(6) **Wailing, etc.** From the moment the vital spark was extinguished, the members of the family, especially the females, in the violent style of Oriental grief, burst out into shrill, loud, and doleful lamentations, and were soon joined by their friends and neighbors, who, on hearing of the event, crowded to the house in such numbers that Mark describes it by the term *θόρυβος*, a tumult (v:38). By the better classes, among whom such liberties were not allowed, this duty of sympathizing with the bereaved family was, and still is, performed by a class of females who engaged themselves as professional mourners, and who, seated amid the mourning circle, studied, by vehement sobs and gesticulations, and by singing dirges in which they eulogized the personal qualities or virtuous and benevolent actions of the deceased (Acts ix:39), to stir the source of tears, and give fresh impulse to the grief of the afflicted relatives. Numbers of these singing men and women lamented the death of Josiah (2 Chron. xxxv:25). It is still the practice in the East to

have burials soon over; and there are two instances in sacred history where consignment to the grave followed immediately after decease (Acts v:6, 10).

(7) **Coffins, etc.** Persons of distinction were deposited in coffins. But the most common mode of carrying a corpse to the grave was on a bier or *bed* (2 Sam. iii:31), which in some cases must have been furnished in a costly and elegant style, if, as many learned men conclude from the history of Asa (2 Chron. xvi:14) and of Herod (Josephus, *Antiq.* xvii:8, sec. 3), these royal personages were conveyed to their tombs on their own beds. The bier, however, in use among the common and meaner sort of people was nothing but a plain wooden board, on which, supported by two poles, the body lay, concealed only by a slight coverlet from the view of the attendants. On such a humble vehicle was the widow's son of Nain carried (Luke vii:14), and 'this mode of performing funeral obsequies,' says an intelligent traveler, 'obtains equally in the present day among the Jews, Mohammedans, and Christians of the East.'

(8) **Sepulchers.** Sepulchers were, as they still are in the East,—by a prudential arrangement sadly neglected in our country—situated without the precincts of cities. Among the Jews, in the case of Levitical cities, the distance required to be 2,000 cubits, and in all it was considerable. Nobody was allowed to be buried within the walls, Jerusalem forming the only exception, and even there the privilege was reserved for the royal family of David and a few persons of exalted character (1 Kings ii:10; 2 Kings xiv:20). In the vicinity of this capital were public cemeteries for the general accommodation of the inhabitants, besides a field appropriated to the *burial of strangers*.

(9) **Public Cemeteries.** The style of the public cemeteries around the cities of ancient Palestine in all probability resembled that of the present burying-places of the East, of which Dr. Shaw gives the following description: 'They occupy a large space, a great extent of ground being allotted for the purpose. Each family has a portion of it walled in like a garden, where the bones of its ancestors have remained undisturbed for many generations. For in these inclosures the graves are all distinct and separate; each of them having a stone placed upright, both at the head and feet, inscribed with the name or title of the deceased; whilst the intermediate space is either planted with flowers bordered round with stone, or paved with tiles.'

(10) **Private Sepulchers.** There were other sepulchers which were private property, erected at the expense and for the use of several families in a neighborhood, or provided by individuals as a separate burying-place for themselves. These were situated either in some conspicuous place, as Rachel's on the highway to Bethlehem (Gen. xxxv:19), or in some lonely and sequestered spot, under a wide-spreading tree (Gen. xxxv:8) in a field or a garden. Over garden tombs, especially when the tomb is that of some holy person, lamps are sometimes hung and occasionally lighted. In common cases, sepulchers were formed by digging a small depth into the ground. Over these, which were considered an humble kind of tomb, the wealthy and great often erected small stone buildings, in the form of a house or cupola, to serve as their family sepulcher. These are usually open at the sides, which are of forms such as a traveler in the East has daily occasion to notice. Sometimes, however, these interesting

monuments are built up on all sides, as is the tomb of Rachel; so that the walls are required to be taken down, and a breach made to a certain extent on each successive interment. 'This custom,' says Carne, 'which is of great antiquity, and particularly prevails in the lonely parts of Lebanon, may serve to explain some passages of Scripture. The prophet Samuel was buried in his own house at Ramah, and Joab was buried in his house in the wilderness. These, it is evident, were not their dwelling-houses, but mansions for the dead, or family vaults which they had built within their own policies.' Not unfrequently, however, those who had large establishments, and whose fortunes enabled them to command the assistance of human art and labor, purchased, like Abraham, some of the natural caverns with which Palestine abounded, and converted them by some suitable alterations into family sepulchers; while others with vast pains and expense made excavations in the solid rock (Matt. xxvii:60). These, the entrance to which was either horizontal or by a flight of steps, had their roofs, which were arched with the native stone, so high as to admit persons standing upright, and were very spacious, sometimes being divided into several distinct apartments; in which case the remoter or innermost chambers were dug a little deeper than those that were nearer the entrance, the approach into their darker solitudes being made by another descending stair. Many sepulchers of this description are still found in Palestine. Along the sides of those vast caverns niches were cut, or sometimes shelves ranged one above another, on which were deposited the bodies of the dead, while in others the ground floor of the tomb was raised so as to make different compartments, the lowest place in the family vaults being reserved for the servants. These interior arrangements may be the better understood by the help of the annexed engravings showing the interiors of tombs now actually existing in Palestine. On the next page is shown the interior of the celebrated Tomb of the Kings (so called), near Jerusalem. In it are some further specimens of the

Ground Plans of Sepulchers.

stone sarcophagi already noticed. The mouth of the sepulcher was secured by a huge stone (Matt. xxvii:60; John xi:38). But the entrance-porch, to which the removal of this rude door gave admittance, was so large that several persons could stand in it and view the interior; and hence we read that the women who visited the sepulcher of our Lord, 'entering in, saw a young man sitting, clothed in a long white garment' (Mark xvi:5); and in like manner, in reference to the flight of steps, that Peter 'stooping down, and looking in, saw the linen clothes lying' (John xx:5). Some of the more splendid of these tombs, however, instead of the block of stone, have the porches surmounted with tasteful mason-work, and supported by well-finished colonnades; and as they stand open and exposed, do now, as they did formerly, afford retreats to numbers of vagrants and law-

less characters. The rocky valleys around Jerusalem exhibit numberless specimens of these sepulchral excavations.

Exterior of Sepulcher.

(11) **Monuments.** Monuments of this elegant description were erected to many of the prophets and other holy men who figured as prominent characters in the early history of Israel, and it seems to have been considered, in the degenerate age of our Lord, an act of great piety to repair and ornament with fresh devices the sepulchers of those ancient worthies (Matt. xxiii:29). The art and taste of the times would, of course, expend their chief resources in what was deemed the patriotic service of adding fresh beauty and attraction to edifices which contained such venera-

Front of the Vestibule of the "Tomb of the Kings."

ble and precious dust. But humbler tombs received also some measure of attention, all in the neighborhood of Jerusalem being at certain seasons whitewashed (Matt. xxiii:27). The origin of this prevailing custom is to be traced not so much to a desire of rendering all such objects of interest in the environs of Jerusalem pleasing to the eye, as of making them easily discernible, and so preventing the risk of contracting ceremonial defilement through accident or ignorance, more especially at the annual festivals, when multitudes unacquainted with the localities resorted to the capital. To paint them with white was obviously the best preservative against the apprehended danger; and the season chosen for this garniture of the sepulchers was on the return of spring, a little before the Passover, when, the winter rains being over, a long unbroken tract of dry weather usually ensued. The words of Christ referred to

were spoken but a few days before the Passover, when the fresh coating of white paint would be conspicuous on all the adjoining hills and valleys; and when we consider the striking contrast that must have been presented between the graceful architecture and carefully dressed appearance of these tombs without, and the disgusting relics of

Interior of "Tomb of the Kings."

mortality that were moldering within, we cannot fail to perceive the emphatic energy of the language in which our Lord rebuked the *hypocrisy* of the Pharisees.

(12) **Visits to Tombs.** During the first few weeks after a burial, members of a family, especially the females, paid frequent visits to the tomb. This affecting custom still continues in the East, as groups of women may be seen daily at the graves of their deceased relatives, strewing them with flowers, or pouring over them the tears of fond regret. And hence, in the interesting narrative of the raising of Lazarus, when Mary rose abruptly to meet Jesus, whose approach had been privately announced to her, it was natural for her assembled friends, who were ignorant of her motives, to suppose 'she was going to the grave to weep there' (John xi:31). Bingham, *Orig. Eccles.*, bk. xxiii, ch. ii, iii; Jandon *Ecc. Dict.*, i, 448. R. J.

BURNT-OFFERINGS (bûrnt-ôf'fēr-īngs), (Heb. עֹלָה , *o-law'*, from עָלָה , *aw-law'*, to ascend), sacrifices which owed their Hebrew name to the circumstance that the whole of the offering was to be consumed by fire upon the altar, and to *rise*, as it were, in smoke towards heaven; hence also the term *kalil* (Deut. xxxiii:10; 1 Sam. vii:9; Ps. li:16; Comp. Judg. xx:40); Gr. ὅλοκαύτωμα , *hol-o-kow'-toh-ma*, entire burnt-offering, alluding to the fact that, with the exception of the skin, nothing of the sacrifice came to the share of the officiating priest or priests in the way of emolument, it being *wholly and entirely* consumed by fire.

(1) **Origin.** Such burnt-offerings are among the most ancient, if not the earliest, on scriptural record. We find them already in use in the patriarchal times; hence the opinion of some that *Abel's* offering (Gen. iv:4) was a burnt-offering as regarded the firstlings of his flock, while the pieces of fat which he offered was a thank-offering, just in the manner that Moses afterwards ordained, or rather confirmed from ancient custom (Lev. i. *sq.*). It was a burnt-offering that Noah offered to the Lord after the Deluge (Gen. viii:20).

(2) **Material.** Only oxen, male sheep or goats, or turtledoves and young pigeons, all without blemish, were fit for burnt-offerings. The offerer, in person, was obliged to carry this sacrifice

first of all into the fore-court, as far as the gate of the tabernacle or temple, where the animal was examined by the officiating priest to ascertain that it was without blemish.

(3) **Ceremonies.** The offerer then laid his hand upon the victim, confessing his sins, and dedicated it as his sacrifice to propitiate the Almighty. The animal was then killed (which might be done by the offerer himself) towards the north of the altar (Lev. i:11), in allusion, as the Talmud alleges, to the coming of inclement weather (typical of the Divine wrath) from the northern quarter of the heavens. After this began the ceremony of taking up the blood and sprinkling it *around* the altar, that is, upon the lower part of the altar, not immediately upon it, lest it should extinguish the fire thereon (Lev. iii:2; Deut. xii:27; 2 Chron. xxix:22). The next act was the skinning or flaying of the animal, and the cutting of it into pieces, actions which the offerer himself was allowed to perform (Lev. i:6). The skin alone belonged to the officiating priest (Lev. vii:8). The dissection of the animal began with the head, legs, etc., and it was divided into twelve pieces. The priest then took the right shoulder, breast, and entrails, and placing them in the hands of the offerer, he put his own hands beneath those of the former, and thus waved the sacrifice up and down several times in acknowledgment of the all-powerful presence of God (Tract *Cholin*, i:3). The officiating priest then retraced his steps to the altar, placed the wood upon it in the form of a cross, and lighted the fire. The entrails and legs being cleansed with water the separated pieces were placed together upon the altar in the form of a slain animal. Poor people were allowed to bring a turtle-dove or a young pigeon as a burnt-offering, these birds being very common and cheap in Palestine (Maimonides, *Morch Nevochim*, iii:46). With regard to these latter, nothing is said about the sex, whether they were to be males or females. The mode of killing them was by nipping off the head with the nails of the hand.

(a) *Standing public burnt-offerings* were those used daily morning and evening (Num. xxviii:3; Exod. xxix:38), and on the three great festivals (Lev. xxiii:37; Num. xxviii:11-27; xxix:2-22; Lev. xvi:3; comp. 2 Chron. xxxv:12-16).

(b) *Private and occasional burnt-offerings* were those brought by women rising from childbed (Lev. xii:6); those brought by persons cured of leprosy (*ib.* xiv:19-22); those brought by persons cleansed from issue (*ib.* xv:14, *sq.*); and those brought by the Nazarites when rendered unclean by having come in contact with a dead body (Num. vi:9), or after the days of their separation were fulfilled (*ib.* vi:14).

(c) Nor were the burnt-offerings confined to these cases alone; we find them in use almost on all important occasions, events, and solemnities, whether private or public, and often in very large numbers (comp. Judg. xx:26; 1 Sam. vii:9; 2 Chron. xxxi:2; 1 Kings iii:4; 1 Chron. xxix:21; 2 Chron. xxix:21; Ezra vi:17; viii:35). Heathen also were allowed to offer burnt-offerings in the temple, and Augustus gave orders to sacrifice for him every day in the temple at Jerusalem a burnt-offering, consisting of two lambs and one ox (Philo, *Opp.* ii, p. 592; Joseph, *De Bell. Jud.* ii:17, 2).

E. M.

BUSH (bush), (Heb. **בִּשְׁמֵ**, *sen-eh'*, bramble).

This occurs only in the passages referring to Jehovah's appearance to Moses (Ex. iii:2-4; Deut. xxxiii:16). The Sept. renders it

βᾶτος, *bramble bush*; which is the same word found Luke xx:37; Acts vii:35, and Luke vi:44. In the last case it is correctly rendered "bramble bush."

Figurative. The *bush burning* and *not consumed*, which Moses saw near Mount Horeb, represented our earthly nature united to the Son of God, inflamed with the fire of Divine punishment, and yet not consumed, but supported and refreshed; and the Hebrew nation in the fire of Egyptian cruelty, and the church in the fire of persecution and distress, and yet not in the least injured, because of the good will and favor of him that dwelt, i. e., appeared in the bush (Exod. iii:2,4; Acts vii:30,35; Deut. xxxiii:16). (Brown).

BUSHEL (bush'el), is used in the Auth. Vers to express the Greek **μῦδιος**, *mo'dee-os*; Latin *modius*; a dry measure of about a peck (Matt. v:15; Mark iv:21). (See WEIGHTS AND MEASURES).

BUTTER (büt'tēr), (Heb. **חֵמֶת**, *khem-aw'*; Sept. **βούτυρον**, *butyrum*, curdled milk, as distinguished from **חָלָב**, *kharw-lawb'*, fresh milk; hence, *curds*, *butter*, and in one place probably *cheese*), the oily part of milk.

Calmet, with others, supposes the butter of Scripture to be the same with cream among the eastern nations; but it is plain from Prov. xxx:33, that it was brought forth by churning; but whether in a skin, as is the custom at present among the Moors and Arabs, or otherwise, we know not. It was late ere the Greeks knew anything of butter. Their ancient poets, who speak of milk and cheese, make no mention of butter. Among the Romans it would appear that butter was employed more as a medicine than ordinary food.

Thomson, *Land and Book*, says that neither the ancient nor the modern Orientals have made butter in our sense of the word. The butter given to Sisera by Jael was sour milk, called in Arabic *leben*. The butter, so called, of Prov. xxx:33 is a production made in this way. A bottle formed by stripping off the entire skin of a young buffalo is filled with milk and then perseveringly kneaded or shaken by women. Then the contents are taken out, boiled or melted, and put into bottles of goats' skins. In winter it resembles candied honey, and in summer is mere oil.

Figurative. (1) To *wash one's steps with butter* is to enjoy great and delightful prosperity (Job xxix:6). This passage is sufficiently indicative of the state in which butter exists in a tropical climate—Job could not have washed his steps with a solid. (2) Flattering speech is *smoother than butter*, is apparently very soft and agreeable (Ps. lv:21).

BUTZ (bütz). See BYSSUS.

BUZ (büz), (Heb. **בּוּז**, *booz*, contempt).

1. Son of Nahor and Milcah, and brother of Huz (Gen. xxii:21).

Elihu, one of Job's friends, who is distinguished as an Aramæan or Syrian (Job xxxii:2), was doubtless descended from this Buz. Judgments are denounced upon the tribe of Buz by Jeremiah (xxv:23); and from the context this tribe appears to have been located in Arabia Deserta, B. C. 2050.

2. The father of Jahdo of the tribe of Gad (1 Chron. v:14), B. C. before 1093.

3. The tribe of Buz being mentioned along with Dedan and Tema, seems to be located in Arabia Petræa, and it is possible that in early times it had migrated thither from Mesopotamia. The passage in Jer. xxv:23, reads: "Dedan, and Tema, and Buz, and all that are in the utmost

corners." Orelli (*Com.*) renders, "all with clipped temple" (*Comp.* ix:26); and adds, "The meaning is, that they shaved the chief hair all round, leaving only a tuft in the middle."

BUZI (bū'zī), (Heb. בּוּזִי, *boo-zee'*, a Buzite), father of the prophet Ezekiel (*Ezek.* i:3), who must have been a priest, since the son was (B. C. before 598).

Of the man himself nothing is known. Jewish writers were led to identify him with Jeremiah, partly by a supposed connection of the name with a verb meaning 'despise,' and partly by a theory that when the father of a prophet is named it is to be understood that he also was a prophet.

BUZITE (büz'ite), (Heb. בּוּזִי, *boo-zee'*), a term indicating the ancestry of Elihu, only found in *Job* xxxii:6, "Elihu the son of Barache', the Buzite;" to which verse 2 adds, "of the kindred of Ram." In *Gen.* xxii:21 Buz is son of Nahor and uncle of Aram and a relative of Abraham.

BY AND BY (bī and bī), (Gr. ἑξαιτίας, *ex-aw-tace'*, *Mark* vi:25), at once. "Give me by and by in a charger the head of John the Baptist;" R. V., "forthwith." (Gr. εὐθύς, *yoo-thus'*, *Matt.* xiii:21; R. V., "straightway.")

BYWAYS (bī'wāz'), (Heb. אֲרָחַי, *o'rakh*, way, and עֲקָלְקָלִים, *ak-al-kal'*, crooked). It is recorded (*Judg.* v:6) that "in the days of Shamgar . . . the highways were unoccupied and the travelers walked through *byways*" (*crooked ways* in the marg.). These byways were paths and winding routes which turned away from the high roads.

BYWORD (bī-wūrd'), the rendering of the following Hebrew words: מִלָּה, *mil-leh'*, word, discourse, *Job* xxx:9; מִשָּׁל, *maw-shawl'*, proverb, *Ps.* xlv:14, and מִשָּׁל, *mesh-ol'*, *Job* xvii:6; שֶׁנִּינָה, *shen-ee-naw'*, sharp, and so a *taunt*, *Deut.* xxviii:37; *1 Kings* ix:7; *2 Chron.* vii:20; *Jer.* xxiv:9).

BYSSUS (bÿs'sus).

(1) The Greek word βύσσος, *bÿs'sos*, fine linen, occurs in *Luke* xvi:19, where the rich man is described as being clothed in purple and *fine linen* and also in *Rev.* xviii:12, 16, and xix:8, 14, among the

merchandise, the loss of which would be mourned for by the merchants trading with the mystical Babylon.

But it is by many authors still considered uncertain whether this byssus was of *flax* or *cotton*. Reference has been made to this article both from *bad* and *butz*, and might be also from *shesh*. For, as Rosenmüller says: 'The Hebrew word *shesh*, which occurs thirty times in the two first books of the Pentateuch (*v.* *SHESH*, and *Celsius*, ii, p. 259), is in these places, as well as in *Prov.* xxxi:22, by the Greek Alexandrian translators, interpreted *byssus*, which denotes Egyptian cotton, and also the cotton cloth made from it. In the later writings of the Old Testament, as for example, in the *Chronicles*, the book of *Esther*, and *Ezekiel*, *buz* is commonly used instead of *shesh*, as an expression for cotton cloth.'

(2) "The Heb. *bad* occurs in numerous passages of Scripture, as *Exod.* xxviii:42, and xxxix:29; *Lev.* vi:10; xvi:4, 23, 32; *1 Sam.* ii:18; xxii:18; *2 Sam.* vi:14; *1 Chron.* xv:27; *Ezek.* ix:2, 3, 11; x:2, 6, 7; *Dan.* x:5; xii:7. In all these places the word *linen* is used in the Authorized Version, and Rosenmüller (*Botany of the Bible*, p. 175) says, 'The official garments of Hebrew, as well as of Egyptian priests, were made of linen, in Hebrew *bad*.' *Butz* or *buz* occurs in *1 Chron.* iv:21; xv:27; *2 Chron.* ii:14; iii:14; v:12; *Esther* i:6; viii:15; *Ezek.* xxvii:16; and in these passages in the Authorized Version it is rendered *fine linen* and *white linen*.

(3) Mr. Harmer has justly observed that there were various sorts of linen cloth in the days of antiquity; for little copious as the Hebrew language is, there are no fewer than four different words, at least, which have been rendered 'linen,' or 'fine linen,' by our translators." These words are, *bad*, *butz*, *pishet*, and *shesh*. To which may be added *carpas* or *karpas*, and as Dr. Harris suggests, *sadin* and *seethun*. But as it will be more satisfactory, in the midst of so many uncertainties, to proceed from the known to the unknown, and from a knowledge of things to the names by which they were in early times indicated, so it will be desirable in this work to treat of the different substances employed for clothing, under the heads of COTTON, FLAX, and HEMP, as well as under SILK and WOOL.

J. F. R.

C

CAB (kăb), (Heb. קַב, *kab*), a measure mentioned in 2 Kings vi:25. The Rabbins make it the sixth part of a *seah* or *satum*, and the eighteenth part of an ephah, or the one hundred and eightieth part of a homer. In that case a cab contained three and one-third pints of our wine measure, or two and five-sixths pints of English corn measure.

CABBALAH (kăb'â-lâ). See KABBALAH.

CABBON (kăb'bôn), (Heb. קַבּוֹן, *kab-bone'*; Sept. Καββα, circle, hamlet, hilly), a town in the low country (*Shefelah*) of Judah (Josh. xv:40), which is only once mentioned, perhaps identical with Machbenah (1 Chron. ii:49). Three places have been suggested as its site—*el-Kufeir*, ten miles southeast of Ashkelon; *el-Kubeibeh*, near *Beit Jibrin*; and *Abu Kabas*. Davis' *Bib. Dict.* says: Perhaps identical with Machbenah (1 Chron. ii:49). The radical letters are the same and the location is suitable.

CABIN (kăb'in), (Heb. קַבִּיט, *k'haw-nooth'*, vault, a cell).

In the East the prison often consisted of a pit (dungeon), with vaulted cells around it for the separate confinement of prisoners (Jer. xxxvii:16). The idea conveyed is that the prophet suffered the most severe and loathsome imprisonment.

CABUL (kâ-bûl'), (Heb. קַבּוּל, *kaw-bool'*, meaning uncertain, perhaps sterile or worthless).

1. A district given to Hiram, King of Tyre, by Solomon, in acknowledgment of the important services which he had rendered toward the building of the Temple (1 Kings ix:13).

Hiram was by no means pleased with the gift, and the district received the name of Cabul (*unpleasing*) from this circumstance. The situation of Cabul has been disputed, but we are content to accept the information of Josephus (*Antiq.* viii:5, 3), who seems to place it in the northwest part of Galilee, adjacent to Tyre. In Galilee it is also placed by the Septuagint. There was a town named Cabul in the tribe of Zebulun (Josh. xix:27), and as it was in Galilee it is possible that it was one of the twenty towns consigned to Hiram, who, to mark his dissatisfaction, applied the significant name of this one town to the whole district. The cause of Hiram's dislike to what Solomon doubtless considered a liberal gift is very uncertain. It has been conjectured (*Pictorial Bible*, note on 1 Kings ix:13) that 'probably, as the Phœnicians were a maritime and commercial people, Hiram wished rather for a part of the coast, which was now in the hands of Solomon, and was not therefore prepared to approve of a district which might have been of considerable value in the eyes of an agricultural people like the Hebrews. Perhaps the towns were in part payment of what Solomon owed Hiram for his various services and contributions.'

2. A town of Asher (Josh. xix:27). It is still known as Kabul, a village nine miles east-southeast of Acre.

CÆSAR (çæ'zar), (Gr. Καῖσαρ, *kai'zar*), a name assumed by, or conferred upon, all the Roman emperors after Julius Cæsar. In this way it be-

came a sort of title like Pharaoh, and, as such, is usually applied to the emperors about thirty times in the New Testament, without their distinctive proper names. (See AUGUSTUS.)

This name was adopted by Octavius, subsequently known as Augustus, after the death of his uncle Julius Cæsar, and passed on to his successors as the official designation of the Roman emperors until the third century A. D., when it came to be used for the junior partners in the government in distinction from the title Augustus, which was reserved for the supreme rulers. No name was ready at hand to describe the unique office of the real autocrat in a nominal republic. While the word 'king' was hated at Rome on account of its associations with the legendary history of the city, and despised by the victorious generals who were familiar with it as the title of defeated Oriental rulers, the fame of Julius Cæsar suggested the use of his name by his heir.

The following Cæsars fall within New Testament times:

Augustus	B.C. 31-A.D. 14.
Tiberius	A.D. 14-37.
Caius (Caligula)	" 37-41.
Claudius	" 41-54.
Nero	" 54-68.
Galba	" 68-69.
Otho	" 69.
Vitellius	" 69.
Vespasian	" 69-79.
Titus	" 79-81.
Domitian	81-96.

(W. F. Adeney, *Hastings' Bib. Dict.*)

The Cæsars mentioned in the New Testament are Augustus (Luke ii:1), Tiberius (Luke iii:1; xx:22), Claudius (Acts xi:28), Nero (Acts xxv:8); Caligula, who succeeded Tiberius, is not mentioned.

CÆSAREA (çæs'a-rē'à), (Gr. Καισάρεια, *kaesar'ia*, in honor of *Cæsar*). There were two important towns in Palestine thus named in compliment to Roman emperors.

(1) **Cæsarea Palestina**, or Cæsarea of Palestine, so called to distinguish it from the other Cæsarea, or simply Cæsarea, without addition, from its eminence as the Roman metropolis of Palestine and the residence of the procurator. It was built by Herod the Great, with much of beauty and convenience, twenty-two years before the birth of Christ, on a spot where had formerly stood a tower called Straton's Tower.

The whole coast of Palestine may be said to be extremely inhospitable, exposed as it is to the fury of the western storms, with no natural port affording adequate shelter to the vessels resorting to it. To remedy this defect, Herod, who, though an arbitrary tyrant, did much for the improvement of Judæa, set about erecting, at immense cost and labor, one of the most stupendous works of antiquity. He threw out a semicircular mole, which protected the port of Cæsarea on the south and west, leaving only a sufficient opening for vessels to enter from the north, so that, within the enclosed space, a fleet might ride at all weathers in perfect security. The mole was constructed of immense blocks of stone brought from a great

distance, and sunk to the depth of twenty fathoms in the sea.

Besides this Herod added many splendid buildings to the city, among which was a temple, dedicated to Cæsar, a theater, and an amphitheater, and when the whole was finished, which was within twelve years from the commencement of the undertaking, he fixed his residence there, and thus elevated the city to the rank of the civil and military capital of Judæa, which rank it continued to enjoy as long as the country remained a province of the Roman empire (Joseph. *Antiq.* xv:9, etc. See Dr. Mansford, *Script. Gazetteer*). Vespasian raised Cæsarea to the rank of a Roman colony, granting it, first, exemption from the capitation tax, and afterwards, from the ground taxes.

Cæsarea is the scene of several interesting circumstances described in the New Testament, such as the conversion of Cornelius, the first fruits of

first acts of that war was the massacre of all the Jewish inhabitants by the Gentiles, to the number of 20,000 (Joseph. *u. s.* ii:18, 1).

Cæsarea is almost thirty-five miles north of Joppa or Jaffa, and fifty-five miles from Jerusalem. It still retains the ancient name in the form of Kaiseraih, but has long been desolate. The most conspicuous ruin is that of an old castle, at the extremity of the ancient mole. A great extent of ground is covered by the remains of the city. A low wall of grey-stone encompasses these ruins, and without this is a moat now dry. Between the accumulation of rubbish and the growth of long grass it is difficult to define the form and nature of the various ruins thus enclosed. Nevertheless, the remains of two aqueducts, running north and south, are still visible. The one next the sea is carried on high arches; the lower one, to the eastward, carries its waters along a low wall, in an arched channel, five or six

Cæsarea.

the Gentiles (Acts x); the residence of Philip the Evangelist (Acts xxi:8); the journey thither of St. Paul; his pleading there before Felix; his imprisonment for two years, and his final pleading before Festus and King Agrippa (Acts xxiv). It was here also, in the amphitheater built by his father, that Herod Agrippa was smitten of God and died (Acts xii:21-23).

It seems there was a standing dispute between the Jewish and Gentile inhabitants of Cæsarea as to which of them the city really belonged. The former claimed it as having been built by a Jew, meaning King Herod; the latter admitted this, but contended that he built it for them and not for Jews, seeing that he had filled it with statues and temples of their gods, which the latter abominated (Joseph. *De Bell. Jud.* ii:13, 7). This quarrel sometimes came to blows, and eventually the matter was referred to the emperor Nero, whose decision in favor of the Gentiles, and the behavior of the latter thereupon, gave deep offense to the Jews generally, and afforded occasion for the first outbreaks, which led to the war with the Romans (Joseph. *De Bell. Jud.* ii:14). One of the

feet wide. The water is abundant and of excellent quality, and the small vessels of the country often put in here to take in their supplies. Cæsarea is, apparently, never frequented for any other purpose; even the high-road leaves it wide, and it has been visited by very few of the numerous travelers in Palestine.

(2) **Cæsarea Philippi.** Towards the springs of the Jordan, and near the foot of Isbel Shrik, or the Prince's Mount, a lofty branch of Lebanon, forming in that direction the boundary between Palestine and Syria Proper, stands a city originally called Baniass, which has erroneously been considered by many to be the Laish captured by the Danites, and by them called Dan (Judg. xviii:7-29). But it appears from the testimony of both Eusebius and Jerome that they were then separate and distinct cities, situated at the distance of four miles from each other. This city, which was in later times much enlarged and beautified by Philip the tetrarch, who called it Cæsarea in honor of Tiberius the emperor, adding the cognomen of Philippi to distinguish it from Cæsarea of Palestine, lay about 120 miles north

from Jerusalem and a day and a half's journey from Damascus (Matt. xvi:13; Mark viii:27). Herod Agrippa also bestowed upon it a considerable share of attention, still further extending and embellishing it. In compliment to the emperor, Nero, its name was afterwards changed to Neronias, and Titus, after the overthrow of Jerusalem, exhibited some public games here, in which the Jewish prisoners were compelled to fight like gladiators, and numbers perished in the inhuman contests. Under the Christians it was erected into a bishopric of Phœnicia. During the Crusades it was the scene of various changes and conflicts. It first came into the possession of the Christians in 1129, along with the fortress on the adjacent mountain, being delivered over to them by its Israelite governor, after their unsuccessful attempt upon Damascus in behalf of that sect. It has now resumed its original name of Bâniâs, which is the Arabic pronunciation of the Paneas of the Greeks and Romans.

Bâniâs has now dwindled into a paltry and insignificant village, whose mean and destitute condition contrasts strikingly with the rich and luxuriant character of the surrounding country. It is said that many remains of ancient architecture are found in the neighborhood, bearing testimony to the former grandeur of the place, although it is difficult to trace the site of the splendid temple erected here in honor of Augustus. The ruins of the castle of Bâniâs, which appears to have been a work of the Saracens, crown the summit of the adjoining mountain, and display a wall 10 feet in thickness, by which the fortress was defended.

CÆSAR'S HOUSEHOLD (Phil. iv:22) was Paul's phrase for the servants and dependants in the palace of the Roman emperor, some of whom were converts.

It is unlikely that any members of the imperial family are meant, although the expression (as Lightfoot remarks) "might include equally the highest functionaries and the lowest menials."

CAGE (kāj), (Heb. כֶּלִּי, *kel-oob'*). The term so translated in Jer. v:27 is more properly a *trap* (*παγίς*, *decipula*), in which decoy birds were placed; the same article is referred to in Ecclus. xi:30 under the term *kar'tal-los*, which is elsewhere used of a tapering basket. In Rev. xviii:2 the Greek term is *phu-la-kay'*, meaning a prison or restricted habitation rather than a cage.

Figurative. Figuratively a cage is a receptacle, as in Jer. v:27, where wicked men's houses are represented as filled with deceit, and what is thereby obtained, as a cage is with birds. The Antichristian state is a "cage of every unclean and hateful bird;" is full of abominable persons, offices, officers, doctrines and customs (Rev. xviii:2).

CAIAPHAS (kā'ia-phas), (Gr. Καϊάφας, *kah-ee-af'as*, depression), called by Josephus (*Antiq.* xviii, sec. 2) Joseph Caiaphas, was high-priest of the Jews in the reign of Tiberius Cæsar (Luke iii:2; Matt. xxvi:3, 57; John xi:49; xviii:13, 14, 24, 28; Acts iv:6).

We learn from Josephus that he succeeded Simon the son of Camith (about A. D. 27 or 28), and held the office nine years, when he was deposed. His wife was the daughter of Annas, or Ananus, who had formerly been high priest, and who still possessed great influence and control in sacerdotal matters, several of his family successively holding the high-priesthood. The names of Annas and Caiaphas are coupled by Luke—"Annas and Caiaphas being the high-priests;" and

this has given occasion to no small amount of discussion. Some maintain that Annas and Caiaphas then discharged the functions of the high-priesthood by turns; but this is not reconcilable with the statement of Josephus.

Kuinoël and others consider it as the more probable opinion that Caiaphas was the high-priest, but that Annas was his vicar or deputy, called in the Hebrew, *sagan*. In fact, the very appellation of high-priest is given to a *sagan* by Josephus (*Antiq.* xvii:6, 4). See the commentators on Luke iii:2, particularly Hammond, Lightfoot, Kuinoël and Bloomfield.

Caiaphas is the high-priest who rent his clothes and declared Jesus to be worthy of death. When Judas had betrayed him, our Lord was first taken to Annas, who sent him to Caiaphas (John xviii:13), who, perhaps, abode in another part of the same palace. What became of Caiaphas after his deposition in A. D. 38 is not known.

CAIN (kāin), (Heb. קַיִן, *kah'yin*, a lance).

1. The eldest son of Adam and Eve (Gen. iv:1).

(1) Derivation. The derivation of this word is disputed. Most writers trace it to קַיִן, or *kah'yin*, *Káiv* acquisition (Gen. iv:1). Others derive it from a word meaning *a spear*, as indicative of the violence used by Cain, or from the Arabic *Kayn*, a smith, in reference to the arts introduced by the Cainites; but some derive it from a verb signifying *to lament*, and others from a verb of similar sound, signifying *to envy*. Both Eusebius and Chrysostom seem to support the last interpretation, but the best Hebrew authorities are on the side of that first named.

Abounding as the Scriptures do with proofs of human guilt, and filled yet more as are the secular annals of the world with instances of crime, none impress the mind with a stronger feeling of horror than that of Cain.

(2) Sacrifice. It is easy to understand how the passion of envy or jealousy wrought in the heart of the offender, but some degree of mystery attends the immediate origin of his crime. Abel, it appears, brought two offerings, the one an oblation, the other a sacrifice. Cain brought but the former—a mere acknowledgment, it is supposed, of the sovereignty of God; neglecting to offer the sacrifice which would have been a confession of fallen nature, and, typically, an atonement for sin. It was not, therefore, the mere difference of feeling with which the two offerings were brought which constituted the virtue of the one or the guilt of the other brother. God's righteous indignation against sin had been plainly revealed, and there can be no doubt that the means of safety, of reconciliation and atonement, were as plainly made known to Adam and his offspring. The refusal therefore, of the sacrifice was a virtual denial of God's right to condemn the sinner, and at the same time a proud rejection of the proffered means of grace.

(3) Murder and Punishment. The punishment which attended the murder of his brother Abel was such as could only be inflicted by an Almighty avenger. It admitted of no escape, scarcely of any conceivable alleviation. Cursed from the earth himself, the earth was doomed to a double barrenness wherever the offender should set his foot. Not like his father, sentenced merely to gather his food from the unwilling ground, bearing herbs, though thorns sprung up along with them, for him it was not to yield its strength; it was to be as without life beneath him.

By the statement that 'Cain went out from the presence of the Lord' probability is given to the conjecture which represents him as abiding, till thus exiled, in some favored spot where the Almighty still, by visible signs, manifested Himself to his fallen creatures. The expression of dread lest, as he wandered over the face of the earth, he might be recognized and slain, has an awful sound when falling from the mouth of a murderer. But he was to be protected against the wrath of his fellow-men; and of this God gave him assurance, not, says Shuckford, by setting a mark upon him, which is a false translation, but by appointing a sign or token which he himself might understand as a proof that he should not perish by the hand of another, as Abel had perished by his.

The many problems raised by the narrative were a fertile theme for the Jewish rabbis. The tradition that Cain was slain by an arrow from the bow of Lamech, who mistook him for a wild beast, and thereafter killed his youthful son who had misled him, is a fanciful structure reared by the same hands on the foundation of Lamech's wild song.—W. P. Paterson, *Hastings' Bib. Dict.*

(4) **Land of Nod.** It may be worthy of observation that especial mention is made of the fact that Cain, having traveled into the Land of Nod, there built a city; and, further, that his descendants were chiefly celebrated for their skill in the arts of social life. In both accounts may probably be discovered the powerful struggle with which Cain strove to overcome the difficulties which attended his position as one to whom the tillage of the ground was virtually prohibited.

(5) **The New Testament References** to Cain are Heb. xi:4, where it is recorded: 'By faith Abel offered unto God a more excellent sacrifice than Cain' (1 John iii:12; Jude 11). (See ABEL.)

2. One of the cities in the low country of Judah, mentioned with Zanoah and Gibeah (Josh. xv:57).

3. The people mentioned in Balaam's prophecy as *Kenite* is in Hebrew called *Kain*, *kah'yin*, identical with *Cain*.

CAINAN (ka-i'nan), (Heb. כַּיִן נָאֵן, *kee-nawn'*, possessor); correctly written Kenan in 1 Chron. i:2.

1. Son of Enos and father of Mahalaleel (Gen. v:9-14; 1 Chron. i:2).

2. Son of Arphaxad, the son of Shem, and father of Salah.

His name is wanting in the present copies of the Hebrew Scriptures, but is found in the Septuagint version of Gen. x:24; xi:12, and in Luke iii:36. As the addition of his generation of 130 years in the series of names is of great chronological importance, and is one of the circumstances which render the Septuagint computation of time longer than the Hebrew, this matter has engaged much attention and has led to great discussion among chronologists. Some have suggested that the Jews purposely excluded the second Cainan from their copies, with the design of rendering the Septuagint and Luke suspected; others, that Moses omitted Cainan, being desirous of reckoning ten generations only from Adam to Noah, and from Noah to Abraham. Some suppose that Arphaxad was father of Cainan and Salah, of Salah naturally and of Cainan legally; while others allege that Cainan and Salah were the same person, under two names. It is believed by many, however, that the name of this second Cainan was not originally in the text of Luke, but is an addition of inadvertent transcribers who, remarking it in some copies of the Septuagint, added it (Kuinoël, *ad Luc.* iii:36).

Upon the whole, the balance of critical opinion is in favor of the rejection of this second Cainan. Some of the grounds for this conclusion are: (1) That the Hebrew and Samaritan, with all the ancient versions and targums, concur in the omission; (2) that the Septuagint is not consistent with itself, for in the repetition of genealogies in 1 Chron. i:24 it omits Cainan and agrees with the Hebrew text; (3) that the second Cainan is silently rejected by Josephus, by Philo, by John of Antioch and by Eusebius; and that, while Origen retained the name itself, he, in his copy of the Septuagint, marked it with an obelisk as an unauthorized reading.

CAIUS CALIGULA (ka'yus ka-līg'u-la), emperor of Rome, succeeded Tiberius (A. D. 37), and reigned three years, nine months and twenty-eight days.

It does not appear that he molested the Christians. Caius having commanded Petronius, governor of Syria, to place his statue in the temple at Jerusalem, for the purpose of adoration, the Jews so vigorously opposed it that, fearing a sedition, he suspended the order. He was killed by Chæreas, one of his guards, while coming out of the theatre (A. D. 41), in the fourth year of his reign, and was succeeded by Claudius. He is not mentioned in the New Testament.

CAKE (kāk). Cake is represented by several Hebrew words. (See BREAD.)

CALAH (kā'lah), (Heb. כַּלַּח, *keh-lakh'*, old age), or rather Calach, a city of Assyria, built by Ashur or Nimrod (the phrase in Gen. x:11, 12 being ambiguous).

It was at some distance from Nineveh, the City of Resen lying between them. Most writers concur in placing it on the Great Zab (the ancient Lycus) not far from its junction with the Tigris, and Resen is placed higher up on the same river, so as to be between it and Nineveh. There is a trace of this name in Calachene, which Strabo describes as a province of Assyria, lying between the source of the Lycus and the Tigris. Many suppose that this Calah is the same as the Chalach (*Auth. Vers.*, Halah) in 1 Kings xviii:6; xvii:11, whither Salmanassar transplanted a colony of Israelites, but there are good reasons assigned under another head (see HALAH) for disputing this conjecture.

CALAMUS (kal'ā-mūs), (Heb. קַלָּמֹס, *kalw-neh'*, a reed, cane).

An aromatic reed, which grows to the height of about two feet, with a knotted or jointed stalk, which is filled with a soft pith. It is in this pith that the aroma or flavor resides. Even when growing the calamus scents the air, and when the reed is cut down, dried and powdered, it forms an ingredient in the sweetest and richest perfumes. There are several species of the genus calamus. The sweet cane is *the Calamus aromaticus*, and is a native of Syria, Egypt, Judea, Samatra and other places. It is called ratany in commercial language. It was a part of the Tyrian trade with the Grecians and Danites (Ezek. xxvii:19), and an ingredient of the Jewish sacred perfume (Exod. xxx:23).

CALCOL (kāl'köl), (Heb. כַּלְכֹּל, *kal-kol'*, sustaining), a man of Judah, son or descendants of Zerah (1 Chron. ii:6). Probably identical with Chalcol, son of Mahol, one of the four wise men whom Solomon excelled in wisdom (1 Kings iv:31), B. C. 1010.

CALDRON (kal'drūn). Several Hebrew words are thus translated, all meaning a vessel for boil-

ing flesh, either for domestic or ceremonial purposes (1 Sam. ii:14; 2 Chron. xxxv:13; Job xli:20; Jer. lii:18, 19; Ezek. xi:3, 7). Metallic vessels of this kind have been found in Egypt and Nimroud.

CALEB (kā'lēb), (Heb. כָּלֵב, *karw-labe'*, dog).

1. Son of Jephunneh, of the tribe of Judah. He was sent with Joshua and others to explore the land of Canaan, and in consequence of his joining with Joshua in opposing the discouraging accounts brought back by the other spies, they were both specially exempted from the decree of death which was pronounced on the generation to which they belonged (Num. xiii:6; xiv:6, 24, 38). When the land of Canaan had been invaded and partly conquered, Caleb was privileged to choose Kirjatharba, or Hebron, and its neighborhood, for his possession (Josh. xiv:6-15). He accordingly went and wrested it from the native inhabitants, and thence proceeded to Debir, which was taken for him by his nephew, Othniel, who, as his reward, received in marriage the hand of Caleb's daughter (see **ACHSAH**), with a valuable dower (Josh. xv:13-19). Caleb is usually supposed to have outlived Joshua (B. C. 1600).

2. According to 1 Chron. ii:18, 19, 42, 49, 50, the son of Hezron, son of Pharez, son of Judah, and the father of Hur by Ephrath, and consequently grandfather of Caleb the spy. But from the manifest corruptions of the text and the evident confusion between the two Calebs at verse 49, and from the non-appearance of this elder Caleb anywhere except in this genealogy drawn up in Hezekiah's reign, it is impossible to speak with confidence of his relations or even of his existence (B. C. 1530-1430).

3. Caleb-Ephrath. According to the text of 1 Chron. ii:24, the name of the place where Hezron died, but the reading of Jerome's Hebrew Bible, "Caleb came in unto Ephrath" is probably the true one, as no such place is elsewhere heard of. Ephrath or Ephratah, was a second wife, married after Hezron's death (B. C. 1856).

4. "The south of Caleb" is that portion of the Negeb occupied by Caleb and his descendants (1 Sam. xxx:14). It is probably to be identified with the extensive basin between Hebron and the ancient Carmel of Judah, where Caleb's descendant Nabal dwelt.

CALEB-EPHRATAH (kā'leb ēph'ra-tah), (Heb. כָּלֵב אֶפְרַתָּה, *karw-labe' ef-raw'thaw*), only in 1 Chron. ii:24. (See **CALEB** 3).

CALENDAR (kāl'ēn-dēr), (Latin *calendarium*, from *calere*, to *call*, because the priests *called* the people to notice that it was new moon. (See **HOURS**; **DAYS**; **YEAR**; **WATCHES**, and **JEWISH CALENDAR**; in Appendix.)

CALF (kāf), (Heb. עֵיִל, *ay'ghel*), is mentioned in several places, but, not requiring a zoölogical explanation, it may be sufficient to make a few remarks on the worship of calves and other superstitious practices connected with them.

The most ancient and remarkable notice in the Scriptures on this head is that of the golden calf, which was cast by Aaron from the earrings of the people, while the Israelites were encamped at the foot of Sinai and Moses was absent on the mount. The next notice refers to an event which occurred ages after, when Jeroboam, king of Israel, set up two idols in the form of a calf, the one in Dan and the other in Bethel. This almost incomprehensible degradation of human reason was, more particularly in the first in-

stance, no doubt the result of the debasing influences which operated on the minds of the Israelites during their sojourn in Egypt, where, amid the daily practice of the most degrading and revolting religious ceremonies, they were accus-

Apis, Calf-god of Egypt.

tomed to see the image of a sacred calf, surrounded by other symbols, carried in solemn pomp at the head of marching armies, such as may be still seen depicted in the processions of Rameses the Great or Sesostris.

It is doubtful whether this idolatrous form is either Apis or Mnevis; it may perhaps represent the sun's first entrance in Taurus, or more probably be a symbol known to the Egyptians by an undeciphered designation, and certainly understood by the Edomites of later ages, who called it *bahumed* and *kharuf*, or the calf, the mysterious *anima mundi*; according to Von Hammer (*Pref. to Ancient Alphabets*), the Nabathæan secret of secrets, or the beginning and return of everything. With the emblems on the back, it may have symbolized the plural Elohim long before the cabalistical additions of this mysterious type had changed the figure. At the time of the departure of the Israelites from Egypt this may have been the Moloch of their neighbors, for that idol was figured with the head of a calf or steer.

A similar divinity belonged to the earliest Indian, Greek and even Scandinavian mythologies, and therefore it may be conceived that the symbol, enduring even to this day, was at that period generally understood by the multitude, and consequently that it was afterwards revived by Jeroboam without popular opposition.

Egyptian paintings illustrate the contempt which the prophet Hosea (x:5) casts upon the practice of those whom he designates as 'coming to sacrifice and kiss the calves;' and commentators have been at pains to explain in what manner Moses reduced the golden calf to such a state as to make it potable in water; but surely as the science of making gold leaf for gilding was already practiced in Egypt, there could be no difficulty, even if chemical processes had not then been discovered, in effecting the object.

With regard to Jer. xxxiv:18, 19, it may be sufficient to mention that many nations of antiquity had a practice of binding themselves to certain resolutions by the ceremony of cutting a calf or other victim into two halves or sides, laying them on the ground and passing between the severed parts. This was considered as constituting a peculiarly binding obligation (*Comp. Gen. xv:10, 17*).

CALF, GOLDEN (kāf, gōld'ŋ), (Heb. עֵגֶל מִסֵּפֶד, *ay'ghel*, steer; *mas-say-kaw'*, molten image).

(1) **The Idolatrous Statue** which the Israelites worshiped at the foot of Mount Sinai (Exod. xxxii:4). (See AARON.) When the people saw that Moses delayed to come down from the mount they demanded of Aaron to make them gods which should go before them. Aaron demanded their earrings, which were melted and cast into the figure of a calf. When this was about to be consecrated Moses, being divinely informed of it, came down from the mount, and, having called on all who detested this sin, the sons of Levi armed themselves and slew of the people about 23,000, according to our version; but the Hebrew, Samaritan, Chaldee, LXX, and the greater part of the old Greek and Latin fathers, read 3,000.

There are some hints in the account of the golden calf, which are usually overlooked: as (1) Aaron calls the calf in the plural "gods"—"These are thy gods—they who brought thee out of Egypt." So the people say, "Make us gods," yet only one image was made. (2) Although the second commandment forbids the making "TO THYSELF" any graven image, yet, in the instances of the cherubim, graven images were made, though not for any private individual, nor for the purpose of visible worship, but for *interior* emblems, in the most holy place, never seen by the people. (3) Aaron did not make this calf with his own hands, most probably, but committed it to some sculptor, who wrought not openly in the midst of the camp, but in his workshop. The Jews report that the image was made into the form of a calf by some *evil spirits* who accompanied the Israelites from Egypt; and if they mean *evil human* spirits, they are right enough. The sacred writers in succeeding ages plainly speak of the golden calf as a very great sin (Ps. cvi:19, 20; Acts vii:41; Deut. ix:16-21). (4) Aaron, though greatly misled, must have meant by this worship something more than the mere worship of the Egyptian calf, Apis, for in what sense had Apis "brought Israel out of the land of Egypt?" an expression which Jeroboam subsequently used (1 Kings xii:28), which is strange, if Apis, an Egyptian deity, had been the object of his calves. The LXX say, in Exod. xxxii:4, that Aaron described the calf with a graving tool, but that the people made and cast it. The Chaldee paraphrast says, "Aaron received the ear-rings, tied them up in purses and made the golden calf of them," and Bochart maintains that this is the best translation, the Hebrew *chanet* signifying a *purse*, and not a *graving tool*. It would seem, therefore, that Aaron had given the gold of which he had the custody to a workman appointed by the people; that he followed the people throughout this transaction; and that he endeavored to guide (perhaps even to control) their opinion in varying and appointing to the honor of Jehovah what many, at least "the mixed multitude," would refer to the honor of the gods they had seen in Egypt. In this view his expression deserves notice—"to-morrow is a solemnity to Jehovah;" not to Apis or to any other god, but to Jehovah. Such was the sentiment of Aaron, whatever sentiments some of the people might entertain; and his confession to Moses (ver. 24) may be so taken: "I cast it," *i. e.* I gave it to be cast. Certainly, the making of the calf was a work of time; it was not cast in a moment, nor in the midst of the camp, but in a proper workshop, or other convenient place; and even perhaps was forwarded more rapidly than Aaron knew, or wished. He might use all means of delay, though he sinfully yielded to a prevarication, or to a worship

of Jehovah by an image; an impure medium of worship, which was explicitly forbidden in the second commandment (Exod. xx:4). Augustine says Aaron demanded the personal ornaments of the women and children, in hopes they would not part with those jewels, and, consequently that the calf could not be made. What means of resistance to the people he might possess we cannot tell; perhaps the people satisfied themselves by fancying that, in referring by this image to God, they avoided the sin of idolatry. Did Aaron imagine the same, not understanding the commandment already given as a prohibition of worshiping God by mediatorial representations, or public symbols of his presence?

The termination of this melancholy occurrence was as extraordinary as its commencement: "And Moses took the calf which *they* had made and burnt it in the fire, and ground it to powder, and strewed it upon the water and made the children of Israel drink of it" (Exod. xxxii:20).

(2) **Golden Calves of Jeroboam.** This prince, in order to separate the ten tribes more effectually from the house of David, set up objects of worship in the land of Israel that the people might not be compelled to go up to Jerusalem (1 Kings xii:26-28). He made two calves of gold and said: "Behold thy *gods*, O Israel, which brought thee up out of the land of Egypt. And he set the one in Bethel and the other he put in Dan, at the two extremities of his kingdom. And this thing became a sin, for the people went to worship before these calves to Dan and to Bethel." Monceau thought that these calves, as well as the calf of Aaron, were imitations of the cherubim, and that they occasioned rather a *schismatic* than an *idolatrous* worship. We know, indeed, that all Israel did not renounce the worship of the Lord for that of the calves, but it is highly probable that the majority did so. (See 1 Kings xix:10.)

It is certain Jeroboam's golden calves were not images of Baal (see 1 Kings xvi:31, 32; 2 Kings x:28, 31), neither does Elijah say, "Choose between these *calves* (as emblems of Apis) and Jehovah." Nevertheless, most commentators think Jeroboam designed, by his golden calves, to imitate the worship of Apis, which he had seen in Egypt (1 Kings xi:40). Scripture reproaches him frequently with having made Israel to sin (2 Kings xiv:9), and when describing a bad prince, it says, he imitated the sin of Jeroboam (2 Kings xvii:21). The LXX and the Greek fathers generally read (feminine) golden cows, instead of golden calves. Josephus speaks of the temple of the golden calf as still in being in his time, somewhere towards Dan, but he omits the history of the sin. The glory of Israel was their God, their law, and their ark; but the worshipers of the golden calves considered those idols as their glory: "The priests thereof rejoiced on it, for the glory thereof" (Hosea x:5). Hosea foretold the destruction and captivity of the calves of Samaria (Hosea viii:5, 6), and the Assyrians, having taken Samaria, carried off the golden calves with their worshipers.

Figurative. The *dividing a calf* in twain at the making of covenants, and wishing that so God might rend the makers if they broke it, exhibits what is our desert for covenant-breaking, and what our blessed Redeemer endured on our account (Jer. xxxiv:18). Ministers and saints are like *calves* in meekness, patience, spiritual strength, readiness to labor, and cheerful running in the way of God's commandments (Rev. iv:7; Ezek. i:7; Is. xi:6). They grow up as *calves in the stall*; when feasted on Jesus' fullness they

abound in grace and good works (Mal. iv:2), and they render to him the *calves of their lips*, the pure offerings of prayer, praise and thanksgiving (Hos. xiv:2).

CALIGULA (ka-līg'u-la). See CAIUS CALIGULA.

CALKER (kāk'ēr), (Heb. פִּקֵּד, *beh'dek*, gap or leak; and פָּקַד, *khaw-zak'*, to stop), a *repairer of the breach*, as in 2 Kings xii:8; xxii:5, but elsewhere used as now for one who stops the seams in a vessel (Ezek. xxvii:9, 27).

CALL (kāl), (Heb. קָרָא, *karaw-rav'*, to call, name).

1. To name a person or thing. To be called or named from one is to derive a name from him. Jacob's name was called upon the sons of Joseph, when they were named Israelites, and each was established parent of a tribe (Gen. xlviii:16). Persons are called by the name of God or Christ when called His people or followers, or called Christians from Christ (James ii:7).

2. To invite, require, request (Exod. ii:7).

3. To invite to, appoint and furnish for an office (Exod. xxxi:2).

4. To create, to produce things by a word, an act of will (Rom. iv:17; Ezek. xxxvi:29).

5. To invite and charge to duty, by the ministry of the word, dispensation of providence, or motions of the Holy Ghost (Is. xxii:12; Prov. i:24; Matt. xxii:14).

6. To invite and draw sinners into a state of union with Jesus Christ, by the preaching of the Word and the working of the Holy Ghost. In this call the person is convinced of his sin and misery, has his mind enlightened in the knowledge of Christ, as able and willing to save him, has his will renewed, and is so persuaded and enabled to embrace Jesus Christ, as offered to him in the gospel. This call is according to God's purpose, with respect to persons, time and manner thereof (Rom. viii:28; 2 Tim. i:9). It is sovereign and free; not many wise, mighty, or noble are called (1 Cor. i:26, 27). It is high, proceeds from the Most High God and interests us in the highest glory and happiness (Phil. iii:14). It is holy in its author, means and end. As we are called by the glorious power and almighty virtue of God's grace, so we are called to glory and virtue, to holiness and happiness (2 Pet. i:3). It is heavenly, comes from above, interests us in and prepares us for heaven (Heb. iii:1); and is without repentance, as God will never cast off any that are once drawn to him (Rom. xi:29).

7. To acknowledge (Heb. ii:11).

8. To esteem, account (Is. lviii:5, 13; Mal. iii:15).

9. To proclaim (Joel i:3; ii:15). To call God for a record on one's soul is solemnly to appeal to Him (2 Cor. i:23). To call on God is to worship Him, particularly by prayer (1 Pet. i:17).

CALLISTHENES (kāl-līs'the-nēz), an officer of the king of Syria, who set fire to the temple gates, and was afterwards burned by the people (2 Macc. viii:33).

CALNEH (kāl'neh), (Heb. קַלְנֶה, *kal-neh'*), or **NIPPUR** (nīp'pur). The recent work of American Assyriologists in the Euphratean valley has been productive of marvelous results.

(1) **Early Record.** Great light has been thrown upon Calneh or Nippur. It is said in the tenth chapter of Genesis: "And the beginning of his (Nimrod's) kingdom was Babel or Babylon and Erech and Accad, and Calneh in the land of Shinar" (verse 10).

Babylon has long been familiar to the student of both prophecy and history, but Erech and Accad and Calneh were mere names on the biblical page until the spade of the explorer uncovered these ancient cities and thus verified the old record in Genesis—a record which some men had boldly assumed to be purely mythical.

(2) **Modern Research.** It had been thought that some of these ancient cities must still be lying in ruins beneath the desert sands of Mesopotamia, and the modern name of Nippur was known to a few scholars, but it remained for the University of Pennsylvania to organize an expedition for the exploration of the secrets which were so carefully guarded by the desolation of the desert.

Calneh was the ancient fort of Anu, who was one of the principal objects of worship, and the site of this antediluvian town is about sixty miles nearly southeast of Babylon and on the left bank of the Euphrates. It is called Nopher in the Talmud and Nipper or Niffer later on. The climate is one of the worst which the explorer has been called upon to face. On every side there are extensive marshes which are reeking with malarial poison and most prolific with stinging insects, while the heat is nearly insupportable by either American or European. It is no unusual thing to have the temperature reach 120 degrees in the shade, and the burning sandstorms of the desert parch and irritate the skin almost beyond endurance. But the heroic scholars of the American expedition never faltered, and some of them have remained in this treacherous climate, surrounded by the still more treacherous Arabs, for thirty-four months at a time.

These important excavations have been going on for ten years; at first they were under the leadership of Dr. John P. Peters, and for the last eight years under the direction of Professor H. V. Hilprecht and J. H. Haynes.

(3) **Records of Primitive Kings.** The work is most carefully done, the sand being shoveled into baskets and then carried by Arabs out to the open plain. As the earth is cautiously removed the explorers are rewarded by the finding of broken statuary, vases and bowls. It is upon these broken vases that many inscriptions are found, and as they are in a fragmentary condition it requires marvelous patience to join the broken pieces and decipher the inscriptions. Dr. Hilprecht has nearly ruined his eyes by this trying work, combined with the heat and burning sand to which his face has been much exposed.

One of these primitive kings left more than a hundred of these vases, upon which his records had been kept, and each of them bore inscriptions of between one and two hundred lines, but they were shattered, as is supposed, by invading armies.

(4) **Successive Cities and Rulers.** Here, as in Greece, in Cyprus and in Egypt, one city has been built upon the ruins of another. It would appear that the old temples had been allowed to crumble away and then a new king would level the ruins, build a solid platform over them and erect new temples and a new city thereon.

Five of these successive cities have been discovered on the site of Calneh, and each one of them is supposed to represent an interval of centuries. Far below the surface they find the work of Assur-bani-pal, the literary king of Assyria, whose strange library was largely recovered some years ago. He was probably the "great and noble" Asnapper of Ezra iv:10, as he was the brilliant Sardanapalus of the East. He kept his

scribes busily employed at Nineveh in making new editions by copying older Babylonian works. These books were written upon tablets of clay, which were then dried, and thus the page became imperishable unless broken. This king began to reign 668 years before Christ. (See LIBRARIES.)

Going down still farther, the intrepid explorers found the markings of Kadashman-Turgu, but, although many Assyrian kings must have reigned between him and Assur-bani-pal, the dates by this time have grown very uncertain.

Lower still they found a platform which was laid in the time of Ur-Gur, who is supposed to have lived long before the birth of Abraham, and still farther down they found the platforms of Sargon and Narim Sin.

This was evidently an earlier Sargon than the one mentioned in Is. xx:1, and who captured Jerusalem and Ashdod 711 years before Christ. He was called Sargon the Usurper, and he came to the throne about 722 B. C. But this earlier king was a Sargon nevertheless, for his name is stamped in the bricks. Professor Hilprecht thinks he has found traces of fifteen kings who lived before Sargon.

At last below all the others, there lie the ruins of ancient Calneh, and there are fragments of arches, sacrificial urns and altars which were built in the city of Nimrod.

Among the broken relics of pre-Sargonic times are those which revealed the existence of an old conqueror by the name of Lugalzaggisi. The fragments containing this inscription were parts of vases which had been widely scattered, but when the smallest pieces were at last in place it proved to be the longest record which had been found pertaining to this early period.

This inscription was reconstructed by Dr. Hilprecht from eighty-eight fragments of more than fifty vases. These in turn had to be chosen at random from a great heap of similar fragments, so it was nearly impossible to tell which of them might belong to the other.

This old document tells a story to the effect that the first king of whom there is any record was En-shagshur-ana, the lord of Kengi. Kengi was the early name for Babylonia. The term signifies "the land of reeds and canals," indicating that the general character of the country was much the same then as now. The capital of this early kingdom is not fully known, but it is supposed to have been the city of Erech mentioned in Genesis x:10.

(5) Early Idolatry. Many of the people had already fallen away from the worship of the true God and the masses in Kengi at that time appear to have been the followers of Bel or Baal, who so long held dominion over the idolatrous portion of the country. This was the Babylonian Bel or Baal in connection with whose worship unmentionable horrors were perpetrated. It was the same deity who, in connection with Ash-toreth, his female counterpart, and several others, were constantly denounced by Moses and the prophets. A temple, which was devoted to Bel, was found in Calneh.

Nearly every city was then a separate kingdom, and Calneh had a municipal neighbor called Kish, but the people of Calneh or Nipper claimed that this rival city was teeming with wickedness. It had once happened that the ruler of Kish encroached so far upon Babylonia that he took possession of Calneh, for there is a record showing that he presented a large stone vase to the god Bel in the temple there.

But vase fragments have been found, showing that En-shagshur-ana, king of Calneh, marched with his army against Kish and defeated this ruler. The spoils of this expedition were presented to the god Bel. Afterward another king of Babylonia marched against Kish and succeeded in capturing its king, En Bildar, and carrying home also "his statue, his shining silver, the utensils, his property," and placing them in the temple of Bel.

This success, however, was followed by other reverses. A new king of Kish is found to have offered several inscribed vases in the temple of Calneh "to Inlil, lord of lands, and to Ninlil, mistress of heaven and earth, consort to Inlil."

(6) Vicissitudes of Babylonia. It is evident from the inscriptions that Babylonia was continually being encroached upon by foreign hordes who came from the north. The Sumerians, or natives of Shinar, were a cultured people in some respects, and Babylonia was their ancestral home, but the invaders were Semites, and they were apparently a younger and a more vigorous race.

Lugalzaggisi was the son of Ukush, who was a Semite, as even his name shows. He was the *patesi*, or priest-king of Gish-ban, which is the Haran of Gen. xii:4. His son Lugalzaggisi was the great conqueror of his times, and his victorious armies swept the country from the Mediterranean Sea to the Persian Gulf. Some of our modern critics have claimed that the four Eastern kings who marched against Palestine must have been mythical, because an invasion of such proportions would have been impossible in the time of Abraham. (See ARIOCH, CHEDARLAOMER, AMRAPHEL, etc.) But Lugalzaggisi, who lived long before Abraham, claims that his conquests reached to the Mediterranean Sea. And Sargon I likewise left inscriptions asserting that he carried on four campaigns to the Mediterranean, and also that he subdued the Amorites.

Lugalzaggisi's inscriptions are in harmony with the Biblical statement to the effect that the Semites came from the North, and it is possible that the origin of the race may be hopefully looked for in or near Armenia.

Lugalzaggisi made the Erech of Gen. x:10 the capital of his newly conquered world, and he, a Semite, adopted the Sumerian pantheon and brought his offerings to their gods. He recorded his achievements on vases of stone and placed them in the temple of Bel, where they probably remained intact until the great Elamitic raid, when (if not before) they were crushed into the fragments which were found, reconstructed and deciphered by Professor Hilprecht.

After the death of Lugalzaggisi the national spirit of the Sumerians began to reassert itself. Uru-kagina was one of its rulers, and he devoted his time and resources largely to the building of temples, but he and his successors fortified the city of Shirpula.

After a time the Sumerians felt strong enough to throw off the Semitic yoke, so they rebelled and won their old supremacy over Babylonia. Erech remained the capital, but the newer dynasties moved over to "Ur of the Chaldees," spoken of in Genesis as the home of Abraham. There was yet another conquest, for the Semites again overran Babylonia, and then came a period of which little is known.

The long period to which these inscriptions belong, Professor Hilprecht says, is represented by about thirty feet of debris beneath the platforms built by Sargon and Naram-Sin. This debris contains pottery, drains, sacrificial vases, altars, keystone arches and other important rel-

ics of antiquity, but there is no data concerning the time which it covers.

The results of these excavations give us a view of the civilization which preceded Abraham, and they show also that the book of Genesis is an epitome of history, as the most ancient cities which have been uncovered are those which are mentioned in Genesis, and they have been found in the very locality where the Biblical writer says they were placed.

CALNO (käl'no), (Heb. כַּלְנוֹ, *kal-no'*, Is. x:9). See CALNEH.

CALVARY (käl'vá-rý), (Gr. *κρανιον*, *kran-ee'on*, a skull), the place where Christ was crucified.

In three of the Gospels the Hebrew name of the place, Golgotha (*place of a skull*), is given; and in Luke xxiii:33, where we find Calvary in the Authorized Version, the original is not Calvary, but *Cranion* (*a skull*). *Calvaria* is the Latin translation of this word, adopted by the Vulgate, from which it found its way into our version. The names *Cranion* and *Calvaria* are respectively Greek and Latin translations of the original Golgotha and occur in three out of the four Gospels.

As to its situation, Conder, *Palestine*, page 30, says: "From the fourth century to the present day the sites of Calvary and of the Holy Sepulcher have been shown within the precincts of the Crusading Cathedral, standing where Constantine's Basilica was raised. The discovery of part of the 'second wall' in 1886 shows pretty clearly that the line which—guided by the rock levels—I drew in 1878, nearly coinciding with Dr. Robinson's line, is correct, and that the traditional site was thus in the time of our Lord within the city walls. For the last half century this view has been very generally held, but there was no agreement as to the true site. I was enabled, however, through the help of Dr. Chaplin, the resident physician, to investigate the ancient Jewish tradition, still extant among the older resident Jews, which places the site of the 'House of Stoning,' or place of execution, at the remarkable knoll just outside of the Damascus Gate, north of the city. There are several reasons, which I have detailed in other publications, for thinking that this hillock is the probable site of Calvary." (See GOLGOTHA.)

CAMBYSES (kam-by'sez). See AHASUERUS.

CAMEL (käm'é'), (Heb. גַּמְלוֹ, *gaw-mawl'*, labor, burden bearing); Hebrew and Syriac.

1. Names and Description. There are three principal names in Eastern history of the genus *Camelus*, as constituted by modern naturalists. In this arrangement it comprises two species positively distinct, but still possessing the common characters of being ruminants without horns, without muzzle, with nostrils forming oblique slits, the upper lip divided and separately movable and extensile, the soles of the feet horny with two toes covered by unguiculated claws, the limbs long, the abdomen drawn up, and the neck, long and slender, is bent down and up, the reverse of that of a horse, which is arched. Camels have thirty-six teeth in all, whereof three cuspidate on each side above, six incisors, and two cuspidate on each side below, which, though differently named, still have all more or less the character of tusks. They have callosities on the breast-bone and on the flexures of the joints. Of the four stomachs, which they have in common with other animals chewing the cud, the ventriculus, or paunch, is provided with membranous cells to contain an extra provision of water, ena-

bling the species to subsist for four or more days without drinking. But when in the desert the camel has the faculty of smelling it afar off, and then, breaking through all control, he rushes onward to drink, stirring the element previously with a fore-foot, until quite muddy. Camels are temperate animals, being fed on a march only once in twenty-four hours with about a pound weight of dates, beans, or barley, and are enabled in the wilderness, by means of their long, flexible necks, and strong cuspidate teeth, to snap as they pass at thistles and thorny plants, mimosas and caper trees.

They are appropriately called the ships of the desert, having to cross regions where no vegetation whatever is met with, and where they could not be enabled to continue their march but for the aid of the double or single hunch on the back, which, being composed of muscular fibre and cellular substance highly adapted for the accumulation of fat, swells in proportion as the animal is healthy and well fed, or sinks by absorption as it supplies the want of sustenance under fatigue and scarcity; thus giving an extra stock of food without eating, till by exhaustion the skin of the prominences, instead of standing up, falls over, and hangs like empty bags on the side of the dorsal ridge. To these endowments are added a lofty stature and great agility; eyes that discover minute objects at a distance; a sense of smelling of prodigious acuteness—ever kept in a state of sensibility by the animal's power of closing the nostrils to exclude the acrid particles of the sandy deserts; a spirit, moreover, of patience, not the result of fear, but of forbearance, carried to the length of self-sacrifice in the practice of obedience; a dense wool, to avert the solar heat and nightly cold, while on the animal, and to clothe and lodge his master when manufactured. Without the existence of the camel immense portions of the surface of the earth would be uninhabitable and even impassable. Surely the Arabs are right: 'Job's beast is a monument of God's mercy.'

Bactrian Camel.

2. Different Kinds. The two species are:

(1) **Bactrian.** The Bactrian camel (*camelus Bactrianus* of authors) is large and robust; naturally with two hunches, and originally a native of the highest tablelands of Central Asia, where even now wild individuals may be found. The species extends through China, Tartary and Russia and is principally imported across the mountains into Asia Minor, Syria and Persia. It is also this species which constitutes the brown Taous variety of single-hunched Turkish or Toorkee camels

commonly seen at Constantinople, there being a very ancient practice among breeders of extirpating with a knife the foremost hunch of the animal soon after birth, thereby procuring more space for the pack-saddle and load. It seems that this mode of rendering the Bactrian cross-breed similar to the Arabian camel or dromedary is one of the principal causes of the confusion and contradictions which occur in the descriptions of the two species.

(2) **Arabian.** The Arabian camel or dromedary (*camelus dromedarius* or *Arabicus* of naturalists, *beker*, and female and young, *bikrah*, Is. lx:6; Jer. ii:23) is properly the species having naturally but one hunch, and considered as of Western Asiatic or of African origin, although no kind of camel is figured on any monument of Egypt, not even where there are representations of live stock, such as that found in a most ancient tomb beneath the pyramid of Gizeh, which shows herdsmen bringing their cattle and domesticated animals to be numbered before a steward and his scribe, and in which we see oxen, goats, sheep, asses, geese and ducks, but neither horses nor camels. That they were not indigenous in the early history of Egypt is countenanced by the mythical tale of the priests describing 'the flight of Typhon, seven days' journey upon an ass.' We find, however, camels mentioned in Gen. xii, but being placed last among the cattle given by Pharaoh to Abraham, the fact seems to show that they were not considered as the most important part of his donation. This can be true only upon the supposition that only a few of these animals were delivered to him, and therefore that they were still rare in the valley of the Nile, though soon after there is abundant evidence of the nations of Syria and Palestine having whole herds of them fully domesticated. These seem to imply that the genus *Camelus* was originally an inhabitant of the elevated deserts of Central Asia, its dense fur showing that a cold but dry atmosphere was to be encountered, and that it came already domesticated, toward the south and west, with the oldest colonies of mountaineers, who are to be distinguished from earlier tribes who subdued the ass, and perhaps from others still more ancient, who, taking to the rivers, descended by water, and afterwards coasted and crossed narrow seas,

Arabian Camel.

(3) **Two Arabian Species.** Of the Arabian species two very distinct races are noticed—those of stronger frame but slower pace used to carry burdens, varying from 500 to 700 weight, and traveling little more than twenty-four miles per day,

and those of lighter form, bred for the saddle with single riders, whereof the fleetest serve to convey intelligence, etc., and travel at the rate of 200 miles in twenty-four hours. They are designated by several appellations, such as Deloul, the best coming from Oman, or from the Bisha-reens in Upper Egypt; also Hadjeens, Ashaary, Maherry, Reches, Bades at Hcrat, Rawakel and Racambel in India, all names more or less implying swift, the same as *δρομάς*, *swift*.

3. **Uses.** All camels, from their very birth, are taught to bend their limbs and lie down to receive a load or a rider. They are often placed circularly in a recumbent posture, and together with their loads form a sufficient rampart of defense against robbers on horseback. The milk of she-camels is still considered a very nutritive cooling drink, and when turned it becomes intoxicating. Their dung supplies fuel in the desert, and in sandy regions where wood is scarce; and occasionally it is a kind of resource for horses when other food is wanting in the wilderness. Their flesh, particularly the hunch, is in request among the Arabs, but was forbidden to the Hebrews, more perhaps from motives of economy and to keep the people from again becoming wanderers than from any real uncleanness.

Camels were early a source of riches to the patriarchs, and from that period became an increasing object of rural importance to the several tribes of Israel, who inhabited the grazing and border districts, but still they never equaled the numbers possessed by the Arabs of the desert. In what manner the Hebrews derived the valuable remunerations obtainable from them does not directly appear, but it may be surmised that by means of their camels they were in possession of the whole trade that passed by land from Asia Minor and Syria to the Red Sea and Egypt, and from the Red Sea and Arabia toward the north, and to the Phœnician seaports.

It is likely the word *achashteranim* (Esth. viii:10), rendered 'young dromedaries' (though Borchart regards it as meaning mules), implies the swift postage or conveyance of others, the whole verse showing that all the means of dispatch were set in motion at the disposal of government.

Figurative. 1. The Jews are compared to "a swift dromedary traversing her ways." Like the dromedary hurried on by the impetuous call of nature, and while it lasts scorning all control, so the Jews scorned to be controlled in their pursuit of idols. 'Multitudes of camels and dromedaries of Midian, Ephah, Shebah, and flocks of Kedar and Nebaioth' (Is. lx:6-8), most evidently refers to the future restoration of Israel, "when they shall bring the Jews for an offering unto the Lord, out of all nations, upon horses, and in chariots, and in litters, and upon mules, and upon swift beasts, to his holy mountain Jerusalem" (Is. lxvi:20).

2. With regard to the passage in Matt. xix:24, 'It is easier for a camel to go through the eye of a needle,' etc., and that in Matt. xxiii:24, 'Ye strain at a gnat, and swallow a camel,' it may be sufficient to observe that both are proverbial expressions, similarly applied in the kindred languages of Asia. Some, claiming a knowledge of the East from birth or long residence, have said that this latter comparison had its origin in the custom of stripping a camel—belated until the great gate of a city was closed for the night, so that it could no longer enter in the usual way—of its load, and pulling or pushing it through the small gate which is made in the panel of the larger one. They have alleged that the force of

the comparison is to be sought in the fact that a rich man must be stripped of his wealth to enable him to squeeze through the narrow gate of heaven, as the camel is stripped of his load that he may be forced through the panel gate of the city. Some have even gone so far as to say that this small gate is known in the East by the name of the 'needle's eye.' In reply, we would say—(1) That this small gate is known by the name *khau-khah*, but no one of the many whom we have asked ever heard the name *needle's eye* applied to it. We believe this to be a fabrication. (2) No camel could be forced through the *khaukhah*. It is a gate from three to four feet in height, and from eighteen inches to two feet in breadth, and its bottom is from one to two feet above the ground, and by no possibility could a camel be got through it. (3) Could we suppose a *khaukhah* so exceptionally large that a camel could be forced through it, the hyperbole would be quite lost. (G. E. Post, *Hastings' Bib. Dict.*)

CAMEL'S HAIR (kām'ēls hâr), (Gr. *τριχες*, *treekh'es*; *καμήλον*, *kam-ay'loo*).

John the Baptist wore a garment made of camel's hair (Matt. iii:4; Mark i:6), and some have supposed that Elijah "was clad in a dress of the same stuff" (*Calmet's Dict. Frag.* No. cccxx.; Rosenmüller, *Schol. ad Is.* xx:2), the Hebrew expression "lord of hair" (2 Kings i:8) having reference not to his beard or head, but to his garment (Comp. Zech. xiii:4; 1 Kings xix:13, 19) (see SACKCLOTH). Chardin (in Harmer's *Observ.* ii. 487) says the people in the East make vestments of camel's hair, which they pull off the animal at the time it is changing its coat. Ælian (*Nat. Hist.* xvii. 34) speaks of the excellent smooth quality of the hair of camels, which the wealthy near the Caspian Sea used to wear; but the garment of camel's hair which the Baptist wore was in all probability merely the prepared skin of the animal.

Figurative. In Zechariah xiii:4 a rough garment—that is, a garment of hairy manufacture—is characteristic of a prophet. (*Smith's Bib. Dict.*) It was his harmonious vesture when he delivered his message of protest and preparation, and such simplicity of personal life is still the consistent accompaniment of any voice crying against social luxury and ecclesiastical pride. It was the garb of John's great predecessor and type, Elijah (2 Kings i:8). (*Hastings' Bib. Dict.*)

CAMON (kā'mōn), (Heb. *כַּמּוֹן*, *ka-w-mone'*, standing place, fastness), the place where Jair, the judge, was buried (Judg. x:5).

According to Josephus it was a city of Gilead. Eusebius and Jerome identify it with Cyamon, in the plain of Esdraelon.

CAMP (kämp). See ENCAMPMENTS.

CAMPHIRE (kämp'fir). See KOPHER.

CANA (kā'nà), (Gr. *Κανὰ*, *kanah'*), a town in Galilee, not far from Capernaum, where Christ performed his first miracle by turning water into wine (John iv:46).

This Cana is not named in the Old Testament, but is mentioned by Josephus as a village of Galilee (*Vita*, sec. 16, 64; *De Bell. Jud.* i. 17, 5). The site has long been identified with the present Kefr Kenna, a small place about four miles north-east from Nazareth, on one of the roads to Tiberias. It is a neat village, pleasantly situated on the descent of a hill looking to the southwest, and surrounded by plantations of olive and other fruit trees. There is a large spring in the neighborhood, enclosed by a wall, which, if this be the

Cana of the New Testament, is doubtless that from which water was drawn at the time of our Lord's visit. It is also observable that water-pots of compact limestone are still used in this neighborhood, and some old ones are, as might be expected, shown as those which once contained the miraculous wine. Here are also the remains of a Greek church, and of a house said to be that of Nathanael, who was a native of Cana (John ii:1-11). The view which we give is that of the traditional Cana. (See cut, in APPENDIX.)

There is a ruined place called Kâna el-Jclil, about eight miles N. ½ E. from Nazareth, which Dr. Robinson is inclined to regard as the more probable site of Cana. The Palestine explorers who call the place Khurbet Kana revert to the traditional view.

CANAAN (kā'nān or kā'nā-an), (Heb. *כְּנַעַן*, *ken-ah'an*, flat or low).

1. Son of Ham and grandson of Noah.

The transgression of his father Ham (Gen. ix:22-27), to which some suppose Canaan to have been in some way a party, gave occasion to Noah to pronounce that doom on the descendants of Canaan which was, perhaps, at that moment made known to him by one of those extemporaneous inspirations with which the patriarchal fathers appear in other instances to have been favored (see BLESSING). There is no just ground for the conclusion that the descendants of Canaan were cursed as an immediate consequence of the transgression of Ham. Canaan was the progenitor of the Phœnicians, and the people living west of the Jordan previous to the conquest by Israel (Gen. x:15; 1 Chron. i:13).

2. The land of Canaan. The ancient name of that portion of Palestine which lay to the west of the Jordan (Gen. xiii:12; Num. xxxiii:51; Deut. xi:30; Judg. xxi:12), the part beyond the Jordan eastward being distinguished by the general name of Gilead (Comp. Judg. xxi:12).

The denomination Canaan included Philistia and Phœnicia (Comp. Is. xxiii:11 and Gesenius thereon; Ezek. xvi:29; Zeph. ii:5). The name occurs on Phœnician coins, and was not even unknown to the Carthaginians (Gesen. *Gesch. d. Heb. Sprach.* p. 16). (See PALESTINE.)

CANAANITE (kā'nān-ite).

The designation of the Apostle Simon, otherwise known as "Simon Zelotes" (Matt. x:4; Mark iii:18). The name comes from a Chaldee or Syriac word, Kanean, or possibly *Kanenich*, by which the Jewish sect of "Zelotes" was designated (Matt. x:4; Mark iii:18). The Greek equivalent is *Ζηλωτής*, *Zelotes*, a zealous follower, which is preserved in St. Luke vi:15; Acts i:13. (See CANAANITES.)

CANAANITES (kā'nān-ites or kā'nān-ites), (Heb. *כְּנַעֲנִים*, *ken-ah-an-ee'*), the descendants of Canaan, the son of Ham and grandson of Noah, inhabitants of the land of Canaan and adjoining districts.

A general account of the different nations included in the term is given in the present article, and a more detailed account of each will be found under their respective names.

(1) **The Promised Land.** The Israelites were delivered from Egypt by Moses, in order that they might take possession of the land which God had promised to their fathers. This country was then inhabited by the descendants of Canaan, who were divided into six or seven distinct nations, viz., the Hittites, Girgashites, Amorites, Canaanites, Perizzites, Hivites, and Jebusites (Exod. iii:17, where the Girgashites are not mentioned; Deut. vii:1,

etc.). All these tribes are included in the most general acceptation of the term Canaanites; but the word, in its more restricted sense, as applied to one tribe, designated those 'who dwelt by the sea, and by the coasts of Jordan' (Num. xiii:29). Besides these 'seven nations,' there were several tribes of the Canaanites who lived beyond the borders of the Promised Land, northward. These were the Arkites, Sinites, Arvadites, Zemarites, and Hamathites (Gen. x:17, 18), with whom, of course, the Israelites had no concern. There were also other tribes of Canaanitish origin (or possibly other names given to some of those already mentioned), who were dispossessed by the Israelites. The chief of these were the Amalekites, the Anakites, and the Rephaim or 'giants,' as they are frequently called in our translation. These nations, and especially the six or seven so frequently mentioned by name, the Israelites were commanded to dispossess and utterly to destroy (Exod. xxiii:23; Num. xxxiii:40; Deut. xx:16, 17). The destruction, however, was not to be accomplished at once.

(2) **Conquest.** The destructive war commenced with an attack on the Israelites by Arad, king of the Canaanites, which issued in the destruction of several cities in the extreme south of Palestine, to which the name of Hormah was given (Num. xxi:1-3). The Israelites, however, did not follow up this victory, which was simply the consequence of an unprovoked assault on them; but turning back, and compassing the land of Edom, they attempted to pass through the country on the other side of the Jordan, inhabited by a tribe of the Amorites. Their passage being refused, and an attack made on them by Sihon, king of the Amorites, they not only forced their way through his land, but destroyed its inhabitants, and proceeding onwards towards the adjoining kingdom of Bashan, they in like manner destroyed the inhabitants of that district, and slew Og, their king, who was the last of the Rephaim, or giants (Deut. iii:11). The tract of which they thus became possessed was subsequently allotted to the tribes of Reuben and Gad, and the half tribe of Manasseh.

(3) **Under Joshua.** After the death of Moses the Israelites crossed the Jordan, and, under the conduct of Joshua, took possession of the greater part of the Promised Land, and destroyed its inhabitants. Several cities, however, still held out, particularly Jebus, afterwards Jerusalem, which was not taken till the time of David (2 Sam. v:6), and Sidon, which seems never to have yielded to the tribe of Asher, to whom it was allotted (Judg. i:31). Scattered portions also of the Canaanitish nations escaped, and were frequently strong enough to harass, though not to dispossess, the Israelites. The inhabitants of Gibeon, a tribe of the Hivites, made peace by stratagem, and thus escaped the destruction of their fellow-countrymen.

Individuals from amongst the Canaanites seem, in later times, to have united themselves, in some way, to the Israelites, and not only to have lived in peace, but to have been capable of holding places of honor and power; thus Uriah, one of David's captains, was a Hittite (1 Chron. xi:41).

In the time of Solomon, when the kingdom had attained its highest glory and greatest power, all the remnants of these nations were made tributary, and bond-service was exacted from them (1 Kings ix:20).

The Girgashites seem to have been either wholly destroyed or absorbed in other tribes. We find no mention of them subsequent to the book of Joshua, and the opinion that the Gergesenes, or Gadarenes,

in the time of our Lord, were their descendants, has very little evidence to support it (Rosenmüller, *Scholia in Gen.* x:16; Reland, *Palæstina*, i:27, p. 138).

The Anakites were completely destroyed by Joshua, except in three cities, Gaza, Gath, and Ashdod (Josh. xi:21-23); and the powerful nation of the Amalekites, many times defeated and continually harassing the Israelites, were at last totally destroyed by the tribe of Simeon (1 Chron. iv:43). Even after the return of the Jews from the Babylonish captivity, there were survivors of five of the Canaanitish nations, with whom alliances had been made by the Jews, contrary to the commands which had been given them. Some of the Canaanites, according to ancient tradition, left the land of Canaan on the approach of Joshua, and emigrated to the coast of Africa. Procopius (*De Bello Vandalico*, ii:10) relates that there were in Numidia, at Tigisis (*Tingis*), two columns on which were inscribed, in Phœnician characters, '*We are those who fled from the face of Joshua, the robber, the son of Naue.*' (Bochart, *Peleg*, i:24; Michaelis, *Laws of Moses*, art. 31, vol. 1, p. 176, Smith's Transl.; Winer's *Realwörterbuch*, arts. 'Canaaniter' and 'Joshua.')

(4) **Objections to the Inspired Record.** The manner in which the Israelites became possessed of the Promised Land has been so frequently brought as an objection to the inspired character of the Old Testament, and indeed is so far removed from the ordinary providential government of God, that it will be proper, in closing this account, to notice the difficulty which has been felt, and to advert to some of the hypotheses by which it is sought to be removed. Many have asserted, in order to alleviate the difficulty, that an allotment of the world was made by Noah to his three sons, and that by this allotment the Land of Promise fell to the share of Shem—that the descendants of Ham were therefore usurpers and interlopers, and that on this ground the Israelites, as the descendants of Shem, had the right to dispossess them. This explanation is as old as Epiphanius, who thus answered the objection of the Manichæans. Others justify the war on the ground that the Canaanites were the first aggressors—a justification which applies only to the territory on the other side of the Jordan. Michaelis asserts that the Israelites had a right to the land of Canaan, as the common pasture land of their herdsmen, in consequence of the undisturbed possession and appropriation of it from the time of Abraham till the departure of Jacob into Egypt—that this claim had never been relinquished, and was well known to the Canaanites, and that therefore the Israelites only took possession of that which belonged to them. The same hypothesis is maintained by Jahn (*Hebrew Commonwealth*, ch. ii. sec. x. Stowe's Transl.). In the Fragments appended to Taylor's edition of Calmet's *Dictionary* (vol. iv, pp. 95, 96), another ground of justification is sought in the supposed identity of race of the Egyptian dynasty under which the Israelites were oppressed, with the tribes that overran Canaan—so that the destruction of the latter was merely an act of retributive justice for the injuries which their compatriots in Egypt had inflicted on the Israelites. To all these and similar attempts to justify, on the ground of *legal right*, the forcible occupation of the land by the Israelites, and the extermination (at least to a great extent) of the existing occupants, it is to be objected, that no such reason as any of these is hinted at in the sacred record. The right to carry on a war of extermination is there rested simply on the divine command to do so. That the Israelites were in-

struments in God's hand is a lesson not only continually impressed on their minds by the teaching of Moses, but enforced by their defeat whenever they relied on their own strength. That there *may* have been grounds of justification, on the plea of human or legal right, ought not indeed to be denied, but it is quite clear, from the numerous attempts to find what these grounds were, that they are not stated in the Old Testament; and to seek for them as though they were necessary to the justification of the Israelites, seems to be an abandonment of the high ground on which alone their justification can be safely rested. In a word, the justification of the Israelites is to be sought in this alone, that they were clearly commissioned by God to accomplish this work of judgment, thus, at once, giving public testimony to, and receiving an awful impression of, His power and authority, so as in some measure to check the outrageous idolatry into which almost the whole world had sunk. (See CRUELITIES.)

(5) **The Mixed Tribes of Canaan.** Hormuzd Rassam, the eminent archæologist, in a communication to the Victoria Institute of Great Britain gives a valuable account of the original people of Canaan which is condensed as follows:

The mixed tribes of Canaan, among whom Abraham wandered, and whose cities the spies from the desert found to be "walled up to heaven;" who had idols and idol-altars, which Israel destroyed, are represented in the Old Testament as belonging to another race, not Semitic, but akin to some of the inhabitants of Chaldea and Phœnicia.

The materials for this study are very authentic, and though fragmentary, they are contemporary, and, rightly understood, they are conclusive. They consist: first, in the names of towns in Palestine and Syria; second, in the names of Syrian chiefs with whom the Egyptians came in contact; third, in the names of Syrian chiefs encountered by the Assyrians; fourth, in the hieroglyphic texts of Syria and Asia Minor; fifth, in the non-Semitic element in Phœnicia; sixth, in the engraved signets and amulets of Phœnicia and Asia Minor, as compared with those of Chaldea.

All these materials yield important results, but only when they are treated by a comparative method, and on the basis of the supposition which is clearly pointed out in Genesis,—that there was in Palestine from the earliest period a non-Semitic as well as a Semitic population,—that is to say, a population speaking a language, possessing a physiognomy, a religion, and customs quite distinct from those of the group of nations called Semitic, by which we understand the Hebrews, the Arabs, and the Assyrians.

The northern part of the list of towns conquered by Thothmes III in Syria contains many names which are not Semitic, and apparently not Aryan. No one, as far as Mr. Rassam knows, has made any serious effort to translate them. Professor Sayce believed that Georgian might furnish the key, but though he has studied Georgian as have Mr. Hyde Clark, Mr. Bertin, and others, the Georgian vocabularies have not been found to throw any light upon the subject.

Mr. Rassam also inspected these vocabularies with the same result. Georgian is a modern language, which, according to Brosset, who has written the best grammar on the subject, is a mixed language.

The Hittites, as represented on the monuments at Karnak have, however, long been recognized by Dr. Birch, Mr. H. G. Tomkins and Mr. Rassam as being of the Mongolian type.

Summary. Mr. Rassam thus sums up the results he has attained: (1) That the monumental nomenclature of the Hittite country and of the Hittite chiefs is Tartar; (2) That the sounds of the Hittite language on the Syrian monuments are Tartar; (3) That the only known bilingual gives a Tartar-Ugrig language; (4) That the old languages of Caria and Lydia are Tartar-Ugrig.

Comparing the results obtained from the monuments with the Old Testament, we know the following facts: (1) The Hittites lived in walled towns; (2) They had carved representations of the gods; (3) They adored Tammuz, and Ash-toreth, and Set; (4) They could write on stone and on metal; (5) They had chariots and horses; (6) They married out of their own tribe; (7) They entered into an alliance with Egypt; (8) They were of Turanian race, and probably, therefore, not circumcised, as that is not a common Turanian custom; (9) They had riches of gold, silver and bronze.

From the Old Testament, on the other hand, we learn that: (1) The Canaanites lived in cities "walled up to heaven;" (2) They made such likenesses of idols, which Israel was to destroy, and no such sculptures have been found between Dan and Beersheba, though they occur in Phœnicia and northern Syria; (3) The Canaanites adored Tammuz and Ashtoreth; (4) Letters are mentioned in David's time, and writing in the time of Moses, but nothing, about the Canaanite literature, except that some think Kirjath Sepher means "Book town" (Josh. xv:15, 16; Judg. i:11, 12), (5) The Canaanites had horses, and chariots of iron. (Note that the Canaanite chariots are said by Thothmes III to have been plated with silver, as were Roman chariots). (6) Esau married Hittite wives; David and Solomon did the same; so did Rameses II. (7) Egypt was the enemy of Israel, and Israel was the enemy of the Canaanites; (8) The Canaanites were the sons of Ham, and they were uncircumcised; (9) Great riches are mentioned as found by the Hebrews when they attacked the Canaanites. (*Transactions of the Victoria Institute*). (See HITTITES.)

CANAANITISS (kā'nān-i-tēss), a woman of Canaan (1 Chron. ii:3).

CANDACE (kān'da-cē), (Gr. *Κανδάκη*, *kan-dak'-ay*), more correctly Kandaké, was the name of the queen of the Ethiopians, whose high treasurer was converted to Christianity under the preaching of Philip the Evangelist (Acts viii:27).

(1) **Her Country.** The country over which she ruled was not, as some writers allege, what is known to us as Abyssinia; it was that region in Upper Nubia which was called by the Greeks *Meroë* and is supposed to correspond to the present province of Atbara, lying between 13° and 18° north latitude. From the circumstance of its being nearly enclosed by the Atbara (Astaboras or Tacazze) on the right, and the Bahr el Abiad, or White River, and the Nile on the left, it was sometimes designated the 'Island' of Meroë; but the ancient kingdom appears to have extended at one period to the north of the island as far as Mount Berkal. The city of Meroë stood near the present Assour, about twenty miles north of Shendy; and the extensive and magnificent ruins found not only there, but along the upper valley of the Nile, attest the art and civilization of the ancient Ethiopians. Meroë, from being long the center of commercial intercourse between Africa and the south of Asia, became one of the richest countries upon earth; the 'merchandise' and wealth of Ethiopia (Is.

xlv:14) was the theme of the poets both of Palestine and Greece; and since much of that affluence would find its way into the royal coffers, the circumstance gives emphasis to the phrase—"all the treasure" of Queen Candace.

(2) **The Title.** It is further interesting to know, from the testimonies of various profane authors, that for some time both before and after the Christian era, Ethiopia Proper was under the rule of female sovereigns, who all bore the appellation of 'Candace,' which was not so much a proper name as a distinctive title, common to every successive queen, like 'Pharaoh' and 'Ptolemy' to the kings of Egypt, and 'Cæsar' to the emperors of Rome. Thus Pliny (*Hist. Nat.* vi:29) says that the centurions whom Nero sent to explore the country reported '*regnare in Meroë feminam Candacen, quod nomen multis jam annis ad reginas transit,*' (that a woman named Candace reigned in Meroë, which name had descended to queens for many years). Strabo also (p. 820, ed. Casaub.) speaks of a warrior-queen of Ethiopia called Candace, in the reign of Augustus, the same whom Dion Cassius (liv:5) describes as queen of the Ethiopians living in Upper Egypt. Eusebius, who flourished in the fourth century, says that in his day the queen of Ethiopia continued to be called Candace.

(3) **Monumental Evidence.** A curious confirmation of the fact of female sovereignty having prevailed in Ethiopia has been remarked on the existing monuments of the country. Thus, on the largest sepulchral pyramid near Assour, the ancient Meroë, a female warrior, with the royal ensigns on her head, drags forward a number of captives as offerings to the gods; on another compartment she is in a warlike habit, about to destroy the same group. Heeren, after describing the monuments at Naga, or Naka, southeast of Shendy, says, 'It is evident that these representations possess many peculiarities, and that they are not pure Egyptian. The most remarkable difference appears in the persons offering. The queens appear with the kings; and not merely as presenting offerings, but as heroines and conquerors. Nothing of this kind has yet been discovered on the Egyptian reliefs, either in Egypt or Nubia. It may therefore with certainty be concluded, that they are subjects peculiar to Ethiopia. Among the Ethiopians, says Strabo (p. 1177), the women also are armed. Herodotus (ii:100) mentions a Nitocris among the ancient queens of Ethiopia. Upon the relief [on the monument at Kalabshé] representing the conquest of Ethiopia by Scosstris, there is a queen, with her sons, who appears before him as a captive' (Heeren, *On the Nations of Africa*, vol. ii, p. 399).

(4) **Lacasa.** De Dieu asserts, on the authority of ecclesiastical tradition, that the proper name of the queen mentioned in the Acts was *Lacasa*, and that of her chamberlain *Judich*. It is not unlikely that some form of Judaism was at this period professed to a certain extent in Ethiopia, as well as in the neighboring country of Abyssinia. Irenæus (iii:12) and Eusebius (*Hist. Eccl.* ii:1) ascribe to Candace's minister her own conversion to Christianity, and the promulgation of the Gospel throughout her kingdom; and with this agrees the Abyssinian tradition, that he was likewise the apostle of Tigré, that part of Abyssinia which lay nearest to Meroë; it is added that he afterwards preached the Gospel in Arabia Felix, and also in the island of Ceylon, where he suffered martyrdom.

CANDLE (kän'd'l), (Heb. נֵר, *nare*; Gr. λυχνος, *lookh'nos*, a light). The word is used in the Scrip-

tures to represent a lamp or a light, but its use is generally symbolical.

Figurative. (1) God's searching Jerusalem *with candles* imports his perfect knowledge of their conduct; his punishing their secret sins; and his searching their consciences by convictions, and awakening providences (Zeph. i:12). (2) God's favor and blessing are termed *his candle*; as they direct, honor, and comfort us (Job xxix:3). (3) The rational understanding and conscience are termed a *candle*; they search, observe, judge, inform, and direct us (Prov. xx:27). (4) Outward prosperity is called a *candle*; it is pleasant and agreeable; it manifests us to the world; renders us conspicuous; and enables us to act more abundantly for the honor of God, and welfare of men (Job xviii:6, and xxi:17; Ps. xviii:28). (5) Gifts and graces, and teaching offices, bestowed by God on persons, are termed a *candle*; they ought to be discovered and used for the direction and comfort of others (Matt. v:15; Luke viii:16, and xi:33). (6) Instituted ordinances, and earthly comforts, are called a *candle*; they are directive and comforting; but are short-lived, and quite unnecessary in the noon-tide of perfect glory (Rev. xxii:5).

CANDLESTICK (kän'd'l-stĭk), (Heb. מְנוּרָה, *men-o-raw'*, place of lights).

(1) **Name.** The candelabrum which Moses was commanded to make for the tabernacle, after the model shown him in the Mount, is chiefly known to us by the passages in Exod. xxv:31-40; xxxvii:17-24; on which some additional light is thrown by the Jewish writers, and by the representation of the spoils of the Temple on the arch of Titus.

(2) **Material.** The material of which it was made was fine gold, of which an entire talent was expended on the candelabrum itself and its appendages. The mode in which the metal was to be worked is described by a term which appears to mean *wrought* with the hammer, as opposed to *cast* by fusion.

(3) **Construction.** The structure of the candelabrum, as far as it is defined in the passages referred to, consisted of a base; of a shaft rising out of it; of six arms, which came out by three from two opposite sides of the shaft; of seven lamps, which were supported on the summits of the central shaft and the six arms, and of three different kinds of ornaments belonging to the shaft and arms. These ornaments are called by names which mean *cups*, *globes* and *blossoms*. The cups receive, in verse 33, the epithet *almond-shaped* (it being uncertain whether the resemblance was to the *fruit* or to the *flowers*). Three such cups are allotted to every arm, but four to the shaft—two-and-twenty in all. Of the four on the shaft, three are ordered to be placed severally under the spots where the three pairs of arms set out from the shaft. The place of the fourth is not assigned, but we may conceive it to have been either between the base and the cup below the lowest tier of arms, or, as Bähr prefers, to have been near the summit of the shaft.

As for the name of the second ornament, the word only occurs in two places in the Old Testament, in which it appears to mean the capital of a column, but the Jewish writers generally concur in considering it to mean *apples* in this place. Josephus, as he enumerates *four* kinds of ornaments, and therefore two of his terms must be considered identical, may be supposed to have understood *globes* or *pomegranates* (*Antiq.* iii:6), Bähr, however, is in favor of *apples* (*Symbolik*, i:414).

The name of the third ornament means *blossom*, *bud*, but it is so general a term that it may apply to any flower. The Septuagint, Josephus and Maimonides, understand it of the lily, and Bähr prefers the flower of the almond.

It now remains to consider the manner in which these three ornaments were attached to the candelabrum. The obscurity of verse 33, which orders that there shall be 'three almond-shaped cups on one arm, globe and blossom, and three almond-shaped cups on the other arm, globe and blossom; so on all the arms which come out of the shaft,' has led some to suppose that there was only one globe and blossom to every three cups. However, the fact that, according to verse 34, the shaft (which, as being the principal part of the whole, is here called the *candelabrum* itself), which had only four cups, is ordered to have globes and blossoms, is a sufficient proof to the contrary.

(4) **Holy Place.** It is to be observed, that the original text does not define the height and breadth of any part of the candelabrum, which was placed in the Holy Place, on the *south* side (*i. e.*, to the *left* of a person entering the tabernacle), opposite the table of shew-bread (Exod. xxvi:35). Its lamps, which were supplied with pure olive oil only, were lighted every evening and extinguished (as it seems) every morning (Exod. xxvii:21; xxx:7, 8; Lev. xxiv:3; 1 Sam. iii:3; 2 Chron. xiii:11). Although the tabernacle had no windows, there is no good ground for believing that the lamps burnt by day in it, whatever may have been the usage of the second temple. It has also been much disputed whether the candelabrum stood lengthwise or diagonally as regards the tabernacle, but no conclusive argument can be adduced for either view. As the lamp on the central shaft was by the Jewish writers called *the western*, or *evening lamp*, some maintain that the former name could not be applicable, unless the candelabrum stood across the tabernacle, as then only would the central lamp point to the west. Others again adhere to the later signification, and build on a tradition that the central lamp alone burnt from evening to evening, the other six being extinguished by day (Reland, *Antiq.* i:5, 8).

(5) **First Temple.** In the first temple, instead of this single candelabrum, there were ten candelabra of pure gold (1 Kings vii:49; 2 Chron. iv:7), one-half of which stood on the north and the other on the south side of the Holy Place. These were carried away to Babylon (Jer. lii:19).

(6) **Second Temple.** In the temple of Zerubbabel there appears to have been only one candelabrum again (1 Macc. i:21; iv:49, 50). It is probable that it also had only seven lamps.

(7) **Herodian Temple.** At least, that was the case in the candelabrum of the Herodian temple, according to the description of Josephus (*De Bell. Jud.* vii:5). This candelabrum is the one which, after the destruction of Jerusalem, was carried with other spoils to Rome; then, A. D. 455, became a part of the plunder which Genseric transported to Africa; was again, about A. D. 533, recaptured from the Vandals by Belisarius, and carried to Constantinople, and was thence sent off to Jerusalem, and from that time has disappeared altogether. It is to this candelabrum that the representation on the arch of Titus, at Rome, was intended to apply.

Figurative. The custom, practiced from time immemorial in the East, of allowing a house lamp to burn night and day, is the source of the frequent figure by which the continually burning lamp pictures the continued prosperity both of the individual and of his family (Ps. xviii:

28, 29), 'thou wilt light my candle' (1 Kings xi:36). Conversely, 'to put out the candle of the wicked' (Prov. xxiv:20; Job xviii:6) is to make his home desolate and bring destruction on himself. This familiar metaphor is employed in the Apocalypse to describe the fate with which the Church of Ephesus was threatened: 'I will remove thy candlestick out of his place' (Rev. ii:5). (R. S. Kennedy, *Hastings' Bib. Diet.*) The "seven golden candlesticks" in John's vision, denoted the seven churches of Asia (Rev. i:20). As seven denotes fulness, Jesus, walking in the midst of the seven golden candlesticks, implies his watchful presence in the church universal.

CANE (kān), or calamus (Cant. iv:14; Ezek. xxvii:19); or sweet calamus (Ex. xxx:23); or sweet cane (Is. xliii:24; Jer. vi:20); all probably names for the same plant.

It seems to have been an aromatic reed brought "from a far country." Lemon-grass (*Andropogon*) is "a plant of remarkable fragrance and a native of Central India, where it is used to mix with ointments, on account of the delicacy of its odor." Calamus may have been a species of this. (See **KANEH**.)

CANKER-WORM (kān'kēr-wūrm), (Joel i:4; Nah. iii:15, 16).

This was one of the army of destroying insects by which the land of Judæa was laid waste. It is thought that the original word means rather the locust in its larva or caterpillar state, when it is even more destructive than after it acquires wings and is about to fly away. Of this Nahum's words are very expressive—it "spoileth and fleeth away." (See **TELEK**.)

CANNEH (kān'neh), (Heb. קַנְהָה, *kan-neh'*, set up, distinguished, Ezek. xxvii:23). Probably a contracted form of the earlier Calneh (Gen. x:10). (See **CALNEH**.)

CANON (kān'ūn). The Greek word *Κανών*, *kan-ōn'*, denotes, primarily, *a straight rod*, and from this flow numerous derivative uses of it, in all of which the idea of *straightness*, as opposed to *obliquity*, is apparent.

(1) **Meaning of Term.** Among the rest it is employed to denote a *rule* or *standard*, by a reference to which the rectitude of opinions or actions may be determined. In this latter acceptation it is used in the New Testament (comp. Gal. vi:16; Phil. iii:16). In the same sense it is frequently used by the Greek fathers (Suicer, *Thes. Eceles.* in voce); and as the great standard to which they sought to appeal in all matters of faith and duty was the revealed will of God contained in the scriptures of the Old and New Testaments, they came insensibly to apply this term to the collective body of those writings, and to speak of them as the Canon or Rule. In the same acceptation we shall use the term in this article.

(2) **Authoritative.** The Canon then may be defined to be 'The Authoritative Standard of Religion and Morals, composed of those writings which have been given for this purpose by God to men.' A definition frequently given of the Canon is that it is 'The Catalogue of the Sacred Books,' while Semler (*Von Freier Untersuchungen des Canons*), Doederlein (*Institutio Theol. Christ.* tom. i. p. 83) and others, define it as 'The List of the Books publicly read in the meetings of the early Christians.' The former of these definitions, however, leaves out of sight the true meaning of the term Canon; and the latter is doubly erroneous, as it not only omits the main characteristic of the Canon, *its Divine authority*, but substitutes for this a characteristic which is

No. I.—CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, * indicates that the book is expressly reckoned as *Holy Scripture*: † that it is placed expressly in a *second* rank: ? that it is mentioned with *doubt*. A blank marks the silence of the author as to the book in question.

historically false, as the Canon was not at any time synonymous with the list of books read in public in the early churches.

(3) **Individual Books.** According to this definition, in order to establish the Canon of Scripture, it is necessary to show that all the books of which it is composed are of Divine authority; that they are entire and incorrupt; that, having them, it is complete without any addition from any other source, and that it comprises the whole of those books for which Divine authority can be proved. It is obvious that, if any of these four particulars be not true, Scripture cannot be *the sole and supreme* standard of religious truth and duty. If any of the books of which it is composed be not of Divine authority, then part of it we are not bound to submit to, and, consequently, *as a whole*, it is not the standard of truth and morals. If its separate parts be not in the state in which they left the hands of their authors, but have been mutilated, interpolated, or altered, then it can form no safe standard, for, in appealing to it, one cannot be sure that the appeal is not made to what is spurious, and what, consequently, may be erroneous. If it require or admit of supplementary revelations from God, whether preserved by tradition or communicated from time to time to the Church, it obviously would be a mere contradiction in terms to call it *complete*, as a standard of the Divine will. And if any other books were extant, having an equal claim, with the books of which it is composed, to be regarded as of Divine authority, it would be absurd to call it the *sole* standard of truth, for in this case the one class of books would be quite as deserving of our reverence as the other.

(4) **Evidence.** Respecting the *evidence* by which the Canon is thus to be established, there exists considerable difference of opinion amongst Christians. Some contend, with the Catholics, that the authoritative decision of the Church is alone competent to determine the Canon; others appeal to the concurrent testimony of the Jewish and early Christian writers, and others rest their strongest reliance on the internal evidence furnished by the books of Scripture themselves. We cannot say that we are satisfied with any of these sources of evidence exclusively. As Michaelis remarks, the first is one to which no consistent Protestant can appeal, for the matter to be determined is of such a kind that, unless we grant the Church to be infallible, it is quite possible that she may at any given period of her existence determine erroneously, and one sees not why the question may not be as successfully investigated by a private individual as by the Church.

(5) **Church of England.** The books specified as canonical in the Sixth Article of the Church of England, and the First of the Confession of the Church of Scotland, are received as such by the majority of Protestants. To these the Church of Rome adds, as part of the Old Testament, ten other books, or parts of books, which Protestants reject as Apocryphal (see APOCRYPHA). For the evidence in support of the genuineness and Divine authority of those books universally regarded by Christians as canonical, taken individually, we would refer here to the articles in this work under the titles of these books respectively. The remainder of the present article shall be devoted to a sketch of the formation and history of the Canon, first of the Old Testament and then of the New.

(6) **Formation of Old Testament Canon.** By this is meant the collection into one whole of all those books whose Divine authority was recognized by the Jews and which now form the Old

Testament, as that is received by the Protestant churches. The question is, At what time and by whom was this done?

In answer to this, a very steadfast tradition of the Jews ascribes the completion of the Old Testament Canon to Ezra, and certain other persons who, after the rebuilding of the Temple, formed with him, and under his auspices, what has been called the Great Synagogue. Without pretending to be able to give full demonstration of the accuracy of this traditionary opinion, it seems to us one which may by evidence, both direct and circumstantial, be rendered so extremely probable that to call it in question would be to exhibit a degree of scepticism such as, in all other questions of a similar kind, would be thought highly unreasonable and absurd (1) In the *first* place, there is the testimony of the tradition itself. It occurs in one of the oldest books of the Talmud, the Pirke Aboth, and is repeated, with greater minuteness, in the Babylonian Gemarah (*Tr. Baba Bathra*, fol. 13, 2). See the passages in Buxtorf's *Tiberias*, lib. i. c. 10). The substance of it is that, after Moses and the elders, the sacred books were watched over by the prophets, and that the Canon was completed by Ezra, Nehemiah, and the men of the Great Synagogue.

An effort has been made to discredit this tradition by adducing the circumstance that Simon the Just, who lived long after Ezra, is said, in the Pirke Aboth, to have been one of the members of the Great Synagogue; but to this much weight cannot be allowed, partly because Simon is, in the passage referred to, said to have been one of the *remnants* of the Great Synagogue, which indicates his having outlived it, and principally because the same body of tradition which states this opinion makes him the *successor* of Ezra, so that either the whole is a mistake or the Simon referred to must have been a different person from the Simon who is commonly known by the title of 'Just' (Cf. Othonis. *Lex. Rabbin. Philol.* p. 604, Gen. 1675; Hävernicks *Einleitung in das A. T.* Th. i. Abt. 1, s. 43); or we may adopt the opinion of Hartmann (*Die Enge Verbindung des Alt. Test. mit d. Neuen*, s. 127), that the college of men learned in the law, which gathered round Ezra and Nehemiah, and which properly was the synagogue, continued to receive accessions for many years after their death, by means of which it existed till the time of the Maccabees, without our being required to suppose that what is affirmed concerning its doings in the time of Ezra is meant to refer to it during the entire period of its existence. Suspicions have also been cast upon this tradition from the multitude of extravagant wonders narrated by the Jews respecting the Great Synagogue. But such are found in almost every traditionary record attaching to persons or bodies which possess a nationally heroic character. (II) The part of this tradition which ascribes the formation of the Canon, before the Exile, to Moses and the prophets, is sufficiently supported by the testimony of Scripture itself. When Moses had finished the writing of the Law 'he delivered it to the priests, the sons of Levi, and unto the elders of Israel' (Deut. xxxi:9); and the book was then taken and put in the side of the ark, in the most holy place (ver. 26). Towards the close of the book of Joshua it is said that 'he wrote these words in the book of the law of God,' which Le Clerc, with considerable probability, explains as meaning that he agglutinated the membrane on which his words were written to the volume of Moses which had been deposited in the side of the ark (*Comment.* in loc.). At a later period we find that Samuel, when he had told the people

1. The quotations in brackets are doubtful either as to the reference or as to the character assigned to the book quoted.

the manner (the *jus publicum*) of the kingdom, wrote it in the book and laid it up before the Lord (1 Sam. x:25). Hilki'ah, at a still later date, is said to 'have found the book of the Law in the House of the Lord' (2 Kings xxii:8). Isaiah, in calling attention to his own prophecies, says: 'Seek ye out of the book of the Lord and read; no one of these shall fail' (xxxiv:16); a passage on which Gesenius says (*Comment.* i. 921), 'The poet seems to have before his mind the placing of his oracle in a collection of oracles and sacred writings, whereby future generations might judge of the truth of his predictions.' And Daniel informs us that he 'understood, by the books, the number of the years of the captivity' (ix:2), an expression which seems to describe the sacred Canon so far as it then was complete.

From these notices we may gather that such books as were sanctioned by the authority of Moses and the prophets (whose business it was, as the watchmen of Zion, to guard the people against either the reception of any writing that was spurious or the loss of any that was genuine) were acknowledged by the Jews, before the Exile, as of Divine authority; that in all probability an authentic copy was in every case laid up in the sanctuary, and placed under the care of the priests (Joseph. *Antiq.* v:1, 17), from which copies were taken and circulated among the people (2 Chron. xvii:9); and that collections of these were made by pious persons for their own use, such as Daniel probably had in Babylon, and such as Jeremiah seems to have had, from the frequent quotations in his prophecies from the older books. (III) It is natural to suppose that, on the return of the people from their exile, they would desire an authoritative collection of their sacred books. We know that, on that occasion, they were filled with an anxious desire to know the will of God, for neglect of which, on the part of their fathers, they had so severely suffered; and that, to meet this desire, Ezra and certain of the priests and Levites read and expounded the word of the Lord to the people (Neh. viii:1-8; ix:1-3). As their fathers also had been misled by *false* prophets, it is natural to suppose that they would earnestly crave some assurance as to the writers whose words they might with safety follow. The Temple also was now bereft of its sacred treasures (Joseph. *De Bell. Jud.* vi:6; *Tract. Rabbin, Joma.* ed. Sheringham, p. 102, sq.). During the Exile, and the troublous times preceding it, several prophets had committed their oracles to writing, and these required to be added to the Canon; and the majority of the people having lost acquaintance with the Hebrew, a translation of their sacred books had become necessary. All this conspired to render it imperative that some competent authority should, at the time of the second temple, form and fix the code of sacred truth. (IV) The time of Ezra and Nehemiah was the latest at which this could be done. As the duty to be performed was not merely that of determining the genuineness of certain books, but of pointing out those which had been divinely ordained as a rule of faith and morals to the Church, it was one which none but a prophet could discharge. Now, in the days of Nehemiah and Ezra, there were several prophets living, among whom we know the names of Haggai, Zechariah and Malachi; but with that age expired the line of prophets which God had appointed 'to comfort Jacob and deliver them by assured hope' (Ecclus. xlix:10). On this point the evidence of Josephus, the Apocryphal books and Jewish tradition, is harmonious (comp. Joseph. *Cont. Apion.* i:8; 1 Macc. iv:46; ix:27; xiv:41; Hieronym. *ad. Jes.* xlix:21; Vitringa,

Obs. Sac. lib. vi. cap. 6, 7; Hävernicks, Einleit. i:1-27; Hengstenberg, *Beiträge zur Einleit. ins A. T.* i. s. 245). As the men of the Great Synagogue were thus the last of the prophets, if the Canon was not fixed by them, the time was passed when it could be fixed at all. (V) That it was fixed at that time appears from the fact that all *subsequent* references to the sacred writings presuppose the existence of the complete Canon; as well as from the fact that of no one among the apocryphal books is it so much as hinted, either by the author or by any other Jewish writer, that it was worthy of a place among the sacred books, though of some of them the pretensions are in other respects sufficiently high (e. g. Ecclus. xxxiii:16-18; 1:28). Josephus, indeed, distinctly affirms (*Cont. Ap.* loc. cit.) that, during the long period that had elapsed between the time of the close of the Canon and his day no one had dared either to add to, or to take from, or to alter anything in, the sacred books. This plainly shows that in the time of Artaxerxes, to which Josephus refers, and which was the age of Ezra and Nehemiah, the collection of the sacred books was completed by an authority which thenceforward ceased to exist.

(7) **Division of Canon.** *Division of the Canon into three parts—the Law, the Prophets and the Writings.*—This division is very ancient; it appears in the prologue to Ecclesiasticus, in the New Testament, in Philo, in Josephus and in the Talmud. Respecting the *principle* on which the division has been made, there is a considerable difference of opinion. The law was so named from its containing the national laws and regulations; the other two are regarded by some as named from the character of the writings they contain; by others, from the office and station of their authors, and by others, from a sort of accidental combination, for which no reason can now be assigned. Of these, the second is the only one that will bear the test of examination. Two very material points in its favor are: (I) That in the days of the Theocracy there was a class of persons who bore the name of Prophets *professionally*, i. e., they were persons not who were occasionally favored with Divine revelations, but who, renouncing all other occupations, gave themselves up to the duties of the prophetic office, and (II) that of *all* the books in the second division the reputed authors belong to this class; while of those in the third division, *none* of the authors, with two exceptions, belong to this class. The exceptions are Daniel and Lamentations. Of these the first is only apparent, for, though Daniel uttered prophecies, he was not *by profession* a prophet. The latter presents a greater difficulty, the best way of getting over which, perhaps, is, with Hävernicks, to admit it to be an exception, and suppose it made intentionally, for the purpose of classing this book of elegies with the Psalms and other lyric poetry of the Jews (*Einleit.* sec. 11, s. 65). Adopting this theory, the title of the *second* division is accounted for. As for that of the *third*, the most probable account of it is that at first it was fuller—viz., 'the *other* writings,' as distinguished from the law and the prophets, and that in process of time it was abbreviated into 'the writings.' This part is commonly cited under the title *Hagiographa*.

(8) **Subsequent History of Old Testament Canon.** The canon, as established in the time of Ezra, has remained unaltered to the present day. Some, indeed, have supposed that, because the Greek version of the Old Testament contains some books not in the Hebrew, there must have been a double canon, a Palestinian and an Egyp-

The sign || marks a verbal coincidence: * a direct quotation: ? an expression of doubt: () an uncertain reference: † a clear rejection: [] that the evidence is suspicious, or inconclusive as to the authority assigned to the book.

tian (Semler, *Apparat ad liberaliorem V. T. interpret.*, secs. 9, 10; Corrodi, *Beleuchtung der Gesch. des Jüdisch. u. Christlich. Kanons*, s. 155-184; Augusti, *Einleit. ins. A. T.* s. 79); but this notion has been completely disproved by Eichhorn (*Einleit.*, bd. i. s. 23), Hävernicks (*Einl.* i. sec. 16) and others. All extant evidence is against it. The Son of Sirach, and Philo, both Alexandrian Jews, make no allusion to it, and Josephus, who evidently used the Greek version, expressly declares against it in a passage above referred to (sec. 6). The earlier notices of the canon simply designate it by the threefold division already considered. The Son of Sirach mentions 'the Law, the Prophets and the other books of the fathers,' and again, 'the Law, the Prophecies and the rest of the books,' expressions which clearly indicate that in his day the canon was fixed.

(9) **New Testament References.** In the New Testament our Lord frequently refers to the Old Testament, under the title of 'The Scriptures' or of 'The Law' (Matt. xxi:42; xxii:29; John x:35, etc., etc.), and in one place he speaks of 'the Law of Moses, the Prophets and the Psalms' (Luke xxiv:44); by the third of these titles intending, doubtless, to designate the Hagiographa, either after the Jewish custom of denoting a collection of books by the title of that with which it commenced, or, as Hävernicks suggests, using the term *psal-moi*, *psalms*, as a general designation of these books, because of the larger comparative amount of lyric poetry contained in them (*Einl.* i. c. 14); Paul applies to the Old Testament the appellation 'The Holy Writings' (Rom. 1:2), 'The Sacred Letters' (2 Tim. iii:15), and 'The Old Covenant' (2 Cor. iii:14). Both our Lord and his apostles ascribe Divine authority to the ancient canon (Matt. xv:3; John x:34-36; 2 Tim. iii:16; 2 Peter i:19-21, etc.), and in the course of the New Testament, quotations are made from all the books of the Old, except Ruth, Ezra, Nehemiah, Esther, Canticles, Lamentations and Ezekiel, the omission of which may be accounted for on the simple principle that the writers had no occasion to quote from them. Philo attests the existence in his time of *the sacred writings*. He describes them as comprising laws, oracles uttered by the prophets, hymns and the other books by which knowledge and godliness may be increased and perfected (*De Vita Contemplat. in Opp.*, tom. ii, p. 275, ed. Mangey), and quotations from or references to the most of the books are scattered through his writings. The evidence of Josephus is very important, for, besides general references to the sacred books, he gives a formal account of the canon, as it was acknowledged in his day, ascribing five books, containing laws and an account of the origin of man, to Moses, thirteen to the prophets, and four, containing songs of praise to God and ethical precepts for men, to different writers, and affirming that the faith of the Jews in these books is such that they would for them suffer all tortures and death itself (*Cont. Apion.* i:7, 8; Eichhorn, *Einleit.* i, sec. 50; Jahn, *Introductio*, p. 50). Melito, bishop of Sardis in the second century of the Christian era, gives, as the result of careful inquiry, the same books in the Old Testament Canon as we have now, with the exception of Nehemiah, Esther and Lamentations, the first two of which, however, he probably included in Ezra, and the last in Jeremiah (Euseb. *Hist. Eccles.* iv:26; Eichhorn, *Einl.* i, sec. 52). The catalogues of Origen (Euseb. *Hist. Eccles.* vi:2, 5), of Jerome (*Prol. Galcat. in Opp.* iii), and of others of the fathers, give substantially the same list (Eichhorn, *l. c.*; Augusti, *Einl.*, sec. 54; Cosin, *Scholastical Hist. of the Canon*, ch.

iii, vi; Henderson, *On Inspiration*, 449). In the Talmudic Tract entitled *Baba Bathro*, a catalogue of the books of the sacred canon is given, which exactly corresponds with that now received by Christians (Buxtorf, *Tiberias*, c. 11). Hence it appears that all the evidence we have shows that the canon, once fixed, has remained unaltered.

(10) **Formation of New Testament Canon.** The history of the formation of the New Testament Canon is involved in much greater obscurity than that of the Old. An ecclesiastical tradition ascribes to the Apostle John the work of collecting and sanctioning the writings which were worthy of a place in the Canon, but this tradition is too late for any weight to be allowed to it. A much more probable opinion, and one in which nearly all the modern writers who are favorable to the claims of the Canon are agreed, is that each of the original churches, especially those of larger size and greater ability, collected for itself a complete set of those writings which could be proved by competent testimony, to be the production of inspired men, and to have been communicated by them to any of the churches as part of the written Word of God, so that in this way a great many complete collections of the New Testament Scriptures came to be extant, the accordance of which with each other, as to the books admitted, furnishes evidence of the correctness of the Canon as we now have it. This opinion, which in itself is highly probable, is rendered still more so when we consider the scrupulous care which the early churches took to discriminate spurious compositions from such as were authentic—the existence, among some, of doubts regarding certain of the New Testament books, indicating that each church claimed the right of satisfying itself in this matter—their high veneration for the genuine apostolic writings—the practice of the fathers of arguing the canonicity of any book, from its reception by the churches, as a sufficient proof of this—and the reason assigned by Eusebius (*Hist. Eccles.* iii:25) for dividing the books of the New Testament into *ὁμολογούμενοι*, *those agreed upon*, and *ἀντιλεγόμενοι*, *those disputed*, viz., that the former class was composed of those which the universal tradition of the churches authenticated, while the latter contained such as had been received by the majority, but not by all (Storch, *Comment. Hist. Crit. de Libb. N. Testamenti Canone*, etc., p. 112, ff.; Olshausen's *Echtheit der IV. Evang.*, s. 439). In this way we may readily believe that, without the intervention of any authoritative decision, either from an individual or a council, but by the natural process of each body of Christians seeking to procure for themselves and to convey to their brethren authentic copies of writings in which all were deeply interested, the Canon of the New Testament was formed.

(11) **History of New Testament Canon.** The first certain notice which we have of the existence of any of the New Testament writings, in a collected form, occurs, in 2 Pet. iii:16, where the writer speaks of the epistles of Paul in such a way as to lead us to infer that at that time the whole or the greater part of these were collected together, were known amongst the churches generally (for Peter is not addressing any particular church), and were regarded as on a par with 'the other Scriptures,' by which latter expression Peter plainly means the sacred writings both of the Old Testament and the New Testament, as far as then extant. That John must have had before him copies of the other evangelists is probable from the *supplementary* character of his own

gospel. In the anonymous Epistle to Diognetus, which is, on good grounds, supposed to be one of the earliest of the uninspired Christian writings, the writer speaks of the Law, the Prophets, the Gospels, and the Apostles (sec. xi, ed. Hefele), Ignatius speaks of 'betaking himself to the gospel as the flesh of Jesus, and to the apostles as the Presbytery of the church,' and adds, 'the prophets also we love,' thus showing that it is to the Scriptures he was referring (*Ep. ad Philadelphenos*, sec. v, ed. Hefele). Theophilus of Antioch speaks frequently of the New Testament writings under the appellation of *the sacred writings, or the Divine Word*, and in one place mentions the Law, the Prophets and the Gospels, as alike divinely inspired (*Ad. Autol.* iii:11). Clement of Alexandria frequently refers to the books of the New Testament, and distinguishes them into 'the Gospels and Apostolic Discourses' (*Quis Dives Salvus?* prope fin.; *Stromat.* sæpissime). Tertullian distinctly intimates the existence of the New Testament Canon in a complete form in his day, by calling it '*Evangelicum Instrumentum*' (*Adv. Marc.* iv:2), by describing the whole Bible as '*totum instrumentum utriusque Testamenti*' (*Adv. Prax.* chap. 20), and by distinguishing between the '*Scriptura Vetus*' and the '*Novum Testamentum*' (*ibid.* c. 13). Irenæus repeatedly calls the writings of the New Testament, 'the Holy Scriptures,' 'the Oracles of God' (*Adv. Har.* ii:27; i:8, etc.), and in one place he puts the Evangelical and Apostolic writings on a par with the Law and the Prophets (*ibid.* i:3, sec. 6). From these allusions we may justly infer that before the middle of the third century the New Testament Scriptures were generally known by the Christians in a collected form, and revered as the word of God. That the books they received were the same as those now possessed by us, is evident from the quotations from them furnished by the early fathers, and which have been so carefully collected by the learned and laborious Lardner, in his *Credibility of the Gospel History*. The same thing appears from the researches of Origen and Eusebius. Besides these sources of information we have no fewer than ten ancient catalogues of the New Testament books still extant. Of these, six accord exactly with our present Canon, while of the rest three omit only the Apocalypse, and one omits, with this, the Epistle to the Hebrews (Lardner's *Works*, vol. iv and v, 8vo; Horne's *Introduction*, vol. i, p. 70, 8th edition).

(12) **Internal Evidence.** With the external evidence thus furnished in favor of the sacred Canon, the internal accords. In the Old Testament all is in keeping with the assumption that its books were written by Jews, sustaining the character, surrounded by the circumstances, and living at the time ascribed to their authors; or if any apparent discrepancies have been found in any of them, they are of such a kind as further inquiry has served to explain and reconcile. The literary peculiarities of the New Testament, its language, its idioms, its style, its allusions, all are accordant with the hypothesis that its authors were exactly what they profess to have been—Jews converted to Christianity, and living at the commencement of the Christian era. Of both Testaments the theological and ethical systems are substantially in harmony, whilst all that they contain tends to one grand result—the manifestation of the power and perfection of Deity, and the restoration of man to the image, service and love of his Creator. The conclusion from the whole facts of the case can be none other than that the Bible is entitled to that implicit and un-

divided reverence which it demands, as the only divinely appointed *Canon* of religious truth and duty.

The criticism of the present century upon the authenticity of the separate books of the Old and New Testaments belongs to the special articles on these books.

Literature. Besides the immortal work of Lardner and the different introductions to the critico-historical study of Scripture, the following works may with advantage be consulted on the subject of the Canon:—Cosin's *Scholastical History of the Canon*, 4to. London, 1657, 1672. Westcott, *The Bible in the Church*, London, 1864; and *History of the Canon of the N. T.*, London, 1866; Hilgenfeld, *Der Kanon und die Kritik des N. T.*, Halle, 1863; *How the English Bible Has Come Down to Us*, Thompson, Chas. Scribner's Sons, 1900.

CANTICLES (kân'tî-k'lz), or Solomon's Song

(Heb. שִׁיר הַשְּׁרִירִים, *shir' hash-irim*; Sept. ᾠσμα ᾠδα-των; Vulg. *Canticum Canticorum*; all signifying the Song of Songs), is generally believed to have been so denominated in the inscription, to denote the superior beauty and excellence of this poem.

It is one of the five *megilloth*, or volumes, placed immediately after the Pentateuch in the present manuscript of the Jewish Scriptures in the following order, viz.: Canticles, Ruth, Lamentations, Ecclesiastes and Esther, although this order is sometimes violated (see SCRIPTURE, HOLY). It also constitutes the fourth of the *Cetubim*, or writings (hagiographa), which in the Jewish enumeration comprehend the Psalms, Proverbs, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Esther, Daniel and Ezra, which last includes the book of Nehemiah. These books are supposed to have been so called in contradistinction to the Law, which was delivered orally, and to the prophetic books, which were dictated in a peculiar manner. The *Cetubim* the Jews regard as the inspired writings of men who had no prophetic mission (see HAGIOGRAPHIA).

1. Canonicity. In favor of the canonical authority of this book (which has been questioned in ancient and modern times) we may observe that it is found in all the copies of the Hebrew Bible which have descended to our times, as well as in the version of the Seventy, which was finished some time in the second century before the Christian era. It is also found in all the ancient catalogues which have come down to us from the early Christian church. The most ancient which we possess, that of Melito, bishop of Sardis (A. D. 170), preserved by Eusebius (*Hist. Eccles.* iv, chap. 26), professes to give an account of the books of the Old Testament, according to the order in which they were written, from accurate information obtained in the East. The names of these books, he acquaints us, are as follows: 'Of Moses, five books, Genesis, Exodus, Leviticus, Numbers, Deuteronomy; Jesus Naue, Judges, Ruth; four books of Kings; two of Paralipomena; Psalms of David; Proverbs of Solomon; Ecclesiastes; *Song of Songs*; Job; of Prophets, Isaiah, Jeremiah; of the twelve Prophets, one book; Daniel, Ezekiel, Esdras.' The book of Canticles is invariably contained in all subsequent catalogues. It has consequently all the external marks of canonicity possessed by any other book of the Old Testament not expressly cited in the New. Those who have questioned its right to a place in the sacred volume have proceeded more in dogmatical than on historico-critical grounds. It has been, indeed, attempted to be shown that the Song of Solomon

was not included by Josephus in his account of the books of canonical Scripture, on the following grounds: Josephus divides these books into the 'five books of Moses; thirteen books containing the history of their own times, written by the Prophets who succeeded him, to the time of Artaxerxes, son of Xerxes, King of Persia; and the remaining four consisting of hymns to God and admonitions for the conduct of men's lives. It is generally supposed that these four books are Psalms, Proverbs, Ecclesiastes and Canticles, and that the thirteen other books, included under the term Prophets, are Joshua, Judges and Ruth, Samuel, Kings, Chronicles, Ezra and Nehemiah, Esther, Isaiah, Jeremiah and Lamentations, Ezekiel, Daniel, the twelve minor Prophets, and the book of Job. But it has been maintained that this last book more appropriately belongs to the four which contain hymns and admonitions for human conduct than to the Prophets who wrote the history of their own times after Moses, and consequently that there is no place left for Canticles. Those who adopt this view are compelled to separate the book of Ezra from that of Nehemiah in order to make up the number of thirteen prophets; but whatever appearance of truth there may be in this reasoning, which is that advanced by Mr. William Whiston, in his supplement to his *Essay Towards Restoring the Text of the Old Testament*, it is overbalanced by the fact already stated, that this book formed part of the Jewish canonical Scriptures and of the Septuagint version. It is true that other books are found in the copies of this latter version, which were either originally written in Greek, as the Book of Wisdom and others, or are translated from the Hebrew or Chaldee, as Ecclesiasticus, and the first book of Maccabees; but it is confessed that these never formed part of the first or Jewish canon. The Book of Canticles was also translated into Greek, from the original, by Symmachus the Jew, and by Aquila, in the second century.

The Canticles was one of the books translated by Jerome from the Greek, or rather, corrected from the older Latin version, and published by that father; but this work is now lost. We still possess in the present Latin Vulgate Jerome's translation of this book from the original Hebrew.

2. Subject. The subject of this book is confessedly Love. But it has been a matter of much controversy, especially in modern times, what kind of love is here celebrated. It is equally a matter of dispute among Divines whether the interpretation of the poem is limited to its obvious and primary meaning, or whether it does not also include a latent mystical and allegorical sense. We shall speak of these subjects in order. And, first, as to the literal and primary meaning, the earliest information which we have is contained in the preface of Origen to his commentary on this book. This eminent scholar holds it to be an epithalamium, or marriage song in the form of a drama. This idea has been, in modern times, improved by Lowth, Bossuet, Michaelis and other commentators. 'The Song of Songs,' says Bishop Lowth, 'for so it is entitled, either on account of the excellence of the subject or of the composition, is an epithalamium, or nuptial dialogue, or rather, if we may be allowed to give it a title more agreeable to the genius of the Hebrews, a Song of Loves. Such is the title of Psalm xlv. It is expressive of the utmost fervor as well as delicacy of passion; it is instinct with all the spirit and sweetness of affection. The principal characters are Solomon himself and his bride, who are represented speaking both in dialogue and in soliloquy, when accidentally separated. Virgins, also,

the companions of the bride, are introduced, who seem to be constantly on the stage, and bear a part of the dialogue. Mention is also made of young men, friends of the bridegroom, but they are mute persons. This is exactly conformable to the manners of the Hebrews, who had always a number of companions to the bridegroom, thirty of whom were present in honor of Samson at his nuptial feast (Judg. xiv:13). In the New Testament, according to the Hebrew idiom, they are called children, or sons of the bridechamber, and friends of the bridegroom. There, too, we find mention of ten virgins who went forth to meet the bridegroom and conduct him home; which circumstance indicates that this poem is founded on the nuptial rites of the Hebrews, and is expressive of the forms or ceremonial of their marriage. In this opinion, indeed, the harmony of commentators is not less remarkable than their disagreement concerning the general economy and conduct of the work, and the order and arrangement of the several parts. The present object of inquiry, however, is only whether any plot or fable be contained or represented in this poem; and upon this point the most probable opinion is that of the celebrated Bossuet, a critic whose profound learning will ever be acknowledged and a scholar whose exquisite taste will ever be admired.'

Bossuet's idea of this poem was that it is a regular drama, or pastoral eclogue, consisting of seven acts, each act filling a day, concluding with the Sabbath, inasmuch as the bridegroom on this day does not, as usual, go forth to his rural employments, but proceeds from the marriage chamber into public with his bride. The following are Bossuet's divisions of the plots:

First day . . .	Chap. i-ii:6.
Second day . .	ii:7-17.
Third day . . .	iii-v:1.
Fourth day . .	v:2-vi:9.
Fifth day . . .	vi:10-vii:11.
Sixth day . . .	vii:12-viii:3.
Sabbath	viii:4-14.

Lowth so far differs from Bossuet as to deny the existence of a regular drama, inasmuch as there is no termination to the plot. Michaelis, in his notes to his German translation of Lowth's *Prelections*, endeavors to overturn the views of Bossuet and Lowth and to show that this poem can have no relation to the celebration of a marriage, inasmuch as the bridegroom is compelled in his nuptial week to quit his spouse and friends for whole days in order to attend to his cattle in the pastures; and while he altogether repudiates the idea, which some have had the rashness to maintain, that the subject of the poem, in its literal signification, is a clandestine amour, inasmuch as the transaction is described as legal and public, and the consent of parents plainly intimated, he equally rejects the views of those who conceive that these songs relate to the state of parties betrothed before marriage. His opinion is that this poem had no reference to a future marriage, but that the chaste loves of conjugal and domestic life are described. This state, he conceives, in the East, admits of more of the perplexities, jealousies, plots and artifices of love than it does with us; the scene is more varied, and there is consequently greater scope for invention.

But the idea that the conjugal state, or the loves of married persons, are here referred to, has been strongly opposed by some of the ablest modern writers, including Eichhorn (*Einleitung*), Rosenmüller (*Scholia in Cant.* Pref. p. 261), Jahn (*Ein-*

leitung and *Introduct. in Compendium redacta*), who maintain that the chaste mutual loves of two young persons antecedent to marriage are here celebrated. The last-named writer having observed that neither in monogamy nor in polygamy is the passion of love so ardent as is here represented, proceeds to maintain that no other object remains but 'the chaste and reciprocal affection of the sexes previously to marriage. Some of the language,' he adds, 'may be thought indecorous in persons in such circumstances, but this is not the case, unless it be taken in the worst sense. It admits of a meaning perfectly chaste, which in the mouths of chaste lovers, such as the parties are uniformly represented, is the only one that can be true.' He conceives that there is no necessity to suppose any actual historical foundation for the poem.

3. Character of the Poem. Here it may be necessary to state that the learned are divided on the point whether the Canticles consist of one continued and connected poem, or of a number of detached songs or amorets. The first person who maintained the latter opinion was Father Simon, who was on this account unjustly accused of denying the canonicity of the book. This opinion has been subsequently defended by Eichhorn (*Einleitung*), Jahn, Pareau (*Institutio Interpretis V. T.* p. iii, sec. iv, c. xi, sec. 3; *Biblical Cabinet*, vol. ii, p. 129), and many others. A very general opinion is that it is an idyl, or rather, a number of idyls, all forming a collective whole. Such is the opinion held, among others, by Sir William Jones and Dr. J. Mason Good, in his beautiful translation of the Song of Songs. Dr. Adam Clarke, however, will not allow that the book of Canticles comes under the denomination of a pastoral, an idyl, an ode or an epithalamium. He conceives it to be a composition *sui generis*, partaking more of the nature of a mask than anything else, an entertainment for the guests who attended a marriage ceremony. He admits no mystical sense. Jahn, in the work above alluded to, states his opinion that the work comprehends several amatory poems.

Ewald considers the poem to consist of a drama in four parts. The heroine of the poem, according to this writer, is a country maiden, a native of Engedi, who, while rambling in the plains, fell in with the chariots of Solomon, and was carried by him into his palace. (Ewald's *Das Hohe Lied Salomo's*, Gotting. 1826).

Among those who have maintained the opinion that the Song of Songs is an allegory founded on facts, were Isidore Clarius and Francis Vatablus. Lightfoot also considers the poem to refer to a daughter of Pharaoh, an Ethiopian and a Gentile. Others, as we have observed, among whom are the learned Lutherans Carpzov (*Introductio ad Libros Canonicos V. T.*) and Gerhard (*Postill. Salomonis, in Cant.*, præm, cap. x), maintain that the book is a simple allegory, having no historical base whatever, but describing the love which subsists between Christ and the church under figures borrowed from the ardor of human passion. These writers maintain that there exists no double sense whatever, but that its primary is its only sense, and that this primary sense is entirely of a spiritual character.

As, however, the Scriptures give no intimation that this book contains a mystical or allegorical sense, recourse has been had to the analogy of some of the Messianic Psalms, whose application to Spiritual objects is recognized in the New Testament. Especially a great resemblance has been observed between the character of the Can-

cles and the 45th Psalm. Aben Ezra, the celebrated Jewish commentator of the twelfth century, considered that the Canticles represented the history of the Jews from Abraham to the Messiah. Others have conceived the bride to be Wisdom, with whom Solomon was acquainted from his childhood and with whose beauty he was captivated (Leo Hebræus, Dialog. iii, *De Amore*). This latter is the view followed by Rosenmüller in his *Scholia*.

The modern writers of the Roman church have, in general, followed Origen and Jerome in their allegorical interpretations. The Rev. T. Scott observes, in his *Commentary*, that 'no other poem of the kind could be so explained as to describe the state of the heart at different times, and to excite admiring, adoring, grateful love to God our Savior as this does.'

We must not omit the opinion of the learned Keiser, who conceives it to be a historico-allegorical song, celebrating the restoration of the Mosaic worship by Zerubbabel, Ezra and Nehemiah (*Das Hohelied*, Erlangen, 1825). Prof. Hengstenberg of Berlin, in his essay upon the Song of Songs, in the *Evangelische Kirchenzeitung* for 1827, maintains that the allegorical interpretation of the book compels us to assume the relation of Jehovah to the Jewish people as the subject of the representation.

Luther, in his *Commentary on Canticles*, maintained the allegorical interpretation, conceiving Jehovah to be the bridegroom, the bride the Jewish nation and the poem itself a figurative description of Solomon's civil government.

The opinions of those who have acknowledged no other than the literal interpretation of the Canticles has had a considerable influence in the question of the canonicity of the book. Nor is it at all surprising that those who were in the habit of attaching a spiritual meaning to it should find it difficult to believe that a book treating of human love should have a place in the inspired volume.

But by many who defend the allegorical interpretation, it is acknowledged that, even in its literal sense, it has a just claim to be considered a canonical book. Dr. J. Mason Good, for instance, who, although he acknowledges that we have no sufficient data to build a decisive opinion, still believes it an allegory (observing that 'this allegoric mode of describing the sacred union subsisting between mankind at large, or an individual and pious soul and the great Creator, is common to almost all Eastern poetry,' in proof of which he refers to the chaste and virtuous Sadi or the more impassioned Hafiz), and maintains that 'to those who disbelieve the existence of such an allegory, they still afford a happy example of the pleasures of holy and virtuous love; they inculcate, beyond the power of didactic poetry, the tenderness which the husband should manifest for his wife, the deference, modesty and fidelity with which his affection should be returned, and, considered even in this sense alone, they are fully entitled to the honor of constituting a part of the sacred Scriptures' (*Song of Songs, or Sacred Idyls*, by J. Mason Good, M. D.).

Writers of exquisite taste, like Bossuet, Lowth, Eichhorn and Dr. J. Mason Good, share the opinion of Calmet when he says: 'Even regarding it as a mere human composition, it has all the beauties of which a piece of this nature is capable. The bride and bridegroom express their sentiments in figurative and enigmatic periods, and by comparisons and similitudes derived from rural scenery. If the comparisons are sometimes

too strong, we must allow something to the genius of the Orientals and the vivacity of love.' The style is tender, lively, animated and delicate' (Preface to *Canticles*).

It was chiefly the subject of the poem that influenced Dr. J. Pye Smith in rejecting the Canticles from the Canon, although he also maintained with Whiston that Josephus did not include it in his catalogue (*Scripture Testimony*, i:55, 3d edit., 1837; also *Congregational Magazine* for 1837, 1838).

4. Author and Age. These have been also much disputed. The inscription ascribes it to Solomon, and this is confirmed by the universal voice of antiquity, although some of the Jews have attributed it to Hezekiah.

5. Translation and Interpretation by C. Taylor.

The translation and interpretation of the Book of Canticles, as found in Calmet, by Mr. C. Taylor, may be given as a typical presentation of the literal and dramatic nature of the work.

(1) Introduction. The first principle to be considered in analyzing this poem is the arrangement of its parts, for it evidently appears to be not one continued or uniform ode, but a composition of several odes into one connected series. In addition to the termination of the poem, there are three places where the author has decidedly marked the close of a subject. These are the lively adjurations addressed by the bride to the daughters of Jerusalem. These three periods close by the same words, uttered by the same person (the bride), who, when she is the last speaker, concludes in the same manner with very slight variations. They occur at the end of the first day, the end of the second day and the end of the fifth day, but at the end of the poem this conclusion is not maintained. If, then, these passages be admitted as divisions of the poem originally intended to be marked as *closes*, we have only to ascertain two other divisions in order to render the parts of the poem pretty nearly commensurate to each other in length, and complete in the subject which each includes. By attending to the sentiments and expressions we shall find little difficulty in perceiving such a change of person and occurrence that the ending of the third day *must* be where we have placed it, because the following words, relating to a dream of the over-night, imply that they are spoken in a morning; and they are so totally distinct from the foregoing sentiments, as to demonstrate a total change of scene and of subject. The same may be said of the close of the fourth day. There is such a determinate change of style, subject and person speaking, in the succeeding verses, that every feeling of propriety forbids our uniting them. These principles, then, divide the poem into six divisions, each of which we have considered as one day. It has been usual with commentators to regard these six days as *succeeding* the day of marriage; a mistake, as we suppose, which has misled them into many mazes of error. On the contrary, they are here considered as *preceding* the day of marriage, and, we think, the poet has distinctly marked the sixth day as being itself the day of that union, which accounts for its termination with the morning eclogue, and the omission of the evening visit of the bridegroom to the bride, as then the Sabbath, to which no allusion appears in any preceding day, would be beginning, in whose solemnities the Jewish bridegroom would be attentively engaged. Other interpreters have supposed these eclogues to be so absolutely distinct as to have no connection with

each other, and not to form a regular series—a supposition that considerably impairs their beauty as a whole, and the effect of each of them singly, while it leaves undecided the reason for their association, or for their appearance and preservation in one book.

(2) Time. That the time of the year is spring has always been supposed, and, indeed, it is so clearly marked as to need no support from reasonings. The mention of several particulars in the poem demonstrates it. Mr. Harmer has identified the month to be April, and, in Judea, we may say of April, as in England has been said of May, that "April is the mother of love."

(3) Division. We have supposed it right to divide each day into two parts (morning and evening), because there appears to be such appropriations of persons and sentiments as detach each eclogue from its companion. It should be remembered that the *noon* of the day is too hot in Judea to permit exertion of body or mind, and that no person of the least degree of respectability is abroad at that time of the day. The Turks have a proverb importing that "only Franks and dogs walk about at noon." And in Europe itself, as in Spain and Portugal, while the natives at noon sleep the *siesta*, "the streets," say they, "are guarded by Englishmen and dogs." Since, then, *noon* is the time for repose in the East (see 2 Sam. iv:5), we are not to expect that an eastern poet should depart from the manners of his country by representing this part of the day as a fit time for visiting, or conversation, or enjoyment. Neither can we suppose that *night* is a fit time for visiting or conversation, among recent acquaintances especially. Whatever our own unhappy manners may ordain, in respect of encroaching on the proper repose of night, the East knows nothing of such revels, nor of those assignations which, under favor of night, furnish too much occasion for repentance on the morrow. Such considerations restrict these eclogues to two parts of the day, morning and evening. The morning, among the Oriental nations, is very early; the cool of the day, daybreak, before the heat comes on; and the evening is also the cool of the day, after the heat is over. The mornings of this poem are mostly occupied by conversations of the bride with her female visitors, or with her attendants, in her own apartments. But on the morning of the second day the bride, observing her beloved engaging in a hunting party, is agreeably surprised by a visit from him, and sees him from the upper story of her apartments and through the crossbars of her windows. He solicits a view of her countenance, but the poem seems to insinuate his further waiting for *that* till the next morning, when she, being intent on considering his palanquin, suffers herself to be surprised; and the bridegroom compliments her beauty, which, for the first time, he has an opportunity—not properly of *considering*—but merely of *glancing* at. The evening is the regular time when the bride expects to be visited by her spouse; accordingly, he visits her on the first evening; but on the second evening she describes her anxiety, occasioned by his failure in this expected attention, for which she had waited even into night, when it was too late to suppose he would come, and she must needs relinquish all thoughts of seeing him. On the other evenings he punctually pays his attendance, and though the import of the conversation between them is usually to the same effect, yet the variety of phraseology and metaphor employed by both parties gives a characteristic richness, elegance and interest to this poem, in which, if it be equaled, it is by very few; but certainly it is not surpassed by any.

(4) **Persons.** It is natural to inquire, in the next place, who are the interlocutors in this poem. That it consists of conversation is an opinion derived from the earliest times; from the Jewish synagogue no less than from the Christian church: but opinions have varied as to the persons engaged in this conversation. There evidently are two principals—first, the lady herself, whom we distinguish as the bride, meaning a person betrothed to her spouse, but not yet married to him. She evidently comes from a distant country, and that country south of Judea, and more exposed to the heat of the sun. She is accompanied by her mother, or by a representative of her mother, and by proper female attendants, whom we shall denominate bridesmaids; the *second* principal in the poem is the bridegroom, who is described in terms which can agree only with a prince; and this prince is accompanied, on his part, by a number of companions, with whom he can be free and who in return can be *heartly*. In addition to these, as the bride is but recently arrived from a distant land, it is very natural that some of the ladies of her present residence (the Royal Harem) should visit her, no less to congratulate and to compliment her than to engage a share in her good graces and to commence that friendship which may hereafter prove valuable and pleasant to both parties. The Queen Mother of the bridegroom perhaps heads this group.

Received opinion, founded on a pretty general tradition, has called the prince Solomon, king of Israel, and tradition almost, or altogether equally general, has called the princess, his Egyptian spouse, daughter of Pharaoh. As we acquiesce in this opinion we pass it with this slight mention only.

(5) **Place.** The place is the city of David. This will follow, in some degree, from the mention already made of the parties, but further proof may be found in the history of this connection (1 Kings iii:1.) Solomon made affinity with Pharaoh, king of Egypt, and took Pharaoh's daughter *and brought her into the City of David*, until he had made an end of building his own house. Solomon made also a house for Pharaoh's daughter (1 Kings vii:8); "Pharaoh's daughter *came up out of the City of David to the house which Solomon had built for her*" (1 Kings ix:24). From these passages it is clear that Solomon lodged his bride in the city of David *directly as he received her*; consequently at the time described in this poem. Tracing the ancient boundaries of the city (or palace) of David, we find it connects on one side with the city of Jerusalem; on the other side it is surrounded by the open country, the hills, etc., in the neighborhood. Its internal distribution, we are not to imagine, was wholly like that of a city; that is, a series of streets throughout, leading from end to end; but comprising the palace of David, its courts and appurtenances, the gardens and pleasure grounds belonging to that place, in various and irregular forms. If there were a few continued lines of houses in it, they might be adjacent to the city of Jerusalem, and further, where the wall of the present city passes, we shall suppose a pile of buildings, the palace of David, having one front toward Jerusalem and another toward the gardens, into which the rest of the ground was formed. These gardens, thus occupying full half the area of the city of David, must be supposed to be amply furnished with the most admired plants, shrubs, trees, evergreens, etc., with water in basins, streams and fountains: with a smooth-mowed sward of the most vivid green, that is, grass, and with a variety of flowers in pots, vases, etc.; in short, with whatever of decoration

art and expense could procure, and the whole so disposed as to be seen to the greatest advantage from the windows, balconies, galleries, pavilions and internal walks of the palace. Nor is this all, for unless we observe how fitly the risings and hills of Mount Sion were adapted to communicate pleasure, by views of them (that is, being looked *towards*) and by the situations they afforded for prospects (that is, being looked *from*); also, what is implied in these risings, the hollows, dells, etc., their counterparts, which yielded at once both coolness and shadow, we shall lose the satisfaction arising from several of the allusions in the poem; these hillocks, then, the reader will bear in mind. We must add the supposition of various gates around this enclosure, some communicating with the town, others with the country, all of them more or less guarded by proper officers and attendants. We must also include in our ideas of the palace that King Solomon himself resided in a part of it; and his bride, her mother and attendants, lodged in another part of it. These parts of the same palace may easily be understood as possessing a ready communication with each other; some of them were surrounded by corridors; others were open pavilions or colonnades, according to the nature and composition of a royal residence in the East, and adapted to the various purposes of the apartments. Add guards, former residents, proper officers, servants, etc.

Thus we have stated our notions of the time, the place, the persons, of this conversation poem. We desire the reader to transport himself and his conceptions into the palace of the highly favored king of Israel; to make one among those honored with a station in the train of Solomon, when his betrothed spouse, newly arrived from Egypt, with her mother, surrounded by all the pomp which the superb Pharaoh himself could depute to aggrandize his daughter in the eyes of beholders. Egypt was at this time in its glory as to riches and power, and Solomon was rising into the greatest repute for magnificence and into a proverbial fame for wisdom. Thus introduced, let us attend the conversations of these illustrious lovers, but let us remember that they are expressed and transmitted in the energetic, the impassioned, the figurative language of poetry, of eastern poetry; comprised in metaphors, easy, familiar, and even constant, in the place and country where we hear them; that a great part of the *gallantry* attending a courtship conversation is (by usage) included in them, and that the promptitude of the repartee to such allusions, metaphors, similes, comparisons, etc., is accepted as no small test of the sprightly wit, felicity of fancy, readiness of reply and mental dexterity, of the persons between whom they pass.

(6) Arrangement.

TIME.

At, and after, the BRIDE'S recent arrival from Egypt.

The MARRIAGE WEEK; six days previous to the completion of the marriage; the sixth day being the day of marriage. Each day divided into two eclogues, MORNING and EVENING, except the sixth, which is MORNING only.

Time of the year—SPRING.

PLACE.

A PALACE OF SOLOMON in Judea, with its harem, gardens, etc., that is, the CITY OF DAVID, adjacent to Jerusalem.

FIRST DAY. ECLOGUE I.

TIME. MORNING.
 PLACE. *The Bride's parlor and apartments in the harem.*
 PERSONS. BRIDE. LADIES of the harem, or QUEEN MOTHER, *visiting the Bride, to compliment and to accompany her.*
 BRIDE. May he salute me with affectionate salutations! (1).
Or, May he think me worthy to receive his addresses—his compliments of kindness.
 LADIES. *Yes, most certainly;—Expect, assuredly, his kindest addresses.* So much are thy (2) love-favors excellences above wine.
 By the exquisite odor of thy perfumes—
 (Like perfume widely diffused is thy renown *for beauty.*)
 The virgins' affections are conciliated to thee.
 BRIDE. *Pray lead the way—[(3) precede me; go before me.]*
 LADIES. . . . *O, no,—We follow in thy train [close after thee.]*
 BRIDE. The king hath introduced me into his palace [(4) HAREM, chamber.]
 LADIES. We shall be happy and rejoice in thee:
 We shall commemorate thy love-favors more than wine;
 Most consummately shall we love thee:
Or, With perfect integrity shall we love thee.
 BRIDE. I am swarthy—
 LADIES. —But attractive—[*engaging*].
 BRIDE. . . . *swarthy, O ye daughters of Jerusalem,*
 As the tents of Kedar!
 LADIES. . . . *attractive—as the tent-curtains of Solomon!*
 BRIDE. Do not too accurately scrutinize my swarthinness,
 For indeed the sun hath darted his direct rays upon me.
 The sons of my mother treated me contemptuously; (5)
 They appointed me (6) inspectress of the (7) fruiteries [*orchards*];
 But my fruitery—my own—I have not inspected.
 Tell me, O thou beloved of my (8) heart [*person*], where thou feedest *thy flock*.
 Where thou makest *it* to repose at noon:
 For why should I be like a rover [*a straggler in confusion*]
 Beside the flocks of thy companions?
 LADIES. If indeed thou shouldst not know of thyself,
 O most (9) elegant of women!
 Trace thou thy way along the tracks of the flock;
 Or feed thou thy kids beside the shepherd's tents.

FIRST DAY. ECLOGUE II.

TIME. EVENING.
 PLACE. *Bride's Parlor.*

PERSONS

BRIDE and her ATTENDANTS.
 BRIDEGROOM and his ATTENDANTS.
 LADIES of the Harem.
 BRIDEGROOM. To a chief (rider) in the cavalry of Pharaoh.
 (10) Have I compared thee, my consort.
 Thy cheeks are *so* elegantly decorated with bands of *pearls*;
 Thy neck is *so resplendent* with collets of *gems*.
 LADIES; or BRIDEGROOM'S COMPANIONS. } We will make for thee golden bands,
 BRIDE, (*aside*) } With spotted edges of silver.
 While the king is surrounded by his (11) circle.
 My spikenard diffuses delightful fragrance.
 A scent-bag of balsam is my love to me,
 In my bosom he shall constantly rest:
 A cluster of Al-Henna (12) is my beloved to me,
 [Of *Al-Henna*] from the plantations of EN-GEDI.
 BRIDEGROOM. Behold, thou art elegant *in thy taste*, my consort!
 Behold thou art elegant! Thine eyes are Doves!
 BRIDE. Behold, thou art (13) magnificent, my associate friend;
 How delightful, how exquisitely green [*or flowery*] is our (14) carpet *covering*!
 The beams of thy palaces are cedars!
 Their ornamental inlayings are firs! (15) *brutim*, or *brushim*.
q. Cypress?
 —I am a rose of the *mere* field:
 A lily of the *mere* valley.
 BRIDEGROOM. As the lily among thorns,
 So is my consort among the maidens.
 BRIDE. As the citron-tree among the wild underwood,
 So is my associate friend among the youths.
 BRIDEGROOM *having retired.* BRIDE *sola; or* (16) *speaking to the LADIES.*
 BRIDE. *When* I delight in his (17) deep shadow, and sit down *beneath it*,
 And his fruit is delicious to my taste;—
When he introduces me into his house of wine,
 And "Affection" is his banner bright-blazing above me;
When he cheers me with refreshing cordials,
 And revives me with fragrant (18) citrons;—
 (I am so wounded to fainting by affection!)
When his left arm is under my head,
 And his right arm embraces me;—
 I adjure you, O daughters of Jerusalem,
 By the *startling* antelopes, by the *timid* deer of the field,

If ye disturb, if ye discompose
this complete affection,
Till [*affection*] herself desire it!

SECOND DAY. ECLOGUE I.

TIME. MORNING, *early*.
PLACE. *Bride's chamber.* BRIDE *at her*
(1) *window hears the [hunt-*
ing horn, etc. ?] music of her
beloved, very early in the
morning.

PERSONS. BRIDE, *her ATTENDANTS.*
BRIDEGROOM, *below.*
BRIDEGROOM'S COMPANIONS, *in at-*
tendance, within hearing.

BRIDE. The (2) *music [sounds] of my*
beloved!
Behold, he himself approaches!
Lightly traversing the hills,
Fleetly bounding over the rising
grounds,
My beloved is *swift* like an ante-
lope, or a fawn!
Behold his stopping [(3) *seated,*
placed,] in his (4) *carriage;*
Looking through the apertures;
(5) [*windows,*]
Gleaming between the blinds;
(6) [*lattices;*]
My beloved addresses me, and
says,
"Rise, my consort, my charmer,
and come away;
For lo! the winter is over, the
rains are passed, are gone,
The flowers appear in the
meads,
The singing-time [*of the night-*
ingale] is come,
And the voice of the turtle re-
echoes in our grounds:
The fig-tree forwards into
sweetness its *swelling* fruit,
And the vines advance into fra-
grance their just setting
grapes.
Arise, my consort, my charmer,
and come away!
My dove (7) *hid* in the clefts of
the rocks,
Concealed in the fissures of the
cliffs,
Show me thy (8) *swelling* neck
[*turgid crop,*]
Let me hear thy [*cooing*]
call; (9)
For sweet is thy call,
And thy *swelling* neck is beauti-
ful."
To his Com-
panions. "Catch the jackals, the little
jackals which damage our
fruiteries
Ere their productions come to
maturity.
[*Or, While they have tender*
fruits.]"

BRIDEGROOM *being withdrawn.*

BRIDE. My beloved is mine, and I am
his! (10)
Feeding among lilies!——
When the day breezes, when the
lengthening shadows glimmer,
Then return, then, my beloved,
show thyself like the antelope,
Or the young hart, on the moun-
tains of Bether (11) [*crag*s.]

SECOND DAY. ECLOGUE II.

TIME. *Very late in the EVENING.*
PLACE. *Bride's apartment.*
PERSONS. BRIDE, *sola [or with the LADIES*
of the Harem.]

BRIDE. *Reclined* on my sofa till dusky
night I look around,
I seek him—the beloved of my
heart:
[*Or, I have sought all the long*
evening till dusk; or, till night,
(12)]
I seek him—but I find him not.
What if I rise now, and take a
turn [*a round*] in the city, (13)
In the streets, in the squares;
Seeking him—the beloved of my
heart?——
I may seek him, but not find
him.
What if the watchmen, going
their rounds through all the
city, find me?
"Have ye seen him—the beloved
of my heart?"
I should ask of them:—I might
ask in vain.
But, what if, passing ever so
little a way beyond them,
I find him—the beloved of my
heart?—
I would clasp him, I would not
let him go;
Until I had brought him to the
house of my mother,
To the apartment of my parent
herself.
Then would I adjure you, O
daughters of Jerusalem,
By the *startling* antelopes, by
the *timid* deer of the field,
If ye disturb, if ye discompose
this complete affection,
Till [*Affection*] herself desire
it!

THIRD DAY. ECLOGUE I.

TIME. MORNING.
PLACE. *Bride's chamber window; look-*
ing towards the country.

PERSONS. BRIDE, *and her ATTENDANTS of*
the Harem; looking through
the window.

BRIDE. (*above*) (1) What is that, coming up
from the common fields,
Like a vast (2) column of
smoke?
Fuming with balsams and frank-
incense,
Surpassing all powders of the
perfumer.
That is the (3) palanquin ap-
propriate to SOLOMON himself!
Sixty stout men surround it;
The stoutest heroes of Israel;
Every one of them grasping a
sword; every one of them ex-
pert at arms;
Ready on his thigh the sword of
the commander,
[*A chief,* (4) *fearless*] from
fear in the night.
Superior to fear at all times.
A nuptial palanquin hath king
SOLOMON made for himself?

LADIES, *or*
ATTENDANTS.

BRIDE.

LADIES, or
ATTENDANTS.

O yes! He hath made (5) of
Lebanon-wood [*cedar*] its pil-
lars
Of silver its *top* covering
Of gold its *lower* carriage;
With purple [*aregamen*] its
part [*floor*] is spread,
A present from the daughters of
Jerusalem.

BRIDE.

Go forth, O daughters of Zion,
and behold king SOLOMON
Wearing the (6) head-circlet
with which his mother en-
circled him
In the day of his espousals,
In the day of the gladness of his
heart.

BRIDEGROOM (7) *having seen the face, or person,
of his BRIDE, for the first time, from a distance
—incidentally at her window—by means of this
visit, takes advantage of this opportunity to
praise her beauty.*

BRIDEGROOM.
(below).

Behold, thou art elegant, my
consort, behold, thou art ele-
gant!

Thine eyes are doves peering be-
tween thy (8) locks:

Thy hair is like a flock of
goats, (9)

Long-haired glistening goats
[*descending*] at mount GIL-
EAD;

Thy teeth like a shorn flock (10)
of sheep,

Coming up on (11) mount CAS-
SIUS.

All of them twins to each other!
And not one has lost its fellow
twin.

Like a braid of scarlet are thy
lips;

And the organ of thy voice
[*mouth*] is loveliness.

Blushing (12) like the inner
part of a piece of pomegran-
ate

Is thy cheek [*temple*] beneath
thy locks;

White (13) like the tower of
David is thy neck,

(14) Built on a commanding
eminence;

A thousand shields are sus-
pended around it, *as trophies
of conquest,*

All of them arms of dignity of
valiant heroes.

Thy (15) two nipples are like
two twin fawns of the ante-
lope,

Nibbling lily flowers.

When the day breezes, when the
lengthening shadows glimmer,
I will visit the mountains of
balsam,

The hill of frankincense.

THIRD DAY. ECLOGUE II.

TIME.

EVENING.

PLACE.

*Bride's parlor; in which her
LADIES, etc., are in waiting.*

PERSONS.

BRIDEGROOM, accompanied by
ATTENDANTS, visiting his
BRIDE.

BRIDEGROOM.

Thou art my entire elegance, my
consort,

Not a blemish is in thee.

Be of my party (16) to Leba-
non, my spouse,
Accompany me to Lebanon,
come:

See the prospect from the head
of Amanah,

From the head of Shenir, and of
Hermon,

From Lions' Haunts, from Pan-
ther Mountains.

Thou hast (17) carried off cap-
tive my heart, my sister,
spouse (19), [*partner*]. Thou
hast carried off captive my
heart [*literally, Thou hast
dishearted me*].

By one (18) *sally* of thine eyes,
By one link [*of the chainette*]
of thy neck.

How handsome are thy love-
favors, my sister, my spouse!
(19) [*betrothed*]

How exquisite are thy love-
favors!

How much beyond wine!

And the fragrance of thine es-
sences!—

Beyond all aromatics!

Sweetness—as liquid [*palm*]
honey drops, such drop thy
lips, [*speech*] O spouse:

[*Bee*] honey and milk are under
thy tongue:

And the scent of thy garments
is the sweet scent of cedar.

A garden locked up is my sister,
spouse,

A spring *strictly* locked up, a
fountain *closely* sealed.

Thy plants are shoots of Para-
dise:

[*Or, Around thee shoot plants
of Paradise. (20)*]

Pomegranates, with delicious
fruits;

The *fragrant* henna, with the
nards,

(21) The nard, and the crocus,
And sweet-scented reed, and
cinnamon;

With every tree of incense;

The balsam and the aloe: (22)

With every prime aromatic.

Thou fountain of gardens! thou
source of living waters!

Thou source of streams—even
of Lebanon streams!

BRIDE. North wind, awake! (but [23]
sink, thou southern gale),

Blow on my garden, waft around
its fragrances,

Then let my beloved come into
his garden

And taste the fruits *which he
praises as his delicacies!*

BRIDEGROOM. I am (24) come into my garden,
my sister, spouse, [*betrothed,
trothplight.*]

I gather my balsam with my
aromatics,

I eat my liquid honey with my
firm honey,

I drink my wine with my milk.

Eat, my companions: drink,
drink deeply,

My associate friends!

To his
COMPANIONS.

FOURTH DAY. ECLOGUE I.

TIME.
PLACE.
PERSONS.

MORNING.

Bride's chamber.

BRIDE and her ATTENDANTS:

LADIES of the Harem.

BRIDE,
*relating a
dream to
her visitors.*

I was sleeping, (1) but my
[heart] imagination was
awake:

When methought I heard

The (2) voice [sound] of my
beloved, knocking, and say-
ing:

"Open to me! my sister! my
consort!

My dove! my perfect! [*or im-
maculate beauty!*]

For my head is excessively filled
with dew,

My locks with the drops of the
night."

But I answered:

"I have put off my vest;

How can I put it on?

I have washed my feet;

How can I soil them?"

My beloved put his hand to
open the door by the lock, (3)

(—My heart in its (4) cham-
ber palpitated on account of
him!

I rose to open to my beloved,
(—My hand dropped balsam,

and my fingers self-flowing
balsam,

On the handles of the lock;)

I did open to my beloved;—

But my beloved was turned
away—was gone—

(—My soul [*person, affection*]
sprung forwards to meet his
address.)

I sought him, but could not find
him;

I called him, but he answered
me not.

The watchmen going their
rounds in the city discovered
me,

They struck me, they wounded
me;

They snatched my deep veil it-
self from off me,

Those *surly* keepers of the
walls!

I adjure you, O daughters of
Jerusalem,

If ye should find my beloved,—

What should ye tell him!—

—That I am wounded to faint-
ing by Affection.

LADIES.

Wherein is thy beloved superior
to *other* beloveds,

Most elegant of women,—

Wherein is thy beloved superior
to *other* beloveds,

That thou dost thus adjure us?

My beloved is white and ruddy;

The (5) bright-blazing standard
of ten thousand!

His head is wrought gold—of
the purest quality!

His locks are pendent curls—
black as the raven!

His eyes like (6) doves at a
white-foaming water-fall;

BRIDE,
*describes his
countenance.*

*Describes his
dress.*

LADIES.

BRIDE.

Or, dipping themselves in a
[garden canal—BASIN] stream-
let of milk,

And [*turning themselves, roll-
ing*] sporting in the fullness
[depth] of the pool.

His temples are shrubberies of
odoriferous plants,

Clumps of aromatic trees:

His lips are lilies dropping self-
flowing balsam;

His wrists [*bands, bracelets*]
are circlets of gold,

Full set with topazes;

His waist [*girdle*] is bright
ivory,

Over which the sapphire plays;

His legs [*drawers, etc.*] are col-
umns of marble,

Rising from bases of purest gold
[*his shoes*]:

His figure is *noble* as the cedars
of Lebanon;

Majestic as the cedars of Para-
dise,

His address is sweetness!

[*The very concentration of
sweetness!*]

His whole person is loveliness!

[*The very concentration of love-
liness!*]

Such is my beloved, such is my
consort,

O daughters of Jerusalem!

Whither may thy beloved be
gone,

Most elegant of women?

What course may thy beloved
have taken,

That we might bring him to re-
join thee?

My beloved is gone down to his
garden,

To his shrubberies of odorifer-
ous plants;

To feed in his gardens,

And to gather lilies.

I am my beloved's, and my be-
loved is mine:—

Feeding among lilies!

FOURTH DAY. ECLOGUE II.

TIME.
PLACE.

EVENING.

*Bride's parlor; in which are the
LADIES in waiting, etc.*

PERSONS.

BRIDEGROOM, with his ATTEND-
ANTS, visiting his BRIDE.

BRIDEGROOM.
Fortified cities.

Thou art wholly (8) decorated,
my love, like Tirzah;

Adorned as Jerusalem;

Dazzling as flaming-bannered
ranks.

Wheel about (9) thine eyes
[*glances*] from off my station,

For, indeed, they overpower me!

"Thy (10) hair is as a flock of
goats that appear from

Gilead:

Thy teeth are as a flock of sheep
which go up from the wash-
ing;

Whereof every one beareth twins,
and there is not one barren
among them.

As a piece of pomegranate are
thy temples within thy locks."

A repetition of
Third Day.
Eclogue I.
Common trans-
lation.

Sixty are those queens, and
 eighty those concubines,
 And damsels beyond number;
 But my dove is the very one
 alone;
To me she is my perfect one!
 The very one is she to her
 mother;
 The faultless favorite of her
 parent:
 The damsels saw her;
 And the queens admired her,
 And the concubines extolled her,
saying,
 "Who is this, advancing [*in
 brightness*] like day-break,
 Beauteous as the moon, clearly
 radiant as the sun,
 Dazzling as the streamer-flames
of heaven?" [q. a COMET?]
 To the garden of filberts I had
 gone down,
 To inspect the fruits of the
 brook side;
 Whether the grape were setting;
 Whether the pomegranate flow-
 ered;
 Unawares to my mind, my per-
 son [11, *Affection*] beglided
 itself *back again,*
 More *swiftly* than the chariots
 of my people at a (12) charge
 [*pouring out.*]

BRIDE *rises to go away.*
 Face about, (13) face about,
 SELOMEH?
 Face about, face about!
 That we may (14) reconnoitre
 thee—
 What would you reconnoitre in
 SELOMEH?
*Or, How would you reconnoitre
 Selomeh?*
 Like [*as we do*] retrenchments
 (15) around camps!

FIFTH DAY. ECLOGUE I.

TIME.
 PLACE.

PERSONS.

MORNING.
*Bride's toilette: Bride dressing,
 or recently dressed.*
 BRIDE, and her ATTENDANTS;
 LADIES of the Harem.
 LADIES of the Harem; admir-
 ing the Bride's [*Egyptian?*]
dress.
 How handsomely decorated are
 thy (1) feet in sandals,
 O daughter of [LIBERALITY] (2)
 princes! [*pouring out.*]
 [i. e., *O liberal rewarder of in-
 genuity and merit.*]
 The (3) selvedges [*returns*]
 of thy drawers are like (5)
 open-work, [PINKED,]
 The performance of excellent
 hands!
 Thy (6) girdle-clasp is a round
 goblet,
 (7) Rich in mingled wine;
 Thy [*bodice*] body-VEST is a
 sheaf of wheat,
 Round about with lilies:
 Thy two (8) nipples are two
 twin fawns of the antelope,
Feeding among lilies.
 Thy neck is like an ivory tower:

BRIDEGROOM'S
 COMPANIONS.

 LADIES of
 Harem, or
 BRIDE'S AT-
 TENDANTS.
 BRIDEG. COM.

Thine eyes [*dark with stibium*]
 are like the fish-pools in
 Heshbon, (9)
 By the gate of Beth-rabbim:
 Thy nose is like the tower of
 Lebanon,
 (10) Which looketh toward
 Damascus:
 Thy head-dress upon thee re-
 sembles (11) Carmel;
 And the tresses of thy hair are
 like (12) Aregamen!
 The king is (13) entangled in
 these meanderings! (14)
 [*foldings; plaitings; intrica-
 cies.*]

FIFTH DAY. ECLOGUE II.

TIME.
 PLACE.

PERSONS.
 BRIDEGROOM.

EVENING.
*Bride's parlor; with LADIES,
 etc., in waiting.*
 BRIDEGROOM *visiting his BRIDE.*
 How beautiful, and how rap-
 turous, O love, art thou in de-
 lights!
 Thy very (15) stature equals
 the palm;
 And thy breasts resemble its
 clusters:
 I said, I would climb this palm,
 And would clasp its branches:
 Now shall thy bosom be *odo-
 riferous* as clusters of grapes,
 And the sweetness of thy
 breath like the fragrance of
 citrons.
 Yes, thy [*palate*] (16) address
 resembles exquisite wine,
 [*cordial.*]
 (17) Going as a love-favor to
 associate friends, to consum-
 mate *integrities of love*
 [*or, to friends whose staunch
 friendship has been often ex-
 perienced.*]
 It might make the very lips of
 the sleeping [*of age*] to dis-
 course.

BRIDE.

BRIDEGROOM.

I am my beloved's, (18)
 And toward me are his desires,
 [*or, And my dependence is up-
 on him.*]
 Come, my beloved, let us go out
 into the fields,
 Let us abide in the villages,
 We will rise early to inspect the
 vineyards,
 Whether the vine be setting *its
 fruit,*
 Whether the smaller grape pro-
 trude itself,
 Whether the pomegranates
 flower,
 Whether the (19) *dudaim* [*man-
 drakes*] diffuse their frag-
 rance.
 There will I make thee com-
 plete love-presents;
 For our lofts (20) contain all
 new delicacies [*fruits,*]
 But especially preserved *delica-
 cies,*
 Stored up, my beloved, for thee.
 O wert thou my brother,
 Sucking my mother's breasts,

BRIDE.

Should I find thee in the public street,
I would kiss thee;
Yes, and then would they [*by-standers*] not condemn me:
I would take thee, I would bring thee
To the house of my mother——
BRIDEGROOM. Thou shouldest conduct me (21); i. e., *show me the way thither.*
BRIDE. ——I would give thee to drink scented wine,
Wine I myself had flavored with the sweetness of my pomegranate.
Then, were his left arm under my head,
And his right arm embracing me,
I would charge you, daughters of Jerusalem,
(22) *By the startling antelopes, by the timid deer of the field,*
Wherefore disturb, wherefore discompose this complete Affection,
Till [*Affection*] herself desire it?

SIXTH DAY. ECLOGUE I.

TIME. MORNING: *after the marriage ceremony had recently taken place.*

PLACE. *Front of the palace.*

PERSONS. BRIDE, her ATTENDANTS: BRIDEGROOM, his ATTENDANTS: *all in procession before and after the Royal Palanquin, in which the Royal Pair are seated.*

ATTENDANTS *at the House.* Who is this coming up from the common fields,
In full (1) sociability with her beloved?

BRIDEGROOM. Under the citron-tree (2) I urged thee [*overcame thy bashfulness.*]
There thy mother (3) delivered thee over to me.
There thy parent solemnly delivered thee over to me.

BRIDE. Wear me as a seal on thy heart [*in thy bosom*],
(4) As a seal-ring on thine arm.
For strong as death is Affection;
Its passion unappeasable as the grave:

BRIDEGROOM. Its shafts are shafts of fire,
Thy flame of Deity *itself!* [*vehement as lightning.*]

BRIDE. Mighty waters cannot quench this complete Affection;
Deluges cannot overwhelm it:
If a chief (man) give all the wealth of his house——
In affection, it would be despised as despicable in him.

BRIDE. Our [*cousin, relation*] sister is little,
And (5) her bosom is immature:
What shall we do for our sister,
In the day when her concerns shall be treated of?

BRIDEGROOM. If she be a wall,
We will build on her turrets of silver:

If she be a door-way,
We will frame around her soffits of cedar.
BRIDE. (*aside*) I am a wall—and my breasts are like kiosks (6);
Thence I appeared in his eyes as one in whom he might find peace (7),
[*Absolute Repose; or Prosperity of all kinds.*]

To Bridegroom. Solomon himself *now* has a fruitery at (8) Baal-Ham-aun;
That fruitery is committed to (9) inspectors;
The chief (10) tenant shall bring *as rent* for its fruits,
A thousand silverlings.
My fruitery, my own, my own inspection,
Will yield a thousand to thee,
Solomon:
But (11) two hundred are due to the inspectors of its fruits.

BRIDEGROOM. O thou [*Dove*] who residest in gardens,
Thy companions listening await thy [*cooing*] voice,
Let me especially hear it!

BRIDE. Fly to me swiftly, my beloved,
And show thyself to be like the antelope or the young hart,
On the mountains of aromatics!

(7) Illustrations of the Proposed Version.

We are now prepared to review the characters of the principal speakers in this interesting poem. The bride has been a ranger of parks, plantations, etc., is fond of gardens and rural enjoyment, and has a property of her own, of the same nature; yet is a person of complete elegance of taste and of manners; magnificent in her personal ornaments and liberal in her disposition. She has been educated by her mother with the tenderest affection, and is her only daughter; though her mother has several sons. The bridegroom is noble in his person, magnificent in his equipage, palace and pleasures; active, military, of pleasing address and compliment, and one on whom his exalted rank and station sit remarkably easy. The bride's mother does not speak in any part of the poem; it is only by what is said of her that we find she accompanied her daughter: whether this personage be her *natural* mother, or any confidential friend, deputed to that office, might engage conjecture. The bride's companions speak but little; we think only once, at the close of the fourth day, if then. The bridegroom's companions speak also only on the same occasion. The ladies of the harem, or visitors to the bride, are the first persons to compliment and to cheer her; and we think they seem to accompany in her train throughout the poem. It is likely that these visitors praise her in the first day, describe the palanquin in the third day, converse with the bride in the fourth day, and admire her dress in the fifth day. These parts have hitherto been attributed to the bride's *Egyptian* attendants; but we rather suppose the information they give, and the sentiments they communicate, imply persons well acquainted with the bridegroom and his court—that is, *Jewish* attendants, maids of honor to the bride—or, may these passages be spoken by the queen mother of the bridegroom? (See *QUEEN MOTHER.*) Some other persons also speak once at the opening of the sixth day; their remark indicates that they stand near, or at the palace; for want of more precise

knowledge of them they are called "Attendants at the house;" say, the chief officers of the palace. But is this spoken by the ladies of the Harem or by the queen mother?

FIRST DAY. (1) *May He Salute Me with Affectionate Salutations!* Though the import of the word *neshek* undoubtedly is to *kiss*, yet, in several passages of Scripture, it implies no more than mere salutation or addressing—a compliment paid on view of a person or object. So those who are said, in our translation, to have "*kissed* the image of Baal," did not kiss that image, strictly speaking, but *kissed toward* it; that is to say, they kissed their hands, and referred that action to the image; or kissed at a distance from it—addressed it respectfully by the *salaam* of the East. (See ADORATION; KISS.) This expression of the bride, then, implies simply an apprehension of fear (united with a wish to the contrary), that when the bridegroom sees her he may think slightly of her person, her qualities, or attractions, and may refrain from paying his addresses to her. In reply, the ladies commend her beauty, and cheer her modest solicitude by praising her attractions and her elegances. They do not indeed praise her person, because, according to the customs and *decencies* of the country, the bridegroom cannot yet see *that*; they only praise her general appearance, and what must first strike a beholder—what are most noticeable at the earliest interview—at a first approach—that is, her polite manners and deportment; also her perfumes, to the diffusion of which they compare her renown for beauty. The importance of perfumes in the East is very great; the lovers of the Arabian poets never omit to notice this attraction of their mistresses.

"When the two nymphs arose they diffused fragrance around them,
As the zephyr scatters perfume from the Indian flower.

Do not the perfumes of Khozami breathe?
Is it the fragrance of Hazer from Mecca, or the odor diffusing from Azza?

She resembled the moon, and she waved like the branches of Myrobalan.
She diffused perfume like the ambergris, and looked beautiful like the fawn."

Agreeably to this we find in Scripture the remark that "Ointment and perfume rejoice the heart" (Prov. xxvii:9), and Isaiah, describing a female desirous of pleasing her paramour, represents her as "*increasing her perfumes*" (chap. lvii:9). (See also Esth. ii:12; Ps. xlv:8; Prov. vii:17.) The reader will observe the distance to which these perfumes are understood to extend their fragrance; and, relatively, that to which the bride's beauty was famous.

(2) *Love-Favors*. It is usual to render this word (*dudi*) *loves*—but, by considering (1) that the *ladies* say they shall commemorate the (*dudi*) *loves* of the bride; (2) that (*dudi*) *loves* are said to be *poured out* as from a bottle, or to be sent as presents to persons of integrities (*plural*); (3) that the spouse invites the bride into the country, where he would give her his (*dudi*) *loves*,—it appears that love-presents of some kind are the articles meant by the word. Suppose, for instance, the bride presented the ladies with curiously-worked handkerchiefs (as is customary in the East), the ladies might look on them, at a distance of time afterwards, with a pleasing recollection of the person by whom they were given;

as is customary among ourselves. Such tokens are not valued for their intrinsic worth, but for the sake of the giver; and were it not trivial, we might quote a common inscription on this subject as coincident with the spirit of this passage, "When this you see, remember me." What other than a present of love can be *poured out* from a bottle—delicious wine, that might rouse the drowsy to discourse? Or why does the Spouse invite his Bride into the country, but in order to present her with its best productions; some of which, he tells her, were *stored up*, and expressly reserved for her reception? Such is the meaning of this word, in this place: favors bestowed as the effect of love—to remunerate love; or designed to conciliate love, to excite regard toward the presenter of the gift. We have used the word *favors*, since that word implies, occasionally, personal decorations; as at marriages, ribands, etc., given by the bride to the attendants, or others, are termed *bride-favors*, or simply *favors*.

(3) The bride proceeds to invite her visitors (as we suppose) into the interior of her apartments; and, from good manners, desires them to precede her; which they, with equal good manners, decline. The word *meshek* signifies to advance toward a place; as (Judg. iv:6), "Go and *draw toward* mount Tabor, and take with thee ten thousand men;" that is, *go first* to mount Tabor, and be followed by thine army—head thine army—*precede it*. (Job xxi:33), "He goeth to the grave, where he (*meshek*) *precedes* a great many men; and so draws them toward him; as he himself has been *preceded* by many who have died before him." (Job xxviii:18,) "The price, (*meshek*), the *precedence* of wisdom—its attraction—is preferable to rubies." Jer. xxxi:3, "I have loved thee with an everlasting love; therefore with loving kindness have I *preceded* thee;" as we say, been beforehand with thee, "drawn thee toward me." Such appears to be the import of the word, which, therefore, is in this place rendered—lead the way, that is, *precede me*.

(4) *The king's chamber*. This word, though usually rendered *chamber*, can only mean, in general, his apartments, his residence. (Deut. xxxii:25. Marg.; Prov. xxiv:4; Jer. xxxv:2.) We have among ourselves an instance of a similar application of the word *chamber*. In Richard III. Shakespeare makes Buckingham say to the young king, "Welcome, sweet prince, to London, *to your chamber*;" the reason is, London, from being the usual residence of the king, was called *camera regis*, "the king's chamber." It might justly be rendered "rooms;" so we have the *rooms* at Bath, at Margate, etc., or chambers in a palace—as the ever-memorable Star chamber, the Jerusalem chamber, the painted chamber, etc., that is, apartments. But here it evidently means the *Harem*, or women's apartment, the secluded chamber into which the bride invites the ladies; and where the latter part of this eclogue passes, being transferred, as we suppose, from the parlor below to the *Harem* above; or from the parlor *exterior*, to the *Harem interior*.

