Securities and Exchange Commission, Official Mail and Messenger Service, United States Post Office Department, Washington 25, D.C.

§ 200.203 Organization, and delegations of authority.

(a) During emergency conditions, the respective functions and responsibilities of the Commissioners, the Chairman of the Commission, and the staff members shall be, to the extent possible, as set forth in Subpart A of this part (§ 200.1 et seq.).

(b) Action for and in the name of the Commission taken pursuant to this subpart by one or more Commissioners or by a successor as designated in this section shall mean and include the delegated authority to act for the unavailable or incapacitated Commissioners.

(c) Pursuant to the statutes governing the Commission, to Reorganization Plan No. 10 of 1950, and to Public Law 87-592 approved August 20, 1962, the following automatic delegation of authority is made to provide continuity in the event of an emergency:

(1) In the absence or incapacity of the Chairman of the Commission during an emergency of the nature contemplated by this subpart, the authority of the Chairman to govern the affairs of the Commission and to act for the Commission, as provided for by laws and by delegations from the Commission, will pass to the surviving successor highest on the following list until such time as a duly appointed Chairman of the Commission is available:

- (i) The senior Commissioner.
- (ii) The Director of the Division of Trading and Exchanges.
- (iii) The Director of the Division of Corporate Regulation.

- (iv) The Director of the Division of Corporation Finance.
- (v) The General Counsel.
- (vi) The Chief Accountant.
- (vii) The Director of the Office of Opinion Writing.
- (viii) The Secretary.
- (ix) The Regional Administrator highest on the following list:

Denver.	Seattle.
Fort Worth.	San Francisco.
Chicago.	New York.
Atlanta.	Boston.

(2) If and when a commissioner previously incapacitated or otherwise unavailable, again becomes available, he shall thereupon have all the powers and functions he would have had if he had not been incapacitated or otherwise unavailable.

(d) Actions taken for and in the name of the Commission as described above shall be effective immediately or as specified by the successor acting, but shall be subject to reconsideration by the Commissioners when the Commission has been reconstituted and is functioning.

(e) Except as may be determined otherwise by the Chairman or his successor, the duties of each head of a division or office of the Commission shall be discharged, in the absence or incapacity of such person during the emergency conditions, by the available staff member next in line of succession. The head of each division or office shall designate the line of succession within his division or office. If no such designation has been made or the designee is unavailable, such duties shall be assumed by the available subordinate officer or employee in the particular division or office who is highest in grade and in the event that there is more than one such person, in length of service with the Commission.

§ 200.204 Personnel, fiscal, and service functions.

In the absence or unavailability of the appropriate staff officer or his successor, authority to effect temporary appointments of such additional officers and employees, to classify and allocate positions to their proper grades, to issue travel orders, and to effect emergency purchases of supplies, equipment and services shall be exercised by the respective Regional Administrators, their deputies, or staff in line of succession, as may be required for the discharge of the lawful duties of the respective offices.

§ 200.205 Effect upon existing Commission organization, delegations, and rules.

Except as otherwise provided herein, all outstanding Commission organizational statements, delegations of authority, orders, rules and regulations shall remain in force and effect during emergency conditions, subject to all lawful requirements and such changes as may be authorized by or in the name of the Chairman or the Commission.

The Commission finds that the foregoing sections involve matters of agency organization and procedure which do not require notice and opportunity for comment under section 4(a) of the Adminis-

trative Procedure Act. Accordingly, the plan is adopted, effective forthwith.

By the Commission,

[SEAL] ORVAL L. DuBOIS,
Secretary.

FILTERS, RESIN-BONDED

The Commissioner of Food and Drugs, having evaluated the data submitted in a petition filed by Johnson & Johnson, 4949 West 45th Street, Chicago 38, Illinois, and other relevant material, has concluded that § 121.2536 should be amended to permit the use of such articles to filter milk at temperatures higher than 145° F. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (25 F.R. 8625), § 121.2536 is amended by insert-

ing therein a new paragraph (h) reading as follows:

Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. SUBCHAPTER C—DRUGS

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

Penicillin Tablets

Under the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended; 21 U.S.C. 357) and delegated to the Commissioner of Food and Drugs by the Secretary (25 F.R. 8625), the regulations for the certification of penicillin and penicillin-containing drugs are amended by changing § 146a.27(d) (2) (1)(a) and (3)(1)(a)(2) to read as follows:

§ 146a.27 Penicillin tablets.

- (d)
- (2)
- (1)

(a) If the person who requests certification is the manufacturer of the batch: Average potency, average moisture, and, if required by paragraph (a) of this section, disintegration time of tablets collected during the time of tableting the batch; and, unless the tablets are packaged into dispensing-size containers immediately after they are compressed or the manufacturer has submitted to the Commissioner, and it has been accepted, information adequate to prove that such tests are not necessary, average moisture of tablets collected during each day of packaging the batch.

(3) * * *
(1) * * *
(a) * * *

(2) If, after tableting, such person packaged the batch into dispensing-size containers: 20 tablets collected at equal intervals during each day the tablets are being packaged, except that this sample is not required if the tablets are packaged immediately after they are compressed or if the manufacturer has been exempted by the Commissioner from such requirement; or

Notice and public procedure and delayed effective date are not necessary prerequisites to the promulgation of this order, and I so find, since the nature of the changes is such that they cannot be applied to the specific products unless and until the manufacturer thereof has supplied adequate data regarding the articles involved.

Title 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6662]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Exempt Mutual Insurance Companies and Associations

On January 10, 1963, notice of proposed rule making regarding amendment of the Income Tax Regulations (26 CFR Part 1) to conform the provisions relating to exempt mutual insurance companies and associations to section 822(b) of the Internal Revenue Code of 1954 as amended by section 3(a)(3) of the Life Insurance Company Tax Act for 1955 (70 Stat. 47), to clarify the provisions relating to feeder organizations

in view of the decision in *Hospital Bureau of Standards and Supplies, Inc. v. United States* (Ct. Cl. 1958) 158 F. Supp. 560, and to reflect the amendments made by the Act of April 7, 1958 (Public Law 85-367, 72 Stat. 80) and by section 75(b) of the Technical Amendments Act of 1958 (72 Stat. 1661), was published in the FEDERAL REGISTER (28 F.R. 280). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the regulations as proposed are hereby adopted, subject to the changes set forth below in paragraphs 1 and 2, to incorporate those changes required by section 8(d) of the Revenue Act of 1962 (76 Stat. 997).

PARAGRAPH 1. Section 1.501(c)(15) is amended.

PAR. 2. Section 1.501(c)(15)-1, as set forth in paragraph 1 of the notice of proposed rule making, is revised.

Because the additional changes contained in this Treasury decision merely conform the regulations under section 501(c)(15) to reflect the amendment made by section 8(d) of the Revenue Act of 1962, which increases the maximum amount permitted to be received from certain sources by mutual insurance companies and associations exempt from taxation, it is hereby found that it is unnecessary, with respect to such changes, to issue this Treasury decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of that Act.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] BERTRAND M. HARDING,
Acting Commissioner
of Internal Revenue.

Approved: July 1, 1963.

STANLEY S. SURREY,
Assistant Secretary of the
Treasury.

PARAGRAPH 1. Section 1.501(c)(15) is amended to read as follows:

[Sec. 501(c)(15) as amended by sec. 5(2) of the Life Insurance Company Tax Act for 1955 (70 Stat. 49); sec. 8(d), Rev. Act 1962 (76 Stat. 997)]

(a) *Taxable years beginning after December 31, 1962.* An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed \$150,000.

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and the regulations thereunder.

