

small GLAM and batch file upload

how to use

pattypan

Paweł Marynowski – @Yarl – Wikimedia Polska
WMCEE Meeting 2016, August 27-29, Dilijan, Armenia

project idea

small-to-medium GLAM institutions have digitized a part of their collections, but making the content available online is problematic for them

options these institutions are offered is either to use Upload Wizard, or to set up GLAMWiki Toolset; neither of these tools is perfect for the scale of planned uploads

current alternatives

- Upload Wizard
not designed for GLAM images
- Commonist / VicunaUploader
designed mainly for self-made photographs
- GLAMWiki Toolset
not suitable for small GLAMs

goals to solve

1. **easy to understand and use**
2. **allowing more control over file descriptions**
3. **flexibility in choosing needed fields from templates**
4. **OS X El Capitan / Windows 10 / Ubuntu 16 full support**

execution

- **July 2015: IdeaLab draft**
- **September 2015: IEG grant request**
- **December 2015: grant funded**
- **January-July 2016: development**

demo

how it works

desc	date	nickname
<code>{{en Test desc.}}</code> <code>{{pl Opis testowy.}}</code>	2016-02-14	Lorem
<code>{{en Test desc.}}</code> <code>{{pl Opis testowy.}}</code>	2016-05-20	Ipsum

```
=={{int:filedesc}}==  
{{Information  
|description = ${desc}  
|date = ${date}  
|source = {{own}}  
|author = [[User: ${nickname}]]  
|permission =  
|other versions =  
}}
```

how it works

```
=={{int:filedesc}}==  
{{Information  
  |description = {{en|Test desc.}}  
  |date = 2016-02-14  
  |source = {{own}}  
  |author = [[User:Lorem]]  
  |permission =  
  |other versions =  
  }}  
}}
```

how it works

```
<#if categories ? has_content>
<#list categories ? split(";") as category>
[[Category:${category?trim}]]
</#list>
<#else>{{subst:unc}}
</#if>
```

categories

```
"Cats;Dogs;Turtles"
```

```
[[Category:Cats]]
[[Category:Dogs]]
[[Category:Turtles]]
```

categories

```
""
```

```
{{subst:unc}}
```

plans for future

1. URL file support
2. “smart validation”
3. category validation and autocomplete
4. i18n
5. RTL interface support
6. *.xlsx support