(5) *Treated me contemptuously*, literally "*snorted at me*;" which, perhaps, might be rendered by our English phrase, "turned up their noses at me;" but how would that read in a poem? To *spurn* does not correctly express the idea, as that action rather refers to a motion of the foot; whereas, this term expresses a movement of a feature, or of the entire countenance.

(6) *Inspectress of the fruiteries*. This, we imagine, is somewhat analogous to our office of ranger of a royal park; an office of some dignity,

and of more emolument; it is bestowed on individuals of noble families among ourselves; and is sometimes held by females of the most exalted rank; as the princess Sophia of Gloucester, who was ranger of a part of Bagshot park; the princess of Wales, who was ranger of Greenwich park, etc., and the office is consistent even with royal dignity. This lady, then, was appointed ranger—governess, directress of these plantations; which appears to have been perfectly agreeable to her natural taste and disposition, although she alludes, with great modesty, to her exposure to the sun's rays, in a more southern climate, by means of this office, as an apology for a complexion which might be thought by Jerusalem females to be somewhat tanned.

(7) *Fruiteries*. The word signifies not restrictively *vineyards*, but places producing various kinds of plants; for we find the *al-henna* came from "the *fruiteries* of En-gedi," the *plantations*, not merely *vineyards*, of "the fountain of Gadi," or the "springs of Gadi," chap. i:14. See No. 12, below.

(8) *Beloved of my heart*, strictly, *beloved by my person*; but as this is rather an uncouth phrase in English, the reader will excuse the substitution of one more familiar. The word is very improperly rendered *soul*, by our translators, throughout the Old Testament, though the usage of their time, as appears from the best writers, pleads strongly in their excuse.—"That *soul* shall die"—"that *soul* shall be cut off," read *person*; for in many places the actions and functions, or qualities, of the body, are attributed to it; sometimes those of a living body, sometimes those of a dead body; where we cannot suppose it means a dead *soul*. It may be considered as a general word, expressing a person's *self*; and Sir William Jones was obliged to use this term *self*, on more than one occasion, in translating a cognate word from the Arabic; as, for instance—"he threw his *self* into the water," where it would be extremely erroneous to say, "his *soul*," in our common acceptance of that term.

(9) *Elegant*. We observed, in considering the Ship of Tyre, that the word *ipi* might refer less to beauty of person than has been thought. We suppose our word *handsome* may answer to it, in a general sense; and we say, not only a handsome person, but a handsome dress, handsome behavior, speech, etc. We have preferred the term *elegant* as implying all these ideas, and as being more usually connected with person and manners; for we rather say, a lady of *elegant* manners, than of *handsome* manners.

(10) This passage is examined in the article on MARRIAGE PROCESSIONS. The principles of that explanation seem to be just. Otherwise the comparison might be, "To my own mare, which is the prime among the high-bred horses I have received from Pharaoh."

(11) *Circle*. This is precisely according to the usages of the East; the royal personage sits on his scat, and his friends stand round him, on each side, forming a segment of a circle. The friends of the bridegroom are, we suppose, his companions; but on this first visit he might, perhaps, be accompanied by other attendants, for the greater dignity and brilliancy of the interview. Nevertheless, thirty companions might form a sufficient circle; and one can hardly suppose the king of Israel had fewer than Samson (at that time a private person) (Judg. xiv:10 and Ps. cxxviii:3).

(12) *Al-Henna*. (See KOPHER). "The *plantations*, or *fruiteries*, of En-gedi." These were not far from Jericho; they did not so much contain

as aromatic shrubs, including, perhaps, the famous balsam of Judea. It may be thought from Ezck. xlvii:10 that En-gedi was a *watery* situation; perhaps not far from the river, besides being itself a fountain. This agrees with Dr. Shaw's account of *al-henna*; he says, it requires much water; as well as the palm, for which tree Jericho was famous, and from which it derived an appellation.

(13) *Elegant; magnificent*. We think the bridegroom here compliments his bride on the *general* elegance of her appearance (*ipi*); for, as she is veiled all over, he cannot see the features of her countenance; he catches, however, a glimpse of her eyes through her veil, and those he praises, as being *doves*, for which we refer to a following remark. (See VEIL.) She returns the compliment, by praising his elegance (*ipi*); but as this elegance refers to his palace, it seems here to be properly rendered *magnificence*, which, indeed, as we have observed, is its meaning elsewhere. She notices this *magnificence*, as displayed in the cedar, and other costly woods, which adorned those apartments of the palace into which she had been conducted; not forgetting that ever-acceptable ornament in the East, the *green grass-plot* before the door, which, besides being *green*, was also in this palace adorned with the most stately and brilliant flowers, compared to which, says the bride, I am not worthy of mention; I am not a palace-flower, not a fragrant rose, carefully cultivated in a costly vase; or a noble lily, planted in a rich and favorable soil; I am a rose of the field, a lily from the side of the humble water-course, the simple—the shaded valley. To this, her self-degradation, the bridegroom returns an affectionate dissent; and here concludes their first interview, whose chief characteristics may be gathered from observing that it is (1) short, (2) distant, (3) general, (4) that not the slightest approach to any *freedom* between the parties is discoverable in it; which perfectly agrees with our ideas on the import of the opening line of this eclogue.

(14) *Green; Flowery*. It has been remarked that the word here used has both these significations; and if, as we suppose, it refers to the *green* grass before the pavilion, and to the flowers and flowering shrubs, in pots and vases, standing close by the pavilion, it is applicable to both ideas. On this subject there is an appropriate passage in Tavernier: "I never left the court of Persia, but some of the lords, especially four of the white eunuchs, begged of me to bring some flowers out of France, for *they have every one a garden before their chamber door*; and happy is he that can present the king with a posy of flowers in a crystal flower pot."

(15) *Palace*. We know also that banquets, etc., are held in gardens adjoining the residences of persons of opulence in the East; and when Ahasuerus, rising from table, went into the *palace-garden* (Esth. vii:7), he had not far to go, but might quit the banquet chamber and return to it in an instant, for evidently the garden was adjacent. The idea of flowery verdure also applies to the rendering of *oresh—carpet*, or *covering*; not *bed*. (See BED.) That a *bed* for sleeping on should be *green* is no great proof of *magnificence*; but an extensive *bed* of flowers, as it were, in full view of a parlor opening into it, would at once delight the senses of sight and smell, and would deserve mention when elegances were the subjects of discourse.

(16) *Garden*. After the bridegroom is withdrawn the bride expresses herself to the ladies

with less reserve. Her conversation no longer refers to the palace, but to her beloved; she resumes the recently suggested simile of the citron tree, which, being a garden plant, naturally leads her thoughts to a *kiosk* in a garden, where, when they should be in private together, they might partake of refreshments; and while they should be sitting on the *duan* (see *BED*) he might rest his arm on the cushion which supported her head, while his right arm was free to offer her refreshments, citrons, etc., or to embrace her. She concludes by saying that, in such a pleasing seclusion, she would not choose their mutual affection should be interrupted, and alludes to the *very* startling antelopes and deer as the most timid creatures she could select, and those most likely to be frightened at intrusion on their retreats.

(17) *Deep Shadow*. As the orange tree does not grow to any height or extent in Britain, answerable to this idea of a *deep* shadow, we must take the opinion of those who have seen it in, or near, perfection; a single witness may be sufficient, if the orange trees of Judea may be estimated by those of Spain. No doubt but the bride's comparison implies a noble tree, a grand tree of its kind. The following are from Mr. Swinburn's *Travels in Spain*: "The day was sultry, and I could with pleasure have *loll'd it out in the prior's garden*, under the shade of a noble lemon tree, *refreshed by the soft perfumes ascending on every side*, from the neighboring orchards. * * * Being very hot and hungry, we made the best of our way home, through *large plantations of orange trees*, which here grow to the size of moderate timber trees; the fruit is much more pleasing to the eye, if less so to the palate, than the oranges of Portugal, as the rich blood color is admirably contrasted with the bright tint of the leaves." (Pp. 250, 260.)

(18) *Citron*. That the fruit here meant is not "apples," but *citrons*, is now so generally admitted that we need not stay to prove it; nevertheless, it is proper to mention it, that this rendering may not seem to be adopted without authority. Almost every writer has *proofs* on this subject. (See *APPLE TREE*.)

THE SECOND DAY. (1) *Bride at Her Window hears the hunting-horn*. This we think probable from what follows; the directions of the bridegroom to his companions to catch the jackals partly prove it; perhaps, however, the poet hints, that though, when he set out, the prince designed to be of their party, yet, after conversation with his beloved, he is tempted to send them alone on that expedition. It is very natural that this passing by the bride's windows should occur, if Solomon dwelt below, and was going out at a gate above, in the palace; or even if his chase were restricted to the area within the walls it might easily lead him to pass the upper wing of the palace and the windows of the harem.

(2) *Music*. This is considered in the article on *MARRIAGE PROCESSIONS*. Are not these hills, these rising grounds, within the park of the palace? If so, then perhaps the bridegroom, in a following day, invites his bride to no very distant or very dangerous "lions' haunts," or "panther mountains"—but to hillocks, etc., in his park, known by these appellations. We say *perhaps*, because, though such names are given to parts of a royal palace in the East, yet the mention of Lebanon seems to infer a more distant excursion.

(3) *Seated in his (4) carriage*. (See the plate of vehicle, p. 362.) Also for (5) the *windows*; and for (6) the *blinds*, or *lattices*.

(7) *My Dove hid in the clefts of the rocks*. To understand this simile, consider the bridegroom as being in the garden, *below* the windows of the chamber, within which openings the bride is seen by him; now, windows in the East are not only narrow, but they have cross-bars, like those of our sashes, in them; the interposition of these prevents a full view of the lady's person, so that she resembles a dove, peeping, as it were, over, or from within, the clefts in a rock; and only partly visible; that is, *retiring*, her head and neck, or crop, "which," says the bridegroom, "though I can but just discern, I perceive is lovely." Observe, too, that she is closely veiled; the *retiring*, *timid* dove, therefore, is the comparison. The bridegroom continues the simile of the dove, praises (8) her turgid crop and her pleasant voice; this, in a dove, can only be the (9) cooing, or call, of that bird, which, under this simile, he desires to hear directed toward himself.

(10) *My beloved is mine, and I am his*. Does this mean: "I am all obedience to his requests? Our enjoyments now are mutual, and it shall be my happiness to accomplish his desires?" What is the import of the phrase "feeding among lilies?" Who feeds?—who is fed?—why among lilies?

(11) *Bether*. This might be rendered "the craggy mountains;" and if it were certain that the *ibex* or rock-goat, or the *chamois*, was that particular species of gazelle which we have rendered "antelope," it might be very proper to preserve that translation; but as Egypt is not a mountainous country, but a valley, could the bride know anything of the rock-goat? On the other hand, were the mountains of *Bether* famous for swift goats?—and how should the bride know that particular?

(12) *Till night I seek him*; meaning I have waited for my beloved all the evening, and now, though it be too late to expect his company, still I seek him; my disappointment is great; but how to remedy it? Shall I go into the city? for I am sure he is not at home. I am sure if he were in the palace he would visit me. The whole of this speech is supposed to be in the *optative* mood; we have rather used the *subjunctive* English mood as more likely to convey its true import.

(13) *City*. We would suggest that the bride does not mean the *City of Jerusalem*, but the streets, the broad places, the handsome courts, squares, etc., of the City of David, her present royal residence. Under this idea, should she venture on an evening *promenade*, she would be near her apartments and never beyond the walls of her palace; but even this she declines, not choosing to expose herself to incidental meetings with the guards or watchmen. To suppose that she has any inclination to ramble in Jerusalem at large is to forget that she is a foreigner, and very recently arrived. How could she know her way about that city?

THE THIRD DAY. (1) *What is that—?* In the original, "*Who is that—?*" But this has been regarded as an error of transcribers. If the original word were *what*, then the palanquin is the subject of this inquiry, and to this the answer is given. If the original word were *who*, then the answer implies that the royal owner was seated in this vehicle. But there appears no subsequent reference to him. We have rather thought that the general turn of the question leads to the word *what*; the reader will take his choice, as either word implies the same import and will justify the same answer.

(2) *Vast column of smoke*. This strong expression (plural) is by no means too strong for

the poet's design; the word is used in Joel ii:30 to denote the smoke of a volcano or other *abundant* discharge of smoke, rising high in the air like a cloud. The immense quantity of perfumes burning around the approaching visitor is alluded to with very great address under this *prodigious* comparison. The burning of perfumes in the East, in the preceding part of processions, is both very ancient and very general. Deities (images) were probably the first honored with this ceremony, and afterward their supposed vice-gerent, human divinities. The English people have a relic of the same custom still existing among them in the flowers, strewed or borne in public processions, at coronations, etc., and before great officers of state, as the lord chancellor, the speaker of the House of Commons; and in some corporations the *mace*, as an ensign of office, has the same origin, though now reduced to a gilded ornament only.

(3) *Palanquin*. (See the plate of vehicle, p. 362.)

(4) *Fearless*. We rather think this epithet describes the commander of these guards, "the man," that is, the head man, or chief (see No. 10 of the SIXTH DAY), as a brave fellow; of tried courage, void of fear in the very darkest night, or rather at all times. The composition of the Hebrew word (with נ) favors this thought, and we think had not the bed, the sleeping bed, unluckily preceded it, this word would not have been deviated by translators from its proper import, to which we have endeavored to restore it.

(5) This passage would startle the reader if he had not been prepared for it by what we have already said. This arrangement of the words is unusual in Hebrew, yet in poetry is very natural; it merely refers the subject described to the following words describing it, instead of the foregoing words, to which it has hitherto been usual to refer it. We shall see by the plates the proprieties which accompany, as natural inferences, this manner of regulating the passage. (See the plate of vehicle, p. 362.)

(6) *Head-Circlet*. This might be rendered *bandeau*; but then we could not have preserved the play of words, for to have said, "the *bandeau* with which his mother *banded*, or *bandaged*, his head," would have been intolerable; the expression in our language becomes ludicrous; we have, therefore, preferred *circlet*, with which his mother *encircled* him. What this *circlet* was, we may see on another occasion more fully; but the plate of the bridegroom's dress will assist us in part. (See p. 364.)

(7) *Bridegroom, having seen his bride for the first time*. This we infer, because this is his first description of her, or the first compliment he pays to her person; he praised, in the first day, her general deportment; on the second day he only compared her neck to that of a dove, *that* being all he had yet seen; but now the poet seems to say that he takes advantage of her contemplation of the royal palanquin to inspect her countenance, which also she has suffered to be seen, partially at least (see Nos. 7 and 8 of the SECOND DAY). Observe, he only praises so much of her person as we may suppose he could discern, while she was standing behind the window; that is to say, her face, her hair (seen in front), her neck, and her bosom; having caught a glimpse of these he praises them, but his bride has modestly stolen away, and returns no answer. She hears him, no doubt, with internal pleasure; but the complete sight of her being a favor not yet to be granted, she withholds her approbation from the incident which had been too much his friend.

Observe the art of the poet, who introduces an incident whereby he favors the Lover with a gratification to which he was not, strictly speaking, entitled, yet contrives to save the delicacy of his bride entirely harmless and irreproachable. He gives to the bride the choice of what time—how long—she would continue at the window, yet from the accident of her going to the window without her veil, if the introduction of his palanquin were a *plot* in the bridegroom, we perceive, by his subsequent discourse, that his plot had succeeded; and this without the smallest imputation on the delicacy of the person who was the object of his contrivance.

(8) *Between thy locks*. The word rendered *locks* seems to imply that portion of—those curls of—the hair which plays around the forehead; whereas, the word rendered *tresses* seems to denote those braids which fall down the back of the wearer (see the plate of the Bride's Dress below.) Agreeably to this supposition, we do not recollect that the king has praised her *tresses*, because he had not seen them, having only seen his Lady in *front*; but he praises her *locks* two or three times, they being such parts of her hair as, in beholding her person in *front*, naturally met his inspection.

(9, 10) There is an opposition in this passage which requires elucidation. Thy hair, or braids of hair, falling on thy shoulders, are like the long hairs of the Angora species of goat, whose staple is of great length, and very silky (some of them have been made into muffs for our ladies), which hang down, but bend and wave in hanging. *Opposed* to this is a flock of sheep, closely shorn, trimmed of their wool; no superfluity, but uniform and perfect neatness. The goats are *descending* at Mount Gilead, where, we suppose, the way was winding and tortuous, making the flock appear the longer and more numerous to a person standing at the foot of the mount; the sheep are *coming up* on Mount Cassius; suppose such a road, as apparently or really compresses them into one company (especially if seen by a person standing on the top of the mount), or which only admits two at a time to pass along it. Mount Gilead was at the extremity of Judea, north; Mount Cassius was at the extremity of Judea, south. The contrast is that of long hair lengthened by convolutions of descent, opposed to the utmost smoothness contracted into the narrowest space.

(11) As to the rendering of "Mount Cassius," instead of "the washing;" (1) It rises from reading the original as two words instead of one, which, in fact, does not deserve the name of an alteration; (2) as Mount Gilead is a place the parallelism requires a place for this verse, which (3) the oppositions we have above remarked fully justify. This correction restores the poetry of the passage, and is perfectly agreeable to the usages of Hebrew poetry in general, and of this song in particular.

(12, 13) *Blushing white*. These verses, we apprehend, maintain an *opposition* of a nature similar to that illustrated in the foregoing remarks—*blushing* like a pomegranate; *white* as a marble tower. We presume that the inference of *blushing* is not to the flower of the pomegranate, but to the inner part of its rind when the fruit is cut open, which certainly is sufficiently blushing. The comparison of the female complexion to the rind, or skin, of ruddy fruits is common in all nations. Comparisons derived from the blushes of the peach are used not only in good company but by good writers.

(14) *The tower of David, built on a command-*

ing eminence. Probably this tower was part of the palace of David, or it might be a guard-house, which stood alone on some hillock of his royal residence. The allusion, we presume, is to the lady's neck rising from her shoulders and bosom, majestically slender, graceful and delicate as the clearest marble, of which material, probably, this tower of David was constructed. On the neck of this lady was hung, by way of ornament, a row or collet of gems, some of which were polished, prominent and oval in shape; these the speaker assimilates to the shields which were hung round the tower of David, as military embellishments. We would ask, however, whether these shields, thus hung on the *outside* of this tower, were not trophies taken from the vanquished; if so, antiquity explains this custom at once, and the royal lover may be understood as saying, "My father David hung many shields of those warriors who may have subdued many shields of the mighty, as trophies of his prowess, around the tower which he built as an armory; trophies no less splendid, and of conquests no less numerous over princes vanquished by your beauty, adorn your neck" (see 1 Macc. iv:57). This is not all, as the word for *shields* seems to imply a shield borne before a warrior, as before Goliath, when subdued by David (1 Sam. xvii:7).

(15) *Thy two nipples.* Here we cannot, we apprehend, adopt any other rendering, for the simile seems to allude to two young red antelopes, who, feeding among lilies, and being much shorter than the flowers, are wholly obscured by them, except the tips of their noses, which they *put up* to reach the flowers, growing on their majestic stems. As these red tips are seen among the white lilies, so are the nipples just discernible through the transparent gauze, or muslin, which covers the lady's bosom. Otherwise, the breast itself is compared to lilies, on account of its whiteness, above which peeps up the red nose of the beautiful gazelle.

(16) *Lebanon.* This may be understood as if he had said, "Your Egypt is a low, a level country, but we have here most delightful and extensive prospects. What a vast country we see from Mount Lebanon!" etc. And this may very possibly be the true sense of the invitation; but we submit, whether these appellations were not names of places within the precincts of the royal park. Such occur in the East, and to such, we suspect, is the allusion of this passage.

(17) *Carried captive my heart.* robbed me of my heart and carried it off, as a prisoner of war, into slavery; so we say among ourselves, such a one has "lost his heart," "his heart is captivated," which is the idea here.

(18) *By one sally of thine eyes*—that is, of which I just get a glimpse, behind or between thy veil; or, of which the sparkles, shooting through thy veil, reach me, and that with irresistible effect, even to my heart's captivity, as above. The comparison of glances of the eyes to *darts*, or other weapons, is common in the poets.

(19) *Spouse.* The first time we meet with this word, *calah*, it implies *bride*; but, we think it is capable of being referred to either sex, like our word *spouse*. The bridegroom adds, *my sister* (see ABRAHAM), but the bride, in her answer, though she adopts the word *spouse*, yet omits the term *brother*; we suppose, because that was understood to convey a freedom not yet becoming her modesty to assume; she goes so far, but no farther. The reader will perceive several words attached, in elucidation of this appellation, to the places where it occurs.

(20) *Around thee shoot plants*—literally, "thy shoots are plants," etc. By means of this supple-

ment, we presume, the ideas of the poet are, for the first time, rendered clear, correct and connected. The importance of water, fountains, springs, etc., in the East is well known; but the peculiar importance of this article to a garden, and that garden appropriated to aromatic plants, must be very striking to an Oriental reader. By way of meeting some ideas that have been suggested, we shall add, that the bride is a fountain, etc., securely locked up from the bridegroom, at present; that is, he is not yet privileged to have complete access to her. What the advantages of water to a garden of aromatics might be we may guess from the nature of the plants. The following extract from Swinburne may contribute to assist our conjectures: "A large party of sprightly damsels and young men that were walking here were much indebted to us for making the water-works play by means of a small bribe to the keeper. Nothing can be more delicious than these sprinklings on a hot day; *all the flowers seemed to acquire new vigor; the odors exhaled from the orange, citron and lemon trees grew more poignant, more balsamic*, and the company ten times more alive than they were; it was a true April shower. We sauntered near two hours in the groves, *till we were quite in ecstasy with sweets*. It is a most heavenly residence in spring, and I should think the summer heats might be tempered and rendered supportable enough by the profusion of water that they enjoy at Seville." (*Travels in Spain*, p. 252.) The following description of his mistress, by an Arabian lover, in Richardson's *Arab. Gram.* (p. 151), bears much similitude to several allusions in the poem before us:

Her mouth was like the Solomon's seal,
And her cheeks like anemones,
And her lips like two carnations,
And her teeth like pearls set in coral,
And her forehead like the new moon;
And her lips were sweeter than honey,
And colder than the pure water.

How very different from our own is that climate wherein the *coldness* of pure water is a subject of admiration!—a comparison to the lips of the fair!

(21) *The nard.* As this plant occurs in the close of the former verse, should it again occur here? Can the words be differently connected? or is a word unfortunately dropped? or what fragrant shrub should be substituted for the *nard*? but observe that in one passage the word *nard* is singular, in the other it is plural. (See NERD.)

(22) We are so accustomed to consider the *aloe* as a *bitter*, because of the medical drug of that name (an inspissated juice), that we are hardly prepared to receive this allusion to the delicious scent of the flowers of this plant; but that it justly possesses and maintains a place among the most fragrant aromatics, we are well assured: "This morning, like many of the foregoing ones, was delicious; the sun rose gloriously out of the sea, and the air all around was perfumed with the effluvia of the aloe, as its rays sucked up the dew from the leaves." (Swinburne's *Travels in Spain*. Letters xii.)

(23) *Sink, thou southern gale.* On this avertive sense of the word BA, see the article SHILOH. Had this sentiment been uttered in England we should have reversed the injunction; but in Judea the heat of the south wind would have suffocated the fragrant of the garden, to which the north wind would have been every way favorable. To desire the north wind to blow at the same time

when the south wind blows is surely perverted philosophy.

(24) *I am come into my garden*; that is, I already enjoy the pleasure of your company and conversation; these are as grateful to my mind as delicious food could be to my palate; I could not drink wine and milk with greater satisfaction; *I am enjoying it*. And you, my friends, partake the relish of those pleasures which you hear from the lips of my beloved, and of those elegances which you behold in her deportment and address."

THE FOURTH DAY. (1) The bride says explicitly that these occurrences happened in a dream, "*I slept*"—which at once removes all ideas of indelicacy, as to the bridegroom's attempt to visit her, her going to the door, standing there, calling him, being found by the watchmen, beaten, wounded, etc. Moreover, she seems to have supposed herself to be previously married, by mentioning her *radid*, or deep veil, which in reality, we presume, she had not yet worn, as the marriage had not actually taken place; and, though betrothed, she probably did not wear it till the wedding. That the word *heart* in this passage means *imagination*, dreaming imagination, fancy, appears from Eccles. ii:23: "The days of laborious man are sorrows; his doing vexations, yea, even *in the night time his heart does not rest*;" he is still dreaming of, still engaged about the subject of his daily labors. This sense of the word *heart* is not uncommon in the Proverbs.

(2) *The voice*, that is, sound, of my beloved, knocking. For the same reasons for which we have rendered voice, *music*, in the SECOND DAY (2), we have rendered voice, *sound*, in this place; since the sound of a rapping against a door is not properly a voice, and since the word bears a more general sense than voice, restrictively.

(3) *Lock*. On the nature of the locks used in the East, Mr. Harmer has said something, and we mean to say more elsewhere, with a plate and explanation.

(4) *Chamber of my heart*. (See the article SHIP.)

(5) *Standard of ten thousand—chief*, say many—*standard*, say others—*he for whom the standard is borne*, say some, observing that the word has a passive import (the standard was a fiery beacon); *he who carries this beacon*—no, that is too laborious—*he for whom*, in whose honor, to light whom, *this standard is carried*; he who shines, glitters, dazzles, by the light of it; and lastly comes the present elucidator—what forbids that this royal bridegroom should himself be the standard that leads, that precedes, that is followed by—imitated by—ten thousand? So Shakespeare describes Hotspur:

His honor stuck upon him, as the sun
In the gray vault of heaven, and by his light
Did all the chivalry of England move
To do brave acts; he was indeed the glass
Wherein the noble youth did dress themselves.
.....So that, in speech, in gait,
In diet, in affections of delight,
In military rules, humors of blood,
He was the mark and glass, copy and book,
That fashioned others!—And him—O wondrous him!
O, miracle of men!

(6) *His eyes are like doves*. Nothing can more strikingly evince the necessity for acquaintance with the East, as well in its natural history as in other matters, than this passage, and the other passages in which eyes are compared to doves;

our translators say "to the eyes of doves," which, as it may be understood to imply meekness, tenderness, etc., has usually passed without correction; but the facts are (1) that our translators have added the word *eyes*; and (2) that they took black for white. They had in their minds the *white* pigeon, or at least the light-colored turtle dove; whereas the most common pigeon, or dove, in the East is the *deep blue*, or *blue-gray* pigeon, whose brilliant plumage vibrates around his neck every sparkling hue, every dazzling flash of color; and to this pigeon the comparison of the author refers. The deep blue pigeon, standing amid the foam of a water-fall, would be a blue center, surrounded by a white space on each side of him, analogous to the iris of the eye, surrounded by the white of the eye. But as the foam of this water-fall is not brilliant enough to satisfy the poet, he has placed this deep blue pigeon in a pond of milk, or in a garden basin of milk, where, he says, he *turns himself round*, to parallel the *dipping* of the former verse; he wantons, sports, frisks; so sportive, rolling and glittering is the eye, the iris of my beloved. The milk, then, denotes the white of the eye, and the pigeon surrounded by it the iris; that is, "the iris of his eye is like a deep blue pigeon, standing in the center of a pool of milk." The comparison is certainly extremely poetical and picturesque. Those who can make sense of our translation are extremely favored in point of ingenuity. This idea had not escaped the poets of Hindostan, for we have in the *Gitagovinda* the following passage: "The glances of her eyes played like a pair of water-birds of azure plumage, that sport near a full-blown lotus on a pool in the season of dew." The pools of Heshbon afford a different comparison to the eyes of the bride; dark, deep, and serene are her eyes; so are those pools, dark, deep and serene—but were they also surrounded by a border of dark-colored marble, analogous to the border of *stibium* drawn along the eyelids of the spouse, and rendering them apparently larger, fuller, deeper? As this comparison is used where ornaments of dress are the particular subjects of consideration, we think it not impossible to be correct; and certainly it is by no means contradictory to the ideas contained in the simile recently illustrated. (See No. 9 in the FIFTH DAY.) For particulars of the dress, see the plates of dresses and their explanations, *infra*.

(7) *Decorated as Tirzah*, etc. The whole of this eclogue, we apprehend, is composed of military allusions and phrases; consequently, the cities, with the mention of which it opens, were those most famous for handsome fortifications. "Thou art (Ipi) decorated as Tirzah (Naweh); adorned as Jerusalem (Aimeh); ornamented in a splendid, sparkling, radiant manner, as bannered ranks, or corps of soldiers, are ornamented, which is not far from the compliment formerly paid her as resembling an officer of cavalry, riding with dignity among the horse of Pharaoh; nor is it unlike the reference of the prince himself to a (fiery) standard, in the preceding eclogue. See what is said on the banner of the heavens in a following verse; these banners, we must recollect, were flaming fire-pots, usually carried on the top of a staff.

(8) *Wheel about thine eyes*. Literally, *do that return*, or, at least, *turn round*; but this phrase is not in our language either military or poetical; we have, therefore, adopted a word of command whose import is of the same nature and whose application has been sufficiently familiar to us of late.

(9) *My station*. Literally, my region, the ground

I occupy with my troops, my post, in a military sense; which station you attack, and by your attack force me to give ground, to retire; you drive me off, overpower me, advance into my territories, and, in spite of my resistance, add them by victory and conquest to your own. These are clearly military ideas, and, therefore, we suppose, are expressed in military terms.

(10) Here follow four lines, or verses, repeated from the second eclogue of the second day. They have every appearance of being misplaced; a mere duplicate of the former passage. It would seem rather unlikely that, in so short a poem, such a duplication should be inserted intentionally. Whether these lines replace others which should be here, or merely are a repetition, the reader will judge for himself by the connection, or want of connection, of the passage.

Dazzling as the streamers? (a COMET?) The reader will probably be startled at this idea, as we also should have been had we not accidentally met with the following Arabic verses in Richardson:

When I describe your beauty, my thoughts are
perplexed,
Whether to compare it
To the sun, to the moon, or to the wandering star
(a COMET).

Now this idea completes the climax of the passage, which was greatly wanted, so that the comparisons stand (1) daybreak, a small glimmering light; (2) the moon (full moon?); (3) the sun clearly shining; (4) the comet, which, seen by night, is dazzling; as it were, the fiery banner, or streamer of the hosts of heaven; such a phenomenon has ever been among the most terrific objects to the eyes of the simple Arab, on whose deep blue sky it glows in tremendous perfection. Is this word plural by *emphasis*?—meaning, the chief of streamers; THE STREAMER, *par excellence*.

The comparison of a lady to the full moon is frequently adopted in Arabia:

She appeared like the full moon in a night of joy,
Delicate in limbs, and elegant of stature.

We cannot refrain from observing how happily this *comet* illustrates the simile, in Jude 13: "*Wandering stars, to whom is reserved the blackness of darkness for ever.*" As the apostle uses the word *planetæ*, it has been usual to suppose he alludes to neighboring orbs, the *planets*, whose motions appear very irregular; sometimes *direct*, sometimes *stationary*, sometimes *retrograde*; but, if we refer his expression to *comets*, then we see at once how they may be said to remain in *perpetual darkness*, after their brilliancy is extinct, which idea is not applicable to the planets. We may add that the Chaldeans held comets to be a species of planets (Senec. *Quest. Nat.*); that the Pythagoreans included comets among planets which appears after very long intervals, (Arist. *Meteor.* lib. i.), and that the Egyptians calculated their periods and predicted their return.

(11) *Affection, heart.* The bride had told us before, in No. 1, that while she slept, her affection, heart, imagination, was awake; the *heart*, among the Hebrews, was the seat of the affections; but here the bridegroom says, while he was really awake, and therefore fully master of his senses and of his actions, his affection overcame his intentions, and brought him back, unawares to himself, unconsciously, or *nolens volens*, as we say *will he nil he*, toward the object of his regard. This, then, is a stronger idea than the former,

and is heightened by his notice of the swiftness with which he was brought back, equal to that of the rapid chariots of his people, flying to engage the enemy; literally, *chariots of my people pouring out*; (12) now, this *pouring out* hardly means a review, but if it does it must point, especially, to the most rapid movement of that exercise; that is, the charge; if it mean *poured out* in battle it amounts to the same; a charge on the enemy, executed with great velocity; but some say, "chariots of the princes of my people." (See AMMINADAB.) Who are "the people" of monarchs? The phrase is used by Pharaoh, in Gen. xli:40, and by Solomon here.

(13) *Face about.* Literally, *turn round*; but as this is no military phrase, as already observed, the expression adopted seems to be more coincident with the general tenor of this eclogue.

(14) *Reconnoitering.* This phrase, which, literally, is *that we may fasten our eyes on thee*, we have ventured to render *reconnoiter thee*, for it appears that they would "fasten their eyes" on her *as they did on entrenchments around camps*, which can be nothing but what modern military language would term *reconnoitering*.

(15) *What, or how, would you fasten your eyes on Selomeh?* *As we do on the ditches, fosses, or entrenchments of the camps.* In this sense the root is used, in 2 Sam. xx:15; 1 Kings xxi:23; Is. xxvi:1; Lam. ii:1. On the whole, then, it appears that these are military terms; and it must be owned that they prodigiously augment the variety of the poem and give a highly spirited air to this eclogue in particular; they account, too, for the lively interference of the bridegroom's companions, and, by the rapid repartee they occasion, they close it very differently from all the others, and with the greatest animation and vivacity.

FIFTH DAY. (1) *Feet in sandals.* (See the plate on page 363.)

(2) *Daughter of Liberality, or of Princes.* Here the same word occurs as we observed signified FOURTH DAY, No. 12) *pouring out*; it is usually rendered *princes*, from the opportunity enjoyed by persons of high rank of pouring out their liberality on proper occasions, and perhaps such is its import in this place. *Daughter*, in the looser sense of the word, not *descendant*, but *patroness* of pouring out, of *liberality*, who has spared no expense on this occasion to adorn thyself with the most costly apparel; *q. d.* "Daughter of liberality, how magnificent! how elegant! how attractive is thy dress! the whole together is beautiful; the parts separately are rich and ornamental! We shall consider and commend them in their order."

As the bride stands up the ladies begin with describing her sandals; and they not only praise her sandals, but her feet in them. The reader will perceive, by inspecting the prints, that this is extremely accurate, as sandals do not hide the feet, but permit their every beauty to be seen; and although our ladies, being accustomed to wear shoes, may think more of a handsome shoe than of a handsome foot, the taste in the East is different. We know that the Roman emperor Claudius decorated his toes with gems, no less than his fingers; and was so proud of his handsome foot that, whereas other sovereigns used to give their hands to be kissed by their subjects, on certain occasions, he gave his foot for that purpose, which some historians have attributed to pride of station; others to pride of person, as if his handsome foot would otherwise have been overlooked and deprived of its due admiration. Observe, these ladies begin at the bride's sandals,

her feet, and their descriptions *ascend*; the bridegroom always begins with her locks, her hair, etc., and his descriptions *descend*, but not so low as the feet.

(3) *The selvedges of thy drawers.* This word (chemuk) is derived from the same root as that in the SECOND DAY rendered "my beloved was turned away;" it signifies, therefore, to turn, to return, to turn back; now, what can more correctly describe the selvedge of a piece of cloth, etc., which is made by the *return* of the threads back again to where they came from, that is, across the cloth? Thus threads, by perpetually turning and returning, compose the edge of the cloth, which we conceive to be the very article described by the use of the word in this place; but if it be the edge of the garment the thought is the same, since that is the natural situation for an ornamental pattern of open work.

(4) *Drawers.* This word can never mean *thighs*, as thighs have no selvedges; it must mean drawers, or the dress of the thighs. (See the plate on page 362).

(5) *Open-work; pinked.* Which of these words should be adopted depends on what materials these drawers were made of; if they were of muslin, then the *open-work* is wrought with a needle, as muslin will not bear pinking; but if they were of silk, then they might be adorned with flowers, etc., cut into them by means of a sharp iron, struck upon the silk, and cutting out those parts which formed the pattern. And this, we apprehend, is the correct meaning of the word; it signifies to prick full of holes—to wound—to pierce—to make an opening—to run through, as with a sword: all which ideas agree perfectly with our rendering, *pinking*, which consists in piercing silk full of holes, with a steel instrument, forcibly struck through its subject. This determines for silk drawers; however, *open-work pinkings* do not disagree in phraseology.

(6) *Girdle-clasp.* (See the plate on page 362).

(7) *Rich in mingled wines.* The original is, *not poor*; an expression doubtless adopted by the poet for the sake of his verse; the difference between rendering "rich," and "not poor," needs no apology. The idea is that this elasp was set with rubies; and Sir William Jones tells us it is very common among the Arabian poets to compare rubies to wine; hence he begins one of his translations from the Arabic: "Boy, bid yon liquid ruby flow"—meaning that he should pour out wine from the vessel which contained it.

(8) *Nipples.* (See No. 15, THIRD DAY, where this allusion has already occurred.)

(9) *Eyes like the pools of Heshbon* (see No. 6 in FOURTH DAY); that is, darkened by a streak of stibium drawn all around them, as those pools are encompassed by a border of black marble. Probably, too, the form of these pools was *oval* rather than circular.

(10) *Thy nose like the tower of Lebanon.* If the former line had not alluded to a place, whereby this line should require allusion to a place also, we should have inclined to risk a version derived from the roots of these words; which would stand thus:

Thy nose like a tower of whiteness itself,
Which overlooks the levels (thy cheeks, etc.).

We are persuaded that this gives the true conception of the passage, even if referred to a structure called the tower of Lebanon, for Damascus is situated on a level plain; or this tower might stand so as to overlook some of those level

plains which are interspersed in the mountains of Lebanon. Such, however, is the general idea; an erect tower, but of whatever other qualities is not determined. It might be desirable to render the foregoing verse also according to its roots, but the mention of the *gate* of *Bathrabbim* forbids; and if Heshbon be of necessity retained, then, for the sake of the parallelism, we think we must retain also Lebanon and Damascus; of course the comparisons are entirely local. (See No. 11, THIRD DAY.)

(11) *Carmel.* (13) *Arçgamen.* We confess our embarrassment on the subject of these words.

(13) *Entangled.* This word (*assur*) is used to signify the entangling power of love. Mr. Harmer interprets Eccles. vii:26: "I find more bitter than death the woman whose hands are (*assurim*) bands;" the general sense of the word is confinement, restraint, bondage, so that our word *entangled* seems to express the idea sufficiently.

The idea that the king's heart was entangled in the numerous and beautiful braids of hair which adorned the head of his spouse seems plausible enough, from the customs of Oriental females, and the general scope of the passage; but a particular and applicable authority is furnished in an ode of the *Pend-Namch* (pp. 287, 288), translated from the Persian by Baron Silvestre de Sacy. *Ode of Jami on the Tresses of His Mistress:* "O thou, who hast entangled my heart in the net of thy ringlets! the name alone of thy curling hair is become a snare for hearts. Yes, all hearts are enchained (as in the links of a chain) in the ringlets (links) of thy hair; each of thy curls is a snare and chain. O thou, whose curls hold me in captivity, it is an honor for thy slave to be fettered by the chains of thy ringlets. What other veil could so well become the fresh roses of thy complexion, as that of thy black curls (fragrant) like musk? Birds fly the net; but, most wonderful! my never quiet soul delights in the chains of thy tresses! Thy curls inhabit a region higher than that of the moon. Ah! how high is the region of thy tresses! It is from the deep night of thy curls that the daybreak of felicity rises at every instant for Jami, thy slave!"

The reader will probably think this rhapsody sufficiently exalted; it is, however, a not immodest specimen of the poetical exuberance of fancy and figurative language in which the Orientals envelop their ideas when inspired by the power of verse and frenzied by the fascinations of beauty.

(14) *Meanderings.* This word (*rethim*) signifies to run down, with a tremendous motion, or winding way, as of a stream, or rill of water: so Jacob's rods were placed in the rills, rivulets, gutters, in the watering troughs (Gen. xxx:38, 39); so the daughters of Reuel filled the troughs, watering places, for the sheep to drink from (Exod. ii:16); not raised wooden troughs, such as our horses drink out of, but rills running among the stones, etc. This we have expressed by the word *meanderings*; derived from the numerous *bendings* of the River *Meander*, and now naturalized in our language, in reference to streams and winding rivulets, etc. The trough into which Rebekah emptied the contents of her pitcher (Gen. xxiv:20) is described by a different word, and might be properly a trough.

(15) *Thy stature equals the palm.* (See the plate of the Bride's Dress, *infra*.)

(16) *Thy address.* Literally, *thy palate*; but this must refer to speech of some kind; the bride had formerly told her spouse that "his lips dropped honey;" and now he says, "her palate dropped wine—prime wine;" we have the lips and the

palate noticed together, to the same purpose, in Prov. v:3: .

The lips of a strange woman drop liquid honey,
And her palate drops what is smoother than oil.

It is evident the writer means her flattering words, her seductive discourses. The rendering "thy address" seems to coincide with the cheering and pervading effects of wine.

(17) *Going to be presented*, as a special token of affectionate regard, to persons whose consummate integrity has been experienced; literally, *going for love-favors to uprights (persons)*. Now in such a case, a person would naturally select the very best wine in his power; he would not send the tart, or the vapid, but the most cordial, the most valuable he could procure. We suspect that the bridegroom compliments himself, under the character of a friend whose integrity could not be doubted. (For the sense of *consummate* or *complete*, as that of the word *Jashur*, or *Jeshurun*, see the article JESHURUN.)

(18) Should this chasm be filled up with

.....and he is mine?

(19) *Dudaim*. (See MANDRAKE.)

(20) *Our lofts*; that is, the upper part of our gates or openings. As it is evident they were places to contain stores of fruit from the last year's gathering, the word *lofts* is as proper as any to convey that idea. It might be added that presents of fruit, especially apples, by youths to their beloveds, are well known among the Greek poets; indeed, the practice almost became a custom, and originated a proverb, "He loves her with apples"—as we say "with cakes and comfits."

(21) *Thou shouldst conduct me*. The reader's attention has already been drawn to this passage; without departing from the usual translation of the words we have merely referred them to the proper speaker.

Should this chasm be filled up with

By the *startling* antelope, by the *timid* deer of the field?

It is inserted by the LXX, and the passage is imperfect without the usual termination.

SIXTH DAY. (1) *Sociability*. This seems to be pretty nearly the import of the original term, which occurs only in this place. Since, as we conceive, the parties sat in the palanquin opposite to each other, the bride could hardly be said to be *leaning on her beloved*, nor *joining herself to her beloved*, as some have proposed to render it; nevertheless, that a kind of free intercourse after marriage is meant here, which would not have been so proper before marriage, admits of no doubt; and we think the *chit-chat* of sociability may answer the meaning of the word. The following conversation is probably a continuation of, or at least is of the nature of, that intended by the term *sociability*.

(2) *I urged thee*; that is to say, I would not let thee indulge thy bashfulness, but brought thee forward to the marriage ceremony, and overcame thy maiden dilatoriness. "That would be woo'd, and not unsought be won."

(3) *Thy mother delivered thee*. The word signifies to deliver over, as a pledge is delivered over, to the person who receives it, or to be *brought forward*, or *brought out* for that purpose. The reader may discover, under the uncouth idiom of our translators, this very idea: "There thy mother

brought thee forth;" that is, as a pledge is brought forth to be delivered to a person who stands out of the house to receive it (see Deut. xxiv:10, 11). That this is sufficiently unhappily expressed, we suppose no judicious reader will hesitate to admit. But what shall we say to the Romish rendering of this passage: "There thy mother was corrupted; there she was deflowered that bare thee!"—and then—such mysteries! in reference to Eve, the general mother, etc.

(4) *As a signet on thy arms*. (See SEALS.)

(5) *Our sister, or cousin, or friend*, etc. The word *sister* is not always used—strictly—in the Hebrew in reference to consanguinity. The youth of this party is denoted by the phrase—her breast is not grown to its proper mature size. In Egypt this part of the person was extremely remarkable; Juvenal describes the breasts of an Egyptian woman as being larger than the child she suckled.

(6) *Kiosks* are pavilions, or little closets projecting from a wall for the purpose of overlooking the surrounding country, like our summer houses, etc. In the East they are also the indispensable places of repose, and of that voluptuous, tranquil gratification to which the inhabitants are urged by the heats of the climate.

(7) *As one who offered peace*; literally, *as one finding peace*; but perhaps the sentiment is: "I appeared to him as inviting as the most delightful kiosk; a kiosk in which he might be so delighted that he would go no farther in search of enjoyment." That *peace* often means prosperity is well known; indeed, all good is, in the Hebrew language, as it were, combined and concentrated in the term *peace*.

(8) *Baal-Ham-aun*. We take this to be altogether an Egyptian term; *Ham Aun* is "progenitor Ham;" *Baal* is "lord"—"The lord Ham our progenitor." This agrees perfectly with Egyptian principles. In fact, no other nation so long maintained, or had so just authority to maintain, its relation to Ham, who was commemorated in this country during many ages. This name of a place, decidedly Egyptian, confirms the general notion that the bride was daughter to Pharaoh.

(9) *Inspectors*. This is the office which had been held by the bride when in her own country; but here it is expressed in the plural, implying, probably, an inferiority from that of the princess, though to the same purposes, etc.

(10) *The tenant*; literally, *the man*; that is, as we understand it, the *chief* man, the first tenant, the occupier; the same here as we have taken "the man" for the commander, in No. 4. THIRD DAY, that is, the chief, or head man, as we speak; not *each* man distributively, but *the* man emphatically; for if there were many tenants, did each bring a thousand silverlings, so as to make, say, ten thousand? then why not state the larger number? or did all which the tenants brought make up one thousand? then why not use the plural form *men*? Moreover, since two hundred, which is one-fifth of a thousand, was due to the inspectors, it reminds us that this is the very proportion established in Egypt by Joseph (Gen. xlvii: 24). This is convincing evidence that this princess was from Egypt, and proves that, for purposes of protection, etc., this due was constantly gathered by the reigning prince. We suppose she hints at her father's government under this allusion to these inspectors, and is still Egyptian enough to insist on the propriety of paying the regular tribute to his sovereignty, as governor in chief. An extract from Mr. Swinburne's account of a similar estate among the Spanish Arabs may explain the nature of these fruiteries and

their profits: "I cannot give you a more distinct idea of this people than by translating a passage in an Arabic manuscript in the library of the Escorial, entitled, '*The History of Grenada*, by Abi Abdalah ben Alkalhibi Aboaneni,' written in the year of the Hegira 778, A. D., 1375; Mahomet Lago being then, for the second time, king of Grenada. It begins by a description of the city and its environs, nearly in the following terms: 'The city of Grenada is surrounded with the most spacious gardens, where the trees are set so thick as to resemble hedges, yet not so as to obstruct the view of the beautiful towers of the Alhambra, which glitter like so many bright stars over the green forests. The plain, stretching far and wide, produces such quantities of grain and vegetables that no revenues but those of the first families in the kingdom are equal to their annual produce. *Each garden is calculated to bring in a net income of five hundred pieces of gold (aurei), out of which it pays thirty minæ to the king.* Beyond these gardens lie fields of various culture, at all seasons of the year clad in the richest verdure, and loaded with some valuable vegetable production or other; by this method a perpetual succession of crops is secured and a great annual rent is produced, which is said to amount to twenty thousand aurei. Adjoining you may see the sumptuous farms belonging to the royal demesnes, wonderfully agreeable to the beholder from the large quantity of plantations of trees and the variety of plants. The vineyards in the neighborhood bring fourteen thousand aurei. Immense are the hoards of all species of dried fruits, such as figs, raisins, plums, etc. They have also the secret of preserving grapes sound and juicy from one season to another.'" (Comp. FIFTH DAY, No. 20.) "N. B. I was not able to obtain any satisfactory account of these Grenada aurei, gold coins." (Swinburne's *Travels in Spain*, Letter xxii, p. 164.)

DAY OF MARRIAGE. We have supposed that this Sixth Day is the day of marriage; as this has not usually been understood we shall connect some ideas which induce us to consider it in that light. Leo of Modena says that (1) "The Jews marry on a *Friday* if the spouse be a maid (Thursday if a widow)." Now *Friday morning* is the time of this eclogue, supposing the poem began with the first day of the week. (2) "The bride is adorned and led out into the open air;" so in this eclogue the bride's mother "brings her out" for that purpose (3) "into a court or garden;" so in this eclogue the ceremony passes "under a citron tree," consequently in a garden. This eclogue, then, opens with observation of the nuptial procession *after* marriage; and we learn that the ceremony *had* taken place by the following conversation, in which the bridegroom alludes to the maiden bashfulness of his bride as *having* required some address to overcome. Moreover, the bride solicits the maintenance of perpetual constancy to herself, as implied in the connection now completed; with attention to the interests of a particular friend she transfers all her private property to her husband, yet reserves a government-due to her royal parent in Egypt; and the eclogue closes, both itself and the poem, by mutual wishes for more of each other's conversation and company. (See the article MARRIAGE.)

CONCLUSIONS. It is now time to conclude our investigation of this poem; but we must previously observe how perfectly free it is from the least idea of indelicacy; that allusions to matrimonial privacies which have been fancied in it, are absolutely groundless fancies; and that, not till the Fifth Day, is there any allusion to so much

as a kiss, and then it is covered by assimilation of the party to a sucking infant brother. The First Day is distance itself, in point of conversation; the Second has no conversation but what passes from the garden below up to the first-floor window; the Third Day is the same in the morning, and the evening is an invitation to take an excursion and survey prospects; as to the comparison to a well, delicacy itself must admire, not censure, the simile. The Fourth Day opens with a dream, by which the reader perceives the inclination of the dreamer and the progress of her affection; but the bridegroom himself does not hear it, nor is he more favored by it, or for it; on the contrary, the lady permits him in the evening to *sport* his military terms as much as he thinks proper; but she does not, by a single word, acquaint him of any breach he had made in her heart. We rather suspect that she rises to retire somewhat sooner than usual, thereby counterbalancing, in her own mind, those effusions of kindness to which she had given vent in the morning. The Fifth morning is wholly occupied by the ladies' praises of the bride's dress; she herself does not utter a word; but, in the evening of that day, as the marriage was to take place on the morrow, she merely hints at what she *could* find in her heart to do, *were he her infant brother*; and for the first time he hears the adjuration, "if his left arm was under her head" on the duan cushion, etc., and the discourse, though evidently meant for her lover, yet is equivocally allusive to her supposed fondling. It must be admitted that after the marriage they make a procession, according to the custom of the place and station of the parties, in the same palanquin together, and here they are a little sociable; but modesty itself will not find the least fault with this sociability, nor with one single sentence, or sentiment, uttered on this occasion.

We appeal now to the candor, understanding and sensibility of the reader, whether it be possible to conduct a six-day conversation between persons solemnly betrothed to each other, with greater delicacy, greater attention to the most rigid virtue, with greater propriety of sentiment, discourse, action, demeanor and deportment. The dignity of the persons is well sustained in the dignity of their language, in the correctness of their ideas and expressions; they are guilty of no repetitions; what they occasionally repeat they vary, and improve by the variation; they speak in poetry, and poetry furnishes the images they use; but these images are pleasing, magnificent, varied and appropriate; they are, no doubt, as they should be, local, and we do not feel half their propriety because of their locality; but we feel enough to admit that few are the authors who could thus happily conduct such a poem; few are the personages who could sustain the characters in it, and few are the readers in any nation, or in any time, who have not ample cause to admire it and to be thankful for its preservation as the SONG OF SONGS.

6. *Explanation of the Plates.* Mr. Taylor has collected representations of several descriptions of those carriages which are used in the East, and which are supposed to be alluded to in the opening of the second day of this poem. We select the most important.

Behold him seated, placed in his carriage, thus: looking out through the apertures, or front windows. Gleaming, showing himself, or, rather, being just visible, just glimpsing through, or between the lattices, perhaps appended to the apertures in front of the carriage. This engraving represents a traveling carriage; not a carriage

for state or splendor. But in the Third Day we have the description of a superb and stately equipage, different, no doubt, from the former, because built expressly by the royal lover, to suit the dignity of his intended nuptials. Such a palanquin we have in the accompanying engraving, and this is what may be more particularly examined by the description given in the poem. "King Solomon hath built for himself a nuptial palanquin; its pillars" (or what we should call its poles) "are made of cedar wood"—Lebanon wood—perhaps, indeed, the whole of its wood-

work might be cedar; but the poles, as being most conspicuous, are mentioned in the first place. Now, it is every way unlikely that Solomon would make these pillars of silver, as we read in our common version; the use of silver poles does not appear; but the top, covering, roof, canopy—literally the

rolling and unrolling part, that which might be rolled up—was of silver tissue. This canopy, or roof, is clearly seen in the engraving; and it is ornamented with tassels and a deep kind of hanging fringe, perhaps of silver also. But the lower carriage, or bottom, was of golden tissue, meaning that part which hangs by cords from the pillars or poles; that part in which the person sat—literally, the ridden-in part, which we have here rendered the carriage—was of gold. The internal part of this carriage was spread with *argamen*. Was this a finely wrought carpet, adorned with flowers, mottos, etc., in colors, as some have supposed? How, then, was it purple, as the word is always held to denote? We see at each end of the carriage a kind of bolster or cushion, or what may answer the purpose of easy reclining. Is this covered with *chintz*? or very fine *calico*? Was such the carriage lining of Solomon's palanquin, but worked with an ornamental pattern of needle-work, and presented to the king by the daughters of Jerusalem? We presume we have now approached nearly to a just understanding of this poetical description; no doubt the royal vehicle was both elegant and splendid. We have attempted to distinguish its parts with their particular applications. The propriety of our departing from the customary mode of understanding these verses must now be left to the reader's decision; but if the words of the original be so truly descriptive of the parts of this carriage as we have supposed, we may anticipate that decision with some satisfaction.

(1) Egyptian Dresses. There are two ideas which ought to be examined before we can justly ascertain the particulars of the bride's appearance: First, Was her dress correspondent to those of the East in general? or, secondly, as she was an Egyptian, was her dress peculiarly in the Egyptian taste? To meet these inquiries we propose to offer a few remarks on the peculiarities of Egyptian dress, presuming that some such might belong to the dress worn by this lady; and indeed, that these are what give occasion to the admiration of the ladies of the Jerusalem harem, who, observing her magnificent attire, compliment every part of that attire as they proceed to inspect it in the following order. (See the notes in illustration of the FIFTH DAY.)

(2) Sandals. (See figure on page 363.)

(3) Selvedges of Thy Thigh Apparel. We have already examined the import of this word. If we look at the accompanying figure we shall find that in front of the drapery, which descends down the thigh from the waist to the ankle, that is to say, where the edges of the drapery meet in front, is a handsome border of open-work; this is very distinct, and it answers exactly to the description and words used to denote it in the poem; it is (1) at the return—the selvedge—of the drapery; (2) it appertains to the thigh and accompanies it like a petticoat; (3) it is pinked, or open-worked, into a pattern, which has evidently cost great labor; the performance of excellent hands! This figure is truly Egyptian, for it is from the Isiac Table. We find the same kind of ornament worn by Grecian ladies, but on the outside of the thigh, as appears in the Hamilton vases. Whether we read returning edge, selvedge, or front borders, etc., of this drapery, is indifferent to the idea here stated.

(4) Thy Girdle Clasp. (See figure on page 363.)

(5) Bodice, body vest. (See figure on page 363.)

(6) Nipples. Observe that the Egyptian figure above has the breast and nipple entirely naked, and has a kind of neck-inger, which crosses the bosom and is brought between the breasts, so that the wearer might have covered the breast had she pleased; but the breast itself is left—as if carefully left—uncovered in all these figures; we presume, therefore, that this was anciently a customary mode of dress, rendered necessary by the heat of the country. It appears on various mummies and on many other Egyptian representations. Sonnini says (vol. iii, p. 204): "The Egyptian women have no other clothing than a long shift, or jacket, of blue cloth, with sleeves of an extraordinary size. This manner of dressing themselves by halves, so that the air may circulate over the body itself and refresh every part of it, is very comfortable in a country where close or thick habits would make the heat intolerable." We must not judge of the propriety of Egyptian costumes by the necessary defenses against the variations and chills of northern climates. The reader will observe the head-dress in this figure; the hair, which we presume is meant to represent curls; the pectoral, the covering of the bosom; the petticoat, its border, ornaments, etc.

Bride's Dress.

7. Bride's Dress. This figure represents an Oriental lady in full dress, from Le Bruyn.

(1) Head-Dress. The reader will observe the head-dress, which consists of a cap set with pearls in various forms, the center hanging over

the forehead. On the top of this cap rise a number of sprigs of jewelry work, which imitate, in precious stones, the natural colors, etc., of the flowers they are meant to represent. The stems are made of gold or silver wires, and the leaves, we suppose, are made of colored foil. We saw, in the former plate, that Egyptian ladies wore a high-rising composition of ornaments; and we see in this figure a composition little, if at all, less aspiring. In fact, then, this head-dress renders very credible the idea of our translators, "thy head-dress upon thee is like *Carmel!*"—whether, by *Carmel*, we understand *Mount Carmel*, in which case the allusion may be to the trees growing on it; or, as the word signifies, a fruitful field, whose luxuriant vegetation displays the most captivating abundance.

(2) **Jewels.** From the cap of this head-dress hangs a string of pearls, which, passing under the chin, surrounds the countenance. We observe also on the neck a collet of gems and three rows of pearls. These are common in the East; and something of this nature, we presume, is what the bridegroom alludes to when he says (*Eclogue ii. in the First Day*): "Thy cheeks are bright, or splendid, with bands, thy neck with collets," meaning bands of pearls surrounding the countenance and glistening on the cheeks; and collets of gems, or other splendid or shining substances, disposed as embellishments. Observe also the ornaments suspended by a gold chain, which hangs from the neck. These, though not, strictly speaking, girdle-clasps, yet have much the same effect in point of decoration, and are composed of precious stones, including, no doubt, rubies, "rich in mingled wine." Observe the rings worn on the fingers; the wrist-bands of the vest, the flowers brocaded on it, on the veil, etc.

(3) **Dressing of the Hair.** The figure also shows distinctly the difference between *locks* and *tresses* of hair. The *locks* are those which hang loosely down the temples and cheek; the *tresses* are those braids which naturally hang down the back, but which, in order to show their length, are in this instance brought forward over the shoulder. The reader will observe how these are plaited. Now, this mode of dressing the hair seems to have little allusion to the color of purple, or to require purple-colored ribands, or ribands of any color. It may rather be fancied to resemble a mode of weaving, such as might be practised at *Arech* or *Erech*, whence it might be denominated *Arechmen*, that is, "from the city of *Arech*;" and, could this be admitted, we should perhaps find something like the following ideas in this passage: "Thy head-dress is a diffuse, spreading appearance, like vegetation and flowers (*q. chenille?*)" "Thy tresses are close, compact, stuck together like an intimately woven or worked texture," say a carpet, diaper, calico, etc.

It is true this figure shows only a few tresses, but we ought to extend our conception to a much greater number, for Lady Montague says: "I never saw, in my life, so many *fine heads of hair*. In one lady's I have counted a *hundred and ten tresses*, all natural." Now, what numerous *intricacies*, meanderings, convolutions, etc., would a *hundred and ten tresses* furnish by dexterous plaiting! And as long hair, capable of such ornamental disposition, was esteemed a capital part of personal beauty, how deeply, how inextricably, was the king—his affection—entangled in such a labyrinth of charms, adorned in the most becoming manner and displayed to the greatest advantage!

The sex has always been proud of this natural ornament; and when art and taste have well ar-

ranged it, all know that its effects are not inconsiderable. The reader will recollect that we have already stated embarrassments on the subject of the word *Aregamen*. We have taken some pains to examine passages where it occurs; but we cannot acquiesce in the opinion that it means *purple*; that is, the color of *purple* only. Nevertheless, as all the dictionaries, and lexicons, and concordances are against us, we suspend our determination.

(4) **Sandals.** There is a figure in Sandys which shows the sandals not only adorned with flowers wrought on them, but which, being sandals only, permit the whole foot to be seen; and being *heighteners*, they make the wearer seem so much taller than otherwise she would be that the bridegroom may well compare his

Heighteners.

bride to a palm tree, up to whose top he desires to climb that he may procure its fruit (*Cant. vii:8*). This figure also shows an ornament around the ankle, and a girdle, perhaps of silver embroidery.

(5) **Vest.** This engraving is from "*Estampes du Levant*," and will assist to illustrate the comparison which our translation renders, "thy belly is a heap of wheat set about with lilies." In the first place, instead of *heap*, read *sheaf*, of wheat. Secondly, for *belly*, read *bodice*, or *vest*; that is the covering of the belly. Thirdly, for *set about*, read *bound about*, or *tied up with* a band of lilies. In short, the comparison is—a vest of gold tissue, tied up with a broad

Vest.

girdle of white satin, or of silver tissue, like that of this figure, to a sheaf of wheat standing on its end, and tied around its middle by a broad band of lilies, twisted into itself, whose heads would naturally hang down loosely, like the end of the girdle of this figure. Having given the above as our idea of this comparison, it may be proper to say that if the words *set about* be absolutely retained, then the silver flowers on this ground of gold tissue may answer that idea; but this does not appear to be so correct a translation. We may be allowed also to observe how entirely this explanation removes every indelicacy to which our translation is exposed; and how greatly it is recommended by its simplicity.

(6) **Oriental Ladies' Dress.** This investigation of the bride's dress may be closed with propriety by the following description of a dress worn by lady Montague as given by herself: also, that of the fair Fatima, of whom she says, "She was dressed in a *caftan* of gold brocade, flowered with silver, very well fitted to her shape, and showing, to admiration, the beauty of her bosom, only shaded by the thin gauze of her shift. Her drawers were pale pink, her waistcoat green and silver; her slippers white satin, finely embroid-

ered; her lovely arms adorned with bracelets of diamonds and a broad girdle set around with diamonds; upon her head a rich Turkish handkerchief of pink and silver, her own fine black hair hanging a great length in various tresses; and on one side of her head some bodkins of jewels.

"When I took my leave, two maids brought in a fine silver basket of embroidered handkerchiefs; she begged I would wear the richest for her sake, and gave the others to my woman and interpreter." (The *dudi*, love-favors, of our poem, *passim*.)

"The first part of my dress is a pair of drawers; very full, that reach to my shoes, and conceal the legs more modestly than your petticoats. They are of a thin, rose-colored damask, brocaded with silver flowers. My shoes are of white kid leather, embroidered with gold. Over this hangs my smock, of a fine white silk gauze, edged with embroidery. This smock has wide sleeves, hanging half way down the arm, and is closed at the neck with a diamond button; but the shape and color of the bosom are very well to be distinguished through it.

"The *antery* is a waistcoat, made close to the shape, of white and gold damask, with very long sleeves falling back, and fringed with deep gold fringe, and should have diamond or pearl buttons.

"My *caftan*, of the same stuff with my drawers, is a robe exactly fitted to my shape, and reaching to my feet, with very long, straight, falling sleeves. Over this is my girdle, of about four fingers broad, which all that can afford it have entirely of diamonds and other precious stones. Those who will not be at that expense have it of exquisite embroidery on satin; but it must be fastened before with a clasp of diamonds.

"The *curdee* is a loose robe they throw off, or put on, according to the weather, being of a rich brocade, (mine is green and gold), either lined with ermine or sables; the sleeves reach very little below the shoulders.

"The head-dress is composed of a cap, called *talpock*, which is, in winter, of fine velvet embroidered with pearls or diamonds, and in summer of a light shining silver stuff. This is fixed on one side of the head, hanging a little way down, with a gold tassel, and bound on, either with a circle of diamonds (as I have seen several) or a rich embroidered handkerchief. On the other side of the head, the hair is laid flat; and here the ladies are at liberty to show their fancies; some putting flowers, others a plume of heron's feathers, and in short what they please; but the most general fashion is a large *bouquet* of jewels, made like natural flowers; that is, the buds of pearl; the roses of different colored rubies; the jessamines of diamonds; the jonquilles of topazes, etc., so well set and enameled, it is hard to imagine any thing of that kind so beautiful.

"The hair hangs at its full length behind, divided into tresses braided with pearls or ribands, which is always in great quantity. I never saw in my life so many fine heads of hair. In one lady's I have counted a hundred and ten of these tresses, all natural; but it must be owned that every kind of beauty is more common here than with us. They generally shape their eyebrows; and both Greeks and Turks have the custom of putting round their eyes a black tincture that, at a distance or by candle light, adds very much to the blackness of them. They dye their nails a rose color; but I cannot enough accustom myself to the fashion to find any beauty in it." Letters xxix, xxxiii.

8. Bridegroom's Dress. We have elsewhere (see CROWN) bestowed some thoughts on the nature and shape of the royal crown of the kings of the Jews, and we wish now to recall those thoughts to the mind of the reader.

(1) **The Crown.** We observed that the crown of king Saul was called *nazer*, or *separated*; but a very different word, *othar*, is used to express the *circlet* with which the mother of Solomon *encircled* his head on the day of his marriage. Our translation renders both these words by one English appellation, *crown*; and the word *othar* is thus rendered, where, as it seems, it gives incorrect notions of the subject intended. In distinguishing the different forms of this part of dress, we consider the cap or crown (or both ideas in one, the crowned cap), in the annexed figure, as being the *nazer*, or "separated" cap of Scripture. This is a portrait of Tigranes, king of Armenia; and it contributes, with others, to authorize our distinction. In addition, however, to these, we have also representations of a cap, the *separations* of which are very evident behind; and one of these separated parts falls on each shoulder, down the back of the wearer. This goes not only in corroboration of the proposed distinction in the form and nature of the crowns of Jewish monarchs, but also strongly tends to establish the nature of the *shebetz*, or royal coat of close armor.

Portrait of Tigranes, King of Armenia, Showing "Separated" Cap.

It was not, then, a royal cap of state with which the mother of Solomon decorated his head at his nuptials; *that* was probably made by a more *professed* artist; neither was it proper to be worn at such a personal ceremony, but only on state occasions; but if the queen mother had taken pains to embroider a muslin fillet; if she had worked it with her own hands, and had embellished it with a handsome pattern, then it was paying her a compliment to wish the daughters of Jerusalem should go forth to admire the happy effects of this instance of maternal attention and decorative skill.

(2) **Royal Seat.** The accompanying portrait of Nadir, Shah of Persia, from Frazer, shows his

dress to abound in pearls, precious stones and golden embroidery. The manner of the king's sitting, and the kind of throne on which he sits, may perhaps give some hint of the manner of the Bridegroom's sitting in the First Day. This is not the royal throne of state, the *musnud* of India; *that* is usually stationed in one place, where it is fitted up with

all imaginable magnificence, and to which it is *fixed*; whereas, this seat is movable, and is carried

from place to place, as wanted. Some such *settee* was perhaps occupied by Solomon, when he visited his Bride; so that the king *sat*, while his companions *stood* on each hand of him, forming a circle. It is necessary to distinguish the kind of throne; because there are: (1) The *musnud* itself, or throne of state. (2) This kind of seat or settee.

(3) A kind of palanquin (called *takht revan*, that is *moving-throne*), and others, all of which are *thrones*; but their names and applications are not the same in the original text of Scripture.

(3) **Jewels.** This figure is copied from De la Valle, and is a portrait of Aurengzebe, the Mogul of India. Observe the pearls, etc., in his turban; the collets of pearls and gems hanging from his neck; the same at his wrists; so the Bride says of her Prince, "his wrists, that is, his wrist-bands, the ornaments at his wrists, are circlets of gold, full set with topazes." These topazes occupy the place of the pearls in our figure.

(4) **Shoes and Girdle.** Observe, also, his shoes, which, being gold embroidery, are the *bases of purest gold*, from which rise his *legs like pillars of marble*. Observe, too, that the stockings, fitting pretty closely to the legs, give them an appearance much more analogous to pillars or columns, than when the drawers are full, and occupy a considerable space, as they are commonly worn in the East. The reader will remark the nature and enrichments of this girdle, which is, no doubt, of gold embroidery.

(5) **Royal Tent.** The tent may give some idea of that of Solomon, to which the ladies compare the Bride; they say she is "attractive as the tent of Solomon;" and certainly a tent so ornamented and enriched, so magnificently embellished, is attractive; attractive in the same manner as a magnificent dress, when worn by a person. If this tent be of black velvet, the golden enrichments embossed upon it must have a grand effect. It should be recollected that the passage demands the strongest contrast possible to the "tents of Kedar," or the black tents of wandering Arabs; and, were it not for a following verse, the reference should be to the Bride's *dress*—discomposed—all in a flutter—after a long journey, from which she is but alighted at the moment—rather than to her person, or complexion, which subsequently is described as *fair*, etc., by terms absolutely incompatible with blackness or swarthinness. The coverings annually sent by the grand seignior for the holy house at Mecca, are always *black*. Mr. Morier has delineated a tent, intended to represent that of the prophet, the front of which is all but covered with jewels; the whole sides and the top with ornaments, shawl-patterns, etc. (*Travels in Persia*, vol. ii, p. 181.)

(6) **Another Girdle.** This is a portrait of the grand seignior, sultan Achmet. But it shows a girdle, or rather the clasp which fastens it, of a different nature from the former. This appears to be made of some solid material (ivory, perhaps), thickly studded over with precious stones, whereby it corresponds perfectly with that described by the Bride, as *bright ivory over which*

the sapphire plays; for these gems may as well be sapphires as any other. The general appearance of the sultan's figure is noble and majestic, and may answer, not inadequately, to the description given of her beloved by the Bride.

It would be a considerable acquisition to sacred literature if those incidents which are furnished by the Greek poets, and which resemble certain incidents in this poem were collected for the purpose of comparison; they would be found more frequent and more *identical* than is usually imagined. But this purpose would be still more completely accomplished, by a comparison with those productions of the Persian and Hindoo poets which have been brought to our knowledge by the diligence and taste of our countrymen in India. It may safely be said, that every line of the Hebrew poem may be illustrated from Indian sources. Even that incident, so revolting to our manners, of the lady's *going out* to seek her beloved *by night*, is perfectly correct, according

to Indian poetical costume, as appears by Calidasa's *Megha Dūta* (line 250 of Mr. Wilson's translation), also the *Gitagovinda*, translated by Sir William Jones (*Asiatic Researches*, vol. iii), and others which have been subsequently added to the stores of English literature.

CAPER (kā'pēr), (Heb. אֲבִינָה, *ab-ee-yo-naw'*, provocative of *desire*, the *caper berry*, Eccles. xii:5), the undeveloped fruit of *Capparis spinosa*, Lat., a plant growing everywhere in clefts of rocks and walls.

It is stimulant, and supposed to be aphrodisiac. If *caperberry* be the correct rendering of *ab-ee-yo-naw'* the meaning of the passage is that even the caperberry shall fail to excite desire, a meaning in effect similar to that of A. V. (Barnes, *Bib. Dict.*). (See ABIYONAH.)

CAPERNAUM (ka-pēr'na-ūm), (Gr. Καπερναούμ, *kap-er-na-oom'*), a city on the northwestern side of the Lake of Gennesareth, and on the border of the tribes of Zebulun and Naphtali.

(1) **Prophecy.** The infidelity and impenitence of the inhabitants of this place, after the evidence given to them by our Saviour himself of the truth of his mission, brought upon them this heavy denunciation:—"And thou, Capernaum, which art exalted unto heaven, shalt be brought down to hell; for if the mighty works which have been done in thee had been done in Sodom, it

would have remained unto this day,' etc. (Matt. xi:23).

This seems to have been more than any other place the residence of Christ after he commenced his great mission; and hence the force of the denunciation, which has been so completely accomplished, that even the site of Capernaum is quite uncertain. Dr. Robinson (*Bib. Researches*, iii, 288-294) exposes the errors of all previous travelers in their various attempts to identify the site of Capernaum; and, from a hint in Quaresmius, he is rather inclined to look for it in a place marked only by a mound of ruins, called by the Arabs, Khan Minyeh. This is situated in the fertile plain on the western border of the Lake of Gennesareth, to which the name of 'the land of Gennesareth' is given by Josephus (*De Bell. Jud.* iii, 10, 8).

(2) **Fountains.** In this plain Josephus places a fountain called Capharnaum; he says nothing of the town; but, as it can be collected from the Scriptural intimations that the town of Capernaum was in this same plain, it may be safely concluded that the fountain was not far from the town, and took its name therefrom. In this plain there are now two fountains, one called 'Ain el Madauwarah, the 'Round Fountain'—a large and beautiful fountain, rising immediately at the foot of the western line of hills. This Pococke took to be the Fountain of Capernaum, and Dr. Robinson was at the time disposed to adopt this conclusion. There is another fountain called 'Ain et-Tin, near the northern extremity of the plain, and not far from the lake. It is overhung by a fig-tree, from which it derives its name.

(3) **Ruins.** Whichever be the Capharnaum, we should look for some traces of an ancient town in the vicinity, and, finding them, should be justified in supposing that they formed the remains of Capernaum. There are no ancient remains of any kind near the Round Fountain, which is one of the reasons against its claim to indicate the site of ancient Capernaum. But near the 'Ain et-Tin is a low mound of ruins, occupying a considerable circumference, which certainly offer the best probability which has yet been offered of being the remains of the doomed city; and if these be all its remains, it has, according to that doom, been brought low indeed. Near the fountain is also a khan, which gives the name of Khan Minyeh to the spot. This khan is now in ruins, but was once a large and well-built structure. Close on the north of this khan, and of the fountain, rocky hills of considerable elevation come down quite to the lake, and form the northern termination of the plain. It is important to add, that Quaresmius expressly states that, in his day, the place called by the Arabs Minyeh, was regarded as marking the site of Capernaum (*Elucid. T. S.* ii, p. 864).

Capernaum is not mentioned in the Old Testament, and perhaps did not arise till after the captivity. The Rev. J. L. Porter, A. M., says: "I reached the brow of a bluff promontory, which dips into the bosom of the lake. Below me now opened up the fertile plain of Gennesaret. At my feet, beneath the western brow of the cliff, a little fountain burst from a rocky basin. A fig-tree spreads its branches over it, and gives it a name,—'Ain-et-Tin, "the fountain of the fig." Beside it are some massive foundations, scarcely distinguishable amid the rank weeds, and away beyond it, almost covered with thickets of thorns, briars, and gigantic thistles, I saw large heaps of ruins and rubbish. These are all that now mark the site of Capernaum. Christ's words are fulfilled

to the letter." (*The Buried Cities of Bashan*, 1891, p. 107.)

CAPH (kăf), כַּפ, the eleventh letter of the Hebrew alphabet. English K comes from the same source; but C and, especially before e and i, or when final, Ch are employed as its representative in anglicized Hebrew names. Caph stands at the head of the eleventh section of Ps. cxix, in which section each verse begins with this letter in the original.

CAPHAR (kă'phar), (Heb. כַּפָּר, *ka'fer*, from a root signifying *to cover*), one of the many words used in the Bible to denote a village.

As an appellative it is found in 1 Chron. xxvii:25; Cant. vii:11; and 1 Sam. vi:18; the last being Copker (כֹּפֶקֶר). Its chief interest arises from its forming a part of the name Capernaum, i. e., *Capharnahum*.

CAPHAR-SALAMA (kăph'ar-säl'a-mâ), (Gr. Καφαρσαλαμά, *khah-far-sal-ah-mah'*, village of Salem), a place (Joseph. *Ant.* xii:10, sec. 4) at which a battle was fought between Judas Maccabæus and Nicanor (1 Macc. vii:31).

From the fugitives having taken refuge in the "city of David," it would appear to have been near Jerusalem. It may be the later Carvasalim, near Ramah.

CAPHENATHA (ka-phën'a-thà), (Gr. καφενάθα, *kaf-en-a-tha'*), a place apparently close to and on the east side of Jerusalem, which was repaired by Jónathan Maccabæus (1 Macc. xii:37).

The name is derived by Lightfoot from *Caphnioth*, the Talmudic word for unripe figs. It may possibly have been the tower that stood out from the upper house of the king (Neh. iii:25). Called also Chaphenatha.

CAPHTHOR (kăph'thôr). See CAPHTOR.

CAPHTHORIM (kăph'tho-rim), (1 Chron. i:12). See CAPHTORIM.

CAPHTOR (kăph'tôr), (Heb. כַּפְתּוֹר, *kaf-tore'*, Deut. ii:23; Jer. xlvi:4; Amos ix:7), was the real and proper country of the Philistines.

There has been a great diversity of opinion with regard to the exact situation of that country. The general opinion that Caphtor was Cappadocia is, upon the whole, founded more on the ancient versions of the Bible, such as the Septuagint and the Targums, than on any sound argument. Against this opinion have been urged (1) The authority of Josephus, who seems to seek Caphtor somewhere between Egypt and Ethiopia; (2) that the Caphtorim came originally from Egypt, from which Cappadocia is so far removed, that it seems highly improbable that an Egyptian colony could first have emigrated thither, and then again removed to Palestine, still more remote; (3) that Caphtor and Cappadocia are very dissimilar names, even in sound; (4) that Caphtor is (Jer. xlvi:4) designated as an island (כַּסְיָא, *aia*), though כַּסְיָא sometimes also signifies a coast.

Others, again, such as Calmet, and still more J. G. Lackemacher (*Obser. Phil.* p. 2, 11 sq.), have tried to prove that the Philistines derived their origin from the island of *Crete*, because—(1) Caphtor is, with Jeremiah, an island, and (2) the proper name of the Philistines is "Cherethites," *Kerethim* (Ezek. xxv:16; Zeph. ii:5). Calmet's earlier opinion (found in the first edition of his *Comment on Genesis*, but which he afterwards recalled, is that Caphtor is the island of *Cyprus*.

Forster (*Epist. ad Michael*, p. 17, sq.) thinks that the Caphtorim had lived on the Egyptian coast (as כַּפְתֹּרִים in Jer. xlvii:4 is also used of sea-coasts), somewhere about Damietta. From hence, he supposes a colony of that people, and their brethren and easterly neighbors, the *Casluchim*, had gone forth, in the period between the first wars of the world (described in Gen. xiv), and the birth of Isaac, and settled on the southern coast of Palestine, under the name of the *Philistines*, after having expelled the Avim, who lived about Gaza (see AVIM). Only in subsequent times, Forster thinks, these new Philistines had again sent a colony, who conquered the province of Lapethus, in the island of Cyprus. This colony he identifies with the Ethiopians, who lived, according to Herodotus (vii:88), upon that island. There is much solid ground in favor of this opinion.

Schaff thinks it is more probably identical with *Caphtur*, and the northern delta of Egypt.

CAPHTORIM (kăph'to-rim), (Heb. כַּפְתֹּרִים, *kaf-to-reem'*), a tribe descended from the Egyptians (Gen. x:14; 1 Chron. i:12), and inhabiting Caphtor (Deut. ii:23). (See CAPHTOR.)

CAPPADOCIA (kăp'pa-dō'ci-à, -dō'shī-à), (Gr. Καππαδοκία, *kaf-pad-ok-ee'ah*), an ancient province of Asia Minor, bounded on the north by Pontus, on the east by the Euphrates and Armenia Minor, on the south by Mount Taurus (beyond which are Cilicia and Syria), and on the east by Phrygia and Galatia.

The country is mountainous and abounds in water, and was celebrated for the production of wheat, for its fine pastures, and for its excellent breed of horses, asses and sheep. The inhabitants were notorious for their dullness and vice. They were called 'Syrians' in the age of Herodotus (i:72; v:49), and even in Strabo's days they bore the name of 'Leuco-Syrians,' i. e., 'White Syrians' (xii, p. 544), in contradistinction to those dwelling beyond the Taurus, whose complexion was darkened by the sun. Cappadocia was subjugated by the Persians under Cyrus. It continued to be governed by tributary kings under the Romans till A. D. 17, when Tiberius made it a Roman province. Christianity was very early propagated in Cappadocia, for St. Peter names it in addressing the Christian churches in Asia Minor (1 Pet. i:1). Cappadocians were present at Jerusalem on the day of Pentecost (Acts ii:9), and afterward Christians of the province were addressed by Peter (1 Pet. i:1).

CAPTAIN (kăp'tin). As a purely military title, Captain in general answers to שַׂר, the Hebrew *Sar* in the Hebrew army, and χιλιάρχος, *tribunus*, in the Roman. קַוְטְסֵן, *kaw-tseen'*, which is occasionally rendered *captain*, applies sometimes to a military (Josh x:24; Judg. xi:6, 11; Is. xxii:3; Dan. xi:18), sometimes to a civil command (e. g., Is. i:10; iii:6). Its radical sense is *division*, and hence *decision* without reference to the means employed. The term illustrates the double office of the *Shophet'*, or *dictator*. (Smith, *Bib. Dict.*)

It is a broad designation for an official, whether he be the commander-in-chief of the army (Gen. xxi:22; Judg. iv:2; 1 Sam. xiv:50; 2 Sam. x:16), or the commander of a division of the army (2 Sam. xviii:2, 5), or part of a division (1 Kings xvi:9); an officer over 1,000 men or 100 men or 50 men (Num. xxxi:14, 48; 1 Sam. viii:12; xvii:18; xviii:13; xxii:7; 2 Sam. xviii:1; 2 Kings i:9; Is. iii:3); the commander of the king's body

guard (Gen. xxxvii:36; and 2 Kings xxv:8; Dan. ii:14, where the word is *Rab*), or of a post of sentries (Jer. xxxvii:13, in Hebrew *Ba'al*). (Davis, *Bib. Dict.*) The "captain of the temple" mentioned by St. Luke (xxii:4; Acts iv:1; v:24), in connection with the priests, was not a military officer, but superintended the guard of priests and Levites, who kept watch by night in the Temple. The office appears to have existed from an early date (the "priests that kept the door" 2 Kings xii:9; xxv:18).

The Greek term *archagos*, rendered *captain* (Heb. ii:10), has no reference whatever to a military office.

Figurative. (1) In Josh. v:13-15 God is called the Captain of the Lord's host, that is, of Israel; all Israel's battles were in his cause. Joshua and the other leaders were the deputies of the Great Captain of Salvation. He is also called the "Captain" or author "of salvation." (Heb. ii:10). Yet more so is Jesus, Captain of the Lord's spiritual hosts. (2) The Antichristian captains are their chief rulers in church, or state, who command, direct, or excite others, to oppose the Redeemer (Rev. xix:18).

CAPTAIN OF THE GUARD (kăp'tin öv the gärd).

Title of the officer (A. V.) to whose custody Paul and other prisoners were committed at Rome (Acts xxviii:16, A. V.). He was a *stratopedarchos*, or commander of a legion, in this particular instance the chief officer of the legion known as the prætorian guard (R. V. margin). The captain of the temple was not a military officer, but the commander of the guard of Levites who kept watch at the Temple (Acts iv:1; v:24; 2 Matt. iii:4; Antiq. xx:6, 2; War vi:5, 3). Under him were subordinate officers of the several divisions of the guard (Luke xxii:4, 52). (Davis, *Bib. Dict.*)

CAPTIVE (kăp'tiv), (Heb. שֶׁבִי, *sheb-ee'*, to be taken away captive), one taken prisoner in war.

There is a threefold captivity mentioned in the Scriptures. (1) Personal and bodily, when men are apprehended by the enemy, and are carried out of their own land and held in slavery (Deut. xxviii:27-48; Gen. xiv:14; Jer. lii:29, 30). (2) Evangelic, when one is apprehended and drawn by Christ's almighty love, and has his whole heart and affections subdued by the obedience of faith (2 Cor. x:5). (3) Sinful, when one is carried away, and oppressed or enslaved under the power of Satan and his own inward corruption (Rom. vii:23; 1 Sam. xxx:3; 2 Tim. ii:26).

CAPTIVITY (kăp'tiv'y-tÿ), (Heb. גֹּ'לָהּ, *go'lah*, exile, removal).

(1) **Expatriation.** The word *captivity*, as applied to the people of Israel, has been appropriated, contrary to the analogy of our language, to mean expatriation. The violent removal of the entire population of a city, or sometimes even of a district, is not an uncommon event in ancient history. As a measure of policy, no objection to it on the ground of humanity was felt by anyone; since in fact, it was a very mild proceeding, in comparison with that of selling a tribe or nation into slavery. Every such destruction of national existence, even in modern times, is apt to be embittered by the simultaneous disruption of religious bonds; but in the ancient world, the positive sanctity attributed to special places, and the local attachment of Deity, made expatriation doubly severe. The Hebrew people, for instance, in many most vital points, could no longer obey their sacred law at all, when personally removed from

Jerusalem; and in many others they were forced to modify it by reason of their change of circumstances.

Two principal motives impelled conquering powers thus to transport families in the mass: first, the desire of rapidly filling with a valuable population new cities, built for pride or for policy; next, the determination to break up hostile organizations, or dangerous reminiscences of past greatness.

The expatriation of the Jewish people belongs to two great eras, commonly called the first and second Captivity; yet differing exceedingly in character. It is to the former that the above remarks chiefly apply. In it, the prime of the nation were carried eastward by the monarchs of Assyria and Babylon, and were treated with no unnecessary harshness, even under the dynasty that captured them. So far were they from the condition of *bondsmen*, which the word 'captive' suggests, that the book of Susanna represents their elders in Babylon as retaining the power of life and death over their own people (i:28), when Daniel was as yet a very young man. The authority of that book cannot, indeed, be pressed, as to the chronology; yet the notices given by Ezekiel (xiv:1; xx:1) concur in the general fact, that they still held an internal jurisdiction over their own members.

(2) **First Captivity.** That which we name the first Captivity, was by no means brought about by a single removal of the population. In fact, from beginning to end, the period of deportation occupied full 150 years; as the period of return reaches probably through 100. The first blow fell upon the more distant tribes of Israel, about 741 B. C.; when Tiglath-pileser, king of Assyria (2 Kings xv:29), carried off the pastoral population which lived beyond the Jordan, with Zebulun and Naphtali. To this event allusion is made in Isaiah ix:1; a passage very ill translated in our received version. In the time of this conquering monarch, Assyria was rapidly rising into power, and to aggrandize Nineveh was probably a great object of policy. His successor, Shalmaneser, made the Israelitish king Hoshca tributary. When the tribute was withheld, he attacked and reduced Samaria (B. C. 721), and by way of punishment and of prevention, transported into Assyria and Media its king and all the most valuable population remaining to the ten tribes (2 Kings xvii:6). The families thus removed were, in great measure, settled in very distant cities; many of them probably not far from the Caspian Sea; and their place was supplied by colonies from Babylon and Susis (2 Kings xvii:24).

(3) **Second Captivity.** Such was the end of Israel as a kingdom. An interval of more than a century followed before Judah was to suffer a similar fate. Two separate deportations are narrated in the book of Kings, three in that of Jeremiah, while a fourth and earlier one appears in the book of Daniel. Jeremiah dates by the years of Nebuchadnezzar's reign (who came to the throne B. C. 605 or 604), and estimates that in his seventh year 3,023 were carried off, in his eighteenth 832, and in his twenty-third only 745; making in all, as the writer is careful to note, 4,600 (Jer. lii:28, etc.). The third removal he ascribes to Nebuzaradan, the Babylonian general. That some error here exists, at least in the numbers, appears undeniable; for 4,600 persons was a very petty fraction of the Jewish people; and, in fact, 42,360 are stated to have returned immediately upon the decree of Cyrus (Ezra ii:64). In 2 Kings xxiv:8-16, we find 18,000 carried off at once, in the third month of king Jehoiachin,

and in the eighth year of Nebuchadnezzar; which evidently is the same as the first removal named by Jeremiah, and may be placed in B. C. 598. After this, the vassal king Zedekiah having rebelled, his city is beleaguered, and, finally, in his eleventh year, is reduced (B. C. 588) by Nebuchadnezzar in person; and in the course of the same year, 'the nineteenth of Nebuchadnezzar' (2 Kings xxv:8). Nebuzaradan carries away all the population except the peasants. Perhaps we need not wonder that no mention is made in the 'Kings' of the third deportation; for the account of the destruction was in a manner complete upon the second invasion. There is a greater difficulty in the statement with which the book of Daniel opens, which is generally interpreted to mean that *in the third year* of Jehoiakim Nebuchadnezzar besieged and captured Jerusalem, partially plundered the temple and carried off the first portion of the people into captivity, among whom was Daniel. The text, however, does not explicitly say so much, although such is the obvious meaning; but if this is the only interpretation, we find it in direct collision with the books of Kings and Chronicles (which assign to Jehoiakim an *eleven years' reign*), as also with Jeremiah xxv:1). The statement in Daniel partially rests on 2 Chron. xxxvi:5, which is itself not in perfect accordance with 2 Kings xxiv. In the earlier history, the war broke out during the reign of Jehoiakim, who died before its close; and when his son and successor, Jehoiachin, had reigned three months, the city and its king were captured. But in the Chronicles, the same event is made to happen twice over, at an interval of three months and ten days (2 Chron. xxxvi:6 and 9), and even so, we do not obtain accordance with the received interpretation of Daniel (i:1-3). It seems, on the whole the easiest supposition, that 'the third year of Jehoiakim' is there a mistake for the third month of Jehoiachin. On the whole, it is pretty clear that the people of Judah, as of Israel, were carried out of their land by two principal removals. The former, B. C. 598, was directed to swell the armies and strengthen the towns of the conqueror; for of the 18,000 then carried away, 1,000 were 'craftsmen and smiths, all strong and apt for war,' and the rest are called 'mighty men of valor.' (Yet there is a difficulty about verses 14 and 16 in 2 Kings xxiv). It was not until the rebellion of Zedekiah that Nebuchadnezzar proceeded to the extremity of breaking up the national existence, B. C. 588. As the temple was then burnt, with all the palaces and the city walls, and no government was left but that of the Babylonian satrap, this latter date is evidently the true era of the captivity. Previously Zedekiah was tributary; but so were Josiah and Ahaz long before; the national existence was still saved.

(4) **The Return.** Details concerning the *Return* from the captivity are preserved in the books denominated after Ezra and Nehemiah; and in the prophecies of two contemporaries, Haggai and Zechariah. The first great event is the decree of Cyrus, B. C. 536, in consequence of which 42,360 Jews of Babylon returned under Sheshbazzar, with 7,337 slaves, besides cattle. This ended in their building the altar, and laying the foundation of the second temple, 53 years after the destruction of the first. The progress of the work was, however, almost immediately stopped; for Zerubbabel, Jeshua and the rest abruptly refused all help from the half-heathen inhabitants of Samaria, and soon felt the effects of the enmity thus induced. That the mind of Cyrus was changed by their intrigues, we are not informed;

but he was probably absent in distant parts, through continual war.

When Darius (Hystaspis), an able and generous monarch, ascended the throne, the Jews soon obtained his favor. At this crisis, Zerubbabel was in chief authority (Sheshbazzar perhaps being dead), and under him the temple was begun in the second and ended in the sixth year of Darius, B. C. 520-516. Although this must be reckoned an era in the history, it is not said to have been accompanied with any new immigration of Jews. We pass on to 'the seventh year of king Artaxerxes' (Longimanus), Ezra vii:7, that is, B. C. 458, when Ezra comes up from Babylon to Jerusalem, with the king's commendatory letters, accompanied by a large body of his nation. The enumeration in Ezra viii, makes them under 1,800 males, with their families; perhaps amounting to 5,000 persons, young and old; of whom 113 are recounted as having heathen wives (Ezra x:18-43). In the twentieth year of the same king, or B. C. 445, Nehemiah, his cup-bearer, gains his permission to restore 'his fathers' sepulchres,' and the walls of his native city; and is sent to Jerusalem with large powers. This is the crisis which decided the national restoration of the Jewish people; for before their city was fortified, they had no defense against the now confirmed enmity of their Samaritan neighbors; and, in fact, before the walls could be built, several princes around were able to offer great opposition. (See SANBALLAT.) The Jewish population was overwhelmed with debt, and had generally mortgaged their little estates to the rich, but Nehemiah's influence succeeded in bringing about a general forfeiture of debts, or at least of the interest; after which we may regard the new order of things to have been finally established in Judæa (see NEHEMIAH). From this time forth it is probable that numerous families returned in small parties, as to a secure home, until all the waste land in the neighborhood was reoccupied.

(5) **Remaining in Dispersion.** The great mass of the Israelitish race nevertheless remained in dispersion. Previous to the captivity, many Israelites had settled in Egypt (Zech x:11; Is. xix:18), and many Jews afterwards fled thither from Nebuzaradan (Jer. xli:17). Others appear to have established themselves in Sheba (see Jost's *Geschichte*, etc.), where Jewish influence became very powerful (see SHEBA).

(6) **The Ten Tribes.** It is maintained by Von Bohlen (*Genesis*, p. cxvi) that the ten tribes intermarried so freely with the surrounding population as to have become completely absorbed; and it appears to be a universal opinion that no one now knows where their descendants are. But it is a harsh assumption that such intermarriages were commoner with the ten tribes than with the two; and certainly, in the apostolic days, the *twelve* tribes are referred to as a well-known people, sharply defined from the heathen (James i:1; Acts xxiv:7). Not a trace appears that any repulsive principle existed at that time between the Ten and the Two. 'Ephraim no longer envied Judah, nor Judah vexed Ephraim;' but they had become 'one nation;' though only partially 'on the mountains of Israel' (Is. xi:13; Ezek. xxxvii:22). It would seem, therefore, that the result of the captivity was to blend all the tribes together and produce a national union which had never been effected in their own land. If ever there was a difference between them as to the books counted sacred, that difference entirely vanished; at least no evidence appears of the contrary fact. When, moreover, the laws of landed inheritance no

longer enforced the maintenance of separate tribes and put a difficulty in the way of their intermarriage, an almost inevitable result in course of time was the entire obliteration of this distinction.

(7) **Under Cyrus.** When Cyrus gave permission to the Israelites to return to their own country, and restored their sacred vessels, it is not wonderful that few persons of the ten tribes were eager to take advantage of it. In two centuries they had become thoroughly naturalized in their eastern settlements; nor had Jerusalem ever been the centre of proud aspirations to them. It is perhaps remarkable that in Ezra ii:2, 36 (see also x:18, 25), the word *Israel* is used to signify what we might call the laity as opposed to the priests and Levites, which might seem as though the writer were anxious to avoid asserting that all the families belonged to the two tribes. (If this is not the meaning, it at least shows that all discriminating force in the words *Israel* and *Judah* was already lost. So, too, in the book of Esther, the twelve tribes through all parts of the Persian empire are called Jews.) Nevertheless, it was to be expected that only those would return to Jerusalem whose expatriation was very recent; and principally those whose parents had dwelt in the Holy City or its immediate neighborhood. The re-migrants doubtless consisted chiefly of the pious and the poor, and as the latter proved docile to their teachers, a totally new spirit reigned in the restored nation.

(8) **Influence of Ezra.** Whatever want of zeal the anxious Ezra might discern in his comrades, it is no slight matter that he could induce them to divorce their heathen wives—a measure of harshness which St. Paul would scarcely have sanctioned (1 Cor. vii:12); and the century which followed was, on the whole, one of great religious activity and important permanent results on the moral character of the nation. Even the prophetic spirit by no means disappeared for a century and a half; although at length both the true and the false prophets were supplanted among them by the learned and diligent scribe, the anxious commentator and the over-literal or over-figurative critic. In place of a people prone to go astray after sensible objects of adoration, and readily admitting heathen customs, attached to monarchical power, but inattentive to a hierarchy; careless of a written law and movable by alternate impulses of apostasy and repentance; we henceforth find in them a deep and permanent reverence for Moses and the prophets, an aversion to foreigners and foreign customs, a profound hatred of idolatry, a great devotion to priestly and Levitical rank, and to all who had an exterior of piety; in short, a slavish obedience both to the law and to its authorized expositors. Now, first, as far as can be ascertained (observe the particularity of detail in Neh. viii:4, etc.), were the synagogues and houses of prayer instituted, and the law periodically read aloud. Now began the close observance of the Passover, the Sabbath and the Sabbatical year. Such was the change wrought in the guardians of the Sacred Books that, whereas the pious king Josiah had sat eighteen years on the throne without knowing of the existence of 'the Book of the Law' (2 Kings xxii:3, 8); in the later period, on the contrary, the text was watched over with a scrupulous and fantastic punctiliousness. From this era the civil power was absorbed in that of the priesthood, and the Jewish people affords the singular spectacle of a nation in which the priestly rule came later in time than that of hereditary kings. Something analogous may perhaps be seen in the priestly authority of

Comana in Cappadocia under the Roman sway (Cicero, *Ep. ad Div.* xv:4, etc.).

(9) **Results of Captivity.** In their habits of life also the Jewish nation was permanently affected by the first captivity. The love of agriculture, which the institutions of Moses had so vigorously inspired, had necessarily declined in a foreign land, and they returned with a taste for commerce, banking and retail trade which was probably kept up by constant intercourse with their brethren who remained in dispersion. The same intercourse in turn propagated toward the rest the moral spirit which reigned at Jerusalem. The Egyptian Jews, it would seem, had gained little good from the contact of idolatry (Jer. xlv:8); but those who had fallen in with the Persian religion, probably about the time of its great reform by Zoroaster, had been preserved from such temptations and returned purer than they went.

In Egypt and Arabia, in Babylonia, Assyria, Media, masses of the nation were planted, who, living by traffic and by banking, were necessitated to spread in all directions as their numbers increased. By this natural progress they moved westward, as well as eastward, and, in the time of St. Paul, were abundant in Asia Minor, Greece and the chief cities of Italy.

(10) **Under the Romans.** The extermination suffered by the Jewish inhabitants of Palestine under the Romans far better deserves the name of captivity, for, after the massacre of countless thousands, the captives were reduced to a real bondage. According to Josephus (*De Bell. Jud.* vi. 9, 3), 1,100,000 men fell in the siege of Jerusalem by Titus, and 97,000 were captured in the whole war. Of the latter number, the greatest part was distributed among the provinces, to be butchered in the amphitheatres or cast there to wild beasts; others were doomed to work as public slaves in Egypt; only those under the age of seventeen were sold into private bondage. An equally dreadful destruction fell upon the remains of the nation, which had once more assembled in Judæa, under the reign of Hadrian (A. D. 133), which Dion Cassius concisely relates, and by these two savage wars the Jewish population must have been effectually extirpated from the Holy Land itself, a result which did not follow from the Babylonian captivity.

Figurative. *Captivity* also signifies a multitude of captives, who had made others captive.

"Children of the captivity" denotes those who were in captivity, or their posterity (Ezra iv:1). "The Lord turned the captivity of Job" (Job xlii:10) means that he released him from his sufferings and restored him to prosperity.

Jesus leads *captivity captive*, when he makes his enemies serve as his slaves in promoting his work, and when he apprehends and subdues his people by the word of his grace, and places them in their new covenant state (Eph. iv:8; Comp. Ps. lxxviii:18).

CARAVAN (kăr'á-văn) is the name given to a body of merchants or pilgrims as they travel in the East.

(1) **Composition.** The company composing a caravan is often very numerous, consisting, it may be, of several hundred persons, and as many thousand camels, and it may be supposed that the assembling of so many individuals, together with the orderly distribution of their respective bales of merchandise and traveling equipage, is an affair requiring both time and the most careful attention. Accordingly, the packing and unpacking of the camels as well as the general serv-

ice of the caravans employ a great many hands, some of whom, by dint of economy and active habits often raise themselves from the condition of servants to the more respectable status of merchants, who travel on their own account or in the capacity of carriers. Any person can, under certain regulations, form a caravan at any time. But generally there are stated periods, which are well known as the regular starting times for the mercantile journeys, and the merchants belonging to the company, or those travelers who are desirous of accompanying it for the benefit of a safe conduct, repair to the place of rendezvous where the caravan is to be formed, exhibiting, as their goods and camels successively arrive, a motley group—a busy and tumultuous scene of preparation, which can be more easily conceived than described. As in the hot season the traveling is performed under night, the previous part of the day on which the caravan leaves is consumed in the preparatory labors of packing—an indispensable arrangement, which has been observed with unbroken uniformity since the days of Ezekiel (xii:3), and then, about eight o'clock, the usual starting time, the whole party put themselves in motion, and continue their journey without interruption till midnight (Luke xi:5, 6) or later. At other seasons they travel all day, only halting for rest and refreshment during the heat of noon. The distances are measured by a day's journey, and from seven to eight hours seem to have been a usual day's journey for caravans (Hornemann, p. 150); so that, estimating the slow and unwieldy gait of a camel at two and one-half miles an hour, the average rate of travel will be from seventeen to twenty miles per day.

(2) **Earliest Caravan.** The earliest caravan of merchants we read of is the itinerant company to whom Joseph was sold by his brethren (Gen. xxxvii). Here we find the Ishmaelites from Gilead conducting a caravan loaded with the spices of India, the balsam and myrrh of Hadramaut, and in the regular course of their traffic proceeding to Egypt for a market. The date of this transaction is more than seventeen centuries before the Christian era, and notwithstanding its antiquity, it has all the genuine features of a caravan crossing the desert at the present hour.

(3) **Pilgrims.** Besides these communities of traveling merchants in the East there are caravans of pilgrims, *i. e.* of those who go for religious purposes to Mecca, comprising vastly greater multitudes of people. Four of these start regularly every year—one from Cairo, consisting of Mohammedans from Barbary; a second from Damascus, conveying the Turks; a third from Babylon, for the accommodation of the Persians, and a fourth from Zibith, at the mouth of the Red Sea, which is the rendezvous for those coming from Arabia and India. The organization of the immense hordes which, on such occasions, assemble to undertake a distant expedition, strangers to each other, and unaccustomed to the strict discipline which is indispensable for their comfort and security during the march, though, as might be expected, a work of no small difficulty, is accomplished in the East by a few simple arrangements which are the results of long experience. One obvious bond of union to the main body, when traveling by night and through extensive deserts, is the music of the Arab servants, who, by alternate songs in their national manner, beguile the tedium of the way, while the incessant jingling of innumerable bells fastened to the necks of the camels—a characteristic feature of Oriental caravans—enlivens the patient beasts, frightens animals of prey and keeps the party together.

To meet all the exigencies of the journey, however, which would be a task impracticable without the establishment of some kind of order, and a prudent division of labor, the caravan is placed under the charge of a *caravan bashè*, the chief who presides over all, and under whom there are five leading officers appointed to different departments—one who regulates the march; a second, whose duties only commenced at halting time; a third who superintends the servants and cattle; a fourth who takes charge of the baggage; a fifth who acts as paymaster.

This description of the general economy of caravans we follow up by the account given by Pitts of the Hadj caravan, which he accompanied to Mecca, and embracing so many minute details, that it may be both interesting and instructive to the reader to be furnished with it in the traveler's own words. 'The first day,' says he, 'we set out from Mecca, it was without any order at all—all hurly-burly; but the next day every one labored to get forward, and in order to do it there was many times much quarreling and fighting. But after everyone had taken his place in the caravan they orderly and peaceably kept the same place till they came to Grand Cairo. They travel four camels abreast, which are all tied one after another, as in teams. The whole body is divided into several *cottors*, or companies, each of which has its name, and consists, it may be, of several thousand camels; and they move, one cotto after another, like distinct troops. At the head of each cotto is some great gentleman or officer, who is carried in a thing like a litter, borne by two camels, one before and the other behind. At the head of every cotto there goes likewise a sumpter camel, which carries his treasure, etc. This camel has two bells, hanging one on each side, the sound of which may be heard a great way off. Others of the camels have bells round about their necks, like those which our carriers put about their fore horse's neck, which, together with the servants who belong to the camels, and travel on foot, singing all night, make a pleasant noise, and the journey passes away delightfully. Thus they travel in good order every day till they come to Grand Cairo; and were it not for this order you may guess what confusion would be among such a vast multitude. They have lights by night (which is the chief time of traveling, because of the exceeding heat of the sun), which are carried on the top of high poles, to direct the hadjis, or pilgrims, on their march. These are somewhat like iron stoves, into which they put short dry wood, which some of the camels were loaded with; it is carried in great sacks, which have a hole near the bottom, where the servants take it out as they see the fire needs a recruit. Every cotto has one of these poles belonging to it, some of which have ten, some twelve, of these lights on their tops, or more or less; they are likewise different in figures as well as in numbers—one perhaps oval-way, like a gate; another triangular, or like N or M, etc., so that everyone knows by them his respective cotto. They are carried in the front and set up in the place where the caravan is to pitch, before that comes up, at some distance from one another. They are also carried by day, not lighted; but yet, by the figure and number of them, the hadjis are directed to what cotto they belong, as soldiers are by their colors where to rendezvous; and without such directions it would be impossible to avoid confusion in such a vast number of people.'

(4) **March of Israel.** This description of the Hadj caravans that travel yearly to Mecca bears so close a resemblance to the far-famed

journey of the Israelites through almost the same extensive deserts that, as the arrangement of those vast traveling bodies seems to have undergone no material alteration for nearly four thousand years, it affords the best possible commentary illustrative of the Mosaic narrative of the Exodus. Like them, the immense body of Israelitish emigrants, while the chief burden developed on Moses, was divided into companies, each company being under the charge of a subordinate officer, called a prince (Num. vii). Like them, the Hebrews made their first stage in a hurried manner and in tumultuous disorder (Exod. xii:11); and, like them, each tribe had its respective standard, which was pitched at the different stages, or thrust perpendicularly into the ground, and thus formed a central point, around which the straggling party spread themselves during their hours of rest and leisure (Num. ii:2). Like them, the signal for starting was given by the blast of a trumpet, or rather trumpets (Num. x:2, 5); and the time of march and halting was regulated by the same rules that have been observed by all travelers from time immemorial during the hot season. Like theirs, too, the elevation of the standard, as it was borne forward in the van of each company, formed a prominent object to prevent dispersion, or enable wanderers to recover their place within the line or division to which they belonged. Nor was there any difference here, except that, while the Israelites in like manner prosecuted their journey occasionally by night as well as by day, they did not require the aid of fires in their standards, as the friendly presence of the fiery pillar superseded the necessity of any artificial lights. One other point of analogy remains to be traced in the circumstance of Hobah being enlisted in the service of the Hebrew caravan as its guide through the great Arabian desert. At first sight the extreme solicitude of Moses to secure his brother-in-law in that capacity may appear strange, and not easily reconcilable with the fact that they enjoyed the special benefit of a heavenly guide, who had guaranteed, in a supernatural manner, to direct their progress through the wilderness. But the difficulty will vanish when it is borne in mind that, although the pillar of cloud by day and of fire by night sufficed to regulate the main stages of the Hebrews, foraging parties would at short intervals require to be sent out, and scouts to reconnoiter the country for fuel, or to negotiate with the native tribes for provender and water.

(5) **Jewish Pilgrims.** The bands of Jewish pilgrims that annually repaired from every corner of Judæa to attend the three great festivals in Jerusalem, wanted this government and distribution into distinct companies and seem to have resembled less the character of the great Mecca caravans than the irregular processions of the Hindoos to and from the scene of some of their religious pageants. As in a crowd of this motley description not the slightest regard is paid to regularity or order, and everyone, of course, takes the place or mingles with the group that pleases him, the separation of the nearest friends for a whole day must, in such circumstances, be a common and unavoidable occurrence, and yet anxiety is never felt, unless the missing one fail to appear at the appointed rendezvous of the family. In like manner among the ancient Jews the inhabitants of the same village or district would naturally form themselves into traveling parties for mutual security as well as for enjoying the society of acquaintance. The poorer sort would have to travel on foot, while females and those of the better class might ride on asses and

cameis. But as their country was divided into tribes, and those who lived in the same hamlet or canton would be more or less connected by family ties, the young, the volatile and active among the Jewish pilgrims had far more inducements to disperse themselves amongst the crowd than those of the modern processions, numbers of whom are necessarily strangers to each other. In these circumstances it is easy to understand how the young Jesus might mingle successively with groups of his kindred and acquaintances, who, captivated with his precocious wisdom and piety, might be glad to detain him in their circle, while his mother, together with Joseph, felt no anxiety at his absence, knowing the grave and sober character of their companions in travel, and the incident is the more natural that his parents are said to have gone 'one day's journey from Jerusalem before they missed him;' since, according to the

the same class in this country, much less do they approximate to the character and appurtenances of European hotels.

(2) **Egyptian Inn.** The Egyptian inn, where the sons of Israel halted to bait their asses, was probably, from the remote period to which it belonged, of a rude and humble description, in point both of appearance and accommodation—merely a shed, under the roof of which the cattle and their drivers might obtain shelter from the heats of noon and the dews of midnight, and such is the low state of art, or the tyrannical force of custom in the East, that few establishments of this kind in the present day can boast of improvements that render them superior to the mean and naked poverty of those which received the pilgrims of the patriarchal age.

(3) **Innkeepers.** Among the Egyptians, and indeed among the ancients generally, the keepers

Kahn, or Inn.

present, and probably the ancient, practice of the East, the first stage is always a short one, seldom exceeding two or three hours.

CARAVANSARY (kār'á-vân'sá-rÿ).

In the days of the elder patriarchs there seem to have been no places specially devoted to the reception of travelers, at least in the pastoral districts frequented by those venerable nomades; for we find Abraham, like the Oriental shepherds of the present day, under a strong sense of the difficulties and privations with which journeying in those regions was attended, deeming it a sacred duty to keep on the outlook, and offer the way-faring man the rites of hospitality in his own tent.

(1) **First Mention.** The first mention of an inn, or house set apart for the accommodation of travelers, occurs in the account of the return of Jacob's sons from Egypt (Gen. xlii:27), and as it was situated within the confines of that country, and at the first stage from the metropolis, it is probable that the erection of such places of entertainment originated with the Egyptians, who were far superior to all their contemporaries in the habits and the arts of civilized life, and who, though not themselves a commercial people, yet invited to their markets such a constant influx of foreign traders that they must have early felt the necessity and provided the comforts of those public establishments. The 'inns' where travelers lodge in the East do not, however, bear the least resemblance to the respectable houses of

of houses of public entertainment were always women (Herod. ii:35), and hence we can easily account for the ready admission which the spies obtained into the house of Rahab, 'on the wall of Jericho,' situated, as such houses were, for the reception of strangers, for the most part at the gate or entrance into the town (Josh. ii:1). This woman is called a harlot in our translation. But the Hebrew, *zonah*, signifies also the landlady of an inn or tavern—most of whom, doubtless, in ancient times, were women of easy virtue—the more so as the idolatrous religion to which they were educated encouraged prostitution, and hence there being only a single word in the original descriptive of both professions, and the first having been adopted by the Septuagint, which was the common version of the Jews in the days of Paul and James (Heb. xi:31; James ii:25), those two apostles might have used the same expression that they found there. The original Hebrew, however, admits of being translated by another word, to which no degrading or infamous associations are attached.

(4) **In the Time of Christ.** The state of Judæa, in the time of Christ and the apostles, was probably, in respect to means of communication, much superior to that of any Oriental country in the present day, and we may be disposed to conclude that for the encouragement of intercourse between distant parts, that country was then studded with houses of public entertainment on a scale of liberal provision at present un-

known in the same quarter of the world. But the warm commendations of hospitality so frequently met with in the works of contemporary classical writers, as well as the pressing exhortations of the inspired apostle to the practice of that virtue, too plainly prove that travelers were then chiefly dependent on the kindness of private individuals. The strong probability is that the 'inns' mentioned in the New Testament find their true and correct representations in the Eastern khans and caravansaries of the present day, and that, although the Jews of that period could not have been acquainted with the largest and most magnificent of this class of buildings, which do not date earlier than the commencement of the Mecca caravans, and which the devotion of opulent Mussulmans then began to erect for the accommodation of the pilgrims, they had experience of nothing better than the bare walls and cell-like apartments of such edifices as we have described above. Bishop Pearce, Dr. Campbell and others, indeed, have labored to show that *κατάλυμα*, *guest chamber*, the word used by Luke to denote the place whence Mary was excluded by the previous influx of strangers, is not synonymous with *πανδοχείον*, *the common inn*, the house to which the good Samaritan brought the wounded stranger, although in both instances our translators, for want of corresponding terms in the English language, have indiscriminately rendered it by 'inn.' *Kataluma* signifies the *guest chamber* (Mark xiv:14; Luke xxii:11), and it is extremely probable that, as upper rooms were always the largest in a house, and most suitable for the reception of a numerous company, every respectable household in Jerusalem appropriated one gratuitously to his friends, who flocked to Jerusalem at the annual feasts, and who, from that circumstance might call it their 'inn.' *Pandokeion*, again, was a house set apart for the accommodation of all strangers who could pay for their lodging and entertainment, and as the name seems to imply, was of a mean description, having no partition wall, men and cattle being both included under the same roof, the former occupying one side, and the latter the other. Bethlehem being the chief city of the family of David, a *κατάλυμα*, *guest chamber*, might have been placed by the kindness of some friend at the service of Joseph and Mary, who were wont to resort to it as often as business or friendship called them to town. But as the same privilege might have been offered to others, who, owing to the general census, flocked in such unwonted numbers that the first corners completely occupied every vacant space, they were obliged to withdraw to the *πανδοχείον*, *common inn*, where, in the only retired corner, viz., at the head of the cattle, the mother of Jesus brought forth her child. And occasions are constantly occurring to set multitudes on travel, many of whom are driven, like Joseph and Mary, for want of room, from the inn to the adjoining stables.

Many caravansaries, however, have not the accommodation of stables, the cattle being allowed to range in the open area, and hence has arisen an opinion warmly espoused by many learned writers, and supported by a venerable tradition, that our Lord was born in an adjoining shed, or probably in a subterranean cave, like the grotto that is sometimes connected with the fountain of the place. The most complete establishments have very excellent stables in covered avenues, which extend *behind* the ranges of apartments—that is, between the back walls of these ranges of buildings and the *external* wall of the khan, and the entrance to it is by a covered passage at one of

the corners of the quadrangle. The stable is on a level with the court, and consequently below the level of the buildings, by the height of the platform on which they stand. Nevertheless, this platform is allowed to project behind into the stable, so as to form a bench, to which the horses' heads are turned, and on which they can, if they like, rest the nose-bag of haircloth, from which they eat, to enable them to reach the bottom when its contents get low. It also often happens that not only this bench exists in the stable, but also recesses corresponding to those in front of the apartments, and formed by the side walls which divide the rooms, being allowed to project behind into the stable, just as the projection of the same walls into the great area forms the recesses in front. These recesses in the stable or the bench, if there are no recesses, furnish accommodation to the servants and others who have charge of the beasts, and when persons find on their arrival that the apartments usually appropriated to travelers are already occupied, they are glad to find accommodation in the stable, particularly when the nights are cold or the season inclement. It is evident, then, from this description, that the part of the stable called 'the manger,' could not reasonably have been other than one of those recesses, or at least a portion of the bench which we have mentioned, as affording accommodation to travelers under certain circumstances.

CARBUNCLE (kär'bŭn-k'l). The representative in the A. V. of the Hebrew words *ek-dawekh*, *עִקְדָוֶכֶךְ*, blaze, sparkle, and *barw-rek-ath'*, *barw-reh'kath*, *בָּרְוֶרֶכְאֵת*, shining like lightning.

According to Dana, Pliny called three distinct minerals, the ruby spinel, the garnet and the sapphire, carbuncles. (See SAPPHIRE.) Perhaps the term *ekdach* may be a general one to denote any *bright, sparkling gem*, but as it occurs only once (Is. liv:12), without any collateral evidence to aid us, it is impossible to determine the real meaning of the word.

Baréketh is rendered *smaragdus* by Josephus, the Seventy and the Vulgate; and this is vindicated by Braun. (*De Vest. Sacerd. Heb.* p. 517, sq.) It was the third stone in the first row of the sacerdotal breastplate (Ex. xxviii:17; xxxix:10), also one of the mineral treasures of the king of Tyre (Ezek. xxviii:13).

CARCAS (kär'kas), (Heb. *כַּרְכַּס*, *kar-kas'*, severe), the seventh of the seven chamberlains, or eunuchs, of King Ahasuerus (Esth. i:10), B. C. 483.

CARCASE (kär'kas), (Heb. mostly *נֶב־אֵי־לָו'*, *neb-ay-law'*; *פֶּה־גֶחֶר*, *peh'gher*), the dead body of man or beast (Josh. viii:29; Is. xiv:19; Heb. iii:17, etc).

The Mosaic law was very strict in relation to the care of the dead, and the instructions given were in accordance with the most recent discoveries of science. A dead body rendered the tent and all open cooking utensils unclean for seven days. Thorough purification was also enjoined after touching a corpse. (See UNCLEANNES.)

CARCHEMISH (kär'ke-mish), (Heb. *כַּרְכֶּמֶשׁ*, *kar-kem-eesh'*), formerly Charchemish (2 Chron. xxxv:20).

A great fortress, west of the Euphrates, at a ford of the river and north of its confluence with the Sajur. It was also the eastern capital of the Hittites.

The Assyrian king, Assur-Natsu-pal (B. C. 885 to 860), threatened to assault it, but was bought

off with rich and numerous presents, for the uninterrupted prosperity of several centuries had filled it with merchants and riches.

Sargon captured it in 717 B. C., and with it fell the empire of the Hittites (Is. x:9). In the prophecy of Jeremiah against Egypt he states: 'Against the army of Pharaoh-necho, king of Egypt, which lay on the river Euphrates, at Carchemish, and which Nebuchadnezzar, the king of Babylon, overthrew (B. C. 605) in the fourth year of Jehoiakim, the son of Josiah, king of Judah' (Jer. xlvi:2). According to 2 Chron. xxxv:20, Necho had five years before defeated and slain Josiah, who was in alliance with Babylon and had advanced to the Euphrates to take Carchemish.

It is possible that the ruin of Carchemish dates from the battle. However that may be, long before the beginning of the Christian era it had been supplanted by Mabog or Membij, and the great sanctuary which had made it a 'holy city' was transferred to its rival and successor.

To Mr. Skene, for many years the English consul at Aleppo, is due the credit of first discovering the true site of the old Hittite capital. On the western bank of the Euphrates, midway between Birejik and the mouth of the Sajur, rises an artificial mound of earth, under which ruins and sculptured blocks of stone had been found from time to time. It was known as Jerablûs, or Kalaat Jerablûs, 'the fortress of Jerablûs,' sometimes wrongly written Jerabis; and in the name of Jerablûs Mr. Skene had no difficulty in recognizing an Arab corruption of Hierapolis. In the Roman age the name of Hierapolis, or 'Holy City,' had been transferred to its neighbor Membij, which inherited the traditions and religious fame of the older Carchemish; but when the triumph of Christianity in Syria brought with it the fall of the great temple of Membij, the name disappeared from the later city and was remembered only in connection with the ruins of the ancient Carchemish.

CARE (kâr), **CARES**, (Gr. μέριμνα, *mer'im-nah*).

The Greek word has the sense of being drawn in different directions, and answers to our *distraction*. It is used in the sense of anxiety in 1 Pet. v:7, where it is contrasted with μέλω, *mel'ô*, to *be of interest* to, and may be read, "Casting all your anxiety upon him, for he is interested in you" (Comp. Ps. lv:22; Luke viii:14; xxi:34).

CAREAH (ka-rē'ah), (Heb. קַרְעָה, *kar-ray'akh*, bald head), father of Johanan (2 Kings xxv:23), elsewhere spelt Kareali (B. C. 588).

CAREFULNESS (kâr'ful-nēs), (Heb. דְּבִירָה, *deh-aw-gaw'*, trouble, Ezek. xii:18, 19; Gr. σπουδή, *sponday'*, dispatch, haste, diligence, 2 Cor. vii:11). "Without carefulness" is the rendering of Gr. ἀμέριμνος, *am-er'im-nos* (1 Cor. vii:32), without anxiety or worry.

CARELESS and **CARELESSLY** have always the meaning of *without trouble or anxiety, in security* (the Heb. meaning always 'to trust' or 'confidence'); 'careless' (Judg. xviii:7; Is. xxxii:9, 10, 11; Ezek. xxx:9, but R. V. adds Prov. xix:16, Heb. 'a despiser'); 'carelessly' (Is. xlvi:8; Ezek. xxxix:6; Zeph. ii:15). (Hastings' *Bib. Dict.*)

CAREM (kâ'rēm), (Gr. Καρέμ, *kah-rem'*), a city of Judah interpolated by the Sept. (Josh. xv:59). Probably Beth-Haecerem.

CARIA (kâ'ri-â), (Gr. Καρία, *karî'a*), a country lying at the southwestern extremity of Asia Minor (1 Macc. xv:22, 33).

It was a separate district, B. C. 139, having the enjoyment of the privilege of freedom granted by

the Romans. It was a little later incorporated in the province of Asia. Its principal towns were Halicarnassus, Cnidus and Myndus, which are all mentioned in the rescript of the Roman senate. Halicarnassus was the birthplace of Herodotus; Cnidus is mentioned in Acts xxvii:7, as having been passed by St. Paul on his voyage to Rome.

CARITES (kâr'i-tēs). See CHERETHITES AND P.

CARMANIANS (kâr-mā'ni-anz), (*Carmanii*). The inhabitants of Carmania, a province of Asia on the north side of the Persian Gulf (2 Esdr. xv:30).

They are described by Strabo (xv. p. 727) as a warlike race, worshiping Ares alone of all the gods, to whom they sacrifice an ass. None of them married till he had cut off the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal, and in this condition, after being tasted by the king, was given to the warrior who brought it to his family to eat. Nearchus says that most of the customs of the Carmanians, and their language, were Persian and Median. (Smith, *Bib. Dict.*)

CARMEL (kâr'mel), (Heb. קַרְמֶל, *karmel'*, a planted field, park, garden).

1. A range of hills extending northwest from the plain of Esdraelon, and ending in a promontory or cape which forms the Bay of Acre.

The extent of this range of hills is about six miles, not in a direct line, but the two extremities (on the western side towards the sea) jut out, and stand over against each other, forming a bow in the middle. The height is about 1,500 feet; and at the foot of the mountain, on the south, runs the brook Kishon, and a little further north, the River Belus. Mount Carmel consists rather of several connected hills than of one ridge, the north and eastern parts being somewhat higher than the southern and western. The foot of the northern portion approaches the water very closely, so that, when seen from the hills northeast of Acre, the mountain appears as if dipping his feet in the western sea; but further south it retires more inland, so as to leave between the mountain and the sea an extensive and very fertile plain.

Mount Carmel forms the only great promontory upon the coast of Palestine. According to the reports of most travelers the mountain well deserves its Hebrew name (Carmel—*country of vineyards and gardens*). Mariti describes it as 'a delightful region,' and says the good quality of its soil is apparent from the fact that many odoriferous plants and flowers, as hyacinths, jonquils, tazettos, anemones, etc., grow wild upon the mountain (*Travels*, p. 274, sq). Otto von Richter (*Wallfahrten*, p. 64) gives the following account: Mount Carmel is entirely covered with verdure. On its summit are pines and oaks, and further down olives and laurel trees, everywhere plentifully watered. It gives rise to a multitude of crystal brooks, the largest of which issues from the so-called Fountain of Elijah; and they all hurry along, between banks thickly overgrown with bushes, to the Kishon. Every species of tillage succeeds here admirably under this mild and cheerful sky. The prospect from the summit of the mountain over the gulf of Acre and its fertile shores, and over the blue heights of Lebanon and the White Cape is enchanting. Isaiah (xxxv:2) alludes to 'the excellency (splendid ornaments) of Carmel.' So, on account of the graceful form and verdant beauty of the sum-

mit, the head of the bride in Cant. vii:5 is compared to Carmel. It was also celebrated for its pastures, and is therefore ranked with Bashan in Is. xxxiii:9; Jer. xlvi:18; Amos i:2). A forest probably consisting chiefly of fruit trees, was in its midst (Mic. vii:14).

The mountain is of compact limestone, and, as often happens where that is the case (see CAVE), there are in it very many caverns—it is said, more than a thousand. In one tract, called the Monk's Cavern, there are as many as four hundred adjacent to each other, furnished with windows and with places for sleeping hewn in the rock.

That the grottoes and caves of Mount Carmel were already, in very ancient times, the abode of prophets and other religious persons is well known. The prophets Elijah and Elisha often resorted thither (1 Kings xviii:19, sq. 42; 2 Kings ii:25; iv:25, and comp. perhaps 1 Kings xviii:4, 13). At the present day is shown a cavern called the cave of Elijah, a little below the Monks' Cavern already mentioned, and which is now a Moslem sanctuary. Upon the summit is an ancient establishment of Carmelite monks, which order, indeed, derived its name from this mountain. The old convent was destroyed by Abdallah Pasha, who converted the materials to his own use; but it has of late years been rebuilt on a somewhat imposing scale by the aid of contributions from Europe.

2. Another Carmel, among the mountains of Judah, is named in Josh. xv:55. It was here that Saul set up the trophy of his victory over Amalek (1 Sam. xv:12), and where Nabal was shearing his sheep when the affair took place between him and David, in which Abigail bore so conspicuous a part (1 Sam. xxv:2, sq.). This Carmel is described by Eusebius and Jerome as, in their day, a village, with a Roman garrison, ten miles from Hebron, verging toward the east. From the time of the Crusades till the present century its name seems to have been forgotten. But it was recognized by recent travelers under the name of Kurmil. The place is now utterly desolate, but the ruins indicate a town of considerable extent and importance. The most remarkable ruin is that of a castle, quadrangular, standing on a swell of ground in the midst of the town. A minute description of this and the other remains is given by Dr. Robinson (*Bib. Researches*, ii. pp. 195-201). The distance of this place from Hebron is about nine Roman miles.

CARMELITE (kär'mel-ite), (Heb. כַּרְמֵלִי, *kar'mel-i*), a native of Carmel in the mountains of Judah (1 Sam. xxx:5; 2 Sam. ii:2; iii:3; xxiii:35; 1 Chron. xi:37).

CARMELITISS (kär'mel-i'tess), (Heb. כַּרְמֵלִית, *kar'mel-lith*), a woman of Carmel of Judah; used only of Abigail, the favorite of David (1 Sam. xxvii:3; 1 Chron. iii:1).

CARMI (kär'mi), (Heb. כַּרְמִי, *kar'mee'*, fruitful, noble).

1. A man of Judah, father of Achan, the "troubler of Israel" (Josh. vii:1,18; 1 Chron. ii:7), according to which he is the son of Zabdi or Zimri.

In 1 Chron. iv:1 the name is given as the son of Judah, but the same person is probably intended.

2. The fourth son of Reuben, founder of the family of Carmites (Gen. xlvi:9; Ex. vi:14; Num. xxvi:6; 1 Chron. v:3), B. C. 1872.

CARMITES (kär'mites), (Heb. כַּרְמִי, *kar'mi*), a branch of the tribe of Reuben, descended from Carmi (2) (Num. xxvi:6).

CARNAIM (kär-nä'im), (Sept. Καρναϊν, *kar-na'in*). See ASHTAROTH.

CARNAL (kär'nal), (from Gr. σάρξ, *sarx*, flesh), having the nature of flesh (Rom. vii:14); governed by mere human nature, not by the Spirit of God (1 Cor. iii:1, 3, "fleshly").

The ceremonial ordinances were *carnal*; they related immediately to the bodies of men and beasts (Heb. vii:16 and ix:10). Wicked men are *carnal*, and *carnally minded*; are under the dominion of their sinful lusts, and habitually think of, desire after, and delight in, sinful and fleshly pleasures and enjoyments (Rom. viii:6, 7). Saints, especially if weak, are *carnal*; much sin continues in and prevails over them if their care for and delight in worldly things is great (Rom. vii:14; 1 Cor. iii:1-4). Ministers' weapons are not *carnal*, are not merely human and natural (2 Cor. x:4).

CARNION (kär'ni-ön). See ASHTAROTH.

CARPENTER (kär'pën-tēr), (Heb. כַּרְתָּן, *khaw-rawsh'*, 2 Sam. v:11; 1 Chron. xiv:1; Is. xlv:13, etc.; Gr. τέκτων, *tek'tone*, Matt. xiii:55; Mark vi:3). A general term, including an artificer in stone and metal as well as wood. (See HANDICRAFT.)

CARPUS (kär'pus), Gr. Κάριπος, *kar'pos*, fruit), a disciple of Paul who dwelt at Troas (2 Tim. iv:13).

CARRIAGE (kär'rīj), (Heb. כֶּלֶעִי, *kel-ee'*). This word occurs only six times in the text of the A. V., and it may be useful to remind the reader that in none of these does it bear its modern sense, but signifies what we now call "baggage" (1 Sam. xvii:22; Is. x:28; 1 Macc. ix:35, 39; Acts xxi:15). In the margin of 1 Sam. xvii:20, and xxvi:5, 7—and there only—"carriage" is employed in the sense of a wagon or cart; the "place of the carriage" answering to "trench" in the text. The Hebrew word is מַגְלָה, *magalah'*, and the allusion is to the circle of wagons which surrounded the encampment (*Ges. Thes.* 989).

The Revised Version has substituted the appropriate modern word in place of the obsolete term *carriage*.

CARSHENA (kär'she-nà or kär-shē'nà), (Heb. כַּרְשֵׁנָא, *kar-shen-aw'*), one of the seven princes who "saw the king's face" (Esth. i:14), B. C. 483.

CART (kärt), (Heb. אֶגְלוֹ, *ag-aw-law'*).

The Hebrew word rendered by our translators in some places by 'wagon,' and in others by 'cart,' denotes any vehicle moving on wheels, and

Egyptian Cart, with Two Wheels.

usually drawn by oxen; and their particular character must be determined by the context indicating the purpose for which they were employed. First, we have the carts which the King of Egypt

sent to assist in transporting Jacob's family from Canaan (Gen. xlv:19, 27). From their being so sent it is manifest that they were not used in the latter country; and that they were known there as being peculiar to Egypt is shown by the confirmation which they afforded to Jacob of the truth of the strange story told by his sons. These carts, or wagons, were, of course, not war-chariots, nor such curricles as were in use among the Egyptian nobility, but were not suited for traveling.

Elsewhere (Num. vii:3, 6; 1 Sam. vi:7) we read of carts used for the removal of the sacred arks and utensils. These also were drawn by two oxen.

A very curious vehicle used for such purposes by the Egyptians is little more than a platform on wheels; and the apprehension which induced Uzzah to put forth his hand to stay the ark when shaken by the oxen (2 Sam. vi:6), may suggest that the cart employed on that occasion was not unlike this, as it would be easy for a jerk to displace whatever might be upon it.

As it appears that the Israelites used carts, they doubtless employed them sometimes in the removal of agricultural produce, although we are not aware of any distinct mention of this practice in Scripture. This is now the only use for which carts are employed in Western Asia.

Assyrian Cart.

Figurative. The expression, "Woe unto them that draw . . . sin, as it were, with a cart rope" (Is. v:18), is understood by some to refer to the binding of burdens upon carts, and so to the enslaving power of sin. Others think that *cart rope* is used in the sense of a trace, and that the metaphor is employed to illustrate the heavy burdens which must be drawn by the sinner.

CARVING (kärv'ing), (Heb. כָּרַת, *kaw'lah*, carve).

The art of cutting letters, figures or images in wood, stone, ivory, metal or other material. Carve is rendered in the Auth. Vcrs. by several Hebrew words derived from *Kawlah*. It denotes sculpture (1 Kings vi:29, 32, 35). It is applied to wood (1 Kings vii:36), to gems (Ex. xxviii:9, 36; 2 Chron. ii:7, 14), to stone (Zech. iii:9). There was carved work in the construction both of the Tabernacle and the Temple (Ex. xxxi:2, 5; xxxv:33; 1 Kings vi:18, 35; Ps. lxxiv:6), as well as in the ornamentation of the priestly dresses (Ex. xxviii:9-36; Zech. iii:9; 2 Chron. ii:7, 14). Bezaleel, a man of Judah, and Aholiab were gifted for the work of carving for the tabernacle. In Solomon's time Hiram the Phœnician had the chief care of this as of the larger architectural works.

CASEMENT (käs'ment), (Heb. עֲשָׂה, *esh-nawb'*, lattice window, Prov. vii:6). (See HOUSE.)

CASIPHIA (ka-siph'i-ä), (Heb. כַּסְפִּיָּה, *kaw-sif-yaw'*, white, shining). Ezra says that when return-

ing to Judea he sent to Iddo, who dwelt at Casiphia; perhaps Mount Caspius, near the Caspian Sea, between Media and Hyrcania, or in or near Babylon, where were many captives (Ezra viii:17).

CASLEU (käs'leu): name of the Jewish month (Neh. i:1; Zech. vii:1) elsewhere written CHISLEV or CHISLEU.

CASLUHIM (käs'lu-him), (Heb. כַּסְלִיִּים, *kas-loo'-kheem*), properly Casluchim, a people whose progenitor was a son of Mizraim (Gen. x:14; 1 Chron. i:12).

He, or they, for the word applies rather to a people than to an individual, are supposed by Bochart and others to have carried a colony from Egypt, which settled in the district between Pelusium and Gaza, or, in other words, between the Egyptians and the Philistines. Perhaps they were the inhabitants of Cassotis, a district on the Mediterranean Sea. There are some grounds for this conjecture; but it is impossible to obtain any certainty on so obscure a subject.

CASPHOR (käs'fôr), (Gr. Κασφώρα, *kas-fore'*), one of the fortified cities in the "land of Galaad" east of the Jordan (1 Macc. v:26), in which the Jews took refuge from the Ammonites under Timotheus (comp. v. 6), and which with other cities was taken by Judas Maccabæus (v. 36). In the latter passage the name is given as Casphon, and in 2 Macc. xii:13 as Caspis, if indeed the same place is referred to, which is not quite clear. Josephus calls it Casphoma (*Antiq.* xii:8, 3).

CASPIS (käs'pīs), (Gr. Κάσπιον, *kas'pin*), a strong fortified city—whether east or west of Jordan is not certain. It was taken by Judas Maccabæus with great slaughter (2 Macc. xii:13, 16).

CASSIA (käs'h'ä), (Heb. קַדְדָּוִן, *kid-daw'*, shriveled, Exod. xxx:24; Ezek. xxvii:19; קֶטְשׁ-עֵי-אֲוֵן, *kets-ee-aw'*, peeled).

One of the ingredients in the composition of the "oil of holy ointment." In Ezekiel it is mentioned where "bright iron, cassia and calamus" are mentioned as articles of merchandise in the markets of Tyre. The Septuagint (in one passage) and Joseph. (*Ant.* iii:8, sec. 3) have *iris*, i. e., some species of *flag*, perhaps the *Iris florentina*, which has an aromatic root-stock. Symmachus and the Vulg. (in Ex. xxx:23) read *stacte*, 'liquid myrrh.' The translation of *cassia* by *kiddáh* is supported by the Chaldee and Syriac, with most of the European versions. It probably denotes a species of the bark or wood. On the margin R. V. has *costus*. The *costus* of the ancients was discovered by Falconer to be a composite plant with purple flowers, now called *Aplotaxis lappa*, growing in Cashmere from eight thousand to nine thousand feet above the sea level. It is exported to various countries, the valuable part being the root. The Chinese burn it in their temples for incense. (Davis, *Bib. Dict.*)

Named only in the plural in Ps. xlv:8 in connection with myrrh and aloes to scent garments. It probably refers to the peeled bark of some species of cinnamon. (See KINNAMON).

CASTANET (käs'tá-nët). See MUSICAL INSTRUMENTS.

CASTLE (käs'l). See FORT, FORTIFICATIONS.

CASTOR and POLLUX (käs'tör änd pöl'lüks), (Διόσκουροι), the Dioscuri, *twin sons*: in heathen mythology the twin sons of Jupiter by Leda. They had the special province of assisting persons in danger of shipwreck (Theocrit. *Id.* xxii:1; Xenoph. *Symp.* viii:20. Comp. Horat. *Carm.* i:3, 2; iv:8, 31); and hence their figures were often adopted for the *sign* (τὸ παράσημον, *insigne*), from which a ship de-

rived its name, as was the case with that 'ship of Alexandria' in which St. Paul sailed on his journey for Rome (Acts xxviii:11).

CAT (kät), (Gr. *αἴλουρος*, *ah-ee'loo-ros*).

It might be assumed that the cat was a useful, if not a necessary, domestic animal to the Hebrew people in Palestine, where corn was grown for exportation, as well as for consumption of the resident population, twenty or thirty fold more than at present, and where, moreover, the conditions of the climate required the precaution of a plentiful store being kept in reserve to meet the chances of scarcity. The animal could not be unknown to the people, for their ancestors had witnessed the Egyptians treating it as a divinity. Yet we find the cat nowhere mentioned in the canonical books as a domestic animal. And in Baruch it is noticed only as a tenant of Pagan temples, where no doubt the fragments of sacrificed animals and vegetables attracted vermin and rendered the presence of cats necessary. This singular circumstance, perhaps, resulted from the animal being deemed unclean, and being thereby excluded domestic familiarity, though the Hebrews may still have encouraged it, in common with other vermin-hunters, about the outhouses and farms, and corn stores, at the risk of some loss among the broods of pigeons which, in Palestine, were a substitute for poultry.

With regard to the neighboring nations just named, they all had domestic cats, it is presumed, derived from a wild species found in Nubia and first described by Ruppel under the name of *Felis Maniculata*. The typical animal is smaller, more slender and more delicately limbed than the European. The fur is pale, yellowish gray, with some dark streaks across the paws and at the tip of the tail. In the domesticated state it varies in colors and markings, for the ancient monuments of Egypt contain many painted figures which show them cross-barred like the wild species in Europe.

CATERPILLAR (kät'ēr-pī'l'ēr). See CHASIL.

CATHOLIC CHURCH, ROMAN (IN THE UNITED STATES).

The history of the Catholic Church in the territory now comprised by the states of the Union is the subject of this sketch. This history has two periods: the Mission period, during which the church's work was carried on by missionaries imported from Spain, France and England, and holding their jurisdiction from ecclesiastical superiors in those respective countries; and the Hierarchical period, which began with the establishment of the Episcopal See of Baltimore, and continues down to the present day, during which period the church's work was, and is, carried on by a clergy organized in diocesan groups and holding jurisdiction from bishops appointed by the Holy See to govern determined districts known as dioceses. The former period extends from the arrival of Spanish missionaries in Florida, 1521, to the appointment of the Rt. Rev. John Carroll to the see of Baltimore, 1789. There is an overlapping of this dividing line in the case of New Mexico and California for the reason that they came into the Union after the erection of the see of Baltimore.

Spanish missionaries evangelized Florida, Alabama, Texas, New Mexico, Arizona, California, 1521-1848. French missionaries evangelized Maine, northern New York, the southern coasts of the great lakes, the valleys of the Ohio and the Mississippi, 1604-1789. There is here an overlapping in the case of Louisiana, which entered the Union in 1812. English missionaries evan-

gelized the Atlantic coast from Maine to Virginia, 1634-1789.

(1) **The Spanish Missions.** In 1521 Ponce de Leon brought with him to Florida a certain number of missionaries; but this expedition was driven back by the natives after a very short stay on land. Five years afterward, 1526, with Vasquez de Ayllon sailed two Dominican fathers and a lay brother. Ayllon reached the Chesapeake and formed a settlement, San Miguel, not far from the spot where almost a century later the English founded Jamestown. A temporary chapel was erected and the services of the church were celebrated as long as the settlement lasted. It did not last long. Ayllon died, a severe winter set in, disease came, the settlers quarreled, and the Indians attacked them. When spring came, the colonists, disgusted and despairing, set sail for Cuba. In 1527 another expedition under Pamfilo de Narvaez, with Franciscan and secular priests, was scattered by the natives and lost at sea. Eleven years later, 1538, in the expedition of Hernando de Soto, most of the priests accompanying him perished in the long, weary marches from Florida to Virginia and from the Atlantic to the Mississippi, in whose waters the ill-fated leader was buried. Eleven years later, 1549, Luis Cancer de Barbastro, a Dominican, led to the Floridian coast a band of his brother religious, only to meet, on landing, a martyr's death. Ten years later, 1559, fifteen hundred soldiers, many settlers, and four Dominican fathers, gathered in thirteen vessels, and started once more for Florida, under the command of Tristan de Luna. A cyclone struck the fleet, destroying eight vessels and scattering the others. Those that escaped the storm remained on land for two years, were picked up by a passing fleet and brought back to Cuba. The government of Spain, after so many failures, decided that no more colonizing should be attempted in Florida; but just then France was trying to get a foothold on the southern Atlantic coast, and in order to keep France out, Spain made one supreme effort that succeeded in the permanent occupation and evangelization of Florida by Spanish troops and missionaries. In 1565 was founded St. Augustine, the oldest city in the United States. Before the end of seventy years the number of Christian Indians was reckoned at twenty-five or thirty thousand, distributed among forty-four missions, under the direction of thirty-five Franciscan missionaries; while the city of St. Augustine, in care of secular priests, was well equipped with religious institutions and organizations. The Indian languages were reduced to grammar, and books of instruction and prayer were written and published by the missionaries for the use of the natives. For one hundred and fifteen years Florida was in the exclusive possession of the Spanish government and the Spanish missionaries. In 1680 the settling of Scotch Presbyterians at Port Royal in South Carolina was the signal for a war of races, which went on, with intervals of quiet, until the treaty of Paris, 1763, transferred Florida to the British Crown.

Out of the wrecked expedition of Pamfilo de Narvaez to Florida, 1527, Cabeza de Vaca, with three companions, was saved; and for ten years they wandered among the Indians of the Southwest, finally making their way to Mexico, with wonderful reports of the countries they had traversed. Expeditions soon followed into those countries that went by the name of New Mexico. Noticeable are the expeditions of the Franciscan Mark of Nizza, 1539; of Coronado, 1542, in which the Franciscan monk, John of Padilla, fell a martyr to his zeal for the

cause of religion. However, it was only in 1599 that a permanent occupation was effected, and the city of Santa Fé was founded by Don Juan de Oñate. The missionary work was undertaken by Franciscan friars. After the first months of hardship and discouragement the work of evangelization went forward at a marvelous rate; most of the natives were reckoned as being within the pale of the church; not less than sixty friars at once were in the field. Fourscore years after the founding of the colony, 1680, the Indians rose in rebellion against the Spanish government; in a few weeks no Spaniard was left north of El Paso; Christianity and civilization were swept away at one blow. In a few years the Spanish power, taking advantage of the anarchy and the famine which fell upon the Indians after their rebellion, reoccupied the country and the missionaries were brought back. The work of the Gospel did not attain thereafter the success it had before the rebellion. The later history of Spanish Christianity in New Mexico is a history of decline and decay; the white population increased, while the Indian dwindled. When New Mexico became part of the United States the number of missionaries was small, only seventeen, and the Indians were only some 20,000 out of a total population of 80,000.

New Mexico, in Spanish times, comprised a large portion of our present territory of Arizona. Here the Franciscans labored in the conversion of the natives until the rebellion of 1680, after which period the field passed into the hands of the Jesuits until their suppression by the Spanish government in 1767. Their central point was St. Francis Xavier del Bac, where still stands a noble church, and the best known of their missionaries was Father Kino. After the suppression of the Jesuits the missions of Arizona fell back to the Franciscans of New Mexico.

Mission work in Texas began in 1689. H. H. Bancroft (*"North Mexican States and Texas,"* vol. xv, p. 631) sums up the condition of the Texan missions about the year 1785, naming his authorities. From this summing up it appears that while the Spanish population, pure and mixed, was about 3,000, the Christian Indians were only 500. The number of natives baptized since 1690 was less than 10,000, and at no time had the neophytes exceeded 2,000. The church buildings and decorations that are still in existence to-day show to what efficiency in handiwork the Indians were trained.

Though expeditions northward from Mexico along the coast of California were begun as early as 1542, yet it was only in 1769 that a permanent occupation was effected by the Spaniards and mission work was begun by the Franciscans in the present state of California. The founder of the California missions was the famous Junipero Serra. About him as a man and as a Christian there is complete agreement on all sides; his name stands for what is best in religion and for what is most romantic in Spanish annals. He segregated his Indian converts from the military and the Spanish colonists. The military composed the Presidio, the Spanish colonists the Pueblo, and the Indian converts the Mission. This was a wise policy. The neighborhood of the military force was undoubtedly advantageous and frequently necessary for the safety of a mission. The introduction of white colonists was beneficial in putting before the Indians object lessons of agriculture and industry. But whereas soldiers and settlers were not likely to be, at all times, models of the religion they professed, it was prudent to keep the newly converted Indians from too close a contact with the Spaniard. Within the missions only

Christian natives resided, under the immediate spiritual and temporal government of the Fathers. Clustered around the mission buildings, wherein the children were educated and trained to mechanical and industrial trades, were the thatched huts in which lived the Indians. Forty-three years after the first foundation there were eighteen missions and a Christian native population of 15,500. Sixty-five years after the foundation there were twenty-one missions, with a native population of 30,600. During the first quarter of this century (1808-1824) took place in Mexico the rebellion against Spanish rule and the establishment of the republic. This revolution brought on the secularization of the missions. Secularization meant the confiscation of the mission properties and the expulsion of the Franciscans. The total ruin of the missions and the return of the Indians to savage life were the results of this inopportune policy.

(2) **The French Missions.** The land reached by the Cabots in 1494 was Cape Breton Island, "which name," says Parkman, "found on the oldest map, is a memorial of very early French voyages." There is reason to believe that before the voyage of Cabot, French fishermen frequented the banks of Newfoundland; there is evidence that they did so as early as the year 1504. In the year 1524 Giovanni da Verrazano, a Florentine sailor in the service of Francis I, touched the American coast near Cape Fear, in North Carolina, and skirted it northward as far as latitude 50. In three voyages—1534, 1535, 1541—Jacques Cartier ascended the St. Lawrence to a great Indian village, back of which rose a majestic mound that Cartier named Mount Royal; he had christened Montreal. For half a century no French expeditions to the western continent took place on account of the disturbed condition of France. In 1603 Samuel de Champlain made a voyage of exploration up the St. Lawrence as far as Montreal. In 1605 he accompanied an expedition to Nova Scotia as royal geographer, and surveyed our northern coasts as far south as Boston Harbor. In 1608 he laid the foundations of Quebec, and this was the beginning of the great French colony of Canada called New France. In 1614 four Recollects (a branch of the Franciscan order) came out to New France to attend to the spiritual wants of the settlers and convert the surrounding tribes. In 1625 came to Quebec the first band of Jesuits, whom the Recollects had called to their aid and to whom they left the field a few years later.

In the days of French supremacy Canada comprised Maine and northern New York. From 1611 till 1760, with short intervals of absence, the Jesuits labored among the Indians of Maine and converted most of them. In the list of their Maine missionaries the two most conspicuous names are Druillettes and Rale; the former by reason of his relations with the colony of Massachusetts, the latter by reason of his death at the hands of Massachusetts troops. In 1726 the Indians of Maine became the subjects of England. After 1760, until early in the present century, they were left without missionaries, yet they did not lose the faith. Perhaps, for all we know, priests from Canada made them stealthy visits, and the Indians frequently visited the Canadian missions. Parents baptized and instructed their children. Every Sunday they assembled in the chapels of their villages, and before the priestless altars chanted mass and vespers, the Gregorian melodies being handed down from generation to generation. When the War of Independence was declared, the Indians of Maine joined the army

of Washington. To-day one thousand descendants of the neophytes of Druillettes and Kale hold the faith and sing the chants of their Catholic forefathers in the diocese of Portland, Maine.

Northern New York was the home of the fierce Iroquois, who were ever the determined enemies of the French and the allies of the English in the contest of those two nations for supremacy in America. All Canada was in terror of these savages. "No man," says Parkman, "could hunt, fish, till the fields, or cut a tree in the forest, without peril to his scalp." "I had as lief," writes a Jesuit, "be beset by goblins as by the Iroquois; the one are about as invisible as the other; our people are kept in a closer confinement than ever were monks or nuns in our smallest convents in France." These savages first came in contact with the French missionaries (1642) when they captured Father Jogues on his way to the Huron country, now the province of Ontario. Jogues was run through the gauntlet in every village, was tied to the stake to be gashed and slowly burned, had his hands mutilated and was preserved from final death only to be made a slave. He was released by the kindness and generosity of the Dutch of Fort Orange (now Albany), was sent down the Hudson to Manhattan, and thence made his way to France. The heroic missionary returned to the Iroquois country in 1646, was again put through his former tortures and finally brained by a tomahawk, October 18, 1646. The scene of his death was the present village of Auriesville, Montgomery county, N. Y.; a small Catholic chapel marks the spot. Fathers Bressani (1644) and Poncet (1653) were likewise subjected to the cruelties of these savages, and by the shedding of their blood prepared the Iroquois soil for the Gospel seed. It was in 1654 that missions were permanently established among them; and they were continued with great success until 1687. During this period God's grace produced marvelous holiness in many a child of the forest; warriors, proud and cruel, were turned into humble and merciful servants of the cross; women and maidens were made as chaste and virtuous as the female saints and martyrs of the first Christian centuries; the chapels were frequented morning and evening, and the hymns of the old Church resounded throughout the woods of northern New York. According to the *Relations of the Jesuits*, between the years 1668 and 1678, there were two thousand two hundred and twenty-one baptisms in these missions. These figures, however, give an incomplete idea of the work done, for the reason that it was the policy of the fathers to lengthen the catechumenate of their dusky disciples so that the number of attendants at instructions and services was far beyond that of the baptized. The political jealousies and the almost constant wars between France and England put an end to this work of God. To-day remnants of the Iroquois tribes, still Catholic, are to be found in Canada to the number of about three thousand.

In the Northwest, along the shores of Lake Superior and Lake Michigan, were numerous Algonquin tribes that were first visited by the Jesuit missionaries in 1641. Permanent stations were established among them some twenty years later. In 1661 Father Menard established a mission in Keweenaw Bay, and in 1665 Father Aillouez set up a mission in Ashland Bay. Thenceforth missionary work in the West was reduced to a system, and central points were chosen for mission sites. Such a point was Sault Ste. Marie, a noted fishing place; for then, as to-day, the

rapids were full of whitefish, and Indians from a distance came thither in crowds. Another center was La Pointe (now Ashland). Michilimackinaw (now Mackinaw) and the great Manitoulin islands were also chosen as mission sites. There was another spot in that western country famous for fish and game—Green Bay. In its neighborhood were a motley crowd of dusky inhabitants—Menominees, Pottowatomies, Winnebagoes, Sacs, Mascoutins, Miamis, Kickapoos, Outagamies. As early as 1669 Aillouez founded there the mission of St. Francis Xavier. These were the early mission posts.

The missions of the West do not record the bloody martyrdoms that marked those of the Huron and the Iroquois nations. The absence of any cruelties inflicted on the missionaries is evidence that already Christianity, now in contact with the tribes for many years, had gained their respect and was beginning to soften their fierce natures. But here more than elsewhere the missionaries had to suffer from the rigor of the climate, the dangers of long voyages by water and land, the absence of the comforts of civilization as to food, dwelling, society; and from the opposition and obstacles by which their work was impeded; opposition on the part of the Indians—medicine-men and polygamy; on the part of the French traders—licentiousness and brandy. It is no wonder the success of the missionaries was slow. Moreover, it must be kept in mind that success is to be measured not so much by the number of baptisms at any one period as by the silent influence of Christian teaching on the Indian nature. It must also be remembered that the catechumens always outnumbered the baptized. A few statistics from the *Relations of the Jesuits* gives some idea of the work done: In 1669, at La Pointe, Ashland Bay, two villages out of five were entirely Catholic; in 1677 there were 1,800 Catholics at Mackinaw; in 1676 there were 500 Catholics at Green Bay; in 1670, at Sault Ste. Marie Bruillettes baptized 120 children and 300 adults. Besides mission work the missionaries were occasionally engaged in discovery, and thus were immortalized the names of Marquette and Hennepin.

The foundation of Detroit by Cadillac, 1701, brought about great changes in the mission. Cadillac's plan was to gather around this new post all the western tribes east of the Mississippi. His intention was to prevent their trade from going northward to the English in the Hudson Bay country, whither it was coaxed by better prices and cheaper brandy. The Jesuits opposed the policy of Cadillac, holding that the less contact there was between the Indians and the whites the better for the Christianization and civilization of the former. The missions dwindled while Detroit grew and drew the Indians to it. The suppression of the Jesuits by the French government and the surrender of New France to England put an end to the glorious work which the society had carried on in the Northwest for the period of one hundred years. To-day there are about twenty thousand Catholic Indians in our Western States, who are descendants of the tribes evangelized by the Jesuits during those one hundred years.

The Illinois country (Illinois and Indiana as far south as the Ohio) and Louisiana (the territory south of the Ohio to the Gulf) were also the theater of missionary work by the Jesuits and secular priests from Quebec during the period of French supremacy. Little result among the Indians of Louisiana was obtained because the missionaries were almost entirely occupied in the

white settlements. In the Illinois country much mission work was done among the Illinois and Miamis, whose population did not exceed eighteen thousand souls. The most successful period of the Illinois missions was from 1725 to 1750. The principal centers were Kaskaskia, Fort St. Louis, Cahokia, Peoria, St. Joseph at the head of Lake Michigan, Fort Chartres, Vincennes and in later times Ste. Genevieve and St. Louis. From all this country the Indians have disappeared and the French settlers at the points named have become the nuclei of flourishing Catholic communities. To-day we find traces of the work of the early missionaries among our present Indians, who formerly lived in the East and the Northwest, in Florida and New Mexico, but none among the Indians from the lower Mississippi Valley, if we except a small band of Quapaws from Arkansas, now living in the Indian Territory. The blame must be laid to the misunderstanding between the Jesuits and the seculars; the Jesuits and the Capuchins of Louisiana; to the want of zeal in the government for the work of the missions, to the suppression of the society just at the time it was entering this field, and, finally, to the political jealousies and wars of the European nations fighting for the mastery of North America. It is a pity; for the Indians whose former home was in that section are the most civilized, cultivated and wealthy of the 248,340 still remaining in the United States, according to the calculations of the Indian Bureau.

Of this total it is hard to say how many are Catholics. Hoffman's *Catholic Directory* of 1894 says 97,850; Sadlier's *Catholic Directory* of 1894 says 58,750; the *Independent* of April 5, 1894, says 45,110; perhaps it will be safe for us to say 50,000. At any rate, this may be said with certainty: That there was not a tribe in all the extent of the United States to which the gospel was not preached by Catholic missionaries from the year 1520 down to the time of our War of Independence; and again, this, that the missionaries of the old church are now once more at work among the aborigines, parked in their reservations, to preserve the fruits of the labors of their predecessors, and to reclaim to Christianity and civilization the sad remnants of a race once the master of this splendid domain.

(3) The English Missions. After an unsuccessful attempt at the foundation of a colony in Newfoundland, Lord Baltimore secured from the English crown, 1632, a grant of land including the present states of Maryland and Delaware. He was to be the lord proprietary; that is to say, the viceroy of this territory, with all legislative and executive powers under the sovereignty of the crown. He could admit to his colony or could keep out of it whom he chose. That he, though a Catholic, admitted Christians of all denominations and guaranteed to them religious equality, is a fact that entitles him to the credit of being the originator of religious liberty on this continent. Such was the policy of the Baltimores from the very beginning of their colonization, and the policy was enacted into a law in 1649. The colonists of Lord Baltimore landed from the Ark and the Dove at the mouth of the Potomac, March 25, 1634. With them were two Jesuits, White and Altham. The work of the church from Virginia to Massachusetts remained exclusively in the hands of the Society of Jesus from 1624 to 1790, or the space of 156 years. Their labors extended into Pennsylvania, New Jersey and New York, and were concerned mostly with the Catholic settlers from Europe. With Indians they had very little to do, for the

reason that the whites soon drove the aborigines from those states.

In 1691 the Protestant settlers in Maryland having become more numerous than the Catholic, Lord Baltimore's act of toleration was revoked, the Anglican was made the established church, and then began for the Catholics of Maryland a period of legal proscriptions and persecutions like those of New England, that lasted until the War of the Revolution. In the War of Independence, Catholics joined the army and the navy in numbers out of all proportion to their population. Catholic officers from Catholic lands (Ireland, France and Poland) came to offer their services to the cause of liberty. France and Spain were the first to recognize our independence and send legations. Our first diplomatic circle was Catholic; this accounts for the solemn church services to which the federal authorities and military officers were invited on great national occasions. Then came to our shores French fleets and French regiments, with their chaplains and religious services. The spirit of intolerance gave way gradually before these Catholic manifestations and a new keynote was sounded in the following words of the Continental Congress, 1774: "As an opposition to the settled plan of the British administration to enslave America will be strengthened by a union of all ranks of men within this province, we do most earnestly recommend that all former differences about religion or politics from henceforth cease and be forever buried in oblivion."

The Revolutionary War broke the connection of the Catholic communities in the colonies with the Vicar Apostolic of London. A decree making the church of the United States a body distinct from that of England, and appointing the V. Rev. John Carroll Prefect Apostolic of the church in the United States, was issued by the Propaganda, June 9, 1784. The following year Father Carroll sent to Rome a *Relation of the State of Religion in the United States*: In Maryland were 15,800 Catholics; in Pennsylvania, 700; in Virginia, 200; in New York, 1,500; in the territory bordering on the Mississippi, an unascertainable number destitute of priests; in Maryland there were 19 priests; in Pennsylvania, 5. In November, 1789, Father Carroll was appointed Bishop of Baltimore. When the news reached England, Thomas Weld of Lulworth Castle, a personal friend of Carroll, invited him to allow the ceremony of his consecration to take place in the chapel of the castle. Carroll accepted the invitation and was consecrated August 15, 1790, by the Rt. Rev. Charles Walmesley, Senior Vicar Apostolic of England. The mission period of the church in the United States was closed, and the hierarchical period was opened by this event.

(4) The Hierarchical Period, 1790-1898. As it would take too much space to relate in detail the expansion of the church during this period, we present a single table showing the present condition of the church in the United States.

Present Condition of the Catholic Church in the United States.

Archbishops.....	11

Orphan Asylums	248
Orphans.....	33,039
Charitable Institutions	757
Catholic Population.....	9,856,622

It has been stated above what was the Catholic population in the thirteen colonies at the end of the last century. A small accession came with the annexation of Louisiana, Florida and the French possessions on the lakes and in the basins of the Mississippi and the Ohio. In 1830 the Catholic population was 361,000. Since then the annexation of New Mexico and California have added a few thousand (say fifteen thousand); but the chief sources of growth were immigration, so abundant since 1829, and the natural increase of population, admittedly larger with Catholics than with Protestants. We have had some losses; not, however, so extensive as has been claimed. Not only immigration, but conversions also have added to the number of Catholics and have offset, if not completely, at least in part, their past losses. On this point Leonard Woolsey Bacon, in *"History of American Christianity,"* vol. 13 of *"The American Church History Series,"* writes: "It has not been altogether a detriment to the Catholic Church in America that the social status and personal composition of its congregations, in its earlier years, have been such that the transition into it from any of the Protestant churches could be made only at the cost of a painful self-denial. The number of accessions to it has been thereby lessened, but the quality of them has been severely sifted."

Two memorable movements, one within and one without the church, Trusteeism and Know-nothingism, were dangers through which the church passed with some loss, but with final triumph. Trusteeism began in New York as early as 1785 and ended in Buffalo in 1852. Within that period it is to be met with in New York, Baltimore, Philadelphia, New Orleans and Virginia. It consists in the following assumptions: Trustees, not content to hold and administer church property, furthermore asserted that the congregation, represented by its trustees, had the right to choose its pastor, to dismiss him at pleasure and that the ecclesiastical superior or bishop had no right to interfere beyond confirming the action of the trustees. Such principles are subversive of the constitution of the church and were fought until they were completely eliminated from the minds of the laity.

"One effect of the enormous immigration," writes Leonard Woolsey Bacon in the work quoted above, "was inevitably to impose upon this church, according to the popular apprehension, the character of a foreign association. It was in like manner inevitable, from the fact that the immigrant class are preponderantly poor and of low social rank, that it should for two or three generations be looked upon as a church for the illiterate and unskilled laboring class. An incident of the excessive torrent rush of the immigration was that the Catholic Church became to a disproportionate extent an urban institution, making no adequate provision for the dispersed in agricultural regions.

"Against these and other like disadvantages the hierarchy of the Catholic Church have struggled heroically, with some measure of success. The steadily rising character of the imported popu-

lation in its successive generations has aided them. If in the first generations the churches were congregations of immigrants served by an imported clergy, the most strenuous exertions were made for the founding of institutions that should secure to future congregations born upon the soil the services of an American-trained priesthood. One serious hindrance to the noble advances that have nevertheless been made in this direction has been the fanatical opposition levied against even the most beneficent enterprises of the church by a bigoted Native-Americanism. It is not a hopeful method of conciliating and naturalizing a foreign element in the community to treat them with suspicion and hostility as alien enemies. The shameful persecution which the mob was for a brief time permitted to inflict on Catholic churches and schools and convents had for its chief effect to confirm a foreigner in his adherence to his Church and his antipathy to Protestantism." The Know-nothing movement lasted from 1830 to 1850 and showed its worst features in Boston, Philadelphia, New York and Louisville.

The great Civil War, that assured by an appalling sacrifice of wealth and lives the faltering unity of this nation, and shattered for a time the seeming unity of many religious denominations, did but bring into clearer evidence the hierarchial unity of the Catholic Church. Its members, it is true, divided off on political grounds; it was their right and, as they supposed, their duty; but there was not any division in organization, discipline and faith. To both sides of the conflict the Church sent her heroes of charity, and oftentimes, indeed, the same heroes to both sides; detailed her priests from the parish and the college, her nuns from the orphan asylum and the schoolroom, to the camp, the hospital, the prison and the bloody battle-field. Meanwhile her sacred edifices resounded with earnest petitions to heaven for peace, with solemn requiems for the fallen on the field; and not infrequently they were turned into hospitals for the wounded and the dying brought in from the battle raging near by.

The chief formative forces of the Church's interior life were her legislative assemblies. Councils are ecumenical, plenary or national, and provincial. An assembly of all the Catholic bishops of the world, convoked by the authority of the Pope, or at least with his consent, and presided over by him or his legates, is an ecumenical council. An assembly of all the bishops of a country—say the United States—convoked by the primate or other dignitary commissioned thereto by the Pope, is a national or plenary council. An assembly of all the bishops within the territory known as a province, convoked and presided over by the metropolitan or archbishop, is a provincial diocese, convoked and presided over by the council. An assembly of all the priests of a bishop, is a diocesan synod.

Ecumenical councils define doctrine and deal with matters of discipline concerning the Church in the whole world. Plenary and provincial councils do not define, but at most only repeat the doctrine defined by the ecumenical councils; their chief purpose is to apply by explicit statutes to each country or province the universal discipline determined by the ecumenical councils and the Holy See, or to initiate such discipline as the peculiar circumstances of the nation or province demand. Diocesan synods promulgate and apply more intimately to each diocese the disciplinary enactments of the Holy See, the ecumenical, plenary and provincial councils, emphasizing those

enactments which the specific conditions or abuses in each diocese render most necessary.

Numerous diocesan synods have been held in the United States, and not a few provincial councils, at least in the elder provinces; and three plenary councils have been held within this first century of the organized hierarchy. The collection of the acts of those various assemblies is an important source of our Church history.

The most remarkable Catholic event in the last decade was the establishment of the Apostolic Delegation in Washington. The Pope has the right to be present in the Church of each country through a representative, if he deem it expedient. Legates represent the person of the sovereign pontiff. They are sent to exercise his authority so far as it is communicated to them. They are not sent to seize or lessen or absorb the authority of the local bishops, no more than the papacy itself seizes or lessens or destroys the local episcopate. They are not aliens, like ambassadors to a foreign country; they are, wherever they may be, within the household of the supreme father who sent them, for they are within the Church directly subject to him; they are in the ecclesiastical territory of their sovereign. To the Catholic, wherever he may be, considered from the religious point of view as a Catholic, the Pope is not a foreigner, and his representative is not a foreigner.

Not only is the right to send delegates to the churches of the world inherent in the papacy, but it has been exercised by the Holy See from the earliest times of Christianity, as might be abundantly proved if that question were the specific subject matter of these pages. It is well to know that the establishment of the Apostolic Delegation in the United States is not due, as many suppose, to accidental and transitory causes, though such may have furnished the occasion; but that it is the natural consequence of the first principles of our Church Constitution, and is in perfect accord with traditional practice of past ages. It is hardly necessary to add that the delegation to the United States is strictly ecclesiastical and not at all diplomatic. The American delegate is accredited to the Church, not to the government of the United States. T. O'G.

CATTLE (kăt't'l). See BEASTS; BULL.

CAUDA (kaŋ-da). See CLAUDA.

CAUL (kał), (Heb. קַרְתָּי, *yoh-theh' reth*, diaphragm or midriff).

1. It generally means a network, and is employed to signify the midriff, or network or the lesser omentum, a layer of the inner lining of the cavity of the belly partly enveloping the liver of all animals, as the greater omentum does the stomach (Ex. xxix:13, 22; Lev. iii:4, 10, 15).

2. A covering of network for women's heads (Is. iii:18).

Figurative. "To rend the caul" of one's heart, is violently to bereave him of life, and, as it were, tear him asunder quickly, in the manner of wild beasts (Hos. xiii:8).

CAUSEY (ka'zÿ) or **CAUSEWAY** (kaz'wă), (Heb. מַסְלֵי, *mes-il-law'*; Fr. *chaussée*), a raised or paved way (1 Chron. xxvi:16, 18 and Prov. xv:19, *margin*, in the A. V. ed. 1611), but afterwards changed to *causeway*, a corruption for *causey*. "Causeway," however, is found in the margin of Is. vii:3 in A. V. ed. 1611.

CAVE (kāv), (Heb. מְעוֹטָה, *meh-aw-raw'*), in A. V. Is. ii:19, *hole* (Is. xxxii:14; Jer. vii:11, *den*). Comp. Josh. x:16, 17. A hollow place in the side of a hill; a den or hole in the earth.

The geological formation of Syria is highly favorable to the production of caves. It consists chiefly of limestone, in different degrees of density, and abounds with subterranean rivulets. The springs issuing from limestone generally contain carbonate of lime, and most of them yield a large quantity of free carbonic acid upon exposure to the air. To the erosive effect upon limestone rocks, of water charged with this acid, the formation of caves is chiefly to be ascribed. The *subordinate* strata of Syria, sandstone, chalk, basalt, natron, etc., favor the formation of caves. Consequently the whole region abounds with subterranean hollows of different dimensions. Some of them are of immense extent; these are noticed by Strabo, who speaks of a cavern near Damascus capable of holding 4,000 men.

(1) **First Mention.** The *first* mention of a *cave* in Scripture relates to that into which Lot and his two daughters retired from Zoar after the destruction of Sodom and Gomorrah (Gen. xix:30). It was some cavern in the mountains of Moab, but tradition has not fixed upon any of the numerous hollows in that region.

(2) **Machpelah.** The next is the *cave of Machpelah*, in the field of Ephron, which Abraham purchased of the sons of Heth (Gen. xxv:9, 10). There Abraham buried Sarah, and was himself afterward buried; there also Isaac, Rebecca, Leah and Jacob were buried (Gen. xlix:32; 1:13). The cave of Machpelah is said to be under a Mahometan mosque, surrounded by a high wall called the Haram; but even the Moslems are not allowed to descend into the cavern. The tradition that this is the burial place of the patriarchs is supported by an immense array of evidence.

(3) **Makkedah.** The situation of the cave at Makkedah, into which the five kings of the Amorites retired, after their defeat by Joshua, and into which their carcasses were ultimately cast, is not known (Josh. x:16, 27).

(4) **Artificial.** Some of the caves mentioned in the Scriptures were *artificial*, or consisted of natural fissures enlarged or modified for the purposes intended. It is recorded (Judg. vi:2) that, 'because of the Midianites, the children of Israel made them the dens which are in the mountains, and caves and strongholds.' Caves made by art are met with in various quarters. An innumerable multitude of excavations are found in the rocks and valleys around Wady Musa, which were probably formed at first as sepulchers, but afterward inhabited, like the tombs of Thebes.

(5) **Dwelling Places.** Caves were used as *dwelling places* by the early inhabitants of Syria. The Horites, the ancient inhabitants of Idumæa Proper, were Troglodytes or dwellers in caves, as their name imports. Jerome records that in his time Idumæa, or the whole southern region from Eleutheropolis to Petra and Ailah, was full of habitations in caves, the inhabitants using subterranean dwellings on account of the great heat. The Scriptures abound with references to habitations in rocks; among others, see Num. xxiv:21; Cant. ii:14; Jer. xlix:16; Obad. 3. Even at the present time many persons live in caves.

(6) **Places of Refuge.** Caves afforded excellent *refuge in the time of war*. Thus the Israelites (1 Sam. xiii:6) are said to have hid themselves in caves, and in thickets, and in rocks, and in high places, and in pits. See also Jer. xli:9; Joseph. *Antiq.* xii:11, 1. Hence, then, 'to enter into the rock, to go into the holes of the rocks, and into the caves of the earth' (Is. ii:19), would, to the Israelites, be a very proper and familiar way to express terror and consternation. The *pits*

spoken of seem to have consisted of large wells, in 'the sides' of which excavations were made, leading into various chambers. Such pits were sometimes used as *prisons* (Is. xxiv:22; li:14; Zech. ix:11); and with *niches* in the sides, for *burying places* (Ezek. xxxii:23). Many of these vaulted pits remain to this day.

(7) **Strongholds of Engedi.** The *strongholds of Engedi*, which afforded a retreat to David and his followers (1 Sam. xxiii:29; xxiv:1), can be clearly identified. They are now called 'Ain Tidy by the Arabs, which means the same as the Hebrew, namely, 'The Fountain of the Kid.' 'On all sides the country is full of caverns, which might serve as lurking places for David and his men, as they do for outlaws at the present day. The whole scene is drawn to the life' (Robinson, ii:203).

(8) **Adullam.** *The cave of Adullam*, to which David retired to avoid the persecutions of Saul (1 Sam. xxii:1, 2), and in which he cut off the skirt of Saul's robe (1 Sam. xxiv:3), is an immense natural cavern of the Wady Khureitun, which passes below the Frank mountain.

(9) **Fortified Caverns.** Caverns were also frequently *fortified* and occupied by soldiers. Josephus often mentions this circumstance. He relates also that Herod sent horsemen and footmen to destroy the *robbers that dwelt in caves* and did much mischief in the country.

The mention of *caves of robbers* reminds us of our Lord's words, in which he reproaches the Jews with having made the Temple, *σπηλαιος ληστῶν, a den of thieves* (Matt. xxi:13). In the former of these passages Josephus calls them *τοὺς ἐν τοῖς σπηλαίοις ληστας, the robbers in the caves*, and in the latter, *ληστῶν τιῶν ἐν σπηλαίοις κατοικούντων, certain robbers living in caves*. Certain caves were afterward fortified by Josephus himself during his command in Galilee under the Romans. In one place he speaks of these as the caverns of Arbela, and in another as the caverns near the lake Gennesareth. A fortified cavern existed in the time of the Crusades. It is mentioned by William of Tyre as situate in the country beyond the Jordan sixteen Roman miles from Tiberias.

(10) **Cave of Elijah.** The cave of Elijah is pretended to be shown, at the foot of Mount Sinai, in a chapel dedicated to him, and a hole near the altar is pointed out as the place where he lay.

CEDAR (sē'dēr), (Heb. עֵדָר, *eh'rez*). See ERES.

CEDRON (sē'dron), (John xviii:1). See KIDRON.

CEILED or CEILING (sēld, sēl'ing). 1. Heb. כָּהַף, *khaw-faw'*, to veil or incase (2 Chron. iii:5, "He ceiled the greater house with fir-tree").

2. סָפַף, *saw-fan'*, to cover, "It is ceiled with cedar" (Jer. xxii:14).

3. שָׂחַף, *shaw-kheef*, cut thin (Ezek. xli:16).

The Orientals bestow much attention upon the ceilings of their principal rooms. Where wood is not scarce they are usually composed of one curious piece of joinery, framed entire and then raised and nailed to the joists. These ceilings are often divided into small square compartments, but are sometimes of more complicated patterns. Wood of a naturally dark color is commonly chosen, and it is never painted. In places where wood is scarce, and sometimes where it is not particularly so, the ceilings are formed of fine plaster, with tasteful moldings and ornaments, colored and relieved with gilding and with pieces of mirror inserted in the hollows formed by the involutions of the raised moldings of the arabesques, which enclose them as in a frame. The

antiquity of this taste can be clearly traced by actual examples up to the times of the Old Testament, through the Egyptian monuments, which display ceilings painted with rich colors.

These satisfactorily illustrate the peculiar emphasis with which 'ceiled houses' and 'ceiled chambers' are mentioned by Jeremiah (xxii:14) and Haggai (i:4).

CELLAR (sē'lār), (Heb. מְצִיטָה, *o-tsawr'*, something laid up), an underground vault for storage of wine and oil (1 Chron. xxvii:27, 28).

The same word is applied to the royal treasury (1 Kings xiv:26), and also to the treasury of the Temple (1 Kings vii:51).

CENCHREÆ (sēn'kre-æ), (Gr. Κενχρεαί, *keng-khreh-a'hee*, like millet grains), one of the ports of Corinth, whence Paul sailed for Ephesus (Acts xviii:18). It was situated on the eastern side of the isthmus, about seventy stadia from the city; the other port on the western side of the isthmus was called Lechæum. (See CORINTH.)

CENSER (sēn'sēr), (Heb. מִכְתָּרֶת, *makh-taw'*, a firepan; מִכְתָּרֶת, *mik-teh'reth*, from מִכְתָּר, *mik-tawr'*, incense), the vessel in which incense was presented in the temple (2 Chron. xxvi:19; Ezek. viii:11; Ecclus. i:9).

Censers were used in the daily offering of incense and yearly on the day of atonement, when the high-priest entered the Holy of Holies. On the latter occasion the priest filled the censer with live coals from the sacred fire on the altar of burnt-offering, and bore it into the sanctuary, where he threw upon the burning coals the 'sweet incense beaten small' which he had brought in his hand (Lev. xvi:12, 13). In this case the incense was burnt while the high-priest held the censer in his hand, but in the daily offering the censer in which the live coals were brought from the altar of burnt-offering was set down upon the altar of incense. This alone would suggest the probability of some difference of shape between the censers used on these occasions. The daily censers must have had a base or stand to admit of their being placed on the golden altar, while those employed on the day of atonement were probably furnished with a handle. In fact, there are different names for these vessels. Those in daily use were called *miktereth*, from the Hebrew word denoting incense; whereas that used on the day of atonement is distinguished by the title of *michtah* or 'coal-pan.' We learn also that the daily censers were of brass (Num. xvi:39), whereas the yearly one was of gold.

The numerous figures of Egyptian censers, consisting of a small cup at the end of a long shaft or handle (often in the shape of a hand), probably offer adequate illustration of those employed by the Jews on the day of atonement. It is observable that in all cases the Egyptian priests had their costly incense made up into small round pellets, which they projected successively from between their finger and thumb into the censer, at such a distance that the operation must have required a peculiar knack, to be acquired only by much practice. As the incense used by the Jews was made up into a kind of paste, it was probably employed in the same manner.

CENSUS (sēn'sūs). This term does not occur in the A. V., although found in the original (Matt. xvii:25, *κῆνσος, kane'sos*, A. V. "tribute"). The act is, however, referred to in the Heb. מִפְּקָדוֹן, *mif-kawd'*, or מִפְּקָדוֹן, *pek-ood-daw'*, numbering; and the Gr. ἀπογραφὴ, *ap-og-ruf-ay'*, enrollment). (See POPULATION.)

CENTURION (sĕn-tū'rĭ-ŭn), (Gr. ἑκατοντάρχης, *hek-a-ton-tar'khace*, and ἑκατονάρχος, *hek-a-ton'tar-khos*, commander of a hundred), a Roman military officer in command of a hundred men, as the title implies.

Cornelius, the first Gentile convert to Christianity, held this rank (Acts x:1, 22). Other Centurions are mentioned in Matt. viii:5, 8, 13; xxvii:54; Luke vii:2, 6; Acts xxi:32; xxii:25, 26; xxiii:17, 23; xxiv:23; xxvii:1, 6, 11, 31, 43; xxviii:16.

CEPHAS (sĕ'phas), (Gr. Κηφᾶς, *kay-fas'*).

A surname which Christ bestowed upon Simon (John i:42), and which the Greeks rendered by Πέτρος and the Latins by Petrus, both words meaning a 'rock,' which is the signification of the original. (See PETER.)

CERATIA (se-rā'tia), (Gr. κερατῖα, *ker-ah-tee'ah*), (Ceratonia) is the name of a tree of the family of Leguminous plants, of which the fruit used to be called *Silqua edulis* and *Silqua dulcis*.

The word Kerateon occurs in Luke xv:16, where it has been translated *husks* in the author-

Husks of the Bible.

ized version. The Italians call the tree *Caroba*, the French *Caroubier*, and the English Carob-tree. By some it has been thought, but apparently without reason, that it was upon the husks of this tree that John the Baptist fed in the wilderness; from this idea, however, it is often called St. John's Bread and Locust-tree.

The Carob-tree grows in the south of Europe and north of Africa, usually to a moderate size, but it sometimes becomes very large, with a trunk of great thickness, and affords an agreeable shade. The quantity of pods borne by each tree is very considerable, being often as much as 800 or 900 pounds weight; they are flat, brownish-colored, from 6 to 8 inches in length, of a subastringent taste when unripe, but, when come to maturity, they secrete, within the husks and round the seeds, a sweetish-tasted pulp. When on the tree the pods have an unpleasant odor, but when dried upon hurdles they become eatable, and are valued by poor people, and during famine in the coun-

tries where the tree is grown, especially in Spain and Egypt, and by the Arabs. They are given as food to cattle in modern, as we read they were in ancient, times; but, at the best, can only be considered very poor fare.

CĒTUBIM (kĕt'u-bim), (Heb. כְּתוּבִים, *ket-u-bim'*, the writings).

One of the three larger divisions of the Old Testament used by the Hebrews, and thus distinguished from the Law and the Prophets as being in the first instance committed to writing and not delivered orally. Hence the book of Daniel is found in this division. This is the division of Scripture known also by the corresponding Greek name of Hagiographa. It contained Psalms, Proverbs, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra and Nehemiah, and Chronicles.

CHABAZZELETH (kā-bāz'ze-leth), (Heb. חַבְאֲזֵלֶת, *chab-at-sel-eth'*), occurs in two places in Scripture, first in the passage of Cant. ii:1, where the bride replies, 'I am the *Rose* of Sharon and the lily of the valleys;' and secondly, in Is. xxxv:1, 'The wilderness and the solitary place shall be glad for them, and the desert shall rejoice and blossom as the *rose*.'

In both passages we see that in the Auth. Vers., as also in some others, the word is considered to indicate the rose. The Sept. renders it simply by *flower* in the passage of the Canticles. In this it has been followed by the Latin Vulgate, Luther, etc. It is curious, however, as remarked by Celsius (*Hiero*, i, p. 489), that many of those who translate *chabazzeleth* by *rose* or *flower* in the passage of the Canticles render it by *lily* in that of Isaiah.

The rose was, no doubt, highly esteemed by the Greeks, as it was, and still is, by almost all Asiatic nations, and, as it forms a very frequent subject of allusion in Persian poetry, it has been inferred that we might expect some reference to so favorite a flower in the poetical books of the Scripture, and that no other is better calculated

Lilium Chalcedonicum.

to illustrate the above two passages. But this does not prove that the word *chabazzeleth*, or any

similar one, was ever applied to the rose. Other flowers, therefore, have been indicated, to which the name chabazzeleth may be supposed, from its derivation, to apply more fitly. Rosenmüller remarks that the substantial part of the Hebrew

Lilium Candidum.

name shows that it denotes a flower growing from a bulb. Some, therefore, have selected the asphodel as the bulbous plant intended.

Celsius has already remarked that Bochart has translated chabazzeleth by narcissus; and not without reason, as some Oriental translators have so explained it. In the Targum, Cant. ii:1, instead of chabazzeleth we have *narkom*, which, however, should have been written *narkos*.

Narkom and *narkos* are, no doubt, the same as the Persian *nurgus*, and which, throughout the East indicates *Narcissus tazetta*, or the polyanthus narcissus. The ancients describe and allude to the narcissus on various occasions, and Celsius has quoted various passages from the poets indicative of the esteem in which it was held. As they were not so particular as the moderns in distinguishing species, it is probable that more than one may be referred to by them, and, therefore, that *N. tazetta* may be included under the same name as *N. poeticus*, which was best known to them. That the narcissus is found in Syria and Palestine is well known, as it has been mentioned by several travelers; and, also, that it is highly esteemed by all Asiatics from Syria even as far as India. Hence, if we allow that the word chabazzeleth has reference to a bulb-bearing root, it cannot apply to the rose. The narcissus, therefore, is as likely as any other of the bulbous tribe to have been intended in the above passages. —J. F. R. (See ROSE.)

CHABRIS (kā'bris), (Sept. *Χαβρις*, *khah-bris'*), the son of Gothoniel, one of the three "rulers" of Bethulia in the time of Judith (Jud. vi:15; viii:10; x:6). The name is identified with Kedesh (Josh. xv:23) by Fritzsche.

CHAFF (cháf), (Heb. *צִבְרִים*, *notes*), the refuse of winnowed grain, consisting of husks and broken straw (Job xxi:18; Ps. i:4; xxxv:5; Is. xvii:13; xxix:5; xli:15; Hos. xiii:3; Zeph. ii:2). In Isaiah v:24; xxxiii:11 the word rendered "chaff" is *khaw-shash'*, and means *dry grass, hay*. It only occurs in the above passages. *Teh'ben* (Heb. *תֵּבֵן*), rendered "chaff" in Jer. xxiii:28, is elsewhere translated *straw* (Edod. v:7, 10). The Chaldee word *ܘܘܪ*, *oor*, is rendered *chaff* in Dan. ii:35.

Figurative. Wicked men, particularly hypocrites, are likened to "chaff" (Hos. xiii:3; Matt. iii:12). From the last passage it appears that the husbandmen in Judea burned the chaff, and in that country, where, at the close of harvest, all things are so parched and dry, it would be impossible to extinguish a mass of burning chaff. False doctrines are called "chaff;" they are vile, useless and unsubstantial, and cannot abide the trial of God's word or Spirit (Jer. xxiii:28).

Fruitless projects are like "chaff" and "stubble;" they are unsubstantial and easily overturned by the blasts of opposition (Is. xxxiii:11). The Assyrians were like the "chaff of the mountains," when the angel destroyed most of their army and the rest fled home with great precipitation (Is. xvii:13; xxxvii:7, 36, 37).

CHAIN (chān), (Heb. *צַוּנוֹת*, *raw-beed'*, literally, collar), and the one promised to Daniel (Dan. v:7; Heb. *חַמְּוֹנַיִק*, *ham-oo-nayk'*, necklace).

Chains of gold appear to have been as much used among the Hebrews for ornament or official distinction as they are among ourselves at the present day. The earliest mention of them occurs in Gen. xli:42, where we are told that a chain of gold formed a part of the investiture of Joseph in the high office to which he was raised in Egypt; a later instance occurs in Dan. v:29, from which we learn that a golden chain was part of a dress of honor at Babylon. In Egypt the judges wore chains of gold, to which was attached a jeweled figure of Thmei, or Truth, and in that country similar chains were also worn as ornaments by the women. It is not, however, necessary to suppose that the Hebrews derived this custom from the Egyptians, for the fact that chains are mentioned among the spoil of the Midianites shows that they were in use among people whose condition of life more nearly resembled that of the Israelites before they obtained possession of Canaan. It would seem that chains were worn both by men and women (Prov. i:9; Ezek. xvi:11), and we find them enumerated among the ornaments of brides (Cant. i:10; iv:9).