(b) *Taxable years beginning after December 31, 1954, and before January 1, 1963.* An insurance company or association described in section 501(c)(15) and paragraph (a) of this section is exempt under section 501(a) if the gross amount received during the taxable year from the sum of the items described in paragraph (a) (1), (2), and (3) of this section does not exceed \$75,000.

(c) *No double inclusion of income.* In computing the gross income from any trade or business (other than an insurance business) carried on by the company or association, or by a partnership of which the company or association is a partner, any item described in section 822(b)(1) (A), (B), or (C) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) (A), (B), or (C) and paragraph (a)(1) of this section.

(d) *Taxable years beginning after December 31, 1953, and before January 1, 1955.* An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed \$75,000:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822-3.

(2) Premiums (including deposits and assessments).

(e) *Exclusion of capital gains.* Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses), chapter 1 of the Code, shall be excluded from the amounts described in this section.

PAR. 3. Paragraph (b) of § 1.502-1 is amended to read as follows:

§ 1.502-1 Feeder organizations.

(b) If a subsidiary organization of a tax-exempt organization would itself be exempt on the ground that its activities are an integral part of the exempt activities of the parent organization, its exemption will not be lost because, as a matter of accounting between the two organizations, the subsidiary derives a profit from its dealings with its parent organization, for example, a subsidiary organization which is operated for the sole purpose of furnishing electric power used by its parent organization, a tax-exempt educational organization, in carrying on its educational activities. However, the subsidiary organization is not exempt from tax if it is operated for the primary purpose of carrying on a trade or business which would be an unrelated trade or business (that is, unrelated to exempt activities) if regularly carried on by the parent organization. For example, if a subsidiary organization is operated primarily for the purpose of furnishing electric power to consumers other than its parent organization (and the parent's tax-exempt subsidiary organizations), it is not exempt since such business would be an unrelated trade or business if regularly carried on by the parent organization. Similarly, if the organization is owned by several unrelated exempt organizations, and is operated for the purpose of furnishing electric power to each of them, it is not exempt since such business would be an unrelated trade or business if regularly carried on by any one of the tax-exempt organizations. For purposes of this paragraph, organizations are related only if they consist of—

- (1) A parent organization and one or more of its subsidiary organizations; or
- (2) Subsidiary organizations having a common parent organization.

An exempt organization is not related to another exempt organization merely because they both engage in the same type of exempt activities.

PAR. 4. Section 1.512(b) is amended by adding a new paragraph (13) to section 512(b) and by adding a historical note at the end of such § 1.512(b). These added provisions read as follows:

§ 1.512(b) Statutory provisions; unrelated business taxable income; exceptions, additions, and limitations.

SEC. 512. *Unrelated business taxable income.* * * *

(b) *Exceptions, additions, and limitations.* The exceptions, additions, and limitations applicable in determining unrelated business taxable income are the following:

- (13) In the case of a trust—
 - (A) Created by virtue of the provisions of the will of an individual who died after August 16, 1954, and before January 1, 1957,
 - (B) Which, by virtue of the provisions of such will, is a limited partner in a partnership created under the laws of a State (i) providing for the creation of limited partnerships, and (ii) under which a limited partner has no right to take part in the control of the business without becoming liable as a general partner,
 - (C) Which, at no time before or during a taxable year of the partnership ending with or with the taxable year of the trust, was (or was liable as) a general partner in such partnership, and
 - (D) Which is required to distribute all of its income (within the meaning of section 643(b)) currently exclusively for religious, charitable, scientific, literary, or educational purposes, and which is required to distribute all of the corpus exclusively for such purposes,

there shall be excluded its share (determined under subsection (c) without regard to this paragraph and paragraph (11)) of gross income of the partnership as such limited partner and of the partnership deductions directly connected with such income, but, if such share of gross income exceeds such share of deductions, only to the extent that the partnership makes distributions during its taxable year which are attributable to such gross income. (3) Promptly upon discovery that:

(i) Such transfer was in violation of the provisions of this part or any regulation, ruling, instruction, license or other direction or authorization thereunder, or

(ii) Such transfer was not licensed or authorized by the Secretary of the Treasury, or

The filing of a report in accordance with the provisions of this paragraph shall not be deemed to be compliance or evidence of compliance

with subparagraphs (1) and (2) of this paragraph.

Subpart H—Procedures

§ 515.801 Licensing.

(a) *General licenses.* General licenses have been issued authorizing under appropriate terms and conditions, many types of transactions which are subject to the prohibitions contained in Subpart B of this part. All such licenses are set forth in Subpart E of this part. It is the policy of Foreign Assets Control not to grant applications for specific licenses authorizing transactions to which the provisions of an outstanding general license are applicable. Persons availing themselves of certain general licenses are required to file reports and statements in accordance with the instructions specified in the licenses.

(b) *Specific licenses—(1) General course of procedure.* Transactions subject to the prohibitions contained in Subpart B of this part which are not authorized by general license may be effected only under specific license. The specific licensing activities of Foreign Assets Control are performed by the central organization and the Federal Reserve Bank of New York. When an unusual problem is presented, the proposed action is cleared with the Director of Foreign Assets Control or such person as he may designate.

(2) *Applications for specific licenses.* Applications for specific licenses to engage in any transaction prohibited by or pursuant to this part are to be filed in

duplicate on Form TFAC-5 with the Federal Reserve Bank of New York. Any person having an interest in a transaction or proposed transaction may file an application for a license authorizing the effecting of such transaction, and there is no requirement that any other person having an interest in such transaction shall or should join in making or filing such application.

(3) *Information to be supplied.* Applicants must supply all information specified by the respective forms and instructions. Such documents as may be relevant shall be attached to each application as a part of such application except that documents previously filed with Foreign Assets Control may, where appropriate, be incorporated by reference. Applicants may be required to furnish such further information as is deemed necessary to a proper determination by the Control. If an applicant or other party in interest desires to present additional information or discuss or argue the application, he may do so at any time before or after decision. Arrangements for oral presentation should be made with the Control.

(4) *Effect of denial.* The denial of a license does not preclude the reopening of an application or the filing of a further application. The applicant or any other party in interest may at any time request explanation of the reasons for a denial by correspondence or personal interview.

(5) *Reports under specific licenses.* As a condition upon the issuance of any license, the licensee may be required to file reports with respect to the transaction covered by the license, in such form and at such times and places as may be prescribed in the license or otherwise.

(6) *Issuance of license.* Licenses will be issued by Foreign Assets Control acting on behalf of the Secretary of the Treasury or by the Federal Reserve Bank of New York, acting in accordance with such regulations, rulings and instructions as the Secretary of the Treasury or Foreign Assets Control may from time to time prescribe, in such cases or classes of cases as the Secretary of the Treasury or Foreign Assets Control may determine, or licenses may be issued by the Secretary of the Treasury acting directly or through any person, agency, or instrumentality designated by him.

§ 515.802 Unblocking.

Any interested person desiring the unblocking of accounts or other property on the ground that no person having an interest in the property is a designated national may file such an application. Such application shall be filed in the manner provided in § 515.801(b) and shall contain full information in support of the administrative action requested.

The applicant is entitled to be heard on the application. If the applicant desires a hearing, arrangements should be made with Foreign Assets Control.

§ 515.803 Decision.

Foreign Assets Control or the Federal Reserve Bank of New York will advise each applicant of the decision respecting applications filed by him. The decision of Foreign Assets Control acting on be-

half of the Secretary of the Treasury with respect to an application shall be final.

§ 515.804 Records and reporting.

Records are required to be kept by every person engaging in any transaction subject to the provisions of this part, as provided in § 515.601.

§ 515.805 Amendment, modification, or revocation.

The provisions of this part and any rulings, licenses, authorizations, instructions, orders, or forms issued thereunder may be amended, modified, or revoked at any time.