It was a custom among the Romans to fasten a prisoner with a light chain to the soldier who was appointed to guard him. One end of it was attached to the right hand of the prisoner, and the other to the left hand of the soldier. This is the *chain* by which Paul was so often bound, and to which he repeatedly alludes (Acts xxviii:20; Eph. vi:20; 2 Tim. i:16). When the utmost security was desired, the prisoner was attached by two chains to two soldiers, as was the case with Peter (Acts xii:6).

Figurative. (1) God's law is a *chain*; it restrains from sinful liberty; is uneasy to corrupt men, and is a great ornament to the saints who obey it (Prov. i:9). (2) The great *chain* with which Satan is bound for a thousand years is the powerful restraints of Divine Providence, and the just laws against great crimes faithfully executed (Rev. xx:1). (3) Bondage and trouble are *chains*; they restrain our liberty, render us uneasy and are shameful badges of our guilt, and yet, if borne for Christ, are an honorable ornament (Lam. iii:7; 2 Tim. i:16). *Make a chain*, prepare for captivity and slavery (Ezek. vii:23). (4) Pride is a *chain*, which keeps men under its power, and by a discovery of it in their conduct, they use it, as if ornamental to them (Ps. lxxiii:6).

CHALCEDONY (kāl-séd'ō-nŷ), (Gr. *χαλκηδών*, *khal-kay-dohn'*, copperlike), occurs only in Rev. xxi:10. It is a precious stone, supposed by some to be the same that occurs in the Hebrew Scriptures (Exod. xxviii:18) under the name of *nophet* (translated emerald); but this is doubtful. It was named from the town Chalcedon, where *kalkos*, copper, was found.

Chalcedony is a variety of amorphous quartz and the distinction between it and agate is not very satisfactorily established. It is harder than flint, specific gravity, 2.04, commonly semi-transparent, and is generally of one uniform color

throughout, usually a light brown and often nearly white, but other shades of color are not infrequent, such as gray, yellow, green and blue. Chalcedony occurs in irregular masses, commonly forming grotesque cavities, in trap rocks and even granite. It is found in most parts of the world, and in the East is employed in the fabrication of cups and plates, and articles of taste, which are wrought with great skill and labor and treasured among precious things. In Europe it is made into snuffboxes, buttons, knife handles and other minor articles.

CHALCOL (kāl'kōl). See **CALCOL**.

CHALDÆA (kāl-dē'ā), or **CHALDEA**.

A country in Asia, the capital of which, in its widest extent, was Babylon. It was originally of small extent, but the empire being afterwards very much enlarged, the name is generally taken in a more extensive sense and includes Babylonia. (See **CHALDÆANS**.)

CHALDÆANS (kāl-dē'āns), (Heb. כַּשְׁדִּיָּם, *kas-dim'*) is the name which is found appropriated in parts of the Old Testament to inhabitants of Babylon and subjects of the Babylonian kingdom.

(1) Inhabitants as Subjects of Babylonia.

In 2 Kings xxv, where an account is given of the siege of Jerusalem in the reign of Zedekiah, by Nebuchadnezzar, the latter monarch is expressly designated 'King of Babylon,' while his troops in general are spoken of as 'Chaldees,' 'the army of the Chaldees.' In Isaiah xiii:19, Babylon is called 'the glory of kingdoms, the beauty of the Chaldees' excellency;' and in xxiii:13 of the same book the country is termed 'the land of the Chaldæans.' So in Daniel ix:1, 'In the first year of Darius, of the seed of the Medes, which was made king over the realm of the Chaldæans.' Ptolemy uses the term *Χαλδαία*, *Chaldæa*, for that part of Babylonia which, lying on the southwest, borders on Arabia Deserta. Strabo speaks to the same effect, and Pliny terms Babylon *Chaldaicarum gentium caput*, the head of the Chaldæan nations. The origin and condition of the people who gave this name to Babylonia have been subjects of dispute among the learned. Probably, however, they were the same people that are described by Greek writers as having originally been an uncultivated tribe of mountaineers, placed on the Carduchian Mountains, in the neighborhood of Armenia, whom Xenophon describes as brave and fond of freedom (*Cyrop.* i:31; *Anab.* iv:3, 4, 7, 8, 25). In Habakkuk (i:6-10) the Chaldæans are spoken of in corresponding terms: 'Lo, I raise up the Chaldæans, that bitter and hasty nation, which shall march through the breadth of the land to possess the dwelling places that are not theirs; they are terrible and dreadful; their horses are swifter than leopards and more fierce than evening wolves; their horsemen shall spread themselves; they shall fly as the eagle that hasteth to eat.' They are also mentioned in Job i:17: 'Chaldæans fell upon the camels (of Job) and carried them away.' These passages show not only their warlike and predatory habits, but, especially that in Job, the early period in history at which they were known.

As in all periods of history hardy and brave tribes of mountaineers have come down into the plains and conquered their comparatively civilized and effeminate inhabitants, so these Armenian Chaldæans appear to have descended on Babylon, made themselves masters of the city and the government, and eventually founded a dominion, to which they gave their name, as well as to the inhabitants of the city and the country

tributary to it, infusing at the same time young blood and fresh vigor into all the veins and members of the social frame. What length of time the changes herein implied may have taken cannot now be ascertained.

(2) Kingdom of Babylon. Of the kingdom of Babylon, Nimrod (Gen. x:8, *sq.*) was the founder and first sovereign. The next name of a Babylonian monarch is found in Gen. xiv:1, where 'Amraphel, king of Shinar,' is cursorily mentioned. (See **AMRAPHEL**.) A long interval occurs, till at last, in 2 Kings xx:12, 13, the name of another is given: 'Berodach-baladan, the son of Baladan, king of Babylon,' it appears 'sent letters and a present unto Hezekiah, for he had heard that Hezekiah had been sick. And Hezekiah hearkened unto them, and shewed them all the house of his precious things; there was nothing in his house, nor in his dominion that Hezekiah shewed them not.' On becoming acquainted with this fact, the prophet Isaiah announced that the treasures of the kingdom would be plundered and taken to Babylon, along with the descendants of Hezekiah, who were to become eunuchs in the palace of the king of Babylon. The friendly act which passed between these two kings took place in the year B. C. 713. About a hundred years later the prophets Jeremiah and Habakkuk speak of the invasion of the Chaldæan army.

(3) Nebuchadnezzar. Nebuchadnezzar now appears in the historical books and in Ezra v:12, is described as 'the king of Babylon, the Chaldæan, who destroyed this house (the Temple) and carried the people away into Babylon.' How extensive and powerful his empire was, may be gathered from the words of Jeremiah (xxxiv:1): 'Nebuchadnezzar, king of Babylon, and all his army, and all the kingdoms of the earth of his dominion, and all the people, fought against Jerusalem.' The result was that the city was surrendered, and the men of war fled, together with King Zedekiah, but were overtaken in the plains of Jericho and completely routed. The Israelitish monarch was carried before Nebuchadnezzar, who ordered his eyes to be put out, after he had been compelled to witness the slaughter of his sons. He was then bound in fetters of brass and conveyed a captive to Babylon.

(4) Evil-merodach. The next Chaldec-Babylonian monarch given in the Scriptures is the son of the preceding, Evil-merodach, who (2 Kings xxv:27) began his reign (B. C. 562) by delivering Jehoiachin, king of Judah, after the unfortunate sovereign had endured captivity, if not incarceration for a period of more than six-and-thirty years. Circumstances incidentally recorded in connection with this event serve to display the magnitude and grandeur of the empire, for it appears (verse 28) that there were other captive kings in Babylon besides Jehoiachin, and that each one of them was indulged with the distinction of having his own throne.

(5) Belshazzar. With Belshazzar (B. C. 538), the son or grandson of Nebuchadnezzar, closes the line of Chaldæan monarchs. In the seventeenth year of his reign this sovereign was put to death while engaged with all his court in high revelry, by Cyrus, when he took the city of Babylon in the night season (Dan. v:30), and established in the city and its dependencies the rule of the Medo-Persians. (See **BABYLON**; **BELSHAZZAR**; **CYRUS**.)

(6) Chaldæan Immigration. Authentic history affords no information as to the time when the Chaldæan immigration took place. It is possible that, at a very early period, a tribe of Chaldees wandered into Babylon and gave to the land

the seven Chaldee kings mentioned by Berossus; but it is possible also that the Chaldæans entered in a mass into the Babylonian territory for the first time not long before the era of Nabonassar (B. C. 747), which Michaelis and others have thought the words of Isaiah render probable (chap. xxiii:13), 'Behold the land of the Chaldæans, this people was not, till the Assyrian founded it for them that dwell in the wilderness.' The circumstance, moreover, that a Shemitic dialect is found to have prevailed in Babylon, corroborates the idea that the Chaldæans were immigrants, since the northern Chaldæans must, from their position, have spoken a different form of speech.

(7) **Kingdom of the Chaldees.** The kingdom of the Chaldees is found among the four 'thrones' spoken of by Daniel (vi, vii, *sq.*), and is set forth under the symbol of a lion having eagles' wings.

The government was despotic, and the will of the monarch, who bore the title of 'King of Kings' (Dan. ii:37), was supreme law, as may be seen in Dan. iii:12, 14, 28. The kings lived inaccessible to their subjects in a well-guarded palace, denominated, as with the ancient Persians (Xenop. *Cyrop.* 1), 'the gate of the king' (Dan. ii:49, compared with Esther ii:19, 21, and iii:2).

The number of court and state servants was not small; in Dan. vi:1, Darius is said to have set over the whole kingdom no fewer than 'an hundred and twenty princes.' The chief officers appear to have been a sort of 'mayor of the palace,' or prime minister, to which high office Daniel was appointed (Dan. ii:49), 'a master of the eunuchs' (Dan. i:3), 'a captain of the king's guard' (Dan. ii:14), and 'a master of the magicians,' or president of the Magi (Dan. iv:9).

Distinct probably from the foregoing was the class termed (Dan. iii:24, 27) 'the king's counsellors,' who seem to have formed a kind of 'privy council' or even 'cabinet' for advising the monarch and governing the kingdom. The entire empire was divided into several provinces (Dan. ii:48; iii:1), presided over by officers of various ranks. An enumeration of several kinds may be found in Dan. iii:2, 3. The head officers, who united in themselves the highest civil and military power, were denominated 'presidents' (Dan. vi:2); those who presided over single provinces or districts bore the title of *governor* (Hagg. i:1; ii:2).

The administration of criminal justice was rigorous and cruel, will being substituted for law, and human life and human suffering being totally disregarded. Nebuchadnezzar (Dan. ii:5) declares to the college of the Magi: 'If ye will not make known unto me the dream with the interpretation thereof, ye shall be cut in pieces, and your houses shall be made a dunghill' (see also Dan. iii:19; vi:8; Jer. xxix:22).

(8) **Religion.** The religion of the Chaldees was, as with the ancient Arabians and Syrians, the worship of the heavenly bodies; the planets Jupiter, Mercury and Venus were honored as Bel, Nebo and Meni, besides Saturn and Mars (Gesenius *On Isaiah*). Astrology was naturally connected with this worship of the stars, and the astronomical observations which have made the Chaldæan name famous were thereby guided and advanced.

(9) **Language.** The language spoken in Babylon was what is designated Chaldee, which is Semitic in its origin, belonging to the Aramaic branch. The immigrating Chaldæans spoke probably a quite different tongue, which the geographical position of their native country shows to have belonged to the Medo-Persian stock.

(10) **The Wise Men.** The term Chaldæan represents also a branch of the order of Babylonian Magi. In Dan. ii:2 they appear among 'the magicians, and the astrologers and the sorcerers,' who were called for to shew the king his dream.' In the tenth verse of the same chapter they are represented as speaking in the name of the rest, or otherwise theirs was a general designation 'which comprised the entire class (Dan. iv:7; v:7); a general description of these different orders is found in Dan. v:8, as 'the king's wise men.'

(11) **Chaldee Language** is the name by which the elder form of the Aramaic idiom is generally distinguished. Whether there is any authority in the Old Testament for applying this designation to the *Aramaic* language is a question which depends on the sense in which the expression 'tongue of the Chaldees,' in Dan. i:4, is to be taken; and which involves such important historical points that it does not come within the scope of this article. Avoiding debatable points, however, we apply the name Chaldee language to that Aramaic idiom which, in our present text of the Old Testament, is employed in the passages of Daniel, from ii:4 to vii:28; in Ezra, from iv:8 to vi:18, and vii. from 12 to 26; in Gen. xxxi:47, and in Jer. x:11; as also to that in which several translations and paraphrases of portions of the Old Testament, the so-called Targums, are written. The language is thus distinguished, as to the nature of the documents in which it is employed, into Biblical and Targumical Chaldee.

We have already (see ARAMAIC LANGUAGE) noticed those several features which the Chaldee possesses in common with the Syriac; and it now remains to define these, certainly not marked, characteristics by which it is distinguished from it. These are: the predominance of the *a* sound where Syriac has *o*; the avoidance of diphthongs and of half-silent letters; the use of dagesh-force; the regular accentuation of the last syllable, and the formation of the infinitives, except in *Peal*, without the preformative *ן*. The mode of writing is also much less *defective* than in Syriac. (See VERSIONS OF SCRIPTURE, II.)

CHALDÆAN PHILOSOPHY (*kāl-dē'ān fī-lōs'ō-fy*). This is a subject of interest to the student of the Bible, in consequence of the influence which the Babylonian philosophy exerted on the opinions and manner of thinking of the Israelites during their captivity in Babylon—an influence of a general and decided character, which the Rabbins themselves admit, in alleging that the names of the angels and of the months were derived by the house of Israel from Babylon.

The system of opinion and manner of thinking which the captives met with in Babylon cannot be characterized exclusively as Chaldæan, but was made up of elements whose birthplace was in various parts of the East, and which appear to have found in Babylon a not uncongenial soil, where they grew and produced fruit which coalesced into one general system. Of these elements the two principal were the Chaldæan and the Medio-Persian or Zoroastrian.

(1) **Star Worship.** The Chaldæans who lived in a climate where the rays of the sun are never darkened, and the night is always clear and bright by means of the light of the moon and stars, were led to believe that light was the soul of nature. Accordingly it was by the light of the sun and stars that the universal spirit brought forth all things; and therefore the Chaldæans offered their homage to the Supreme Being in the heavenly bodies, where he appeared to them in a special

manner to dwell. As the stars form separate bodies, imagination represented them as distinct existences, which had each their peculiar functions, and exerted a separate influence in bringing forth the productions of nature. The idea of a universal spirit disappeared, as being too abstract for the people, and not without difficulty for cultivated minds; and worship was offered to the stars as so many powers that governed the world. It is easy to see how the Chaldæans passed from this early corruption of the primitive religion of the Bible to a low and degrading polytheism.

As light was regarded as the only moving power of nature, and every star had its own influence, so natural phenomena appeared the result of the particular influence of that heavenly body which at any given time was above the horizon; and the Chaldæan philosophers believed that they found the cause of events in its position and the means of foretelling events in its movements.

These views, and perhaps the extraordinary heat and the pestilential winds which in certain months prevail in the country, and against which there is no protection except in the hills, led the Chaldæans to the mountains which gird the land. On these observatories, which nature seems to have expressly formed for the purpose, they studied the positions and movements of the heavenly host. They thought they saw that similar phenomena were constantly accompanied by the same conjunction of the stars, which seemed to observe regular movements and a similar course.

On this the Chaldæan priests came to the conviction that natural events are bound together, and that sacrifices do not interrupt their course; that they all have a common origin, which works according to unknown principles and laws, whose discovery is so important as to deserve their best attention. The heavenly bodies themselves are obedient to these laws; their formation, position and influence are consequences of these universal laws, by which nature was controlled.

This determined the Chaldæans to seek in the heavens the knowledge of the original cause which created the world, and of the laws which that cause followed in the formation of things, and in the production of phenomena, since in the heavens dwelt the power which brings all things forth.

(2) **First Cause.** It could not be doubted that this power possessed intelligence, and the operations of the mind appear to have so much resemblance to the subtlety and fleetness of light that men who had only imagination for their guide had no hesitation in representing intelligence as a property of light, and the universal spirit of highest intelligence as light itself.

The observations of the Chaldæans had taught them that the distances of the stars from the earth are unequal and that light decreases in its approach to the earth, on which they concluded that light streams forth from an endless fountain far removed from the earth, in doing which it fills space with its beams, and forms the heavenly bodies in different positions and of different magnitudes.

The creative spirit was therefore set forth by them under the image of an eternal inexhaustible fountain of light.

The space which contained the First Cause, or Fountain of radiations, was filled with pure and happy intelligences. Immediately beneath this region began the corporeal world, or the empyreum, which was a boundless space, lighted by the pure light which flowed immediately from the Great Source; this empyreum was filled with an infinitely less pure fire than the original light,

but immeasurably finer than all bodies. Below this was the ether, or grosser region, filled with still grosser fire. Next came the fixed stars, spread over a wide region, where the thickest parts of the ethereal fire had come together and formed the stars. The world of planets succeeded, which contained the sun, moon, and the wandering stars. Then came the last order of beings—the rude elements which are deprived of all activity, and withstand the motions and influence of light.

(3) **Good and Bad Spirits.** The different parts of the world are in contact, and the spirits of the upper regions can influence the lower, as well as descend and enter into them. As the chaotic elements were without shape and motion, the spirits of the higher regions must have formed the earth, and human souls are spirits sprung from them.

To these spirits from above the system of the Chaldæans ascribed all the productions, appearances, and movements upon the earth. The formation of the human body, the growth of the fruits, all the gifts of nature, were attributed to beneficent spirits. In the space below the moon, in the midst of night, tempests arose, lightnings threaded the dark clouds, thunder broke forth and laid waste the earth, there were found spirits of darkness, corporeal demons spread through the air.

(4) **Cabala.** As the good and the bad spirits had various degrees of power, and different offices, so they had names given to them which described their functions. As the good spirits were under an obligation to protect men and furnish succor in their need, they were compelled to learn human language; accordingly, it was believed that a guardian angel against every evil was possessed by every one who bore his mysterious name—a name which was to be pronounced only when succor was needed.

All manner of names were therefore devised, by which the good spirits were conjured or informed of human necessities; and all the combinations of the alphabet were exhausted in order to bring about a commerce between men and angels. Here is the origin of the Cabala, which gave strange names to these spirits in order to bring them into connection with men, and by this means to do wonderful things (Matt. xii: 24-27). These names also sometimes served to drive bad spirits away; they were a kind of exorcism. A power, too, was ascribed to the name of the spirit, or to the image which marked his office—a power which forced the spirit to come on being called; and, accordingly, it was held that this name carved on a stone kept the spirit near the person who wore the stone—a notion in which is probably found the origin of Talismans, which were formed either by words or symbolical figures.

CHALDEES (käl'deez or käl-deez').

Another form of Chaldeans used in the expression Ur of the Chaldees (Gen. xi:31; Neh. ix:7), and also sometimes in A. V., when there is no mention of Ur (2 Kings xxiv:2; xxv:4, 10, 13, 25, 26; 2 Chron. xxxvi:17; Is. xiii:19).

CHALKSTONE (chak'stōn).

A stone taken from the limestone rocks which constitute a marked feature of Palestine.

It is easily reduced to powder, and sometimes burned in order to be employed as lime. To make the stones of altars like chalkstones, is to pull them down, break them to pieces, and entirely abolish the idolatrous worship (Is. xxvii:9).

CHALPHI (kāl'phi), in A. V. Calphi.

Father of Judas, one of the two captains who fought with Jonathan Maccabæus at Hazor (1 Macc. xi:70).

CHAMBER (chām'bēr).

1. A retired room and especially an upper room.

2. A hall where a king gives audience, or a deliberative body meets, as presence chamber, senate chamber.

3. A legislative and judicial body; an assembly or association, as the Chamber of Deputies.

Figurative. The term chamber is applied to the heavens (Ps.civ:3, 13). It is used to indicate the isolation of closet prayer (Is. xxvi:20). Job calls the southern constellations, or the regions of the southern sky, "the chambers of the south" (Job ix:9).

CHAMBERING (chām'bēr-ĭng), (Gr. κοίτη, *koy'tay*). Coarse and licentious conduct, illicit intercourse (Rom. xiii:13).

CHAMBERLAIN (chām'bēr-lĭn), (Heb. שַׂר־בַּיָּדָה, *saw-reece'*, eunuch officer). (1) A keeper of the king's bed-chamber, or a steward (Esth. i:10). (2) City treasurer, to whom the receipt and expenditure of the public money were intrusted (Rom. xvi:23).

CHAMBERS OF IMAGERY (chām'bērs ōv ĭm'āj-rĭ).

The scenes of pictorial representation referred to by this phrase are connected with an interesting passage in the history of Ezekiel and the Jewish exiles, who were stationed in Assyria, on the banks of the Chebar (Ezek. viii).

Ezekiel, in presence of his friends, consisting of the exiled elders of Judah, was suddenly wrapt in mystic vision, and graciously shown, for his own satisfaction, as well as that of his pious associates, the reasons of God's protracted controversy with Israel, and the sad necessity there was for still dealing harshly with them. Transported to the city and temple of Jerusalem he there saw national apostasy and corruption, sufficient to justify, both to the mind of the prophet and his circle of pious associates, the severity of the divine judgments on Israel.

(1) **Statue of Baal.** The first spectacle that caught his eye was a colossal statue, probably of Baal, around which crowds of devotees were performing their frantic revelries, and whose forbidden ensigns were proudly blazoning on the walls and portals of his house. Leading him to that side of the court along which were ranged the houses of the priests, his conductor pointed to a mud-wall (verse 7), which, to screen themselves from observation, the apostate servants of the true God had raised; and in that wall was a small chink, by widening which he discovered a passage into a secret chamber, which was completely impervious to the rays of the sun, but which he found, on entering, to be lighted up by a profusion of brilliant lamps. The sides of it were covered with numerous paintings of beasts and reptiles—the favorite deities of Egypt; and, with their eyes intently fixed on these decorations was a conclave of seventy persons, in the garb of priests—the exact number, and in all probability the individual members, of the Sanhedrim, who stood in the attitude of adoration, holding in their hands each a golden censer, containing all the costly and odoriferous materials which the pomp and magnificence of the Egyptian ritual required. The scene described was wholly formed on the model of Egyptian worship; and every one who has read the works of Wilkinson, Belzoni,

Richardson, and others, will perceive the close resemblance that it bears to the outer walls, the sanctuaries, and the hieroglyphical figures that distinguished the ancient mythology of Egypt.

(2) **Sacred Paintings.** In order to show the reader still further how exactly this inner chamber that Ezekiel saw was constructed after the Egyptian fashion, we subjoin an extract from the work of another traveler, descriptive of the great Temple of Edfou, one of the admired relics of antiquity; from which it will be seen that the degenerate priests of Jerusalem had borrowed the whole style of the edifice in which they were celebrating their hidden rites—its form, its entrance, as well as its pictorial ornaments on the walls—from their idolatrous neighbors of Egypt:—'Considerably below the surface of the adjoining building,' says he, 'my conductor pointed out to me a chink in an old wall, which he told me I should creep through on my hands and feet. After proceeding about ten yards in utter darkness, the heat became excessive, the breathing was laborious, the perspiration poured down my face, and I would have given the world to have got out; but my companion, whose person I could not distinguish, though his voice was audible, called out to me to crawl a few feet farther, and that I should find plenty of room. I joined him at length, and had the inexpressible satisfaction of standing once more upon my feet. We found ourselves in a *splendid apartment of great magnitude*, adorned with an incredible profusion of sacred *paintings and hieroglyphics*.'

(3) **Orgies of Tammuz.** It might have been supposed impossible for men to have sunk to a lower depth of superstition than that of imitating the Egyptians in worshiping the monsters of the Nile, or the vegetable produce of their fields and gardens, had not the prophet been directed to turn yet again and he would see greater abominations than they did. 'Then he brought me to the gate of the Lord's house, which was towards the north; and behold there sat women weeping for Tammuz' (verse 14).

This, the principal deity of the Phœnicians, and who was often called also by that people Adoni, that is, My Lord, became afterwards famous in the Grecian mythology under the well-known name of Adonis; and the circumstances of his being selected for the subject of their most beautiful fiction by so many of the classic poets is a sufficient proof of the great popular interest his name and ritual excited among the idolaters of the ancient world. It is said to have originated in a tragic adventure that befell an intrepid and beautiful prince of Phœnicia, who was killed while hunting a wild boar, by which that land was infested, and whose untimely death in the cause of his country was bewailed in an annual festival held to commemorate the disastrous event. During the seven days that the festival lasted the Phœnicians appeared to be a nation of mourners; and in every town and village a fictitious representation of Tammuz was improvised for the occasion, and the whole population assembled to pour forth their unbounded sorrow for his hapless fate. (See TAMMUZ.)

These violent efforts in mourning were always followed by scenes of the most licentious and revolting revelry, which, though not mentioned, are manifestly implied among the 'greater abominations' which degraded this other group of idolaters.

(4) **Sun Worship.** Besides the hieroglyphics of Egypt and the orgies of Tammuz, there was another form of superstition still, which in Jerusalem, then almost wholly given to idolatry, had

its distinguished patrons. 'Turn thee yet again,' said his celestial guide to the prophet, 'and thou shalt see greater abominations than these' (verse 16). And he brought him unto the inner court of the Lord's house, and behold at the door of the Temple of the Lord, between the porch and the altar were about five-and-twenty men with their backs towards the Temple of the Lord, and their faces towards the east; and they worshiped the sun towards the east.' Perhaps of all the varieties of superstition which had crept in among the Hebrews in that period of general decline, none displayed such flagrant dishonor to the God of Israel as *this*; for, as the most holy place was situated at the west end of the Sanctuary, it was impossible for these twenty-five men to pay their homage to the rising sun without turning their backs on the consecrated place of the divine presence. Could stronger proofs be wanted that the Lord had not forsaken Israel, but was driven from them? This was the lesson intended, and actually accomplished by the vision.

CHAMELEON (kā-mē'lē-ŭn), (Heb. כַּמֵּלֵאֵן, or כַּמֵּלֵאֵן, *ko'akh*). It appears to be a satisfactory translation of the Hebrew *tinshemeth*, which denotes a small species of lizard, celebrated for the faculty it has of changing the color of its skin.

This property, however, has no reference to the substance it may be placed on, as generally asserted, but is solely derived from the bulk of its respiratory organs acting upon a transparent skin, and on the blood of the animal. The chameleons form a small genus of Saurians, easily distinguished by the shagreened character of the skin, and the five toes on the feet, divided differently from those of most other animals, there being, if the expression may be allowed, two thumbs opposed to three fingers. Their eyes are telescopic, move separately, and can be directed backwards or forwards. Chameleons are slow, inoffensive, and capable of considerable abstinence from food, which consists solely of flies, caught by the rapid protrusion of a long and viscous tongue. Among themselves they are irascible, and are then liable to change their colors rapidly: dark yellow or grey is predominant when they are in a quiescent state, but, while the emotions are in activity, it passes into green, purple, and even ashy black. The species found in Palestine and all Northern Africa is the common *Chameleon Africanus*, and is that referred to in Lev. xi:30, where unclean animals are mentioned.

CHAMOIS (shām'mŷ or shā-moi'), Deut. xiv:5.

The true chamois is believed never to have lived in Arabia or Palestine. It is now thought that this animal of the Bible was a species of wild sheep (*Ovis tragelephus*) formerly abundant among the mountains of Sinai, but now apparently confined to Africa. (See ZEMER.)

CHAMPAIGN (shām-pān'), (Heb. אֶרֶץ פְּנִינָה, *ar-aw-baw'*, plain, waste, desert, open country, Deut. xi:30, A. V.). (See ARABIA.)

CHAMPION (chām'pī-ŭn), (Heb. גִּבּוֹר, *ghib-bore'*, 1 Sam. xvii:51; elsewhere "mighty man"). The Hebrew word sometimes means a challenger, as the representative of a people (1 Sam. xvii:4, 23).

CHANAAN (kā'naan, kā'nan or kā'na-an), the manner of spelling *Canaan* in the A. V. of the New Testament and Apocrypha (Judith v:3, 9, 10; Acts vii:11; xiii:19).

CHANAANITE (kā'naan-īte), for **CANAANITE**. (Judith v:16).

CHANOCH (kā'noch), (Gen. iv:17, marg.), a form of Enoch, more accurately representing the Hebrew.

CHANCE (chāns), to meet unexpectedly (Deut. xxii:6; 2 Sam. i:6). An unexplained circumstance (1 Sam. vi, ix). A meeting apparently accidental (Luke x:31).

CHANCELLOR (chān'sēl-lēr), (Heb. בֵּהַאֲלֵי־תֵה־אֵמֶה, *beh-ale'teh-ame'*, lord of judgment), the Chaldee title of the Persian governor of Samaria (Ezra iv:8, 9, 17).

CHANNEL (chān'nēl), (Heb. נַחַל, *aw-feek'*, valley).

1. The bed of a river or of the sea (Ps. xviii:15; Is. viii:7).

2. The rendering (Is. xxvii:12) of SHIBBOLETH (which see).

CHAOS (kā'ös), a term taken from the Greek mythology, according to which Chaos was the first existence and the origin of all subsequent forms of being (Hesiod, *Theogon.* 116; Ovid, *Metamorph.* 1:5).

The description which Ovid gives of Chaos itself, and of the formation of the world from the chaotic mass, bears so many striking resemblances to the Mosaic account of the creation that one can scarcely fail to regard it as having been derived from tradition.

(1) **The Chaos of Genesis.** Our present object is to inquire what the Chaos was of which Moses speaks (Gen. i:2). Was it the first form in which matter was created? and do the succeeding operations described relate to the very beginning of material order and animal life? Or was it merely a condition preparatory to the reorganization of the world, which had already been the abode of living beings?—in other words, is the first verse of the inspired record to be dissociated from the succeeding, and to be understood only as a declaration of the important truth, that the visible universe was not made from anything already existing (Heb. xi:3); whilst the confusion and darkness which are described in the succeeding verse relate to a state long subsequent to the 'beginning,' and were introductory to a new order of material existence, of which man is the chief and lord? The first of these opinions is not only in accordance with the ancient notions of chaos to which we have referred, but is that which would be naturally maintained, unless cause be shown to the contrary. No one would gratuitously assume a long interval, where it must be admitted there is no intimation of such an interval having occurred. Accordingly, most interpreters who have been ignorant of geological phenomena have at once decided that the chaos of which Moses speaks was the form in which matter was first created. Some have even declared that there cannot have been any such interval as we have spoken of. But on the other hand, the world gives intimations, in the rocks which compose its crust, of various and long-continued changes both of condition and of inhabitants.

(2) **Rock Formation.** Those who have carefully examined these different forms of being, and have attentively studied the circumstances in which their remains are now found, have been forced to the conviction that in many cases the rocks have been gradually formed by deposition at the bottom of an ocean, which has been successively the habitation of races differing alike from each other and from those now existing: that the coeval land likewise has had its distinct races of inhabitants, and that the land and water

have changed places many times in the history of the world.

It is impossible to do more than barely glance at these geological facts; but it will be seen that they lead to these three conclusions: (1) That the world has existed during some long period *before* the Mosaic record of creation in six days; (2) that during that period it was the abode of animals differing in organization and structure from those now found on its surface; and (3) that it has been exposed to various convulsions and reorganizations, more or less general.

(3) **Common View Not Biblical.** In the face of these facts it appears impossible to hold the ordinarily received opinion that the universe was created only just before the creation of man; and the question then is, how are these facts to be reconciled with the Mosaic narrative? Not by denying the evidence of our senses (which is, in truth, a very dangerous mode of upholding the sacred record, though it has been adopted by those who especially claim to themselves the title of Scriptural Geologists), nor, on the other hand, by treating the Mosaic account as a *mythus*, or allegorical representation (a mode of explanation which, if ever admissible, ought not to be resorted to without the most pressing necessity), but surely by re-examining the interpretation *we* have put on the words of Scripture, and by seeking to ascertain whether the discrepancy does not arise from *our view* of the narrative.

(4) **Biblical Teaching.** If we keep in mind that the revelation of God to man is not intended to teach physical science, that it never speaks the language of philosophy, but of appearances, and that it tells of these only so far as they relate to the human race, we obtain a clue by which we may be safely guided through these difficulties. We shall not then wonder that no notice should be taken of previous conditions and inhabitants of this earth, supposing such to have existed. The first sentence of the inspired record will then be regarded as the majestic declaration of a fact, which the world had lost sight of, but which it deeply concerned men to know. What occurred subsequently, until the earth was to be furnished for the abode of man, is to be gathered not from the written word, but from the memorials engraven on the tablets of the world itself. The succeeding verse of the Mosaic account then relates to a state of chaos, or confusion, into which the world was thrown immediately before the last reorganization of it. Geologists are not, indeed, at present (if ever they may be) in a condition to identify the disruption and confusion of which we suppose Moses to speak with any one of these violent convulsions; but that events which might be described in his language have taken place in the world's history, over considerable portions of its surface, seems to be fully established. Whether the chaos of which we are now speaking was universal, or was confined to those regions which formed the cradle of the human race, is a question on which we do not feel it needful to enter. We do not regard the evidence which geology furnishes as complete enough to decide such a point. (See COSMOGONY.)

CHAPEL (chăp'ěl), (Heb. מִקְדָּשׁ, *mik-dawsh'*, sanctuary, holy place), a house for public worship.

Bethel is called the king's chapel, because there the kings of Israel worshiped the golden calf (Amos vii:13).

The term "chapel" is also applied in the A. V.

to places for idol-worship (εἰδωλεῖα, τεμένη) (1 Macc. i:47; 2 Macc. x:2; xi:3).

CHAPTER (chăp'i-tēr).

1. Heb. כִּרְתָּה, *ko-the-reth'*, crown.
2. Heb. רוֹשׁ, *roshe*, head.
3. Heb. תְּצִיֵּת, *tseh'feth*, to encircle.

The upper part of a pillar; that on which there rests the thing which the pillar is intended to support. It is generally called the capital, and differs in the different orders of architecture, varying in form and ornamentation according to the order of architecture used in the building (Ex. xxxvi:38; xxxviii:17, 19; 1 Kings vii:19, 20). (See TABERNACLE; TEMPLE.)

CHARASHIM, THE VALLEY OF (kăr'a-shīm), (Heb. חַרְשֵׁי, *khar-aw-sheem'*, craftsmen) mentioned in 1 Chron. iv:14 as having been settled by Joab, of the tribe of Judah; and in Neh. xi:35 as inhabited by Benjamites after the Captivity.

The Talmud makes it to consist of the valleys of Lod and Ono. Dr. Robinson argues that Charashim may have been a side valley near Lod. Conder suggests the ruin Hirsha as an echo of the name on the slope of a wady one and three-fourths miles southeast of Ajalon and 11 miles west-northwest of Jerusalem.

CHARCHEMISH (kăr'ke-mīsh), (2 Chron. xxxv:20). Same as CARCHEMISH.

CHARGER (chăr'jēr).

1. (Heb. כֶּה־אֲרָוֹ, *keh-aw-raw'*), from a root signifying hollowness, *a deep dish or bowl* (Num. vii:13, 19, 25, 31, 37, 43 and other verses).

The "chargers" mentioned in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, *Anc. Weights*, c. ix, p. 190).

2. (Heb. אֲגַדְתָּוֹ, *ag-ad-taww'*), found only in Ezra i:9, a shallow vessel for receiving water or blood, also for presenting offerings of fine flour with oil (Num. vii:79; Ges. *Thes.* 22).

3. The daughter of Herodias brought the head of John the Baptist "in a charger" (Gr. πλῆξ, Matt. xiv:8, 11; Mark vi:25, 28), probably a dish, trencher or platter.

CHARGES (char'ez). "Be at charges with them" (A. V. Acts xxi:24), R. V. "for them," means "pay the expense of their offerings."

CHARGOL (kăr'gōl), (Heb. חַרְגוֹל, *char'gol*, serpent-fighter, A. V. *beetle*; found only in Lev. xi:22. R. V., *cricket*).

This word cannot mean the *beetle*. No species of scarabæus was ever used as food by the Jews, or perhaps any other nation. Nor does any known species answer to the generic description given in the preceding verse. It is plain that the chargol is some winged creature, which has at least four feet, which leaps with its two hind jointed legs, and which we might expect, from the permission, to find actually used as food. This description agrees exactly with the *locust-tribe* of insects, which are well known to have been eaten by the common people in the East from the earliest times to the present day.

In attempting to ascertain the particular *species* of locust intended by the word 'chargol,' great deference is due to the term adopted by the Septuagint and repeated by Jerome, which is evidently a creature that fights with serpents. Inapplicable as such a description might seem to be to the habits of any known species of locust, it may, nevertheless, help to identify the species

of which we are in search. Now the ancients have certainly referred to the notion of locusts fighting with serpents (Aristot. *Hist. Anim.* ix:9; Plin. *Hist. Nat.* xi:35). Although this notion is justly discarded by Cuvier (Grandsagne's edition of Pliny, Paris, 1828, p. 451, note), yet it may serve to account for the application of the term *serpent-fighters* to a species of locust. For this word instantly suggests a reference to the *ichneumon*, the celebrated destroyer of serpents and other vermin; and it is remarkable that Hesychius, in the second century, applies the word *ὄφιομάχος* *serpent-fighting*, both to the *ichneumon*, and a species of locust having no wings.

Now there is one kind of locusts, the genus *truxalis* (fierce or cruel), inhabiting Africa and China, and comprehending many species, which hunts and preys upon insects. It is also called the *truxalis nasutus*, or long-nosed. May not, then, this winged, leaping, insectivorous locust, and its various species, be the chargol?

It may be observed that it is no objection to the former and more probable supposition, that a creature which lives upon other insects should be allowed as food to the Jews, contrary to the general principle of the Mosaic law in regard to birds and quadrupeds, this having been unquestionably the case with regard to many species of fish coming within the regulation of having 'fins and scales,' and known to exist in Palestine at the present time—as the perch, carp, barbel, etc.

CHARIOT RACES. See GAMES.

CHARIOTS (chär'i-ōts), (Heb. מֵרְכָבָה, *mer-kaw-baw'*; מֵרְכָב, *mer-kawb'*).

The Scriptures employ different words to denote carriages of different sorts, but it is not in every case easy to distinguish the kind of vehicle which these words severally denote. We are now, however, through the discovery of ancient sculptures and paintings, in possession of such information respecting the chariots of Egypt, Assyria, Babylon, and Persia as gives advantages in the discussion of this subject which were not possessed by earlier writers. The chariots of these nations are, in fact, mentioned in the Scriptures; and by connecting the known with the unknown, we may arrive at more determinate conclusions that have hitherto been attainable.

(1) Early Mention. The first chariots mentioned in Scripture are those of the Egyptians; and by close attention to the various notices which occur respecting them, we may be able to discriminate between the different kinds which were in use among that people.

The earliest notice on this head occurs in Gen. xli:43, where the king of Egypt honors Joseph by commanding that he should ride in the second of the royal chariots. This was doubtless a state-chariot, and the state-chariots of the Egyptians do not appear to have been different from their war-chariots, the splendid military appointments of which rendered them fit for purposes of royal pomp. This view of the matter is confirmed by our finding that although the same word (*mercabah*) is again used for chariots of state in Gen. xlvi:29, 1 Sam. viii:11, 2 Sam. xv:1, it undoubtedly denotes a war-chariot in Exod. xv:4; Joel ii:5. In Is. ii:7, the same word appears to comprehend chariots of every kind which were found in cities.

(2) Private Carriages. We also observe that where private carriages were known, as in Egypt, they were of the same shape as those used in war, and only differed from them by having less complete military accouterments, although

even in these the case for arrows is not wanting. One of the most interesting of the Egyptian paintings represents a person of quality arriving late at an entertainment in his curricule, drawn (like all the Egyptian chariots) by two horses. He is attended by a number of running footmen, one of whom hastens forward to knock at the door of the house, another advances to take the reins, a third bears a stool to assist his master in alighting; and most of these carry their sandals in their hands that they may run with the more ease. This conveys a lively illustration of such passages as 1 Sam. viii:11; 2 Sam. xv:1.

(3) War Chariots. The principal distinction between these private chariots and those actually used in war was, as appears from the monuments, that in the former the party drove himself, whereas in war the chariot, as among the Greeks, often contained a second person to drive it, that the warrior might be at liberty to employ his weapons with the more effect. But this was not always the case; for in the Egyptian monuments we often see even royal personages alone in their chariots, warring furiously, with the reins lashed round their waist. So it appears that Jehu (who certainly rode in a war-chariot) drove himself; for his peculiar style of driving was recognized at a considerable distance (2 Kings ix:20).

(4) Definition of Terms. There has been some speculation as to any difference of meaning between the preceding word *mercabah* and *mercab*. In Lev. xv:9 (rendered in the Auth. Vers. 'saddle') and Cant. iii:10 (rendered 'the bottom') it has been understood by some to denote the seat of a chariot. To this view there is the fatal objection that ancient chariots had no seats. It appears to denote the seat of a litter (the only vehicle that had a seat), and its name *mercab* may have been derived from the general resemblance of the body of a litter (distinguished from the canopy, etc.), both in form and use, to that of a chariot.

Another word, *rekeb*, from the same root, appears to signify a carriage of any kind, and is especially used with reference to large bodies of carriages, and hence most generally of war-chariots; for chariots were anciently seldom seen together in large numbers except when employed in war. It is applied indifferently to the war-chariots of any nation, as to those of the Egyptians

Assyrian Chariot.

(Exod. xiv:9), the Canaanites (Josh. xvii:18; Judg. i:19; iv:3), the Hebrews (2 Kings ix:21, 24; x:16), the Syrians (2 Kings v:9), the Persians (Is. xxi:7, 9). By a comparison of these references with those passages in which *mercabah* occurs, we find the two words applied with so little distinction to all sorts of carriages as to suggest that they were used indifferently and interchangeably.

There is another word which is sometimes rendered by chariot, viz., *'agalah*; but as we have

elsewhere (see **CART**) shown that it denotes a plaustrum, cart or wagon, drawn by oxen, we need not here return to the subject.

In the prophecy of Nahum, who was of the first captivity, and resident (if not born) at El-kosh, in Assyria, there is much allusion to chariots, suggested doubtless by their frequency before his eyes in the streets of Nineveh and throughout the Assyrian empire.

Chariots also of other nations are mentioned, as of Assyria (2 Kings xix:23; Ez. xxiii:24), Syria (2 Sam. viii and 2 Kings vi:14, 15), Persia (Is. xxii:6), and lastly Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Macc. xiii:2).

(5) **New Testament Mention.** In the New Testament, the only mention made of a chariot, except in Rev. ix:9, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts viii:28, 29, 38).

Figurative. To denote the speed and resistless power and majesty with which God effects his purposes, he is represented as possessing chariots. These are angels, providences, clouds, or any other natural phenomena, in the agency and motion of which he displays his greatness and power, opposes and conquers his foes, and supports and protects his people (Ps. lxxviii:17; Hab. iii:8; Is. lxvi:15; Jer. li:21; Zech. vi:1).

The binding the chariot to the swift beast imports fleeing off from the enemy with the utmost speed (Mic. i:13). In imitation of the Persians and other heathen kings, Manasseh and Amion consecrated chariots to the sun; but Josiah destroyed them (2 Kings xxiii:11).

The "four chariots" proceeding from between mountains of brass may denote the four noted monarchies which, according to the eternal purpose of God, have, from small beginnings, and amidst great opposition, appeared in the world, and in their turn conquered the nations. The "chariot with red horses" may denote the Assyrians and Chaldeans, cruel and bloody; that with black horses, the Medes and Persians, sometimes arrayed in black, and terribly distressful; that with white horses, the Greeks, astonishingly victorious, and overrunning the very places which the Medes and Persians had done; that with grizzled and bay horses, the Romans and Goths who pushed their conquests chiefly to the southward. Or might these "chariots" signify angels, as employed in the dispensations of providence, of bloody wars and persecutions, of famines and pestilence, of joy and prosperity, of events wonderfully mixed? Or, might they signify gospel ministers, in their diversified conditions? or in the periods apostolic, Antichristian, millennial, etc.? (Zech. vi:1-8).

"Chariots of fire, and horses of fire" (2 Kings ii:11) signifies some bright effulgence which, in the eyes of the spectators, resembled those objects. "Chariot man" (2 Chron. xviii:33) is another name for "driver of chariot" (1 Kings xxii:34).

Ministers and eminent saints are the "chariots and horsemen" of a country; such is the regard God shows them, such the power of their prayers and holy conversation, that they are a noted means of the victories and preservation of their countries (2 Kings ii:12; xiii:14).

The former passage teaches that, as earthly kingdoms are dependent for their defense and glory upon warlike preparations, a single prophet has done more for the preservation and prosperity of Israel than all her chariots and horsemen.

CHARIOTS OF WAR (chär'î-ōts ōv war). The Egyptians used horses in the equipment of an armed force before Jacob and his sons had settled in Goshen; they had chariots of war, and mounted asses and mules, and therefore could not be ignorant of the art of riding; but for ages after that period Arab nations rode on the bare back, and guided the animals with a wand.

Others, and probably the shepherd invaders, noosed a single rope in a slipknot round the lower jaw, forming an imperfect bridle, with only one rein; a practice still in vogue among the Bedouins. Thus cavalry were but little formidable, compared with chariots, until a complete command over the horse was obtained by the discovery of a true bridle. This seems to have been first introduced by chariot-drivers, and there are figures of well-constructed harness, reins, and mouthpieces in very early Egyptian monuments, representing both native and foreign chariots of war. These differed but little from each other, both consisting of a light pole, suspended between and on the withers of a pair of horses, the after end resting on a light axle-tree, with two low wheels. Upon the axle stood a light frame, open

Egyptian War Chariot.

behind and floored for the warrior and his charioteer, who both stood within; on the sides of the frame hung the war-bow, in its case; a large quiver with arrows, and darts had commonly a particular sheath. In Persia, the chariots, elevated upon wheels of considerable diameter, had four horses abreast; and, in early ages, there were occasionally hooks or scythes attached to the axles. In fighting from chariots great dexterity was shown by the warrior, not only in handling his weapons, but also in stepping out upon the pole to the horses' shoulders, in order the better to attain his enemies, and the charioteer was an important person, sometimes equal in rank to the warrior himself. Both the kingdoms of Judah and Israel had war-chariots, and, from the case of King Josiah at the battle of Megiddo it is clear they had also traveling vehicles, for being wounded he quitted his fighting chariot, and in a second, evidently more commodious, he was brought to Jerusalem (2 Chron. xxxv:24).

CHARITY (chär'î-tÿ), the Greek word ἀγάπη, ag-ah'pay, frequently thus rendered in the A. V.

of the N. T. (e. g., 1 Cor. xiii throughout), is that which is more usually translated 'love' in the same version (e. g., John xv throughout).

The translation of the word by 'love' is the more proper, seeing that 'charity' has acquired a signification in our language which limits it to overt acts of beneficence. 'Αγάπη denotes that kindly state of mind or feeling which renders a person full of such good will or affectionate regard towards others as is always ready to evince itself in word or action. In short, it describes that state of feeling which the apostle enjoined the Romans (xii:10) to entertain: 'Be ye kindly affectioned one to another.' This extended meaning of the word explains the pre-eminence which the apostle assigns to the virtue which it implies over every other Christian grace (1 Cor. xiii).

CHARMING OF SERPENTS (chärm'ing ðv sēr'pents). See ADDER.

CHARMIS (kär'mis), (Gr. χαρμῖς, *char-mis'*), son of Melchiel, one of the three "rulers" of Bethulia (Judith vi:15; viii:10; x:6).

CHARRAN (kär'ran), (Acts vii:2, 4). See HARAN.

CHARTUMMIM (kär-tüm'mīm), (Heb. חַרְטֻמִּים, *khar-tome'*, using charms).

This is the title rendered 'magicians' in our version, applied to the 'wise men' of Egypt (Gen. xli:8, 22; Exod. vii:11; viii:7, 18, 19; ix:11), and of Babylon (Dan. i:20; ii:2). The word 'magicians' is not in either case properly applied, as the magi belonged to Persia rather than to Babylon or Egypt; and should be altogether avoided in such application, seeing that it has acquired a sense different from that which it once bore. The Hebrew word properly denotes 'wise men,' as they called themselves and were called by others; but, as we should call them, 'men eminent in learning and science,' their exclusive possession of which in their several countries enabled them occasionally to produce effects which were accounted supernatural by the people.

CHARUL (kär'ul), (Heb. חַרְוּל, *khar-rool'*), occurs in three places in Scripture, and in them all is translated 'nettles' in the A. V.

Thus in Prov. xxiv:30, 31, it is written, 'I went by the field of the slothful, etc., and, lo! it was all grown over with thorns, and nettles (*charullim*) had covered the face thereof.' So in Job xxx:7, it is stated that he was insulted by the children of those whom he would formerly have disdained to employ, and who were so abject and destitute that 'among the bushes they brayed; under the nettles they were gathered together;' and in Zeph. ii:9, 'Surely Moab shall be as Sodom, and the children of Ammon as Gomorrah, even the breeding of nettles, and salt-pits, and a perpetual desolation.' Considerable difficulty has been experienced in determining the plant which is alluded to in the above passages.

Hence brambles, the wild plum and thistles, have been severally selected; but nettles have had the greatest number of supporters.

Of all these determinations, however, it must be observed that they amount to nothing more than conjectures.

All that is implied is that neglected fields, that is, fields in cultivation which are neglected, will become covered with weeds, and that these should be of a kind such as idlers, as in the passage of Job, might take shelter under, or lie down among. This passage, indeed, seems to preclude any thorny plant or nettle, as no one would voluntarily resort to such a situation.

Moreover, it is worthy of remark that there is a word in a cognate language, the Arabic, which is not very dissimilar from *charul* or *kharul*, and which is applied to plants, apparently quite suitable to all the above passages. The word *khardul* is applied in all old Arabic works, as well as at the present day, to different species of mustard, and also to plants which are employed for the same purposes as mustard, and it is not very unlike the *kharul* or *charul* of Scripture. In fact, they do not differ more than many words which are considered to have been originally the same. Some of the wild kinds of mustard are well known to spring up in cornfields, and to be the most troublesome of all the weeds with which the husbandman has to deal; one of these, indeed, *sinapis arvensis*, is well-known as abundant in our fields, where it is a very troublesome weed, and also in waste ground when newly disturbed.

Some of these are found in Syria and Palestine so large that one of them has been supposed to be the mustard tree alluded to by our Saviour. *S. arvensis* being so widely diffused, is probably also found in Palestine, though this can only be determined by a good botanist on the spot, or by a comparison of genuine specimens. But there is another species, the *S. orientalis*, which is common in cornfields in Syria, and south and middle Europe, and which can scarcely be distinguished from *S. arvensis*. Either of these will suit the above passages, and as the name is not very dissimilar, we are of opinion that it is better entitled to be the *charul* of Scripture than any other plant that has hitherto been adduced.

CHASE (chās). See HUNTING.

CHASIL (käs'il), (Heb. חַרְסִיל, *khaw-seel'*, devourer, Eng. Vers. *caterpillar*), occurs in Hebrew. 1 Kings viii:37; 2 Chron. vi:28; Ps. lxxviii:46; Is. xxxiii:4; Joel i:4; ii:25.

In the *Auth. Vers.* 1 Kings viii:37; 2 Chron. vi:28; Ps. lxxviii:46; ev:34; Is. xxxiii:4; Jer. li:14, 27; Joel i:4; ii:25.

The English word *caterpillar* belongs strictly to the larvæ of the genus lepidoptera, and more especially to the larvæ of a section of it, the *Papilionidæ*. It is, however, far from provable that the *chasil* is any species of caterpillar. The root from which it is derived, signifies to 'consume' or 'devour,' and it is especially used to denote the ravages of the locust (Deut. xxviii:38).

The Arabic and Syriac cognates also signify to consume. The word βροῦχος, by which it is frequently rendered in the Septuagint, from βρώσκω, I eat up, conveys also the idea of ravenousness. All these names indicate a creature whose chief characteristic is voracity, and which also attaches to all the species of locusts. The ancients, indeed, concur in referring the word to the locust tribe of insects, but are not agreed whether it signifies any particular species of locust, or is the name for any of those states or transformations through which the locust passes from the egg to the perfect insect. The *Latin Fathers* take it to mean the larvæ of the locust, and the *Greek* understand it as the name of an adult locust.

The Septuagint, in Lev. xi:22, seems to distinguish the *bruchus* 'and its kind' from the common locust as differing not in age, but in species. It also ascribes flight to the *brookhos*, and speaks of it as a distinct species, so that it is difficult to suspect it of an egregious error.

CHASMIL (käs'mil), (Heb. חַשְׁמִיל, *khash-mal'*, Ezek. i:4, 27; viii:2), was probably a composition of

several sorts of metal, since even *electron*, by which the word is rendered by the ancients, frequently signifies a composition of gold and silver.

CHASTE, CHASTITY (chāst, chās'tī-tý), (Gr. *ἀγνός*, *hag-nos'*; *ἀγνότης*, *hag-nol'ace*, dedicated, hence, holy, clean), freedom from lustful actions or thoughts (Phil. iv:8; 1 Tim. v:22; 1 Pet. iii:2).

The word is applied to God in 1 John iii:3; James iii:17.

CHASTEN (chā's'n). See CHASTISEMENT.

CHASTISEMENT (chās'tiz-ment).

1. (Heb. *יָצַר*, *yaw-sar'*, primarily to instruct, then to chasten, Deut. viii:5; xxi:18; Ps. vi:1; xxxviii:1; xciv:2).

2. (Heb. *חָבַר*, *yaw-kakh'*, to convict.) This word is translated *chasten* in 2 Sam. vii:14; Job xxxiii:19.

3. (Heb. *עָנָה*, *aw-naw'*, to humble oneself, is translated "to chasten thyself" in Dan. x:12.)

In the New Testament we have *παιδεύω*, *pahee-dyoo'o*, to instruct, chasten, train, etc.

CHATZIR (kāt'zir), (Heb. *חֲצִיר*, *khaw-tseer'*), or Chazir, also Chajir.

This word occurs in several places in the Old Testament, where it is variously translated as grass, in 1 Kings xviii:5; 2 Kings xix:26; Job xl:15; Ps. xxxvii:2, etc; *herb* in Job viii:12; *hay*, in Prov. xxvii:25, and Is. xv:6; and *court*,

Leeks.

in Is. xxxiv:13; but in Num. xi:5, it is translated *leeks*. Hebrew scholars state that the word signifies 'green' or 'grass' in general; and it is no doubt clear, from the context of most of the above passages, that this must be its meaning. There is therefore no reason why it should not be so translated in all the passages where it occurs, except in the last.

In the passage of Num. xi:5, where the Israelites in the desert long for 'the melons, and the *leeks*, and the onions, and the garlic of Egypt, it is evident that it was not *grass* which they desired for food, but some green, perhaps grass-like vegetable, for which the word *chatzir* is used, and which is above translated *leeks*. In the same

way that, in this country, the word *greens* is applied to a variety of cabbage. It is more than probable, therefore, that *chatzir* is here similarly employed, though this does not prove that *leeks* are intended. That the leek is esteemed in Egypt we have the testimony of Hasselquist, who says, 'that the kind called *karrat* by the Arabs must certainly have been one of those desired by the children of Israel; as it has been cultivated and esteemed from the earliest times to the present time in Egypt.'

CHAVAH (kā'vah), (Gen. iii:20, marg.), a form of Eve, more closely representing the Heb.

CHEBAR (kē'bar), (Heb. *כְּבַר*, *kēb-awr'*, length), a river of Mesopotamia, upon the banks of which King Nebuchadnezzar planted a colony of Jews, among whom was the prophet Ezekiel (2 Kings xxiv:15; Ezek. i:1, 3; iii:15, 23; x:15, 22).

This was supposed to be the same river that was known among the Greeks as the Chaboras, and which now bears the name of Khabour. It flows to the Euphrates, through Mesopotamia, and is the only considerable stream which enters that river, at Circesium.

The view now obtains that the Chebar was a Babylonian canal. Similar streams were known by the name *nar*, river.

It is a name which might properly be given to any large river. It is sometimes identified with *Nahr Malcha*, or the Royal Canal of Nebuchadnezzar.

CHEBEL (kē'bel), (Heb. *כְּבֵל*, *kheh-bel'*), literally means "rope" (Josh. ii:15; 1 Kings xx:31, etc.). From this it came to denote a "band" of men (Ps. cxix:61). In a topographical sense it means a "tract" and is always applied to the region of Argob (Deut. iii:13, 14; 1 Kings iv:13).

CHECKER WORK (chēk'ēr wûrk), (Heb. *שֶׁבַע־קָוָה*, *seb-aw-kaw'*, network).

This word is used to describe the lattice work of the balustrade upon the columns of the Temple (1 Kings vii:17). In verse 18, the same word is translated "network."

CHEDEK (kē'dek). See THORNS.

CHEDORLAOMER (kēd'or-lā'o-mer or kēd'or-lā-ō'mer), (Heb. *כְּדֹר־לְאֹמֶר*, *ked-or-law-o'mer*), king of Elam, and leader of the five kings who invaded Canaan in the time of Abraham (Gen. xiv:4).

We thus know that Abraham came out of Ur of the Chaldees, and by way of Haran finally reached Palestine, where he cared for his flocks and herds, and also recaptured the booty which had been taken from the cities of the plain. We learn from Genesis that Chedorlaomer, who led the invaders, was king of Elam, but that is all. Any further light on the subject must come from the recovered monuments of the East.

(1) **Primitive Peoples.** At the time when Terah and his son Abraham left Southern Babylonia, it was inhabited by various races, the original race being probably of the negrite type—very dark and small and no match for the larger and stronger races which followed. They formed the original basis of the population of both Babylonia and Elam to the east. With them, and dominant over them, were two other rival and generally hostile races, inhabiting Babylonia, one of which we may call Mongolian, which came from the east or northeast, by way of Elam, while the other was Semitic, and came from the west, from Arabia. Abraham belonged to this Semitic stock, which had succeeded the Mongol invasion and had conquered the country.

(2) **Mongolian Invasions.** Somewhere about 2300 B. C. occurred one of the most important and revolutionary events in the history of the early world; and one whose full extent only now begins to be understood. It was nothing less than the bursting out of a great flood of Mongol people, which overran all that was then known of the civilized East or West. Such a horde of conquerors had subdued the negrite population of Babylonia and Elam before the beginning of history, and now came another such invasion.

This horde, of about 2300 B. C., the first of which we have historical knowledge, divided, as it seems, into two streams. One of these crossed the upper Tigris and Euphrates, reached the Mediterranean coast, and proceeded southward, until it at last reached Egypt, and leaving kindred people behind it, there founded the dynasty of the hated Shepherd or Hyksos kings, which overthrew the fourteenth regular dynasty. All of this took time, and must be considered in relation to an already considerably Mongolianized Phœnicia.

The other division of the Mongolian invasion passed down east of the Tigris, over the territory which was afterward Persia, into the southern Persian territory of Elam, where it found a kindred population in control, and then crossed the Tigris into Babylonia, where the Semites were the ruling people. This great invasion, of which we have pretty definite knowledge, and which we call Elamite, was substantially concurrent with the conquest of Egypt, by the invasion of the Canaanite or Phœnician, the old Mongolian nomads, who founded Avaris and the Hyksos dynasty.

The most distinguished of these Mongolian or Elamite conquerors of Babylonia was Kudur-Nahunta, whose name means "the servant of the god Nahunta."

This Elamite conquest probably covered all of Southern Babylonia, although the farthest extent of it known to us was the plunder in the year 2285 B. C., of the city of Erech, and the capture of the image of Nana, which was carried to Susa, and was recovered by Assur-bani-pal, king of Assyria, 1800 years later.

From Erech to Ur of the Chaldees was not a long distance. At this time there must have been a great emigration of the Semites, who fled from this irresistible invasion. They went north and formed a homogeneous Semitic population farther up the valleys of the two rivers, the basis of the later Assyrian empire.

(3) **Departure of Terah.** About this time Terah and his family left their ancestral home for the North, and we may conjecture, with great probability, that the Elamite invasion explains in part their departure; we may believe that they were the representatives of the dispossessed aristocracy which went to the northern plain of Haran, carrying, as we know, with them, the worship of Sin, the moon god of Ur.

(4) **Abraham and the Early Kings.** In time, Abraham at the command of God moved farther to the Mediterranean coast, and wandered over the land of Canaan. It was while he was there that the invasion of Palestine occurred, led by Chedorlaomer, or, as his Elamite name would be, Kudur-Lagamar, meaning the servant of the goddess Lagamar, who, perhaps, represented the Dawn, and a name parallel to that of his great predecessor, Kudur-Nahunta.

Kudur-Nahunta's son was Simti-Shilhak, who was the father of Kudur-Mabug, who was the father of Eri-Aku (in Semitic, Rim-Sin) of

Larsa, probably the Arioeh, king of Ellasar, who was one of those who made the raid on Canaan (see ARIOCH) with Chedorlaomer (Kudur-Lagamar), king of Elam.

We do not know just what was the extent and purpose of this invasion, but we may be sure that the Semite Abraham, who had been driven by the Elamites out of his ancestral home, had no good will towards the house of Kudur-Nahunta, nor any of his successors.

He lived at some distance from the rich cities which were attacked, and was personally safe; but he was not only glad to rescue his nephew Lot, but also to avenge as far as possible the injuries which he and his father had suffered, and which made them wanderers from their early home. The opportunity was offered on the retreat. We must not imagine Abraham, with his three hundred and eighteen men, as attacking the combined army of the invaders. What he probably did was to follow and surprise a separate detachment which had lingered to attack and spoil Sodom, or had charge of prisoners. These were suddenly overcome, and the prisoners and spoil retaken (Gen. xiv:14-16). (See ABRAHAM; LOT.)

Kudur-Lagamar is the last one of this line of Elamite or Mongolian kings ruling over Babylonia that is known to us. It is supposed by some that Amraphel, king of Shinar, who was also in the invasion of Kudur-Lagamar (Chedorlaomer) is the same as Hammurabi, who later drove out the Elamites and restored a Semitic line of rulers and who reigned until about 1600 B. C. (See AMRAPHEL.)

Another Elamite or Kassite dynasty conquered Babylonia and held it for some 300 years.

Such a wide view of early Oriental history as we have taken explains not only the relations of Abraham to the politics of Ur of the Chaldees, and the reason for his hostility to the Elamites, but it also explains the fact, so surprising to scholars, of the wide use of the cuneiform writing in Palestine, a few centuries later, as proved by the Tel-Amarna tablets. (See TEL-AMARNA TABLETS.) The Elamites used the cuneiform script.

This raid of Kudur-Lagamar was one of a large number which brought Canaan under the rule of Elam and Babylonia, but not with the nearer Egypt. Its literature and writing were Babylonian, not Egyptian. We may not be surprised if we learn that its religion, and its notions of cosmogony, and all its faiths and legends were closely allied to those of Babylonia. (See *Chedorlaomer and Abraham*, William Hayes Ward, D. D., *Hom. Rev.*, July, 1894; Sayce, *Patriarchal Palestine*, pp. 33, 64, 168; Price, *The Monuments and the Old Testament*, pp. 101, 293.)

CHEEK (chēk), (Heb. לֶחֶם, *lekh-ee'*).

In the Mosaic economy a part of the priests' provision comprehended the *checks* and maw of the sacrifice (Deut. xviii:3). Check-teeth appear to be the grinders, strong and resistless in the lion (Joel i:6).

Figurative. To smite one upon the cheek was a vile insult as well as an injury (Job xvi:10; Lam. iii:30; Mic. vii; Luke vi:29). In Psalms iii:7, the term is used to indicate destruction. The idea of strength is conveyed in Joel i:6.

CHEESE (chēz) is mentioned three times only in the Bible under a different Hebrew name, as חֶמְצָה, *khah-re-tsay' he-khaw-lawb'*, slices, or segments, of cheese (1 Sam. 17:18); חֶמְצָה, *חֶמְצָה*.

sheph-orwth' barw-kawr', according to the Chaldee and the rabbins, *cheese of cows* (2 Sam. 17:29); חֶבֶב, *gheb-ee-naw'* (Job x:10), coagulated milk.

In this, the most important passage in which this preparation from milk is mentioned in Scripture, Job, figuratively describing the formation of the fetus in the womb, says:

'Hast thou not poured me out like milk,
And curdled (condensed, solidified) me like
cheese?' (x:10).

There is much reason to conclude that the cheese used by the Jews differed in no respect from that still common in the East; which is usually exhibited in small cakes about the size of a tea saucer, white in color, and excessively salt. It has no rind, and soon becomes excessively hard and dry—being, indeed, not made for long keeping. It is best when new and comparatively soft; and, in this state, large quantities are consumed in lumps or crumbs not made up into cakes. All cheese in the East is of very indifferent quality, and it is within the writer's own knowledge that the natives infinitely prefer English or Dutch cheese when they can obtain it. In making this cheese, the thing used to curdle the milk is either butter-milk or a decoction of the great-headed thistle, or wild artichoke. The curds are afterwards put into small baskets made of rushes or palm leaves, which are then tied up close, and the necessary pressure applied. (See 1 Sam. xvii:18; 2 Sam. xvii:29.)

A valley at Jerusalem bore the name Cheese-mongers.

CHELAL (kē'lal), (Heb. כֶּלֶל, *kel-aw'*, perfection; χαλῆλ, *chalal*), Ezra x:30, where he is mentioned as one of the eight sons of Pahath-Moab, who all took "strange wives" (B. C. 458).

CHELBENAH (kēl-bē'nah), (Heb. כְּחֶבֶן, *chal-ben-aw'*), is mentioned in Exod. xxx:34 as one of the substances from which the incense for the sanctuary was to be prepared: 'Take unto thee sweet spices, stacte (opobalsamum, R. V.) and onycha and (chelbenah) galbanum.' The Hebrew word is very similar to the Greek χαλβάνη, *galbanum*, which occurs as early as the time of Hippocrates.

Galbanum then is either a natural exudation, or obtained by incisions from some umbelliferous plant. It occurs in commerce in the form either of tears or masses, commonly called *lump-galbanum*. The latter is of the consistence of wax, tenacious, of a brownish, or brownish yellow color, with white spots in the interior, which are the agglutinated tears. Its odor is strong and balsamic, but disagreeable, and its taste warm and bitter. It is composed of 66 per cent. of resin, and 6 of volatile oil, with gum, etc., and impurities. It was formerly held in high esteem as a stimulant and anti-spasmodic medicine, and is still employed as such, and for external application to discuss indolent tumors.

It was the practice of the ancients to mix galbanum with the most fragrant substances with which they were acquainted. The effect of such mixture must depend upon the proportion in which it or any other strong-smelling substance is intermixed, more than upon what is its peculiar odor when in a concentrated state. We need not, therefore, inquire into the reasons which have been assigned to account for galbanum being intermixed with stacte and onycha as sweet spices. We see that the same practice existed among the Greeks and the Egyptians.

CHELCIAS (kēl'shī-as), (Heb. כְּחִילִיָּהּ, *khil-kee-yawh'*, the portion of the Lord), Hilkiah, the father of Susanna.

Tradition makes him the brother of Jeremiah, and identifies him with the priest who found the copy of the law in the time of Josiah (2 Kings xxii:8).

CHELLIANS (kēl-li-anz), (Judith ii:23). See **CHELLUS**.

CHELLUH (kel'lūh), (Heb. כְּלוּיָהּ, *kel-oo-hah'-ee*, robust), one of the sons of Bani, who had foreign wives (Ezra x:35), B. C. 458. Called also Cheluhi.

CHELLUS (kēl-luz), (Gr. Χελλούς, *khel-loos'*), named amongst the places beyond Jordan to which Nebuchodnosor sent his summons (Judith i:9).

CHELOD (kē'lōd). The sons of Chelod were among those who obeyed the summons of Nebuchodnosor to his war with Arphaxad (Judith i:6). The word is evidently corrupt and probably a nickname of the Syrians, "sons of the moles," (כְּחֹלֵד, *kholed*).

CHELUB (kē'lub), (Heb. כְּלוּבָ, *kel-oob'*, a cage).

1. The brother of Shuah and father of Mehir, of the tribe of Judah (1 Chron. iv:11).

2. The father of Ezri, who was David's chief gardener (1 Chron. xxvii:26), B. C. after 1000.

CHELUBAI (ke-lū'bāi), (Heb. כְּלוּבָי, *kel-oo-bah'-ee*), one of the sons of Hezron (1 Chron. ii:9); elsewhere in the same chapter (verses 18, 42) called **CALEB** (which see).

CHEMARIM (kēm'a-rīm), (Heb. כְּמַרִּים, *kem-aw-reen'*, Zeph. i:4).

In 2 Kings xxiii:5, it is rendered "idolatrous priests," and in Hos. x:5, "priests." In the Hebrew usage of the word, it is exclusively applied to the priests of the false worship.

CHEMOSH (kē'mōsh), (Heb. כְּמוֹשׁ, *kem-osh'*), is the name of a national god of the Moabites (1 Kings xi:7; 2 Kings xxiii:13; Jer. xlvi:7; who are for this reason called the 'people of Chemosh,' in Num. xxi:29), and of the Ammonites (Judg. xi:24), whose worship was introduced among the Israelites by Solomon (1 Kings xi:7).

No etymology of the name which has been proposed, and no attempt which has been made to identify this god with others whose attributes are better known, are sufficiently plausible to deserve particular notice. The only theory which rests on any probability is that which assumes a resemblance between Chemosh and Arabian idolatry. Jewish tradition affirms that he was worshiped under the symbol of a black star, and Maimonides states that his worshipers went bareheaded and abstained from the use of garments sewn together by the needle. The black star, the connection with Arabian idolatry, and the fact that Chemosh is coupled with Moloch (1 Kings vi:7), favor the theory that he had some analogy with the planet Saturn. Solomon erected a high place for him near Jerusalem (1 Kings xi:7), which was afterwards defiled by Josiah (2 Kings xxiii:13).

CHENAANAH (ke-nā'a-nah') (Heb. כְּנַעֲנָה, *ken-an-aw'*, flat, low).

1. Son of Bilhan, descendant of Benjamin, head of the Benjamite house (1 Chron. vii:10), probably of the family of Belaites (B. C. 1020).

2. Father or ancestor of Zedekiah, the false prophet, who encouraged Ahab to go up against Ramoth-Gilead (1 Kings xxii:11, 24; 2 Chron. xviii:10, 23). Perhaps the same as 1 (B. C. 896).

CHENANI (kěn'a-nī), (Heb. כֶּנָנִי, *ken-aw-nee'*, Jehovah appointed or made).

One of the Levites who officiated at the solemn purification of the people under Ezra (Neh. ix:4), B. C. 459.

CHENANIAH (kěn'a-nī'ah), (Heb. כְּנַנְיָהוּ, *ken-an-yaw'*, God's goodness).

A master of the temple music, who conducted the grand musical services when the ark was removed from the house of Obed-edom to Jerusalem (1 Chron. xv:22).

CHEPHAR-HAAMMONAI (kē'phar-ha-ām'-mo-nāi), (Heb. כְּפַרְחַמְמוֹנַי, *kef-ar' haw-am-mo-nee'*, village of the Ammonites).

A place mentioned among the towns of Benjamin (Josh. xviii:24). No trace of it has been found, but it doubtless preserved the memory of an Amorite incursion into the ravines that ran back from the Jordan into the highlands of Benjamin.

CHEPHIRAH (ke-phī'rah), (Heb. כְּפִירָה, *kef-ee-raw'*, with the definite article, הַכְּפִירָה, *hak-kef-ee-raw'*, except in the later books), a city of the Gibeonites, given to Benjamin (Josh. ix:17; xviii:26).

It appears to have been a village of the Hivites, and to have retained its name, to whatever size it might afterwards have attained. It continued to exist after the captivity (Ezra ii:25; Neh. vii:29). Its site is the ruin Kefireh, eight miles west-northwest of Jerusalem, about two miles east of *Talo* (Ajalon) (Robinson iii. 146).

CHERAN (kē'ran), (Heb. כְּרָנִי, *ker-awn*, union), one of the sons of Dishon the Horite (Gen. xxxvi:26; 1 Chron. i:41), B. C. 1920.

CHERETHIM (kēr'e-thīm), (Heb. כְּרֹתִים, *kher-ee-theem'*, Ezek. xxv:16). The plural form is elsewhere **CHERETHITES** (which see).

CHERETHITES and **PELETHITES** (kēr'e-thītes and pē'leth-ites), (Heb. כְּרֹתִי, *ker-ay-thee'*), names borne by the royal life-guards in the time of David (2 Sam. viii:18; 1 Chron. xviii:17). Prevailing opinion translates their names 'Headsmen and Foot-runners.'

The former word is used for *woodcutters* (2 Chron. ii:10), and it might seem probable that the Cherethites, like the lictors of the Roman dictator, carried axes, both as a badge of office and for prompt use. That they were strictly a body-guard is distinctly stated in 2 Sam. xxiii:23. The grammatical form of the Hebrew words is nevertheless not quite clear, and as the Cherethites are named as a nation of the south (1 Sam. xxx:14), some are disposed to believe Crethi and Plethi to be foreign Gentile names used collectively. No small confirmation of this may be drawn from 2 Sam. xv:18: 'All the Cherethites and all the Pelethites and all the Gittites, six hundred men.' In three places the name Carite appears in their stead (2 Sam. xx:23; 2 Kings xi:4, 19, both Revised Version). It has been suggested that this name preserves the memory of Carian inhabitants of Crete, alluded to by classical writers.

CHERITH (kē'rith), (Heb. כְּרִיתָה, *ker-eeth'*, torrent of the gorge), a river in Palestine, on the banks of which the prophet Elijah found refuge (1 Kings xvii:3-7).

Eusebius and others have conceived themselves bound by the words rendered 'east of the Jordan,' to seek the river in the Trans-Jordanic country; but although the words sometimes re-

quire this translation, they may also be rendered 'towards,' or 'before the Jordan,' that is, in coming from Samaria. And this interpretation, which places the Cherith west of the Jordan, agrees with the history, with Josephus, and with the local traditions, which have uniformly placed the river of Elijah on this side the Jordan. Dr. Robinson drops a suggestion that it may be the Wady Kelt, which is formed by the union of many streams in the mountains west of Jericho, issuing from a deep gorge, in which it passes by that village and then across the plain to the Jordan. It is dry in summer. Some identify it with *Wady Fusail*, a little farther north, and yet others think it was some stream on the other, or eastern, side of the Jordan. Wady Yabis, opposite Beth-shean, may be the place. (Harper, *Bible and Mod. Dis.*, p. 299.)

CHERUB (kē'rub), (Heb. כְּרוּב, *ker-oob'*, a city); apparently a place in Babylonia from which some persons returned to Judæa with Zerubbabel (Ezra ii:59; Neh. vii:61).

CHERUB, CHERUBIM (chěr'üb, chěr'ü-bīm), (Heb. כְּרוּב, *ker-oob'*, one grasped, held fast), in the singular only in Exod. xxv:19; 2 Sam. xxii:11; 1 Kings vi:24, 25, 27; 2 Chron. iii:11, 12; Ps. xviii:10; Ezek. x:2, 7, 9, 14; xxviii:14, 16; cherubim, plural, כְּרוּבִים, *ker-oo-beem'*, the name of certain symbolical figures frequently mentioned in Scripture.

Hebrew nouns of the masculine gender generally end in *im*, and our translators, in adopting this form into their version in preference to the English cherubs, have in several places improperly added the letter *s* to the termination of the word, and so given us cherubims.

(1) **Symbolical of Ruling Powers.** One system regards the cherubim as symbolical of the chief ruling powers by which God carries on the operations of nature. As the heaven of heavens was typified by the holy of holies in the Levitical tabernacle (Heb. ix:3-12, 24-28), this system considers that the visible heavens may be typified by the holy place or the outer sanctuary, and accordingly finding, as its supporters imagine they do, the cherubim identified with the aerial firmament and its elements in such passages as the following: 'He rode upon a *cherub*, and did fly, yea, he did fly upon the wings of the *wind*,' where the last hemistich is exegetical of the former (Ps. xviii:10); 'Who rideth upon the heavens in thy help, and in his excellency upon the sky' (Deut. xxxiii:26; Ps. lxxviii:4); 'He maketh the clouds his chariot;' he is said to descend in fire (Exod. xix:18), and between which he dwelt in light (1 Tim. vi:16), and it was in this very manner he manifested his Divine glory in the Tabernacle and Temple—they interpret the cherubim, on which the Lord is described as riding, to be symbolical of the wind, the clouds, the fire, the light; in short, the heavens, the atmosphere, the great physical powers by which the Creator and preserver of the universe carries on the operations of nature.

(2) **Ecclesiastical Rulers.** A second system considers the cherubim, from their being instituted immediately after the Fall, as having particular reference to the redemption of man, and as symbolical of the great and active rulers or ministers of the church. Those who adopt this theory as the true explanation of their emblematical meaning, are accustomed to refer to the living creatures, or cherubim, mentioned in the Apocalyptic vision (Rev. iv:6), improperly rendered in our English translation 'beasts,' and which, it is clear, were not angels, but redeemed

men connected with the church, and deeply interested in the blessings and glory procured by the Lamb. The same character may be ascribed to the living creatures in Ezekiel's visions, and to the cherubim, which stood over and looked into the mercy-seat, sprinkled with the blood of the atonement, and on the Shechinah, or divine glory arising from it, as well as the cherubic figures which were placed on the edge of Eden, and thus the cherubim, which are prominently introduced in all the three successive dispensations of the covenant of grace, appear to be symbols of those who, in every age, should officially study and proclaim the glory and manifold wisdom of God.

It may be observed in general that they both involve the leading idea that the cherubim were symbols, either directly emblematic of Deity, or significant of the ruling powers by which the agency of God is carried on in the natural and moral world.

(3) **Levitical Tabernacle.** Figures of the cherubim were conspicuous implements in the Levitical Tabernacle. Two of them were placed at each end of the mercy-seat, standing in a stooping attitude, as if looking down towards it, while they overshadowed it with their expanded wings, and, indeed, they were component parts of it, formed out of the same mass of pure gold as the mercy-seat itself (Exod. xxv:19).

(4) **Solomon's Temple.** These figures were afterwards transferred to the most holy place in Solomon's temple, and it has been supposed from 1 Chron. xxviii:18 that that prince constructed two additional ones after the same pattern, and of the same solid and costly material, but whether it was with a view to increase their number in accordance with the more spacious and magnificent edifice to which they were removed, or merely to supply the place of those made by Moses, which in the many vicissitudes that befell the ark might have been mutilated or entirely separated from the mercy-seat to which they were attached—is not ascertained. This much, however, is known, that Solomon erected two of colossal dimensions in an erect posture with their faces towards the walls (2 Chron. iii:13), covering with their outstretched wings the entire breadth of the debir, or most holy place. These sacred hieroglyphics were profusely embroidered on the tapestry of the tabernacle, on the curtains and the great veil that separated the holy from the most holy place (Exod. xxvi:1-31), as well as carved in several places (1 Kings viii:6-8) on the walls, doors and sacred utensils of the temple.

The position occupied by these singular images at each extremity of the mercy-seat—while the Shechinah, or sacred flame that symbolized the Divine presence and the awful name of Jehovah in written characters were in the intervening space—gave rise to the well-known phrasology of the sacred writers, which represents the Deity dwelling between or inhabiting the cherubim, and, in fact, so intimately associated were they with the manifestation of the Divine glory that whether the Lord is described as at rest or in motion, as seated on a throne, or riding in a triumphal chariot, these symbolic figures were essential elements in the description (Num. vii:89; Ps. xviii:10; lxxx:i; xcix:1-10; Is. vi:2; xxxvii:16).

(5) **Uniform in Figure.** Rejecting the opinion of those who maintain that the cherubim were of various shapes, we assume it to be, if not absolutely certain, at least highly probable, that in all the passages of Scripture where they are spoken of their figures were uniform.

(6) **First Mention.** The first occasion on which they are mentioned is on the expulsion of

our first parents from Eden, when the Lord placed cherubim on the east of the garden (Gen. iii:24). The word, translated 'on the east,' may signify as well 'before or on the edge of;' and the historian does not say that the Lord placed there cherubim, but the cherubim. Besides, *yashab* rendered by our translators 'placed,' signifies properly 'to place in a tabernacle,' an expression which, viewed in connection with some incidents in the after history of the primeval family (Gen. iv:14-16), seems a conclusive establishment of the opinion that this was a local tabernacle, in which the symbols of the Divine presence were manifested, suitably to the altered circumstances in which man after the Fall came before God, and to the acceptable mode of worship he was taught to observe. That consecrated place, with its striking symbols, called 'the presence of the Lord,' there is reason to believe, continued till the time of the deluge, otherwise there would have been nothing to guard the way to the tree of life; and thus the knowledge of their form, from the longevity of the antediluvians, could have been easily transmitted to the time of Abraham (Faber, *Horæ Mosaicæ*, b. ii. chap. 6). Moreover, it is an approved opinion that, when those emblems were removed at the close of the patriarchal dispensation from the place of public worship, the ancestors of that patriarch formed small models of them for domestic use, under the name of Seraphim, or Teraphim, according to the Chaldee dialect.

(7) **Furniture of the Tabernacle.** The next occasion in the course of the sacred history on which the cherubim are noticed is when Moses was commanded to provide the furniture of the tabernacle (Exod. xxv:18-20; xxxvii:7-9); and, although he received instructions to make all things according to the pattern shown him in the Mount, and although it is natural to suppose that he saw a figure of the cherubim, yet we find no minute and special description of them, as is given of everything else, for the direction of the artificers (Exod. xxvi:31). The simple mention which the sacred historian makes, in both these passages, of the cherubim, conveys the impression that the symbolic figures which had been introduced into the Levitical tabernacle were substantially the same with those established in the primeval place of worship on the outskirts of Eden, and that by traditional information, or some other means, their form was so well known, both to Bezaleel and the whole congregation of Israel, as to render superfluous all further description of them. On no other ground can we account for the total silence as to their configuration, unless we embrace the groundless and unworthy opinion of those who impute to the author of the Pentateuch a studied concealment of some parts of his ritual, after the manner of the Mystics.

(8) **Vision of Ezekiel.** But there was no mystery as to those remarkable figures, for Ezekiel knew at once (x:20) the living creatures which appeared in his vision supporting the throne of God, and bearing it in majesty from place to place, to be cherubim, from having frequently seen them, in common with all other worshipers, in the carved work of the outer sanctuary. Moreover, as is the opinion of many eminent divines the visionary scene, with which this prophet was favored, exhibited a transcript of the Temple, which was shown in pattern to David, and afterwards erected by his son and successor; and, as the chief design of that later vision was to inspire the Hebrew exiles in Babylon with the hope of seeing, on their return to Judæa, another tem-

ple, more glorious than the one then in ruins, it is reasonable to believe that, as the whole style and apparatus of this mystic temple bore an exact resemblance (1 Kings vi:20) to that of Solomon's magnificent edifice, so the cherubs also that appeared to his fancy portrayed on the walls would be fac-similes of those that belonged to its ancient prototype. Taking, then, his description of them to be the proper appearance that belonged in common to all his cherubic creatures (chaps. i, x, xli), we are led to conclude that they were compound figures, unlike any living animals or real object in nature; but rather a combination, in one nondescript artificial image, of the distinguishing features and properties of several. The ox, as chief among the tame and useful animals, the lion among the wild ones, the eagle among the feathery tribes, and man, as head over all—were the animals which, or rather parts of which, composed the symbolical figures. Each cherub had four distinct faces on one neck—that of a man in front, that of a lion on the right side, and of an ox on the left; while behind was the face of an eagle. Each had four wings, the two under ones covering the lower extremities (Heb. the feet), in token of decency and humility, while the upper ones, spread out on a level with the head and shoulders, were so joined together, to the edge of his neighbors' as to form a canopy; and in this manner they soared rather than flew, without any vibratory motion with their wings, through the air. Each had straight feet. The Hebrew version renders it 'a straight foot;' and the probability is that the legs were destitute of any flexible joint at the knee, and so joined together that its locomotions must have been performed in some other way than by the ordinary process of walking, or lifting one foot after another.

The ideal picture, then, which Ezekiel's description would lead us to form of the cherub, is that of a winged man, or winged ox, according to the particular phase it exhibited or the particular direction from which it was seen.

(9) Corruption of Early Worship. Whether the golden calf constructed by Aaron might be—not the Apis of Egypt—but a representation of the antediluvian Cherubim, as some suppose, from its being made on 'a feast to the Lord,' and called 'the gods of Israel' (Exod. xxxii:5), and whether Jeroboam, in the erection of his two calves, intended a schismatic imitation of the sacred symbols in the Temple of Jerusalem, rather than the introduction of a new species of idolatry (1 Kings xii:28), we shall not stop to inquire. But as paganism is a corruption of patriarchal worship—each nation having added something to its own taste and fancy—perhaps we may find a confirmation of the views given above of the compound form of the cherubim in the strange figures that are grouped together in the heathen deities.

The numerous ox-heads, for instance, in the statue of the ancient Diana, and particularly the Asiatic idols, almost all of which exhibit several heads and arms attached to one person, or the heads of different animals combined, afford a collateral proof, similar to the universal prevalence of sacrifice, that the form of the primitive cherubim has been traditionally preserved and extended over a large portion of the world.

The opinions concerning the design of the cherubim are as diversified as those relative to their form. All are agreed that they had a symbolical meaning, although it is not easy to ascertain it. The ancients, as well as the fathers, considered that they had both a physical and a metaphysical object. Thus, for instance, Philo

regarded them as signifying the two hemispheres, and the flaming sword the motion of the planets; in which opinion he is joined by some moderns, who consider them to have been nothing more than astronomical emblems—the Lion and the Man being equivalent to Leo and Aquarius—the signs of the zodiac (Landseer, *Sab. Resear.* p. 315). Irenæus views them as emblematic of several things, such as the four elements, the four quarters of the globe, the four gospels, the four universal covenants (*Adv. Haeres.* iii:11). Tertullian supposed that the cherubic figures, particularly the flaming sword, denoted the torrid zone (*Apol.* cap. 47). Justin Martyr imagined that the living creatures of Ezekiel were symbolical of Nebuchadnezzar, the Assyrian monarch, in his distress; when he ate grass like an ox, his hair was like a lion's, and his nails like a bird's claws (*Quaest.* xlv). And Athanasius supposed that they were significant of the visible heavens (*Quaest. ad. Antiocl.* cxxxv). The opinions of the moderns may be reduced to three systems. Hutchinson and his followers consider the cherubim as emblems of the Trinity, with man incorporated into the Divine essence.

But the grand objection to this theory, where it is at all intelligible, is that not only are the cherubim, in all the places of Scripture where they are introduced, described as distinct from God, and no more than His attendants, but that it represents the Divine Being, who is a pure spirit, without parts, passions, or anything material, making a visible picture of himself, when in all ages, from the beginning of time, he has expressly prohibited 'the likeness of anything in heaven above' (See Parkhurst, *Heb. Lexicon*, sub voce). Another system regards the cherubim as symbolical of the chief ruling powers by which God carries on the operations of nature. As the heaven of heavens was typified by the holy of holies in the Levitical tabernacle (Heb. ix:3-12, 24-28).

(10) Literature. The subject is extensively discussed in the standard works on the Theology of the Old Testament, by Oehler, Smend, Schultze, Dillmann; and on the Archæology, by Nowack and Benzinger. See also Cheyne's 'Excursus' in vol. ii. of his *Isaiah*, and his notes on the word in *Com. on Psalms*.

CHESALON (kēs'a-lōn), (Heb. כֶּסֶלֹן, *kes-arv-lone'*, strength, fortress).

One of the landmarks on the west part of the north boundary of Judah (Josh. xv:10). Early historians differ somewhat concerning its exact location, but they agree that it was a large town near Jerusalem. It is commonly identified with the village of Kesla, ten miles west of Jerusalem.

CHESED (kē'sed), (Heb. כֶּסֶד, *keh'sed*, doubtful signification), the fourth named of the sons of Nabor (Abraham's brother) by Milcah (Gen. xxii:22), B. C. between 2088 and 1870.

It is noticeable that the eldest of the brothers of Chesed is Uz, and that in Job. i the Casdim (translated Chaldæans) are found invading the territory of Uz. Gen. xxii:21, 22 probably represent, in the terms of genealogy, the supposed kinship of allied clans who dwelt in Mesopotamia. The Hebrew tradition gives the names of tribes identified with various localities on the borders of the plain of Mesopotamia (H. E. Ryle, *Hastings' Bib. Dict.*).

CHESIL (kē'sil), (Heb. כֶּסֶל, *kes-ee'*, fleshly, carnal, ungodly), a city of Judah (Josh. xv:30). Eusebius calls it Nil, and places it in the south of Judah.

In the list of towns given to Simeon out of Judah the name *Bethul* occurs (Josh. xix:4) in place of *Chesil* as if identical with it. This is strengthened by the reading *Bethuel* in 1 Chron. iv:30.

CHEST (chĕst). Two distinct Hebrew words are translated by this term:

1. **אֲרוֹן**, *aw-rone'*, which, with two exceptions, is always used of the Ark of the Covenant. These two exceptions are the "coffin" of Joseph (Gen. l:26), and the "chest" in which the alms were collected by Jehoiada (2 Kings xii:9, 10; 2 Chron. xxiv:8-11).

2. **אֲרוֹנוֹת**, *ghen-aw-zem'*, "chests," Ezek. xxvii:24 only; "treasuries," Esther iii:9; iv:7.

CHESTNUT-TREE (chĕs'nüt-trĕ'). See **ARMON**.

CHESULLOTH (ke-sül'loth), (Heb. כֶּסֶלֶת, *kes-ool-lōth'*, fatness, the loins), one of the towns of Issachar (Josh. xix:18). It appears to be between Jezreel and Shunem, but not far enough north to be the Achaseluth mentioned by Eusebius and Jerome. Perhaps the same as **CHISLOTH-TABOR**.

CHETH (kĕth), in R. V. Heth. "The eighth letter of the Hebrew alphabet. It stands at the beginning of the eighth section of Ps. cxix, in several versions, in which section each verse begins with this letter." (Davis, *Bib. Dict.*)

CHETTIIM (kĕt-ti'im), (1 Macc. i:1). See **CHITTIM**.

CHEZIB (kĕ'zib), (Heb. כֶּזִיב, *kez-ceb'*, deceitful, lying), a name mentioned in Gen. xxxviii:5, where the Canaanitess Bathshua bore Judah his third son, Shelah. It was probably in the low country of Judah, and no doubt identical with Achzib and Chozeba.

CHIDON (ki'don), (Heb. כִּידוֹן, *kee-dohn'*, destruction, a javelin), the threshing-floor where Uzzah was suddenly struck dead (1 Chron. xiii:9). In 2 Sam. vi:6, it is called "the threshing-floor of Nachon;" but we neither know whether the names of Nachon and Chidon are those of men or of places, nor if they are really two distinct names for the same person or spot, but simply corruptions one of the other.

CHILD, CHILDREN (chıld, chĭl'dren), (Heb. יָלֵד, *yeh'led*).

The word 'children' is sometimes used in the plural number, when meant to designate only one male issue (comp. 1 Chron. ii:31; 2 Chron. xxiv:25; xxxiii:6). In such places 'sons' is equivalent to offspring, all of whom had probably died except the last-mentioned in the text. The more children—especially of male children—a person had among the Hebrews the more was he honored, it being considered as a mark of Divine favor, while sterile people were, on the contrary, held in contempt (comp. Gen. xi:30; xxx:1; 1 Sam. ii:5; 2 Sam. vi:23; Ps. cxxvii:3, *sq.*; exxxviii:3; Luke i:7; ii:5). That children were often taken as bondsmen by a creditor for debts contracted by the father is evident from 2 Kings iv:1; Is. l:1; Neh. v:5. Among the Hebrews a father had almost unlimited power over his children, nor do we find any law in the Pentateuch restricting that power to a certain age; it was indeed the parents who even selected wives for their sons (Gen. xxi:21; Exod. xxi:9, 10, 11; Judg. xiv:2, 5). It would appear, however, that a father's power over his daughters was still greater than that over his sons, since he might even annul a sacred vow made by a daughter, but not one made by a son (Num. xxx:4, 16). Children cursing or assaulting their parents were punished by the

Mosaical Law with death (Exod. xxi:15, 17; Lev. xx:9), a remarkable instance of which is quoted by Christ (Matt. xv:4, 6; Mark vii:9). Before the time of Moses a father had the right to choose among his male children and declare one of them (usually the child of his favorite wife) as his firstborn, though he was perhaps only the youngest. Properly speaking, the 'firstborn' was he who was first begotten by the father, since polygamy excluded all regard in that respect to the mother. Thus Jacob had sons by all his four wives, while only one of them was called the firstborn (Gen. xlix:3); we find, however, instances where that name is applied also to the firstborn on the mother's side (1 Chron. ii:50; comp. v:42; Gen. xxii:21). The privileges of the firstborn were considerable, as shown in **BIRTHRIGHT**.

The firstborn son, if not expressly deprived by the father of his peculiar rights, as was the case with Reuben (Gen. xlix), was at liberty to sell them to a younger brother, as happened in the case of Esau and Jacob (Gen. xxv:31, *sq.*). Considering the many privileges attached to first-birth, we do not wonder that the Apostle called Esau a *thoughtless person* (Heb. xii:16). There are some allusions in Scripture to the modes in which children were carried. Several of these allusions seem to import that they were carried bundled on the back; Is. xlix:22 represents them as carried on the shoulder.

On the influence of heredity, G. M. Mackie (*Hastings' Bib. Dict.*) says: Given a life with little change in its outward conditions, and with a law that controlled every detail of life, it followed that time would be an intensifier of the parental features. Among the Arabs the epithet 'dog' has for its climax 'son of a dog.' As one of their proverbs states the problem, 'If the father be onion and the mother garlic, how can there be sweet perfume?' When Saul asked the young slayer of Goliath, 'Whose son art thou, young man?' (1 Sam. xvii:58) the answer would not only reveal the family of David, but also account in part for the courage he had shown. Hence the incriminations, 'Ye are the children of them that killed the prophets' (Matt. xxiii:31); 'If ye were Abraham's children ye would do the works of Abraham' (John viii:39); and the defense, 'How can Satan cast out Satan?' (Mark iii:23; Ezek. xviii:2; Acts xiii:10). (See **ADOPTION**; **BIRTH**; **BIRTHRIGHT**; **EDUCATION**.)

Figurative. 1. The Jews are compared to a child or infant cast out and forsaken of its mother, or infant lying in its blood; their origin was base, their condition in Egypt extremely mean, and they were exposed to the most bloody cruelty, but God exalted them into a glorious kingdom (Ezek. xvi:1-14). They are the "children of the kingdom," who are now cast out to trouble, while the Gentiles are admitted into the church and a state of fellowship with God (Matt. viii:12). They, while cleaving to their burdensome ceremonies, as a ground of justification, are the "children of the bond-woman" (Gal. iv:31).

2. The saints are called the "sons or children of God;" they are graciously adopted into his spiritual family, begotten into his image, endued with his Spirit, and entitled to privileges unnumbered, and an inheritance that fadeth not away; they are heirs of righteousness, salvation, of the promises, nay, of God himself (John i:12; Rom. viii:14-17). They are the "children or seed" of Wisdom, or Christ; by his travail unto death, and suffering, and by the influence of his regenerating Spirit, he begets them again (Matt. xi:19; Is. liii:10). They are "children of light;" begotten of God, the purest light, by means of his

pure and enlightening word; they have the knowledge of Divine things, walk in the light of God's countenance and law; the light of their good works shines before men; and they are heirs and expectants of the inheritance of the saints in light (Luke xvi:8). They are "children of promise;" by the promises of the gospel, they are quickened, supported, comforted, and secured of eternal life (Gal. iv:29). They are "children of the resurrection;" then they shall be raised from the dead, fully conformed to God, and enter on the complete possession of their glorious inheritance in heaven (Luke xx:36). They are "children of Zion; of Jerusalem; of the kingdom; and of the free woman;" they are spiritually born, instructed and nourished in the church; they are under the covenant of grace, have a spirit of liberty, are freed from the slavery of sin and Satan, and of the broken law; and now, under the gospel, are free from burdensome ceremonies, and serve God with cheerfulness of heart (Ps. cxlix:2; Matt. xiii:38; Gal. iv:31; Is. lx:4).

3. Christ's disciples were "children of the bride-chamber;" they had early and peculiar intimacy with him, the glorious Bridegroom of souls (Matt. ix:15). The title son of man is given to Ezekiel, Daniel and Jesus Christ, but whether it was a title of dignity, importing their peculiar excellency, or whether a mark of our Saviour's debasement, and his delight in our nature; or a mark of the low origin and frailty of these prophets, to be remembered by them amidst their visions, is not agreed (Ezek. ii:1; Dan. vii:13; viii:17).

4. The wicked are "children of this world;" they are never born from above; have no portion of felicity, but in this world; nor do they study to fulfill any thing but its lusts (Luke xvi:8). They are represented as "sons of men," or Adam; in him they were corrupted; his transgressions they imitate; they have no spiritual birth (Ps. iv:2; xii:1; lvii:4). They are "children of the devil;" they are devoted to the wickedness he introduces into the world; they cheerfully imitate, obey and serve him (John iii:18; viii:44). They are "children of darkness;" they are in a state of darkness and condemnation; their heart is full of ignorance and their practice of things shameful and wicked (1 Thess. v:5). They are "children of disobedience and iniquity;" their carnal mind is enmity against God; their whole practice is a continued rebellion against his law and a treacherous departure from him (Eph. ii:2; Is. lvii:4; Hos. ii:4; ix). They are "children of wrath;" they are naturally full of enmity against God and heirs of his just wrath (Eph. ii:3).

5. Persons eminently wicked are called "children of Belial" (Deut. xiii:13).

6. The "children of Abraham" are such as descended from him by natural generation—the Ishmaelites, Israelites, Edomites, etc.—or such as resemble him in faith and holiness (Luke iii:8; John viii:39; Gal. iii:7; Matt. iii:9).

7. The "children of the desolate" are more than of the married wife; the converts of the long desolate Gentile world are more numerous than those of the Jewish nation, long espoused to Christ; the converts of the church after Christ's departure to heaven are more numerous than when she enjoyed his presence on earth (Is. liv:1). See the word **BARREN**, where reason is adduced to show that the "children of the desolate" are the posterity of Abraham converted to Jesus under the restored state of the Jewish church.

8. "Strange children" are heathens or wicked persons, or children born to the Jews by heathenish women (Ps. cxlv:7; Neh. ix; Hos. v:7).

CHILDBEARING (child'bâr'ing), (Gr. *τεκνογονία*, *tek-nog-on-ee'ah*). As a consequence of the sin of our first parent it was said to her, "In sorrow thou shalt bring forth children" (Gen. iii:16).

Commenting on this, Delitzsch says: "That the woman should bear children was the original will of God; but it was a punishment that henceforth she was to bear them in sorrow, i. e., with pains which threatened her own life as well as that of the child." The language of the apostle: "Notwithstanding she shall be saved in childbearing, if they continue in faith and charity," etc. (1 Tim. ii:15), implies that a patient endurance of this penalty shall contribute to woman's spiritual benefit. (Barnes, *Bib. Dict.*)

But as the curse has been lifted from labor by the coming of Christ so has the curse from childbearing. Proper hygiene and anæsthetics can remove almost all the pains attendant on childbirth among civilized people. It is the highest glory of woman to be a faithful Christian mother.

CHILDBIRTH (child'bêrth'). See **CHILD**, **CHILDREN**.

CHILDREN OF GOD (chil'drên òv göd). See **ADOPTION**.

CHILDREN OF ISRAEL (chil'drên òv iz'râ-êl). See **ISRAEL**.

CHILEAB (kil'e-âb). See **ABIGAIL**; **DAVID**; **DANIEL**.

CHILION (kî-lî'on), (Heb. *כִּילִיּוֹן*, *kil-yone'*, pining), son of Elimelech and Naomi, and husband of Orpah (Ruth i:2-5; iv:9). He is called "an Ephrathite," perhaps for Ephraimite, "of Bethlehem-judah" (B. C. 1360).

CHILMAD (kil'mäd), (Heb. *כִּילְמָד*, *kil'mawd'*), a city of Asia (Ezek. xxvii:23), mentioned in conjunction with Sheba and Asshur, which Rawlinson identifies with *Kalwadha*.

CHIMHAM (kîm'häm), (Heb. *כִּימְחָם*, *kim-hawm'*, longing, pining; *χάμαμ*, *chamaam*).

1. A follower and perhaps a son of Barzilai, the Gileadite, and one who followed David to Jerusalem, after the war with Absalom, and who was enriched by David with a possession at Bethlehem, in consideration of his father Barzilai, whose generous assistance David had experienced (2 Sam. xix:37-40), B. C. 1023.

2. In later times an inn stood here, and it was well known as the starting point for travelers from Jerusalem to Egypt (Jer. xli:17). The inn bore Chimham's name for at least four centuries and may have been the one which six centuries later could not furnish room for two travelers with an infant child (Luke ii:7).

CHINNERETH (kîn'ne-rêth), (Heb. *כִּנְנֶרֶת*, *kin-neh'reth*, harp-shaped), or **CHINNEROTH** (Heb. *כִּנְרוֹת*, *kin-ner-ôth'*; 1 Kings xv:20, "Cinneroth"), one of the 'fenced cities' of the tribe of Naphtali (Josh. xix:35). In the A. V. of 1611, and other early editions, the name is spelt "Cinnereth," which it seems likely was an ancient Canaanite name existing prior to the Israelite conquest, and, like other names, adopted into the Israelite language.

It is also the earlier name of the Lake Gennesareth (which is supposed to be a corruption of Cinnereth), from which we may collect that the town lay on the western border of the lake, and was of sufficient consequence to give its own name to it (Num. xxxiv:11; Josh. xiii:27). It is even supposed that Cinnereth, afterwards Gennesareth, was the earlier name of the town of Tiberias, and under the latter change still extended its own

denomination to the lake; nor is there anything improbable in this conjecture.

The town, or the lake, seems to have given its name, with a slight change to a district (1 Kings xv:20).

On the temple walls of Karnak, at Thebes, Thothmes III (B. C. 1600) gives a list of Canaanitish towns submitting to him among which Chinnereth is found.

CHIOS (kī'ōs), (Gr. *Xios*, *kheē'os*), one of the principal islands of the Ionian Archipelago, mentioned in Acts xx:15.

It belonged to Ionia and lay between the islands Lesbos and Samos, and distant eight miles from the nearest promontory of Asia Minor. It is thirty miles long from north to south, and its greatest breadth ten miles. It is very fertile in cotton, silk and fruit, and was anciently celebrated for its wine. The principal town was also called Chios and had the advantage of a good harbor (Strabo xiv. p. 645). St. Paul's vessel passed it on his last voyage to Palestine (Acts xx:15).

It was one of the seven places that claimed to be the birthplace of Homer; and a much stronger body of tradition speaks in favor of it than for any of the other claimants. Like Cnidus, Cos, Cyzicus, Ilium, Samos, Smyrna, Mitylene, and many other cities of the province of Asia, Chios had the rank of a free city, which implied merely that in certain respects it was administered according to native law, while other Asian cities were administered according to Roman law. (W. M. Ramsay, *Hastings' Bib. Dict.*)

The island is now called by the Greeks Khio, and by the Italians Scio. The wholesale massacre and enslavement of the inhabitants by the Turks in 1822 forms one of the most shocking incidents of the Greek war.

CHISLEU (kīs'leū), (Heb. כִּסְלֵו, *kis-lave'*, Neh. i:1), is the name of that month which is the third of the civil and the ninth of the ecclesiastical year of the Jews, and which commences with the new moon of our December.

It corresponds, in Josephus, to the Macedonian month, Ἀπελλαῖος, *Apellaeus*. As it is now admitted that Chisleu is one of those Persian names of months which the Jews adopted after the captivity, it is fruitless to search for a Syro-Arabian etymology of the word.

The memorable days which were observed in this month were: The feast of the dedication of the Temple, in commemoration of its being purified from the heathen abominations of the Syrians, which was celebrated by illuminations and great demonstrations of joy for eight days, beginning from the 25th of this month (1 Macc. iv:59); and a fast on account of Jehoiakim having, in this month, burnt the roll containing Jeremiah's prophecy (Jer. xxxvi:22, 23). There is some dispute whether this fast was observed on the 6th or on the 28th of the month. It is an argument in favor of the earlier day that the other would fall in the middle of the eight days' festival of the dedication.

CHISLON (kīs'lon), (Heb. כִּסְלוֹן, *kis-lone'*, strong, hope, trust, confidence), father of Elidad, prince of the tribe of Benjamin, chosen to assist in the division of Canaan (Num. xxxiv:21), B. C. between 1618 and 1490.

CHISLOTH-TABOR (kīs'loth-tā'bor), (Heb. כִּסְלוֹת תְּבוֹר, *kis-loth' taw-bore'*, loins of Tabor).

A city on the side of Mount Tabor (Josh. xix:12, 18), which Eusebius and Jerome call *Casalus*, or *Exalus*, and place ten miles from Diocæsarea, east.

It is called Tabor, only, in verse 22, and there is at this day a village so called by the Arabs, at the foot of the mountain. It is, however, probable that this was a fortification higher up the mountain, perhaps on the top of it; whence it might be called the *confidence* of Tabor. It is commonly identified with the modern village of Iksâl or Ksâl, standing on a rocky height west of Tabor. Probably the same as **CHESULLOTH** (which see).

CHITTAH (kīt'tah). See **WHEAT**.

CHITTIM or **KITTIM** (kīt'tim or kīt'tim), (Heb. כִּיִּתִּים, כִּיִּתִּים, *khit-teem'*, *kit-tee-eem'*, an islander).

A branch of the descendants of Javan, the son of Japheth (Gen. x:4). The plural termination of Chittim, and other names in this ethnographical survey (verses 13, 14), renders it probable that the term *son* must be understood, not in the strict sense of that relation. On the authority of Josephus, who is followed by Epiphanius and Jerome, it has been generally admitted that the Chittim migrated from Phœnicia to Cyprus and founded there the town of Citium, the modern Chitti. 'Chethimus possessed the island of Chetlima, which is now called Cyprus, and from this, all islands and maritime places are called Chethim by the Hebrews' (Joseph. *Antiq.* i:6, sec. 1). Cicero, it may be remarked, speaks of the Citians as a Phœnician colony (*De Finibus*, iv:20). Some passages in the prophets (Ezek. xxvii:6; Is. xxiii:1, 12) imply an intimate connection between Chittim and Tyre. At a later period the name was applied to the Macedonians (1 Macc. i:1, and viii:5). Hengstenberg has lately endeavored to prove that in every passage in the Old Testament where the word occurs it means Cyprus, or the Cyprians. On Num. xxiv:24, he remarks that the invaders of Ashur and Eber are said to come not *from* Chittim, but *from the coast of* Chittim, that being the track of vessels coming from the west of Palestine. In Dan. xi:30, he contends that the use of the absolute form, instead of the construct, denotes a less intimate connection with the following word, and that the phrase means, like that in Balaam's prophecy (to which he supposes the prophet alludes), ships sailing *along the coast of* Chittim. The Vulgate translates Chittim, in this passage, *Romanos*, an interpretation adopted by several of the ancient Jewish and Christian writers. After a careful examination, Chittim seems to be a name of large signification (such as our Levant), applied to the islands and coasts of the Mediterranean, in a loose sense, without fixing the particular part, though particular and different parts of the whole are probably in most cases to be understood.

CHIUN (kī'un). See **REMPHAN**.

CHLOE (klō'e), (Gr. Χλόη, tender shoot or herb-
age), a Christian woman at Corinth, some members of whose family afforded Paul intelligence concerning the division which reigned in the church at that place (1 Cor. i:11).

CHOACH (kō'ak). See **THORNS**.

CHOBA (khō'bà), (Gr. Χωβά, *khoh-bah'*), a place mentioned in Judith iv:4, apparently situated in the central part of Palestine, probably the same as **CHOBAL**.

CHOBAI (kōb'a-i), (Gr. *Χοβαί*, *khoh-bah-ee'*, Chō-bai), occurs in Judith xv:4, 5; in verse 5 the Greek is *Χοβά*, *Choba*. The name suggests *Hobah*, especially in connection with the mention of Damascus in verse 5.

CHENIX (kœ'nix), (Gr. *Χοῖνιξ*, Rev. vi:6 marg.) a dry measure holding almost an English quart.

CHORASHAN (ko-rā'shan), (Heb. *כּוֹרָשָׁן*, *kor-aw-shaw'n'*, furnace of smoke).

One of the places where David went to hunt (1 Sam. xxx:30). The towns in this catalogue are all south of Hebron, and Chorashan may, therefore, be identical with *Ashan* of Simeon, but this is quite uncertain.

CHORAZIN (ko-rā'zin), (Gr. *Χοραζίν*, *chor-ad-zin'*).

A town mentioned in Matt. xi:21; Luke x:13, in connection with Bethsaida and Capernaum; not far from which, in Galilee, it appears to have been situated. Jerome makes it a village of Galilee, on the shore of the lake Tiberias, two miles from Capernaum (*Onomast.*, art. Chorozain). Discoveries recently made two miles north of Tell Hūm identify the ruins there, known as *Kerazeh*, with the ancient Chorazin. The ruins cover a large area, and consist of a synagogue, the ornaments being cut in black basalt rock, walls of dwellings, columns which supported the roofs and doorways, some of them in a tolerably perfect condition, and a paved roadway leading to the great caravan-route to Damascus. (See CAPERNAUM).

CHOSAMEUS (kōs'a-mē'us). See SIMON CHOSAMEUS.

CHOZEBA (ko-zē'bā), (Heb. *כּוֹזֵבָא*, *ko-zeb-aw'*, deceitful; Sept. *χωζηβά*, *chozeba*), a town in Judah (1 Chron. iv:22). This word and CHEZIB both probably refer to the same place which is elsewhere called ACHZIB, the place where Shelah was born.

CHRIST (krīst). See JESUS CHRIST; MESSIAH.

CHRISTIAN (krīs'chan), (Gr. *Χριστιανός*, *khristee-an-os'*, follower of Christ).

The disciples of our Lord Jesus were thus first denominated at Antioch, shortly after the time of Paul's conversion, Acts xi:26. This name was given them either by divine direction, or was a term of contempt applied by their enemies. They were known to each other as brethren of one family, as disciples of the same Master, as believers in the same faith, and as distinguished by the same endeavors after holiness and consecration of life; and so were called *brethren* (Acts xv:1, 23; 1 Cor. vii:12), *disciples* (Acts ix:26, xi:29), *believers* (Acts v:14), *saints* (Rom. viii:27; xv:25). It would seem that the name "Christian," which, in the only other cases where it appears in the New Testament (Acts xxvi:28; 1 Pet. iv:16; Comp. Tac. *Ann.* xv:44), is used contemptuously, could not have been applied by the early disciples to themselves, nor could it have come to them from their own nation the Jews; it appears, therefore, to have been imposed upon them by the Gentile world, and no place could have so appropriately given rise to it as Antioch, where the first Church was planted among the heathen. "Its inhabitants were celebrated for their wit and a propensity for conferring nicknames (Procop. *Pers.* ii:8, p. 105). The Emperor Julian himself was not secure from their jests (Amm. Marc. xxii:14). Apollonius of Tyana was driven from the city by the insults of the inhabitants (Philostr. *Vit. Apoll.* iii:16). Their wit, however, was often harmless enough (Lucian, *De Saltat.* 76), and there is no reason to suppose that the name "Christian" of itself was intended as a

term of scurrility or abuse, though it would naturally be used with contempt." (Smith, *Bib. Dict.*).

The saints are justly denominated Christians, because they belong to, obey, and imitate Jesus Christ; and are anointed with the same Spirit of God. To constitute one a true adult Christian, he must be united to Christ as his head; have Christ and his Spirit dwelling in his heart; have Christ's grace implanted in all the faculties of his soul; and must believe, profess, and practice Christ's truths, in conformity to his example and commands.

CHRISTIAN CHURCH OF HISTORY.

(1) The Apostolic Church (A. D. 30-101).

The visible Church consists of the organized believers in Christ and the followers of his life. In secular history the spiritual forces lie largely in the background, but in the life of the Church they have come out boldly into the foreground.

Christ immediately before his ascension commanded his disciples to remain in Jerusalem until they should be endued with power from on high. Without the descent of the Spirit at Pentecost there would have been no impulsive power in Christianity. The organization of the Church took place immediately after the remarkable scenes at Pentecost. Orders of ministers and lay members were established for the preaching of the gospel, the care of the needy, and the building up of the body of believers. The most simple arrangements were made for government, as the believers were as yet but few and confined to a narrow territory. The more elaborate polity was left for the future needs of the Church.

The practical life of the Christians was at once simple and beautiful. It was a type of all the essential qualities which Christ had taught as requisite for pure living and final salvation. Simplicity of faith and intense brotherly love had their practical demonstration in the equal distribution of temporal possessions. The community of goods did not arise from a divine command, but was merely the natural effect of that broad charity which sprang from the love of Christ and the possession of the Spirit. The real majesty of the early Church lay in its spontaneous quality. To crown all, there was a boundless fervor in communicating the gospel. The whole world seemed small. What the apostles had felt and known was now their sole passion. Both the apostle and the unlettered believer, each in his own best way, preached the new life in Christ, that all men might share its sacrifice here and its holy joy hereafter.

In the Acts of the Apostles we have the chief source of information concerning the fields of work of the different apostles. The Epistles of Paul and his associates supply missing links in that more formal history. To these may be added the somewhat vague statements of writers from the second century to the fourth, many of which rest on the oral traditions of the early Church.

Peter represented the Jewish type of Christianity. He was slow to learn that Christianity was designed for all men. He made an evangelistic tour through portions of Asia Minor. At the time of writing his first Epistle he was in Babylon, where there was a large Jewish population. He confined his labors principally to the East.

Paul towers far above all the apostles in the majesty of his character, the scope of his genius, the depth of his learning and the sublime quality of his labors. His call was to the Gentiles. He made three great missionary tours through Asia Minor and Southeastern Europe.

John represented the mediating element between Judaism and paganism. The scenes of his labor seem to have been, for the first twenty years after Pentecost, chiefly in Palestine; later in the valley of the Tigris and Euphrates; then at Jerusalem, whence on the capture of that city by Titus he fled to Ephesus. His residence here was intermitted by his exile to the island of Patmos. He died in Ephesus about A. D. 98, when about one hundred years old.

The labors of the other apostles were widely bestowed. James, the Elder, suffered martyrdom in Jerusalem about A. D. 44. James, our Lord's brother, preached in Jerusalem, and finally died there a martyr. It was believed that Philip labored in Phrygia; Simon Zelotes, in Egypt and the neighboring African coast; Thomas, in India; Andrew, in Scythia, Asia Minor, Thrace and Greece; Matthias, in Ethiopia; Judas, called Lebæus or Thaddeus, in Persia; and Bartholomew, in Lycaonia, Armenia and India.

(2) The Patristic Church (A. D. 101-313).

When Christianity came forward with its strange claims upon the confidence of men there was but little in its exterior which could awaken sympathy. The most despised land had produced it. Its Founder had suffered death on the shameful cross. Its first apostles were of humble origin, and, with the exception of Paul, not one had drunk at the classic fountains. That a new faith, with such multiform disadvantages, should venture upon such a hostile field, where the literature and traditions of many centuries held firm ground, seemed a hopeless task. But the heroism of the first preachers of Christianity was not disturbed by the number or strength of the enemy. The promise of their Founder was the basis of their faith. They wrought on and expected triumph over every foe.

The path of the Greek to mastery had been through all fields of intellectual development. Out of the old Pelagic cradle he had grown to the full grandeur of Attic manhood. The blood of many tribes flowed through his veins, and he had absorbed the strongest and best elements of all.

The growth of their philosophical systems was contemporaneous with their national prosperity. The dealing with the fundamental questions of human existence and destiny by Socrates and Plato reveals a deep moral purpose. The most spiritual of the entire circle of Greek philosophers was Plato. In many departments of his philosophy, such as the unity and spirituality of God and the immortality of the soul, he made, though unconsciously, very near approaches to the truths of revelation. Eusebius said: "Plato alone, of all the Greeks, reached the vestibule of truth and stood upon its threshold."

When Christianity began its contest for the world's possession, the Roman rule was universal. Law was the Roman habit and to govern was the Roman passion. The hold of the old mythology was broken, and a general skepticism as to all beliefs prevailed. But the emperors regarded the preservation of the ancestral faith as the great bulwark of the throne. Political government and fidelity to the prevailing mythology were held to be inseparable. Hence Christianity was bitterly opposed, so soon as its antagonism was discovered. It was seen to be hostile to the elaborate temple service.

The more clearly Christianity came into view, the more stringent became the measures for its suppression. The Christians made no concealments. They absented themselves from the tem-

ples, threw off all faith in the ruling mythology, and openly declared their hostility to it.

The Twelve Tables of the Roman law forbade the existence of foreign faiths within the dominions, but the usage had been to conciliate the conquered provinces by toleration of the existing religions. The appearance of the Christians, however, was the signal for the revival of the old prohibition. The bonds uniting the Christians were close. Their separate services were declared an act of hostility to the country. They were accused of disobedience to the laws and of a spirit ripe at any moment for insurrection. They were charged with immoral practices at their services. All public calamities, such as earthquakes, inundations, pestilence, and defeat in war, were attributed to them. A popular proverb ran thus: "*Deus non pluit—duc ad Christianos!*"—"It does not rain—lead against the Christians!"

From A. D. 64 to 313, until Constantine granted an edict of toleration to the Christians, persecutions prevailed about seventy years. All forms of torture and violent death were inflicted. There was no security at home. The exiles were numerous, but the Christians carried their faith and life with them to their new places of abode, where they built up societies, which in turn became centers for the wider dissemination of the gospel. Christianity had conquered in the realm of political life.

(3) Christianity and the Roman Empire (A. D. 313-768). Constantine declared himself a Christian in sympathy, early in his reign. Before the decisive battle of the Rubra Saxa with Maxentius he claimed to see in the sky the sign of the cross, with the words, *En touto nika*—"By this conquer." He accepted the token as an argument in favor of Christianity, gained the battle for the crown of the Roman empire, and henceforth avowed his belief in Christianity. His vision, though in the line of his sympathies, was probably only a shrewd method to attract the Christians to his support. He carried the labarum, a standard inscribed with the cross, in all his subsequent wars. His policy was at first to make all Christians favor his rule, and by granting concessions to heal the alienation from the empire which the repressive policy of his predecessors had produced.

The edict tolerating Christianity as one of the legal religions of the empire was published in A. D. 313. But in 323 he enlarged the scope of his favor and made Christianity the established faith of all his dominions. Among the chief special acts of Constantine in favor of the Church were: his order for the civil observance of Sunday, his confiscation in the East of pagan temples for Christian churches, his emancipation of slaves, his exemption of the clergy from military and municipal duty, and his ardent promotion of Christian education among his subjects.

It was a happy day when the Christians could walk abroad without fear of persecution. But Constantine claimed the right to supervise religion, as the emperor had always done in the case of paganism. He accounted himself still the great high priest, or Pontifex Maximus, and assumed the prerogative to compose differences, decide questions of religious policy, call ecclesiastical councils, and appoint the leading officers. He had no faith in paganism, but would not suppress it. His line of conduct was to allow it to go on as he found it, and yet to help the Christians to conquer it. He was, of all successful rulers, the most successful trimmer.

Hitherto the Church had been a grand moral unity, held together by ties of love and doctrine. But now it was absorbed by the State. Its frame-

work was lost in the body politic. Freeman says: "The Church conquered the State." This is a great error. Constantine's adoption of Christianity as the State religion was the conquest of the Church by the State. All the moral forces of the Church were now impaired. The bondage of the Church to the State, thus early begun, produced the great evils of the following twelve centuries—superstition, the purchase of office, the angry controversy about theological trifles, the moral corruption of the clergy and the ignorance of the masses.

When Julian came to the throne in 361, for a time he was silent as to his attitude toward the Christians, but he soon exhibited a spirit of refined opposition to all Christian institutions and doctrines. He issued no formal edict against Christianity, but raised barriers on every hand. He was the last ruler on the Roman throne who was hostile to Christianity. He passed into history as Julian the Apostate. The epithet is probably a misnomer, as it is not likely that Julian was ever a real disciple of Christ.

The march of the Roman bishop towards primacy throughout the Christian world was steady. Bishop Leo I. (440-461) was a man of strong intellect, and he did much to clothe himself with power and prestige. But the most eminent incumbent of the Roman episcopate was Gregory, who was called the Great, and ruled A. D. 590-604. Under him every department of the priesthood and the episcopacy advanced in strength.

Roman centralization became constantly greater. Church offices multiplied rapidly, and the close of the early period was the signal for larger measures for Roman primacy. The Bishops of Rome were the real rulers of Southern Europe from the Constantinian dynasty to the reign of Charles the Great.

(4) The Mediæval Church (A. D. 768-1517). The significance of the Middle Ages lies in their transitional character. It was the far-reaching mission of this remarkable period to test the power of Christianity for meeting the wants of new nations; to withstand the shock of all philosophical schools; to sift and preserve the best that remained of the ancient world and pass it safely down for modern use; and, above all, to prove the ultimate power of Christianity to rise above the infirmities of those who professed it, and to lay the foundations of a new spiritual life by a return to the pure, apostolic example. The office of the Mediæval Church was to conduct man from the narrow limits of the pagan to the Protestant world.

The first period of the Mediæval Church extends from Charles the Great to the papacy of Gregory VII.—A. D. 768-1073. This was the time of the full appropriation and unification of the Germanic and other northern elements. Mohammedanism, lying at the border-line between the ancient and the mediæval time, arose as a counter-force to Christianity. Papal supremacy in Church and State culminated. Looked upon in retrospect, there is almost no intellectual or political treasure of the nineteenth century whose precious seeds were not cast into the ready soil between the ninth and sixteenth centuries.

The process of centralization north of the Alps began with Charles the Great—Charlemagne. His rule was the signal of death to the tottering Roman empire. It was also the first prophecy of the ascendancy of the new Gothic nations of the North and of their firm place in the later life of Europe. In him the old classic conditions disappeared and the new political life began its career.

Charles the Great ascended the throne on the death of his father, Pepin, in 768. He divided with his brother, Carloman, the Frankish empire. Carloman died in 771, and Charles the Great united his own empire with that of the rest of the family and claimed rule over all, without regard to the rights of his brother's family. The soil was now prepared for the new European life—the Church and the State working hand in hand for universal dominion. Charles the Great regarded himself as a theocratic lord. His notion of himself was not that he was a mere successor of Constantine or Augustus Cæsar, but of David or Solomon—the head of a vast theocracy. To the pope, Leo III., he made this declaration of their mutual relations: "It is my bounden duty, by the help of the Divine compassion, everywhere to defend outwardly by arms the holy Church of Christ against every attack of the heathen and every devastation caused by unbelievers; and inwardly to defend it by the recognition of the general faith. But it is your duty, Holy Father, to raise your hands to God, as Moses did, and to support my military service by your prayers." Leo III accepted this declaration with the utmost complaisance.

Charles the Great surrounded himself with learned men. Alcuin of England was his adviser in all literary and educational matters. Guizot calls Alcuin the "intellectual prime-minister of Charles the Great."

The final and complete cementing of papal and imperial interests took place under Charles the Great. In the midst of the magnificent Christmas festivities of the year 800 in the city of Rome, Leo III. advanced towards Charles and placed upon his head a golden crown with these words: "Life and victory to Charles Augustus, crowned by God the great and pacific emperor!" As compensation for this important papal service Charles enlarged the papal territory which had been first given by his father Pepin, and placed the papacy itself, as a temporal sovereignty, on a plane entirely new to history.

Charles' successors were a group of steadily dissolving lights. The extinction of the Carolingians in 987 was simultaneous with the complete ascendancy of the papacy. By the time the last descendants of the great Charles were spending their closing days as mere weak functionaries in the palace of Laon, the Church had become proprietor of more than all its old prerogatives, and was holding its new territory with a grasp which relaxed only when its arm was stretched for more.

(5) The Crusades (A. D. 1096-1270). The origin of the Crusades is to be found in the occupation of Palestine by its Mohammedan conquerors. The pilgrims from Europe cherished the warmest attachment to the sacred places. The Mohammedans not only occupied them, but persecuted the pilgrims. The sanctuaries were profaned, and the venerated patriarchs were thrown into prison. Christian merchants from Pisa, Amalfi, Genoa and other rich Italian ports were fortunate if they escaped with their lives. The evil reports came back to Europe, and then began a series of military expeditions against the Mohammedans. These were called Crusades because of the cross (*crux*) worn by the warriors.

Pope Gregory VII. was the first, it is believed, who conceived the idea of sending from Europe an armed expedition, not only to punish the Mohammedan rulers, but to occupy and rule the country. His successors, Victor III. and Urban II., indulged the same strong hope. All that was wanting were popular leaders who would fire the

heart of Christian Europe. These appeared in Walter the Penniless and Peter the Hermit. The latter had been a soldier under the counts of Boulogne, but forsook his military career, made a journey to Palestine, and saw the indignities suffered by the pilgrims. He returned to Europe, traveled through Italy and France, and aroused the people to a frenzy of indignation against the Moslems. He was a dwarf, wore neither shoes nor hat, and rode an ass. His appeals were irresistible. Multitudes regarded him as the representative of a holy cause, and through him 40,000 men joined the first Crusade.

The varied fortunes of the Crusaders furnish a striking picture. The best blood of Europe was boiling in sympathy with Christians in their aspirations to kneel beside the Holy Sepulcher at Jerusalem and rule over the land in which Jesus had lived. Six different armies constituted the first Crusade. They numbered six hundred thousand people, who were led by Godfrey, Hugh the Great, Tancred, Raymond of Toulouse, and Robert of Normandy. This Crusade, begun in 1096, resulted in the capture of Jerusalem within two years, and in making Godfrey of Bouillon king of the sacred city.

In the next Crusade St. Bernard was the Apostle. Louis VII. of France and Conrad III. of Germany led one million two hundred thousand men against the Saracens. The great object was to reduce Damascus, as a support to the kingdom of Jerusalem. It was a failure, and only the mere fragments of the armies reached Europe again. Saladin, the great Mohammedan chief, conquered Jerusalem in 1187, and this was the signal for the third Crusade to rescue the Holy City and the entire country. Germany under Frederic Barbarossa, France under Philip Augustus, and England under Richard Cœur de Lion united their forces. Through division among the leaders this also failed.

The fourth Crusade led by the Knights of St. John, and the fifth inspired by the authority of Pope Innocent III. and the fervor of Fulk of Neuilly, but afterward diverted by the Venetian doge Dandolo to the conquest of Zara and the establishment of the Latin empire of Constantinople, also ended in disaster.

The sixth Crusade (1228) under the direction and through the diplomacy of Frederick II of Germany proved a success. Palestine was ceded to the emperor, and became a Christian land; but was lost during the seventh, which followed in 1248, under the leadership of Louis IX. of France. The eighth and last Crusade (1270) was also under the guidance of Louis IX. of France. It proved the final failure of the series. Europe was exhausted and the cause was lost.

The Crusades seem to have saved France, Central Germany, Scandinavia and even Britain from the hand of the Saracen. All of Central and Western Europe had been torn up by a feudal and predatory system. The Crusades broke up this system and bound the people together by a common law. When the last Crusader came home from Palestine he found himself a member of a broad commonwealth and not the head of a clan. The cruelty of rulers was arrested. The voice of the people was heard for the first time, and kings learned that there was a limit to their authority. Commerce took larger and freer shape. The far Eastern countries were brought into close relationship with the Western.

(6) **The Eastern and the Western Church.** Many things early contributed to give pre-eminence to the bishop of Rome. The Church at

Rome was firm in the midst of many heresies. After the overthrow of Jerusalem it was believed to be the oldest apostolic Church. In the giving of alms, in missionary zeal and in devotional purity, the Roman Christians had no superiors. The certain residence of Paul in Rome, and the already growing impression of Peter's sojourn there, were important apostolical associations which clothed the Roman society with great sanctity. By the middle of the second century there was frequent mention of the primacy of Rome. So soon as this intimation was expressed strong words were spoken against it.

The resisting force lay in the Eastern Church, where Antioch was leader. But there was little cohesion in the East. It was regarded as provincial, while in spiritual affairs Rome came constantly into more prominent leadership. The protests from the East after a time received little or no attention. When Firmilian, the bishop of Cappadocian Cæsarea, dared to charge Stephen of Rome with boasting of episcopal superiority he was laughed at in the Western metropolis.

When Constantine made the obscure Byzantium (thereafter called Constantinople), which had been subordinate to Heraclea, the capital of Thrace, his vast capital and the center of imperial authority, much advantage to the Church was expected. But when he passed away, there was little purity left. The palace became a nest of intrigue and revolution. But the Roman Church life had the equipoise of power. It had neither the wish nor the talent for theological invention.

The divisions of the Eastern empire, the decline of moral life, the universal spread of controversy, and particularly the pre-eminent ability of several of the bishops of Rome, were calculated to advance the claims of that patriarchate above all others. Gregory the Great devoted himself to the purification of the life of the Church and the enforcement of monastic discipline. He was especially active in his encouragement of missions. Under him the authority of the Roman bishop advanced far beyond its former dimensions. He created the papacy of history. He preserved amicable relations with the emperor, and yet held firmly to his ecclesiastical independence.

From the middle of the eleventh century to the thirteenth the papacy grew into enormous proportions. There never floated before the mind of Julius Cæsar or Trajan a larger empire than that to which Gregory VII (Hildebrand) and other occupants of the Roman see aspired.

The doctrinal divergence between the East and the West was first perceptible in the different teaching on the divinity of the Holy Ghost. The Council of Constantinople decided in 381 that the Holy Ghost is equal in essence with the Son, and that both are consubstantial with the Father. The Western teaching, guided chiefly through the clear and logical intellect of Augustine, held that the Holy Spirit proceeds from the Father and the Son. In 589 the Toledo Council, in accordance with this view, added to the symbol of Constantinople the term *Filioque*—"and from the Son."

The Eastern Church held that the patriarch of Constantinople was equal in rank to the Roman bishop. At Rome this claim was indignantly rejected.

The complete schism took place in 1054. Constantine Monomachus, the Byzantine emperor, having in view a war, applied to the Roman pope for friendly support. This overture awakened the wrath of Michael Cerularius, patriarch of Constantinople, and of Leo of Achrida, metropolitan of Bulgaria. They wrote a letter to the bishops

of the Latin Church, charging it with grave doctrinal errors and urging it to renounce them. This letter reached Pope Leo IX. He was intensely excited, and bitter letters passed between Rome and Constantinople. The pope sent three delegates to the latter city. But only a fiercer animosity ensued. The signal of an open and final rupture was given by the issuing of a public excommunication of the patriarch by the legates, in the Church of St. Sophia, and their withdrawal to Rome.

During the Crusades, which united all Christendom in their chief purpose, and until the middle of the fifteenth century, strong but futile attempts were made to restore the unity of the East and the West. But when the Byzantine empire went down in 1453 all serious and general efforts for union ceased.

(7) Mediæval Missions in Europe. The spread of Christianity continued steadily. Columban and Gallus from Britain were the pioneers in evangelizing the Germans, and were followed by Willibrod and Winfried, both Englishmen. Winfried, or as he is better known under his Latin name Boniface, was the great apostle of Germany, where he organized the Church about the middle of the eighth century. He was martyred among the Frisians.

From the centers in Germany and France, from Ireland, the "Holy Isle," and from England, missionaries co-operated in founding missions among the heathen dwelling in the remoter parts of Europe. The monasteries kept up a close brotherhood. Monks went out from them, threaded the forests and climbed the mountains of rude and barbarous peoples, and spent their lives amid all possible dangers, in their endeavor to extend Christianity. Many of them fell by violent hands. Sometimes the rulers were the first to accept the gospel, but often it ascended from the poor and the lowly, step by step, until the throne was reached and Christianity was publicly proclaimed as the faith of the State.

Harold, king of Jutland, was aided to the throne of his fathers against his competitors by the Carolingian emperor, Louis le Débonnaire. Harold and his queen were then baptized in the Cathedral of Mentz in 826, and ever afterwards befriended the gospel. Anskar, a monk of Corbey, accompanied them back to Denmark, with a view to organize the Church in that country. A rebellion was excited against Harold, and he was obliged to flee from the country. Anskar was also driven out, but rather than give up his missionary work he turned his eyes toward the still more savage Sweden and determined to plant missions there.

In 831 Anskar, with Witmar, his brother monk, proceeded to Sweden with gifts for the king of the country. While on their voyage they were attacked by pirates, lost all their possessions and barely escaped with their lives. They reached Birka on the Malar Lake; the king welcomed them, and in a short time his counsellor, Herigar, became a Christian convert.

Anskar went to Rome, was consecrated an archbishop, and departed to preach the gospel to the northern nations. He made a second visit to Sweden in 855. He died in 865, but before his death saw Christianity taking firm hold throughout Scandinavia. He was one of the most beautiful characters of the whole mediæval period.

The first positive accounts we have of the introduction of the gospel into Norway is that it was carried thither by some seafaring youth. Olaf the Thiek, king of Norway, called St. Olaf, was the first to organize the Church on a permanent basis in 1019.

The gospel reached Iceland from Norway, and during the tenth century was fully established there by Olaf Trygvesen. From Iceland the gospel was carried to Greenland. Even from these remote regions Rome was strenuous to gather gifts for her treasury. The Greenland Christians paid their tithes to Rome in walrus teeth.

Cyril and Methodius, two Greek monks, were the first to introduce the gospel among the Bulgarians and also among the Moravians. Cyril was a theologian and Methodius a painter, and the latter's picture of the Day of Judgment had as much to do with the conversion of the people as the arguments of the former. They made a Slavonic version of portions of the Scriptures. During this formative period the Bulgarian Church had its relations with Rome.

The Russian princess Olga embraced Christianity in 955. Her son Swiatôslav was proof against all her importunities to follow her example. Her grandson Vladimir, however, accepted Christianity and caused churches to be organized and the people to be instructed in the use of the Slavonic Scriptures and liturgy.

Poland received the gospel through Christian refugees from Moravia, when that kingdom was broken up. Hungary first became acquainted with Christianity through the instrumentality of certain of her princes while visiting Constantinople. The wild tribes of the Wends between the Saale and the Oder, after an unsuccessful attempt by Gottschalk in 1047, were brought over to the Christian faith in 1168 when Absalon, bishop of Roeskilde, burned the last Wendic idol.

(8) The Reformation. Martin Luther (A.D. 1517-1545). From the eighth century to the middle of the eleventh, the German people became evangelized and gave full promise of their future large place in universal Christian thought and life. At the end of the Middle Ages the Saxon and the Latin Church confronted each other. The Latin represented the past; the Saxon, the future and the permanent. The force which destroyed the old and strong Roman conditions was titanic. The Saxon hammer was irresistible. The Germans of the North were kinsmen to the Saxons and Angles of Britain. Wycliffe and Luther were from a common cradle of Teutonic honesty and liberty.

Protestantism was an oak of young and vigorous growth in the first quarter of the sixteenth century, but its roots lay deep in the soil of the twelfth and the intervening centuries. Among those whose work directly contributed to the Reformation are, in France: Hugo (1097-1141) and Richard (died 1173), both of St. Victor, Peter d' Ailly (1350-1425), John Charlier Gerson (1363-1429) and Nicholas Clémanges (1360-1440); in Germany Master Eckart (died about 1328), John Tauler (1290-1361), and Henry Suso (1295-1365); in the Netherlands, John Ruysbroek (1293-1381) and John of Goch (1401-1475); in Bohemia, John Huss (1373-1415) and Jerome of Prague (died 1416); in England, John Wycliffe (born about 1315); and, in Italy, Jerome Savonarola (died 1498).

The Reformation had two characteristics—one national, with all the individuality of race and land that might be expected; the other cosmopolitan, having general fibre and color, always the same, whatever the country or people, from Norway to the Alps, and from Transylvania to the Bay of Biscay. The Reformation has proved to be the chief turning-point in modern history. It is that great religious and intellectual revolution which marks the boundary line between the Middle Ages and the Modern Period.

The call for regeneration was deep and loud. Superstition had become interwoven with the pure doctrine of the gospel. The morals of the clergy, from the papacy down to the humblest monks, had become corrupt. The highest ecclesiastical offices were reached by vicious means. The common people were purposely kept in ignorance.

Against these evils, ruinous at once to intellect and soul, the Reformers made their bold protest, and called upon the people to rally to their standard. Their aim was, at first, a purification of the Church within itself and by its own servants. This proved a total failure. The next step was to withdraw from the fold and establish an independent confession and a separate ecclesiastical structure. This succeeded; and the result is that vast and aggressive sisterhood of Protestant Churches which exists to-day in all the advanced countries of the world.

All the Teutonic nations had been ripening for the great ecclesiastical revolt, and Central Germany now became the theater for the Reformation. The popular mind was so fully ready that the only great need now was a man of sufficient courage, ability and singleness of purpose to become the representative of his generation. Luther responded to the universal aspirations for a leader to guide surely and safely into the new paths.

Martin Luther was born in Eisleben, Saxony, November 12, 1483, and died in the same place February 18, 1546. His father was a miner of humble tastes and scanty means. His mother used to carry on her back the wood necessary for the comfort of the humble home. In this son were the calm judgment, the solid sense, and the sturdy valor of the colder blood of the North. But with these was blended the current of a gentle, cheerful and tuneful nature, a sympathetic and social feeling, which stood him in good stead in his later struggles.

He was educated at Magdeberg, Eisenach, and the University of Erfurt, and in 1508 he entered upon his great career as a professor in the University of Wittenberg. On October 31, 1517, he nailed his Theses to the door of the Schlosskirche of Wittenberg, and then began the storm which lasted until the day of his death.

(9) The Reformation in England. (A. D. 1509-1603.) To England belongs the honor of having discovered the need of a universal religious regeneration in Europe. The beginnings of reform centered in Wycliffe, a student and afterwards a professor in Oxford. His first position of hostility to the prevailing doctrines was his denunciation of the mendicant monks, who went up and down the land, extorting money from the people, and preaching against learning and progress in every form. He became master of Canterbury Hall, the Christ College of a later day. The Pope issued a bull in 1370 to eject Wycliffe, who replied in a ringing tract. Edward III, the king, took up the cause of Wycliffe, who was appointed a royal chaplain and rector of Lutterworth. Wycliffe gained a clearer view of the corruptions of the Church and preached boldly against them. Twice he was tried and escaped, yet not without being forbidden to preach and write. But he continued to hurl anathemas against willful pope and deluded priests. He died a natural death at Lutterworth.

Wycliffe's greatest service to the Reformation was his translation of the Bible into English.

While the people were fully ready for religious revolt, the first organized rupture with Rome came from the king, Henry VIII. Many learned Protestants from the Continent settled in Oxford and

Cambridge, and conducted discussions in favor of the Reformation. Among them were Ochino, Peter Martyr, Martin Bucer, Paul Fagius, and Tremellius. But greatest of all the men from abroad was Erasmus, whose Greek New Testament found a ready entrance into England.

Henry's grievance against Rome was purely personal. He resolved on a divorce from Catherine of Aragon and to marry Anne Boleyn. To this the pope refused his consent. This brought the question to a crisis, and Henry broke the ties which had hitherto bound him to the papacy.

John Colet (1466-1519) and Sir Thomas More (1480-1535) were of great influence in bringing about the revolution in the popular mind. Thos. Cranmer, despite his time-serving pliancy, was of all men of his time the most powerful in hastening the English reform, and the publication of the Bible in the language of the people was the most powerful single agency in the spreading the leaven through the nation.

The young Edward, who succeeded Henry, was a Protestant, but he died early, and was succeeded by Mary, a rigid Roman Catholic. Cranmer, Latimer and Ridley were thrown into the Tower. Cranmer, in a moment of weakness, signed a recantation, but soon withdrew it. He, with Latimer and Ridley, was burned at the stake in 1556. A low estimate of the number of persons burned places the martyrdoms at two hundred. The number would have been much greater had not many leading Reformers fled to the Continent.

Elizabeth succeeded Mary in 1558. She at once recognized Protestantism as the national faith, and Protestants were placed in charge of all the churches. Among the exiles who now returned were the Puritans who looked upon the elaborate ceremonial, the episcopacy, the use of robes; and the mild observance of the Sabbath as wretched remnants of the evil times. They refused to observe the new order and would establish one of their own in harmony with the example of the Genevan Church. Elizabeth took strong ground against the Puritans; but despite all its divisions English Protestantism became strong and permanent under Elizabeth.

Robert Brown, born about 1550, was a student at Cambridge. While there he adopted and advocated Puritan views. His followers were alike firm in their hostility to the Church of England and the Church of Rome. They also opposed the synodal and presbyterial government of the Presbyterians and were for that reason called separatists or Independents. The Brownists were persecuted by ecclesiastical courts. Unable to circulate their writings or hold public services, they fled from England and organized a church in Amsterdam, and afterwards in Leyden. In the latter place John Robinson was their pastor. They resolved on leaving Holland and set sail for the New World. They landed at Plymouth, Massachusetts, in 1620, and became the chief factor in the civil and religious development of the colonies and the United States.

(10) Results of the Reformation. The good fruits of the Reformation are many and widespread. Hitherto but little liberty had been granted to the common people. All the political convulsions brought small return to them. The effect of the Reformation was to create in the people a thirst for liberty and for a higher and purer citizenship.

Wherever the Reformation extended it made the masses more self-asserting. Social respect and order were introduced and subjected to firm regulation. Nations were taught a higher regard for

each other's rights, and kings learned that their subjects were no longer mere playthings or serfs. In some countries the aspiration for independence took organized shape. The Reformation became the mother of republics.

The Dutch Republic was born of the efforts of the Protestants of the Netherlands to secure liberty of conscience. No thought of civil independence animated the Dutch at the outset. They fought simply for liberty of doctrine and worship. But once in the current they were carried on. They builded more wisely than they knew, and so founded a nation whose commerce covered every sea, whose discoveries reached the antipodes, and whose universities became the pride and wonder of Europe.

The American Union owes a large measure of its genesis to the European struggle for reform. The Germans who came with Penn to this country were strongly attached to the doctrines of Luther, and immediately began to build churches and establish schools in that interest. The Dutch who settled in New York and the adjacent country brought with them a fervent love of Protestantism, which had been the creative force of their nation at home, and which their fathers had bought at the price of their treasure and blood. The Swedes of New Jersey and Delaware were animated by the same ardent spirit which had burned in their hearts in their ancestral home. The Huguenots, who settled in many places along the coast from Massachusetts down to Georgia, found that safe asylum which was denied them at home because of their fidelity to conscience. The Pilgrims, who came over in the Mayflower and became the strongest nucleus in the development of our Northern colonies, were fugitives from oppression in their native England. All these elements, the finest wheat from the trampled harvest-fields of Europe, combined on these shores and became a unit in this Western planting of evangelical Christianity.

The promotion of learning was not the least benefit conferred upon the world by the Reformation. Cultured men were its first advocates. The universities were the cradles of Protestantism. The translation of the Scriptures had the effect to formulate and solidify the languages as no other literary movement had been able to do it. Wycliffe's Bible preserved the Saxon tongue, and our Authorized Version, or King James' Bible, shows its constant dependence upon his translation. Luther found German a mere conglomeration of rude and coarse dialects. In his translation of the Bible he grouped the best and purest idioms and for the first time made the German language a unit.

Universities took on new life and were multiplied as an immediate fruit of the Reformation. The University of Leyden was the first creation of the new nation, after the siege of that city was raised and the Spanish troops withdrawn. During the centuries since the Reformation more than twenty universities, three-fourths of which are Protestant, have been founded in Germany alone. Holland has built up in addition to the University of Leyden five other universities, all of which are the direct results of her Protestantism. Not until now, and only as a fruit of the Reformation, was the gospel generally preached in the popular language. When the Reformation was once in progress the printing press was free. The study of all the languages became a new fascination which no edict could destroy. Public schools, though crude at first, were introduced in Germany, directly through Luther's labors. The intermediate schools, between the primary and highest educa-

tion, were soon established. The German gymnasium of our times owes its real origin to the period of the Reformation. Wherever the Reformation triumphed and became a permanent force, the cause of education, good morals, and political liberty advanced securely and rapidly.

(11) **The American Church—Colonial Period. (1492-1783.)** Europe in the sixteenth century was in convulsions. The reformatory movements reacted on the political life of all the central nations. Every land was divided into factions. One class, receiving its inspiration from Rome, wished to continue the old order, with the pope as practical sovereign. Another class, craving liberty and an accommodation to the new order, was willing to break loose from the Roman see, but desired to retain many of the Roman usages. A third class saw nothing but antichrist in Rome, and found hope only in casting off every reminder of papal doctrine and custom.

The transfer of the conflicts of Europe to America marked the new era. Whenever a colony came to America, it no sooner settled in its new habitat than it revived, under broader conditions, the struggle in which it had been engaged in the mother country. The Cavalier of the Virginia Colony surrendered none of his old attachment to the Church of England. The Plymouth Pilgrim was even more intense in his revolt against both Romanism and Protestant Episcopacy than he had been when a Brownist at Scrooby, a parishioner of Robinson at Leyden, or a Pilgrim on the Mayflower. In the New World were fought out by contestants, fewer in number and more widely scattered, the issues which had driven the colonists to the Western wilds.

The religious motive was supreme in the mind of all the best colonists. To enjoy the free exercise of conscience was the Pilgrim's one passion, whose bright flame no distance from native land, nor stormy seas, nor rigor of climate, nor danger of death by savage hands, could quench. Our first settlers came as Christians, lived as Christians, and planted the religious principles as the richest inheritance for their posterity. They brought the best aspirations of the Old World and determined to realize them in the New. The hour of American colonization was the fittest one in all modern times for the New World to receive the best which the Old had to give.

The territorial distribution of the colonists was not less providential. The acquisitions of the Spanish knights and Jesuit fathers who accompanied them were confined to a doubtful settlement in Florida, to the great province of New Spain (Mexico), and to a strip of the Pacific coast. The French Roman Catholic explorers and the Jesuit fathers were limited to Indian evangelization and an uncertain territory along the St. Lawrence, the northern chain of lakes, and the Mississippi valley. The great field of English colonization lay between these two. It is the temperate belt of North America—the region which nature had fitted for the most aggressive mission in Western civilization.

Spain now holds no foot of land on the North American continent. Louisiana passed from her hands into French possession, and in 1803 the French sold it to the United States. The French had fair to own all Canada. The ownership was at last reduced to the fortunes of one battle—that of Quebec. The pivotal hour of all American Church history was that in which the brave Montcalm met his fate at the hands of the victorious but dying Wolfe, on the plains of Abraham, September 13, 1759.

This culmination of a long and bitter series of wars between France and England made the English the possessors of that immense tract lying between the United States and the polar seas and extending from the Atlantic to the Pacific. The war with Mexico, closing in 1848, gave the United States the great State of Texas, with its vast area of two hundred and seventy-five thousand square miles.

The fifth decade of the eighteenth century was marked by the "Great Awakening" which began under the preaching of Jonathan Edwards at Northampton, and swept through all the colonies. A general spiritual decline marked the religious life of the Colonial Church from about 1765 until the end of the century. The absorbing topic was the struggle for national independence. All spiritual interests languished. At no time in the history of the American Church was the condition so serious. It was a question, How would Christian people act with the boon of a nation in their hands? Until the beginning of the nineteenth century it was doubtful whether the national independence would prove a spiritual blessing or a curse.

(12) The American Church—National Period. (1783-1898.) The Church had been a part of the colonial system. The citizen had been taxed for the support of the Church. When the Revolution severed the civil bonds with England, a strong tendency at once set in towards the separation of the Church from all political government. The people began to insist on placing the support of the Church, in all its departments, upon the voluntary judgment of its adherents. This assertion of the voluntary principle in ecclesiastical support and government was one of the most original of all the great phenomena of this initial stage of our national life.

Virginia was the scene of the first great movement to carry into practical effect the voluntary principle. To the Baptists belongs the honor of being the herald. Thomas Jefferson, who in religious matters was to all intents and purposes a Frenchman, has the honor of being one of the earliest and most consistent advocates of religious freedom.

The close connection of the colonies with France during the Revolutionary War favored the importation of the infidelity then rampant in that country. The churches were demoralized and could offer no sufficient opposition. The new infidelity spread like wildfire. Edition after edition of the infidel publications of the old world were sold in America. French thought became fashionable. Many public men were smitten by the contagion.

The young men of the colleges were peculiarly susceptible to the baleful influences of the rising star of unbelief. The man who did more than any other, perhaps, to stay this tide and bring the people back to saner thoughts was Timothy Dwight, president of Yale College from 1795 to his death, in 1817. From the day that the young president faced his students, infidelity has been a vanishing force in the history of the American people. This overthrow was mightily helped by the great revival which visited the country at that critical time.

This revival of 1797-1803 had several important centers of operation. The movement began almost simultaneously in widely separated regions and spread until the intervening spaces were covered by its effects.

The colleges shared largely in its benefits. The reclaiming of the colleges from infidelity to Chris-

tianity had an immense significance. Never since has religion been at so low an ebb in these centers of intellectual life; and from these college revivals have come some of the most earnest and successful Christian workers the Church has ever known.

This revival also imparted a great impulse towards evangelization, especially in the West, where the results are still appearing to the present time. Other advantages to the Church grew out of that wonderful work of grace. The remnants of the Half-way Covenant were swept away. Missions among the neglected at home, the Indians and negroes, were revived and organized anew. The founding of Sunday-school unions, Bible and Tract societies, and other benevolent institutions, sprang out of the warm inspiration of this great spiritual ingathering.

The Roman Catholic preoccupation of the West and South gave abundant promise of a permanent population of adherents to that communion. From the headwaters of the Mississippi down to the Gulf, and along the tributary rivers, there had been settlements of the Jesuits, which preserved the Roman Catholic spirit after the most of the missions had been broken up. The population was in large part French, with a Spanish admixture, and the Roman Catholic faith predominated everywhere.

The Protestant current westward did not take the shape of a religious movement. It was simply the expansion of the solid and permanent population east of the Alleghenies. The great religious currents moved along the parallels of latitude westward with a steadiness and persistency which belong to the rarer spiritual phenomena of modern times.

The moral significance of the Western and Southwestern occupation by the Protestants of the United States is vast. We are too near the scene, and the time is too recent, to comprehend the grandeur of the achievement. Centuries must elapse before the transformation can be seen in all its meaning and proportions. Our religious literature, the pulpit, our denominational treasuries, have all been enriched beyond calculation by the contributions which the West has made with liberal hand and sublime faith.

J. F. H.

CHRISTIAN ENDEAVOR. See article on page 1755.

CHRISTIANS (krī's'chans improperly pronounced christ-ians), a denomination usually styled "The Christian Connection" or sometimes "The Christian Church."

Among the minor denominations in the United States and Canada, there is a people rejecting all names but *Christian*.

(1) General Position. Their real attitude toward the religious world is such that some of their own ministers contend that they are not a denomination, except in the sense of being named. Speaking as one of them, the writer states their general position as follows: "The Bible is our only rule of faith and practice, to the exclusion of human statements, creeds or confessions; Jesus Christ is our only leader; we accept no name but Christian; Christian character is our only test of fellowship; individual interpretation of the Scriptures is allowed to everyone; and we seek the union of the followers of Jesus." This last purpose has been expressed more prominently within a few late years than before. In the beginning, the assertion was rather of liberty.

(2) Origin. On November 1, 1792, a General Conference of the Methodist Episcopal Church was held at Baltimore. During the session Rev.

James O'Kelly, a presiding elder, offered a resolution providing that ministers dissatisfied with the charges to which they were assigned might appeal to the conference, and if the appeal were sustained, the bishop should make another assignment. The resolution was lost, after animated debate. The next day O'Kelly and about thirty other ministers resigned from the conference. The next year, Christmas day, they met at Manakin, N. C., and organized a body known as "Republican Methodists," not intending fully to cut themselves off from the Methodist Church. But within a year, at Lebanon Church, Surry county, Virginia, at the suggestion of Rev. Rice Haggard, they voted to bear only the name "Christian," to take the Bible as their only creed, and to allow each church to govern itself.

In the year 1801, Rev. Abner Jones, trained among the Baptists, organized the first Christian church in New England, at Lyndon, Vt. In 1801 and 1802, occurred the great Caneridge revival, in Kentucky, following which Barton W. Stone, David Purviance, and others of the Presbyterian Church, came out on the ground virtually occupied by the brethren of the east and south already spoken of. These western ministers were largely influenced by the conduct of many young converts of the revival, who, when solicited to unite with the churches, hesitated; expressing the wish to remain simply Christians, to take Christ for their only leader, and the Bible for their only creed, and to have equal fellowship for *all* Christians.

These three bodies of people, in their several districts, were ignorant of the springing up of a people in any other locality teaching the same doctrines. A few years later, when learning of each other, they recognized their oneness, and organized somewhat loosely. There was thus what was practically a simultaneous revolt against the three great American churches; against the Methodists in North Carolina and Virginia, against the Baptists in New England, and against the Presbyterians in Kentucky and Ohio. They are the manifestation of an important religious movement that is wholly American. Yet the common phrase, "the Bible our only creed," ever drives us for inspiration, for law, and for doctrine, to Palestine. Though we sprang up in the wilderness, we refer to chapters xi, xii and xiii of Revelation for explanation of that fact. Yet though our origin has been largely rural, our history has shown a spirit of leadership not merely in early home missionary activities, but a pioneer-ship in subjects of public thought. We established the first religious newspaper; we established the first college (Antioch) giving fully equal rights and honors to both sexes, etc.

J. J. S.

CHRISTIANITY COMPARED WITH OTHER RELIGIONS.

We believe that Christianity is the absolute religion, and that it alone can become universal; but we cannot believe this intelligently, until Christianity is compared with other religions which have given light and life to millions of men and women, and from which have sprung civilizations with their splendid trophies of literature, science, art, morals, as well as great political and industrial systems. For the first time in history, all the families of mankind can become acquainted with each other and investigate the secrets of each other's lives. In these circumstances, comparison of religions cannot be escaped. Faith welcomes, instead of shrinking from, the necessity.

(1) **Brahmanism.** Little need be said concerning Brahmanism. It is the religion of the great majority of the people of India, and is essentially local, rather than universal. It cannot live out of India. The strength and the weakness of its doctrine of God is that according to it God is in everything and is everything. "Everything, from the lowest estate of a straw to the highest estate of a God, is Brahmâ." It thus admits His unity, but denies His character and personality. There is, therefore, no basis for a fundamental distinction between morality and immorality. Caste, which constitutes its great strength, is also a fatal weakness, because, though originating in historical necessities, it is essentially anti-national and anti-social. Mankind now will not accept a religion which is inconsistent with the truths of the unity of the race, its liberty, the equality of its members before God and before the law, the right of the meanest to rise to the highest place and to the fullest self-realization, with the hope of progress to infinite horizons. Brahmanism denies the Fatherhood of God and the brotherhood of man. Its compact structure is now being honey-combed by the thousand influences of the government, the courts of justice, the literature, the education, the social, sanitary, economical and physical science of a Christian people, as well as by direct missionary enterprise. Its fall is as certain as anything future can be, though its place will not be taken by any of the existing Christian organizations. When India absorbs the spirit of Christ, it has intellectual and spiritual strength enough to develop a theology and a church suited to its own soil. Native churches in India are, as yet, little better than exotics.

(2) **Buddhism.** To Gautama, even before he became Buddha, or Enlightened, the ideal man was the dignified ascetic, free from all ties and relationships, and holding out his bowl for rice, uncaring whether it was filled or not. This mendicant, the flower of Brahmanism, was seeking for liberation from self and absorption into the Supreme existence. All other men were subject to vanity and delusions. No wonder that to a noble nature, imbued with this conviction, the full truth should be revealed, after long study and meditation, that man himself is greater than his appetites, passions or desires; and that by rising superior to these he can attain to a liberation which means escape from the danger of rebirth. Before the simplicity and power of this way of salvation—salvation above all from the craving for continuous personal life—sacrifices and penances lost their efficacy and the Veda its supernatural authority. His simple and sublime teaching was that the true greatness of man, in one word his life, consists, not in the abundance of the things which he possesses, but in himself or in moral culture; in Christian language, he learned that the kingdom of God is within and that it is all-sufficient. This spiritual truth transfigured him. It took possession of disciples who gathered round him from various castes, and it filled them with such power that India became transformed. Never was a grander testimony on a great scale borne to the might of the Spirit. Not only at its beginning, but when India was ruled by Buddhist kings, it disdained the use of carnal weapons of every kind, and it continued to be a reforming force for centuries. Missionaries went forth, North, South, East and West, filled with a holy enthusiasm which enabled them to win in time all Eastern Asia to the Faith. Before the truth of man's essential greatness and the living witness borne to the truth by converts of every caste, from the Brahman to the Chandala,

the iron bands prescribed by caste fell to the ground. The equality and fraternity of men were recognized.

How then shall we explain the failure of Buddhism? For it has failed, more completely than Brahmanism, to meet the spiritual necessity of any race except the Mongolian. India rejected a doctrinal system which had no room for the ideas of sin, atonement, and the significance of life which Brahmanism had tried to express. Its home since has been in countries of a lower type of civilization, such as Burmah, Siam, Thibet, China, Corea and Mongolia. The Aryan and Semitic peoples will never adopt it, for they have truer conceptions of God, of the worth of human life and the significance of the world, than any which it presents. The fundamental weakness of Buddhism is that it denies all reality. According to it, there is no God and the supreme aim of man is to cease to be. There is no need of a Creator, for there is force in the world, and as no force can ever be lost, why should it not have been from the beginning? What we call the soul does not survive death. "He is a heretic who holds that man has a permanent soul or self separate from the body." The consequences of our past, hypostasized as Karma or Act, alone survive, and round this fancied Karma new bodies repeatedly gather, until Nirvana is attained. No such uncompromising system of pessimism has ever been successfully preached. Therefore it had to fail, though successful for a time, partly as a development and partly as a recoil from Brahmanism. (See *BUDDHISM AND CHRISTIANITY CONTRASTED*.)

(3) **Confucianism**, like Brahmanism, is essentially a local, rather than a universal religion. Rooted in the soil, the history and the ideals of China, it cannot extend far beyond its boundaries. Unlike Buddhism, it plants itself firmly on this world, considering it and the relations of life everything. Thus practically ignoring the spiritual, it left a void, felt even by a materialistic people, which Buddhism—invited into the country—filled in a crude fashion. This explains why almost every Chinaman is both a Confucianist and a Buddhist. A more striking confession that each religion is one-sided could hardly be given.

To Confucius, society was the great reality; and as social disorders abounded in his time, he had to look for a remedy. He found the remedy in the wisdom of the past, and to the task of compiling and editing its precious records he gave his whole strength. His influence on China, through his disciples, and still more through his classics, is the greatest illustration history gives of what can and what cannot be done by education, and by law, custom, institutions, and ritual. He believed that man is good by nature and that if only a sound education be given and a right example set by his superiors, he will assuredly be moral. Education therefore lies at the foundation of society and the governing classes are the consummate flower of the educational system. They have been drilled in ethics from their youth and the inculcation of duty is backed up by examples from the lives of ancient worthies.

The practical results may be seen in the present condition of the Chinese people; industrious and law-abiding, but low in their aims and destitute of the mighty hopes which make us men; their *litterati* filled with self-conceit and contempt for others, but narrow, bigoted and puerile themselves. Confucius ignored the spiritual world, not seeing that the spiritual rules the material. He was a historian, scribe, teacher, or, as he himself said, a "transmitter;" but he was not a prophet, or

"maker." Mankind needs both. Israel had Moses and the Prophets as well as Ezra the scribe. We have the spirit of Jesus as well as great legalists and theologians.

(4) **Mohammedanism**. Mohammedanism is monotheistic. God is in heaven; not as he is to the Hindu, in everything. To the Buddhist, there is no reality; to the Confucianist, society with its order and settled government is all-sufficient; to the Moslem, God is the one reality and man's glory is to do or to bow to his will. "Islam means that we must submit to God." And there is no complexity in the divine nature. The doctrine of the Trinity is inconceivable. God is an arithmetical unit. The gulf between God and man is not bridged over by the incarnation. There is therefore no ministration of the Spirit and no provision for bringing man into that filial relation to God in which alone his true life consists. Instead of the Person of Jesus and the Spirit of Jesus, Mohammedanism offers only an imperfect prophet and an imperfect book. It gives thus an inadequate conception of God and equally an inadequate conception of man. When man is only the subject, servant or slave of God, he cannot be the child and heir. Dependence on God is taught, but not the high privilege of fellowship with Him nor the law of progress. This inadequate conception of man is seen most clearly in Mohammed's low estimate of woman, and the consequent degradation of family and social life.

(5) **Christianity**. Christianity is based on the essential identity of God and man, and on their reconciliation in Jesus, crucified for us and now dwelling in us by his Spirit. It has already vindicated itself in comparison with other religions, and "the history of the world is the judgment of the world." The highest civilization is commensurate with Christendom, and from this verdict of humanity there can be no appeal. As the religions of Babylon and Egypt, of Greece and Rome, of the Germanic and Scandinavian peoples have passed away, not without leaving behind an inheritance absorbed by the religion of Jesus, so shall it be with the other great religions. Each of them is acting the part of a school-master to bring their worshipers to the Christ, even as the Law did for Israel; and each may leave some residuum in the system which supercedes it for the use of its late votaries.

G. M. G.

CHRISTIANITY THE UNIVERSAL RELIGION.

Scholars sometimes claim that there are universal religions, and they mention Christianity, Buddhism, and Mohammedanism. The consciousness of Christendom eliminates instantly and emphatically the claims of the Buddhist and the Moslem faiths to universal acceptance, and wise observation eliminates them both from any serious regard so far as the future of Christendom is concerned. They can not make themselves at home in our western world. They have few natural affiliations with Christendom. They represent either what we have left behind, or what we can never assimilate.

(1) **Its Nature**. That Christianity is essentially a universal religion is evident from its nature, which must be identified with the mind or personality of Jesus Christ. It cannot be seriously denied that He is universal in His character, His purposes, and in His conquests. There is nothing provincial, local, or merely national about Him. He was and is the Son of Man, the Son of Humanity, the Representative of all races, nationalities, con-

ditions, and of both sexes. He is the reconciliation of all diversities and the consummation of all human possibilities. He is also the Son of God, the realization in human life of the mind of the Eternal, the revelation to man of God's fatherly heart and His redeeming purposes.

(2) **Universality.** A universal religion must meet universal wants. It must be immediately adapted to the profoundest needs of the human soul. It must be able to redeem human nature from pollution, from guilt, and to so reinvigorate the human spirit as to make it strong in true righteousness, benevolence, and hope. A religion like Buddhism, which has mere pity for man's misery and makes no adequate provision for the healing of man's sin, and which fails to give man a vital hold of an infinite fatherly love, cannot be universal. A system of faith that is not in harmony with the highest ethics, and which exhausts its uplifting and progressive possibilities in a brief and limited history, can never become a universal religion. Mohammedanism has shown itself an excellent cure for idolatry and the lower forms of savagery, but it soon leads to a state of intellectual and moral stagnation, and is so fettered by its fundamental creed that it can have no strong affiliations with the humanities and hopes of modern progressive civilization.

(3) **Standard.** A survey of the world as it spreads out before us at the present time is a strong evidence that Christianity is rapidly universalizing itself. It has become the standard to which other religions are adjusting their teachings. Nothing is more evident than that the progressive minds among the Hindus and Buddhists are endeavoring to make some parts of their creed as Christian as possible. Christianity is already the religion of those who control the destinies of the race, and, however imperfectly the so-called Christian nations are behaving in their dealings with the Orient, they contain within themselves a Life which sharply rebukes their own imperfections, and which furnishes the ideal to which more and more they must approximate. A universal religion must not leave the sorrowing and troubled and oftentimes despairing heart of man in doubt with regard to the Supreme Love which reigns in the heavens and is controlling the destinies of mankind. It must so reveal that love in a human life as to make it a living and perpetual reality. It must provide a standard which can never be outgrown, and furnish motives of enduring energy that shall lead men to aspire to live nearer and nearer to that standard. It must furnish a body of spiritual teaching which has in it so much of God's mind that man cannot outgrow it. It must provide for the satisfaction of human hope and human affection by bringing the assurances of a happy immortality close to the sorrowing and troubled life of the present. I find in Christianity, and in Christianity alone, that which meets all these conditions and needs. I discover that Christ, who is the substance of Christian faith, is exalted more and more before the minds and moral imaginations of men. In a thousand ways He is drawing nations toward Himself. The lines of progress center in Him. He is the inspiration of hope and the object of desire. The greatest of modern Hindu reformers, Keshub Chunder Sen, saw in Him the world's reconciliation and redemption. When received into the heart, He satisfies the Japanese as truly as the American, the Hindu as perfectly as the European.

My conviction that Christianity is yet to become the religion of all nations has been vastly strengthened by what I have seen of the decadent civilizations and systems of the Orient. I acknowledge that these Eastern systems still have a strong, though at times a despairing grip over the Asiatic peoples, but they have been put on the defensive; they have come to feel that there is a mighty spiritual power which seeks to replace them with something better. Their natural antipathy to that which comes from the West, and their abhorrence of the sins and crimes of those who represent Christian nations, have still not been able to keep from them the spiritual and ethical superiorities of the Christian system. There have been such noble examples of Christly living and teaching in the Orient that even non-Christian scholars confess that the highest types of character yet evolved by our race are found among some of the Christian missionaries in the Orient. I do not look for the speedy disintegration of these ancient systems; I do look for a wiser approach on the part of Christianity toward the representatives of Hinduism, Buddhism, and Islam. Christendom itself is so furrowed with imperfection and weakened by discord that it hardly seems worthy to secure any sudden and very rapid dominion in Asia; but the dawn of a better Christendom means the dawn of Christian civilization in Asia and throughout the world.

The feeling of a universal human brotherhood is entering the heart of humanity, and this has a distinctively Christian origin. Fraternity is the key to the solution of the social and ecclesiastical problems of Europe and America; and just so far as the spirit of true brotherhood enters the Hindu, Chinese, and Japanese mind, just so far will some of the peculiar creeds or dispositions of the Oriental spirit be sloughed off. There is no true progress possible to the Hindu and Chinese civilizations without a new standard of womanhood, and a new conception of the unity, personality, righteousness, and love of God. These can be derived only from a pure Christianity. It deserves world-wide acceptance, and therefore will ultimately secure it. It is the only religion which from first to last shows us God seeking with loving and redemptive purpose after man, instead of man groping through mists of error, through weary centuries, after the unknown God. Christianity is the religion of redemption, of intellectual freedom, of popular liberty, of unending progress, of world-wide hope, and therefore it will be universal. J. H. B.

CHRISTMAS (krîs'mas). An annual church festival (December 25th), and in some states of the Union a legal holiday, which is held in memory of the birth of Christ.

Concerning the exact time at which the birth of Our Lord really occurred, authorities differ.

The first records we find of the observation of this day are in the second century, about the time of the emperor Commodus. The decretal epistles, indeed, carry it up a little higher, and say that Telesphorus, who lived in the reign of Antoninus Pius, ordered divine service to be celebrated and an angelic hymn to be sung the night before the nativity of our Saviour. That it was kept before the time of Constantine we have a melancholy proof; for whilst the persecution raged under Diocletian, who then kept his court at Nicomedia, that tyrant, among other acts of cruelty, finding multitudes of Christians assembled together to celebrate Christ's nativity, commanded the church doors where they were met to be shut, and fire to be put to it, which soon reduced them and the church to ashes.

CHRONICLES (krōn-ī-k'ls'). This name seems to have been first given to two historical books of the Old Testament by Jerome (Prolog. Galeat.).

The Hebrews call them *דברי הימים*, i. e., *words of days, diaries, or journals*, and reckon them but one book. The Alexandrian translators, who regarded them as two books, used the appellation, *things omitted*, as if they were *supplementary* to the other historical records belonging to the Old Testament canon.

(1) **Contents.** In 1 Chron. i-ix. is given a series of genealogical tables interspersed with historical notices. These genealogies are not complete.

1 Chron. x-xxix. contains the history of David, partly agreeing with the account given of him in the books of Samuel, though with several important additions relating to the Levites.

2 Chron. i-ix. contains the history of Solomon.

2 Chron. x-xxviii. furnishes a succinct account of the kingdom of *Judah* while *Israel* still remained, but separate from the history of the latter.

2 Chron. xxix-xxxvi. describes the kingdom of Judah after the downfall of Israel, especially with reference to the worship of God.

From this analysis it appears that the Chronicles contain an epitome of sacred history, particularly from the origin of the Jewish nation to the end of the first captivity.

(2) **Diction.** The diction is such as suits the time *immediately* subsequent to the captivity. It is substantially the same with that of Ezra, Nehemiah, and Esther, which were all written shortly after the Babylonish exile. It is mixed with *Aramæisms*, marking at once the decline of the Jews in power, and the corruption of their native tongue. The pure Hebrew had been then laid aside. It was lost during their sojourn in Babylon. The *orthography* is characterized by an adoption of the *matres lectionis* and frequent interchange of the weak letters with other peculiarities.

(3) **Age and Author.** Internal evidence sufficiently demonstrates that the Chronicles were written after the captivity. Thus the history is brought down to the end of the exile, and mention is made of the restoration by Cyrus (2 Chron. xxxvi:21,22). It is certain that they were compiled after the time of Jeremiah (2 Chron. xxxv:25), who lived to see the destruction of Jerusalem by the Chaldæans. The genealogy of Zerubbabel is even continued to the time of Alexander (1 Chron. iii:19-24). The same opinion is supported by the character of the *orthography* and the nature of the *language* employed, as we have already seen, both which are Aramæan in complexion, and harmonize with the books confessedly written after the exile. The Jews generally ascribe the Chronicles to Ezra, who wrote them after the return from the captivity, assisted by Zechariah and Haggai. But Calmet contends that if there be some things which seem to determine for Ezra as the author, others seem to prove the contrary. (a) The author continues the genealogy of Zerubbabel down to the twelfth generation; but Ezra did not live late enough for that. (b) In several places he supposes the things which he mentions to be then in the same condition as they had formerly been, for example, before Solomon, and before the captivity (2 Chron. v. 9, and 1 Kings viii:8). (See also 1 Chron. iv:41, 43; v. 22, 26; 2 Chron. viii:8, and xxi:10). (c) The writer of these books was neither a contemporary nor an original writer; but a compiler and abridger. He had before him ancient memoirs, genealogies, annals, registers, and other pieces, which he often quotes

or abridges. Still the weight of opinion is in favor of the authorship of Ezra. It seems that the chief design of the Chronicles was to exhibit correctly the genealogies, the rank, the functions, and the order of the priests and Levites; that, after the captivity, they might more easily resume their proper ranks, and reassume their ministries. He had also in view to show how the lands had been distributed among the families before the captivity, that subsequently each tribe, so far as was possible, might obtain the ancient inheritance of their fathers.

(4) **Record of Distribution of Lands.** These two purposes, which are closely allied, will serve to demonstrate the perfect congruity of all that is peculiar in the Chronicles. They account for the genealogical tables, the specifications of tribes and families with their situation, as also for a variety of references to the priests and Levites, to the preparations made by David for building the temple, the reformations which took place at different periods, the prosperity of such kings as feared Jehovah and walked in his ways, to the marvelous interpositions of Heaven on behalf of those who trusted in Him alone, to the idolatry of Israel and their consequent misfortunes.

The books of Chronicles as compared with those of Kings are more *didactic* than *historical*. The *historical* tendency is subordinated to the *didactic*. Indeed, the purely historic form appears to be preserved only in so far as it presented an appropriate medium for those religious and moral observations which the author was directed to adduce. Samuel and Kings are more occupied with the relation of *political* occurrences; while the Chronicles furnish detailed accounts of *ecclesiastical* institutions.

(5) **Sources.** A thorough examination of these books as compared with those of Samuel and Kings will satisfy the inquirer that the latter were known to Ezra and extensively used by him in the composition of Chronicles.

The earlier books themselves must have been compiled from annals. So far as the history contained in them is concerned, it bears little evidence of originality. It is true that the books of Samuel present no references to national records such as occur in Kings, but their internal character and structure evince their derivation from annals contemporaneous with the events they relate.

But the books of Samuel and Kings are not the only source from which the Chronicles have been taken. Public documents formed the common groundwork of the three histories. The Pentateuch has also been used in their compilation. A comparison of the first nine chapters of 1 Chron. with the Mosaic books will show the parallelism existing between them; and it should be especially noticed that 1 Chron. i:43-54 agrees *verbatim* with Genesis xxxvi:31-43. Perhaps, however, this passage in both has been drawn from the same source.

It is evident that the Chronicles were compiled not only from former inspired writings, but, for the most part, from public records, registers, and genealogies belonging to the Jews. That national annals existed there can be no doubt. They are expressly mentioned, as in 1 Chron. xxvii:24. They contained an account of the most important events in the history of the Hebrews, and were generally lodged in the tabernacle or temple, where they could be most conveniently consulted.

The histories of kings appear to have been usually written by *prophets* (1 Chron. xxix:29; 2 Chron. ix:29; xii:15; xiii:22). Hence they con-

stantly refer to the divine rewards and punishments characterizing the theocracy. These historical writings of the prophets were, for the most part, inserted in the public annals, as is evident from 2 Chron. xx:34; xxxii:32; xii:15; xxiv:27. Whether they were *always* so inserted is questionable, for they seem to be distinguished from the annals of the kingdom in 2 Chron. xxxiii:19.

From such sources Ezra extracted the accounts which he was prompted to write for the use of mankind in all ages. We cannot believe that his selection was indiscriminate or careless. His inspiration effectually secured him against everything that was inaccurate or unsuitable to the purposes for which he was supernaturally enlightened. That he committed mistakes cannot for a moment be admitted, else his history is impugned and its position in the canon inexplicable. His veracity, integrity, and scrupulous exactness must be held fast by every right-minded believer.

(6) **The Character of Such Statements as are Peculiar to the Chronicles.** From an inspection of 1 Chron. xvi:4-41; 1 Chron. xxii-xxvi:28; xxviii; xxix; 2 Chron. xv:1-15; 2 Chron. xvii:7, etc.; xxvi:16-21; xxx; xxxi, it will be manifest that it was one design of Ezra to notice with particularity the order of the divine worship as established by David and Solomon, with various reformations in the theocracy that took place at different times. The Levitical priesthood, and the public service of God, are specially noticed and prominently brought into view. From 2 Chron. xiii.; xx:22, etc.; xix:2, etc.; xxv:7, etc., it is evident that God's miraculous interference on behalf of Judah, and his displeasure with idolatrous Israel, were also intended to be depicted. In accordance with the same object, pious kings evincing appropriate zeal for the glory of Jehovah are commended, and their efforts marked with approval (comp. 2 Chron. xiv:6-15; xvii:10, etc.; xx; xxvi:5, etc.; xxvii:4-6, etc.), while the ruin of idolatrous practices is forcibly adduced (2 Chron. xxi:10, 11, etc.; xxviii:5, etc.; xxxiii:11, etc.; xxv:14, etc.; xxxvi:6).

(7) **Conclusions.** Such are the characteristic peculiarities of these books; and we now ask the impartial reader to consider if they be not worthy of the Holy Spirit under whose guidance the Chronicles were written. Are they not admirably in unison with the character of Ezra the high-priest and reformer? What more natural, or more accordant with the solitudes of this holy man, than to dwell upon such matters as relate to the worship of Jehovah, to the priests, and Levites? Surely *he* was appropriately directed to record the reformations effected by godly kings, and the disastrous consequences of forsaking the true God, whose zeal was abundantly manifested in reform, and to whom idolatry was peculiarly offensive. And yet upon these very chapters and paragraphs charges the most flagrant have been founded. The author of them has been accused of hatred to Israel, predilection for the Levites, love of the marvelous, design to magnify pious kings and to heighten the mistakes of the kingdom of Israel. It is unnecessary to enter into any refutation of these monstrous accusations. They bear with them their own condemnation. They are the offspring of that Rationalism which resolves to see nothing but what it relishes. On every page of these historical books are impressed *genuineness* and *honesty*. The writer candidly refers to the sources whence his information was derived; and contemporary readers, placing implicit reliance on his

statements, allowed the original documents to perish. He relates many things disgraceful to Judah and its kings, while he evinces no desire to palliate or conceal sin. He even retains, as we have seen before, expressions incongruous with his own age, and therefore exactly copied from the ancient records. Surely a writer guilty of falsification would have been careful to alter these into exact correspondence with his own times. Transparent simplicity of character needs not such minutiae.

CHRONOLOGY meant originally, as appears from its Greek roots (*χρόνος*, time, *λόγος*, reason, science), the scientific measurement of time; as such it is a branch of astronomy. More commonly it means the ascertaining and arrangement of the times of the occurrence of events; as such it is a branch of history, and is essential to its proper arrangement and to its philosophical development and narration. For as later events depend upon and spring from earlier ones, the gravest misunderstandings of the lessons of history must follow upon inversions of the true order of occurrences; and a student can have no adequate knowledge of the life of a man or of a nation, however vivid and correct his mental pictures of it may be, unless these are properly woven into the web of time.

1. Difficulties of Chronology.

(1) The Indifference of Ancient Writers.

Authors, especially in the Orient, were accustomed to record their facts without regard even to such dates as they might have given.

All demands were satisfied when known occurrences were referred to definite periods, as within a certain generation, or under a specific dynasty, or within the reign of a given ruler already familiar to the contemporaries addressed; for our modern method of historical notation according to the calendar was something altogether unknown to the ancients. Nor does it follow that because such documents were dateless they were unhistorical, or in any sense to be discredited. Rather, as such was the universal custom of the times with historians, a departure from that method would at once justify a suspicion against an ancient document as unauthentic and incredible.

Monuments may have been erected long after the event which they commemorate and may carry traditional inscriptions. It has been found in Egypt that kings altered inscriptions. Rameses II and others did this to claim glory for deeds of others. Contemporary inscriptions are found to have been mendacious. Egyptian and Assyrian monarchs boasted grandly of conquests never made; the London Monument lied in ascribing to Roman Catholics the origin and spread of the great fire of 1666, which it commemorated.

(2) **Use of Round Numbers.** Similar to this indifference as to fact is the frequent use of indefinite round numbers. This is common in ordinary speech now as formerly. Even in modern history, the Hundred Years' War between England and France began in A. D. 1337, and ended in 1453. Gesenius remarks upon such use of the numbers *forty*, *seventy*, and *seven*, used as in English for *many* and *several*, he might have said the same of *hundred*. In English that word passed from meaning a number of freemen to mean a certain territory. Jesus bade Peter to forgive seventy times seven times: it would be a comical absurdity to take this literally. If, then, we read that Gideon and Eli each judged Israel forty years, and Saul reigned forty years (Acts xiii:21), and David and Solomon reigned each

forty years, we may suspect that these are not chronological numbers, but oriental expressions for long reigns. This number is common in the book of Judges.

(3) **Lack of an Era.** Modern writers have a great advantage over the ancients in having a definite point of time from which to reckon forward or backward, to-wit, Saturday, January 1, A. D. 1. They have, too, the benefit of Cæsar's establishment of the length of a year, beginning January 1, and of Gregory's correction, made possible by modern astronomy. But this adoption of the Christian era was so late that it was not generally used until after Charlemagne—say A. D. 800. Greek writers had indeed the computation by Olympiads; but they used this so little that Thucydides, writing about 360 years after the first Olympiad, dates but twice by the Olympic Era; Xenophon, still later, uses it twice; and Timæus, living over 500 years after the establishment of the era, is the first to use it regularly. The Romans reckoned from the foundation of Rome, but did not agree upon the date of the era, and preferred to date an event by naming the consuls then in office. So oriental writers generally said that an event was in such a year of such a king, if the event occurred in a kingdom. But periods of anarchy and of conflicting dynasties and instances of co-regency of a father and son make this method uncertain for us. The prophet Amos (i:1) dated a prophecy from an earthquake: that was familiar enough for his hearers, not for us.

(4) **Length of Years and Time of Beginning.** To us it seems natural to fix the length of the year by the seasons, which recur with a sort of regularity, but which shade one into another so that no definite line of demarcation between them can be drawn, except by astronomers. Our system involves a great series of previous observations, and a study of astronomy that could be perfected only with modern instruments. Simple as it seems to us, it is complex to simple minds; and few of the educated carry its facts and reasons in their minds. It was easier in old times to let the priests arrange the sacred days upon which the year depended, and to let them put in or leave out a few days to accord with the seasons. Indeed, it was this priestly function that enabled Julius Cæsar, as Pontifex Maximus in charge of such matters, to establish the system which lasted in Europe 1,627 years and is still maintained in Russia; yet philosophic Cicero made a jest of it. We find a great variety in the length of the year in various countries and times, and in the season chosen for the beginning of the year.

As it is much easier to observe the moon than the sun, it was natural to measure off years by lunations. People of little culture would soon find that the counting of twelve new moons brought them to about the same season, with a year of 354 days, and months alternately twenty-nine and thirty days long. Then their priests must determine whether they will follow the moon, putting in a day now and then upon a chosen month, since the lunations are not exactly twenty-nine and a half days long. The Arabian or Mohammedan years adhere to the lunations, so that in the course of 897 years their new year's day fell upon every day of the Julian calendar: upon most of them repeatedly.

But many nations observed festivals dependent upon the seasons as a festival welcoming the spring; or one of thanksgiving after harvest. If such were set upon some particular day of the year or month, the new year's day must not be al-

lowed to wander far, and the priestly order must keep the length of the year on an average near 365 days by lengthening the months or by adding days. Most of the ancient nations adopted this plan. But there was a great variety in the time of beginning the year. The Romans began the year in March, as the season of planting, vaguely suggested by the equinoxes; and the Hebrews had the same beginning, marked by their great religious festival, the Passover. Several other nations had the same, which seems one of the points suggested by nature itself. But the later Jews adopted a civil calendar which has now superseded the other, so that they celebrate the opening of their new year in the autumn; and what was formerly their seventh month is now the first. This brings their new year's day near the autumnal equinox, another time suggested by nature, when the labor of cultivation is done and the grains and most of the fruits are harvested. The French scientists chose the autumnal equinox as the point for beginning their new era of 1792, when they hoped to bring mankind to reckon from the fruition of their great Revolution.

Cæsar fixed the beginning of the year now used in all Europe and in lands colonized by Europeans near midwinter. On the other hand the Olympic years began at midsummer. Now to illustrate confusion arising from these various beginnings of a year, suppose we learn that an event occurred in the first year of the 94th Olympiad. By our calendar that Olympic year began in July of B. C. 404, and ended in July B. C. 403. Hence if no circumstances show in what season of the year the event occurred, the historian cannot say in which of the two years he must place it. De Quincey shows that at a certain period of English history, owing to the use of January 1 and of March 25 for New Year's Day and to the introduction of New Style, an error of two years might occur. (*De Quincey's Works, Essay on Pope.*)

(5) **Conflict of Authorities** furnishes as great a difficulty as the indifference and the looseness of enumeration discussed above. Sometimes the conflict is in the text of an author, by the occurrence of irreconcilable statements. Thus in 2 Chron. xxi:20, we are told that King Jehoram was thirty-two years of age at accession, and died after a reign of eight years, at the age of forty. The next chapter tells us (verse 2) that his youngest son Ahaziah succeeded him, being forty-two years old at accession, so that he must have been born two years before his father, and other sons were born earlier, or else there was a long unrecognized interregnum, or a mistake has occurred. Here we have a parallel passage in 2 Kings viii:26, which says twenty-two instead of forty-two, making it probable that a "mem" was erroneously written for a "kaph," a figure 4 for 2. But the LXX says, at least in the best MSS., twenty, and neither twenty-two nor forty-two.

But discrepancies and conflicts are not always so easily dealt with, as will appear below. Authors of equal credibility sometimes differ widely; and the chronologer who follows one rather than another proceeds often by a judgment for which he may not be able to give a definite reason. The students of history, whether that of the Bible or of other books, must expect to find men of the greatest learning and keenest research unable to agree upon dates; and he must learn to respect them none the less, and to avail himself of their labors thankfully, leaving riddles of time undecided.

(6) **Dates Before B. C. 700 All Uncertain.** This may be asserted positively so far as present research can go; no date prior to B. C. 700 is absolutely certain, though many are sufficiently

approximate, except 776, 753, 747, which are eras or points from which to reckon. And of these, except 747, there is no certainty that the events they have been held to commemorate occurred just then. The regular establishment of the Olympic games may, as Mahaffy shows, have been before or after B. C. 776; but that is the era of the Olympiads none the less. Most historians take B. C. 753 as the date of the founding of Rome; yet Roman writers differed to the extent of 28 years as to the founding in fact. The era of Nabonassar, B. C. 747, is fixed by astronomical records; that is sure; and so far as human events can be correlated with those records of the sun, moon, and stars, we can be sure of their date. But even with the aid of astronomy, we may still meet very perplexing problems. Thus the date of the battle between Medes and Lydians, upon the fixing of which many other dates depend, seems easily settled by the fact that the conflict was arrested by the occurrence of a total eclipse in the midst of it; but the astronomers find several eclipses that answer the conditions of the story, these phenomena ranging from B. C. 625 to B. C. 583. Most historians adopt the eclipse of B. C. 610.

(7) **Antiquity of Man.** The knowledges which constitute the sciences of geology and archæology are insuperable obstacles to the schemes of chronology that attempt to fix a date for the creation of the world and the appearance of man upon it. It is now seen that the creation of the world was progressive, indeed, as represented in Genesis but that He to whom a thousand years is as one day neither hastened nor tarried; whether from nebular fire-mist or from cosmic confusion, the "tohu bohu" of Genesis 1:2, God took myriads of years to shape the earth so that it might be habitable. And it is proved that the human race has been here too long to fit the schemes of Calmet, Usher, and Hales, whose work is summed up in the chronological table given in this work. The very ruins of Egypt indicate a civilization there in full bloom at least B. C. 6000; Maspero says B. C. 10,000; and man was on earth long before such progress was wrought out. The best Christian scholarship now recognizes these facts, and ceases to peer into the impenetrable darkness and mystery that covers the beginnings. The literal is the least tenable of the interpretations of Genesis.

2. Chronology of the Old Testament.

(1) **From Adam to Noah.** The genealogy of Gen. v:1-32 and vii:6, gives basis for this calculation. This has come down to us in three forms: the present Hebrew text; the Samaritan Pentateuch, which was transcribed probably about B. C. 430, from the Hebrew text of that time; and third, the Septuagint, the translation of which began about B. C. 283, and was continued for over a century. These three were discrepant, as appears in the following table:

Age of each when next was born or event occurred			
NAME.	Heb.	Sam.	LXX.
Adam.....	130	130	230
Seth.....	105	105	205
Enosh.....	90	90	190
Kenan.....	70	70	170
Mahalalel.....	65	65	165
Jared.....	162	62	162
Enoch.....	65	65	165
Methuselah.....	187	67	167
Lamech.....	182	53	188
Noah.....	600	600	600
Years from Creation to the Flood.....	1656	1307	2242

The question arises at once, which of the three, if any one, is to be taken as correct and the standard? Naturally, one answers, the Hebrew text, as the original. So thought the translators of 1611; and they followed that text slavishly, even where corruption in transcription had made nonsense, and where there was manifest error, as in the case cited above, 2 Chron. xxii:2, compared with 2 Kings viii:26; and if in this instance both these had concurred in mistake, the text of the LXX (which was good enough for St. Paul and Luke) offered sufficient reason for avoiding an absurdity. But this bibliolatrous regard for the Hebrew text did not arise even among the Jews until long after the final dispersion, when the Masorets fixed the text. Prior to that, as is shown abundantly by Robertson Smith, in his popular lectures on "The O. T. in the Jewish Church" changes in the Hebrew text were not uncommon: one chapter of Jeremiah (xxvii) was so changed that his words were in substance reversed, and he was made to prophesy falsely.

From these facts it may be seen that the scribes took liberties with the text, especially with what we call the historical books, concentrating their attention and their exactitude upon "The Law." The variations of the three texts above cited imply the taking of liberties which surely would not have been taken if the copyists and translators had supposed the genealogies and numbers to rest upon genuine historical documents. They evidently recognized only conjectural and traditional narration, shaped long before calendars were devised, the art of writing invented, or records kept. That a Hebrew text or several Hebrew texts were the original source of the Samaritan and the Septuagint, no one will dispute; but he who says that it was the Masoretic text we now have will find that he has vouched for the unprovable.

The early history of what was to them the Adamite world is thrown into the form of genealogical tables, in the making of which certain purposes appear beyond the giving of history. The number of the patriarchs, *ten*, is a selected number, to fit into a scheme, just as in Matthew the number of generations, twice the sacred number seven, is forced by the omission of three persons: so here the patriarchs are found from Adam to Noah, inclusive; and then a series of ten from Shem to Abraham or Terah as we shall notice below. Whether we take one or the other of the three texts, we do not secure certainty; and among the learned each has its advocates. The calculation of the LXX was that of the Hellenist Jews, of the early Christian church, and of some modern scholars, among whom, in England, are Hales, Poole, and Prof. Rawlinson. These seek to lengthen the time before the Flood, since the antiquity of man requires a period for which even the long ages of the LXX are not sufficient.

The students of these patriarchal tables, after observing the carelessness of Hebrew genealogies with their frequent omissions, will find himself obliged to say of the genealogies prior to Abraham that in them we have probably only the more important names of the lives of descent, the purpose of their transmission not being history in our modern sense, but to show a line of descent. We start from one made of the red earth into whom God poured the breath of physical life and the inspiration of understanding (Job xxxii:8); we reach the Father of the Faithful, the "Faithful Abraham" of the Galatian Epistle (iii:9). That the first man was of earth we know, not by the gross conception of a form made of mud and then

made alive; but because the sentence "dust thou art and unto dust shalt thou return" is proved by experience, which shows of what we are made. Nor need we quarrel with the evolutionist for giving man a long line of simian predecessors if it pleased the Creator so to develop by slow degrees or by greater steps the final form: *Man* was created only when the inspiration of which Elihu spoke to Job befell that form, and true life, with intellectual powers not limited to instinct nor heredity, and with "the powers of an endless life" (Heb. vii:16), became its crown. Was it about such questions as puzzle us here that Paul spoke with fine scorn: "Shun foolish questionings and genealogies"—"unprofitable and vain?" (Titus iii: 9). Who were fighting over genealogies in his day?

(2) Long Lives of Patriarchs. Of these four things may be said: (1) We may take them literally. We cannot from the fact that few men live now to be a hundred years of age—and none much more—presume to say that it was impossible for men to have lived nine centuries. We may say that if the historical verity of the document is doubtful we may refuse to accept it on that point. Perhaps, as some suggest, the original list was of names only, to which some later scribe added numbers. Possibilities and guesses are endless. (2) We may claim that the word *years* is too vague, occurring in a document in which the ages of creation are called days; that the writer speaks of seasons, or other periods. (3) More plausibly it is suggested that "for the ages before Moses the Old Testament writers made the head of a family group or clan stand for his descendants composing such a community, till a new community of the same kind branched off from it. . . . In the old Semitic languages it was a very common usage to denote such a family or kin by the name of its ancestral head; and the very designation of such a community was the term (Heb.) *Chai*, 'a life.'" Thus J. W. De Forest (*Old and New* for 1872, vi:497) says Abel is a tribe of shepherds, victims of the first reported war, extinguished by Cain, a fierce predatory clan, which was expelled from the social center of the Adamites. Jared means ruling; it was a predominant clan; Jared's sons and daughters were its colonies. The reader will find amusement if not instruction in the extremes to which De Forest carries his notion. (4) One may follow Swedenborg and give to these chapters an inner sense which will atone for the loss of the outward literal verity. Perhaps there are other ways of dealing with these long lives.

(3) The Flood and Civilization. Singularly, the nature and extent of the Flood and the origin and development of civilization become involved in this question of time, but not in any question of definite chronology. It is said that no scheme yet proposed gives time enough after the Flood for the development of civilization and institutions. Did civilization develop from different origins and various centers? Is it not rather true that there is but one civilization which spread and was planted from a single source, as one torch may light many? It is a favorite theory of some that man has arisen slowly from savagery; but others claim that savages and barbarians are fallen men. This article is not the place for discussing these questions; but the reader will see that they involve demands for æons of time if all men are to have risen from savagery or simian conditions. Was the flood real or symbolical? Did the flood strip the whole globe of all inhabitants, except the Noahite family? Or was it limited in extent, leaving most of the world untouched, so that in

the undevastated regions there was time enough for all the development that is shown to have existed? Have savage or barbarous people risen in civilization or shown tendencies to do so without contact with the civilized? And in China we have an example of what is to us an arrest of civilization, without retrogression. When the chronologer asks for time, many such questions confront him.

(4) From the Flood to Abraham. We have a genealogical table for this period in Gen. xi: 10-26, probably from the same source as the former one, and subject to the same difficulties from its triple form.

Age of each when next was born or event occurred

NAME.	Heb.	Sam.	LXX.
Shem.....	100	100	100
Arphaxad.....	35	135	135
Cainan.....	130
Shelah.....	30	130	130
Eber.....	34	134	134
Peleg.....	30	130	130
Reu.....	32	132	132
Serug.....	30	130	130
Nahor.....	29	79	179
Terah.....	70	70	70
Abraham born.....
<hr/>			
Yrs. of Shem's life before the Flood.....	390	1040	1270
	100	100	100
<hr/>			
From Flood to birth of Abraham.....	290	940	1170

The age of Shem before the Flood must be subtracted to get the time from the Flood to Abraham's birth. Here again are ten patriarchs if we count Cainan and include Terah; then Abraham stands at the head of the new movement in a more definitely historical era. But shall Cainan be included? Reasons for adopting the insertion of the name by the LXX are, first, it is impossible to account for the presence of the name if it were not in some authentic copy of the Hebrew text in B. C. 283. Second, names are more easily left out than inserted. Omissions in the genealogies of the Hebrew text are common enough to warn us that counting by generations as they are given is unsafe. Compare Ezra vii:1-5 with 1 Chron. vi:4-15; there is a discrepancy of eight generations, since two must be put in between Ezra and Seraiah. Jehu is the son of Jehoshaphat, the son of Nimshi, in 2 Kings ix:2, 14; but in verse 20 of the same chapter, in 1 Kings xix:16, and in 2 Chron. xxii:7 he is Jehu, son of Nimshi. Laban in Gen. xxii:20, 23, and xviii: 5, is son of Bethuel; but in xxix:5, he is son of Nahor, the father of Bethuel. In an extreme case, Shebuel, contemporary of David, is called son of Gershon, the son of Moses (1 Chron. xxvi: 24). Third, Cainan is in the genealogy of St. Luke iii:36. The theory that from Luke it was worked back into the text of the LXX is an extreme one. The question is pressing, if this "second Cainan," as he is called, is genuine, how came he to be left out? if not genuine, how came he to be put in? It must be said, however, that the general opinion of chronologers is against him. Perhaps Abraham is to be counted as the tenth in this second group.

But to the length of time assigned to these patriarchs, which is in the Hebrew text only 290 years, there is the fatal objection that time

enough is not given after the denudation of the earth by the Flood for the growth of the great nations of Abraham's time, the history of some of which is known to run back from 3000 to 6000 years before the time of Abraham. Such are Chaldea, Assyria, and Egypt. Even the 1170 years of the LXX are insufficient. From these two series of ten patriarchs, then, it is impossible to deduce any defensible system of chronology. The development of the genealogies of the Noahites in Gen. x shows that names of nations, as Mizraim, Sudim, Philistim, Caphtorim, are used as if personal names.

(5) From Birth of Abraham to the Exodus.

Gen. xxi:5, gives age of Abraham at the birth of Isaac, who was 60 years old at the birth of Jacob (Gen. xxv:26). Gen. xlvii:9, gives age of Jacob when he went to Egypt. Exod. xii:40 states definitely the length of the sojourn in Egypt at 430 years, for which the 400 of Gen. xv:13, and of Stephen's speech in Acts vii:6, may be taken as round numbers. But the LXX and the Samaritan Version divide the 430 years into two equal parts, calling the first the sojourn of the patriarchs in Palestine, and the other 215 years the sojourn in Egypt. Hence the following table:

Age of Abraham on leaving Haran....	75	...
Age of Abraham at the birth of Isaac.	100	100
Age of Isaac at the birth of Jacob.....	60	60
Age of Jacob at the descent into Egypt	130	130
Years of the patriarchal sojourn in Canaan.....	215	...
Years of the patriarchal sojourn in Egypt.....	430	430
Years of the sojourn in Egypt according to LXX.....	215	...
From the birth of Abraham to the Exodus.....		720

The main question here is the time of the going into Egypt and of the coming out, in relation to Egyptian history. The stay in Palestine was converted into the 430 years because Palestine was a long time under Egyptian sway, and was certainly so at the time of the exodus and probably fifty years later, covered by the round number, forty years, as the time of the wandering. It is now generally agreed that Joseph could have been received and advanced, as told in Genesis, only during the time of the Hyksos, or Shepherd Kings, one of the last of whom was Apepi (Aphophis). But the time of the Hyksos is uncertain: they were in Egypt several centuries, and were driven out not later than B. C. 1530. Other dates given for the close of this period are: Wiedemann, 1750; Brugsch, 1706; Mariette, 1703; Rawlinson, 1640; Lepsius, 1591. Then followed the great dynasties, the xviiith and xixth, during which the Egyptian power was extended over Sinai, Idumæa, Palestine, and Phœnicia. Their time lasted till about 1200: Mariette says 1288; Lepsius, 1269; not later than 1180, says Wendell.

The Pharaoh of the oppression, under whom the children of Israel built the treasure cities Pithom and Raamses (Exod. i:11) was Rameses II. This fact, long conjectured, has been definitely settled by Naville's identification of Pithom and discovery that it was built by Rameses II. The Exodus has usually been assigned (by Brugsch, Ebers, Rawlinson, Sayce, and others) to the reign of Menephtah (Merenptah) or Seti II, the immediate successors of Rameses II. Since,

however, both of these kings were no mean sovereigns, and apparently controlled both Palestine and the Sinaitic Peninsula, it may be better (with Kittel, Maspero, Wiedemann, and others), to place the exodus in the time of anarchy, and hence of weakness, which was in the xxth dynasty; McCurdy would place it in the last years of the reign of Rameses III (not later than B. C. 1180 to 1148) or after that, but probably B. C. 1200. This date leaves the time for the wandering migration, called in round numbers forty years, ending about 1150.

(6) From the Exodus to the Building of the Temple. This period is said in 1 Kings vi:1, to be 480 years; the LXX says 440. Solomon began, it is there said, to build the temple in the fourth year of his reign, that is, three full years after his succession, which is dated at B. C. 993 by Duncker, and at 1017 by Oppert, and at intermediate dates by others. The foundation must be dated, then, as late as B. C. 900 or 1014. But 480 years earlier carries us back to B. C. 1470 or 1494 for the exodus. But the Egyptologists, with their present light on the time of Menephtah, cannot put the exodus, if it occurred in his time, further back than B. C. 1300, cutting this period from 480 years to about 300. Really, the book of Judges gives very few data. If we tabulate the times mentioned between the exodus and the temple, we have this result:

The sojourn in the wilderness.....	40	years
Period of conquest, Joshua ruler.....	230	"
Israel serves Cushan-rishathaim.....	8	"

Total.....	623	"

This shows that the judgeships and the foreign oppressions overlapped each other, each being sometimes local in the land, and thus contemporaneous. The recurrence of 10 and its multiples, 20, 40, 80, shows that the numbers are vague and imaginary. No satisfactory chronology of the period is possible. Every period of time given in the table is either questionable or lapped upon some other except the three years of Solomon; and if the forty years assigned to him is as vague as other round numbers, even that is uncertain. The time necessary for the conquest is reckoned at thirty years. The twenty years assigned to Samuel are a doubtful inference from 1 Sam. vii:2; in 1 Sam. vii:15 it is said that he judged Israel all the days of his life; the next chapter represents him as old when he aids in making Saul a king; and there is no evident connection between the

stay of the ark at Kirjath-jearim and his office as judge, which must have lapsed, at least from the calculation, when Saul became king, though the people seem to have regarded Saul as general of the army and Samuel as their judge at the same time.

Saul's reign is put down as forty years; but Paul probably used forty as an equivalent of many; for he surely knew that no length of reign is assigned in the Old Testament. Duncker allows his accession at 1080 and his reign to have been twenty-two years; Noeldeke gives him ten; Hales, thirty-four; Josephus, twenty.

Now counting from 1200, the most probable date of the Exodus to Duncker's date for the founding of the temple, the latest allowable date, we have 207 years in place of 480; and if we put back the Exodus to Mariette's date of the end of Dynasty xix, we have only 295 years. The number 480, four times 120, was assumed as a typical round number for a long time, 120 being itself made by the mystic number three and the vague number forty. But this number 480 seems to have been fixed in the text very early, since only the LXX varies from it, giving instead 440. Josephus, however, had as little regard for it as for his own consistency, his datings summing up at 592, 612 and 632 years. Even Paul's statement (Acts xiii:17-22) does not sustain 480, as he makes 450 years between the death of Moses and King Saul.

(7) **From the Founding of Solomon's Temple to the Babylonian Destruction of It.** For this period we have the lists of the kings of Israel and Judah, wherein three points of synchronism can be fixed; and we have points in Assyrian and Babylonian history so settled by the discoveries from the records of those countries that there is now no controversy about them. There are necessary, however, some adjustments of the statements of the books of Kings and Chronicles as to the length of reign of the several monarchs, for reasons given below. It is to be noticed, too, that the books that we have are not the original records; perhaps they are not even second-hand. They were written after the close of the period, of course; they are not a compilation direct from royal annals. The writer (or writers?) refers often for his authority to "the Book of the Chronicles of the Kings of Israel," and to a like book for Judah, "the Book of the Chronicles of the Kings of Judæa;" but this language rather implies that he used a compilation from the royal archives, "the *Book* of the Chronicles," he says. The writer is of the southern kingdom; were the royal records of the northern kingdom saved in the sack of Samaria and brought to Jerusalem? And when the capitals—Samaria and Jerusalem—were forcibly captured, and men were anxious to the utmost for their lives and the lives of their families, even the most self-possessed and the most favored by circumstances are far more likely to have saved from their scanty libraries some compendium of facts from which a later writer has selected facts which he has expanded or condensed, and woven together in the books—sole and precious remnants—that we now have.

The author of Kings and Chronicles dates the accession of each king in Israel by the regnal years of the king in Judah, and *vice versa*. This shows a comparison of two records, for original state records would surely never contain such cross-references. An English keeper of official records does not say: "James I became king of England in the fourteenth year of Henry IV of France." In a statement so carefully made, the sum of the length of the reigns of one line should

agree exactly with the sum of the reigns of the other when a common point is found. Thus Rehoboam and Jeroboam I began together: so did Athaliah and Jehu. The following table shows the lengths of reigns between these accessions; Zimri's reign of one week falls in the first year of Omri:

Rehoboam.....	17	Jeroboam....	22
Abijam.....	3	Nadab.....	2
Asa.....	41	Baasha.....	24
Jehoshaphat.....	25	Elah.....	2
Joram.....	8	Zimri.....	..
Ahaziah.....	1	Omri.....	12
—	—	Ahab.....	22
	95	Ahaziah.....	2
		Joram.....	12
			98

The discrepancy evidently arises from the Hebrew method of reckoning time, and from counting the calendar year, twice in some cases, as the last year of one king and the first year of his successor. The reckoning of part of a year or of a day as a full year or full day is illustrated familiarly in the entombment of Jesus a few hours of Friday, all Saturday, and a first fragment of Sunday, being called three days. There may be also a co-regency the time of which is counted for both kings. Thus it is made evident by coaptation of the data given that the period of these reigns is neither 95 nor 98 years, but 90: the lapping of one reign upon the year of another reign and the co-regency of Jehoram and Jehoshaphat become evident in this comparison, and the apparent time is shortened.

(8) **Table of Synchronisms, Judah and Israel.**

Rehoboam's first year.....	1	1 Jeroboam's first.
his reign.....	17	17 Jeroboam.
Jeroboam's 18th, Abijam's.....	1	18 (1 K. xv:1).
Jeroboam's 20th, Abijam's.....	3	20 Jeroboam.
Asa's beginning, 1 K. xv:9.....
Asa's first full year.....	1	21 Jeroboam.
Asa (1 K. xv:25).....	2	1 Nadab, 22d Jeroboam.
Asa (1 K. xv:28, 33).....	3	1 Baasha, 2 Nadab.
Asa (1 K. xvii:8).....	26	1 Elah, 24 Baasha.
Asa.....	27	Zimri, 7d. (1 K. xv:10).
(Tibni vs. Omri 4 yrs.) Asa.....	27	1 Omri (1 K. xvi:16),
Asa (1 K. xvi:29).....	38	1 Ahab, 12 Omri.
Jehoshaphat begins, Asa.....	41	4 Ahab.
Jehoshaphat's full year.....	1	5 Ahab.
Jehoshaphat (1 K. xxii:51).....	17	1 Ahaziah, 21 Ahab.
Jehoshaphat (2 K. iii:1).....	18	1 Joram, 22 Ahab, 2 Ahaziah.
Jehoshaphat 22, Jehoram.....	1	5 Joram (2 K. viii:16).
Jehoshaphat 25, Jehoram.....	4	8 Joram.
Jehoram and Ahaziah.....	1	12 Joram (2 K. viii:25).
his only year.....	1	12 Jehu kills both kings.

It is objected to a part of the history of the Kings of Israel that both the Moabite stone of King Mesha and the Assyrian records make Omri of much greater importance than suits the short reign of twelve years, four of which were spent in a struggle against his rival, Tibni. In the Assyrian records the designation of the kingdom of Israel is "the land of the house of Omri." Even Jehu is put down as of the dynasty of Omri. King Mesha in the famous inscription records that he was overcome by Omri, and was subject until he revolted from Joram. He says, "And Omri took possession of the new land of the Mehedeba and it (Israel) dwelt therein during his days, and half his sons' days, forty years." The number forty may be the vague forty, meaning many; but the impression of the power of Omri was great both in Assyria and in the immediate vicinity of this king. Duncker suggests that more time should be given him by a diminution of the time of Baasha. Ahab was a great warrior, had political and family connections with Tyre, Judah, and Syria, and was against the increasing power of Assyria

at the battle of Karkar in B. C. 854, near the end of his reign.

The rest of this period (to the fall of Jerusalem) is more difficult so far as the chronology of Isreal is concerned. Chronologers have room for much guessing as to the best way out of the difficulty, for no proof is possible. The capture of Samaria and the end of the kingdom of Isreal occurred, according to 2 Kings xviii:10, in the sixth year of Hezekiah of Judah and the ninth year of Hoshea of Israel. Starting from the point of agreement afforded by the concurrence of the usurpations of Athaliah in the one state and of Jehu in the other, we have in 2 Kings this list of kings and times:

Athaliah 6 years	Jehu 28 years
Joash 40 "	Jehoahaz. 17 "
Amaziah 29 "	Joash 16 "
Azariah 52 "	Jeroboam. 41 "
Jotham 16 "	Zachariah. 6 months
Ahaz 16 "	Shallum. 1 "
Hezekiah 6 "	Menahem. 10 years
	Pekahiah. 2 "
165 years	Pekah 20 "
	Hoshea 9 "
	143 y. 7 m.

Here is a discrepancy of over 21 years, or more than one eighth of the period of 165 years. Two years are easily disposed of in the way of co-regency; but the ways of disposing of the remaining nineteen show how uncertain and unsatisfactory are all the proposed expedients. That adopted by most chronologers is to insert an interregnum of eleven years between Jeroboam II and Zachariah, and another between Pekah and Hoshea, of eight years' duration. This change makes the time of the northern kingdom agree with the time of the southern. But one may well question whether the southern can be made the standard, since in 2 Kings xviii:10 and 13 the fall of Samaria and a great invasion by Sennacherib are placed in the sixth and fourteenth years of Hezekiah, eight years apart when they were 20 years apart, B. C. 721 or 722, and B. C. 701. Ewald recognizes the error as 21 years, and in place of interregna adds twelve years to Jeroboam's reign and nine to Pekah's. Thenius sees that a slight substitution of Hebrew numeral characters which resemble each other, one fifteen for one fourteen and twelve for eleven will give those kings 51 years and 30: Lepsius makes those reigns 52 and 30 years; Bunsen gives Jeroboam II 61 years, letting Pekah remain at 20.

If the data could be co-ordinated, the ingenuity and labor of biblical students would by this time have evolved something better than the guesses of which we have given samples, for there are many more. The assumption of co-regencies may force a sort of agreement, at the whim of the writer. Fortunately there is another valuable and reliable source of chronology of these times that will fix a number of dates for us, the Assyrian Canon, in the form of annals. Its mention of an eclipse which the astronomers find to have occurred in B. C. 763 correlates the Canon to our Christian Era. Assyria was extending its power westward in the ninth century B. C., and thus touched persons of this period of the Israelitish kingdom.

Ahab was in the battle of Karkar against Assyria, B. C. 854: his death may be placed in 853, and Joram followed him the next year. Jehu, after slaughtering all of the family of Ahab within his reach, was obliged to fulfill Ahab's and Joram's obligation, and to pay tribute to Shalmaneser II, in 842, just twelve years after the battle

of Karkar; this may have been in the second year of his reign, making his accession B. C. 843. Azariah or Uzziah has war with Assyria, Tiglath-Pileser II (or Pul) 742-740. Menahem pays tribute 738 and Ahaz B. C. 734. Pekah is conquered by Tiglath-Pileser II, 734, and Hoshea succeeds him the same year; but Shalmaneser IV dethrones him B. C. 722. The following is Duncker's list of kings from 800:

JUDAH. (Accession dates).		ISRAEL.	
Joash 837		Jehoahaz 815	
Amaziah 797		Joash 798	
Azariah (Uzziah) . . . 792		Jeroboam II 790	
Jotham 740		Zachariah 749	
Ahaz 734		Shallum 748	
Hezekiah 728		Menahem 748	
Manasseh 697		Pekahiah 738	
Amon 642		Pekah 736	
Josiah 640		Hoshea 734	
Jehoahaz (3 mos.) . . 609		End of Israel 722	
Jehoiakim 609			
Jehoiachin (3 mos.) . 597			
Zedekiah 597			
End of Judah 586			

Concerning but few of the later kings is there any dispute; the biblical record offers hardly any difficulties. Perhaps Hezekiah was co-regent with his father Ahaz; that has been suggested to account for the inconsistency mentioned above; but that supposition unsettles more dates than it settles.

By the errors and inconsistencies, as shown above, up to the date of the destruction of the temple by Nebuchadnezzar, it is made plain that no precision can be found in the placing of dates and numbers until the time is reached when documents other than the biblical can be brought in as aids. The numbers given must often have been conjectural, reminding the investigator of Renan's dictum, that the Orientals give definite numbers, but they never count. There seems to have been an attempt to make the period from the building of Solomon's Temple to the rebuilding by Zerubbabel just 480 years, that favorite number, and to make the duration of the Israelitish kingdom just half of 480, or 240 years. How easy to remember if we could make up a table like this:

From Abraham's birth to Exode	3x240=720
From Exode to first Temple	2x240=480
From first Temple to fall of Samaria . .	1x240=240
From first Temple to second	2x240=480

The last two lines of this table are approximate,—near enough for an oriental; but the second line is far away, and the first is in the clouds.

(9) **Post-Exilic Chronology.** This is supplied in the Old Testament by the books of Ezra and Nehemiah, and, if we include the Apocrypha, by 1 and 2 Esdras and 1 and 2 Maccabees. Daniel belongs to the class of apocalyptic prophecy, and its facts are more precisely set forth elsewhere. The episode of Esther furnishes no datable fact or facts at all; Tobit and Judith are romances.

This period of time is dealt with sufficiently and satisfactorily in the Chronological Table of this volume, to which the reader is referred. These are principal dates:

Persians take Babylon	538 B. C.
Temple rebuilt by Zerubbabel	536-515
Ezra reaches Jerusalem	458
Nehemiah's mission	445
Ptolemy I Lagi takes Jerusalem . . .	320
Septuagint begun about	285

Antiochus takes Jerusalem	170 B.C.
Rise of Maccabees	166
Pompey takes Jerusalem	63
Herod, as king, takes Jerusalem	37
Herod's Temple	29-18

3. Chronology of the New Testament.

In the endeavor to place the events of the New Testament upon the long calendar of time, we are not without serious difficulties; but they are entirely different from those of the Old Testament. There our documents were few, but they professed to give us lists of names and statements of years, length of lives and duration of reigns and dynasties; here we have documents many, including the non-biblical; but the biblical texts are so full of their one great purpose that they are indifferent to times and seasons; and we learn of them by incidental mention and vague hints only. Jesus came—and went; what matter when?

The Problems group around two centers; first, the birth, life, and death of Jesus; second, about Paul of Tarsus and his career, to which the movements of the apostles between Jesus and him form but an unimportant preface or introduction.

1. The Time of Christ, the Christian Era.

(1) **The Birth of Christ.** It is a familiar fact that we owe the devising of the Christian era to a monk in Rome, Dionysius Exiguus, or The Little, in the sixth century; and that the state of historical literature within his narrow circle was such that he fixed the beginning of the era upon Saturday, January 1, A. D. 1, which was the forty-sixth of the years of Julius Cæsar's reformed calendar, and the year of Rome 754 by Varro's computation. But when inquiry began to be made into the real date of the birth of Jesus, the opinion soon prevailed that the birth was four years earlier, an opinion arising from better information as to the time of Herod's death, and from the offhand inference from the second chapter of Matthew.

We are not to suppose that Dionysius believed that Jesus was born on January 1, A. D. 1. He wished to make the years of the Christian Era agree with the Julian. The church at Rome had been celebrating December 25th in honor of the nativity; and though this custom, probably decreed by the Bishop or Pope Julius I (337-352 A. D.), had originally been adopted in furtherance of the shrewd policy of the church to substitute great Christian festivals for great pagan ones, and so to put a festival of the nativity in place of the jolly Saturnalia of Rome, it naturally led to the belief that Jesus was born December 25th. The Greeks, not yet separated from the Romans, were in the time of Dionysius celebrating January 6th; his initial day of the new era fell between the two. If we should judge from Luke ii:8, we should put the Dies Natalis in any other of the four seasons rather than in the winter.

Dionysius certainly accepted the Roman tradition, and must have believed that Jesus was born just a week before January 1, A. D. 1; to-wit, on Saturday, December 25, B. C. 1; for there is no year zero. And if in accord with current opinion we date the event four years earlier we must say that Jesus was born December 25, B. C. 5.

(2) **The Star of Bethlehem.** Matthew tells us the story, unrecorded by the other evangelists, of the coming of the Magi or Wise Men of the East in obedience to the indications of a star.

"For we have seen his star in the east," or it may mean, "at its rising." It is more likely, however, that this locative phrase, "in the east," denoted the place of the seeing, as if "we in the east saw this star." Why should they have come westward if the eastern rising of the star attracted them? Great search has been made by astronomers for record of some remarkable appearance in the heavens about the year B. C. 4; but neither comet nor new upblazing star like the famous one that flashed up in 1572 in Cassiopeia, and shone for sixteen months before it vanished, is found. Kepler found that there was a notable conjunction of Jupiter, Saturn, and Mars, in the constellation Pisces in B. C. 6; but that was not a star, and does not seem to have been noticed.

Prof. Elias Colbert has collated evidences of a widespread anticipation of the coming of some great one, such anticipation as is voiced in Virgil's Eclogue IV, the "Pollio," written in B. C. 40, which foretells the golden age of peace to follow the birth of a wonderful boy. Dr. Clarke gives similar prophecies from Jewish writers. Prof. Colbert finds some of these refer to a virgin mother. This directed his attention to the constellation Virgo in the Zodiac, the emblem of harvest and plenty. He finds that in B. C. 4 the star Spica, "Alpha Virginis," reached the celestial equator or equinoctial in its passage southward caused by the same movement that makes the precession of the equinoxes. He says that magian astronomers must have noticed this rare position of Spica; and that moved by the old prophecy they may have looked for the Divine boy.

But one verse (Matt. ii:9) puts aside all the astronomers. When the magi left Jerusalem they saw the star in motion, going southward toward Bethlehem; they followed it until it "stood over where the young child was." Then the Star of Bethlehem was a miraculous vision granted to them only; as Dr. Clarke says, "a simple luminous meteor in a star-like form, and at a very short distance from the ground;" for if it had been high, it could not have pointed plainly to the house of the manger (Luke ii:7).

(3) **Death of Herod.** But the astronomers help us grandly on the next question. While in consequence of different ways of reckoning it is a little uncertain from what time to begin to reckon the years of Herod's reign as given by various and varying historians, all point to B. C. 3 or B. C. 4 for his death. Josephus relates that an eclipse of the moon occurred while Herod lay sick at Jericho with his fatal illness, and he just then revived. Soon worse again he was carried to the baths of Callirrhœ; gaining nothing, he was brought again to Jericho, whither he summoned the principal men of the nation, intending to have them all slaughtered, that there might be mourning in the land at his death. Then the desired consent of Augustus to the execution of Antipater, Herod's son, arrived, and the prince was killed. Five days later Herod died, and the Passover was at hand when the week of the funeral was spent. The Passover of that year (B. C. 4) was on April 9th. The eclipses of that time visible in Palestine were on March 23, B. C. 5, which allows no time for the events related; Sept. 15, B. C. 5, which allows too much time, considering the mortal illness of the tyrant; and March 12-13, B. C. 4, which gives 18 days before the Passover. If this time be deemed too short, we may count from the September eclipse; but in either case the death was in March B. C. 4.

(4) **The Nativity.** Now the story of Matthew requires us to allow before the death of Herod

time enough for the flight of Joseph and Mary into Egypt, after the birth of Jesus; and if there were reasons for Herod's time limit of two years and under, we may put the birth of Jesus two years before Dec. 25th of B. C. 5, which was the Christmas next before Herod's death. The birth may have occurred then in B. C. 7, or B. C. 6, or B. C. 5, but not later if we depend upon these data.

(5) **The Census of Quirinius** (A. V. says Cyrenius). St. Luke fixes time of the birth of Jesus by an enrollment ordered by the Emperor Augustus, and effected by the governor or legate Quirinius. This governor did take a census soon after A. D. 6, when he was sent as governor after Archclaus was deposed at that date; but he certainly could not have taken a census in B. C. 4, or 5, since the governors are known from the year B. C. 9 onward. They were Marcus Titius, Caius Sentius Saturninus, and Publius Quinctilius Varus. The death of Herod occurred in the time of Quinctilius Varus. If Quinctilius had taken a census, it might be said that Luke or a copyist had written Quirinius for Quinctilius. But no enrollment is known of in his time. If there were any, it was made for Herod for his own purposes; but in that case it would have been mentioned by Josephus. The census of Quirinius, when he took it, raised a revolt. He was twice governor of Syria under Augustus, but no census can be found, save the one of later date. The Greek statement (Luke ii:2) is *αὕτη ἀπογραφή πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου*. According to Greek ways, this must mean, "This was taken as the first census [of several] while Quirinius ruled Syria." Adam Clarke wants to translate *πρώτη* as if it were a preposition meaning *before*, as if he were saying, "This census occurred *before* Quirinius was governor;" this he does not defend as a classical Greek usage, but finds similar instances in John i:30; *πρώτος μου*, "he was before me," and John xv:18, *ἐμὲ πρώτον ὑμῶν μίσησεν*, "it hated me before it hated you," and in the LXX, 2 Sam. xix:43, *λόγος μου πρώτος . . . τοῦ Ἰούδα*, "our word before Judah's." But in none of these places does *πρώτος* necessarily mean time; in the first and in the last of them it denotes priority in rank, not in time; and in John xv:18 it means *more than*, the idea of superiority. Michaelis and others think that Luke wrote, "*πρὸ τῆς*" which a copyist made into *πρώτη*; this would relieve all difficulty, as it would say, "This enrollment occurred before that of Quirinius." But no MSS. has such text.

The result of the investigation is that we must say that Luke used the wrong name when he wrote Quirinius; and this gospel gives no aid in determining the time of the Nativity. Tertullian brings real help. He was a Roman lawyer of vast erudition, and is in this case an independent witness. In his controversy with Marcion he mentions a census taken in Judæa by Sentius Saturninus as one that would contain an account of the family to which Jesus belonged. Now Saturninus was succeeded B. C. 6 by Varus; and as the census was a completed work when Varus took the office, the birth of Jesus is to be set as early as B. C. 6, probably in B. C. 7. This date will not disagree with Matthew, and is the final conclusion from the data.

(6) **The Genealogies** of Jesus in Matthew and Luke are, as was shown above, of no use in settling questions of time. Every genealogist and every historian is familiar with the fact that a man may be traced from an ancestor by different lines with a different number of steps in the two or more lines. For example, Henry IV of France,

Bourbon, was the eleventh descendant from St. Louis in the French line, but the thirteenth through the house of Navarre. Genealogies can give but an approximate date at best, when there is no question of the links of the chain. The chronologer can do nothing with the fact that by one genealogy thirty names lie between David and Jesus, and forty-one by the other.

(7) **The Baptism of Jesus** was in effect the beginning of his ministry, the duration of which is an important question. After the forty days in the wilderness of temptation, "from that time Jesus began to preach" (Matt. iv:17; Luke iv:14, 15). Luke says, *αὐτὸς ἦν Ἰησοῦς ἀρχόμενος ὡσεὶ ἐτῶν τριάκοντα*, "Jesus himself began to be about 30 years of age," as the A. V. has it. This is susceptible of two interpretations: the common understanding of the words is that this was the beginning of his thirtieth year, positively; but *ἀρχόμενος* may refer to the beginning of his preaching, as in Luke xxiii:5; Acts i:22; and Acts x:37. The rest of the phrase is elastic; a man of 28 or one of 32 would be about 30 years of age. Taking the shortest time, from birth in B. C. 6 we are brought to A. D. 22, if we reckon him 28 years of age, the earliest limit.

John is said to have begun to baptize in the fifteenth year of Tiberius. If this be reckoned from the time when Tiberius became co-regent with Augustus, A. D. 12, John began his career in A. D. 27; if from the death of Augustus, in A. D. 29. We must date the baptism of Jesus between A. D. 22 and A. D. 29.

In John ii:13 we are told that Jesus went to Jerusalem to the Passover, apparently but a few weeks after he began to speak in the synagogues of Galilee. At Jerusalem the Jews said to him, "Forty and six years was this temple in building." Herod began it B. C. 19; the forty-sixth year brings us to A. D. 27, agreeing with the calculation from the regency of Tiberius, and fixing the baptism at A. D. 26 or 27, and thus the beginning of the ministry of Jesus, with the first Passover of John ii:13 in A. D. 27.

(8) **Duration of the Ministry.** The only mode of determining this from the gospels is by finding how many Passovers Jesus attended—two or three?

John speaks of three (ii:13; vi:4, and xii:55); and Farrar (*Encyc. Brit. s. v. Jesus*) says, "On other grounds it is probable that there was one Passover during the ministry which our Lord did not attend." The three Passovers may also be inferred obscurely from passages in Mark. There was then a ministry of more than two years, the silence of Matthew and Luke availing nothing to the contrary; and while the Valentinians limited the ministry to one year, (how wonderful that such a powerful influence should be thrown into the world in a single year!) the prevalent opinion soon was that the ministry lasted three years. Nevertheless the evidence is scanty, and the question intricate, so that there are plausible reasons for the short term.

(9) **The Crucifixion.** The Roman governor at that time was Pontius Pilate. Josephus gives his term of office as ten years, ending in A. D. 37, as he was on his way to Rome when in that year Tiberius died. Including Luke iii:1 we have reason to say he came to Palestine during A. D. 27; and the incidents of Luke xiii:1 and xxiii:12 indicate a residence of a year or two before the crucifixion. Caiaphas was high priest, appointed before Pilate came, and deposed by the next governor; according to Josephus, before the death of Herod Antipas in twentieth year of Tiberius, or

A. D. 34. The limits of the time of the crucifixion are A. D. 28 and A. D. 33 at the Passover time.

The event occurred on Friday. On what years was it possible for the Passover and the Friday to fall into the relation indicated in the gospels? The discussion long rent the church in what was called the Quartodeciman controversy, so called because the Quartodeciman party maintained that the crucifixion fell on the 14th of the month Nisan, which accords with the fourth gospel, while the story of the three Synoptic Gospels puts that agony on the 15th. The almost endless minutiae of the discussion cannot be reproduced here. But within the limits stated above, the years 28, 31 and 32 will not fit either hypothesis; we have left 29, 30 and 33, between which modern opinion still wavers. On grounds already stated, to-wit, the date of the Nativity, the date of the baptism, the age of Jesus, the three Passovers, at the last of which his life was ended, the date A. D. 33 is quite improbable, and A. D. 29 the most probable, with A. D. 30 its close rival, if not superior.

2. Chronology of the Apostolic Period.

The fixing of dates in this period is made difficult by the usual lack of definiteness in the narration; and the most that can be relied upon is what is gained from the connection of events with persons and events known to non-biblical history; and these are often too uncertain.

(1) **In Palestine, the Death of Herod.** Herod Agrippa, grandson of Herod the Great, was made king by Caligula in A. D. 37; and Judæa was added to his Syrian domains by Claudius. His reign of seven years ended in A. D. 44. This marks the martyrdom of James, the Apostle, brother of John.

(2) **In Palestine, a Famine.** The reign of Claudius had several periods of scarcity, of which Tacitus notices one as very severe at Rome itself. The one in Judæa is told of by Josephus, and was not limited to a single year, probably in A. D. 46-48. This is told of in Acts xi, and marks the early period of Paul's missionary work with Barnabas.

(3) **In Damascus, King Aretas.** Aretas was a king at Petra, in Idumæa; how he came into possession of Damascus is not plain. Prior to the death of Tiberius, Aretas was in a quarrel with Herod Antipas; and the governor of Syria, Vitellius, was ordered to help Herod, about A. D. 37. Aretas was not in Damascus himself in Paul's stay, but had a governor there. All that can be determined is that this sway of Aretas was after A. D. 33, and before A. D. 48. It is supposed by Conybeare and Howson that he held Damascus by favor of Caligula, emperor in A. D. 37-41. This is all the help we get to aid in dating the conversion of Saul of Tarsus. If the apostle's escape was in A. D. 38, and that was at the end of his three years, we may put his conversion in A. D. 35 or 36; for by Jewish reckoning, three years need be parts only of three years. This will not suit those who hurry the events at Jerusalem and put the martyrdom of Stephen and the conversion of Saul in the same year, and near the time of the crucifixion.

(4) **In Cyprus, Sergius Paulus.** Secular History gives no trace of the proconsulship of this man.

(5) **Jews Expelled from Rome.** Suetonius tells of this, saying of Claudius, "*Judæos, impulsore Chresto assidue tumultuantes, expulit.*" This may mean that Chrestus—otherwise unheard of—raised riots in the ghetto, or that there were riots among the Jews about Christ. Tacitus, whose record of Claudius' time for all years ex-

cept A. D. 47-54 is missing, mentions the expulsion of astrologers in A. D. 52, but says nothing of Jews. This date accords well with the probable residence of Paul at Corinth, and the coming thither of Aquila and Priscilla.

(6) **At Corinth, Gallio.** Gallio, originally Aunæus Novatus, brother of the famous Seneca, was pretty surely not appointed proconsul in Achaia until after A. D. 49; for Seneca does not recognize his name Gallio in a treatise written about 49, and Seneca was in disfavor prior to that date. We may date Gallio's officeholding about A. D. 50, but for how long is not known. He died A. D. 65. Probably Paul was before him in A. D. 52 or 54.

(7) **In Palestine, Herod Agrippa II.** This Herod was a great-grandson of Herod I the Great and son of Herod Agrippa I, and nephew of the Herod, king of Chalcis, who married Salome, daughter of Herodias. Agrippa II succeeded his uncle in A. D. 48, and in A. D. 53 had the northern part of Palestine, at which time he gave his sister Drusilla to Azizus of Emesa, whom she left for Felix. Paul's coming before Agrippa and Felix must be as late as A. D. 54, and may be later.

(8) **Felix and Festus in Palestine.** Both the coming and the departure of Felix are involved in darkness. He seems, from the account of Josephus taken with that of Tacitus, to have been in Palestine in some subordinate position before he, being brother of Nero's favorite, Pallas, was made procurator or governor. Probably this occurred in A. D. 52. He was not removed before A. D. 56, and his trial at Rome was not later than 61. Some put his recall as early as 57, others in 60. This difficulty seriously affects the dates of Paul's career and his two years of detention at Cæsaræa. Most students prefer the date A. D. 60 for the coming of Festus, putting the arrest of Paul in A. D. 58; his hearing before Festus, Agrippa, and Berenice and the voyage to Rome, A. D. 60-61. To fix his death at 64 or 68 is but guessing and not history. The author of "*Quo Vadis*" has liberty for his extravagances under the maxim "*Poetis mentiri licet;*" the historian stops at the edge of his record.

(9) **The Galatian Visit.** Paul's conferences with other apostles are told of in Gal. i:18, 19, and ii:1. If we date the conversion at A. D. 36 and allow for the looseness of expression common among orientals, we may put the first visit in A. D. 38 and the next in 50, as Conybeare and Howson do. Or putting the second visit in 50 and saying that 14 + 3 = 17, we may put the conversion back to 33, as some later writers wish to do. Conybeare and Howson date Paul's Epistles thus:

Reaching Corinth, writes 1 Thess. sum . . . A. D. 52	
Corinth to Ephesus in 54, writes 1 Cor.,	
spring	57
In Macedonia in autumn, writes 2 Cor.	57
At Corinth, winter, writes Galatians	57
Corinth, spring, writes Romans	58
At Rome writes Philemon, Coloss. and	
Eph., spring	62
— writes Philippians, autumn	62
Acquitted in 63, spring, to Macedonia and Asia;	
in Spain 64-66, and again to Asia, he writes:	
From Macedonia, 1 Tim., summer A. D. 67	
From Ephesus, Titus, autumn	67
In prison at Rome, spring, 2 Tim.	68
Executed in May or June	68

Prof. Harnack, one of the latest to lay lines in the mists of uncertainty, dates thus: A. D. 48-49,

1 and 2 Thessalonians; 53, 1 Cor., Gal., and 2 Cor.; 53-54, Romans; 57-59, Coloss., Philemon, Ephes. (perhaps not Paul's), Phil.; 59-64, the kernels of the Pastorals to Timothy and Titus, finished by another. Hebrews he ascribes to Barnabas, probably somewhere between 65 and 95; to John the Presbyter and not the Apostle he ascribes the Apocalypse, 93 to 96, and the fourth gospel and the three epistles, between 89 and 110. The gospel of Mark he dates 65-70, followed by Matthew's, 70-75, and by Luke and Acts, 78-93. 1 Peter, between 60 and 96, and 2 Pet. somewhere from 150 to 180, he says are not from the Apostle; and he sets the Epistles of Jude and James after 100 and 120. Yet after thus defying tradition, he urges that more credit be given to it saying, "A time will come when . . . what . . . can be ascertained will be generally recognized, . . . (including) the general truth of tradition, apart from a few important exceptions. Partly before the destruction of Jerusalem (A. D. 70), and partly by the time of Trajan (98-117), all the fundamental stamps of Christian traditions, teachings, pronouncements, and even ordinances, except the New Testament as a collection, were essentially perfect; and it is necessary to conceive of their institution within that period, and to realize how the general ground lines of catholicism must be conceived of in the time between Trajan and Commodus (117-190)." S. W.

CHRYSOLITE (krís'ô-lít), (Rev. xxi:20). See TARSHISH.

CHRYSOPRASUS (krí-sôp'ra-sûz), (Gr. χρυσοπρασος, *krus-ôp'ra-sus*, Rev. xxi:20). (See SHOHAM.)

CHUB (küb), (Heb. כּוּב, *koob*), a word which occurs only in Ezek. xxx:5. It would appear to be the name of a country or people in alliance with Egypt, and probably of northern Africa or of the lands near Egypt to the south.

CHUN (kūn), (Heb. כּוּן, *koon*, founding), a city of Syria, conquered by David (1 Chron. xviii:8). In the parallel passage (2 Sam. viii:8) it is called Berothai, i. e., probably *Berytus*, now Beirut. (See BEROthAI.)

CHURCH (chûrch), (Gr. Ἐκκλησία, *ek-klay-see'a*, assembly).

The original Greek word, in its larger significance, denotes a number of persons called together for any purpose, an assembly of any kind, civil or religious. As, however, it is usually applied in the New Testament to religious assemblages, it is very properly translated by 'assembly,' in the few instances in which it occurs in the civil sense (Acts xix:32, 39, 41). It is, however, well to note that the word rendered 'assembly' in these verses is the same which is elsewhere rendered 'church.'

In a few places the word occurs in the Jewish sense, of a congregation, an assembly of the people for worship, either in a synagogue (Matt. xviii:17) or generally of the Jews regarded as a religious body (Acts vii:38; Heb. ii:12). The text last cited is quoted from Ps. xxii:22, where the Septuagint uses Ἐκκλησία for the Hebrew קהל, *qahal*, which has the same meaning, namely, assembly, congregation, or a called or invited gathering. Elsewhere also this word which we render 'church' in the New Testament is used by the Septuagint for the Hebrew word which we render 'congregation' in the Old Testament.

But the word most frequently occurs in the Christian sense of an assemblage (of Christians) generally (1 Cor. xi:18). Hence it denotes a

church, the Christian church; in which, however, we distinguish certain shades of meaning, viz.—

1. A particular church, a church in a certain place, as in Jerusalem (Acts viii:1; xi:22, etc.), in Antioch (Acts xi:26; xiii:1, etc.), in Corinth (1 Cor. i:2; 2 Cor. i:1), etc.
2. Churches of (Gentile) Christians, without distinguishing place (Rom. xvi:4).
3. An assembly of Christians which meets anywhere, as in the house of any one (Rom. xvi:5; 1 Cor. xvi:19; Philem. 2). The Church universal—the whole body of Christian believers (Matt. xvi:18; 1 Cor. xii:28; Gal. i:13; Eph. i:22; iii:10; Heb. xii:23, etc.).

CHUSHAN-RISHATHAIM (kū'shan-rísh'a-thā'im), (Heb. כּוּשָׁן רִישָׁתַיִם, *koo-shan'rish-aw-thah'-yim*), a king of Mesopotamia, by whom the Israelites were oppressed for eight years (B. C. 1575 to B. C. 1567), until delivered by Othniel (Judg. iii:8-10). (See CUSHAN-RISHATHAIM.)

CHUZA (kū'zà), properly Chuzas, (Gr. Χουζάς, *khood-zas'*), steward of Herod Antipas, whose wife Joanna was one of those who employed their means in contributing to the wants of Christ and his apostles (Luke viii:3; xxiv:10).

CICCAR (sic'câr), (Heb. כִּכָּר, *kik-kawr'*, circuit), a topographical term applied especially to the Jordan. (See JORDAN; CITIES OF THE PLAIN.)

CILICIA (sí-lísh'ÿ-à), (Gr. Κιλικία, *Cilicia*), the southeastern part of Asia Minor, bounded on the west by Pamphylia; separated on the north from Cappadocia by the Taurus range, and on the east by Amanus from Syria; and having the Gulf of Issus (Iskenderoon) and the Cilician Sea (Acts xxvii:5) on the south.

By the ancients the eastern part was called Cilicia Propria *proper*, or the level Cilicia; and the western, *the rough or mountainous*. The former was well watered, and abounded in various kinds of grain and fruits (Xenoph. *Anab.* i:2. sec. 22). The chief towns in this division were *Issus* (Xenoph. *Anab.* i:4), at the southeastern extremity, celebrated for the victory of Alexander over Darius Codomannus (B. C. 333), and not far from the passes of Amanus or the so-called *gates of Amanus* (Polyb. xii:8); *Solæ*, originally a colony of Argives and Rhodians, the birthplace of Menander, the comic poet (B. C. 262), the stoic philosopher Chrysippus (B. C. 206), and of Aratus, author of the astronomical poem *The Things Seen* (B. C. 270); and *Tarsus*, the birthplace of the Apostle Paul. (See TARSUS.) Cilicia Trachea furnished an inexhaustible supply of cedars and firs for ship-building; it was also noted for a species of goat, of whose skins cloaks and tents were manufactured. Its breed of horses was so superior that 360 (one for each day of the year) formed part of the annual tribute to the king of Persia (Herod. iii:90). The neighborhood of Corycus produced large quantities of saffron. Herodotus says that the first inhabitants of the country were called Hypachæi, Ἰπαχαιοί; and derives the name of Cilicia from Cilix, son of Agenor, a Phœnician settler (vii:91). He also states that the Cilicians and Lycians were the only nations within the Halys who were not conquered by Cræsus (i:28). Though partially subjected to the Assyrians, Medes, Persians, Syrians, and Romans, the Eleuthero, or free, Cilicians, as the inhabitants of the mountainous districts were called, were governed by their own kings (Reguli, Tacit. ii:78) till the time of Vespasian. The seacoast was for a long time occupied by pirates, who carried on the appropriate vocation of slave-merchants, and found

ample encouragement for that nefarious traffic among the opulent Romans (Mannert, vi:1; Strabo, xiv:5); but at last their depredations became so formidable that Pompey was invested with extraordinary powers for their suppression, which he accomplished in forty days. He settled the surviving freebooters at Solæ, which he rebuilt and named Pompeiopolis. Cicero was proconsul of Cilicia, and gained some successes over the mountaineers of Amanus, for which he was rewarded with a triumph (*Epist. ad Fam.* xv:4). Many Jews were settled in Cilicia (Acts vi:9).

According to the modern Turkish divisions of Asia Minor, Cilicia Proper belongs to the Pashalic of Adana; and Cilicia Trachea to the Liwah of Itchil in the Mousselimlik of Cyprus.

CINNAMON (sîn'nâ-mûn). See KINNAMON.

CINNEROTH (sîn'ne-rôth), (Heb. כְּנֶרֶת, *kin-neroth*'), a district named with the "land of Naphtali" (1 Kings xv:20). It probably took its name from the adjacent city or lake, which in modern editions is spelt Chinneroth. Possibly it was the small district north of Tiberias afterwards known as "the plain of Gennesaret." (See CHINNERETH.)

CIRAMA (sîr'a-mâ), mentioned (1 Esdr. v:20) as returning from Babylon with Zorobabel. (See RAMAH.)

CIRCLE (sêr'k'l), (Heb. כְּרוּג, *khoog*). In Isaiah we read of "the circle of the earth" (Is. xl:22). The Bible therefore taught the globular shape of the earth long before the fact was discovered by modern astronomers.

In Job xxii:14 the same word is translated "circuit."

CIRCUIT (sêr'kî't). In 1 Sam. vii:16 (Heb. סָבַב, *saw-bab'*, to revolve) a regular tour of inspection; in Eccles. i:6 the periodical direction of the winds, which in the east are quite regular in their seasons. Also *the act of going round* (Heb. הִסְבִּיבָה, *tek-oo-faw'*, revolution); the apparent diurnal revolution of the sun around the earth (Ps. xix:6); the completion of a year (Exod. xxxiv:22).

CIRCUMCISION (sêr'kûm-sîzh'ûn), (Heb. מִילָה, *moo-law'*; Gr. περιτομή, *per-it-om-ay'*, a cutting around).

(1) **History.** The history of Jewish Circumcision lies on the surface of the Old Testament. Abraham received the rite from Jehovah, Moses established it as a national ordinance, and Joshua carried it into effect before the Israelites entered the land of Canaan. Males only were subjected to the operation, and it was to be performed on the eighth day of the child's life; foreign slaves also were forced to submit to it, on entering an Israelite's family. Those who are unacquainted with other sources of information on the subject besides the Scriptures might easily suppose that the rite was original with Abraham, characteristic of his seed, and practiced among those nations only who had learned it from them. This, however, appears not to have been the case.

First of all, *the Egyptians* were a circumcised people. Vonck, followed by Wesseling (*ad Herod.* ii:37) and by numerous able writers, alleged that this was not true of the whole nation, but of the priests only; that at least the priests were circumcised is beyond controversy. No one can for a moment imagine that they adopted the rite from the despised shepherds of Goshen; and we are immediately forced to believe that Egyptian circumcision had an independent origin. A great preponderance of argument, however, appears to us to prove that the rite was universal

among the old Egyptians, as long as their native institutions flourished; although there is no question that, under Persian and Greek rule, it gradually fell into disuse, and was retained chiefly by the priests and by those who desired to cultivate ancient wisdom.

Herodotus distinctly declares that the Egyptians practiced circumcision; and that he meant to state this of the whole nation is manifest (*Herod.* ii:37). It is difficult to suppose that the historian could have been mistaken on this point, considering his personal acquaintance with Egypt. Further, he informs us that the Colchians were a colony from Egypt, consisting of soldiers from the army of Sesostris. With these he had conversed (ii:104), and he positively declares that they practiced circumcision.

The same remark will apply to the savage Troglodytes of Africa, every branch of whom, except one (the Kolobi), as Diodorus informs us (iii:31), was circumcised, having learnt the practice from the Egyptians.

Herodotus, moreover, tells us that the Ethiopians were also circumcised; and he was in doubt whether they had learned the rite from the Egyptians, or the Egyptians from them. By the Ethiopians we must understand him to mean the inhabitants of Meroe or Sennaar. In the present day the Coptic Church continues to practice it; the Abyssinian Christians do the same; and that it was *not* introduced among the latter with a Judaical Christianity appears from their performing it upon both sexes. Oldendorp describes the rite as widely spread through Western Africa—16 deg. on each side of the Line,—even among natives that are not Mohammedan. In later times it has been ascertained that it is practiced by the Kafir nations in South Africa, more properly called Kosa, or Amakosa.

How far the rite was extended through the Syro-Arabian races is uncertain. The Philistines, in the days of Saul, were however uncircumcised; so also, says Herodotus (ii:104), were all the Phœnicians who had intercourse with the Greeks. That the Canaanites, in the days of Jacob, were not all circumcised, is plain from the affair of Dinah and Shechem. The story of Zipporah (Exod. iv:24, 25) who did not circumcise her son until fear came over her that Jehovah would slay her husband Moses, proves that the family of Jethro, the Midianite, had no fixed rule about it, although the Midianites are generally regarded as children of Abraham by Keturah. On the other hand, we have the distinct testimony of Josephus (*Antiq.* i:12, 2) that the Ishmaelite Arabs inhabiting the district of Nabathæa were circumcised after their 13th year: this must be connected with the tradition which no doubt existed among them, of the age at which their forefather Ishmael underwent the rite (Gen. xvii:25). A negative argument is more or less dangerous: yet there is something striking in the fact that the books of Moses, of Joshua, and of Judges never bestow the epithet *uncircumcised* as a reproach on any of the seven nations of Canaan, any more than on the Moabites or Ammonites, the Amalekites, the Midianites, or other inland tribes with whom they came into conflict. On the contrary, as soon as the Philistines become prominent in the narrative, after the birth of Samson, this epithet is of rather common occurrence. The fact also of bringing back, as a trophy, the foreskins of slain enemies, never occurs except against the Philistines (1 Sam. xviii:25-27). We may perhaps infer, at least until other proof or disproof is attained, that while the Philistines, like the Sidonians and the other mari-

time Syrian nations known to the Greeks, were wholly strangers to the practice, yet among the Canaanites, and all the more inland tribes, it was at least so far common that no general description could be given them from the omission.

It appears from Josephus (*Antiq.* xiii:9) that when Hyrcanus subdued the Idumæans he forced them to be circumcised on pain of expatriation. This shows that they had at least disused the rite. But that is not wonderful, if it was only a custom, and not a national religious ordinance; for, as Michaelis observes, the disuse of it may have dated from the edict of Antiochus Epiphanes, of which it is said (1 Macc. i: 41, 42), 'The King Antiochus wrote to all his kingdom, that all should be one people; and that all should keep the ordinances of his country: and all the nations acquiesced according to the word of the king.'

The rather obscure notices which are found in Jeremiah and Ezekiel of the circumcision of the nations who were in immediate contact with Israel admit of a natural interpretation in conformity with what has been already adduced (Jer. ix:25; Ezek. xxxi:18; also xxxii:19, *et passim*). The difficulty turns on the new *moral* use made of the term 'uncircumcised,' to mean simply *impure*.

How far the rite of circumcision spread over the southwest of Arabia no definite record shows. The silence of the Korân confirms the statement of Abulfedâ that the custom is older than Mohammed, who, it would appear, in no respect regarded it as a religious rite. Nevertheless it has extended itself with the Mohammedan faith, as though it were a positive ordinance. Pocock (*Specimen Hist. Arab.*, p. 309) cites a tradition, which ascribes to Mohammed the words: 'Circumcision is an ordinance for men, and honorable in women.' This extension of the rite to the other sex might, in itself, satisfy us that it did not come to those nations from Abraham and Ishmael. We have already seen that Abyssinian circumcision has the same peculiarity: so that it is every way probable that Southern Arabia had the rite from the same source or influence as Ethiopia. In fact, the very closest relations are known to have subsisted between the nations on the opposite coasts of the Red Sea.

(2) **Moral Meaning.** The moral meaning of the word 'uncircumcised' was a natural result of its having been made legally essential to Hebrew faith. 'Uncircumcised in heart (Lev. xxvi:41) and ears' (Jer. vi:10) was a metaphor to which a prophet would be carried, as necessarily as a Christian teacher to such phrases as 'unbaptized in soul,' or 'not washed by regeneration.'

(3) **Origin and Purpose.** If, however, we try to take a step farther back still, and ask *why* this ordinance in particular was selected, as so eminently essential to the seed of Abraham, we probably find that we have reached a point at which we must be satisfied with knowing the fact without the reason. Every external ordinance, as for instance baptism, must have more or less that is arbitrary in it. It is, however, abundantly plain that circumcision was *not* intended to separate the Jews from other nations generally, for it could not do so: and, least of all, from the Egyptians, as the words in Joshua v:9 show. Rather, it was a well known and already understood *symbol of purity*.

A great deal of speculation and argument has been employed on the utility and origin of the rite to the Egyptians and others. Herodotus, long ago, declared that it was adopted *for cleanliness*. καθαριότητος εἵνεκα, and a slight acquaintance with the ideas of the Turks, concerning per-

sonal defilement will make it easy to believe that an idea of cleanliness continued the practice among nations which had once become habituated to it. By the ancient Egyptians this same spirit was carried to a great height; nor is it wonderful that in hot climates detailed precepts of cleanliness form a very large part of primitive religion. But we can hardly rest in this as a sufficient account of the *origin* of the rite. It was practiced, moreover, by the males of African tribes so savage and so little devoted to religious ceremonialism that a broader ground must be sought for it than simple cleanliness.

The fact, also, that most of these nations performed whatever operation it was, not on infants, but on those who were advanced towards marriageable age, conspires to indicate that some physical inconvenience gradually showed itself (as with the Bushmen females, through the enlargement of the parts), of which they desired to get rid. Jost looks upon *infant* circumcision as the distinguishing mark of Judaism; and this may be nearly correct, though we have seen that, according to Abulfedâ, some Arabs delayed it only till after teething.

If an independent and human origin has been discovered for Egyptian circumcision, the thought of necessity arises that the Israelites must have had it from the same sources as the nations around them; and it has been discussed (Spencer, *De Leg. Heb.*) whether they even borrowed it from the Egyptians. The idea has naturally given much offense; but in truth the question involves no peculiar difficulty; it is only part of another far wider inquiry. It is well known that many other ancient nations had various ceremonies and institutions in common with the Jews, and that the Hebrew law is by no means in all points original. That sacrifice pre-existed is on the surface of the Bible History. The same, however, is true of temples, tabernacles, priests, ever-burning fire, oracles, etc. The fact has been often denoted by saying that the Jewish institutions are a selection, revision and re-enactment of an older patriarchal religion.

The process of restoring a circumcised person to his natural condition by a surgical operation was sometimes undergone. Against this Paul cautions the Corinthians (1 Cor. vii:18). The attitude of early Christianity towards circumcision as a rite necessary to salvation is one of absolute hostility (Acts xv:1; Gal. v:2). While the Apostles forbade its imposition by authority on the Gentiles, as in the case of Titus (Gal. ii: 3-5), they made no objection to its practice as a matter of expediency, as in the case of Timothy (Acts xvi:3).

(4) **Modern Surgery.** Circumcision is strongly recommended by a multitude of the medical profession as a remedy for many nervous diseases so often apparent in children of the present day. The most beneficial results have frequently followed the operation.

Criticism has been made by medical men regarding the employment of unskilled persons by Jews in performing the operation, who are not always cleanly in their persons and methods.

CIS (sîs), (Acts xiii:21). See KISH, 1.

CISAI (sî'sai), (Esth. ii:5). See KISH, 2.

CISTERN (sîs'tĕrn), (Heb. בַּיַּר, *bore'*, well, pit).

In a country which has scarcely more than one perennial stream, where fountains are not abundant, and where the months of summer pass without rain, the preservation of the rain water in cisterns must always have been a matter of vast

importance, not only in the pasture grounds, but in gardens, and, above all, in towns. Hence the frequent mention of cisterns in Scripture, and more especially of those which are found in the open country. These were, it seems, the property of those by whom they were formed (Num. xxi:22). They are usually little more than large pits, but sometimes take the character of extensive subterranean vaults, open only by a small mouth, like that of a well. They are filled with rain water, and (where the climate allows) with snow during winter, and are then closed at the mouth with large flat stones, over which sand is spread in such a way as to prevent their being easily discovered. If by any chance the waters which the shepherd has thus treasured up are lost by means of an earthquake or some other casualty, or are stolen, both he and his flocks are exposed to great and imminent danger; as are also travelers who hasten to a cistern and find its waters gone. For this reason a failure of water is used as the image of any great calamity (Is. xli:17, 18; xlv:3). There is usually a large deposit of mud at the bottom of these cisterns, so that he who falls into them, even when they are without water, is liable to perish miserably (Gen. xxxvii:22, *sq.*; Jer. xxxviii:6; Lam. iii:53; Ps. xl:2; lxix:15). Cisterns were sometimes used, when empty, as prisons, and indeed prisons which were constructed underground received the same name, *בֵּר* (Gen. xxxix:20; xl:15).

In cities the cisterns were works of much labor, for they were either hewn in the rocks or surrounded with subterranean walls, and lined with a fine incrustation. The system which in this respect formerly prevailed in Palestine is, doubtless, the same that exists at present; and indeed there is every probability that most of the cisterns now in use were constructed in very ancient times. The main dependence of Jerusalem at the present day is on its cisterns, and this has probably always been the case. There are immense cisterns now and anciently existing within the area of the temple, supplied partly by rain water and partly by an aqueduct from Solomon's Pools, and which, of themselves, would furnish a tolerable supply in case of a siege. But, in addition to these, almost every private house in Jerusalem of any size is understood to have at least one or more cisterns, excavated in the soft limestone rock on which the city is built. The cisterns have usually merely a round opening at the top, sometimes built up with stonework above, and furnished with a curb and a wheel for the bucket, so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses during the rainy season, and, with proper care, remains pure and sweet during the whole summer and autumn. In this manner most of the larger houses and the public buildings are supplied. The Latin convent, in particular, is said to be amply furnished, and in seasons of drought is able to deal out a sufficiency for all the Christian inhabitants of the city.

Most of these cisterns have undoubtedly come down from ancient times, and their immense extent furnishes a full solution of the question as to the supply of water for the city. Under the disadvantages of its position in this respect, Jerusalem must necessarily have always been dependent on its cisterns; and a city which thus annually laid in its supply for seven or eight months could never be overtaken by a want of water during a siege. Nor is this a trait peculiar to the Holy City, for the case is the same through-

out all the hill country of Judah and Benjamin. Fountains and streams are few, as compared with Europe and America, and the inhabitants, therefore, collect water during the rainy season in tanks and cisterns in the cities, in the fields and along the high roads, for the sustenance of themselves and of their flocks and herds and for the comfort of the passing traveler. Many, if not the most, of these are obviously antique, and they exist not unfrequently along the ancient roads which are now deserted. Thus, on the long-forgotten way from Jericho to Bethel, 'broken cisterns' of high antiquity are found at regular intervals. That Jerusalem was thus actually supplied of old with water is apparent also from the numerous remains of ancient cisterns still existing in the tract north of the city, which was once enclosed within the walls, and which modern excavations have investigated carefully.

Figurative. The left ventricle of the heart, which retains the blood till it be redispersed through the body, is called a cistern (Eccles. xii:6). Wives are called cisterns, as they, when dutiful, are a great pleasure, assistance and comfort to their husbands (Prov. v:15). The comparison of a wife to a cistern, in the passage just quoted, means, "Keep at home, wander not to others," follow not her who says, "Stolen waters are sweet." Idols, armies and outward enjoyments, when trusted to, are "broken cisterns that can hold no water;" they can afford no solid or lasting happiness and comfort (Jer. ii:13). They are soon emptied of all the aid and comfort which they possess and cannot fill themselves again.

CITIES (sīt'īz). See TOWNS.

CITIES, FOUNDING OF (cīt'īz, found'ing ōv).

The beginnings of the first cities when they had as yet no models for civic government is a very interesting study.

(1) **Signification of Words.** The principal Semitic words employed for "city" are in themselves very suggestive. We have first a word which signifies the "meeting place" of men, of flocks and herds, of caravans and of great routes of travel. It indicates a gathering place, a good station for trade, and a convenient depot for supplies. In a historical sense it includes everything from the most insignificant village to Jerusalem (1 Kings i:41-45; Is. i:21, etc.) and Carthage, "new city."

A second word suggests a slightly different thought. It is a "watching place," a collection of people having property of value over which they erected a primitive watch tower (*cf. Judg. ix:51 ff.*, for one of Canaanitic origin). This indicates a stage at which the encampment or depot is no longer likely to be broken up. The town was secured by the watch tower, which later became an adjunct of regular walls and gates, or was enlarged into a citadel (*e. g. Judg. ix:46*).

A poetical designation among the Babylonians and Assyrians was *alu*. Originally meaning a number of tents, it commemorates the encampment as the foundation of a subsequent city.

We have also the word "Medina," meaning "jurisdiction." It is employed, however, in Hebrew and Biblical Aramaic, only of provinces, or loosely, of a country generally. In Syriac, Arabic and modern Hebrew it means only a city.

(2) **Beginnings.** The typical Semitic city, large or small, retained plainly the traces of these historical beginnings. It was in the "broad place" near the gate that the public meetings were held (Neh. viii:1-3), where the elders of the city sat for conference and where there were

judicial proceedings (Job xxix:7 ff.; Prov. xxi:22, etc.; also 2 Sam. xv:2; Deut. xvii:5). This was a marked feature of Jerusalem, throughout Old Testament history. The great bazaars also, as a rule, near the principal gate, perpetuated the old institution of the depot and market at the meeting place of caravan roads by an exposition of wares from far and near. Damascus, for instance, still has bazaars not unlike those which Ahab was permitted by treaty to hold there twenty-seven centuries ago (1 Kings xx:34). The wide areas which were set apart for one trade or another (Jer. xxxvii:21) long constituted the only streets, and the multiplied booths and bazaars illustrated the growth of the "city" from the primitive villages.

What are now called streets were mostly crooked and narrow passages from one "quarter" to another, and a straight avenue was a notable exception. Hence the distinguishing name given to the street called "Straight" in Damascus (Acts ix:11).

Thus the building of cities is recognized by the Bible (Gen. iv:17) as a step towards civilization.

(3) **Government.** It accordingly marks the first type of Semitic government, but we are not to suppose that the early Semites who founded and perpetuated villages and towns in Babylonia, Mesopotamia or Palestine passed rapidly to the methods of city life from the nomadic mode of existence. Neither are we to suppose that the habits of primitive patriarchal rule were speedily discarded. On the contrary, it is possible to trace the influence of the patriarchal system in the establishment and regulation of the Semitic cities, and even to find there some reproduction in type of the essential elements of the old tribal government.

Throughout the North Semitic realm the simple constitution of the city or state included the rule of a "king" between whom and the common people there stood a circle of nobles or "great men," the position of the one or the others being normally hereditary.

This king was, we may assume, the chief elder of the clan which founded the settlement, and his principal function was not to rule, but to act as a referee, to represent his people in treaties and to perform generally the duties of leader among the council of prominent men. After this the development of functionaries was a matter of easy transition.

An instance of the development of the "council of elders" is described in Exod. xviii, where Jethro the Midianite gives advice upon which the organization of the clans of Israel was carried out.

After a time the "counsellor" became a "king," and the Oriental monarchs still retain the simplicity of administrative type characteristic of the earliest "kingdoms."

These cities maintained a separate and an independent existence, and this often resulted in serious conflicts between them, but confederations were sometimes formed to enable them to successfully meet the common invader. (*History, Prophecy and the Monuments.* By James F. McCurdy, Ph. D., LL.D., pp. 32-34.)

CITIES OF REFUGE (šit'iz òv rēf'ūj), (Heb. עֲרֵי הַמִּקְלָט, *aw-ray' ham-mik-lawt'*). Places of refuge where, under the cover of religion, the guilty and the unfortunate might find shelter and protection were not unknown among the ancient heathen.

(1) **Early Abuse.** The *jus asyli*, or right of shelter and impunity, was enjoyed by certain

places reputed sacred, such as groves, temples and altars. This protective power commonly spread itself over a considerable district round the holy spot, and was watched over and preserved by severe penalties. Yet the fate of Pausanias, were there no other similar case, shows that it could not always stand against the assaults of popular indignation.

Among the Greeks and Romans the number of these places of asylum became in process of time very great, and led, by abuse, to a fresh increase of criminals. Tiberius, in consequence, caused a solemn inquiry into their effects to be made, which resulted in a diminution of their number and a limitation of their privileges.

In the Apocrypha (2 Macc. iv:33) mention is made of a city having the *jus asyli*, the right of asylum—'Onias withdrew himself into a sanctuary at Daphne that lieth by Antiochia.' The temple of Diana at Ephesus (Acts xix:27) was also a heathen asylum, whose privileges in this respect increased with the progress of time.

(2) **Asylums in Churches.** This pagan custom passed into Christianity. As early as Constantine the Great, Christian churches were asylums for the unfortunate persons whom an outraged law or powerful enemies pursued. Theodosius, in 431, extended this privilege to the houses, gardens and other places which were under the jurisdiction of the churches, and the synod of Toledo, in 681, widened the right of asylum to thirty paces from every church. Since then this ecclesiastical privilege prevailed in the whole of Catholic Christendom, and was preserved undiminished, at least in Italy, so long as the papal independence remained. The right acted beneficially in ages when violence and revenge predominated, and fixed habitations were less common than now; but its tendency to transfer power from the magistrate to the priesthood was injurious to the inviolability of law and the steady administration of justice. It has accordingly in recent times been abrogated by most governments.

(3) **Framing of the Institution.** Among the Jew the 'cities of refuge' bore some resemblance to the asylum of the classic nations, but were happily exempt from the evil consequences to which reference has been made, and afford, even to the present day, no mean proof of the superior wisdom and benignant spirit of the Jewish laws.

The institution was framed with a view to abate the evils which ensued from the old-established rights of the blood-avenger (see BLOOD-REVENGE), and thereby to further the prevalence in the nation of a mild, gentle and forgiving spirit.

From the laws on this point (Exod. xxi:13; Num. xxxv:11-32; Deut. xix:1-13) it appears that Moses set apart out of the sacerdotal cities six as 'cities of refuge.' There were, on the eastern side of the Jordan, three, namely, Bezer in the wilderness, in the plain country of the Reubenites, and Ramoth in Gilead of the Gadites, and Golan in Bashan of the Manassites' (Deut. iv:41, 42); on the western side three, namely, 'Kedesh in Galilee in Mount Naphtali, and Shechem in Mount Ephraim, and Kirjath-arba, which is Hebron, in the mountain of Judah' (Josh. xx:7). If found desirable, then other cities might be added. An inspection of the map will show how wisely these places were chosen so as to make a city of refuge easy of access from all parts of the land. To any one of these cities a person who had unawares and unintentionally slain any one might flee, and if he reached it before he was overtaken by the avenger of blood, he was safe within its shelter,

provided he did not remove more than a thousand yards from its circuit, nor quit the refuge till the decease of the high priest under whom the homicide had taken place. If, however, he transgressed these provisions, the avenger might lawfully put him to death. The roads leading to the cities of refuge were to be kept in good repair. Before, however, the fugitive could avail himself of the shelter conceded by the laws, he was to undergo a solemn trial, and make it appear to the satisfaction of the magistrates of the place where the homicide was committed that it was purely accidental. Should he, however, be found to have been guilty of murder, he was delivered 'into the hands of the avenger of blood, that he might die.'

(4) **Bribes Unavailing.** And the Israelites were strictly forbidden to spare him either from considerations of pity or in consequence of any pecuniary ransom. This disallowal of a compensation by money in the case of murder shows a just regard for human life, and appears much to the advantage of the Hebrew legislation when compared with the practice of other countries (Athens, for instance, and Islam), in which pecuniary atonements were allowed, if not encouraged, and where in consequence the life of the poor must have been in as great jeopardy as the character of the wealthy.

(5) **The Homicide.** The asylum afforded by Moses displays the same benign regard to human life in respect of the homicide himself. Had no obstacle been put in the way of the Goel, instant death would have awaited any one who had the misfortune to occasion the death of another. By his wise arrangements, however, Moses interposed a seasonable delay and enabled the manslayer to appeal to the laws and justice of his country. Momentary wrath could hardly execute its fell purposes, and a suitable refuge was provided for the guiltless and unfortunate.

Yet, as there is a wide space between the innocence of mere homicide and the guilt of actual murder, in which various degrees of blame might easily exist, so the legislator took means to make the condition of the manslayer less happy than it was before the act or the mischance, lest entire impunity might lead to the neglect of necessary precaution and care. With great propriety, therefore, was the homicide made to feel some legal inconvenience. Accordingly, he was removed from his patrimony, restricted in his sphere of locomotion, affected indirectly in his pecuniary interests, and probably reduced from an affluent or an easy station to one of service and labor. The benefit of the protection afforded was common to strangers and sojourners with native Israelites.

(6) **Rabbinical Authority.** What ensues rests on the authority of the Rabbins. In order to give the fugitive all possible advantage in his flight it was the business of the Sanhedrim to make the roads that led to the cities of refuge convenient by enlarging them and removing every obstruction that might hurt his foot or hinder his speed. No hillock was left, no river was allowed over which there was not a bridge, and the road was at least two and thirty cubits broad. At every turning there were posts erected bearing the words *Refuge, Refuge*, to guide the unhappy man in his flight, and two students in the law were appointed to accompany him, that, if the avenger should overtake him before he reached the city, they might attempt to pacify him till the legal investigation could take place.

When once settled in the city of refuge the manslayer had a convenient habitation assigned him gratuitously, and the citizens were to teach

him some trade wherby he might support himself. To render his confinement more easy, the mothers of the high-priests used to feed and clothe these unfortunate fugitives, that they might not be impatient and pray for the death of their sons, on whose decease they were restored to their liberty and their property. If the slayer died in the city of refuge before he was released, his bones were delivered to his relations, after the death of the high-priest, to be buried in the sepulchre of his fathers. In addition to the right of asylum reference appears to be made to a custom which prevailed from very early times, both among the chosen people and the nations of the world, of fleeing, in case of personal danger, to the altar. With the Jews it was customary for the fugitive to lay hold of the horns of the altar, whether in the tabernacle or temple; by which, however, shelter and security were obtained only for those who had committed sins of ignorance or inadvertence; thus true did Moses remain to his principle that the wilful shedding of human blood could only by blood be atoned—a principle which the advances of civilization and the spread of the gentle spirit of the gospel have caused to be questioned, if not exploded (Exod. xxi:14; 1 Kings i:50; ii:28). From the last two passages it seems that state criminals also sought the protection of the altar, probably more from the force of custom than any express law. Their safety, however, depended on the will of the king, for in the passages referred to it appears that in one case (that of Adonijah) life was spared, but in the other (that of Joab) it was taken away even 'by the altar' (Comp. Matt. xxiii:35).

CITIES OF THE PLAIN (cīt'īz ōv thē plān).

This subject has been ably treated in the light of recent discoveries by the eminent Sir William Dawson in his *Egypt and Syria*, from which the following epitome is made:

(1) **Name.** The name 'Dead Sea' is modern and unknown to Bible writers, who call it the 'Salt Sea,' 'the Sea of the Plain, or Ghor,' 'the East Sea,' etc.' No ideas of desolation are here associated with it. On the contrary, the plain at its northern end is said to have resembled the Garden of the Lord, and Engedi on its western side was celebrated for its vineyards and its beauty.

But how does this accord with the terrible story of the destruction of the Cities of the Plain?

(2) **Topography.** To understand this we must note the topography of the Ghor or depressed Jordan valley in connection with the historical notices in the book of Genesis.

It may be affirmed in the first place that Sodom and its companion cities were not, as held by later tradition, at the south end of the sea, but at its northern end. Canon Tristram has ably supported this view, as has also Dr. Merrill in his work, *East of the Jordan*. This northern end of the sea must at the time have occupied approximately its present position. This appears from the name, 'Cities of the Plain,' or Ciccar—that is, the Jordan valley, or the lower end of it. It is also stated that Abraham and Lot could see this plain from the high ground between Bethel and Hai, whence only the northern end of the Dead Sea is visible. Abraham could not see the cities of Mamre, but he saw their smoke ascending. The most convincing geographical note, however, is that in Genesis xiv., which describes the invasion of Canaan by the five Eastern kings in the days of Abraham. They are said to have come down on the east side of the Dead Sea, to have defeated the Hivites and Amalekites on the south

and then to have come up by way of Engedi (Hazezon-Tamar) on the west side of the sea, and to have fallen on the Sodomites and their allies from the southwest. Thus the Book of Genesis, from which alone we have any contemporary account of these cities, fixes their position.

(3) **Manner of Destruction.** The manner of their destruction also connects them with the locality. We are told that there were 'slime pits'—that is, petroleum wells—in their vicinity. Now, regions of bitumen, like that of the Dead Sea, are liable to eruptions of the most dangerous character. Of these we have had examples in the oil regions of America.

Now, if we suppose that at the time referred to accumulations of inflammable gas and petroleum existed below the Plain of Siddim, the escape of these through the opening of a fissure along the old line of fault might produce the effect described—namely, a pillar of smoke rising up to heaven, burning bitumen and sulphur raining on the doomed cities and fire spreading over the ground. The attendant phenomenon of the evolution of saline waters, implied in the destruction of Lot's wife would be a natural accompaniment, as water is always discharged in such eruptions; and in this case it would be a brine thick with mud and fitted to encrust and cover any object reached by it.

(4) **Lot's Wife.** The fate of Lot's wife, as briefly told in Genesis, implies that she lingered behind until overtaken by the fire and saline ejections, and that when the survivors sought her remains they found only a heap of saline incrustation marking the place where she perished.

In relation to Lot's wife, the term which is translated 'pillar' is *netsib*, and it should be rendered 'mound.' The erroneous word pillar was probably suggested to the translators by the pillar-like masses of salt that jut out of the salt cliff of Jebel Usdum.

(5) **Causes of Destruction.** With reference to the causes of the destruction of the cities, these are so clearly stated in a perfectly unconscious and incidental manner in Gen. xix. that Sir William Dawson thinks no geologist, on comparing the narrative with the structure of the district, can hesitate as to the nature of the phenomena which are presented to the observation of the narrator. Nor is there any reason to suppose that the history is compounded of two narratives giving different views as to their proximate causes or natural probability.

We learn from the narrative that the destruction was caused by 'brimstone and fire;' that these were rained down from the sky; that a dense column of smoke ascended to a great height, like the smoke of a furnace or lime-kiln, and that along with, or immediately after the fire, there was an emission of brine or saline mud, capable of encrusting bodies (as that of Lot's wife) so that they appeared as mounds of salt.

(6) **Definition of Word.** The only point in the statements in regard to which there can be any doubt is the substance intended by the Hebrew word translated 'brimstone.' It may mean sulphur, of which there is an abundance in some of the Dead Sea deposits, but there is reason to suspect that, as used here, it may rather denote pitch, since it is derived from the same root with Gopher, the Hebrew name apparently of the cypress and other resinous woods. If, however, this were the intention of the writer, the question arises, why did he use this word *gaphrith* when the Hebrew possesses other words suitable to designate different forms of petroleum and asphalt? The writer of the Pentateuch had not

studied the chemistry of the Egyptian schools to no purpose, and the most likely reason why he used this term was that he wanted one which his readers would understand as including any kind of mineral pitch or oil, and possibly sulphur as well.

It would have been well if later writers, who have undertaken to describe the fires of Gehenna in terms taken from the destruction of the Cities of the Plain, had been equally cautious. In connection with this it is interesting to note that in the notice of the pits in the vale of Siddim, the specific word *chemar*—asphalt—is used, and it is in this particular form that the bituminous exudations of the region of the Dead Sea usually appear.

(7) **Bituminous Matter.** The source of the bituminous matter is in the great beds of bituminous limestone of the Upper Cretaceous age which appear at Neby Mousa, on the Jericho road, and at many other places in the vicinity of the sea, and no doubt underlie its bed and the lower part of the Jordan plain. From these beds bituminous and gaseous matter must have been at all times exuding. Further, the Jordan valley and the Dead Sea basin are on the line of a great fault or fracture traversing these beds, and affording means of escape to their products, especially when the districts are shaken by earthquakes.

We have thus only to suppose that at the time in question reservoirs of condensed gas and petroleum existed under the plain of Siddim, and that these were suddenly discharged, either by their own accumulated pressure or by an earthquake shock fracturing the overlying beds, when the phenomena described by the writer in Genesis would occur, and after the eruption the site would be covered with a saline and sulphurous deposit, while many of the sources of petroleum previously existing might be permanently dried up.

(8) **Subsidence of Ground.** In connection with this there might be subsidence of the ground over the now exhausted reservoirs, and this might give rise to the idea of the submergence of the cities.

It is to be observed, however, that the parenthetic statement in Gen. xiv:3, 'which is the Salt Sea,' does not necessarily mean under the sea, and that it relates not to the cities themselves but to the plain where the battle recorded in the chapter was fought at a time previous to the eruption. It is also to be noted that this particular locality is precisely the one which, as previously stated, may be supposed to have subsided, and that this subsidence having occurred subsequently may have rendered the march of the invading army less intelligible to the later reader.

(9) **Real Occurrence.** It seems difficult to imagine that anything except the real occurrence of such an event could have given origin to the narrative.

No one unacquainted with the structure of the district and the probability of bitumen eruptions in connection with this structure would be likely to imagine the raining of burning pitch from the sky, with the attendant phenomena stated so simply, and without any appearance of exaggeration, and with the evident intention of dwelling on the spiritual and moral significance of the event, while giving just as much of the physical features as was essential to this purpose.

It may be added here that in Is. xxxiv:9-10, there is a graphic description of a bitumen eruption which may possibly be based on the history

now under consideration, though used figuratively to illustrate the doom of Idumea. In directing attention to the physical phenomena attendant on the destruction of the Cities of the Plain, Sir William Dawson does not desire to detract from the providential character of the catastrophe nor from the lesson which it teaches. He merely wishes to show that its author has described, in an intelligent manner, appearances which he must have seen or which were described to him by competent witnesses. Dr. Dawson wishes also to indicate that the statements made are in accordance with the structure and possibilities of the district as now understood after its scientific exploration. From a scientific point of view the narrative is an almost unique description of a natural phenomenon of much interest and of very rare occurrence.

(10) Physical Results. An important note, with reference to the destruction of these cities, appears in the statement in Gen. xiv that the Vale of Siddim had bitumen pits or wells, and that these were so abundant or important as to furnish a place of retreat to, or impede the flight of, the defeated kings of Sodom and Gomorrah. These bitumen pits have disappeared, unless their remains are represented by the singular pits described by Dr. Merrill as occurring near Wady Nimrim. Their existence in the times of Abraham would bespeak a much greater abundance of bituminous matter than that now remaining, and it is possible that the eruption which destroyed the Cities of the Plain may have to a great extent exhausted the supply of petroleum.

There is no reason to believe that the destruction of Sodom and Gomorrah was connected with any important changes in the limits of the Dead Sea, though it is highly probable that some subsidence of the valley took place and may have slightly affected its levels relatively to the Jordan and the sea; but it would appear from Deut. xxix:23 that the eruption was followed by a permanent deterioration of the district by the saline mud with which it was covered.

It is not likely, however, that this referred to a very extensive area; and the deposit produced would be so like to those of the Dead Sea that it would not be easy to distinguish it unless remains of man and his works were found under it. Sir William Dawson fully agrees with Dr. Merrill that these remains are to be sought for on the Plain of Shittim, at the northeast corner of the Dead Sea, where, as he informs us, there are still several ancient city sites, some of which may belong to the cities in question, which were, however, probably of small size and near to one another.—*Egypt and Syria*, by Sir J. William Dawson, C. M. G., LL.D., F. R. S., pp. 124-132.

CITIM (sīt'im), (1 Macc. viii:5). See CHITTIM.

CITIZENSHIP (sīt'ī-z'n-shīp), (Gr. πολιτεία, *politeia*, *civitas*, citizenship).

Strict isolation did by no means, as some suppose, form the leading principle in the system of theocracy as laid down by Moses, since even non-Israelites, under various names, not only were allowed to reside in Palestine, but had the fullest protection of the law, equally with the native Israelites (Exod. xii:19; Lev. xxiv:22; Num. xv:15, xxxv:15; Deut. i:16; xxiv:17; the law of usury, Deut. xxiii:20, made, however, an exception), and were besides recommended in general terms by Moses to humanity and charity (Exod. xxii:21; xxiii:9; Lev. xix:33, 34; Deut. x:18; Comp. Jer. vii:6; Mal. iii:5; Joseph. *Contra Ap.* ii:28), as well as to a participation in certain prerogatives granted to the poor of the land, such

as a share in the tithe and feast offering, and the harvest in the Jubilee year (Deut. xiv:29; xvi:10, 14; xxvi:11; Lev. xxv:6).

In return, it was required on the part of non-Israelites not to commit acts by which the religious feelings of the people might be hurt (Exod. xx:10; Lev. xvii:10; xviii:26; xx:2; xxiv:16; Deut. v:14). The eating of an animal which had died a natural death (Deut. xiv:21) seems to have been the sole exception. The advantage the Jew had over the Gentile was thus strictly spiritual, in his being a citizen, a member of the theocracy, of the community of God, on whom positive laws were enjoined. But even to this spiritual privilege Gentiles were admitted under certain restrictions (Deut. xxiii:1-9); thus we find among the Israelites an Edomite (1 Sam. xxi:7), as also a Hittite (a Canaanite). The only nations that were altogether excluded from the citizenship of the theocracy by especial command of the Lord were the Ammonites and Moabites, from a feeling of vengeance against them; and in the same situation were all estrated persons, and bastards, from a feeling of disgrace and shame (Deut. xxiii:1-6). In the time of Solomon no less than 153,600 strangers were resident in Palestine (2 Chron. ii:17).

Roman citizenship (Acts xxii:28, *jus civitatis*, *civitas*) was granted in the times of the emperors to whole provinces and cities (Dion Cass. xli:25; Suet. *Aug.* 47), as also to single individuals, for some service rendered to the state or the imperial family (Suet. *Aug.* 47), or even for a certain sum of money (Acts xxii:28; Dion Cass. xli:24). The apostle Paul was a Roman citizen by family, and hence his protesting against corporal or capital punishment (Acts xvi:37).

CITRON (sīt'ron). See TAPPUACH.

CLAUDA (klaū'dā), (Gr. Κλαυδία, *klou'dia*).

1. A small island off the southwest coast of Crete, mentioned in Acts xxvii:16. It was also called Gaudos (Mela, ii:7; Plin. *Hist. Nat.* iv:42), and now bears the name of Gozzo, corrupted by the Italians from the Greek name Claudanesa, or Gaudonesi.

2. A Christian woman of Rome, mentioned in 2 Tim. iv:21. Some think she was a Briton, a sister of Linus and daughter of King Tiberius Claudius Cogidunus, an ally of Rome.

She may have taken the name of Rufina from Pomponia, the wife of Aulus Plautus, the Roman commander in Britain, and have come to Rome in her train (T. Williams, *Claudia and Pudens*, Llandovery, 1848; E. H. Plumptre in Ellicott, *N. T. Comm.* ii. p. 185; but against the theory, Lightfoot, *Apost. Fathers*, Clem. i. pp. 29 and 76-79). (W. Lock, *Hastings' Bib. Dict.*) She appears to have become the wife of Pudens, mentioned in the same verse.

CLAUDIUS (klaū'di-ūs), (Gr. Κλαύδιος), the fifth Roman emperor and successor of Caligula, A. D. 41-54 (Acts xi:28; xviii:2). His full name was Tiberius Claudius Nero Germanicus.

Previously to his accession he led rather a dissolute life, and the throne was in a great measure secured to him through the address and solicitations of Herod Agrippa (Joseph. *Antiq.* xix:2, l. c. 3 and 4; Comp. Suet. *Claud.* 10). This obligation he returned by great and peculiar favors to that personage; and the Jews were generally treated with indulgence till the ninth year of his reign, when those who abode at Rome were all banished thence (Acts xv:iii:12; Comp. Suet. *Claud.* 25). Several famines occurred under Claudius, one of which, in the fourth year of his reign, extended to Palestine and Syria, and ap

pears to be that which was foretold by Agabus (Acts xi:28).

CLAUDIUS FELIX (kla'u'di-ūs fē'lix). See FELIX; DRUSILLA.

CLAUDIUS LYSIAS (kla'u'dī-ūs lish'ī-as). See LYSIAS.

CLAW (kla), (Heb. פִּרְסָה, *par-saw'*), the sharp, hooked end of the foot of a bird, or animal; the hoof solid or split. As in older English claw was used for an animal's *hoof*, and for any of the parts into which a cloven hoof is divided, so in Deut. xiv:6, A. V., we read, 'And every beast that parteth the hoof and cleaveth the cleft into two claws, . . . that ye shall eat' (R. V., 'and hath the hoof cloven in two'); and in Zech. xi:16, 'he shall eat the flesh of the fat and tear their claws in pieces' (R. V., 'hoofs'). The Hebrew is *parsah*, the ordinary word for 'hoof,' in both passages (Cf. Lovell, 1661). (J. Hastings, *Bib. Dict.*)

Figurative. To *tear claws in pieces* is to devour ravenously the last morsel of flesh or fat. It refers to the cutting off of every means of protection, resistance or conquest (Zech. xi:16).

CLAY (klā), (Heb. טֵיט, *teet*, properly mire or mud).

A substance frequently mentioned in Scripture, chiefly with reference to its employment by the potter, the elegant and useful forms assumed by the rude material under his hands supplying a significant emblem of the Divine power over the destinies of man (Is. lxiv:8; Rom. ix:21). A remarkable allusion to the use of clay in sealing occurs in Job xxxviii:14, 'He turneth it as clay to the seal.' This may be explained by reference to the ancient practice of impressing unburnt bricks with certain marks and inscriptions which were obviously made by means of a large seal or stamp. We trace this in the bricks of Egypt and Babylon. (See BRICKS.) Modern Oriental usages supply another illustration. Travelers, when entering the khans in towns, often observe the rooms in which goods have been left in charge of the *khanjee* sealed on the outside with clay. A piece of clay is placed over the lock and impressed by a large wooden stamp or seal.

Figurative. (1) Men are compared to clay; their bodies are formed of it; they are frail and easily undone (Is. xxix:16; xli:25; lxiv:8). (2) In Nebuchadnezzar's image the Roman kingdom is compared to a mixture of iron and miry clay, to denote that notwithstanding its having been once very powerful, yet it should become weak, and be easily destroyed by the barbarous Goths, Huns, Vandals, Heruli, etc. (Dan. ii:33-35, 42). (3) Trouble is like miry clay; it is very uncomfortable; men gradually sink into it, and with difficulty can they escape it (Ps. xl:2). (4) Wealth and other worldly enjoyments are likened to a load of thick clay; they are of small value for an immortal soul, and are often polluting, enslaving and burdensome (Hab. ii:6). (5) The clay wherewith Jesus anointed the eyes of the blind man may denote ordinances which are contemptible in the view of worldly men, or convictions which render men blind in their own view (John ix:6, 15). (6) The earth is turned up as clay to the seal; when it is fresh plowed it is ready to receive any impression, and when the warmth of summer returns it assumes a comely appearance (Job xxxviii:14). Bricks are often printed with figures from a cut die or seal. Travelers to the East assure us that the lock of the room or apartment in a caravansary, where goods are deposited, is often sealed with clay. The keyhole

is covered with a mass of clay and a seal applied. In the passage quoted, the turning of clay to the seal and the reducing of the shapeless mass to order and beauty is compared to morning reducing the shapeless masses of the dark night to regularity and order.

CLEAN (klēn). Several Hebrew and Greek words are translated "clean" and "cleanness." They mean primarily *freedom from dirt, purity*, but they also often indicate ceremonial cleanness.

Ethical and Figurative. Closely related to this ceremonial use is the *ethical*, and quite as old. In passages like Ezek. xxxvi:25; Luke xi:41, and especially John xiii:10; xv:3, we see the one passing into the other; in others the ethically stands out from the ceremonially religious meaning. Take first of all some passages where the Hebrew is the usual verb (*taher*) or adjective (*tahor*) used for ceremonial cleanness: Ps. xix:9, 'The fear of the Lord is clean' (that is, the religion of Jehovah is morally undefiled, in contrast to heathen religions. Comp. Ps. xii:6, 'the words of the Lord are pure words,' where the Hebrew is the same, a word frequently applied to 'pure' gold); Lev. xvi:30, 'from all your sins shall ye be clean'; Gen. xxxv:2, 'Put away the strange gods that are among you, and be clean, and change your garments'; Ps. li:7, 'Purge me with hyssop and I shall be clean'; li:10, 'Create in me a clean heart.' Next, where the Hebrew is *bar*, that is, 'clean' because cleansed, 'bright' because polished (as a pointed arrow, Is. xlix:2); Ps. lxxiii:1, 'such as are of clean heart'; Job xi:4, 'I am clean in thine eyes;' comp. Is. lii:11, 'be ye clean that bear the vessels of the Lord.' Finally, where the Hebrew is *zakhah*, or *zakhak*, 'be clean,' *zak*, 'clean,' always in a moral sense, Job xv:14, 'What is man that he should be clean?' ix:30, 'If I wash myself with snow water and make my hands never so clean;' xv:15, 'the heavens are not clean in his sight;' xxxiii:9, 'I am clean, without transgression;' Prov. xvi:2, 'all the ways of a man are clean in his own eyes' (J. Hastings, *Bib. Dict.*).

The *cleanness* or *purity* of the saints lies in their having a clean heart and pure hands; in having their conscience purged from guilt by the application of the Saviour's righteousness; their mind, will, and affections sanctified by his spirit, endowed with implanted grace, and free from the love and power of sinful corruption; their outward conversation being holy and blameless. *Cleanness of teeth* is want of provision to eat (Amos iv:6). *Clean, purely*, also denote *full, fully* (Lev. xxiii:23; Josh. iii:17; Is. i:25). (See UNCLEAN, UNCLEANNESS.)

CLEFT (klēft). A number of Hebrew words are rendered thus. The primary meaning is *divided* or *split*. In Amos vi:11, Is. xxii:9 it is translated "breaches." In Is. ii:21, Jer. xlix:16, and elsewhere it is rendered "cleft" of a rock; it is also applied to the hoof of an animal (Deut. xiv:6).

CLEMENT (klēm'ent), (Gr. Κλήμης; Lat. *Clemens; Clement*), a person mentioned by Paul (Phil. iv:3).

This Clement was, by the ancient church, identified with the bishop of Rome of the same name (Euseb. *Hist. Eccles.* iii:4; *Constitut. Apost.* vii:46); and that opinion has naturally been followed by Roman Catholic expositors. It cannot now be proven incorrect, but the suspicion exists that the case here may be as with many other names in the New Testament, which have been assigned to celebrated persons of a later period. Clement is said to have lived to the third year of the emperor Trajan (A. D. 100), when he suffered martyrdom.

There is an epistle of Clement to the Corinthians, which was highly esteemed by the ancient church, and was publicly read in many churches. (See EPISTLES, APOSTOLICAL.)

CLEOPAS (klē'o-pās), (Gr. Κλέπας, *kleh-op'as*, contraction of Gr. Κλέπατρος, of a renowned father).

One of the two disciples to whom Jesus appeared in the way to Emmaus (Luke xxiv:18). He is not to be confounded with the other Cleophas, or rather Clopas, who was also called Alphæus (John xix:25). (See ALPHÆUS.)

CLEOPATRA (klē'o-pā'trā), the name of numerous Egyptian princesses derived from the daughter of Antiochus.

1. The wife of Ptolemy Epiphanes, king of Egypt. Some are of opinion that this princess is described in Dan. xi:17, under the title "Daughter of Women."

2. A daughter of Ptolemy VI, Philometor and Cleopatra (1), who was married first to Alexander Balas, B. C. 150 (1 Macc. x:58), and afterwards given by her father to Demetrius Nicator when he invaded Syria (1 Macc. xi:12; Joseph. *Antiq.* xiii:4, sec. 7). During the captivity of Demetrius in Parthia (see DEMETRIUS) Cleopatra married his brother Antiochus VII (Sidetes), and was probably privy to the murder of Demetrius on his return to Syria, B. C. 125 (App. *Syr.*, chap. 68; yet see Joseph. *Antiq.* xiii:9, sec. 3; Just. xxxix:1). She had two sons by Demetrius. She murdered Selencus the elder, and then raised to the throne the younger Antiochus VIII, called Grypus. As he was unwilling to gratify her ambitious designs, she attempted to make away with him by offering him a cup of poison, but was compelled to drink it herself (B. C. 120).

CLEOPHAS (klē'o-phās), (Gr. Κλωπᾶς, *klo-pas'*) or rather Clopas (John xix:25), who was also called Alphæus. (See ALPHÆUS; CLEOPAS.)

CLERK (klērk), (Acts xix:35). See TOWN CLERK.

CLIFT (klift), an old form of *cleft* (Ex. xxxiii:22; Is. lvii:5). In Is. xxxii:14 the margin seems to use *clift* for cliff, in the A. V. as elsewhere in old English writers.

CLIMATE (kli'mât). See PALESTINE.

CLOAK (klōk), an article of dress, as a covering or veil. See DRESS.

Figurative. A fair pretense or excuse, concealing covetousness, malice, unbelief (1 Thess. ii:5; 1 Peter ii:16; John xv:22). God's *zeal* is called his *cloak*; it plainly appears in punishing his enemies and in delivering his people (Is. lix:17).

CLOSET (klōz'ēt), (Heb. קַוֵּץ, *khoof-raw'*, canopy). It is translated "curtains" (Joel ii:16), and also "chamber" (Ps. xix:5).

In the New Testament the word (Gr. ταμειὸν, *tam-i'on*) is used to convey the idea of retirement or privacy (Matt. vi:6; Luke xii:3).

CLOTHING (klōth'ing), (Heb. תְּבוּשָׁתִי, *til-bo-shethi'*). (See DRESS.)

Man originally went naked (Gen. ii:25). Skins of beasts were the first real clothing (Gen. iii:21). The art of manufacturing cloths by spinning and weaving is of very great antiquity (Gen. xiv:23; xli:42; Job vii:6). The materials woven and used for clothing were wool (Prov. xxxi:19; Lev. xiii:47; Job xxxi:20), linen (Exod. ix:13; Lev. xvi:4), *byssus*, a fabric made of cotton or flax (Gen. xli:42; Luke xvi:19), silk (Ezek. xvi:10,

13; Rev. xviii:12), goats' hair (Rev. vi:12), and camels' hair (Mat. iii:4).

The Hebrews, and, in fact, the Orientals generally, wore only an upper and an under dress. The upper, or *cloak*; the under, or *coat*. It was seldom that in addition to these they wore shirts or drawers, though these were worn when on visits of ceremony or friendship. The shirt and drawers were of gauze or cotton, that of the females being ornamented. The coat, or under garment, was often made of linen, but as often of woolen, and hung down very near the ground, unless when tucked up for walking or for work. The scribes wore theirs longer than ordinary, to mark their uncommon gravity and holiness (Luke xx:46).

The cloak, or upper garment, now generally known under the name of *hyke*, was made of wool, and was a long piece of broadcloth thrown over the shoulders and folded round the body; and which, yet more than the coat, required to be girded up when they journeyed or set themselves to work (Luke xii:37). When this upper garment was laid aside the person was said to be "naked" (John xxi:7)—a mode of speech which explains the nature of David's dress when he danced before the ark, simply that he laid aside his upper garment that he might dance more freely. The veil was worn by women in the presence of strangers (Gen. xxiv:65; Cant. v:7); but it was not uncommon for them to go with face unveiled (Gen. xxiv:15; xxvi:8; Judith x:7, 14). It appears from various passages (such as 2 Kings i:8; Is. xx:2; Matt. iii:4; Heb. xi:37) that the prophets usually wore a rough or hairy garment.

Princes, especially great kings and priests, generally wore white garments; such were also worn on the occasions of great joy and gladness (Eccl. ix:8). In mourning, men generally wore sackcloth, or haircloth. Prophets, being professed mourners, often wore a mourning dress of coarse stuff or skin (2 Kings i:7, 8; Matt. iii:4). False prophets, in order to deceive the people, clothed themselves after the same manner (Zech. xiii:4).

Among the Hebrews neither sex was permitted to wear such form of apparel as was used by the other (Deut. xxii:5). Probably people generally went bareheaded; however, turbans were on occasion worn by both sexes (Job xxix:14, R. V. margin; Is. iii:20; Ezek. xxiii:15).

Great men's children had often their garments striped with divers colors (Gen. xxxvii:3; 2 Sam. xiii:18). Isaiah largely describes the apparel of the Jewish women in his time. It is plain they were gaudy and fine; but we are now quite uncertain of their particular form (Is. iii:16-24). In the East, both bridegroom and bride, on their marriage day, appear in several suits of apparel; and as great men frequently change their garments on solemn days, and make presents of them, get new ones on joyful occasions, and supply their guests with them on festivals of marriage, or the like, it is necessary for them to have a great stock of them always in their wardrobe (Gen. xlv:22; Judg. v:30; 1 Sam. xviii:25; Ps. cii:26; Is. iii:6, 7; Matt. xxii:12; Rev. xxi:2).

Sandals were worn when outside of a room, being an imperfect shoe consisting of a sole of wood or leather (Ezek. xvi:10), fastened to the bare foot by straps passing over the instep and around the ankle (Gen. xiv:23; Is. v:27; Acts xii:8).

Figurative. (1) To be clothed with worms is to be infected all over with a loathsome disease, or to have one's skin crawling with vermin

(Job vii:5; x:11). (2) "To be clothed with shame and cursing" is to be exceedingly exposed to reproach, contempt, confusion and ruin (Ps. cix:18, 19; cxxxii:18). (3) To be "clothed with salvation and praise" is abundantly to possess deliverance, happiness and comfort (Is. lxi:3, 10). (4) To cover one's self with violence, as with a garment, is to practice injustice and oppression, without shame or even with boasting, as if it were honorable (Ps. lxxiii:6). (5) False teachers put on "sheep's clothing," when they pretend to great innocency, holiness and usefulness (Matt. vii:15). (6) The rending or tearing of garments imports great grief or horror (Mark xiv:63; Acts xiv:14).

CLOTHES, RENDING OF (klōthz, rēnd'ing ðv). See CLOTHING, *Figurative*, 6; REND.

CLOUD (kloud), (Heb. principally עָנַן, *awb*, and מָגֵן, *aw-naww'*), (Gr. *νεφέλη*, *nef-el'ay*, covering of the sky).

The allusions to clouds in Scripture, as well as their use in symbolical language, must be understood with reference to the nature of the climate, where the sky scarcely exhibits the trace of a cloud from the beginning of May to the end of September, during which period clouds so rarely appear, and rains so seldom fall, as to be considered phenomena—as was the case with the harvest rain which Samuel invoked (1 Sam. xii:17, 18), and with the little cloud, not larger than a man's hand, the appearance of which in the west was immediately noticed as something remarkable not only in itself, but as a sure harbinger of rain (1 Kings xviii:44).

The Lord appeared at Sinai in the midst of a cloud (Exod. xix:9; xxxiv:5); and after Moses had built and consecrated the tabernacle, a cloud filled the court around it, so that neither Moses nor the priests could enter (xl:34, 35). The same occurred at the dedication of the temple by Solomon (2 Chron. v:13; 1 Kings viii:10).

When, then, the cloud appeared on the tent, in front of which were held the assemblies of the people, in the desert, it was believed that God was then present, for the motion of the cloud which rested on the tent was a sign of the Divine presence (Exod. xvi:10; xxxiii:9; Num. xi:25). The angel descended in the cloud and from thence spoke to Moses, without being seen by the people (Exod. xvi:10; Num. xi:25). It is equal in Scripture, when mentioning the presence of God, to represent him as encompassed with clouds, serving as a chariot, and veiling his dreadful majesty (Job xxii:14; Is. xix:1; Matt. xvii:5; xxiv:30, etc.; Ps. xviii:11, 12; xcvi:2; civ:3). The Son of God is described as ascending to heaven in a cloud; (Acts i:9) and at his second advent, as descending upon clouds (Matt. xxiv:30; Rev. xiv:14, 16).

Figurative. (1) In allusion to the pillar of cloud and fire in the wilderness, God is said to *create a cloud and smoke* by day, and the shining of a *flaming fire* by night, upon the dwellings and assemblies of Zion, when he remarkably protects, guides and comforts his people (Is. iv:5). (2) The *cloud of glory* that hovered over the mercy-seat signified the majestic and marvelous presence of God as revealed in Christ, with his church (1 Kings viii:10). (3) God is likened to a *cloud of dew* in the heat of harvest; his fulness is unsearchable, his approaches quick, and his presence very comforting (Is. xviii:4). (4) God often appeared in a *cloud*, to mark his majesty; and to intimate that his glory, purposes, and works are unsearchable (Exod. xvi:10; Ps. civ:3; Matt.

xvii:5). (5) He rides on *swift clouds*, or has them for the dust of his feet, when he comes in a speedy and awful manner to deliver his people and destroy his enemies (2 Sam. xxii:12; Is. xix:1; Neh. ix:12). (6) *Clouds and darkness* are round about him, when his providences are very mysterious and awful (Ps. xcvi:2). Christ was received up into heaven by a cloud, when he ascended; and at the last day, will come in the clouds, making them his throne while he judges the world (Acts i:9; Dan. vii:13; Rev. i:7). (7) He is *clothed with a cloud*, when his work is obscure and terrible (Rev. x:1). (8) His *sitting on a white cloud* denotes the glorious display of his equity, holiness, power, and authority, in the execution of his judgments (Rev. xiv:14, and xx:11). (9) Ministers and ordinances are likened to *clouds*; by the authority of heaven they are appointed, and by them God comforts and directs his people, and communicates his grace to them (Is. v:6). (10) Saints are called a *cloud*; their number is great (Is. lx:8; Heb. xii:1). (11) Hypocrites and false teachers are *clouds without water*; they *promise usefulness, but, being without true solidity, value, and knowledge, are easily carried about by their own pride and ambition, and by the winds of false doctrines* (2 Pet. ii:17). (12) Men, in general, are as a *vanishing cloud*; while they live, they have but little of true happiness and comfort, and their days hasten to an end (Job vii:9). (13) Sins are compared to a *cloud*; how vast their numbers! how they darken our souls, separate between God and us! By his free forgiveness, by the shining of his countenance, and the breathing of his Spirit only can they be dispelled (Is. xliv:22). (14) Afflictions are a *cloud*; their ingredients are many, their nature awful and mysterious; they bereave men of their glory and joy (Lam. ii:1). (15) The favor of a king is like a *cloud of the latter rain*, very useful and pleasant (Prov. xvi:15). (16) The goodness of the ten tribes of Israel was like a *morning cloud, and early dew*; whatever appearances of reformation were among them under Jehu, and whatever prosperity they had under Joash, and Jeroboam his son, or Pekah, they all quickly came to an end (Hos. vi:4). (17) Armies are likened to a *cloud*, because of their number, and their threatening to overwhelm and ruin all around (Ezek. xxxviii:9).

CLOUD, PILLAR OF (kloud, pīl'ēr ðv). See PILLAR.

CLOUT (klout). The word *taw-law'* (Heb. לָטַף, Josh. ix:5), properly means to *cover*, i. e., to *patch*, and denotes that the sandals of the Gibeonites were mended, as if they had become old and worn during their journey.

It probably in its primary meaning meant a *blow*, as "a clout on the head."

The "cast clouts" (Heb. סִחָוָה, *seh-khaw-baw'*, Jer. xxxviii:11, 12) put under the prophet's arms to prevent the cords cutting into the flesh while he was being drawn out of the dungeon were old clothes or rags.

As a verb (Josh. ix:5) 'old shoes and clouted upon their feet' (Amer. R. V. 'patched'). Comp. Shaks. 2 *Henry VI*, iv. ii. 195—

'Spare none but such as go in clouted shoon;' and Latimer, *Scrm.* p. 110. 'Paul, yea, and Peter too, had more skill in mending an old net, and in clouting an old tent, than to teach lawyers what diligence they should use in the expedition of matters.' The word is Celtic, and came in early, but Wycliffe, in Josh. ix:5, has 'sowid with patchis'. J. Hastings' *Bib. Dict.*)

CLUB (klüb), (Job xli:29, R. V.). The "club" was a common weapon among shepherds.

The rod, scepter, or club of iron (*shebhet barzel*, Ps. ii:9) was carried by kings, as seen in the Assyrian reliefs in the Kouyunjik Gallery, B. M., especially the figure of Assur-nazir-pal. Comp. Is. x:5 'Ho Assyrian, the rod (*shebhet*) of mine anger.' (W. E. Barnes, *Hastings' Bib. Dict.*). (See DART.)

CNIDUS (ni'dus), (Gr. *Κνίδος*, *knee'dos*), otherwise GNIDUS, a town and peninsula of Doris in Caria, jutting out from the southwest part of Asia Minor, between the islands of Rhodes and Cos.

It was celebrated for the worship of Venus (Strabo, xiv. p. 965; Plin. *Hist. Nat.* xxxvi:15; Hom. *Odyss.* i.30). The Romans wrote to this city in favor of the Jews (1 Macc. xv:23), and St. Paul passed it in his way to Rome (Acts xxvii:7).

COAL (kōl). The Hebrew words most frequently and properly translated coal are two.

1. *גַּחְלִיץ*, *gah-khch'leth*, burning coal, Lev. xvi:12; 2 Sam. xiv:7; xxii:9, 13; Job xli:21; Ps. xviii:8, 12; cxx:4; cxl:10; Prov. vi:28; Is. xlv:19; Ezek. i:13; xxiv:11.

2. *פַּחַל*, *peh-khawm'*, charcoal, coal, Prov. xxvi:21; Is. xlv:12; liv:16.

In the New Testament we have in John xviii:18, 'a fire of coals.' The word here evidently means a mass of live charcoal, as also in xxi:9, and Rom. xii:20.

It is generally assumed that, in those numerous passages of our version in which the word coal occurs, *charcoal*, or some other kind of *artificial* fuel, is to be understood; at all events, that the word has not its English meaning. The idea is founded upon the supposition that fossil coal was not known to the ancients as an article of fuel, but the existence of coal in Syria is placed beyond a doubt. Many indications of coal occur in the Lebanon mountains; the seams of this mineral even protrude through the superincumbent strata in various directions. It is also found at Cornali, eight miles from Beirut. A passage in Theophrastus indicates that "the smiths" of Greece used fossil coal nearly 300 years B. C., but this does not prove that coal in the proper sense was known and employed by the Hebrews.

Figurative. (1) God's judgments are compared to *coals* or *coals of juniper*: they are terrible to endure, and sometimes of long continuance (Ps. cxl:10, and cxx:4). (2) The objects or instruments of his judgments are likened to *coals* (Ps. xviii:8). (3) Christ's promise of forgiveness and grace is a *live coal* taken from the altar; conveyed to us through his person and righteousness; it melts our hearts into godly sorrow, warms them with love, and purges away our dross of sinful corruption (Is. vi:6). (4) A man's posterity is a *burning coal*; in them progenitors act, shine, and are comforted (2 Sam. xiv:7). (5) Good deeds done to our enemies among men are as *coals of fire* heaped on their heads; they tend to melt and pain their hearts with grief for injuring us, and make them to love us; as they occasion the speedy infliction of terrible judgments upon them (Rom. xii:20; Prov. xxv:22). (6) Harlots and temptations to unchastity are as *burning coals*; they can scarcely be approached without inflaming our lusts and wounding our souls (Prov. vi:28). (7) Strife and contention are as *burning coals*; they spread terribly, and hurt and ruin everything near them (Prov. xxvi:21). (Brown, *Bib. Dict.*).

COAST (kōst), stands often for "border" (Judg. xi:20; 1 Sam. v:6; Matt. viii:34, etc.).

COAT (kōt). See DRESS; CLOTHING.

COAT OF MAIL (kōt öv mäl). See ARMS, ARMOR.

COCK (kōk). The Hebrew word *כֶּבֶד*, *bar-boor'*, which is mentioned only in connection with Solomon's table, has been rendered *swans*, *geese*, *guinea fowls*, and *fatted fish*, as well as the *fatted fowl* of the A. V. and the R. V.; Gr. *ἀλέκτωρ*, *al-ek'tore*, the male of the well known domestic fowl *gallus domesticus*.

It is somewhat singular that this bird and poultry in general should not be distinctly noticed in the Hebrew Scriptures; especially as rearing gallinaceous fowls was an object of considerable economical importance in Egypt, and their flesh one of the principal resources for the table in every part of Southern and Western Asia. They were, it may be surmised, unknown in Egypt when the Mosaic law was promulgated, and, though imported soon after, they always remained in an undetermined condition, neither clean nor unclean, but liable to be declared either by decisions swayed by prejudice, or by fanciful analogies; perhaps chiefly the latter, because poultry are devourers of unclean animals, scorpions, scolopendra, small lizards, and young serpents of every kind.

But although rearing of common fowls was not encouraged by the Hebrew population, it is evidently drawing inferences beyond their proper bounds when it is asserted that they were unknown in Jerusalem, where civil wars, and Greek and Roman dominion, had greatly affected the national manners.

In the denials of Peter, described in the four Gospels, where the cock-crowing is mentioned by our Lord, the words are plain and direct, not we think admitting of cavil, or of being taken to signify anything but the real voice of the bird, *cock-crow*, as it is expressed in Mark xiii:35, in its literal acceptation, and not as denoting the sound of a trumpet, so called, because it proclaimed a watch in the night; for to what else than a real hen and her brood does our Saviour allude in Luke xiii:34, where the text is proof that the image of poultry was familiar to the disciples, and consequently that they were not rare in Judæa? To the present time in the East, and on the Continent of Europe, this bird is still often kept, as amongst the Celts (Cæsar, *Bell. Gall.* iv:12), not so much for food as for the purpose of announcing the approach and dawn of day. The origin of our domestic poultry is undoubtedly Asiatic, but there is considerable doubt as to the precise breed from whence they are sprung. It is figured on the ancient Egyptian monuments.

COCKATRICE (kōk'ä-tris). See SERPENT.

COCK-CROWING (kōk'krō'ing).

The cock usually crows several times about midnight, and again about break of day. The latter time, because he then crows loudest, and his 'shrill clarion' is most useful by summoning man to his labors, obtained the appellation of *the* cock-crowing emphatically, and by way of eminence; though sometimes the distinctions of the *first* and *second* cock-crowing are met with in Jewish and heathen writers. These times, and these names for them, were, no doubt, some of the most ancient divisions of the night adopted in the East, where 'the bird of dawning' is most probably indigenous. The latter *ἀλεκτοροφωνία*, *cock-crowing*, was retained even when artificial divisions of time were invented. In our Lord's time the Jews had evidently adopted the Greek and

Roman division of the night into four periods, or watches, each consisting of three hours; the first beginning at six in the evening, *in the second watch, and in the third watch* (Luke xii:38); *in the fourth watch of the night* (Matt. xiv:25; Mark vi:48). These watches were either numbered first, second, third, and fourth, as now specified, or were called *late, middle of the night, early, and cock-crowing*. These are all mentioned (Mark xiii:35).

It has been considered a contradiction that Matthew (xxvi:34) records our Lord to have said to Peter, *before the cock crow thou shalt deny me thrice*, whereas St. Mark (xiv:30), says, *before (the cock) crow twice*. But Matthew, giving only the *general sense* of the admonition (as also Luke xxii:34; John xiii:38), evidently alludes to that only which was *customarily* called *the cock-crowing*, but Mark, who wrote under Peter's inspection, more accurately recording *the very words*, mentions the *two* cock-crowings.

Another opinion prevails regarding the signal to which the four Evangelists allude in connection with Peter's denial of our Lord. It is held that it was the voice of the trumpet which announced the closing of one watch and the beginning of another.

In our Lord's time the Jews had adopted the Roman division of time by which the night was measured with four watches; these were sometimes designated by the terms, "even, midnight, cock-crowing, and morning" (see Mark xiii:35).

Jerusalem being at that time a Roman military station, the placing and relieving of the guard was in force, and the changes of the watch were indicated at regular intervals by the sounding of a trumpet.

The first watch was from six until nine, the second from nine until twelve, the third from twelve until three, the fourth from three until six in the morning. The third watch, which terminated at three in the morning, was signaled at its close by three peals of the trumpet with a little interval between them, and this threefold signal was termed by the Romans, *gallicinium*.

A recognition of this fact explains the apparent discrepancy between Mark and the other Evangelists, three of whom speak only of the cock crow, including in that term the whole of the threefold signal, while Mark, who is more explicit, speaks of two of these trumpet peals belonging to the close of the third watch of the night (Mark xiv:68-72).

That this cock-crowing could not have been the voice of the barnyard fowl is evident from a consideration of the above facts, and also in view of the testimony of the Talmud to the effect that neither the priesthood nor the laymen were allowed to keep hens in Jerusalem.

The priests who ate of holy things were not allowed to raise them anywhere in Palestine, but the common people could keep them outside the Holy City. This was not because the fowls were considered unclean and therefore unfit for food. They could be eaten, and could be brought into the city after they were dressed; but the commentators upon the Talmud explain the interdiction as follows: "They do not breed cocks and hens in Jerusalem because of the holy things—that is, these fowls by scratching are continually bringing up insects, and reptiles which are unclean, by which the sacrifices which are eaten as food might be polluted." (See *Mishna, Baba Kama*, vii:7).

E. A. R.

COCKLE (kōk-k'l), (Heb. בֹּשֶׂת, *bosh-aw'*).

The word rendered cockle (Job xxxi:40) should

be, as in the margin of the A. V., *stinking weeds*, or of R. V. *noisome weeds*.

This word may denote troublesome or offensive weeds in general (Job xxxi:40). But the arums, which abound in Galilee and other Eastern regions, have precisely the odor indicated by the original, and may be the plants meant. The *wild grapes* (Is. v:2, 4) should be rendered *stinking fruits*. Such are the fruits of *Solanum nigrum*, L., a plant growing in all vineyards in this land, the fruit of which is black, resembling a small grape, and having an ill odor, which would correspond with the requirements of the comparison. It is called in Arabic *'inab-cdh-dhib*, *wolf's grapes*. The proximity of these offensive growths is sometimes scarcely endurable.

COELESYRIA (sēl'ē-sŷr'i-à), (Gr. ἡ κοίλη Συρία, *hay koi'lay soo-ree'ah*, the hollow Syria).

This name, which is evidently of Grecian origin in the times of the Seleucidæ, was originally applied to the valley lying between the mountain-ranges of Libanus and Anti-Libanus. It was also used to denote the whole tract of country, with the exception of Judæa and Phœnicia, reaching from Seleucis to Arabia and the confines of Egypt (Strabo, xvi. 2, vol. iii. p. 365, ed. Tauch.; Polyb. *Hist.* v. 80, sec. 3). In the time of David, Cœlesyria was probably included in 'Syria of Damascus,' which was conquered by that monarch (2 Sam. viii:6), but recovered from Solomon by Rezon the son of Eliadah (1 Kings xi:23). The possession of it was an object of many struggles between the Seleucidæ and the kings of Egypt. *Amyce*, the name of the plain through which the Orontes flowed, is derived by Bochart from the Syriac *Amica*, which means *deep*, and is nearly synonymous with the Greek word *Koilay*, *hollow*. *Celosyria* is found in the Apocrypha.

The same learned writer supposes that Syro-phœnicia is the same as Cœlesyria. Scythopolis and Gadara are mentioned by Josephus as cities of Cœlesyria (*Antiq.* xiii. 13 sec. 2, sec. 3). The name frequently occurs in the Apocrypha (1 Macc. x:69; 2 Macc. viii:8; x:11; 1 Esdr. ii:17, 24; iv:48; vii:1); in 1 Esdr. vi:3, it is called simply Syria. Under the emperor Diocletian, Phœnicia and Cœlesyria formed one province, called Phœnicia Libanica. Under the present Turkish government the western part of Cœlesyria is in the Pashalic of Saide, and the eastern in the Pashalic of Damascus.

COFFER (kōf'fēr), (Heb. אָרְגָז, *ar-gawz'*, suspended), a movable box or chest hanging from the side of a cart. The word is found only in 1 Sam. vi:8, 11, 15. (See **ARK OF THE COVENANT**; **CHEST**.)

COFFIN (kōf'fīn), (Heb. אָרוֹנוֹ, *aw-rone'*), a casket for the dead (Gen. 1:26). (See **BURIAL AND SEPULCHERS**; **DEAD**.)

COGITATION (kōj'ī-tā-shūn), (Heb. רַחֲיוֹנָה, *rah-yone'*, Dan. vii:28), elsewhere rendered simply "thought."

COIN (koin). See **WEIGHTS AND MEASURES**.

COLA (kō'lā), (Gr. Χωλά, *khoh-la'*), a place mentioned with Chobai (Judith xv:4). It has not been identified.

COLHOZEH (kol-hō'zeh), (Heb. כּוֹלְחֹזֶה, *kol-kho-zeh'*, every seer), a descendant of Judah, being the son of Hazaiah and father of one Baruch (Neh. xi:5), B. C. before 445.

COLIUS (kō'li-ūs), (1 Esdr. ix:23). See **KE-LAIATH**.

COLLAR (kōl'lēr), (Heb. פֶּהַל, *feh*).

1. An aperture (Job xxx:18). Job's trouble

bound him closely, firmly, and fast as the *collar of his garment*.

"It is frequently assumed that the reference is to Job's emaciated condition, which causes his outer garments to cling to him like the neck of the close-fitting inner tunic. Davidson suggests that the idea may be that through Job's writhing under his pains his clothes are twisted tightly about him. Dillman finds a reference to the unnatural swelling of Job's body by elephantiasis till his garment becomes tight like a collar." (G. M. Mackie, *Hastings' Bib. Dict.*).

2. A peculiar kind of pendant (Judg. viii:26; Heb. רֶשֶׁת־פָּאָוּ, *net-ee-faw'*), rendered "chains" in Is. iii:19.

COLLECTION (köl-lěk'shün), (Heb. מַשְׂאֵת, *mas-ayth'*).

1. The process of collecting or gathering as the collection of specimens, or of letters.

2. A collection of money for charitable or other purposes (2 Chron. xxiv:6, 9).

COLLEGE (köl'lěj), (Heb. מִשְׁנֵה, *mish-neh'*, repetition, 2 Kings xxii:14), the residence of the prophetess Huldah.

The word *mishneh* was probably used as a proper name. The same Hebrew word in Zeph. i:10, is translated "second" where allusion is made to different portions of Jerusalem (Neh. xi:9).

The translation is derived from the Targum of Jonathan which has "house of instruction," a school-house supposed to have been near the Temple. Others explain it as denoting the quarter of the city allotted to the Levites, who were a second, or inferior order as compared to the priests.

It was probably the "lower" city, ἡ ἄλλη πόλις, *the other city*, of Josephus.

COLLOPS (köl'lüps), (Heb. פֶּע־מָאוּ, *pee-maw'*, to be plump). The term is applied to the thick flakes of fat flesh upon the haunches of a stall fed ox. It is employed as the symbol of irreligious prosperity (Job. xv:27).

COLONY (köl'ō-nŷ), (Gr. *Κολώνια*).

This distinction is applied to Philippi in Macedonia (Acts xvi:12). Augustus Cæsar had deported to Macedonia most of the Italian communities which had espoused the cause of Antony; by which means the towns of Philippi, Dyrrachium, etc., acquired the rank of Roman colonies (Dio Cass. p. 455). They possessed the *jus Italicum* (*Italian right*), consisting, if complete, in a free municipal constitution, such as was customary in Italy, in exemption from personal and land taxes, and in the commerce of the soil, or the right of selling the land.

COLORS (kül'ērs), (Gen. xxxvii:3).

The art of coloring cloth seems to have attained to great perfection among the Jews, though it did not originate with them, but with their idolatrous neighbors, the Phœnicians and Egyptians, the former supplying the dyes, the latter the mode of applying them. Four *artificial* colors are spoken of in the Bible.

1. *Purple*, which was derived from a shell-fish native to the Mediterranean Sea. The coloring-matter was found in a small vessel in the fish, and the rest of the fish was useless. Purple was the royal and noble color, indicative of wealth and station (Judg. viii:26; Esth. viii:15; Luke xvi:19; Rev. xvii:4).

2. *Blue*, produced from a similar source, used in the same way, and for the same purposes (Ex. xxv:4; Esth. i:6).

3. *Scarlet* and *crimson* appear to express the

same color. "The dye was produced from an insect somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other Eastern countries"—*Smith*. The three colors above mentioned, together with white, were employed in the tabernacle curtains and in the vestments of the priests.

4. *Vermilion* was used in fresco-painting (Ezek. xxiii:14), for coloring the idols themselves, and for decorating the walls and beams of houses (Jer. xxii:14).

The *natural* colors noticed in the Bible are white, black, red, yellow, and green, yet only three colors are sharply defined, *white*, *black*, and *red*. To show the vagueness of the use of the others, the tint *green* (translated "yellow" in the A. V.) is applied in the Hebrew to gold (Ps. lxxviii:13) and to the leprous spot (Lev. xiii:49). (*Schaff, Bib. Dict.*) (See PURPLE, BLUE, CRIMSON, SCARLET.)

Figurative. (1) **White** is often used to represent what is pure and glorious. (1) God having *hair white* as wool, and *white* garments, and riding on a *white* cloud, denotes his eternity, wisdom, holiness, and the equity of his providential conduct. (Dan. vii:9. Is. xix:1. Rev. xiv:14. (2) Christ is *white*; he is pure in his Godhead, holy, highly exalted, and abounding in love; and he is *ruddy*, and *red in his apparel*; he appeared in our nature, and suffered in it; and in the execution of his wrath, conquers and destroys his enemies (Cant. v:10; Is. lxiii:1, 2). (3) His *hair white* as wool, denotes his eternity, and wisdom (Rev. i:14). (4) The *whiteness of his throne* imports the holiness, equity, and glory of his procedure in the last judgment (Rev. xx:11). (5) The *white horses* of Christ and his people, are the pure truths of the gospel, by means of which they obtain spiritual victories (Rev. vi:2; xix:14). (6) Saints are made *white*, when freed from guilt and sin (Ps. li:7); their *white raiment* is the righteousness of Christ appropriated by faith, and their sanctification; the state of heavenly glory, in which they are peaceable, noble, and triumphant kings and priests unto God (Rev. iii:4, 5; iv:4; xv:6) and (vii:14). (7) The Nazarites were *whiter than milk*, when they kept their vows, and looked fresh and comely (Lam. iv:7). (8) The fields were *white to harvest*, or ripe, when multitudes seemed fond of hearing the gospel, by the power of which men are cut off from their natural state, gathered to Jesus, and bound up in the bundle of life with him (John iv:35).

(2) **Black.** (1) Blackness, applied to gates, skin, face, raiment, imports great distress, bitter grief and mourning (Jer. xiv:2 and viii:21; Joel ii:6; Mal. iii:14). (2) When applied to the hair of one's head, it signifies beauty, freshness, and soundness (Lev. xiii:37; Cant. v:11). (3) With respect to remaining corruptions and afflictions, and often to the views of unbelievers the church and people of God are *black*; but in respect of Christ's ordinances, and implanted grace, they are *comely* (Cant. i:5, 6). (4) To mark dread, fear, and perplexity, the Jews and Assyrians are called *black* (Joel ii:6; Nah. ii:10). (5) Hell is called the *blackness of darkness*.

(3) **Red; Redness.** (1) *Redness* of horses, and *redness* of the wine of God's wrath, denote the fearful and bloody effects of God's judgments (Zech. i:8, and vi:2; Rev. vi:4; Ps. lxxv:8). (2) *Redness* ascribed to the church as a vine, denotes her exposure to bloody trouble and persecution, and their bringing forth good fruit to God (Is. xxvii:2). (3) The *redness* of the heathen dragon, signified the bloody persecutions of the Christians by the Roman emperors (Rev. xii:3). (4)

The *redness* of a leprous infection in flesh or garments, might denote angry refusal of reproof, and furious defense of faults (Lev. xiii:19, 42, 49), and (xiv:37). (5) *Redness of eyes*, imports having plenty of wine, or being drunk with it (Gen. xlix:12; Prov. xxiii:29).

(4) *Green*. (1) As *green* is the color of flourishing grass, it is used as an emblem of pleasantness, prosperity, fullness of wealth, grace, or comfort. Jesus Christ is called a *green tree*, to mark his unbounded and never-failing fullness of grace and fructifying virtue (Luke xxiii:31; Hos. xiv:8). (2) Saints are *green trees*, or *green things*; they still retain the Spirit of grace, and grow in grace and good works; and are delightful to behold (Ps. lli:8; Rev. ix:4). (3) Men abounding in prosperity, honor, and wealth, are called *green trees* (Ezek. xvii:24 and xx:47).

(5) *Blue*. In types and emblems it signified heavenliness, purity, humility, etc. (Exod. xxv:4;

with Laodicea and Hierapolis, destroyed by an earthquake. This, according to Eusebius, was in the ninth year of Nero; but the town must have been immediately rebuilt, for in his twelfth year it continued to be named as a flourishing place (Nicet. *Chron.* p. 115). It still subsists as a village named Choias. The huge range of Mount Cadmus rises immediately behind the village, close to which there is in the mountain an immense perpendicular chasm, affording an outlet for a wide mountain torrent. The ruins of an old castle stand on the summit of the rock forming the left side of this chasm. There are some traces of ruins and fragments of stone in the neighborhood, but barely more than sufficient to attest the existence of an ancient site; and that this site was that of Colossæ is satisfactorily established by the Rev. F. V. J. Arundell.

COLOSSIANS, EPISTLE TO THE.

(1) *Content of the Epistle*. This writing be-

Colossæ.

xxvi:1, 31, 36; xxviii:31; Prov. xx:30). Among the Hebrews it was the Jehovah color, the symbol of the revealed God (comp. Exod. xxiv:10; Ezek. i:26). Delitzsch says: "Blue denotes the softened divine majesty condescending to man in grace" (*Iris*, p. 48). It also represented reward.

(6) *Purple*. *Purple*, as the dress of kings, was associated with *royalty* and *majesty* (Judg. viii:26; Esth. viii:15; Cant. iii:10; vii:5; Dan. v:7, 16, 29, A. V. "scarlet").

COLOSSÆ (ko-lös'se), (Gr. Κολοσσαί, *kol-os-sah-ee'*), improperly spelled Colosse (Col. i:2), a city of Phrygia, on the river Lycus (now Gorduk), not far from its confluence with the Mæander, and near the towns of Laodicea, Apamea, and Hierapolis (Col. ii:1; iv:13, 15; Comp. Plin. *Hist. Nat.* v:41; Strabo xii, p. 576).

A Christian church was formed here very early probably by Epaphras (Col. i:7; iv:12 *sq.*), consisting of Jews and Gentiles, to whom Paul, who does not appear to have ever visited Colossæ in person (Col. ii:1) addressed an Epistle from Rome. Not long after, the town was, together

gins with the salutation of Paul and Timothy to the Christians of Colossæ, (i:1-2), which is followed by an expression of thanksgiving for the grace of God manifested in the experience of the Colossian Christians, (i:3-6). Then comes a general prayer for their enlightenment and confirmation in faith, (i:9-23). This leads to the statement of the cardinal doctrine of the faith, which is the "mystery hid from all eyes, but now manifested to the saints of God," i. e. the indwelling Christ, (i:24-29). The theme thus brought before the reader is then taken up and the doctrine of the supremacy of Christ is cleared and established by the repudiation of speculative conceptions regarding the constitution of the spiritual universe and certain ceremonial usages deduced from them, (ii:1-23). As against these useless ritual practices, the writer then commends certain ethical principles and precepts of life, (iii and iv). These grow out of participation in the life of the Risen Lord, (iii:1-4). The fruit of them is the mortification of the sinful nature, (iii:5-11), whose counterpart is the vivification of the new or holy

character, (iii:12-17). Practically, the new life should evince itself in ideal domestic harmony, (iii:18-25), and in prayer and unblemished conduct among men, (iv:1-6). The writer then adds some items of a personal nature and closes with a common salutation, or benediction, (iv:7-18).

(2) **The Colossian Heresy.** The subject of the epistle is the supremacy of Christ over all principalities and powers conceivable. Such powers and principalities, it appears, were being commended by the adherents of a certain "philosophy." By implication, Christ's authority and sphere of action were presented as limited and remote from men. There was here, of course, the influence of the pagan polytheism, and the design of the epistle is to check this influence and restore to the Colossian Christians their absolute and pure confidence in Christ as the all-in-all of the Universe. The exact classification of this philosophy and of those who taught it at Colossæ have been a question in dispute among critics. One of the earliest views regarding them was that they were disciples of John the Baptist (*Heinrichs Nov. Test. Kop.* vii. pt. ii. p. 158) Michaelis & Storr thought they were Essenes. Hug believed they were Magians (*Introd.* vol. ii, p. 449, Eng. tr.). Neander made them syncretists who attempted to combine Oriental theosophy and asceticism with Christianity (*Planting and Training of the Church*, Chap. i. p. 374). Lightfoot describes them as a class of incipient Gnostics who sprang from the Essenism of the preceding age. It has been put beyond doubt that there were, even before the advent of Christ, heretical sects within Judaism, especially at the centers where Judaism came in contact with Hellenism. These interpreted the Old Testament in a speculative manner and developed their speculations into a cosmogony and a theology quite similar to the theogonies and cosmogonies of the later Gnostic sects. The errors taught at Colossæ were kindred to these speculations. They constituted a system ("philosophy") characterized by intellectual exclusiveness, as against which Paul contends for the universality of the Gospel, (i:28), which he designates as the true "wisdom," (*σοφία*), "intelligence," (*σύνεσις*), "knowledge," (*γνώσις*), and "perfect knowledge," (*ἐπιγνώσις*), (i:9, 28; ii:2, 3; iii:10, 16; iv:5). As the teachers of the error constituted themselves into an organization and practiced rites of initiation, the Apostle "contrasts with these the one universal, comprehensive mystery, the knowledge of God in Christ." This mystery exhausts all wisdom. It contains "all the treasures of wisdom and knowledge hidden in it." If the false teachers said "We, and we alone, possess wisdom," the apostle responded, "True wisdom is offered to all in the revelation of God through Jesus Christ." But the philosophy taught by these teachers included a doctrine of beings intermediate between God and the world. The function of these beings was to bridge over the chasm supposed to exist between the true God and the coarse material universe. They were supposed to have a share in the creation and government of the world. Against this doctrine the Apostle sets over the doctrine of the One Eternal Son, the Word begotten before the worlds, (i:15-20; ii:9-15). Christ was the word become Incarnate, and in him men had all they required. He was the image of the invisible God. He was before all things, and by him all things consist. In him they were complete and he would present them to God, holy, unblamable, and unreprouvable, provided they continued steadfast in the faith. Further, this "philosophy" led to asceticism. It drew a distinc-

tion between kinds of meats and drinks (ii:16), and insisted that those forbidden should not even be handled or tasted or touched (ii:21), with the intent of checking fleshly indulgence (ii:23). All of these prescriptions, Paul consistently with his whole attitude towards the doctrine of salvation by works, denounces as valueless. Christians have risen above them (ii:8, 20-22). They have found the true and only remedy for sin—the resurrection of the inner man through Christ, (iii:1). In this way a new life has been born within them which is able to overcome the evil tendencies that work through the flesh.

(3) **The Church at Colossæ.** The church to which this letter was addressed was one of several in the same general neighborhood. The town of Colossæ (see COLOSSÆ) was situated in the valley of the Lycus. Not far from it were the cities of Laodicea and Hierapolis. In these two, as well as at Colossæ, Christian communities had been established and had existed for some time before the writing of the epistle. The founder of the church at Colossæ was Epaphras, a Gentile from Phrygia, converted to the Gospel under the preaching of Paul, (iv:12). It has been supposed that this Epaphras became the missionary of the general region and founded not only the church at Colossæ, but also those at Laodicea and Hierapolis. In any case, the Apostle himself declares that he was personally unknown to all these churches; (i:4, 8, 9; ii:1, 5), though he had come in contact with individual members in them, such as Philemon and Epaphras, and he reckons them as fruits of his ministry inasmuch as Epaphras himself, as already said, was one of his converts and, in a manner his vicar.

The conditions already described as prevailing in the Colossian church, and calling for such a letter as Paul wrote, must have been to some extent the same as those found at Laodicea; for Paul directs that the letter be read in the church at Laodicea, (iv:16), and betrays some concern as to the peace and welfare of that church also, (ii:1). From an allusion made in this connection to a letter to the church in Laodicea, (iv:16), it has been inferred that Paul wrote such an one and that it has not been preserved. Another inference from this allusion identifies the letter to the Laodiceans with the Epistle to the Ephesians (see EPHESIANS). It is impossible to reach a definite conclusion in this subject beyond the negative one that the epistle current in the ancient church under the title of Laodiceans was not the document alluded to in Col. iv:16.

(4) **Time and Place of Composition.** The question now may be approached, in what place and at what time of his life did Paul write the Epistle to the Colossians? In the received text (*Textus Receptus*) the subscription answered the first part of the question by assigning the letter to Paul's Roman sojourn. The correctness of this subscription has been, however, recently disputed. Several excellent scholars (Schulz, Thiersch, Reuss, Sabatier, Weiss, and Meyer) have found reasons for believing that the epistle was written from Cæsarea during the Apostle's imprisonment in that city. Upon examination, these reasons prove inconclusive. On the other hand, the statement of the subscription is borne out by stronger considerations than any adduced for Cæsarea as the place of the composition of the letter. Consequently, the more recent scholars are inclined to accept the older view and assign the letter to Paul's Roman imprisonment (see Holtzmann, Godet, T. K. Abbott, Zahn, etc.) But if Paul wrote to the Colossians from Rome, the most probable

date for his writing seems to be the end of the year 62 or the beginning of 63 A. D.

The occasion and design of writing have been partly given already. The Colossian Christian community was composed chiefly of converts from among the Gentiles, (i:13, 21-27; ii:13; iii:6, 7). Epaphras, the founder of the church, was a disciple of Paul. He had doubtless taught it the gospel as he had heard it from Paul. But his teaching was in danger of being corrupted by the rise in the community of a certain system of error (the "philosophy" already characterized above). In his perplexity, he resorted to Paul to lay the case before him. In the epistle, we have Paul's response to the personal appeal of Epaphras.

(5) **Genuineness.** But did Paul write the letter after all? This question was answered in the negative first by Meyerhoff in 1838. The reasons upon which this scholar based his conclusion were mainly these three: (1) That the style of the epistle was different from the style of the other Pauline writings. (2) That the heresy combated in it was the Gnosticism of Cerinthus which arose only after the days of Paul. And (3) that Colossians appeared to be a condensation of Ephesians. The view of Meyerhoff was taken up and elaborated by the leaders of the Tübingen school of criticism. Baur and Schwegler, upon grounds similar to those already cited, and further because the denial of the genuineness of the epistle harmonized with their preconceived philosophy of the development of thought in the apostolic age, argued strenuously against the Pauline authorship of Colossians.

Out of the efforts to prove the spuriousness of the epistle, arose two efforts to assign to it a semi-authentic character. First Ewald conceived the idea that the substance of the thought was Paul's, but that it was written down by Timothy, to whom the apostle had committed this task, after explaining the situation to him and approving of some suggestions made by him. This theory required the introduction of a large subjective element into the solution of the problem and found no favor.

The second view propounded to account for the differences between Colossians and the other epistles of Paul is the interpolation theory. This view was elaborated by Holtzmann and assumes that Paul did write a short letter to the Colossian church. This letter was taken by a Gnostic of the early part of the second century and used as a basis of the Epistle to the Ephesians. Afterward, the same person conceived the notion of expanding the original Colossian Epistle into our present letter. This view is carefully worked out and supported by its originator in a keen critique. Nevertheless, it has found but few advocates. Von Soden is one of these; but even he qualifies his endorsement of Holtzmann's theory by reducing very largely the number of passages interpolated. Pauline authorship is at present denied to the epistle by Pfeiderer, Hilgenfeld and Weizsäcker, whereas its genuineness is accepted by Sabatier, Lightfoot, Weiss, Farrar, Salmon, Godet, Zahn, Abbott, and the majority of scholars in general.

(6) **Conclusion.** These discussions have brought into view two important matters connected with the epistle. First, the emphatic place given to correct conception of the person of Christ in the apostolic age. It was the Christological section, i:15-20, which served to raise doubts of Pauline authorship. The removal of these doubts leaves the Christology of the epistle in bolder relief than it was before they were suggested.

Secondly, the relations of the Epistles to the Ephesians and to the Colossians are cleared. These relations are not correctly presented when it is said that Ephesians is an elaboration of the nucleus of Colossians by a later author, or that it is an imitation of Colossians, or further that Colossians is an abridgment of Ephesians. The two epistles move in the same sphere of thought and are expressed in language and style possessing the same general characteristics. These similarities grow out of the fact that the author wrote both at nearly the same time when his own mind was possessed by nearly the same line of thought. The differences between the epistles are such as might be expected to come from the different conditions prevailing in the midst of those to whom they were respectively addressed. (See EPHESIANS.)

(7) **Helps to the Study of the Epistle.** The most thorough separate commentary on Colossians, in English, is that by Lightfoot. Other good commentaries are Abbott's (in the International Critical Series), Ellicott's, Maclaren's (in the Expositor's Bible), Moule's (in the Cambridge Bible also the same author's *Colossian Studies*), Barry's and L. J. Davies'.

Of the older works, Eadie's may be mentioned as full of merit. In commentaries upon the whole New Testament, Colossians is adequately treated by Meyer and Alford. The Expositor's Greek Testament (now in preparation) may be expected to be excellent on this writing. A. C. Z.

The following analysis of the epistle has been made by J. O. F. Murray, *Hastings' Bib. Dict.*

(a) The opening section, after the salutation (verses 1, 2), is devoted to an elaborately expanded thanksgiving (verses 3-24). St. Paul singles out for special mention the fruitfulness of the knowledge of the truth among the Colossians as witnessed by their evangelist Epaphras (verses 3-8), and prays for a further development, springing from the same source, to take practical effect in walking worthily of the Lord, as they give thanks to the Father for their deliverance from the power of darkness into the kingdom of the Son of His love (verses 9-16). This reference to the Son leads to a full, though condensed, statement of the office of the Son—

(a) In relation to the universe as the source and goal, and the present principle of coherence for all creation (verses 15-17), and

(b) In relation to the Church as being now in His risen state not only the permanent home of all the divine perfections, but also the source of an all-embracing reconciliation by His death (verses 18-20),—a reconciliation the power of which the Colossians had already experienced, and which would not fail of its final consummation if they continued as they had begun, faithful adherents of the world-wide gospel of which St. Paul was in a special sense the minister.

(b) This personal reference forms the starting-point of the second section of the epistle (i:24-ii:5), in which St. Paul introduces himself to his correspondents, explaining his unique position in relation to the consummation of the divine revelation, and his efforts to bring the hearts of all men under the full power of its influence (i:24-28). This will help them to understand the interest that he takes in them and in their neighbors, even though they had never met in the flesh, and also the ground for his prayer for their enlightenment (ii:1-3). This section closes with a brief warning against some plausible deceiver, coupled with a renewed assurance of his close sympathy with them, and his joy in their constancy (verses 4, 5).

(c) He passes now to a series of special exhortations and warnings, which occupy two chapters (ii:6; iv:6 *sq.*), and fall into five subdivisions.

(a) The first of these (ii:6-19), is in its main purpose an exhortation to retain their hold on and to develop into all its practical consequences the personal relation to Christ which the gospel had made known to them. As this was the point on which the Colossians had most to fear from false teachers, the exhortation (verses 6, 7) is accompanied by an explicit warning (verse 8), and a careful statement of the grounds on which the Christian who grasps the true conception of the Person of Christ is assured of a complete moral development, and receives, by union in baptism with the death and resurrection of Christ, the reality of that separation from his evil nature which had been foreshadowed by circumcision (verses 9-15). In the light of this thought, the attractiveness of outward observances for the attainment of purity and the necessity for angelic mediation disappear (verses 16-19).

(b) In the second subdivision (ii:30-iii:4), union with the death of Christ is shown to be a deliverance from formal and material restrictions, and union with His resurrection determines the true sphere of Christian thought and life.

(c) The third subdivision develops the same thought in its present practical application to moral effort, with relation (1) to the appetites and passions (the members on the earth) which need to be done to death, and the evil habits which must be stripped off (iii:5-11), and (2) to the new graces which the Christian must seek to acquire (verses 12-14), and the new principles by which he should regulate his practice (verses 15-17).

(d) The fourth subdivision (iii:18-iv:1), applies the new principle to the fundamental relations of family life, husbands and wives, parents and children, masters and servants.

(e) The last subdivision (iv:2-6) contains an exhortation to perseverance in prayer, and to discretion in their relations with the heathen world.

(d) The letter closes with a commendation of the messengers, Tychicus and Onesimus, by whose hands it was sent (iv:7-9), and a group of personal salutations (verses 10-16).

COMFORT (kŭm'fĕrt), (Heb. נַחֵם, *naw-kham'*, to comfort, give forth sighs; Gr. *παρακαλέω*, *par-ak-al-eh'ō*, to call alongside, help).

Our English word is from Lat. *confortare* (*confortis*), to strengthen greatly, and means to ease, enhearten, encourage, inspirit, enliven, console, cheer.

Spiritual comfort is that pleasure of the soul which arises from the consideration of what God in Christ is to us with respect to relation, and of what he has done for and infallibly promised to us (2 Cor. i:4). The Holy Spirit is the author of it; the Scriptures are the established ground and means of it; and ministers and godly companions are the instruments and helpers of it (John xvi:7; Ps. cxix:49, 50; 2 Cor. i:5, 6, 7 and vii:6, 7). (See CONSOLATION.)

COMFORTER (kŭm'fĕrt-ēr), (Gr. *παρακλήτος*, *par-ak-lay-tos*). See HOLY GHOST; PARACLETE.

COMING OF CHRIST (kŭm'ing ōv krĭst), (Gr. *παρουσία*, *par-oo-see'ah*, a being present), our Lord's first appearance in the flesh (1 John v:20; 2 John vii), or future appearance at the last day. (See MILLENNIUM.)

COMMANDMENTS, TEN (kŏm-mānd-ments). See DECALOGUE.

COMMENTARY.

(1) **Meaning.** By commentary, in its theological application, is usually meant an exhibition of

the meaning which the sacred writers intended to convey; or a development of the truths which the Holy Spirit willed to communicate to men for their saving enlightenment. This is usually effected by notes more or less extended—by a series of remarks, critical, philological, grammatical, or popular, whose purport is to bring out into view the exact sentiments which the inspired authors meant to express. The ideas contained in the Old and New Testaments are thus transferred into other languages and rendered intelligible by the help of oral or written signs. There is a high and holy meaning in the words of holy men who spake as they were moved. To adduce this in a perspicuous form is the important office of the commentator. As there never has been, and from the nature of the case there never can be, a universal language, God selected for the revelation of his will those languages which were in all respects the fittest media for such a purpose. Hence arises the necessity of transplanting from these individual dialects the momentous truths they were selected to express; and of clothing in the costume of various people, as far as that costume can be adapted to such an object, the precise sentiments which were in the minds of the inspired writers. It is true that this can be only imperfectly done, owing to the various causes by which every language is affected; but the *substance* of revelation may be adequately embodied in a great variety of garb.

The following may be noticed as:

(2) **Characteristics.** (1) An elucidation of the meaning belonging to the words, phrases, and idioms of the original.

(2) Another characteristic of commentary is an exhibition of the writer's scope, or the end he has in view in a particular place. It ascertains the precise idea he intended to inculcate in a given locality, and how it contributes to the general truth enforced.

(3) In addition to this, the train of thought or reasoning pursued throughout an entire book or epistle, the various topics discussed, the great end of the whole, with the subordinate particulars it embraces, the digressions made by the writer—these, and other particulars of a like nature, should be pointed out by the true commentator.

(4) Another characteristic of commentary is, that it presents a comparison of the sentiments contained in one book, or one entire connected portion of Scripture, with those of another, and with the general tenor of revelation. A beautiful harmony pervades the Bible. Diversities, indeed, it exhibits, just as we should *a priori* expect it to do; it presents difficulties and mysteries which we cannot fathom; but, with this variety, there is a uniformity worthy of the wisdom of God.

(3) **Differs from Translation.** From what has been stated in regard to the constituents of commentary, it will also be seen that it differs from *translation*. Its object is not to find words in one language corresponding to those of the original language of the Scriptures, or nearly resembling them in significance, but to set forth the meanings of the writers in notes and remarks of considerable length. *Paraphrase* occupies a middle place between translation and commentary; partaking of greater diffuseness than the former, but of less extent than the latter.

(4) **Different Kinds.** There are two kinds of commentary which we shall notice, viz., the *critical* and the *popular*:

(1) **Critical.** The *critical* contains grammatical and philological remarks, unfolds the general and special significations of words, points out idioms and peculiarities of the original languages,

and always brings into view the Hebrew or Greek phraseology employed by the sacred writers. In a word, it takes a wide range, while it states the processes which lead to results, and shrinks not from employing the technical language common to scholars.

(2) *Popular*. *Popular* commentary states in perspicuous and untechnical phraseology the sentiments of the holy writers, usually without detailing the steps by which that meaning has been discovered. It leaves philological observations to those whose tastes lead them to such studies. All scientific investigations are avoided. Its great object is to present, *in an attractive form*, the thoughts of the sacred authors, so that they may vividly impress the mind and interest the heart.

The limits of *critical* and *popular commentary* are not so wide as to prevent a partial union of both. Both may state the import of words and phrases; both may investigate the course of thought pursued by prophets and apostles. They may develop processes of argumentation, the scope of the writers' remarks, the bearing of each particular on a certain purpose, and the connection between different portions of Scripture. In these respects *critical* and *popular* commentary may substantially coincide. Perhaps the union of both presents the best model of commentary, provided the former be divested of learned parade and repulsive technicalities, and the latter be perspicuously full. The results which it is the great object of every commentator to realize are simply *the ideas* which the inspired writers designed to set forth. These constitute theology. They are emphatically *the truth*. They are the holy mind of God, as far as he has thought fit to reveal it to men—the pure and paramount realities which metamorphose the sinner into the saint. The commentator who comes short of this important end, or fails in exhibiting the whole counsel of God in its harmonious proportions, is not successful.

(5) **Earlier Commentaries.** The following are some of the earlier commentators on the Bible:

Calvin.—In all the higher qualifications of a commentator Calvin is pre-eminent.

It has been well remarked that he chiefly attended to the *logic* of commentary. He possessed singular acuteness, united to a deep acquaintance with the human heart, a comprehension of mind by which he was able to survey revelation in all its features, and an enlightened understanding competent to perceive sound exegetical principles, and resolute in adhering to them. He can never be consulted without advantage, although not all his opinions should be followed. His works present specimens of exegesis that deserve to be ranked among the best extant, because they are occupied with the *spiritual essence* of the Bible—with *the theology* of the inspired writers.

Beza.—Beza's talents are seen to great advantage in expounding the argumentative parts of the Bible. He was better acquainted with *the theology* than *the criticism* of the New Testament.

Hammond.—This learned annotator was well qualified for interpretation. His paraphrase and annotations on the New Testament possess considerable value; and many good specimens of criticism are found in his notes.

Poole.—Poole's annotations on the Holy Bible contain several valuable, judicious remarks. But their defects are numerous. The pious author had only a partial acquaintance with the original. He was remarkable neither for profundity nor acuteness.

Poli Synopsis Criticorum.—In this large work, the annotations of a great number of the older

commentators are collected and condensed. But they are seldom sifted and criticised, so that the reader is left to choose among them for himself.

Grotius.—This very learned writer investigates the literal sense of the Scriptures with great diligence and success. He had considerable exegetical tact, and a large acquaintance with the heathen classics, from which he was accustomed to adduce parallels. His chief defect is in *spiritual discernment*. Hence he rests in the literal meaning in many cases, where there is a higher or ulterior reference.

Le Clerc.—Excellent notes are interspersed throughout the commentaries of this author, which the younger Rosenmüller transcribed into his *Scholia*. His judgment was good, and his mode of interpretation perspicuous.

Calmet.—Calmet is perhaps the most distinguished commentator on the Bible belonging to the Roman Catholic Church. In the higher qualities of commentary his voluminous work is very deficient. It contains a good collection of historical materials, and presents the meaning of the original where it is already plain.

Patrick, Lowth, Arnold and Whitby.—Bishop Patrick had many of the elements belonging to a good commentator. His learning was great when we consider the time at which he lived, his method brief and perspicuous. Lowth was inferior to Patrick. Whitby presents a remarkable compound of excellences and imperfections. In philosophy he was a master. In critical elucidations of the text he was at home. Nor was he wanting in acuteness or philosophical ability. His judgment was singularly clear, and his manner of annotating straightforward. Yet he had not much comprehensiveness of intellect, or a deep insight into the spiritual nature of revelation.

Henry.—The name of this good man is venerable, and will be held in everlasting remembrance. His commentary does not contain much *exposition*. It is full of *sermonizing*. In thoroughness and solidity of exposition he is not to be named with Calvin.

Doddridge.—The taste of this pious commentator was good, and his style remarkably pure. He had not much acumen or comprehension of mind; but he had an excellent judgment, and a calm candor of inquiry.

Scott.—The prevailing characteristic of Scott's commentary is judiciousness in the opinions advanced. The greater portion of it, however, is not *proper exposition*. The pious author preaches about and paraphrases the original.

A. Clarke.—In most of the higher qualities by which an interpreter should be distinguished, this man of much reading was wanting. His historical and geographical notes are the best.

E. F. C. Rosenmüller.—The *Scholia* of this laborious writer extend over the greater part of the Old Testament. Looking to the last editions, they are unquestionably of high value. They bring together a mass of annotations such as is sufficient to satisfy the desires of most Biblical students. Yet the learned author undertook too much to perform it in a masterly style. Hence his materials are not properly sifted, the chaff from the wheat.

Olshausen.—The best example of commentary on the New Testament with which we are acquainted has been given by this writer. It is a model of exposition unrivalled in any language. Verbal criticism is but sparingly introduced, although even here the hand of a master is apparent.

Tholuck.—The commentaries of this eminent writer on various books of the New Testament,

especially those on the Epistles to the Romans and Hebrews, exhibit the highest exegetical excellences. While he critically investigates phrases and idioms, he ascends into the pure region of the ideas, unfolding the sense with much skill and discernment. His commentary on John is of a more popular cast. His interpretation of the *Bergpredigt*, or Sermon on the Mount, is very valuable.

In addition to these, Germany has produced other specimens of commentary that occupy a high place in the estimation of competent judges. Lucke, on John's writings, especially in the *third* edition now in progress; Gesenius, on Isaiah; De Wette, on the Psalms; Hävernick, on Ezekiel and Daniel; Billroth, on the Corinthians; Harless, on the Ephesians; and Baehr, on the Colossians—possess much merit, accompanied, it is true, with some serious faults. As examples of thorough and solid commentary, the English language presents none equal to those of Professor Stuart on the Epistles to the Romans and Hebrews.

(6) Later Commentaries. A valuable commentary on the Epistle to the Romans we also possess in that of Professor Hodge, although the author cannot be said to have gone far beyond Calvin, in whose steps he has closely trodden.

Among the later commentaries of value are those of Henry Alford; C. J. Ellicott; F. Godet; Keil and Delitzsch; Heinrich A. W. Meyer; J. D. Michaelis; R. C. Trench. (*Notes on the Miracles, Notes on the Parables, etc.*); F. G. A. Tholuck; D. D. Whedon.

COMMERCE (kōm'mērs), (Heb. קָוַר, *saw-khar'*, a primitive root; to *travel* round, specifically as a *peddler*). The idea conveyed by this word is represented in the sacred writings by the word *trade*.

(1) Origin. The origin of commerce must have been nearly coeval with the world. As pasturage and agriculture were the only employments of the first inhabitants, so cattle, flocks, and the fruits of the earth were the only objects of the first commerce, or that species of it called barter. It would appear that some progress had been made in manufactures in the ages before the flood. The building of a city or village by Cain, however insignificant the houses may have been, supposes the existence of some mechanical knowledge. The musical instruments, such as harps and organs, the works in brass and in iron exhibited by the succeeding generations, confirm the belief that the arts were considerably advanced. The construction of Noah's ark, a ship of three decks, covered over with pitch, and much larger than any modern effort of architecture, proves that many separate trades were at that period carried on. That enormous pile of building, the tower of Babel, was constructed of bricks, the process of making which appears to have been well understood.

Such of the descendants of Noah as lived near the water may be presumed to have made use of vessels built in imitation of the ark—if, as some think, that was the first floating vessel ever seen in the world—but on a smaller scale, for the purpose of crossing rivers. In the course of time the descendants of his son Japheth settled in 'the isles of the Gentiles,' by which are understood the islands at the east end of the Mediterranean sea, and those between Asia Minor and Greece, whence their colonies spread into Greece, Italy, and other western lands.

(2) Sidon. Sidon, which afterwards became so celebrated for the wonderful mercantile exertions of its inhabitants, was founded about 2,200 years before the Christian era. The neighboring moun-

tains, being covered with excellent cedar-trees, furnished the best and most durable timber for ship-building. The inhabitants of Sidon accordingly built numerous ships, and exported the produce of the adjoining country, and the various articles of their own manufacture, such as fine linen, embroidery, tapestry, metals, glass, both colored and figured, cut, or carved, and even mirrors. They were unrivaled by the inhabitants of the Mediterranean coasts in works of taste, elegance, and luxury. Their great and universally acknowledged pre-eminence in the arts procured for the Phœnicians, whose principal seaport was Sidon, the honor of being esteemed, among the Greeks and other nations, as the inventors of commerce, ship-building, navigation, the application of astronomy to nautical purposes, and particularly as the discoverers of several stars nearer to the north pole than any that were known to other nations; of naval war, writing, arithmetic, book-keeping, measures and weights; to which it is probable they might have added money.

Egypt appears to have excelled all the neighboring countries in agriculture, and particularly in its abundant crops of corn. The fame of its fertility induced Abraham to remove thither with his numerous family (Gen. xii:10).

(3) Early Mention of Money. The earliest accounts of bargain and sale reach no higher than the time of Abraham, and his transaction with Ephron. He is said to have weighed unto him '400 shekels of silver, current money with the merchant' (Gen. xxiii:16). The word merchant implies that the standard of money was fixed by usage among merchants, who comprised a numerous and respectable class of the community. Manufactures were by this time so far advanced, that not only those more immediately connected with agriculture, such as flour ground from corn, wine, oil, butter, and also the most necessary articles of clothing and furniture, but even those of luxury and magnificence, were much in use, as appears by the ear-rings, bracelets of gold and of silver, and other precious things presented by Abraham's steward to Rebecca (Gen. xxiv: 22, 53).

Although at a time too early to be dated the precious metals, gold and silver, were used as media of exchange, it is to be noticed that they were so used in the way of barter, and not as money in our sense of the term, which implies a definite weight bearing a stamp. The metal was weighed out, just as other articles would be weighed that were not sold by measure. We have no suggestion of the standard of weight. It is natural to suppose that the Phœnicians would be the first to appreciate the convenience of coin, money to be told out by number; but archæologists do not give them credit for the invention. The earliest known coins are Lydian, struck by the Mermnad kings, the earliest of whom, Gyges (Gugu or Gog), usurped the throne about 700 B. C. The Lydians were rivals of the Phœnicians in ingenuity, in fine workmanship, and even in commerce, especially on internal trade, as contrasted with maritime and coastal. Professor Sayce credits their merchants with being the first to devise inns upon regular lines of commerce. We need not hesitate, then, to credit them with the invention of money when the evidence of the earliest coins certainly is in their favor. Pliny ascribes the invention to Servius Tullius. As that monarch is largely the creature of fable, this means only that the earliest Roman coinage (copper) was traditionally assigned to him. As to Lydia, see Sayce's article in *Encyc. Brit.*, s. v.

(4) **Arabian Commerce.** In the book of Job, whose author, in the opinion of the most learned commentators, resided in Arabia, and was contemporary with the sons of Abraham, much light is thrown upon the commerce, manufactures, and science of the age and country in which he lived. There is mention of gold, iron, brass, lead, crystal, jewels, the art of weaving, merchants, gold brought from Ophir, which implies commerce with a remote country, and topazes from Ethiopia; ship-building, so far improved that some ships were distinguished for the velocity of their motion; writing in a book, and engraving letters or writing on plates of lead and on stone with iron pens, and also seal-engraving; fishing with hooks, and nets, and spears; musical instruments, the harp and organ; astronomy, and names given to particular stars. These notices tend to prove that, although the patriarchal system of making pasturage the chief object of attention was still maintained by many of the greatest inhabitants where the author of the book of Job resided, the sciences were actively cultivated, the useful and ornamental arts in an advanced state, and commerce prosecuted with diligence and success.

The inhabitants of Arabia appear to have availed themselves, at a very early period, of their advantageous situation between the two fertile and opulent countries of India and Egypt, and to have obtained the exclusive monopoly of a very profitable carrying trade between those countries. The merchants of one of these caravans bought Joseph from his brothers for twenty pieces of silver, that is about 2*l.* 11*s.* 8*d.* sterling or thirteen dollars, and carried him into Egypt. The southern Arabs were eminent traders, and enjoyed a large proportion, and often the monopoly, of the trade between India and the western world.

(5) **Egyptian Manufactures.** At the period when Joseph's brethren visited Egypt, inns were established for the accommodation of travelers in that country and in the northern parts of Arabia. The more civilized southern parts of the peninsula would no doubt be furnished with caravansaries still more commodious.

During the residence of the Israelites in Egypt manufactures of almost every description were carried to great perfection. Flax, fine linen, garments of cotton, rings and jewels of gold and silver, works in all kinds of materials, chariots for pleasure, and chariots for war, are all mentioned by Moses. They had extensive manufactories of bricks.

(6) **Foreign Colonies.** The expulsion of the Canaanites from a great part of their territories by the Israelites under Joshua, led to the gradual establishment of colonies in Cyprus, Rhodes, and several islands in the Ægean Sea; they penetrated into the Euxine or Black Sea, and, spreading along the shores of Sicily, Sardinia, Gaul, Spain, and Africa, established numerous trading places, which gradually rose into more or less importance. At this period mention is first made of Tyre as a strong or fortified city, whilst Sidon is dignified with the title of Great.

(7) **Reigns of David and Solomon.** During the reign of David, king of Israel, that powerful monarch disposed of a part of the wealth obtained by his conquests in purchasing cedar-timber from Hiram, king of Tyre, with whom he kept up a friendly correspondence while he lived. He also hired Tyrian masons and carpenters for carrying on his works. Solomon, the son of David, cultivated the arts of peace, and indulged his taste for magnificence and luxury to a great extent. He employed the wealth collected by his father in

works of architecture, and in strengthening and improving his kingdom. He built the famous Temple and fortifications of Jerusalem, and many cities, among which was the celebrated Tadmor or Palmyra. From the king of Tyre he obtained cedar and fir, or cypress-timbers, and large stones cut and prepared for building, which the Tyrians conveyed by water to the most convenient landing-place in Solomon's dominions.

Hiram also sent a vast number of workmen to assist and instruct Solomon's people, none of whom had skill 'to hew timber like the Sidonians.' Solomon, in exchange, furnished the Tyrians with corn, wine, and oil, and received a balance in gold. Solomon and Hiram appear to have subsequently entered into a trading speculation or adventure upon a large scale. Tyrian shipwrights were accordingly sent to build vessels for both kings at Eziongeber, Solomon's port on the Red Sea, whither he himself went to animate them with his presence (2 Chron. viii:17). These ships, conducted by Tyrian navigators, sailed in company to some rich countries called Ophir and Tarshish, regarding the position of which the learned have multiplied conjectures to little purpose. The voyage occupied three years; yet the returns in this new found trade were very great and profitable. This fleet took in apes, ebony, and parrots on the coasts of Ethiopia, gold at Ophir, or the place of traffic whither the people of Ophir resorted; it traded on both sides of the Red Sea, on the coasts of Arabia and Ethiopia, in all parts of Ethiopia beyond the straits when it had entered the ocean; thence it passed up the Persian Gulf, and might visit the places of trade upon both its shores, and run up the Tigris or the Euphrates as far as these rivers were navigable.

After the reign of Solomon the commerce of the Israelites seems to have very materially declined. An attempt was made by Jehoshaphat, king of Judah, and Ahaziah, king of Israel, to effect its revival; but the ships which they built at Eziongeber having been wrecked in the harbor, the undertaking was abandoned.

(8) **Tyre.** The rising prosperity of Tyre soon eclipsed the ancient and long-flourishing commercial city of Sidon. About 600 years before Christ her commercial splendor appears to have been at its height, and is graphically described by Ezekiel (xxvii). The vast wealth that thus flowed into Tyre from all quarters brought with it its too general concomitants—extravagance, dissipation, and relaxation of morals.

The subjection of Tyre, 'the renowned city which was strong on the sea, whose merchants were princes, whose traffickers were the honorable of the earth,' by Cyrus, and its subsequent overthrow by Alexander, after a determined and most formidable resistance, terminated alike the grandeur of that city and the history of ancient commerce, as far as they are alluded to in Scripture.

G. M. B.

COMMON (kõm'mũn), (Gr. κοινός, *koy-nos'*, belonging to several). The Greek term properly signifies *what belongs to all* (as in Wisd. vii:3), but the Hellenists applied it (like the Hebrew, *Khole*) to what was profane, *i. e., not holy*, and therefore of common or promiscuous use (Acts x:14).

They also applied the term to what was *impure*, whether naturally or legally (as in Mark vii:2, compared with Macc. i:47, 62). And, finally, it was used of meats forbidden, or such as had been partaken of by idolaters, and which, as they rendered the partakers thereof impure, were themselves called *common* and *unclean*.

COMMONWEALTH (kõm'mũn-wěłth'), (Gr. *πολιτεία*, *pol-ec-ti'ah*, a state), spoken of the theocratic or divine commonwealth (Eph. ii:12); elsewhere, "freedom" (Acts xxii:28, R. V. "citizenship").

COMMUNICATE (kõm-mũ'nĩ-kāt), (Gr. *κοινωνία*, *koy-nohn-ec'ah*, Heb. xiii:16), from root meaning partnership, sharer; used intransitively, to participate (Phil. iv:14).

COMMUNION (kõm-mũn'yũn), (Gr. *κοινωνία*, *koi-noh'nee-ah*, community), a fellowship or agreement, when several persons join and partake together of one thing (2 Cor. vi:14; 1 John i:3); hence its application to the celebration of the Lord's supper as an act of fellowship among Christians (1 Cor. x:16); and it is to this act of participation or fellowship that the word 'communion' is now restricted in the English language, the more familiar application of it having fallen into disuse.

COMMUNION OF SAINTS (kõm-mũn'yũn õv sãnts), a part of Article III of the Apostles' Creed:

"I believe in the Holy Catholic Church, the communion of saints." The phrase is not found in the creeds of the Greek Church; and in the West we find it first in Faustus, Bishop of Reji, South Gaul, A. D. about 455. Among the views held are:

(1) **Roman Catholic.** "The communion of saints consists in the union which binds together the members of the Church on earth, and connects the Church on earth with the Church suffering in purgatory and triumphant in heaven. The faithful on earth have communion with each other because they partake of the same sacraments, are under one head, and assist each other by their prayers and good works. . . . They communicate with the souls in purgatory by praying for them, . . . with the blessed in heaven by obtaining their prayers" (*Cath. Dict.*, s. v.).

(2) **Protestant.** The Churches of the Reformation rejected these views, although Protestant definitions vary somewhat. (a) Luther declared the Church was the body of believers, who, by faith, were saints; hence the phrase was exegetical of the "Holy Church." So also the Reformed Church, at first in its symbols, the First Helvetic and the Scotch Confession of 1560. (b) Calvin understood it as a peculiarity of the Church. "It excellently expresses the character of the Church; as though it had been said that the saints are united in the fellowship of Christ on this condition, that whatever benefits God bestows upon them they should mutually communicate to each other." He is followed in the Geneva and Heidelberg Catechisms, and in the Westminster Catechism, which says: "All saints . . . being united to one another in love, they have communion in each other's gifts and graces, and are obliged to the performance of such duties, public and private, as do conduce to their mutual good, both in the inward and outward man." (c) Pearson and Leighton agree substantially in stating that Christians have communion with the Father (1 John i:3; 2 Pet. i:4), with Christ (1 John i:3; John xvii:23), with the Holy Ghost (Phil. ii:1; 2 Cor. xiii:14), with angels (Heb. i:14; Luke xv:10; Matt. xvii:10), with all saints on earth as the living members of Christ (John i:7; Col. ii:19), and that they form one family with the saints who are in glory (Heb. xii:22, 23). (Barnes, *Bib. Cyc.*, Mc. & Str. *Bib. Cyc.*)

COMMUNITY OF GOODS (kõm-mũ'nĩ-tỹ õv gõods). A state of things which obtained in the early church (Acts ii:44, 45; iv:32, 34).

COMPASS (kũm'pas), (Heb. usually *סבב*, *saw-bab'*, to revolve), used in the A. V. as a noun, as to "fetch a compass" (Num. xxxiv:5; Josh. xv:3, etc.; Acts xxviii:13, Gr. *περιέρχουμαι*, to go around).

COMPASSION (kõm-pãsh'ũn), (Heb. *רַחֲמִים*, *kheh'-sed*, kindness; Gr. *ἔλεος*, *el'eh-os*, compassion). It is rendered "mercy" in Micah vi:8. (See also Matt. v:7; xxiii:23; James iii:17).

COMPEL (kõm'pěł), the rendering in the A. V. (Matt. v:41; xxvii:32; Mark xv:21) of the technical Greek term *ἀγγαρεύω* (*ang-ar-ye-w'o*), literally, "to employ a courier." In Luke xiv:23 the Greek word *ἀναγκάζω*, *an-ang-kad'zo* has the milder sense of *to urge with great zeal*.

It is thus that Christians are to *compel sinners to come in* to Christ's house, when with the utmost earnestness and concern they show them their sinfulness and danger; the excellency, love, and loveliness of Christ; the happiness of those who receive him; their warrant and the command of God to believe in him; and beseech them, as in Christ's stead, to be reconciled to God (2 Cor. v:20).

COMPREHEND (kõm'prě-hěnd'), (Heb. *קָוַל*, *kool*, Is. xl:12), from primitive root, to keep in, to contain, to hold as in a measure.

1. To enclose (Is. xl:12).
2. To sum up (Rom. xiii:9).
3. To perceive clearly, understand fully (John i:5). To *comprehend* with all saints the unbounded love of Christ is to have a clear, extensive knowledge of its nature and effects (Eph. iii:18).

CONANIAH (kõn'a-nĩ'ah), (Heb. *כּוֹנַנְיָהוּ*, *konan-yaw'ho*, Jah has sustained or made).

1. A Levite ruler who had charge of the offerings and tithes in the time of Hezekiah (2 Chron. xxxi:12, 13, A. V. "Cononiah").

2. One who made large offerings for the paschal sacrifices as renewed by Josiah (2 Chron. xxxv:9). (B. C. 726).

CONCISION (kõn-sĩzh'ũn), (Phil. iii:2), (Gr. *ἡ κατατομή*, *mutilation*, or *concision*), a term by which St. Paul denominates the Judaizers who insisted on circumcision as being necessary for Gentile converts.

CONCORDANCE (kõn-kõrd'ans), the name assigned to a book which gives the words contained in the Holy Scriptures in alphabetical order, with a reference to the place where each may be found.

CONCUBINAGE (kõn-kũ'bĩ-nãj), (Heb. *זְנוּת*, *pe-leh'ghesh*, a half wife), in a scriptural sense, means the state of cohabiting lawfully with a wife of second rank, who enjoyed no other conjugal right but that of cohabitation, and whom the husband could repudiate and send away with a small present (Gen. xxi:14).

In like manner, he could by means of presents, exclude his children by her from the heritage (Gen. xxv:6). Such concubines had Nahor (Gen. xxii:24), Abraham (xxv:6), Jacob (xxxv:22), Eliphaz (xxxvi:12), Gideon, Saul (2 Sam. iii:7), David (2 Sam. v:13; xv:16; xvi:21), Solomon (1 Kings xi:3), Caleb (1 Chron. ii:46), Manasseh (*ib.* vii. 14), Rehoboam (2 Chron. xi:21), Abiah (2 Chron. xiii:21), and Belshazzar (Dan. v:2).

(1) **Causes.** To judge from the conjugal histories of Abraham and Jacob (Gen. xvi and xxx), the immediate cause of concubinage was the barrenness of the lawful wife, who in that case

introduced her maid-servant, of her own accord, to her husband, for the sake of having children. Accordingly we do not read that Isaac, son of Abraham, had any concubine, Rebecca, his wife, not being barren. In process of time, however, concubinage appears to have degenerated into a regular custom among the Jews, and the institutions of Moses were directed to prevent excess and abuse in that respect, by wholesome laws and regulations (Exod. xxi:7-9; Deut. xxi:10-14). It would seem that the unfaithfulness of a concubine was not regarded as an act of real adultery (Lev. xix:20). To guard adult male offspring from debauchery before marriage, their parents, it appears, used to give them one of their female slaves as a concubine. She was then considered as one of the children of the house, and she retained her rights as a concubine, even after the marriage of the son (Exod. xxi:9, 11). When a son had intercourse with the concubine of his father, a sort of family punishment, we are informed, was inflicted on him (Gen. xxxv:22; 1 Chron. v:1).

(2) **Children.** With regard to the children of the wife and concubine, there was not the difference that our illegitimacy implies; the latter were a supplementary family, and their names occur in the patriarchal genealogies (Gen. xxii:24; 1 Chron. i:32). The rights of a Hebrew concubine, who had been bought of her father and of a Gentile taken in war, were protected by law (Exod. xxi:7; Deut. xxi:10), but the rights of a concubine who had been bought as a foreign slave were unrecognized, and those of a Canaanitish woman prohibited.

In the Talmud (tit. *Cetuboth*), the Rabbins differ as to what constitutes concubinage; some regarding as its distinguishing feature the absence of the betrothing ceremonies (*sponsalia*), and of the *dowry* (*libellus dotis*), or portion of property allotted to a woman by special engagement, and to which she was entitled on the marriage day, after the decease of the husband, or in case of repudiation; others, again, the absence of the latter alone.

(3) **Roman Custom.** The Roman law calls concubinage an allowed custom. When this expression occurs in the constitutions of the Christian emperors, it signifies what we now sometimes call a *marriage of conscience*. The concubinage tolerated among the Romans, in the time of the Republic and of the heathen emperors, was that between persons not capable of contracting legal marriage. Inheritances might descend to children that spring from such a tolerated cohabitation. Concubinage between such persons they looked on as a kind of marriage, and even allowed it several privileges; but then it was confined to a single person, and was of perpetual obligation, as much as marriage itself. Concubinage is also used to signify a marriage with a woman of inferior condition, to whom the husband does not convey his rank, much like the morganatic marriages of European princes. The connection was considered so lawful that the concubine might be accused of adultery in the same manner as a wife.

This kind of concubinage is still in use in some countries, title of *halb-che* (half-marriage), or left-hand marriage, in allusion to the manner of its being contracted, namely, by the man giving the woman his left hand instead of the right. This is a real marriage, though without the usual solemnity, and the parties are both bound to each other forever, though the female cannot bear the husband's name and title.

CONCUPISCENCE (kōn-kū'pīs-sens), (Gr. ἐπιθυμία, *ep-ee-thoo-mee'ah*, a longing, Rom. vii:8; Col. iii:5), evil desire. It denotes:

1. The imperfection of our nature, from whence all our actual sin proceeds (Rom. vii:7; James i:14).

2. Actual motions and inclinations of our heart toward sinful deeds (Rom. vii:8).

3. Unchastity, especially of desire (Col. iii:5; 1 Thess. iv:5).

CONDESCENSION OF CHRIST. This is a term used to express the meaning of Kenosis, or the Incarnation. It was applied to the limitations upon the Christ in His incarnate human life; to the limitations imposed upon Divine omnipotence and Divine omniscience within the human sphere of action, in order to allow a real growth and action of human will and human knowledge.

The term, Condescension of Christ, or its equivalent word, Kenosis, was sometimes used widely to apply to all such limitations, sometimes (*e. g.*, in the discussions on the 17th century) it was used, in antithesis to *κράσις*, of a virtual surrender of such attributes, as opposed to a possession but conscious restraint in the use of them. On these exact points the Bible does not define, but it supplies the factors that have to be reconciled, viz., the reality of a Divine oneness between the Father and the Son (John i:1-18; x:30; Heb. i:3), certain limitations of perfect intercourse between the Father and the Incarnate Son (Matt. xxvii:46), certain statements of the Lord Himself as to the limitations of His own knowledge (Mark xiii:32) and of His own 'glory' (John xvii:4), and statements of New Testament writers as to the reality of temptation, and of growth in wisdom and learning in Him (Luke ii:10-52; Heb. iv:15; v:7, 8). (See **KENOSIS**; **INCARNATION**.)

CONDUIT (kōn'dīt), (Heb. תְּלַחֲוֹת, *teh-aw-law'*, a channel, "watercourse," Job xxxviii:25; "trench," 1 Kings xviii:32-38).

The aqueduct made by Hezekiah to convey the water from the upper pool of Gihon into the western part of Jerusalem (2 Kings xviii:17; xx:20; Is. vii:3; xxxvi:2).