§ 515.806 Rule making.

(a) All rules and other public documents are issued by the Secretary of the Treasury upon recommendation of the Director of Foreign Assets Control. Except to the extent that there is involved any military, naval, or foreign affairs function of the United States or any matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts and except when interpretative rules, general statements of policy, or rules of agency organization, practice, or procedure are involved or when notice and public procedure are impracticable, unnecessary or contrary to the public interest, interested persons will be afforded an opportunity to participate in rule making through submission of written data, views, or argument, with oral presentation in the discretion of the Director. In general, rule making by Foreign Assets Control involves foreign affairs functions of the United States. Wherever possible, however, it is the practice to hold informal consultations with interested groups or persons before the issuance of any rule or other public document.

(b) Any interested person may petition the Director of Foreign Assets Control in writing for the issuance, amendment or repeal of any rule.

§ 515.807 Delegation by the Secretary of the Treasury.

Any action under § 515.201 which the Secretary of the Treasury is authorized to take pursuant to Proclamation 3447 or the Trading With the Enemy Act may be taken by the Director, Foreign Assets Control, or by any other person to whom the Secretary of the Treasury has delegated authority so to act.

§ 515.808 Customs procedures; merchandise specified in § 515.204.

(a) With respect to merchandise specified in § 515.204, whether or not such merchandise has been imported into the United States, collectors of customs shall not accept or allow any:

- (1) Entry for consumption (including any appraisement entry, any entry of goods imported in the mails, regardless of value, and any other informal entries);
- (2) Entry for immediate exportation;
- (3) Entry for transportation and exportation;
- (4) Withdrawal from warehouse;
- (5) Transfer or withdrawal from a foreign-trade zone; or

(6) Manipulation or manufacture in a warehouse or in a foreign-trade zone, unless either:

- (i) The merchandise was imported prior to 12:01 a.m., February 7, 1962, or
- (ii) A specific license pursuant to this part is presented, or
- (iii) Instructions from the Foreign Assets Control, either directly or through the Federal Reserve Bank of New York, authorizing the transaction are received.

(b) Whenever a specific license is presented to a collector of customs in accordance with this section, one additional legible copy of the entry, withdrawal or other appropriate document with respect to the merchandise involved shall be filed with the collector of customs at the port where the transaction is to take place. Each copy of any such entry, withdrawal or other appropriate document, including the additional copy, shall bear plainly on its face the number of the license pursuant to which it is filed. The original copy of the specific license shall be presented to the collector in respect of each such transaction and shall bear a notation in ink by the licensee or person presenting the license showing the description, quantity, and value of the merchandise to be entered, withdrawn or otherwise dealt with. This notation should be so placed and so written that there will exist no possibility of confusing it with anything placed on the license at the time of its issuance. If the license in fact authorizes the entry, withdrawal or other transaction with regard to the merchandise the collector, or other authorized customs employee, shall verify the notation by signing or initialing it after first assuring himself that it accurately describes the merchandise it purports to represent. The license shall thereafter be returned to the person presenting it and the additional copy of the entry, withdrawal or other appropriate document shall be forwarded by the collector to the Foreign Assets Control.

(c) Whenever a person shall present an entry, withdrawal or other appropriate document affected by this section and shall assert that no specific Foreign Assets Control license is required in connection therewith, the collector of customs shall withhold action thereon and shall advise such person to communicate directly with the Federal Reserve Bank of New York to request that instructions be issued to the collector to authorize him to take action with regard thereto.

This subpart establishes Chapter 5A of the General Services Administration Procurement Regulations (41 CFR Ch. 5A), states its relationship to the Federal Procurement Regulations (FPR) and Chapter 5 of the General Services Administration Procurement Regulations (GSPR), and sets forth other introductory information.

§ 5A-1.102 Establishment of Chapter 5A, General Services Administration Procurement Regulations.

This Chapter 5A of GSPR is prescribed by the Commissioner, Federal Supply Service, and is established to provide all Federal Supply Service (FSS) activities with additional uniform policies and procedures applicable to the procurement of personal property and nonpersonal services.

§ 5A-1.103 Relationship of Chapter 5A to the FPR and Chapter 5, GSPR.

(a) GSPR Chapter 5A implements and supplements the FPR and GSPR Chapter 5. Implementing material is that which expands upon related FPR or Chapter 5 material. Supplementing material is that for which there is no counterpart in the FPR or Chapter 5.

(b) Material published in the FPR or GSPR Chapter 5 becomes effective throughout FSS upon the effective date of the particular FPR or Chapter 5 material. Such material will not be repeated, paraphrased, or restated in Chapter 5A. Therefore, all three must be reviewed to obtain comprehensive coverage of FSS-wide procurement policies and procedures.

(c) Material in Chapter 5A implements and supplements but does not supersede the FPR or Chapter 5 unless a deviation has been authorized and the deviation is explicitly referenced. In case of other conflict, or when Chapter 5A contains no related material implementing the FPR or Chapter 5, the FPR or Chapter 5 will govern.

§ 5A-1.104 Applicability.

Chapter 5A applies to all purchases and contracts made by FSS for the procurement of personal property and nonpersonal services.

§ 5A-1.105 Exclusions.

(a) Certain FSS procurement policies and procedures which come within the scope of this chapter nevertheless may be excluded therefrom when there is justification. These inclusions include the following categories:

- (1) Subject matter which bears a security classification.
- (2) Policies or procedures which are expected to be effective for a period of less than six months.
- (3) Policies or procedures which are effective on an experimental basis for a reasonable period.
- (4) Policies or procedures pertaining to other functions of FSS as well as to procurement functions and there is need to make the issuance available simultaneously to all FSS employees concerned.

(5) Where speed of issuance is essential, numerous changes are required, and all necessary changes cannot be made promptly.

(b) Procurement policies and procedures issued in other than the FPR System format under paragraphs (a) (4) and (5), above, shall be codified into Chapter 5A at the earliest practicable date, but in any event not later than six months from date of issuance.

§ 5A-1.106 Method of issuance.

(a) All Chapter 5A material deemed necessary for business concerns, and others interested, to understand FSS procurement policies and procedures will be published in the FEDERAL REGISTER. Other related material also may be published in the FEDERAL REGISTER when its inclusion will provide a logical, comprehensive statement of FSS procurement policies and procedures.

(b) Chapter 5A material published in the FEDERAL REGISTER will be published in cumulative form in Chapter 5A of Title 41 of the Code of Federal Regulations (41 CFR Ch. 5A). The FEDERAL REGISTER and Title 41 of the Code of Federal Regulations may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D.C.

§ 5A-1.107 Arrangement.

§ 5A-1.107-1 General plan.

Chapter 5A is divided into parts, subparts, sections, subsections, and further subdivisions as necessary.

§ 5A-1.107-2 Numbering.

(a) Generally, the numbering system used in Chapter 5A conforms to that of the FPR (see § 1-1.007-2). Thus, a particular procurement policy or procedure is identified by the same number in the FPR, Chapter 5, and Chapter 5A, except that the first digit of the number is either 1, 5, or 5A.

(b) Where Chapter 5A implements a part, subpart, section, or subsection of the FPR or Chapter 5, the implementing part, subpart, section, or subsection of Chapter 5A will be numbered (and captioned) to correspond to the FPR or the Chapter 5 part, subpart, section, or subsection.

(c) Where Chapter 5A supplements the FPR or Chapter 5 and thus deals with subject matter not contained in the

FPR or Chapter 5, numbers in the group 70 through 89 will be assigned to the respective supplementing parts, subparts, sections, or subsections.