CONEY (kō'nŷ), (Heb. שָׂוֹן, *shaw-fawn'*, a hare, hedgehog, or rabbit). See **SHAPHAN**.

Coney.

CONFECTION (kōn-fĕk'shŭn), (Heb. רוֹחַ, *ro-kakh*), a perfume made by Moses (Exod. xxx:35).

CONFECTIONARY (kōn-fĕk'shŭn-ā-rŷ), (Heb. רֹחַ, *raw-kakh'*), a woman who was a perfumer, (1 Sam. viii:13).

"And he will take your daughters *to be* confectonaries, and *to be* cooks, and *to be* bakers." We now use the form *confectioner*; but *confectionary* was the older form.

But myself
Who had the world as my *confectionary*.
SHAKESPEARE.

CONFERENCE (kǒn'fēr-ens), (Gr. *προσανατιθῆμι*, *pros-an-at-ith'ay-mee*, to communicate, Gal. ii:6.) The coming together to discuss questions and to deliberate upon subjects.

It was used originally as *converse*, or *conversation*. This is Bacon's meaning in the passage, *Essays 'Of Studies'* (p. 205, Gold. Treas. ed.), 'Reading maketh a full man; Conference a ready man; and Writing an exact man.'

CONFESSION (kǒn-fēsh'ün), (Heb. from *יָדָה*, *yaw-daw'*, literally, to use, i. e., extend the hand), is used in the Old Testament in the sense of acknowledging one's sin (Lev. v:5; Job xl:14; Ps. xxxii:5).

Jesus Christ will "confess his people" at the last day: will publicly own them his children, bride, and faithful servants (Luke xii:8). They "confess him" before men, when, notwithstanding of danger and opposition, they openly profess and adhere to his truth, observe his ordinances, and walk in his way (Matt. x:32). To "confess God," is to praise and thank him (Heb. xiii:15). To "confess sin," is candidly to acknowledge our guilt before God, who can pardon or punish us: or to our neighbor, whom we have offended, or who can give us proper instruction and comfort (Ps. xxxii:5; Matt. iii:6; James v:16).

CONFLAGRATION, GENERAL (kǒn'flā-grā'shūn, jĕn'ēr-al).

The opinion that the end of the world is to be effected by the agency of fire is very ancient, and was common amongst heathen philosophers (Ovid, *Metamorph.* i:256). Other testimonies are quoted by Grotius (*De Veritate Rel. Chr.*, lib i: see. 22). It is not easy to discover the origin of this opinion; it can scarcely be traced to tradition derived from revelation, since there is no distinct reference to such a catastrophe in the Old Testament. It is, moreover, remarkable, considering how universal and definite is the ordinary belief on the subject, that there is only one passage in the New Testament, viz., 2 Pet. iii:7, 10, which can be adduced as speaking distinctly of this event. This passage is, indeed, very explicit, but it should not be forgotten that some learned and able expositors have referred it altogether to the destruction of Jerusalem and of the Jewish polity.

CONFUSION (kǒn-fū'zhūn), (Heb. *תְּהוּ*, *to'hoo*, Is. xxxiv:11; xli:29).

The root of the word means to lie waste, desert, without form; the huddling of things together; perplexity; disorder; shame; ruin (Isa. xxiv:10; Ps. xxxv:4). Unnatural intimacy with beasts, or of a man with his daughter-in-law, is *confusion*; is a horrid and shameful blending of natures or persons which ought to be kept distinct. But the word might be translated, A shocking crime (Lev. xviii:25, and xx:12). Idols and the Egyptians were the *confusion* of the Jews; they were the means or the occasion of bringing them to shame, disorder, perplexity, and ruin (Is. xli:29, and xxx:3). *Confusion of face* denotes perplexity and shame, which make one doubtful, or to blush to look anywhere (Ezra ix:7). (Brown). (Gr. *ἀκαταστασία*, *ak-at-as-tah-see'ah*, Jas. iii:16) instability, disorder, tumult. Wycliffe has unsteadfastness; Cranmer has unstableness; Geneva has sedition.

CONFUSION OF TONGUES (kǒn-fū'shūn òv tūngz). See BABEL, TOWER OF.

CONGREGATION (kǒn-grē-gā'shūn), (Heb. *עֲדָתָא*, *ay-daw'*, or *מוֹעֵד*, *mo-ade'*; Gr *συναγωγὴ*, *soon-ag-o-gay'*).

1. In the Old Testament it denotes the Hebrew people in its collective capacity, under its peculiar aspect as a holy community, held together by religious rather than political bonds. Deut. xxxi:30; Josh. viii:35; 1 Chron. xxix:1, etc. "Sometimes it is used in a broad sense, as inclusive of foreign settlers, Exod. xii:19, but more properly as exclusively appropriate to the Hebrew element of the population. Num. xv:15." The congregation was governed by the chief of the tribes and families, but from these was selected a council of 70 elders. Num. xvi:2; xi:16. This was a permanent institution, for these representatives of the people—who at first met at the door of the tabernacle at the call of one silver trumpet, while the congregation came at sound of the two, Num. x:3, 4, 7—became in post-exilic days the Sanhedrin. Doubtless these meetings of the elders are often meant when the term "congregation" is used. Thus they meet to elect a king. 1 Sam. x:17. Their decisions bound the nation. Josh. ix:15, 18.

2. In the New Testament it means the Christian Church at large or a local congregation, but in King James's Version the corresponding Greek word (*ecclesia*), when used of a religious assembly, is always rendered "church," even in Acts vii:38, where it means the Jewish congregation in the wilderness. King James expressly commanded the revisers to do this, in opposition to the Geneva Version, which uses the more literal rendering "congregation." In Acts xix:32, 39, 40 it means simply a popular assembly. (Schaff, *Bib. Dict.*).

CONGREGATION, MOUNT OF THE (Heb. *הַר מוֹעֵד*, *har mo-ade'*), supposed by some to refer to Mount Moriah as the site of the Temple (Is. xiv:13), but Zion was neither a northern point of the earth, nor was it situated on the north of Jerusalem.

The name denotes some place of religious worship among the Babylonians. Delitzsch says, "The prophet makes the king of Babylon speak after the general notion of his people, who placed the seat of the Deity on the summit of the northern mountains, which were lost in the clouds."

CONGREGATIONAL CHURCH (kǒn-grē-gā'-shūn-al chûrch).

What are known as the Congregational Churches of America and of Great Britain are not the only churches which are congregational by organization. The Baptists, the Christians, the Unitarians, and several other religious bodies have substantially the same polity, so that nearly thirty-eight per cent of all assemblies for public worship in the United States are of this type of government. But the group of churches known by the title of "Congregational" are so one in history, faith, character, worship, missionary activities and responsible mutual relationship, that they constitute as distinct a denomination as any in America.

(1) **Origin.** American Congregationalism had its origin in England in the reign of Elizabeth. Many English Protestants felt that the Reformation, as introduced under that great queen, had not gone far enough toward the realization of what they believed that the Bible taught that a Christian church should be. These seekers for a more perfect Reformation were of two classes,—the Puritans, a large party who believed in the possibility of a reformed national church, and the Separatists, a comparatively small and radical party, who agreed in general with the Puritans as to the direction in which churchly reforms should be

sought, but held that Christians should separate from the national church and organize local congregations composed exclusively of persons of professed Christian experience.

The first to proclaim these Separatist views successfully was Rev. Robert Browne, a graduate of Cambridge University. In 1580 he formed a Congregational Church in Norwich. A similar church completed its organization at London in 1592, and another came into being at Scrooby, one hundred and fifty miles north of London, in 1605 or 1606. The latter had Richard Clyfton, John Robinson, William Brewster and William Bradford among its members. Persecution compelled all these churches to flee from England to Holland. That formed at Scrooby settled at Leyden in 1609, and a considerable portion of its membership, under the lead of Brewster and Bradford, crossed the Atlantic in the "Mayflower," and founded the first permanent settlement in New England at Plymouth in 1620.

(2) Early Growth. Not long after Congregationalism was thus brought by Separatists to America, political and ecclesiastical tyranny in England induced many prominent Puritans to emigrate to New England. Massachusetts, Connecticut and New Hampshire were settled by Puritans, and beginning with the formation of a Congregational Church substantially like that of Plymouth at Salem in 1629, Congregational Churches were spread by Puritan settlers over the New England colonies. By 1637, when they held their first synod, or general council, they numbered 22; by 1646, when the Cambridge Synod formulated their polity, they had grown to 53. In 1760, there were 530 Congregational Churches in New England. By 1816, they had multiplied to 1,000; and at the present time the churches of the denomination in the United States number 5,625; their ministers about 5,500, and their communicants 630,000. As late as 1820, four-fifths of the Congregational Churches were in New England. Now nearly three-fourths are in other parts of the United States.

Some few of the way-marks of this long history have been, Eliot's efforts for the conversion of the Indians, from 1646 onward; the "Great Awakening" under George Whitefield and other evangelists, 1740-41; Jonathan Edwards and the New England theology; home missions organized, 1798; the first theological seminary opened (Andover), 1808; the American Board of Foreign Missions formed, 1810; the Triennial National Council instituted, 1871; the Christian Endeavor Society inaugurated, 1881; the International Congregational Council, 1891.

Congregationalism has always believed in popular education. Its first school (Boston) was opened in 1635. The first of a long series of colleges (Harvard) was founded in 1636; and the list of such institutions of higher learning essentially related to Congregationalism now embraces forty-one, besides seven theological seminaries.

(3) New Testament Pattern. The founders of Congregationalism believed that the New Testament contains a minute and authoritative pattern of what a church should be in organization and government. Few of their present successors would make so sweeping a claim; but Congregationalists generally hold that the Scriptures set forth certain broad principles of Christian life and practice which should dominate the government and worship of a church as truly as the conduct of an individual believer. While Congregationalists freely recognize that all Christians, throughout the world, are spiritually, but

not governmentally, one—the Church universal—they have held from the beginning that the proper organized form of the Church is not national, synodical or diocesan, but in self-governing congregations—hence the name, Congregationalist. Each of these congregations—or, more properly, churches—is to be composed exclusively of members of professed Christian faith and experience, united one to another, and to their Lord, by a covenant, assent to which is required on admission to the church. Of each congregation Christ is the immediate Head, hence no superior human authority can interfere with its control of its own concerns. It chooses its own officers, regulates its own worship, formulates its creed and covenant in words of its own selection, and conducts all its business by the votes of its membership, either directly or through committees. Hence Congregational Church government is spiritual democracy.

The officers of a Congregational Church were originally a "pastor," a "teacher," one or two "ruling elders," and several "deacons." In theory, and in practice in one instance of early Congregational history, "widows" or deaconesses were to be added to the officers named, all being thought to be required by the New Testament. But these officers were speedily felt to be too numerous, and the official equipment of a Congregational Church usual, for more than two centuries past, has been a pastor and deacons. Besides the deacons, from two to eight in number customarily, churches of size have a "prudential" committee to aid the pastor in administration; but no act is final unless approved by the church itself. Congregationalists have always felt that religious knowledge was no monopoly of a few, but the privilege of all; hence they have emphasized learning in the pews as well as in the pulpit. Their churches have been characteristically of a missionary spirit; and their worship has been, and is still essentially, of a non-liturgical character.

But while each Congregational Church is independent and self-governing, it is not alone. Since Christ is the immediate head of each church, these churches are equal, they are like brothers and sisters in one family. As members of a Christian household, they owe one to another counsel in perplexity, advice in important decisions, aid in poverty, and admonition when in error. Hence arises the Congregational thought of responsibility, as well as local independence.

(4) Advisory Councils. This responsibility finds expression in "advisory councils;" *i. e.*, in all matters of importance, like organizing a church, settling a pastor, or healing a quarrel within the church, Congregationalists believe that the advice of the representatives of other Congregational Churches, assembled by invitation, should be sought. Besides these occasional councils, which are summoned only to advise on the particular question under consideration and are not permanent bodies, Congregational fellowship finds expression in local "conferences" and "associations," often embracing the churches of one county; in state conferences; and in the Triennial National Council. In these permanent bodies the churches are represented by delegates. None of these bodies are judicial; but though merely advisory their counsel has great weight.

While each Congregational Church can express its conception of Christian truth in words of its own choosing, Congregationalists, gathered in their public conventions, have never hesitated to give testimony to their faith. Thus, in 1648, the Cambridge Synod approved the doctrinal sections

of the Westminster Confession; in 1680, a council representative of the churches of Massachusetts approved the modification of the same Confession made by the English Congregationalists in 1658. Similar action was taken by the churches of Connecticut in 1708. The National Council in 1865 adopted a statement of belief; and a creed was put forth, in 1883, by a commission appointed by the National Council in 1880, which was further approved for publication in its model "Manual" for a Congregational Church, by the same body in 1895. No Congregational Church is required to subscribe to this creed, but many have adopted it as their expression of faith, and it represents as fairly as any statement could the position to-day of the great majority of Congregational Churches and ministers.

(5) **Missionary Work.** The missionary work of these churches is mainly conducted through six societies, viz.: the "American Board;" the "American Missionary Association;" the "Congregational Home Missionary Society;" the "Congregational Church Building Society;" the "Congregational Education Society;" and the "Congregational Sunday-School and Publishing Society."

Congregationalists believe this system to be peculiarly illustrative of the fraternal spirit of the Gospel; they regard it also as admirably adapted to the intelligent, self-governing communities of democratic America, to the development of whose characteristic institutions it has contributed much in the past. But the Congregational Churches of America have never claimed to be the only true churches; and they stand ready to unite in federal co-operation, as far as opportunity may offer, with churches of the Protestant type of faith commonly known as "evangelical." W. W.

CONIAH (ko-nī'ah), (Heb. כֹּנִיָּהוּ, *kon-yaw' hoo*, Jah is creating). See JECONIAH.

CONONIAH (kōn'o-nī'ah). See CONANIAH.

CONSCIENCE (kōn'shens), (Lat. *conscientia*, consciousness; Gr. *συνείδησις*, *soon-i'day-sis*).

(1) **Views Regarding Conscience.** 1. *J. Stuart Mill.* Strictly, the name is applicable to the power by which we know moral law. Popularly, the name is given indiscriminately to the knowing power, and to the dispositions and sentiments concerned with morals. "The internal sanction of duty, whatever our standard of duty may be, is one and the same—a feeling in our own mind, a pain more or less intense, attendant on violation of duty. . . . This feeling, when disinterested, and connecting itself with the pure idea of duty, and not with some particular form of it, or with any of the merely accessory circumstances, is the essence of conscience." J. S. Mill, *Utilitarianism*, p. 4.

2. *Bain.* "I entirely dissent from Dugald Stewart, and the great majority of writers on the theory of morals, who represent conscience as a primitive and independent faculty of the mind, which would be developed in us, although we never had any experience of external authority. On the contrary, I maintain that conscience is an imitation within ourselves of the government without us."—Bain. *Emotions and Will*, 3d ed., p. 285.

3. *Sedgwick.* "I find that I undoubtedly seem to perceive, as clearly and certainly as I see any axiom in arithmetic or geometry, that it is 'right' and 'reasonable,' and the 'dictate of reason,' and 'my duty,' to treat every man as I should think that I myself ought to be treated in precisely similar circumstances."—Sedgwick. *Methods of Ethics*, 470. (Fleming, *Vocab. of Phil.*)

4. *Schaff.* Conscience is the inborn sense of right and wrong, the moral law written on our hearts which judges of the moral character of our motives and actions, and approves or censures, condemns or justifies us accordingly. Rom. ii: 15. This universal tribunal is established in the breast of every man, even the heathen. It may be weakened, perverted, stupefied, defiled, and hardened in various ways, and its decisions are more or less clear, just, and imperative according to the degree of moral culture. John viii:9; Acts xxiii: 1; xxiv:16; Rom. ix:1; and 1 Tim. i:5.

(2) **Terms Applied to Conscience.** In Ethics, a large number of terms have arisen, in which are indicated the various theoretical and practical judgments involved in its questions. Among the most important of these are the following: approving and disapproving; careless, lax, morbid, narrow, micrologic, solicitous about trifles; scrupulous: certain and uncertain; proportional; complete and incomplete; concomitant, when it regards things present; consequent, things past; antecedent, things future; dissuading and persuading; natural; educated and uneducated; erroneous and right; free and servile; gnawing, biting, stinging, wounded; good and bad; tranquil, calm, quiet; improbable and probable; torpid and wakeful. (Fleming).

CONSECRATION (kōn'sê-krā'shūn), the rendering of several words in the original. Among them are Heb. כָּהַן, *khah'ram*, to devote; נָחַץ, *neh'zer*, separation.

It is the act of solemnly setting apart a person or thing to the service of God. By various transactions (such as the circumcision of Abraham, Isaac, and Jacob; and the covenant made with them, in reference to their posterity, in their passing through the Red Sea; in their appearance before God at Mount Sinai, and the solemn covenant there; and in the solemn dedication of themselves at Ebal and Gerizim), the whole Hebrew nation were "consecrated" to be the peculiar people and servants of God (Exod. xiv. xix. xxiv; Deut. v, xxvi, xxvii, xxix). To commemorate the destruction of the first-born of the Egyptians, the first-born of Israel, man and beast, were "consecrated" to be the Lord's (Exod. xiii). By washing, offering of sacrifice, and sprinkling of oil or blood, were the Levites, in room of the first-born, and the priests, and the tabernacle, temple, and sacred furniture, "consecrated" to the ceremonial service of God (Exod. xxviii:29; Num. i:49; iii:10; vii, viii; 2 Chron. ii:4; vii:9; Ezra vi:16, 17). The tithes and first-fruits were really, but less solemnly "dedicated" to the service of God. The Jews "dedicated" their houses, and even the walls of their city; probably this was done with prayer and thanksgiving (Deut. xx:5; Neh. xii:27). Joshua "dedicated" the Gibeonites, and the silver and gold of Jericho (Josh. vi, ix). Not a few "consecrated" themselves to serve God in the capacity of Nazarites, or Nethinims (Num. vi). Manoah devoted Samson his son; and Hannah, Samuel her son, to the perpetual service of God (Judg. xiii; 1 Sam. i:21, 22). Many "dedicated" their money, fields, and cattle to the Lord (Lev. xxvii). Moses, Samuel, Saul, David and his successors, and other warriors, "dedicated" part of the spoil they took in battle (Num. xxxi; 1 Kings xv:15; 1 Chron. xxvi:26-28). When Judas Maccabæus purged the temple, he solemnly "dedicated" it to its holy use, and appointed the feast of dedication to be yearly observed (John x:22).

CONSOLATION (kǒn'sō-lā'shŭn).

Christ is the *consolation of Israel*; with predictions of his coming and kingdom the ancient prophets comforted the Jews; and in every age, his person, righteousness, fullness, and love, are the source and substance of his people's comfort against every trouble (Luke ii:25). *Are the consolations of God small with thee?* Do you condemn our divine advices, which we have given you for your direction and comfort? (Job xv:11). (See COMFORT; HOLY GHOST.)

CONSTELLATIONS (kǒn'stĕl-lā'shŭns). See ASTRONOMY.

CONSUMPTION (kǒn-sŭmp'shŭn), possibly tuberculosis (Zech. xiv:12).

CONTAIN (kǒn-tān'), (Gr. ἐγκρατεύομαι, *eng-krat-yoo'om-ahēe*, 1 Cor. vii:9, to exercise self-restraint in diet and chastity).

In general (1) to take in; hold (1 Kings viii:27). (2) In particular, to peruse fully (John xxi:25).

CONTENTION (kǒn-tĕn'shŭn), (Heb. מִלְחָמָה, *malw-dohn'*, strife; רִיב, *reeb*, pleading; Gr. ἐρις, *er'is*).

A violent effort to obtain, or resist, something; contest. strife (Phil. ii:3; James iii:14, 16).

It is *sinful*, when, with anger we strive with one another (Prov. xiii:10); or *lawful*, when we eagerly promote that which is good, notwithstanding great opposition (1 Thess. ii:2). We *contend earnestly for the faith*, when, notwithstanding manifold suffering and danger, we are strong in the faith of God's truth contained in his word; zealously profess and practise it, and excite others to do so (Jude 3).

CONTENTMENT (kǒn-tĕnt'mĕnt), (Gr. ἀυτάρκεια, *aw-tar'ki-ah*, sufficiency, 2 Cor. ix:8).

The perfect faith, or trust which makes one independent of outward circumstances (Phil. iv:11; 1 Tim. vi:6, 8). It is a disposition of mind undisturbed by envy, or anxiety (James iii:16; Matt. vi:25, 34).

CONTRITION (kǒn-trĭsh'ŭn), (Heb. כָּאֵב, *daw-kaw'*, bruised; our English word is from Lat. *contritus*).

It denotes being broken; bruised; deeply affected with grief (Ps. xxxiv:18 and li:17; Is. lvii:15 and lxvi:2).

CONVENIENT (kǒn-vĕn'yent), (Gr. καθήκω, *kath-ay'ko*, to come to), signifies "becoming, fitting, appropriate" in several passages (Prov. xxx:8; Jer. xl:4; Rom. i:28; Eph. v:4; Philem. ver. 8). It occurs once in the dedication of James' translators. It was an ancient Latin tense of the word.

CONVENT (kǒn-vĕnt'), (marg. of Jer. xlix:19 and l:44), to convene, to summon to a tribunal; Lat. *convenire*.

CONVERSANT (kǒn-vĕrs'ant), (Heb. חָוֵל, *haw-lak'*, Josh. viii:35; 1 Sam. xxv:15), to come continually, follow, accustomed to haunt, walking among and dealing with.

CONVERSATION (kǒn-vĕr-sā'shŭn).

1. (Heb. דֶּלֶת, *del'rek*, Ps. l:23), road, way, custom, manner; R. V., marg., "way."

2. (Gr. τρόπος, *troph'os*, Heb. xiii:5), deportment, style, mode of life.

It thus means conduct, or mode of life, especially with respect to morals (Ps. xxxviii:14; Eph. iv:22; Heb. xiii:5; 1 Peter i:15).

3. (Gr. πολιτευμα, *pol-it'you-mah*), to behave as a citizen (Phil. i:27).

In Phil. iii:20, "our *conversation* is in heaven" means "we are citizens of heaven," or "our citizenship is in heaven," *i. e.*, Christians are citizens

of the heavenly kingdom and their daily civil conduct should correspond with the teachings of the gospel of the kingdom.

CONVERSION (kǒn-vĕr'shŭn), (Gr. ἐπιστροφή, *ep-is-trof-ay'*, Acts xv:3, rendered "conversion," literally, turning toward).

Conversion, a change from one state to another. Conversion may be (1) *Merely external*, or that which consists only in an outward reformation.—(2) *Doctrinal*, or a change of sentiments.—(3) *Saving*, which consists in the renovation of the heart and life, or a *turning* from the power of sin and Satan unto God, Acts xxvi:18, and is produced by the influence of divine grace on the soul.—(4) Sometimes it is put for *restoration*, as in the case of Peter, Luke xxii:32—(5) The instrumental cause of conversion is usually the ministry of the word; though sometimes it is produced by reading, by serious and appropriate conversation, sanctified afflictions, etc. (6) "Conversion," says the great Charnock, "is to be distinguished from regeneration thus—*Regeneration* is a spiritual change; *conversion* is a spiritual motion; in *regeneration* there is a power conferred; *conversion* is the exercise of this power; in *regeneration* there is given us a principle to turn; *conversion* is our actual turning. In the covenant, God's putting his Spirit into us is distinguished from our walking in his statutes from the first step we take in the way of God, and is set down as the cause of our motion, Ezek. xxxvi:27. In renewing us, God gives us a power; in converting us, he excites that power. Men are naturally dead, and have a stone upon them; *regeneration* is a rolling away the stone from the heart, and a raising to newness of life; and then *conversion* is as natural to a regenerate man as motion is to a lively body. A principle of activity will produce action. In *regeneration*, man is wholly passive; in *conversion*, he is active. The first reviving us is wholly the act of God, without any concurrence of the creature; but after we are revived we do actively and voluntarily live in his sight. *Regeneration* is the motion of God, in the creature; *conversion* is the motion of the creature to God, by virtue of that first principle; from this principle all the acts of believing, repenting, mortifying, quickening, do spring. In all these a man is active; in the other he is merely passive." *Conversion* evidences itself by ardent love to God, Ps. lxxiii:25, delight in his people, John xiii:35, attendance on his ordinances, Ps. xxvii:4, confidence in his promises, Ps. ix:10, abhorrence of self, and renunciation of the world, Job xlii:6; James iv:4; submission to his authority, and uniform obedience to his word as in Matt. vii:20. (See REPENTANCE; REGENERATION.)

CONVICTION (kǒn-vĭk'shŭn), (Gr. ἐλέγχω, *el-eng'kho*, to convict, reprove, John viii:46, A. V. "convinceth." The R. V. changes the rendering to "convicteth." In 1 Cor. xiv:24, A. V., "convinced" is in R. V. "reproved;" in Tit. i:9 "convince" is changed to "convict," etc.).

(1) Conviction, in general, is the assurance of the truth of any proposition. (2) In a religious sense, it is the first degree of repentance, and implies, an affecting sense that we are guilty before God; that we can do nothing of ourselves to gain his forfeited favor; that sin is very odious and hateful, yea, the greatest of evils. (3) There is a *natural* conviction which arises from natural conscience, fear of punishment, moral suasion, or alarming providences, but which is not of a permanent nature. (4) *Saving* conviction is the

work of the Spirit, as the cause; though the law, the conscience, the Gospel, or affliction, may be the means, John xvi:8, 9.

CONVINCE (kōn-vīns'), See CONVICTION.

CONVOCAION (kōn-vó-kā'shūn), (Heb. מִקְרָא, *mik-rav'*, a holy assembly, Num. x:2; Is. i:13). This term is applied invariably to meetings of a religious character, in contradistinction to *congregation*, in which political and legal matters were occasionally settled.

On the sabbath, on the day of the passover, on the first and seventh days of unleavened bread, on the days of Pentecost and expiation, on the first and eighth of the feast of tabernacles, the Jews had their solemn convocations (Exod. xii:16; Lev. xxiii; Num. xxviii; xxix; Neh. viii:18).

COOK, COOKING (kōök, kōök'īng). See FOOD.

COOS (kō'os), (Gr. *Kōs, koce*), Cos or Co (now Stan-Co or Stanchio), a small and fertile island in the Ægean Sea, near the coast of Caria, in Asia Minor, almost between the promontories on which the cities Cnidus and Halicarnassus were situated.

It was celebrated for its wine, silks, and cotton of a beautiful texture. The island is mentioned in 1 Macc. xv:23; Acts xxi:1. It is about twenty-one miles long by six broad. Its principal city has been seriously injured more than once by earthquakes.

COPING (kō'pīng), (Heb. תַּפְחָה, *tay'fakh*, a hand-breath, a course of stones, either flat or sloping, to throw off the water (1 Kings vii:9).

COPPER (kōp'pēr), (Heb. נְחֹשֶׁת, *nekh-ō'sheth*). Tubal Cain is recorded as the first artificer in brass and iron (Gen. iv:22).

In the time of Solomon, Hiram of Tyre was celebrated as a worker in brass (1 Kings vii:14; comp. 2 Chron. ii:14).

To judge from Hesiod and Lucretius the art of working in copper was even older than that in iron, probably from the fact that it was found in larger masses, and from its requiring less labor in the process of manufacture.

Palestine abounded in copper (Deut. viii:9), and David left behind him an immense quantity of it to be employed in building the Temple (1 Chron. xxii:3-14). All sorts of vessels in the Tabernacle and Temple were made of copper (Lev. vi:28; Num. xvi:39; 2 Chron. iv:16; Ezra viii:27), weapons, and more especially helmets, armor, shields, spears (1 Sam. xvii:5, 6, 38; 2 Sam. xxi:16), also chains (Judg. xvi:21), and mirrors (Exod. xxxviii:8). The larger vessels were moulded in foundries, as also the pillars for architectural ornaments (1 Kings vii). It would however appear (1 Kings vii:14) that the art of copper-founding was, even in the time of Solomon, but little known among the Jews, and was peculiar to foreigners, particularly the Phœnicians. Michaelis (*Mos. Recht* iv:217, 314) observes, that Moses seems to have given to copper vessels the preference over earthen, and on that ground endeavors to remove the common prejudice against their use for culinary purposes. From copper, also, money was coined (Matt. x:9).

COPPERSMITH (kōp'pēr-smīth'), (Gr. χαλκεύς, *khalk-yooce'*, a brazier, a worker in any kind of metals; probably Alexander, an opponent of St. Paul, was so called (2 Tim. iv:14) because copper was in such common use. (See HANDICRAFT.)

COPTIC VERSION (kōp'tik vēr'shūn). See VERSIONS, ANCIENT EGYPTIAN.

COR (kōr), (Heb. קֶרַח, *kor*), a measure for both liquids and solids, containing ten ephahs or baths (Ezek. xlv:10). Rendered "measure" except in 1 Esdr. viii:20.

CORAL (kōr'al), (Heb. קַרְלִים, *rav-marv'*, red coral.)

It is usually understood to be denoted by the word as above, in Job xxviii:18; Ezek. xxvii:16; and this interpretation is not unsuitable, although the etymology is not well made out, and the dialects afford little support. The ancient translators were evidently much perplexed to determine whether the word *peninim* (Job xxviii:18; Prov. iii:15; viii:11; xx:15; xxxi:10; Lam. iv:7) meant corals or pearls. This will always be doubtful; but the text in Lam. iv:7, by describing the article as *red*, suggests a preference of the former. Winer indeed remarks that it is scarcely credible such a product should have circulated under two different names (if *ramoth* also means coral); but surely there is no difficulty in conceiving that one word may have denoted *coral* generally, while another may have distinguished that *red coral*, which was the most esteemed and the most in use for ornament.

Coral is a marine calcareous substance of various colors and forms, the production of a species of zoophyte. In growth and external appearance, coral is like a beautiful plant, being fixed by its root to the rock, and spreading out its branches from main stems. But it has not the life of a plant. It is the work of innumerable animals, which apparently live in communities, and so connected, that the prey consumed by one contributes to nourish all. The animal is very simple: it is nothing more than a sack or bag, with eight tentacula, or arms, to seize its prey. This animal appears to possess the faculty of abstracting calcareous particles from the ocean, and depositing them in a solid mass. So rapid is their multiplication, so speedy the growth of their work, that it eventually forms reefs of rock, not only dangerous to navigation, but which, rising above the water, become islands, fit for the abode of men. Among these are the famed Bermuda Islands in the Atlantic, the waters surrounding them, brought by the Gulf stream, being warm enough to allow the coral animals to live and work.

CORBAN (kōr'ban), (Gr. κορβάν, *kor-ban'*, an offering), a Hebrew word employed in the Hellenistic Greek, just as the corresponding Greek word *doron* was employed in the Rabbinical Hebrew (Buxtörf, *Lex. Rab.* col. 579) to designate an oblation of any kind to God. It occurs only once in the New Testament (Mark vii:11), where it is explained (as also by Josephus, *Antiq.* l, 4, c. 4, sec. 4, *Contra Ap.* l, 1, sec. 22) by the word *doron*.

The Jews sometimes swore by *Corban*, or by gifts offered to God (Matt. xxiii:18). A person might interdict himself, or a child be interdicted by his parents, from the use of certain things lawful in themselves. The thing thus interdicted was considered *corban*. A person might thus exempt himself from any inconvenient obligation. It was with such practices that our Lord found fault (Matt. xv:5; Mark vii:11), as destroying the spirit of the law. Grotius shows that this and similar formulæ were not used to signify that the thing was actually devoted, but was simply intended to prohibit the use of it from the party to whom it was thus made *corban*, as though it were said, 'If I give you anything or do anything for you, may it be as though I gave you that which is devoted to God, and may I be accounted perjured and sacrilegious.' Thus the Jews permitted

even debtors to defraud their creditors, by consecrating their debt to God; as if the property were their own, and not rather the right of their creditor. It would, indeed, seem surprising that such a vow as this (closely analogous to the modern profanity of imprecating curses on one's self if certain conditions be not fulfilled) should be considered to involve a religious obligation from which the party could not be freed even if afterwards he repented of his rashness and sin. It appears, however, from Rabbinical authority that anything thus devoted, except within certain limitations, was irreclaimable (Grotius, *Annotations in Matt.* xv:5), and that even the hasty utterance of a word implying a vow was equivalent to a vow formally made.

Rabbi Eliezer ben Hyrkanos (A.D. 90), who felt in several ways the influence of Christianity, was apparently the first Rabbi to advocate retraction of vows. I render *Nedarim* i:1 thus: 'Rabbi Eliezer said that when rash vows infringe at all on parental obligations, Rabbis should suggest a retraction (*lit.* open a door) by appealing to the honor due to parents. The sages dissented. Rabbi Zadok said, instead of appealing to the honor due to parents let them appeal to the honor due to God; then might rash vows cease. The sages at length agreed with Rabbi Eliezer, that if the case be directly between a man and his parents (as in *Matt.* xv:5), they might suggest retraction by appealing to the honor due to parents.'

CORBE (kôr'be), (Gr. *Xopβé*, *kor-be'*, 1 Esdr. v:12), a name apparently answering to Zaccai in the lists of Ezra and Nehemiah. It should have been spelled Chorbe to correspond with the Greek.

CORD (kôrd), (Heb. *כֶּהֶל*, *kheh'bel*, rope, cord).

(1) **The Material** of which cord was made varied according to the strength required. Wilkinson says that flax was used for making ropes, string, and various kinds of twine; for large ropes, however, of ordinary quality and for common purposes, the fibers of the date tree were employed, as at the present day. The strongest rope was probably made of strips of camel hide, still used by the Bedouins for drawing water. Other materials are mentioned, as reeds, rushes, osier, etc.

(2) **Uses.** The following uses of cord are mentioned: (1) For fastening a tent (*Exod.* xxxv:18; xxxix:40; *Is.* liv:2). (2) For leading or binding animals, as a halter or rein (*Psa.* cxviii:27; *Hos.* xi:4). (3) For yoking them either to a cart (*Is.* v:18) or a plow (*Job* xxxix:10, A. V. "band"). (4) For binding prisoners (*Judg.* xv:13; *Ps.* ii:3; *exxix*:4; *Ezek.* iii:25). (5) For bowstrings (*Ps.* xi:2) made of catgut; such are spoken of in *Judg.* xvi:7 (A. V. "green withes," but more properly fresh or moist bowstrings). (6) For the ropes or "trackings" of a vessel (*Is.* xxxiii:23). (7) For measuring ground (2 *Sam.* viii:2; *Jer.* xxxi:39; *Amos* vii:17; *Zech.* ii:1); hence *cord* or *line* became an expression for an inheritance (*Josh.* xvii:14; xix:9; *Ps.* xvi:6; *Ezek.* xlvi:13), and even for any defined district (*Deut.* iii:7). (8) For fishing and snaring. (9) For attaching articles of dress, as the "wreathen chains," which were rather twisted cords, worn by the high priests (*Exod.* xxviii:14, 22, 24; xxxix:15, 17). (10) For fastening awnings (*Esth.* i:6). (11) For attaching to a plummet. (12) For drawing water out of a well or raising heavy weights (*Josh.* ii:15; *Jer.* xxxviii:6, 13). (*Mc. & Str. Bib. Cyc.*)

Figurative. (1) To put cords about one's reins, to gird one's self with a cord, was a token of sorrow and humiliation (*Job* xii:18; 1 *Kings*

xx:31,32). (2) *Cord* is often used for inheritance: "I will give thee the land of Canaan, the *cord* of thine inheritance," *Psalm* cv:11, *margin*. "Joseph hath a double *cord*," (*Ezek.* xlvi:13, *Eng. tr.* *two portions*); which expression originated from the custom of measuring land with a cord. So Joshua distributed to every tribe a certain number of *cords*, or acres. (3) "My *cords* (*Eng. tr.* the *lines*, that is, my lot) are fallen unto me in pleasant places" (*Ps.* xvi:6). (4) *To stretch a cord or line about a city* signifies, to ruin it, to destroy it entirely, to level it with the ground (*Lam.* ii:8). (5) The *cords* extended in setting up tents furnish several metaphors (*Is.* xxxiii:20; *Jer.* x:20). (6) The *silver cord*, that is broken at death, is the pith or marrow of the back-bone, the *spinal cord* (*Eccles.* xii:6). (7) The *cords of God*, which wicked men cast from them, are his government and laws, which are uneasy to them as they restrain their liberty, and bind them to duties which they hate. (*Ps.* ii:3). (8) God draws with *cords of a man, and bands of love*, when he employs rational and gentle arguments, and *humane methods*, such as men employ when inducing others, as, for instance, a father guiding a child, who is learning to walk, with leading strings. (9) The *cords* of a church or state, are her constitutions, laws, rulers, power, and wealth, which connect and establish the various parts of it; and by the ruin of the former of which, the church and the state are disordered or dissolved (*Is.* liv:2; *Jer.* x:20). (10) The harmonious society of friends is a *three-fold cord*, not easily broken; each contributes to strengthen and support the whole body (*Eccles.* iv:12). (11) The *cords of sinners*, are the snares by which they catch and ruin weak and innocent persons. (*Ps.* *exxix*:4, and *exl*:5). (12) The *cords of sins* are their corrupt lusts, and habits, the curse of God's law, and the punishment denounced by it, which hold transgressors that they cannot escape. (*Prov.* v:22). (13) Men draw iniquity with *cords of vanity*, and sin as with a *cart rope*, when, with unsubstantial pretences of pleasure, profit, and the like, they engage themselves and others to act wickedly; and, with all their might and diligence, endeavor to commit it (*Is.* v:18). (14) Afflictions are *cords*; they restrain our liberty, and ought to draw us to God; nor can we free ourselves from them at pleasure (*Job* xxxvi:8).

CORE (kō're), (Gr. *Kopé*, *ko-re'*), the Greek form of *Korah*, *Eccles.* xlv:18; *Jude* 11. (See *KORAH*, 1).

CORIANDER (kō'rī-ān'dēr), (Heb. *גַּד*, *gad*), a round aromatic seed.

The coriander plant (*Coriandrum sativum*) grows wild in Palestine and neighboring countries, and is often cultivated in the United States. The seeds are globular, and when dry are pleasant to the taste and smell, and incrustated with sugar, are often sold by confectioners. We are told that the particles of manna were shaped like coriander seeds. (See *GAD*.)

CORINTH (kôr'inth), (Gr. *Κόρινθος*, *kor'in-thos*, ornament, beauty), a Grecian city, placed on the isthmus which joins Peloponnesus (now called the Morea) to the continent of Greece.

(1) **Topography.** A lofty rock rises above it, on which was the citadel, or the *Aerocorinthus*. It had two harbors: *Cenehræ*, on the eastern side, about 70 stadia distant; and *Leehæum*, on the modern Gulf of Lepanto, only 12 stadia from the city (*Strabo*, viii:6). Its earliest name, as given by Homer, is *Ephyræ*. Owing to the great difficulty of weathering Malea, the southern prom-

ontory of Greece, merchandise passed through Corinth from sea to sea; the city becoming an *entrepot* for the goods of Asia and Italy (Strabo, viii:6). At the same time it commanded the traffic by land from north to south. An attempt made to dig through the isthmus was frustrated by the rocky nature of the soil; at one period, however, they had an invention for drawing galleys across from sea to sea on trucks. With such advantages of position, Corinth was very early renowned for riches, and seems to have been made by nature for the capital of Greece. When the Achaean league was rallying the chief powers of southern Greece, Corinth became its military center. The canal across the isthmus has been recently cut through.

(2) **Destruction by Romans.** The fatal blow fell on Corinth (B. C. 146), when L. Mummius, by order of the Roman Senate, barbarously destroyed that beautiful town (Cicero, *Verr.* i:21), eminent even in Greece for painting, sculpture, and all designs in metal and pottery.

(3) **Corinth of the New Testament.** The Corinth of which we read in the New Testament was quite a new city, having been rebuilt and established as a Roman colony, and *peopled with freedmen from Rome* (Pausanias and Strabo, *u. s.*) by the dictator Cæsar, a little before his assassination. Although the soil was too rocky to be fertile, and the territory very limited, Corinth again became a great and wealthy city in a short time, especially as the Roman proconsuls made it the seat of government (Acts xviii.) for *southern* Greece, which was now called the province of Achaia. In earlier times Corinth had been celebrated for the great wealth of its Temple of Venus, which had a gainful traffic of a most dishonorable kind with the numerous merchants resident there—supplying them with harlots under the pagan forms of religion. The same phenomena, no doubt, reappeared in the later age. The little which is said in the New Testament seems to indicate a wealthy and luxurious community, prone to impurity of morals; nevertheless, all Greece was so contaminated, that we may easily overcharge the accusation against Corinth. The capture of Constantinople by the Venetians and the Crusaders in 1204 was immediately followed by the surrender of Corinth. In 1446 the Turks took it, and in 1687 the Venetians retook it; the Turks capturing it again in 1715. In 1823 it joined in the successful great rebellion. In February, 1858, it was nearly destroyed by an earthquake, but has since been restored. It is now called Gortho. (Davis, *Bib. Dict.*)

(4) **Corinthian Church.** The Corinthian Church is remarkable in the Epistles of the Apostle Paul by the variety of its spiritual gifts, which seem for the time to have eclipsed or superseded the office of the elder or bishop, which in most churches became from the beginning so prominent. Very soon, however, this peculiarity was lost, and the bishops of Corinth take a place co-ordinate to those of other capital cities. One of them, Dionysius, appears to have exercised a great influence over many and distant churches, in the latter part of the second century. Paul arrived at Corinth, (Acts xviii:1.) and lodged with Aquila and his wife Priscilla, who, as well as himself, were tent-makers. He preached in the Jewish synagogue, and converted some to the faith of Christ; and from there he wrote two Epistles to the Thessalonians. Finding that the Jews of Corinth, instead of being benefited, opposed him with blasphemy, he shook his raiment, and turned to the Gentiles, lodging with Justus, surnamed

Titus. There is great probability that Paul visited Corinth a second time, (Acts xx:2; and 2 Cor. xii:14; xiii:1.) and a third time, on his second return to Rome, 2 Tim. iv:20. (See ACTS OF THE APOSTLES; PAUL.)

CORINTHIANS, EPISTLES TO THE.

1. First Epistle. (1) **Genuineness.** The testimony of Christian antiquity is full and unanimous in ascribing this inspired production to the pen of the Apostle Paul.

The original form of this testimony need not be given here. It has been collected and presented by writers in the canon of the New Testament (See Charteris' *Canonicity*, pp. 222-232. Westcott, *On the Canon of the New Testament* and Zahn, *Gesch. des Neutest. Kanons*). Suffice it to say that the epistle comes down with every possible external attestation of genuineness that could have been demanded by the most rigid literary criticism.

This external attestation is fully supported by the claims and marks of authorship to be found within the epistle. It reveals a perfectly consistent and intelligible historical situation; its allusions and undesigned coincidences, its style and type of thought all harmonize with the theory of Pauline origin.

Accordingly, even within the most rigid critical schools until quite recently and with very few and sporadic exceptions, the genuineness of 1st Corinthians was not called in question. The Tübingen School placed it, with the Epistles to the Romans and Galatians and the Second to the Corinthians, within the nucleus of the undoubted Pauline writings. Bruno Bauer was the sole exception to this unanimity of opinion until 1882. Since that date a series of attacks have been made on the genuineness of this writing as well as on all of the others associated with it by the Tübingen critics. The source of these attacks is chiefly a Dutch School of Criticism consisting of Loman, Naber, Pierson, and Van Manen. The result of this hypercriticism would be the dissolution of the personality of Paul and the explanation of Paulinism as a product of a form of evolution within Judaism. The arguments employed in support of the view are characterized as "wildly subjective and arbitrary" and have been disallowed by the vast majority of scholars. An independent effort to cast doubt on the genuineness of all the writings ascribed to Paul, was made by R. Steck who undertook to base his view upon literary and historical data found in the Book of Acts and in the extra-canonical writings of the period. But this effort, like that of the Dutch school, has met with no sufficient endorsement to entitle it to the attention of others than very narrow specialists, (See Steck, *Der Galater brief nach seiner Echtheit untersucht*; 1888. Loman, *Questiones Paulinae in Theo. Tid.* 1882-1886; Naber and Pierson, *Verisimilia*; Van Manen, *Jahrbucher fuer Protest. Theol.* 1883-1887.)

(2) **Structure and Content.** The construction of the epistle is like that of Paul's other writings. It begins with a greeting which is followed by a thanksgiving for the good which is in the church. It takes up next the questions of doctrine and life on which the church needs instructions and warnings. It concludes with particular communications. Of these three sections, the first occupies i:1-9; the second, i:10; xv:58, and the third, xvi. The second and most extensive of the sections contains Paul's admonitions on the following subjects: Party spirit in the church at Corinth, i:10; iv:21, the moral scandal caused by

the toleration of the incestuous offender, v: 1-13; litigation before the unrighteous, vi:1-11; fornication, vi:12-20. At this point, the epistle becomes an answer to certain questions propounded to Paul by the church. The first of these questions referred to marriage, vii:1-40; the second was concerning eating of the flesh of the victims sacrificed to idols, and led the Apostle to state the great principle of Christian liberty, viii:x; the next question was evidently about the idea of services of worship and included minor questions as to covering the head by women, xi:1-16, as to love feasts and the Lord's Supper, xi:17-34, and as to abuses in speaking with tongues, xii:1; xiv:40. The next question was regarding the resurrection from the dead and leads to a thorough discussion of the subject from the Apostle's point of view, xv. The epistle then closes with some directions regarding the collection for the poor saints, personal allusions and the autograph benediction of the Apostle.

(3) **Occasion and Purpose.** The epistle seems to have been occasioned partly by some intelligence received by the Apostle concerning the Corinthian church from the domestics of Chloe, a pious female connected with that church (i:11), and, probably, also from common report (*ἀκούεται, it is heard*, v:1); and partly by an epistle which the Corinthians themselves had addressed to the Apostle, asking advice and instruction on several points (vii:1), and which probably was conveyed to him by Stephanas, Fortunatus, and Achaicus (xvi:17). Apollos, also, who succeeded the Apostle at Corinth, but who seems to have been with him at the time this epistle was written (xvi:12), may have given him information of the state of things among the Christians in that city. From these sources the Apostle had become acquainted with the painful fact that since he had left Corinth (Acts xviii:18) the church in that place had sunk into a state of great corruption and error. One prime source of this evil state of things, and in itself an evil of no inferior magnitude, was the existence of schisms or party divisions in the church. 'Every one of you,' Paul tells them, 'saith I am of Paul, and I of Apollos, and I of Cephas, and I of Christ' (i:12). This has led to the conclusion that four great parties had arisen in the church, which boasted of Paul, Apollos, Peter, and Christ, as their respective heads. The existence in many of the early churches of a strong tendency towards the ingrafting of Judaism upon Christianity is a fact well known to every reader of the New Testament; and though the church at Corinth was founded by Paul and afterwards instructed by Apollos, yet it is extremely probable that as in the churches of Galatia so in those of Achaia this tendency may have been strongly manifested, and that a party may have arisen in the church at Corinth opposed to the liberal and spiritual system of Paul, and more inclined to one which aimed at fettering Christianity with the restrictions and outward ritual of the Mosaic dispensation. But that there really were in the Corinthian church sects or parties specifically distinguished from each other by peculiarities of doctrinal sentiment may be seriously questioned. That erroneous doctrines were entertained by individuals in the church, and that a schismatical spirit pervaded it, cannot well be doubted. But these two in all likelihood were not formally connected with each other. Schisms often arise in churches from causes which have little or nothing to do with diversities of doctrinal sentiment among the members; and such probably were the schisms which disturbed the church at Corinth. At least this is to be legitimate-

ly inferred from the circumstance that the existence of these is condemned by the Apostle, without reference to any doctrinal errors out of which they might arise; whilst, on the other hand, the doctrinal errors condemned by him are denounced without reference to their having led to party strifes. We may therefore take it for granted that the schisms arose merely from quarrels among the Corinthians as to the comparative excellence of their respective teachers—those who had learned of Paul boasting that he excelled all others, and the converts of Apollos and Peter advancing a similar claim for them, whilst a fourth party haughtily repudiated all subordinate teaching, and pretended that they derived all their religious knowledge from the direct teaching of Christ. The language of the Apostle in the first four chapters, where alone he speaks directly of these schisms, and where he resolves their criminality not into their relation to false doctrine, but into their having their source in a disposition to glory in men, must be regarded as greatly favoring this view. Comp. also 2 Cor. v:16.

Besides the schisms and the erroneous opinions which had invaded the Church at Corinth, the Apostle had learned that many immoral and disorderly practices were tolerated among them, and were in some cases defended by them. A connection of a grossly incestuous character had been formed by one of the members, and gloried in by his brethren (v:1, 2); law-suits before heathen judges were instituted by one Christian against another (vi:1); licentious indulgence was not so firmly denounced and so carefully avoided as the purity of Christianity required (vi:9-20); the public meetings of the brethren were brought into disrepute by the women appearing in them unveiled (xi:3-10), and were disturbed by the confused and disorderly manner in which the persons possessing spiritual gifts chose to exercise them (xii-xiv); and in fine the *ἀγάπαι*, love feasts, which were designed to be scenes of love and union, became occasions for greater contention through the selfishness of the wealthier members, who, instead of sharing in a common meal with the poorer, brought each his own repast, and partook of it by himself, often to excess, while his needy brother was left to fast (xi:20-34). The judgment of the Apostle had also been solicited by the Corinthians concerning the comparative advantages of the married and the celibate state (vii:1-40), as well as, apparently, the duty of Christians in relation to the use for food, of meat which had been offered to idols (viii:1-13). For the correction of these errors, the remedying of these disorders, and the solution of these doubts, this epistle was written by the Apostle.

(4) **A Previous Epistle.** *Was there an epistle to the Corinthians before this one?* From an expression of the Apostle in chapter v: 9, it has been inferred by many (Dean Farrar among others) that the present was not the first epistle addressed by Paul to the Corinthians, but that it was preceded by one now lost. For this opinion, however, the words in question afford a very unsatisfactory basis. They are as follows: *ἔγραψα ὑμῖν ἐν τῇ ἐπιστολῇ, κ. τ. λ.* Now these words must be rendered either 'I have written to you in *this* epistle,' or 'I wrote to you in *that* epistle,' and our choice between these two renderings will depend partly on grammatical and partly on historical grounds. As the aorist *ἔγραψα* may mean either 'I wrote' or 'I have written,' nothing can be concluded from it in either way. It may be doubted, however, whether, had the Apostle intended to refer to a former epistle, he would have used the article *τῇ* simply, without adding *former*.

In support of this conclusion it may be added, (1) that the Apostle had really in this epistle given the prohibition to which he refers; (2) that it is not a little strange that the Apostle should, only in this cursory and incidental manner, refer to a circumstance so important in its bearing upon the case of the Corinthians as his having already addressed them on their sinful practices; and (3) that had such an epistle ever existed it may be supposed that some hint of its existence would have been found in the records of the primitive Church, which is not the case.

(5) **Paul's Visits to Corinth.** From 2 Cor. xii:14 and xiii:1, compared with 2 Cor. ii:1, and xiii:2, it appears that before the writing of that epistle Paul had *twice* visited Corinth, and that one of these visits had been after the Church there had fallen into an evil state; for otherwise his visit could not have been described as one *ἐν λύπῃ*, and one during which God had humbled him before them.

Interpreters have differed widely as to the meaning of the references to these visits. Some have understood the Apostle to say in them not that he had actually come to Corinth, but that he had planned to come. This was the view of Baur, Hilgenfeld, and others. But against this view, Meyer and Godet have argued from the plain and obvious sense of the language used, that the visits were actual and not simply projected. But if actual, did the second visit precede the writing of the first epistle, or did it fall between the two epistles? In favor of the first alternative, Reuss reasons from xvi:7, "I will not see you in passing." But this is certainly not conclusive. We must accordingly, accept the view of those who place the second visit between the two letters. This view explains how it was possible for the Corinthians to say as they did (iv:18) that Paul was always postponing his visit. This they could not have said if the visit in question had just preceded the first Epistle. In favor of this view, further is the fact of the Apostle's silence as to a second visit. In the first epistle, he repeatedly alludes to incidents that occurred in the first visit (i:8, 9; i:23; ii:1, 12, 13; xii:14, 21.), but to none that occurred in the second, although this was by the very supposition, fresher in his mind.

(6) **Date and Place of Composition.** The question when and where the Epistle was written, must be answered in the light of what the Apostle says in xvi:8, 19, taken together with v. 7, 8. From these passages, it appears that he was at Ephesus and was to stay there some time longer "until Pentecost." But from the general chronology of the life and ministry of Paul, we learn that he sojourned at Ephesus from 55 to 58 A. D. It has therefore been inferred with reason, that the letter was written about Easter in the year 57.

The subscription intimates that this epistle was conveyed to Corinth by Stephanas, Fortunatus, Achaicus, and Timothy. As respects the last named there is evidently a mistake, for from chapter xvi:10, it appears that Timothy's visiting Corinth was a thing not certain when this letter was finished, and from 2 Cor. viii:17, 18, it appears that Timothy did not visit Corinth till afterwards. Comp. also Acts xix:22. As respects the others, this tradition is probably correct.

2. Second Epistle. (1) **The Interval Between the Two Epistles.** Not long after the transmission of the first epistle, the Apostle made a special visit to Corinth, not recorded in Acts, returning, however, immediately to Ephesus. Here he continued his work until his success roused the opposition of Demetrius and the guild of the silver-

smiths. In consequence of the riotous uproar which followed (Acts xix:93 *sq.*), he left for Troas, where he expected to meet Titus with news from Corinth. But in this he was disappointed. Accordingly, he proceeded to Macedonia and there at length his desire for information on the state of affairs in the Corinthian church was gratified by the arrival of Titus (ii:13; vii:15 *sq.*)

Meanwhile, some claim (Godet among them) that Paul wrote to this church another letter which has not been preserved to us. The reasons, however, adduced for the existence of such an intermediate letter, have never appeared strong enough to convince the majority of expert scholars, and the preponderance of opinion is against the hypothesis. It appears to be, upon the whole, a gratuitous and unnecessary supposition.

(2) **Occasion and Purpose.** The intelligence brought by Titus concerning the church at Corinth was on the whole favorable. The censures of the former epistle had produced in their minds a godly sorrow, had awakened in them a regard to the proper discipline of the church, and had led to the exclusion from their fellowship of the incestuous person. This had so wrought on the mind of the latter that he had repented of his evil courses, and showed such contrition that the Apostle now pities him, and exhorts the church to restore him to their communion (2 Cor. ii:6-11; vii:8, *sq.*). A cordial response had also been given to the appeal that had been made on behalf of the saints in Palestine (ix:2). But with all these pleasing symptoms there were some of a painful kind. The spirit of strife had evidently abated in a marked degree. But some who were perhaps from the first unfavorably disposed towards him came forward now boldly denying his authority on the alleged ground that he was not an apostle. This along with other news, brought him by Titus led the Apostle to compose his second epistle, in which the language of commendation and love is mingled with that of censure, and even of threatening.

(3) **Contents.** This epistle may be divided into three sections. In the first, (i-iii), the Apostle chiefly dwells on the effects produced by his first epistle and the matters therewith connected. In the second (iv.-ix.) he discourses on the substance and effects of the religion which he proclaimed, and turns from this to an appeal on behalf of the claims of the poor saints on their liberality. And in the third (x-xiii) he vindicates his own dignity and authority as an apostle against the parties by whom these were opposed.

(4) **Date and Place of Composition.** But when did Paul write this letter and where? What has been already said fixes the date and place of writing as Ephesus and the summer of 58. Wieseler propounded the theory that the whole epistle was not composed at the same time. The difference of the matter and style between chapters i-vi and vii-xiii led him to suppose that the first of these two parts was written before the arrival of Titus and the second after the Apostle had heard his report. The difference between the two parts of the epistle, however, is not so great as to warrant such a difference of time in their composition. It is sufficiently accounted for, as Godet shows, by the supposition that the Apostle's mind reverts in the first part to the thoughts occurring to him before the arrival of Titus and in the second, to those subsequent to that event. Upon the basis of the difference of content between chapters i-ix and chapters x-xiii, some recent critics (Hausrath, Pfleiderer, and Schmiedel) have based still

another view of the origin and relation of these two parts of the letter. They allege that the last four chapters were written before the first nine. Still another theory propounded, is that Paul's two letters to the Corinthians were originally three, the first comprising eight fragments of the first epistles, and written in the winter of 56-57; the second consisting of six fragments of the first epistle and four of the second, and written at Easter, 57; and the third consisting of the first seven chapters of the second epistle, written in the summer of 58. It is hardly necessary to do more than mention these views as they have found no advocates outside the circle of their propounders.

3. Helps on the Epistles to the Corinthians. Among the best commentaries on these epistles, in English, are J. A. Beet's on both. Also A. P. Stanley's on both, besides those in the commentaries on the whole New Testament by Meyer, Alford, the Expositor's, etc. On First Corinthians separately, Gode't's, T. C. Edwards', and C. J. Ellicott's, are especially valuable; also Marcus Dods' (in the *Expositor's Bible*). On Second Corinthians, James Denney's (in the *Expositor's Bible*) stands alone. W. L. A. and A. C. Z.

CORINTHUS (ko-rin'thus), a Latin form for CORINTH, found in the A. V. in the subscription to the Epistle to the Romans.

CORMORANT (kôr'mô-rant). In the list of unclean birds (Lev. xi:17, Deut. xiv:17) the word *cormorant* is probably the correct rendering of the Heb. צ'ו'ש', *shaw-lawk'*, bird of prey.

It is a large black bird, living by fishing. Its scientific name is *Phalacrocorax carbo*. In all other places in the A. V. where *cormorant* is used *pelican* should be substituted for it, as the true rendering of the original, א'ת'ר', *kaw-ath'*, vomiting. The true cormorant is found along the salt and fresh waters of Syria, and is certainly a "plunger," so that there is no reason for a change in the passages of the Pentateuch, as some have suggested. These birds are as large as the raven, of a dark color, with long necks, webbed feet, feed upon fish, and are proverbial for their voracity. (See SALACH).

CORN (kôrn). The Hebrew word ד'ג'ל', *daw-gawn'*, which is rendered 'grain,' 'corn,' and sometimes 'wheat' in the Authorized Version, is the most general of the Hebrew terms representing 'corn,' and is more comprehensive than any word in our language, seeing that it probably includes not only all the proper corn grains, but also various kinds of pulse and seeds of plants, which we never comprehend under the name of 'corn' or even of 'grain.'

Daw-gawn may, therefore, be taken to represent all the commodities which we describe by the different words corn, grain, seeds, peas, beans. Among other places in which this word occurs, see Gen. xxvii:28-37; Num. xviii:27; Deut. xxviii:51; Lam. ii:12, etc. There is another word, *bar*, which denotes any kind of cleansed corn, that is, corn purified from the chaff and fit for use (Gen. xli:35-49; Prov. xi:26; Job xxxix:4; Joel ii:24). The same word is more rarely used to describe corn in a growing state (Ps. lxxv:13). The word *sheber*, which is sometimes rendered corn, denotes in a general sense 'provisions' or 'victuals,' and by consequence 'corn,' as the principal article in all provisions (Gen. xlii:1, 2, 19; Gen. xxvii:28; Neh. x:39, etc.).

It is evident from Ruth ii:14; 2 Sam. xvii:28, 29, etc., that parched corn (i. e., grain) constituted

part of the ordinary food of the Israelites, as it still does of the Arabs resident in Syria. Their methods of preparing corn for the manufacture of bread were the following: The threshing was done either by the staff or the flail (Is. xxviii:27, 28)—by the feet of cattle (Deut. xxv:4)—or by "a sharp threshing instrument having teeth" (Is. xli:15), which was something resembling a cart, and drawn over the corn by means of horses or oxen. When the corn is threshed, it is separated from the chaff and dust, by throwing it forward across the wind, by means of a winnowing fan, or shovel (Matt. iii:12), after which the grain is sifted to separate all impurities from it, Amos ix:9; Luke xxii:31. Hence we see that the threshing-floors were in the open air, Judg. vi:11; 2 Sam. xxiv:18. The grain thus obtained was commonly reduced to meal by the hand-mill, which consisted of a lower mill-stone, the upper side of which was concave, and an upper mill-stone, the lower surface of which was convex. The hole for receiving the corn was in the center of the upper mill-stone; and in the operation of grinding the lower was fixed, and the upper made to move round upon it, with considerable velocity, by means of a handle. These mills are still in use in the East, and in some parts of Scotland. Dr. E. D. Clarke says, "In the island of Cyprus I observed upon the ground the sort of stones used for grinding corn, called *querns* in Scotland, common also in Lapland, and in all parts of Palestine. These are the primeval mills of the world; and they are still found in all corn countries, where rude and ancient customs have not been liable to those changes introduced by refinement. The employment of grinding with these mills is confined solely to females; and the practice illustrates the

Women Grinding Corn.

prophetic observation of our Saviour, concerning the day of Jerusalem's destruction: "Two women shall be grinding at the mill; one shall be taken, and the other left," Matt. xxiv:41. Mr. Pennant, in his Tour to the Hebrides, has given a particular account of these hand-mills, as used in Scotland, in which he observes that the women always accompany the grating noise of the stones with their voices; and that when ten or a dozen are thus employed, the fury of the song rises to such a pitch, that you would, without breach of charity, imagine a troop of female demoniacs to be assembled. As the operation of grinding was usually performed in the morning at day-break, the noise of the females at the hand-mill was heard all over the city, which often awoke their more indolent masters. The Scriptures mention the want of this noise as a mark of desolation in Jer. xxv:10, and Rev. xviii:22. There was a humane law, that "no man shall take the nether or upper mill-stone in pledge,

for he taketh a man's life in pledge," Deut. xxiv: 6. He could not grind his daily bread without it. (Calmet.)

"Corn of all kinds is carried in sheaves from the harvest-fields on asses, mules, horses, or camels. It is threshed by the *nauraj* or *mauraj* (Heb. *môrag*), and winnowed, and stored in earthen, barrel-shaped receptacles or oblong bins in the houses (2 Sam. iv:6), or in pits under the floor (2 Sam. xvii:9), or in store-houses (2 Chron. xxxii:28). It is now often stored in underground chambers, with domed roofs, at the top of which is an opening to introduce the corn and remove it. These chambers, contrary to what might be expected, are dry and free from vermin. They are sometimes excavated in the rock, at other times in a sort of soft marl called *huw-wârah*." (G. E. Post, *Hastings' Bib. Dict.*)

The different products coming under the denomination of corn, are noticed under the usual heads, as BARLEY, WHEAT, etc.; their culture, under AGRICULTURE; their preparation, under BREAD, FOOD, MILL, etc.

Figurative. (1) A *handful of corn sown on the top of the mountains*, may denote Christ himself, the *corn of wheat*, as preached, or his gospel-truths and ordinances, dispensed by a few apostles and other preachers, in places spiritually barren to an eminent degree, and yet remarkably fruitful in the conversion of multitudes, and the production of much grace and many good works (Ps. lxxii:16). (2) The people of God *revive as the corn*; when watered with the rain of his word and Spirit, and warmed by the rays of the Sun of righteousness, they recover from spiritual decays, pleasantly flourish, and forebode a rich harvest of eternal blessedness (Hos. xiv:7). (3) Good men dying in old age are as a *sheaf of corn* coming in in its season; being fully prepared for death, they are carried by angels into the heavenly mansions (Job v:26). (4) Blessings, whether temporal or spiritual, are likened to *corn*, to denote their necessity and eminent usefulness for men's souls or bodies (Is. lxii:8; Ezek. xxxvi:29; Hos. ii:9; Zech. ix:17). (5) Manna is called *corn of heaven*; it fell from heaven, and sustained men's lives as grain does (Ps. lxxviii:24).

CORNELIUS (kor-nē'li-ūs), (Gr. Κορνήλιος, *kor-nay'lee-os*).

(1) **Family and Station.** The centurion of this name, whose history occurs in Acts x, most probably belonged to the Cornelli, a noble and distinguished family at Rome. He is reckoned by Julian, the Apostate, as one of the few persons of *distinction* who embraced Christianity. His station in society will appear upon considering that the Roman soldiers were divided into legions, each legion into ten cohorts, each cohort into three bands, and each band into two centuries or hundreds; and that Cornelius was a *commander of a hundred*, *ἐκατοντάρχης*, belonging to the *Italian* band.

(2) **Religious Position.** The *religious position* of Cornelius, before his interview with Peter, has been the subject of much debate. It is contended, that he was what is called a *proselyte of the gate*, or a Gentile, who, having renounced idolatry and worshiping the true God, submitted to the seven (supposed) precepts of Noah, frequented the synagogue, and offered sacrifices by the hands of the priests; but, not having received circumcision, was not reckoned among the Jews. But on the whole it is more probable that he belonged to the class of pious Gentiles who had so

far benefited by their contact with the Jewish people as to have become convinced that theirs was the true religion, who consequently worshiped the true God, were acquainted with the Scriptures of the Old Testament, most probably in the Greek translation, and observed several Jewish customs, as, for instance, their hours of prayer, or anything else that did not involve an act of special profession. This class of persons seems referred to in Acts xiii:16, where they are plainly distinguished from the Jews, though certainly mingled with them. To the same class is to be referred Candace's treasurer (Acts viii:27, etc.); and in earlier times, the midwives of Egypt (Exod. i:17), Rahab (Josh. vi:25), Ruth, Araunah the Jebusite (2 Sam. xxiv:18, etc.), the persons mentioned 1 Kings viii:41, 42, 43, Naaman (2 Kings v:16,17).

(3) **The First Fruits of the Gentiles.** It is reasonable, therefore, to regard Cornelius as having been selected of God to become *the first fruits of the Gentiles*. His character appears suited, as much as possible, to abate the prejudices of the Jewish converts against what appeared to them so great an innovation. It is well observed by Theophylact, that Cornelius, though neither a Jew nor a Christian, lived the *life* of a good Christian. He was *pious*, influenced by spontaneous reverence to God. He practically obeyed the restraints of religion, for he feared God, and this latter part of the description is extended to all his family or household (verse 2). He was liberal in alms to the Jewish people, which showed his respect for them, and he 'prayed to God always,' at all the hours of prayer observed by the Jewish nation. Such piety, obedience, faith, and charity, prepared him for superior attainments and benefits, and secured to him their bestowment (Ps. xxv:9; 1:23; Matt. xiii:12; Luke viii:15; John vii:17).

(4) **Two Visions.** The remarkable circumstances under which these benefits were conferred upon him are too plainly and forcibly related in Acts x: to require much comment. While in prayer, at the ninth hour of the day, he beheld, in waking vision, an angel of God, who declared that 'his prayers and alms had come up for a memorial before God,' and directed him to send for Joppa for Peter, who was then abiding 'at the house of one Simon, a tanner.' Cornelius sent accordingly; and when his messenger had nearly reached that place, Peter was prepared by the symbolical revelations of a noonday ecstasy, or trance, to understand that nothing which God had cleansed was to be regarded as common or unclean.

It is well remarked by Paley, that the circumstances of the two visions are such as to take them entirely out of the case of momentary miracles, or of such as may be accounted for by a *false perception*. 'The vision might be a dream; the message could not. Either communication taken separately might be a delusion; the concurrence of the two was impossible to happen without a supernatural cause' (*Evidences*, prop. i. chap. 2). The inquiries of the messengers from Cornelius suggested to Peter the application of his vision, and he readily accompanied them to Joppa, attended by six Jewish brethren, and hesitated not to enter the house of one whom he, as a Jew, would regard as unclean. The Apostle waived the too fervent reverence of Cornelius, which, although usual in the East, was rendered by Romans only to their gods; and mutual explanations then took place between him and the centurion. After this the Apostle proceeded to address Cornelius and his assembled friends, and expressed his conviction that the Gentiles were no longer to be called unclean, and stated the leading evidence and chief

doctrines of the Gospel. While he was discoursing the miraculous gifts of the Holy Spirit, contrary to the order hitherto observed, of being preceded by baptism and imposition of hands, fell on his Gentile auditors. Of this fact Peter and his companions were convinced, for they heard them speak with tongues, foreign and before unknown to them, and which Peter and his companions knew to be such by the aid of their own miraculous gifts, and, under divine impulse, glorify God as the author of the Gospel. The Jewish brethren who accompanied Peter were astonished upon perceiving, by these indubitable indications, that the Holy Spirit was poured out upon the Gentiles, as upon themselves at the beginning (x:45). Peter, already prepared by his vision for the event, and remembering that baptism was by the command of Jesus, *associated* with these miraculous endowments, said, 'Can any man forbid water that these should be baptized, who have received the Holy Ghost as well as we?' and yet, agreeably to the apostolic rule of committing the administration of baptism to others, and, considering that the consent of the Jewish brethren would be more explicit if they performed the duty, he ordered *them* to baptize Cornelius and his friends, his household, whose acceptance as members of the Christian church had been so abundantly testified.

CORNER (kôr'nēr), (Heb. פִּנָּא *pin-na'w'*, pinnacle).

(1) An angle, as the corner of a house or street (Prov. vii:8).

(2) (Heb. פִּי *pay-aw'*, mouth, hence side, the extreme part), the side of anything, as the points of the compass; sometimes rendered "quarter," "side;" *districts* of a country (Neh. ix:22).

(3) (Heb. קַוֵּי *kaw-na'w'*, edge), used in Is. xi:12; xxx:20; Ezek. vii:2, to express the "four corners of the earth," or the whole land.

(4) (Heb. קַוֵּי *kaw-thaf'*, shoulder), the side of a building (1 Kings vi:8).

(5) (Heb. זַיְתוֹן *mik-tso'ah*, angle), the external extremities of the tabernacle (Exod. xxvi:24).

(6) (Heb. מַשְׁבֵּט *pah'am*, step), a term applied perhaps to the feet of the ark and laver (Exod. xxv:12).

(7) (Heb. צַד *tsay-law*, rib, or side, Exod. xxx:4; xxvii:4). See RIB.

The Greek word *γωνία*, *go-nee'ah*, may mean the corner of a street, forming a square (Matt. vi:5), or a dark recess used for secrecy (Acts xxvi:26).

CORNER GATE (kôr'nēr gât). This gate was at the northwest corner of Jerusalem (2 Kings xiv:13; 2 Chron. xxv:23). See JERUSALEM.

CORNER STONE (kôr'nēr stōn), (Heb. פִּנָּא *pin-na'w'*, Job xxxviii:6; Is. xxviii:16; Gr. κεφαλὴ γωνίας, *kef-al-ay' go-nee'as*).

The chief corner stone was a large and massive stone so formed as when placed at a corner, to bind together two outer walls of an edifice. This properly makes no part of the *foundation*, from which it is distinguished in Jer. li:26; though, as the edifice rests thereon, it may be so called. Sometimes it denotes those massive slabs which, being placed towards the bottom of any wall, serve to bind the work together, as in Is. xxviii:16. Of these there were often two layers, without cement or mortar (Bloomfield, *Reccens Synop.* on Eph. ii:20). This explanation will sufficiently

indicate the sense in which the title of 'chief corner stone' is applied to Christ. For various superstitions and religious rites connected with the corner stone, comp. Trumbull, *Threshold Covenant*, 22, 51, 55. (See FOUNDATION.)

Figurative. The symbolical title of 'chief corner stone' is applied to Christ in (Eph. ii:20, and 1 Pet. ii:6), which last passage is a quotation from Is. xxviii:16, where the Septuagint has the same words for the Hebrew *pinna'w'*. There seems no valid reason for distinguishing this from the stone called 'the head of the corner' (Matt. xxi:42; which is the Sept. translation of *pinna'w'*, in Ps. cxviii:22), although some contend that the latter is the top stone or coping. The figure of Eph. ii:20, is well explained by Grimm. As the corner stone is inserted at the angle of a building, holding two walls together and supporting the superstructure, so Christ unites Jew and Gentile, and is the support of the Church. The additional thought of 1 Pet. ii:8, can be without violence derived from the same figure. As one recklessly turning the corner of a building may stumble over the corner stone, so, while some find in Christ their support, others stumble at Him and perish (Comp. Alford and Ellicott on Eph. ii:20). (J. A. Selbie, *Hastings' Bib. Dict.*)

CORNET (kôr'nēt), (Heb. שׁוֹפָר *shophar*), a loud sounding instrument used by the ancient Hebrews for announcing the "Jubilee" (Lev. xxv:9) and other important events (Jer. iv:5, 9). It was made out of the horn of a ram or chamois, or sometimes of an ox. It was about eighteen inches in length. (See MUSICAL INSTRUMENTS.)

CORRECTION (kōr-rēk'shūn), (Heb. יָדָע *yaw-sar'*, to instruct, chastise; מָנִיעַ *yaw-kakh'*, to manifest, reason with, reprove).

In "He that *chastiseth* the heathen, shall not he *correct*?" (Ps. xciv:10) both Hebrew words are used in the above order. (See also Job v:17). The scriptures are for *correction*; by their powerful influence they prick a man to the heart, and make him amend his evil courses (2 Tim. iii:16).

CORRUPTION (kōr-rūp'shūn). A number of Hebrew and Greek words are thus translated. They signify

(1) The decay of the body (Ps. xvi:10). (2) The blemishes of an animal thus rendered unfit for sacrifice (Lev. xxii:25). (3) The moral ruin caused by sin (Deut. ix:12). (4) Everlasting ruin (Gal. vi:8).

CORRUPTION, MOUNT OF (kōr-rūp'shūn, mount ōv).

The Mount of Olives is called the "mount of corruption," because there Solomon built high places or temples for abominable idols, to gratify his heathenish wives (2 Kings xxiii:13). "On the right hand of the mount of corruption." The Chaldee and other versions read "the Mount of Olives," obviously deriving the word rendered corruption *mashchith*, from *mashach*, to anoint, with reference to the oil produced by the famous olives of this mountain, rather than from the Chaldee word meaning to *destroy*. We agree with this, as the Mount of Olives is no doubt intended, whatever name be given to it. With this the Jews agree, in so far that they place the mount of corruption immediately fronting the Temple on the east, which makes it the Mount of Olives. (Kitto, *Pictorial Bib.*)

COS (kōs). See COOS.

COSAM (kō'sam), (Gr. Κωσάμ, *ko-sam'*, a diviner, Luke iii:28). This name occurs nowhere else in

the Bible. He was the son of Elmodam, and fifth before Zorobabel in the generations of 'Joseph, the husband of Mary.'

COSMOGONY (kōz-mōg'ō-nŷ), (Gr. *κοσμογονία*, *koz-mog-o-ne'ah*), from the Greek words *cosmos*, universe, and *gignesthai*, to be born, signifies the creation of the universe.

1. Cosmogony of Genesis.

The book of Genesis opens with a cosmogony, i. e., an account of the origin of the universe. It has been alleged that there are two parallel cosmogonies in the opening chapters of the book, the first of which is given in i-ii:4 and the second in ii:4-7. But it is only by a hard stretch of the term that the second of these can be called a cosmogony. At the first glance, as well as after maturer study, it appears to be a brief introduction to the account of the origin of man. It is in no sense a comprehensive narrative of the origin of the world, but a summary statement preparing the way for what follows. It looks upon a certain portion of the earth as the local habitation of the first man and treats of the preparation of this habitation. It contains no special data as to the successive stages in which the world came into being. To treat it as a variant cosmogony would be to detach it from the larger section to which it belongs and to misunderstand its meaning.

If we now examine the cosmogony given in Gen. i, ii:1-3, we shall find that it begins with the general statement in verse 1, that "God created the heaven and the earth"; i. e., the universe; for all things are included in the two terms, heaven and earth. This general statement is then explicated in a series of seven paragraphs. Each one of these gives the so-called work of one day. The first traces the progress of the earth from a chaotic ("formless and void") mass under the influence of the spirit of God to a luminous or illuminated body. The second tells of the separation between the firmament and the waters above and the earth with the waters beneath; the third, of the separation between the dry land and the seas and of the appearance of vegetable life; the fourth, of the emergence of the sun, moon, and stars and their use as standards or measurements of time; the fifth, of the production of animal life in the waters of the sea and in the air (fishes and birds); the sixth, of the creation of animal life on land, culminating in man. The seventh records the hallowing of the seventh day as the day of the rest of God. All but the last of these paragraphs end with the formula: "And there was evening and there was morning, one day," "a second day," etc.

How is this account to be understood? Is it to be taken as a precise history of the way in which the world came into being, or is it a poetical or even allegorical portraiture of certain moral and religious principles? Light has been thrown on the subject by recent research, both in the sphere of archæology and in that of natural science. The cosmogony of Genesis bears certain resemblances to the cosmogonies of the ancients.

2. Cosmogony of the Ancients.

(1) **Greeks and Romans.** Of the cosmogonies of the ancients, the most familiar is that which passed current among the Greeks and Romans. This was gathered into form early, by the poet Hesiod. In the beginning, it ran, the world was a great, shapeless mass called Chaos. Out of Chaos sprang first the spirit of love—*Eros*—and the broadchested earth—*Gaea*; then darkness—*Erebos*—and night—*Nyx*; from the union of the two latter arose the clear sky—*Aether*—and

the day—*Hemera*. The earth, by virtue of the power by which it was produced, brought forth the firmament—*Uranos*—the mountains and the sea—*Pontos*. Thereupon, *Eros* moved the beings thus far produced to come together in pairs. *Uranos* and *Gaea* first being joined together, peopled the earth with Titans, Giants and Cyclops. Out of these beginnings grew in the course of time the gods of Olympus, the heroes, and the human race in successive ages.

(2) **Egyptian.** According to the Egyptian cosmogony, the universe is a gradually developing divinity. It is not, however, a unit, but a quaternity. Its four members are: *Kneph*, Spirit; *Neith*, matter; *Sevech*, time; and *Pascht*, space. These are all independent and undervived. The last two, time and space, are passive; the first two combine to produce the visible world. *Neith* is conceived of as in the form of a great ball—the primitive or cosmic egg—around which *Kneph* broods as a subtle substance, preparing it for its transformation. The first product of this brooding of the Spirit over matter is *Ptah*, or the fire and light element. In the next stage of development, two vast material divinities arise; i. e., the firmament *Pc* and the earth, *Anuke*. Above the vault of heaven there remain the subtle dark fluid substances of the primitive stage; these are the waters above the heavens. The masses below the vault are then shaped into the sun, moon and stars. With the creation of the sun, the period of universal light—*Ptah*—comes to an end. How long this period was, it is impossible to tell, as there was no sun to measure it. After the origin of the sun and moon, the world was gradually brought to its present form, the earth occupying the center.

(3) **Phœnician.** The Phœnician cosmogony began, like the Greek, with Chaos as the primitive being, but placed side by side with, or rather within Chaos, the primitive Spirit. A third factor is also introduced in the form of Desire, but it is impossible to say definitely whether as primitive or derived from the other two. In any case, from the union of Desire with Spirit was born *Mōt* (mire—mud—water). *Mōt* made himself into an egg and developed into the world.

(4) **Babylonian.** The Babylonian account of the creation, unearthed and deciphered within the last half of the nineteenth century, is worth reciting. It goes back to the time when nothing existed. "There was a time when what is overhead was not called heaven, what is beneath was not yet called earth. The abyss, the ancient, their progenitor, the mother *Tiamat* was the bearer of them all. Their waters were altogether unscattered. The fields were not prepared, the moor was not seen. At that time none of the gods had appeared; neither was anyone's name implored, nor was any destiny fixed. The gods were created. . . . *Lachmu* and *Lachamu* issued forth, and they brought forth. . . . *An Sar* and *Ki Sar* were created. A long time passed. . . . the God *Anu (Bel)* and *Ea* were born, *An Sar* and *Ki Sar* bore them.

These four ancient cosmogonies, which may be regarded as the best out of a large number, illustrate the resemblances and differences existing between the extra-biblical and the biblical accounts of the creation.

3. **Resemblances and Differences.** The resemblances are: (1) They all begin with chaos. (2) The first stage after chaos is in all the creation of light. (3) The next stage is the process, with some at least, of the separation of dry land

from the sea just as in Genesis i. (4) The sun and other heavenly bodies follow in the next stage in all the cosmogonies that make special mention of them. (5) Animals and mankind appear last in all. The differences between the Biblical and the other cosmogonies are, however, also to be noted: (1) According to the Biblical cosmogony, God precedes the world; according to all the others, the gods are born into existence in the development of the world. Genesis i gives a cosmogony in the strict sense of the word; the mythologies contain a confused theogony in their cosmogonies. (2) According to Genesis, God is distinct from and above the world, forming it by His word; according to the mythologies, the gods are a part of the universe, sharing in the common development. (3) According to Genesis, God is one; according to the mythologies a multitude of gods emerge into existence. (4) According to Genesis, the universe has a definite plan and goal which it reaches and is pronounced *very good*; according to the mythologies, the universe reaches its present condition as if haphazard.

4. Modern Science. But we may now inquire into the conclusion of modern science on the subject of the beginnings of the world. Until recently, this question was supposed to be beyond the reach of true science. It is now agreed upon, however, that science must begin with a theory, the primitive condition of all things and their transformation into their present state. While there are still differences of view, there is a growing tendency towards the acceptance of the nebular hypothesis as a true cosmogony.

(1) **Nebular Hypothesis.** What then is the nebular hypothesis? It is the supposition first put forth as a philosophical speculation by Kant and subsequently elaborated as a scientific theory by La Place that in the earliest stage of its existence, the universe was an inchoate mass of extremely rarified matter. According to the laws of gravitation, this mass assumed the form of an immense sphere and began to revolve on an axis. In consequence of this rotation, it became flattened at the poles and expanded at the equator. This, with the condensation and contraction of the mass, led to the separation of the equatorial portion of it and the formation of the same into a ring like the rings of the planet Saturn. The ring, on account of unequal condensation in different portions of it, broke into a number of fragments, each of which went through a process similar to that of the whole mass, and thus stellar systems, and in particular the solar system, were formed. In each of these systems, the conditions above described being present, through the same process planets and satellites came into existence.

A single glance at this theory and its relation to Mosaic cosmogony reveals the fact that there can be no conflict between the two. The nebular hypothesis leaves the question of the First Cause out of view as beyond the reach of science strictly so called. It begins with the "heavens and the earth;" i. e., the universe as already created in a chaotic mass; it assumes further that motions, issuing in heat and light, have been inserted into this mass, perhaps created together with it, and then proceeds to account for the formation of planets and suns, and within these (especially within the terrestrial sphere) for the formation of the firmament and the separation of the waters above and the waters beneath. The correspondence between the two is, however, from the nature of the case very general. At one point, this correspondence is particularly striking and unexpected. According to the nebular hypothesis, as well as according to

the Mosaic account, light precedes the formation of the sun and the other celestial bodies.

At the point where the nebular hypothesis leaves the story of the origin of the world, the science of geology takes it up and continues it.

(2) **Geology.** When the earth's crust was formed in accordance with the laws mentioned in the above brief sketch of the nebular hypothesis, it was surrounded by a dense mass of vapors. Part of this mass was condensed and precipitated to the surface of the earth, constituting a continuous and all-enveloping sea. The rest remained suspended in the form of an unbroken shell of thick, impenetrable cloud or hygro-sphere. The further condensation of the central mass of the earth caused shrinkages and wrinklins on the surface. The elevations thus formed appeared as mountains and continents, while the depressions became the basins of the oceans and seas. Meantime, life in its lowest forms also appeared, though science does not undertake to say whence and how. But life, once introduced, went on progressing and becoming more and more complex and differentiated. The earliest forms of life appear to have been "comprehensive" or intermediary between animal and vegetable. Out of these arose the protophytes, or first plants, and the protozoa, or first animals. Then appeared fishes, next reptiles, next birds; last mammals, followed by man. This order is not the same as that given in the six days, or stages, of creation in Genesis. For here, plants of all kinds—"grass, herbs, fruit, trees, yielding fruit after their kind"—are created on the third day. Fishes, or sea-monsters—"moving creatures that move"—and birds, are created on the fifth day; and living creatures or beasts, defined as "cattle and creeping things"—reptiles—and finally man, were created on the sixth day. The discrepancies are seen at a glance and have led to many ways of looking at them.

(3) **Discrepancies.** In general, these may be reduced to three classes: (1) Those of the Harmonists; (2) those of the Collisionists; and (3) those of the Parallelists.

(1) The Harmonists strive to bring the data furnished by geology into perfect accord with the Genesis narrative. As the facts of geology are fixed and admit of but a single interpretation, any attempt to remove the discrepancies between the teachings of this science and the portraiture of Genesis must be based on some interpretation of the Biblical text. Of such interpretations, there have been attempted a very large number. It will be sufficient to mention here some that have obtained currency among Bible students.

(a) The first of the systems of harmonization is that according to which Genesis and geology give accounts of totally different matters. According to this view Genesis i:1, states in a single sentence the fact of the creation of the world, including the earth with all its contents. Between this verse, however, and what follows, there is a gap. The second verse begins with a devastation and ruin. This is not primitive chaos, but the result of a convulsion or cataclysm. "The earth was without form and void and darkness was upon the face of the deep." All that geology now discovers and deciphers of the earth's history belongs to the period preceding the cataclysm obscurely alluded to in this statement. The subsequent portion of the chapter gives, according to this view, an account of the reconstruction of the terrestrial world after this cataclysm, in six ordinary or solar days of twenty-four hours each. Of such reconstruction, geology could naturally

know and say nothing. Thus the two accounts are mutually supplementary and the harmony between them is complete. The difficulties of this method of reconciliation need not here be pointed out.

(b) Another way of harmonizing Genesis and geology is that proposed by geologists like Hugh Miller, Dana and Dawson, and accepted by such men as Gladstone. These authorities, though differing among themselves, have this in common, that they take the Hebrew words meaning "grain," "herbs," "trees," "birds," "reptiles" and give them broader meanings than the same admit of in other passages, and thus create artificial correspondences between the two accounts. Such correspondences, however, though seen by their own authors, are not readily accepted by others as evidenced by the differences among the harmonists of this class. And in general, Hebrew scholars have failed to endorse the interpretations put on Hebrew terms by them. In some cases, Hebraists have gone further and protested against these interpretations.

(c) A third class of harmonists confess themselves unable to find perfect accord between the accounts, but ascribe the failure to the imperfection of the data furnished by geology. In the present condition of our knowledge, they say, these discrepancies are insuperable; but geology is a new science, it is a growing science, and we may expect that when it gathers all the facts together, if indeed it ever shall succeed in doing so, its picture of the creative period will be identical with that of Genesis. That this is rather an abandonment of the efforts to reconcile than a successful reconciliation of the accounts is evident on the face of it.

(2) But if harmonies of Genesis and geology have not been successful in general, must we accept the conclusion of the Collisionists, which is that these two cosmogonies contradict each other at every point? Are the discrepancies between them actual contradictions? Those who answer in the affirmative do not agree among themselves. Some consider the first chapter of Genesis a legend or myth on a perfect level with the mythological cosmogonies of the ancients, and refuse to assign to it any value whatever. Others regard it as a legend indeed, but one in which the divine Spirit has chosen to embody certain great moral and spiritual lessons. While the vehicle itself is no different from the myths of other ancient people, the lessons conveyed to mankind through it raise it infinitely above them. Both forms of the collisionist view ignore the facts. There is a general resemblance between the account in Genesis and that of geology which is worthy of attention.

(3) We are thus led to the Parallelists' view of these accounts, which consists in putting them side by side and noting their resemblances and differences, without making an effort to bring about a reconciliation between them, if they should prove to be divergent, or expecting them to conflict upon the assumption that because the Genesis account is an ancient one it must necessarily conflict with modern science. The two records move upon different planes, but these two planes are parallel to one another. Each of them has a specific design and the details in each are selected and arranged with a view to making it a perfect means towards this end. Neither could be substituted for the other. Moreover, each is drawn up within a definite environment and its form is determined by this environment. The geological account is a nineteenth century grouping of certain facts with a view to satisfying a scientific need; the Genesis

account is a pre-Christian presentation emphasizing the place of God in the origin of the world. Perfect correspondence between them does not exist. And yet a general similarity of order cannot be denied. This parallelism is such as grows out of the fact that both touch on the same main subject. But whereas one is intended to show up the First Cause and the ultimate purpose of the creation, the other aims to trace its course as a process possessing an interest of its own. The differences between the accounts are also precisely such as might have been expected from the purpose and nature of each as compared with the other. The geological record apart from that of Genesis would be defective, as it cannot go back to the primary cause of the creation. The Genesis account, compared with that of geology, cannot be regarded as accurate in every detail. But its lack of accuracy in no way militates against its being accepted as in general true. This "trueness" as Gladstone says "is truth or trueness as conveyed and comprehended by the mind of man; and further, by the mind of man in a comparatively untrained and infant state." (*Impregnable Rock*, p. 38.) Language, and in fact all other modes of expression are means towards ends. It may occur that "with the aim in view, words of figure literally untrue might carry more truth home than words of fact; words less exact will even now often carry more truth than words superior in exactness." (*Impregnable Rock*, p. 49.)

(4) **Biology.** Apart from geology there has arisen another science of recent years which claims to have something to say on the early periods of the world's history, namely, the science of biology. And the point of contact between biology and the cosmogony of Genesis is its adoption of the law of evolution. Through the operation of this law biology claims to explain the successive appearance of the various forms of life as links in a connected chain. All that the cosmogony of Genesis had described as the creation of "grain," "herb," "fruit-tree yielding fruit," "moving creature that hath life," "fowl" flying above the earth, "sea-monster," "creeping thing," "cattle," and "beast of the earth," and the physical frame and life of man himself, biology classifies under orders, classes, families, genera, species, and varieties; and traces them all in their multitudinous forms from a few primordial germs, perhaps even from one. The question which is thus raised between Genesis and biology is: Can the theory of evolution be held in consistency with the general trustworthiness of the account in Genesis? In order to obtain a satisfactory answer to this question, it is necessary to posit first of all that biology has no right to and does not undertake to account for causes, but only for successions and varieties of phenomena. It can look upon evolution only as a process or method in nature, and not as a force or cause which brings things or entities into existence. In other words, we must distinguish between evolution as a method according to which the underlying cause or causes bring about new forms out of old ones, and evolution as a philosophy of cause or being. Further than this, biological evolution must be understood as concerned simply with the phenomena of life and as distinguished from cosmical evolution, which undertakes to explain the origin of inorganic forms as well as forms of life upon the same principle. It does not come within the scope of the principle of biological evolution to inquire how life originated. It leaves the answer to that question to philosophy. Naturally, philosophy aims to take up the

question and answer it in a manner similar to that of biology through its theory of Cosmic evolution. But with that biology has nothing to do. Assuming that life has somehow come on the earth, it traces it from its simple and single beginning, by slow and gradual modifications—"insensible gradations"—through successive forms and stages up to man.

Is the creation of the various forms of life as pictured in Genesis inconsistent with this effort of modern biology to trace them all to one beginning and one process of development? It was for a long time supposed that it was. Under the influence of ancient and medieval interpretation, it was supposed that the account in Genesis could only be harmonized with a theory of the special creation of each species of life. But on a close scrutiny, this interpretation does not seem to be necessary. There is nothing in the text to indicate that the author or original readers of the record had the creation of each species by a separate divine fiat in mind. On the contrary, while the account cannot be said to teach the passage of species into one another or to involve the modern doctrine of evolution, it certainly leaves room for that doctrine. The creator is represented as endowing the material elements with the power to produce certain forms of life. "And God said, let the earth put forth grass," etc. "Let the waters bring forth abundantly moving creature that hath life," etc. "Let the earth bring forth the living creature after its kind," etc., i:11, 20, 24. There is at least a suggestion here of what scientists (Le Conte) call "resident forces." There are further suggestions of heredity in the command that plants and animals shall bring forth, each "after its kind." There is the suggestion of adaptation to environment in the fact that the waters, the air, and the earth are each commanded to bring forth each the forms of life best suited to subsist in it. There is the suggestion of fecundity in the command to multiply and replenish the earth. And finally there is a suggestion of the law of the survival of the fittest in the subordination of the lower forms to the higher and of all to man. These are no more than mere shadowy suggestions. It is not to be thought for a moment that they show a knowledge of modern scientific theories on the part of the ancient writer. Yet they indicate how free his mind was of any other theory of creation which might lay claims to exclusive consistency with his view of the origin of living forms upon the earth.

(5) **Biblical Bearing.** The bearing of the doctrine of evolution on the Biblical portraiture of the origin of man's intellectual and moral nature falls rather within the scope of an article on Anthropology than within that on Cosmogony. It may be said, however, that even that part of Genesis has been found to raise no difficulty in the way of a full acceptance of both the scientific theory and the Biblical record.

If finally we turn from organic evolution to cosmic evolution as a favorite doctrine in modern thought, and institute a comparison between it and the statements of Genesis, we shall find the same parallelism without absolute harmony which we have found between the cosmogony of modern science and the record of Genesis. Evolution in this sense is defined by Herbert Spencer as "an integration of matter and concomitant dissipation of motion, during which the matter passes from an indefinite, incoherent homogeneity to a definite, coherent heterogeneity, and during which the retained motion undergoes a parallel transformation." (*First Principles*, c. xvii:145. p. 396.)

It is to be noted that evolution in this definition is a mere process. It is not a principle or cause. As a process, it may be held with a materialistic (pantheistic), theistic, or agnostic system of theory of the nature of the First Cause. Herbert Spencer himself, followed by many, holds to evolution upon an agnostic basis. He asserts that the First Cause, though existing, is not knowable. Others make matter itself the first cause and evolution the process of its blind self-unfolding. Still others postulate a personal God as a First Cause and evolution as the method of his working. If this last metaphysical basis be put under the theory of evolution, all inconsistency between it and the cosmogony of Genesis vanishes. On the contrary, certain resemblances emerge which, though not indicating an anticipation of the modern thought by the Biblical writer, at least show that his mind was not pre-occupied by a rival theory. These resemblances are especially striking in the characterization of the process of transition from the first to the subsequent stages of the world's history. Evolution represents the transition as a passage of matter from a state of "indefinite, incoherent homogeneity" to a state of "definite, coherent heterogeneity." Genesis asserts that God in the beginning created heaven and earth and that "the earth was without form and void;" i. e., in a state of "indefinite, incoherent homogeneity" and that from this state it passed by gradual stages into a state in which a firmament, land and water, grass, herbs, and trees, sun, moon, and stars, animals and man appeared in order. In other words, a definite, coherent heterogeneity was gradually evolved out of the preceding opposite conditions (see Matheson, *Can the Old Faith live with the New?*) If it be borne in mind that Genesis was not written in order to teach science and philosophy, but to show God's earliest dealings with his people, this absence of real conflict between its representations and the teachings of modern science will be seen to show a soberness and soundness in the mind of its author which fitted him to become the vehicle of God's revelations to the world. The product may be called history, legend, or even myth or allegory. But whatever it be called, there is nothing in it which makes it difficult to believe that its author was inspired by God.

A. C. Z.

COTES (kōts), (Heb. only in the plural, אֹתוֹת, *av-av-roth'*, stalls), pens or inclosures for flocks (2 Chron. xxxii:28).

COTTAGE (kōt'tāj).

1. A *hut* made of boughs (Is. i:8; Heb. סֹכָה, *sook-kaw'*) for the purpose of temporary shelter. It is rendered "booth" in Job xxvii:18.

2. מְלוֹנָה, *mel-oo-naw'*, occurs in Is.xxiv:20, "The earth . . . shall be removed like a *cottage*."

It should be translated to swing to and fro like a hammock. It appears to have been a swinging bed suspended from the trees or an even frailer structure than No. 1 (rendered "lodge," Is. i:8).

3. The cottages mentioned in Zephaniah (ii:6; Heb. כְּרוֹת, *ke-roth'*, literally, *diggings*) are thought by some to mean wells, but probably were excavations made by the shepherds as a protection against the sun. (Mc. & Str. *Bib. Cyc.*)

COTTON (kōt't'n). In the Book of Esther, i:6, the word corresponding to 'green' in the Authorized Version is קַרְפָּס, *karpas*, and no doubt means cotton.

But we have only the Hebrew names to assist us in our inquiries. The same names have been applied by the ancients, and by writers in later times, sometimes to cotton and sometimes to linen, and we are unable to ascertain whether the earlier authors were more precise than their successors. Thus, *fine linen* was called *othone*. This is considered by Celsius and Forster to be an Egyptian word, and to correspond to *athon* or *ethon*. From the time that the mummies of Egypt were found to be enveloped in pieces and rolls of cloth, different authors have adduced these as evidence that the Egyptians were acquainted with cotton. But the microscope has proved that all the specimens were of linen, and not of cotton. Cotton is found apparently wild in Upper Egypt; it is cultivated on the west coast of Africa, but it has not yet been settled whether these are indigenous or introduced plants.

The difficulty of ascertaining whether cotton was known to the Egyptians having been shown to be sufficiently great, even when we have such a substance as mummy-cloth to deal with, it is hardly necessary to add that it is still more difficult to say whether it is mentioned in the Scriptures. Though it is probable that cotton was imported into Egypt and known to the Hebrews, it is extremely difficult to prove the fact. Passages have been quoted from Arrian and others to prove that it grew and was used for clothing in India. (See BYSSUS).

COUCH (kouch). See BED; SEAT.

COUCHING PLACE (kouch'ing plās), (Heb. מַרְבַּת, *mar-bates'*); a resting place for flocks (Ezek. xxv:5), a term used to denote the utter ruin of Ammon.

COULTER (kōl'tēr), (Heb. אֵיט, *ayth*, 1 Sam. xiii:20, 21), according to Is. ii:4, Mic. iv:3, and Joel iii:10, is an iron instrument used in agriculture, the majority of the ancient versions rendering it *plowshare*.

COUNCIL (koun'sīl). In the Old Testament *council* is the rendering of the Heb. רִגְמָו, *rig-maw'*, literally, a *heap* (Ps. lxxviii:27); a throng or company of persons. Two Greek words are thus rendered in the New Testament: (1) *συμβριον*, the Jewish governing body, the great council of the Sanhedrim, which sat at Jerusalem. (2) *συβρια* (Matt. x:17; Mark xiii:9), the lesser courts, of which there were two at Jerusalem, and one in each town of Palestine.

The constitution of these courts is a doubtful point; according to Talmudical writers the number of judges was twenty-three in places where there was a population of 120, and three where the population fell below that number (Mishn. *Sanhedr.* 1, sec. 6). Josephus, however, gives a different account: he states that the court, as constituted by Moses (Deut. xvi:18; *Comp. Ant.* iv:8, sec. 14), consisted of seven judges, each of whom had two Levites as assessors; accordingly in the reform which he carried out in Galilee, he appointed seven judges for the trial of minor offenses (*B. J.* ii:20, sec. 5). (Smith, *Bib. Dict.*) (See SANHEDRIM.)

COUNCIL HOUSE (koun'sīl hous), (Gr. *συβριον*, *soon-eh'dree-on*, Sanhedrim, a sitting together), a building in Jerusalem west of the temple, near the gymnasium and adjoining the innermost city wall (War v. 4, 2), where the Sanhedrim probably met.

During the course of the contest for the possession of the city by the Romans it was burned by Titus.

COUNSELOR (koun'sēl-ēr), (usually Heb. יָצָו, *yaw-ats'*).

1. An adviser upon any matter (Prov. xi:14; xv:22; 2 Chron. xxii:3, etc.).

2. The king's state adviser (2 Sam. xv:12; Ezra vii:28; 1 Chron. xxvii:33, etc.).

COUNTERVAIL (koun'tēr-vāl'), (Heb. שָׁוָה, *shaw-vaw'*), to act against with equal force, power, or effect; to thwart or overcome the action of the enemy (Esth. vii:4).

COUPLING (kūp'ling), (Heb. בָּרָב, *khaw-bar'*, to join), of curtains (Exod. xxvi:4, 5, 10; xxviii:27; xxxvi:11, etc.) and wooden beams or girders for fastening a building (2 Chron. xxxiv:11).

COURAGE, COURAGEOUS (kūr'āj, kūr-ā'jūs), (Heb. בָּרָב, *lay-bawb'*, heart, Dan. xi:25; רוּחַ, *roo'-akh*, breath, life, spirit, Josh. ii:11; מַטְאָה, *aw-mats'*, to be alert, strong, Deut. xxxi:6, 7, etc.; זָכַק, *khaw-zak'*, to seize, Josh. xxiii:6; 2 Sam. x:12; xiii:28; 2 Chron. xv:8, etc.; Gr. *θάρσος*, *thar'sos*, courage, cheer, Acts xxviii:15).

Courage is ranked as one of the four cardinal virtues (Wis. viii:7) according to the classification derived from Grecian philosophers. It is that condition of mind into which fear does not enter; which enables us to face difficulties and dangers with firmness and fearlessness.

It may be compared with bravery as follows: *Bravery* is shown in overcoming the obstacle of the moment; *courage* seeks to avert the distant evil that may possibly arrive. *Bravery* is a thing of the moment, that is or is not, as circumstances may favor: it varies with the time and season; *courage* exists at all times and on all occasions. (Crabb.)

In the early days of Israel's battles, courage in its simplest sense was naturally rated very high. The courageous feats of Jonathan and David and others are related with admiration (e.g. 1 Sam. xiv, xvii). We hear much of 'men of valor' (Judg., Sam. and especially Chron). The faint-hearted are not to be allowed to serve in battle (Judg. vii:3; Deut. xx:8; 1 Macc. iii:56). Between the earlier kings and the Maccabees we hear little or nothing of courage in war. The courage of endurance shown by martyrs is a leading topic in Dan., Macc., and parts of the New Testament, especially Heb. xi; 1 Pet. and Rev. (W. O. Burrows, *Hastings' Bib. Dict.*).

COURSE (kōrs). This word is used in Scripture in the sense of *onward movement*, *advance*, *progress*, in a particular direction, as of a *ship* (Acts xvi:11; xxi:1-7); of the *stars* (Judg. v:20); a *career* (2 Tim. iv:7).

It denotes the *path* in which the onward movement takes place, as of a *river* (Is. xlv:4).

Figurative. It denotes one's manner of life (Jer. viii:6; xxiii:10); also the manner of the present age (Eph. ii:2).

COURSE OF PRIESTS AND LEVITES (kōrs òv prēsts ānd lē'vits), (Heb. מַחְלְקֵי, *makh-al-o'keth*; Gr. *ἐφημερία*, *ef-ay-mer-ee'ah*, lasting for a day).

The division made by David of the priests and Levites into twenty-four classes or orders, with a president at the head of each class. In 1 Chron. xxiv. we have an account of the divisions of the priests into twenty-four classes, courses, or orders, who ministered at the altar in rotation. The courses were distinguished by the name of the most prominent member of the family from which

the course was taken. The eighth of these courses fell to the family of Abia or Abijah; and to this course belonged Zacharias, the father of John the Baptist (Luke 1, 5). (See ABIA).

COURT (kōrt), (Heb. generally כֶּרֶת, *khaw-tsare'*), an open inclosure; applied in Scripture frequently to the inclosures of the tabernacle and temple.

It also means the court of a prison (Neh. iii:25; Jer. xxxii:2), of a private house (2 Sam. xvii:18), and of a palace (2 Kings xx:4; Esth. i:5, etc.). In the New Testament the Gr. ἀθή, *ōw-lay'*, indicates an open court (Rev. xi:2), while "kings' courts" is the rendering of the Greek word βασιλειον, a *palace*. (See HOUSE.)

The word is often used in the plural (Ps. lxxv:4; lxxxiv:2). The courts belonging to the temple of Jerusalem were three: (1) *The court of the Gentiles*, because the Gentiles were allowed to enter no further; (2) *The court of Israel*, because Israelites, if clean, had a right of admission into it; (3) *The court of the priests*, where the altar of burnt-offerings stood, and where the priests and Levites exercised their ministry. "Court for owls" (Is. xxxiv:13) is rendered by Delitzsch (*Com.*, in loc.) "pasture for ostriches."

COURTS, JUDICIAL. See LAW.

COUSIN (küz'n), (Gr. συγγενής, *soong-ghen-ace'*). The child of an uncle or an aunt (Luke i:36, 58). Sometimes applied to more distant relationships. Shakespeare uses it of a nephew (*King John*, III, iii, 6), a niece (*Twelfth Night*, I, iii, 5), an uncle (I, v, 131), etc. Thus, *As You Like It*, I, iii, 44—

Rosalind—Me, uncle?

Duke Frederick—You, cousin.

COUTH (kou'thà), mentioned (1 Esdr. v:32) as one of those whose sons were servants in the temple after the return from captivity, but the Hebrew lists (Ezra ii:53; Neh. vii:55) contain no corresponding names.

COVENANT (kūv'ē-nant), (Heb. בְּרִית, *ber-eeth'*, cutting). Among other instances of anthropomorphic forms of speech employed in Scripture is the use of the term *covenant* to designate the divine dealings with mankind, or with individuals of the race.

(1) **Mutual Contract.** In all such cases, the *proper* idea of a covenant or mutual contract between parties, each of which is bound to render certain benefits to the other, is obviously excluded, and one of a merely *analogical* nature substituted in its place. Where God is one of the parties, and man the other, in a covenant, all the benefits conferred must be on the part of the former, and all the obligations sustained on the part of the latter. Such a definition, therefore, of a divine covenant as would imply that both parties are under conditions to each other is obviously incorrect, and incompatible with the relative position of the parties.

(2) **God's Promise.** We should prefer defining God's covenant with man as a gracious engagement on the part of God to communicate certain unmerited favors to men, in connection with a particular constitution or system, through means of which these favors are to be enjoyed. Hence in Scripture the covenant of God is called his 'counsel,' his 'oath,' his 'promise' (Ps. lxxxix:3, 4; cv:8-11; Heb. vi:13-20; Luke i:68-75; Gal. iii:15-18, etc.); and it is described as consisting wholly in the gracious bestowal of blessing on men (Is. lix:21; Jer. xxxi:33, 34). Hence also the application of the term *covenant* to designate such

fixed arrangements, or laws of nature, as the regular succession of day and night (Jer. xxxiii:20), and such religious institutions as the Sabbath (Exod. xxxi:16); circumcision (Gen. xvii:9, 10); the Levitical institute (Lev. xxvi:15); and in general any precept or ordinance of God (Jer. xxxiv:13, 14); all such appointments forming part of that system or arrangement in connection with which the blessings of God's grace were to be enjoyed.

(3) **Ratification.** The divine covenants were ratified with the sacrifice of a peculiar victim, the design of which was to show that without an atonement there could be no communication of blessing from God to man. Thus when God made a covenant with Abraham certain victims were slain and divided into halves, between which a smoking furnace and a burning lamp, the symbols of the divine presence, passed, to indicate the ratification of the promises conveyed in that covenant to Abraham; and here it is deserving of notice, as illustrating the definition of a divine covenant above given, that the divine glory *alone* passed between the pieces; whereas had the covenant been one of mutual stipulation, Abraham also would have performed the same ceremony (Gen. xv:1-18). In like manner, the Levitical covenant was ratified by sacrifice (Exod. xxiv:6-8); and the Apostle expressly affirms, on this ground, the necessity of the death of Christ, as the mediator of the new covenant; declaring that where a covenant is, there also of necessity must be the death of the appointed victim (Heb. ix:16).

(4) **The Everlasting Covenant.** Of the divine covenants mentioned in Scripture the first place is due to that which is emphatically styled by Jehovah, 'My covenant.' This is God's gracious engagement to confer salvation and eternal glory on all who come to him through Jesus Christ. It is called sometimes 'the everlasting covenant' (Is. lv:3; Heb. xiii:20), to distinguish it from those more temporary arrangements which were confined to particular individuals or classes; and the *second*, or *new*, or *better covenant*, to distinguish it from the Levitical covenant, which was *first* in order of time, because first ratified by sacrifice, and became *old*, and was shown to be *inferior*, because on the appearance of the Christian dispensation it was superseded, and passed away (Jer. xxxi:31; Gal. iv:24; Heb. vii:22; viii:6-13; ix:15-23; xii:24). Though this covenant was not, strictly speaking, ratified before the death of Christ, the great sacrificial victim (Heb. xiii:20), yet it was revealed to the saints who lived before his advent, and who enjoyed salvation through the retrospective power of his death (Rom. iii:25; Heb. ix:15). To the more highly favored of these God gave specific assurances of his gracious purpose, and on such occasions he was said to establish or make his covenant with them. Thus he established his covenant with Noah (Gen. ix:8, 9); with Abraham (Gen. xvii:4, 5); and with David (Ps. lxxxix:3, 4). These were not distinct covenants so much as renewals of the promises of the everlasting covenant, coupled with certain temporary favors, as types and pledges of the fulfilment of these promises.

(5) **The Old or Sinaitic Covenant.** The old or Sinaitic covenant was that given by God to the Israelites through Moses. It respected especially the inheritance of the land of Canaan and the temporal blessings therewith connected; but it stood related to the new covenant, as embodying a typical representation of those great truths and blessings which the Christian dispensation unfolds and conveys.

In the system of a certain class of theologians great importance is attached to what they have technically called 'the covenant of works.' By this they intend the constitution established by God with Adam, during the period of his innocence. So far as this phraseology is not understood to imply that man, even in his sinless state, was competent to bind Jehovah by any conditions, it cannot be objected to. It seems also to have the sanction of one passage of Scripture, viz. Hos. vi:7, which almost all the best interpreters agree in rendering thus: 'But they like Adam have transgressed the covenant.'

(6) **The Covenant of Redemption.** Theologians have also spoken of 'the covenant of redemption,' by which they mean an engagement entered into between God the Father and God the Son from all eternity, whereby the former secured to the latter a certain number of ransomed sinners, as his church or elect body, and the latter engaged to become their surety and substitute. By many the propriety of this doctrine has been doubted; but the references to it in Scripture are of such a kind that it seems unreasonable to refuse to admit it. With it stand connected the subjects of election, predestination, the special love of Christ to his people, and the salvation of all that the Father hath given him.

Sometimes a mere human contract is called God's covenant, in the sense of involving an appeal to the Almighty, who, as the Judge of the whole earth, will hold both parties bound to fulfil their engagement. Compare 1 Sam. xx:8; Jer. xxxiv:18, 19; Ezek. xvii:18, 19.

COVENANT OF SALT (kǔv'ê-nant òv salt).

A common form of ratifying covenants among the orientals was by the use of salt. (See SALT, COVENANT OF.)

COVENANT, THE NEW.

Under the Old Testament, the covenant of grace was externally administered by promises, prophecies, sacrifices, circumcision, the passover, and other types and ordinances. Under the New, it is administered in the preaching of the gospel, baptism, and the Lord's supper; in which grace and salvation are held forth in greater fullness, evidence, and efficacy, to all nations (2 Cor. iii:6-18; Heb. viii; Matt. xxviii:19, 20; 1 Cor. xi:23-28). But in both periods, the Mediator, the whole substance, blessings, and manner of obtaining an interest therein by faith, are the very same, without any difference (Heb. xiii:6; Gal. iii:7-14).

COVERING THE HEAD (kǔv'êr-ĩng thē hěd) in prayer. "The Jewish men prayed with the head covered, nay, even with a veil before the face." But Paul disapproved of the practice (1 Cor. xi:1,6).

COVERT (kǔv'ěrt) **FOR THE SABBATH** (Heb. מַי־סַוֵּק הַשַּׁבָּת, *may-sawk' hash-shab-bawth'*, 2 Kings xvi:18).

The *covert for the Sabbath*, which Ahaz demolished, was a place in the court of the temple, where the royal family sat to hear the law on the Sabbath; or a shelter here erected to defend the people in a storm (2 Kings xvi:18). He has *forsaken his covert as a lion*; God has wrathfully forsaken his city and temple of Jerusalem; or rather Nebuchadnezzar has furiously marched from Babylon, his capital, or from his lodging at Riblah (Jer. xxv:38).

COVET (kǔv'ět).

1. Sinfully and immoderately to desire earthly enjoyments, as honor, wealth, pleasure (Josh. vii:21).

2. To desire earnestly in a lawful manner (1 Cor. xii:31). (See COVETOUSNESS.)

COVETOUSNESS (kǔv'ět-üs-něš), (Heb. חַמְדָּה, *chaw-mad'*, to desire; עֲבָרָה, *beh'tsah*, unlawful gain; Gr. πλεονεξία, *pleh-on-ex-ee'ah*, the desire to have more (Mark vii:22; Rom. i:29; Luke xii:15; Eph. v:3).

It is an inordinate desire of earthly things, or of what belongs to our neighbor. Covetousness is a vice that becomes stronger in old age, when other vices are weakened; it can never be satisfied; it renders men the abhorrence of God, cruel, oppressive, and unjust towards neighbors; and it betrays the man into sins and miseries unnumbered (Ps. x:3; Mic. ii:2; Deut. xvi:19; Job xx:15-17; Prov. i:19; 1 Tim. vi:10).

COW (kou). See BEEVES; CALF.

COZ (kǒz), (Heb. כּוֹז, *kotse*, nimble).

1. A descendant of Judah (Chron. iv:8), B. C. between 1680 and 1430.

2. The name of one of the Levites (1 Chron. xxiv:10; Ezra ii:61; Neh. iii:4, 21; vii:63). In these passages the name has the article prefixed, and in the first of them it is retained in the A. V. (See HAKKOZ.)

COZBI (kǒz'bī), (Heb. כּוֹזֵבִי, *koz-bee'*, false), a daughter of Zur, one of the chiefs of the Midianites, slain with Zimri by Phinehas (Num. xxv:6-8, 14, 15, 18; xxxi:8).

CRACKLING (krāk'klĩng), (Heb. לֵקֶה, *kole*, voice, i. e., noise). The laughter of a fool is like to the *crackling noise of thorns burning*; is senseless, base and of short duration (Eccles. vii:6).

CRACKNEL (krāk'něł), (Heb. plural נִי־קֶרֶךְ, *nik-kood-deem'*, a kind of biscuit or bun baked hard and punctured with holes (1 Kings xiv:3).

CRAFT (kräft).

1. Deceit, guile (Dan. viii:25).

2. Trade, occupation (Acts xviii:3, and xix:25, 27). (See HANDICRAFT.)

CRAFTSMAN (kräfts'man), one skilled in some mechanical trade (Deut. xxvii:15; Acts xix:24). (See HANDICRAFT.)

CRAFTINESS, CRAFTY (kräft'ĩ-něš, kräft'ý), (Heb. עָרָם, *aw-ram'*, to be bare, cunning, deceitfulness, subtilty; Gr. πανουργία, *pan-oorg-ee'ah*, wiliness, adroitness, unscrupulousness, slyness). These are terms used to denote an aptitude to employ peculiar, secret, and fraudulent means to the attainment of an end (Job v:12, 13; Ps. lxxxiii:3; Luke xx:23; 1 Cor. iii:19; 2 Cor. iv:2; xii:16, etc).

CRANE (krān), (Is. xxxviii:14; Jer. viii:7), סוּס, *soos* and עֲגוּר, *a-goor'*, occur in these pages as names of birds, and have been generally considered as denoting the 'crane' and 'swallow.'

But translators are by no means agreed as to the appropriation of these names to the Hebrew terms, for if the 'crane' of Europe had been meant by either denomination, the clamorous habits of the species would not have been expressed as 'chattering;' and it is most probable that the striking characteristics of that bird, which are so elegantly and forcibly displayed in Hesiod and Aristophanes, would have supplied the lofty diction of prophetic inspiration with associations of a character still more exalted. '*Ardea virgo*' of Linn., the '*Grus virgo*' of later writers, and '*Anthropoides virgo*' of some, is the bird intended by *agur*, though not coming from the north, but from Central Africa, down the Nile, and in the Spring arriving in Palestine, while troops of them proceed to Asia

Minor, and some as far north as the Caspian. This bird is not more than three feet in length; it is of a beautiful bluish grey, with the cheeks, throat, breast, and tips of the long hinder feathers and quills black, and a tuft of delicate white plumes behind each eye. It has a peculiar dancing walk, which gave rise to its French denomination of 'demoiselle.'

CRATES (krā'tez), (Gr. κράτης, *krah'tace*, ruler), a governor of the Cyprians who was left in charge of the castle of Jerusalem during the absence of Sostratus, in the time of Antiochus Epihanes (2 Macc. iv: 29).

CREATION (krē-ā'shūn).

(1) **Old Testament View.** In the ideas implied by this term a subject of vast extent and most profound interest is suggested; at the same time one in reference to which but little can be said to be so certainly known or distinctly understood as to afford adequate satisfaction to that curiosity which is so naturally excited in the human mind with respect to it.

In the first place the doctrine of revelation on this point, in the most general view, is chiefly founded on the simple ascription of the original formation of all things to Divine power, and on the title of the 'Creator' applied to the Deity. This is the constant language of all parts of Scripture, both of the Old and New Testaments; and in the meaning of the term 'create' we must seek the origin of those views which constitute the theological and revealed belief respecting the mode in which the world had its beginning.

The meaning of this word has been commonly associated with the idea of 'making out of nothing,' but when we come to inquire more precisely into the subject, we can of course satisfy ourselves as to the meaning only from an examination of the original phrases.

Now, in the Hebrew Scriptures three distinct verbs are in different places employed with reference to the same Divine act, viz.: *bara*, create; *asah*, make; and *satoar*, form or fashion, and though each of these has its shade of distinction, yet the best critics understand them as so nearly synonymous that, at least in regard to the idea of making out of nothing, little or no foundation for that doctrine can be obtained from the use of the first of these words. They are used *indifferently* and *interchangeably* in many passages; as, e. g. in Is. xliii:7, where they all three occur applied to the same divine act. The Septuagint renders indifferently by ποιέιν, *poi-ein'*, to make, and κτίξεν, *ktidz'ein*, to create. But especially in the account of the Creation in Gen. i the verbs are used irrespectively in verses 7, 16, 21, 25, etc.; and, comparing Gen. i:27 and ii:7, man is said to have been *created*, yet he is also said to have been *formed out of the ground*. Again, in the Decalogue (Exod. xx:11), the verb is *asah'*, made, not *created*. In Gen. i the Septuagint has *ep-oi'ay-sen*, *he made*, throughout.

The word *bara* implies neither positively, on the one hand, a formation out of nothing, nor, on the other, positively a formation out of existing materials, but it is absolutely indefinite and neutral as to either of these conditions. Thus the original expression 'let there be light' (Gen. i:3), by no means *necessarily* implies that light had never before existed. Upon the whole, the only difference between the three verbs lies in the *degree of force* in the expression; *bara*, create, being simply the stronger and more emphatic word to express more forcibly the absolute power of the Creator.

(2) **New Testament View.** In the New Testament we have a similar indifferent use of the

words *to create* and *to make*, in a great number of passages. The former is applied to the origin of the world in Mark xiii:19, and to the formation of man in 1 Cor. xi:9, and in some other places; but most remarkably in Col. i:16. The same word is also applied in a spiritual sense in Eph. ii:10 and other passages, in which the figure clearly involves formation out of what existed before; as also in Eph. iv:24, Col. iii:10, etc. It manifestly implies previous materials in Heb. ix:11, as in the Septuagint version of the corresponding passage in Lev. xvi:16. But more particularly in Rom. i:20, the expression *for the invisible things of him from the creation of the world, etc.*, places in synonym the substantives corresponding to the verbs 'create' and 'fashion' or 'form.'

If from the subject of the *general idea* of creation we turn to that of the particular *mode* in which the 'formation' of existing things (whether the crude material existed previously or not) is represented to have taken place, we find more extensive and express declarations in various parts of the Bible. The sacred writers refer largely to the Divine *will* and the announcement of that will by His *word* as the immediate agent, as in Ps. xxxiii:6, 9, and cxlviii:5; Rev. iv:11, and many other places; and this reference to the Divine *word* is considered by many to be in effect the same with the more direct ascription of the work of creation to the Divine *logos*, *word*, in John i:3; which again is explicitly referred to the Son of God in Eph. iii:9, and Heb. i:2, 3; and again, Col. i:16. These *general* representations of the creation all agree in speaking of it in terms of the most unbounded extent and *universality* of operation. This is observable in the last cited texts, and not less pointedly in Acts xiv:15, and xvii:24; Rev. x:6; besides many others; but it is to be observed, it is not expressed that this universal act took place *at one and the same time*, nor that it was either *instantaneous* or *gradual*. (See ADAM; COSMOGONY; NATURE.)

CREATURE (krē'tūr), (Heb. נֶפֶשׁ, *neh'fesh*, a breathing creature; Gr. κτίσις, *ktis'is*, a making, thing made; κτίσμα, *ktis'mah*, formation, Gen. i:21, 24, etc.).

1. It is a loose or general rendering in the Old Testament for any animal.

2. In the New Testament the word designates, (1) *The whole creation* or any created object or being, e. g. "Every creature of God is good" (1 Tim. iv:4); "Nor height, nor depth, nor any other creature" (Rom. viii:39, etc.). (2) *Humanity* or the whole human race. "Preach the Gospel to every creature" (Mark xvi:15); "The creature was made subject to vanity," etc. (Rom. viii:20, 21). (3) By the *creature* or *creation* that waits for a glorious deliverance into the glorious liberty of the sons of God, some suppose that the Heathen gentiles are meant; but how these were unwillingly made subject to the bondage of corruption, or how they waited and longed for a gospel deliverance, it is difficult to understand. Is it not more easy to represent the *creature*, or *creation*, to be the irrational part of our world, which, by the providence of God, is subjected to vanity for man's sin, and is often used instrumentally in wickedness, and which, at the last day, shall be perfectly delivered from this abuse? (Rom. viii:19-23). (4) The implanted habit or principle of grace, and the man who possesses it, are called a *new creature*; it is formed from nothing by the almighty influence of the word and Spirit of God; it is quite new, and entirely opposite to the old

principle of natural corruption (Gal. vi:15; 2 Cor. v. 17).

CREATURE, LIVING (krē'tūr, liv'ing), (Ezek. i:5; x:15, 17, 20). See CHERUB; CHERUBIM.

CREEK (krēk), (Gr. κόλπος, kol'pos, bosom), a small bay of the sea, e. g., St. Paul's Bay, island of Malta, where the apostle was wrecked (Acts xxvii:39) or a corner of a harbor (Judg. v:17), "abode in his *breaches*" (or *creeks*, Marg.).

CREEPING THING (krēp'ing thing), (Heb. שֶׁחֵרֵץ, sheh'rets, an active mass of minute animals; or, Heb. רֵמֵשׁ, reh'mes, creeping).

Any animal which creeps (Gen. i:24, 25), whether a land or a water reptile (vi:7; Ps. civ:25), and whether crawling on the belly or creeping on four or more feet (Lev. xi:41, 42). It is applied to all the smaller mammalia.

CRESCENS (krēs'senz), (Gr. Κρήσκης, krace'kace, growing; Latin, *crescens*, increasing), an assistant of St. Paul's, and generally supposed to have been one of the seventy disciples of Christ.

It is alleged in the *Apostolical Constitutions* (vii:46), and by the fathers of the church, that he preached the Gospel in Galatia, a fact probably deduced conjecturally from the only text (2 Tim. iv:10) in which his name occurs. There is a less ancient tradition (in Sophronius), according to which Crescens preached, went into Gaul, and became the founder of the church in Vienne; but it probably has no other foundation than the resemblance of the names Galatia and Gallia.

CRETE (krēt), (Gr. Κρήτη, kray'tay, carnal, fleshly), one of the largest islands in the Mediterranean, now called Candia, and by the Turks, Kirid.

It is 160 miles long, but of very unequal width—varying from thirty-five to six miles. It is situated at the entrance of the Archipelago, having the coast of the Morea to the northwest, that of Asia Minor to the northeast, and that of Libya to the south. Great antiquity was affected by the inhabitants, and it has been supposed by some that the island was originally peopled from Egypt; but this is founded on the conclusion that Crete was the Caphthor of Deut. ii:23, etc., and the country of the Philistines, which seems more than doubtful (see CAPHTOR). Surrounded on all sides by the sea, the Cretans were excellent sailors, and their vessels visited all the neighboring coasts. The island was highly prosperous and full of people in very ancient times; this is indicated by its 'hundred cities' alluded to by Homer (*Il.* ii:649). The chief glory of the island, however, lay in its having produced the legislator Mino, whose institutions had such important influence in softening the manners of a barbarous age, especially in Greece. The natives were celebrated as archers. Their character was not of the most favorable description. In short, the ancient notices of their character fully agree with the quotation which St. Paul produces from 'one of their own poets,' in his Epistle to Titus (i:12), who had been left in charge of the Christian church in the island:—"The Cretans are always liars, *eternal liars*, evil beasts, *brutes*,' 'slow bellies,' gorbellies, bellies which take long to fill.

Crete is named in 1 Macc. x:67. But it derives its strongest scriptural interest from the circumstances connected with St. Paul's voyage to Italy. The vessel in which he sailed, being forced out of her course by contrary winds, was driven round the island, instead of keeping the direct course to the north of it. In doing this, the ship first made the promontory of Salmone on the eastern side

of the island, which they passed with difficulty, and took shelter at a place called Fair-Havens, near to which was the city Lasea. But after spending some time at this place, and not finding it, as they supposed, sufficiently secure to winter in, they resolved, contrary to the advice of St. Paul (the season being far advanced), to make for Phœnice, a more commodious harbor on the western part of the island, in attempting which they were driven far out of their course by a furious east wind called Euroclydon, and wrecked on the island of Melita (Acts xxvii).

It is not known who planted Christianity in Crete. If St. Paul did so, it must have been before his first imprisonment, possibly in the course of a visit while he was staying at Corinth or Ephesus. Perhaps the Church in the island had been founded by Christian converts. St. Paul seems to imply from his words to Titus (Tit. i:5), 'For this cause left I thee in Crete,' that he had been to the island. The fact that Titus was left to supply all omissions and appoint elders in every city, shows that the Church had been established long enough to admit the presence of irregularities, and had been imperfectly organized. (C. H. Prichard, *Hastings' Bib. Dict.*)

CRETES (krēts), (Gr. Κρήτες, kray'tes). The word in Acts ii:11 probably refers to Jews and proselytes. "Cretians" is used for the same term (Tit. i:12), applied there to native Greeks. "Cretans" would be better in both passages. The subscription of the Epistle to Titus, A. V., states that it was written to Titus "first bishop of the church of the Cretans."

CRETIANS (krē'shans). See CRETES.

CRIB (krīb), (Heb. אֲבוּסָה, ay-boose', a stall or manger, Prov. xiv:4), the place from which the cattle and horses fed (Is. i:3; Job xxxix:9). In 2 Kings v:23 the word is rendered "bags."

CRICKET (krīk'ēt). See CHARGOL.

CRIMSON (krīm'z'n). See PURPLE, ETC.

CRISPING PINS (krīs'pīng pins), (Heb. כְּרִיפִים, khaw-reet'im, pockets, bags).

These were the reticules carried by Hebrew women. They were often elegant and ornamented (Is. iii:22).

CRISPUS (krīs'pūs), (Gr. Κρίσπος, kris'pos, for Latin *crispus*, curled), chief of the Jewish Synagogue at Corinth (Acts xviii:8), converted by St. Paul (1 Cor. i:14).

According to tradition (*Constitut. Apost.* vii:46) he was afterwards bishop of Ægina. His office shows that he was a Jew, and his foreign name that he had mingled freely with foreign peoples.

CRITICISM AND ARCHÆOLOGY (krīt'ī-sīz'm ānd ār'kē-ōl'ō-jÿ).

(1) **No Real Antagonism.** There is no real antagonism between archæology and literary criticism; on the contrary the archæologist is bound to welcome all literary criticism which is based upon sufficient evidence and is conducted in accordance with a sound method. It prepares the way for the reception of his archæological facts by explaining the meaning and character of the documents to which he applies them. But unfortunately the literary criticism of the Old Testament has come to signify a very different thing, and indeed it has gained notoriety chiefly from the startling and extravagant nature of its results, and the confidence with which it has been put forward, the confidence being in inverse propor-

tion to the solidity of the foundations upon which these statements rest.

(2) **Assumptions.** When we ask for the evidence upon which the unanimous belief of centuries is reversed and the authenticity and trustworthiness of the Old Testament Scriptures are alike denied, we find that it consists almost entirely of a philological analysis made by modern European and American scholars. Passages are torn from their context and assigned to authors who are supposed to have lived centuries after the events which they record took place, if indeed they ever took place at all. And this is done on the strength of a few words or idioms which the philologist assumes to indicate a particular author or particular date. The conclusions which are thus obtained are often supported only by microscopic contradictions detected in the text, many of which are due to the arbitrary interpretations of the critic or by his dogmatic assertion that the statements contained in it are incredible.

(3) **A Dead Language.** In the first place it seems to be forgotten that the Hebrew is a dead language and that the critics are not even modern Orientals who are familiar with Eastern modes of thought and expression.

(4) **Fragmentary Literature.** It is also forgotten that the books of the Old Testament constitute but a fragment of the Hebrew literature that once existed, and that consequently our knowledge of both Hebrew lexicon and grammar are exceedingly imperfect. We are dependent for what we know upon the traditional interpretation of that fraction of it which is contained in the Old Testament.

In a modern case of collaboration it is often impossible to tell which portions were written by each author. How, then, can it be possible to do this in the case of the Hebrew Scriptures which were written so long ago, and in a tongue of which so little is actually known concerning its early uses and idioms?

(5) **A Literary Mosaic.** If the so-called critical method is correct the Pentateuch, instead of being the work of Moses, is a literary mosaic cut from the works of various authors, and so cleverly put together as to deceive even contemporaries and also the Jews, Samaritans and Christians up to the present day. So far from being the earliest portion of the Scriptures upon which the religion of Israel rested, it is claimed that the Law is later than the Prophets and marks a period of real decline. The tabernacle with which it was associated, was also a fiction as much as the revelation on Mount Sinai. Against these conclusions, archæology raises a protest which is daily growing stronger and more emphatic. The position of the "critic" depends largely upon the unavowed assumption that the use of writing for literary purposes was not known among the Israelites until long after the days of Moses. But we now know that this assumption is entirely false. (See ASSYRIAN AND BABYLONIAN LIBRARIES; EGYPT, LITERATURE OF; TEL AMARNA, TABLETS OF.)

(6) **Belonging to Mosaic Age.** Archæological evidences are accumulating to the effect that portions of the Pentateuch *must* belong to the age of Moses. For instance: The tenth chapter of Genesis is a great geographical chart in which we find a record of the nations of the known world, and it is here stated that Canaan was the brother of Mizraim or Egypt. But this could be true only while Canaan was a province of Egypt, as it was during the 18th and 19th Dynasties. After the fall of the 19th Dynasty Canaan was separated from Egypt.

Henceforth Canaan belonged to the geographical zone of Shem. Be it remembered that the 19th Dynasty was the time of the exodus of Israel from Egypt; therefore the historical statements of Genesis are being confirmed by the monuments.

The account of the campaign of Chedorlaomer has also been fully vindicated. (See ARIOCH; CHEDORLAOMER.) It is now plain that the 14th chapter of Genesis, instead of being the late production which some of the critics claimed, must go back to the period when the history of Babylonian supremacy in Palestine was still known. Archæology has verified the names of "Amraphel, king of Shinar," of "Arioch, king of Ellasar," and even "Td'al, king of nations," and also the *Ummam Manda* or "nations" of Kurdistan whom Kudur-Laghamar (Chedorlaomer) arrayed under his banner. Numerous contracts have also been found which are dated in the reigns of Arioch and Amraphel. (See AMRAPHEL.)

(7) **Demonstrations.** Some literary critics having decided that the account in the 14th chapter of Genesis was unhistorical and that the names of the Canaanitish kings were etymological fictions, it was necessary for them to deny the archæological facts which had been produced. Consequently Mr. Pinches, of the British Museum, and other competent Assyriologists were plainly told that they were mistaken in the reading of these names, and that too by men who could not read a word, or decipher a letter of the Assyrian. It was triumphantly stated and repeated anonymously, in various journals, that the name of Kuder-Laghamar especially had a wholly different pronunciation; but unfortunately for their theory their "demonstration" was hardly in print before Dr. Scheil found tablets in the Museum of Constantinople which when deciphered proved to be the letters of "Amraphel, king of Shinar," and had been written after he had thrown off the Elamite yoke. He referred to the Elamite supremacy in Chaldea, and in one of them spoke of the presents which he was sending to a vassal Babylonian prince as a reward for his valor "on the day of Kuder-Laghamar's defeat." This valuable discovery was made in the summer of 1897, and it set at rest any doubts which might have obtained on that subject.

But literary criticism is not inclined to yield without a struggle, and while it now admits the reading of the names, it is urged that the cuneiform documents contain no account of Abraham, and that a fragment of Babylonian history must therefore have been introduced into a mass of fiction. It is forgotten that this "fragment" itself was recently pronounced fiction.

The literary or "higher critic" had also declared that the mention of Salem in the same chapter was an anachronism, but we have learned from the Tel-Amarna tablets that the city of Salem was already important when they were written. (See TEL-AMARNA TABLETS.)

Even the names of Jacob and Joseph have been found by Prof. Pinches in a Babylonian contract tablet belonging to the period of Chedorlaomer, and the name of Abram (Abu-ramu) is in another contract tablet of the same date.

(8) **Other Testimony.** Similar testimony has been found in a papyrus belonging to the 18th Dynasty. Not only is the political situation the same as that pictured in Exodus, but the geography is the same.

The Babylonian account of the deluge presupposes the Biblical account in its integrity. (See DELUGE.)

Scorn has been cast upon the fact that Abraham came from "Ur of the Chaldees." It has been claimed that the family of Terah was Aramean, and not Chaldean; that it belonged to Haran; and that its Chaldean origin was a myth. Ur has been found, however, on the site of Mugheir in Southern Babylonia, and proves to have been the seat of three powerful dynasties, the last of which ruled Babylonia and claimed sovereignty in Canaan only a short time before Abraham was born. Colonies of Canaanitish and Syrian merchants were settled at the time in Babylonia, and a contract which is dated in the time of Amraphel's grandfather is signed by a witness who is called "The son of Abi-ramu" or Abram.

(9) **Illustrations.** Many examples illustrate the life of the people during those long forgotten centuries of Oriental civilization which covered the period during which the Pentateuch was composed, and they also show that the Old Testament is in complete harmony with the facts which are confirmed by archæology.

Neither the history nor the literature of the Old Testament any longer stands alone; the contemporaneous monuments of the nations whose life was intertwined with that of Israel, as well as the literatures which are older than the productions of that people, may be now compared with them.

(10) **Comparative Methods.** The comparative methods of science can at last be employed in the case of the Old Testament Scriptures, and we can test their truthfulness by the external evidence of entirely independent witnesses.

There are large portions of the Old Testament history which can be illustrated only by such research, and not covered by it, portions which from the necessity of the case do not admit of monumental confirmation. The scenes of home life in the history of the patriarchs, for example, can never be the subject of inscriptions. All that archæology can do in such circumstances is to illustrate them from the life of other Orientals and to show that they contain nothing inconsistent with either history or geography.

The wanderings of Israel are not likely to be recorded on monuments, but it can be shown that these wanderings are the necessary interlude between the exodus and the conquest of Canaan, and that for both of these events there is sufficient archæological evidence. (See EXODUS, GEOGRAPHY OF.)

Archæology is the handmaid of the Bible, and not a substitute for it, but it has confirmed our confidence in the historical accuracy of the Old Testament in a two-fold manner: First, by showing the high literary culture of the age to which the books belong; and, secondly, by recent and wholly reliable archæological discoveries which have shown that the doubts which had been cast upon the antiquity and credibility of the Old Testament narratives are wholly unwarranted.

(11) **Menes.** Previous to the spring of 1898 "critical science" had been assuring us that Menes, the reputed founder of the united monarchy of ancient Egypt and leader of the first historical dynasty, was nothing more than a myth. His very name was shown to be an etymological invention of later times, even Maspero claiming that "the Menes of Egyptian tradition was fabulous." (Maspero, *History of Egypt*.)

M. de Morgan, however, the late director of the Antiquities of Egypt, discovered in that year a tomb at Negada, twenty miles north of Thebes, the contents of which are now in the Cairo Museum. Among them are the skull and bones of a king who was buried in the central chamber of

the sepulcher, and there are various archæological indications that these belong to the period which had been pronounced mythical. The tomb appears to have been made for Menes himself, and the very name which had been "proved" to be an invention can now be read in the hieroglyphs on one of the ivory objects now in the Museum at Cairo. (See MENES.)

Another illustration may be found in relation to Grecian history. For a long time the literary critics denied that there was any history in Greece before the age of Solon; but these men have been forced from the field by the excavations of Dr. Schliemann and others, who have verified Greek tradition by clothing the Achæan princes and the kings of Mycenæ with flesh and blood. The remains of Troy have been found, although it had long been declared to have existed only in "cloudland."

We have called this class of men "literary critics" in contrast with those who employ the historic method and rest their conclusions upon historical facts. (See *Fresh Light from the Monuments*, by Prof. A. H. Sayce, LL. D., Oxford University. *Hom. Rev.* 1896, pp. 97, 98. *The Monuments and The Old Testament*. Prof. Ira M. Price.)

CROCODILE (krök'ô-dil). Although the term κροκόδειλος, *lizard, crocodile*, occurs in the Greek version, there is no specific word in the Hebrew of which it is the acknowledged representative. (See DRAGON; LEVIATHAN; WHALE.)

The crocodiles which we have to notice at present consist of three varieties, or perhaps species, all natives of the Nile, distinguishable by the different arrangement of the scutæ or bony studs on the neck, and the number of rows of the same processes along the back. Their general lizard form is too well known to need particular description; but it may be remarked that of the whole family of crocodiles, comprehending the sharp-beaked gavials of India, the alligators of the west, and the crocodiles properly so called, the last are supplied with the most vigorous instruments for swimming, both from the strength and vertical breadth of their tails and from the fingers of their paws having deeper webs. Although all have from thirty to forty teeth in each jaw, shaped like spikes, without breadth so as to cut, or surface so as to admit of grinding, the true crocodile alone has one or more teeth on each side in both jaws, exerted, that is, not closing within but outside the jaw. They have no external ear beyond a follicle of skin, and the eyes have a position above the plane of the head, the pupils being contractile, like those of a cat, and in some having a luminous greenish tinge, which may have suggested the allusion to 'the lids of the morning' (Job xli:18). The upper jaw is not movable, but, as well as the forehead, is extremely dense and bony; the rest of the upper surface being covered with several rows of bosses, or plated ridges, which on the tail are at last reduced from two to one, each scale having a high horny crest, which acts as part of a great fin. Although destitute of a real voice crocodiles when angry produce a snorting sound, something like a deep growl; and occasionally they open the mouth very wide, remain for a time thus exposed facing the breeze, and, closing the jaws with a sudden snap, cause a report like the fall of a trap-door. The gullet of the crocodile is very wide, the tongue being completely tied to the lower jaw; and beneath it are glands exuding a musky substance. On land the crocodile, next to the gavial, is the most active, and in the water it is also the species that most readily frequents

the open sea. Of the immense number of genera which we have seen or examined, none reached to 25 feet in length, and we believe the specimen in the vaults of the British Museum to be one of the largest. Sheep are observed to be unmolested by these animals; but where they abound, no pigs can be kept, perhaps from these frequenting the muddy shores; for we have known only one instance of crocodiles being encountered in woods not immediately close to the water's side: usually they bask on sandy islands. As their teeth are long, but not fitted for cutting, they seize their prey, which they cannot masticate, and swallow it nearly entire, or bury it beneath the waves to macerate. Having very small excretory organs, their digestion requires, and accordingly they are found to possess, an immense biliary apparatus. They are oviparous, burying their eggs in the sand; and the female remains in the vicinity to dig them out on the day the young have broken the shell. Crocodiles are caught with hooks, and they seldom succeed in cutting the rope when properly prepared. Crocodiles and alligators take the sea, and are found on islands many leagues distant from other land. The fact is particularly notable at the Grand Caymanas, in the sea of Mexico, which is almost destitute of fresh water. It is indeed owing to this circumstance that the same species may frequent all the rivers of a great extent of coast, as is the case with some found in Africa, whence they spread to India and the Malayan islands.

CROOKBACKED (krōok'bāk't), (Heb. גִּבְבָּנִי, *gibbane'*, to be arched, or contracted). A humpback (Lev. xxi:20, 21). One with this infirmity could not serve as priest.

CROP (krōp), (Heb. מֹרְאָו', *moor-aw'*, conspicuous), this part of the bird was cast with its feathers among the ashes at the side of the altar of sacrifice, and not burned with the rest of the fowl (Lev. i.16).

CROSS (krōs), (Gr. σταυρός *stauw-ros'*).

(1) **Origin and Form.** This word is derived from the Latin *crux*. Respecting the origin of its Greek representative there is some diversity of opinion. According to Eustathius and Hesychius, the Greek *stauros*, *cross*, is so called from its standing erect, or from its standing with its arms horizontal. Latin etymologists also derive the word from the Greek word *his'-tay-mec*, to place. In its general acceptation the cross is an instrument of punishment, and, metaphorically, punishment itself, as well as the pain which it inflicts, and generally any severe suffering or heavy trial. Instead of *stauros* the Greek word *skolops*, *stake*, is sometimes found as equivalent to the Latin *crux*.

In its simplest form, consisting of two pieces of wood, one standing erect, the other *crossing* it at right angles, the cross was known at an early age in the history of the world. Its use as an instrument of punishment was probably suggested by the shape so often taken by branches of trees, which seem to have been the first crosses that were employed. Trees are known to have been used as crosses (Tertull. *Ap.* viii:16), and to every kind of hanging which bore a resemblance to crucifixion, such as that of Prometheus, Andromeda, etc., the name was commonly applied. Among the Scythians, Persians, Carthaginians, Greeks, Romans, and the ancient Germans, traces are found of the cross as an instrument of punishment.

(2) **The Simple Cross.** According to Lipsius and Gretser there were in general two kinds of crosses: (1) *Crux simplex* and (2) *crux com-*

posita or *compacta*. The first consisted of a stake on which the criminal was fastened or by which he was impaled. For the first kind of punishment a tree or a specially prepared stake was used, on which the criminal was bound, and either left to perish or immediately put to death. For *impaling* (*infixio*) a long and sharpened piece of wood (*pale*) was employed, on which the criminal was put as on a spit.

(3) **The Compound Cross.** Of the *crux composita* or *compound cross* there were three sorts: 1, *crux decussata*; 2, *crux commissa*; 3, *crux immissa*. The *crux decussata* is also called Andrew's cross, because tradition reports that on a cross of this kind the Apostle Andrew suffered death. Jerome (*Comment. on Jerem.* c:31) describes this cross, saying in effect that the name indicates two lines cutting each other after the manner of the letter X. So Isidorus Hisp. (*Orig.* 1, 1, 3) says that the letter X denotes a cross and the number ten.

The classic work upon the cross and the crucifixion of Jesus is Justus Lipsius's (d. 1606) *De Cruce*, 1595.

(4) **The Crux Commissa.** The *crux commissa*, Lipsius states, was formed by putting a cross piece of wood on a perpendicular one, so that no part of the latter may stand above the former. Of the *crux immissa*, or, as others prefer to term it, *crux capitata*, the following is given as the description:—a cross in which the longer piece of wood or pale stands above the shorter piece which runs across it near the top. It is distinguished from the preceding by the part of the longer beam which is above the shorter or transverse. This form is found in paintings more frequently than any other, and on a cross of this kind our Saviour is believed by Lipsius to have suffered death. But in 1878, Herman Fulda, pastor near Halle, Germany, issued a work entitled *Das Kreuz und die Kreuzigung*, which maintains that Lipsius and all his followers are wrong. This statement he fortifies by a fresh examination of the sources. According to Fulda, the cross of Jesus was a post. His hands were nailed on either side of it; his feet, the knees being much bent, were fastened by a stout cord to this post, but not nailed, and they, together with the nailed hands, supported the body. Owing to haste, he deems it probable that the customary "seat" fastened to the cross as a partial support was wanting. Fulda finds in this extremely painful position one reason for the speedy death of Jesus, which occasioned Pilate's incredulity. (See CRUCIFIXION.)

The three forms of the cross enlarged are as follows (the first is the usual form; the second is probably the oldest).

Three Forms of the Cross.

1. Usual Form of Cross.
2. Probably Oldest Form of Cross.
3. St. Andrew's Cross.

(5) **Emblem.** The sign of the cross is found as a holy symbol among several ancient nations, who may accordingly be named, in the language of

Tertullian, *crucis religiosos*, devotees of the cross, Among the Indians and Egyptians the cross often appears in their ceremonies, sometimes in the shape of the letter T, at others in the usual form of the Roman Cross. At Susa, Ker Porter saw a stone cut with hieroglyphics and cuneiform inscriptions, on which in one corner was a figure of a cross, thus . The cross, he says, is generally understood to be symbolical of the divinity or eternal life, and certainly a cross was to be seen in the temple of Serapis as the Egyptian emblem of the future life, as may be learnt in Sozomen and Rufinus. Porter also states that the Egyptian priests urged its being found on the walls of their temple of Serapis, as an argument with the victorious army of Theodosius to save it from destruction. From the numerous writings on this subject by La Croze, Jablonski, Zoega, Visconti, Pococke, Pluehe, Petit Radel, and others, the symbol of the cross appears to have been most various in its significations. Sometimes it is the Phallus, sometimes the planet Venus, or the Nilometer, or an emblem of the four elements, or the seasons (Creuzer's *Symbolik*, pp. 168-9). It is not therefore surprising that ancient and even modern Christian writers should on this subject have indulged in some degree of refinement and mysticism. Justin Martyr (*Apol.* i:72) says: 'The sign of the cross is impressed upon the whole of nature. There is hardly a handiworkman but uses the figure of it among the implements of his industry. It forms a part of man himself, as may be seen when he raises his hands in prayer.' In like manner Minutius Felix (c:29): 'Even nature itself seems to have formed this figure for us. We have a natural cross on every ship whose sails are spread, in every yoke that man forms, in every outspreading of his arms in prayer. Thus is the cross found both in the arrangements of nature, and among the heathen.' (See *Phallic Worship*, Robt. Allen Campbell.)

(6) Alleged Discovery of the Cross of Christ.

Of the cross on which Jesus was crucified four ecclesiastical historians (Socrates, i:13; Sozomen, ii:1; Rufinus, i:7; Theodoret, i:18) concur in stating that it was found by the Empress Helena, mother of Constantine the Great. This event is assigned to the year of our Lord 326. Eusebius is silent on the discovery.

"Having built a church over the sacred spot, Helena is reputed to have deposited within it the chief part of the real cross. The remainder she conveyed to Constantinople, a part of which Constantine inserted in the head of a statue of himself, and the other part was sent to Rome, and placed in the church of Sta. Croce in Jerusalem, which was built expressly to receive the precious relic. When subsequently a festival to commemorate the discovery had been established, the Bishop of Jerusalem, on Easter Sunday, exhibited to the grateful eyes of eager pilgrims the object to see which they had traveled so far, and endured so much. Those who were persons of substance were further gratified by obtaining, at their full price, small pieces of the cross set in gold and gems; and that wonder might not pass into incredulity, the proper authorities gave the world an assurance that the holy wood possessed the power of self-multiplication, and, notwithstanding the innumerable pieces which had been taken from it for the pleasure and service of the faithful, remained intact and entire as at the first."

The capture of Jerusalem by the Persians, A. D. 614, placed the remains of the cross in the hands of Chosroes II., who mockingly conveyed them to his capital. Fourteen years afterwards, Heraclius

recovered them, and had them carried first to Constantinople, and then to Jerusalem, in such pomp that on his arrival before the latter city he found the gate barred, and entrance forbidden. Instructed as to the cause of this hindrance, the Emperor laid aside the trappings of his greatness, and, barefooted, bore on his own shoulders the sacred relic up to the gate, which then opened of itself, and allowed him to enter, and thus place his charge beneath the dome of the sepulcher.

The figure of a cross has often been represented on the banners of contending armies, thus:

Cross of Constantine.

Figurative. (1) Troubles and afflictions, chiefly those endured for Christ, are called a *cross*; they are painful, lingering, and attended with shame in the view of carnal men: and to *take up this cross* is cheerfully to submit to it, from love to Christ (Matt. xvi:24). (2) The whole sufferings of Christ are called his *cross*, as on it he suffered in the most excruciating manner, in both soul and body at once (Eph. ii:16; Heb. xii:2). (3) The doctrine of his sufferings is called his *cross*. (1 Cor. i:18; Gal. v:11, and vi:12.) (4) Enemies to his *cross* are such as undermine the necessity or virtue of his righteousness by their legal doctrine, worldly care, or licentious life, Phil. iii:18.

CROW (krō). See RAVEN.

CROWN (kroun), (Heb. , *neh'zer*, literally, something set apart, consecration; hence, consecrated or dedicated hair, as of a Nazarite), is supposed to mean a diadem. (Heb. , *at-aw-rav'*, crown.)

Crowns are often mentioned in Scripture and in such a manner as in most cases to indicate the circumstances under which, and the persons by whom, they were worn; for they were less exclusively worn by sovereigns than among modern nations. Perhaps it would be better to say that the term 'crowns' was applied to other ornaments for the head than those exclusively worn by royal personages, and to which modern usage would give such distinctive names as coronet, band, miter, tiara, garland, etc.

(1) **Origin.** The royal crown originated in the diadem, which was a simple fillet fastened round the head, and tied behind. This obviously took its rise among a people who wore long hair, and used a band to prevent it from falling over the

face. The idea occurred of distinguishing kings by a fillet of different color from that usually worn; and being thus established as a regal distinction, it continued to be used as such even among nations who did not wear the hair long, or was employed to confine the head-dress. We sometimes see this diadem as a simple fillet, about two inches broad, fastened round the otherwise bare head; we then find it as a band of gold. In this shape it sometimes forms the basis of raised ornamental work, in which case it becomes what we should consider a crown; and indeed the original diadem may be traced in most ancient crowns. Then we find the diadem surrounding the head-dress or cap (figs. 3, 9, 13), and when this also is ornamented, the diadem may be considered as having become a crown. The word *nezer* is supposed to denote a diadem. It is applied to the inscribed plate of gold in front of the high-priest's miter, which was tied behind by a ribbon (Exod. xxix:6; xxxix:30). This word is also employed to denote the diadem which Saul wore in battle, and which was brought to David (2 Sam. i:10), and also that which was used at the coronation of the young Joash (2 Kings xi:12),

(Rev. xii:3; xix:12) to the wearing of two or three fillets as a diadem. These fillets may have been significant of dominion over Lower and Upper Egypt, and Lower and Upper Egypt and

Ancient Egyptian Crowns.

Asia. These Egyptian tiaras were worn in war and on occasions of state; but on ordinary occasions a fillet or diadem was used.

(3) **Miter of the High Priest.** It is important to observe that the miter of the high-priest, which is also called a crown (Exod. xxxix:30), was of similar construction, if not shape, with the addition of the golden fillet or diadem. Similar also in construction and material, though not in form, was the ancient Persian crown, for which there is a distinct name in the book of Esther (i:2; ii:17; vi:8), viz., *kéther*, which was doubtless the *kidaris* or *kitaris* (*the high cap or tiara*) so often mentioned by the Greek historians. From the descriptions given of it, this seems to have been a somewhat conical cap, surrounded by a wreath or fold. This one is worthy of very particular attention, because it forms a connecting link between the ancient and modern Oriental crowns, the latter consisting either of a cap, with a fold or turban, variously enriched with aigrettes, or of a stiff cap of cloth, studded with precious stones.

Crowns were so often used symbolically to express honor and power that it is not always safe to infer national usages from the passages in which they occur. Hence we could scarcely conclude from Ezek. xxiii:42 that crowns were worn by Jewish females, although that they wore some ornament which might be so called is probable from other sources. Mr. Lane (*Arabian Nights*, i. 424) mentions that until about two centuries ago a kind of crown was worn by Arabian females of wealth and distinction. It was generally a circle of jeweled gold (the lower edge of which was straight, and the upper fancifully heightened to a mere point), surmounting the lower part of a dome-shaped cap, with a jewel or some other ornament at the summit.

It is certain that 'crowns' of this or some similar kind were worn at marriages (Cant. iii:11; Is. lxi:10); and it would appear that at feasts and public festivals 'crowns of rejoicing' were customary. These were probably garlands (Wisd. ii:8; iv:2; Eccclus. i:11).

Figurative. (1) The crown was a symbol of victory and reward, victors being crowned in the Grecian or Olympic games. These crowns were usually made of leaves, which soon began to wither. They are more than once alluded to in the epistles (1 Cor. ix:25; 2 Tim. ii:5; iv:8;

Ancient Asiatic Crowns.

and, as another word is applied elsewhere to the crown used in this ceremonial, the probability is that the Hebrew kings wore sometimes a diadem and sometimes a crown, and that the diadem only was accessible to the high-priest, by whom Joash was crowned, the crown itself being most likely in the possession of Athaliah. As Ps. lxxxix was certainly composed by David, the regal use of the diadem is further indicated in verse 39.

The more general word for a crown is *atarah*; and it is applied to crowns and head ornaments of different sorts, including those used by the kings. When applied to their crowns, it appears to denote the state crown as distinguished from the diadem. This, the Rabbins allege, was of gold set with jewels; such was the crown which David took from the king of the Amorites (2 Sam. xii:30), and afterwards wore himself, as did probably his successors.

(2) **Early Sculptures.** In Egypt and Persia there are sculptures representing royal crowns in the shape of a distinguishing tiara, cap, or helmet, of metal, and of cloth, or partly cloth and partly metal. There are allusions in Scripture

1 Pet. v:4) and contrasted with the incorruptible crown of life. (2) Anything that adds honor and glory to one. Thus the Lord was a *crown of glory and a diadem of beauty* to Judah; he protected, exalted, and reformed them, when the ten tribes were carried into captivity (Is. xxviii:5, with 2 Chron. xxix-xxxiii). (3) The church is a *crown of glory, and royal diadem* to God; in her, his glory, power, and authority are clearly displayed (Is. lxii:3; Zech. ix:16). (4) Christ's *crown of gold, his many crowns*, are the mediatorial power, authority, and glory assigned him by his Father; his manifold victories and high sovereignty, and the ascription of all praise and honor to him by the church (Ps. cxxxii:18; Rev. xix:12; Cant. iii:11). (5) The church's *crown of twelve stars* is her heavenly, illumining, and directing doctrines of the prophets and apostles, which are her honor, and mark her royal state and marriage with Christ (Rev. xii:1). (6) Saints are a *crown* to ministers; are the ornament and honor of their labors (Phil. iv:1; 1 Thess ii:19). (7) The saint's *crown of glory, life, and righteousness* is that royal and truly honorable state of glory, life, and holiness given them through the righteousness of Jesus Christ (Rev. iii:11, and ii:10; 1 Pet. v:4; 2 Tim. iv:8). (8) The saints *cast their crowns* before God's throne; they undervalue themselves, and all they have, in comparison of him; and ascribe their whole existence, holiness, and happiness to Christ, and to God in him (Rev. iv:4, 10). (9) A good wife is a *crown*, and honor, and cause of wealth and power to her husband (Prov. xii:4). (10) So are children a *crown* to their parents (Prov. xvii:6). (11) A *hoary head, or gray hairs*, is a *crown*; an honorable badge of wisdom and authority (Prov. xx:29, and xvi:31). (12) *Riches are a crown to the wise*, as they gain and expend them honorably (Prov. xiv:24). (13) Honor, wealth, and authority are called a *crown* (Prov. xvii:6, xxvii:24, and iv:9).

CROWN OF THORNS (kroun ðv thõrns), (Gr. στέφανον ἐξ ἀκανθῶν).

The Roman soldiers made a crown probably out of a common Arabian plant, called *nabk*, which has "many small and sharp spines, soft, round, pliant branches, leaves much resembling ivy, of a very deep green, as if in designed mockery of a victor's wreath."—*Hasselquist*, quoted in *AYRE: Treasury of Bible Knowledge*. The soldiers plaited the wreath for Christ rather as an insult than to cause suffering. (See THORN.)

CRUCIFIXION (kru' sī-fik'shūn), in Greek ἀνασταυροῦν, *an-as-tou-roon'*; in Latin, *cruci affigere, in cruce agere or tollere*; in later times *cruci figere*, whence our crucifixion.

To describe this punishment the Jews used the general term תַּלְוָה, *tarw-law'*, for crucifixion is a kind of hanging; whence Christ in the polemical writings of the Jews is designated "the hanged one," and Christians "worshippers of the crucified."

(1) **Cruel and Disgraceful.** Crucifixion was a most cruel and disgraceful punishment. It was the punishment chiefly of slaves; accordingly the word *furcifer*, 'cross-bearer,' was a term of reproach for slaves, and the punishment is termed *servile supplicium*, 'a slave's punishment.' Free-born persons also suffered crucifixion, but only *humiles*, those of low condition and provincials. Citizens could not be crucified (Cic. *Verr.* i:5; Quintil. viii:4; Suet. *Galb.*). This punishment was reserved for the greatest crimes, as robbery, piracy, assassination, perjury, sedition, treason,

and (in the case of soldiers) desertion. Its origin is ancient. In Thucydides we read of Inarus, an African king, who was crucified by the Egyptians. The similar fate of Polycrates, who suffered under the Persians, is detailed by Herodotus, who adds, in the same book, that no less than 300 persons were condemned to the cross by Darius, after his successful siege of Babylon. That the Greeks adopted it is plain from the cruel executions which Alexander ordered after the capture of Tyre, when 2,000 captives were nailed to crosses along the sea-shore (Q. Curtius, iv:4; Justin, xviii:3). With the Romans it was used under their early monarchical government, and was the death to which Horatius was adjudged for the stern and savage murder of his sister (Liv. i:26), where the terms employed show that the punishment was not at that time limited to any rank or condition. It appears also from the passage that scourging then preceded crucifixion, as undoubtedly was customary in later times. The column to which Jesus was fastened during this cruel infliction is stated by Jerome (*Epist. ad Eustach.*) to have existed in his time in the portico of the holy sepulcher, and to have retained marks of his blood. The Jews received the punishment of crucifixion from the Romans (Joseph. *Antiq.* xii:14, 2; xx:6, 2; *De Bell. Jud.* ii:12). Though it has been a matter of debate, yet it appears clear that crucifixion, properly so called, was not originally a Hebrew punishment. (Bermittii, *De cruce num. Ebræor. supp. fuerit.*)

(2) **Method.** The condemned, after having been scourged (Liv. xxxvi:26; Prud. *Enchir.* xli:1), had to bear his cross, or at least the transverse beam, to the place of execution, which was generally in some frequented place without the city. The cross itself, or the upright beam, was fixed in the ground. Arrived at the spot the delinquent was supplied with an intoxicating drink, made of myrrh and other bitter herbs (Pipping, *Exercit. Acad.* iv), and having been stripped of his clothing, was raised and affixed to the cross, by nails driven into his hands, and more rarely into his feet; sometimes the feet were fastened by one nail driven through both. The feet were occasionally bound to the cross by cords, and Xenophon asserts that it was usual among the Egyptians to bind in this manner not only the feet but the hands. A small tablet (*titulus*), declaring the crime, was placed on the top of the cross (Sueton. *Cal.* 38; *Dom.* 10; Euseb. *Hist. Eccles.* v:1). The body of the crucified person rested on a sort of seat, stage (Iren. *Adv. Her.* ii:42). The criminal died under the most frightful sufferings—so great that even amid the raging passions of war pity was sometimes excited (Comp. p. 472, above).

(3) **Disposal of the Body.** Sometimes the suffering was shortened and abated by breaking the legs of the criminal—*crura fracta* (Cic. *Phil.* xiii:12). After death, among the heathens, the bodies commonly remained on the cross till they wasted away, or were devoured by birds of prey (Horat. *Epist.* i:16, 48; *Non pasces in cruce corvos*; Plaut. *Mil. Glor.* ii:4, 19; Plin. *Hist. Nat.* xxxvi:24). A military guard was set near the cross, to prevent the corpse from being taken away for burial (Plut. *Cleomen.* 39; Petron. *Satyr.* iii:6; Sen. *Ep.* 101). But among the Jews the dead body was customarily taken down and buried. Josephus says (*De Bell. Jud.* v:2), 'the Jews used to take so much care of the burial of men that they took down those that were condemned and crucified, and buried them before the going down of the sun.' In order that death might be hastened, and the law might not be vio-

lated, the Jews were accustomed to break the legs (John xix:31, 32, 33; Deut. xxi:22; Lipsius, *De Cruc.* lib. iii). The execution took place at the hands of the *carnifex*, or hangman, attended by a band of soldiers, and in Rome, under the supervision of the *Triumviri Capiales* (Tac. *Ann.* xv:60; Lactan. iv:26). The accounts given in the Gospels of the execution of Jesus Christ are in entire agreement with the customs and practices of the Romans in this particular (Tholuck, *Glaubwürdigkeit der Evangel. Gesch.* p. 361).

(4) **Abolition.** The punishment continued in the Roman empire till the time of Constantine, when it was abolished through the influence of the Christian religion. Examples of it are found in the early part of the emperor's reign, but the reverence which, at a later period, he was led to feel for the cross, induced him to put an end to the inhuman practice.

CRUCIFIXION, DEATH BY (krü'si'fik'shün, dëth bī).

(1) **Causes.** Physically considered it is to be attributed to the sympathetic fever which is excited by the wounds, and aggravated by exposure to the weather, privation of water, and the painfully constrained position of the body. Traumatic fever corresponds, in intensity and in character, to the local inflammation of the wound. In the first stage, while the inflammation of the wound is characterized by heat, swelling, and great pain, the fever is highly inflammatory; and the sufferer complains of heat, throbbing headache, intense thirst, restlessness, and anxiety. As soon as suppuration sets in, the fever somewhat abates, and gradually ceases as suppuration diminishes and the stage of cicatrization approaches. But if the wound be prevented from healing, and suppuration continue, the fever assumes a hectic character, and will sooner or later exhaust the powers of life. When, however, the inflammation of the wound is so intense as to produce mortification, nervous depression is the immediate consequence; and if the cause of this excessive inflammation of the wound still continues, as is the case in crucifixion, the sufferer rapidly sinks. He is no longer sensible of pain, but his anxiety and sense of prostration are excessive; hiccup supervenes, his skin is moistened with a cold, clammy sweat, and death ensues. It is in this manner that death on the cross must have taken place in an ordinarily healthy constitution. The wounds in themselves were not fatal; but, as long as the nails remained in them, the inflammation must have increased in intensity until it produced gangrene.

(2) **Instances.** De la Condamine witnessed the crucifixion of two women of those fanatic Jansenists called Convulsionnaires. One of them, who had been crucified thrice before, remained on the cross for three hours. They suffered most pain from the operation of extracting the nails; and it was not until then that they lost more than a few drops of blood from their wounds. After they were taken down, they seemed to suffer little, and speedily recovered (*Correspond. de Grimm et Diderot*, ii:75).

(3) **Probable Recovery.** The probabilities of recovery after crucifixion would of course depend on the degree of constitutional irritation that had been already excited. Josephus (*Vita*, 74) relates that of three of his friends, for whom he had obtained a release from the cross, only one survived. The period at which death occurred was very variable, as it depended on the constitution of the sufferer, as well as on the degree of exposure and the state of the weather. It may,

however, be asserted that death would not take place until the local inflammation had run its course; and though this process may be much hastened by fatigue and the alternate exposure to the rays of the sun and the cold night air, it is not completed before forty-eight hours, under ordinary circumstances, and in healthy constitutions; so that we may consider thirty-six hours to be the earliest period at which crucifixion would occasion death in a healthy adult.

(4) **Hunger and Thirst.** Eusebius (*Hist. Eccles.* iii:8) says that many of the martyrs in Egypt, who were crucified with their heads downwards, perished by hunger. This assertion, however, must not be misunderstood. It was very natural to suppose that hunger was the cause of death when it was known that no food had been taken, and when, as must have happened in lingering cases of crucifixion, the body was seen to be emaciated. But it has been shown above that the nails in the hands and feet must inevitably have given rise to such a degree of inflammation as to produce mortification, and ultimately death; and it is equally certain that food would not, under such circumstances, have contributed to support life. Moreover, it may be added that after the first few hours, as soon as fever had been fully excited, the sufferer would lose all desire for food. The want of water was a much more important privation. It must have caused the sufferer inexpressible anguish, and have contributed in no slight degree to hasten death.

Figurative. (1) Christ is *crucified afresh*, when his person or office is despised, hated, and blasphemed, or his righteousness and gospel utterly rejected (Heb. vi:6). (2) He is *crucified at Rome*, or in the Antichristian state, when his person and office are despised, his truth perverted, his righteousness blasphemed, and his people murdered (Rev. xi:8). (3) The saints are *crucified with Christ*; in his death he represented them, and, applied to their conscience, this renders them dead to the law, to sin, and to the world, and gradually effects the death of their indwelling corruptions (Gal. ii:20). (4) Their old man, or corrupt lusts, are *crucified with him*; the law, which is the strength of sin, being slain by his fulfilment of it; and by their union with his person, and sharing of the views and virtue of his dying love, their indwelling sin is gradually weakened, and they are enabled through the Spirit to mortify the deeds of it (Rom. vi:6; Gal. v:24). (5) By him and his cross they are *crucified to the world, and the world to them*; by their professed cleaving to him, and the doctrine of his cross, they become contemptible to wicked and worldly men, and are separated from them (Gal. vi:14).

CRUELTIES (krü'ël-tīz).

The law given through Moses has been denounced as being unnecessarily severe, but law is always stern and uncompromising, and a wayward people numbering more than six hundred thousand men besides women and children, were not to be trained in everything pertaining to their own welfare without strict military discipline.

(1) **Less Cruel Than English Code.** The Mosaic law, however, was less severe than was that of England even in the eighteenth century. The code which was given to Israel mentions only about seventeen capital crimes, while English law in the time of Blackstone (1723-1780) specifies no less than one hundred and sixty offenses which were by act of Parliament declared worthy of instant death. (See Blackstone's *Com.* iv:4, 15-18, Christian's Edition, N. Y., 1822.)

The law itself then was less cruel than was that of England at a time when Great Britain was the most civilized nation on the globe.

(2) **Vigorous Warfare.** In relation to the vigorous warfare which Israel waged upon the peoples around them it is certain that in one or two cases, future civilization depended upon the extirpation of moral lepers, for even idolatry was sometimes the most innocent of their loathsome crimes. In cases like this, death was the most merciful thing that could come to the children, even though it came by the tempest or by the sword, for they were poisoned by an heredity which would have made life a curse to themselves and to all around them. In exterminating a nest of serpents one does not stop to enquire which members of the family may at that particular time be innocent.

A child who might witness a surgical operation would be able to see only the most barbarous cruelty in the action of the surgeon in removing a limb, in order that the whole body might not be poisoned by its presence. So also men often judge of God's penalties without a knowledge of future or even of present necessities. Would it not be better to suspend judgment in cases where we know so little of far-reaching results?

(3) **The Amalekites.** The bloodthirsty Amalekites had hung along the line of the march and murdered in cold blood all who were unable to keep up with the main column of the Israelites, those who were old and feeble, or faint with weariness falling into their hands. And it appears that this was done not merely for the purpose of robbery or of disputing the possession of this district with the Hebrews, but to assail Israel as the nation which God had chosen to work out His purpose, and if possible to destroy it (Deut. xxv: 17, 18).

Hence the order was given for the practical extermination of a race in which there was found no good thing. And Israel being used as the executor of the Divine penalty learned to avoid the abominations for which they were cut off. "*Not for thy righteousness or the uprightness of thy heart, dost thou go to possess their land, but for the wickedness of these nations, the Lord thy God doth drive them out from before thee*" (Deut. ix:1-6).

(4) **The Canaanites.** Another illustration may be found in the conduct of the Canaanites. They were in the habit of practicing the most loathsome vices (Lev. xviii:22-24) and even burned their children in honor of their gods. Such was their depravity that the land is represented as "vomiting out her inhabitants."

The command to destroy a race which had become utterly unworthy of life, laid upon the people the awful responsibility of becoming the Divine instruments of justice, and they thus learned God's abhorrence for that class of crimes.

In speaking of the terrible and bloody measures which were employed by Cromwell in relation to the Irish insurgents, Carlyle says:

"An armed soldier, solemnly conscious to himself that he is the soldier of God, the Just, a consciousness which it well beseems all soldiers to have always,—an armed soldier, terrible as death, relentless as doom; doing God's judgments on the enemies of God! It is not a phenomenon of a joyful but of an awful nature." (*Cromwell's Letters and Speeches*, ii:53. Second edition.) Ewald, the great German critic, in relation to this subject, writes as follows: "It is an eternal necessity that a nation, such as a great majority of the Canaan-

ites then were, sinking deeper and deeper into the slough of discord and moral perversity, must fall before a people roused to a higher life." (*Hist. of Israel* ii:237.)

Note also the following from Dr. Thomas Arnold: "If we are inclined to think that God dealt hardly with the people of Canaan, let us think what might have been the fate of every other nation under heaven at this hour had the sword done its work more sparingly....The Israelites' sword in its bloodiest execution, wrought a work of mercy for all the countries of the earth to the very end of the world....Whatever were the faults of Jephthah or of Samson, never yet were any men engaged in a cause more important to the whole world's welfare." (Ser. iv. *Wars of the Israelites*.)

(5) **The Midianites.** Another forcible illustration of the actual necessity of cutting off at least the male line of a corrupt people is found in the case of the Midianites.

Here we find a people so vile that *the mothers* decked their virgin daughters in their gayest apparel, and sent them into the neighborhood of the Israelites with full instructions how to win the attention and admiration of the soldiers and then seduce them into wickedness and idolatry. (Josephus *Antiq.* Bk. iv, Ch. vi, Sec. 6. According to Reland this story is also preserved in the Samaritan Chronicle and by Philo.)

It was by means of their intercourse with this people that the plague came among the Israelites and cost twenty-four thousand lives (Num. xxv: 9). What wonder then that the order was given for the virtual extermination of the race?

And yet Moses saved the girls who were still innocent, and they were taken into service in the Israelitish households, but no man was allowed to even marry a captive without at least a month of delay, during which time she might be won (Deut. xxi:12).

We have seen that in these extreme cases no quarter was given on account of the indescribable "abominations" of the people, but the general rule was the taking of captives and their humane treatment. "And he answered thou shalt not smite them; would'st thou smite those whom thou hast taken captive with thy sword and thy bow? Set bread and water before them that they may eat and drink and go to their master" (2 Kings, vi:22. Also 2 Chron. xxviii:15).

Thus the apparent cruelty of God is ever the necessary severity of the surgeon's knife, but shortsighted men too often sit in judgment upon the nature of the act, without taking into consideration either the necessity for it or the ultimate and probably incalculable good to be derived from it.

Shall we venture to question the wisdom of Him "whose ways are past finding out?" "Justice and judgment are the habitation of His throne," and though to us his ways may be at times surrounded with clouds and darkness, still "His tender mercies are over all His works." E. A. R.

CRUSE (krus). Three Hebrew words are thus translated:

(1) *Tsap-pakh'ath* (צַפְפָּחַת), literally, spread out), commonly thought to be a *flask*, but more likely a shallow *cup* for holding water (1 Sam. xxvi:11, 12).

(2) *Bak-book'* (בַּקְבֹּקֶב), so called from the *gurgling* sound in emptying (1 Kings xiv:3), perhaps an "earthen bottle" for holding liquids (Jer. xix:1, 10).

(3) *Tsel-o-kheeth'* (תְּלֵהֶת), probably a flat metal saucer of the form still to be found in the East. It occurs in 2 Chron. xxxv:13. (See BOTTLE; DISH; PITCHER.)

CRYSTAL (kris'tal), (Heb. קְרַח, *keh'rakh*, *kerach*, and גַּבִּישׁ, *gaw'beesh*, both rendered in the Sept. by κρύσταλλος, *kroos'tal-los*, ice, which also occurs in Rev. xxi:11).

There seems to be no doubt that crystal is intended by the Greek word in Rev. xxi:11, as indeed the phrase of comparison 'clear as crystal' would seem naturally to suggest. It is not very certain, nor very likely, that the Hebrew word *gabish* (Job xxviii:17) means crystal; but as the other word so rendered (*kerach*) denotes ice, to which crystal bears so much external resemblance; and as in Ezek. i:22 it occurs with an application so similar to the κρύσταλλος, *crystal*, of Rev. xxi:11, we may with much confidence take this to be its meaning. This is the more apparent when we recollect that crystal was anciently held to be only pure water, congealed by great length of time into ice harder than the common (Diod. Sic. ii:52; Plin. *Hist. Nat.* xxxvii:2), and hence the Greek word for it, in its more proper signification, also signifies ice. From this it necessarily followed that crystal could only be produced in the regions of perpetual ice; and this was accordingly the ancient belief; but we now know that it is found in the warmest regions. Theophrastus (54) reckons crystal among the pellucid stones used for engraved seals. In common parlance we apply the term *crystal* (as the ancients apparently did) to a glass-like transparent stone, commonly of a hexagonal form, which, from being found in rocks, is called by mineralogists rock-crystal. It is a stone of the flint family, the most refined kind of quartz.

CUB (küb), (A. V. כּוּב, *kub*). Name of a people in alliance with Egypt in the time of Nebuchadnezzar (B. C. 610). Probably *Nub*. The Seventy seem to read *Lub*, i. e., *Libya*.

CUBIT (kü'bīt), (Heb. אַמְמָה, *am-maw'*; Gr. πῆχυς, *pay'khoos*, the forearm), a word derived immediately from the Latin *cubitus*, the lower arm.

The length of the cubit has varied in different nations, and at different times. Derived as the measure is from a part of the human body, and as the human stature has been of very dissimilar length, the cubit must of necessity have been various. That the cubit *ammah*, among the Hebrews was derived as a measure from the human body, is clear from Deut. iii:11—'after the cubit of a man.' But it is difficult to determine whether this cubit was understood as extending to the wrist or the end of the third finger. As however the latter seems most natural, since men, when ignorant of anatomy, and seeking in their own frames standards of measure, were likely to take both the entire foot and the entire fore-arm, the probability is that the longer was the original cubit, namely, the length from the elbow to the extremity of the longest finger. The Egyptian cubit, which it is likely the Hebrews would adopt, consisting of six hand-breadths, is found on the ruins of Memphis (*Journal des Savans*, 1822, Nov. Dec. Comp. Herod. ii:149). The Rabbins also (*Mischn. Chelim*. xvii:9) assign six hand-breadths to the Mosaic cubit. By comparing Josephus (*Antiq.* iii:6, 5) with Exod. xxv:10, it will, moreover, be found that the weight of his authority is in the same scale. According to him, a cubit is equal to two spans. Now, a span is equal to three

hand-breadths (Schmidt, *Bib. Mathemat.* p. 117; Eisen-Schmidt, *De Ponderibus*, p. 110); a cubit therefore is equal to six hand-breadths. The hand-breadth is found as a measure in 1 Kings vii:26 (Comp. Jer. lii:21). In the latter passage the finger-breadth is another measure. The span also occurs Exod. xxviii:16. So that, it appears, measures of length were, for the most part, borrowed by the Hebrews from members of the human body. Still no absolute and invariable standard presents itself. If the question, What is a hand or a finger-breadth? be asked, the answer can be only an approximation to fact. If, however, the palm or hand-breadth is taken at three and a half inches, then the cubit will amount to twenty-one inches.

In addition to the common cubit, the Egyptians had a longer one of six palms—four inches. The Hebrews also have been thought to have had a longer cubit; for, in Ezek. xl:5, we read of a cubit which seems to be an ordinary 'cubit and an hand-breadth;' see also Ezek. xliii:13, where it is expressly said 'the cubit is a cubit and an hand-breadth.' The prophet has been supposed to refer here to the then current Babylonian cubit—a measure which it is thought the Jews borrowed during the period of their captivity.

In the New Testament, our Lord characteristically employs the term cubit (Matt. vi:27; Luke xii:25) for the enforcement of a moral and spiritual lesson. The term also occurs in John xxi:8, and in Rev. xxi:17. In Lev. xix:35, justice in measures, as well as in weights, is strictly enjoined.

CUCKOO (kōök'ōō), (Heb. שַׁחַף, *shakh'af*, leanness), occurs only in Lev. xi:16; Deut. xiv:15; among birds of prey not clearly identified, but declared to be unclean.

Our version and others have rendered it 'cuckoo,' which, if correct, stands certainly out of the order of all affinity with the other species enumerated; and although the cuckoo is a winter and spring bird, distinctly heard, it appears, by Mr. Buckingham, early in April, while crossing the mountains between Damascus and Sidon, at that time covered with snow, it could scarcely deserve to be included in the prohibited list—for the species is everywhere scarce. *Shachaph* may be an imitation of its voice, since the Arabs call it *Teer-el-Yakoub*, or the bird of Jacob, because in its song it seems to repeat the patriarch's name. Bochart and Dr. A. Clarke derive *Shachaph* from *Sachepeth*, 'a wasting,' and thence apply it to the seagull or sea-mew, a bird pretended to be incapable of becoming plump or fleshy.

The strength of the versions is in favor of the *sea-mew*, or *gull*. Geddes renders, "the horn-owl." The opinion of Shaw, who understands it of the *rhaad*, or *saf-saf*, a granivorous and gregarious bird, which wants the hinder toe, is not improbable if he refers this name to the species of Bustards or Pterocles, which reside in or near Palestine, or make their passage through that country in the proper season. C. H. S.

CUCUMBER (kü'küm-bēr), (Heb. מִישָׁה, *mishaw'*, Is. i:8; Heb. קִישׁוֹ, *kish-shoo'*, hard). This word is translated cucumber in Num. xi:5.

The cucumber is a garden vegetable well known in this country and cultivated in Palestine. Besides our own kind, another (*Cucumis chate*) is raised, having a fruit with less flavor, but larger.

"Cucumbers form an important item in the summer food of the poor, and are eaten with the rind on, without any condiment. In the oppressive

heat of summer they form a most grateful vegetable. I remember seeing dinner served out to an Arab school in Jerusalem, which consisted of a thin barley-cake and a raw cucumber to each boy."—*Tristram*.

The "lodge in the garden of cucumbers" (Is. i:8), rudely constructed of poles and boughs, may still be seen in many fields. It is intended to shelter a watchman set to protect the fruit from jackals and other animals, as well as from thievish men. When the crop is over and the lodge forsaken by the keeper, "the poles fall down, or lean every which way, and those green boughs with which it is shaded will have been scattered by the wind, leaving only a ragged, sprawling wreck, a most affecting type of utter desolation."—*Thomson*. Job apparently had such ruins in mind (xxvii:18). (See KISHNIM.)

CUD (kŭd). See UNCLEAN, UNCLEANNESS.

CUMBERLAND PRESBYTERIAN CHURCH (kŭm'ber-land prĕz'bĕ-tĕ'ri-an chŭrch).

(1) **Origin.** The Cumberland Presbyterian Church originated in the remarkable revival of religion which began in 1797 to develop itself in Kentucky, under the labors of James McGready, a minister of the Presbyterian Church. It has long been known as "the revival of 1800." It rapidly grew to such proportions as to create a demand for Presbyterian ministers of the gospel beyond the ability of that church to supply. This circumstance caused the Cumberland Presbytery, of the Presbyterian Church, to ordain certain men who could not quite meet the doctrinal and educational requirements of the Confession of Faith and Form of Government to which the Presbytery was amenable. The doctrine to which particular exception was taken was that contained in the famous third chapter of the Westminster Confession, relative to "the eternal decree" and "preterition." The correlated doctrine of "a limited atonement" was also involved, of course. This action of the Cumberland Presbytery produced discussion in the Synod of Kentucky, of which it was a member. In 1806 the Cumberland Presbytery was dissolved by the Synod, some of its members having been placed already under prohibition to preach the gospel and administer its ordinances. The presbytery had also taken the ground that this proscribing act was unconstitutional and void. These proscribed ministers waited patiently and loyally for some years, hoping that the synod would at last redress their grievances. As a last resort and in order to save what they had represented to the General Assembly as "every respectable congregation" in that part of the country, three of these ministers, Finis Ewing, Samuel King, and Samuel McAdow met and reorganized the Cumberland Presbytery, or more properly speaking, perhaps, organized themselves into a presbytery bearing the name of the one which had been dissolved. This event occurred in what is now called Dickson County, Tennessee, February, 1810. Hence the name "Cumberland Presbyterian Church." This action of the proscribed ministers was apparently a hazardous one, but it was taken after long and patient waiting and much prayer, and the step seems to have been abundantly justified by subsequent events.

(2) **Statistics.** The new church began its life hopefully. Local churches here and there enrolled themselves under its standard. In due course of time other persons were ordained to the ministry. The evangelical activity of both old and young was great. New local churches were

rapidly multiplied. Other presbyteries were organized. The first synod, known as the Cumberland Synod, was organized in 1813 and the General Assembly in 1829. The Form of Government to which these early ministers had been accustomed, viz., the Presbyterian, was retained. At present there are 129 presbyteries, 15 synods, 2,915 churches (reported), 1,571 ministers (reported), and 175,642 communicants, 293 churches making no report. The Cumberland Presbyterian Church extends from Pennsylvania to California, Oregon and Washington, and from the Lakes to the Gulf States. It is strongest in Tennessee, Texas, Missouri, Kentucky, and Illinois. Its principal schools and colleges are Cumberland University, Lebanon, Tennessee; Waynesburg College, Pennsylvania; Lincoln University, Illinois; Trinity University, Texas; Missouri Valley College, Marshall, Missouri; and the Theological Seminary, Lebanon, Tennessee.

(3) **Doctrines.** The Cumberland Presbyterian Church at the very outset of its history set forth a synopsis of its theological system, which "for substance of doctrine," has continued the same to this day.

1. It was thought that the Westminster symbols implied the doctrine of eternal reprobation, whereas the Cumberland Presbyterians explicitly repudiated this.

2. The Westminster system teaches that although the atonement of Christ is "sufficient" for all men, it is prevented by an eternal decree from being "efficient" in the case of all men; the Cumberland Presbyterians agreed that the atonement would not be efficient in the place of all men, but they denied that the cause lay in the unconditional, eternal decree, at least in the sense in which they understood the word unconditional.

3. The Westminster implied that some infants dying in infancy were lost—or all, as to that, so far as the logic of the system gave any right to affirm the contrary. The Cumberland Presbyterians did not like this, and, in harmony with their rejection of the doctrines of "preterition" and "the limited atonement," consistently affirmed that all infants dying in infancy are saved.

4. The Westminster taught that the reason why the Holy Spirit does not on the basis of the atonement, bring saving grace to the heart of every sinner is the fact of the restriction placed on his work by the "eternal decree;" whereas, the Cumberland Presbyterians denied this, and affirmed that the reason lies in the fact that every sinner does not make a right use of the "common" grace which is bestowed upon all.

As to the relation of these Cumberland Presbyterian principles both to the ecclesiastical and the general public, there is, of course, no doubt, that they are acceptable thereto. The Westminster symbols as modified by the Cumberland Presbyterian Church constitute the only type of Presbyterian doctrine which one could wisely promulgate from the pulpit; and on this type of doctrine the Cumberland Presbyterian Church would, no doubt, cheerfully agree to become organically one with the other Presbyterian Churches of America, thus constituting one great Continental Presbyterian Church of America. This ought to be the objective point of all Presbyterian movements in our country, but no argument is needed to show that if this point is reached, it will be on the basis of some such modification of the Westminster as that held by Cumberland Presbyterians.

R. V. F.

CUMI (kū'mī), (Gr. κοῦμι, *koos'mee*, from Heb. קוּמִי, *koos'mee*), "arise" (Mark v:41). And he took the damsel by the hand and said unto her, *Talitha cumi*; which is, being interpreted, Damsel (I say unto thee), arise.