(d) Where the subject matter contained in a part, subpart, section, or subsection of the FPR or Chapter 5 requires no implementation, Chapter 5A will contain no corresponding part, subpart, section, or subsection number. Thus, there may be gaps in the Chapter 5A series of part, subpart, section, or subsection numbers. In such cases, reference must be made to the FPR and Chapter 5 for policy and procedure applicable throughout FSS.

§ 5A-1.107-3 Cross-references.

(a) Within Chapter 5A, cross-references to the FPR will be made in the same manner as used within the FPR and Chapter 5. Illustrations of cross-references to Chapter 5 are:

- (1) Part 5-3.
- (2) Subpart 5-3.1.
- (3) § 5-3.102-50.

(b) Within Chapter 5A, cross-references to parts, subparts, and sections will be made in a manner generally similar to that used in making cross-references to the FPR. For example, this paragraph would be referenced as "§ 5A-1.107-3(b)".

§ 5A-1.108 Citation.

(a) Citation in formal documents, such as legal briefs, shall give the number of the part, subpart, or section of Chapter 5A following the words "General Services Administration Procurement Regulations" and shall include an appropriate reference to "41 CFR ____" where the material has been published in the FEDERAL REGISTER.

(b) Any section of Chapter 5A, for purpose of brevity, may be informally identified as "GSPR" followed by the section number. For example, this paragraph could be identified in a memorandum as "GSPR 5A-1.108(b)".

§ 5A-1.109 Deviation.

(a) The term "deviation" as used in this Chapter 5A is defined in the same manner as described in § 1-1.009-1.

(b) In order to maintain uniformity to the greatest extent feasible, deviation by FSS activities from this Chapter 5A will be kept to a minimum and controlled as follows:

(1) Deviation will be made only after prior approval by the Assistant Commissioner for Procurement, if the deviation does not affect the programs and operations assigned to any other Assistant Commissioner of FSS.

(2) Deviation affecting the programs and operations of two or more Assistant Commissioners, FSS, will be made only after prior approval by the Commissioner, FSS.

(3) Requests for authority to deviate from Chapter 5A shall be submitted to the Assistant Commissioner for Procurement. Such requests will be supported by statements adequate to disclose fully the nature of the deviation and the reasons for special action.

(4) Deviations in classes of cases, authorized under subparagraphs (1) and (2), above, will expire, unless extended,

12 months from the date of approval, unless sooner rescinded, without prejudice to any action taken thereunder.

Subpart 5A-1.71—Criteria for Determining Method of Supply

§ 5A-1.7101 General.

This subpart establishes criteria for guidance in determining when requirements for items needed on a recurring basis should be consolidated for procurement at one or more points, and whether such consolidated requirements should be purchased and stored at redistribution points in advance of immediate need for issue to use points as needs arise; purchased in definite quantities for direct delivery to use points; or contracted for in advance of immediate need under indefinite delivery type contracts covering specific periods and providing for delivery to use points as needs arise.

§ 5A-1.7102 Definition of use point.

The term "use point," as used in this subpart, means that point from which supplies are issued to consumers or equipment is placed in use, as distinguished from storage points where supplies and equipment are issued to redistribution points.

§ 5A-1.7103 Basic criteria.

(a) The basic criteria set forth in this subpart are intended to be applied only to the normal recurring needs of the Government and shall be subject to appropriate adjustments in technique when purchase of abnormally large quantities are involved, or requirements involved cover special items for which stocks are maintained in support of a specific activity of any Government agency.

(b) Principles are established governing selection of the appropriate methods of supply to be utilized. However, in applying these criteria to specific items and requirements therefor, appropriate consideration shall be given to any other significant factors not mentioned herein.

§ 5A-1.7104 Purchase for storage and issue.

The following criteria will govern in determining whether an item can be handled most advantageously through consolidated purchasing for storage and issue to use points:

(a) The items shall be physically adaptable to storage and issue and of such a character that it is feasible to forecast with reasonable accuracy overall requirements of the use points served.

(b) Rate of use and frequency of ordering by use points shall be sufficient to warrant storage and issue.

(c) Rate of deterioration or obsolescence shall be sufficiently low to avoid unnecessary loss.

(d) Price advantage through bulk buying shall be sufficient to render storage and issue more economical, all costs both direct and indirect considered, or conditions exist where any of the following factors require consolidated purchasing of items suitable for storage and issue:

(1) Where close inspection or testing is necessary to assure quality, or where repetitive inspection and test of small

lots are prohibitive from the standpoint of cost or potential urgency of need.

(2) Where advance purchase and storage are necessitated by long procurement lead time.

(3) Where an item is of special manufacture or design and is not readily available from commercial sources.

(4) Where an adequate industry distribution system does not exist to assure availability at use points.

(5) Where contracts for production quantities are necessary to secure timely deliveries and advantageous prices.

(6) Where market conditions are such that central procurement is required to secure adequate supply.

§ 5A-1.7105 Consolidated purchase for direct delivery.

The following criteria shall govern in determining whether an item can be most advantageously handled through consolidated purchase for direct delivery to use points:

(a) The items shall be equipment or supply items of such a character that it is feasible to forecast requirements for delivery to specific use points.

(b) The greatest price advantage, both direct and indirect costs considered, shall be obtainable through definite quantity purchasing, or conditions exist where any of the following factors require consolidated purchasing of such items for direct delivery to use points:

(1) Where an item is of special manufacture or design and is not readily available from commercial sources.

(2) Where market conditions are such that central procurement is required to assure adequate supply.

(3) Where contracts for production quantities are necessary to secure timely deliveries and advantageous prices.

(4) Where quantity is large enough to assure lowest transportation cost, or conversely, where transportation costs for small quantity redistribution are so excessive that it is not feasible to store and issue the item.

§ 5A-1.7106 Purchase through indefinite delivery type contracts.

The following criteria shall govern in determining whether an item can be most advantageously purchased through the medium of indefinite delivery type contracts, as described in § 1-3.405-5 (such as Federal Supply Schedules), covering specific periods and providing for delivery to use points as needs arise:

(a) The item shall be of such a character that:

(1) Handling on a storage and issue basis is not economically sound.

(2) It is either not feasible to forecast definite requirements for delivery to specific use points, or no advantage accrues for doing so.

(b) Industry distribution facilities shall be adequate to serve properly the use points involved.

(c) Price advantage shall be sufficient to warrant the cost involved in maintaining indefinite delivery type contracts, or conditions exist where any of the following factors require handling on that basis:

(1) Where acute competitive bidding problems exist based upon highly tech-

RULES AND REGULATIONS

nical matters which can best be met by centralizing contracting work.

(2) Where item is of special manufacture or design and is not readily available from commercial sources.

(d) This method of purchase shall be used also when:

(1) Items are proprietary or so highly complex in design, function, or operation as to be noncompetitive.

(2) Technical assistance or service to be furnished by suppliers is a fundamental consideration in use of equipment.

§ 5A-1.7107 Local purchase.

Whenever it is not feasible to procure under any of the other methods described in this subpart, procurement shall be made locally by the FSS buying office to which the requirement has been submitted in accordance with applicable procedures.

Effective date. These regulations are effective upon publication in the FEDERAL REGISTER.

Dated: July 1, 1963.

Commissioner,

ENGINES AND TURBINES INDUSTRY

Tentative Decision Determining Prevailing Minimum Wages

A complete record of proceedings under sections 1 and 10 of the Walsh-Healey Public Contracts Act (41 U.S.C. 35 and 43a) to determine the prevailing minimum wages for persons employed in the engines and turbines industry has been certified by the hearing examiner. A tentative decision, including a statement of findings and conclusions as well as the reasons and basis therefor, on all material issues of fact, law, and discretion presented on the record, and any proposed wage determination, is now appropriate under the applicable rules of practice (41 CFR Part 50-203.21(b)) and the Administrative Procedure Act (5 U.S.C. 1007(b)).