CUMMIN (kūm'mīn), (Heb. קָמְמוֹן, *kam-mone'*, preserving; Gr. κύμινον, *koos'min-on*).

Cummin.

This is an umbelliferous plant, mentioned both in the Old and New Testaments, and which, like the dill and the coriander, continues to be cultivated in modern, as it was in ancient times, in Eastern countries. These are similar to, and used for many of the same purposes as the anise and caraway, which supply their place, and are more common in Europe. All these plants produce fruits, commonly called seeds, which abound in essential oil of a more or less grateful flavor, and warm stimulating nature, hence they were employed in ancient as in modern times, both as condiments and as medicines.

Cummin is first mentioned in Isaiah (xxviii:25): 'When he (the ploughman) hath made plain the face thereof, doth he not cast abroad the fitches, and scatter the cummin;' showing that it was extensively cultivated, as it is in the present day, in Eastern countries, as far even as India. In the above chapter of Isaiah (verse 27) cummin is again mentioned: 'For the fitches are not threshed with a threshing instrument, neither is a cart-wheel turned about upon the cummin, but the fitches are beaten out with a staff, and the cummin with a rod.' This is most applicable to the fruit of the common cummin, which, when ripe, may be separated from the stalk with the slightest stroke, and would be completely destroyed by the turning round of a wheel, which, bruising the seed, would press out the oil on which its virtues depend.

In the New Testament, cummin is mentioned in Matt. xxiii:23, where our Saviour denounces the scribes and Pharisees, who paid their 'tithe of mint, and anise, and cummin, but neglected the weightier matters of the law. In the Talmudical tract *Demai*, quoted by Celsius (i. p. 519), cummin is mentioned as one of the things regularly tithed. It is still known by its ancient name (*kam-mān*) throughout the Arabic world.

CUNNING (kūn'nīng), (Heb. חָשָׁב, *khaw-shab'*, Ps. cxxxvii:5, ability, skill, dexterity). It means (1) skillful, artful (Gen. xxv:27; Exod. xxxi:4, and

xxxv:35); (2) crafty, deceitful (Eph. iv:14). In 1 Kings vii:14 (Heb. *dah'ath*) it means knowledge, skillfulness.

CUP (kūp), the translation mostly in the Old Testament of the Heb. כּוּס, *koose*, a receptacle; in the New Testament, of the Gr. ποτήριον, *pot-ay'-ree-on*, a drinking vessel.

1. It means (1) a drinking vessel made of gold, silver, glass, wood, or the like (Gen. xl:13). (2) The liquor contained in it (1 Cor. xi:27).

2. Cup of blessing (1 Cor. x:16) is that which was blessed in entertainments of ceremony.

3. Cup of Salvation (Ps. cxvi:13) is a cup of thanksgiving, of blessing the Lord for his mercies. We see this practice where the Jews of Egypt, in their festivals for deliverance, offered cups of salvation. Some commentators believe "the cup of salvation" to be a libation of wine poured on the victim sacrificed on thanksgiving occasions, according to the law of Moses (Exod. xxix:40).

4. Cup of Joseph, or Cup of Divination, by which, according to the English translation, he is said to have *divined* (Gen. xlv:5). From customs still used in the East, it seems probable that this, instead of being a cup by which to divine, was a cup of distinction, or one peculiar to the governor, which had been presented, as they now are in some parts, by the citizens whom he governed.

Figurative. (1) As by cups men's shares of liquor were given them, and affected them differently, the share of any thing is called a *cup*. So the soul-satisfying inheritance of the saints is called the *portion of their cup* (Ps. xvi:5); and the state of wicked men is called their *cup* (Ps. xi:6). (2) An abundant share of blessings, prosperity, joy, and salvation is called a *cup* (Ps. xxiii:5, and cxvi:13); and a share of terrible afflictions is called a *cup* (Ps. lxxv:8; Is. li:17; Matt. xx:23, and xxvi:39; John xviii:11). (3) The *cup of devils* is liquor drunk at idolatrous feasts, and in mad revels (1 Cor. x:21). (4) Men are likened to *cups and platters*; first their inside, or heart, should be cleansed, and then their outside, or practice (Matt. xxiii:25, 26). (5) Babylon is called a *golden cup*; great were her riches and wealth; and by her the Lord inflicted his judgments on the nations (Jer. li:7, and xxv). (6) Antichrist is said to have a *golden cup*, to denote her abundant luxury, power, and wealth, and the specious means by which she seduces the nations to idolatry, superstition, and error (Rev. xvii:4). (7) The cup of wine in the Lord's Supper is called a *cup of blessing*; it is solemnly set apart and dedicated to a holy use, and all the blessings of the new covenant are represented and sealed by it (1 Cor. x:16). (8) To *take the cup of salvation* is, with cheerful joy, gratitude, and praise, to take hold of and improve God's deliverance and eternal redemption (Ps. cxvi:13). There seems to be here an allusion to the drinking of the wine at the feast of the peace-offering. (9) To drink the *cup of trembling*, or of the *fury of the Lord*, is to be afflicted with sore and terrible judgments (Is. li:17; Ps. lxxv:8; Jer. xxv:15-29; Matt. xx:23).

CUPBEARER (kūp-bār'ēr), (Heb. מַשְׂכֵּה, *mash-keh'*, wine pourer), an officer of high rank among the Egyptians, Persians, and Assyrians, as well as the Jews. Such was the office of Rabslakeh (2 Kings xviii:17), Nehemiah (Neh. i:11). Solomon had cupbearers as attendants (1 Kings x:5).

CURE (kūr), deliverance from disease.

To *cure* a person is to heal his body or mind of their diseases and troubles (Luke vii:21). To

cure a church or state is to reform it and restore it to order, freedom, power, and wealth (Jer. xxxiii:6, and xlvi:11).

CURIOUS (kū'ri-ūs), (Gr. *πεπλεγτος*, *per-ee'er-gos*).

1. Made with great art.

The word *curious* occurs in several passages. Thus the "*curious* girdle" of the ephod is spoken of in Ex. xxviii:8, and in Ex. xxxv:32, the expression "*curious* works" is used to designate embroidery or works of skill.

The term *curious* in these passages is used in its original sense, namely, wrought with *care* and art (Latin "*cura*," *care*). The "*curious* girdle" was a richly embroidered belt. A like use of this word was common in the literature of the seventeenth century. Thus,

He, sir, was lapp'd

In a most *curious* mantle, wrought by the hand
Of his queen mother. (SHAKS. *Cymb.* V, v, 361.)

2. Mysterious; magical. Acts xix:19.

The reference is to the *Ephesian spells*, or *charms*, consisting of marks, letters or monograms written on scraps of parchment and worn like amulets. (See MAGIC.)

CURIOUSLY (kū'ri-ūs-ly), (Heb. *ראַם*, *raw-kam'*, to embroider, to variegate with colors).

In Ps. cxxxix:15, there occurs the phrase "*curiously* wrought in the lower parts of the earth." It is a figurative allusion to the pre-natal growth of the child and the adjusting the parts of its body, as the threads and colors are in tapestry.

CURSE (kûrs). Several Hebrew and Greek words are thus translated.

To curse, signifies to imprecate, to call for mischief upon, or wish evil to, any one. Noah cursed his grandson Canaan (Gen. ix:25); Jacob cursed the fury of his two sons (Gen. xlix:7); Moses enjoins the people of Israel to denounce curses against the violators of the law (Deut. xxvii:15, 16, etc.) Joshua pronounced a curse upon him who should undertake to rebuild Jericho. These curses were such as were either ordained by God himself and pronounced by men under the influence of his Spirit; or they were predictions of certain evils which would happen to individuals, or to a people, uttered in the form of imprecations. They were not the effects of passion, impatience, or revenge; and, therefore, were not things condemned by God in his law, like the cursing mentioned (Exod. xxi:17; xxii:28; Lev. xix:14).

The Mosaic law forbade the cursing of father or mother (Exod. xxi:17) on pain of death, of the prince of his people (xxii:28), of one that is deaf (Lev. xix:14) or perhaps absent so that he could not hear. Blasphemy, or cursing God, was a capital crime (Lev. xxiv:10, 11). (See ANATHEMA.)

God pronounced his curse against the serpent which had seduced Eve (Gen. iii:14), and against Cain, who had imbued his hands in his brother Abel's blood, iv:11. He also promised to bless those who should bless Abraham, and to curse those who should curse him. The divine maledictions are not merely imprecations, nor are they impotent wishes; but they carry their effects with them, and are attended with all the miseries they pronounce or foretell.

The *curse of the law* signifies the just and lawful sentence of God's law, condemning sinners to suffer the full punishment of their sin, or the punishment inflicted on account of transgression (Gal. iii:10), and from which Christ redeems us by

"being made a curse for us." (Gal. iii:13; Comp. Rom. viii:1 and Gal. iii:13 with Rom. v:16 and 2 Cor. iii:7-9.)

To *curse*, in an evil or blasphemous sense, is to affirm or deny anything with thoughtless or rash imprecations of Divine vengeance (Matt. xxvi:74).

CURTAINS (kûr'tîns). Three Hebrew words are thus rendered.

1. *יָרֵיחַ* (*yer-ee-aw'*, tremulous), the ten curtains which covered the tabernacle of Moses (Exod. xxvi:1-13; xxxvi:8-17). The word afterwards became a synonym for the tabernacle.

2. *מַסְכֵּה* (*maw-sawk'*, veil), the hanging for the door of the temple (Exod. xxvi:36, 37; xxxv:15, etc.), and also the gate of the court about the tabernacle (Exod. xxvii:16; xxxv:17).

3. *דֹּקָה* (*doke*, fineness. Is. xl:22), "He stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in." There is a reference to the screen stretched over the summer courts of the rich Orientals.

CUSH (kûsh), (Heb. *כּוּשׁ*, *koosh*).

1. A son (probably the eldest) of Ham. In the genealogy of Noah's children it is said, "Cush begat Nimrod" (Gen. x:8; 1 Chron. i:10).

2. Land of Cush. From Cush (Gen. x:6; 1 Chron. i:8), seems to have been derived the name of the *land* of Cush, which is commonly rendered by the Sept. *Ethiopia*, and by the Vulgate *Æthiopia*; in which they have been followed by almost all other versions, ancient and modern. The German translation of Luther has *Mohrenland*, which is equivalent to Negroland, or the Country of the Blacks. A native was called *Cushi*, *Αἰθίοψ*, *Æthiops* (Jer. xiii:23), the feminine of which was *Cushith*, *Æthiopissa* (Num. xii:1), rendered Ethiopian woman, A. V., and Cushite woman, R. V., and the plural *Cushiim*, *Αἰθίοπες*, *Æthiopes* (Amos ix:7).

The locality of the land of Cush is a question upon which eminent authorities have been divided; for while Bochart (*Phaleg*, iv:2) maintained that it was exclusively in Arabia, Gesenius (*Lex. in voce*) held with no less pertinacity that it is to be sought for no where but in Africa. In this opinion he is supported by Schulthess of Zurich, in his '*Paradies*' (p. 11, 101). Others again, such as Michaelis and Rosenmüller have supposed that the name Cush was applied to tracts of country both in Arabia and Africa—a circumstance which would easily be accounted for, on the very probable supposition, that the descendants of the primitive Cushite tribes, who had settled in the former country, emigrated across the Red Sea to the latter region of the earth, carrying with them the name of Cush, their remote progenitor. This idea had been developed by Eichhorn, in his dissertation entitled *Verisimilia de Cuschæis*, 1774.

The existence of an *African* Cush cannot reasonably be questioned, though the term is employed in scripture with great latitude, sometimes denoting an extensive but undefined country (Ethiopia), and at other times one particular kingdom (Meroë). It is expressly described by Ezekiel as lying to the south of Egypt beyond Syene (xxix:10; comp. xxx:4-6). Hence we find Mizraim and Cush (*i. e.* Egypt and Ethiopia) so often classed together by the prophets, *e. g.* Ps. lxxviii:31; Is. xi:11; xx:4; xliii:3; xlv:14; Nahum iii:9. The inhabitants are elsewhere spoken of in connection with the Lubim and Sukkiim (2 Chron. xii:3; xvi:8; Jer. xlvi:7; Dan. xi:43), supposed to be the Libyans and Ethiopic Troglodytes,

and certainly nations of Africa, for they belonged to the vast army with which Shishak, king of Egypt, 'came out' of that country, against Rehoboam, king of Judah. In these, and indeed in most other passages where 'Cush' occurs, Arabia is not to be thought of; the Ethiopia of Africa is beyond all doubt exclusively intended, and to the article 'ΕΘΙΟΠΙΑ' we refer the reader for the scriptural notices regarding it.

Yet, though there is a great lack of evidence to show that the name of Cush was ever applied to any part of Arabia, there seems no reason to doubt that a portion of the Cushite race did early settle there. According to the ethnographic table in the tenth chapter of Genesis, Cush was the father of Seba, Havilah, Sabta, Raamah (whose sons were Sheba and Dedan), Sabthecah, and also of Nimrod (Gen. x:7, 8; 1 Chron. i:9, 10). The last mentioned appears to have moved northward, first into Babylonia, and then into Assyria, but the others seem to have migrated to the south, though it is impossible accurately to trace out their settlements. Yet, even if we give Seba to Africa, and pass over as doubtful the names of Havilah, Sheba, and Dedan (for these were also the names of Shemitic tribes, Gen. x:28, 29; xxv:3), still, in Ezek. xxvii:22, Raamah is plainly classed with the tribes of Arabia, and nowhere are any traces of Sabtah and Sabthecah to be found but in the same country. By referring, however, to the relative geographical positions of the south-west coast of Arabia and the east coast of Africa, it will be seen that nothing separates them but the Red Sea, and it is not unlikely that while a part of the Cushite population immigrated to Africa others remained behind, and were occasionally called by the same name. Thus in 2 Chron. xxi:16, among those who were stirred up against the Hebrews are mentioned the Philistines, and 'the Arabs that were near the Cushites,' and the expression 'near' in this connection, can scarcely apply to any but dwellers in the Arabian peninsula. In the fifth century of our era the Himaryites, in the south of Arabia, were styled by Syrian writers Cushæans and Ethiopians (Assemanni, *Bibl. Orient.* i:360; iii:568). The Chaldee Paraphrast Jonathan, at Gen. x:6, and another paraphrast at 1 Chron. i:8, explain 'Cush' by Arabia. Niebuhr found in Yemen a tribe called Beni Chusi. The book of Job (xxviii:19) speaks of the topaz (*pitdah*) of Cush, and there was a Topaz Island in the Red Sea (Diod. Sic. iii:39; Pliny, *Hist. Nat.* xxxvii:8; Strabo, xvi:4, 6). Yet most of these are circumstances upon which we can lay but little stress; and the passage in 2 Chron. xxi:16 is the only direct evidence we possess of the name 'Cush' being applied in scripture to any part of Arabia, and even that does not amount to absolute demonstration.

Some have sought for another Cush in more northerly regions of Asia, as in the Persian province of Chusistan or Susiana, in Cuthan, a district of Babylonia, etc.; and as Nimrod, the youngest son of Cush, spread his conquests in that direction, it is, no doubt, possible that his father's name might be preserved in the designation of some part of the territory or people. But here again the data are very unsatisfactory; and, indeed, the chief thing which led to the supposition is the mention in the description of the site of Paradise (Gen. ii:13), of a land of Cush, compassed by the river Gihon. (See EDEN.) The ancients, with the usual looseness of their geographical definitions, understood by Ethiopia *the extreme south* in all the earth's longitude. It is the mistaken idea of the scriptural term 'Cush'

being used in the same vague and indeterminate manner, that has led to so much confusion on this subject. (See ETHIOPIA.)

3. A Benjamite mentioned only in the title to Ps. vii. He was probably a follower of Saul, the head of his tribe (B. C. 1061). Some Jewish interpreters take this name, *black*, as symbolic of the black heart and character of Shimei, who cursed David when he fled from Absalom (2 Sam. xvi:5 ff.): Others suppose him to be Saul, because the Psalm seems to refer to the times of Saul rather than those of Absalom.

CUSHAN (kū'shan), (Heb. כּוּשָׁן, *koo'shan'*), if the name of a person (Hab. iii:7), is probably the same as CUSHAN-RISHATHAIM (which see), king of Mesopotamia (Judg. iii:8, 10).

CUSHAN-RISHATHAIM (kū'shan-rish'a-thā'im), (Heb. כּוּשָׁן רִישַׁתַּיִם, *koo-shan' rish-aw-thah'-yim*, A. V. "Chushan").

He was a king of Mesopotamia who oppressed Israel during the period of the Judges, eight years (Judg. iii:8). The country over which he ruled, 'Aram of the Two Rivers,' was in all probability the territory lying between the Euphrates and the Chabōras, the last of the tributaries of the Greek River.

From his sway they were delivered by Caleb's younger brother Othniel. Of Cushan-rishathaim nothing more is known directly, and his name has not yet been found in the inscriptions either of the Babylonians or Assyrians.

Sayce believes there is a remarkable correspondence between this petty king and the reign of Rameses III.

He says: "The eight years during which the king of Aram-naharaim oppressed Israel would exactly agree with the interval between the beginning of the Libyan attack upon Egypt and the campaign of the Pharaoh against Syria. We know from the Egyptian records that Mitanni of Aram-naharaim took part in the invasion of Egypt; we also know from them that the king of Mitanni was not among those who actually marched into the Delta. He participated in the southward movement of the peoples of the north, and nevertheless lingered on the way. What is more probable than that he again sought to secure that dominion in Canaan which had belonged to some of his predecessors?"

His conclusions have been questioned by Driver and Moore. (T. Nichol, *Hastings' Bib. Dict.*) (See CHUSHIAN-RISHATHAIM; OTHNIEL.)

CUSHI (kū'shī), (Heb. כּוּשִׁי, *koo-shee'*, Cushite or Ethiopian, black).

1. An ancestor of Jehudi, connected with the court of Jehoiakim (Jer. xxxvi:14).

2. Father of the prophet Zephaniah (Zeph. i:1). (B. C. 605).

3. A man apparently attached to Joab. He was evidently a foreigner and unaccustomed to the king, for he was unrecognized by the watchman, and the fact that Ahimaaz outran him would point to his ignorance of the Jordan Valley (2 Sam. xviii:21, 22, 23, 31, 32). (B. C. 1023).

CUSTOM (kūs'tūm), (Heb. חֵלֶק, *hal-awk'*, way tax, Ezra iv:13, 20; vii:24; Gr. τέλος, *tel'os*, tax).

1. Ordinary practice (Luke iv:16).
2. A practice long used, or derived from ancestors (Judg. xi:39; John xviii:39).
3. Frequent disease (Gen. xxxi:35).
4. A tax upon persons or goods demanded by civil magistrates (1 Macc. xi:35; Matt. xvii:25; Rom. xiii:7).

CUSTOM, RECEIPT OF (kūs'tüm, rē-sēt'öv), (Gr. *τελώνιον, tel-o'nee-on*), a term signifying a *collector's office, a toll-house* (Matt. ix:9; Mark ii:14; Luke v:27).

CUTHAH (kū'thah or kũth'ah), (Heb. *כוּתָה, koo-thaw'*), a district in Asia, whence Shalmaneser transplanted certain colonists into the land of Israel, which he had desolated (2 Kings xvii:24-30).

From the intermixture of these colonists with the remaining natives sprung the Samaritans, who are called Cuthites in the Chaldee and the Talmud, and for the same reason a number of non-Semitic words which occur in the Samaritan dialect are called Cuthian. The situation of the Cuthah from which these colonists came is altogether unknown. Josephus places it in central Persia, and finds there a river of the same name (*Antiq. ix:14, 3; x:9, 7*). Rosenmüller and others incline to seek it in the Arabian Irak, where Abulfeda and other Arabic and Persian writers place a town of this name, in the tract near the Nahr-Malca, or royal canal, which connected the Euphrates and Tigris to the south of the present Bagdad. Winer seems to prefer the conjecture of Stephen Morin and Le Clerc, which identifies the Cuthites with the Cossæi in Susiana (Arrian, *Indic. xl.*; Plin. *Hist. Nat. vi:31*; Diod. Sic. xvii:111; Mannert, ii:493). All these conjectures refer essentially to the same quarter, and any of them is preferable to the one suggested by Michælis, that the Cuthites were Phœnicians from the neighborhood of Sidon, founding it upon reasons which no one regards as satisfactory, and which it is therefore unnecessary to reproduce.

CUTHITES (kũth'īts). See SAMARITANS.

CUTTINGS (kũt-tĩngs), in the flesh, expressed by *seh'ret* (Heb. *שֶׁרֶט, Lev. xix:28*), *saw-reh'teth* (Heb. *שֶׁרֶטָה, incision, Lev. xxi:5*) and *gud-go'daw* (Heb. *גִּדְגֹדָה, a cut, Jer. xlviii:37*).

Amongst the prohibitory laws which God gave the Israelites there was one that expressly forbade the practice embraced in those words, viz.: 'Ye shall not make any cuttings in your flesh for the dead' (Lev. xix:28). It is evident from this law that such a species of *self-inflicted* torture obtained amongst the nations of Canaan; and it was doubtless to guard his people against the adoption of so barbarous a habit, in its idolatrous form, that God led Moses to *reiterate* the prohibition: 'They shall not make baldness upon their heads, neither shall they shave off the corner of their beards, nor make any cuttings in their flesh' (Lev. xxi:5; Deut. xiv:1).

(1) **Heathen Practice.** Investing his imaginary deities with the attributes of *cruelty*, man has, at all times and in all countries, instituted a form of religion consisting in cruel rites and bloody ceremonies. If then we look to the practices of the heathen world, whether of ancient or modern times, we shall find that almost the entire of their religion consisted of rites of *deprecation*. Fear of the Divine displeasure would seem to have been the leading feature in their religious impressions. The universal prevalence of *human sacrifices* throughout the Gentile world is, in itself, a decisive proof of the light in which the human mind, unaided by revelation, is disposed to view the Divinity.

It was doubtless such *mistaken* views of the character of God that led the prophets of Baal (1 Kings xviii:28) to cut their bodies with lancets, supposing that, by mingling their own blood with that of the offered sacrifice, their god must be-

come more attentive to the voice of entreaty. In fact it was a current opinion amongst the ancient heathen that the gods were *jealous* of human happiness; and in no part of the heathen world did this opinion more prevail, according to Sanchoniathon's account, than amongst the inhabitants of those very countries which surrounded that land where God designed to place his people Israel. Hence we see why God would lay them under the wholesome influence of such a prohibitory law as that under consideration: 'Ye shall not make any cutting in your flesh for the dead.'

(2) **Violent Sorrow.** The ancients were very violent in their expression of sorrow. Virgil represents the sister of Dido as tearing her face with her nails, and beating her breast with her fists. Some think that that law of Solon's, which was transferred by the Romans into the Twelve Tables, *that women in mourning should not scratch their cheeks*, derived its origin from this law of Moses (Lev. xix:28). But, however this opinion may be questioned, it would appear that the simple tearing of their flesh out of grief and anguish of spirit is taken, in other parts of scripture, *as a mark of affection*; thus (Jer. xlviii:37), 'Every head shall be bald, every beard clipped, and upon all *cuttings*.' Again (ch. xvi:6): 'Both the great and the small shall die in the land; they shall not be buried, neither shall men lament for them, *nor cut themselves*.' So (ch. xli:5): 'There came from Samaria fourscore men having their heads shaven and their clothes rent, and having cut themselves, with offerings to the house of the Lord.'

The spirit of Islam is less favorable than that of heathenism to displays of this kind; yet examples of them are not of rare occurrence even in the Moslem countries of Western Asia, including Palestine itself.

We may very safely infer that the expression '*cuttings in the flesh*,' in these passages of Scripture, was designed, as already intimated, to declare the feeling of *strong* affection; as though the living would say, 'See how little we regard the pleasures of life, since now the object of our affection is removed from us!' We must therefore come back to our former position, that it was against those self-inflicted tortures, by which the unhappy devotees vainly thought to deprecate the wrath of their angry gods towards their deceased relatives and friends, this law of Moses *was especially aimed*.

CYAMON (sÿ-a-mön), (Gr. *Κυαμών, kooahmohn*), a place opposite to Esdraelon (Judith vii:3, *Gr.*), perhaps the same as *Camon*, placed by Eusebius in the great plain, six miles from Legio, north.

CYMBALS (šim'bals), (Heb. *צִלְצְלֵי שֹׁמַע, tsil-tsel-ay' shaw-mah'*, "loud cymbals;" *צִלְצְלֵי תְרוּעָה, tsil-tsel-ay' ter-oo-aw'*, "high sounding cymbals"). (See MUSIC.)

CYPRESS (sÿ'prës), (Heb. *תְּרֵזֶה, teer-zaw', ilex*).

As in the case of the box tree there is nothing in the philology to indicate what tree is signified. The root, which is obsolete in Hebrew, signifies in Arabic to be *strong* or *hard*. The tree is mentioned (Is. xlv:14) in connection with the cedar and the oak. It may have been the Syrian juniper, which grows wild upon Lebanon, as the cypress

Cutting in the Flesh.

never does in the Holy Land. The latter tree (*Cupressus sempervirens*) is a tall evergreen, the wood of which is heavy, aromatic, and remarkably durable. Its foliage is dark and gloomy, its form close and pyramidal, and it is usually planted in the cemeteries of the East. Coffins were made of it in the East, and the mummy-cases of Egypt are found at this day of the cypress-wood. The timber has been known to suffer no decay by the lapse of 1100 years.

CYPRIANS (sÿp'ri-ănz), the people of Cyprus (2 Macc. iv:29).

At the time mentioned they were governed by Egyptian viceroys. Sostratus left Crates, one of these rulers, in command of the castle of Jerusalem, while he was summoned before the king. Barnabas, Paul's associate, was a "Cyprian by birth," translated "of the country of Cyprus" in the A. V. (Acts iv:36).

CYPRUS (sÿ'prus), (Gr. *Κύπρος*, *koo'pros*), the modern *Kebrıs*, one of the largest islands in the Mediterranean, and next to Sicily in importance.

It is about 140 miles in length, and varies in breadth from 50 to 5 miles. From its numerous headlands and promontories, it was called *Κεραστίς*, *Kerastis*, or *the Horned*; and from its exuberant fertility, *Μακαρία*, *Macaria*, or *the blessed* (*beatam Cyprum*: Hor. *Carm.* iii:26, 9). Its proximity to Asia Minor, Phœnicia, and Egypt, and its numerous havens, made it a general rendezvous for merchants. 'Corn, wine, and oil,' which are so often mentioned in the Old Testament as the choicest productions of Palestine (Deut. xii:17; 1 Chron. ix:29; Neh. x:39; Jer. xxxi:12), were found here in the highest perfection. The forests also furnished large supplies of timber for ship-building, which rendered the conquest of the island a favorite project of the Egyptian kings. It was the boast of the Cyprians that they could build and complete their vessels without any aid from foreign countries (Ammian. Marcell. xiv:8, sec. 14). Among the mineral products were diamonds, emeralds, and other precious stones, alum, and asbestos; besides iron, lead, zinc, with a portion of silver, and, above all, copper.

Cyprus was originally peopled from Phœnicia (see CHITIM). Amasis I, king of Egypt, subdued the whole island (Herod. ii:182). In the time of Herodotus the population consisted of Athenians, Arcadians, Phœnicians, and Ethiopians (vii:90). Under the Persians and Macedonians the whole island was divided into nine petty sovereignties. After the death of Alexander the Great it fell to the share of Ptolemy, the son of Lagus. It was brought under the Roman dominion by Cato. Under the Emperor Augustus it was at first an imperial province, and afterwards, with Gallia Narbonensis, made over to the senate (Dion Cass. liv; iv.). When the empire was divided it fell to the share of the Byzantine emperors.

Cyprus was one of the first places out of Palestine in which Christianity was promulgated, though at first to Jews only (Acts xi:19), by 'those who were scattered abroad' after Stephen's martyrdom. It was visited by Barnabas and Paul on their first missionary tour (Acts xiii:4), and subsequently by Barnabas and John Mark (Acts xv:39). Paul sailed to the south of the island on his voyage to Rome (Acts xxvii:4). (See ELYMAS; PAPHOS; SERGIUS PAULUS; SALAMIS.)

CYRAMA (sÿr'a-mà), (1 Esdr. v:20). An incorrect form in the A. V. of 1611, and some early editions, for *Cirama*.

CYRENE (sÿ-rē'ne), (Gr. *Κυρήνη*, *koo-ray'nay*; *Ghrenna*, in modern Arabic), a city in Upper

Libya, founded about the year B. C. 632, by a colony of Greeks from Thera (Santorini), a small island in the Ægean sea.

Its name is generally supposed to be derived from a fountain (but according to Justin, *Hist.* xiii, a mountain), called *Κυρή*, *Cyre*, near its site. It was the capital of a district, called from it Cyrenaica (Barca), which extended from the Gulf of Platea (Bomba) to the Great Syrtis (Gulf of Sidra). With its port Apollonia (Musa Soosa), about 10 miles distant, and the cities Barca, Teuchira, and Hesperis, which at a later period were named Ptolemais, Arsinoë, and Berenice (Strabo, xvii. vol. iii. p. 496, ed. Tauchn.), it formed the Cyrenaic Pentapolis. For above 180 years the form of government was monarchical; it then became republican; and at last, the country became tributary to Egypt, under Ptolemy Soter. Strabo says that in Cyrene there were four classes of persons, namely citizens, husbandmen, foreigners, and Jews, and that the latter enjoyed their own customs and laws. At the commencement of the Christian era, the Jews of Cyrene were so numerous in Jerusalem that they had a synagogue of their own (Acts ii:10; vi:9). Some of the first Christian teachers were natives of Cyrene (Acts xi:20; xiii:1). Simeon, who was compelled to assist in bearing the cross of the Savior, was a Cyrenian (Matt. xxvii:32; Mark xv:21; Luke xxiii:26).

The ruins of Cyrene and the surrounding country have been diligently explored within the last century; in 1817 by Dr. Della Cella, in 1821-22 by Capt. Beechey, and in 1826 by M. Pacho, a French traveler. A very interesting account of the results of their investigations is given in the Penny Cyclopædia, under the article *Cyrenaica*.

CYRENIAN (sÿ-rē'nī-an), (Gr. *Κυρηναῖος*, *koo-ray-nah'yos*), a native of Cyrene (Mark xv:21; Luke xxiii:26; Acts vi:9).

CYRENIUS (sÿ-rē'nī-ŭs), (Gr. *Κυρήνιος*, *koo-ray'nee-yos*, or, according to his Latin appellation, P. SULPITIUS QUIRINIUS), governor of Syria (Luke ii:1, 2).

(1) **Difficulties Regarding Census.** The mention of his name in connection with the census which was in progress at the time of our Lord's birth, presents very serious difficulties, of which, from the want of adequate data, historical and critical inquiry has not yet attained a satisfactory solution. The passage is as follows: *αὕτη ἡ ἀπογραφὴ πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου*, translated in the Authorized Version thus: 'Now this taxing was first made when Cyrenius was governor of Syria.' Instead of 'taxing' it is now agreed that the rendering should be 'enrollment,' or 'registration' (of which use of the word *ἀπογράφεσθαι* many examples are adduced by Wetstein), as it appears from Josephus that no taxing did take place till many years after this period. The whole passage, as it now stands, may be properly read, 'This enrollment was the first while Cyrenius was governor of Syria.'

This appears very plain, and would suggest no difficulty, were it not for the knowledge which we obtain from other quarters, which is to the effect, (1) that there is no historical notice of any enrollment at or near the time of our Lord's birth; and (2) that the enrollment which actually did take place under Cyrenius was not until ten years after that event. Since no historian mentions any such general enrollment of the whole empire, and since, if it had taken place, it is not likely to have been mentioned in connection with the

governor of Syria, it is now usually admitted that Judæa only is meant by the phrase rendered 'the whole earth' (but more properly 'the whole land'), as in Luke xxi:26; Acts xi:28; and perhaps in xxi:20. The real difficulties are thus reduced to the two now stated. With regard to the enrollment, it may be said that it was probably not deemed of sufficient importance by the Roman historians to deserve mention, being confined to a remote and comparatively unimportant province. Many attempts have been made to remove these difficulties. Assuming, on the authority of Luke, that an enrollment, actually did take place at the time of our Lord's birth, one hypothesis proceeds to make out a probability that Cyrenius was then joint-governor of Syria along with Saturninus. It is known that a few years previous to this date, Volumnius had been joined with Saturninus as the procurator of that province; and the two Saturninus and Volumnius, are repeatedly spoken of together by Josephus, who styles them equally governors of Syria (*Antiq.* xvi:9, 1; xvi:9, 8) Josephus does not mention the recall of Volumnius; but there is certainly a possibility that this had taken place before the birth of Christ, and that Cyrenius, who had already distinguished himself, had been sent in his place. He would then have been under Saturninus, a ἡγεμών, 'governor,' of Syria, just as Volumnius had been before, and as Pilate was afterwards, of Judea. That he should here be mentioned as such by Luke, rather than Saturninus, is very naturally accounted for by the fact, that he returned, ten years afterwards, as procurator or chief governor.

(2) **Another Explanation.** Another explanation would read the passage thus:—'This enrollment was made *before* Cyrenius was governor of Syria.' The advocates of this view suppose that Luke inserted this verse as a sort of parenthesis, to prevent his readers from confounding this enrollment with the subsequent census made by Cyrenius.

Another mode of getting over the difficulty is sanctioned by the names of Calvin, Valesius, Wetstein, Hales, and others. They translate the words as follows, 'In those days there went forth a decree from Augustus, that the whole land should be enrolled; but the *enrollment itself* was first made when Cyrenius was governor of Syria.' The supposition here is, that the census was commenced under Saturninus, but was not completed till two years after, under Quirinus.

Hales reminds us that a little before the birth of Christ, Herod had marched an army into Arabia to redress certain wrongs which he had received; and this proceeding had been so misrepresented to Augustus that he wrote a very harsh letter to Herod, the substance of which was, that '*having hitherto treated him as a friend, he would now treat him as a subject.*' And when Herod sent an embassy to clear himself, the emperor repeatedly refused to hear them, and so Herod was forced to submit to all the injuries (παρὰνομιαι) offered to him (*Joseph. Antiq.* xvi:9). Now it may be supposed that the chief of these injuries was the performance of his threat of treating him as a subject, by the degradation of his kingdom to a Roman province. For soon after Josephus incidentally mentions that 'the whole nation of the Jews took an oath of fidelity to Cæsar and the king jointly, except 6000 of the Pharisees, who, through their hostility to the regal government, refused to take it.' The date of this transaction is determined by its having been shortly before the death of Pheroras, and coincides

with the time of this decree of enrollment and of the birth of Christ. The oath which Josephus mentions would be administered at the same time, according to the usage of the Roman census, in which a return of persons, ages, and properties, was required to be made upon oath, under penalty of confiscation of goods, as we learn from Ulpian. That Cyrenius, a Roman senator and procurator, was employed to make this enrollment, we learn not only from St. Luke, but by the joint testimony of Justin Martyr, Julian the Apostate, and Eusebius; and it was made while Saturninus was president of Syria (to whom it was attributed by Tertullian) in the thirty-third year of Herod's reign, corresponding to the date of Christ's birth. Cyrenius, who is described by Tacitus as '*impiger militiæ et acribus ministeris,*' 'an active soldier and rigid commissioner,' was well qualified for an employment so odious to Herod and his subjects; and probably came to execute the decree with an armed force. The enrollment of the inhabitants, 'each in his own city,' was in conformity with the wary policy of the Roman jurisprudence, to prevent insurrections and to expedite the business; and if this precaution was judged prudent even in Italy, much more must it have appeared necessary in turbulent provinces like Judæa and Galilee.

At the present juncture, however, it appears that the census proceeded no further than the first act, namely, of the enrollment of persons in the Roman register. For Herod sent his trusty minister, Nicolas of Damascus, to Rome; who, by his address and presents, found means to mollify and undeceive the emperor, so that he proceeded no further in the design which he had entertained. The census was consequently at this time suspended; but it was afterwards carried into effect upon the deposal and banishment of Archelaus, and the settlement of Judæa as a Roman province. On this occasion the trusty Cyrenius was sent again, as president of Syria, with an armed force, to confiscate the property of Archelaus, and to complete the census for the purposes of taxation. This taxation was a poll tax of two drachmæ a head upon males from fourteen, and females from twelve to sixty-five years of age—equal to about fifteen pence of our money. This was the 'tribute money' mentioned in Matt. xvii:24-27. The payment of it became very obnoxious to the Jews, and the imposition of it occasioned the insurrection under Judas of Galilee, which Luke himself describes as having occurred 'in the days of the taxing' (Acts v:37).

By this statement Hales considers that 'the Evangelist is critically reconciled with the varying accounts of Josephus, Justin Martyr, and Tertullian; and an historical difficulty satisfactorily solved, which has hitherto set criticism at defiance.' This is perhaps saying too much; but the explanation is undoubtedly one of the best that has yet been given (*Analysis of Chronology*, iii:48-53; *Lardner's Credibility*, i. 248-329; *Robinson, Addit. to Calmet*, in 'Cyrenius'; *Wetstein, Kuinoel, and Campbell*, on Luke ii:2, etc.). (See CHRONOLOGY.)

CYRIA (syr'ia), (Gr. Κυρία, *kooreeah*, 2 John i:5), a Christian woman to whom the Second Epistle of John is addressed. (See JOHN.)

CYRUS (s̄y'rus), (Heb. כִּרְשִׁי, *ko'resh*; *Babyl. Kurash*; old Persian *Kurush*; Gr. Κύρος, *ko'ros*; Lat. *Cyrus*).

The celebrated Persian conqueror of Babylon (B. C. 559), who promulgated the first edict for the restoration of the Jews to their own land (Ezra i:1, etc.). We are informed by Strabo that

his original name was Agradates (xv:3, p. 320, ed. Tauchn.); but he assumed that of Kouros, or Kouresh (whichever was the most accurate Persian form) doubtless on ascending the throne. We may perhaps compare it with the Hebrew *kheres*, which bears the same sense.

But as this Hebrew word signifies a potsherd, a worthless bit of broken pottery, it cannot be the real meaning of the name of the great hero king. Sayce suggests that he took his new name from the river Cyrus, which ran near his capital, Pasargadæ; and adds that it cannot come from a word signifying the sun, as some have said.

(1) **Parentage.** Herodotus and Xenophon agree that he was son of Cambyses, prince of Persia, and of Mandane, daughter of Astyages, king of the Median empire. Ctesias denies that there was any relationship at all between Cyrus and Astyages. According to him, when Cyrus had defeated and captured Astyages, he *adopted* him as a grandfather, and invested Amytis, or Amyntis, the daughter of Astyages (whose name is in all probability only another form of Mandane), with all the honors of queen dowager. His object in so doing was to facilitate the submission of the more distant parts of the empire, which were not yet conquered; and he reaped excellent fruit of his policy in winning the homage of the ancient, rich, and remote province of Bactria. Ctesias adds, that Cyrus afterwards married Amytis. It is easy to see that the latter account is by far the more historical, and that the story followed by Herodotus and Xenophon is that which the courtiers published in aid of the Persian prince's designs. Yet there is no reason for doubting that, on the father's side, Cyrus belonged to the Achæmenidæ, the royal clan of the military tribe of the Persians.

(2) **Records of Cyrus.** In his own records he says (Cyl. 20-22): "I am Cyrus, the king of multitudes, the great king, the powerful king, the king of Babylon, king of Sumer and Accad, king of the four quarters (of the world); son of Cambyses, the great king, king of the city of Anshan; the grandson of Cyrus, the great king, king of the city of Anshan; the great-grandson of Teispes, the great king, king of the city of Anshan; the enduring seed of royalty, whose reign Bel and Nebo loved, whose lordship for their hearts' delight they longed for." This genealogical table shows that his royal ancestry had become thoroughly established on the throne, and that he was the legitimate heir to the headship of Anshan.

(3) **Conquest of Cyrus.** Within ten years from his accession (B. C. 559) Cyrus absorbed the Median kingdom. How long previous to this time he had made conquests of minor tribes and peoples we have no means of knowing. In 549 we find (Nab.-Cyr. Chron. col. ii:1-4): "[His troops] he assembled, and against Cyrus, the king of Anshan . . . he marched. As for Astyages, his troops revolted against him, and he was seized and hand [ed over] to Cyrus. Cyrus marched to Ecbatana, the royal city; the silver, gold, goods and possessions of Ecbatana he carried forth and brought them to the land of Anshan." This seems to have been a voluntary choice on the part of the Medes of Cyrus as their king, as against Astyages of the Umman-Manda. This throne became henceforth the possession of Cyrus, and formed one of the chief elements in the great empire which he afterwards created. Cyrus occupied the next two or three years in the East in organizing and establishing himself in his new realms, Persia in the meantime yielding to his arms.

(4) **The Fall of Babylon.** In 546 (Nab.-Cyr.

Chron. col. ii: Obv. 15-18), "in the month Nisan, Cyrus, king of the land of Persia, mustered his troops, and below the city of Arbela the Tigris he crossed; and in the month Iyyar to the land of Ish . . . its king he slew, its goods he took, and his governor he placed therein." In this western campaign Cyrus was a victor over Croesus, king of Lydia, and pushed his authority as far as the Ægean Sea. This gave him supremacy from the eastern limits of Media, through the upper plains of Mesopotamia, eastern, middle, and western Asia Minor. Further conquests in the East occupy his attention until the year 539-538 B. C. The heavy and almost impregnable fortifications of Babylon were left for the last stroke.

Fortunately we are not dependent upon the statements of second or third-hand historians for a description of the fall of Babylon. We have the records both of Nabonidus, the reigning and vanquished king, and of Cyrus, the conqueror. Though somewhat fragmentary in some places, they nevertheless furnish us with a reasonably good picture of that momentous event. Nabonidus' own record will be cited first (Nab.-Cyr. Chron. col. i: Rev. 12-24): "In the month Tammuz (June) Cyrus having fought a battle at Ukhu on (the banks of) the river Zalzallat, against the troops of the land of Accad, the people of the land of Accad arose in revolt. Some persons were killed. On the fourteenth day Sippar was taken without fighting. Nabonidus fled. On the sixteenth day, Gobryas, governor of the land of Gutium, and the troops of Cyrus entered Babylon without fighting. Afterwards, Nabonidus, being shut up in Babylon, was taken. Until the end of the month, the shields of land of Gutium guarded the gates of Esagila. No arms had been stored in Esagila and the sacred precincts, nor had any weapons entered them. In the month Marchesvan (October), on the third day, Cyrus entered Babylon, the walls submitted before him. Peace for the city he established. Cyrus spake peace to Babylon, to the whole of it. Gobryas his governor he appointed governor of Babylon. From the month Chislev to the month Adar (November to February), the gods of the land of Accad, whom Nabonidus had carried to Babylon, returned to their own cities. On the 11th day of the month Marchesvan, at night, Gobryas . . . the king's wife died. From the twenty-seventh of the month Adar to the third of the month Nisan, there was lamentation in Accad; all the people smote their heads." This remarkable piece of the royal annals astonishes us by recording but one battle in the neighborhood of Babylon. That was fought near Accad, and resulted favorably for Cyrus' troops. Thence the way was open into the city of the empire. The reception of the army is equaled only by the liberty which was announced for the whole city.

Cyrus' own cylinder gives us a no less wonderful story. This sets out by assuring the reader that Cyrus was thoroughly imbued with the idea that he was the man of destiny (Cyl. 11-19, 22-24): "He (Merodach) sought for, he found him, yea, he sought out an upright prince, after his own heart, whom he took by his hand, Cyrus, king of the city of Anshan; he called his name; to the sovereignty of the whole world, he called him by name. The land of Qutu and all the Umman-Manda he subjected to his feet; the black-headed people, whom his hand conquered,—in faithfulness he governed them. Merodach, the great lord, the guardian of his people, beheld with joy the blessed deeds and his upright heart. To his own city Babylon, he issued orders to march;

he bade him also take the road to Babylon; like a friend and helper he marched at his side. His wide-extended troops, whose number like the waters of a river could not be known, in full armor, marched at his side. Without clash or battle he (Merodach) made him enter Babylon. His own city Babylon he spared (from disaster); Nabonidus the king, who had not revered him, he delivered into his hand. The people of Babylon in a body, the whole land of Sumer and Accad, the nobles and the great ones, prostrated themselves before him, kissed his feet, rejoiced at his sovereignty, their countenances shone. The lord (Merodach) who by his power had raised the dead, who had freed all from difficulty and distress,—they gladly did him homage, heeded his word. . . . When I had entered Babylon peacefully, with rejoicings and great joy, I took possession of the king's palace as my royal residence. Merodach, the great Lord [granted!] me the open heart of the sons (inhabitants) of Babylon; and daily I invoked him. My great army I stationed peacefully throughout Babylon."

These two records of the capture of Babylon from two different sources—one might rightfully say from two opposing forces—present a marvelous harmony. They unite in the statement that the city made no resistance to the entrance of the army of Cyrus, neither was there any objection to his immediate assumption of control, unless, in the Nab.-Cyr. Chron., we interpret the guard about the temple of Esagila as a minor siege. On the other hand, the population of the city seems to have welcomed their new conqueror, deliverer, and ruler, as a friend and benefactor. The popular prejudice aroused by the faithful devotees of Bel and Nebo against Nabonidus for his neglect of worship, gladly transferred their fealty to one who honored and revered the great gods of Babylon. It had likewise become evident that the sway of Cyrus meant for other lands a renewed and continuous political prosperity and a religious liberty unknown in the annals of other rulers. This array of facts freely opened the gates of Babylon to give Cyrus a royal welcome. In view of this direct testimony of two contemporaneous documents, we are forced to the conclusion that the story of Herodotus that Cyrus diverted the waters of the Euphrates from its channel and marched in under the unguarded gates of the river cannot be true.

(5) The Policy of Cyrus. The policy adopted by Cyrus, and put into effect at once in Babylon, fostered the affectionate favor of the gods and of his subjects. (Cyl. 24-36): "I permitted Sumer and Accad to have no gainsayer. In Babylon and in all its cities I was solicitous for the peace of the inhabitants. . . . Their sighing I quieted, I soothed their sorrow. To [do] works Merodach, the great lord, gave [me] command. To me Cyrus, the king that reveres him, and to Cambyses, the son, the issue of [my] body. . . . to the whole of my army he graciously inclined. . . . All the kings who abode in royal palaces, who in all parts of the world from the upper sea to the lower sea abode on dry land, the kings of the West-land, dwellers in tents, all of them brought their rich tribute into Babylon and kissed my feet. From . . . Asshur . . . Accad, Abnunak, the city of Zamban, the city of Mi-Turnu, Durili unto the border of Qutu, cities on the Tigris whose settlements were founded from of old,—the gods that abode in them I restored to their place, and settled them in an everlasting abode; all their population I gathered together and restored to their own dwelling-places. And the gods of the land of

Sumer and Accad whom Nabonidus, to the anger of the lord of the gods (Merodach), had brought into Babylon, by the command of Merodach, the great lord, I made to dwell safely in their own places, according to their desires. May all the gods whom I brought into their own cities, daily before Bel (Merodach) and Nebo intercede for a long life for me! may they speak in my favor, and to Merodach, my lord, let them say: Cyrus the king, who revives thee, and Cambyses, his son, . . . made them dwell in a quiet habitation." . . . Unfortunately the remaining lines of this notable inscription are almost entirely broken away. What has been quoted gives us the sweep of Cyrus' supremacy and the gist of his beneficent policy. He was the protector and the bounteous promoter of the welfare of his subjects. Their deities and their methods of worship were graciously restored, and dignified by elevating them to their former positions. The peoples, too, who had been forcibly deported from their native lands were restored by the king's decree. This generous policy, in contrast with that of preceding rulers, gave Cyrus unwonted influence and power over his retainers. It may be that the fact that he was an Aryan, with newer and freer ideas than those that had grown up in Semitic thought and power, threw an added charm about his personality and policy.

(6) Cyrus and Prophecy. The significance of the rise of Cyrus is vividly portrayed by the prophetic words to the exiles in Babylon. Words of comfort addressed to the exiles assure them (Is. xl:1,2) that their punishment will soon cease. They shall return to their home-land, inhabit it and rebuild their cities and restore the waste places (Is. xlv:26). This shall be accomplished by a deliverer who is already on his way to conquer. "Who hath raised up one from the East, whom he calleth in righteousness to his foot? he giveth nations before him and maketh him rule over kings; he giveth them as the dust to his sword, as the driven stubble to his bow. He pursueth them, and passeth on safely; even by a way that he had not gone with his feet. Who hath wrought and done it, calling the generations from the beginning? I, Jehovah, the first, and with the last, I am he" (Is. xli:2-4). Again we find, "Thus saith Jehovah to his anointed (selected), Cyrus, whose right hand I have holden, to subdue nations before him, and I will loose the loins of kings; to open the doors before him, and the gates shall not be shut. . . . For Jacob, my servant's sake, and Israel, my chosen, I have called thee by name: I have surnamed thee, though thou hast not known me. I am Jehovah, and there is none else; beside me there is no God: I will gird thee, though thou hast not known me" (Is. xlv:1, 4, 5). Cyrus is distinctly designated as the agent of Jehovah to conquer the nations. His mission was a providential one, and in no sense because he was a worshiper of Jehovah, for the sake of his servant, Jacob.

To deliver the Jews it was necessary that the great Babylon, the pride of her kings, the yoke of her subjects, should fall. Numerous prophecies from Jeremiah down had pictured her doom. But her conqueror is now at hand. "Come down and sit in the dust, O virgin daughter of Babylon; sit on the ground without a throne, O daughter of the Chaldeans: for thou shalt no more be called tender and delicate. . . . Sit thou silent, and get thee into darkness, O daughter of the Chaldeans: for thou shalt no more be called the lady of kingdoms." "Thou art wearied in the multitude of thy counsels: let now the astrologers, the star-gazers, the

monthly prognosticators, stand up and save thee from the things that shall come upon thee. Behold they shall be as stubble, . . . there shall be none to save thee" (Is. xlvi:1, 5, 13, 15). Nothing that they can muster shall be able to avert the certain doom of the wicked city. On the eve of its fall the prophet sees some of its consequences. "Bel (Merodach) bows down, Nebo crouches; their idols are upon the beasts, and upon the cattle: the things that ye carried about are made a load, a burden to the weary beast. They stoop, they bow down together; they could not deliver the burden, but themselves are gone into captivity" (Is. xlvi:1, 2). The substance of these and other prophecies is that Babylon must be humiliated, her proud position surrendered, and even her idols become a load for beasts and not a joy to their own worshipers. This last statement was fulfilled only in the sense that the idols, as contrasted with Jehovah's power who was bringing this about,

fortress, Jerusalem, midway between western Asia and Egypt, was the first step towards the conquest of that rival power. If Cyrus could conserve that advantage by aiding the Jews to build and hold it, he would be setting up one battlement in the face of Egypt's army. For one of his next strokes would be at that nation.

(8) **Cyrus and the Jews.** Cyrus issued his proclamation authorizing the return of the Jewish exiles in the first year of his sovereignty as king of Persia (Ezra i:1, B. C. 538). It is entirely reasonable to conjecture that, in accordance with his general principles of government, he issued many similar documents. The copy quoted in Ezra i:2-4 gives a few only of the specifications originally announced. In subsequent references to the document (Ezra iii:2-7; v:13-16; vi:1-5), we discover that elaborate provisions were made for the building of the temple, as well as for the reinauguration of the worship of Jehovah.

Tomb of Cyrus.

would be merely a burden of useless material. For as Cyrus himself claimed, it was under the auspices of the gods that he marched into Babylon. (See **BABYLON.**)

(7) **Evidences of Polytheism of Cyrus.** His own appeals to the gods, and his avowal of their support, reveal Cyrus as a polytheist of a pronounced type. It was not a matter of monotheism, of a possible Zoroastrianism, that called his attention to the Jews, but other reasons of no mean proportions. (1) In addition to the restoration and rehabilitation of captive and dethroned deities, he says (Cyl. 32): "All of their peoples I gathered together and restored to their own dwelling-places." This definitely stated national policy gives us one reason for the royal proclamation (Ezra i:2-4) issued in favor of the Jews. (2) It is altogether probable that Cyrus caught up from some one in Babylonia the mission which had been assigned him by the prophets. "Cyrus is my shepherd, and shall perform all my pleasure: even saying of Jerusalem. She shall be built; and to the temple, thy foundation shall be laid" (Is. xlv:28). (3) To occupy and hold that strong

Cyrus had not overlooked anything that would contribute to the rapid reclamation of this western waste. The proclamation was of such scope as to include the Jews in any part of his realm. The citizens of the empire were also authorized, if they chose, to render assistance to the pilgrims to Palestine. How generally they responded to the royal edict is stated in Ezra ii. This pilgrimage of less than fifty thousand of the faithful to the land of their fathers relieved the administration of Cyrus from the presence, in any part of the realm, of a dissatisfied, disturbing Jewish element. It also populated and built up a section of his territory which had been overrun and devastated by successive armies as Assyria and Babylonia. It likewise gave spirit to a people whose national life had been next to blotted out by a succession of well-deserved chastisements and captivities. In this event many of the brightest and most hopeful utterances of the great prophets found their fulfillment, and their fruition. (*The Monuments and the Old Testament*, 1900. Prof. Ira M. Price, Ph. D., University of Chicago).

D

DABAREH (dăb'a-rēh), (Josh. xxi:28). See DABERATH.

DABBASHETH (dăb'ba-shēth), (Heb. דַּבְּשֶׁת, *dab-bel'sheth*, hump), a town on the border of Zebulun (Josh. xix:11). It is located at Dabshch, near Jokneam, by Conder.

DABERATH (dăb'e-răth), (Heb. דַּבְּרַת, *daw-ber-ath'*, pasture), a town in the tribe of Issachar, assigned to the Levites (Josh. xix:12; xxi:28; 1 Chron. vi:72).

It is probably the same as the Dabaritta in the great plain of Josephus (*Vita*, 62; *De Bell. Jud.*, ii:21, 3); and the Dabira, which Eusebius and Jerome place by Mount Tabor, in the region of Dio-Cæsarea. It is recognized in the present Debûrieh, a small village lying on the side of a ledge of rocks, just at the base of Taboon on the northwest (Robinson's *Resarches*, iii:210). It is erroneously spelled Dabareh (Josh. xxi:28).

DAGAN (dă'gān). See CORN.

DAGGER (dăg'gēr), (Heb. דָּגֶר, *kheh'reb*), any sharp instrument, particularly a weapon of war (Judg. iii:16, 21, 22).

DAGON (dă'gōn), (Heb. דָּגוֹן, *daw-gohn'*), is the name of a national god of the Philistines at Gaza and Ashdod (Judg. xvi:23; 1 Sam. v:2-7 sq.; 1 Chron. x:10).

As to the meaning of the name, Philo Byblius assumed the word to be derived from *dagan*, *corn*. This derivation is admitted by Bochart, who argues that the fields of the Philistines were laid waste by mice, in order to show that Dagon was not the true god of agriculture, as he was thought to be; and by Beyer, who makes the extraordinary assertion that we may conclude, from the sending of the five golden mice (to the God of Israel! 1 Sam. vi:4), that golden mice were offered to Dagon as an acknowledgment of his care in freeing their fields from mice. Each of these arguments is open to the objection that the five golden piles—which were sent at the same time, and which, if they bore any reference to Dagon, would possibly not be reconcilable with his character as the god of agriculture—are here altogether disregarded; yet it is quite evident that no conclusions can be

Dagon.

legitimately drawn from the one unless they apply with equal force to the other. There are much better arguments, however, for the other etymology, which deduces the same from *dag*, *fish*, with the ending *ōn* (Ewald, *Hebr. Gram*, sec. 341). This derivation is not only more in accordance with the principles of formation, but it is most decisively established by the terms employed in 1 Sam. v:4. It is there said that Dagon fell to the earth before the ark, that his head and the palms of his hands were broken off, and that 'only Dagon was left on him.' If Dagon is derived from *dag*, *fish*, and if the idol, as there is every reason to believe, had the body of a fish with the head and hands of a man, it is easy to un-

derstand why a *part* of the statue is there called *Dagon* in contradistinction to the head and hands; but not otherwise. That such was the figure of the idol is asserted by Kimchi, and is admitted by most modern scholars. It is also supported by the analogies of other fish deities among the Syro-Arabbians. Besides the Atergatis of the Syrians, the Babylonians had a tradition, according to Berosus (*Berosi Quæ supersunt*, ed. Richter, p. 48, 54), that at the very beginning of their history an extraordinary being, called Oannes, having the entire body of a fish, but the head, hands, feet and voice of a man, emerged from the Erythræan sea, appeared in Babylonia, and taught the rude inhabitants the use of letters, arts, religion, law, and agriculture; that, after long intervals between, other similar beings appeared and communicated the same precious lore in detail, and that the last of these was called Odakon (Ὠδάκων). Selden is persuaded that this Odakon is the Philistine god Dagon (*De Diis Syris*, p. 265). The resemblance between Dagon and Atergatis, or Derketo, is so great in other respects that Selden accounts for the only important difference between them—that of sex—by referring to the androgynous nature of many heathen gods. It is certain, however, that the Hebrew text, the Sept., and Philo Byblius, make Dagon masculine.

Apparently, the worship of Dagon among the Philistines was conducted with a highly developed and technical ritual. We may infer this from the elaborate discussions and arrangements for returning the ark, as described in 1 Sam. v:6, the golden mice and golden tumors as a guilt-offering, the new cart, the new milch kine with their calves shut up at home.

The temple of Dagon at Ashdod was destroyed by Jonathan the brother of Judas the Maccabee, about the year B. C. 148 (1 Macc. x:84). J. N.

DAILY (dă'lŷ), (Gr. ἐπιούσιος, *ep-ee-oo'see-os*, necessary, Matt. vi:11; Luke xi:3). The phrase really means *the bread of our necessity*, i. e., *necessary for us day by day*.

DAILY OFFERING or **SACRIFICE** (dă'lŷ-ōf-fēr-ĭng). See SACRIFICE.

DALE, THE KING'S (dāl, thē kĭng's), (Heb. דַּלְיָה, *ay'mek*, depression), the name of a valley near Jerusalem where Absalom built a family monument (Gen. xiv:17; 2 Sam. xviii:18). It is also called the "Vale of Shaveh."

DALAIHA (da-la'yà), (Heb. דַּלְיָה, *del-aw-yaw'*, Jehovah delivers). See DELAIAH.

DALETH (dă'leth).

The fourth letter of the Hebrew alphabet. The English letter D comes from the same source, and represents it in anglicized Hebrew names. It stands at the head of the fourth section of Ps. cxix, in which section each verse of the Hebrew begins with this letter.

DALMANUTHA (dăl'ma-nū'thà), (Gr. Δαλμανουθά, *dal-man-oo-thal'*), a village near Magdala (Mark viii:10; comp. Matt. xv:39); probably on the western shore of the lake of Gennesareth, a little to the north of Tiberias. The exact site is unknown.

DALMATIA (dăl-mā'shi-à), (Gr. Δαλματία, *dal-mat-ee'ah*), a province of Europe on the east of the

Adriatic Sea, forming part of Illyricum, and contiguous to Macedonia.

Titus was sent into this region by Paul to spread the knowledge of the Gospel.

DALPHON (däl'fon), (Heb. דַּלְפֹּן, *dal-fone'*), one of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix:7).

DAM (däm), (Heb. אִמָּה, *ame*), a mother among animals.

The Mosaic code had several regulations respecting treatment of parents, even among animals (Exod. xxii:30; Lev. xxii:27; Exod. xxiii:19; Deut. xxii:6, 7).

DAMAGES (däm'äj-ez), the restitution or remuneration prescribed by law for offenses against the name, property or person of another. (See **LAW**.)

DAMARIS (däm'a-ris), (Gr. Δάμαρις, *dam'ar-is*), a woman of Athens, who was led to embrace Christianity by the preaching of St. Paul (Acts xvii:34).

Some suppose she was the wife of Dionysius the Areopagite, who is mentioned before her; but

Damascus' are found in Is. vii:8. It is expressly said 'the head of Syria is Damascus;' also, Is. xvii:3, 'the kingdom' is to cease 'from Damascus.' So that this place was obviously the metropolis of a Syrian empire. It gave name (Syria Damascena, Plin. *Hist. Nat.* v. 13) to a district of Syria, which, in 1 Chron. xix:6, is distinguished as 'Syria-Maachah,' in the common English Version. The plain is about 400 stadia from the Mediterranean, and from six to eight days' journey from Jerusalem.

(2) **Topography.** Damascus—by some held to be the most ancient city in the world—is called by the Orientals 'a pearl surrounded by emeralds.' Nothing can be more beautiful than its position, whether approached from the side of Mount Lebanon, from the Desert to the east, or by the high road from the north from Aleppo and Hamah. For many miles the city is girdled by fertile fields, or gardens, as they are called, which being watered by rivers and sparkling streams, give to the vegetation, consisting principally of olive-trees, a remarkable freshness and beauty. Of all the cities of the East, Damascus is probably the most oriental.

Damascus.

the construction in the Greek will not sanction this conclusion. The name Damaris does not occur elsewhere, whence some suppose it a corruption of Damalis, which was not an uncommon name; but the *r* and *l* are in Greek so constantly interchanged as to render this emendation superfluous.

DAMASCENE (däm'a-sēn), a native or inhabitant of Damascus (2 Cor. xi:32).

DAMASCUS (da-mäs'kus), (Heb. דַּמָּשְׁקַיִם, *dam-meh'sek*; (Gr. Δαμασκός, *dam-as-kós*), called by the natives Es-Sham.

(1) **The Metropolis and Capital of Syria**, also capital of an important pashalic of the same name, lies in a plain at the eastern foot of Anti-Libanus. It was sometimes spoken of by the ancients as an Arabian city, but in reality it belongs to Syria. In 2 Sam. viii:5, 6, 'the Syrians of Damascus' are spoken of, and the words, 'Syria of

The plain of Damascus owes its fertility and loveliness to the river Barrada, which is supposed to be either the Abana or Pharpar of 2 Kings v: 12, and has been noticed under another head (see **ABANA**).

The view of Damascus, when the traveler emerges from Anti-Libanus, is of the most enchanting kind, and the surrounding country is dense with luxuriant foliage.

(3) **Origin and Early History.** Of the origin of Damascus nothing certain is known. The building of it has been ascribed both to Abraham and to his 'steward, Eliezer of Damascus.' That the city existed as early as the days of Abraham is clear from Gen. xiv:15; xv:2; but the way in which it is spoken of in these passages shows that even at the time to which they refer it was not a new nor an unknown place; for Abraham's steward is characterized as being of Damascus,

and the locality of another town (Hobah) is fixed by stating that it lay on the left hand of Damascus.' L. Müller (*Ad Orig. Reg. Damas.*) has undertaken to show that it was even then governed by its own rulers. How long it may have retained its independence cannot be determined; but it appears (2 Sam. viii:5, 6; 1 Chron. xviii:5, 6) that its monarch having unadvisedly attacked the victorious David, the Hebrew sovereign defeated the Syrians, making a great slaughter of them, and, in his turn, subdued Damascus, and exacted tribute from its inhabitants. This subjection was not of long duration, for under his successor (1 Kings xi:24) one Rezon, a servant of Hadadzer, king of Zobah, made himself master of Damascus, and, ruling over Syria, 'was an adversary to Israel all the days of Solomon.' After Rezon, Hezion occupied the throne; he was succeeded by his son Tabrimon (1 Kings xv:18, 19), who was in alliance with Asa, king of Judah. Preserving the same direct line, the crown then fell to Benhadad, who, having been in a league with Baasha, king of Israel, was bribed by Asa to desert his ally, and join himself in attacking Baasha, on whom the united forces inflicted great injury (1 Kings xv:19, 20). In the time of Benhadad, son of the preceding monarch, Damascus was the head of a very powerful empire, since it appears (1 Kings xx:1) that 'thirty and two kings' (doubtless petty princes or pashas, governors of provinces) accompanied him in a campaign which he undertook against Samaria. Of Ahab, its king, he made insolent demands.

The king of Israel therefore took counsel of 'all the elders of the land,' and, being advised to resist, met the threats of Benhadad with these famous words:—'Let not him that girdeth on his harness boast himself as he that putteth it off.' The Damascene king, undismayed, gave himself up to drinking and revelry. Ahab was under religious influences. The battle took place; the Syrians were defeated, and their king effected his retreat with difficulty. The subsequent operations of the Damascenes, under their king, have already been stated (see BENHADAD). Hazael, the successor of Benhadad, unwilling to give up hope of being master of Ramoth-Gilead, was attacked by the united forces of Judah and Israel, whom he vanquished, wounding Joram (2 Kings viii:28); and, at a later period, under Jehu (2 Kings x:33), laid waste a large portion of the Israelitish kingdom and 'threshed Gilead with threshing instruments of iron' (Amos i:3). Determined on revenge (2 Kings xii:17), Hazael marched to Jerusalem, and was bought off by King Jehoash by a most costly sacrifice. He, however, took the kingdom of Israel (2 Kings xiii:3), and, though he treated the people oppressively, he was able to hand them over in subjection to his son, Benhadad III, who was thrice beaten (2 Kings xiii:24, 25) by the Israelitish king Jehoash, and deprived of all his conquests. Jeroboam II (2 Kings xiv:28) pursued these advantages, and captured Damascus itself. Subsequently a junction took place between Israel and Damascus, when (2 Kings xvi:5, 6) Rezin, king of the latter, and Pekah, king of the former, entered into a confederacy, and undertook an expedition against Ahaz, king of Judah (Is. vii:1). They succeeded in 'recovering Elath to Syria,' but could not prevail against Jerusalem (2 Kings xvi:6). Ahaz, however, urged by necessity, applied for aid to Tiglath-pileser, king of Assyria, who, being bribed by a munificent present, fell on Damascus, took it, carried the people of it captive to Kir (on the river Kur), slew Rezin, and united the Da-

mascene territory with his own kingdom (2 Kings xvi:9; Is. viii:4; x:9; xvii:1). (For confirmation from the monuments see McCurdy, *History, Prophecy, and the Monuments*; Dr. Ira Maurice Price, *The Monuments and the Old Testament*, p. 273, ff. ed.)

Damascus after this fell under the power of the Babylonians and Persians, from whom it was taken by Alexander the Great, as one consequence of his victory at Issus (Arrian, *Expd. Alex.* ii:11, 15; Curt. iii:12). Then it made a part of the kingdom of the Seleucidæ, from whom it passed into the hands of the Romans (Flor. iii:5; Diod. Sic. xxxix:30). In the time of the Apostle Paul it belonged to the dependent kingdom of the Arabian prince Aretas. At a later period it was reckoned among the cities of Decapolis (Plin. *Hist. Nat.* v:16); then it was added to the province of Phœnice, and at last made a part of the province of Phœnicia Libanesia (Hierocles, *Synece*). From the time of Hadrian it bore the honorary title of Metropolis, without enjoying the rights of a metropolis. Under the Greek emperors of Constantinople Damascus was the most celebrated city of the East, remarkable for its wealth, luxury, magnificence, and its very large Christian population. A great era in its history is its conquest by the Saracens, of which an account may be found in the writings of the Arabic historian Alwakidi (Ockley's *Hist. of the Saracens*). The war was begun about A. D. 633, by the celebrated Abubeker, the successor of Mohammed; and ended in the capture of the city, and the substitution of Islamism for Christianity. It then became the capital of the whole Mussulman world, till the Caliphate was removed from it to Bagdad. The city continued under the sway of the caliphs of Bagdad till it came into the hands of the Turks, and was held and rendered famous by Nouredin and Saladin. In 1301 Timour the Tartar captured the city and barbarously treated its inhabitants. From Josephus (*De Bell. Jud.* i:2; xxv:2; xx:2; comp. Acts ix:2) it appears that its population contained great numbers of Jews.

Damascus is famous in the first age of Christianity for the conversion and first preaching of the apostle Paul (Acts ix:3, 20; Gal. i:17). The consequences might have been fatal to the apostle, for his life was endangered in this fanatical city. 'In Damascus the governor under Aretas, the king, kept the city of the Damascenes with a garrison, desirous to apprehend me; and through a window in a basket was I let down by the wall, and escaped his hands' (2 Cor. xi:32-3).

(4) The Present Condition. The interior of the city does not correspond with the exquisite beauty of its environs. In the Armenian quarter the houses are built with mud, and pierced towards the street by a very few small grated windows with red painted shutters. They are low, and the flat arched doors resemble those of stables. A filthy dunghill and a pool of stinking water are almost invariably before the doors. In some of these dwellings, belonging to the principal Armenian merchants, there is great internal richness and elegance. The furniture consists of magnificent Persian or Bagdad carpets, which entirely cover the marble or cedar floor, and of numerous cushions and mattresses, spread in the middle of the saloon, for the members of the family to sit or lean against.

There is a fine wide street, formed by the palaces of the agas of Damascus, who are the nobility of the land. The fronts of these palaces, however, towards the street, are like long prison or hospital walls, mere grey mud walls, with few or no windows, whilst at intervals is a great gate

opening on a court. But the interior is magnificent. The bazaars are very striking. The great bazaar is about half a league long. There are long streets covered in with high wood-work, and lined with shops, stalls, magazines, and cafés. The shops are narrow, and go only a short way back. The merchant is seated in front, with his legs doubled up below him, and the pipe in his mouth. The magazines are stored with merchandise of all sorts, and particularly with Indian manufactures, which are brought in great profusion by the caravans from Bagdad. In the midst of the bazaars stands the finest khan in the East, that of Hussan Pasha. It is an immense cupola, whose bold springing arch recalls that of St. Peter's at Rome; it is in like manner borne on granite pillars.

Not far distant is the principal mosque, formerly a church consecrated to St. John, whose skull and sepulchre, found in this holy place, give it such a sanctity that it is death for even a Mohammedan to enter the room where the relics are kept. Situated at the edge of the desert, at the mouth of the plains of Cœle-Syria and the valleys of Galilee, of Idumæa, and of the coasts of the Sea of Syria, Damascus was needed as a resting-place for the caravans to India. It is essentially a commercial town. Two hundred merchants are permanently settled in it. Foreign trade is carried on by the Great Mecca caravan, the Bagdad caravan, the Aleppo, and by several small ones to Beirut (its sea-port), Tripoli, Acre, etc. Lamartine makes its population to be some 300,000, of whom 30,000 are Christians. Another estimate (McCulloch, *Geograph. Dict.*) gives only from 120,000 to 150,000 inhabitants, comprising 12,000 Christians and as many Jews, which is probably a pretty high estimate.

Political changes and social influences have lessened and mitigated the proverbial bigotry of the Damascenes. The lower classes, indeed, are still fanatical, but a better feeling on religion prevails in the higher. Winding round the walls on the outskirts of the city, one comes to a point where they were broken at the top, at which Paul is said to have been let down in a basket, to escape the indignation of the Jews, when (Acts ix) 'the disciples took him by night, and let him down by the wall in a basket.' From hence, passing on through some pretty lanes, the traveler reaches an open green spot, surrounded by trees, over the tops of which can be seen the distant summits of Mount Hermon. At this place it is said Saul had arrived when (Acts ix:3) as he journeyed he came near Damascus, and suddenly there shined round about him a great light from heaven. These localities are pointed out with the greatest confidence by the Damascene Christians of all sects, and are held in great veneration; nor is it difficult to suppose that the true spots have been handed down by tradition among the followers of the cross. 'The street which is called Straight' (Acts ix:11) is still found in Damascus, or at any rate a street bearing that name. Addison says it is 'a mile in length,' and 'so-called because it leads direct from the gate to the castle or palace of the Pasha.' The house of Judas, also, to which Ananias went, is still pointed out, as well as that of Ananias himself. How much credulity may have had to do in fixing on and perpetuating the recollection of these localities, it is probably easier to suspect than to ascertain.

Burckhardt, *Arabia*, p. 194; Lamartine, *Travels in the East*; Addison's *Damascus and Palmyra*, ii:100; Bowring's *Report on Syria*; Stanley, *Sinai and Palestine*; Porter, *Five Years in Damascus*; Poccocke, *Travels*; Kelley, *Syria*.

DAMNATION (dăm-na'shŭn), (Gr. ἀπώλεια, *aph'lei-ah*, destruction, losing away), a word generally used, in a theological sense, to express a total loss of the soul; but this is not its proper import in all places where it occurs in Scripture; and the use of it is in some passages of our translation extremely unfortunate.

We read, John v:29, of the "resurrection to damnation;" of "eternal damnation" (Mark iii:29) of "the damnation of hell" (Matt. xxiii:33), where the stronger sense of the word is exacted by the context: but in Matt. xxiii:14, we read of the "greater damnation," which evidently implies a lesser damnation; and in Rom. xiii:2, 1 Cor. xi:29, and 1 Tim. v:12, we should read "condemnation," or "judgment" (Rom. xiv:23). "He that doubteth is damned," should be read "self-condemned."

DAN (dăn), (Heb. דָּן, *dawn*, a judge).

(1) **Son of Jacob.** Dan was the fifth son of Jacob by the concubine Bilhah (Gen. xxx:3; xxxv:25), and founder of one of the tribes of Israel. Dan had but one son, called Hushim (Gen. xlvi:23): notwithstanding which, when the Israelites came out of Egypt, this tribe contained 62,700 adult males (Num. i:39), which made it the second of the tribes in number, Judah only being above it. Its numbers were less affected in the desert than those of many other tribes; for at the census, before entering Canaan, it mustered 64,400 (Num. xxvi:43), being an increase of 1,700, which gave it still the second rank in population. But there is nothing in the history of the tribe corresponding to this eminence in population: the most remarkable circumstance in its history, however, is connected with this fact. The original settlement assigned to the tribe in southwestern Palestine being too small for its large population, a body of them went forth to seek a settlement in the remote north, and seized and remained in permanent occupation of the town and district of Laish, the inhabitants of which dwelt in greater security and were more easily conquered than the neighbors of the tribe in its own proper territory (Josh. xix:47; Judg. i:34; xviii). The district regularly allotted to the tribe, although contracted, was very fertile. It had the country of the Philistines on the west, part of Judah with Benjamin on the east, Ephraim on the north, and Simeon on the south. The territory proved inadequate chiefly from the inability of the Danites to expel the Philistines and Amorites, who occupied parts of the land assigned to them. There is no doubt that the territory as allotted, but not possessed, extended to the Mediterranean through the country of the Philistines. Samson was of this tribe, and its proximity to the Philistines explains many circumstances in the history of that hero. It appears from that history that there was an undercurrent of private and social intercourse between the Philistines and the Danites, notwithstanding the public enmity between Israel and the former (Judg. xiii; xvi).

(2) **Town of Dan.** The town, anciently called Laish, or Leshem, mentioned in the preceding article as having been conquered by a warlike colony of Danites, who named it after their tribe. The terms in which the condition of Laish is described, previously to the conquest, indicate that the place belonged to the Sidonians, and that the inhabitants lived quiet and secure, 'after the manner of the Sidonians,' enjoying abundance of all things (Judg. xviii:7). They seem to have derived their security from the absence of any adverse powers in their neighborhood, and from con-

fidence in the protection of Sidon, which was, however, too far off to render aid in the case of such a sudden assault as that by which they were overpowered. This distance of Sidon was carefully noted by the Danite spies as a circumstance favorable to the enterprise; and it does not appear that Sidon ever made any effort to dispossess the intruders. Dan afterwards became a chief seat of Jeroboam's idolatry, and one of the golden calves was set up there (1 Kings xii:28, 29). It was conquered, along with other towns, by the Syrians (1 Kings xv:20); and the name is familiar from the recurrence of the proverbial expression, 'from Dan to Beersheba, to denote the extent of the Promised Land (Judg. xx:1; 1 Sam. iii:20; 2 Sam. xvii:11). (See BEERSHEBA.) In the days of Eusebius, Dan was still a small village, which is placed by him four miles from Paneas, towards Tyre. As this distance corresponds to the position of the fountain at Tel el-Kady, which forms one of the sources of the Jordan, and is doubtless that which is called Dan by Josephus (*Antiq.* i:10, 2), the situation of the city of Dan could not therefore have been that of Paneas itself, with which it has been in later times confounded. (See CÆSAREA PHILIPPI.) There are no longer any ruins near the spring at Tel el-Kady, but at about a quarter of an hour north, Burckhardt noticed ruins of ancient habitations; and the bill which overhangs the fountains appears to have been built upon, though nothing is now visible (Burckhardt, *Syria*, p. 42; Robinson, *Researches*, iii:351-358). The mound rises out of a close jungle of tall bushes and rank reeds, with larger trees on the higher slopes, until an irregular oblong plateau is reached, about forty feet high on the north side and eighty feet on the south, and resting upon one of the broad fringe-like terraces with which the skirts of Hermon sweep down towards the plain of Huleh (Lake Merom). G. A. Smith prefers to locate Dan at Banias.

(3) **An Arabian City.** There was apparently a city named Dan in Southern Arabia, associated with Jason, from which the Phœnicians obtained wrought iron, cassia, and calamus (Ezek. xxvii:19). This is not certain, however.

(4) **Camp of Dan.** (Judg. xiii:25; xviii:12, A. V. "Mahaneh-dan"), the name given to the portion of country in which the Danites pitched before emigrating northward; or probably the location of some Danite families which remained.

(5) **Dan Even Unto Beersheba.** Dan being the northern boundary of Canaan, and Beersheba its most southerly town, this proverbial saying expressed the extreme length of the land (Judg. xx:1; 1 Sam. iii:20, etc.).

(6) There is a reference in Ezek. xxvii:19 in the A. V. to "Dan also" (Heb. דַּן), but the R. V. has it correctly "Vedan." This is supposed to be Aden in Arabia, formerly the chief trading port of Arabia before the rise of Mochar.

DANCE (dâns), (Heb. כְּחֹל, *khool*, to twist, dance, dancing, chorus).

1. The words in the original, rendered in our translation by this term, denote, properly, *to leap for joy*.

(1) **Ancient Dance.** The character of the ancient dance was very different from that of ours, as appears from the conduct of Miriam, who 'took a timbrel in her hand, and all the women went out after her with timbrels and with dances.' Precisely similar is the Oriental dance of the present day, which, accompanied of course with music, is led by the principal person of the company, the rest imitating the steps. The evolutions, as well as the songs, are extemporaneous—not confined to

a fixed rule, but varied at the pleasure of the leading dancer; and yet they are generally executed with so much grace, and the time so well kept with the simple notes of the music, that the group of attendants show wonderful address and propriety in following the variations of the leader's feet.

(2) **Sacred Dances.** At a very early period, dancing was enlisted into the service of religion among many people; the dance, enlivened by vocal and instrumental music, was a usual accompaniment in all the processions and festivals (Strabo, x); and, indeed, so indispensable was this species of violent merriment that no ceremonial was considered duly accomplished, no triumph rightly celebrated, without the aid of dancing.

The Hebrews, in common with other nations, had their sacred dances, which were performed on their solemn anniversaries, and other occasions of commemorating some special token of the divine goodness and favor, as means of drawing forth, in the liveliest manner, their expressions of joy and thanksgiving. The performers were usually a band of females, who, in cases of public rejoicing, volunteered their services (Exod. xv:20; 1 Sam. xviii:6), and who, in the case of religious observances, composed the regular chorus of the temple (Ps. cxlix:3; cl:4), although there are not wanting instances of men also joining in the dance on these seasons of religious festivity. Thus David deemed it no way derogatory to his royal dignity to *dance* on the auspicious occasion of the ark being brought up to Jerusalem.

His conduct was imitated by the later Jews, and the dance incorporated among their favorite usages as an appropriate close of the joyous occasion of the feast of Tabernacles.

(3) **Perversion.** (Buxtorf, *De Synag. Jud.* cap. 21). From being exclusively, or at least principally, reserved for occasions of religious worship and festivity, dancing came gradually to be practiced in common life on any remarkable seasons of mirth and rejoicing (Jer. xxxi:4; Ps. xxx:11). In early times, indeed, those who perverted the exercise from a sacred use to purposes of amusement were considered profane and infamous; and hence Job introduces it as a distinguishing feature in the character of the ungodly rich, that they encouraged a taste for dancing in their families (Job xxi:11). During the classic ages of Greece and Rome society underwent a complete revolution of sentiment on this subject; insomuch that the Grecian poets represent the gods themselves as passionately fond of the diversion (Potter's *Grec. Antiq.* ii:400); and that not only at Rome, but through all the provinces of the empire, it was a favorite pastime, resorted to not only to enliven feasts, but in the celebration of domestic joy (Luke xv:25; Matt. xiv:6). Notwithstanding, however, the strong partiality cherished for this inspiriting amusement, it was considered beneath the dignity of persons of rank and character to practice it. The well-known words of Cicero, that 'no one dances unless he is either drunk or mad,' express the prevailing sense as to the impropriety of respectable individuals taking part in it; and hence the gay circles of Rome and its provinces derived all their entertainment, as is done in the East to this day, from the exhibitions of professional dancers.

Amateur dancing in high life was, as that writer informs us, by no means uncommon in the voluptuous times of the later emperors. But in the age of Herod it was exceedingly rare and almost unheard of; and therefore the condescension of Salome, who volunteered, in honor of the anniversary of that monarch's birthday, to exhibit her

handsome person as she led the mazy dance in the saloons of Machærus—for though she was a child at this time, as some suppose (Michaelis, *Introd.*), she was still a princess—was felt to be a compliment that merited the highest reward. The folly and rashness of Herod in giving her an unlimited promise, great as they were, have been equaled and even surpassed by the munificence which many other eastern monarchs have lavished upon favorite dancers. (See HEROD; SALOME.)

The Jewish dance was performed by the sexes separately. There is no evidence from sacred history that the diversion was promiscuously enjoyed, except it might be at the erection of the deified calf, when, in imitation of the Egyptian festival of Apis, all classes of the Hebrews intermingled in the frantic revelry. In the sacred dances, although both sexes seem to have frequently borne a part in the procession or chorus, they remained in distinct and separate companies (Ps. lxxviii:25; Jer. xxxi:13).

2. By 'dance' the A. V. translates the Hebrew word *Machôl*, a musical instrument of percussion; according to many, used to accompany the dance, and hence called by the same name as the dance itself.

Figurative. Dancing in the Scriptures is expressive of joy as contrasted with mourning (Ps. xxx:11, etc.).

DANGER (dān'jēr), (Gr. *ἐνοχος*, *en'okh-os*, subject to, liable to).

(1) The different degrees of *danger of the judgment, council, or hell-fire*, denote different degrees of punishment, according to the greater or lesser heinousness of men's crimes; and there is an allusion to the Jewish courts, the lesser of which judged lesser crimes, and inflicted lesser punishments (Matt. v:21, 22). (2) *Sailing was dangerous*, after the fast of expiation, on the tenth day of the seventh month; winter began, and the weather became stormy (Acts xxvii:9).

DANIEL (dān'i-el or yěl), (Heb. דָּנִיֵּאל, *daw-nee-yale'*, God is my judge).

1. A celebrated prophet in the Chaldæan and Persian period. There are in the Bible two other persons of the same name—a son of David (1 Chron. iii:1), and a Levite of the race of Ithamar (Ezra viii:2; Neh. x:6).

(1) **Early Life.** Daniel was descended from one of the highest families in Judah, if not even of royal blood (Dan. i:3; comp. Joseph. *Antiq.* x:10, 1). Jerusalem was thus probably his birth-place, though the passage (Dan. ix:24) quoted in favor of that opinion, is considered by many commentators as not at all conclusive.

We find the lad Daniel, at the age of twelve or sixteen years, already in Babylon, whither he had been carried, together with three other Hebrew youths of rank, Ananiah, Mishaël and Azariah, at the first deportation of the people of Judah in the fourth year of Jehoiakim.

(2) **Enters the King's Service.** He and his companions were obliged to enter the service of the royal court of Babylon, on which occasion he received the Chaldæan name of *Belshazzar* (i. e., *Beli princeps, princeps cui Belus favet*), according to eastern custom when a change takes place in one's condition of life, and more especially if his personal liberty is thereby affected (comp. 2 Kings xxiii:34; xxiv:17; Esth. ii:7; Ezra v:14).

In this his new career, Daniel received that thorough polish of education which Oriental etiquette renders indispensable in a courtier (comp. iii:6; Plat. *Alcib.*, sec. 37), and was more especially instructed 'in the writing and speaking

Chaldæan' (Dan. i:4). That Daniel had distinguished himself, and already at an early period acquired renown for high wisdom, piety and strict observance of the Mosaic law (comp. Ezek. xiv:14, 20; xxviii:3; Dan. i:8-16) is very evident.

A proper opportunity of evincing both the acuteness of his mind and his religious notions soon presented itself in the custom of the Eastern courts to entertain the officers attached to them from the royal table (Athenæus, iv:10, p. 145, ed. Casaub). Daniel was thus exposed to the temptation of partaking of unclean food, and of participating in the idolatrous ceremonies attendant on heathen banquets. His prudent proceedings, wise bearing and absolute refusal to comply with such customs were crowned with the Divine blessing and had the most splendid results.

(3) **Interprets Dreams.** After the lapse of the three years fixed for his education, Daniel was attached to the court of Nebuchadnezzar, where, by the Divine aid, he succeeded in interpreting a dream of that prince to his satisfaction, by which means—as Joseph of old in Egypt—he rose into high favor with the king, and was entrusted with two important offices—the governorship of the province of Babylon and the head inspectorship of the sacerdotal caste (Dan. ii:48).

Considerably later, in the reign of Nebuchadnezzar, we find Daniel interpreting another dream of the king's, to the effect that, in punishment of his pride, he was to lose, for a time, his throne, but to be again restored to it after his humiliation had been completed (Dan. iv). Here he displays not only the most touching anxiety, love, loyalty and concern for his princely benefactor, but also the energy and solemnity becoming his position, pointing out with vigor and power the only course left for the monarch to pursue for his peace and welfare.

(4) **In Retirement.** Under the unworthy successors of Nebuchadnezzar, Daniel and his deservings seem to have been forgotten, and he was removed from his high posts. His situation at court appears to have been confined to a very inferior office (comp. Dan. viii:27); neither is it likely that he should have retained his rank as head inspector of the *order of magians* in a country where these were the principal actors in effecting changes in the administration whenever a new succession to the throne took place.

We thus lose sight of Daniel until the first and third year of King Belshazzar (Dan. v:7, 8), generally understood to have been the last king of Babylon. He was regent or co-king with his father, Nabonidus, and was slain when the Persians obtained the city. (See BELSHAZZAR; BABYLON; CYRUS; DARIUS.)

(5) **Restored to Office.** Shortly before this event Daniel was again restored to the royal favor, and became moral preacher to the king, who overwhelmed him with honors and titles in consequence of his being able to read and solve the meaning of a sentence miraculously displayed, which tended to rouse the conscience of the wicked prince.

Under the same king we see Daniel both alarmed and comforted by two remarkable visions (Dan. vii., viii), which disclosed to him the future course of events and the ultimate fate of the most powerful empires of the world, but in particular their relations to the kingdom of God, and its development to the great consummation.

After the conquest of Babylon by the united powers of Media and Persia, Daniel seriously busied himself under the short reign (two years) of Darius the Mede or Cyaxares II with the affairs of his people and their possible return from

exile, the term of which was fast approaching, according to the prophecies of Jeremiah. In deep humility and prostration of spirit he then prayed to the Almighty, in the name of his people, for forgiveness of their sins, and for the Divine mercy in their behalf; and the answering promises he received far exceeded the tenor of his prayer, for the visions of the Seer were extended to the end of time (Dan. ix). (Sec DARIUS.)

(6) **Persecution.** In a practical point of view also Daniel appeared at that time a highly-favored instrument of Jehovah. Occupying, as he did, one of the highest posts of honor in the state, the strictness and scrupulousness with which he fulfilled his official duties could not fail to rouse envy and jealousy in the breasts of his colleagues, who well knew how to win the weak monarch, whom they at last induced to issue a decree imposing certain acts, the performance of which, they well knew, was altogether at variance with the creed of which Daniel was a zealous professor. For his disobedience the prophet suffered the penalty specified in the decree; he was thrown into a den of lions, but was miraculously saved by the mercy of God—a circumstance which enhanced his reputation and again raised him to the highest posts of honor under Darius and Cyrus (Dan. vi).

(7) **Patriotism.** He had, at last, the happiness to see his most ardent wishes accomplished—to behold his people restored to their own land. Though his advanced age would not allow him to be among those who returned to Palestine, yet he never for a moment ceased to occupy his mind and heart with his people and their concerns (Dan. x:12).

(8) **Visions.** In the third year of Cyrus he had a series of visions, in which he was informed of the minutest details respecting the future history and sufferings of his nation, to the period of their true redemption through Christ, as also a consolatory notice to himself to proceed calmly and peaceably to the end of his days, and then await patiently the resurrection of the dead at the end of time.

From that period the accounts respecting him are vague, sometimes confused, and even strange, and we hardly need mention the various fables which report his death to have taken place in Palestine, Babylon or Susa. H. A. C. H.

2. Second son of David, born at Hebron, of Abigail (1 Chron. iii:1).

3. A descendant of Ithamar, who returned from Babylon with Ezra (Ezra viii:2).

4. One of the priests who sealed the covenant with Nehemiah. He is probably the same as Daniel Number 1 in this article, but not to be confounded with Daniel Number 3. (B. C. 445.)

DANIEL, BOOK OF (dān'yēl, bōōk ōv).

This important, and in many respects remarkable, book takes its name not only from the principal person in it, but also and chiefly from him as its real author, there being no doubt whatever that, as the book itself testifies, it was composed by Daniel (Comp. vii:1, 28; viii:2; ix:2).

(1) **Rank in Canon.** It occupies, however, but a third rank in the Hebrew canon, not among the *Prophets*, but in the *Hagiographa*, owing, no doubt, to the correct view of the composers of the canon, that Daniel did not exercise his prophetic office in the more restricted and proper sense of the term 'prophecy.'

(2) **Historical.** The book of Daniel divides itself into two parts, *historical* (chaps. i-iv) and *prophetic* (chaps. vii-xii), arranged respectively in chronological order. Its object is by no means

to give a summary historical account of the period of the exile, or of the life of Daniel himself, since it contains only a few isolated points both as to historical facts and prophetic revelations. But the plan or tendency which so consistently runs through the whole book is of a far different character; it is to show the extraordinary and wonderful means which the Lord made use of, in a period of the deepest misery, when the theocracy *seemed* dissolved and fast approaching its extinction, to afford assistance to his people, proving to them that he had not entirely forsaken them, and making them sensible of the fact that His merciful presence still continued to dwell with them, even without the Temple and beyond the Land of Promise.

The wonders related in Daniel (chaps. i-vi) are thus mostly of a peculiar, prominent and striking character and resemble in many respects those performed of old time in Egypt. Their divine tendency was, on the one hand, to lead the heathen power, which proudly fancied itself to be the conqueror of the theocracy, to the acknowledgment that there was an essential difference between the *world* and the *kingdom of God*; and, on the other, to impress degenerate and callous Israel with the full conviction that the power of God was still the same as it was of old in Egypt.

(3) **Language.** The language of the book is partly Chaldæan (ii:4; vii:28) and partly Hebrew. The latter is not unlike that of Ezekiel, though less impure and corrupt, and not so replete with anomalous grammatical forms.

(4) **Prophetic.** The style is, even in the prophetic parts, more prosaic than poetical. The historical descriptions are usually very broad and prolix in details, but the prophecies have a more rhetorical character and their delivery is frequently somewhat abrupt; their style is descriptive, painting with the most lively colors the still fresh impression which the vision has made on the mental eye.

The following are the essential features of the prophetic tenor of the book of Daniel, while the visions in chap. ii and vii, together with their different symbols, may be considered as embodying the leading notion of the whole: The development of the whole of the heathen power, until the completion and glorification of the kingdom of God, appeared to the prophet in the shape of four powers of the world, each successive power always surpassing the preceding in might and strength, namely, the Babylonian, Medo-Persian, Greek and Roman. The kingdom of God proves itself conqueror of them all—a power which alone is everlasting, and showing itself in its utmost glorification in the appearance of the Messiah, as Judge and Lord of the world. Until the coming of the Messiah the people of God have yet to go through a period of heavy trials. That period is particularly described in chapters viii and xi, illustrative of the last and heaviest combats which the kingdom of God would have to endure.

The period until the appearance of the Messiah is a fixed and sacred number—seventy weeks of years (ch. ix). After the lapse of that period ensues the death of the Messiah; the expiation of the people is realized; true justice is revealed, but Jerusalem and the temple are in punishment given up to destruction. The true rise from this fall and corruption ensues only at the end of time in the general resurrection (ch. xii).

(5) **Attacks Upon Its Unity.** The *unity* of the book has been disputed by several critics, and more especially by Eichhorn and Bertholdt, who conceived it to have been written by more than one author, on account of some contradictions

which they thought they had discovered in it, such as in i:21, compared with x:1, and in i:5-18, compared with ii:1.

(6) **Genuineness and Authenticity.** Much greater is the difference of opinion respecting the *authenticity* of the book. The oldest known opponent of it is the heathen philosopher Porphyry, in the third century of the Christian era. He found no successor in his views until the time of the English deists, when Collins attempted to attack the authenticity of Daniel, as was done by Semler in Germany. In later times its authenticity has been questioned by a number of Biblical critics, who have made elaborate attacks upon it.

The objections of these writers have been fully met and confuted. They rest, to a great extent, partly on historical errors, partly on the want of a sound exegesis, and, lastly, on the perversion of a few passages in the text. Thus it has turned out that several of the arguments have led to a far different and even opposite result from what was originally meant, namely, to the *defense* of the authenticity of the book. The existence of a king Darius of the Medians, mentioned in chap. vi., is a thorough historical fact, and the very circumstance that such an insignificant prince, eclipsed as his name was by the splendor of Cyrus, and therefore unnoticed in the fabulous and historical chronicles of Persia, should be known and mentioned in this book, is in itself a proof of the high historical authority of Daniel. Nor does the whole dogmatic tenor of the book speak less in favor of its genuineness, since the dogmatic spirit of the Maccabæan period is essentially different from that which it exhibits, as, for example, in the Christology, which forms the substance and basis of Daniel. (See DARIUS.) H. A. C. H.

(7) **Interpretation.** The book contains three representations of the world's history, more or less closely related to each other, which, with their interpretations, may be outlined as follows:

	Ch. ii	Ch. vii	Ch. viii	
A.	Golden=The lion head			=Babylonian Empire
	Silver=The bear breast	=The ram		=Medo-Persian "
	Brazen=The leopard belly and thighs	=The he-goat		=Grecian "
	Iron legs=The fourth and iron beast and clay feet			=Roman "
B.	Golden=The lion head			=Babylonian Empire
	Silver=The bear breast	=The ram		=Medo-Persian "
	Brazen=The leopard belly and thighs	=The he-goat		=Macedonian "
	Iron legs=The fourth and iron beast and clay feet			=Syrian "
C.	Golden=The lion head			=Babylonian Empire
	Silver=The bear breast	=The ram		=Median "
	Brazen=The leopard belly and thighs	=The he-goat		=Persian "
	Iron legs=The fourth and iron beast and clay feet			=Grecian "

The interpretation A has been the one generally received. In fact, it was almost universal in the early Jewish and the Christian Church. B has had few advocates. C is now the prevailing interpretation. (E. L. Curtis, *Hastings' Bib. Dict.*)

(8) **Literature.** The most important commentators on Daniel are, among the fathers, Ephræm Syrus, Jerome, Theodoret; among the rabbins,

Jarchi, Kimchi, Aben Ezra, Joseph Jacchiades; among the Protestant theologians, Melancthon, Calvin, Martin Geier, de Dieu, Venema, Chr. Bned. Michaelis, J. D. Michaelis. In more recent times critical works on Daniel have appeared by Bertholdt (1806), Rosenmüller (1832), Hävernick (1832), Lengerke (1835), Maurer (1836), Birks, *The four prophetic empires*, and *The two later visions of Dan.*; Stuart, *Commentary*, Boston, 1850; Noyes, *New Transl. of the Heb. Proph.*, vol. ii, 1866; Ewald (*Proph. d. A. B.*), 1867, Eng. tr., 1881; Keil, 1869, Eng. tr., 1872; Zöckler (*Lange's Bibelwerk*), 1870, Eng. tr. and add. by Strong, 1875; Fuller (*Speaker's Com.*), 1876; Meinhold (*Kgf. Kom.*), 1889; Bevan, 1892; Behrmann (*Hand. Kom.*), 1894; Farrar (*Expositor's Bible*), 1895; Heng. *Beitraege*, 1831, Eng. tr., 1848; Tregelles, *Defence of Authenticity*, 1852; Auberlen, *Der Prophet Daniel und Offenbarung Johannes*, 1854-57, Eng. tr., 1857; Pusey, *Dan. the Prophet*, 1864, 3d ed. 1869; Fuller, *Essay on the Authenticity of Daniel*, 1864; Lenormant, *La Divination chez les Chald.* (pp. 169-236), 1875; Cornill, Margoliouth in *Expos.*, April, 1890; Fuller in *Expos.*, 3d series, vols. i, ii; Sayce *HCM* (pp. 495-537), 1893; Terry, *Proph. of Dan. Expounded*, 1893.

The following works may also be consulted: The *Old Testament Introductions* of Karl F. Keil, Cornill, Driver, König, Strack *et al.*, and the *Old Testament Theologies* of Dillmann, Schultz, Smend *et al.*, and the *Messianic or Old Testament Prophecies* of Briggs, Delitzsch, Hoffmann (*Weissagung u. Erfüllung*), Orelli, Riehm, *et al.*, and in the *Histories of Israel* or *The Jews* of Ewald, Grätz, Köhler, Kittel, Stade, Schürer *et al.*

(9) **Apocryphal Addenda.** (See DEUTEROCANONICAL BOOKS.) In the version of the Seventy, and in that of Theodotion, there are found some considerable additions to the book of Daniel which are wanting in the Hebrew canon. These are: (1) The Prayer of Azarias, etc. (Dan. iii:24-51); (2) The Song of the Three Children (Dan. iii:52-90); (3) The History of Susanna (Dan. xiii); (4) The Narrative of Bel and the Dragon (Dan. xiv).

St. Jerome, who translated these, together with the canonical parts of the book of Daniel from the Greek version of Theodotion, observes: 'Daniel, as received among the Hebrews, contains neither the history of Susanna, nor the Hymn of the Three Children, nor the Fables of Bel and the Dragon, all of which, as they are dispersed throughout the world, we have added, lest to the ignorant we should seem to have cut off a considerable part of the book, transfixing them at the same time with a dagger.'

Jerome further observes that the history of Susanna is considered by nearly all the Hebrews as a fable, and that it is not read in the synagogues; for who, say they, could believe that captives had the power of starving their princes and judges? (*Præf. ad Danielelem*).

(1) The subject of the Prayer of Azarias, and of the Song of the three youths, Azarias, Ananias and Misael (the Hebrew names of Shadrach, Meshach and Abed-nego), consists in a petition for deliverance from the furnace, and a hymn of thanksgiving on the part of the young men for their preservation in the midst of the flames. De Wette (*Lehrbuch*) conceives that the Prayer and the Hymn betray marks of two different authors (Dan. iii:38; comp. with 53, 55, 84, 85, Stephen's *Division*), and that the latter has the appearance of being written with a liturgical object. Certain it is that, from a very early pe-

riod, it formed part of the church service (see Rufinus, in *Symbol. Apost.*, who observes that this hymn was then sung throughout the whole church, and Athanasius, *De virginitate*); it is one of the canticles still sung on all festivals in the Roman, and retained in the daily service of the Anglican church.

(2) The *History of Susanna* is probably a moral parable, founded perhaps on some fact, and affording a beautiful lesson of chastity.

The object of the Jewish author of the history of the destruction of *Bel and the Dragon* was, according to Jahn, 'to warn against the sin of idolatry some of his brethren who had embraced Egyptian superstitions. The book was, therefore, well adapted to the time, and shows that philosophy was not sufficient to keep men from apostatizing into the most absurd and degrading superstitions.' The time of the writing Jahn ascribes to the age of the Ptolemies, when serpents were still worshiped at Thebes.

(3) *Bel and the Dragon* is read in the Roman office on Ash Wednesday, and in the Church of England on the 23d of November. *Susanna* is read in the Anglican Church on the 22d of November, and in the Roman on the vigil of the fourth Sunday in Lent.

We shall conclude with the following observation of Erasmus: 'It is astonishing that what Jerome stabbed with his dagger is now everywhere read and sung in the churches; nay, we read, without any mark of distinction, what Jerome did not fear to call a fable, the history of *Bel and the Dragon*, and which he would not have added had he not been apprehensive of seeming to have cut off a considerable portion of the sacred volume. But to whom did he fear to seem to do so? To the ignorant, as he himself observes. Of so much more weight to the ignorant multitude is custom than the judgment of the learned' (*Schol. super Pref. Hieron. in Daniel*).
W. W.

Davidson, *Introd. to the Old Testament*, iii:227 ff.; Arnald, *Comm. on the Apoc. Books*; Fritzsche, *Exeg. Handb.* i, iii.

DANITES (dän'ites), the descendants of Dan and those who belonged to his tribe (Judg. xiii:2; xviii:1, 11; 1 Chron. xii:35). (See DAN.)

DAN-JAAN (dän'já'an), (Heb. דָּן יָאָן, *dawn yah'an*, Dan playing the pipe, 2 Sam. xxiv:6). The LXX and the Vulgate read "Dan in the woods."

One of the places mentioned as being visited by Joab when taking the census. It is given between Gilead and Zidon, and may have been therefore in the vicinity of Dan (2 Sam. xxiv:6). Van de Velde, *Memoir*, p. 3.)

DANNAH (dän'nah), (Heb. דָּנָה, *dan-naw'*, murmuring), a city mentioned with Debir and Socoh, in the mountains of Judah (Josh. xv:49). It probably lay south of Hebron.

DAR (där), (Heb. דָּר, *dar*). This word occurs in Esth. i:6 as the name of one of the stones in the pavement of the magnificent hall in which Ahasuerus feasted the princes of his empire.

This would suggest that it must have denoted a kind of marble. Some take it to signify Parian marble, others white marble; but nothing certain is known about it. In Arabic the word *dar* signifies a large pearl; but that pearls were also used in the pavements of even regal dining-rooms is improbable in itself and unsupported by any known example. (See ALABASTER.)

DARA (dä'rä), (Heb. דָּרָה, *daw-rah'*, bearer holder), a contraction of Darda (1 Chron. ii:6). (See DARDA.)

DARCMONIM (därk'mō-nīm). See ADARCONIM.

DARDA (där'dä), (Heb. דָּרְדָה, *dar-dah'*, pearl of knowledge), son of Mahol (B. C. 960), one of the four men renowned for wisdom, but whom Solomon excelled (1 Kings iv:31).

In 1 Chron. ii:6, however, the same four names occur again as "sons of Zerah," of the tribe of Judah, where Darda appears as Dara. Although the identity of these persons with those in 1 Kings iv has been much debated they are probably the same.

DARIC (där'ik), (Heb. דָּרְכֵמֹן, *dar-ke-mon'*, or אֲדָרְכֵן, *ad-ar-kon'*, drachma; Ezra ii:69; viii:27; Neh. vii:70, 71, 72; 1 Chron. xxix:7), a gold coin current in Palestine in the period after the return from Babylon. Translated in A. V. dram.

That the Hebrew word is, in the Bible, the name of a coin and not of a weight appears from its similarity to the Greek appellation of the only piece to which it could refer. The allusions in Ezra and Nehemiah show that the coin was current in Palestine under Cyrus and Artaxerxes Longimanus. (See ADARCONIM.)

DARIUS (da-rí'us) or rather Darjavesch (Gr. Δαρειός, hence the Roman and modern form of the name; Old Persian *Darayava'ush*; Heb. דָּרְדָה יָאָו וַיִּשְׁחַ, *daw-reh-yaw-vaysh'*), the name under which three Medo-Persian kings are mentioned in the Old Testament.

The original form of the name, to which the Hebrew and Greek words are only approximations, has been read by Grotefend, in the cuneiform inscriptions of Persepolis, as Darheush, or Darjeush (Heeren's *Ideen*, i:2, p. 350).

(1) **Darius the Mede**. The first Darius is 'Darjavesch, the son of Achashverosh, of the seed of the Medes,' in the book of Dan. ix:1. Much difference of opinion has prevailed as to the person here intended; but it appears from the passages in v:30, 31; vi:28 that Darjavesch, the Mede, obtained the dominion over Babylon on the death of Belshazzar, who was the last Chaldean ruler (see BELSHAZZAR), and that he was the immediate predecessor of Koresh (Cyrus) in the sovereignty. The historical juncture here defined belongs, therefore, to the period when the Medo-Persian army, led by Cyrus, took Babylon (A. D. 538); and Darjavesch, the Mede, must denote the first king of a foreign dynasty who assumed the dominion over the Babylonian empire before Cyrus. These indications all concur in the person of Cyaxares the Second, the son and successor of Astyages (see AHASUERUS) and the immediate predecessor of Cyrus.

I. A. Pinches, *Hastings' Bib. Dict.*, controverts this opinion. He says: "The passage in Dan. v:31, where he is described as having received the kingdom (Revised Version) leads one to ask whether, in spite of the title of king which is given to him (vi:6, 7, etc.), he may not have been really governor only. In the Greek historians and in the *Bab. Chronicle* the name of Darius the Mede does not occur, he who preceded Cyrus to Babylon, on the occasion of the siege and capture of that city, being Gobryas, who may thus be regarded as having 'received the kingdom for him.' Gobryas, like Darius the Mede (vi:1), appointed governors in Babylon, and seems also to have been in the attack which resulted in Bel-

shazzar's death (*Bab. Chronicle*, Rev. col. i:1, 22). It will thus be seen that Cyrus gave great power to Gobryas, who was, in fact, his viceroy. Apparently, therefore, the later Jewish writers looked upon Gobryas as having as much authority as Belshazzar, whom they regarded likewise as king, though he does not appear ever to have reigned. The confusion of the names of Darius the Mede and Gobryas of Gutium (he being governor of that place, which is regarded as having included a part of Media), may have been due to the scribes, who, being more familiar with the Greek form of the name of Darius (the end of which, when carelessly pronounced, bears a certain resemblance to that of Gobryas in that language) than with the Hebrew form *Daryawesh*, wrote one name for the other; and there is also the possibility that one of Gobryas' names was Darius, which would account for the mistake." In this view J. F. McCurdy, *Barnes' Bib. Dict.*, concurs, saying it is impossible to make any other identification.

(2) **Darius Hystaspis.** The second 'Darjavesch king of Persia, is mentioned in the book of Ezra (iv-vii.) in Haggai, and in Zechariah, as the king who, in the second year of his reign, effected the execution of those decrees of Cyrus which granted the Jews the liberty to rebuild the temple, the fulfillment of which had been obstructed by the malicious representations which their enemies had made to the immediate successors of Cyrus. It is agreed that this prince was Darius Hystaspis, who succeeded the usurper Smerdis (B. C. 521) and reigned thirty-six years.

(3) **Darius Nothus.** The third, 'Darjavesch the Persian,' occurs in Neh. xii:22, in a passage which merely states that the succession of priests was registered up to his reign. It is commonly believed that this king was Darius Nothus, who came to the throne (B. C. 423), and reigned nineteen years.

Darius Codomannus is evidently the Persian king alluded to in 1 Macc. i:1. J. N.

DARKNESS (därk'nēs), (Heb. כְּהָלָה, *kho-sheh'*, the dark; Gr. σκοτος, *skot'os*), in the physical sense, is specially noticed, on three occasions, in the Scriptures:

1. At the period of creation darkness, it is said, "was on the face of the deep" (Gen. i:2-4). (See COSMOGONY.)

2. The plague of darkness in Egypt (Exod. x:21), "darkness that might be felt." (See PLAGUES OF EGYPT.)

3. In the Gospels of Matthew (xxvii:45) and Luke (xxiii:44) we read that, while Jesus hung upon the cross, "from the sixth hour there was darkness over all the land unto the ninth hour."

That the darkness could not have proceeded from an eclipse of the sun is placed beyond all doubt by the fact that, it being then the time of the Passover, the moon was at the full. This darkness may, therefore, be ascribed to an extraordinary and preternatural obscuration of the solar light, which might precede and accompany the earthquake which took place on the same occasion. For it has been noticed that often before an earthquake such a mist arises from sulphurous vapors as to occasion a darkness almost nocturnal (see the authors cited in Kuinoel *ad Matt.* xxiv:29 and compare Joel ii:2; Rev. vi:12, sq.). Such a darkness might extend over Judæa, or that division of Palestine in which Jerusalem stood, to which the best authorities agree that here, as in some other places, it is necessary to limit the phrase πᾶσαν τῆν γῆν, rendered 'all the land.'

Darkness is often used symbolically in the

Scriptures as opposed to light, which is the symbol of joy and safety, to express misery and adversity (Job xviii:6; Ps. cvii:10; cxliii:3; Is. viii:22; ix:1; lix:9, 10; Ezek. xxx:18; xxxii:7, 8; xxxiv:12).

Figurative. (1) *Darkness* of the sun, moon and stars is used figuratively to denote a general darkness or deficiency in the government or body politic (Is. xiii:10; Ezek. xxxii:7; Joel ii:10-31). (2) In Eph. v:11, the expression, '*works of darkness*,' is applied to the heathen mysteries, on account of the impure actions which the initiated performed in them. (3) '*Outer darkness*' in Is. viii:22; Matt. viii:12; xxii:13 and elsewhere refers to the darkness outside, in the streets or open country, as contrasted with the blaze of cheerful light in the house, especially when a convivial party is held in the night time. And it may be observed that the streets in the East are utterly dark after nightfall, there being no shops with lighted windows, nor even public or private lamps to impart to them the light and cheerfulness to which we are accustomed. This gives the more force to the contrast of the 'outer darkness' with the inner light. (4) *Darkness* is used to represent the state of the dead (Job x:21; xvii:13). (5) It is also employed as the proper and significant emblem of spiritual blindness and ignorance (Is. ix:2; lx:2; Matt. vi:23; John i:5; iii:19; 2 Cor. iv:1-6; 1 John ii:8, etc.). (6) To *eat in darkness* is to live in perpetual anxiety and distress amidst the outward comforts of life (Eccl. v:17.) (7) To *meet with darkness in the day time, and to grope at noon*, is to be exceedingly infatuated, or surprised with great trouble at the height of prosperity (Job v:14). (8) The *darkness is past, and the true light shineth*. The ceremonial dispensation is over, and Jesus is clearly exhibited in the Gospel. The state of ignorance, error, unbelief, and wickedness is over; and believers have received the knowledge, felt the power and believed the promises of God (1 John iii:8).

DARKON (där'kon), (Heb. דַּרְקוֹן, *dar-kone'*, perhaps bearer, or scattering). The children of Darkon returned from Babylon under Zerubbabel along with "the servants of Solomon" (Ezra ii:56; Neh. vii:58), B. C. 458.

DARLING (där'ling), (Heb. יָדוּרָה, *yaw-kheed'*; united, only, hence beloved), used in Ps. xxii:20; xxxv:17, of *life* as something very dear; hence *self*.

DAROM (där'öm), (Heb. דָּרוֹם, *daw-rom'*). This word means the south, and as a proper name is usually understood to be applied to the southernmost part of Judæa, in Job xxxvii:17; Deut. xxxiii:23; Eccles. i:6; Ezek. xxi:4; xl:24.

DART (därt), (Heb. חַיֵּץ, *khayts*, arrow), an instrument of war, similar to an arrow or light spear (Job xli:26; Prov. vii:23; Eph. vi:16; 2 Sam. xviii:14; 2 Chron. xxxii:5; Heb. xii:20). (See ARMS, ARMOR.)

DATES (däts). See TAMAR.

DATHAN (dä'than), (Heb. דָּתָן, *daw-thawn'*, fount), one of the chiefs of Reuben (B. C. 1190) who joined Korah in the revolt against the authority of Moses and Aaron (Num. xvi:1; xxvi:9; Deut. xi:6; Ps. cvi:17). (See AARON.)

DAUGHTER (dä'tēr), (Heb. בַּת, *bath*, feminine of בֵּן, *bane*, son; Gr. θυγάτηρ, *thoo-gat'air*).

It has in Scripture a more extended application than our word *daughter*. Besides its usual and proper sense of—

1. A daughter real or adopted, we find it used to designate:

2. A uterine sister, niece or any female descendant (Gen. xx:12; xxiv:48; xxviii:6; xxxvi:2; Num. xxv:1; Deut. xxiii:17).

3. Women, as natives, residents or professing the religion of certain places, as 'the daughter of Zion' (Is. iii:16); 'daughters of the Philistines' (2 Sam. i:20); 'daughters of a strange God' (Mal. ii:11); 'daughters of men,' i. e., carnal women (Gen. vi:2), etc.

4. Metaphorically, small towns are called daughters of neighboring large cities—metropolises or mother cities—to which they belonged, or from which they were derived, as 'Heshbon and all the daughters' (Auth. Version, *villages thereof*) Num. xxi:25; so Tyre is called the daughter of Sidon (Is. xxiii:12), as having been originally a colony from thence, and hence also the town of Abel is called 'a mother in Israel' (2 Sam. xx:19), and Gath is in one place (comp. 2 Sam. i:20; 1 Chron. xviii:1) called Gath-Ammah, or Gath the *mother* town, to distinguish it from its own dependencies, or from another place called Gath. See other instances in Num. xxi:32; Judg. xi:26; Josh xv:45, etc.

5. The people collectively of any place, the name of which is given, as 'the daughter (i. e., the people) of Jerusalem hath shaken her head at thee' (Is. xxxvii:22; see also Ps. xlv:13; cxxxvii:8; Is. x:30; Jer. xlvi:19; Lam. iv:22; Zech. ix:9).

6. The word 'daughter,' followed by a numeral, indicates a woman of the age indicated by the numeral, as when Sarah (in the original) is called 'the daughter of ninety years' (Gen. xvii:17).

The significations of the word 'daughter' in its scriptural use might be still more minutely distinguished, but they may all be referred to one or other of these heads.

Respecting the condition of daughters in families (see WOMEN; MARRIAGE).

Figurative. (1) Joseph is called 'a fruitful bough whose daughters (branches) run over the wall' (Gen. xlix:22). (2) The *daughters of a city*, chiefly a capital one, signify not only its inhabitants, but also lesser cities or villages (Num. xxi:25). (3) The saints are represented as *daughters*; they are dear to God and to their elder brother, Christ; they receive their all from him, and are affectionate and beautiful (Ps. xlv:10-14). (4) The *daughters of the horse-leech* are her young ones, that are never satisfied with blood (Prov. xxx:15). (5) *The daughters of music are brought low*; in old age the lungs and other organs of singing are weakened, and the ears that attended to it become dull (Eccles. xii:4). (6) The *daughters of trees* are their branches and sprouts (Gen. xlix:22).

DAUGHTER-IN-LAW (dā'tēr-în-lā'), (Heb. כַּלְיָהּ, *kal-law'* Gr. νύμφη, *noom'fay*), denotes, literally, a *bride*, and has reference to a son's wife.

DAVID (dā'vid), (Heb. דָּוִד, *daw-vid'*); Chron. דָּוִד, *daw-veed'*; New Test. Δαβίδ, *dah-beed*). The word probably means *beloved* (Gesenius). The reign of David is the great critical era in the history of the Hebrews.

1. Critical Era. It decided that they were to have for nearly five centuries a national monarchy a fixed line of priesthood, and a solemn religious worship by music and psalms of exquisite beauty; it finally separated Israel from the surrounding heathen, and gave room for producing those noble monuments of sacred writ, to the in-

fluence of which over the whole world no end can be seen. His predecessor, Saul, had many successes against the Philistines, but it is clear that he made little impression on their real power, for he died fighting against them, not on their own border, but at the opposite side of his kingdom, in Mount Gilboa. As for all the other 'enemies on every side'—Moabites, Ammonites, Edomites and the kings of Zobah—however much he may have 'vexed them' (1 Sam. xiv:47), they, as well as the Amalekites, remained unsubdued, if weakened. The real work of establishing Israel as lord over the whole soil of Canaan was left for David.

2. Authors of Biography. We learn from 1 Chron. xxix:29 that the life of David was written by Samuel, Nathan and Gad; also (from 2 Sam. i:18) it may be probably inferred that other information concerning him was contained in the poems of Jasher. None of these works are before us in their original form. Materials from them have, however, been worked up by a later hand which, it would seem, has sometimes adopted whole passages from them, sometimes has modified them and added connecting parts and explanations. Such, at least, is the conclusion to which everyone will find himself strongly pressed by a close criticism of the whole narrative. The change of name from *Ishui* to *Ishbosheth* (1 Sam. xiv:49, and 2 Sam. ii:8, etc.), appears to indicate that compositions by different hands have been put together.

That a duplicate account is found of the origin of the proverb, 'Is Saul also among the prophets?' seems undeniable (1 Sam. x:1-12, and xix:20-24); and if a single clear case of this sort is admitted to exist, various others must probably fall under the same head. On this ground, doubtless, it is that the Vatican Septuagint has omitted chap. xviii:10-11, since this attack of Saul on David's life 'on the morrow' is hard to reconcile with all that follows, and the verses appear to be a duplicate of chap. xix:9, 10. Less certain duplicates, and yet not free from difficulty, are the following: The men of Ziph twice betray David to Saul (chap. xxiii:19, and xxvi:1); David twice spares Saul's life under circumstances highly unlikely to recur (chap. xxiv and xxvi), and on each occasion Saul is melted into tenderness. The former event ends with an oath of David to Saul, which appears like a final termination of hostility, while the opening of chap. xxvii embarrasses us by its extreme abruptness, when the very opposite result might have been expected from that which immediately precedes. Comparing also chap. xxi:10-15 with chap. xxvii, it may seem that David's sojourn at Gath has been told twice over, for though each pair of events separately might without physical impossibility happen twice, yet, viewed collectively, the repetition of so many pairs surpasses all human probabilities. It has been necessary to premise so much, to show why we are disposed to be satisfied with rough results from the accounts of David's earlier life, which, as happens with all celebrated men who rise from a humble station, can hardly have been chronicled with the same precautions as those of his reign.

3. Life of David. The life of David naturally divides itself into three portions: (1) The time which he lived under Saul. (2) His reign over Judah in Hebron. (3) His reign over all Israel.

(1) In the Reign of Saul. In the first period we may trace the origin of all his greatness. His susceptible temperament, joined to his devotional tendencies, must, at a very early age, have made

him a favorite pupil of the prophets, whose peculiar mark was the harp and the psalm (1 Sam. x:1-12, and xix:20-24; see also 2 Kings iii:15). His hospitable reception, when in distress, by Ahimelech the priest, and the atrocious massacre innocently brought by him on Nob, the city of the priests (1 Sam. xxi and xxii:9-19), must have deeply affected his generous nature, and laid the foundation of his cordial affection for the whole priestly order, whose ministrations he himself helped to elevate by his devotional melodies.

At an early period he attracted the notice of Samuel, and if we are to arrange events according to their probable connection, we may believe that *after* David had been driven away from Saul and his life several times attempted, Samuel ventured on the solemn step of anointing him king. Whenever this took place, it must have produced on David a profound impression and prepared him to do that in which Saul had so eminently failed, viz., to reconcile his own military government with a filial respect for the prophets and an honorable patronage of the priesthood. Besides this, he became knit into a bond of brotherhood with his heroic comrades, to whom he was eminently endeared by his personal self-denial and liberality (1 Sam. xxx:21-31; 1 Chron. xi:18).

This, indeed, drew after it one of the most painful results, viz., the necessity of enduring the turbulence of his violent but able nephew Joab, nor could we expect that of a band of freebooters many should be like David. Again, during his outlawry, David became acquainted in turn not only with all the wild country in the land, but with the strongholds of the enemy all round. By his residence among the Philistines he must have learned all their arts and weapons of war, in which it is reasonable to believe the Israelites previously inferior (1 Sam. xiii:19-23). With Nahash the Ammonite he was in intimate friendship (2 Sam. x:2); to the king of Moab he entrusted the care of his parents (1 Sam. xxii:3); from Achish of Gath he received the important present of the town of Ziklag (1 Sam. xxvii:6). It must, however, be confessed that the details of the last passage, without professing to be miraculous, go beyond the limits of probability; for if we even suppose that David could commit the massacres there described, merely in order to hide his own perfidy, it is still incredible that the secret could have been kept and Achish continue to trust him (xxviii:2 and xxix:3). That Ziklag was a strong place may be inferred from 1 Chron. xii:1, 20.

The celebrity acquired in successful guerilla warfare, even in modern days, turns the eyes of whole nations on a chieftain, and in an age which regarded personal heroism as the first qualification of a general (1 Chron. xi:6) and of a king, to triumph over the persecutions of Saul gave David the fairest prospects of a kingdom. That he was able to escape the malice of his enemy was due *in part* to the direct help given him by the nations round, who were glad to keep a thorn rankling in Saul's side; *in part* also to the indirect results of their invasions (1 Sam. xxiii:27).

The account transmitted to us of David's dangers and escapes in this first period is too fragmentary to work up into a history; nevertheless, it seems to be divisible into two parts, differing in character. During the former he is a fugitive and outlaw in the land of Saul, hiding in caves, pitching in the wilderness, or occasionally with great risk entering walled cities (1 Sam. xxiii:7; in the latter he abandons his native soil entirely and lives among the Philistines as one of their chieftains (xxvii:1). While a rover in the land

of Judah, his position (to our eyes) is anything but honorable, being a focus to which 'all who were in distress, in debt or discontented gathered themselves' (xxii:2). Yet, as the number of his followers became large, six hundred we read, (xxiii:13), and David knew how to conciliate the neighboring sheep-masters by his urbanity and kind services, he gradually felt himself to be their protector and to have a right of maintenance and tribute from them. Hence he resents the refusal of Nabal to supply his demands, as a clear injustice, and, after David's anger has been turned away by the prudent policy of Abigail, in blessing her for saving him from slaying Nabal and every male of his family, the thought seems not to have entered his mind that the intention of such a massacre was more guilty than Nabal's refusal to pay him tribute (xxv:34). This whole narrative is characteristic and instructive. By his marriage with Abigail he afterwards probably became rich (for she seems to have been a widow at her own disposal), and on passing immediately after into the land of the Philistines, he was enabled to assume a more dignified place. Becoming possessed of the stronghold of Ziklag, he now appeared like a legitimate chieftain with fixed possessions, and no longer a mere vagabond and freebooter. This was accordingly a transition state in which David was prepared for assuming the kingdom over Judah. In Ziklag he was joined, not, as before, by mere outcasts from Israelitish life, but by men of consideration and tried warriors (1 Chron. xii:1-22), not only of the tribe of Judah, but from Gad, Manasseh, and even 'from Saul's brethren of Benjamin.'

(2) **Reign Over Judah in Hebron.** Immediately upon the death of Saul the tribe of Judah invited David to become their prince.

His first step, after his election, was to fix upon Hebron as the center of his administration—an ancient city, honorable by its association with the name of Abraham, and in the middle of his own tribe. He then strengthened himself by a marriage with Maacah, daughter of Talmai, king of Geshur (2 Sam. iii:3); a petty monarch whose dominions were near the sources of the Jordan, and whose influence at the opposite end of the land must have added a great weight into David's scale. From Abigail, widow of the churlish Nabal, David, as we have already observed, seems to have received a large private fortune. Concerning his other wives we know nothing particular; only it is mentioned that he had six sons by six different mothers in Hebron. The chief jealousy was between the two tribes of Benjamin and Judah, as Saul had belonged to the former; and a tournament was turned by mutual ill-will into a battle, in which Abner unwillingly slew young Asahel, brother of Joab. (On the synchronism of Abner and Asahel, see SAUL). 'Long war,' after this, was carried on between 'the house of Saul and the house of David.' We may infer that the rest of Israel took little part in the contest; and although the nominal possession of the kingdom enabled the little tribe of Benjamin to struggle for some time against Judah, the skill and age of Abner could not prevail against the vigor and popular fame of David. A quarrel between Abner and Ishbosheth decided the former to bring the kingdom over to David. The latter refused to treat unless, as a preliminary proof of Abner's sincerity, Michal, daughter of Saul, was restored to David. The possession of such a wife was valuable to one who was aspiring to the kingdom. After giving her back, Abner proceeded to win the elders of Israel over to David; but Joab discerned that if this should be so

brought about, Abner of necessity would displace him from his post of chief captain. He therefore seized the opportunity of murdering him when he was come on a peaceful embassy and covered the atrocity by pleading the duty of avenging his brother's blood. This deed was perhaps David's first taste of the miseries of royal power. He dared not proceed actively against his ruthless nephew, but he vented his abhorrence in a solemn curse on Joab and his posterity, and followed Abner to the grave with weeping. Anxious to purge himself of the guilt, he ordered a public wearing of sackcloth, and refused to touch food all the day. His sincere yet ostentatious grief won the heart of all Israel. The feeble Ishbosheth, left alone, was unequal to the government, and shortly suffered the same fate of assassination. David, following the universal policy of sovereigns (Tac. *Hist.* i:44), and his own profound sense of the sacredness of royalty, took vengeance on the murderers, and buried Ishbosheth in Abner's tomb at Hebron.

David's Tomb.

(3) **Reign Over All Israel.** The death of Ishbosheth gave to David supremacy over all Israel. The kingdom was not at first a despotic, but a constitutional one; for, it is stated, 'David made a *league* with the elders of Israel in Hebron before Jehovah, and they anointed David king over Israel' (2 Sam. v:3). This is marked out as the era which determined the Philistines to hostility (verse 17), and may confirm our idea that their policy was to hinder Israel from becoming united under a single king. Two victories of David over them follow, both near the valley of Rephaim; and these were probably the first battles fought by David after becoming king of all Israel.

Perceiving that Hebron was no longer a suitable capital, he resolved to fix his residence farther to the north. On the very border of the tribes of Judah and Benjamin lay the town of Jebus, which with its neighborhood was occupied by Jebusites, a remnant of the old Canaanitish nation, so called. In spite of the great strength of the fort of Zion it was captured and the Jebusites were entirely expelled or subdued; after which David adopted the city as his new capital. greatly enlarged the fortifications and gave or restored the name of Jerusalem (see JERUSALEM). After becoming master of Jerusalem, David made a league with Hiram, king of Tyre, who supplied him with skillful artificers to build a splendid palace at the new capital. That the mechanical arts should have been in a very low state among the Israelites was to be expected, since before the reign of Saul even smiths' forges

were not allowed among them by the Philistines. Nothing, however, could have been more profitable for the Phœnicians than the security of cultivation enjoyed by the Israelites in the reigns of David and Solomon. The trade between Tyre and Israel became at once extremely lucrative to both, and the league between the two states was quickly very intimate.

Once settled in Jerusalem, David proceeded to increase the number of his wives, perhaps in part from the same political motive that actuates other Oriental monarchs, viz., in order to take *hostages* from the chieftains around in the least offensive mode. This explanation will not apply to the concubines. We know nothing further concerning David's family relations than the names of eleven sons born in Jerusalem (2 Sam. v:14, 15), of whom four were children of Bathsheba (1 Chron. iii:5), and therefore much younger than the elder sons.

Jerusalem, now become the civil metropolis of the nation, was next to be made its religious center, and the king applied himself to elevate the priestly order, to swell the ranks of attending Levites and singers, and to bring the ark to Jerusalem. The priests or Aaronites must, for a long time, have had little occupation in their sacred office, for the ark was at Kirjath-jearim, under the care of a private family. Indeed, during the reign of Saul, we find shewbread to have been set forth at Nob (1 Sam. xxi:4-6), by Ahimelech the priest; and it is possible that many other ceremonies were performed by them, in spite of the absence of the ark. But after the dreadful massacre perpetrated on the priestly order by Saul, few Aaronites are likely to have felt at ease in their vocation. At least Jehoiada (who, according to 1 Chron. xxvii:5, was high priest at this time, and joined David at Hebron with 3,700 Aaronites) was father of the celebrated warrior Benaiah, afterwards captain of David's bodyguard; a man whose qualities were anything but priest-like; and Zadok, afterwards high priest, who joined David 'with twenty-two captains of his father's house' at the same time as Jehoiada, is described as 'a young man mighty of valor' (1 Chron. xii:27, 28). How long Jehoiada retained the place of high priest is uncertain. It is probable that no definite conception then existed of the need of having *one* high priest; and it is certain that David's affection for Abiathar, because of his father's fate, maintained him in chief place through the greater part of his reign. Not until a later time, it would seem, was Zadok elevated to a coördinate position.

The bringing of the ark from Kirjath-jearim to Jerusalem established the line of high priests in direct service before it; and from this time we may presume that the ceremonies of the great day of Atonement began to be observed. Previously, it would appear, the connection between the priesthood and the tabernacle had been very loose. The priests fixed their abode at Nob, when the ark was at Kirjath-jearim, a very short distance; yet there is nothing to denote that they at all interfered with Abinadab in his exclusive care of the sacred deposit. (Concerning the chronological difficulties involved in the stay of the ark at Kirjath-jearim see the article SAUL.)

When the ark entered Jerusalem in triumph David put on a priest's ephod and danced before it. This proved the occasion of the rupture between him and his royal spouse, Michal, which sooner or later was inevitable. Accustomed to see in her father's court a haughty pre-eminence of the monarch over the priest, she could not sympathize with the deeper piety which led the

royal Psalmist to forget his dignity in presence of the ark. The words of David to her, 'Jehovah chose me *before thy father and before all his house*' (2 Sam. vi:21) sufficiently show Michal to have felt that she had been taken from her husband Phaltiel, merely to give color to David's claim to the kingdom, and that David scorned to allow that he was in any way indebted to her for it.

After this event the king, contrasting his cedar palace with the curtains of the tabernacle, was desirous of building a temple for the ark; such a step, moreover, was likely to prevent any future change of its abode. The prophet Nathan, however, forbade it, on pious and intelligible grounds.

4. Principal Victories. David's further victories are narrated in the following order: Philistines, Moab, Zobah, Edom, Northern League stirred up by the Ammonites, Ammon.

(1) **Philistines.** The short and dry notice concerning the Philistines just gives us to understand that this is the era of their decisive, though not final, subjugation. Their towns were despoiled of their wealth (2 Sam. viii., xii.), and doubtless all their arms and munitions of war passed over into the service of the conqueror.

(2) **The Moabites.** The Moabites were a pastoral people, whose general relations with Israel appear to have been peaceful. The slight notice of Saul's hostilities with them (1 Sam. xiv:47) is the only breach recorded since the time of Eglon and Ehud. In the book of Ruth we see them as friendly neighbors, and much more recently (1 Sam. xxii:3, 4) David committed his parents to the care of the king of Moab. We know no cause, except David's strength, which now drew his arms upon them. A people long accustomed to peace, in conflict with a veteran army, was struck down at once, but the fierceness of his triumph may surprise us. Two-thirds of the population (if we rightly interpret the words, 2 Sam. viii:2) were put to the sword; the rest became tributary.

(3) **Syrians.** Who are meant by the Syrians of Zobah is still a problem (see ZOBAB). We here follow the belief that it was a power of northern Syria, then aiming at extensive empire, which had not only defeated and humbled the king of Hamath, but had obtained homage beyond the Euphrates. The trans-Jordanic tribes in the time of Saul had founded a little empire for themselves by conquering their eastern neighbors, the Hagarenes; and, perhaps, occasionally overran the district on the side of the Euphrates, which Hadadezer, king of Zobah, considered as his own. His efforts 'to recover his border at the river Euphrates' first brought him into collision with David, perhaps by an attack which he made on the roaming Eastern tribes. David defeated not merely his army, but those of Damascus too, which came too late with succor, and put Israelite garrisons into the towns of the Damascenes.

(4) **In the Valley of Salt.** Another victory, gained 'in the valley of salt,' ought, perhaps, to be read, as in 1 Chron. xviii:12, and in the superscription of Ps. lx., 'over the *Edomites*,' not 'over the Syrians.' The verse which follows (2 Sam. viii:14) seems to tell the result of this victory, viz., the complete subjugation and garrisoning of Edom, which, like Moab, was incorporated with David's empire. Immediately before this last conquest, as would appear, he wrote the 60th Psalm; and as that Psalm gives no hint of his achievements against the king of Zobah and the Damascenes, this is a strong ground for believing that those successes were not gained till somewhat later in time.

(5) **The Ammonites.** After David had become master of all Israel, of the Philistine towns, of Edom and of Moab, while the Eastern tribes, having conquered the Hagarenes, threatened the Ammonites on the north, as did Moab on the south, the Ammonites were naturally alarmed, and called in the powers of Syria to their help against a foe who was growing dangerous even to them. The coalition against David is described as consisting of the Syrians of Bethrehob and of Maacah, of Zobah and of Tob. The last country appears to have been in the district of Trachonitis, the two first immediately on the north of Israel. In this war we may believe that David enjoyed the important alliance of Toi, king of Hamath, who having suffered from Hadadezer's hostility, courted the friendship of the Israelitish monarch (2 Sam. viii:9, 10). We are barely informed that one division of the Israelites under Abishai was posted against the Ammonites; a second under Joab met the confederates from the north, 30,000 strong, and prevented their junction with the Ammonites. In both places the enemy was repelled, though, it would seem, with no decisive result. The spirit of exaggeration is certainly displayed in the statement—whoever is answerable for it—(1 Chron. xix:7) that the Syrian confederates brought with them 32,000 chariots, which are not noticed in the parallel place of 2 Sam. Perhaps the text is corrupt; for 1,000 talents of silver (verse 6) appears a small sum to hire such a force with. A second campaign took place. The king of Zobah brought in an army of Mesopotamians, in addition to his former troops, and David found it necessary to make a levy of all Israel to meet the pressing danger. A pitched battle on a great scale was then fought at Helam—far beyond the limits of the twelve tribes—in which David was victorious.

The Syrians henceforth left the Ammonites to their fate, and the petty chiefs who had been in allegiance to Hadadezer hastened to do homage to David.

(6) **Capture of Rabbah.** Early in the next season Joab was sent to take vengeance on the Ammonites in their own home by attacking their chief city, or Rabbah of Ammon. The natural strength of their border could not keep out veteran troops and an experienced leader, and, though the siege of the city occupied many months, and, indeed, it was prolonged into the next year, it was at last taken. It is characteristic of Oriental despotism that Joab, when the city was nearly reduced, sent to invite David to command the final assault in person. David gathered a large force, easily captured the royal town and despoiled it of all its wealth. His vengeance was as much more dreadful on the unfortunate inhabitants than formerly on the Moabites, as the danger in which the Ammonites had involved Israel had been more imminent. The persons captured in the city were put to death by torture, some of them being sawed in pieces, others chopped up with axes or mangled with harrows, while some were smothered in brick-kilns (2 Sam. xii:31; 1 Chron. xx:3); or, as some interpret these passages, he put them to work as prisoners. They were "put under the saws" in the same sense that they were put under the yoke. They were put to the axes and the harrows—forced to work with them, and made to pass through (or among) the brick-kilns.

5. Sins and Penalties.

(1) **Sin Against Bathsheba and Uriah.** During the campaign against Rabbah of Ammon the painful and never-to-be-forgotten outrage of

David against Bathsheba and her husband Uriah the Hittite took place. It is principally through this narrative that we know the tediousness of that siege, since the adultery with Bathsheba and the birth of at least one child took place during the course of it.

(2) **Rebellion of Absalom.** The latter years of David's reign were afflicted by the inevitable results of polygamy and despotism, viz., the quarrels of the sons of different mothers, and their eagerness to seize the kingdom before their father's death. Of all his sons, Absalom had naturally the greatest pretensions, being, by his mother's side, grandson of Talmai, king of Geshur, while through his personal beauty and winning manners he was high in popular favor. It is evident, moreover, that he was the darling son of his father. When his own sister Tamar had been dishonored by her half-brother Amnon, the eldest son of David, Absalom slew him in vengeance, but in fear of his father then fled to his grandfather at Geshur. Joab, discerning David's longings for his son, effected his return after three years; but the conflict in the king's mind is strikingly shown by his allowing Absalom to dwell two full years in Jerusalem before he would see his face.

The insurrection of Absalom against the king was the next important event; in the course of which there was shown the general tendency of men to look favorably on young and untried princes rather than on those whom they know for better and for worse. Absalom erected his royal standard at Hebron first, and was fully prepared to slay his father outright, which might probably have been done if the energetic advice of Ahithophel had been followed. While they delayed David escaped beyond the Jordan, and with all his troop met a most friendly reception, not only from Barzillai and Machir, wealthy chiefs of pastoral Gilead, but from Shobi, the son of the Ammonite king Nahash, whose power he had destroyed and whose people he had hewed in pieces. We likewise learn on this occasion that the fortunes of David had been all along attended by 600 men of Gath, who now, under the command of Ittai the Gittite, crossed the Jordan with all their households, in spite of David's generous advice that they return to their own country.

(3) **Death of Absalom.** Strengthened by the warlike eastern tribes, and surrounded by his experienced captains, the king no longer hesitated to meet Absalom in the field. A decisive victory was won at the wood of Ephraim, and Absalom was slain by Joab in the retreat. The old king was heart-stricken at this result, and, ignorant of his own weakness, superseded Joab in the command of the host by Amasa, Absalom's captain. Perhaps Joab on the former occasion, when he murdered Abner, had blinded the king by pleading revenge for the blood of Asahel; but no such pretense could here avail. The king was now probably brought to his determination, partly by his disgust at Joab, partly by his desire to give the insurgents confidence in his amnesty. If Amasa is the same as Amasai, David may likewise have retained a grateful remembrance of the cordial greeting with which he had led a strong band to his assistance at the critical period of his abode in Ziklag (1 Chron. xii:18); moreover, Amasa, equally with Joab, was David's nephew, their two mothers, Abigail and Zeruah, being sisters to David by at least one parent (2 Sam. xvii:25; 1 Chron. ii:13, 16).

(4) **Assassination of Amasa.** The unscrupulous Joab, however, was not so to be set aside. Before long, catching an opportunity, he assassi-

nated his unsuspecting cousin with his own hand; and David, who had used the instrumentality of Joab to murder Uriah, did not dare to resent the deed.

(5) **New Insurrection.** A quarrel, which took place between the men of Judah and those of the other tribes in bringing the king back, had encouraged a Benjamite named Sheba to raise a new insurrection, which spread with wonderful rapidity. Amasa was collecting troops as David's general at the time when he was treacherously assassinated by his cousin, who then, with his usual energy, pursued Sheba, and blockaded him in Beth-maachah before he could collect his partisans. Sheba's head was cut off and thrown over the wall; and so ended the new rising. Yet this was not the end of trouble; for the intestine war seems to have inspired the Philistines with the hope of throwing off the yoke. Four successive battles are recorded (2 Sam. xxi:15-22), in the first of which the aged David was nigh to being slain. His faithful officers kept him away from all future risks, and Philistia was once more, and finally, subdued.

(6) **Conspiracy of Adonijah.** The last commotion recorded took place when David's end seemed nigh, and Adonijah, one of his elder sons, feared that the influence of Bathsheba might gain the kingdom for her own son Solomon, Adonijah's conspiracy was joined by Abiathar, one of the two chief priests, and by the redoubtable Joab, upon which David took the decisive measure of raising Solomon at once to the throne. Of two young monarchs, the younger and the less known was easily preferred, when the sanction of the existing government was thrown into his scale; and the cause of Adonijah immediately fell to the ground. Amnesty was promised to the conspirators, yet it was not very faithfully observed. (See SOLOMON.)

6. Foreign Relations.

(1) **Toleration of Foreigners.** Numerous indications remain to us that, however eminently David was imbued with faith in Jehovah as the national God of Israel, and however he strove to unite all Israel in common worship, he still had no sympathy with the later spirit which repelled all foreigners from co-operation with Jews. In his early years necessity made him intimate with Philistines, Moabites and Ammonites; policy led him into league with the Tyrians. He himself took in marriage a daughter of the king of Geshur; it is the less wonderful that we find Uriah the Hittite (2 Sam. xi.), Gether the Ishmaelite (1 Chron. ii:17), and others, married to Israelitish wives. The fidelity of Ittai the Gittite, and his six hundred men, has been already alluded to. It would appear, on the whole, that in tolerating foreigners Solomon did not go beyond the principles established by his father, though circumstances gave them a fuller development.

(2) **Standing Army.** It has been seen that the reign of David began as that of a constitutional monarch, with a league between him and his people; it ends as a pure despotism, in which the monarch gives his kingdom away to whomsoever he pleases, and his nominee steps at once into power without entering into any public engagements. The intensity of the despotism is strikingly shown in the indirect and cautious device by which alone Joab dared to hint to the king the suitableness of recalling Absalom from banishment, though he believed the king himself to desire it (2 Sam. xiv). All rose necessarily out of the standing army which David kept up as an instrument of conquest and of power, by the side of which constitutional liberty could not stand.

The standing army which Saul had begun to maintain was greatly enlarged by David. An account of this is given in 1 Chron. xxvii; from which it would seem that 24,000 men were constantly maintained on service, though there was a relieving of guard every month. Hence, twelve times this number, or 288,000, were under a permanent military organization, with a general for each division in his month.

On one occasion (2 Sam. viii:3) David fought against Hadadezer about a district on the river Euphrates. Yet it is not to be imagined that he had any fixed possession of territory so distant, which indeed could have had no value to him.

(3) Slight Inclination for Commerce. A warrior from his youth, he seems to have had little perception of the advantages of commerce; and although the land of Edom was long under his power, he made no effort to use its ports of Eziongeber and Elath for maritime traffic. Much less was he likely to value the trade of the Euphrates, from which river he was separated by a tedious distance of desert land, over which, without the possession of superior cavalry, he could not maintain a permanent sovereignty. No attempt seems to have been made in David's reign to maintain horses or chariots for military purposes. Even chieftains in battle, as Absalom on his fatal day, appear mounted only on mules. Yet horses were already used in state equipages, apparently as a symbol of royalty (2 Sam. xv:1).

(4) Archers and Slingers. That in the opening of Saul's reign the Philistines had deprived the Israelites of all the most formidable arms is well known. It is probable that this may have led to a more careful practice of the sling and of the bow, especially among the southern tribes, who were more immediately pressed by the power of the Philistines. Such weapons cannot be kept out of the hands of rustics, and must have been essential against wild beasts. But from causes unknown the Benjamites were peculiarly celebrated as archers and slingers (Judg. xx:16; 1 Chron. viii:40; xii:2; 2 Chron. xiv:8; xvii:17), while the pastoral tribes beyond the Jordan were naturally able to escape all attempts of the Philistines to deprive them of shield, spear, and sword. Hence the Gadites, who came to David at Ziklag, are described as formidable and full-armed warriors, 'with faces like lions, and swift as mountain rocs' (1 Chron. xii:8).

(5) Bodyguard of the King. The bodyguard of David was an important appendage to his state and a formidable exhibition of the actual despotism under which, in fulfillment of the warning of Samuel, Israel had now fallen. (See CHERETHITES AND PELETHITES.)

(6) Cabinet of David. The *cabinet* of David, (if we may use a modern name) is thus given (1 Chron. xxvii:32-34) with reference to a time which preceded Absalom's revolt: (1) Jonathan, David's uncle, a counsellor, wise man, and scribe; (2) Jehiel, son of Hachmoni, tutor (?) to the king's sons; (3) Ahithophel, the king's counsellor; (4) Hushai, the king's companion; (5) after Ahithophel, *Jehoiada, the son of Benaiah*; (6) Abiathar, the priest. It is added, 'and the general of the king's army was Joab.'

(7) Royal Bailiffs. Twelve royal bailiffs are recited as a part of David's establishment (1 Chron. xxvii:25, 31), having the following departments under their charge: (1) The treasures of gold, silver, etc.; (2) the magazines; (3) the tillage (wheat, etc.); (4) the vineyards; (5) the wine cellars; (6) the olive and sycamore trees; (7) the oil cellars; (8) the herds in Sharon; (9) the herds in the valleys; (10) the

camels; (11) the asses; (12) the flocks. Concerning the closing scenes of David's life no more need here be said; the celebrated enumeration of the people by Joab will be noticed under the article STATISTICS.

F. W. N.

7. Character. The eminently prosperous state in which David left his kingdom to Solomon appears to prove that he was, on the whole, faithfully served, and that his own excellent intentions, patriotic spirit and devout piety (measured, as it must be measured, by the standard of those ages), really made his reign beneficial to his subjects. If it reduced them under despotism, yet it freed them from a foreign yoke and from intestine anarchy; if it involved them in severe wars, if it failed of uniting them permanently as a single people, in neither of these points did it make their state worse than it found them. We must not exact of David either to reign like a constitutional monarch, to uphold civil liberty, or by any personal piety to extract from despotism its sting. Even his most reprobate offense has no small palliation in the far worse excesses of other Oriental sovereigns; and his great superiority to his successors justifies the high esteem in which his memory was held.

Dean Stanley, *Smith's Bib. Dict.*, says: "The difficulties which attend on his character are valuable as proofs of the impartiality of Scripture in recording them and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Bayle) in later times, have seized on its dark features and exaggerated them to the utmost. And it has been often asked, both by the scoffers and the serious, how the man after God's own heart could have murdered Uriah, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter: "Who is called 'the man after God's own heart?' David, the Hebrew king, had fallen into sins enough—blackest crimes—there was no want of sin. And therefore the unbelievers sneer, and ask: 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often baffled, never-ended struggle of it be forgotten? . . . David's life and history, as written for us in those Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled—sore baffled—driven as if into entire wreck; yet a struggle never ended, ever with tears, repentance, true unconquerable purpose begun anew" (*Carlyle's Heroes and Hero Worship*, p. 72).

Another distinguished writer says: "If we proceed to put together, in its most general features, the whole picture of David which results from all these historical testimonies, we find the very foundations of his character to be laid in a peculiarly firm and unshaken trust in Jehovah, and the brightest and most spiritual views of the creation and government of the world, together with a constant, tender and sensitive awe of the Holy One in Israel, a simple, pure striving never to be untrue to him, and the strongest efforts to return to him all the more loyally after errors and transgressions. . . . His mouth continually overflows with heartfelt praise of Jehovah, and his actions are ever redolent of the nobility inspired

by a real and living fear of him (for the errors by which he is carried away stand out prominently just because of their rarity). . . . In the clear daylight of Israel's ancient history David furnishes the most brilliant example of the noble elevation of character produced by the old religion" (Ewald, *Hist. of Israel*, vol. iii, pp. 57, 58).

8. Literature. Dean Stanley, *History of the Jewish Ch.*, ii:40-155; Porter, *Giant Cities*, p. 232; Perowne, *Book of Psalms* i. xviii-xxiv; Krummacher, *David, der Koenig*, Eng. transl. N. Y., 1868. For the Analysis of Samuel, see Wellhausen, *Composition* (1889), pp. 248-266; Kuenen, *Onderzoek* (1887), i:386 ff., or *Hist. Krit. Einleitung* (1890), i. ii:37-62, 72; Budde, *Richter und Samuel* (1890), pp. 210-276. For the text, Driver, *Heb. Text of Sam.* (1890); Wellhausen, *Text d. Buecher Sam.* (1871). (1896), ii:35-49, 119-182; Cheyne, *Devout Study of Criticism* (1892). *Mod. Criticism and the Preachings of the Old Testament*, George Adam Smith, 1901).

Figurative. Jesus Christ is frequently called David, because he was the antitype of the former. He is the chosen one of God, who sprung from Bethlehem; the man according to his heart, that fulfills all his counsels. How noted his fidelity, meekness and humility! his love to God, zeal for his honor and devout intimacy with him! Thrice, that is, in his conception, at his baptism and at his ascension, he was plentifully anointed with the Holy Ghost above measure, to be the Head of God's chosen people. He is the covenant-head of his spiritual seed, who are kings unto God. He is our sweet psalmist, who sings for himself and indites our songs and tunes our hearts to praise God. He is our great prophet and king, who instructs, forms and governs his church, the Israel of God. Through what debasement, labor, reproach, temptation from the world, from heaven, from hell, from relations, from friends, from foes, did he obtain his kingdom and glory! With what resignation, courage and steady eye to his Father's glory, and sure hope of a happy issue, he endured the whole. How he defeats and destroys the lions, the bears, the giants of opposition! He fulfilled the law, destroyed death and the grave, and by the Gospel conquers the nations to the obedience of faith, and puts his chosen people in possession of the whole inheritance and dominion assigned them of God! How skillful, compassionate and righteous is he, in the government of his subjects; and how active in preparing the temple above for his people, and in preparing them for it! His *mighty men*, who, by the word of the gospel do wondrous exploits, are *prophets, apostles, evangelists, pastors and teachers* (Eph. iv:11 ff), and his faithful warriors are such as being discontented with their natural state of poverty, debt and disgrace, desert the service of the world, and are enlisted in his service (Ps. lxxxix; Ezek. xxxiv, xxxvii; Hos. iii:5). (See JESUS CHRIST.)

DAVID, CITY OF (dā'vid).

1. The name given by David to the castle of Zion, which he captured from the Jebusites, and in which he dwelt (1 Chron. xi:7). It was on the southwest side of Jerusalem.

2. Bethlehem was called the city of David (Luke ii:4, 11), being the birthplace of the king. (See BETHLEHEM; JERUSALEM.)

DAWN (dān). See DAY.

DAY (dā), (Heb. יוֹם, *yome*; Gr. ἡμέρα, *hay-mer'-ah*).

(1) **Civil or Calendar Day.** The earliest measure of time on record is the day: 'The evening and the morning were the first day' (Gen. i:5). Here the word 'day' would seem to denote the civil or calendar day of twenty-four hours, including 'the evening,' or natural night, and 'the morning,' or natural day. It is remarkable that in this account 'the evening,' or natural night, precedes 'the morning,' or day. Hence the Hebrew compound *eh'-rcb bo'-ker*, 'evening-morning,' which is used by Daniel (vii:14) to denote a civil day. In fact, the Jewish civil day began, as it still does, not with the morning, but the evening—thus the Sabbath commences with the sunset of Friday, and ends with the sunset of Saturday.

(In the account of the days of creation we arc, however, to understand periods of time. (See CREATION; COSMOGONY.)

(2) **Inconveniences of Reckoning.** The inconveniences resulting from a variable commencement of the civil day, earlier or later, according to the different seasons of the year, as well as the equally varying duration of the natural day and night, must have been very considerable, and are sensibly felt by Europeans when traveling in the East, where the ancient custom in this matter is still observed. These inconveniences must be less obvious to the people themselves, who know no better system; yet they were apparent to several ancient nations—the Egyptians (Plin. *Hist. Nat.* ii:77), the Ausonians and others—and induced them to reckon their civil day from midnight to midnight, as from a fixed invariable point, and this usage has been adapted by most of the modern nations of Europe. We thus realize the advantage of having our divisions of the day, the hours, of equal duration, day and night, at all times of the year; whereas among the Orientals the hours and all other divisions of the natural day and night are of constantly varying duration, and the divisions of the day vary from those of the night, excepting at the equinoxes.

(3) **Natural Day.** The natural day was at first divided into three parts, morning, noon and evening, which are mentioned by David as hours or times of prayer (Ps. lv:17).

The natural night was also originally divided into three parts, or watches (Ps. lxxiii:6; xc:4). The *first*, or *beginning of the watches*, is mentioned in Lam. ii:19; the *middle watch*, in Judg. vii:19, and the *morning watch*, in Exod. xiv:24. Afterwards the strictness of military discipline among the Greeks and Romans introduced an additional night watch. The *second* and *third watches of the night* are mentioned in Luke xii:38, and the *fourth* in Matt. xiv:25. The four are mentioned together by our Lord in Mark xiii:35, and described by the terms, 'the late watch;' 'the midnight;' 'the cock-crowing,' and 'the morning.'

(4) **Division of Watches.** The precise beginning and ending of each of the four watches is thus determined:

1. *Opsay*, 'the late,' began at sunset and ended with the third hour of the night, including the evening dawn, or twilight. It was also called 'even-tide' (Mark xi:11), or simply 'evening' (John xx:19).

2. *Mesonukteen*, 'the midnight,' lasted from the third hour till midnight.

3. *Alektoro-phonias*, 'the cock-crowing,' lasted

from midnight till the third hour after, or to the ninth hour of the night. It included the two cock-crowings, with the second of which it ended.

4. *Pro-i*, 'early,' lasted from the ninth to the twelfth hour of the night, or sunrise, including the morning dawn, or twilight. It was also called 'morning,' or 'morning-tide,' *hora* being understood (John xviii:28).

The division of the day into twelve hours was common among the Jews after the captivity in Babylon. The word *hour* first occurs in the book of Daniel (iv:19), and it is admitted by the Jewish writers that this division of the day was borrowed by them from the Babylonians. Our Lord appeals to this ancient, and then long-established, division as a matter of public notoriety: 'Are there not twelve hours in the day?' (John xi:9).

This, however, was the division of the natural day into twelve hours, which were therefore variable according to the seasons of the year, at all places except the equator, and equal, or of the mean length, only at the vernal and autumnal equinoxes, being longer in the summer half-year and shorter in the winter. The inconvenience of this has already been intimated.

The *first hour* of the day began at sunrise; the *sixth hour* ended at mid-day, or noon; the *seventh hour* began at noon, and the *twelfth hour* ended at sunset.

The days of the week had no proper names among the Hebrews, but were distinguished only by their numeral order. (See WEEK.)

Figurative. (1) In prophetic language a *day* is put for a year; and so a week is seven years, a month thirty, and a year or time, 360 (Ezek. iv:5, 6; Dan. ix:24, and vii:25; Rev. iv:15, and x:3). (2) *One day is with the Lord as a thousand years, and a thousand years as one day.* God's duration is without succession of moments, so that a longer period is no more in his account, and in comparison with his eternity, than a shorter one (2 Pet. iii:8). (3) As the day is a period proper for work, so any noted occasion of mercy or judgment is called a *day* (Ps. xxxvii:13; Mal. iv:1; Jer. l:4, 30). (4) The *day* of persons is either their birthday (Job iii:1) or the season of merciful opportunities and prosperity (Luke xix:42; comp. Hos. vii:5; Amos v:8), or their *day* or season of ruin and trouble (Ps. xxxvii:13, and cxxxvii:7; Job iii:8), or the eternal period of their complete happiness (Rom. xiii:12). (5) A *day of power* is that period in which Jesus, by his word and spirit, powerfully converts sinners to himself (Ps. cx:3). (6) A *day of espousals* is the period in which one, or rather many, souls are spiritually united to Christ (Cant. iii:11). (7) A *day of slaughter* signifies a time of excessive feasting, as when multitudes of peace offerings were slain or when some sumptuous feast is held (James v:5). (8) The *day of vengeance* in Christ's heart, and *year of his redeemed*, is the appointed time for punishing his enemies, and for saving, delivering and comforting his people (Is. lxiii:4). (9) The season of gospel light, opportunities and success is called a *day* and a *day of salvation*; it is a period of light, labor and comfort (Is. xlix:8; 2 Chron. vi:2; Ps. cxviii:23). (10) Saving knowledge of Christ, and a state of gracious union with him, are called a *day* (1 Thess. v:5, 8; 2 Pet. i:19). (11) The state of heavenly glory is called a *day of redemption*; there the ransomed constantly enjoy the light of God's countenance, are delivered from bondage and trouble and are active in the service of God (Eph. iv:30). (12) A *great day* is a season of something very great

and wonderful; and that either of great mercy, as when the Jews shall be converted to the Lord (Hos. i:11), or of great trouble and vengeance, as on the Jews when led captive by the Chaldeans, and when almost destroyed by the Romans (Jer. xxx:7; Joel ii:31; Mal. iv:5), and on heathenism and Antichrist at their downfall (Rev. vi:17, and xvi:14). (13) *That day*; in predictions, does not always signify the time of the events mentioned just before, but a noted period, as Is. xi:1, and xxvii:1, or of the last judgment (Jude 6). (14) *This day* denotes a time near at hand, as well as one present (Deut. ix:1, and xi:8). (15) *This day* sometimes denotes eternity, wherein Christ was divinely begotten, and which admits of no yesterday or to-morrow (Ps. ii:7; Is. xliii:13), or the period of his resurrection, when his eternal generation and divine Sonship were manifested (Acts xiii:33). (16) The *latter* or *last days* denote future time in general (Gen. xlix:1), the period of the New Testament dispensation (Is. ii:2), the last part of the Gospel period (1 Tim. iv:1; 2 Tim. iii:1), or the day of death and judgment (Jam. v:3). (17) A *good day* is one of prosperity, feasting and gladness (Esth. viii:17, and ix:22). (18) An *evil* or *bitter day* is a time of trouble and distress (Amos vi:3, and viii:10). (19) *To-day* denotes a present season of grace and opportunity of salvation (Ps. xcv; Heb. iii. and iv). (20) *In one day* sometimes denotes suddenly, and all at once (Rev. xviii:8). (21) *In the day time* signifies publicly, or at a set time (2 Pet. ii:13; Ps. xlii:8), or in a time of scorching trouble and persecution (Is. iv:6). (22) *All the day* is constantly, habitually (Deut. xxviii:32; Ps. xxv:5).

DAY OF ATONEMENT (dā òv à-tōn'ment). See ATONEMENT, DAY OF.

DAY OF CHRIST (dā òv krìst), also called "his day," "that day," "the day of the Lord."

The *day of Christ* is either the period of his humiliation and the time of the powerful spread of the Gospel (John viii:56), or the period of the Jewish destruction, and of the last judgment. The season is fixed; and great is, or will be, the work and discoveries made therein (2 Pet. iii:12; 1 Cor. iii:13, and v:5; Phil. i:6); or the *Christian Sabbath*, which he set apart to commemorate the memory of his resurrection (Rev. i:10); or the day of his coming again (see also 1 Cor. i:8; Phil. i:6; 2 Thess. ii:2).

DAY OF JUDGMENT (dā òv jùj'ment). See JUDGMENT.

DAY OF THE LORD (dā òv the lôrd).

The *day of the Lord* often signifies the period when he will execute his fearful judgments (Is. ii:12, and xliii:6; Ps. xxxvii:13; Job xxiv:1; Zeph. i:14, 18). (See DAY OF CHRIST).

DAY'S JOURNEY (dā'z jûr-nÿ), a standard often used in the Bible for reckoning distance (Gen. xxxi:23; Ex. iii:18; Num. xi:31; Deut. i:2; 1 Kings xix:4; 2 Kings iii:9; Jonah iii:3, 4; Luke ii:44; Acts i:12).

But the term usually meant the actual time covered in a journey rather than any definite distance. Its length would vary according to the nature of the ground traversed; on a level plain it would be longer than over a country broken by hills or water courses. Its distance would, again, be conditioned by the circumstances or capabilities of the traveler; a messenger on a hasty errand (Gen. xxxi:23) would achieve better results than a caravan, the rate of which would be regulated by the slowest beast of burden. A sturdy courier, without undue exertion, might put twenty-five to thirty miles behind him in a day; while a caravan, with its encumbrances, would

not be able to overtake more than about twenty miles at the most. The camel usually proceeds at a rate of about two and one-half miles an hour, and, as six to eight hours would be sufficient for a day, a caravan (probably implied Luke ii:44) might accomplish fifteen to twenty miles; with much impedimenta, as recorded in the travels of the patriarchs (Gen. xxx:36), or of the Israelites (Num. x:33), the day's journey would necessarily be much less.—A. Grieve, *Hastings' Bib. Dict.* (See **SABBATH DAY'S JOURNEY.**)

DAYS (dāz), signify a period of duration; thus, the *days* of men are their whole life (Ps. xc:9).

Figurative. (1) The *days of a tree* denote a long, happy period (Is. lxxv:22). (2) The *days of Christ* denote the period of his powerfully gathering the nations to himself and governing his people (Jer. xxiii:6). (3) The *days of heaven* mark eternal duration (Ps. lxxxix:29). (4) The events that happen in a period (Ps. xxxvii:18; xxxi:15, and cxix:84; Is. vii:17). (5) Persons of great age (Job xxxii:7). (6) The *ten days* of the church's tribulation denote a short time, or the ten years of persecution, from A. D. 302 to 312 (Rev. ii:10).

DAYSMAN (dāz'mān), (Heb. יָוֹם, *yaw-kakh'*, to set right), an *umpire*, *arbitrator* or *mediator* (Job ix:33), is an old English word derived from *day*, in the specific sense of a day *fixed for a trial*.

DAYSRING (dā'sprīng), (Heb. שָׁחַר, *shakh'ar*, Job xxxviii:12; Gr. ἀνατολή, *an-at-ol-ay'*).

Jesus Christ is called the *day-spring that visits us from on high*. By his appearance in our nature, by his righteousness, resurrection, saving discoveries of himself, and appearance to judgment, he introduces light and comfort; and brings in a day of gospel dispensation, spiritual knowledge, a gracious state and endless glory (Luke i:78).

DAYSTAR (dā'stār), (Gr. φωσφόρος, *foce-for'os*, lightbearing; (Lat. *Lucifer*), the planet Venus, the morning star (2 Pet. i:19).

Perhaps, in a lower sense, David is the *star* that came out of Jacob, and smote the corners of Moab, and destroyed the children of Sheth; but in the highest sense it refers to Jesus, the *Bright and Morning Star*, whose glory is bright, and ushers in an eternal day to his people; and so is their joy, and the terror of the wicked, who love the works of darkness. Compare Num. xxiv:17 with Rev. ii:28 and xxii:16.

DEACON (dē'k'n), (Gr. διάκονος, *dee-ak'on-os*, ministrant).

This word in its more extended sense is used, both in Scripture and in ecclesiastical writers, to designate *any person who ministers in God's service*.

1. Officers in the Church. In 2 Cor. vi:4, the Apostle says, 'But in all things approving ourselves as the ministers (*deacons*) of God.' Again (Eph. iii:7), 'Whereof I was made a minister (*deacon*); and in Col. i:2, 3, he employs the same epithet to express the character of his office. In Rom. xv:8, St. Paul calls our Lord *deacon of the circumcision*; and, in his Epistle to the Philippians, he addresses himself to the *bishops and deacons* (Phil. i:1).

But it is in its more confined sense, as it expresses the *third* order or office of the ministry of the primitive Church, that we are to examine the meaning of the word *Deacon*.

(1) Origin. Some say that the office of deacon had an existence before the election of the seven

persons of whom we read in Acts vi. That the duties of these seven deacons were not of an exclusively secular character is clear from the fact that both Philip and Stephen preached, and that one of them also *baptized*. (Smith, *Bib. Dict.*)

Ignatius, a martyr-disciple of St. John, and bishop of Antioch (A. D. 68), styles them as once 'ministers of the mysteries of Christ,' adding that they are not ministers of meats and drinks, but of the Church of God (Ignat. *Ep. ad Trall.* n.:2).

Cyprian, bishop of Carthage (A. D. 250), whilst referring their origin to Acts vi, styles them ministers of episcopacy and of the Church (Cypr. *Ep.* 65, al. 3, *ad Rogat.*); at the same time he asserts that they were called *ad altaris ministerium*—to the ministry of the altar.

Tertullian, a celebrated father of the second century, classes them with bishops and presbyters as guides and leaders to the laity.

(2) Forbidden to Assume Priestly Functions. The fourth Council of Carthage expressly forbids the deacon to assume any one function peculiar to the priesthood by declaring, '*Diaconus non ad sacerdotium, sed ad ministerium consecratus.*' He is not ordained to the priesthood but for the purpose of ministering. (See also 18th Can. Con. Nic.)

(3) Ordination of Deacons. His ordination, moreover, differed from that of presbyter both in its form and in the powers which it conferred. For in the ordination of a presbyter, the presbyters who were present were required to join in the imposition of hands with the bishop; but the ordination of a deacon might be performed by the bishop alone, because, as the 4th Can. of the 4th Council of Carthage declares, he was ordained not to the priesthood, but to the inferior services of the Church.

2. Duties. We now proceed to notice what these services specifically were.

(1) To Assist the Bishop. The deacon's more ordinary duty was to assist the bishop and presbyter in the service of the sanctuary; especially was he charged with the care of the utensils and ornaments appertaining to the holy table (Isidorus, *Epistola ad Landefredum*).

(2) At the Sacrament. In the administration of the Holy Sacrament, that it was theirs to hand the consecrated elements to the people is evident from Justin Martyr (*Apol.* ii. p. 152) and from Cyprian (*Serm.* v. 'De Lapsis').

(3) Administer Baptism. Deacons had power to administer the sacrament of baptism (Tertull. *De Bapt.* c. 17; also Hieron. *Dial. contr. Lucif.* c. 4, p. 139).

(4) Instructors. The office of the deacon was not to preach, so much as to instruct and catechise the catechumens. His part was, when the bishop or presbyter did not preach, to read a homily from one of the Fathers. St. Ambrose, Bishop of Milan, A. D. 380, says expressly that deacons, in his time, did not preach, though he thinks that they were all originally evangelists, as were Philip and Stephen.

(5) Receive Offerings. It was the deacon's business to receive the offerings of the people; and, having presented them to the bishop or presbyter, to give expression in a *loud voice* to the names of the offerers (see Cypr. *Ep.* 10, al. 16, p. 37, Hieron. *Com. in Esck.* xviii. p. 537).

(6) Imposition of Hands. Deacons were sometimes authorized, as the bishops' special delegates, to give to penitents the solemn imposition of hands, which was the sign of reconciliation (Cypr. *Ep.* 13, al. 18, *ad Eter.*).

(7) Suspension of Inferior Clergy. Deacons had power to suspend the inferior clergy; this,

however, was done only when the bishop and presbyter were absent and the case urgent (*Constit. Apost.* viii:28).

(8) **Scribes and Disputants.** The ordinary duty of deacons, with regard to general Councils, was to act as scribes and disputants according as they were directed by their bishops. In some instances they voted as proxies for bishops who could not attend in person; but in no instance do we find them voting in a general Council by virtue of their office. But in provincial synods the deacons were sometimes allowed to give their voice, as well as the presbyters, in their own name.

(9) **Care of the Poor.** But, besides the above, there were some other offices which the deacon was called upon to fill abroad. One of these was to take care of the necessitous, orphans, widows, martyrs in prison, and all the poor and sick who had any claim upon the public resources of the church. It was also his especial duty to notice the spiritual, as well as the bodily, wants of the people; and wherever he detected evils which he could not by his own power and authority cure, it was his duty to refer them for redress to the bishop.

In general the number of deacons varied with the wants of a particular church. Sozomen (vii:19, p. 100) informs us that the church of Rome, after the apostolic model, never had more than seven deacons.

(10) **Celibacy.** It was not till the close of the third century that deacons were forbidden to marry. The council of Ancyra, A. D. 344, in its 10th Can., ordains that if a deacon declared at the time of his ordination that he would marry, he should not be deprived of his function if he did marry; but that if he married without having made such a declaration, 'he must fall into the rank of laics!'

(11) **Required Qualifications.** The *qualifications* required in deacons by the primitive church were the same that were required in bishops and presbyters; and the characteristics of a deacon, given by St. Paul in his Second Epistle to Timothy, were the rule by which a candidate was judged fit for such an office. The second Council of Carthage, 4th Can., forbids the ordination of a deacon before the age of twenty-five; and both the Civil and Canon Law, as may be seen in Justinian's *Novels*, 123, c. 14, fixed his age to the same period.

(12) **Archdeacons.** The primitive church had its archdeacon, though when the office was first instituted is a matter of dispute with learned men. He was not in priest's orders; but was selected from the deacons by the bishop, and had considerable authority over the other deacons and inferior orders. Neander, *Ch. Hist.* (Torrey's transl.) i:184, ff.; Bingham, *Orig. Eccles.* bk. ii:20; Sawyer, *Organic Christianity*, Ch. xiii; Dexter, *Congregationalism*, p. 134 ff.

DEACONESS (dē'k'n-ēs), (Gr. *διακόνισσα*, *deakon-ō's-sa*).

1. Deaconesses of the Early Church. That the order of Deaconess existed in the Christian church, *even in Apostolic days*, is evident from Rom. xvi:1: 'I commend unto you Phebe, our sister, which is a *servant* (ὄσαν διάκονον, a deaconess) of the church which is at Cenchrea.

(1) **Early Mention.** The *earliest* Fathers of the church, moreover, speak of the same order of persons.

(2) **Ordination.** It is a disputed point with some learned men whether deaconesses were ordained by imposition of hands. However, the

fifteenth Canon of the Council of Chalcedon expressly declares that deaconesses were so ordained, and this is fully confirmed by the author of the *Apost. Constitutions*, viii:19. Still, deaconesses were not consecrated to any *priestly function*. Some heretics, indeed, allowed women to teach, exercise, and to administer baptism; but all this he sharply rebukes as being contrary to the apostolic rule (Tertullian, *De Præscript.* 41).

2. Qualifications. Certain qualifications were necessary in those who were taken into this order.

(1) **Widowhood.** It was necessary that she should be a *widow*. On this Tertullian (*Ad Uxorem*, i:7, p. 275) thus expresses himself: 'The discipline of the church and apostolical usage (alluding to 1 Tim. v:9) forbid that any widow be elected unless she have married but *one* husband.' Virgins, it is true, were sometimes admitted into the order of deaconesses; but this was the exception, and not the rule.

(2) **Motherhood.** No widow, unless she had borne children, could become a *deaconess*. This rule arose out of a belief that no person but a mother can possess those sympathizing and tender feelings which ought to animate the deaconess in the discharge of her *peculiar* duties.

(3) **Once Married.** The early church was very strict in exacting the rule which prohibits the election of any to be deaconesses who had been twice married, though lawfully, and successively to two husbands, one after the other. Thus Tertullian (*Ad Uxorem*, iv:7) says, 'The apostle requires them (deaconesses) to be *univiræ*—'the wives of one man.' Others, however, give to these words of the apostle another sense. They suppose the apostle to exclude only those widows who, having divorced themselves from their former husbands, had married again. (See Suicer's *Thesaurus*, tom. i. p. 866.)

3. Duties. (1) **Baptism of Women.** One of the *peculiar* duties, then, of the deaconesses was at the baptism of *women*. The custom of the early church being to baptize all adult persons by immersion (see Suicer's *Thesaur.* tom. i. p. 634), it was necessary to have the assistance of this order of persons. Epiphanius speaks of this practice in his *Exp. Fid.* xxi; also Justin. *Novel.* vi. p. 6.

(2) **Instructors.** Another duty the deaconesses had to perform was to instruct and prepare the catechumens for baptism.

(3) **Visitation of Prisoners.** In times of danger and persecution it was the duty of the deaconesses to visit the martyrs in prison, because they could more easily gain access to them, and with less suspicion and hazard than the deacons.

(4) **Station at Church Door.** The deaconesses stood at the entrance of the church in order to direct the women as to the place each one should occupy during divine service. How long this order continued in the Christian church is not quite certain (Suicer's *Thesaurus*, tom. i. p. 69). It was not however discontinued everywhere at once, and it was not till the tenth century that it was wholly abrogated, see Bona, *Rep. Liturg.* i:25, 15; Howson, *Deaconesses, etc.* (Lond.); Ludlow, *Woman's Work in the Ch.* (Lond.); Ripley, *Ch. Polity* (Boston); Schaff, *Apostolic Hist.* sec 135; *ibid.*, *Hist. of the Christian Ch.* ii. sec 52).

DEAD (dēd), (Heb. *מוֹת*, *muth*, to die; Gr. *νεκρός*, *nek-ros'*, dead).

1. Deprived of natural life (1 Pet. iv:6; Ruth i:8).

2. Without spiritual life; under the dominion of sin; void of grace; incapable to perform any spiritual exercise (Eph. ii:1; 1 Tim. v:6); or even desperately obstinate in wickedness (Luke xv:24).

3. What never had life, as idols, etc. (Job xxvi:5; Is. viii:19).

4. What has no continued existence, no living soul to be reunited to its body (Matt. xxii:32).

5. In a state of mortality; condemned or signally exposed to death (Rom. viii:10; Gen. xx:3).

6. In a state of oppression, slavery, and desperate-like wretchedness (Is. xxvi:19; Ezek. xxxvii:1-14).

7. Unfit for generation, according to the power of nature (Rom. iv:19; Heb. xi:12).

8. Formal hypocrites; or much decayed in grace (Rev. iii:1).

9. The resurrection of the dead (1 Cor. xv:29).

When an Israelite died in any house or any tent, all the persons and furniture in it contracted a pollution, which continued seven days (Num. xix:13-16). All who touched the body of one who died, or was killed in the open fields, all who touched men's bones, or a grave, were unclean seven days. To cleanse this pollution, they formerly took the ashes of the red heifer, sacrificed by the high-priest on the day of solemn expiation: (Num. xix) on these they poured water in a vessel, and a person who was clean dipped a bunch of hyssop in the water, and sprinkled with it the furniture, the chamber, and the persons, on the third day and on the seventh day. It was required that the polluted person should previously bathe his whole body, and wash his clothes; after which he was clean (ver. 17-22).

Anciently the Jews had women hired to lament at funerals, and who played on doleful instruments, and walked in procession. The rabbins say that an Israelite was enjoined to have two of these musicians at his wife's obsequies, besides the women hired to weep. Persons who met the funeral procession, in civility joined the company, and mingled their groans. To this our Saviour seems to allude: (Luke vii:32).

Figurative. (1) *Let the dead bury their dead*; let men dead in sin bury those naturally dead; or let the dead lie unburied, rather than the preaching of the gospel be hindered (Matt. viii:22). (2) *Dead faith* is that persuasion of Divine truth which flows not from spiritual life, and is not productive of good works (James ii:17, 29). (3) *Dead works* are those that flow not from a principle of spiritual life, but from corrupt nature, which is in a state of spiritual death (Heb. ix:14). (4) *To be dead to the law*, as a covenant, is to be delivered from the obligations of it, and from a reigning inclination to be under it (Rom. vii:4); and it is *dead* to us when it can exercise no commanding or condemning power over our conscience (Gal. ii:19). (5) Sin is *dead* relatively when it lies undiscovered and unregarded in the soul (Rom. vii:8); it is *dead* really when it is mortified and slain by the word, spirit, and blood of Christ (Rom. vi:6). (6) *To die to sin*, or be dead to it, is to be freed from the dominion of it, and the curse due to it by the blood of Christ, and by his grace drawn from the love and service of it (Rom. vi:7). (7) The saints are *dead* both to the law and to sin (Col. iii:3).

DEAD SEA, THE (dĕd sē).

In Scripture it is called the *Salt Sea* (Gen. xiv:3; Num. xxxiv:12, etc.) the *Sea of the Plain* or *Arabah* (Deut. iii:17; iv:49, etc.), *East Sea* (Ezek. xlvi:18; Joel ii:20; Zech. xiv:8; A. V. "former"). The name *Dead Sea* has been applied to it since the second century, and it was also called the *Asphalt Sea* by early writers.

DEAF (dĕf or dĕf), (Heb. שָׁרָה, *khay-rashe'*; Gr. κωφός, *ko-fos'*, blunted).

Moses enacted a statute of special protection to the deaf mute (Lev. xix:14). It might even be understood as extending them kindness (Is. xxix:18, 35; Matt. xi:5; Mark vii:32).

Figurative. (1) *Deafness* is symbolical of a want of spiritual ability or concern to regard or understand divine things (Is. xlii:18, 19 and xxix:18). (2) Saints are as *deaf* and *dumb*, when they exercise the utmost patience and resignation under trouble; neither murmuring against God, nor angrily vindicating themselves before men (Ps. xxxviii:13, and xxxix:9).

DEAL (dĕl), (Heb. מִשְׁכָּל, *asw'saw'*, deal; אֲשֵׁרֵי, *as-ee-ree'*), a word often used in the sense of *part*, with fractional numbers (Ex. xxix:40).

In the authorized version *deal* is used in the phrase 'tenth deal' or 'tenth deals,' for Heb. *aseeron*, wherever that word occurs (Revised Version 'tenth part' or 'tenth parts').

DEARTH (dĕrth), (Heb. רָעָב, *raw-awb'*, hunger; Gr. λιμός, *lee-mos'*, scarcity), a scarcity of food in consequence of failure of rain (1 Kings xvii:1), the plague of locusts (Ps. lxxviii:46), or the result of improperly farming the land (Ruth i:1).

DEATH (dĕth), (Heb. מוֹת, *marw'veth*, death).

Since death can be regarded in various points of view, the descriptions of it must necessarily vary. If we consider the state of a dead man, as it strikes the senses, death is the cessation of natural life. If we consider the cause of death, we may place it in that permanent and entire cessation of the feeling and motion of the body which results from the destruction of the body. Among theologians, death is commonly said to consist in the separation of soul and body, implying that the soul still exists when the body perishes.

Death does not consist in this separation, but this separation is the consequence of death. As soon as the body loses feeling and motion, it is henceforth useless to the soul, which is therefore separated from it.

Scriptural representations, names, and modes of speech respecting death:

(1) **Return to Dust.** One of the most common in the Old Testament is, *to return to the dust*, or *to the earth*. Hence the phrase, *the dust of death*. It is founded on the description Gen. ii:7 and iii:19, and denotes the dissolution and destruction of the *body*. Hence the sentiment in Eccles. xii:7,—'The dust shall return to the earth as it was, the spirit unto God, who gave it.'

(2) **Removal of Breath.** A withdrawing, exhalation, or removal of the breath of life (Ps. civ:29).

(3) **This Tabernacle.** A removal from the body, a being absent from the body, a departure from it, etc. This description is founded on the comparison of the body with a tent or lodgment in which the soul dwells during this life. Death destroys this tent or house, and commands us to travel on (Job iv:21; Is. xxxviii:12). Whence Paul says (2 Cor. v:1) 'our earthly house of this tabernacle' will be destroyed; and Peter calls death a 'putting off of this tabernacle' (2 Peter i:13, 14).

(4) **Unclothed.** Paul likewise uses the term ἐκδύεσθαι, *ekdooesthai*, *to be unclothed*, in reference to death (2 Cor. v:3, 4), because the body is represented as the garment of the soul, as Plato calls it. The soul, therefore, as long as it is in the body, is clothed; and as soon as it is disembodied, is naked.

(5) **Sleep.** The terms which denote *sleep* are applied frequently in the Bible, as everywhere else, to death (Ps. lxxvi:5; Jer. li:39; John xi:13, *sq.*). Nor is this language used exclusively for the death of the pious, as some pretend, though this is its prevailing use. Homer calls *sleep* and *death* twin-brothers (*Iliad*, xvi:672). The terms also which signify to lie down, to rest (*e. g.* נָשָׁא, *occumbere*), also denote death.

(6) **Departure.** Death is frequently compared with and named from a *departure*, a *going away* (Job x:21; Ps. xxxix:4; Matt. xxvi:24; Phil. i:23; 2 Tim. iv:6).

Figurative. Death, when personified, is described as a ruler and tyrant, having vast power and a great kingdom, over which he reigns. But the ancients also represented it under some figures which are not common among us. We represent it as a man with a scythe, or as a skeleton, etc.; but the Jews, before the exile, frequently represented death as a hunter, who lays *snares* for men (Ps. xviii:5, 6; xci:3). After the exile, they represented him as a man, or sometimes as an angel (the angel of Death), with a cup of poison, which he reaches to men. From this representation appears to have arisen the phrase, which occurs in the New Testament, to *taste death* (Matt. xvi:28; Heb. ii:9), which, however, in common speech, signifies merely to *die*, without reminding one of the origin of the phrase. The case is the same with the phrase to *see death* (Ps. lxxxix:48; Luke ii:26).

Christ *abolished death*, and swallowed it up in victory, when by his own death he removed the curse and sting from his people's natural death, and redeemed them from spiritual and eternal death. He will complete his victory over death natural hereafter, when he will raise them from the dead, and give them the full possession of eternal happiness (Is. xxv:8; 1 Cor. xv:54, 55; 2 Tim. i:10). (See *Knapp's Christian Theology*, by Dr. Leonard Wood; *Watson's Institutes*; *Christian Dogmatics*, Martensen; *Brown, Bib. Dict.*)

DEBATE (dê-bât'), (Heb. מַטְסָאָה, *mats-tsaw'*).

Among evils of the Gentiles given in the Epistle to the Romans (i:29) Paul includes *debate*; the rendering of Gr. *épis*, *er'is*, wrangling, strife (A. V.). In early English *to debate* was to fight and wrangle.

DEBIR (dê'bir), (Heb. דְּבִיר, *deb-eer'*, sanctuary, place of the oracle).

1. A city in the tribe of Judah, about thirty miles southwest from Jerusalem, and ten miles west of Hebron. It was also called Kirjath-sepher (Josh. xv:15), and Kirjath-sannah (xv:49). The name *Debir* means 'a word' or 'oracle,' and is applied to that most secret and separated part of the Temple, or of the most holy place, in which the ark of the covenant was placed, and in which responses were given from above the cherubim. From this, coupled with the fact that Kirjath-sepher means 'book-city,' it has been conjectured that *Debir* was some particularly sacred place or seat of learning among the Canaanites, and a repository of their records. 'It is not indeed probable,' as Professor Bush remarks, 'that writing and books, in our sense of the words, were very common among the Canaanites; but some method of recording events, and a sort of learning was, doubtless, cultivated in those regions.' *Debir* was taken by Joshua (x:38); but it being afterward retaken by the Canaanites, Caleb, to whom it was assigned, gave his daughter Achsah in marriage to his nephew Othniel for his bravery in carrying

it by storm (Josh. xv:16). The town was afterward given to the priests (xxi:15). No trace of it is to be found at the present time.

2. A place belonging to Gad, beyond the Jordan (Josh. xiii:26).

3. A town on the north boundary of Judah near to the valley of Achor (Josh. xv:7), and therefore back of Jericho.

4. A king of Eglon, in the low country of Judah, and one of the five hanged by Joshua (Josh. x:3, 23).

DEBORAH (dëb'o-rah), (Heb. דְּבוֹרָה, *deb-o-raw'*, a bee).

1. The nurse of Rebekah (Gen. xxxv:8), whom she accompanied from the house of Bethuel (xxiv:59).

2. A prophetess, wife of Lapidoth. She dwelt, probably, in a tent, under a well-known palm-tree between Ramah and Bethel, where she judged Israel (Judg. iv:4, 5). This probably means that she was the organ of communication between God and his people, and probably, on account of the influence and authority of her character, was accounted in some sort as the head of the nation, to whom questions of doubt and difficulty were referred for decision. In her triumphal song she says—

'In the days of Shamgar, son of Anath,
In the days of Jael, the ways lay desert,
And highway travelers went in winding by-
paths.
Leaders failed in Israel, they failed,
Until that I Deborah arose,
That I arose, a mother in Israel.'

From the further intimations which that song contains, and from other circumstances, the people would appear to have sunk into a state of total discouragement under the oppression of the Canaanites; so that it was difficult to rouse them from their despondency and to induce them to make any exertion to burst the fetters of their bondage. From the gratitude which Deborah expresses toward the people for the effort which they finally made, we are warranted in drawing the conclusion that she had long endeavored to instigate them to this step in vain. At length she summoned Barak, the son of Abinoam, from Kedesh, a city of Naphtali, on a mountain not far from Hazor, and made known to him the will of God that he should undertake an enterprise for the deliverance of his country. But such was his disheartened state of feeling, and at the same time such his confidence in the superior character and authority of Deborah, that he assented to go only on the condition that she would accompany him. To this she at length consented. They then repaired together to Kedesh, and collected there—in the immediate vicinity of Hazor, the capital of the dominant power—ten thousand men, with whom they marched southward, and encamped on Mount Tabor. Sisera, the general of Jabin, king of Hazor, who was at the head of the Canaanitish confederacy, immediately collected an army, pursued them, and encamped in face of them in the great plain of Esdraelon. Encouraged by Deborah, Barak boldly descended from Tabor into the plain with his ten thousand men to give battle to the far superior host of Sisera, which was rendered the more formidable to the Israelites by nine hundred chariots of iron. The Canaanites were beaten; and Barak pursued them northward to Harosheth. Sisera himself, being hotly pursued, alighted from his chariot and escaped on foot to the tent of Heber the Kenite, by whose

wife he was slain. This great victory (dated B. C. between 1409 and 1296), which seems to have been followed up, brock the power of the native princes, and secured to the Israelites a repose of forty years' duration. During part of this time Deborah probably continued to exercise her former authority; but nothing more of her history is known.

The song of triumph, which was composed in consequence of the great victory over Sisera, and said to have been 'sung by Deborah and Barak,' is usually regarded as the composition of Deborah; and was probably indited by her to be sung on the return of Barak and his warriors from the pursuit.

It is a peculiarly fine specimen of the earlier Hebrew poetry, and is one of the best of oriental poetry. We give a few verses from a revised version:

Lord, when thou wentest forth out of Seir,
When thou marchedest out of the field of
Edom,
The earth trembled, the heavens also dropped,
Yea, the clouds dropped water.
The mountains flowed down at the presence of
the Lord,
Even that Sinai at the presence of the Lord the
God of Israel.
* * * * *
The kings came, they fought;
Then fought the kings of Canaan
In Taanach by the waters of Megiddo;
They took no gain of silver.
They fought from heaven;
The stars from their courses fought against
Sisera.
The river Kishon swept them away,
That ancient river, the river Kishon.
March on, my soul, with strength.'

(See BARAK; JAEL.)

Deborah was not so much a judge as one gifted with prophetic command (Judg. iv:6, 14; v:7).

DEBT (dět), (Heb. יָד, *yad*, hand).

"Whoso shall swear by the gold of the temple—by the gift on the altar—is a debtor" (Matt. xxiii:16); is bound by his oath; is obliged to fulfil his vow. "I am debtor to the Greeks and barbarians" (Rom. i:14); under obligations to persons of all nations and characters. Gal. v:3, he is a debtor—is bound—to do the whole law. Men may be debtors to human justice, or to divine justice; bound to obedience, and if that be not complied with, bound to suffer the penalties annexed to transgression.

DEBTOR (dět'ör), (Heb. צֹחֵב, *chob*, debtor, one bound, indebted; debt).

A creditor could not enter a debtor's house when about to take a pledge for a loan (Deut. xxiv:10, 11; Job xxii:6; xxiv:3, 7, 9). A mill, millstone or upper garment, could not be retained as a pledge of debt (Exod. xxii:26, 27; Deut. xxiv:6, 12). A debt that remained unpaid until the seventh year, could not be exacted during that period (Deut. xv:1-11).

For the law at other times see Lev. xxv:14, 32, 39; 2 Kings iv:1; Neh. v:1, 13; Matt. xviii:25. In the time of Moses imprisonment for debt does not seem to have been practiced; but it was in the time of Christ (Matt. xviii:34).

Figurative. Sinners are *debtors* to God: owe all obedience to the precept, and all satisfaction to the penalty of his holy law (Matt. xviii:27; Luke vii:41). Paul was *debtor* to both Jews and Gentiles, wise and unwise; he was bound by ob-

fice to preach the gospel to them (1 Cor. ix:16; Rom. i:14). Love to one another, is a *debt* which we ought to regard ourselves as never able to pay, and which by our love to others we ought continually to be laying them under (Rom. xiii:8).

DECALOGUE (dëk'ä-lög), (Gr. Δεκάλογος, *dek-al'og-os*).

1. The Moral Law. Decalogue is the name by which the Greek fathers designated "the Ten Commandments," which were written by God on tables of stone and given to Moses on Mount Sinai.

(1) **Name.** In Hebrew the name is "ten words" (עֲשֵׂרֵי דְבָרִים, *had-deh-barw-reem' as-eh'reth*, Exod. xxxiv:28; Deut. iv:13; x:4).

(2) **Author.** The decalogue was written upon two stone slabs (Ex. xxxi:18), which having been broken by Moses (xxxii:19), were renewed by God (xxxiv:1, etc.). They are said (Deut. ix:10) to have been written by the finger of God, an expression which always implies an immediate act of the Deity. The decalogue is five times alluded to in the New Testament, there called *commandments*, but only the latter precepts are specifically cited, which refer to our duties to each other (Matt. v:19; xv:9; xix:17; xxii:40; Mark x:19; Luke xviii:20; Rom. xiii:9; vii:7, 8; Matt. v; 1 Tim. i:9, 10). Jeremy Taylor's *Life of Christ*, and *Ductor Dubitan.*; Rosenmüller's *Scholia in Exod.* (See LAW.)

2. Divisions. The circumstance of these precepts being called *the ten words* has doubtless led to the belief that the two tables contained ten distinct precepts, five in each table; while some have supposed that they were called by this name to denote their perfection, *ten* being considered the most perfect of numbers (Philo-Judæus *De Decalogo*). This distinguished philosopher divides them into two pentads, the first pentad ending with Exod. xx:12, 'Honor thy father and thy mother,' etc., or the *fifth* commandment of the Greek, Reformed, and Anglican churches; while the more general opinion among Christians is that the first table contained our duty to God, ending with the law to keep the sabbath holy, and the second, our duty to our neighbor. As they are not numerically divided in the Scriptures, so that we cannot positively say which is the first, which the second, etc., it may not prove uninteresting to the student in Biblical literature, if we here give a brief account of the different modes of dividing them which have prevailed among Jews and Christians. These may be classed as the Talmudical, the Origenian, and the two Masoretic divisions.

(1) **Talmudical.** According to this division the first commandment consists of the words 'I am the Lord thy God, who brought thee out of the land of Egypt, out of the house of bondage' (Exod. xx:2; Deut. v:6); the second (Exod. iii:4), 'Thou shalt have none other Gods beside me; thou shalt not make to thyself any graven image,' etc., to ver. 6; the third, 'Thou shalt not take God's name in vain,' etc.; fourth, 'Remember to keep holy the sabbath day,' etc.; the fifth, 'Honor thy father and thy mother,' etc.; the sixth, 'Thou shalt not kill;' the seventh, 'Thou shalt not commit adultery;' the eighth, 'Thou shalt not steal;' the ninth, 'Thou shalt not bear false witness, etc.; and the tenth, 'Thou shalt not covet,' etc., to the end.

(2) **Origenian.** The next division is the *Origenian*, or that approved by Origen, and is that in use in the Greek and in all the reformed churches, except the Lutheran.

Although Origen was acquainted with the differing opinions which existed in his time in regard

to this subject, it is evident from his own words that he knew nothing of that division by which the number *ten* is completed by making the prohibition against coveting either the house or the wife a distinct commandment. In his eighth *Homily on Genesis*, after citing the words 'I am the Lord thy God, who brought thee out of the land of Egypt,' he adds, 'this is not a part of the commandment.' The first commandment is, 'Thou shalt have no other Gods but me,' and then follows, 'Thou shalt not make an idol.' These together are thought by some to make one commandment; but in this case the number ten will not be complete. Where then will be the truth of the Decalogue? But if it be divided as we have done in the last sentence, the full number will be evident. The first commandment therefore is, 'Thou shalt have no other Gods but me,' and the second, 'Thou shalt not make to thyself an idol, nor a likeness,' etc. Gregory Nazianzen and Jerome took the same view with Origen. It is also supported by the learned Jews Philo and Josephus, who speak of it as the received division of the Jewish Church. This division, which appears to have been forgotten in the Western Church, was revived by Calvin in 1536, and is also received by that section of the Lutherans who followed Bucer, called the Tetrapolitans. It is adopted by Calmet (*Dictionary of the Bible*, French ed., art. *Loi*); This division, which appeared in the Bishops' Book in 1537, was adopted by the Anglican Church at the Reformation (1548), substituting *seventh* for sabbath-day in her formularies. The same division was published with approbation by Bonner in his *Homilies* in 1555.

(3) **First Masoretic.** We shall next proceed to describe the two Masoretic divisions. The first is that in Exodus. According to this arrangement, the first two commandments (according to the Origenian or Greek division), that is, the commandment concerning the worship of one God, and that concerning images, make but one; the second is, 'Thou shalt not take the name of the Lord thy God in vain,' and so on until we arrive at the last two, the former of which is, 'Thou shalt not covet thy neighbor's house,' and the last, or tenth, 'Thou shalt not covet thy neighbor's wife, nor his servant,' etc., to the end. This was the division approved by Luther, and it has been ever since his time received by the Lutheran Church. This division is also followed in the Trent catechism, and may therefore be called the Roman Catholic division. Those who follow this division have been accustomed to give the decalogue very generally in an abridged form: thus the first commandment in the Lutheran shorter catechism is simply, 'Thou shalt have no other gods but me;' the second, 'Thou shalt not take the name of thy God in vain;' the third, 'Thou shalt sanctify the sabbath-day' (*Feyer-tag*). A similar practice is followed by the Roman Catholics, although they, as well as the Lutherans, in their larger catechisms (as the Douay) give them at full length. This practice has given rise to the charge made against those denominations of leaving out the second commandment, whereas it would have been more correct to say that they had mutilated the first, or at least that the form in which they give it has the effect of concealing a most important part of it from such as had access only to their shorter catechisms.

(4) **Second Masoretic.** The last division is the *second Masoretic*, or that of Deuteronomy, sometimes called the Augustinian. This division differs from the former simply in placing the precept 'Thou shalt not covet thy neighbor's wife' before 'Thou shalt not covet thy neighbor's house,' etc.;

and for this transposition it has the authority of Deut. v:21. The authority of the Masorites cannot, however, be of sufficient force to supersede the earlier traditions of Philo and Josephus.

This division was that approved by Augustine who thus expresses himself on the subject: Following up what he had said he observes, 'but to me it seems more congruous to divide them into three and seven, inasmuch as to those who diligently look into the matter, those which appertain to God seem to insinuate the Trinity.' And, indeed, the command, 'Thou shalt have no other gods but me,' is more perfectly explained when images are forbidden to be worshiped. Besides, the sin of coveting another man's wife differs so much from coveting his house, that to the house was joined his field, his servant, his maid, his ox, his ass, his cattle, and all that is his. But it seems to divide the coveting of the house from the coveting of the wife, when each begins thus: '*thou shalt not covet thy neighbor's wife, thou shalt not covet thy neighbor's house,*' to which it then begins to add the rest. For, when he had said, 'thou shalt not covet thy neighbor's wife, he did not add the rest to this, saying, nor his house, nor his field, nor his servant, etc.; but these seem plainly to be united, which appear to be contained in one precept, and distinct from that wherein the wife is named. But when it is said, 'thou shalt have no other gods but me,' there appears a more diligent following up of this in what is subjoined. For to what pertains, 'thou shalt not make an idol, nor a likeness; thou shalt not adore nor serve them,' unless to that which had been said, 'thou shalt have none other gods but me.' The division of Augustine was followed by Bede and Peter Lombard.

The learned Sonntag has entirely followed Augustine's view of this subject and has written a dissertation in vindication of this division in the *Theologische Studien und Kritiken*, Hamburg, 1836-7; to which there has been a reply in the same miscellany from Züllg, in vindication of what he terms the *Calvinistic division*, or that of Origen, which is followed by a rejoinder from Sonntag. Sonntag is so convinced of the necessity of that order of the words, according to which the precept against coveting the wife precedes (as in Deuteronomy) that against coveting the house, etc., that he puts down the order of the words in Exodus as an oversight. The order in the Septuagint version in Exodus agrees with that in Deuteronomy. The Greek church follows this order. Sonntag conceives that the Mosaic division of the decalogue was lost in the period between the exile and the birth of Christ.

W. W.

DECAPOLIS (de-kăp'o-līs), (Gr. Δεκάπολις, *dek-ăp'ol-is*, ten cities).

This appears to denote, not, as is frequently stated, a particular province or district, but certain *Ten Cities*, including the adjacent villages (Joseph. *Vit.* sec. 65), which resembled each other in being inhabited mostly by Gentiles, and in their civic institutions and privileges. In Matt. iv:25, it is said 'multitudes followed Jesus from Galilee, and from Decapolis, and from Jerusalem, and from Judæa, and from beyond Jordan.' This must be considered as a popular mode of expression. We, therefore, cannot agree with Dr. Lightfoot in thinking it 'absurd to reckon the most famed cities of Galilee for cities of Decapolis, when, both in sacred and profane authors, Galilee is plainly distinguished from Decapolis' (*Chorographical Decad.* ch. vii sec. 1; *Works*, x. p. 238). One at least of the Decapoltan towns (Seythopolis, formerly Bethshan) was in Galilee,

and several, if not all the rest, were in the country beyond Jordan. Pliny gives the following list, but allows that a difference of opinion existed as to its correctness: (1) Damascus. (2) Philadelphia. (3) Raphana. (4) Scythopolis. (5) Gadara. (6) Hippos. (7) Dion. (8) Pella. (9) Galasa. (10) Canatha. Josephus speaks of Gadara and Hippos as Grecian cities (*Antiq.* xvii:11, sec. 4), and calls Scythopolis the greatest city of the Decapolis (*Bell. Jud.* iii:9, sec. 7), from which it may be inferred that he excluded Damascus from the number. For Damascus and Raphana, Cellarius substitutes Cæsarea Philippi and Gergesa, and Ptolemy Capitolias (Winer's *Real-wörterbuch*, i. 308). The name Decapolis was in course of time applied to more than *ten* towns, a circumstance which may in part account for the discrepancies in the list given by various writers. The Decapolitan towns referred to in the Gospels were evidently situated not far from the sea of Galilee (Mark v:20; vii:31).

J. E. R.

DEDAN (dē'dan), (Heb. דִּדָּן, *ded-awn*, two persons, meaning doubtful).

(1) Of the descendants of the Cushite Dedan, very little is known. It is supposed that they settled in southern Arabia, near the Persian Gulf; but the existence in this quarter of a place called Dadan or Dadena, is the chief ground for this conclusion.

(2) The descendants of the Abrahamite Jokshan seem to have lived in the neighborhood of Idumæa; for the prophet Jeremiah (xlix:8) calls on them to consult their safety, because the calamity of the sons of Esau, *i. e.*, the Idumæans, was at hand. The same prophet (xxv:23) connects them with Thema and Buz, two other tribes of Arabia Petræa, or Arabia Deserta, as does Ezekiel (xxv:13) with Theman, a district of Edom. It is not always clear when the name occurs which of the two Dedans is intended; but it is probably the Cushite tribe, which is described as devoted to commerce, or rather, perhaps, engaged in the carrying-trade. Its 'traveling companies,' or caravans, are mentioned by Isaiah (xxi:13); in Ezekiel (xxvii:20), the Dedanites are described as supplying the markets of Tyre with flowing riding-cloths; and elsewhere (xxxviii:13) the same prophet names them along with the merchants of Tarshish.

DEDANIM (dēd'a-nīm or de-dā'nim), descendants of Raamah, grandson of Ham (Is:xxi:13). (See DEDAN.)

DEDICATE, DEDICATION (dēd'ī-kāt, dēd'ī-kā'shūn), (Heb. כָּהַן, *kaw-nak'*, to initiate; קָדַשׁ, *kaw-dash'*, to pronounce clean).

A religious ceremony, whereby anything is dedicated or consecrated to the service of God; and it appears to have originated in the desire to commence, with peculiar solemnity, the practical use and application of whatever had been set apart to the divine service. Thus Moses dedicated the Tabernacle in the Wilderness (Exod. xl.; Num. vii.); Solomon his temple (1 Kings viii.); the returned exiles theirs (Ezra vi:16, 17); Herod his (Joseph. *Antiq.* xv:11, 6). The Maccabees having cleansed the Temple from its pollutions under Antiochus Epiphanes, again dedicated the altar (1 Macc. iv:52-9), and an annual festival was established in commemoration of the event. This feast was celebrated not only at Jerusalem, but everywhere throughout the country, in which respect it differed from the feasts of the Passover, Pentecost and Tabernacles, which could only be observed at Jerusalem. Not only were sacred

places thus dedicated, but some kind of dedicatory solemnity was observed with respect to cities, walls, gates and even private houses (Deut. xx:5; Ps. xxx title; Neh. xii:27). We may trace the continuance of these usages in the custom of consecrating or dedicating churches and chapels, and in the ceremonies connected with the 'opening' of roads, markets, bridges, etc., and with the launching of ships.

DEDICATION, FEAST OF (dēd'ī-kā'shūn, fēst öv).

In John x:22, 23, we are told that Jesus was at Jerusalem, walking in Solomon's porch at the time of 'the feast of the dedication, and it was winter.' This is usually supposed to have been the feast commemorating the dedication by Judas Maccabæus, which was celebrated in the month Cisleu, about the winter solstice (answering to the 15th of December). There seems no reason to disturb this conclusion, for the dedication of Solomon's Temple was in the seventh month, or autumn; that of Zerubbabel's Temple in the month Adar, in the spring; and, although that of Herod's Temple was in the winter, we know not that it was celebrated by an annual feast, while the Maccabean dedication was a festival much observed in the time of Christ. (See FEASTS.)

DEED (dēd). See LAND.

DEEP (dēp), (Heb. תְּהוֹמוֹת, *teh-om'*, deep place, the deep [sea]). See ABYSS.

DEER (dēr). See ROEBUCK.

DEFILEMENT (dē-fil'ment), (Heb. מְלִצָּה, *go-el'*, defilement, pollution). (See POLLUTION.)

DEGREE (dē-grē'), (Heb. מַחְלָה, *mah-al-aw'*, a step). This term is used of a group of Levites "of the second *degree*" (1 Chron. xv:18) in the sense of rank or order of enumeration.

DEGREES, SONG OF (dē-grēz, söng öv), (Heb. שִׁיר הַמַּחְלָה, *sheer ham-mah-al-loth'*, song of steps), a title given to each of the fifteen psalms from cxx to cxxxiv inclusive. (See PSALMS.)

DEHAVITES (de-hā'vītes), (Heb. דְּהַוִּי, *deh-haw-yay'*, or דְּהַוִּי, *deh-haw-vay'*, Ezra iv:9 only), inhabitants of that part of Assyria which was watered by the river Diaba (probably the *Dai* of Herodotus (i:125); a Persian tribe, Ezra iv:9). They were planted by the Assyrian monarch Esar-haddon or King Assur-bani-pal, after the completion of the captivity of Israel.

DEHORT (dē-hōrt'), (Prov., ch. 7, cap.; 1 Pet., ch. 2), to dissuade. Only 1 Macc. ix:9, 'they dehorted him, saying, We shall never be able,' and in the headings of some chapters. 'Dehort' (fr. Lat. *dehortari*) is the opposite of 'exhort.' "Exhort" continues, but "dehort," a word whose place "dissuade" does not exactly supply, has escaped us' (Trench, *Eng. Past and Pres.*).

DEKAR (dē-kar), (Heb. דְּקָר, *deh'ker*, stab), Solomon's commissariat officer in the western part of the hill country of Judah (1 Kings iv:9), B. C. 1014.

DELAIAH (dēl'a-ī'ah), (Heb. דְּלַיָּהּ, *del-aw-yaw'*, freed by Jehovah).

1. Father of Shemaiah and son of Mehetabel (Neh. vi:10), B. C. 410.

2. Son of Shemaiah, one of the "princes" in the time of Jehoiakim (Jer. xxxvi:12, 25), B. C. 604.

3. A priest and leader of the twenty-third course in the temple service (1 Chron. xxiv:18), B. C. 1014.

4. Descendants of Delaiah were among those of uncertain lineage, who returned from captivity with Zerubbabel (Ezra ii:60; Neh. vii:62), B. C. 536.

DELICATE (děl'ī-kât), (Heb. נִדְּבָה, *aw-nogue'*, Deut. xxviii:54; Is. xlvi:1; Jer. vi:2), luxurious, effeminate, fine, nice.

DELICATELY (děl'ī-kât-lÿ), (Gr. σπαταλάω, *spat-al-ah'o*, 1 Tim. v:6, marg.), means given up to pleasure, voluptuousness, wantonness.

DELICATES (děl'ī-kâtz), (Heb. נִדְּבָה, *ed-naaw'*, Jer. li:34), pleasure, delight, choice morsels, etc. Same as delicacies.

The words denote most precious things, wealth, etc., that are to the desire as dainty meats to the stomach (Rev. xviii:2; Jer. li:34). *He that delicately bringeth up his servant from a child shall have him become his son at length* (Prov. xxix:21). He that too nicely and indulgently brings up his servant may expect him by and by to grow as bold and familiar, and as full of pretensions, as if he were an heir of the family.

DELILAH (děl-ī'lah), (Heb. דִּלְיָהּ, *del-ee-law'*, languishing, lustful), the woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi:4-18), B. C. about 1060.

The account as given in Judges does not say whether she was an Israelite or a Philistine, but she was probably the latter, and Sorek, her place of residence, was then within the Philistine territory. Samson was frequently with her and allowed her to gain a great influence over him. That she was his wife is very improbable, notwithstanding that that is the opinion of Chrysostom and other patristic writers. (See SAMSON.)

DELUGE (děl'ūj).

The narrative of a flood, given in the book of Genesis (vii, viii), by which, according to the literal sense of the description, the whole world was overwhelmed and every terrestrial creature destroyed, with the exception of one human family and the representatives of each species of animal, supernaturally preserved in an ark, constructed by Divine appointment for the purpose, need not here be followed in detail. The account furnished by the sacred historian is circumstantially distinct, and the whole is expressly ascribed to Divine agency, but, in several of the particulars, secondary causes, as rain 'the opening of the windows of Heaven' (vii:11), and the 'breaking up of the fountains of the great deep,' are mentioned, and again the effect of wind in drying up the waters (viii:1). It is chiefly to be remarked that the whole event is represented as both commencing and terminating in the most gradual and quiet manner, without anything at all resembling the catastrophes and convulsions often pictured in vulgar imagination as accompanying it. When the waters subsided, so little was the surface of the earth changed that the *vegetation continued uninjured*; the olive-trees remained from which the dove brought its token.

We allude particularly to these circumstances in the narrative as being those which bear most upon the probable *nature* and extent of the event, which it is our main object in the present article to examine, according to the tenor of what little evidence can be collected on the subject, whether from the terms of the narrative or from other sources of information which may be opened to us by the researches of science.

Much, indeed, might be said on the subject in other points of view, and especially in a more

properly theological sense, it may be dwelt upon as a part of the great series of Divine interpositions and dispensations which the sacred history discloses. We may allude to the fact that in almost all nations, from the remotest periods, there have prevailed certain traditional narratives and legendary tales of similar catastrophes. Such narratives have formed a part of the rude belief of the Egyptians, Chaldeans, Greeks, Scythians and Celtic tribes. They have also been discovered among the Peruvians and Mexicans and the South Sea Islanders. (See Bryant, *Ancient Mythology*; Harcourt, *On the Deluge*; Ignatius Donnelly, *Lost Atlantis*.)

The general results of geological researches show no evidence of any great aqueous revolution at any comparatively recent period having affected the earth's surface over any considerable tract. Changes have been produced, but on a comparatively small scale, and in isolated districts (Pye Smith, *Geology and Scripture*, p. 130, 2d ed.). *Universality*, the author shows, must be taken in the sense of *great extent*; often, indeed, the very same phrase is applied to a very limited region or country, as in Gen. xli:56; Deut. ii:25; Acts ii:5, etc.). Thus, so far as the description goes, the expression may refer to a local deluge. (See ANTEDILUVIANS.)

DEMÁS (dē'mas), (Gr. Δημάς, *day-mas'*), a Thesalonian mentioned by Paul (2 Tim. iv:10), who was at first a most zealous disciple of the apostle (Col. iv:14; Philem. 24), and very serviceable to him at Rome during his imprisonment, but afterwards forsook him to follow a more secular life.

DEMETRIUS (de-mē'tri-ūs), (Gr. Δημήτριος, *day-may'tree-os*).

1. A goldsmith of Ephesus, who made niches, or little chapels, or portable models of the famous temple, for Diana of Ephesus, which he sold to foreigners (Acts xix:24).

Observing the progress of the gospel, not in Ephesus only, but in all Asia, he assembled his fellow craftsmen, and represented that, by this new doctrine, not only their trade would suffer, but that the worship of the great Diana of Ephesus was in danger of being entirely forsaken. This produced an uproar and confusion in the city, till at length the town clerk appeased the tumult by firmness and persuasion.

2. A man mentioned by John as an eminent Christian (3 John 12). This is the only notice of him (A. D. about 90).

DEMETRIUS (Gr. as above.)

(1) **Demetrius I.** Demetrius Soter, king of Syria, reigned twelve years (B. C. 175). He was son of Seleucus IV., surnamed Philopater; but, being a hostage of Rome when his father died, his uncle, Antiochus Epiphanes, who in the interim arrived in Syria, procured himself to be acknowledged king and reigned eleven years; after him, his son, Antiochus Eupator, reigned two years. At length Demetrius Soter regained his father's throne. He is often mentioned in the books of the Maccabees.

(2) **Demetrius II.** Demetrius Nicanor, or Nicator, son of Demetrius Soter, was for many years deprived of the throne by Alexander Balas; but he at length recovered it by the assistance of Ptolemy Philometor, his father-in-law. After a number of vicissitudes, he was killed (B. C. 125), and was succeeded by his eldest son, Seleucus, to whom he left a dangerous rival in the person of Alexander, surnamed Zebina.

(3) **Demetrius III** (surnamed *Eukairos*, 'Prosperous,' and on coins Theos, Soter, Philometor, etc.) was a son of Antiochus Grypus, and

grandson of Demetrius Nicator. On the death of his father civil wars ensued, in the course of which two of his elder brothers lost their lives, whilst Philip, the third, secured a part of Syria, and Demetrius established himself in Cœle-Syria, with Damascus as his capital, by the aid of Ptolemy Lathyrus, king of Cyprus (Jos. *Ant.* xiii; xiii:4). In Judæa, too, civil war broke out between Alexander Jannæus and his Pharisee subjects. The latter invited the assistance of Demetrius (Jos. *Ant.* xiii; xiii:5; *Wars*, I; iv:4), who possibly regarded it as a good opportunity to extend his kingdom to its ancient limits on the west and the south. He entered the country with a large army, was joined by the insurgent Jews, and defeated Jannæus in a pitched battle near Shechem (Jos. *Ant.* xiii; xiv:1; *Wars*, I; iv:5). After various vicissitudes he was taken prisoner and sent to Arsaces IX, and by him was confined until his death. He probably reigned from B. C. 95-88. R. W. Moss, *Hastings' Bib. Dict.*

DEMON (dē-mon), (Gr. *δαίμων*, *dah'ee-mown*, and its derivative, *δαίμωνιον*, *dahee-mon'ee-on*).

This word has been used by ancient writers with great latitude, being applied by them to every order of beings superior to man, including even the highest. It is applied to any particular divinity.

Summary of Opinions. Since no distinct ideas of the ancient Jewish doctrines concerning demons can be obtained from the Septuagint, we next have recourse to the heathens, and from their writings, owing to the universal prevalence of belief in demons, ample information may be obtained. The following is offered as a summary of their opinions:

(1) **Middle Beings.** Demons, in the theology of the Gentiles, are middle beings between gods and mortals. This is the judgment of Plato, which will be considered decisive: 'Every demon is a middle being between God and mortal.' He thus explains what he means by a middle being: 'God is not approached immediately by man, but all the commerce and intercourse between gods and men are performed by the mediation of demons.' He enters into further particulars: "Demons are reporters and carriers from men to the gods, and again from the gods to men, of the supplications and prayers of the one, and of the injunctions and rewards of devotion from the other" (Plato, *Sympos.*, pp. 202, 203, tom. iii ed. Serran.). 'And this,' says the learned Mede, 'was the *æcumenical* philosophy of the apostles' times and of the times long before them.'

(2) **Of Two Kinds.** Demons were of two kinds; the one were the souls of good men, which upon their departure from the body were called heroes, were afterward raised to the dignity of demons, and subsequently to that of gods (Plutarch, *De Defect. Orac.*). Plato (*Cratylus*, p. 398, tom. i edit. Serran.) says 'the poets speak excellently who affirm that when good men die they attain great honor and dignity, and become demons.' It is also admitted that Jamblichus, Hierocles and Simplicius use the words angels and demons indiscriminately. Philo (*De Gigantibus*) says that souls, demons and angels are only different names that imply one and the same substance, and he affirms (*De Somn.*) that Moses calls those angels whom the philosophers call demons.

(3) **Souls of Bad Men.** It was also believed that the souls of *bad* men became evil demons (Chalcid. in *Platon. Tim.*, cap. 135, p. 330). Accordingly *δαίμωνιος* often occurs in ancient authors as a term of reproach. The *other* kind of demons were of more noble origin than the

human race, having never inhabited human bodies (Plato, *Tim.*, pp. 41, 42, 69, 71, 75; Apuleius, *De Deo Socratis*, p. 690).

(4) **Objects of Worship.** Those demons who had once been souls of men were the objects of *immediate worship* among the heathens (Deut. xxvi:14; Ps. cvi:28; Is. viii:19), and it is in contradistinction to these that Jehovah is so frequently called 'the *living God*' (Deut. v:6, etc.; Farmer's *Essay on the Demoniacs*, *passim*).

(5) **Malignant.** The heathens held that some demons were malignant by *nature*, and not merely so when provoked and offended. Plutarch says, 'it is a very ancient opinion that there are certain *wicked* and *malignant* demons, who envy good men, and endeavor to hinder them in the pursuit of virtue, lest men should be partakers of greater happiness than they enjoy' (Plut. *Dion.*, p. 958, tom. i edit. Paris, 1624). On this passage Bishop Newton remarks: 'This was the opinion of all the later philosophers, and Plutarch undeniably affirms it of the very ancient ones' (*Dissert. on the Proph.*, Lond., 1826, p. 476). Pythagoras held that certain demons sent *diseases* to men and cattle (Diog. Laert., *Vit. Pythag.*, p. 514, ed. Amstel.). Zaleucus, in his preface to his Laws (*apud Stobæum*, Serm. xlii), supposes that an evil demon might be present with a witness to influence him to injustice.

In later times Josephus uses the word demon always in a bad sense, as do the writers of the New Testament, when using it as *from themselves*, and in their *own sense* of it (*De Bell. Jud.* vii:6, sec. 3). 'Demons are no other than the spirits of the wicked, that enter into men and kill them, unless they can obtain some help against them.' For proof of the latter assertion we must refer the reader to the contents of the New Testament, and if necessary for a reconciliation of the apparent exceptions, to Farmer's *Essay*.'

(6) **Demons of New Testament.** It is frequently supposed that the demons of the New Testament are fallen angels; on the contrary, it is maintained by Farmer that the word is never applied to the Devil and his angels, and that there is no sufficient reason for restricting the term to spirits of a higher order than mankind. They who uphold the former opinion urge that our Lord, when accused of casting out demons by Beelzebub, the prince of demons, replies, How can Satan cast out Satan? (Mark iii:23, etc.). There is no doubt but that *Satan* and *Diabolus* are the same, and hence *Beelzebub* and *Diabolus* are evidently the same being. It is further urged that it is but fair and natural to suppose that the writers of the New Testament use the word demons in the same sense in which it was understood by their contemporaries, which, as it appears from Josephus and other authorities, was, that of the spirits of the wicked, and that if these writers had meant anything else they would have given notice of so wide a deviation from popular usage. The writings of the Fathers show that they sometimes understood the demons to be fallen angels; at other times they use the word in the same sense as the ancient philosophers. Justin Martyr affirms (*Apol.* i:2, p. 65) that 'those persons who are seized and thrown down by the souls of the deceased are such as all men agree in calling demoniacs, or mad.' (Creuzer, *Religions de l'Antiquité*, iii, pt. 1, pp. 1-55; pt. iii, p. 873 ff.; Campbell, *Four Gospels*, Prel. Diss., vi, pl. 1). J. F. D.

DEMONIAC (dē-mō'nī-āk), (Gr. *δαίμωνιζομαι*, *dahee-mon-id'zom-ahee*, to be under the power of a demon, rendered "possessed with a devil," possessed of an evil spirit).

Demonized persons, in the New Testament, are those who were supposed to have a demon or demons occupying them, suspending the faculties of their minds and governing the members of their bodies, so that what was said and done by the demoniacs was ascribed to the indwelling demon.

Apollonius thus addresses a youth supposed to be possessed: 'I am treated contumeliously by the demon, and not by thee' (Comp. Matt. viii: 28, 31; Mark v:2; ix:12; Luke viii:27, 32).

1. Reality of Demoniacal Possession. The correctness of the opinion respecting those who are called *δαιμονιζόμενοι* in the New Testament which prevailed among the Jews and other nations in the time of our Lord and his apostles has been called in question. On the one hand, it is urged that the details of the evangelical history afford decisive evidence of the truth and reality of demoniacal possessions in the sense already explained, at least during the commencement of Christianity; on the other hand, it is contended that the accounts in question may all be understood as the phenomena of certain diseases, particularly hypochondria, insanity and epilepsy; that the sacred writers used the *popular language* in reference to the subject, but that they themselves understood no more than that the persons were the subjects of ordinary diseases. Here issue is joined—and it is to the evidence in this cause that our attention will now be directed.

Those who contend that the demoniacs were really possessed by an evil spirit urge the following considerations:

(1) Unusual Expressions. The demoniacs express themselves in a way unusual for hypochondriacal, insane or epileptic persons (Matt. viii:29; Mark i:24); they possessed supernatural strength (Mark v:4); they adjure Jesus not to torment them; they answer the questions proposed to them in a rational manner; they are distinctly said to have 'come out of' men and to have 'entered into swine,' and that consequently the whole herd, amounting to about 2,000, ran violently down a precipice into the sea (Matt. viii:32; Mark v:13). The supposition which has been maintained by Lardner, among others, that the swine were *driven into* the sea by the demoniacs is irreconcilable with the language of the narrative, being also highly improbable in itself; madmen do not act in concert, and rarely pursue the same train of maniacal reasoning.

(2) Not Mental Diseases. No mental diseases are predicated of the dumb (Matt. ix:32), or of the blind and dumb (Matt. xii:22). Do such diseases ever produce blindness?

(3) Epilepsy. It is admitted that the symptoms of the youth described in Matt. xvii:15; Mark ix:17; Luke ix:39 coincide precisely with those of epilepsy, but they are attributed to the agency of the demon on that very account.

(4) Spirit of Divination. The damsel at Philippi is said to have been possessed with a spirit of *divination*, which was the means of obtaining much gain to her masters, and to have understood the Divine commission of Paul and his companions (Acts xvi:17). Is this to be ascribed merely to an aberration of mind?

(5) Confession. The demoniacs themselves confess that they were possessed with demons (Mark v:9); the same is asserted of them by their relatives (Matt. xv:22). The apostles and evangelists assert that persons possessed with demons were brought unto Jesus (Matt. iv:24; Mark i:32), or met him (Luke viii:27). Jesus commands them not to make him known as the Messiah

(Mark i:34, margin); rebuked them (Matt. xvii:18). The evangelists declare that the demons departed from their victims at his command (Matt. xvii:18; Mark ix:25, 26; Luke iv:35; xi:14); and Jesus himself asserts it (Luke xiii:32).

(6) Distinctions. The writers of the New Testament make distinctions between the diseased and the demoniacs (Mark i:32; Luke vi:17, 18); and Jesus himself does so (Matt. x:8, etc.).

(7) Recognition of the Christ. The demoniacs knew Jesus to be the Son of God (Matt. viii:29; Mark i:24; v:7), and the Christ (Luke iv:41).

(8) Jesus Calls Them Demons. Jesus addresses the demons (Matt. viii:32; Mark v:18; ix:25; Luke iv:35); so does Paul (Acts xvi:18). Jesus bids them be silent (Mark i:25); to depart and enter no more into the person (Mark ix:25).

(9) Called Demons by the Seventy. In Luke x the Seventy are related to have returned to Jesus, saying: 'Lord, even the demons are subject to us through thy name; and Jesus replies (verse 18): 'I beheld Satan, as lightning, fall from heaven.'

(10) No Discord Among Demons. When Jesus was accused by the Pharisees of casting out demons by Beelzebub, the prince of the demons, he argued that there could be no discord among demoniacal beings (Matt. xii:25, etc.).

(11) Natural History. Jesus makes certain *gratuitous* observations respecting demons (see Matt. xii:43, 44), which seem like facts in their natural history. In regard to the demon cast out of the youth, which the disciples could not cast out, he says: 'This *kind* (i. e., of demons) goeth not out but by prayer and fasting.' Can these words be understood otherwise than as revealing a real and particular fact respecting the nature of demons (Matt. xvii:21)?

(12) Bound by Satan. The woman which had a spirit of infirmity, and was bowed together (Luke xiii:11) is, by our Lord himself, said to have been bound by Satan (v:16). In the same way St. Peter speaks of all the persons who were healed by Jesus, as being 'oppressed of the devil' (Acts x:38).

(13) Casting Out of Devils. It is further pleaded that it sinks the importance and dignity of our Saviour's miracles to suppose that when he is said to have cast out devils all that is meant is that he healed diseases.

2. Theories of Opponents. To these arguments the opponents of the theory of real demoniacal possessions reply generally that there can be no doubt that it was the *general belief* of the Jewish nation, with the exception of the Sadducees, and of most other nations, that the spirits of dead men, especially of those who had lived civil lives, and died violent deaths, were permitted to enter the bodies of men, and to produce the effects ascribed to them in the *popular creed*; but the *fact* and real state of the case was that those who were considered to be *possessed* were afflicted with some peculiar diseases of mind or body, which, their true *causes* not being generally understood, were, as is usual in such cases, ascribed to supernatural powers, and that Jesus and his apostles, wishing, of course, to be understood by their contemporaries, and owing to other reasons which can be pointed out, were under the *necessity* of expressing themselves in popular language, and of seeming to admit, or at least of not denying, its correctness. They further plead that the fact, admitted on all hands, that the demon so actuated the possessed as that whatever *they* did was not to be distinguished

from *his* agency, reduces the question, so far as *phenomena* are concerned, to one simple inquiry, namely, whether these phenomena are such as can be accounted for without resorting to supernatural agency. They assert that the symptoms predicated of demoniacs correspond with the ordinary symptoms of disease, and especially of hypochondria, insanity and epilepsy; that the sacred writers themselves give intimations, as plain as could be expected under the circumstances, that they employed popular language; that consequently they are not to be considered as teaching doctrines or asserting facts when they use such language, and that the doctrine of the agency of departed spirits on the bodies of men is inconsistent with certain peculiar and express doctrines of Christ and his apostles.

(1) **Symptoms Cured.** With regard to the *symptoms* related of the demoniacs, it is urged that such persons as were called demoniacs in other countries, and who seem to have labored under precisely the same symptoms, are recorded to have been cured by the use of *medicine*. Josephus and the Jewish physicians speak of medicines composed of stones, roots and herbs being useful to demoniacs (*Gittei*, f. 67). The cure of *diseases* by such methods is intelligible, but is it rational to believe that the spirits of dead men were dislodged from human bodies by medical prescriptions? Maimonides (in *Sabat.* ii:5) says: 'All kinds of diseases which are called melancholy they call an evil spirit' (Comp. Matt. xi:18; John vii:20; x:20).

(2) **Madmen.** With regard to the two demoniacs at Gadara (or *one*, according to Mark and Luke), it is concluded that they were madmen, who fancied that there were within them innumerable spirits of dead men. Accordingly they dwelt among the *tombs* about which the souls of the dead were believed to hover, went naked, were ungovernable, cried aloud, attacked passengers, beat themselves and had in their frenzy broken every chain by which they had been bound. Strength almost superhuman is a common attendant on insanity. Their question, 'Art thou come to torment us?' refers to the cruel treatment of the insane in those times, and which they had no doubt shared, in the endeavors of men to 'tame' them. Both Mark and Luke the *physician* describe the demoniac as *σωφρονούντα* in 'his right mind,' when healed, which implies previous *insanity*. (See also Matt. xii:22; xv:28; xvii:18; Luke vii:21; viii:2; ix:42.) It is true that these demoniacs address Jesus as the Son of God, but they might have heard in their lucid intervals that Jesus, whose fame was already diffused throughout Syria, was regarded by the people as the Messiah. They show their insanity, 'their *shaping* fancies,' by imagining they were demons without number, and by requesting permission to enter the swine. Would actual demons choose such an habitation? They speak and answer, indeed, in a rational manner, but agreeably to Locke's definition of madmen, 'they reason right on false principles, and, taking their fancies for realities, make right deductions from them. Thus you shall find a distracted man fancying himself a king, and with a right inference require suitable attendance. Others, who have thought themselves glass, take the needful care to preserve such brittle bodies' (*Essay on Human Understanding*, vol. i, chap. II, sec. 12). It is true that Jesus commands the *unclean* spirit (so called because believed to be the spirit of a *dead* man), but he does this merely to excite the attention of the people, and to give them full opportunity to observe the miracle. It is not

necessary to suppose that the madmen drove the swine, but merely that, *in keeping with all the circumstances*, the *insanity* of the demoniacs was transferred to them, as the leprosy of Naaman was transferred to Gehazi, for the purpose of illustrating the miraculous power of Christ; and though this was a *punitive* miracle, it might serve the good purpose of discouraging the expectation of temporal benefits from him. If the demoniac is represented as worshipping Jesus, it should be remembered that the insane often show great respect to particular persons.

(3) **Naturally Blind and Dumb.** The men who were dumb, and both blind and dumb, are not said to have been disordered in their intellects any more than the blind man in John v. The disease in their organs was *popularly ascribed* to the influence of demons. It is observable that in the parallel passage (Matt. ix:32), the evangelist says the *man* was dumb.

(4) **Epilepsy.** The symptoms of epilepsy in the youth described (Matt. xvii:15) are too evident not to be acknowledged. If the opinion of relatives is to be pressed, it should be noticed that in this case the father says his 'son is lunatic.' It was most probably a case of combined epilepsy and lunacy, which has been common in all ages. Epilepsy was ascribed to the influence of the moon in those times. The literal interpretation of popular language would therefore require us to believe that he was 'moonstruck,' as well as a demoniac.

(5) **Spirit of Apollo.** The damsel at Philippi is said by Luke to have been possessed with a *spirit of Apollo*. It was *her* fixed idea. The gift of divination is said by Cicero to have been ascribed to Apollo (*De Divinat.* i:5). Insane persons, pretending to prophesy under the influence of Apollo, would be likely to gain money from the *credulous*. A belief among the common people that the ravings of insanity were sacred was not confined to Egypt. The *larvati*, the *lymphatici*, the *cerriti* of the Romans signify possessed persons. The apostle, who taught that an 'idol is nothing in the world,' did not believe in the reality of her soothsaying. Many demoniacs are mentioned, the peculiar symptoms of whose diseases are not stated, as Mary Magdalene (Mark xvi:9), out of whom Jesus cast seven demons, i. e., restored from an inveterate insanity (seven being the Jewish number of perfection), supposed to be caused by the united agency of seven spirits of the dead. Yet she is said to have been *healed* (Luke viii:2).

(6) **Christ Rebuked Other Objects.** If Jesus forbade the demoniacs to say he was the Christ, it was because the declaration of such persons on the subject would do more harm than good. If he *rebuked* them he also rebuked the wind (Matt. viii:26), and the fever (Luke iv:39). If it be said of them they departed, so it is also said of the leprosy (Mark i:42).

(7) **Questionable Distinctions.** It may be questioned whether the writers of the New Testament make a distinction between the diseased and those possessed of demons, or whether they specify the demoniacs by themselves, as they specify the lunatics (Matt. iv:24), merely as a distinct and *peculiar class* of the *sick*. It is, however, most important to observe that St. Peter includes 'all' who were healed by Jesus under the phrase *them that were oppressed of the devil*, many of whom were not described by the evangelists as subjects of demoniacal possession. Sometimes the specification of the demoniacs is omitted in the general recitals of miraculous cures (Matt. xi:5), and this, too, on the important occasion of our Lord sending to John the Baptist an account

of the miraculous evidence attending his preaching (Matt. xi:5). Does not this look as if they were considered as included under the sick?

(8) **Not All Knew Jesus.** It cannot be proved that all the demoniacs knew Jesus to be the Messiah.

(9) **Addressed Persons.** It is admitted that Jesus addresses the demons, but then it may be said that his doing so has reference partly to the persons themselves in whom demons were supposed to be, and partly to the bystanders; for the same reason that he rebuked the winds in an audible voice, as also the fever.

(10) **Our Lord's Reply.** With regard to our Lord's reply to the Seventy, it will not be urged that it was intended of a local fall of Satan from heaven, unless it may be supposed to allude to his primeval expulsion; but this sense is scarcely relevant to the occasion. If, then, the literal sense be necessarily departed from, a choice must be made out of the various figurative interpretations of which the words admit; and taking the word Satan here in its generic sense, of whatever is inimical or opposed to the Gospel, Jesus may be understood to say, I foresaw the glorious results of your mission in the triumphs which would attend it over the most formidable obstacles. Heaven is often used in the sense of political horizon (Is. xiv:12, 13; Matt. xxiv:29). To be cast from heaven to hell is a phrase for total downfall (Luke x:15; Rev. xii:7-9). Cicero says to Mark Antony: 'You have hurled your colleagues down from heaven.' Satan is here used figuratively. Our Lord does not, therefore, assert the real operation of demons.

(11) **Refutation of Charges.** In the refutation of the charge that he cast out demons by Beelzebub, the prince of the demons, he simply argues with the Pharisees upon their own principles, and 'judges them out of their own mouth,' without assuming the truth of those principles.

(12) **Popular Creed of the Jews.** The facts he seems to assert respecting the wandering of demons through dry places (Matt. xii:43) were already admitted in the popular creed of the Jews. They believed that demons wandered in desolate places (Baruch iv:35). Upon these ideas he founds a parable or similitude, without involving an opinion of their accuracy, to describe 'the end of this generation.' The observations respecting prayer and fasting seem to have relation to that faith in God which he exhorts his apostles to obtain. Prayer and fasting would serve to enable them to perceive the Divine suggestion which accompanied every miracle, and which the apostles had not perceived upon this occasion, though given them, because their animal nature had not been sufficiently subdued.

(13) **Loosing Daughter of Abraham.** The application of the term Satan to the case of the woman who had a spirit of infirmity is plainly an *argumentum ad hominem*. It is intended to heighten the antithesis between the loosing of an ox from his stall and loosing the daughter of Abraham, whom Satan, as they believed, had bound eighteen years.

(14) **Cure of Diseases.** The objection taken from the supposed consequence of explaining the casting out of demons to signify no more than the cure of diseases, that it tends to lower the dignity of the Saviour's miracles, depends upon the reader's complexion of mind, his prior knowledge of the relative dignity of miracles, and some other things, perhaps, of which we are not competent judges.

(15) **Theory Opposed to Express Doctrines.** The theory of demoniacal possessions is opposed

to the known and express doctrines of Christ and his Apostles. They teach us that the spirits of the dead enter a state corresponding to their character, no more to return to this world (Luke xvi:22, etc.; xxiii:43; 2 Cor. v:1; Phil. i:21). With regard to the fallen angels, the representations of their confinement are totally opposed to the notion of their wandering about the world and tormenting its inhabitants (2 Peter ii:4; Jude, verse 6). If it be said that Jesus did not correct the popular opinion, still he nowhere denies that the phenomena in question arose from diseases only. He took no side; it was not his province. It was not necessary to attack the misconception in a formal manner; it would be supplanted whenever his doctrine respecting the state of the dead was embraced. To have done so would have engaged our Lord in prolix arguments with a people in whom the notion was so deeply rooted, and have led him away too much from the purposes of his ministry. 'It was one of the many things he had to say, but they could not then bear them.' It is finally urged that the antedemoniacal theory does not detract from the Divine authority of the Saviour, the reality of his miracles, or the integrity of the historians. *Sub judice lis est* (Jahn's *Biblisches Archæologie*, Upham's transl.; Winer's *Biblisches Real-wörterbuch*, art. 'Besessene'; Moses Stuart's *Sketches of Angelology in Bibliotheca Sacra*, London and New York, 1843; Roberts' *Oriental Illustrations of Scripture*; Morrison, *On Matthew*, pp. 157-168; Sam. Hopkins' *Demoniacal Possessions in the New Testament*, in *Am. Presb. and Theol. Rev.*, October, 1865). J. F. D.

DEN (dĕn), (Heb. מְרֹאָס, *meh-ar-raw'*, with other Hebrew words), Is. xxxii:14; Jer. vii:11, *a cave*; Is. xi:8, *a hole*; Ps. civ:22, *a covert*; Ps. x:9; Jer. ix:11; x:22, *a lair*; Heb. xi:38; Rev. vi:15; Matt. xxi:13; Mark xi:17, *a recess* for hiding. In Dan. vi. *den of lions* is mentioned as a means of execution. This has been confirmed by discoveries at Babylon. (See Porter, *Travels in Persia*, ii:416.)

DENARIUS (dĕ-nā-rī-ŭs), (Gr. δηνάριον, *day-nar-ee-on*), the principal silver coin of the Romans, which took its name from having been originally equal to ten ases.

It was in later times (after B. C. 217) current also among the Jews, and is the coin which is called 'a penny' in the Authorized Version. The denarii were first coined in B. C. 269, or four years after the first Punic war began, and the more ancient specimens are much heavier than those of later date. Those coined in the early period of the commonwealth have the average weight of 60 grains, and those coined under the empire of 52.5 grains. With some allowance for alloy, the former would be worth 8½d. (17 cents), and the latter 7½d. (15 cents). It has been supposed, however, that the reduction of weight did not take place till the time of Nero, and in that case the denarii mentioned in the Gospels must have been of the former weight and value, although 15 cents is the usual computation. A denarius was the day-wages of a laborer in Palestine (Matt. xx:2, 9, 13), and the daily pay of a Roman soldier was less (Tacit. *Ann.* i:17). In the time of Christ the denarius bore the image of the emperor (Matt. xxii:19; Mark xii:15), but formerly it was impressed with the symbols of the republic.

DENIAL (dĕ-nī-al).

1. Heb. כָּזָב, *kaw-khash'*, to be untrue, disown (Josh. xxiv:27; Prov. xxx:9).

2. Gr. ἀπαρνεομαι, *ap-ar-neh'om-ahee*, to declare that one has no knowledge of or connection

with another; of Peter denying Christ (Matt. xxvi: 34, sq., 75; Mark xiv:30, sq., 72; Luke xxii:34, 61); to deny one's self, to lose sight of one's self and one's own interests (Matt. xvi:24; Mark viii:34; Luke ix:23).

3. Gr. ἀρνέομαι, *ar-neh'om-ahēe*, to deny a statement (Mark xiv:70) or occurrence (Acts iv:16).

DENIAL OF CHRIST (dē-nī-al ōv krīst). See PETER.

DENOUNCE (dē-nouns), (Heb. נָגַד, *naw-gad'*, Deut. xxx:18), primitive, to confront fairly, to stand boldly opposite, certify. Hence as in Deut. xxx:18 to announce, declare, proclaim.

DEPOSIT (dē-pōz'it), property kept by one man at another's request, which could be used provided it was returned intact. Under the Mosaic law such property consisted of (1) money or stuff; (2) an ass, or an ox, or a sheep, or any beast (Ex. xxii:7-13; Lev. vi:5, 6).

DEPRAVITY (dē-prāv'ī-tŷ). In theology the term depravity denotes corruption, a change from perfection to imperfection, the sinfulness of man's nature. (See FALL OF MAN; SIN).

DEPTH (dēpth). See ABYSS.

DEPUTY (dēp'ū-tŷ), the rendering of several words: *Peh-khaw'* (Heb. פֶּה־כַּחַשׁ, Esth. viii:9; ix:3; R.V., governor); *Nits-tsawb'* (Heb. נִיטְסָאָב, *appointed*), a *prefect*; Gr. ἀνθύπατος, *anth-oo'pat-os*, Acts xiii:7; comp. xviii:12. Vulg. and R.V., "proconsul." In general, a deputy is an inferior ruler appointed by a superior (1 Kings xxii:47). (See PROCONSUL.)

DERBE (dēr-be), (Gr. Δέρβη, *der'bay*).

A small town of Lycaonia, in Asia Minor, at the foot of the Taurian Mountains, 60 miles south by east from Iconium, and 18 miles east of Lystra. It was the birthplace of Gaius, the friend and fellow-traveler of Paul (Acts xx:4), and it was to this place that Paul and Barnabas fled when expelled from Iconium, A. D. 41 (Acts xiv:6, 21). On his second missionary tour Paul again visited Derbe (Acts xvi:1). Hamilton, *Researches in Asia Minor*, ii:313.

DESERTS (dēz'ērts), (Heb. אֲרָבִים, *ar-aw-baw'*).

In the East, wide, extended plains are usually liable to drought, and consequently to barrenness. Hence the Hebrew language describes a *plain*, a *desert*, and an *unfruitful waste*, by the same word, *Arabah*. The term, which is in general rendered 'wilderness,' מִדְבָּר, *mid-bawr'*, means, properly, a *grazing tract*, uncultivated and destitute of wood, but fit for pasture—a heath or steppe. The *pastures of the wilderness* are mentioned in Ps. lxxv:13; Joel i:19; Joel ii:20, and may be very well explained by reference to the fact that even the Desert of Arabia, which is utterly burnt up with excessive drought in summer, is in winter and spring covered with rich and tender herbage. Whence it is that the Arabian tribes retreat into their deserts on the approach of the autumnal rains, and when spring has ended and the droughts commence, return to the lands of rivers and mountains in search of the pastures which the deserts no longer afford. The same word may therefore denote a region which is desert, and also one which, at stated seasons, contains rich and abundant pastures. But in fact the word translated in our Bibles by 'desert' or 'wilderness' often means no more than the common, uncultivated grounds in the neighborhood of towns on which the inhabitants grazed their domestic cattle.

A great desert or wilderness is generally expressed by the word יְשֻׁעַ, *yesh-ee-mone'*, from יָשַׁע, *yaw-shawm'*, 'to be waste or 'desolate' (1 Sam. xxiii:19, 24; Is. xliii:19, 20). This word is especially applied to that desert of Stony Arabia in which the Israelites sojourned under Moses (Num. xxi:20; xxiii:28; Ps. lxxviii:7; lxxviii:40, etc.). This was the most terrible of the deserts with which the Israelites were acquainted, and the only *real* desert in their immediate neighborhood. It is described under Arabia, as is also that Eastern desert extending from the eastern border of the country beyond Judæa to the Euphrates. It is emphatically called 'the Desert,' without any proper name, in Exod. xxiii:31; Deut. xi:24. (See EDOM; ETHAM; JUDAH; KADESH; MAON; PARAN; SHUR; SIN; SINAI.)

DESIRE (dē-zīr'), (Heb. חָמַד, *khem-daw'*), "without being desired" is used (2 Chron. xxi:20) in the sense of being unregretted.

DESIRE OF ALL NATIONS (nā'shūns), literally the *delight* or *costly* of all the nations (Hag. ii:7).

The term is usually applied to the Messiah; but the proper translation would be, as in the Revised Version, "the desirable things of all nations shall come."

DESPITE (dē-spīt'), (Gr. ἐνυβρίζω, *en-oo-brid'zo*, Heb. x:29, to insult, to treat with contempt; Heb. שָׁקַע, *shek-awt'*, contempt, Ezek. xxv:6).

DESPITEFUL (dē-spīt'fūl), (Heb. שָׁקַע, *shek-awt'*, to push aside, Ezek. xxv:15; Gr. ἐπηράζω, *ep-ay-reh-ad'zo*, to insult; A. V., "despitefully," Matt. v:44, Luke vi:28; Gr. ὑβρίζω, *oo-brid'zo*, to abuse, Acts xiv:5; Rom. i:30).

DESTROYER (dē-stroi'ēr), (Heb. מַשְׁחֵת, *mash-kheeth'*, an *exterminator*, Ex. xii:23), the agent employed in the slaying of the firstborn (Heb. xi:28; Gr. ὁ ὀλοθρεύων, *hō hol-oth-ryoo'on*), the angel or messenger of God (2 Sam. xxiv:15, 16; 2 Kings xix:35; Ps. lxxviii:47; Acts xii:23).

DESTRUCTION (dē-strūk'shūn), (Heb. אֲבִדָּה, *ab-ad-done'*, a *perishing*, Job xxvi:6; xxxi:12; Ps. lxxxviii:11; Prov. xv:11), means a place of destruction, abyss, and is nearly equivalent to SHEOL (which see).

DESTRUCTION, CITY OF. See ON.

DEUEL (de-ū'el), (Heb. דְּעֻיָּאל, *deh-oo-ale'*, known of God), father of Eliasaph, the captain of the tribe of Gad at the time of the census in Sinai (Num. i:14; vii:42, 47; x:20).

In Num. ii:14 the name occurs again as Reuel, owing to the interchange of the very similar initial letters (B. C. about 1657).

DEUTERO-CANONICAL BOOKS (dū'tēr-ō-kā-nōn'ī-kal books), a term applied in modern times to denote those sacred books which, originally denominated *ecclesiastical* and *apocryphal*, were not in the Jewish or Hebrew Canon, but, as being contained in the old Greek versions, were publicly read in the early Christian Church. (See CANON; APOCRYPHA.) It is acknowledged by all that these books never had a place in the Jewish Canon.

Rufinus made the same distinction in regard to the books of Scripture that Jerome did. After enumerating the books of the Old and New Testament exactly according to the Jewish canon, saying: "These are the volumes which the Fathers have included in the canon, and out of which they would have us prove the doctrines of our faith,"

—he adds: 'However, it ought to be observed that there are also other books which are not *canonical*, but have been called by our forefathers *ecclesiastical*; as the Wisdom of Solomon, and another called the Wisdom of the Son of Sirach. Of the same order is the book of Tobit, Judith and the books of the Maccabees. In the New Testament is the book of the Shepherd of Hermas, which is called the "Two Ways, or the Judgment of Peter;" all which they would have to be read in the churches, but not alleged by way of authority for proving articles of faith. Other Scriptures they call *apocryphal*, which they would not have to be read in the churches' (*In Symb. Apost.*)

1. Early Catalogues. There were three divisions made by the ancient authorities, viz., the Canonical Scriptures, the Ecclesiastical, and the Apocryphal, of which latter there are two kinds, viz., those which, having nothing contrary to the faith, may be profitably read, although not authentic, and those which are injurious and contrary to the faith. It is, however, maintained by Professor Alber that, when Jerome and Rufinus said the Ecclesiastical books were read for edification, but not for confirming articles of faith, they only meant that they were not to be employed in controversies with the Jews, who did not acknowledge their authority. These fathers, however, certainly put them into the same rank with the Shepherd of Hermas.

(1) Earliest Catalogue. The earliest catalogue which we possess of the books of Scripture is that of Melito, Bishop of Sardis, preserved by Eusebius. From his statement, written in the year 170, it seems evident that there had been no catalogue authorized by the church or any public body. He enumerates the books of the Jewish canon only, from which, however, he omits the book of Esther. (See ESTHER.)

(2) Council of Laodicea. The first catalogue of the Holy Scriptures drawn up by any public body in the Christian church which has come down to us is that of the Council of Laodicea, in Phrygia, supposed to be held about the year 365. According to a canon of this council the books of the Old Testament which ought to be read are these: (1) Genesis; (2) Exodus; (3) Leviticus; (4) Numbers; (5) Deuteronomy; (6) Joshua, son of Nun; (7) Judges, with Ruth; (8) Esther; (9) 1 and 2 Kingdoms; (10) 3 and 4 Kingdoms; (11) 1 and 2 Remains; (12) 1 and 2 Esdras; (13) the book of 150 Psalms; (14) Proverbs; (15) Ecclesiastes; (16) Canticles; (17) Job; (18) the Twelve Prophets; (19) Isaiah; (20) Jeremiah and Baruch, the Lamentations and the Epistles; (21) Ezekiel; (22) Daniel. We have already given the books of the New Testament as enumerated by this council (see ANTILEGOMENA). This catalogue is not, however, universally acknowledged to be genuine.

But besides the Hebrew Canon there were certain other books publicly read in the primitive church, and treated with a light degree of respect, although not considered by the Hebrews, from whom they were derived, as of equal authority with the former. Josephus, a contemporary of the apostles, after describing the Jewish Canon (*Contr. Ap.* i:8), which he says consists of 22 books, remarks: 'but from the reign of Artaxerxes to within our memory there have been several things committed to writing, which, however, have not acquired the same degree of credit and authority as the former books, inasmuch as the tradition and succession of the prophets were less certain.' These books seem to have been included in the copies of the Septuagint, which were

generally used by the sacred writers of the New Testament. It does not appear whether the apostles gave any caution against the reading of these books; and it has been even supposed that they have referred to them.

Some of the uncanonical books, however, had not been extant more than 130 years at most at the Christian era, and could only have obtained a place in the Greek Scriptures a short time before this period; but the only copies of the Scriptures in existence for the first 300 years after Christ, either among the Jews or Christians of Greece, Italy, or Africa, contained these books without any mark of distinction that we know of. The Hebrew Bible and language were quite unknown to them during this period, and the most learned were probably but ill-informed on the subject, at least before Jerome's translation of the Scriptures from the original Hebrew. The Latin versions before his time were all made from the Septuagint. We do not, indeed, find any catalogue of these writings before the Council of Hippo, but only individual notices of separate books. Thus Clement of Alexandria (*Stromata*, A. D. 211), cites the Wisdom of Solomon and Ecclesiasticus, and Origen refers to several of these books, treating them with a high degree of veneration.

(3) Council of Hippo. The local Council of Hippo, held in the year of Christ 393, at which the celebrated Augustine, afterward Bishop of Hippo, was present, formed a catalogue of the sacred books of the Old and New Testament, in which the *ecclesiastical books* were all included. They are inserted in the following order in its 36th canon, viz.:

'That nothing be read in the church besides the Canonical Scriptures. Under the name of Canonical Scriptures are reckoned Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth, four books of Kings, Remains, Job, Psalms of David, five books of Solomon, twelve books of the Prophets, Isaiah, Jeremiah, Daniel, Ezekiel, Tobit, Judith, Hesther, Esdras, two books, Maccabees 2 books.' (For the books of the New Testament, see ANTILEGOMENA.)

(4) Council of Carthage. The third Council of Carthage, generally believed to have been held in 397, at which Aurelius, bishop of Carthage, presided, and at which Augustine was present, consisting in all of forty-four bishops, adopted the same catalogue, which was confirmed at the fourth Council of Carthage, held in the year 419.

(5) Roman Council. The next catalogue is that of the Roman Council, drawn up by Pope Gelasius and seventy bishops. The genuineness of the acts of this council has been questioned by Pearson, Cave and the two Basnages, but vindicated by Pagi and Jeremiah Jones. The catalogue is identical with the preceding, except in the order of the books.

(6) Alexandrian Manuscripts. Some of the most important manuscripts of the Holy Scriptures which have descended to us were written soon after this period. The very ancient Alexandrian MS. now in the British Museum contains the following books in the order which we here give them, together with the annexed catalogue: 'Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth,—8 books. Kingdoms, 4; Remains, 2,—6 books. 16 Prophets, viz., Hosea, 1; Amos, 2; Micah, 3; Joel, 4; Obadiah, 5; Jonah, 6; Nahum, 7; Ambacum, 8; Zephaniah, 9; Haggai, 10; Zechariah, 11; Malachi, 12; Isaiah, 13; Jeremiah, 14; Ezekiel, 15; Daniel, 16. Esther; Tobit; Judith; Ezra, 2; Maccabees, 4; Psalter and Hymns; Job; Proverbs; Ecclesiastes; Canticles; Wisdom; Wisdom of Jesus Sirach; 4 Gos-

pels; Acts, 1; 7 Catholic Epistles; 14 Epistles of Paul; Revelation; 2 Epistles of Clement, together . . . books; Psalms of Solomon.' These books are equally incorporated in all the manuscripts of the Latin Vulgate (which was originally translated from the Septuagint). Those which Jerome did not translate from the Hebrew or Greek, as Wisdom and Ecclesiasticus, were adopted from the older Latin version.

Although the Canon of Scripture seemed now to be so far settled by the decrees of these Councils, all did not conceive themselves bound by them, and it is observed by Jahn (*Introd.*) that they were not otherwise to be understood than 'that the ecclesiastical books enumerated in this catalogue were to be held as useful for the edification of the people, but not to be applied to the confirmation of doctrines of faith.' Such appears at least to have been the sentiment of many eminent divines between this period and the sixteenth century.

2. Period of the Reformation. We are now arrived at the period of the Reformation when the question of the Canon of Scripture was warmly discussed.

(1) **Wycliffe's Translation.** Long before this period (*viz.*, in 1380), Wycliffe had published his translation of the Bible, in which he substituted another prologue for Jerome's; wherein, after enumerating the 'twenty-five' books of the Hebrew Canon, he adds: 'Whatever book is in the Old Testament, besides these twenty-five, shall be set among the Apocrypha, that is, without authority of belief.' He also, in order to distinguish the Hebrew text from the Greek interpolations, inserted Jerome's notes, *rubricated*, into the body of the text.

(2) **Luther's Bible.** Although Martin Luther commenced the publication of his translation of the Bible in 1522, yet, as it was published in parts, he had not yet made any distinction between the two classes of books, when Lonicus published his edition of the Greek Septuagint at Strasburg in 1526, in which he separated the Deutero-canonical, or Apocryphal, books from those of the Jewish Canon, for which he was severely castigated by Morinus. (See Masch's edition of Le Long's *Bibliotheca Biblica*, vol. ii, p. 268). Arias Montanus went still further, and rejected them altogether. In 1534 the complete edition of Luther's Bible appeared, wherein those books which Jerome had placed *inter apocrypha* were separated, and placed by themselves between the Old and New Testament, under the title 'Apocrypha—that is, books which are not to be considered as equal to Holy Scripture, and yet are useful and good to read.'

(3) **Council of Trent.** A few years after, the divines of the Council of Trent assembled, and among the earliest subjects of their deliberation was the Canon of Scripture. 'The Canon of Augustine,' says Bishop Marsh, 'continued to be the Canon of the ruling party. But as there were not wanting persons, especially among the learned, who from time to time recommended the Canon of Jerome, it was necessary for the Council of Trent to decide between the contending parties' (*Comparative View*, p. 97). The Tridentine Fathers had consequently a nice and difficult question to determine.

On the 8th April, 1546, all who were present at the fourth session of the Council of Trent adopted the canon of Augustine.

The whole of the books in debate, with the exception of 3d and 4th Esdras, and the Prayer of Manasses, are considered as canonical by the Council of Trent. But it must be recollected that

the decision of the Council of Trent is one by no means peculiar to this council. The third Council of Carthage had considered the same books canonical. 'The Council of Trent,' says Bishop Marsh, 'declared no other books to be sacred and canonical than such as had existed from the earliest ages of Christianity.'

The ecclesiastical books were generally written within a period which could not have extended to more than two centuries before the birth of Christ. In the choice of the places which were assigned them by the Greek Jews resident in Alexandria and other parts of Egypt, who probably added these books to the Septuagint version, according as they became gradually approved of, they were directed 'partly by the subject, partly by their relation to other writings, and partly by the periods in which the recorded transactions are supposed to have happened.' Their insertion shows how highly they were esteemed by the Greek Jews of Egypt; but whether even the Egyptian Jews ascribed to them canonical and Divine authority it would not be easy to prove (*Marsh's Comparative View*).

(4) **Anglican Church.** The following were the proceedings of the Anglican Church in reference to this subject:

In Coverdale's English translation of the Bible, printed in 1535, the deutero-canonical books were divided from the others and printed separately, with the exception of the book of Baruch, which was not separated from the others in this version until the edition of 1550. They had, however, been separated in Matthew's Bible in 1537, prefaced with the words, 'the volume of the book called *Hagiographa*.' This Bible contained Olivetan's preface, in which these books were spoken of in somewhat disparaging terms. In Cranmer's Bible, published in 1539, the same words and preface were continued; but in the edition of 1549 the word *Hagiographa* was changed into *Apocrypha*, which passed through the succeeding editions into King James' Bible. Olivetan's preface was omitted in the Bishop's Bible in 1568, after the framing of the canon in the Thirty-nine Articles in 1562.

In the Geneva Bible, which was the popular English translation before the present Authorized Version, and which was published in 1559, these books are printed separately, with a preface in which, although not considered of themselves as sufficient to prove any point of Christian doctrine, they are yet treated with a high degree of veneration. In the parallel passages in the margin of this translation references are made to the deutero-canonical books.

In the first edition of the Articles of the Church of England, 1552, no catalogue of the 'Holy Scripture' had yet appeared, but in the Articles of 1562 the Canon of St. Jerome was finally adopted in the following order: Five books of Moses; Joshua; Judges; Ruth; 1 and 2 Samuel; 1 and 2 Kings; 1 and 2 Chronicles; 1 and 2 Esdras; Esther; Job; Psalms; Proverbs; Ecclesiastes; Cantica; four Prophets the Greater; twelve Prophets the Less. The books of the second canon were commended and enumerated as follows: 1 and 2 (3 and 4) Esdras, Tobias, Judith, the rest of the book of Esther, Wisdom of Jesus the son of Sirach, Baruch the Prophet, the Song of the Children, the Story of Susanna, Bel and the Dragon, the Prayer of Manasses, and 1 and 2 Maccabees.

(5) **Westminster Confession.** The Westminster Confession treated the books of the second Canon with less ceremony. After enumerating the canonical books (ascribing thirteen epistles only to Paul), they proceed to say that 'the books

called Apocrypha, not being of Divine confirmation, are no part of the Canon of Scripture, and therefore are of no authority in the Church of God, nor to be any otherwise approved or made use of than other human writings.'

Luther (on 1 Cor. iii:9, 10) had declared that the *touchstone* by which certain Scriptures should be acknowledged as Divine or not was the following: 'Do they preach Jesus Christ or not?' And among the moderns, Dr. Twisten (*Vorlesungen ueber die Dogmatik*, 1829, vol. i, p. 421, sq.) has maintained a somewhat similar principle. (See Gausson's *Theopneustia*.) The Confession of Augsburg, dated in 1531, contains no article whatever on the Canon of Scripture; nor do the Lutherans appear to have any other canon than Luther's Bible. (For the sentiments of the Greek Church, see ESDRAS; ESTHER; MACCABEES.)

3. Grounds and Authorities. We shall add a few words on the grounds and authorities adopted by different persons for deciding whether a work is canonical or not. Mr. Jeremiah Jones furnishes us with three different views on this subject:

(1) **Opinions of Papists.** 'The first,' he says, 'is the opinion of the Papists, who have generally affirmed, in their controversies with the Protestants, that the authority of the Scriptures depends upon, or is derived from, the power of their church. By the authority of the church, those authors plainly mean a power lodged in the Church of Rome, and her synods, of determination, what books are the Word of God, than which nothing can be more absurd or contrary to common sense; for if so, it is possible, nay, it is easy, for them to make a book which is not Divine to be so.'

(2) **Internal Evidence.** Another principle was that adopted by all the reformed communions (except the Anglican Church), viz., to use Mr. Jones' words, that '*there are inward or innate evidences in the Scriptures, which, applied by the illumination or testimony of the Holy Spirit, are the only true proofs of their being the Word of God;*' or, to use the words of the French Reformed Communion in its Confession, which harmonizes with the methods adopted by the Scotch and Belgian communions, that upon the internal persuasion of the Spirit *they knew the Canonical from Ecclesiastical*, i. e., *Apocryphal*, books. This method Mr. Jones thinks to be of a very extraordinary nature. 'Can it be supposed,' he asks, 'that out of ten thousand books, private Christians, or even our most learned reformers, should by any internal evidence agree precisely on the number of twenty-seven, which are now esteemed canonical, induced thereto by some characters those books contain, of their being written by the inspiration of the Holy Ghost?'

(3) **Testimony of Early Christians.** The third method is that approved of by Mr. Jones, viz., that tradition, or the testimony of the ancient Christians, preserved in their writings, is the best method of determining the subject. 'This,' adds Mr. Jones, 'is the method the first Christians constantly made use of to prove, against the heretics, the truth of the sacred books, viz., by appealing to that certain and undoubted tradition which assured them they were the writings of the persons whose names they bear. The chief objection which has been urged against this method is that it leaves the canonicity of each book to the decision of every private individual, which is inconsistent with the idea of a *canon*. Certain it is that the ancient church, in deciding on the present Canon, exhibited a wonderful theological tact, as the books which it has handed down as

canonical, and these alone, are generally the same which, after having undergone the strictest ordeal that the learning and acumen of modern times have been enabled to apply to them, are acknowledged by the best critics to be authentic. In fact, the church has adopted the same methods for this purpose which Mr. Jones has considered to be the only ones satisfactory to private individuals. Christians are thus in possession of the highest degree of satisfaction.

The question in dispute, however, is not with regard to the Jewish Canon, but as to whether or not there is reliable testimony as to how far our Saviour and his Apostles gave the stamp of their authority to any books not contained in this canon. We have no certain evidence as to the authority on which, or the time when, the Jewish Canon was collected, or of the cause of its closing; and our best evidence in favor of the canonicity of the Hebrew Scriptures rests on the authority of Christ, as contained in the Scriptures of the New Testament.

See, in addition to the works already cited, Vicenzi's *Introductio in Scrip. Deutero-canon.* (Stowe, in *Bib. Sacra*, April, 1854.) See also Edwin Cone Bissell, *Historic Origin of the Bible*.

DEUTERONOMY (dū'tēr-ōn'ō-mŷ), (Gr. δευτερονόμιον, *deu-ter-on-om'ee-on*, repetition of the law), the Greek name given by the Alexandrian Jews to the fifth book of Moses.

1. Contents. It comprises that series of addresses which the Lawgiver delivered (orally and by writing, i:5; xxviii:58, etc.) to assembled Israel in the second month of the fortieth year of their wandering through the desert, when the second generation was about to cross the Jordan, and when the parting hour of Moses had nearly arrived. The book of Deuteronomy contains an account of the sublime and dignified manner in which Moses terminated that work, the accomplishment of which was his peculiar mission.

(1) **Faithfulness of God.** The speeches begin with the enumeration of the wonderful dealings of God with the chosen people in the early period of their existence. Moses clearly proves to them the punishment of unbelief, the obduracy of Israel, and the faithfulness of Jehovah with regard to his promises, which were now on the point of being accomplished. Fully aware of the tendencies of the people, and foreseeing their alienations, Moses conjures them most impressively to hold fast the commands of the Lord, and not to forget his revelations, lest curses should befall them instead of blessings (ch. i, iv). The lawgiver then expatiates on the spirit of the law and its reception into the hearts of men, both in a positive and negative way. *Fear*, he says, is the primary *effect* of the law, as also its *aim*. As Israel had once listened to the announcement of the fundamental laws of the theocracy with a sacred *fear*, in like manner should man also receive, through the whole system of the law, a lively and awful impression of the holiness and majesty of God (ch. v). But as the essence and sum of the law is *love* to Jehovah, the only and true God, man shall by the law be reminded of the Divine mercy, so variously manifested in deeds; and this reflection is calculated to beget in man's heart *love* for God. This love is the only and true source from which proper respect and obedience to the law can proceed (ch. vi).

(2) **Dangers.** There were, however, two tempting deviations, in following which the people were sure to be led astray. The law, in its strict rigor, was but too apt to tempt them to desert Jehovah and to yield to idolatry (the very approval of which even in thought polluted the

heart), by discontinuing to bear the heavy yoke of the law. Hence the most impressive warnings against Canaan's inhabitants and idols; and hence the declarations that Israel, in placing themselves on a par with the heathens, should have to endure an equal fate with them and be repulsed from the presence of Jehovah (ch. vii, viii).

The other, not less dangerous, deviation is that of self-justification—the proud fancy that all the favors Jehovah had shown to his people were merely in consequence of their own deservings. Therefore Jehovah tells them that it was not through their own worthiness and purity of heart that they inherited the land of the heathens. It was only through his free favor; for their sins bore too strong and constant testimony how little they ought to take credit to themselves for it (ch. ix).

The history of the people, before and after the exile, shows these two deviations in their fullest bearings. Idolatry we find to have been the besetting sin *before* that period, and presumptuous pride of heart *after* it; a proof how intimately acquainted the Lawgiver was with the character and disposition of his people, and how necessary, therefore, those warnings had been.

Therefore, adds Moses, turn to that which Jehovah, in giving you the tables of the law, and establishing the Tabernacle and priesthood, has intimated as a significant symbol, 'to circumcise the foreskin of your heart,' and to cherish love in your inward soul. Think of Jehovah, the just and merciful, whose blessings and curses shall be set before your eyes as a lasting monument upon the mounts Ebal and Gerizim (ch. x, xi).

(3) Practical Life. The mention of that fact leads the Lawgiver to the domestic and practical life of the people when domesticated in their true home, the Land of Promise; which he further regulates by a fixed and solid rule, by new laws, which for this, their new design and purport, form a sort of complement to the laws already given. There, in the land of their forefathers, Jehovah will appoint *one* fixed place for his lasting sanctuary. At that chosen spot alone are the sacrifices to be killed, while cattle in general, which are not destined for sacred purposes, but merely for food, may be slaughtered at all places according to convenience—a regulation which still leaves in full force the previous laws concerning the eating of blood and the share of Jehovah in slaughtered cattle. This sanctuary was to be considered as the central point for all sacred objects. The whole land was, by means of the sanctuary established in the midst of it, consecrated and dedicated to Jehovah. This consecration was incompatible with any defilement whatsoever. On that account the Canaanites must be exterminated and all idolatrous abominations destroyed, since nothing ought to be added to or taken from the laws of God (ch. xii). For the same reason (i. e., for the sake of the holiness of the land, diffused from the sacred center) no false prophets or soothsayers are to be tolerated, as they may turn the minds of the people from *the law*, by establishing a different one, and therefore even a whole town given to the worship of idols must be demolished by force of arms (ch. xiii). Neither, in like manner, must the heathen customs of mourning be imitated, or unclean beasts eaten; but the people must always remain true to the *previous* laws concerning food, etc., and show their real attachment to Jehovah and his religion by willingly paying the *tithe* as ordained by the law (ch. xiv). To the same end likewise shall the regulations concerning the years of release and the festivals of Jehovah (to be sol-

ennized in the place of the new-chosen Sanctuary) be most scrupulously observed (ch. xv, xvi). Only *unblemished* sacrifices shall be offered, for all idolatrous worshippers must irrevocably be put to death by stoning. For the execution of due punishment, honest judges must govern the nation, while the highest tribunal shall exist in the place chosen for the Sanctuary, consisting of the priests and judges of the land. If a king be given by God to the people, he shall first of all accommodate himself to the laws of God, and not lead a heathen life. Next to the regal and judicial dignities the ecclesiastical power shall exist in its full right; and again, next to it, the prophetic order (ch. xvii, xviii). Of all these institutions the duties of the judicial power are most clearly defined; for Jehovah does as little suffer that in his land the right of the innocent shall be turned aside as that indulgence shall be shown to the evil-doer (ch. xix). The exposition of the civil law is followed by that of the martial law, which has some bearing upon the then impending war with Canaan.

These are again followed by a series of laws in reference to the preceding, and referring chiefly to hard cases in the judicial courts, by which Moses obviously designed to exhibit the whole of the civil life of his people in its strict application to the theocratic system of law and right. Therefore the form of prayer to be spoken at the offering up of the firstlings and tithe—the theocratic *confession of faith*—by which every Israelite acknowledges in person that he is what God has enjoined and called him to be, forms a beautiful conclusion of the whole legislation (ch. xxi-xxvi).

The blessings and curses of Jehovah, the two opposite extremes which were to be impressed upon the minds of the people at their entrance into Canaan, and which have hitherto been spoken of only in general terms, are now set forth in their fullest detail, picturing in the most lively colors the abundance of blessings on the one hand and the awful visitations of heaven's wrath on the other. The prophetic speeches visibly and gradually increase in energy and enthusiasm, until the perspective of the remotest future of the people of God lies open to the eye of the inspired Lawgiver in all its checkered details, when his words resolve themselves into the strains of a splendid triumphal song in which the tone of grief and lamentation is as heartrending as the announcement of Divine salvation therein is jubilant (ch. xxvii, xxviii). The history of the law concludes with a supplement concerning him who was deemed worthy by the Lord to transmit his law to Israel (ch. xxxiv). Thus much regarding the contents and connection of the book of Deuteronomy.

2. Date and Authenticity. The *date*, however, of the composition of Deuteronomy, as well as its *authenticity*, has given rise to a far greater variety of opinion, more especially among those who are opposed to the authorship of Moses.

(1) Earliest of Mosaic Writings. The older critics considered Deuteronomy as the *latest* production of all the books of the Pentateuch, while the more recent critics have come to just the contrary opinion, and declare it to be the *earliest* of the Mosaic writings.

(2) Quoted by the Prophets. A very strong proof of the genuineness of the book lies in its relation to the later writings of the prophets. Of all the books of the Pentateuch, Deuteronomy has been made most use of by the prophets, simply because it is best calculated to serve as a model for prophetic declarations, as also because of the inward harmony that exists between the *prophecies* and the *laws* upon which they are based.

3. Objections. Among the arguments advanced against the authenticity of Deuteronomy are:

(1) The *contradictions* said to exist between this and the other books of Moses.

(2) Certain *anachronisms* committed by the author.

These contradictions are more especially alleged to exist in the festival laws, where arbitrary and unwarranted views are mostly entertained by such critics with regard to the nature and original meaning of the festivals, which they identify altogether with *natural* or *season* festivals, and without lending to them a more spiritual character and signification.

(3) That the *Sinai* of the other books is always called *Horeb* in Deuteronomy. They forget, however, that *Horeb* is the general name of the whole mountain, while *Sinai* is the special name of a particular part of it. This distinction is, indeed, most scrupulously observed everywhere in the Pentateuch.

(4) That *Priests* and *Levites* are used as synonymous terms in Deuteronomy, while in the other books of the Pentateuch they are used as terms distinct from each other. By that expression, however, can only be meant the *Levitical* priests, i. e., the only legitimate priests. This meaning is borne out by Deuteronomy xviii:3-8, where a clear distinction is made between *Priests* and *Levites*.

(5) That in Deuteronomy i:44 are mentioned the *Amorites* instead of the *Amalekites*, as in Num. xiv:45. Here also they have forgotten to notice that in the sequel of the very passage alluded to in Deuteronomy both the *Amorites* and *Amalekites* are mentioned.

(6) That the cause of the punishment of Moses is differently stated in Num. xxvii:14 and Deuteronomy iii:26. To this objection we reply that both the guilt and punishment of Moses are described in both books as originating with the people (comp. also Deut. xxxii:51, etc.).

(7) Among the anachronisms in Deuteronomy are reckoned the allusions made in it to the Temple (xii: xvi:1, *sq.*) to the royal and prophetic powers (xiii: xviii:18) to the different modes of idol worship (iv:19; xvii:3), and to the exile (xxviii *sq.*). In suggesting these critical points, however, they do not consider that all these subjects are most closely and intimately connected with the spirit and principles of the law itself, and that all these regulations and prophecies appear here in Deuteronomy, as necessary finishing points to the law, so indispensable for the better consolidation of the subsequent and later relations of the theocracy.

More *anachronisms* are said to be:

(1) The sixty dwelling places of Jair mentioned Deut. iii:14, *sq.* (comp. Judg. x:3 *sq.*; Josh. xiii:30; 1 Kings iv:13; comp. also 1 Chron. ii:22, 23). We consider, however, that the men mentioned in the two passages are evidently different persons, though of the same name. Nor is it difficult to prove from other sources that there really existed at the time of Moses a man by name Jair.

(2) The notice (iii:11) concerning King Og, which looks more like a note of a subsequent writer in corroboration of the story told in the chapter. But this hypothesis falls to the ground when we consider that Moses did not write for his contemporaries merely, but also for late posterity.

4. Mosaic Origin. The book contains, moreover, not a small number of plain, though indirect, traces indicative of its Mosaic origin. We thus find in it:

(1) Numerous notices concerning nations with whom the Israelites had then come in contact, but who, after the Mosaic period, entirely disappeared from the pages of history; such are the accounts of the residences of the kings of Bashan (i:4).

(2) The appellation of 'mountain of the Amorites,' used throughout the whole book (i:7, 19, 20, 44), while even in the book Joshua, soon after the conquest of the land, the name is already exchanged for 'mountains of Judah' (Josh. xi:16, 21).

(3) The observation (ii:10) that the *Emim* had formerly dwelt in the plain of Moab; they were a great people, equal to the *Anakim*. This observation quite accords with Genesis xiv:5.

(4) A detailed account (ii:11) concerning the Horim and their relations to the Edomites.

(5) An account of the Zamzumim (ii:20, 21), one of the earliest races of Canaan, though mentioned nowhere else.

(6) A very circumstantial account of the Rephaim (iii:3, *sq.*), with whose concerns the author seems to have been well acquainted.

The standing-point also of the author of Deuteronomy is altogether in the Mosaic time, and had it been assumed and fictitious there must necessarily have been moments when the spurious author would have been off his guard, and unmindful of the part he had to play. But no discrepancies of this kind can be traced, and this is in itself an evidence of the genuineness of the book.

A great number of other passages force us likewise to the conclusion that the whole of Deuteronomy originated in the time of Moses. Such are the passages where (1) a comparison is drawn between Canaan and Egypt (xi:10, *sq.*), with the latter of which the author seems thoroughly acquainted; (2) detailed descriptions are also given of the fertility and productions of Palestine (viii:7, *sq.*); (3) regulations are given relating to the conquest of Canaan (xii:1, *sq.*; xx:1, *sq.*), which cannot be understood otherwise than by assuming that they had been framed in the Mosaic time, since they could be of no use after that period.

Besides, whole pieces and chapters in Deuteronomy, such as xxxii, xxxiii, betray in form, language and tenor a very early period in Hebrew literature. Nor are the laws and regulations in Deuteronomy less decisive of the authenticity of the book. We are struck with the most remarkable phenomenon, that many laws from the previous books are here partly repeated and impressed with more energy, partly modified, and partly altogether abolished, according to the contingencies of the time, or as the new aspect of circumstances among the Jews rendered such steps necessary (comp. e. g. Deut. xv:17, with Exod. xxi:7; Deut. xii, with Lev. xvii).

5. Supplemental Portion. The part of Deuteronomy (xxxiv) respecting the death of Moses requires a particular explanation. That the whole of this section is to be regarded as a piece altogether apart from what precedes it, or as a supplement from another writer, has already been maintained by the older theologians (comp. *ex. gr.* Carpzov, *Introd. in libr. V. T.*, i, p. 137), and this opinion is confirmed not only by the contents of the chapter, but also by the express declaration of the book itself on that event and its relations; for chapter xxxi contains the conclusion of the work, where Moses describes himself as the author of the previous contents, as also of the Song (chap. xxxii), and the blessings (chap.

xxxiii) belonging to it. All that follows is, consequently, not from Moses, the work being completed and concluded with chapter xxxiii. There is another circumstance which favors this opinion, namely, the close connection that exists between the last section of Deuteronomy and the beginning of Joshua (comp. Deut. xxxiv:9 with Josh. i:1). Chapter xxxiv. of Deuteronomy is intended to serve as a *point of transition* to the book of Joshua, and indicate that it was written by the same author as the latter.

The correct view of this chapter, therefore, is to consider it as a *real supplement*, but by no means as an *interpolation*.

It is not out of order, even in our own day, for an editor to furnish addenda to an autobiography, giving an account of the author's death. It will be noted also that the book of Joshua is closed in the same way. This appendix may have been attached to the roll of manuscript soon after the death of Moses, or it may be, as some scholars suppose, that what is now the last of Deuteronomy was formerly the beginning of the Book of Joshua.

These books were written before the invention of sections, divisions and chapters, as well as points and pauses. At that time several books were connected together by following each other on the roll. The beginning of one book, therefore, might very easily be transferred to the end of the preceding one, and in process of time come to be considered its real conclusion.

The author of this appendix was probably Joshua, the intimate friend of the great law-giver and his successor as the leader of Israel. He was the one of all others who should have pronounced the eulogy upon his master after his death. And a more positive indication of this authorship is found in the expressions, "Moses, the servant of the Lord," and "Moses, the man of God." Neither of these phrases is found in the preceding part of the Pentateuch, and it does not appear that Moses ever assumed such titles for himself. It was a favorite method with Joshua, however, in speaking of his dead friend and leader. The words "Moses, servant of the Lord," occur more than a dozen times in the Book of Joshua, and are found both in the narrative matter and in the speeches attributed to the author. The other expression also was known in his day, for Caleb referred to "Moses, the man of God," in addressing him. These facts strongly indicate that the author of the Book of Joshua also wrote the appendix to the book of Deuteronomy.

On the literature of Deuteronomy, compare the article PENTATEUCH; Riehm, *Die Gesetzgebung Moses im lande Moab*; Wordsworth, *Holy Bible with Notes*, vol. i; *Five Books of Moses*, 2d ed.; Schroeder, *Das Deuteronomium* (in Lang's *Bibelwerk*, A. T. iii.); Volck, *Moses canticum*; Horsley, *Notes on Deut.*, in *Bib. Crit.* i.

DEVIL (dĕv'1), (Gr. διάβολος, *dee-ab'ol-os*, accuser).

1. One who slanders another for the purpose of injury, a calumniator, e. g., a gossip monger (1 Tim. iii:6; 2 Tim. ii:26; 1 John iii:8).

2. "Devil" is the rendering of the Heb. שָׂעִיר, *saw-eer'*, hairy (Lev. xvii:7), a "goat," or "satyr" (Is. xiii:21; xxxiv:14). (See SATAN.)

DEVOTIONS (dĕ-vō'shūns), formerly meant the *objects* of worship, and not the acts themselves. In the former sense it is used correctly in Acts xvii:23, by which Paul means the temples, altars, shrines and the likes.

DEW (dū), (Heb. טַל, *tal*).

The various passages of Scripture in which dew is mentioned, as well as the statements of travelers, might, unless carefully considered, convey the impression that in Palestine the dews fall copiously at night during the height of summer, and supply in some degree the lack of rain (Judg. vi:37-40). But, in fact, scarcely any dew does fall during the summer months—from the middle of May to the middle of August; but as it continues to fall for some time after the rains of spring have ceased, and begins to fall before the rains of autumn commence, we may from this gather the sense in which the Scriptural references to dew are to be understood. Without the dews continuing to fall after the rains have ceased and commencing before the rains return, the season of actual drought, and the parched appearance of the country, would be of much longer duration than they really are. The partial refreshment thus afforded to the ground at the end of a summer without dews or rains, is of great value in Western Asia, and would alone explain all the Oriental references to the effects of dew (Gen. xxvii:28; Deut. xxxiii:13; Zech. viii:12).

Figurative. (1) Christ, and God in him, are likened to *dew*; how pleasant, reviving and fructifying the influences of his word and spirit (Hos. xiv:5; Is. xxvi:19). The saints are as *dew*, for multitude, pleasantness and refreshing influence on others around (Ps. cx:3; Mic. v:7). (2) An army is like *falling dew*, for their numbers and their seizing on everything near them (2 Sam. xvii:12). (3) Afflictions and sufferings are like *dew, and drops of the night*; are many and disagreeable, and yet have a happy and fructifying tendency (Cant. v:2; Dan. iv:25; Hos. vi:4). (4) The truths of God are as *dew*, falling gradually, and often insensibly, on the souls of men; they refresh, render them soft, pliable and fruitful in good works (Deut. xxxii:2). (5) Anything very delightful and refreshing is compared to *dew*; the king's favor is as *dew*; it mightily delights and actuates men (Prov. xix:12). (6) Harmony of brethren is as the *dew of Hermon*, very delightful, reviving and encouraging to good works (Ps. cxxxiii:3). (7) The *dew lies* on a man's branches when his soul prospers under the influences of God's word and Spirit, and his outward lot under the smiles of his providence (Job xxix:19).

DEXIOLABOS (dĕx-iōl'a-bos), (Gr. δεξιόλαβος, *dechs-ee-ol-a-bos*, a protector of the right side).

This is the Greek word rendered 'spearmen' in the Authorized Version of Acts xxiii:23. As it does not occur in the classical writers, and only this once in the Scriptures, it is uncertain what kind of soldiers is denoted by it. It strictly signifies one who covers or guards the *right side* of any one. Hence it has been conjectured that, in the above passage, it denotes officers who perform the same functions in the camp as lictors did in the city—being appointed to apprehend malefactors and to guard criminals when led to execution.

DIADEM (di'ā-dĕm). Three Hebrew words are thus translated:

1. *Tsaw-neeſ'* (Heb. טַלְטַל, something *wound about* the head), spoken of the turban of men (Job. xxix:14).

2. *Tsef-ee-raw'* (Heb. כִּטְרוֹן, circlet, Is. xxviii:5), a royal tiara.

3. *Mits-neh'feth* (Heb. מִצְנֶפֶת, the tiara of the high priest, Ezek. xxi:26).

The distinctive idea of 'diadem' is that of royalty, or regal power; while that of 'crown' is the reward of victory in the games, the crown of civic worth, military valor, nuptial joy, festal gladness; but not the emblem of sovereignty (Rev. xii:3; xiii:1; xix:12). See Trench, *Syn. of the New Testament*. (See CROWN.)

DIAL (dī'al) (Heb. מַעְלָא, *mah-al-aw'*, step). The invention of the sun-dial belongs most probably to the Babylonians.

Herodotus affirms that the Greeks derived from them the pole (supposed to mean the dial-plate), the gnomon and the division of the day into twelve parts (ii:109). The first mention in Scripture of the 'hour' is made by Daniel, at Babylon (ch. iii:6). The circumstances connected with the dial of Ahaz (2 Kings xx:11; Is. xxxviii:8), which is perhaps the earliest of which we have any clear mention, entirely concur with the derivation of gnomonics from the Babylonians. Ahaz had formed an alliance with Tiglath-pileser, king of Assyria, (2 Kings xvi:7, 9); he was a man of taste and was ready to adopt foreign improvements, as appears from his admiration of the altar at Damascus and his introduction of a copy of it

Dial in Hindostan.

into Jerusalem (2 Kings xvi:10). 'The princes of Babylon sent unto him to inquire of the wonder that was done in the land' (2 Chron. xxxii:31). Hence the dial also, which was called after his name, was probably an importation from Babylon. Different conjectures have been formed respecting the construction of this instrument.

On the whole, the dial of Ahaz seems to have been a distinct contrivance rather than any part of a house. It would also seem probable, from the circumstances, that it was of such a size, and so placed, that Hezekiah, now convalescent (Is. xxxviii:21, 22), but not perfectly recovered, could witness the miracle from his chamber or pavilion. May it not have been situate 'in the middle court,' mentioned 2 Kings xx:4? A dial has been discovered in Hindostan, near Delhi, the ancient capital of the Mogul empire, whose construction would well suit the circumstances recorded of the dial of Ahaz. It seems to have answered the double purpose of an observatory and a dial—a rectangular hexangle, whose hypotenuse is a staircase, apparently parallel to the axis of the earth, bisects a zone or coping of a wall, which wall connects the two terminating towers right and left. The coping itself is of a circular form, and accurately graduated to mark, by the shadow of the gnomon above, the sun's progress both before and after noon; for when the sun is in the zenith he shines directly on the staircase and the shadow falls beyond the coping. A flat surface on the top of the staircase, and a gnomon, fitted the

building for the purpose of an observatory. According to the known laws of refraction, a cloud or body of air of different density from the common atmosphere, interposed between the gnomon and the coping of the dial plate below, would, if the cloud were denser than the atmosphere, cause the shadow to recede from the perpendicular height of the staircase and, of course, to re-ascend the steps on the coping, by which it had before noon gone down; and if the cloud were rarer a contrary effect would take place. (See Bishop Stock's *Translation of Isaiah*, Bath, 1803, p. 109.) The phenomenon on the dial of Ahaz, however, was doubtless of a miraculous nature, even should such a medium of the miracle be admitted; nothing less than a Divine communication could have enabled Isaiah to predict its occurrence at that time and place; besides he gave the king his own choice whether the shadow should advance or retire ten degrees. There seems, however, to be no necessity for seeking any medium for this miracle, and certainly no necessity for supposing any actual interference with the revolution of the earth or the position of the sun. In the more distinct and ample account of it in 2 Kings xx:9 it is simply said that the Lord, at the prayer of Isaiah, brought the shadow ten degrees backward.

The words in Is. xxxviii:8, 'and the sun went back ten degrees,' are wanting in three of Dr. Kennicott's MSS., and originally in two of De Rossi's. Thus the miracle, from all the accounts of it, might consist only of the retrogression of the shadow ten degrees by a simple act of Almighty power, without any medium, or, at most, by that of refracting those rays only which fell upon the dial. It is not said that any time was lost to the inhabitants of the world at large; it was not even observed by the astronomers of Babylon, for the deputation came to inquire concerning the wonder that was done in the land. It was temporary, local, and confined to the observation of Hezekiah and his court, being designed chiefly for the satisfaction of that monarch. It is remarkable that no instrument for keeping time is mentioned in the Scripture before the dial of Ahaz (B. C. 700); nor does it appear that the Jews generally, even after this period, divided their day into hours. The dial of Ahaz was probably an object only of curious recreation, or served at most to regulate the occupations of the palace.—Gumpach, *Sonnenzeiger des Ahas*; Keil and Delitzsche, *Buecher der Könige*, p. 345; Hopkins, *Plumbline Papers*, 1 ch. ii.

J. F. D.

DIAMOND (dī'münd), (Heb. יָה־חַלֹּמֶת, *yah-hal-ome'*), which the LXX renders by *λασπίς* (*ee'as-pis*) in the first two cases and by *σμάραγδος* (*smar'ag-dos*). (See YAHALOM; SHAMIR.)

DIANA (dī-ā'nā or dī-ān'ā), (Gr. Ἄρτεμις, *ar'tem-is*, Artemis), a celebrated goddess of the heathen, and one of the twelve superior deities.

In the heavens she was Luna, or Meni (the moon), on earth Diana, in hell Hecate. She was invoked by women in childbirth under the name of Lucina. She was sometimes represented with a crescent on her head, a bow in her hand, and dressed in a hunting habit; at other times with a triple body (triple-faced Proserpine), and bearing instruments of torture in her hands. At Rome there is a full-length and complete image of this goddess, which is clearly an emblematical representation of the dependence of all creatures on the powers of nature, or the many and extensive blessings bestowed by nature on all ranks of existence; whether man, lions, stags, oxen, animals of all kinds, or even insects. The goddess is symbol-

ized as diffusing her benefits to each in its proper station. Her numerous rows of breasts speak the same allegorical language, i. e., fountains of supply.

The Ephesian Diana was regarded as invested with different attributes from the Diana of the Greeks, and her worship was of a slightly different nature. (K. O. Müller, *Hist. of the Dorians*, i:403, Eng. Trans.).

It is well known that many heathen deities resolve themselves into the sun and moon, and that Diana is the moon, in most or all of her offices and characters. "The precious things put forth by the moon" are mentioned so early as the days of Jacob; and long afterward we frequently read of the "queen of heaven," etc. The moon was also the goddess presiding over childbirth. This deity was known by distinction as Diana of Ephesus, where she had a famous temple (see EPHEBUS), to some of the persons connected with which Paul rendered himself obnoxious by the discharge of his apostolic duties (Acts xix:27, etc.). The large manufacture of silver shrines to this goddess is mentioned in Acts xix:24.

DIBLAIM (dīb'la-īm), (Heb. דִּבְלַיִם, *dib-lah'yim*, cakes), mother of Gomer, the wife of Hosca (Hos. i:3). Manger, Gesenius and others take it to be the name of Gomer's father (B. C. 725).

DIBLATH (dīb'lath), but accurately DIBLAH (Heb. דִּבְלָה, *circle*), mentioned in Ezek. vi:14 as a place at one extremity of Israel. The name may be an incorrect form for RIBLAH, the scene of the cruelties inflicted on the last king of Judah, and the massacres of priests by the king of Babylon (Davidson, *Heb. Text*, Ezek. vi:14).

DIBLATHAIM (dīb'la-thā'īm). See ALMON-DIBLATHAIM.

DIBON (dī'bon), (Heb. דִּבּוֹן, *dee-bone'*, a pining, a wasting away, a consumption, Is. xv:9).

1. The place was called also Dibon-Gad, from its having been rebuilt by the tribe of that name (Num. xxxii:34), a city on the northern bank of the Arnon, at the point where the Israelites crossed that river on their journey to the Jordan, and where their first encampment was made after having passed it. In later times we find it, with other towns in this quarter, in the hands of the Moabites (Is. xv:2; Jer. xlviii:18, 22). The site has been recognized by Seetzen, Burckhardt, Irby and Mangles at a place which bears the name of Diban, in a low tract of the district called the Koura, about three miles north of the Arnon (Modjeb). It was among the ruins of Diban that Mr. Klein, in 1868, found the MOABITE STONE (which see). (See DIMON.)

2. There was another place called Dibon in the tribe of Judah (Neh. xi:25), perhaps the same that is called Dimonah in Josh. xv:22. It was re-inhabited by the people of Judah after the captivity.

DIBON-GAD (dī'bon-gād), (Heb. *dibon-gad*). See DIBON, 1.

DIBRI (dīb'ri), (Heb. דִּבְרִי, *dib-ree'*, perhaps *eloquent*), a Danite, whose daughter Shelomith married an Egyptian. Her son was stoned for having "blasphemed" (Lev. xxiv:11), B. C. considerably before 1619.

DIDRACHMA (dī-drāk'mà) or **DIDRACHMON** (Gr. δίδραχμον, *did' drach-mon*, a double drachma), a silver coin equal to two Attic drachmæ, and also to the Jewish half-shekel (Joseph. *Antiq.* iii:8, 2).

It was therefore equivalent to about 32 cents of our money. By the law every Jew was re-

quired to pay half a shekel to the Temple (Exod. xxx:13 sq.), and this amount is represented by the didrachma in Matt. xvii:24, where it is used for the 'tribute money' demanded of Christ. (See MONEY.)

DIDYMUS (dīd'ÿ-mūs). (Gr. Δίδυμος, *did'oomos*, a twin), a surname of the Apostle Thomas, denoting that he was a twin, and if translated he would be called 'Thomas the Twin' (John xi:16; xx:24; xxi:2). (See THOMAS.)

DIET (dī'ēt), (Heb. אֶרְוֹתָא, *ar-oo-khaw'*), the term used of the daily allowance apportioned by Evil-merodach, king of Babylon, to his royal captive, Jehoiachin, king of Judah (Jer. lii:34). (See FOOD.)

DIGNITIES (dīg'nī-tiz), (Gr. plural of δόξα, *dox'ah*, glory), persons higher in honor (2 Pet. ii:10; Jude viii).

Perhaps used of angels who are spiritual beings of high dignity.

DIKE (dī-kè), (Gr. Δίκη, *dee'kay*, justice), the heathen Goddess of Justice, described as the daughter of Zeus and Themis (Hesiod, *Op.* 266; *Theog.* 902).

The punishment of murderers is particularly ascribed to her; and therefore, besides being the goddess of punishment in a general sense, she is often to be considered the same as Nemesis or Vengeance. The word occurs in Acts xxviii:4, and is there rendered 'vengeance,' appellatively.

DIKLAH (dīk'lah), (Heb. דִּיקְלָה, *dik'law*, a palm tree), a tribe descended from Joktan (Gen. x:27; 1 Chron. i:21).

As the name in Aramaic and Arabic means a *palm-tree*, it has been judged necessary to seek the seat of the tribe in some territory rich in palm-trees. Bochart finds it in Southern Arabia, Michaelis in the region of the Tigris (from the analogy of the name Diglath); but where the ground of search is so uncertain, it is impossible to obtain any satisfactory result.

DILEAN (dīl'e-ān), (Heb. דִּילְעָן, *dil-awn'*, a gourd), a city in the low country of Judah (Josh. xv:38). Van de Velde suggests that it may be the modern *Tina*, south of Ekron, but the exact site is unknown.

DILIGENTLY (dīl'ÿ-jent-lÿ), (Gr. ἀκριβῶσεν, *akree'bo-sen*, Matt. ii:7), R. V. "accurately." The word used is a Greek verb that means to inquire into details precisely.

Bible title-page, edition 1611: "The Holy Bible, with the former translations diligently compared and revised."

DILL (dīl), (Marg. Matt. xxiii:23). See ANISE.

DIMNAH (dīm'nah), (Heb. דִּמְנָה, *dim-naw'*, dung), a city of Zebulun, given to the Levites of Merari's family (Josh. xxi:35).

As it does not occur in Josh. xix:10-16, it may be a variation of Rimmon (1 Chron. vi:77). If they are identical, Rimmon is probably the correct form.

DIMON (dī'mon), (Heb. דִּמּוֹן, *dee-mone'*, river bed).

"The waters of Dimon" are mentioned as being in the land of Moab, east of the Dead Sea (Is. xv:9). It is probably the same as Dibon (Is. xv:2; Jer. xlviii:22).

DIMONAH (di-mō'nah), (Heb. דִּמְוֹנָה, *dee-mo-naw'*), a town in south Judah (Josh. xv:22).

It undoubtedly occurs under the name Dibon. (See DIBON, 2). Knobel (*Joshua*, p. 423) identifies it with *ed-Dheib*, northeast of Tell Arād. See Van de Velde (*Mem.*, p. 152).

DINAH (di'nah), (Heb. דִּנְיָהּ, *dee-naw'*, judgment or perh. judged), daughter of Jacob by Leah (Gen. xxx:21), and therefore full sister of Simeon and Levi.

While Jacob's camp was in the neighborhood of Shechem, Dinah was seduced by Shechem, the son of Hamor, the Hivite chief or head-man of the town. Partly from dread of the consequences of his misconduct, and partly, it would seem, out of love for the damsel, he solicited a marriage with her, leaving the 'marriage price' (see **MARRIAGE**) to be fixed by her family. To this Dinah's brothers would only consent on the further condition that all the inhabitants of the place should be circumcised. Even this was yielded; and Simeon and Levi took a most barbarous advantage of the compliance by falling upon the town on the third day, when the people were disabled by the effects of the operation, and slew them all (Gen. xxxiv). For this act of truly Oriental vindictiveness no excuse can be offered, and Jacob himself repeatedly alludes to it with abhorrence and regret (Gen. xxxiv:30; xlix:5-7). To understand the act at all, however, it is necessary to remember, that any stain upon the honor of a sister, and especially of an only sister, is even at this day considered as an insupportable disgrace and inexpiable offense among all the nomade tribes of Western Asia. If the woman be single, her brothers more than her father, and if she be married her brothers more than her husband, are aggrieved, and are considered bound to avenge the wrong. Hence the active vengeance of Dinah's full brothers, and the comparative passiveness of her father in these transactions. Of Dinah's subsequent lot nothing is known.

DINAITES (di'na-ites), (Heb. דִּנְיָהּ, singular, *deenah'ee*), a people who opposed the rebuilding of the Temple (Ezra iv:9).

They were colonists who had been placed in the cities of Samaria by the governor of Assyria, after the captivity of the ten tribes by Shalmaneser.

DINE (din). See **BANQUET**: **ACCUBATION**; **EATING**.

DINHABAH (din'ha-bah or din-hā'bah), (Heb. דִּנְחָבָה, *din-haw-baw'*, robbers' den), a city of Edom (Gen. xxxvi:32; 1 Chron. i:43).

It was the capital city and the birthplace of Bela, son of Beor, and King of Edom.

DIONYSIUS THE AREOPAGITE and **PSEUDO-DIONYSIUS** (di'o-ný'si-us the ār'e-óp'a-jíte), (Gr. Διονύσιος, *dee-on-oo'sec-os*).

The name of 'Dionysius the Arcopagite' enlivens the scanty account of success which attended the visit of Paul to Athens (Acts xvii:34). Nothing further is related of him in the New Testament; but ecclesiastical historians record some particulars concerning his career, both before and after his conversion. Suidas recounts that he was an Athenian by birth, and eminent for his literary attainments, that he studied first at Athens and afterward at Heliopolis in Egypt; and that, while in the latter city, he beheld that remarkable eclipse of the sun, as he terms it, which took place at the death of Christ, and exclaimed to his friend Apollphanes, 'Either the Divinity suffers, or sympathizes with some sufferer.' He further details that after Dionysius returned to Athens, he was admitted into the Arcopagus, and, having embraced Christianity about A. D. 50, was constituted Bishop of Athens by the Apostle Paul himself. Syncellus and Nicephorus both record the last particular. Aristides, an Athenian philosopher, asserts that he suffered martyrdom—a fact generally admitted by

historians; but the precise period of his death, whether under Trajan or Adrian, or, which is most likely, under Domitian, they do not determine. Whatever credit may be given to these traditions, the name of Dionysius is certainly interesting in a literary point of view, owing to an attempt made by some writer, in after times, to personate the Arcopagite; and who contrived to pass his productions on the Christian world as of the apostolic age, and thereby greatly influenced the spirit both of the Eastern and Western Churches.

The resemblance between the *Arcopagitica* and the writings of Proclus and Plotinus is so obvious as to afford great probability that the Pseudo-Dionysius did not write much earlier than the fifth century (Cave's *Hist. Literar. Coloniae*, 1720, pp. 142, 143; Lardner's works, vol. vii, p. 371, ed. 1788; Fabric, *Bib. Bibliog.* J. F. D.

DIOTREPES (dī-ót're-fēz), (Gr. Διοτρεπής, *dee-ot-ref-ace'*, Jove-nourished), a person who seems to have been one of the false teachers condemned by St. John in his third epistle.

He appears to have been a presbyter or deacon—probably the former. He refused to receive the letter sent by John, thereby declining to submit to his directions or acknowledge his authority (3 John 9). Neander, *Pflanzung*, ii:647, 648 (Robinson's revised transl., p. 376).

DISCERNING OF SPIRITS (diz-zēr'n'ing òv spír'its), (Gr. διακρίσις, *dee-ak'ree-sis*, *diakrisis*, a thorough judging).

This is now usually understood to mean a high faculty, enjoyed by certain persons in the apostolic age, of diving into the heart and discerning the secret dispositions of men. It appears to have been one of the gifts peculiar to that age, and was especially necessary at a time when the standards of doctrine were not well established or generally understood, and when many deceivers were abroad (2 John 7). This faculty seems to have been exercised chiefly upon those who came forward as teachers of others, and whose real designs it was important that the infant churches should know.

DISCIPLE (dis-si'p'l), (Gr. μαθητής, *math-ay-tace'*, a learner), a scholar or follower of any teacher, in the general sense.

It is hence applied in the gospels not only to the followers of Christ, but to those of John the Baptist (Matt. ix:14, etc.), and of the Pharisees (Matt. xxii:16). Although used of the followers of Christ generally, it is applied in a special manner to the twelve apostles (Matt. x:1; xi:1; xx:17; Luke ix:1). After the death of Christ the word took the wider sense of a believer, or Christian; i. e., a follower of Jesus Christ.

DISCIPLES OF CHRIST (dis-si'p'ls òv kríst).

The religious people who are generally known as Disciples of Christ, or Christians, represent a movement in the church in the interest of unity, peace and union, by a return in faith and in life to the Christianity described in the New Testament. The inspiration of this movement is found in the words of our Lord, recorded in John xvii:20, 21, as follows: "Neither pray I for these alone, but for them also which shall believe on me through their word; that they may be one as thou, Father, art in me, and I in thee, that they also may be one in us; that the world may believe that thou hast sent me."

(1) **Origin.** This movement began in the early part of the nineteenth century in different parts of the country.

In 1891 the General Convention of the Disciples of Christ met in Allegheny, Pa. In that conven-

tion the standing committee on Christian union made a report which was adopted without a dissenting vote. This report suggested as a basis of union: (1) The primitive creed; (2) the primitive ordinances; (3) the primitive life.

(2) **Creed.** The primitive creed is this: *I believe in my heart that Jesus is the Christ the Son of the living God.*

(3) **Primitive Ordinances.** The primitive ordinances are two—baptism and the supper of the Lord.

A movement which has for its object the union of Christians ought to occupy a position out of the region of controversy. The Disciples occupy such a position. In answer to the question, what is baptism? their reply is: "Baptism is the immersion in water of a penitent believer in the name of the Lord Jesus, and into the name of the Father, and of the Son, and of the Holy Spirit." That this is baptism is denied by no one. Some do, indeed, say that there are other ways of being baptized, but no one says that the penitent believer who has been immersed in water, in the name of the Lord Jesus, and into the name of the Father, and of the Son, and of the Holy Spirit, has not been baptized. Persons who have been thus baptized are received into the fellowship of all the churches. No person is denied membership in any church, as above explained, on the ground that he has not been baptized. The Disciples, then, so far as baptism is concerned, occupy undisputed and indisputable ground. The baptism of infants, of unbelievers, is a subject of controversy, but not the baptism of penitent believers. Sprinkling, as a mode of baptism, is in debate; immersion is not.

The supper of the Lord is a feast of love for such as are disciples of Jesus. This is clear from the testimony of Holy Scripture, "And as they were eating Jesus took bread, and blessed it, and brake it, and gave it to the disciples, and said: 'Take, eat; this is my body.' And he took the cup and gave thanks, and gave it to them, saying, 'Drink ye all of it; for this is my blood of the New Testament, which is shed for many for the remission of sins.'" (Matt. xxvi:26-28).

(4) **Primitive Life.** The primitive life is the life that takes the man Christ Jesus as the model. The Christian life is not a life of rules and regulations, saying, "thou shalt not," and "thou shalt." It is a life inspired by devotion, a devotion inspired by faith and love to the Sinless One. The real Christian tries to be and to do all things, in all places, and at all times, whatever the Lord Jesus would like him to be and do. That life is most truly Christian which is most like the life lived by the Son of God in the flesh and when he was among the sons of men.

This, in brief, is the origin, the position, the aim of the people who are known as Disciples of Christ. The movement evidently was inspired by God. It was not planned by any man, nor by any company of men. The above facts clearly demonstrate the absolute accuracy of this statement.

(5) **Statistics.** The movement is remarkably popular among the people. They have responded to its call with great rapidity. The number of names together is now, according to the last report of the statistical secretary, made to the General Convention in Indianapolis, in October, 1897, more than one million.

Their organizations for aggressive evangelistic or missionary work are as follows: "The American Christian Missionary Society," "The Christian Woman's Board of Missions" and "The Foreign Christian Missionary Society." B. B. T.

DISCREPANCIES, BIBLICAL (dīs-krēp-an-šēz).

1. *Bible Written at Different Times, Etc.*

The Bible is a book which was written during a space of twelve or fourteen hundred years by many scribes, the first of whom preceded by centuries the most ancient philosophers of Greece and Rome. The writers varied in position, attainments, and locality. The pen was held by the lawgiver in the wilderness and the tax-gatherer amidst the multitude; by the king on his throne and the shepherd in his tent; by the sage in the desert and the fisherman by the sea; it was held by accomplished scholars and by men who had been taught but little save by nature and by God. And yet it is evidently the work of the same great Author, for *its plan and its purpose are one.*

We can only imagine the discords which would obtain in a scientific or historical work which had been prepared under such circumstances; but with stately step and perfect unity of design the Bible marches from the creation to the consummation—from Eden lost to Eden restored. With broken crowns and crumbling thrones on every side, it pursues the even tenor of its way. With nothing to fear and nothing to hide, it tells of the faults of its writers as unflinchingly as it tells of their virtues. Only one faultless character is described upon its pages and that is He who "was in all points tempted like as we are, and yet without sin" (Heb. iv:15).

The books of the Bible lived for hundreds of years in manuscript only, and the copyist is never infallible. What wonder, then, that there should be clerical errors, the occasional variation of a vowel or a numeral? These old manuscripts were copied by reverent hands. Kiel, Bleek, and other scholars assert that so great was the care bestowed upon the Hebrew text "that it was the practice to count, not only the number of verses, but also of the words, and even of the letters of the various books, in order to ascertain the middle verse, middle word, and even the middle letter of each book." (Bleek's *Introduction to the Old Testament*, ii:451.)

But at a certain period numbers were expressed by letters of the alphabet, and some of the Hebrew letters are so nearly alike that when written with a pen, unless perfectly formed, it is almost impossible to distinguish them from each other. No wonder, then, that this and other causes have led to slight errors which have caused the "various readings" so often spoken of by Biblical scholars.

"But at the same time," says Professor Stuart, "it is equally true that *all these, taken together, do not change or materially affect any important point of doctrine, precept, or even history.*" A great proportion, indeed the mass of variations in Hebrew manuscripts, when minutely scanned, amount to nothing more than the differences in spelling of a multitude of English words. What matters it as to the meaning, whether one writes honour or honor, whether he writes centre or center?" (*Hist. Old Testament Canon*, p. 178, Revised Ed.)

In relation to the Greek text, Professor Norton claims that as early as the close of the second century *as many as sixty thousand manuscript copies of the Gospels were extant.* (*Genuineness of the Gospels*, p. 50.)

There was no possibility of corrupting so vast a number of copies in the interest of any sect or people. And even now, after these books have been circulated by the art of printing for hundreds of years, we still have about five hundred

manuscripts of the Gospels which have been found in various portions of the globe, and under circumstances which would make any radical changes impossible, even the slightest clerical error being manifest by comparison with many of the others. Some of these manuscripts are more than fourteen hundred years old (one of them, a portion of which has been recently discovered, is thought to be more than seventeen hundred years old) and may have been prepared by those who had access to the originals written by the apostles themselves. And here, too, as in the Hebrew books, it is safe to say that no important doctrine or fact has been imperiled by the slight variations in the text.

No man refuses to accept an inheritance because the testator differs with him in relation to orthography or grammar; why, then, should we hesitate about accepting the truths of the Bible because of a clerical error in the text?

2. Other Causes. But there are other causes of apparent discrepancies.

(1) The Determination of the Seeker. There are many perversions of the text which are so transparent that they can only be ascribed to willful dishonesty, when they are published and scattered broadcast for the purpose of destroying the faith of those who believe in Christianity.

(2) The Carelessness of the Reader. Many people do not stop to analyze what they read; nay, it would appear by their attempted quotations that they pay very little attention to what the book actually says. For instance, an editorial in a great daily paper has announced that "the good book says that bread is the staff of life!" It is needless to say there is no such text, although the prophet Ezekiel speaks of "the staff of bread" (Ezek. iv:16).

(3) Difference in the Dates of Passages. For instance, when creation was completed: "God saw everything which he had made, and behold, it was *very good*" (Gen. i:31). And again we are told that "it repented God that he had made man upon the earth" (Gen. vi:6). But between the periods to which these statements refer there were hundreds of years of disobedience on the part of man. No wonder, then, that "God repented" or "turned from" his purpose of preserving the antediluvian race upon the earth.

(4) Difference of Authorship in Certain Passages. Thus it is said: "In the day thou eatest thereof, thou shalt surely die" (Gen. ii:17). And again it is said: "Ye shall not surely die" (Gen. iii:14). But God was the author of the first statement and the devil was the author of the second. It is needless to say that the first is correct and that man received his dying nature in consequence of disobedience.

(5) Varied Use of Terms. The term generation sometimes applies to the number of progenitors and sometimes it is reckoned as a certain number of years, as in the English Court of Chancery.

3. Different Basis of Statement. **(1) Different Periods.** Sometimes different periods were considered as the basis of a statement. For example, it was announced to Abraham that his "seed should be a stranger in a land that was not theirs . . . and they should afflict them four hundred years" (Gen. xv:13).

This was the prophecy. The historian states that "the sojourning of the children of Israel who dwelt in Egypt was four hundred and thirty years" (Exod. xii:40).

It will be remembered that the affliction did not begin until after the death of Joseph, when "there

arose another king over Egypt that knew not Joseph" (Exod. i:8).

(2) Different Numbers. Sometimes numbers are inclusive, sometimes exclusive. It is said "those who died in the plague (whole number) were twenty and four thousand" (Num. xxv:9). While Paul says: "Neither let us commit fornication, as some of them committed, and fell in one day three and twenty thousand" (1 Cor. x:8).

(3) Different Names, Etc. *The name of a tribe sometimes given to posterity.* Edom or Esau is sometimes used to designate the Edomites, who were the descendants of Esau, 'as in Num. xx:18. There are many similar instances. The same persons or places sometimes had different names, either successively or at the same time. This often occurred, as in the case of Barnabas, who was called Joses (Acts iv:36); Barsabas is called Justus and also Joseph (Acts i:23); Nathanael is another name for Bartholomew; Thomas is also called Didymus; and Levi is another name for Matthew. The place called Enmishpat, which is Kadesh in the Hebrew text of Gen. xiv:7, is called Magdala in Matthew xv:39. Horeb is another name for Sinai.

(4) Various Persons, Etc. Various persons or places also have the same name. This often happens, as in the case of Joram, one of whom was king of Israel and the other king of Judah at the same time. There were many Pharaohs, this being the general name for the kings of Egypt. There were also three persons named Herod; and various similar instances occur. There was one Bethlehem belonging to the tribe of Zebulun (Josh. xix:15), and another in the territory of the tribe of Judah (Matt. ii:6). There were also two towns called Cana, as there are many duplicate names of towns and cities in our own day. Dan was the name of one of the Jewish tribes, and the town of Laish was afterward called Dan. It was also the name of a river—one of the two which formed the Jordan. (See DAN; JAIR, etc.).

A little attention to this class of facts will obviate many difficulties which appear insurmountable to the careless reader.

(5) Change in Meaning of Terms. All living languages are flexible, and in the course of the centuries the meaning of many words has been changed in the English tongue, and hence the value of the Hebrew and Greek texts. In Ps. cxix:147 we read: "I prevented (or preceded) the morning; I hoped in thy word." The Septuagint renders this passage: "I arose before it was morning," etc. When King James' version was issued, one of the meanings of "let" was to hinder, as in Romans i:13. And other obsolete terms need examination in order that they may not obscure the meaning.

(6) New Facts, Etc., Mentioned. One writer mentions facts omitted by others. This is especially true concerning the Gospels, for in this case we have four different authors, each of whom gives us more or less of the particulars pertaining to the life of the Christ.

Although these books were written during the first century, it was not until Christianity had been propagated through a great portion of the known world on the testimony of thousands of eye-witnesses to some of the principal facts which these writers record. It was not until many of the followers of Christ had sealed their testimony with their blood, not probably, until after Nero had lighted his gardens with fires made by wrapping living Christians in garments covered with pitch (about A. D. 64).

The writing of these books by this time became a necessity in order that the principal events recorded therein might not be perverted by tradition; and it is certain that they could not have been thus presented to that generation, and accepted by those who were cognizant of the great tragedy, either of their own knowledge or that of their personal friends, *unless the books had been both genuine and authentic.*

The opening verses of the Gospel by Luke indicate that at that time there were already many incomplete histories of our Lord, and the variety evinced in the work of the four evangelists show that they wrote entirely independent of each other. There is no intimation even of arrangement, and evidently no collusion between these witnesses. Their testimony, therefore, is that which comes under the head of the very best criterion of human testimony, viz.: *substantial truth under circumstantial variety.* For instance, John speaks of Mary Magdalene as coming early to the sepulcher (John xx:1). He does not say that she came alone, but speaks of her as the actor in the events immediately following. Matthew not only speaks of her, but adds that "the other Mary was with her" (Matt. xxviii:1).

Mark speaks of Mary Magdalene, the "other Mary," mentioned by Matthew, and adds the name of another of the little group (Mark xvi:1). Luke mentions the names of three, and adds that "other women" were with them (Luke xxiv:10). Thus he endorses the testimony of the others and adds to it.

Again Luke speaks of "a certain blind man who sat by the wayside And he cried, saying, 'Jesus, thou son of David, have mercy upon me'" (Luke xviii:35, 38).

Matthew does not mention this incident, but speaks of *two blind men* who besought him, apparently on the same day (Matt. xx:30). The first event occurred according to Luke, when they were *approaching Jericho*, while the one which Matthew records took place "*as they departed from Jericho.*" Cases like the above, and many others, indicate the necessity of studying the connection of the texts under consideration. We also find that Matthew speaks of "a woman of Canaan" who besought Jesus to have mercy upon her daughter (Matt. xv:22), while Mark, in recording the same circumstance, says that the woman "was a Greek, a Syro-Phœnician by nation" (Mark vii:26). Syro-Phœnicia being at this time a province of the former Greek but now Roman government, and inhabited largely by the descendants of Canaan, all of these statements were undoubtedly true.

Another illustration of the wonderful evidence of substantial truth under circumstantial variety is found in the fact that one writer speaks of the ascension of Christ as if it occurred on "the Mount called Olivet" (Acts i:9, 12), while Luke gives us to understand that he ascended from Bethany (Luke xxiv:50). Both statements are true because Bethany was situated on the slope of "the Mount called Olivet."

Thus we find that a little study solves these problems and shows the wonderful unity of these independent witnesses, some of whom mentioned circumstances which were omitted by the others. No one of the writers of the New Testament claimed to give a full account of the life, death and resurrection of our Lord. Indeed John distinctly states that "Many other signs truly did Jesus in the presence of his disciples, which are not written in this book" (John xx:30). But the glimpses which we here and there find of the living, loving and glorified Christ are quite enough

to bring us to him, if we live out his teachings to the children of men.

E. A. R.

DISEASES OF THE JEWS (dīz-ēz'ēz, jūz).

The most prevalent diseases of the East are cutaneous diseases, malignant fevers, dysentery and ophthalmia.

(1) Of the first of these the most remarkable are leprosy and elephantiasis. (See LEPROSY.) To the same class also belongs the singular disease called the mal d'Aleppo, which is confined to Aleppo, Bagdad, Aintab and the villages on the Segour and Kowick. It consists in an eruption of one or more small red tubercles, which give no uneasiness at first, but, after a few weeks, become prurient, discharge a little moisture and sometimes ulcerate. Its duration is from a few months to a year. It does not affect the general health at all, and is only dreaded on account of the scars it leaves. Foreigners who have visited Aleppo have sometimes been affected by it several years after their return to their own country. It is a remarkable fact that dogs and cats are likewise attacked by it (Russell's *Nat. Hist. of Aleppo*, ii:299). The Egyptians are subject to an eruption of red spots and pimples, which cause a troublesome smarting. The eruption returns every year toward the end of June or beginning of July, and is on that account attributed to the rising of the Nile (Volney, i:231).

(2) Malignant fevers are very frequent, and of this class is the great scourge of the East, the plague, which surpasses all others in virulence and contagiousness. (See PLAGUE.)

(3) The Egyptian ophthalmia is prevalent throughout Egypt and Syria, and is the cause of blindness being so frequent in those countries. (See BLINDNESS.)

(4) Of inflammatory diseases in general, Dr. Russell (*supra*) says that at Aleppo he has not found them more frequent, nor more rapid in their course, than in Great Britain. Epilepsy and diseases of the mind are commonly met with. Melancholy monomaniacs are regarded as sacred persons in Egypt, and are held in the highest veneration by all Mahometans (Prosper Alpinus, *De Med. Ægypt*, p. 58).

(5) Diseases are not unfrequently alluded to in the Old Testament, but, as no description is given of them, except in one or two instances, it is for the most part impossible even to hazard a conjecture concerning their nature. The issue mentioned in Lev. xv:5 cannot refer to *gonorrhœa virulenta*, as has been supposed by Michaelis and Hebenstreit (Winer, s. v. *Krankheiten*); for the person who exposed himself to infection in the various ways mentioned was only unclean until the evening, which is far too short a time to allow of its being ascertained whether he had escaped contagion or not. Either, then, the law of purification had no reference whatever to the contagiousness of the disease (which is hardly admissible), or the disease alluded to was really not contagious.

(6) Joram's disease is probably referable to chronic dysentery, which sometimes occasions an exudation of fibrine from the inner coats of the intestines. The fluid fibrine thus exuded coagulates into a continuous tubular membrane, of the same shape as the intestine itself, and as such is expelled. This form of the disease has been noticed by Dr. Good under the name of *diarrhœa tubularis* (*Study of Med.*, i:287). A precisely similar formation of false membranes, as they are termed, takes place in the windpipe in severe cases of croup.

(7) Hezekiah suffered, according to our version, from a *boil*. The term here used, שֶׁחַיִּים, *shekheccu'*, means, literally, *inflammation*; but we have no means of identifying it with what we call boil. The same may be said of the plague of boils and blains (see **BLAINS**), and of the names of diseases mentioned in the 28th chapter of Deuteronomy, such as pestilence, consumption, fever, botch of Egypt, itch, scab. The case of Job, in which the term translated *boil* also occurs, demands a separate notice. (See **JOB**.)

(8) Nebuchadnezzar's disease was a species of melancholy monomania, called by authors zoanthropia, or more commonly, lycanthropia, because the transformation into a wolf was the most ordinary illusion. Esquirol considers it to have originated in the ancient custom of sacrificing animals. But, whatever effect this practice might have had at the time, the cases recorded are independent of any such influence, and it really does not seem necessary to trace this particular hallucination to a remote historical cause, when we remember that the imaginary transformations into inanimate objects, such as glass, butter, etc., which are of every day occurrence, are equally irreconcilable with the natural instincts of the mind. The same author relates that a nobleman of the court of Louis XIV was in the habit of frequently putting his head out of a window, in order to satisfy the urgent desire he had to bark. Calmet informs us that the nuns of a German convent were transformed into cats and went mewling over the whole house at a fixed hour of the day (Esquirol, *Maladies Mentales*, i:522). Illustrations of corresponding mental maladies might be furnished by the hundreds.

(9) Antiochus and Herod died, like Sylla, from phthiriasis, a disease which was well known to the ancients. Plutarch, in his *Life of Sylla*, mentions several names of persons who had died from it, amongst whom are Pherecydes the philosopher, Alcman the poet, and Mutius the lawyer. M. Alibert was consulted by a celebrated French academician, who complained that his enemies even pursued him into the academy, and almost carried off his pen (*Dermatoses*, i:585). Nothing is known respecting the immediate causes of this malady, but there is no doubt that it depends on the general state of the constitution, and must not be attributed to uncleanliness. Alibert mentions the case of a person who, as soon as the parasitic animals had been destroyed, fell into a typhoid state, and shortly after died. The question of alleged demoniacal possession, so often mentioned in the New Testament, has been considered under another head. (See **DEMONIAC**.)

W. A. N.

Slave Bearing Covered Dishes to Table.

DISH (dīsh), (Heb. שֶׁפֶל, *say'fel*, low), probably a shallow pan.

Various kinds of dishes are mentioned in Scripture, but it is impossible to form any other idea

of their particular forms than may be suggested by those of ancient Egypt and of the modern East, which have much resemblance to each other. The sites of such ancient towns as were built of sun-dried bricks are usually covered with broken potsherds, some of them large enough to indicate the form of the entire vessel. These are remarkably similar to those in modern use, and are for the most part made of a rather coarse earthenware, covered, with a compact and strong glaze, with bright colors, mostly green, blue or yellow. Dishes and other vessels of copper, coarsely but thickly tinned, are now much used in the East, but how far this may have been anciently the case we have not the means of knowing. (See **BASIN**; **CUP**.)

DISHAN (dī'shan), (Heb. דִּישָׁן, *dee-shawn'*, another form of Dishon, antelope), youngest son of Seir the Horite, about B. C. 1953 (Gen. xxxvi:21, 28, 30; 1 Chron. i:38, 42).

DISHON (dī'shōn), (Heb. דִּישׁוֹן, *dee-shone'*, antelope).

1. The name of the fifth son of Seir, the Horite (Gen. xxxvi:21, 26, 30; 1 Chron. i:38), B. C. about 1963.

2. Grandson of Seir and son of Anah (Gen. xxxvi:25; 1 Chron. i:41).

DISHONESTY (dīs-ōn'ēs-tŷ), (Gr. αἰσχύνη, *aiheeskhoon'ay*, 2 Cor. iv:2), shame, disgrace. R. V., "shame." Tyndale has *unhonesty*.

DISPENSATION (dīs'pēn-sā'shūn), (Gr. οἰκονομία, *oy-kon-om-ee'ah*, management of household; hence English *economy*).

(1) These are otherwise called "the ways of God," and denote those schemes or methods which are devised and pursued by the wisdom and goodness of God, in order to manifest his perfections and will to mankind, for the purpose of their instruction, discipline, reformation and advancement in rectitude of temper and conduct, in order to promote their happiness. These are the grand ends of the divine dispensations, and in their aptitude to promote these ends consist their excellence and glory.

(2) The works or constitutions of nature are, in a general sense, divine dispensations, by which God condescends to display to us his being and attributes, and thus to lead us to the acknowledgment, adoration and love of our Creator, Father and Benefactor.

(3) The sacred scriptures reveal and record other dispensations of Divine Providence, which have been directed to the promotion of the religious principles, moral conduct and true happiness of mankind. These have varied in several ages of the world, and have been adapted by the wisdom and goodness of God to the circumstances of his intelligent and accountable creatures. In this sense the various revelations which God has communicated to mankind at different periods, and the means he has used, as occasion has required, for their discipline and improvement, have been justly denominated divine dispensations.

(4) The various dispensations are known as the *Patriarchal*, the *Mosaic*, or *Jewish*, and the *Christian*. They are called the dispensations of grace, the perfection and ultimate object of every other (see Eph. i:10; iii:2). All these were adapted to the conditions of the human race at these several periods; all, in regular succession, were mutually connected and rendered preparatory one to the other, and all were subservient to the design of saving the world and promoting the perfection and happiness of its rational and moral inhabitants. (See **COVENANT**.)

(5) St. Paul uses the term to indicate the office (duty) intrusted to him by God of proclaiming the Gospel (1 Cor. ix:17; Col. i:25).

(6) Those acts of God which affect men either in mercy or judgment, are called dispensations of Providence (which see).

DISPERSION OF ISRAEL (dīs-pēr'shūn), (Gr. *διασπορά*, *dee-as-por-ah'*, rendered "dispersed," John vii:35; "scattered," James i:1; 1 Pet. i:1). (See ISRAEL; NATIONS, DISPERSION OF).

DISPERSION OF NATIONS (dīs-pēr'shūn ōv nā'shūns). See NATIONS, DISPERSION OF.

DISPOSITION (dīs-pō-zīsh'ūn), (Gr. *διαταγή*, *dee-at-ag-aj'*, Acts vii:53), an arrangement, instrumentality. R. V., "received the law as it was ordained by angels;" marg., "as the ordinance of angels."

'Disposition' is the Rhemish word here (Wycliffe, Tyndale, Geneva have 'ordinance;' Coverdale, Cranmer, 'ministration'), and it is used in the archaic sense of administration. In the same sense 'disposer' is used by Tyndale, in 1 Cor. iv:1. 'Let men this wise esteeme us, even as the ministers of Christ, and disposers of the secretes of God.' (Hastings' *Bib. Dict.*)

DISPUTE (dīs-pūt'), (Gr. *διαλέγομαι*, *dee-al-eg'-om-ahēe*, Acts xix:8), to discuss, to reason.

The only passage in which 'dispute' seems to have the meaning of 'wrangle' is 1 Tim. vi:5, 'Perverse disputings of men of corrupt minds' (R. V. 'wranglings'). Here Wycliffe has 'fightyngis' and Rhemish 'conflictes' after Vulg. *conflictationes*, but Tyndale and the rest 'disputations,' a word which never seems to signify 'altercation,' 'wrangling.' The Greek word is found nowhere else. (Hastings' *Bib. Dict.*)

DITCH (dīch), (Heb. *גֵּב*, *geb*, ditch, 2 Kings iii:16), a trench for holding cistern water; Job ix:31, a collection or pool of water. Also *שִׁחָוּה*, *shuchaw'*, pit, ditch (Prov. xxiii:27), used figuratively.

DIVERS, DIVERSE (dī'vēr-z, dī-vēr's'), (Heb. *כִּלְאֵי יָמִים*, *kil-ah'yim*, of two sorts).

1. Several persons (2 Chron. xxx:11.)

2. Different (Judg. v:30; Dan. vii:19).

'Divers' has now dropped out of use, or, if used archaically, is restricted to the sense of 'several.' But formerly 'divers' and 'diverse' were indifferent spellings of the same adjective, which expressed, as above quoted, either 'varied,' 'different' (Lat. *diversus*), or 'various,' 'several.' The Hebrews were forbidden (1) to engender their cattle with *divers* kinds, as by coupling horses and asses; (2) to sow their fields or gardens with mingled seed; (3) to wear cloth made of linen and woolen wrought together. By these admonitions they were taught to beware of mingling themselves with the heathen; or mingling the truths and ordinances of God with their own inventions; and to avoid purposing to mix nature and grace, the Messiah's righteousness and their own, in the work of their salvation (Lev. xix:19; Deut. xxii:9, 11). (4) *Divers* weights and measures are, a larger, to receive goods with, and a lesser, to give them out; this importing, as it does, deliberate dishonesty, is an abomination to the Lord (Prov. xx:10, 23). (5) *Diversity of gifts and operations* are different forms, kinds and degrees of them (1 Cor. xii:4, 6).

DIVINATION (dīv'ī-nā'shūn), (Heb. *כַּהֲסֵם*, *keh'-sem*, lot), is a general term descriptive of the various illusory arts anciently practiced for the discovery of things secret or future.

The human mind has always shown a strong curiosity to ascertain the course of fortune and the issue of present or contemplated schemes; and in those countries and ages where ignorance of physical laws has combined with superstition to debase it, it has sought to gratify this innate disposition to pry into futurity by looking for presages in things between which and the object of its anxiety no connection existed but in the diviner's imagination. Scarcely a single department of nature but was appealed to as furnishing, on certain conditions, good or bad omens of human destiny; and the aspect of things which, perhaps by the most casual coincidence, marked some event or crisis in the life of one or two individuals, came to be regarded, by blind credulity, as the fixed and invariable precursor of a similar result in the affairs of mankind in general. By such childish and irrational notions was the conduct of the heathen guided in the most important, no less than in the most ordinary occurrences of life; and thence arose the profession of augurs, soothsayers, *et hoc genus omne* of impostors, who, ingrafting vulgar traditions on a small stock of natural knowledge, established their claims to the possession of an occult science, the importance and influence of which they dexterously increased by associating it with all that was pompous and imposing in the ceremonies of their religion.

This science, if that can be called science which was the product of ignorance and fraud united, was divided into various branches, each of which had its separate professors. In a general view, divination may be considered as either natural or artificial; the first being founded on the notion that the soul possesses, from its spiritual nature, some prescience of futurity, which it exemplifies particularly in dreams, and at the approach of death; the second resting on a peculiar interpretation of the course of nature, as well as on such arbitrary observations and experiments as superstition introduced. The different systems and methods that were anciently in vogue were almost incredible; as, for instance, Aëromancy, divining by the air; Arithmomancy, by means of numbers; Capnomancy, by the smoke of sacrifices; Chiromancy, by the lines on the palms of the hands; Hydromancy, by water; Pyromancy, by fire, etc. But without attempting an enumeration and explanation of all the arts of divination that were anciently practiced, let us confine ourselves to the mention of those which occur in sacred history (Exod. vii:11; Is. xliv:25; Jer. 1:35; Dan. ii:12, etc.).

(1) **Wise Men.** This is a term applied generally to magicians, or men who were skilled in natural science.

(2) **Wizards.** 'Wizards,' or wise men, and 'a witch,' from an Arabic verb signifying 'to reveal,' both practicing divination by the same arts, i. e., pretending to reveal secrets, to discover things lost, find hidden treasures and interpret dreams.

(3) **Flight of Birds.** One who foretold what was to happen by the flight of birds, or the use of lots. (See LOT.)

(4) **Observer of Times.** One who, though rendered by our translators 'an observer of times,' foretold political or physical changes by the motion of the clouds, along with whom Isaiah conjoins those who made the same predictions from eclipses and the conjunction of the stars (xlvi:13).

(5) **An Enchanter.** 'An enchanter' was probably one who practiced Ophiomancy, or the art of charming serpents, which was and still is a favorite trick of jugglery in the East.

(6) **Charmer.** 'A charmer,' one who placed

words and things in a certain arrangement, or muttered them, as a kind of spell.

(7) **Consulter with Familiar Spirits.** 'A consulter with familiar spirits,' or a 'ventriloquist,' was a wizard who asked counsel of his familiar, and gave the responses received from him to others—the name being applied in reference to the spirit or demon that animated the person, and inflated the belly, so that it protuberated like the side of a *bottle* (see Lev. xx:27; 1 Sam. xxviii:8; also Acts xvi:16).

(8) **Necromancy.** 'A necromancer,' one who, by frequenting tombs, by inspecting corpses, etc., like the witch of Endor, pretended to evoke the dead, and bring secrets from the invisible world (Gen. xli:8; Exod. vii:11; Lev. xix:26; Deut. xviii:10-12).

(9) **Belomancy.** Belomancy, as it is called, is a form of divination by means of arrows (Ezek. xxi:21; see also 2 Kings xiii:14-19), a notable example of which occurs in the history of Nebuchadnezzar, who, being undecided whether to march first against Jerusalem or Rabbah, allowed neither his policy nor resentment to decide the course of his expedition, but was determined wholly by the result of superstitious rites.

The way of divining by arrows was, having first made them bright, 'in order the better to follow them with the eye,' to shoot them, and to prosecute the march according to the direction in which the greatest number of arrows fell; or, having 'mixed together' some arrows with the names of the devoted cities marked on them, to attack that first which was first drawn out; or to put in a bag three arrows, as is the practice of the Arabs, one of which is inscribed with the words, 'Command me, Lord,' the second with 'Forbid me, Lord,' while the third is left blank; so that if the first is taken out, he was to go; if the second, he was to desist; if the third is drawn, no decision being given, the experiment is to be repeated.

(10) **Rhodomancy.** Rhodomancy, or divination by rods (Hos. iv:12), has been confounded with the preceding. But the instruments of divination which Hosea alludes to are entirely different from those described by Ezekiel, arrows being used by the latter, whereas the former speaks of 'staff.' The form of divination by the staff was, after placing it upright, to let it fall, and decide by the direction in which it fell, or, according to others, by measuring the staff with the finger, saying at each span, 'I will go,' or 'I will not go,' and determining the course, according as it happened to be the one or the other at the last measurement. Both of these, as Jerome informs us, were frequently practiced by the Assyrians and Babylonians. Herodotus (vi) describes the Alani women as gathering and searching anxiously for very smooth and straight wands to be used in this superstitious manner.

(11) **Images.** Another way of divining was by 'images' (Ezek. xxi:21), which are generally considered talismans, but which the Persian and other versions render astrological instruments or tables.

(12) **The Liver.** Another form of divination was 'by looking into the liver' of a newly-killed sacrifice, and by observing its state and color according to certain rules, to draw a favorable or unfavorable omen.

(13) **The Cup.** The last form which it is of consequence to notice as alluded to in Scripture was by 'the cup.' But in what manner it was practiced; whether it was by observing the appearance of some magical ingredients that were infused into the vessel, or whether allusion is made

to a famous cup which the immemorial tradition of the East says has been in the possession of some great personages, and represents the whole world; or, finally, whether the original word rendered 'divineth,' should be rendered by 'searching' or 'inquiring earnestly,' as many learned writers, anxious to save the character of Joseph from the imputation of sorcery (Gen. xli:5), have labored to prove, it is absolutely impossible, and we shall not attempt, to determine.

(14) **Prevalence in Egypt.** Egypt, the cradle of arts and sciences, if she did not give it birth, seem to have encouraged the practice of divination at an early age, and whether any of its forms had become objects of popular superstition, or were resorted to for the purposes of gain in the days of Joseph, it is well known that at the time of the Hebrew Exodus there were magicians in that country whose knowledge of the arcana of nature, and whose dexterity in the practice of their art, enabled them, to a certain extent, to equal the miracles of Moses. By what extraordinary powers they achieved those feats, how they changed their rods into serpents, the river water into blood, and introduced frogs in unprecedented numbers, is an inquiry that has occasioned great perplexity to many men of learning and piety. Some have imagined that the only way of accounting for the phenomena is to ascribe them to jugglery and legerdemain; the serpents, the frogs and the other materials requisite having been secretly provided and dexterously produced at the moment their performances were to be exhibited.

Others contend that these conjurors were aided by familiar spirits or infernal agents, with the Divine permission, in the performance of their wonderful feats. 'Earth, air and ocean,' says a sensible writer, 'may contain many things of which our philosophy has never dreamt. If this consideration tend to humble the pride of learning, it may remind the Christian that secret things belong not to him, but to a higher power.'

It is reasonable to suppose that as Moses never had been in any other civilized country, all the allusions contained in his writings to the various forms of divination were those which were practiced in Egypt, and, indeed, so strong a taste had his countrymen imbibed there for this species of superstition that throughout the whole course of their history it seems to have infected the national character and habits.

(15) **Divination a Snare to the Hebrews.** The diviners, who abounded both amongst the aborigines of Canaan and their Philistine neighbors (Is. ii:6), proved a great snare to the Israelites after their settlement in the promised land, and yet, notwithstanding the stern prohibitions of the law, no vigorous efforts were made to put an end to the crime by extirpating the practitioners of the unhallowed art, until the days of Saul, who himself, however, violated the statute on the night previous to his disastrous fall (1 Sam. xxviii).

(16) **Chaldæa, the Mother Country of Diviners.** But it was Chaldæa to which the distinction belongs of being the mother country of diviners. Such a degree of power and influence had they attained in that country (see CHALDÆA) that they formed the highest caste and enjoyed a place at court; nay, so indispensable were they in Chaldæan society that no step could be taken, not a relation could be formed, a house built, a journey undertaken, a campaign begun, until the diviners had ascertained the lucky day and promised a happy issue.

A great influx of these impostors had, at various times, poured from Chaldæa and Arabia into the land of Israel to pursue their gainful occupa-

tion, more especially during the reign of the later kings (Is. viii:19), and we find Manasseh not only their liberal patron, but zealous to appear as one of their most expert accomplices (2 Kings xxi:6; 2 Chron. xxxiii:6). The long captivities in Babylon spread more widely than ever among the Jews a devoted attachment to this superstition, for after their return to their own country, having entirely renounced idolatry, and, at the same time, no longer enjoying the gift of prophecy or access to the sacred oracles, they gradually abandoned themselves, as Lightfoot has satisfactorily shown, before the advent of Christ, to all the prevailing forms of divination (*Comment. on Matt.*).

(17) **Mosaic Denunciations Against.** Against every species and degree of this seductive superstition the sternest denunciations of the Mosaic law were directed (Exod. xxii:18; Lev. xix:26, 31; xx:27; Deut. xviii:10, 11), as fostering a love for unlawful knowledge and withdrawing the mind from God who only is wise; while, at the same time, repeated and distinct promises were given that in place of diviners and all who used enchantments God would send them prophets, messengers of truth, who would declare the Divine will, reveal futurity and afford them all the useful knowledge which was vainly sought for from those pretended oracles of wisdom. Much discussion, however, has been carried on by learned men to determine the question whether the ancient tribe of diviners merely pretended to the powers they exercised, or were actually assisted by demoniacal agency. The latter opinion is embraced by almost all the fathers of the primitive church.

(18) **A System of Imposture.** On the other hand, it has been with great ability and erudition maintained that the whole arts of divination were a system of imposture, and that Scripture itself frequently ridicules those who practiced them as utterly helpless and incapable of accomplishing anything beyond the ordinary powers of nature (Is. xlvi:11-13; xliv:25; Jer. xiv:14; Jonah ii:8; see Faber's *Origin of Pagan Idolatry*; Farmer's *Dissert. on Miracles*; Lightfoot's *Works*; Potter's *Antiq.* i:354; Stolberg's *Hist. of Relig.* iii; Goodwin's *Moses and Aaron*, p. 216; Rosenmüller's *Geog.* vii:101, 102; Gesenius's *Comment. on Isaiah*, app. xi; Richardson's *Dissertation on the Manners of Eastern Nations*). R. J.

DIVORCE (dī-vōrs'), **DIVORCEMENT** (Heb. קְרִיאת, *ker-ee-thooth'*; Gr. ἀποστάσιον, *ap-os-tas'-ee-on*, a cutting, separating. See MARRIAGE.

For literature on the subject see Alvah Hovey, *The Scriptural Doctrine of Divorce*, Boston, 1866; Joseph Tracy, *The Bible Doctrine of Divorce in Bibl. Sacra*, July, 1866.

DIZAHAB (dīz'a-hāb), (Heb. אֶרֶץ זָהָב, *dee zaw-hawb'*, golden, region of gold), the name of a place not far from the plains of Moab, mentioned in Deut. i:1. Robinson identifies it with *Dahab*, a cape on the west shore of the Gulf of Akabah (i:147; ii:187, note).

DOCTOR (dōk'tēr), (Gr. διδάσκαλος, *did-as'kal-os*, a teacher, Luke ii:46; Acts v:34).

(1) Teacher of the law may, perhaps, be distinguished from scribe, as rather teaching *vivā voce* than giving written opinions.

(2) Doctors of the law were mostly of the sect of the Pharisees, but are distinguished from that sect in Luke v:17.

(3) Doctors or teachers are mentioned among Divine gifts in Ephes. iv:11.

DOCTRINE (dōk'trīn). 1. *Leh'kakh* (Heb. לָקַח, something received), instruction (Deut. xxxii:2; Job xi:4; Prov. iv:2; Is. xxix:24).

2. *Mo-say-raw'* (Heb. מוֹסַרְרָה, correction, chastisement, Jer. x:8).

3. *Shem-oo-aw'* (Heb. שְׂמוּעָה, something heard, and so an announcement), proclamation, preaching (Is. xxviii:9).

4. Generally in the New Testament *doctrine* is from Gr. διδάσκω, *did-as'ko*, to teach (Matt. vii:28; Mark i:22, 27; Luke iv:32, etc.), but once (Heb. vi:1) it is the rendering of Gr. λόγος, *log'os*, something spoken, instruction.

5. In general: The truths of the gospel are the *doctrine of God*, and according to *godliness and sound doctrine*. God in Christ is their author, matter and end, and they are pure, solid, substantial and uncorrupted with error (1 Tim. vi:1, 3); Heb. vi:1; 2 Tim. iv:3). And they are *Christ's doctrine*, as he is the chief preacher and great substance of them (Tit. ii:10), and they are *not his*, i. e., not his only, nor his as a mere man, which the Jews supposed him to be, but the Father's also (John vii:16). They are the doctrine of preachers, as they are published by them (2 Tim. iii:10).

DOCUS (dō'kuz), (Gr. Δώκ, *dōke*, a little hold, a small stronghold near Jericho (1 Macc. xvi:15, comp. verse 14) built by Ptolemæus, the son of Abubus, and in which he entertained and murdered his father-in-law, Simon Maccabæus, with his two sons. By Josephus (*Ant.* xiii:8,1; *B. J.* i:2, 3) it is called Dagon, and is said to have been "one of the fortresses" (ἐρμάρων) above Jericho. The name still remains in 'Ain Duk, a copious spring about four miles northwest of Jericho. A road leads by it from the Jordan valley into the hill country. Above the spring are traces of ancient fortifications. Also written Dok).

DODAI (dōd'a-i), (Heb. דֹּדַי, *do-dah'ee*, probably another form for *Dodo*), an Ahohite, who commanded the contingent for the second month under David (1 Chron. xxvii:4); probably the same as *Dodo* (which see).

DODANIM (dōd'a-nīm), (Heb. דֹּדַנִים, *do-daw-neem'*, perhaps leaders; Sept. Ῥόδιοι, *Rhodii*), the descendants of the fourth son of Javan (Gen. x:4). Bochart and other commentators on the ethnographical sketch in Gen. x suppose that the first settlements of the Dodanim were in the southwest part of Asia Minor; where the country called by the Greeks Doris, with the neighboring isle of Rhodes, are conceived to exhibit traces of this origin, the Hebrew letters ד (*d*) and ר (*r*) being, from their similarity, often transposed. In fact, some copies have the ד, and read *Rodanim* (as in the margin of the Auth. Vers.). It is further supposed that settlers of this family may be traced in Thessaly and Epirus, where the name is traced in the city of Dodona and in the country of Doris. But there seems much of uncertainty in all these ingenious speculations.

DODAVAH (dōd'a-vah), (Heb. דֹּדַוָּהוּ, *do-daw-vaw'hoo*, beloved of Jehovah), father of Eliezer, who condemned Jehoshaphat's alliance with Ahaziah (2 Chron. xx:37) B. C. before 895. Properly *Dodavahu*.

DODO (dō'do), (Heb. דֹּדוֹ, *do-do'*, amatory).

1. *Dodo*, the Ahohite, was the father of Eleazar, the second of the three who commanded the "thirty" (2 Sam. xxiii:9; 1 Chron. xi:12). Either he or his son had charge of the second monthly

course (1 Chron. xxvii:4). Here and in Samuel the name is Dodai, which is probably correct (B. C. ante 1312).

2. Father of Elhanan, who was one of David's "thirty" (2 Sam. xxiii:24; 1 Chron. xi:26).

3. A man of Issachar, and ancestor of Tola (Judg. x:i), (B. C. ante 1046).

DOE (dō), a female deer or antelope. In Prov. v:19, R. V., it is the female ibex or wild goat of Sinai.

DOEG (dō'ēg), (Heb. דֹּעַג, *do-ayg'*, fearful).

An Edomite, and chief overseer of King Saul's flocks, which is an important trust in Oriental courts. At Nob he was witness of the assistance which the high-priest Ahimelech seemed to afford to the fugitive David, by furnishing him with the sword of Goliath, and by supplying him with bread even from the sacred table (1 Sam. xxi:7). Of this he failed not to inform the king, who, regardless of the explanation offered by Ahimelech, and finding that the chiefs censured him, and hesitated to lay their hands upon a person so sacred, commanded Doeg to slay him and his priests—a task which was executed with equal readiness and cruelty by the Edomite (1 Sam. xxii:18, sq.).

DOG (dōg), (Heb. דָּוָג, *keh'leb*, yelping; κυνάριον, *koo-nar'ee-on*, puppy; κύων, *koo'ohn*, dog; Arabic, *kelb*), occurs in many places of Scripture (Exod. xxii:31; 1 Sam. xvii:43; xxiv:14; 2 Sam. ix:8; 2 Kings viii:13; Ps. lix:6, 14, 15; Prov. xxvi:11, 17, etc.).

(1) An animal so well known, whose numerous varieties come under daily observation, requires no detailed description. There is, however, in Asia still extant one, perhaps more than one, species of dogs which never have been the companions of man, and there are races of uncertain origin, that may have been formerly domesticated, but which are now feral, and as fierce as wolves; while, from the particular opinions of Oriental nations, there are others, exceedingly numerous, neither wild nor domesticated, but existing in all the cities and towns of the Levant, without owners, feeding on carrion and offals, and still having the true instinct of protecting property, guarding the inhabitants of the district or quarter where they are tolerated, and so far cherished that water and some food are not unusually placed within their reach.

(2) The true wild species of Upper and Eastern Asia is a low, sharp-nosed, reddish cur-dog, not unlike a fox, but with less tail. In Persia and Turkey there exists a larger dog resembling a wolf, exceedingly savage. Both are gregarious, hunt in packs, but are occasionally seen alone. They are readily distinguished from a wolf by their shorter unfurnished tails. In the time of the sojourning of Israel in Egypt, there were already in existence domestic dogs of the principal races now extant—the cur-dog or fox-dog, the hound, the greyhound, and even a kind of low-legged turnspit. All the above, both wild and reclaimed, there is every reason to believe were known to the Hebrews; and notwithstanding the presumed Mosaic prohibition, anterior habits and in some measure the necessity of their condition must have caused cattle-dogs to be retained as property (Deut. xxiii:18), for we find one of that race, or a house-dog, actually attending on travelers (Tobit v:16; xi:4).

(3) Besides the cattle-dog, the Egyptian hound and one or two varieties of greyhound were most likely used for hunting—a pastime, however, which the Hebrews mostly pursued on foot.

The street-dog, without master, apparently de-

rived from the rufous cur, and in Egypt partaking of the mongrel greyhound, often more or less bare, with a mangy unctuous skin, frequently with several teeth wanting, was, as it now is, considered a defiling animal. It is to animals of this class, which no doubt followed the camp of Israel, and hung on its skirts, that allusion is more particularly made in Exod. xxii:31; for the same custom exists at this day, and the race of street-dogs still retains their ancient habits.

(4) But with regard to the dogs that devoured Jezebel, and licked up Ahab's blood (1 Kings xxi:23), they may have been of the wild races, a species of which is reported to have particularly infested the banks of the Kishon and the district of Jezreel.

(5) It is to be presumed that practically the street-dogs alone were considered as absolutely unclean, though all, as is the case among Mohammedans, were excluded from familiarity.

(6) The cities of the East are still greatly disturbed in the night by the howlings of street-dogs, who, it seems, were similarly noisy in ancient times, the fact being noticed in Ps. lix:6, 14, and dumb or silent dogs are not unfrequently seen, such as Isaiah alludes to (lvi:10). C. H. S.

Figurative. (1) A *dog*, *dead dog*, or *dog's head* was expressive of the most insignificant person (2 Kings viii:13; 1 Sam. xxiv:14, and 2 Sam. ix:8, and iii:8). (2) Persons immodest and unclean, or who return to filthy doctrines and practices, or who bark and rail at such as they hate, are called *dogs* (Rev. xxii:15; Deut. xxiii:18; 2 Pet. ii:22; Prov. xxvi:11; Ps. lix:6, and xxii:16;). (3) False teachers are *dogs*; they are inclined to abominable courses: are *dumb dogs*; do not faithfully warn and instruct men: are *lazy dogs*; do not faithfully work: are *greedy dogs*; that never get enough of worldly things; and are given to bark at and reproach the people of God (Phil. iii:2; Is. lvi:11). (4) The gentiles were reckoned as *dogs* by the Jews, but they *ate of the crumbs* that fell from Jesus' table; partook of some of his miracles, profited by them, and applied his sufferings for the healing and food of their souls (Matt. xv:27; Luke xvi:21). (5) Satan is called a *dog* to mark his vileness and hurtfulness, in reproaching and harassing the saints, though God made both him and his agents useful in driving them to himself (Ps. xxii:20).

Millet.

DOKHAN (dók'hán) or **DOCHAN**, (Heb. דֹּכָחַן, *do'khan*), occurs in Ezek. iv:9; where the Prophet is

directed to take unto him wheat, and barley, and beans, and lentils, and millet (*dokhan*) and fitches, and to put them into one vessel, and to make bread thereof for himself.

The Hebrew word *dokhun* is identical with the Arabic *dukhun*, which is applied in the present day by the Arabs to a small grain cultivated from the middle of Europe to the most southern part of India. This is the common millet, *Panicum miliaceum* of botanists. This is so universally cultivated in the East as one of their smaller corn-grasses, that it is most likely to be the kind alluded to in the passage of Ezekiel. J. F. R.

DOLEFUL CREATURES (dōl'ful krē-tūrs), (Heb. אֲכִי, *o'akh*, a howler, Is. xiii:21; A. V. marg., "Ochim"), refer to birds or beasts which utter shrieks or howlings or ominous sounds, such as the booming of owls, the wailing cry of jackals, and the dismal howling of wolves. See Is. xxxiv:13, 14.

DOOR (dōr), (Heb. בֵּית, *de-leth'*), an entrance by which people go out and into houses, gardens, etc. The word is used for any kind of means of entrance to or going out.

Figurative. (1) Christ is called the *door*, and was figured out by the *doors* or *gates* of the tabernacle and temple. He, in his person and offices of mediation, is the means of our access to God (John x:9). (2) Slothful persons are as a *door turning upon its hinges*; they appear to be doing something and yet make no progress in anything good (Prov. xxvi:14). The *door* at which Christ knocks and demands entrance is the understanding, conscience and affections, and by these he enters into our hearts (Rev. iii:20; Ps. xxiv:7, 9). (3) The *door is shut* after Christ's faithful ones have entered his marriage feast (Matt. xxv:10; Luke xiii:25). (4) The *door of faith* is open to the gentiles when they have a clear warrant and invitation to believe set before them in the gospel, and they are powerfully determined to receive Jesus and all his fullness as the gift of God and the means of access to his favor (Acts xiv:27). (5) An effectual *door* was opened to the apostles and other ministers when they had opportunity, with appearance of success, to preach Christ to multitudes (1 Cor. xvi:9; 2 Cor. ii:12; Rev. iii:8). (6) Ministers have a *door of utterance* given them when they are helped by God to preach the gospel with great plainness, readiness and boldness (Col. iv:3). (7) Ministers *enter in by the door* when they have a regular call from God to their office (John x:1, 2). (8) *At the door*, or *before it*, imports nearness, readiness to testify against, come upon, or judge us (Gen. iv:7; Matt. xxiv:33; James v:9). (9) God's making the valley of Achor a *door of hope* may import that, amid guilt and trouble, the beginnings of mercy shall encourage to hope for still greater favors; or that the conversion of the Samaritans near that place was an earnest of the conversion of the gentiles (Hos. ii:15; John x). (See GATES.)

DOORKEEPER (dōr'kēp'ēr), (Heb. שׂוֹרֵר, *sho-are'*; Gr. *θυρωρός*, *thoo-ro-ros'*, 1 Chron. xv:23, 24; John xviii:16; Acts xii:13).

"Doorkeeper" in Ps. lxxxiv:10 (marg. "to sit at the threshold") means one "at the threshold"; either a beggar asking alms or a passer-by merely looking in.

DOORPOST (dōr'pōst), the translation of Heb. סַף, *saf* (Ezek. xli:16), for THRESHOLD (which see). Moses enjoined upon the Israelites that they

should write the divine commands "upon the posts of thy house and thy gates" (Deut. vi:9; Heb. מִזְוָזֵי, *mez-oo-zaw'*). The allusions were figurative and spiritual.

DOPHKAH (dōph'kah), (Heb. דֹּפְקָה, *dof-kaw'*, a knock), a station of the Israelites on the route to Sinai between the Red Sea and Rephidim (Num. xxxiii:12, 13).

Scetzen locates it at a place called Tobbacha, but the identification has not been generally accepted.

DOR (dôr), (Heb. דֹּר, *dore'*, dwelling), a town on the border of the Mediterranean, which Jerome places nine Roman miles north of Cæsarea.

It was one of the royal towns of the Canaanites (Josh. xi:2; xii:23), and was included in the heritage of Manasseh (Josh. xvii:11). The place, or rather the region to which it gave name, occurs again in 1 Kings iv:11, and in the Maccabees (1 Macc. xv:11) and Josephus (*Antiq.* xvi:4, 4) appears under the name of Dora. A place still exists, at the distance indicated by Jerome, under the name of Tortura, which Buckingham describes as a small village with about forty or fifty houses and 500 inhabitants. It has a small port, formed by a narrow range of rocky islets, at a short distance from the sandy beach.

DORCAS (dôr'kas). See TABITHA.

DOSITHEUS (dō-sith'e-üs), (Gr. *Δοσίθεος*, *dosith'ee-os*), a Levite priest who carried the translation of Esther to Egypt (Esth. xi:1 in Apocrypha).

NOTE (dōt).

1. (Heb. בִּזְיוֹן, *yaw-al'*, Jer. l:36), to be foolish, to lose one's senses through fear. "A sword is upon the boasters, and they shall dote."

2. (Heb. אֲוֵגָב, *aw-gab'*, Ezek. xxiii:5, sq.), primitive root, to love, to be foolishly fond.

DOTHAİM (dō'thā-īm). See DOTHAN.

DOTHAN (dō-than), (Heb. דוֹתָן, *do'than*, two wells), the place where Joseph found his brethren, who had wandered thither with their flocks from Shechem, and where he was treacherously sold by them to the Ishmaelites (Gen. xxxvii:17).

It was here also that the Syrians were smitten with blindness at the word of Elisha (2 Kings vi:13). Dothan is placed by Eusebius and Jerome twelve Roman miles north of Sebaste or Samaria, and on the caravan track from Syria to Egypt. Here it was discovered by Van de Velde (i:364 ff), and Robinson (iii:122), still called by its ancient name. It is four or five miles southwest of Jenin and not far from the plain of Esdraelon.

DOUBLE (düb'l), which is the translation of several Hebrew and Greek words, has many meanings. Thus the BREASTPLATE (which see) was to be made of two thicknesses of cloth (Exod. xxxix:9).

Figurative. (1) God's people receive of his hand *double* for all their sins. The Jews in their Chaldaean captivity received large punishment, sufficient to answer God's designs with them (Is. xl:2). (2) The Jews had *double* for their shame, when their troubles and disgrace were removed, and great happiness and glory succeeded (Is. lxi:7). (3) Antichrist's cup shall be *filled double*; the judgments of God shall, at last, be more dreadful than the persecution inflicted on the witnesses of Christ (Rev. xviii:6). (4) A *double portion* is either twice as much as any other (Deut. xxi:17), or a very large share (2 Kings ii:9). (5) A *double garment* is a lined

one (Exod. xxxix:9). (6) A *double heart*, or mind, is that which pretends an inclination to good, and yet habitually works wickedness with pleasure; and is opposite to a single, honest, faithful, and sincere one (Ps. xii:2; James i:8).

DOUBT (dout), to be uncertain what to think or believe (John x:24; Matt. xxviii:17).

The New Testament gives us a series of terms which run through the shades of meaning expressed by our words, perplexity, suspense, distraction, hesitation, questioning, scepticism, shadowing down into unbelief. (1) *Perplexity and suspense* (Matt. vi:20; Luke xxiv:4; John xiii:22; Acts xxv:20; 2 Cor. iv:8; Gal. iv:20). (2) *Distraction* (Luke xii:29; Matt. xiv:31; xxviii:17). (3) *Hesitation* (Luke xxiv:38; Rom. xiv:1; Phil. ii:14; Acts xi:12). (4) *Scepticism and Unbelief* (Matt. xxi:21; Mark xi:23; Rom. xiv:23; James i:6; Jude 22).

DOUGH (dō), (Heb. בֹּצֵק, *baw-tsake'*, swelling from fermentation, Exod. xii:34, 39; Jer. vii:18, etc.).

The Israelites subsisted for a month on the bread prepared from the dough which they brought away with them in their kneading-troughs on their shoulders (Exod. xii:34). In Oriental countries the process of fermentation is often dispensed with.

DOVE (dūv), (Heb. יוֹנָת *yo-naw'*; Gr. *περιστερά*, *per-is-ter-ah'*).

Four species of wild pigeons are found in Bible lands, the *ring dove*, or *wood pigeon*, the *stock dove*, the *rock dove*, and the *ash-rumped rock dove*. They are all known by the name of *hamām* in Arabic.

All pigeons in their true wild plumage have iridescent colors about the neck, and often reflected flashes of the same colors on the shoulders, which are the source of the silver and gold feathers ascribed to them in poetical diction; and thence the epithet of purple bestowed upon them all, though most applicable to the vinous and slaty colored species. The coasts and territory of Syria are noted for the great number of doves frequenting them, though they are not so abundant there as in the Coh-i-Suleiman chain near the Indus. Syria possesses several species of pigeon: The *Columba Œnas*, or stock-dove, *C. Palumbus*, or ring-dove, *C. Domestica*, *Livia*, the common pigeon in several varieties, such as the Barbary, Turkish or Persian carrier, crisp, and shaker. These are still watched in their flight in the same manner as anciently their number, gyrations, and other manœuvres were observed by soothsayers. The wild species, as well as the turtle-doves, migrate from Palestine to the south; but stock and ring-doves are not long absent.

By the Hebrew law, however, doves and turtle-doves were the only birds that could be offered in sacrifice, and they were usually selected for that purpose by the less wealthy (Gen. xv:9; Lev. v:7; xii:6; Luke ii:24); and to supply the demand for them dealers in these birds sat about the precincts of the Temple (Matt. xxi:12, etc.).

C. H. S.

Figurative. (1) The dove is the harbinger of reconciliation with God (Gen. viii:8, 10, etc.). (2) It is also a noted symbol of tender and devoted affection (Cant. i:15; ii:14, etc.). (3) It was the especial symbol of the Holy Spirit which descended upon our Saviour at his baptism, visibly with that peculiar *hovering motion* which distinguishes the descent of a dove (Matt. iii:16; Mark i:10; Luke iii:22; John i:32), and also of the meekness, purity, and splendor of right-

eousness. (4) The ten tribes of Israel were like a *silly dove without heart*; when, by means of the Assyrian oppression, and their own civil broils, they were weakened, perplexed, dispirited, and took no care to avoid their ruinous afflictions (Hos. vii:11). (5) To *mourn like doves* is to lament in the most bitter and desperate manner (Is. xxxviii:14, and lix:11; Nah. ii:7).

DOVECOT (dūv'kōt). This is clearly designated (Is. lx:8) in describing the final restoration of the Jews after their long exile.

DOVES' DUNG (dūv's dūng), (Heb. רִבְיוֹנִים, *khar-ay'yo-neem'*, 2 Kings vi:25, which in the margin is written רִבְיוֹנִים, *dib-yonim*, both meaning the same thing).

(1) In the above compounds, *khir* and *dib* being prefixed to *yonim*, the plural form for *doves*, the literal meaning is as above translated. By many the expression is considered to signify literally the dung of pigeons, as in the passage of 2 Kings vi:25.

(2) Different opinions, however, have been entertained respecting the meaning of the words which are the subject of this article, namely, whether they should be taken literally, or as a figurative name of some vegetable substance. The strongest point in favor of the former view is that all ancient Jewish writers have understood the term literally. Taking it, however, in this sense, various explanations have been given of the use to which the doves' dung was applied. Some of the rabbins were of opinion, that the doves' dung was used for fuel, and Josephus, that it was purchased for its salt. Mr. Harmer has suggested that it might have been a valuable article, as being of great use for quickening the growth of esculent plants, particularly melons. Mr. Edwards, as cited by Dr. Harris, remarks that it is not likely they had much ground to cultivate in so populous a city for gardens; and is disposed therefore to understand it as meaning the offals or refuse of all sorts of grain, which was wont to be given to pigeons, etc. Dr. Harris, however, observes that the stress of the famine might have been so great as to have compelled the poor among the besieged in Samaria to devour either the intestines of the doves, after the more wealthy had eaten the bodies, or, as it might perhaps be rendered, the *crops*.

Ornithogalum umbellatum.

(3) Bochart, however, has shown (*Hicrozoicon* ii:37) that the term 'pigeons' dung' was applied

by the Arabs to different vegetable substances. He quotes Avicenna as applying the term *stercus columbarum* to two different plants or substances. From this Bochart has been led to consider it as identical with another plant, which occurs under the name of kali, both in the Hebrew and Arabic languages, and which was one of the pulses used in ancient times, as at the present day, as an article of diet. (See KALI.) With reference to this grain, it has been observed that 'large quantities of it are parched and dried, and stored in magazines at Cairo and Damascus. It is much used during journeys, and particularly by the great pilgrim-caravan to Mecca; and if this conjecture be correct, it may be supposed to have been among the provisions stored up in the besieged city, and sold at the extravagant price mentioned in the text' (*Pict. Bible*). The late Lady Callcott, in her *Scripture Herbal*, 1842, adduces the *ornithogalum umbellatum*, or common Star of Bethlehem, as the 'doves' dung' of Scripture, and assigns this, as well as 'birds' milk,' as two of its vernacular names, and infers that the *pigeons' dung* which has been mentioned above as being eaten in England in the famine of 1316 was the roots of this plant. It is a native of this country, and also of Taurus, Caucasus, and Northern Africa. Dioscorides states that its bulbs were sometimes cooked with bread in the same way as the *melanthium*, and also that it was eaten both raw and roasted. The roots were also commonly eaten in Italy and other southern countries at an early period.

DOWRY (dou-ry), (Heb. מִתְּנָה, *mō'har*, price paid for a wife, Gen. xxxiv:12; Exod. xxii:17; 1 Sam. xviii:25; זֶהְבֵּד, *zeh'bed*, a gift, Gen. xxx:20).

In the East the bridegroom offers to the father of his bride a sum of money, or value to his satisfaction, before he can expect to receive his daughter in marriage. Of this procedure we have instances from the earliest times. (1) When Jacob had nothing which he could immediately give for a wife, he purchased her by his services to her father Laban (Gen. xxix:18). So we find Shechem offers to pay any value, as a dowry for Dinah (Gen. xxxiv:12). In this passage is mentioned, a distinction still observed in the East: (a) "A dowry" to the family, as a token of honor, to engage their favorable interest in the desired alliance; (b) "a gift" to the bride herself, *e. g.*, of jewels and other decorations, a compliment of honor, as Abraham's servant gave to Rebekah. (2) We find king Saul (1 Sam. xviii:25) instead of wishing for a pecuniary dowry from David, which David was sensible he could not pay in proportion to the value of the bride, required one hundred foreskins of the Philistines, thereby proposing his daughter in reward of valor, as Caleb had formerly done his daughter Achsah to whoever should take Kirjathsepher; that is, he gave her as a reward of honor, without receiving the accustomed dowry (Josh. xv:16). (3) The dowry was esteemed so essential, that Moses even orders it in a case where it might otherwise, perhaps, have been dispensed with; "If a man entice a maid, that is not betrothed, he shall endow her to be his wife" (Exod. xxii:16); he shall make her the usual nuptial present; according to the rank which he holds in the world, and to that station which his wife might justly be expected to maintain; proportionate, also, to that honor which he would have put upon her, had he regularly solicited her family for her; that is, jewels and other trinkets. "If her father refuse his daughter," he shall pay

money, "according to the dowry of virgins;" that is, what the father of a virgin of that rank of life might justly expect should have been offered for his daughter when solicited in marriage. And this we find was the proposal made by Shechem, in reparation of the injury done to Dinah.

DOXOLOGIES (dōks'ōl-ō-jīz), (Gr. *δοξολογία*, *doxol-og-ee'a*, giving glory), ascriptions of glory or praise to God.

(1) **Scriptural**. These are frequently found in the Psalms (*e. g.*, xcvi:6; cxii:1; cxiii:1), and were used in the synagogue. The apostles very naturally used them (Rom. xi:36; Eph. iii:21; 1 Tim. i:17). We have also examples of celestial doxologies (Rev. v:13; xix:1). The song of the angels in Luke ii:14 is a doxology. As to the doxology in Matt. vi:13, see LORD'S PRAYER.

(2) **Liturgical**. There were hymns used in the service of the ancient Christians. (1) The doxology was only a single sentence, without a response, running in these words, "Glory be to the Father, and to the Son, and to the Holy Ghost, world without end, Amen." Part of the latter clause, "As it was in the beginning, is now, and ever shall be," was inserted some time after the first composition. The fourth council of Toledo, A. D. 633, added the word honor to it, and read it, "Glory and honor be to the Father," etc., because the prophet David says, "Bring glory and honor to the Lord." It is not easy to say, at what time the latter clause was inserted. Some ascribe it to the council at Nice, and pretend it was added in opposition to the Arians. But the first express mention made of it is in the second council of Vaison, A. D. 529, about two centuries later. This was called the *Lesser Doxology*. (2) There was likewise another hymn, of great note in the ancient church, called the *Great Doxology*, or *Angelic Hymn*, *the Gloria in Excelsis*, beginning with those words which the angels sung at our Saviour's birth, "Glory be to God on high," etc. This was chiefly used in the communion service. It was also used daily in private devotions. In the Mozarabic liturgy, it is appointed to be sung before the lessons on Christmas Day. Chrysostom often mentions it, and observes, that the Ascetics, or Christians who had retired from the world, met together daily to sing this hymn. Who first composed it, adding the remaining part to the words sung by the angels, is uncertain. Some suppose it to be as ancient as the time of Lucian, about the beginning of the second century. Others take it for the "Gloria Patri;" which is a dispute as difficult to be determined, as it is to find out the first author and original of this hymn. (3) There was another called the *Trisagion*, as old as the second century, beginning, "Therefore with angels and archangels, and with all the company of heaven, we laud and magnify thy glorious name." They are still in use in church worship.

DRACHMA (drāk-mā), (Gr. *δραχμή*, *drachma*), a coin of silver, the most common among the Greeks, and which after the Exile became also current among the Jews (2 Macc. iv:19; x:20; xii:43; Luke xv:8, 9).

The earlier Attic drachmæ were of the average weight of 66.5 grains, and in a comparison with the English shilling would be equal to about twenty cents. But the specimens of later times are of the average weight of only 61 grains, and some of less. In this state the drachma was counted equal to the denarius, which was at first worth about seventeen cents, and afterwards only fifteen cents. The value of the drachma of the New Testament may therefore have been about sixteen cents. The woman's 'ten pieces of silver'

(*drachmæ*) in Luke xv:8, would hence be equal to or about \$1.65—that is, in nominal value, for the real value of money was far greater in the time of Christ than at present.

DRAG (dräg), (Heb. מִקְמֶרֶת, *mik-meh'reth*), is mentioned as being the object of worship by fishermen (Hab. i:15). It was a large fishing net.

DRAGON (dräg'on), in our version is used for the two Hebrew words *than*, תָּנִי, and *than-noon'*, תַּנְיָן.

It occurs principally in the plural form (Job xxx:29; Ps. xlv:19; Is. xiii:22; xxxiv:13; xxxv:7; Jer. ix:11; xiv:6; xlix:33; and Micah i:8). These texts, in general, present pictures of ruined cities and of desolation in the wilderness. Where *Thanim* are associated with birds of the desert, they clearly indicate serpents of various species, both small and large, as already noticed in the article **ADDER**. In Jer. xiv:6, where wild asses snuffing up the wind are compared to dragons, the image will appear in its full strength, if we understand by dragons, great boas and python-serpents, such as are figured in the Prænestine mosaics. They were common in ancient times, and are still far from rare in the tropics of both continents. Several of the species grow to an enormous size, and, during their periods of activity, are in the habit of raising a considerable portion of their length into a vertical position, like pillars, 10 to 12 feet high, in order to survey the vicinity above the surrounding bushes, while with open jaws they drink in a quantity of the current air. The same character exists in smaller serpents; but it is not obvious, unless when, threatening to strike, they stand on end nearly three-fourths of their length. Most, if not all, of these species are mute, or can utter only a hissing sound; and although the *malli-pambu*, the great rock-snake of Southern Asia, is said to wail in the night, we have never witnessed such a phenomenon, nor heard it asserted, that any other boa, python, or *erpeton* had a real voice; but they hiss, and, like crocodiles, may utter sounds somewhat akin to howling.

Figurative. (1) Satan is called a *dragon* because of his power, malice, and hurtfulness (Rev. xx:2). (2) Cruel tyrants and conquerors, such as the kings of Assyria and Egypt, are likened to *dragons*, chiefly those of the water kind, as crocodiles, etc., for their terrible appearance and destructive influence (Ps. lxxiv:13; Is. xxvii:1; li:9; Ezek. xxix:3). (3) The heathen empire of Rome is likened to a great *red dragon*; that is, a fierce and powerfully persecuting monster. Rome, in a most bloody manner, wasted the nations, and persecuted the church of God (Rev. xii:3). (4) The "*dragon and his angels*" were cast out into the earth, when the power of the bloody persecutors was brought low; heathen idolatry and superstition banished out of the cities to villages; and the power of Satan and his agents trampled under foot (Rev. xii:9). (5) Anti-christ *speaks as a dragon*; by diabolic and heathen authority he teaches, and, under the most terrible penalties, imposes Pagan errors, superstition, and idolatry (Rev. xiii:2). (6) Wicked men are like *dragons*; they are the seed of the old serpent, and are full of sinful poison; and destruction and misery are in all their ways (Is. xxxv:7; xliii:20).

DRAGON WELL (dräg'on wěl), (Heb. תַּנְיָן, *ane hat-tan-noon'*, fountain of jackals, Neh. ii:13; comp. iii:13, 14), lay east of Jerusalem, near the valley gate. It is probably identical with the modern *Upper Pool of Gihon*, but much doubt

exists as to its identification. (See Robinson, *Bib. Res.* i. 473, 514, 1st ed.; Barclay, *City of the Gt. King*, p. 315).

DRAM (dräm). See **DARIC**.

DRAUGHT (dräft).

1. (Gr. ἀγρα, *ag'rah*, Luke v:9), a catching of fish, a haul.

2. (Gr. ἀφεδρών, *af-ed-rone'*, Matt. xv:17, place for sitting apart), house of the sewer, the bowel, the intestine below the stomach.

DRAUGHTHOUSE (dräft-hous), (Heb. מַחְרֵי־אָו, *makh-ar-aw-aw'*, literally, easing one's self), a *privy* or *sink*. Jehu, in contempt for Baal, ordered his temple to be destroyed and the place turned into a receptacle for ordure or offal (2 Kings x:27).

DRAWER (drä'er) **OF WATER** (Heb. מַי־שֹׁאֵב, *sho-ayb'*, drawer, *mah'yim*, water, Deut. xxix:11; Josh. ix:21, 23). The work of the drawer of water was of a hard and servile character.

DREAM (drēm), (Heb. חַלֹּם, *khal-ome'*; Gr. *δραμα*, *on'ar*).

Of all the subjects upon which the mind of man has speculated, there is perhaps none which has more perplexed than that of dreaming.

Whatever may be the difficulties attending the subject, still we know that it has formed a channel through which Jehovah was pleased in former times to reveal His character and dispensations to His people.

(1) **Causes.** In regard to the immediate cause of dreaming the opinions of the ancients were very various.

We believe that dreams are ordinarily the re-embodiment of thought which have before, in some shape or other, occupied our minds. They are broken fragments of our former conceptions revived, and heterogeneously brought together. If they break off from their connecting chain, and become loosely associated, they exhibit oftentimes absurd combinations, but the *elements still subsist*. If, for instance, any irritation, such as pain, fever, etc., should excite the *perceptive* organs while the *reflective* ones are under the influence of sleep, we have a consciousness of objects, colors, or sounds being presented to us, just as if the former organs were actually stimulated by having such impressions communicated to them by the external senses; whilst, in consequence of the repose of the reflecting power, we are unable to rectify the illusion, and conceive that the scenes passing before us, or the sounds that we hear, have a real existence. This want of mutual co-operation between the different faculties of the mind may account for the *disjointed* character of dreams. This position might be fully substantiated by an appeal to the evidence of fact. Dr. Beattie speaks of a man who could be made to dream anything by whispering in his ear. Dr. Gregory relates of himself that, having once had occasion to apply a bottle of hot water to his own feet when he retired to bed, he dreamed that he was ascending the side of Mount *Ætna*, and that he found the heat of the ground almost insufferable. Persons who have had blisters applied to their heads have been known to dream of being scalped by a party of North American Indians. Sleeping in a smoky room, we may dream of a house or a city being in flames. The smell of a flower applied to the nostrils may call forth the idea of walking in a garden: and the sound of a flute may excite in us the most pleasurable associations.

Here, then, we discover one great source of

that class of dreams of which Solomon speaks in Eccles. v:7.

The only one of our mental powers which is not suspended while dreaming is fancy, or imagination. We often find *memory* and *judgment* alternately suspended and exercised. Sometimes we fancy ourselves contemporaneous with persons who have lived ages before; here memory is at work, but judgment is set aside. We dream of carrying on a very connected discourse with a deceased friend, and are not conscious that he is no more; here judgment is awake, but memory suspended. The power, however, to judge correctly, is always wanting in the dream. No matter how absurd the premise may be, the mind in dreaming accepts it as correct.

In the dream the mind is creator, inventor, artist, musician, dramatist, poet, orator, etc. The humblest plowboy transcends often in his dreams all that a Shakespeare has ever written. Dreaming is one of the most wonderful, if not the most wonderful of all the phenomena connected with the human mind. It gives a forceful suggestion of the infinite possibilities which lie in the soul, waiting for the opportunity to call them into active exercise.