DEFINITION

A proposed definition of the industry based on industry group number 351 of the 1957 edition of the *Standard Industrial Classification (SIC) Manual* is contained in the notice of hearing (27 F.R. 2532). No criticisms were proffered concerning this definition. It appears to be satisfactory to both labor and management. The SIC Manual was prepared by the Bureau of the Budget of the Executive Office of the President for the purpose of promoting uniformity and comparability in industry classifications used by various agencies of the United States Government. The SIC appears to be an appropriate foundation for defining the industry for this wage deter-

mination, as the wage determination will exclusively affect contracts to which federal agencies are parties. The definition proposed in the notice of hearing is adopted for the purpose of this tentative decision.

BRANCHES

The employers' representatives have proposed that the industry be divided into the following branches for wage determination purposes: (1) The steam engines, turbines, and turbine generator sets branch; and (2) the internal combustion engines branch. This proposal was supported by substantial evidence that establishments which make products in one of these proposed branches generally do not, and are not equipped to make products in the other branch. This evidence is further supported by the SIC Manual's similar division of the industry into Nos. 3511 and 3519. For these reasons, and because the record provides separate definitions and separate wage data which provide a basis for dividing the industry into the two requested branches, I have decided so to divide it in this tentative determination.

LOCALITY

The next issue to be considered concerns the question of whether the geographic area of competition for contracts subject to the Walsh-Healey Public Contracts Act for products of each branch of the industry extends to all the area in which the branch has its plants so as to require branchwide minimum wage determinations, or whether such competition is limited to smaller geographic areas in either or both branches so as to authorize separate minimum wage determinations for smaller localities in one or both of the branches. The record contains extensive data prepared by the Wage and Hour and Public Contracts Divisions of the Department of Labor concerning this subject. These data clearly indicate that when bids are invited the geographic area of competition for Government contracts for the products of each branch of this industry is not confined to the locality where the goods are to be delivered. There is no way to predict at that time the geographic area in which the successful bidder's plant will be located. In their testimony at the hearing the representatives of organized labor took the position that the area of competition for Government contracts for the products of this industry was industrywide. Counsel for the National Electrical Manufacturers Association (NEMA) stipulated for the record that the turbine members of NEMA ship their products throughout the nation. Moreover, although counsel for the Internal Combustion Engine Institute (ICEI) and the Diesel Engine Manufacturers Association (DEMA) took no position on this issue, several witnesses appearing on behalf of individual establishments in the internal

combustion engines branch testified that they competed with establishments throughout the United States.

Accordingly, it is my finding that the locality in which products of each branch of the engines and turbines industry are to be manufactured or furnished for any Government contract subject to the Walsh-Healey Public Contracts Act cannot be defined more narrowly than the entire area in which the branch operates. Under these circumstances, a wage determination without geographic divisions is essential to achieve the purposes of Congress in enacting the statute (See the tentative decision in the textile industry, 17 F.R. 11197; *Mitchell v. Covington Mills, Inc.*, 229 F. 2d 506, certiorari denied, 350 U.S. 1002, rehearing denied, 351 U.S. 934).

PREVAILING MINIMUM WAGES IN THE STEAM ENGINES, TURBINES, AND TURBINE GENERATOR SETS BRANCH

The record contains a survey prepared by the Bureau of Labor Statistics (BLS) which shows the minimum wages paid in October 1961 by each establishment with 20 or more employees in which the manufacture of products of this industry were found to constitute 50 percent or more of its total value of sales in 1960, and in which the manufacture of the products of this branch were found to constitute more of the total value of its sales than the manufacture of the products of the other branch in that year. There were 17 such establishments paying widely scattered minimum wages and employing a total of 15,042 workers of the type covered by the act when performing under a contract subject to it (hereafter called "covered workers"). This survey was supplemented by a survey prepared by the National Electrical Manufacturers Association of the minimum wages paid in ten of the 17 establishments in June 1962. In order to cause its survey to reflect minimum wages paid in all of the establishments within the scope of the BLS survey, NEMA prepared a table for all 17 establishments by combining the June 1962 data for the ten establishments it had surveyed with the October 1961 data for the seven other establishments (NEMA exhibit 7).

For the purpose of obtaining June 1962 data for these seven establishments, NEMA renewed its application for a subpoena which would in effect require the BLS to provide NEMA with the identity of these establishments. The hearing examiner declined to grant the application. The application for the subpoena had originally been made and was denied by an order issued prior to the commencement of the hearing. The text of this order is set forth as an appendix to this decision.

It is my finding that the hearing examiner acted correctly in denying this application, for the value of the possibility of replacing October 1961 data with June 1962 data for a minor part of the industry does not in my opinion outweigh the reasons for denial of the subpoena as set forth in the original order.

The NEMA table shows that a majority of 52.9% of the establishments in this

branch paid no covered worker less than \$1.70 an hour, and that a majority of 52.4% of the covered workers in the branch were employed in establishments which paid no covered worker less than \$1.75. It therefore appears that the rate which is most representative of the minimum wages paid in the branch as a whole lies between \$1.70 and \$1.75 an hour. Most of the employment within this range is in the largest plant in the branch which accounts for over one-third of its total covered worker employment. Its minimum wage is \$1.71 per hour. I find that rate to be the prevailing minimum wage in this branch of the industry.

PREVAILING MINIMUM WAGES IN THE INTERNAL COMBUSTION ENGINES BRANCH

The BLS survey presents data on the minimum wages paid in this branch comparable in every detail with that presented for the other branch. No recommendations were received from the representatives of employers concerning the question of what are the prevailing minimum wages in the branch. The Internal Combustion Engine Institute and Diesel Engine Manufacturers Association did, however, criticize the BLS survey in a number of respects. They contend that employers are prejudiced because establishments with less than 20 employees are excluded from the survey. This claim is not substantiated by the evidence. These establishments were excluded merely because they represented so small a part of the industry (being responsible for only three-tenths of one percent of the shipments of internal combustion engines) as not to warrant the administrative difficulty involved in including them. Moreover, there is nothing in the record to indicate that the survey was in any way biased by this limitation on its scope. The association also objects to the fact that a large portion of the industry was excluded from the survey because of its limitation to establishments at least half of the value of whose products were within the industry. However, if the survey is to serve its purpose most effectively, it should exclude establishments whose productive activities are principally directed in other industry channels, and I find that exclusion of establishments which produce over half the value of their products for some other industry or industries is the most feasible way of achieving this result. The survey was also criticized because it did not show rates said to be "established" by various plants in the industry although lower than the lowest rates actually paid. Such rates were not surveyed because of the long standing rule, which has been reconsidered with care time and time again and of which I approve, that lowest rates actually paid are the best guide to prevailing minimum wages. See: Photographic and blueprinting equipment and supplies industry—final decision (21 F.R. 2243); tires and related products industry—tentative decision (24 F.R. 8741); electron tubes and related products industry—tentative decision (25 F.R. 7801); metal business furniture and storage equipment industry—tentative decision (25 F.R. 12363);

electronic component parts industry—tentative decision (26 F.R. 4173); manifold business forms industry—tentative decision (26 F.R. 5898).

Counsel for ICEI and DEMA contends that the BLS data are not dependable or reliable evidence. This criticism grows out of the contention that some respondents initially failed to understand the scope of the definition of covered employment and filed erroneous returns. On rechecking their copies of the questionnaire after discussing the matter with counsel, several employers submitted revisions of the data originally provided the BLS. The proposed changes were verified by the BLS and all necessary revisions with the exception of the corrections of the Briggs and Stratton Company were incorporated in the July 1962 revision of the wage survey. Subsequently, corrected data for Briggs and Stratton were received and incorporated in the record.

From the record, it is evident that every effort to make the survey as accurate as possible was made. Moreover, the technical proficiency of the BLS in conducting wage surveys is without question. Although mistakes are inherently possible in any survey, there is every reason to believe that this survey was made with the highest degree of competence and accuracy.

I find, therefore, that the evidence of record provides a sound basis for determining the prevailing minimum wage in this branch. This evidence shows that in October 1961, 51.8 percent of the establishments employing 55.3 percent of the covered workers paid no covered worker less than \$1.69 an hour. This rate most nearly represents the central tendency among the widely scattered minimum wages paid by establishments in the branch. Accordingly, I find \$1.69 an hour to be the prevailing minimum wage in the internal combustion engines branch of the industry.

A SECOND LEVEL OF PREVAILING MINIMUM WAGES

The representatives of organized labor contend that any minimum wage determination for this industry (or either of its branches) arrived at in the manner discussed in the preceding paragraphs is inadequate for use with respect to the industry (or either of its branches) as a whole. They insist that the wages paid to the lowest paid employee in each establishment in the industry does not provide a valid guide to the lower end of the wage scales which characterize such establishments. In support of this contention, they point to evidence in the BLS survey which indicates that if the wage determination was based upon data which excluded the lowest paid one percent of the covered workers in each establishment a substantially higher wage determination would be warranted for the industry (or its branches). They, therefore, contend that in determining prevailing minimum wages for this industry, I should recognize the fact that this industry is characterized by establishments which employ a very small portion of their workers (or a single worker) at much lower

wages than the bulk of their lower paid workers; that in view of such circumstances two levels of prevailing minimum wages should be established; one in the manner discussed in the preceding paragraphs to be applied to the lowest paid one percent of the workers in an establishment; and a second based on the minimum wage paid to the other 99 percent of the workers in each establishment to be applied to the other 99 percent of the workers in an establishment when performing upon a contract subject to the Act.

The peculiar composition of this industry to which labor refers creates a situation which raises some question as to whether a determination based upon the absolute minimum wage paid in each establishment is likely to foster one purpose of the Act—"to use the leverage of the Government's immense purchasing power to raise labor standards" (Endicott Johnson Corp. v. Perkins, 317 U.S. 501, 507). This results from the fact that such a determination is based upon wage rates which are so far removed from those paid in any substantial portion of the employment in each establishment of which the industry is composed as to have practically no effect upon any workers in the industry. This is illustrated by the BLS survey which shows that only between two and three-tenths of one percent of the covered workers in the steam engines, turbines, and turbine generator sets branch of the industry received less than the previously discussed prevailing minimum wage for that branch and only between one and two percent of the covered workers in the internal combustion engines branch received less than the corresponding rate for that branch.

The problem thus created by the composition of this industry requires special consideration. I have examined the evidence to determine the possible results of the application of the technique recommended by labor. It reveals that the \$1.71 rate for the steam engines, turbines, and turbine generator sets branch could be supplemented by a rate somewhere between \$1.70 an hour based upon the minimum wages paid in establishments weighted equally and \$2.00 an hour based on the minimum wages paid in establishments weighted according to their covered employment. The comparable rates which could supplement the \$1.69 an hour rate for the internal combustion engines branch are \$2.00 an hour and \$2.10 an hour. Accordingly, if I were to adopt labor's proposal, employers in the internal combustion engines branch would become subject to a lower minimum wage determination for a few of their workers than employers in the steam engines, turbines, and turbine generator sets branch, and a higher minimum wage determination for most workers. Aside from the practical difficulties of applying the proposed percentage test under conditions of day-to-day employment fluctuations and providing equitably for small plants employing less than 100 workers, this would yield an anomalous result, considering the fact that the general wage structure of the internal combustion engines branch is

lower than that of the other branch. I have concluded, therefore, that this record presents a poor case for the innovation suggested by labor. I have decided not to provide any second level of prevailing minimum wages for this industry or either of its branches in this tentative determination.

RECENT CHANGES IN PREVAILING MINIMUM WAGES

The principal remaining subject concerns the question of what changes have taken place in prevailing minimum wages since the survey dates. The evidence shows that there was no significant change in the wages paid between the time of the BLS survey and hearing date in the internal combustion engines branch. Most of the data on which the survey of the steam engines, turbines, and turbine generator sets branch rests were current at the time of the hearing. The representatives of labor argue, however, that in determining prevailing minimum wages, I should rely upon the most recent BLS data available to the Department at the time the final determination is made. This would have the advantage of providing a determination which takes into consideration wage changes in the industry between the hearing date and the effective date of the determination. However, as stated in the final determination for the office, computing, and accounting machines industry (27 F.R. 1269) this cannot be done without first reopening the hearing. Thereafter, it would be necessary to provide additional time for the filing of new proposed findings, conclusions, and exceptions resulting in a further delay which would in turn dissipate any merits involved in using the new evidence.

DELAY IN EFFECTIVE DATE

For the reasons fully stated in the final decision for the paper and pulp and manifold business forms industries (26 F.R. 7698, 7699), this tentative decision finds good cause to make the final decision in these proceedings effective seven days after it is published in the FEDERAL REGISTER.

PROPOSED DETERMINATIONS

Accordingly, upon the findings and conclusions stated herein, I propose to amend Part 50-202 of Title 41 of the Code of Federal Regulations by the addition of § 50-202.34 to read as follows:

§ 50-202.34 Engines and turbines industry.

bines, turbine blades, assembled diaphragms, turning gear drives, marine propulsion gears, head covers, bottom rings, discharge rings, pit liners, pistons, vibration dampers, cam follower rollers, crankshafts, piston pins and gear covers.

(2) Specifically excluded from this definition are: prime mover generator sets (except complete steam, gas or hydraulic turbine generator sets); all types of generators; aircraft engines; rocket engines; automotive engines (except diesel); locomotives; and parts commonly recognized as products of industries other than the engines and turbines industry such as, but not limited to, temperature relays, packings, pulsation dampeners, roller and ball bearings, compressors, piping and tubing, oil pumps, couplings, rubber sealing rings, clutches, governors for diesel engines, gaskets, thrust bearings, torque converters, silencers, valve seat inserts, and non-metallic engine mountings.

(b) *Minimum wages.* (1) The minimum wage for persons employed in the manufacture or furnishing of steam engines, steam turbines, hydraulic turbines, gas turbines (except aircraft), complete steam, gas, and hydraulic turbine generator sets; and parts, attachments, and accessories specifically designed for the foregoing products, shall be not less than \$1.71 an hour.

(2) The minimum wage for persons employed in the manufacture or furnishing of internal combustion engines (except aircraft and non-diesel automotive) such as diesel and semi-diesel engines, including marine, locomotive, and military tank engines; jet propulsion engines (except aircraft); outboard motors and propelling units; and parts, attachments, and accessories specifically designed for the foregoing products shall be not less than \$1.69 an hour.

Within twenty-one days from the date of publication of this tentative decision in the FEDERAL REGISTER, interested persons may submit written exceptions to the proposed action described therein, together with supporting reasons. Exceptions shall be directed to the Secretary of Labor and filed with the Chief Hearing Examiner, Room 4410, United States Department of Labor, 14th Street and Constitution Avenue NW., Washington 25, D.C.

Signed at Washington, D.C., this 1st day of July 1963.

APPENDIX

DEPARTMENT OF LABOR

OFFICE OF THE SECRETARY

ENGINES AND TURBINES INDUSTRY

ORDER RELATIVE TO DETERMINATION OF
PREVAILING MINIMUM WAGES

The National Electrical Manufacturers Association, hereinafter referred to as the Association, has applied for the issuance of a subpoena duces tecum under 41 CFR 50-203.19(a) calling for: (1) the production for inspection by its counsel of the originals, or copies if the originals cannot be produced, of the completed questionnaire forms received by the Bureau of Labor Statistics (BLS) from each of the 68 establishments

included in its survey of employment and wages in the engines and turbines industry (except the establishments of the companies listed in the application, which are already known to the Association and from which the Association has collected wage and employment data) or in the alternative, (2) the preparation and presentation by April 7, 1962, of a list showing the name and address of each of the establishments in the survey which are not known to the Association.

In connection with the asserted reasonableness in scope of the alternative request of the Association for a list of the names and addresses of those included in the BLS survey which are unknown to it, the Association contends that the production of that list would not affect in any way the pledge of confidence prefacing each questionnaire form. It is apparently conceded that a granting of the initial request for the forms completed by the respondents would breach that pledge.

A careful examination of the questionnaire form indicates that the alternative request for a list of the establishments unknown to the Association would also constitute a breach of the pledge of confidence. Such a list would to some extent reveal responses to Items III and IV of the questionnaire. The inclusion of an establishment in such a list would indicate that the establishment responded that it had 50 percent or more of its sales in products in the engines and turbines industry and that it had 20 or more employees. The pledge contains no qualifications permitting the disclosure of this information. No releases from the pledge, not even one from the applicants, have been received permitting its disclosure.

On the strength of the application, there is not sufficient cause to warrant a disclosure of this information which was received in confidence. Therefore, the request is considered unreasonable. In balance, the need for the confidential information is outweighed by the burden which would be placed upon the Government by its production.

The stated need is to enable the applicant to conduct such cross-examination at the hearing as will be necessary for a full and true disclosure of the facts. However, where the subject matter and evidence in rule-making proceedings are broadly economic or statistical and the parties or witnesses are numerous, as in minimum wage proceedings under the Walsh-Healey Public Contracts Act, the direct and rebuttal evidence may be such that cross-examination may add nothing substantial to the record. Cf. Sen. Doc. 248, 79th Cong. 2d sess., entitled "Administrative Procedure Act—Legislative History", p. 271. In minimum wage proceedings under the Act, interested persons, such as individual manufacturers, trade associations, and labor unions, regularly prepare and submit employment and earnings data bearing

upon the particular industry that may be involved. Consequently, the confidential information sought may not be necessary for a full and complete disclosure of the facts. It would seem that in any event the application is prematurely submitted since the need for the requested information cannot be accurately assessed at this time.

To be weighed against the need of the applicant for the requested confidential information, is the fact that not only the effectiveness of future BLS wage surveys for use in minimum wage proceedings under the Act, but also the other programs of the BLS, such as its production of monthly figures on employment, hours, and earnings in the non-agricultural economy, is dependent upon the receipt of voluntary responses to questionnaires. See: United States Government Organization Manual, 1961-62, pp. 334-338. It is readily apparent that such responses are not likely to be made if ever the pledge of confidence is violated as is here requested.

Upon the basis of the foregoing, the application is denied.

Signed at Washington, D.C., this 26th day of April, 1962.

W. WILLARD WIEZ,
Acting Secretary of Labor.

FEDERAL AVIATION AGENCY

[14 CFR Part 507]

[Reg. Docket No. 1819]

MARTIN

Proposed Airworthiness Directives

The Federal Aviation Agency has under consideration a proposal to amend Part 507 of the Regulations of the Administrator to include an airworthiness directive for Martin Models 202, 202A, and 440 aircraft. Numerous cracks have been found in the engine mounts on the subject aircraft. In order to correct this unsafe condition, the proposed AD requires inspection of the engine mounts and repair or replacement of any parts found cracked before further flight.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the Federal Aviation Agency, Office of the General Counsel: Attention Rules Docket, Room A-103, 1711 New York Avenue NW., Washington 25, D.C. All communications re-

ceived on or before August 8, 1963, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 (72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423).

In consideration of the foregoing, it is proposed to amend § 507.10(a) of Part 507 (14 CFR Part 507), by adding the following airworthiness directive:

MARTIN. Applies to all Models 202, 202A, and 404 aircraft.

Compliance required as indicated.

Numerous cracks have been discovered in Martin Models 202 (P/N A10100), 202A (P/N A16647-81) and 404 (P/N 404-5000004, and P/N 404-5000005) aircraft engine mounts. To preclude the possibility of engine loss due to this condition, accomplish the following:

(a) Within the next 2,500 hours of time in service after the effective date of this AD, and at intervals thereafter not to exceed 2,500 hours of time in service from the last inspection, inspect the engine mount tubular members and welds for cracks using either X-ray, Magnaflux, dye-penetrant method in conjunction with at least a 10 power magnifying glass, or an FAA approved equivalent method.

(b) If cracks are found, cracked parts shall be repaired in accordance with an FAA approved repair procedure or replaced with an uncracked part having the same part number or with another FAA approved equivalent part, before further flight, except that one flight may be made in accordance with the provisions of CAR 1.76 for the purpose of obtaining these repairs or replacements.

(c) Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA Eastern Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for such operator.

Issued in Washington, D.C., on July 2, 1963.

Acting Director,

Flight Standards Service.

CIVIL AERONAUTICS BOARD

[Docket No. 14625; Order E-19771]

PAN AMERICAN WORLD AIRWAYS, INC., ET AL.

Order of Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of July 1963.

Cargo rates from Hawaiian points to California points by Pan American World Airways, Inc., The Flying Tiger Line Inc., and World Airways, Inc.; Docket No. 14625.

Tariff revisions involving charter rates for the carriage of fresh fruits and vegetables have recently been filed applicable from Hawaiian points to California points, as follows:

1. For World Airways, Inc. (World), \$3,200 per trip in L-1049 and L-1649 equipment to Oakland:

(a) From Honolulu, effective June 23, 1963.

(b) From Hilo or Kahului, to become effective July 7, 1963.

2. For The Flying Tiger Line Inc., (Tiger), \$3,200 per trip in L-1049H aircraft and of \$4,800 in CL-44D aircraft to San Francisco:

(a) From Honolulu, effective June 25, 1963.

(b) From Hilo, to become effective July 25, 1963.

The foregoing rates are similar to certain charter rates of Tiger, World, and The Slick Corporation already under investigation in Dockets 13487 and 14559, except that the latter rates are not restricted to the carriage of fresh fruits and vegetables. The same issues are involved in both sets of rates. Consequently, on the basis of the findings made in the orders of investigation in the foregoing dockets,¹ the Board finds that the rates indicated above may be unjust, unreasonable, unjustly discriminatory, unduly preferential, or unduly prejudicial, and should be investigated.

We are also instituting an investigation of the rates in effect of Pan American World Airways, Inc. (Pan American), on fruits and vegetables from Honolulu to various U.S. West Coast points. This rate, amounting to 8 cents per pound for minimum shipments of 1,100 pounds, is essentially equivalent to the foregoing charter rates we are setting for investigation in that it is at a relatively low level and may be unlawful.

We have concluded not to suspend any of the foregoing proposed rates. The instant proposals are restricted to fresh fruits and vegetables, for which an essentially equivalent rate from Honolulu is already in effect for Pan American. The distance from Honolulu to California points may be greater than from Hilo and Kahului on certain routes;

¹ Order E-18138, adopted March 22, 1962, Order E-18999, adopted November 13, 1962, and Order E-19686, adopted June 12, 1963.

moreover, there have been no complaints.²

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof:

It is ordered that:

1. An investigation be instituted to determine whether the charter charges from Hilo, Hawaii, or Honolulu, Hawaii, to San Francisco, California (Applicable only to Fruits and Vegetables, Fresh), appearing on 9th Revised Page 4-B of The Flying Tiger Line Inc. C.A.B. No. 32, the charter rates from Hilo, Hawaii, Kahului, Hawaii or Honolulu, Hawaii, to Oakland, California (Applicable only to Fruits and Vegetables, Fresh) appearing on 3d Revised Page 15 of World Airways, Incorporated C.A.B. No. 12, and the rates on Fruits and/or Vegetables, Fresh (Commodity Item Number 0007Q) from Honolulu, USA, to Los Angeles, USA, Portland, Oregon, USA, San Francisco, USA, and Seattle, USA, appearing on 6th Revised Page 14-A of Agent R. C. Lounsbury's C.A.B. No. 118, including subsequent revisions and reissues of such rates and charges, are, or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial or otherwise unlawful and if found to be unlawful, to determine and prescribe the lawful rates and charges;

2. The proceeding herein be assigned before an examiner of the Board at a time and place hereafter to be designated;

3. Copies of this order shall be served upon Pan American World Airways, Inc., The Flying Tiger Line Inc., and World Airways, Inc., which are hereby made parties to this proceeding.

This order will be published in the **FEDERAL REGISTER**.

[Docket No. 14624; Order E-19770]

WORLD AIRWAYS, INC.

Order of Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of July 1963.

Cargo charter rates from Hawaiian points to Los Angeles proposed by World Airways, Incorporated; Docket No. 14624.

By tariff revision marked to become effective July 7, 1963, World Airways, Incorporated (World), proposes a cargo charter rate of \$3,200 for L-1649 aircraft, applicable from Hilo, Honolulu, or

² The period allowed in the Board's rules of practice (§ 302.505) has not expired with respect to Tiger's proposal from Hilo. The Board will, of course, consider any timely complaints seeking suspension of this tariff.

Kahului (Hawaii) to Los Angeles, California. No complaints have been filed.

The proposed rate is essentially identical to the rate in effect for World applicable to L-1049 aircraft in the same markets, which the Board set for investigation by Order E-18999, dated November 13, 1962.¹ The two types of aircraft involved have practically the same capacity and essentially the same operating costs. World has presented no justification for its current proposal distinguishing it from the rate for L-1049 aircraft under investigation.

The issues involved in World's current L-1649 filing appear to be essentially identical to those raised when the Board considered the above-mentioned L-1049 rate. Consistent with the findings in the foregoing order and for the same reasons, and upon consideration of all other relevant matters, the Board finds that the tariff proposal may be unjust, unreasonable, unjustly discriminatory, unduly preferential, or unduly prejudicial, and should be investigated.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof:

It is ordered that:

1. An investigation be hereby instituted to determine whether the cargo charter rate of \$3,200.00 for L-1649 aircraft from Hilo, Hawaii, Honolulu, Hawaii, or Kahului, Hawaii, to Los Angeles, California, appearing on 1st Revised Page 15 of World Airways, Incorporated, C.A.B. No. 12, including subsequent revisions and reissues thereof, is, or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful rate;

2. The proceeding ordered herein be assigned for hearing before an examiner of the Board at a time and place hereafter to be designated; and

3. A copy of this order shall be served upon World Airways, Incorporated, which is hereby made a party to this proceeding.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

SUGARCANE WAGES AND PRICES
IN LOUISIANA
Notice of Hearing and Designation of
Presiding Officers**

Pursuant to the authority contained in sections 301(c)(1) and 301(c)(2) of the Sugar Act of 1948, as amended (61 Stat. 929; 7 U.S.C. 1131), and in accordance with the rules of practices and procedure applicable to wage and price proceedings (7 CFR 802.1 et seq.), notice is hereby given that a public hearing will be held in Houma, Louisiana, in the District Court Room, 2nd Floor, Parish

Courthouse, on July 18, 1963, beginning at 10:00 a.m.

The purpose of this hearing is to receive evidence likely to be of assistance to the Secretary of Agriculture in determining (1), pursuant to the provisions of section 301(c)(1) of said Act, fair and reasonable wage rates for persons employed in the harvesting of the 1963 crop of sugarcane, and in the production and cultivation of sugarcane during the calendar year 1964, and (2), pursuant to the provisions of section 301(c)(2) of said Act, fair and reasonable prices for the 1963 crop of sugarcane to be paid, under either purchase or toll agreements, by producers who process sugarcane grown by other producers and who apply for payments under the Act.

NOTICES

In the interest of obtaining the best possible information, all interested persons are requested to appear at the hearing to express their views and present appropriate data in regard to wages and prices. While testimony on all pertinent points is desired, it is especially requested that witnesses be prepared to offer information and recommendations on the following matter regarding fair wages for fieldworkers and fair prices for sugarcane:

I. *Wages.* Elimination of the differential in wage rates between harvesting work and production and cultivation work for tractor drivers.

II. *Prices.* The 1962 crop determination fixed the period October 5, 1962, through February 28, 1963 for determining the season's average price of raw sugar. The same period was established for determining the season's average price of blackstrap molasses. What periods will provide an equitable basis for pricing raw sugar and molasses of the 1963 crop?

The hearing, after being called to order at the time and place mentioned herein, may be continued from day to day within the discretion of the presiding officers and may be adjourned to a later day or to a different place without notice other than the announcement thereof at the hearing by the presiding officers.

Ward S. Stevenson and Charles F. Denny are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearing.

Signed at Washington, D.C., on July 5, 1963.

Take notice that on May 10, 1963, Northern Utilities, Inc. (Applicant), Casper, Wyoming, filed in Docket No. CP63-301 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the transportation and delivery of additional volumes of natural gas for the account of Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska), all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct and operate the following facilities:

(a) Approximately 25 miles of 16-inch main pipeline loop on Applicant's interstate transmission pipeline between Sand Draw Field, Fremont County, Wyoming, and the city of Casper, Natrona County, Wyoming;

(b) A 12-inch meter run at the delivery point to Kansas-Nebraska at the latter's Casper compressor station, replacing the existing 8-inch meter run, and,

The proposed facilities will enable Applicant to deliver a maximum daily volume of 26,000 Mcf* of natural gas which volume Kansas-Nebraska has requested Applicant to transport and deliver pursuant to the transportation agreement, dated August 25, 1962, between the two companies. The application indicates that the subject volumes will be tendered by Kansas-Nebraska to Applicant from producing areas in Fremont and Natrona Counties, Wyoming, and that said volumes will be transported by Applicant and delivered to Kansas-Nebraska for utilization by the latter in its market areas in eastern Wyoming and western Nebraska.

The application shows the estimated cost of the proposed facilities to be \$914,388, which cost will be financed

from cash on hand and obtained from the sale of assets.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on August 6, 1963, at 9:30 a.m., e.d.s.t., in a hearing room of the Federal Power Commission, 441 G. PANHANDLE EASTERN PIPE LINE CO.

Notice of Application to Amend

JULY 1, 1963.

Take notice that on May 24, 1963, Panhandle Eastern Pipe Line Company (Applicant) filed in Docket No. G-19461 an application to amend the Commission's order, issued May 25, 1961, in said docket to renew and extend for one year the certificate authorization granted by said order, all as more fully set forth in the application to amend on file with the Commission and open to public inspection.

The subject order, among other things, authorized Applicant to construct and operate facilities to test and develop by May 25, 1963, the Waverly Storage Field, located in Morgan and Sangamon Counties, Illinois. Applicant was authorized to inject and withdraw up to 6,000,000 Mcf of natural gas.