(2) **Patriarchal Dispensation.** How God revealed himself by dreams, and raised up persons to interpret them, the Scriptures abundantly testify. Under the three successive dispensations we find this channel of communication with man adopted. It was doubtless in this way that God appeared to the father of the faithful, ordering him to forsake country, kindred, and his father's house, and to go into the land that he would show him. To this divine command Abraham paid a ready obedience. It was by a similar prompt obedience to the admonition conveyed to him in a dream that Abimelech, himself (Gen. xx:3) and Abraham, too, were saved from the evil consequences of his meditated act. In Gen. xxxi:10, Jacob informs his wives that it was God who saw how Laban oppressed him—who had directed him to take the speckled, etc. cattle for his wages, and had ordered him to return home. He obeyed; and when Laban, designing to do Jacob some harm (Gen. xxxi:24), pursued, and after seven days overtook him, God, by a dream, prevented the meditated evil. Joseph, whilst yet a child, had dreams *predictive* of his future advancement (Gen. xxxvii:6-11).

(3) **Mosaic Dispensation.** Such were some of the dreams by which God revealed himself under the patriarchal dispensation; and that the same divine mode of communicating with man was continued under that of Moses is evident from an express word of promise (Num. xii:6). That dreams were one of the ways whereby God was wont to signify his pleasure to men under this dispensation is evident from the complaint of Saul to the spirit of Samuel (whom the witch pretended to raise up), when he asked him, 'Why hast thou disquieted me to bring me up?' Saul answered, 'I am sore distressed; for the Philistines make war against me, and God is departed from me, and answers me no more; neither by prophets, nor by *dreams*; therefore I have called thee that thou mayest make known to me what I shall do.' And, in order to guard against imposition, Moses pronounced a penalty against dreams which were invented and wickedly made use of, for the promotion of idolatry (Deut. xiii:1-5). Thus Zechariah (x:2) complains: 'The idols have spoken vanity, and the diviners have spoken a lie, and have told *false dreams*; they comfort in vain.' And so Jeremiah (xxiii:25), 'I have heard what the prophets said that prophesy lies in my

name, saying, I have dreamed, I have dreamed,' etc. Yet this abuse did not alter God's plan in the right use of them; for in the 28th verse of the same chapter it is said 'the prophet that hath a *dream*, and he that hath my word, let him speak my word faithfully. What is the chaff to the wheat? saith the Lord.'

When Gideon warred with the Amalekites, and was alarmed at their vast multitudes, he was encouraged to do God's will by overhearing one of them relate his dream, and another giving the interpretation (Judg. vii). Again, it was in a dream that God was pleased to grant Solomon a promise of wisdom and understanding (1 Kings iii:5, etc.). Here we may perceive what converse the Lord was pleased to hold with Solomon in a dream; and the sacred record informs us how punctually everything herein promised was fulfilled. The knowledge of visions and dreams is reckoned amongst the principal gifts and graces sometimes bestowed by God upon them that fear him; so it is said of Daniel and his companion, that 'God gave them knowledge and skill in all learning and wisdom; and Daniel had understanding in all visions and dreams (Dan. i:17). And the God who had imparted this spirit unto his servant Daniel soon, in the arrangement of his providence, gave occasion for its exercise (Dan. ii). In the dream of Nebuchadnezzar a great variety of ends were attained in reference to *Babylon*, Israel, and indeed the world—all of which were worthy of God's miraculous interference.

(4) **Christian Dispensation.** That this method of God's revealing himself was not confined to the legal dispensation, but was to be extended to the Christian is evident from Joel (ii:28), 'And afterwards (saith the Lord) I will pour out my spirit upon all flesh; and your sons and your daughters shall prophesy; your young men shall see visions, and your old men shall *dream dreams*.' In Acts ii:17 we find the Apostle Peter applying this to the illumination of the Holy Ghost. Accordingly, we read that when Joseph designed to put Mary away, because he perceived her to be with child, he was turned from his purpose by a dream, in which an angel made the truth of the matter known to him (Matt. i:20). And in the following chapter it is stated that God, in a dream, warned the wise men not to return to Herod. Moreover, in verses 13 and 19, Joseph is instructed to flee into and return from Egypt with the child Jesus.

We inquire not how far God may have revealed himself to man beyond what Holy Scripture records. Some of the dreams, both of ancient and modern times, which lay claim to a divine character, are certainly striking, and may, for aught we know, have had, and may still have, a collateral bearing on the development of God's purposes.

J. W. D.

John Newton, concerned about his soul's interest, had a dream which made the way of salvation clear to him.

DREDGE (drĕj), (Job xxiv:6, in marg., A. V., "mingled corn, or dredge"), a word still used in Wiltshire; dredge-malt, or malt made of oats and barley.

DREGS (drĕgs).

1. The rendering of the Heb. שֵׁמֶר, *sheh'mer*, Ps. lxxv:8, elsewhere *lees* of wine.

2. Heb. קֶבֶץ, *koob-bah'ath*, goblet (Is. li:17, 22), and rendered "dregs of the cup of my fury," but better, "the goblet of his fury."

DRESS (drēs), is used in Scripture in the following senses:

1. To till the soil (Heb. עָבַד, *aw-bad'*, to serve, Gen. ii:15; Deut. xxviii:39; Gr. γεωργεῖν, *ghch-ore-ghch'o*, Heb. vi:7).

2. Preparation of food (Heb. עָשָׂה, *aw-saw'*, to make, Gen. xviii:7, 8; 1 Sam. xxv:18; 2 Sam. xii:4, etc.).

3. Trimming lamps (Heb. יָצַב, *yaw-tab'*, make right, Exod. xxx:7).

The subject of the costume of the ancient Hebrews is involved in much obscurity and doubt.

1. Sources of Information. There are, however, many allusions to dress in the Scriptures, and these form the only source of our positive information. They are often, indeed, obscure, and of uncertain interpretation; but they are invaluable in so far as they enable us to compare and verify the information derivable from other sources. These sources are:

(1) The costume of neighboring ancient nations, as represented in their monuments.

(2) The alleged costume of Jews as represented in the same monuments.

(3) The present costumes (which are known to be ancient) of Syria and Arabia.

(4) Tradition.

2. The Monuments. The range of inquiry into monumental costume is very limited. Syria, Arabia, and Egypt are the only countries where monuments would be likely to afford any useful information; but Arabia has left no monumental figures, and Syria none of sufficiently ancient date; and it is left for Egypt to supply all the information likely to be of use.

(1) **Extent and Value.** The extent and value of this information, for the particular purpose, we believe to be far less than is usually represented. That we are not disposed to undervalue the information derivable from the Egyptian monuments for the purpose of illustrating Biblical history and antiquities, the pages of the present work will sufficiently evince. But the rage for this kind of illustration has been carried to such preposterous lengths, and is so likely in its further progress to confuse our notions of the real position which the Hebrews occupied, that it may not be an unwholesome caution to remind our readers that the Egyptians and the Hebrews were an exceedingly different people—as different in every respect as can well be conceived; and that the climates which they inhabited were so very different as to necessitate a greater difference of food and dress than might be presupposed of countries so near to each other. This consideration appears to us to render of little value the very ingenious illustrations of Jewish costume which have been deduced from this source.

(2) **Home Manufacture.** It is true that the Jewish nation was cradled in Egypt; and this circumstance may have had some influence on ceremonial dresses, and the ornaments of women; but we do not find that nations circumstanced as the Jews were, readily adopt the costumes of other nations, especially when their residence in Egypt was always regarded by them as temporary, and when their raiment was of home manufacture—spun and woven by the women from the produce of their flocks (Exod. xxxv:25). We find also that, immediately after leaving Egypt, the principal article of dress among the Hebrews was some ample woolen garment, fit to sleep in (Exod. xxii:27), to which nothing similar is to be seen among the costumes of Egypt.

With respect to the supposed representation of

Jews in ancient monuments, if any authentic examples could be found, even of a single figure in the ancient costume, it would afford much satisfaction, as tending to elucidate many passages of Scripture which cannot at present be with certainty explained. The sculptures and paintings supposed to represent ancient Hebrews are contained in the painting described below.

(3) **Painting at Beni Hassan.** A painting at Beni Hassan represents the arrival of some foreigners in Egypt, and is supposed to figure the arrival of Joseph's brethren in that country. The accessories of the scene, the physiognomies of the persons, and the time to which the picture relates, are certainly in unison with that event, and though we must speak with hesitation on the subject, the conjecture is probably correct.

All the men wear sandals. Some of them are clad only in a short tunic or shirt, with close sleeves; others wear over this a kind of sleeveless plaid or mantle, thrown over the left shoulder, and passing under the right arm. It is of a striped and curiously figured pattern, and looks exceedingly like the fine grass woven cloth of the South Sea. Others have, instead of this, a fringed skirt of the same material. All the figures are bare-headed, and wear beards, which are circumstances favorable to the identification. The fringed skirt of figure 1 is certainly a remarkable circumstance. Moses directed that the people should wear a fringe at the hem of their garments (Num. xv:38); and the probability is that this command merely perpetuated a more ancient usage.

(4) **Egyptian Sculpture in Other Tombs.** This fringe reappears, much enlarged, in the other Egyptian sculpture in which Jews are supposed to be represented. These are in a tomb discovered by Belzoni, in the valley of Bab-el Melook, near Thebes. There are captives of different nations, and among them four figures, supposed to represent Jews. The scene is imag-

ined to commemorate the triumphs of Pharaoh-Necho in that war in which the Jews were defeated at Megiddo, and their king Josiah slain (2 Chron. xxxv, xxxvi). It will be seen that the dress of these figures differs little, excepting in the length of the fringe, from that of the skirted figure in the earlier painting; and so far this is a corroborative circumstance in favor of both.

(5) **Behistun Rock.** On the face of a rock, at Behistun, on the Median border of the ancient Assyria, there is a remarkable sculpture, representing a number of captives strung together by the neck, brought before the king and conqueror, who seems pronouncing sentence upon them. The venerable antiquity of this sculpture is unquestionable; and Sir R. K. Porter was led to fancy that the sculpture commemorates the subjugation and deportation of the *ten* tribes by Shalmaneser, King of Assyria (2 Kings xvii:6).

There is no reason to think that the dress of the Jews was in any important respect different from that of the other inhabitants of the same and immediately bordering countries. The prevailing style was a close tunic under a loose outer garment, the latter being replaced sometimes by a cloak. The dresses were often of brilliant colors and variegated pattern.

Such is the information to be derived from ancient monuments.

3. Tradition. That to be obtained from tradition is embodied in the following:

(1) **Monks and Pilgrims.** In the dresses of monks and pilgrims, which may be traced to an ancient date, and which are an intended imitation of the dresses supposed to have been worn by the first disciples and apostles of Christ.

(2) **Conventional Garb.** The garb conventionally assigned by painters to Scriptural characters, which was equally intended to embody the dress of the apostolical period, and is corrected in some degree by the notions of Oriental costume which were collected during the Crusades.

4. Arabian Costumes. We may now turn to modern sources of illustration. With the exceptions of the foreign Turkish costume and the modification thereof, and with certain local exceptions, chiefly in mountainous regions, it may be said that there is one prevailing costume in all the countries of Asia between the Tigris and Mediterranean, and throughout Northern Africa, from the Nile to Morocco and the banks of the Senegal. This costume is substantially Arabian, and owes its extension to the wide conquests of the Arabians under the first caliphs; and it is through the Arabians—the least changed of ancient nations, and almost the only one which

has remained as a nation from ancient times—that the antiquity of this costume may be proved. This is undoubtedly the most ancient costume of Western Asia, and while one set of proofs would carry it up to Scriptural times, another set of strong probabilities and satisfactory analogies will take it back to the most remote periods of Scriptural history, and will suggest that the dress of the Jews themselves was very similar, without being strictly identical.

(1) **Desert Tribes.** It is to be observed, however, that there are two very different sorts of dresses among the Arabians. One is that of the Bedouin tribes, and the other that of the inhabitants of towns. The distinction between these is seldom clearly understood, or correctly stated; but is of the utmost importance for the purpose of the present notice. Instead therefore of speaking of the Arabian costume as one thing, we must regard it as two things—the desert costume, and the town costume.

If, then, our views of Hebrew costume were based on the actual costume of the Arabians, we should be led to conclude that the desert costume represented that which was worn during the patriarchal period, and until the Israelites had been some time settled in Canaan; and the town costume that which was adopted from their neighbors when they became a settled people.

This is a subject which, more than any other, requires the aid of pictorial illustration to render the details intelligible. Having provided ourselves with these, our further observations will most advantageously take the form of explanations of them, and of comments upon them.

Under the notion that the desert costume belongs to the patriarchal period, the precedence is here given to it. Only the outer articles of dress are *distinctive*, those which are worn underneath being similar to other articles worn by the town and peasant classes, and which as such will be hereafter noticed.

(2) **Bedouin Head-dress.** The distinctive head-dress of the Bedouin, and which has not been adopted by any other nation, or even by the Arabian townsmen, is a kerchief (*keffeh*) folded triangularly, and thrown over the head so as to fall down over the neck and shoulders, and bound to the head by a band of twisted wool or camel's hair. We forbear at the moment from inquiring whether this was or was not in use among the ancient Hebrews.

(3) **Cloak.** The cloak is called an *abba*. It is made of wool and hair, and of various degrees of fineness. It is sometimes entirely black, or entirely white, but is more usually marked with broad stripes, the colors of which (never more

than two, one of which is always white) are distinctive of the tribe by which it is worn. The cloak is altogether shapeless, being like a square sack, with an opening in front, and with slits at the sides to let out the arms. The Arab who wears it by day, sleeps in it by night, as does often the peasant by whom it has been adopted; and in all probability this was the garment similarly used by the ancient Hebrews, and which a benevolent law, delivered while Israel was still in the desert, forbade to be kept in pledge beyond the day, that the poor might not be without a covering at night (Exod. xxii:27).

Among the Arab tribes or Moors of Northern Africa, the outer garment is more generally the *bournos* (Fig. 3), a woolen cloak, not unlike the *abba*, but furnished with a hood, and this is sometimes strangely confounded with a totally different

outer-garment worn in the same regions, usually called the *hyke*, but which is also, according to its materials, quality, or color, distinguished by various other names; and writers have produced some confusion by not observing that these names refer to an article of raiment which under all these names is essentially the same. Regardless of these minute distinctions, this part of dress may be described as a large woolen blanket, either white or brown, and in summer a cotton sheet (usually blue or white, or both colors together). Putting one corner before over the left shoulder, the wearer brings it behind, and then under the right arm, and so over the body, throwing it behind over the left shoulder, and leaving the right arm free for action (Fig. 2). It is sometimes thrown over the head as a protection from the sun or wind (Fig. 1), and calls to mind the various passages of Scripture in which persons are described as covering their heads with their mantles (2 Sam. xv:30; 1 Kings xix:13; Esth. vi:12). This article of dress, originally borrowed from the nomades, is known in Arabia, and extends westward to the shores of the Atlantic, being most extensively used by all classes of the population. The seat of this dress, and of the *abba* respectively, is indicated by the direction of their importation into Egypt. The *hykes* are imported from the west (*i. e.*, from North Africa), and the *abbas* from Syria. The close resemblance of the above group of real costume to those in which the traditional ecclesiastical and traditional artistical costumes are displayed, must be obvious to the most cursory observer. It may also be noticed that the *hyke* is not without some resemblance, as to the manner in which it was worn, to the outer garment of one of the figures in the Egyptian family, supposed to represent the arrival of Joseph's brethren in Egypt.

5. Village Costumes. We now turn to the costumes which are seen in the towns and villages of southwestern Asia.

(1) **Drawers.** In the Scriptures *drawers* are only mentioned in the injunction that the high-priest should wear them (Exod. xxviii:42), which seems to show that they were not generally in use; nor have we any evidence that they ever became common. (See **PRIESTS.**) Drawers descending to the middle of the thighs were worn by the ancient Egyptians, and workmen often laid aside all the rest of their dress when occupied in their labors. As far as this part of dress was used at all by the Hebrews, it was doubtless either like this, or similar to those which are now worn in Western Asia by all, except some among the poorer peasantry, and by many of the Bedouin Arabs. They are of linen or cotton, of ample breadth, tied around the body by a running string, or band, and always worn next the skin, not over the shirt as in Europe.

It will be asked, when the poor Israelite had pawned his outer-garment 'wherein he slept,' what dress was left to him? The answer is probably supplied in the cotton, or woolen frocks or shirts, which often, in warm weather, form the sole dress of the Bedouin peasants, and the lower class of townspeople. To this the *abba* or *hyke* is the proper outer robe, but is usually, in summer, dispensed with in the day-time, and in the ordinary pursuits and occupations of life. It is sometimes worn without, but more usually with, a girdle.

(2) **Shirt.** The shirt worn by the superior classes is of the same shape, but of finer materials. If we call this a shirt, the Hebrews doubtless had it—the sole dress (excepting the cloak) of the poor, and the inner robe of the rich. Such, probably, were the 'sheets' (translated 'shirts' in some versions), of which Samson despoiled thirty Philistines to pay the forfeit of his riddle (Judg. xiv:13, 19). It

is shown from the Talmud, indeed, that the Hebrews of later days had a shirt called *chaluk*, which it would appear was often of wool (Light-foot, *Hor. Heb.* on Luke ix:3), and which is described as the ordinary inner-garment, the outer being the cloak or mantle. This shows that the shirt or frock was, as in modern usage, the ordinary dress of the Jews, to which a mantle (*abba*, *hyke*, or *bournos*) was the outer covering.

(3) **Gown or Caftan.** Among all the garments of persons of the superior class the shirt covered by a striped (sometimes figured) gown or caftan, of mingled silk and cotton, was commonly worn. It descends to the ankles, with long sleeves, extending a few inches beyond the fingers' ends, but di-

vided from a point a little above the wrist, so that the hand is generally exposed, though it may be concealed by the sleeve when necessary; for it is customary to cover the hands in the presence of a

person of high rank. It is very common, especially in winter, for persons to sleep without removing this gown, but only unloosing the girdle by which it is bound. It is not unusual within doors to see persons without any article of dress outside this; but it is considered decidedly as an undress, and no respectable person is beheld out of doors, or receives or pays visits, without an outer covering. Hence persons clad in this alone are said to be 'naked' in Scripture—that is, not in the usual complete dress; for there can be no manner of doubt that this, or something like this, is the *Keth-o'-neth* of the Scripture (Exod. xxviii:40; Job xxx:18; Is. xxii:21, etc.). A similar robe is worn by the women, as was also the case among the Israelites (2 Sam. xiii:18, 19; Cant. v:3). It is in the bosom of this robe that various articles are carried, and hence the Scriptural expression of giving things 'into the bosom.'

(4) **The Girdle.** The girdle worn over this, around the waist, is usually a colored shawl, or long piece of figured white muslin. The girdle of the poorer classes is of coarse stuff, and often of leather, with clasps. This leathern girdle is also much used by the Arabs, and by persons of condition when equipped for journey. It is sometimes ornamented with workings in colored worsted, or silk, or with metal studs, shells, beads, etc. Both kinds of girdles were certainly in use among the Hebrews (2 Kings i:8; Matt. iii:4; Mark i:6; comp. Jer. xiii:1). It is known to all readers of Scripture how often the 'girdle' and the act of 'girding the loins' is mentioned. It seems from 2 Sam. xx:8, that it was usual to wear a knife or poniard in the girdle. This custom is still general, and denotes not any deadly disposition, but the want of clasp knives. Men of literary vocations replace it by an inkhorn, as was also the case among the Israelites (Ezek. ix:2).

(5) **The Benish.** Over the gown is worn either the short-sleeved *gibbeh*, which is a long coat of woolen cloth, or the long-sleeved *benish*, which is also of woolen cloth, and may be worn either over or instead of the other. The benish is, by reason of its long sleeves (with which the

hands may be covered), the robe of ceremony, and is worn in the presence of superiors and persons of rank. Over one or both of these robes may be worn the *abba*, *bournoos*, or *hyke*, in any of the modes already indicated. Aged persons often wrap up the head and shoulders with the latter, in the manner shown.

(6) **Hyke or Wrapper.** This same *hyke* or wrapper is usually taken by persons going on a journey, for the purpose of being used in the same manner as a protection from the sun or wind. This is shown in the annexed cut, representing a group of persons equipped for travel. The robe is here more succinct and compact, and the firm manner

in which the whole dress is girded up about the loins calls to mind the passages of Scripture in which the action of 'girding up the loins' for a journey is mentioned.

(7) **Swords.** From this it is also seen that travelers usually wear a sword, and the manner in which it is worn is correctly shown. It would also appear that the Jews had swords for such occasional uses (Matt. xxvi:51; Luke xxii:36).

(8) **Baring the Arm.** The necessity of baring the arm for any kind of exertion, must be evident from the manner in which it is encumbered in all the dresses we have produced. This action is often mentioned in Scripture, which alone proves that the arm was in ordinary circumstances similarly encumbered by the dress. For ordinary purposes a hasty tucking up of the sleeve of the

right arm suffices; but for a continued action special contrivances are necessary. The full sleeves of the shirt are sometimes drawn up by means of

cords, which pass round each shoulder, and cross behind, where they are tied in a knot. This custom is particularly affected by servants and workmen, who have constant occasion for baring the arm; but others, whose occasions are more incidental, and who are, therefore, unprovided with the necessary cords, draw up the sleeves and tie them together behind between the shoulders.

For the dress of women, see WOMEN; SANDAL.

DRINK (drink), (Heb. שָׁוַת, *shaw-thaw'*; a prim. root), to imbibe (lit. or fig.).

It denotes not only the drinking of a fluid to the satisfying of thirst, or to create a sober cheerfulness (Gen. xliii:34; John ii:10); but the receiving or enduring of things good or bad. On fast days the Jews abstained from drinking during the whole day, believing it to be equally of the essence of a fast, to suffer thirst as to suffer hunger.

Figurative. (1) To drink abundantly water, wine, and milk, is to receive God's Spirit, and new-covenant blessings, in a plentiful degree (John vii:37; Zech. ix:15-17). (2) To drink waters out of one's cistern and well, is to enjoy the lawful pleasures of marriage (Prov. v:15). (3) To drink a cup of gall, fury, astonishment, and trembling, is to undergo fearful miseries, that make one tremble and be astonished (Jer. xxiii:15 and xxv:15; Ps. lx:3; Is. li:22). (4) To drink up iniquity as water, is with great pleasure to abound in the practice of wickedness (Job xv:16). (5) To drink blood, is to be satisfied with slaughter (Ezek. xxxix:18). (6) Sennacherib drank strange waters, and dried up the rivers of besieged places, when his army exhausted the wells of the countries which he invaded, and dried up the cisterns and wells of besieged cities; or when he conquered the nations, and seized their wealth at pleasure (Is. xxxvii:25). (7) The Jews drinking the water of the Nile and Euphrates signifies their entering into alliances with the Egyptians and Assyrians (Jer. ii:18). (8) To drink one's own water, to buy water to drink, or to drink water in measure, imports being reduced to the utmost distress of famine and want (2 Kings xviii:27; Lam. v:4; Ezek. iv:11). (9) Our Lord commands us to drink His blood and to eat His flesh (John vi:53, 54), we eat and drink both figuratively, in the eucharist.

DRINK, STRONG (drink, strong), (Heb. שָׂוַת, *shay-kawr'*).

Sweet drink (what satiates or intoxicates) applies in its etymological sense to any beverage possessing intoxicating qualities.

We shall class the various senses of the word under three heads, in the order in which we conceive them to have been developed.

(1) **Sweet Wine or Syrup.** *Shay-kawr'*, luscious, *saccharine* drink or *sweet syrup*, especially sugar or *honey of dates* or of the palm-tree (*debash*); also, by accommodation, occasionally, the sweet fruit itself.

In Solomon's time and afterwards, says Dr. Harris, 'the wine and sweet cordials seem generally to have been used separately' (*Nat. Hist. of Bible*). It seems more probable, however, that the *palm syrup* or honey denoted by *shay-kawr'*, was used both as a sweetmeat or article of food, and as a drink, like the Hebrew *sobhe* and the Roman *sapa* (boiled wine), diluted with water, as with the modern grape and honey syrups or sherbets (Prov. ix:2, 5). The derivative of *shechar*, expressive of its first signification, are numerous. Eastward and southward, following the Arabian channel and the Saracenic conquests, we

meet with the most obvious forms of the Hebrew word still expressive of sugar. Thus we have the Arabic *sakar*; Persic and Bengali, *shukkur* (whence our word for sugar-candy, *shukur-kund*, 'rock-sugar'); common Indian, *jaggree* or *zhaggery*; Moresque, *sekkour*; Spanish, *azucar*; and Portuguese, *assucar* (molasses being *mel-de-assucar* 'honey of sugar,' abbreviated). The wave of population has also carried the original sense and form northwards, embodying the word in the Grecian and Teutonic languages. Hence Greek, *sakhar*; Latin, *saccharum*; Italian, *zucchero*; German, *sucher* and *juderig*; Dutch, *suiker*; Russian, *sachar*; Danish, *sukker*; Swedish, *socker*; Welsh, *siwgar*; French, *sucre*; and our own common words *sukkar* (sweetmeat), *sugar*, and *saccharine*. 'Sukkarde' is also an old English word clearly traceable in sense and sound to the same origin, and is used by the writers of the middle ages in the sense of dainty, dessert, or sweetmeat.

To satisfy or cloy is the well-known property of sweet and luscious preparations (as honey, Prov. xxv:16, 27); whereas 'strong drink,' in the modern sense of intoxicating, is proverbial for creating an appetite which is insatiable. The drinkers of it 'tarry long at the wine;' they 'rise up early in the morning and continue until night, till wine inflames them;' and when, after suffering its evils, they awake, their cry still is, 'I will seek it yet again' (Prov. xxiii:30-35; Is. v:11, 22).

(2) **Date or Palm Wine.** Date or *palm wine* in its fresh and unfermented state. Bishop Lowth translates Is. xxiv:9 thus,—

'With songs they shall no more drink wine (i. e., of grapes);

The *palm wine* shall be bitter to them that drink it'—

and observes, note in loc., that 'this is the proper meaning of the word shekar; Gr., *sikera*. All enjoyment shall cease; the *sweetest wine* shall become bitter to their taste.' Herodotus, in his account of Assyria, remarks that 'the palm is very common in this country,' and that 'it produces them bread, wine, and honey' (i:193).

The Mohammedan traveler (A. D. 850) says that 'palm wine, if drunk fresh, is sweet like honey; but if kept, it turns to vinegar' (p. 9).

Mandeville, who traveled above 500 years ago, says, 'Other trees there ben also, that beren wyn of noble sentement.' He then describes the *jaggree* or sugar palm, and adds, 'the honey and the wyn and the venym ben drawn out of other trees, in the same manere and put in vessels for to kepe' (p. 189).

Mandelsloh (1640), speaking of the village of Damre near Surat, records thus:—'*Terry or Palm Wine*. In this village we found some terry, which is a liquor drawn out of the palm-trees, and drank of it in cups made of the leaves of the same tree. To get out the juice, they go up to the top of the tree, where they make an incision in the bark, and fasten under it an earthen pot, which they leave there all night, in which time it is filled with a certain *sweet liquor* very pleasant to the taste. They get out some also in the daytime, but that (owing to the great heat) *corrupts immediately*, and is good only for vinegar, which is all the use they make of it' (*Ambassador's Travels*, p. 23).

Adam Fabroni, an Italian writer of celebrity, informs us that 'the palm-trees, which particularly abounded in the vicinity of Jericho and Engaddi, also served to make a *very sweet wine*,

which is made all over the East, being called palm wine by the Latins, and *syra* in India, from the Persian *shir*, which means luscious liquor or drink' (*On the Husbandry of the Ancient Jews*).

Dr. Shaw thus describes the unfermented palm wine: 'This liquor, which has a more luscious sweetness than honey, is of the consistence of a thin syrup, but *quickly grows tart and ropy*, acquiring an intoxicating quality' (*Travels*, i:262). Sir G. T. Temple says: "We were daily supplied with the sap of the date-tree, which is a delicious and wholesome beverage *when drunk quite fresh*; but if allowed to remain for some hours, it acquires a sharp taste, not unlike cider. It is called *leghma*, and, poetically, 'the tears of the date,'—*leghma* being a corruption of *lachryma*. The Landers inform us that '*Palm wine* is the common and favorite drink of the natives' of Africa—that 'the *juice* is called wine,' and that 'it is either used in this state, or preserved till it acquires rather a *bitter flavor*.' (*Expedition to the Niger*, iii:307-8). With these facts before us, the language employed by the prophet in the sublime chapter from which we quoted above, becomes beautifully apposite. His prediction is that 'the land shall be utterly spoiled,' that the light of joy shall be turned into the gloom of sorrow, even as the *sweet drink* which corrupts, grows *sour and bitter* to those who drink it. The passage clearly indicates the nature of the drink to have been *sweet* in what the Jews esteemed its most valuable condition, but *bitter* in its fermented state. Hence the drunkard is represented in Is. v:20-22, as one who 'puts bitter for sweet, and sweet for bitter.' This palm wine, like the honey of dates and sugar, was much valued as a medicine and cordial.

(3) *Shaykawr* also denotes fermented or intoxicating palm wine. Various forms of the noun in process of time became applied to other kinds of intoxicating drink, whether made from fruit or from grain. Arrack has been commonly, but erroneously, derived from *sakar*, and some, including Dr. Paxton (*Illustrations of Scripture; Nat. Hist.*, p. 51), have confounded the *arrack* with the palm wine, forgetting that the original wine existed long prior to the discovery of arrack distillation. The true palm wine, also the *shaykawr* of the Bible, is exclusively the juice of the palm-tree or fruit, whereas *arrack* is applied to the spirit obtained from fermented rice and other things, and is, as Dr. Shaw remarks, 'the general name for all hot liquors extracted by the alembic' (*Travels*, i:262). Such liquors furnish more powerful means of intoxication than the ancients possessed, and derive their name, we apprehend, from a poisonous species of the palm-tribe, the *areca*, or 'drunken date-tree,' the nuts of which are mixed with betel-leaf, datura, and other drugs, and made into a confection or preserve, which the Indians chew, or put into their drink to make it intoxicating (*Pomet On Drugs*).

The palm wine of the East, as we have explained, is made intoxicating either by allowing it to corrupt and ferment, thereby losing the sweet luscious character for which the Orientals esteem it, and becoming ropy, tart, and bitter; or, in its fresh or boiled state, by an admixture of stimulating or stupefying ingredients, of which there is an abundance (see Olearius, Mandelsloh, Linschoten, and others). Such a practice seems to have existed amongst the ancient Jews, and to have called down severe reprobation (comp. Prov. xxiii:30; Is. i:22; v:11, 22, and see Lowth *in loc*).

DRINK-OFFERING (drīnk-ōf'fēr-īng).

One kind consisted of wine (Num. xv:5; Hos. ix:4) which was poured around the altar (Exod. xxx:9). It was commonly joined with meat-offering (Num. vi:15, 17; 2 Kings xvi:13; Joel i:9, 13; ii:14). Drink-offerings were frequently devoted to heathen gods (Is. lvii:6; lxxv:11; Jer. vii:18; xix:13; xlv:17, 18; Ezek. xx:28). Libations of water also occur (2 Sam. xxiii:16; 1 Sam. vii:6; 1 Kings xviii:33, 34). Oil libations are likewise mentioned (Gen. xxxv:14). (See OFFERING.)

DROMEDARY (drūm'ē-dā-rŷ), (Heb. רֶמֶשׁ, *reh'-kesh*, swift beast; רַמְמָה, *ram-mawk'*, a brood mare).

Besides Is. lx:6, Jer. ii:23, where it should be rendered *young camel* (Heb. בְּהֵמָה, *beh'ker*), the word is also mentioned in 1 Kings iv:28 and Esth. viii:10; in the first being an erroneous rendering of a Hebrew word signifying "*swift beasts*," as in margin, and in the second another word signifying "*mares*." There is no clear and undoubted reference to the dromedary in the Scripture. (See CAMEL.)

DROPPING, A CONTINUAL. We find this expression in Prov. xxvii:15, where it is said: "A continual dropping in a very rainy day and a contentious woman are alike." From the LXX we learn the sense to be "Drops of rain in a wintry day drive a man out of his house; in the same manner also does an abusive woman." When we consider the construction of the ordinary eastern house, the force of this comparison becomes evident. A very great number of them have simply roofs made of clay; so when it rains, and especially when rains are of long duration and violent, the clay becomes saturated, loosens, and allows the water to drop or pour down upon the helpless inmates. An oriental traveler relates his experience, which serves to illustrate the proverb. He says: "Last night we retired to rest in what appeared to be one of the best rooms which we have occupied during the journey; but at midnight we were roused by the rain descending through the roof, and were obliged to rise and seek shelter from the incessant dropping, in the corridor, which was better protected."

On the roofs of many of the houses in Syria are large cylindrical stone rollers which are used by the women, immediately after a shower, for the purpose of packing the softened earth, which is so easily soaked with the rain. This, however, seems sometimes to make matters worse. Dr. Lepsius says: "Being overtaken by a sudden shower at night I took refuge in a house on Mt. Lebanon. Ere long the rain softened the mud on the roof, and began to pour down on the bed. One of the number was sent out to fill up the crevices and draw about the stone roller. This only added to our misery by bringing down heaps of stone and rubbish, and I was compelled to beg the host to desist from the well-meant kindness." So the meaning of the proverb becomes very apparent.

DROPSY (drōp'sŷ), (Gr. ὑδρωπικός, *hoo-droh-phi-kos'*, watery, Luke xiv:2).

A disease characterized by an unnatural accumulation of watery liquid in any cavity of the body or in the tissues.

DROSS (drōs) (Heb. דִּי, *seeg*, refuse), the impurities separated from silver, etc., by the process of melting (Prov. xxv:4; xxvi:23); also the *base metal* itself before smelting (Is. i:22, 25; Ezek. xxii:18, 19).

Figurative. (1) The corruptions of a people, and their profane and wicked persons, are likened to *dross*; they are useless, and tend to defile others till God, by his grace and providence, separates them (Is. i:25; Ps. exix:119; Ezek. xxii:18, 19). (2) Silver is become *dross*, and wine is mixed with water, when God's word is mixed with traditions and errors; and rulers and professors become naughty and profane (Is. i:22).

DROUGHT (drou't), dryness caused by lack of rain (Gen. xxxi:40; Ps. xxxii:4).

DROWN (droun), (Gr. καταποντίζω, *kat-af-on-tid'zo* (Matt. xviii:6).

Drowning was not a Jewish mode of capital punishment, nor was it *practiced* in Galilee, but was employed by the Greeks, Romans, Syrians, and Phœnicians (Matt. xviii:6).

DRUM (drūm), (Gr. τύμπανον, *τύπανον, too'phan-on*, from the verb τύπτω, to beat). The word occurs in 2 Macc. vi:19, 28, but not in the Old Testament or the New.

(1) As a musical instrument a form of the drum was used by the Hebrews, especially by dancing women, called in A. V. TIMBREL, which see. (See MUSICAL INSTRUMENTS.)

(2) In 2 Macc. it signifies an instrument of torture, and is translated 'the torture.' Josephus calls the same instrument τροχός, a wheel. It was probably a wheel-like frame upon which a man was extended, as upon a St. Andrew's cross, and beaten to death; see the passage cited, and verse 30, which speaks of the strokes or blows, mis-translated 'stripes.' 'Breaking upon the wheel' was a punishment by torture in the Middle ages; but that was a prolonged misery, while the killing of Eleazar seems to have been completed at once. In Heb. xi:35 it is said 'others were tortured;' the verb is literally tympanized, referring to this style of execution; beaten to death.

DRUNK, DRUNKARD (drūnk, drūnk'ērd), (Heb. some form of שָׂרֵב, *shaw-kar'*, to be tipsy; שָׂרַב, *shaw-thaw'*, to imbibe; רָוַע, *raw-va'w'*, to fill; סָבַח, *saw-baw'*, to drink to excess; Gr. μεθύω, *meth-oo'o*, Gen. ix:21).

Figurative. (1) *Drunkness* sometimes denotes abundance, satiety (Deut. xxxii:42; Is. xlix:26). (2) It means to be madly carried away with delusion, idolatry, error, and superstition (Is. xxviii:7; Rev. xvii:2). (3) To be stupefied and overwhelmed with sore afflictions and miseries (Jer. xliii:13; Is. lxliii:6). (4) To be given to luxury, wantonness, and lust (1 Thess. v:7; Habak. ii:15). (5) Antichrist is *drunk* with the blood of the saints; with great pleasure he persecutes and murders multitudes of them (Rev. xvii:6). (6) To add *drunkness* to *thirst* is to become worse and worse in idolatry and other wickedness (Deut. xxix:19). (See CUP.)

DRUSILLA (dru-sīl'la), (Gr. Δρούσιλλα, *drou'sil-lah*, youngest daughter of Herod Agrippa I.

She was much celebrated for her beauty, and was betrothed to Epiphanes, prince of Com-magene; but was afterwards married to Azizas, king of Emesa, whom the procurator Felix induced her to abandon, in order to live with him. She is mentioned in Acts xxiv:24 (comp. Joseph. *Antiq.* xix. 9. 1; xx. 7. 1, 2).

This Antonius Felix had three wives, each named Drusilla. One of them was a granddaughter of Antony and Cleopatra.

DUDAIM (dū-dā'im), (Heb. דודאים, *du-daw-yim'*).

(1) This word, in its plural form, occurs only in two places of Scripture; first in Gen. xxx:14-16; and secondly, in Cant. vii:13. In the first passage it is mentioned several times: 'Reuben went out in the days of wheat harvest, and found *dudaim* (mandrakes) in the field and brought them home to his mother Leah. Then Rachel said to Leah, give me of thy son's *dudaim*;' also in

The Mandrake.

verse 16, it is said, 'And Jacob came out of the field in the evening, and Leah went out to meet him, and said, Thou must come in unto me, for surely I have hired thee with my son's *dudaim*; and he lay with her that night.' (2) In the passage in Canticles we learn that these *dudaim*, or the plants which yielded them, gave out a peculiar odor: 'The *dudaim* (mandrakes) give a smell, and at our gates are all manner of pleasant plants.' From the above passages it is evident that the *dudaim* were collected in the fields, that they were fit for gathering in the wheat harvest in Mesopotamia, where the first occurrence took place; that they were found in Palestine; that they or the plants which yielded them diffused an odor.

From this it is manifest that there is little to guide us in determining what plant is alluded to at such early periods, especially as no similar name has been recognized in any of the cognate languages. Hence great diversities of opinion have been entertained respecting the plant and produce intended by the name *dudaim*. These Dr. Harris has thus summed up: 'Interpreters have wasted much time and pains in endeavoring to ascertain what is intended by the Hebrew word *dudaim*. Some translate it by "violet," others "lilies," "jasmins," "truffles or mushrooms;" and some think that the word means "flowers," or "fine flowers." Bochart, Calmet, and Sir Thomas Browne suppose the *citron* intended: Celsius is persuaded that it is the fruit of the *lotc-tree*; Hiller that *cherries* are spoken of; and Ludolf maintains that it is the fruit which the Syrians call "mauz" (that is the plantain), resembling in

figure and taste the Indian fig; but the generality of interpreters and commentators understand mandrakes, a species of melon, by 'dudaim.' Here, however, the author has confounded the melon 'cucumis dudaim' with the mandrake or mandragora, adopted by the generality of authors. (3) Considering that the earliest translators have given *mandragora* and *Yabrokhim* as the synonymous names for dudaim, and that the root and fruits of *atropa mandragora* have, from early times, been supposed to be possessed of the same properties which are ascribed to the *dudaim*, there does not appear to us any other plant, which has been yet adduced, better entitled than it to stand for the dudaim. But there does not exist sufficient collateral proof to confirm the selection by the Greek translator of the mandragora as the *dudaim*, in preference to some other plants, which might be adduced, and to which similar properties have from ancient times been ascribed.

J. F. R.

DUKE (dūk). This word is from the Latin *dux*, 'a captain or leader,' from *duco*, 'to lead.'

1. It thus corresponds with tolerable exactness to the Hebrew *al-loof* (אֶלְלוּף, friend), from *alaph*, to 'lead,' 'guide.' This word, alluph, is usually rendered by 'prince' or 'chief;' but by 'duke' in Gen. xxxvi:15-30, where we find 'dukes of Edom.'

2. *Nes-eeh'* (נֶסְעִי, a prince, being anointed), dukes of Sihon (Josh. xiii:21, "properly vassals of Sihon, princes created by the communication or pouring in of power" (K. and D., *Com.*, in loc.). It is rendered "princess" (Ps. lxxxiii:11; Ezek. xxxii:30; Dan. xi:8) and principal men" (Mic. v:5).

DULCIMER (dül-sim-ēr), (Chald. סוּמְפִינָה, *psan-tay'reen*). The Oxford Bible and Chappell translate this Hebrew word as *dulcimer*; but as this name is merely an Aramaic ("Chaldee") transliteration of ψαλτήριον, (*psal-tay'ree-on*), the word must represent the psaltery, a stringed instrument, like the μάγαδισ orνάβλα, a psaltery harp, ψ. τριγώνον (Ariet. *Prob.* xix:23, 2, cited by Liddell and Scott). The verb ψάλλω, from which the word *psaltery* is derived, signifies to pull, pluck, twang.

But the "duleimer" of Scripture (Chald. סוּמְפִינָה, *soom-po-nch-yaw'*), is quite another thing. The instrument denoted by this word was, in the opinion of the best Bible scholars, as well as of the Rabbins, a bagpipe like that in use at the present day among the peasants of northwestern Asia and southern Europe and called by them *sampagna*, which is a word of similar sound to the word here used, *sumphoniah* (Dan. iii:5, 10, 15). It was composed of two pipes with a leathern sack, and produced a harsh, screaming sound. It has no resemblance at all to the modern dulcimer. (See MUSICAL INSTRUMENTS.)

DUMAH (dū'mah), (Heb. דוּמָא, *doo-maw'*, silence).

1. A son of Ishmael, most probably the founder of an Ishmaelite tribe of Arabia, and so giving name to the principal place or district inhabited by that tribe (Gen. xxv:14; 1 Chron. i:30; Is. xxi:11).

2. The region occupied by the Ishmaelites in Arabia (Gen. xxv:14; Is. xxi:11). It is doubtless the same that is still called by the Arabs *Duma*, the *Stony*, and the *Syrian Duma*, situated on the confines of the Arabian and Syrian deserts, with a fortress (Niebuhr, *Beschreibung*, p. 344).

3. *Dumah* was also the name of a town in the tribe of Judah (Josh. xv:52), which Eusebius and Jerome place seventeen Roman miles from Eleutheropolis, in Daroma.

Figurative. As employed in Is. xxi:11, *Dumah* appears to be symbolical, meaning deep, complete "silence," and therefore the land of the dead (Ps. xciv:17; cxv:17).

DUMB (düm), (Heb. דוּמָא, *il-lame'*, speechless; דוּמָא, *doo-maw'*, Hab. ii:19; Gr. κωφός, *ko-fos'*, blunted, as to tongue).

It denotes (1) Such as cannot speak for want of natural abilities (Exod. iv:11; 1 Cor. xii:2). (2) Such as cannot teach others for want of grace, knowledge, and courage (Is. lvi:10). (3) Submissive and silent under the dispensations of Providence (Ps. xxxix:9). (4) Such as do not speak (Ps. xxxix:2; Ezek. iii:26). (5) Such as cannot speak in their own cause by reason of ignorance, fear, etc. (Prov. xxxi:8). (6) Rendered speechless by a divine ecstasy of wonder and amazement (Dan. x:15). (7) Zachariah's dumbness during his wife's pregnancy might figure out the silencing and abolition of the ceremonial laws by Christ's appearance in our nature; or that by means of his birth, and what followed, their true language and signification should be made known (Luke i:20). (8) A *dumb and deaf spirit* is one who, by his possession of persons, renders them dumb and deaf (Mark ix:17, 25).

DUNG (düng), (Heb. אֶשְׁפֹּת, *ash'pōth*, dung, dirt, rubbish). Among the Israelites, as with the modern Orientals, dung was used both for manure and for fuel.

In a district where wood is scarce, dung is so valuable for the latter purpose, that little of it is spared for the former.

(1) The use of dung for manure is indicated in Is. xxv:10, from which we also learn that its bulk was increased by the addition of straw, which was, of course, as with us, left to rot in the dunghill. Some of the regulations connected with this use of dung we learn from the Talmud. The heaping up of a dunghill in a public place exposed the owner to the repair of any damage it might occasion, and any one was at liberty to take it away (*Bava-kama*, i:3, 3). Another regulation forbade the accumulation of the dunghill to be removed, in the seventh or sabbatic year, to the vicinity of any ground under culture (*Sabb.* iii:1), which was equivalent to an interdiction of the use of manure in that year; and this must have occasioned some increase of labor in the year ensuing.

(2) The use of dung for fuel is collected incidentally from the passage in which the prophet Ezekiel, being commanded, as a symbolical action, to bake his bread with human dung, excuses himself from the use of an unclean thing, and is permitted to employ cows' dung instead (Ezek. iv:12-15). This shows that the dung of animals, at least of clean animals, was usual, and that no ideas of ceremonial uncleanness were attached to its employment for this purpose. The use of cow-dung for fuel is known to villagers in the west of England, who prefer it in baking their bread 'under the crock,' on account of the long-continued and equable heat which it maintains.

(3) In many thinly-wooded parts of southwestern Asia the dung of cows, camels, horses, asses, whichever may happen to be the most common, is collected with great zeal and diligence from the streets and highways, chiefly by

young girls. They also hover on the skirts of the encampments of travelers, and there are often amusing scrambles among them for the droppings of the cattle. The dung is mixed up with chopped straw, and made into cakes, which are stuck up by their own adhesiveness against the walls of the cottages, or are laid upon the declivity of a hill, until sufficiently dried. It is not unusual to see a whole village with its walls thus garnished, which has a singular and not very agreeable appearance to a European traveler. Towards the end of autumn, the result of the summer collection of fuel for winter is shown in large conical heaps or stacks of dried dung upon the top of every cottage. The usages of the Jews in this matter were probably similar in *kind*, although the *extent* to which they prevailed cannot now be estimated.

Figurative. (1) Wicked men are likened to *dung* (Jer. xvi:4; Job xx:7). (2) To fall like *dung, and handfuls of corn*, is to be slain in multitudes (Ps. lxxxiii:10; Jer. ix:22). (3) Idols are called about forty-nine times *dung-gods*, or *gillulim*, to denote how useless and abominable they are (Deut. xxix:17, etc.). (4) God spreads the *dung* of men's *sacrifices* and *solemn feasts* on their *faces* when he rejects their religious services, because of their hypocrisy and wickedness (Mal. ii:3). (5) The saints count all things but *dung, or dogs' meat*, to win Christ; altogether worthless and abominable in comparison of him, and utterly insufficient to recommend them to the favor of God as a judge (Phil. iii:8).

DUNGEON (dŭn'jŭn), (Heb. בּוֹר, *bor*, pit, dungeon), is distinguished from the ordinary prison as being more severe (Gen. xl:15; xli:14; Ex. xii:29; Jer. xxxviii:6-13; Lam. iii:53). It usually consisted of a deep well or cistern.

DUNG GATE (dŭng gāt), (Neh. ii:13, "dung port;" iii:13, 14; xii:31), a gate of ancient Jerusalem, located at the southwest angle of Mount Zion (J. Strong, *Harmony*).

It was probably called such on account of the piles of sweepings and garbage in the valley of Tophet below. (See JERUSALEM.)

DUNGHILL (dŭng-hĭl), the translation of three Hebrew words and one Greek, and meaning: (1) A heap of manure (Is. xxv:10; Luke xiv:35). (2) Privy (2 Kings x:27); "draught-house" (Dan. ii:5).

Figurative. To sit upon a dunghill denoted the lowest and most wretched condition of life (1 Sam. ii:8; Ps. cxliii:7; Lam. iv:5).

DUNKERS (dŭn'kĕrs), (the German Baptist Brethren).

In 1708 a small company—eight persons—met on the bank of the Eder at Schwarzenau, Germany, and were baptized. This was the beginning of a new religious sect. A desire to follow more closely in the footsteps of the Master, and the conviction that this was impossible in any of the religious bodies of the time, led this company to take this step. Alexander Mack, one of the eight, was the first minister chosen by this band. The church increased rapidly in numbers; but even in Witgenstein, where so many had found refuge from persecution, they were not allowed to dwell in peace. Mack and Hochman traveled and preached in many parts of Germany. Later they went to Holland, and while there they met William Penn. He was then greatly interested in his colony in the new world, and invited the Dunkers to settle in it. The desire to escape persecution led them to accept the offer, and in 1719 they began to emigrate to

America. December 25, 1723, the first Brethren church was organized in America, the first members were received by baptism, and the first love feast was celebrated. This was at Germantown, Pa. Peter Becker was the first elder of the church in America. In 1729 Alexander Mack came. Divine services were held in private houses until 1770, when the members built themselves a house of worship in Germantown. This building is still standing. Since then the Brethren have built churches in nearly every state and territory of the Union. They also have missions in Denmark and Sweden, in Asia Minor and in India.

During the century and three-quarters which has passed since their organization at Germantown there has been no change in their creed. The New Testament is their only creed, and as that does not change, they do not change. They hold that faith, repentance and baptism are essential to salvation. They believe that trine immersion is the apostolic method of baptism, and receive none as members without baptizing them in this way. The *agape*, or feast of love, as instituted by Christ and practiced by the early church, they restored in 1708. Just before partaking of this meal they engage in the ordinance of feet washing, the brethren washing the feet of brethren and the sisters those of sisters. In connection with the feast of love, they receive the communion of bread and wine. After the supper, and while still seated at the tables, the right hand of fellowship and the kiss of charity are extended, by the brethren to the brethren and by the sisters to the sisters.

The Brethren teach and practice plain dressing. The wearing of gold for ornament is forbidden. The Brethren never go to law with each other; and they are not allowed to go to law with others without the consent of their congregations. They do not go to war, for their Master is the Prince of Peace and brought to this world a gospel of peace. Obeying the command of Jesus and James, they "swear not at all." When called upon to give testimony, they affirm, but never under oath. No member of the church is allowed to belong to any secret society. They believe that the marriage tie can be broken by death alone. Following the command of James, they anoint the sick with oil. They keep their own poor. More than a hundred years ago they forbade any member of the Brethren church to manufacture or sell intoxicants. They forbid the use of alcoholic or malt liquors as a beverage. They are opposed to the use of tobacco. In 1782 they called the slave trade unchristian, and decided that no member could purchase or hold slaves. J. H. M.

DURA (dŭ'rā), (Heb. דּוּרָא, *doo-raw'*), the plain in which Nebuchadnezzar set up his golden image (Dan. iii:1).

Traces of the name have been idly sought in quarters too distant from Babylon to have been historically possible, as it is clear from the context that 'the plain of Dura' could be no other than that plain (or some part of it) in which Babylon itself was situated.

DURE (dŭr), (Gr. ἐστέ, *es-tee'*, consist, remain), R. V., "endure."

Yet hath he not root in himself, but *dureth* for a while (Matt. xiii:21).

This is the same word which we now write *endure*. Our word *during* comes from the same root.

DUST (dŭst), (generally Heb. עָפָר, *aw-fawr'*, powdered ashes, clay, dust).

Figurative. 1) *The putting of dust and ashes on the head; rolling one's self in dust; sitting in the dust; putting the mouth in the dust;* import great mourning and distress (Josh. vii:6; Mic. i:10; Job xlii:6; Is. xlvi:1; Lam. iii:29). (2) *The Jews throwing dust in the air against Paul* imported an outrageous desire to have reduced him to powder (Acts xxii:23). (3) *The apostles shaking off the dust of their feet,* against those who refused to receive them, imported a condemnation of them (Matt. x:14; Luke x:5). (4) *The shaking one's self from the dust* imports recovery from distress, contempt, and grief (Is. lii:2). (5) *To lick the dust of one's feet* is to pay him the utmost reverence and subjection; as the subjects in some eastern courts fell on the earth, and kissed the dust at the feet of their sovereign (Ps. lxxii:9; Is. xlix:23). (6) *To pant for the dust on the head of the poor,* is to wish for their utter ruin, or to be earnestly covetous of their meanest enjoyments (Amos ii:7). (7) *Dust shall be the serpent's meat,* i. e. Satan shall only harass wicked men; and wicked men shall have a poor pittance of outward enjoyments (Gen. iii:14; Is. lxxv:25). (8) *Dust* is put for the grave, where men's bodies are encompassed with, and turned into dust (Gen. iii:19; Job vii:21; Eccles. xii:7); and for a low and wretched condition (1 Sam. ii:8; Nah. iii:18; Ps. xxii:29). (9) Men are called *dust and ashes;* their bodies are formed from, nourished with, and shall return to dust (Gen. xviii:27). (10) Dead men are called *dust* (Ps. xxx:9). (11) The Jews are likened to *dust* for their multitude (Gen. xiii:16; Num. xxiii:10; and for their great distress (2 Kings xiii:7); and the quails for their vast number (Ps. lxxviii:27). (12) *Affliction cometh not forth of the dust, neither doth trouble spring out of the ground;* it comes not by mere chance or course of nature, but from a sinful cause, and by means of the providence of God (Job v:6).

DUTY (dū'ty). 1. (Heb. דָּוָר, *darw-bar'*, a matter, 2 Chron. viii:14; Ezra iii:4), means the task of each day.

2. Heb. עֲנָוָה, *o-naw'*, cohabitation.

In the New Testament the word is the rendering of the Greek *ὀφειλέω*, *of-i-leh'o*, to be under obligation (Luke xvii:10; Rom. xv:27), and signifies that which ought to be done.

It thus denotes what one owes, is obliged to render by equity, law, or engagement (Ezek. xviii:11). The *duty* of marriage is the same with what Paul calls *due benevolence*, together with a proper authority in the family (Exod. xxi:10; 1 Cor. vii:3). The duty of a husband's brother, if unmarried, was to marry the widow of his deceased brother, and raise up children to him (Deut. xxv:5-7).

DWARF (dwarf), (Heb. דַּק, *dak*, beaten small, as in Lev. xvi:12), an incorrect translation for a lean or emaciated person (Lev. xxi:20).

Such a person could not administer in the ceremonial service of the Tabernacle or Temple (see BLEMISH).

DWELL (dwěl), (Heb. שָׁבַת, *yaw-shab'*, to remain), to have a fixed residence in a place.

Figurative. (1) God *dwells in light*, in respect of his delight in, and independent possession of, his own glorious excellencies, and in respect

of his glorious residence amidst rays of inexpressible glory in heaven (1 Tim. vi:16; 1 John iii:17). (2) He *dwells* in heaven, in respect of the continued and delightful residence of his presence there (Ps. cxxiii:1). (3) He *dwelt* in the tabernacle, temple, and city of Jerusalem; there the symbols of his presence were continued (Ps. cxxxii:14 and lxviii:16). (4) He *dwells* in his church, and in and with his people, in the continued bestowal of his ordinances, and of his gracious, supporting, and comforting influences (Ps. ix:11; 1 John iv:12; Is. lvii:15). (5) The fullness of the Godhead *dwells bodily* in Christ, that is, the divine nature, personally, perpetually, and truly, resides in his human nature, by the closest union with it (Col. ii:9). (6) Christ *dwelt* among men in his state of humiliation on earth (John i:14). (7) He *dwells in our hearts by faith;* he is united to us as our head and husband; his righteousness is imputed to us, and applied to our conscience; his Spirit and grace are fixed in our hearts; he loves and delights in us, and furnishes our whole soul with his fullness (Eph. iii:17). (8) The Holy Spirit *dwells* in us by personal residence and gracious influence (Rom. viii and ix; 2 Tim. i:14; 1 Cor. iii:16). (9) The word of God *dwells in us richly* when it is carefully studied, firmly believed, closely applied, and diligently practiced (Col. iii:16; Ps. cxix:11). (10) The saints *dwelt in God, and in Christ;* they are united to, and nourished, supported, and comforted by him, and have sweet intimacy and fellowship with him (1 John iii:24 and iv:16). (11) They *dwelt in love* when they live in the faith of God's redeeming love to them, and in the exercise of love to him and his people (1 John iv:15). (12) Their *dwelling* in the house of God, or in his courts, imports their frequent fellowship with him in his ordinances (Ps. xxvii:4 and lxxxiv:4). (13) Wickedness, vengeance, or judgment *dwelt* in or on a person and land when they long continue there (Job xi:14 and xviii:15; Is. xxxii:16). (14) *Dwell deep,* literally *make deep for dwellings* (Jer. xlix:8), seems to refer to a custom still common in Eastern countries of seeking refuge from danger in the recesses of rocks and caverns, etc.

DWELLING (dwěl'ing), the rendering of a number of Hebrew and Greek words. Human dwellings have been of different kinds from the earliest day to the present, caves, booths, tents, houses, and palaces, according to the character of the country, mode of living, and occupation, as well as the degree of culture. (See HOUSE.)

DYE (dī), (Heb. מַצֵּי, *khaw-mates'*, dazzling, Is. lxiii:1; אַדְמָן, *aw-dam'*).

The art of dyeing is of great antiquity. That the Jews learned it from the Egyptians and used the art during their wandering is evident from Exod. xxvi:1; xxviii:5-8. (See COLORS.)

DYED ATTIRE (did ät-tīr'), (Ezek. xxiii:15; Heb. טְבוּלֵי, *teb-oo-leem'*).

This seems to refer to variegated turbans or dyed headbands.

DYSENTERY (dis'en-tēr-ÿ), (Gr. *δυσεντερία*, *doo-sen-ter-ee'ah*).

A well-known disease marked by inflammation and ulceration of the lower part of the intestines, with hemorrhage from the bowels. Called bloody flux, A. V. (Acts xxviii:7, 8).

E

EAGLE (ē'g'l), (Heb. נֶשֶׁר, *neh'sher*; רָבִיב, *raw-khawm'*; Gr. *ἀετός*, *ah-et-os'*).

(1) The Eagle, in zoölogy, forms a family of several genera of birds of prey, mostly distinguished for their size, courage, powers of flight, and arms for attack. The bill is strong and bent into a plain pointed hook, without the notch in the inner curve which characterizes falcons; the nostrils are covered with a naked cere or skin, of a yellow or a blue color; the eyes are lateral, sunken, or placed beneath an overhanging brow; the head and neck covered with abundance of longish, narrow-pointed feathers; the chest broad, and the legs and thighs exceedingly stout and sinewy, and feathered down to the toes; they are clothed in general with brownish and rust-colored feathers, and the tail is black, grey, or deep brown. Sea-eagles (genus *Haliaëtus*) have the tarsi or legs half bare and covered with horny scales; not unusually the head, back, and tail more or less white. The larger species of both measure, from head to tip of tail, 3 feet 6 inches or more, and spread their wings above 7 feet 6 inches; but these are proportionately broad to their length: for it is the third quill feather which is the longest; as if the Creator intended to restrain within bounds their **rapidity of flight**, while by their breadth the power of continuing on the wing is little or not at all impeded. The claws of the fore and hind toe are particularly strong and sharp; in the sea-eagles they form more than half a circle, and in length measure from 1½ to 1¾ of an inch. Under the name of *nisr* the scriptures include species of both the above, and in some cases, also, the larger vultures, or the genus *vultur proper*. (See VULTURE.)

(2) These majestic birds have their abode in Europe, on the shores of the Mediterranean, in Syria and Arabia, wherever there are vast woody mountains and lofty cliffs: they occupy each a single district, always by pairs, excepting on the coasts, where the sea-eagle and the osprey (*Pandion haliaëtus*) may be found not remote from the region possessed by the rough-legged eagles. It is in this last genus, most generally represented by the golden eagle (*aquila chrysaëta*) that the most powerful and largest birds are found. That species in its more juvenile plumage, known as the ring-tailed eagle, the Imperial eagle, or mogilnick, and the booted eagle is found in Syria; and at least one species of the sea-eagles frequents the coasts, and is even of stronger wing than the others. These build usually in the cliffs of Phœnicia, while the others are more commonly domiciliated within the mountains. According to their strength and habits the former subsist on antelopes, hares, hyrax, bustard, stork, tortoises, and serpents; and the latter usually on fish; both pursue the catta (*pteroles*), partridge, and lizard. The osprey alone being migratory retires to Southern Arabia in winter. None, excepting the last-mentioned, are so exclusively averse to carrion as is commonly asserted: from choice or necessity they all, but in particular the sea-eagles, occasionally feed upon carcasses of horses, etc.; and it is well known in the East that they follow armies for that purpose. Hence the allusions in Job and Matt. xxiv:28, though vultures may be

included, are perfectly correct. So again are those which refer to the eagle's eyrie, fixed in the most elevated cliffs.

(3) The swiftness of this bird, stooping among a flock of wild geese, with the rushing sound of a whirlwind, we have witnessed; and all know its towering flight, suspended on its broad wings among the clouds with little motion or effort. Thus the predictions, in which terrible nations coming from afar are assimilated to eagles, have a poetical and absolute truth, since there are species like the golden, which really inhabit the whole circumference of the earth, and the nations alluded to bore eagles' wings for standards, and for ornaments on their shields, helmets, and shoulders.

Figurative. (1) The conquering kings of Assyria, Egypt, and Babylon, are likened to *eagles* for their powers and dominion, and for their ravenous oppression, ravage, and murder of the nations (Ezek. xvii:3, 7; Hos. viii:1). (2) The Chaldean armies are said to have had *eagles' wings*, and to be "swift as eagles;" with speed they overran and destroyed the nations (Jer. iv:13; xlviii:40; Lam. iv:19; Dan. vii:4; Hab. i:8). (3) The Roman armies are likened to *eagles*; they had their standards surmounted with the image of an eagle; they ravaged and murdered the nations; and, coming from afar, terribly ruined the corrupt nation of the Jews (Deut. xxviii:49; Matt. xxiv:28; Luke xvii:37). (4) The Edomites *exalted themselves, and made their nest high as the eagles*, they thought to secure themselves by the almost inaccessible rocks of their country (Jer. xlix:16; Obad. 4). To *enlarge baldness as the eagles*, is to be bereaved of all comfort, protection, and happiness, and oppressed with sorrow and grief on that account (Mic. i:16).

EAR (ēr), (Heb. אָזֶן, *o'zen*), the organ of hearing. We learn from Scripture that blood was put upon the right ear of the priests at their consecration (Exod. xxix:20; Lev. viii:23), and of the healed leper in his cleansing (Lev. xiv:14).

(1) To *hear in the ear* is to have a thing privately told us (Matt. x:27). (2) To *bow down the ear, incline the ear, give ear*, is carefully to attend to what is commanded or requested, and readily to do it. (Ps. xxxi:2; cxvi:2; cxxx:2, and xlix:1). (3) To *uncover the ear* is to whisper or tell a secret to one. (1 Sam. ix:15). (4) To *stop the ears* imports the highest disregard and abhorrence (Is. xxxiii:15). (5) *Open and obedient ears* import readiness to hear, to receive, and obey instructions (Is. l:5, and xlviii:8; Prov. xxv:12). (6) *Heavy and dull ears* import an incapacity to perceive, or an unwillingness to embrace and obey divine truths (Is. lix:1, and vi:10). (7) *Uncircumcised ears*, and *ears turned away from hearing* the law, or *ears stopped to good*, import stupidity, obstinacy, and impenitency, which render men incapable of receiving good counsel or instruction (Jer. vi:10; Acts vii:51; Prov. xxi:13, and xxviii:9). (8) *Itching ears* denote an excessive fondness to hear novelties, quaint speeches, etc. (2 Tim. iv:3). (9) Such as have *ears and hear not* are those that have opportunities of learning God's truth, and have natural faculties to consider it, and yet never apply them

for that purpose (Is. xlii:20 and xliii:8; Mark viii:18).

EAR (ēr). Used as a verb.

1. (Heb. שָׂרַח, *khaw-rash'*, 1 Sam. viii:12, primitive root), to scratch, to engrave with tools, hence to plow with an instrument.

2. (Heb. עָבַד, *aw-bad'*, Deut. xxi:4; Is. xxx:24, primitive root), meaning to till, to dress, to work.

EARING (ēr'ing), (Heb. שָׂרַח, *khaw-rash'*, 1 Sam. viii:12). This word, which occurs in the Authorized Version (Gen. xlv:6), is very often supposed to mean 'collecting the *ears* of corn,' which would confound it with harvest, from which it is distinguished in this very passage. But the word is radically the same with *harrow*, and denotes *plowing*, from the Anglo-Saxon *erian*, 'to plow.'

EARNEST (ēr'nēst), (Gr. ἀρραβών, *ar-hrab-ohn'*, pledge), money which in purchase is given as a pledge that the full amount will subsequently be paid. The Hebrew word (עֲרָבוֹנִים, *ar-aw-bone'*) was used generally for *pledge* (Gen. xxxviii:17), *surety* (Prov. xvii:18) and *hostage* (2 Kings xiv:14).

(1) Hesiychius explains *arrabohn* by *prodoma*, *somewhat given beforehand*. This idea attaches to all the particular applications of the word, as, anything given by way of warrant or security for the performance of a promise; part of a debt paid as an assurance of paying the remainder; part of the price of anything paid beforehand to confirm the bargain between buyer and seller; part of a servant's wages paid at the time of hiring, for the purpose of ratifying the engagement on both sides. The idea that the earnest is either to be returned upon the fulfillment of the engagement, or to be considered as part of the stipulation, is also included.

This word, carried around the Mediterranean by Tyrian commerce, appears in Latin as *arrhobo*, *arrha*, *arra*, and *rabo*; in modern languages, Italian, *arra*, *caparra*; Spanish, *caparra*; French, *arrhes*.

(2) The word is used three times in the New Testament, but always in a figurative sense; in the first (2 Cor. i:22), it is applied to the *gifts* of the Holy Spirit, which God bestowed upon the *Apostles*, and by which he might be said to have hired them to be the servants of his son; and which were the earnest, assurance, and commencement of those far superior blessings which He would bestow on them in the life to come, as the wages of their *faithful* services:—in the two latter (2 Cor. v:5; Eph. i:13, 14), it is applied to the *gifts* bestowed on *Christians generally* upon whom, after baptism, the Apostles had laid their hands, and which were to them an *earnest* of obtaining an heavenly habitation and inheritance, upon the supposition of their fidelity. This use of the term finely illustrates the augmented powers and additional capacities promised in a future state.

EARRINGS (ēr'rings).

(1) No custom is more ancient or universal than that of wearing earrings, from which it would appear to be a very natural idea to attach such an ornament to the pendulous lobe of the ear. There are two words in Hebrew denoting earrings, viz., עֲרָבוֹנִים, *aw-gheel*, which is applied to any kind of ring, particularly to earrings (Num. xxxi:50; Ezek. xvi:12). The name implies *roundness*, and it is a fact that nearly all the ancient earrings exhibited in the sculptures of Egypt and

Persepolis are of a circular shape. The other word, נֶזֶם, *neh-zem*, is also applied to a nose-jewel. It most certainly denotes an earring in Gen. xxxv:4; but in Gen. xxiv:47; Prov. xi:22; Is. iii:21; it signifies a nose-jewel; and it is doubtful which of the two is intended in Judg. viii:24, 25; Job xlii:11.

Earrings of certain kinds were anciently, and are still, in the East, instruments or appendages of idolatry and superstition, being regarded as talismans and amulets. Such probably were the earrings of Jacob's family, which he buried with the strange gods at Bethel (Gen. xxxv:4).

(2) No conclusion can be formed as to the shape of the Hebrew earrings except from the signification of the words employed, and from the analogy of similar ornaments in ancient sculpture. Those worn by the Egyptian ladies were large, round, single hoops of gold, from one inch and a half to two inches and one-third in diameter, and frequently of still greater size, or made of six single rings soldered together. Such probably was the round 'agil' of the Hebrews. Among persons of high or royal rank the ornament was sometimes in the shape of an asp, whose body was of gold set with precious stones (see AMULET). Silver earrings have also been found at Thebes, either plain hoops like the earrings of gold, or simple studs. The modern Oriental earrings are more usually jeweled drops or pendants than

Egyptian Earrings.

circlets of gold. The use of earrings appears to have been confined to the women among the Hebrews. That they were not worn by men is implied in Judg. viii:24, where gold earrings are mentioned as distinctive of the Ishmaelite tribes. The men of Egypt also abstained from the use of earrings.

EARTH (ērth).

(1) There are two words in Hebrew which are translated sometimes by *earth* and sometimes by *land*. These are עֵרֶץ, *eh'retz*, and אֲדָמָה, *ad-aw-maw'*, both of which are rendered by γῆ in the Septuagint, and this γῆ is rendered by 'earth,' 'land,' 'ground,' in the New Testament. The word *adamah*, however, is applied chiefly to the very *substance* of the earth, as soil, ground, clay, although sometimes denoting a region, land, or country; whereas *eretz* more generally denotes the *surface* of the earth, and is, hence, in the earlier parts of the Bible, opposed to שָׁמַיִם, *shaw-mah'yim*, 'the heavens.'

(2) Besides the ordinary sense of the word or words rendered 'earth' in our translation—namely, as denoting mould, the surface of the earth, and the terrestrial globe—there are others in scripture which require to be discriminated. (1) 'The earth' denotes 'the inhabitants of the earth' (Gen. vi:11; xi:1). (2) *Heathen countries*, as distinguished from the land of Israel, especially during the theocracy; *i. e.* all the rest of the world ex-

cepting Israel (2 Kings xviii:25; 2 Chron. xiii:9, etc.). (3) In the New Testament especially, 'the earth' appears in our translation as applied to the land of Judæa. As in many of these passages it might seem as if the habitable globe were intended, the use of so ambiguous a term as 'the earth' should have been avoided, and the original rendered by 'the land,' as in Lev. xxv:23; Is. x:23, and elsewhere. This is the sense which the original bears in Matt. xxiii:35; xxvii:45; Mark xv:33; Luke iv:25; xxi:23; Rom. ix:28; James v:17. For the cosmological uses of the term, see

GEOGRAPHY.

EARTHENWARE (ērth'n-wâr). See POTTER.

EARTHQUAKE (ērth-kwāk), (Heb. רָעַץ, *rah'-ash*, vibration; Gr. σεισμός, *seis-mos'*).

The quaking of the earth; a vibratory or undulatory movement extending superficially over a wide area, and downward, it is believed, from a mile or two to more than thirty miles. The vibrations are, perhaps, produced by contractions of portions of the earth's crust. Earthquakes and volcanoes are connected, and are confined to particular regions constituting continuous lines.

1. Proximate Causes. (1) The proximate cause of earthquakes, though by no means accurately defined, seems referable to the action of internal heat or fire. That the earth was once subject to the action of a vast internal power springing probably from the development of subterranean or central heat, the elevations and depressions, and the generally scarred and torn character of its exterior make sufficiently evident. A power similar in kind, but more restricted in degree, is still at work in the bowels of the earth, and occasionally breaks down all barriers and devastates certain parts of the world.

(2) But although subterranean disturbances may be the true cause of all great earthquakes and eruptions, there can be little doubt that the occasion of those subterranean disturbances is often, if not always, to be sought outside the earth's crust. In times of great storm the mercury changes rapidly in height, and this corresponds to the rapid addition or removal of many thousands of millions of tons to and from the areas of rising and falling barometer. When we hear that the barometer has risen or sunk half an inch, we do not commonly attach much importance to the change, nor, in most parts of the earth, is such a change likely to produce any remarkable effects. Even in regions where the crust of the earth is notably unstable, a change of half an inch in the height of the mercurial column is not ordinarily of great importance. Yet it might under certain conditions make such a change in the conditions of equilibrium as to bring about an earthquake. Consider what it really means. When the barometer rises half an inch over an area of 10,000 square miles, less than a sixth of the area of Missouri, the pressure on that area is increased by 4,260,000,000 tons. If a wave of atmospheric pressure passed over the United States in such sort that over the eastern half of the states the barometer were first half an inch lower than in the western half, and then half an inch higher, the effect would be as though a mass of about seven hundred thousand millions of tons were shifted from the western to the eastern half of the United States.

(3) We need not be surprised to find, then, that earthquakes have very often been preceded by remarkable atmospheric phenomena. Usually great earthquakes have not followed tremendous storms, but a condition of portentous calm. The air has

been found oppressive for hours, perhaps days, before the earthquake occurred. Remembering afterward the sense of oppression which had preceded the subterranean disturbance, the ordinary observer has been apt to infer that the dull, heavy calm, the unrestful stillness, was nature's pause before the mighty throes in which her imprisoned energies found vent. But in reality the oppressive stillness has been simply the result of increased atmospheric pressure, and this increased pressure brings about the earthquake as its direct consequence.

(4) But while the action of atmospheric pressure in helping to excite subterranean activities must not be overlooked, the varying pressure exerted by seas and oceans is a more potent disturbing factor. Atmospheric pressure is distributed in such a way that though the weight of air on any given area is continually changing, there are no sharply defined lines, at any time, which separate regions of less pressure from regions of greater pressure. It is otherwise with the sea along a shore line. Here we have the sea acting with constantly varying intensity, as its level changes, on the seaward side of the shore line, while on the landward side there are no such variations of pressure. Let us consider what this means. Take a tolerably straight shore line 500 miles in length, and suppose that along this shore line a region of ocean 100 miles broad rises through a height of three feet under the combined action of sun and moon raising a tidal wave, and favoring strong winds urging the water shoreward. Then we have 50,000 square miles of sea-water, three feet deep, added as so much dead-weight to that part of the earth's crust which underlies the seas along that shore. Each square mile contains in round numbers 3,000,000 square yards, or 27,000,000 square feet. The additional weight corresponds, then (as the added layer is three feet deep), to 50,000 times 81,000,000 cubic feet of water, each weighing 64 1-3 pounds, or to 116,000,000,000 tons. It is clear that the addition of so enormous a weight as this to the submerged part of the earth's crust, outside the shore line, may well produce strains too great to be resisted. (Richard A. Proctor, LL.D.)

2. Regions of Most Frequent Earthquakes. (1) The manifestation of the awful phenomena which accompany earthquakes is generally restricted in its range. Accordingly geologists have laid down certain volcanic regions or bands within which this manifestation most frequently takes place. Over these regions various traces of volcanic agency are found, such as either gaseous vapors or hot springs; also bituminous substances, and in some instances there are volcanoes in eruption. Several sources of bitumen are found on the Tigris, in the Persian mountains, near the Kharoon, and at Bushire, as well as along the Euphrates. At Hit, especially, on the last-mentioned river, it exists on a very large scale, and, having been much used from the earliest times, seems inexhaustible. Abundant traces of it are also to be seen amid the ruins and over the entire vicinity of Hillah—the ancient Babylon. Syria and Palestine abound in volcanic appearances. Between the river Jordan and Damascus lies a volcanic tract. The entire country about the Dead Sea presents indubitable tokens of volcanic agency.

(2) Accordingly these places come within one of the more common volcanic regions. The chief of these are—(1) that which extends from the Caspian Sea to the Azores; (2) from the Aleutian Isles to the Moluccas; (3) that of the Andes; (4) the African; (5) the Icelandic. Syria and

Palestine are embraced within the first band; and these countries have not unfrequently been subject to earthquakes.

That earthquakes were among the extraordinary phenomena of Palestine in ancient times is shown in their being an element in the poetical imagery of the Hebrews, and a source of religious admonition and devout emotion (Ps. xviii:7; Hab. iii:6; Nah. i:5; Is. v:25).

3. Historical. (1) The earthquake at Mount Sinai on the giving of the Law: 'the whole mount quaked greatly' (Exod. xix:18).

(2) The earthquake accompanied by fissures and sinking of the ground, by which Korah and his companions were destroyed (Num. xvi:31); also (Jos. *Antiq.* iv, iii:3).

(3) The earthquake in the days of Saul (1 Sam. xiv:15).

(4) The earthquake in the reign of Ahab, when Elijah (1 Kings xix:11, 12) was directed to go forth and stand upon the mountain before Jehovah: 'and behold Jehovah passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks before Jehovah; but Jehovah was not in the wind; and after the wind an earthquake; but Jehovah was not in the earthquake; and after the earthquake a fire; but Jehovah was not in the fire; and after the fire a still small voice.'

(5) A terrible earthquake took place 'in the days of Uzziah, king of Judah' (B.C. from 790 to 740), which Josephus (*Antiq.* ix:10, 4) says, 'shook the ground, and a rent was made in the Temple, so that the rays of the sun shone through it, which, falling upon the king's face, struck him with the leprosy,' being a punishment which the historian ascribes to the wrath of God consequent on Uzziah's usurpation of the priest's office. That this earthquake was of an awful character may be learnt from the fact that Zechariah (xiv:5) thus speaks respecting it—'Ye shall flee as ye fled from before the earthquake in the days of Uzziah, king of Judah;' and also that it appears from Amos (i:1) that the event was so striking, and left such deep impressions on men's minds, that it became a sort of epoch from which to date and reckon; the prophet's words are, 'two years before the earthquake.'

(6) In the reign of Herod (B. C. 31, Sept. 2) an earthquake occurred in Judæa, 'such as had not happened at any other time,' destructive to men and animals (Jos. *Ant.* xv. v. 2).

(7) The earthquake which occurred at the crucifixion of the Saviour of mankind (Matt. xxvii:50-1; Luke xxiii:44, 45; Mark xv:33), A. D. 29. This darkness has been misunderstood, and then turned to the prejudice of Christianity. (See DARKNESS.) The obscuration was obviously an attendant on the earthquake. Earthquakes are frequently attended by accompaniments which obscure the light of day during (as in this case from the sixth to the ninth hour, that is, from 12 o'clock at noon to 3 o'clock P. M.) several hours. If this is the fact, then the record is consistent with natural phenomena, and the darkness which skeptics have pleaded against speaks actually in favor of the credibility of the Gospel. Now it is well known to naturalists that such obscurations are by no means uncommon. It may be enough to give the following instances: A very remarkable volcanic eruption took place on the 19th of January, 1835, in the volcano of Cosegüina, situated in the Bay of Fonseca (usually called the Coast of Conchagua), in Central America. The eruption was preceded by a rumbling noise, accompanied by a column of smoke which

issued from the mountain, increasing until it assumed the form and appearance of a large dense cloud, which, when viewed at the distance of thirty miles, appeared like an immense plume of feathers, rising with considerable velocity, and expanding in every direction.

(8) The earthquake at the resurrection of Christ (Matt. xxviii:2). The word here rendered earthquake does not of necessity mean that the convulsion extended to the earth, but only that there had been such a concussion as to remove the stone. (Albert Barnes, *Com.*) The Greek word *seismos* relates to a concussion of the air as well as of the earth. But there was a miraculous shaking of the ground in the particular place where the tomb was situated.

(9) Earthquake at Philippi. This has often been considered a miraculous manifestation of Divine power, called forth for the release from prison of St. Paul and Silas (Acts xvi:26 ff.), A. D. 51.

4. Prophetic. Earthquakes being amongst the most terrible and impressive of natural phenomena, are made use of in the Bible for prophetic imagery connected with future calamitous events; thus: (1) 'She (Ariel or Mount Zion) shall be visited of the Lord of hosts with thunder and with earthquake' (Is. xxix:6, R. V.). (2) 'And there shall be famines and earthquakes in divers places' (Matt. xxiv:7). (3) 'And I saw when he opened the sixth seal, and there was a great earthquake' (Rev. vi:12). (4) 'And he (the angel) taketh the censer, and he filled it with the fire of the altar, and cast it upon the earth; and there followed thunders, and voices, and lightnings, and an earthquake' (Rev. viii:5). (5) 'And there were killed in the earthquake seven thousand persons' (Rev. xi:13). (6) 'And there was a great earthquake, such as was not since there were men upon the earth' (Rev. xvi:18). (E. Hull, *Hastings' Bib. Dict.*)

EAST (ēst). This word, which is used by English writers in only two senses, viz., to denote either the quarter of the heavens where the sun rises, or the regions in the eastern part of the world, has frequently *three* senses in the Authorized Version of the Bible.

(1) It is sometimes used to mean the *sun-rising* (Heb. מִזְרָח, *miz-ravakh'*, rising, Ps. ciii:12), 'as far as the east is from the west.'

(2) It very frequently corresponds to קֶדֶם, *keh-dem*, (*what is in front of, before*), the name given by the ancient Hebrews to a certain region, without any regard to its relation to the eastern part of the heavens, comprehending not only Arabia Deserta and the lands of Moab and Ammon, which really lay to the east of Palestine, but also Armenia, Assyria, Mesopotamia, Babylonia, and Chaldæa, which were situated rather to the north than the east of Judæa. Its geographical boundaries include Syria, the countries beyond the Tigris and Euphrates, the shores of the Indian ocean and of the Arabian gulf. The name given to this entire region by the Hebrews was the land of Kedem or East, and its miscellaneous population were called by them Sons of the East, or Orientals. It seems that the inhabitants of this region were distinguished for their proficiency in the arts and sciences and were addicted in the time of Isaiah to superstition (Is. xxvi').

(3) The wise men, who came from the East to Jerusalem at the birth of the Saviour, no doubt belonged to that region, 'saying, We have seen his star in the East.' Campbell remarks that 'to see either star or meteor in the east,' means,

in English, to see it in the East-quarter of the heavens, or looking eastward. But this cannot be the Evangelist's meaning. The meaning manifestly is, that when the magians themselves were in the East, they saw the star. So far were they from seeing the star in the East, according to the English acceptance of the phrase, that they must have seen it in the West, as they were by its guidance brought out of the East country westwards to Jerusalem.

EAST, CHILDREN OF THE (Heb. בְּנֵי־קֵדְמוֹן, *ben-ay' keh-dem*).

A general designation of the tribes occupying the east country, who inhabited the region bordering on Ammon and Moab (Ezek. xxv:4, 10), dwelt as far north as a district where people of Haran pastured their flocks (Gen. xxix:1, 4), and extended far southward into Arabia. (Davis, *Bib. Dict.*).

EAST COUNTRY (*ēst kūn'trŷ*), (Gen. xi:2; Job i:3; Ezek. xlvii:8; Matt. ii:1).

The Hebrews used the word *kedem*, or "east," to describe any country which was before or in front of another—that is, to the east of it; and it generally refers to the region around and beyond the rivers Tigris and Euphrates, including portions of Arabia, Mesopotamia, and Babylonia.

EASTER (*ēs'tēr*), (Gr. *πάσχα*, *pas'khah*, from Heb. פֶּסַח, *peh'sakh*, the Passover).

The occurrence of this word in the A. V. of Acts xii:4—"Intending after Easter to bring him forth to the people"—is chiefly noticeable as an example of the want of consistency in the translators. In the earlier English versions Easter had been frequently used as the translation of *pascha*, but Passover was substituted in all passages but this in the King James version. The anachronism of this version was inherited from older versions which avoided, as far as possible, expressions which could not be understood by the people.

This is illustrated by such words as "robbers of churches" (Acts xix:37), "town-clerk" (xix:35), "serjeants" (xvi:35), "deputy" (xiii:7, etc.). The translators acted on the principle of choosing, not the most correct, but the most familiar equivalents. (Comp. Trench, *On the Authorized Version of the New Testament* p. 21 [2d ed. p. 49]. In the R. V. it is properly rendered Passover.

(1) **Festival of.** It is an ecclesiastical festival commemorative of the resurrection of Christ. It originated in the circumstance that Christ was typified by the paschal lamb, ordained by Moses to be slain at the feast of the Passover; the feast being considered as a continuation, in its fulfillment, of the Jewish festival. The English name *Easter*, and the German *Ostern*, are derived from the name of the Teutonic goddess *Ostera* (Anglo-Saxon *Eostre*), whose festival was celebrated by the ancient Saxons with peculiar solemnities, in the month of April, and for which, as in many other instances, the first Roman Catholic missionaries substituted the paschal feast.

Easter was observed as a most joyous day—catechumens were dressed in white and solemnly baptized—the Lord's Supper was administered with great solemnity—alms were liberally distributed to the poor, etc. The day before Easter was called *Sabbatum magnum*, the great Sabbath—its observance was perpetuated long after the seventh-day Sabbath was discontinued; it was kept as a solemn fast, and by a nocturnal assembly called the Easter vigil. "By degrees the fast preparatory to Easter Sunday was lengthened, until, probably about the time of Constantine, it reached

forty days (Quadragesima, Lent). The rejoicings were also continued through the whole period of fifty days (Quinquagesima) from Easter to the day of Pentecost (Whitsunday)" (Bennett, *Christ. Archæol.*, p. 455). The day is now generally celebrated by the Christian Church of all faiths.

(2) **Controversies.** As early as the second century, there were keen disputes respecting the day on which this feast should be kept: the Eastern church persisting in observing it on the same day with the Jews; while the Western celebrated it on Sunday, as the day of Christ's resurrection. The dispute was finally settled at the Council of Nice, in 325, which ordained that it should be kept always and everywhere on one and the same day, and on the Sunday next after the full moon that came on or first after the vernal equinox (which falls on March 21st), provided that when that moon was full on a Sunday, Easter should be the Sunday after: thus it never could be coincident with the passover. According to this rule Easter may occur as early as March 22d, and as late as April 25th. As it is not in the Nicene canons, Dr. Waterland suggests that the council merely prohibited the custom of the Quartodecimans, and ordered the observance to be always on Sunday—the day to be fixed every year by the Alexandrians. However that may be, the foregoing rule has ever since governed the celebration of this festival, except in a few churches.

EAST SEA (*ēst sē*) or **EASTERN SEA** (Ezek. xlvii:18; Joel ii:20). See **DEAD SEA**, **THE**.

EAST WIND (*ēst wīnd*), (Heb. קָדְמוֹן, *kaw-deem'*, east). See **WINDS**.

EATING (1) The ancient Hebrews did not eat indifferently with all persons; they would have esteemed themselves polluted and dishonored by

Washing Before or After Eating.

eating with those of another religion, or of an odious profession. In Joseph's time they neither ate with the Egyptians nor the Egyptians with them (Gen. xliii:32); nor in our Saviour's time, with the Samaritans (John iv:9). The Jews were scandalized at his eating with publicans and sinners (Matt. ix:11).

The Hebrews anciently sat at table, but afterwards imitated the Persians and Chaldeans, who reclined on table-beds, or divans, while eating resting the body on the left elbow and using chiefly the right hand. This peculiar position makes the scene described in Luke vii:36-50 perfectly natural, and also shows how one of the guests could repose his head on another's bosom (John xiii:23). Women were never present at Jewish meals as guests.

(2) **Time of Principal Meal.** The Jews, in Old Testament times, appear to have taken their principal meal at night, after the heat of the day was over. This, to be sure, is largely conjecture, since we have no detailed information given us in the Bible. See Ruth iii:7; Exod. xvi:12; xviii:12, 13. The institution of the paschal feast in the evening likewise helps to confirm the opinion

of God, and to be influenced thereby to activity in his worship and service (Ps. xxii:29). (4) To *eat a roll, book, or word* is thoroughly to consider, understand, and be affected by it (Ezek. iii:1; Rev. x:9; Jer. xv:16). (5) To be *caten up* or *consumed* with zeal is to have our thoughts and cares wholly taken up with a desire for and devoted to the welfare of the church, and the honor and

Reclining at a Feast.

(Exod. xii:6, 18). They made their other meal in the morning. In New Testament times they did not ordinarily breakfast until 9 o'clock (Acts ii:15), and on the Sabbath, as Josephus says, not before noon, because not till then was the service of the synagogue completed. In the evening the more substantial meal took place. In general, the Jews led the simple, abstemious life of the modern Oriental, eating the fruits of the earth in the morning, and meat only once a day, if at all. But besides this occasional reference to the ordinary life of the Jews, the Bible contains notices of numerous feasts in honor of all the events which broke the monotony of their existence. Leaving out of account the religious festivals and the formal banquets at the ratification of treaties and on other public occasions, we read of feasts given at marriages (Gen. xxix:22; Judg. xiv:10), etc., on birthdays (Gen. xl:20; Job i:4), etc., burials (2 Sam. iii:35; Jer. xvi:7), sheep-shearing (1 Sam. xxv:2, 36; xiii:23). (See FEASTS; FOOD.)

(3) **Tables.** The tables which the Jews are represented as purifying by washing (Mark vii:4), are these kinds of beds (*κλινῶν*), they cleansed them as if they had been polluted by the recumbence of strangers; unless it were customary, as in point of neatness it ought to be, to wash the tables after every meal, and before they received guests again. (See ABLUTION.)

Figurative. (1) To *eat people* or *eat their flesh*, is cruelly to oppress and destroy them; and to bereave them of all that they enjoy (Ps. xiv:4, Mic. iii:3; Rev. xvii:16, and xix:18). (2) To *eat the flesh* and *drink the blood* of Christ is with pleasure, appropriation, and desire, to know, believe on, and receive him in his person, incarnation, righteousness, and benefits, for the spiritual nourishment and life of our souls (John vi:53). (3) To *eat and worship* is to receive the fulness

service of God (Ps. lxxix:9 and cxix:139). (6) To *eat on the left hand, and eat the flesh of one's own arm*, is to be reduced to terrible straits of famine, and to destroy what might be useful for their own protection and relief (Is. ix:20). The Jewish priests *did eat up the sin of God's people*: For the sake of their share of the sin-offerings, they gladly received information of scandals, and with pleasure feasted on, and pampered themselves with the sacrifices offered for them (Hos. iv:8). (7) To *eat on the mountains* is to partake of the idolatrous sacrifices offered in high places (Ezek. xviii:15). (8) To *eat dung and drink one's own water*,

Modern Oriental Dinner Party.

is to suffer the utmost extremities of famine and misery in the siege of a city, etc. (Is. xxxvi:12). (9) To *eat before the Lord* was to attend the

solemn feasts in his courts (Deut. xii:7). (10) To *eat with one* is to be familiar with him (1 Cor. v:11). (11) The lion is called the *cater* because he kills and feeds on a multitude of animals, and is himself preyed on by none (Judg. xiv:14).

EBAL (ē'bal), (Heb. עֲבָל, *ay-barwl'*, to be bare, stone).

1. One of the sons of Shobal, the son of Seir (Gen. xxxvi:23; 1 Chron. i:40).

2. Son of Joktan (1 Chron. i:22). Some MSS., the Syriac and Arabic versions, read Obal, as in Gen. x:28 (B. C. 1694).

EBAL and **GERIZIM**, **MOUNTS** (ē'bal and gēr'i-zīm), (Heb. עֲבָל וְגֵרִיזִים, *har-ay-barwl'*, mount of stone, and גֵּרֵי צִעִים, *gher-ee-zcem'*, desert dwellers). Ebal and Gerizim, two mountains of Samaria, form the opposite sides of the valley which contained the ancient town of Shechem, the present Nablus. From this connection it is best to notice them together.

(1) The valley which these mountains enclose is about 200 or 300 paces wide, by above three miles in length; and Mount Ebal rises on the right hand and Gerizim on the left hand of the valley (which extends west-north-west) as a person approaches Shechem from Jerusalem. It was on Mount Ebal that God commanded to be reared up an altar, and a pillar inscribed with the law; and the tribes were to be assembled, half on Ebal and half on Gerizim, to hear the fearful maledictions pronounced by the Levites upon all who should violate the obligations of the sacred code, and the blessings promised to those who should observe them.

(2) The tribes which responded with simultaneous 'Amen's' to the curses, were to be stationed on Mount Ebal, and those who answered to the blessings, on Mount Gerizim. This grand ceremony—perhaps the grandest in the history of nations—could not have found a more fitting scene; and it was duly performed by Joshua as soon as he gained possession of the Promised Land (Deut. xxvii:4, 13; Josh. viii:30-35).

(3) Mounts Gerizim and Ebal rise in steep, rocky precipices, immediately from the valley on each side, apparently some 800 feet in height.

The sides of both these mountains are equally naked and sterile, although some travelers have chosen to describe Gerizim as fertile, and confine the sterility to Ebal. The only exception in favor of the former is a small ravine coming down opposite to the west end of the town, which indeed is full of fountains and trees; in other respects both mountains are desolate, except that a few olive-trees are scattered upon them. The side of the northern mountain, Ebal, along the foot, is full of ancient excavated sepulchers. The southern mountain is now called by the inhabitants Jebel-et-Tûr, though the name Gerizim is known, at least, to the Samaritans.

Conder considers that upon the top of this mount may be the site of Joshua's altar.

EBED (ē'bed), (Heb. עֶבֶד, *eh'bed*, servant, but many MSS. have EBER).

1. Father of Gaal, who assisted the men of Shechem against Abimelech (Judg. ix:26, 28, 30, 31, 35), B. C. 1321.

2. Son of Jonathan, one of the sons of Adin, who returned from Babylon with Ezra (Ezra viii:6), B. C. 459.

EBED-MELECH (ē'bed-mē'lek), (Heb. עֶבֶד מֶלֶךְ, *eh'bed-meh'lek*, servant of a king), a eunuch or servant of king Zedekiah, who, being informed that

Jeremiah was imprisoned in a place full of mire informed the king of it, and was the means of his restoration to safety, though not to liberty. For this humanity he was promised divine protection, and after the city was taken by Nebuzaradan he was preserved (Jer. xxxviii:7; xxxix:16 ff). His name seems to be an official title—*King's slave*, i. e., *minister* (B. C. 589). (See JEREMIAH.)

EBEN-BOHAN (ē'ben-bō'han). See BOHAN.

EBEN-EZEL (ēb'en-ē'zel), (Heb. אֶבֶן עֶזֶל, *eh'-ben-ha-e'zel*, stone of departure), an old stone of testimonial, mentioned in 1 Sam. xx:19. The circumstance which it commemorated is not known.

EBEN-EZER (ēb'en-ē'zer), (Heb. אֶבֶן עֶזֶר, *eh'-ben-harw-ay'zer*, stone of help), the name given to a stone which Samuel set up between Mizpeh and Shen, in witness of the divine assistance obtained against the Philistines (1 Sam. vii:12).

Neither of these points has been identified with any certainty—the latter not at all.

EBER (ē'ber), (Heb. עֵבֶר, *ay'ber*, beyond).

1. Son of Salah, and great grand-son of Shem (Gen. x:21, 24; 1 Chron. i:19). Sometimes confused with HEBER. (B. C. 2448-1984.)

2. Son of Elpaal, a Benjamite. One of the founders of Ono and Lod (1 Chron. viii:12).

3. A priest representing the family of Amok, in the days of Joiakim, son of Jeshua (Neh. xii:20), B. C. 535.

4. A Gadite, head of a father's house in Gilead in Bashan (1 Chron. v:13), B. C. 782.

5. A Benjamite, son of Shashak (1 Chron. viii:22, 25), B. C. 535.

EBIASAPH (e-bī'a-sāf), (Heb. עֲבִיאָסָפִי, *eb-yaw-sawf* gatherer), a Kohathite Levite of the family of Korah, forefather of Samuel the prophet and Heman the singer (1 Chron. vi:23, 37).

He is thought by some to be the man mentioned in ix:19. His identity with Abiasaph is, however, very uncertain. The probability is that they were different persons.

EBODA (e-bō'da), (Num. xxi:10; xxxiii:43, 44), one of the stations of the Israelites in the wilderness. (See WANDERING, THE).

Ebony.

EBONY (ēb'ūn-ŷ), (Ezek. xxvii:15).

A black, heavy, and very hard wood, which was brought to ancient Tyre from India. It is suscepti-

ble of a fine polish, and is used for musical instruments and ornamental work. Ebony is the heart-wood of a tree (*Diospyros ebenus*) of the same genus with the persimmon of our warmer states, and, like that tree, bears an edible fruit. Virgil in his *Georgics* mentions the black ebony of India.

EBRON (ē'bron), in A. V. Hebron.

A city on the boundary line of Asher (Josh. xix:28). Perhaps identical with Abdon.

EBRONAH (ē-brō'nah), (Heb. עֲבְרוֹנָה, *eb-ro-naw'*, passage).

One of the halting places of the Israelites next preceding Ezion-geber (Num. xxxiii:34, 35). From the derivation of the word the name may refer to the ford across the head of the Elanitic Gulf. The name is properly Abronah.

ECBATANA (ek-bāt'a-nā). See ACHMETHA.

ECCLESIASTES (ek-klē'zī-ās'tēz), (Heb. קוֹהֵלֶת, *ko-heh'leth*, preacher.)

(1) **The Hebrew Name.** This book has obtained its Hebrew name from the designation of the principal person mentioned in it, who is thus self-styled in several passages. The feminine termination of the name has given rise to the opinion that Koheleth means a body or academy of sages, whose dicta are contained in this book; but this opinion is contradicted by the reading of the book itself, which thus commences: *Words of Koheleth, the son of David, the king in Jerusalem.* Hence it appears that Koheleth is intended for an epithet of Solomon. Compare also chapter i:12, 'I, Koheleth, was king over Israel in Jerusalem.' With one exception, in chapter vii:27, the word Koheleth is always construed as a masculine noun.

The various interpreters who consider Koheleth as expressive of a person, differ in their translation of it in different manners. Some follow the Septuagint in which this word is translated *Ekklesiastace, assembler*. Others interpret it by collector, which implies, they state, that the author not merely intended to communicate his own wisdom, but that he had compiled the experience of former sages. The verb *Kohel*, however, does not mean to *compile*, but always to *assemble* or to *convene a meeting*. It hence appears that the Septuagint translation, *assembler, preacher, or teacher*, is correct. Still there remains to be explained the feminine form of the word. The only correct explanation of this is, that Solomon was called Kohcleth because he was personified Wisdom, and that Wisdom spoke through him.

According to this interpretation, the construction of *Koheleth*, both with the masculine and with the feminine, may be equally well explained. If with the masculine, the bearer of the name is considered; but if with the feminine, the *wisdom*, which animates him, is to be considered in view.

(2) **The Author.** The circumstance that Solomon is introduced as the speaker in this book has induced most of the ancient interpreters to consider him as its author.

But the greatest obstacle in the way of considering Solomon to be the author, is the character of the language. Many opponents of the Solomonic authorship certainly went much too far in their assertions. The Grecisms which Zirkle thought that he had found have now generally been given up. The Rabbinisms likewise could not stand the proof. The words, significations, and forms which seem to appertain to a later period of Hebrew literature, and the Chaldaisms, an abundance of which Knobel gathered, require, as Herzfeld has shown, to be much sifted. Never-

theless, it is certain that the book does not belong to the productions of the first, but rather to the second period of the Hebrew language. This alone would not quite disprove the authorship of Solomon, if we could produce any weighty argument in its favor.

Among the other arguments which have been produced against Solomon's authorship, the only one which seems to have some importance, is that the author now and then forgets his fiction; for instance, in chapter i:12, where he says 'I was king over Israel in Jerusalem.'

Supposing it now proved that Solomon is only introduced as the speaker, the question arises why the author adopted this form. The usual reply is, that Solomon among the Israelites had, as it were, the prerogative of wisdom; and hence the author was induced to put into Solomon's mouth that wisdom which he intended to proclaim, without the slightest intention of forging a supposititious volume. This reply contains some truth; but it does not exhaust the matter.

The chief object of the author was to communicate wisdom in general; but next to this, as appears from chapter i:12, *sq.*, he intended to inculcate the vanity of human pursuits. Now, from the mouth of no one could more aptly proceed the proclamation of the nothingness of all earthly things than from the mouth of Solomon, who had possessed them in all their fullness; at whose command were wisdom, riches, and pleasures in abundance; and who had therefore full opportunity to experience the nothingness of all that is earthly.

(3) **The Date.** The history of the canon fixes the time after which the book cannot have been written. It cannot have been written after the times of Ezra and Nehemiah, under whom the canon was completed.

The style alone furnishes the date *before* which the book cannot have been written; that is, not before the time of Aramæan influence. But within these boundaries we are unable to produce any valid reasons for fixing the date more precisely. From internal evidence it appears that Koheleth was not written during the latter period of the first, but rather during the time of the second temple, since idolatry does not occur amongst the deviations combated by the author. The whole book seems to presuppose that the people were externally devoted to the Lord. The admonitions of the author to a serene enjoyment of life, and against murmuring; exhortations to be contented with Divine Providence, and the attacks upon a selfish righteousness of works, may best be explained by supposing the author to have lived in a period like that of Malachi, in which there prevailed a Pharisaical righteousness of works, and melancholy murmurings because God would not recognize the alleged *rights* which they produced before him, and refused to acknowledge the *claims* they made upon him.

(4) **The Plan.** The author places the fundamental idea of the nothingness of all earthly things both at the beginning and at the end of his book, and during its course repeatedly returns to the same. This has induced many interpreters to suppose that the purpose of the author was to demonstrate this one idea; an opinion which, down to the most recent times, has been unfavorable to the true interpretation of the book, because everything, however reluctant, has been forced into an imaginary connection. The following is the correct view. The object of the author is not to teach an especial tendency of wisdom, but wisdom in general. Consequently, it is not at

all surprising if the connection suddenly ceases, and a new subject commences.

That the idea of the nothingness of earthly matters should strongly predominate may easily be explained, since according to our author it forms a very important part of wisdom. He never, however, intended to confine himself to this one idea, although he likes frequently to point it out in passing, even when he is considering a matter from another point of view. The plan of this book has been the subject of much investigation. It is best to consider this plan as free as possible, and to employ its separate parts for its support. The commencement and the conclusion show the unity of the whole. The greater part consists of isolated observations concerning the course of the world, and the experience of his life. These are connected with general sentences; and, finally, a very simple conclusion is deduced from the whole. It seems to me that a more artificial texture ought not to be sought for.

Several interpreters have supposed that Koheleth consists of a dialogue between a considerate sage and a discontented skeptic. Others have thought that not two persons, but two voices, or two moods of the same person, are to be distinguished, whose conflict is at the conclusion terminated in the victory of the better part by faith. This opinion however, originated from an imperfect understanding, which seemed to discover everywhere irreconcilable contradictions. Whoever penetrates deeper will perceive that the author remains unchanged from the beginning to the end.

(5) **Contents and Objects.** Here we consider only the fundamental idea, omitting isolated sentences of wisdom, and rules for the conduct of life. Nobody can entertain any doubt concerning this fundamental idea. It is contained in the sentence: 'Vanity of vanities; all is vanity.' It is, however, very important that this should be rightly understood. The question is, What is that *all* which is vanity? The author does not mean all in general, but only *all* of a certain genus. He himself explains this by defining this *all* in numerous passages; as, 'all that is under the sun;' that is, earthly things in their separation from the heavenly. To this leads also the enumeration of the *all* in which occur only those things which belong to the earth—riches, sensual pleasure, honor, sphere of activity, human wisdom apart from God, self-righteousness. From many passages it appears that the author was far from comprehending the fear of God and active obedience to his laws among that *all* which was vanity. This appears most strikingly from the conclusion, which, as such, is of the highest importance, and furnishes the undoubted measure for the correctness of the whole interpretation. 'Let us hear the conclusion of the whole matter: Fear God, and keep his commandments; for this is the whole duty of man' (*i. e.*, in this consists all that is incumbent upon him; and his whole salvation depends upon it). For God shall bring every work into judgment, with every secret thing, 'whether good, or whether evil.' (Compare chapter xii:1: 'Remember now thy Creator in the days of thy youth;' ch. v:5-7, 'For thou God;' ch. vii:18, and many other passages). A deep religious sense pervades the whole book. In reference to the prevailing idea, Ewald strikingly remarks, 'There blows throughout this book a piercing chill against every earthly aim, and every vain endeavor; a contempt which changes into a bitter sneer against everything which in the usual proceedings of men is one-sided and perverse; an indefatigable penetration in the discovery of all human vanities and

fooleries. In no earlier writing has all cause of pride and vain imagination so decidedly and so comprehensively been taken from man; and no book is pervaded by such an outcry of noble indignation against all that is vain in this world.'

From the contents of the book results its object. The author had received the mission to treat professedly and in a concentrated manner the highly important sentence. '*Vanitas vanitatum, omniaque vanitas,*' which pervades the whole of Holy Writ; but he is not content with the mere theoretical demonstration, so as to leave to another teacher its practical application, but places before us these practical results themselves: What is incumbent upon man, since everything else is naught? What real good remains for us, after the appearance in every seeming good has been destroyed? The answer is, Man shall not gain by cunning and grasping; shall not consume himself in vain meditations, nor in a hurried activity; he shall not murmur about the loss of that which is naught; he shall not by means of a self-made righteousness constrain God to grant him salvation; but he shall instead fear God (ch. xii:13; verses 6, 7), and be mindful of his Creator (ch. xii:1); he shall do good as much as he is able (ch. iii:12); and in other passages. And all this, as it is constantly inculcated by the author, with a contented and grateful heart, freed from care and avarice; living for the present moment, joyfully taking from the hand of the Lord what he offers in a friendly manner. Man shall not be of a sorrowful countenance, but in quiet serenity enjoy the gifts of God. What would avail him all his cares and all his avarice? By them he cannot turn anything aside from him, or obtain anything, since everything happens as it shall happen. St. Jerome, in his commentary on chapter xii, verse 13, relates that, according to the statement of the Hebrews, they were disinclined to receive it into the canon; but that the conclusion of the volume had saved its divine authority. Similar doubts occur in the Talmud and other Jewish writings. These doubts were not, however, allowed to prevail, but were suppressed in deference to the conclusion of Koheleth.

(6) **Misunderstandings.** Within the Christian Church the Divine inspiration of Koheleth, the Proverbs, and the Song of Solomon was denied by Theodorus of Mopsuestia. In recent times, the accusers of Koheleth have been Augusti, De Wette, and Knobel; but their accusations are based on mere misunderstandings. They are especially as follows:—(1) The author is said to incline towards a moral epicurism. All his ethical admonitions and doctrines tend to promote the comforts and enjoyments of life. But let us consider above all what tendency and disposition it is to which the author addresses his admonition, serenely and contentedly to enjoy God's gifts.

(a) He addresses this admonition to that speculation which will not rest before it has penetrated the whole depth of the inscrutable councils of God; to that murmuring which bewails the badness of times and quarrels with God about the sufferings of our terrene existence; to that gloomy piety which wearies itself in imaginary good works and external strictness, with a view to wrest salvation from God; to that avarice which gathers, not knowing for whom; making the means of existence our highest aim; building upon an uncertain futurity which is in the hand of God alone.

(b) When the author addresses levity he speaks quite otherwise. For instance, in chapter vii:2, 4. 'It is better to go to the house of mourning than to

the house of feasting; for that is the end of all men; and the living will lay it to his heart. Sorrow is better than laughter; for by the sadness of the countenance the heart is made better. The heart of the wise man is in the house of mourning; but the heart of fools is in the heart of mirth.' The nature of the joy recommended by the author is also misunderstood. Unrestrained merriment and giddy sensuality belong to those vanities which our author enumerates. He says to laughter, thou art mad, and to joy, what art thou doing? He says, chapter vii:5, 6, 'It is better to hear the rebuke of the wise than for a man to hear the song of fools. For as the crackling of thorns under a pot, so is the laughter of a fool; this also is vanity.' That joy which he recommends is joy in God. It is not the opposite, but the fruit of the fear of God. How inseparable these are is shown in passages like chapter v:6, vii:18; iii:12, 'I know that there is no good in them, but for a man to rejoice, and to do good in his life;' and in many similar passages, but especially chapter xi:9, 10, and xii:1, 'Remember now thy Creator in the days of thy youth,' etc.

(c) In reference to these passages Ewald says, 'Finally, in order to remove every doubt, and to speak with perfect clearness, he directs us to the eternal judgment of God, concerning all the doings of man, and inculcates that man, in the midst of momentary enjoyment, should never forget the whole futurity, the account and the consequences of his doings, the Creator and the Judge.' Ewald adds, in reference to the conclusion, 'In order to obviate every possible misunderstanding of this writing, there is, verse 13, once more briefly indicated that its tendency is not, by the condemnation of murmuring to recommend an unbridled life; but rather to teach, in harmony with the best old books, the fear of God, in which the whole man consists; or that true singleness of life, satisfying the whole man, and which comprehends everything else that is truly human. It is very necessary to limit the principle of joy which this book recommends again and again in various ways and in the most impressive manner; and to refer this joy to a still higher truth, since it is so liable to be misunderstood.' (2) It is objected that in his views concerning the government of the world the author was strongly inclined to fatalism, according to which everything in this world progresses with an eternally unchangeable step; (3) and that he by this fatalism was misled into a moral skepticism, having attained on his dogmatical basis the conviction of the inability of man, notwithstanding all his efforts, to reach his aim. However, this so-called fatalism of our author is nothing else but what our Lord teaches Matt. vi:25: 'Take no thought,' etc. And as for the moral skepticism, our author certainly inculcates that man with all his endeavors can do nothing; but at the same time he recommends the fear of God, as the never-failing means of salvation. Man in himself can do nothing; but in God he can do all. It is quite clear from chapter vii:16, 18, where both self-righteousness and wisdom, when separated from God, are described as equally destructive, and opposite to them is placed the fear of God, as being their common antithesis, that our author, by pointing to the sovereignty of God, did not mean to undermine morality: 'He that feareth God comes out from them all.' If our author were given to moral skepticism, it would be impossible for him to teach retribution, which he inculcates in numerous passages, and which are not contradicted by others, in which he says that the retribution in individual

circumstances is frequently obscure and enigmatical. Where is that advocate for retribution who is not compelled to confess this as well as our author? (4) This book has given offense also, by chapter iii:21, and similar passages, concerning immortality. But the assertion that there is expressed here some doubt concerning the immortality of the soul is based on a wrong grammatical perception. The ׀ cannot, according to its punctuation, be the interrogative, but must be the article; and our author elsewhere asserts positively his belief in the doctrine of immortality (ch. xii:7). How it happens that he did not give to this doctrine a prevailing influence upon his mode of treating his subject has lately been investigated by Heyder, in his essay entitled *Ecclesiastæ de Immortalitate Animi Sententiæ*, Erlangen, 1838. (See *Skeptics of the Old Testament*, Prof. E. J. Dillon.) E. W. H.

ECCLESIASTICUS (ĕk-klē'zī-ās'tī-kūs). See WISDOM OF SIRACH.

ECDIPPA (ek-dīp'pa). See ACHZIB.

ECLIPSE (ĕ-klīps'). The Hebrews do not seem to have philosophized much on eclipses, which they considered as visible marks of God's anger (see Joel ii:10, 31; iii:15; Job ix:7). Ezekiel (xxxii:7), and Job (xxxvi:32), speak more particularly, that God covers the sun with clouds when he deprives the earth of its light by eclipses.

The date of Amos coincides with a total eclipse, which occurred Feb. 9, B. C. 784; and was visible at Jerusalem shortly after noon (Hitzig, *Comm. in Proph.*); that of Micah with the eclipse of June 5, B. C. 716, referred to by Dionys. *Hal.* ii:56, to which same period the latter part of the book of Zechariah may be probably assigned. A passing notice in Jer. xv:9 coincides in date with the eclipse of Sept. 30, B. C. 610, so well known from Herodotus' account (i:74, 103). The darkness that overspread the world at the crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the Passover. (See DARKNESS.)

ED (ĕd), (Heb. עֵד, *ayd*, a witness), a word inserted in the A. V. of Josh. xxii:34, apparently on the authority of a few manuscripts, and also of the Syriac and Arabic versions, but not existing in the generally received Hebrew text.

It was the name given to the altar erected by the two tribes and a half, who were settled beyond Jordan (Josh. xxii:34). It was probably a copy or repetition of that which was used among the Hebrews, their brethren, and it was built to witness to posterity the interest of these tribes in the altar common to the descendants of the patriarch Israel.

Perhaps a better translation would be: "It (the altar) is a witness between us that Jehovah is God." The entire sentence formed its name and was written on the altar, not merely "witness." In this case "Ed" would not be a proper name.

EDAR (ē'dar), (Heb. עֵדָר, *ay'der*, a flock), a place mentioned in Gen. xxxv:21, beyond which was Jacob's first halting place between Bethlehem and Hebron.

As Bethlehem was a pastoral country and, even at this time, abounds in watchtowers from which the shepherds overlook their flocks, Edar may have been a well known tower of that kind.

EDEN (ē'd'n), (Heb. עֵדֵן, *ay'den*). The real origin of the name probably is found in the Assyrian *idinū* (from Accadian *edin*), "plain." But Eden has generally been supposed to mean *delights, pleasantness* (LXX τρυφή; Vulg. *voluptas*).

1. The home of Adam and Eve before their fall (Gen. ii:15). Its site has not been fixed. Two of its rivers are identified, the Euphrates, and the Hiddekel or Tigris; the others are disputed. Some say Gihon was the Nile and Pison the Indus. The best authorities agree that the "garden of Eden eastward" was in the highlands of Armenia, or in the valley of the Euphrates, but its precise location cannot be determined. The Bible, after the history of the fall of our first parents, withdraws paradise lost from our view, and directs our hope to the more glorious paradise of the future, with its river of life and tree of life (Rev. xxii:2). (See PARADISE.)

2. One of the places which furnished Tyre with richly embroidered stuffs. It is mentioned with Haran, Sheba, and Asshur; also with Beth-Eden (Amos i:5). The sons of Eden are mentioned with Gozan, Haran, and Rezep, as subjects of Assyrian conquest (2 Kings xix:12; Is. xxxvii:12). Telassar seems to have been the chief place of the tribe. Eden was probably situated in the northwest of Mesopotamia, but positive evidence is wanting.

3. Beth-Eden (Heb. בַּיִת עֵדֵן, *bayth ay'den*, house of pleasure, house of Eden), was probably the name of a house of pleasure of the kings of Damascus (Amos i:5).

4. A Levite, son of Joah, who was one of the two who represented his family in the purification of the Temple in the days of Hezekiah (2 Chron. xxix:12), B. C. 726.

5. A Levite, probably identical with Eden, who had charge of the freewill offering of God, under Kore, son of Imnah (2 Chron. xxxi:15).

EDER (ē'dēr), (Heb. עֵדֵר, *ay'der*, a flock).

1. One of the towns in the south of Judah on the borders of Edom. Its identity with the modern Arad has been suggested (Josh. xv:21).

2. A Levite, of the family of Merari, in the time of David (1 Chron. xxiii:23; xxiv:30), B. C. 1013.

EDIFICATION (ēd'ī-fī-kā'shūn), (Gr. οἰκοδομῆ, *oy-kod-om-ay'*, building), means building up. A building is therefore called an edifice.

(1) Applied to spiritual things, it signifies the advancing, improving, adorning, and comforting the mind. A Christian may be said to be edified when he is encouraged and animated to fresh progress in the ways and works of the Lord. The means to promote our own edification are prayer, self-examination, reading the scriptures, hearing the gospel, meditation, attendance on all appointed ordinances. To edify others, there should be love, spiritual conversation, forbearance, faithfulness, benevolent exertions, and uniformity of conduct.

(2) To perceive the full force and propriety of the terms as used by the apostles, it is quite necessary to keep in mind the similitudes by which they generally describe a Christian church; for, an attentive reader of the New Testament may readily observe that it is mostly with a direct reference to that particular object that these expressive terms occur. Thus for instance, we sometimes find them speaking of a church under the figure of a building (Eph. ii:21; 1 Cor. iii:9). At others, a house, (Heb. iii:6; 1 Tim. iii:15). And frequently a temple (1 Cor. iii:16, 17). A habitation for God (Eph. ii:22). Of this building, Jesus Christ is the foundation or chief corner-stone, laid by the doctrine of the apostles and prophets,—he is that living stone, elect, and precious, on which Zion is founded,—and believers in him united together in a church capacity, are consequently spoken of, as

"lively stones, built up into a spiritual house" (1 Pet. ii:5), thus constituting what Paul calls "the household of God" (Eph. ii:19), or "the household of faith" (Gal. vi:10).

EDIFY (ēd'ī-fī), (Gr. οἰκοδομέω, *oy-kod-om-eh'o*, Acts ix:31), to construct or be a house-builder. Used by old writers literally in this sense, but now in a spiritual or metaphorical sense. The Greek word is translated literally in Acts xx:32; see also Col. ii:7. (See EDIFICATION.)

EDOM (ē'dom), (Heb. עֲדוֹם, *ed-ome'*, red), called also Idumæa, and Mount Seir.

The country extended from the Dead Sea southward to the Gulf of Akabah, and from the valley of the Arabah eastward to the desert of Arabia, being about 125 miles long and 30 miles wide.

It is a mountain-range of porphyritic rock forming the backbone of the country; above this rises sand-stone, assuming fantastic forms, while on either side of these formations are lime-stone hills. On the west, along the valley of the Arabah, the hills are low; on the east the mountains attain their highest. (See ESAU; IDUMÆA.)

EDOMITES (ē'dom-ites), (Heb. עֲדוֹמִי, *ed-o-mee'*), the descendants of Esau, who settled in the south of Palestine, and at a later period came into conflict with the Israelites (Deut. xxiii:7; Num. xx:14, *sq.*); frequently called merely *Eaom* (Num. xxiv:18; Josh. xv:1; 2 Sam. viii:14, etc.). (See ESAU; IDUMÆA.)

EDREI (ēd're-i), (Heb. עֲדְרֵי, *ed-reh'ee*, mighty).

1. One of the metropolitan towns of the kingdom of Bashan, beyond the Jordan. It was here that Og, the gigantic king of Bashan, was defeated by the Israelites, and lost his kingdom (Num. xxi:33-35; Deut. i:4; iii:1-3). Edrei afterwards belonged to eastern Manasseh (Josh. xiii:31). The ruins of this city, still bearing the name Edr'a stand on a rocky promontory projecting from the southwest corner of Lejah. Others identify this place with the modern Der'at or Der'a, following Eusebius who mentions it in the Onomasticon as 24-25 Roman miles from Ashtaroth and about 27 miles east of Gadara. It was the seat of a bishop in the early ages of Christianity, and a bishop of Adraa sat in the council of Seleucia (A. D. 381), and of Chalcedon A. D. 451). Adraa was the name given to the place by the Greeks: by the Crusaders it was known as Adratum, and also as Civitas Bernardi de Stampis. Abulfeda calls it Adsraat. The ruins cover an extent of about two miles in circumference, the principal being an immense rectangular building, with a double covered colonnade all around, and a cistern in the middle. This seems to have been originally a Christian church, and afterwards a mosque. Near the town, in the hollow of the mountains, is a large reservoir cased with stone, near which are the ruins of a large building, with a cupola of light materials.

"In one of the Tel el-Amarna letters (B. M. 43. 10) it is called Astartu, and the writer of the despatch accuses a certain Biridasyi of taking the chariots out of it and giving them to the Bedouin. The neighboring city of Buzruna (Bostra) was at the time under a king of its own. W. Max Müller identifies the city of Autarâ in the Karnak List of Thothmes III (No. 91) with Edrei. Philologically the names would correspond, but the identification is impossible, as Autarâ is enumerated among the towns of southern Palestine. Astartu or Ashtaroth is in an earlier part of the list (No. 28)." (A. H. Sayce, *Hastings' Bib. Dict.*)

2. A town of Naphtali (Josh. xix:37), situated

near Kedesh. There are some ruins two miles south of Kedesh, called Tell Khuraibeh, or "Tell of the ruin," which may be the ancient Edrei, but the site is not fully known. Porter identifies it with *Tell Khuraibeh*, near Kedesh; Conder, with *Yater*.

EDUCATION (ěd-ū-kā'shūn).

(1) Of secular education, in our sense of the word, the Jews knew little, but they enjoined the duty and enjoyed the privilege of religious and moral training at home and in public worship far more than any nation of antiquity. They learned from their parents and their public teachers, the Levites, and later the Rabbins, to read and write and commit the Law. During the Captivity they were brought into contact with the extensive learning of the Chaldæans. Moses derived his knowledge from Egyptian priests, and Solomon was both a scholar and a wise man, to whose open mind the gathered treasures of instruction and the books of nature and human life brought lessons of priceless wisdom.

(2) The people at large must have been ignorant of things outside of religion, and their religious exclusiveness would tend to keep them so, but there were men among them acquainted with mensuration (Josh. xviii:8, 9), and with foreign languages (2 Kings xviii:26), and who were skilled in writing, like the chroniclers of the various kings, and in keeping accounts, like the scribes who are often mentioned. In the days of the monarchy the advantages of education were secured by many in the so-called "schools of the prophets." After the Captivity the Rabbins regularly gave instruction in the synagogues upon the Bible and the Talmud. In the entire history it holds good that boys remained up to their fifth year in the women's apartments and then their fathers began to instruct them in the Law. Later, the boys began at this age the Rabbinical books. The Captivity was in many respects an incalculable blessing to the Jews. It taught them that there was something worth learning outside of the Mosaic books. Hence, after their return, they were a greatly improved people. It was then that synagogues sprang up, furnishing practical instruction.

(3) After Jerusalem fell the Jews kept up these schools, and they exist even in this day. One valuable custom was the learning of a trade on the part of each one. Well known is the instance of Paul, who, although well trained, a pupil of Gamaliel, still could, and did, make tents. (Acts xviii:3; xxii:3.)

(4) Girls were generally without much more education than the rudiments, yet they could attend the schools and learn more than to do needlework, keep house, and care for the children. Women were far higher in the social scale among the Jews than at present among the Orientals.

(5) The sect of the Essenes, by preference celibates, took great pains to instruct children, but confined their attention chiefly to morality and the Law. The Rabbins taught the physical sciences. In these schools the teachers sat on raised seats; hence Paul could say literally that he was brought up at the feet of Gamaliel. (Luke ii:46; Acts xxii:3.) Unmarried men and women were forbidden to teach boys.

(6) The ancient Jews enjoyed more advantages in mental training than other contemporary nations. And if they knew little about matters of common information among us, they knew more than did the great mass of people living outside of Judæa. (Schaff, *Bib. Dict.*)

EDUTH (ē'duth), (Heb. עֲדוּת, *ay-dooth'*, precept), stands as a part of the inscription of certain poetical compositions, indicating that the contents were of a *revealed* or sacred character; the title of Ps. lx, lxxx.

EFFECT (ěf-fěkt), (Heb. דָּבָר, *daw-bawr'*, Ezek. xii:23). The term means "purport."

EFFECTUAL CALLING. See CALL.

EFFECTUAL PRAYER. In James v:16 the A. V. has "the *effectual fervent* (Gr. *ἐπερωμένη*) prayer of a righteous man availeth much." The R. V. renders it more accurately, "the supplication of a righteous man availeth much in its working." (See PRAYER.)

EGG (ěg), (Heb. בָּיִט, *bay-tsaw'*, from root meaning white). The passage in Deut. xxii:6 prohibits the taking of a sitting bird from its eggs or young. Eggs are mentioned as deserted (Is. x:14); of the cockatrice (lix:5). Egg is contrasted with a SCORPION (which see) as an article of food (Luke xi:12). Eggs were extensively used as FOOD (which see).

Figurative. "The white of an egg" is used (Job vi:6, "the juice of purslain," R. V. margin) as a symbol of something *insipid*.

EGLAH (ěg'lah), (Heb. עֵגְלָה, *eg-law'*, heifer), sixth wife of David, and mother of Ithream (2 Sam. iii:5; 1 Chron. iii:3). Many are of opinion that Eglah and Michal are the same, and that she died in labor of Ithream. See 2 Sam. vi:23.

EGLAIM (ěg'la-īm), (Heb. עֵגְלַיִם, *eg-lah'yim*), a city beyond Jordan, east of the Dead Sea, in the land of Moab, which Eusebius places eight miles south of Areopolis, i. e., Ar-Moab (Rabba). However, in that place stands Kerak, the ancient Kir Moab. It awaits further research before complete identification. Probably the same as EN-EGLAIM.

EGLON (ěg'lon), (Heb. עֵגְלוֹן, *eg-lohn'*, calf-like).

1. A Moabite king who, assisted by the Ammonites and Amalekites, subdued the Israelites beyond the Jordan, and the southern tribes on this side the river, and made Jericho the seat, or one of the seats, of his government (B. C. 1527).

This subjection to a power always present must have been more galling to the Israelites than any they had previously suffered. It lasted eighteen years, when (B. C. 1509) they were delivered, through the instrumentality of Ehud, who slew the Moabitish king (Judg. iii:12, 14, 15). (See EHUD.)

2. A city of Judah (Josh. x:3; xv:39), in the low country. It was one of the five cities which joined in a confederacy with Adonizedek, king of Jerusalem, in attacking Gibeon. Eglon was afterwards visited by Joshua and destroyed. The modern Ajlan is doubtless the site of the city.

EGOZ (ē'goz), (Heb. עֵגוֹז, *eg-oz'*). This word occurs in the Song of Solomon, vi:11, 'I went into the garden of *nuts*,' where probably 'walnuts' are intended.

The Hebrew name is evidently the same as the Persian *goruz*, which has been converted by the Arabs into *jowz*, by a process common in the case of many other words beginning with the interchangeable letters *gaf* and *jim*. In both languages these words, when they stand alone, signify the walnut, *gouz-bun* being the walnut-tree. It is more than probable that, if not indigenous in Syria, it was introduced there at a still earlier period, and that therefore it may be alluded to

in the above passage, more especially as Solomon has said, 'I made me gardens and orchards, and planted trees in them of all kinds of fruits' (Eccles. ii:5). (See NUTS.) J. F. R.

Walnut.

EGYPT (ē'yjpt), (Heb. מִצְרַיִם, *mists-rah'yim*; Gr. ἡ Αἴγυπτος, whence the modern *Kopt* through the Arabic *Qibt*).

1. General Features. (1) **Topography.** Ancient Egypt was divided into three geographical sections—Upper Egypt in the south; Middle Egypt in the center; and Lower Egypt, or the Delta, in the north. Upper Egypt is very narrow and bounded by mountains of no great height which rarely take the form of peaks. The northern coast of Egypt is low and barren, presenting no feature of interest, and affording no indication of the character of the country which it bounds. It is because of the almost entire absence of rain that no vegetation whatever is found on the desert rock formations to the east and the west of the valley of the Nile. In shape Egypt is like a lily with a crooked stem. The long stalk of the lily is the Nile valley itself, which is a ravine scooped in the rocky soil for seven hundred miles, from the first cataract to the apex of the Delta, sometimes not more than a mile broad, never more than eight or ten miles. No other country in the world is so strangely shaped, so long compared to its width, so straggling, so hard to go over from a single center.

Only the immediate valley of the Nile is arable soil, and this is a very narrow strip. In the Delta there is a far wider stretch of cultivable land, owing to the fact that the Nile here divides into numerous branches, but even here not all the land is available for cultivation, owing to numerous great swamps and large lakes. In antiquity the greater part of the Delta was swamp and meadow land; and its chief value lay in the fact that it was a good grazing country, and that its swamps and lakes made fine hunting grounds, abounding as they did in all sorts of aquatic birds. The lakes were full of fish, so that fishing was added to grazing and hunting, and thus the country possessed considerable resources even before agriculture became profitable. It is well known that Egypt owes

this strip of good land to the Nile. In situation, natural strength and great resources, the political advantages of Egypt can hardly be overestimated. Egypt lies in the very route of the trade between Europe and Asia, and between Africa and the other two continents. "It is the gate of Africa, and the fort which commands the way from Europe to the East Indies." The natural ports of the Red Sea and the Mediterranean have always been sufficient for its commerce, which that great inland waterway—the Nile—has greatly augmented.

(2) **The Nile.** From the remotest antiquity it has been said that Egypt "is the Gift of the Nile." No artificial methods of renewing the soil could possibly equal what nature has here gratuitously provided in the deposits from the annual overflows of this renowned river. When these floods have subsided the fields are again left dry and are covered with a rich mud. The husbandman has only to sow the seed and gather in the harvest, since the soil requires little or no labor. These overflows have thus caused this famous land, in the midst of surrounding deserts, to become one of the most fertile regions of the globe and, in consequence, the granary of antiquity. The Nile takes its rise in equatorial Africa, in the two great lakes, the *Albert* and *Victoria Nyanzas*. The great *Victoria Nyanza* lies in a zone where rain falls all the year round. The Nile is the only river in the world which is considerably larger in its upper course than it is towards its mouth. From the junction of the *Atbara* to its mouth, a distance of 1,680 miles, it receives no tributary, while its waters are diminished by evaporation, by absorption in the soil, and by the system of irrigation which extends the whole distance. The river gets less and less in size as it flows through this rainless land to the soil of which it supplies, by countless irrigation channels, more water than rain would supply. The *White Nile*, as above stated, takes its rise from the great lakes and tablelands lying under the equator. The *Blue Nile* takes its rise far to the southeast, out of the tablelands of *Abyssinia*, and joins the *White Nile* at *Khartoum*.

(3) **Climate.** In no other country do the same climatic conditions exist as in Egypt. In some localities the temperature hardly varies as much as fifty degrees during the year, while for eight months refreshing winds temper the heat. In Upper Egypt rains and snow are impossible and clouds are never seen, while further down the valley an occasional cloud floats southward. The atmosphere is remarkably dry and clear, except on the seacoast, and the climate equable. In some portions of the country the heat is extreme during the greater part of the year and the winter comparatively severe in its cold.

(4) **Cities.** The chief city of the south was the "hundred-gated" *Thebes*, the ruins of which extend for seven miles on both banks of the Nile. The southernmost points of Egypt were *Syené* and the *Island of Elephantiné*, in the Nile. The leading city of Middle Egypt was *Memphis*, famous for its ruins, and in the vicinity of which existed the famous *Labyrinth* and the *Great Pyramids of Ghizeh*—the most imposing monuments ever erected by human hands. The Delta was in ancient times thickly studded with cities, including, on the western side the famous *Greek City of Alexandria*. This city in the later days of antiquity was the metropolis of Egypt and the commercial center of the civilized world, besides at the same time being the seat of learning and civilization.

2. Origin and History. There are many theories as to the origin of the Egyptians. Accord-

ing to the early Greek and Roman writers, the Egyptians themselves held the belief that they were the original inhabitants of their land.

Early Beginnings. So far as the historical record on the surviving monuments of Egypt reaches back, their beginnings coincide with the first age of the stone period. Relics have been discovered in various parts of the country from Cairo to Luxor, in great numbers. They are the same sort of prehistoric implements which prove to us the existence of man in so many other parts of the world at a geological period so remote that the figures given by our chronologists are but trivial. We find sculptured upon the early monuments types of various races—Egyptians, Israelites, Negroes and Libyans—as clearly distinguishable in these paintings and sculptures of from four to six thousand years ago as the same types are

the question, To what race do the Egyptians belong? still remains open. Ethnologists and anthropologists have decided after long study of skulls of mummies that they belong to the Caucasian race. It is now generally believed that some thousands of years before the Christian era the nation which afterward inhabited the Nile valley set out from Asia, and journeyed westward, crossing the Isthmus of Suez; entered Africa and settled upon the banks of the Nile, and founded there a mighty kingdom. They are believed to have been kindred with other races of Southwestern Asia, such as the primitive Chaldæans and the Southern Arabs. In Gen. x:1, 5, 6, where the table of nations is mentioned, it is stated: These *are* the generations of the sons of Noah; Shem, Ham, and Japheth: and unto them were sons born after the flood. By these were the isles of the Gentiles

A Nile Farm.

at the present day. No one can look at these sculptures upon the Egyptian monuments, or even the facsimiles of them as given by Lepsius, without being convinced that they indicate even at that remote period a difference of races so great that long previous ages must have been required to produce it. Professor Rudolph Virchow, the distinguished German scientist, says: "I thought that I could obtain some evidences of the change of the Egyptians in historic time, by comparative investigation of the living with the remains and likenesses of the dead. I return with the conviction that so far as historical and prehistoric evidences reach, so far as man has been discovered, ancient Egypt and its neighboring lands have not essentially changed their populations." All that we are allowed to suppose on this subject is confined to the assumption that Egypt's pre-historic age must of necessity correspond to the time of the first development of arts and handicraft, and of human science.

Egypt is designated in the old inscriptions, as well as in the books of the Christian Egyptians of later years, as the "Black Land," which is read in the Egyptian language as Kem or Kami. When the earliest settlers on the Nile first made the "black land" their home is unknown. Accordingly

divided in their lands; every one after his tongue, after their families, in their nations. And the sons of Ham; Cush, and Mizraim, and Phut, and Canaan.

Now Ham is the same as Kham or Khem, *Egypt*, and a proof of this may be deduced from Ps. lxxviii:51, where it is said 'And smote all the firstborn in Egypt; the chief of their strength in the tabernacles of Ham' (Ps. cxi:22). And again, 'Wondrous works in the land of Ham, and terrible things by the Red Sea' (Ps. cvi:22). Mizraim also mentioned in the table of the nations is Egypt itself (Gen. x:6, 13). The inhabitants of Kush (the region called after the sons of Ham) are represented on the Egyptian monuments. Their personal appearance is about the same, except that their skin is darker, and at this time they seem to have had a religion and speech almost akin to the Egyptians.

We find Phut, the 'Punt' of the inscriptions, the land where spices came from, to be situated in the south of Egypt on both sides of the Red Sea. The fourth son, Canaan, is represented by the original inhabitants of Canaan. After the age of the Old Empire, the dominant race ceased to be pure. Thus the Pharaohs of the twelfth dynasty seem to have had Nubian blood in their veins; the

Phœnicians of the Delta have left their descendants, and the long dominion of the Hyksos must have affected the population of the country. The Egyptians resembled the modern Arabs in form and their Syrian neighbors in features. They were tall, and with the head well placed upon their shoulders; their movements were graceful and dignified. Their frames were spare and in color the men were brown and the women yellow. The forehead was straight but low, and the hair was usually black and straight. They were mild in their general character, polished in their manners, cleanly in their habits, religious and obedient by nature, and in consequence were a healthy, hardy people.

3. Early Dynasties. The Egyptian monarchy according to the most moderate calculations must have already been in existence fifteen hundred or two thousand years before the book of Exodus was written.

Egyptian history shows that Moses was a contemporary of the 'Great Rameses' (or Ra-ám-ses), the Pharaoh of the oppression. The date of the Great Pyramid cannot be more recent than 3000 B.C. This is undoubtedly a great and venerable antiquity, but no unbiased judge can doubt that an immensely long period of years must have been required for the development of civilization up to the state in which we there find it. The investigations in the bed of the Nile in connection with the rate of earth deposit by the Nile warrant the conclusion that man existed in that valley thousands of years before the longest time admitted until recently by chronologists. (A. D. White.)

Menes. At present nothing is really known of the Egyptian rulers before Menes, the first historical king of Egypt. "The evidence of a vastly longer existence of man in the Nile Valley than could be made to agree with even the longest duration accorded by modern chronology is now seen to be overwhelming. Manetho, the Egyptian scribe at Thebes, in the third century B.C., assigned a longer duration to human civilization than that which accords with the chronologies of modern writers. Manetho has given a statement according to which Mena, or Menes, must have lived nearly 6,000 years before the Christian era."

Many dates have been given by scholars for the reign of this king. Champollion Figeac gives it about B. C. 5867; Petrie, B. C. about 4777; Mariette, the eminent French authority, puts the date at 5004 B. C., and with this the foremost English authority, Professor Sayce, agrees; Brugsch, the leading German authority, puts it at about 4500 B. C. We have it, then, as the result of a century of work by the most trained Egyptologists that the reign of Mena must be placed close upon 7,000 years ago. (See *Antiquity of Egypt* by Andrew D. White, LL. D., Pop. Sc. Monthly, June, 1890.)

Mena, or Menes, came from the town of Teni near Abydos. He built the great temple of Ptah and by many is supposed to have founded the great city of Memphis. He built a large dyke to protect the city, which is still in a good state of preservation, and protects Gizeh from excessive inundation. Menes was a mighty warrior, as the Libyans had reason to know. Very little was actually known of Menes until the recent discoveries made by M. de Moyan, the late director of the Antiquities of Egypt, who believed that he had found the tomb and remains of this famous monarch. (See *ARCHÆOLOGY; CRITICISM.*)

His son, Athothis, succeeded him and wrote many books on anatomy. The next king of note was Ata, or as the Greeks called him, Ouenephes.

He is famous for having built pyramids at Khome. Of the other kings of the first, second and third dynasties but little of consequence is known.

4. Fourth Dynasty. The fourth dynasty was the one under which Egypt became famous. The information we get of this dynasty is from the monuments which the kings of this period erected. Senefru appears to have loved warfare. His body has never been found, although some believe his grave to be marked by the pyramid of Meydoum.

(1) Cheops: The Pyramids. Next (B. C. 3733) came Xufu or Cheops, who is chiefly celebrated for the immense pyramid called 'Height' which he built at Gizeh, the height of which is 450 feet and the breadth at the base 746 feet. The pyramids which are next in point of size are Chephren and Mycerinus. They were all built as graves. When a new king ascended the throne he began at once to build a pyramid. The site was chosen and a slanting shaft was bored out of solid rock; at the end of this shaft a chamber was hewn out large enough to contain the coffin in which was placed the king's body.

On the flat site a comparatively small building was erected, the outer walls of which were steep steps. An idea may be obtained of the amount of labor necessary for the building of the pyramid of Cheops when we consider that the causeway along which the stone was brought took ten years to build, the work being performed by a company of one hundred thousand men, changed every three months. Thus four millions of men were employed on this work alone while it required seven millions more to build the pyramid itself. These pyramids, which date from the earliest period of Egyptian history, are to this hour the wonder of the world for size, for boldness, for exactness and for skillful contrivance. The four sides of the great pyramid built in the very earliest period of Egyptian civilization were adjusted to the cardinal points with the utmost precision. The day of the equinox can be taken by observing the sunset across the face of the pyramid, and the neighboring Arabs adjust their astronomical dates by its shadow. Cheops was known as a great tyrant. The Egyptian nation hated him very bitterly on account of the labor he imposed upon them.

(2) The Sphinx. Chephren, the successor of Cheops, built a smaller pyramid and the small temple behind the Sphinx. The Sphinx is in reality an immense lion with a man's head, representing the God Harmachis. The outstretched paws make a narrow passage leading to a temple which was built in front of the lion; and as the name of Chephren has been found in inscriptions it is probable that this king caused this great sphinx to be hewn out of the solid rock. The total height of the monument is 65 feet, its length 190 feet. Originally the face was colored red, and covered with polished stone, but this polished surface has now disappeared. The features are solemn, awe-inspiring and majestic. The nose has fallen away and the beard is in the British Museum.

(3) Menkau Ra. Menkau Ra, or Mycerinus, like his two predecessors, built for himself a pyramid. His reign is supposed to have extended over sixty-three years. History believes him to have been a pious and good king. According to tradition he was a devout worshiper of the god Osiris. His pyramid, which is the third in Gizeh, is in the best state of preservation. During the researches of Colonel Vyse he found the stone sarcophagus of the king, also the wooden cover of the inside coffin, which was made of cedar,

The body of the king had been carried to an upper room in the pyramid, and had been literally torn in pieces, most probably at the time the pyramid was broken open in search of treasure. Mycerinus was succeeded by Sheps-es-kaf, and thus closes the important fourth dynasty. The united reigns of the fifth and sixth dynasties occupied the next four hundred years, and what is called the Old Empire came to a close B. C. 3000.

Here a gap occurs of about five hundred years, of which only the names of some of the kings are known.

5. Twelfth Dynasty. (1) **Amenemha.** The first king of the twelfth dynasty was called Amèn-emha. His reign was one of great peace and prosperity, and all his people, from the highest to the lowest, received blessings due them. A copy of a book he wrote for his son, Usertsen I (who was associated with him in the kingdom) is full of instructive information. This book is now in the British Museum.

(2) **Usertsen I.** Usertsen I built many magnificent edifices in Heliopolis and brought gold from Nubia and turquoise from the peninsula of Sinai. It is to this dynasty the splendid tomb of Nahre Se Khnum-hetep at Beni-Hassan belongs. His inscription mentions the first four sovereigns as having honored three successive generations of his family.

(3) **Amenemha III.** Amenemha III, the successor of Usertsen III, was renowned for the greatest benefit ever bestowed upon Egypt. It is well known that the prosperity of that country depends upon a uniform inundation of the river Nile. Amenemha III built an enormous lake in the district called the Fayoum—Lake Moeris—or 'the great water.' It was surrounded on all sides by dams and was connected by canal with the Nile. In this lake the surplus water of the inundation was stored for future use. Amenemha III. also built a pyramid 246 feet high, and a wonderful palace called the Labyrinth, which Herodotus tells us contained within its walls four thousand and five hundred rooms.

From the close of the Twelfth dynasty, ruled by Amenemha IV (B. C. 2200), to the Eighteenth dynasty, there is a gap of about five hundred years.

(4) **The Hyksos.** About this time the Hyksos or 'Shepherd Kings,' were in power. They migrated from the east and settled at Memphis. Both the domestic and foreign policies of Egypt were completely changed by the invasions of the Hyksos. Previously, invasions and discoveries were not attempted. Now the canal between the Nile, at Bubastis, and the Red Sea, at Suez, was opened and the circumnavigation of the African Continent was actually accomplished, while navigators were dispatched to determine the source of the Nile. Foreign conquests, also, were undertaken, probably for the purpose of procuring timber for ship-building.

6. Eighteenth Dynasty. (1) **Ahmes.** The Hyksos were driven out by Ahmes, the first king of the eighteenth dynasty. Ahmes reigned twenty-two years and married Ahmes Neftari, a negress, who ruled some time after his death. The son of these rulers, Amenhotep, ruled eleven years.

(2) **Queen Hatasu.** Then came Thothmes I, who associated his beautiful and powerful daughter Hatasu, or Hashop, with him. She reigned for some years either alone or with her brother, Thothmes II. After his death Hatasu adopted the masculine garb and gave orders that her brother's name be erased from all monumental inscriptions. She ordered two granite obelisks with

shining metal tops to be erected, and they were to stand forever (to record her works) before the gate of her father, Thothmes I.

(3) **Thothmes III.** She was also associated with her brother Thothmes III, and the same fate befell her as her brother Thothmes II. Her name was carefully chiseled out of all inscriptions. After Hatasu's death Thothmes III was called 'Great.'

Bust of Thothmes III.

Nations hastened to do him honor. Syria, Ethiopia and Phœnicia paid immense tribute. He it was who erected and inscribed with his own name the obelisk known as 'Cleopatra's Needle,' which is now in Central Park, New York City. He reigned fifty-four years. Then came Amenhotep II and Thothmes IV.

(4) **Amenhotep III,** in whose reign the arts were in greatest perfection, followed. He built the great statues of Memnon before the palace of Luxor. Tradition says one of these statues always sang when the sun's rays shone upon it at dawn. Amenhotep is famous as having introduced the worship of the sun's disk and changed his name from Amenhotep to Khu-en-aten—that is—'the glory of the disk.' He founded a city Tel-el-Amarna (see TELL AMARNA), where he built a great temple in worship of the sun's disk.

7. Nineteenth Dynasty. Next in importance comes the nineteenth dynasty.

(1) **Rameses I.** But little has been learned about Rameses I, king of the nineteenth dynasty (about 1400 B. C.). He began a war with the Khita nations, which was continued by his son and successor.

(2) **Seti I.** Seti I took up arms against the Asiatics, warring with the Ethiopians, Libyans, and the Arabs. He was great in battle and the sculptures are many where he is represented fighting in hand to hand combat. He gave new names and erected new fortresses in place of the old, abolishing everything that did not systematically tend to the rule of the king. He built Memnonium, a small temple, made a well in the desert, and erected an obelisk in Heliopolis. His sarcophagus, in beautiful colored marble, is now in Sir John Soane's Museum in Lincoln's Inn Fields.

(3) **Rameses II.** Rameses II succeeded Seti I. Wars were carried on with greater vigor than ever before. All countries, even those whom Egyptians had never known, began to learn of Rameses' sol-

diers. A prize poem called *Pentaur*, or by a poet of that name, describing with great vividness the brave deeds of Rameses II, was inscribed on the walls of the temples at Abydos. (See EGYPTIANS, LITERATURE OF ANCIENT.) All the best artists of that period painted great pictures of the battle of the Khita or Hittites. One of the pictures shows the king of Khilibu or Khiribu, an ally of the Khita king, being rescued from drowning by his own men, as the chariots were overturned into the river. Rameses II is said to have gone too far into the thickest of the battle. In this dread time he prayed to his god 'Amen,' who appearing encouraged him, and led him on to victory. (Sayce, *Old Testament History in the Light of Recent Discoveries in Egypt*.) There is little doubt that the Pharaoh who persecuted the Israelites so bitterly was Rameses II. Both tradition and monuments prove that he was a builder and in each of his works he erected a monument which declared that the work had been done by captives. (See PITHOM.)

In later years when Rameses was thirty-four, he married the daughter of the king of Khita, thus cementing a treaty between Egypt and Khita. Rameses II reigned sixty-seven years.

(4) **Menephtah or Menephtah.** The persecution of the Israelites which Rameses began was bitterly prosecuted by Menephtah.

(5) **Egypt's Decline.** By the time of the twenty-fifth dynasty Egypt had been divided into a number of small principalities. The light of Egypt's glory was fast fading. Amasis briefly kindled the dying spark, but upon his death Cambyses, the Persian, became king. From this time, with a brief exception, Egypt ceased to be Egyptian.

8. Egypt and the Bible. (1) **Zoan.** The spade of the archeologist has revealed fire as a most destructive agent at the imperial Zoan, the

will set fire in Zoan" (Ezek. xxx:14). We had known it was a desolate ruin; now we know scientifically that fire was set in Zoan—most destructively.

(2) **Joseph.** On an altar, excavated at Am in the suburbs of Zoan, is engraved as a title that of the "Chief of the chancellors and royal seal bearings."

Under Pharaoh at Memphis, Thebes or Zoan, there could be but one such personage. Now this occurred, according to the monuments, under the Hyksos kings. Joseph was under a Hyksos king—probably Apepi, the last monarch of the XVIIth Dynasty. And, biblically speaking, Joseph had such power. So we read: "Let Pharaoh look out a man discreet and wise, and set him over the land of Egypt" (Gen. xli:33). Such an inscription as the above, therefore, reflects much light upon these vivid passages in the biography of Joseph.

(3) **Inscriptions at Tanis.** A marked peculiarity of the Hyksos inscriptions at Tanis is that they are always in a line down the right shoulder, never on the left; whereas the native Egyptians inscribed either side indifferently. This Semitic honoring of the right shoulder recalls at once such passages as Exod. xxix:22; Lev. vii:32, 33; Num. xviii:18.

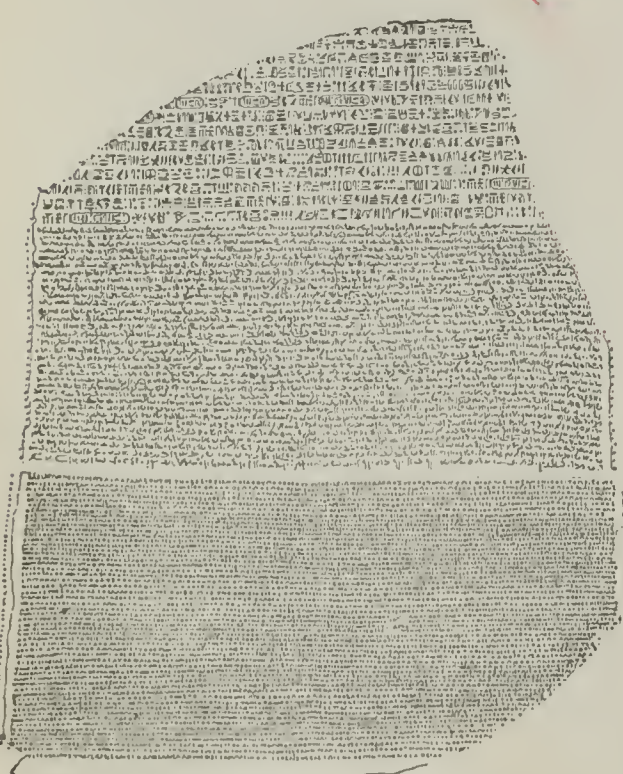

The statement, "There went up with Joseph both chariots and horsemen" (Gen. 1:9), disputed as impossible by Kalisch and others, who have said that there were no mounted horsemen in the Egyptian army, is established by two granite tablets which refer to "the very valorous upon horses," and "strong upon their horses"—expressions applied to Rameses and his soldiers. The sublime hymn, "The horse and his rider hath he thrown into the sea" (Exod. xv:21), becomes fact, as well as poetry, in the light of such texts from the long-buried monuments of a site like Zoan.

In the Boston Museum of Fine Arts is an ungainly statue of an elderly brother of the Pharaoh of the Exodus. This crouching figure is entitled "General of Cavalry," while Menephtah was called "General of Infantry," terms indicative of both mounted and foot soldiers in the armies of Egypt.

(4) **Goshen.** Where in Egypt was the land of Goshen? Saft-el-Henneh, some four miles east of the railway station, Zagazig, is shown to be the site of the capital, in that land, and the all-important discovery is told in the volume of the Egyptian Exploration Fund entitled "Goshen, and the Shrine of Saft-el-Henneh." Dr. Naville had read on two fragments in the Museum at Cairo inscriptions relating to this name; and when in his personal research he espied a block of black granite peeping from the mud at Saft-el-Henneh, his trained eye instantly recognized it as a third fragment of the monument from which the two fragments had been taken. Excavations followed with the proofs that this site, within the walls of brick, anciently was the city of Goshen, and the country about it the land of that name. (See GOSHEN.)

(5) **Bubastis.** A re-study is necessary of the ten chapters of Jeremiah, from the 37th to the 47th chapter inclusive, in which the events in Egypt following the destruction of Jerusalem by Nebuchadnezzar are described, in order fully to appreciate the importance of such excavations as those of Tell-el-Defench, the site of the Daphnæ of the Greeks and the Tahpanhes of Jeremiah.

The most precious treasures revealed at Bubastis are the inscriptions of the XVIIIth Dynasty and of the Hyksos monuments. Declared the prophet Ezekiel: "The young men of Aven and

Facsimile of Inscriptions on Rosetta Stone.

Tanis of the Greeks. The unearthing of the private houses, in genuine Pompeiian style, reveals the sad havoc played by fire almost everywhere. By the mouth of Ezekiel, God had declared, "I

of Pi-Beseth (i.e., Bubastis) shall fall by the sword; and these cities shall go into captivity" (Ezek. xxx:17). The name of Meneptah occurs several times upon the monuments; and the explorer also disinterred the first Hyksos statue ever found with the head-dress complete; and then another Hyksos statue. Near to the latter statue, now in the British Museum, was found the name that signifies his standard—Apepi—the last of the Hyksos kings, under whom Joseph entered Egypt. Bubastis adjoins what is now proved to have been "the land of Goshen," where Jacob settled.

(6) **Tell-el-Amarna.** The tablets found at Tell-el-Amarna (see TELL AMARNA) reveal to us much of the court and diplomatic life of the XVIIIth Dynasty, when Israel prospered in Egypt, and shows how Semitic influence and Semitic officials were in favor particularly with Amenophis IV, who was known in Egyptian history as Khuenaten, the heretic, because he worshiped the sun's disk. With the XIXth Dynasty came the king "that knew not Joseph" (Exod. i:8), when Israel, getting too strong numerically, passed under the harrow.

A tablet disinterred at Lachish, the city of the Ammonites captured by Joshua, bears the name of Zimrida, the governor of Lachish, the very man mentioned in the Tell-el-Amarna tablets. So not only do the Tell-el-Amarna tablets establish the existence of Lachish, but Lachish testifies to the existence of the tablets at that time. (See LACHISH). (Prof. A. H. Sayce.)

9. Egypt After the Exodus. After the Israelites had gone up out of Egypt there were no friendly relations with Egypt till the time of Solomon (1 Kings iii:1).

(1) **Shishak.** Under the reign of Shishak, or Sheshank, first king of the twenty-second dynasty, the Egyptians made an attack upon Jerusalem (2 Chron. xii:2-4). A list of the towns captured is given on a wall in Thebes. Among them is Bethoron, Ajalon, Megiddo, and Judah-melek, which Dr. Birch considers to be the royal city of Judah, i. e. Jerusalem (Birch, *Hist. of Egypt*).

(2) **Tirhakah.** Tirhakah (2 Kings xix:9; Is. xxxvii:9), a king of the twenty-fifth dynasty is well known from Assyrian inscriptions. He had incited Tyre to rebel against the Assyrians, who consequently turned against Tirhakah and conquered him under Esar-haddon. The Egyptians had offered help to the Jews if they would resist Assyria; but the weakness of Egypt was well known, for Rab-shakeh, remembering the successful attacks that Shalmaneser had made against dependencies of Egypt, taunted Hezekiah with the vanity of any hope based on Egyptian alliance, and called her king "a bruised reed" (2 Kings xviii:21).

(3) **Pharaoh Necho.** Two of the kings of the twenty-sixth dynasty are mentioned in the Bible, Pharaoh Necho and Pharaoh Hophra. The first (2 Kings xxiii:29) met Josiah in battle at Megiddo, where Josiah was slain, and Jehoiakim, the brother of Jehoahaz, whose real name was Eliakim, was made king in place of Jehoahaz, the lawful heir. The power of Pharaoh-Necho was soon broken by Nebuchadnezzar of Babylon, and "the king of Egypt came not again any more out of his land" (2 Kings xxiv:7; Jer. xlvi).

(4) **Pharaoh Hophra.** Hophra assisted Jehoiakim and Zedekiah to rebel against Nebuchadnezzar (Jer. xliv). This brought about the conquest of Egypt by Babylon, and after a few years

the prophecies of Ezekiel and Jeremiah regarding its destruction were fulfilled.

Egyptian Pharaoh, Queen and Fan Bearer.

10. Literature. The following works may be consulted on Egypt: *Egypt and Palestine Photographed and Described*, 1870, 2 vols. roy. fol.; Wilkinson, Sir J. G., *The Manners and Customs of the Ancient Egyptians*, new edition by S. Birch, LL.D., London, 1879, 3 vols. 8vo; Brugsch-Bey, *Geschichte Aegypten's unter den Pharaonen. Nach den Denkmälern*, Leipzig, 1877; Engl. translation, London, 2d ed., 1881, 2 vols.; F. Vigouroux, *La Bible et les découvertes modernes en Egypte et en Assyrie*, Paris, 1877, 2 vols.; Ebers, *Aegypten im Bild und Wort*, Leipzig, 1879. EGYPTIANS, ART OF ANCIENT.

We have not only the great Sphinx of Gizeh, so wonderful by its boldness and plastic character, dating from the very first period of Egyptian history, but we have ranges of sphinxes, heroic statues and bas-relief, showing that even in the early ages this branch of art had reached an amazing development. As regards the perfection of these, Lübke, the most eminent German authority on plastic art, referring to the early works in the tombs about Memphis, declares that

as monuments of the period of the fourth dynasty they are an evidence of the high perfection to which the sculpture of the Egyptians had attained. Brugsch claims that every artistic production of those early days, whether picture, writing or sculpture, bears the stamp of the highest perfection in art. Maspero, the most eminent French authority in this field, declares that the art which conceived and carved this prodigious statue was a finished art; and Sir James Fergusson, the highest English authority, declares "We are startled to find Egyptian art nearly as perfect in the oldest periods as in any of the later." G. E.

EGYPTIANS, LITERATURE OF ANCIENT.

By the Literature of the Ancient Egyptians we understand the entire written remains of this people. It came down partly as inscriptions upon hard material, partly on movable writing materials like leather and papyrus. Hard materials comprise, in the first place, stone and wood, but also metal, terra cotta, cartonages, and even glass. Of stone are the temples and tombs, whose walls and ceilings, pillars and architraves were covered with inscriptions, then the sarcophagi and pillars of tombs; also many amulets and sacrificial vessels. Of wood are the coffins, tablets and utensils. Regarding the exterior of the manuscripts, it may be said that leather was used previous to papyrus.

1. Early Documents. The document of the founding of the Temple of Heliopolis, even as late as in the twelfth dynasty, was written upon leather.

Papyrus did exist in that time, and much earlier, for even in the very oldest inscriptions which owe their existence to the builders of the pyramids of the fourth dynasty, hieroglyphics are found, which represent rolls of papyrus and writing materials in the same form which they retained much later.

(1) Styles of Writing. The nature of the different styles of writing may be briefly made plain by the following: The pure hieroglyphic script consists of pictures of concrete objects and of freely invented symbolic forms. The hieratic letters are abbreviations of these pictures; the demotic are a still greater simplifying of these. Concerning the application, the pure hieroglyphic script might be best compared with the uncials of the inscriptions upon our own monuments, the hieratic script with our print, and the demotic with our written characters.

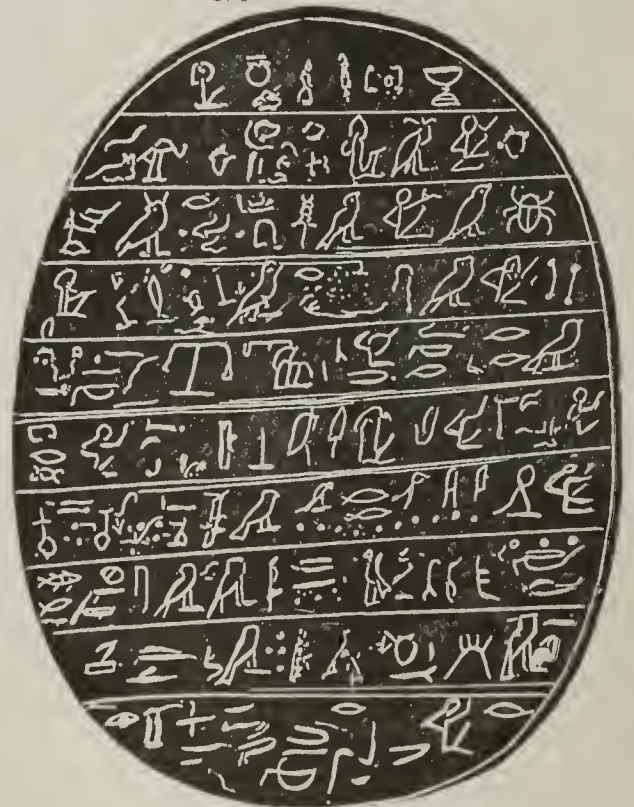

The pure hieroglyphics were used as script for monuments, because they consisted, as before said, of pictures, and because the architects early learned to make use of them to cover the surfaces of the buildings which they erected with an ornamentation which was at the same time pleasing and full of meaning.

(2) Successive Periods. These three different kinds of script, the pure hieroglyphic, the hieratic and the demotic, were not used at the same period. The use of the hieroglyphics preceded that of any other; they are as old as the oldest monument upon which we find them. We meet them as complete as Pallas Athene came from the head of Zeus. To follow their development is impossible. The hieratic script we first meet with upon the papyri of the twelfth dynasty. The demotic did not come into use until the eighth century before Christ. Nor did all three of these scripts represent the same *forms of language*. The *pure hieroglyphic script* had for its foundation the *ancient sacred language*. The same is true of the older *hieratic*, but since the nineteenth dynasty it rather accommodates itself (in

the texts of narrative character) to the *spoken language*. The *demotic* represents, even as its name (meaning *script of the people*) indicates, only the *mode of speech of the people*. It was used to write letters, for which reason it was also called the *epistolographic*. It was also used to write contracts, last wills, and the like. The older scripts were used to reproduce *religious texts*, or to record *historic memories*. The hieratic is generally used to put in writing *scientific or belletristic matter*.

Up to the beginning of the nineteenth century a knowledge of the Egyptian language had not only actually perished, but the key to the decipherment of its writings was supposed to be irrevocably lost. The hieroglyphic characters were looked upon as symbols under which the mysteries of the religion had been concealed from the vulgar, and several attempts had been made to explain them. All efforts however were destitute of any scientific basis until the discovery of the Rosetta stone. See cut on page 568.

2. Religious Works. On the basis of the three different kinds of script we obtain the three following main classes into which we may divide the entire Egyptian literature: *Religious, Scientific, and Belletristic matter*. The religious part of the Egyptian literature throws all the others deeply into the shade, not only because *The Books of the Dead*, which were put into the graves of the deceased, were best guarded against destruction, and were therefore preserved in a thousand-fold larger numbers than writings of a secular character, but because religion permeated the entire life of the Egyptians.

Scarabæus with a part of the Ritual of the Dead.

(1) Book of the Dead. The Book of the Dead is the starting point of the study of the Egyptian religion and acquaints us with the God-idea of the Egyptians, with many of their dogmas and their interpretations, with their mythology, their morals and their faith in immortality. It also teaches us their forms of calling upon the divine powers in prayers and hymns. It was put into the graves with the dead, and parts of it were written on many a tomb and on the inner sides

of the sarcophagi, to point out to the deceased the road through the other world and serve him as an aid to memory. He had to know the "right word," to use it as a magic weapon against the demons, which would meet him with hostile intentions, and as a key to open the locked portals upon his way.

(2) **Magic.** There was also another element besides the religious which was intermixed in the wonderful effect of the "right word." It was the *Magic*. We meet with it even in the oldest texts, which were discovered in the interior of some pyramids. Here one sees that the people did not only endeavor to earn for themselves the favor of the gods by prayer, coming from a believing heart, but that they also tried to force the gods to do the will of the conjurer by the aid of magic formulas.

There is also a list of special writings treating of Magic, like the Magic Papyrus Harris, the Magic Mythological Papyrus published by Maruchi, or the later Coptic and Greek Magic Papyri, published after the beginning of the Christian era, and pieces of magic character are also found in many other manuscripts, especially in some of a scientific nature.

3. Scientific Literature. The scientific literature treats of Theology, Jurisprudence and Philosophy.

(1) **Historic Texts.** Historic texts give sketches of military campaigns and some biographies of prominent military leaders. Among the historic documents which the scholar who visits Egypt beholds are those which contain the sculptured tablets giving the list of kings. Each shows the monarch of the period doing homage to the long line of his ancestors. Each of these sculptured monarchs has near him a tablet bearing his name. That great care was always taken to keep these imposing records correct is certain; the loyalty of subjects, the devotion of priests and the family pride of kings were all combined in this, and how effective this care was is seen in the fact that kings now known to be usurpers are carefully omitted.

(2) **Medical Works.** The medical science of the Egyptians is taught us by the Papyrus Ebers, a voluminous handbook of Egyptian medicine. Even in this work we find parts of Magic, but the incantations which are to accompany the treatment of many a disease are not very numerous. The Papyrus Ebers was written under Amenophis I (eighteenth dynasty), in the sixteenth century before Christ, and is a collective work which contains many earlier medical writings, dating in part from very ancient time. A number of diagnoses testify to the excellent observation of the Egyptian physicians, and a special part treating of physiology proves that the heart had been recognized as the central organ of the human organism and its influence upon the circulation of the blood was also known.

(3) **Astronomical Methods.** Thus far we only learn the methods of the astronomers from pictures and their accompanying texts, which also inform us of a well-designed instrument which they had, the use of which was discovered by Schack von Schackenburg.

It can only be said of the scientific literature of the Egyptians that it informs us regarding the Theology, the Jurisprudence, the Mathematics, the Medicine and Magic of the people somewhat in detail, and gives us a little information on the succession of the regents and a few of the wars.

4. Belles Lettres. (1) **Poetry.** We also possess some Egyptian writings of a belletristic char-

acter; for instance, samples of most of the classes of poetry, excepting the drama, for the simple dialogues which we have are not worthy of being called dramas.

Specially valuable are also the *Hymns*, which properly belong to the class of theology, of these a few excel in beauty of rhythm and a deep conception of the godhead. The hymns also which were sung in the chapels of the tombs in honor of prominent deceased persons, are partly of poetic value. These "Nanies" (funeral dirges) do not show, as might be supposed, a very gloomy coloring; on the contrary, we are surprised by a view of the world which we would not be likely to accord to a people who called their earthly habitations temporal abodes and their tombs "eternal houses," for they call upon us to enjoy whatever beautiful things life offers while we may, and to remember that the capability to enjoy the gifts of life ends with death.

The Sphinx, Cleared from the Sand.

The Egyptian literature also contains other examples of a lyrical nature. There are love songs in which beautiful passages are not wanting. Worthy of special mention are those which are contained in the London Papyrus Harris 500.

The folksong is, according to its nature, of idyllic simplicity, sung, for instance, on the occasion of threshing, to stir up the activity of the cattle that were treading the corn.

Some other lyrics are devoted to the fame of Pharaoh. Of specially peculiar character is the song celebrating the triumphal chariot of the king, in which every part of the chariot is compared with a characteristic trait of the monarch by the aid of a play of words, which seemed to be very popular with the Egyptians. For instance, after the *wheel* has been mentioned, it is said: "Thou crushest the nations under thy wheel." In this lyric poetry, however, no meter, that is, a measure of words according to short and long syllables, nor anything like it, can be perceived. The Egyptian poetry is, rather, like the Hebrew, in that it makes use of *parallelisms* to give the poetic expression beauty and greater

force. In these *parallelisms* the opposite parts strictly conform to each other, and therefore, the characters, for instance, in the song of praise addressed to Thutmosis the Third,* upon the pillar of el-Gise, appear as if they consisted of a successive row of verses. But none such exist, although in the Coptic, poems occur which are arranged in lines with final rhymes.

There are also other marks distinguishing the old Egyptian poetry from the prose. Ebers, for instance, found even a rhyme (not a final rhyme, but a rhyme only as an ornament of speech in the midst of the parts of the parallelisms), at the close of a narrative, or the incantations to flatter the ear and to help the memory to retain them. And that is not all. *Alliterations*, for instance, are of very frequent occurrence, even in

for even these are found in the Egyptian literature, and the most important production of this class is the "Epic of the Pentaur," which was preserved in several copies upon stone and papyrus. The poem treats of the war of Rameses II against the Kheta and their allies, of the great danger in which the Pharaoh was placed, when surrounded by enemies, and of his rescue by Amen.

(2) *Romance*. The much more ancient history of Sinuhet (twelfth dynasty) I do not venture to call an epic. It only tells of the flight of a high official to a Semitic tribe, of his reception by, and his happy fate while with them, and also of his return home to the court of the Pharaoh and of his brilliant reception there.

This story is justly classed with poetic literature, for the well-ornamented delivery of the recital is

Cairo, showing Citadel.

the very oldest poetic pieces, the texts of the pyramids, and they are still found in the latest period of the Ptolemaic and Roman imperial period.

A love song in which every sentence begins with the name of a flower reminds us of the *Ritornelle* of the Italians. It is very beautiful and belongs to the songs in the London Papyrus Harris 500. Over the hieratic texts on many a papyrus there are also seen dots, generally in red, and the sign of an arm with the hand downward. These dots sometimes support the parts or lines of a parallelism, and sometimes they only seem to give the reciter a hint. The arm with the hand downward, which is read *Gerh*, and means pause or rest, indicates that the reader should lower his voice and let a pause ensue.

By this we see that many parts of the belletristic literature of the Egyptians were intended for recitation, especially the hymns and epic poems,

strongly distinguished from sober prose. But it is true that just at the time (during the twelfth dynasty), when this story originated, a language which was overloaded with figures seems to have been in vogue. An example of this class of literature is the story translated by Griffith of a peasant who is brought to court that the people there might be delighted by his manner of speech.

The Suez Canal of Seti I. (From a bas-relief on the exterior North Wall of the Temple of Karnak, Thebes.)

From this time also dates the fairy tale of the man who was shipwrecked upon an island, with

* Thutmosis is the Greek form of this name. Elsewhere Dr. Ebers writes it Thothmes, as do many other Egyptologists. Burgsch prefers the following orthography, Tehutimes, and some follow him, while Dr. W. M. Flinders Petrie writes the name Tahutnes.—EDITOR.

which the Russian scholar Golenischeff has made us acquainted. It forms the contents of a hieratic papyrus at St. Petersburg.

There are other fairy tales, most of which were put in writing under the nineteenth dynasty, and that in a language nearer to the popular form than the older hieratic texts. Maspero translated and collected them in a volume. The best known and most beautiful of them is the Tale of the Two Brothers, mentioned in the Papyrus D'Orbigny. The fairy tale of the enchanted prince, spoken of in a London papyrus, unfortunately breaks off before the conclusion. Nor is the story of the conquering of Joppa complete. The tale of Setnau has only been preserved in the demotic script. The tales of the sons of Chufu (Cheops), treating of famous sorcerers, of which A. Erman, of Berlin (where the papyrus which relates them is preserved), has made excellent translations, date back to the beginning of the eighteenth dynasty, but they rather belong to the class of Magic than to the fairy tales.

(3) **Satirical Works.** Some works are preserved which justify the Romans in calling the Egyptians

Wood Carving in Relief, from Sakkarah.

a people given to scoffing, with a specialty for *satire*. One of the most sneering invectives which they had used against the prince of a despotic country was found in the *satirical* papyrus of Turin. It represents a war between cats and mice, in other parts it is highly obscene, and scathes the dissolute life of Rameses II. Besides that, it shows us the highest priests of the land with the head of a buck, an ass and a crocodile, and puts before our eyes a completely reversed world, by placing the rhinoceros in the crown of a tree, and showing the crow mounting a ladder. From this it may be seen that the fable of the animals was known to the Egyptians, for many of their mythological narratives can be classed directly with the fables.

The fable of the Lion and the Mouse was also completely preserved, though only in a demotic papyrus of Lyden, but the form is so truly Egyptian that it could well be taken for a genuine Egyptian production, and one might suppose the

fable of Æsop containing the same story was borrowed from the Nile.

(4) **Correspondence.** There is also another very remarkable part of the Egyptian literature preserved to this day. It consists of letters which contain not only communications from one person to another, but also exercises in style, which were used for the instruction of the young in the schools; whilst they were copying, and perhaps also learning by heart, they were to practice the style, and the contents of the letters were designed to fill them with pride in their future vocation. In some of these letters the professional vocation of the scribe is placed high above all other classes.

EGYPTIANS, RELIGION OF ANCIENT.

(1) **Nature and Destiny of the Soul.** In the basis of all religion, the nature of the soul, the Egyptians showed the same aptitude for holding several different views that we notice also in their theology. The presence of entirely contradictory notions side by side, points to their having been devised by different tribes or races; each of these divergent views has probably descended from some different element of the population.

The most complete account recognized many different parts of the personality. There was: *a*, The body, which became a mummy, *sahu*; *b*, the double or ghost, the *ka*, which was exactly like the body, was born with it, but was immortal and wandered about at will after the death of the body; *c*, the *ka* carries with it the *khaib* or shadow symbolized by a sunshade. These are the elements of the material person. The immaterial parts are: *d*, The *ba*, or soul symbolized as a human headed bird, which flies in and out of the tomb, and visits the mummy; the king's *ba* was a hawk; *e*, the *khu*, or glory, symbolized by a crested bird; *f*, the *ab*, or will, symbolized by the heart; *g*, the *sekhem*, or strength; *h*, the *ran*, or name.

Ka Statues of Ra-hotep and His Sister-Wife, Nofret.

The Khaib and the Ba.

The simplest, and apparently earliest, notion of the soul after death was that it hovered about the tomb and required food and drink, an idea which is usual among many other races; hence the offer-

ings of food which are found placed in the tombs of all periods. Later, however, these offerings were changed from being corruptible food into the incorruptible images of the food, and of the servants who prepared it; and these again were changed into mere surface sculptures, and lastly into paintings of the objects. All of these changes took place before 4000 B. C., and throughout the historical period all of these modes of offering existed side by side. Failing the provision by human care, the soul was reduced to rely on the tree-goddess, who lived in the thick shady sycamore trees that overshadowed the cemeteries. The starving *ka*, or ghost, and the *ba*, or soul, came to adore the goddess, who from her mysterious haunt poured out the drink and gave them the bread. The *ba*, or soul, easily wandered about, and was provided (in some cases) with a narrow opening which led from the outer air down the shaft in the rock into the funeral chamber. Thus it could rest with the body or fly out to receive its nourishment.

Another notion, which is entirely inconsistent with the above, is that the dead, after attesting his righteousness to Osiris, was permitted to enter the fields of Aalu in the kingdom of Osiris, and there to cultivate the ground, to plow, to sow, and to reap the gigantic and glorified maize which rewarded his Elysian labors. The natural result

The Judgment Before Osiris.

of believing that the dead had to work after death was that their labors should be lightened as in life by having many servants to do their bidding. Probably servants were actually sacrificed at first, and at about 2500 and 1500 B. C. we find representations of human sacrifice which was probably then in image and not in reality. But from about 1600 B. C. down to about 400 B. C. images of the servants were buried in the tombs; at first only a few large and important figures, but afterwards many hundreds, degraded to mere lumps of mud about 700 B. C., but starting again with fine statuettes at about 600 B. C. These are known as *ushabtis*, or "answerers," as they had to answer for the dead when his name was called out from the roll of the *corvée* to work in Aalu.

The third notion was that the dead joined the sun, and went through all the hours of day and night with Ra, the sun-god.

(2) **Amulets and Charms.** So far as purely personal religion can be traced, the belief in amulets and their magical effects was the most potent force. In the old kingdom (3500 B. C.) amulets of many kinds were worn; the sacred eyes of horses and the images of gods were the more theologic, and continued in use till late times; while the clinched hand, the jackal's head, and the hornet were simple charms which did not hold

their place against later ideas. Such amulets were equally efficacious for the dead as for the living, and could control the malice of evil spirits in the

King Seti I Offering Wine Before Osiris.

future as in the present world. Hence nearly all our examples are those found in the mummies in tombs.

The more social beliefs of the household seem to have been largely devoted to the worship and benefit of the ancestors, as in China at present. In the central hall of the house was a niche or recess, usually in the western wall. This recess was two or three feet wide, and with sometimes a narrower recess in the middle of it. A raised step stood before it, or sometimes a platform with two or three steps leading to it. The recess was usually painted red, but in one case a painted scene remains in it, showing an ancestor come forth from his tomb as a *ka* of human form, and a *ba* or human-headed bird. Both *ka* and *ba* are adoring the tree goddess, who gives them food and drink. Here we see that the earliest and simplest beliefs about the soul continued to be the basis of the domestic worship, although complex and gorgeous services were devoted to the temple gods at the same time. The evidence for this belongs only to the XVIII-XXII dynasties; so that we do not know how late this domestic worship continued. We may infer from its simple type that it preceded this period from the earliest times downward.

In later times of the Ptolemaic and Roman ages very few of the well-known gods appear at all in the popular pantheon. The main objects of worship were, before all, *Horus*, then *Isis* with *Horus* and *Serapis*, which was the later form of *Osiris* as modified by the type of *Zeus*. The vase-formed (or "canopic") *Osiris* is equally frequent. Female figures are also common, and are of different types, but connected with the gestures of those who went to the orgies at Bubastis, and those who sought fertility by invoking the sacred Hapi bull at Memphis. These were probably charms against childlessness, so dreaded in the East.

The Horus Monogram.

(3) **Animal Worship.** This worship, which served for the ridicule of Roman and Christian writers, was probably one of the earliest, and belonged to the most nearly primitive layer of Egyptian population. It was extended through every state of the country, and every local capital had its sacred animal.

The list of animals thus honored comprises the baboon, shrew-mouse, dog, wolf, jackal, ichneumon, cat, lion, hippopotamus, ram, bull, cow,

The Scarab, Supposed Capable of Propagation by Itself, and Hence an Emblem of Resurrection.

vulture, hawk, egret, ibis, goose, crocodile, cobra, oxyrhynchos fish, eel, lepidotas, latus, and maeotes; while the scarabæus beetle was the commonest sacred emblem, though not worshiped anywhere. Of all these animals that were worshiped, it should be noted that it was always an individual animal that was honored and held sacred; while the whole species enjoyed only a vague sanctity, since any member of it might possibly become the divine representative. There was not the *tabu* and inviolability of the species to a special family or tribe, as in totemism; and no Egyptian hesitated to kill and feed on the sheep, ox, or goose, however much single individuals were honored and adored.

This worship of the individual animals did not ensure their length of life. On the contrary, they were the victims of a sacramental feast.

The Bull Apis.

The source of this worship of animals has been much debated. That they were not adored because of their utility is evident, as many are useless to man. That they were not merely employed as emblems of pre-existing gods is probable, since different gods are associated with the same animals; the animal worship appears to be a wider and earlier stratum than that of gods, and some were sacred apart from any god. Probably the idea of extra-human intelligence, perception, and powers attributed to them is to be looked on as really the origin of the worship devoted to them. The most celebrated examples of the worship of sacred animals are described by Greek and Roman authors. Four sacred bulls were adored: Hapi or Apis at Memphis, Mnevis at Heliopolis, Bakh or Bakis at Hermonthis, and Onuphis. These appear from some figures of them to have been different local breeds with marked characteristics. The most celebrated by far was the bull Hapi of Memphis; the long series of tombs of

these sacred bulls at Sakkara is one of the most impressive sights in Egypt; the earlier ones, about 1500 B. C., were separate chapels; but during the later centuries vast catacombs were excavated, in the chambers of which gigantic sarcophagi of granite still remain. Later, in Greek times, the deified Hapi (who became an *Osiris* in his apotheosis, and was hence the *Osir-apis*) was worshiped as Serapis; and this form of *Osiris* became the principal state deity of the Ptolemaic and Roman government of Egypt. The noble temple of *Serapis* at Alexandria was one of the greatest and most magnificent then known, and became the rallying point of the expiring struggles of paganism. The last great festival of the Egyptian religion was that of a fresh Apis bull under Julian, 361 A. D., noted on his coinage as an event of his reign.

Another very prominent sacred animal was the jackal, the emblem of *Anubis*, the protector of the dead in their wanderings. The association of the jackal, which haunts the cemeteries along the edge of the desert, with a guardian of the dead, is but natural; and though specially worshiped at Siut; yet the jackal is represented in sculptures as a divine emblem throughout the whole country.

(4) **The Osiride Religion.** The gods of the family of *Osiris* form a very marked group; they are all purely human and without animal or cosmogonic nature, except so far as combined in later times with other gods. In the most remote age it appears that *Osiris*, *Isis*, *Horus*, and *Set* were all independent and unconnected deities, belonging probably to different tribes. *Isis* was a goddess at Buto in the Delta. *Horus* came to be worshiped with her, and was therefore called her son, though a separate form as "*Horus the elder*" apart from *Isis*, continued until late times. Then *Set* was worshiped along with *Horus* and *Isis*, and is treated as a coequal god with *Horus*. Lastly, *Osiris* came to be united with this family, *Isis* was considered his wife, *Horus* his son, and *Set*, with whom he was at enmity, ceased to be coequal with *Horus*, and became the evil brother of *Osiris*, with whom *Horus* waged ceaseless war. This warfare of the *Horus* tribe with the earlier members of the *Set* tribe forms the oldest chapter of the legendary history, the earlier stages of the religious changes being only dimly preserved, owing to intense conservatism.

At the earliest historic times we find, then, a compact family of gods: *Osiris*, who married his sister *Isis* (for thus all good brothers were bound to do in ancient Egypt), and also his sister *Nebhat*, or *Nephthys*, who is otherwise considered the wife of *Set*, the evil brother of *Osiris*. The sons of *Osiris* were *Horus*, from *Isis*, and *Anpu* or *Anubis*, from *Nebhat*. The latter is, however, perhaps only a later theologic connection, as *Anubis* is never figured with *Nephthys*, while *Isis* and *Horus* are constantly shown together.

As the god of the dead, *Osiris* was of the highest importance to the Egyptian. Every good Egyptian needed to enter his kingdom, and to become osirified, so as to be assured of immortal bliss. Hence all deceased persons were entitled "the *Osiris* so-and-so," much as we speak of "the blessed dead." The kingdom of *Osiris* was a shadowy but glorified copy of earthly life. All the pleasures and needful work of life went on there; and in the vignettes to the "Book of the Dead," which was the guide to the unseen world deposited in the tomb of every well-to-do Egyptian, the varied occupations are delightfully figured. To enter this paradise, however, the dead needed to be judged by *Osiris*; his heart was weighed

against truth to see if it were just, and the dead asserted his innocence of a long list of what we should call "mortal sins." If he failed to be accepted, his soul was driven away in the form of a pig to an unknown doom. If his heart proved to be true when weighed, he then passed into the fields of Aalu, where *Osiris* ruled, and all was peace and plenty. And even there he did not need to labor if his tomb had been properly provided with the *ushabtis* or slave figures, which we have noticed before.

(5) **The Cosmogonic Religion.** So great has been the influence of sun-worship in Egypt that to the later Egyptians it absorbed everything else, and almost all the other gods became identified with *Ra*, the sun-god. In the early times before 2000 B. C., the solar and cosmogonic gods receive but two or three per cent. of all the mentions of divinities. In the XVIII-XX. dynasty they receive over thirty per cent., while later than that they are less prominent, but only because almost every other god was subdued to *Ra* and formed but a manifestation of the sun.

This cosmogony has many elements similar to that of Mesopotamia, familiar to us in Genesis. The sky or celestial ocean, *Nut*, rests upon the earth, *Seb*, to begin with. Then a firmament lifts the waters above from the waters below, and the god *Shu* raises *Nut* and supports her on his arms. *Shu* is empty space or air, symbolized by the lightest bulk known—an ostrich feather. Another version was that *Ra*, the sun himself, lifted the upper waters from the lower; and this may be seen daily in the sun lifting the thick fog and cloud from off the Nile. The sky, *Nut*, was symbolized by a woman spotted over with stars, and resting with hands and feet on the ground—the four pillars of the sky—while *Shu*, or space, sup-

Air Supporting Sky, While Earth Reclines Below.

ports her body on his upraised arms. *Seb*, the earth, symbolized as a man, lies on the ground below. *Ra* was an entirely human god, and this name is maintained for the sun throughout the whole day and night. *Harakhti*, or *Horus* on the horizon, a compounding of *Ra* with *Horus*, is a hawk-headed god, who specially is the rising and morning sun. Another form, *Atmu* or *Tum*, is the afternoon sun; and *Khepra* is the night sun. *Atmu* is the god who is theologically said to have created everything by the word of his power. Heliopolis, in the Delta, just below Cairo, was the special center of this worship; and the story of creation as told there was in three scenes: First, the separation of *Ra* and *Atmu*, *Ra* being the sun

and *Atmu* the creator; second, the lifting of the sky (*Nut*) from the earth (*Seb*); third, the birth of the Nile and of cultivation. This corresponds to the first three days of Genesis; the separation of light from the Creator, the separation of the upper waters from the lower by space, and the production of sea and land and plants. Specially connected with this *Ra* worship was the division of the day and night each into twelve hours. The separate hours of day are not specially important, but the hours of night form the basis of one of the most essential beliefs of Egypt. Each hour was a different territory through which the sun passed, accompanied by his bodyguard of gods, and the spirits of the faithful who accompanied him. Several religious works were adapted to this idea, or founded on it. The Book of the Dead, the Book of the Shades (*Duat*), and the Book of Gates or of Hades belong to this form of spiritual guide-book. In the earlier writings of the Book of the Dead the hours are not so prominent, and *Osiris* is more important than *Ra* as a patron of the dead; but in all the later writings *Ra* became more and more important, and the twelve hours are the basis of the whole system. The motion of the sun was seen to be smooth and regular, as that of a boat on water; and rain was known to descend from the sky. Hence the conclusion was not unnatural that there was a river above in the sky, and the sun floated in a boat on that river. The boat or bark of the sun is therefore constantly represented, and the gods who formed his bodyguard went with him in this boat. Whenever the sun as a moving body was to be shown, as in rising or setting, the disk is figured on a boat.

(6) **The Abstract Religion.** The forms of religion that we have already noticed are comparatively free from abstract ideas. The utmost that can be said of the animal worship is that it may have originated in the animals being adorned as embodying or exemplifying certain attributes. Of *Osiris* it may be that he was a god of vegetation; and *Horus* and *Set* are looked on as the principles of good and evil. The whole cosmogony is essentially concrete, with hardly any abstraction traceable.

But another class of gods, which stand quite apart from all the others, are essentially abstract.

Hypostyle Hall of the Esneh Temple.

Ptah, the god of Memphis, is the creator; he is not like the creator *Atmu*, identified with the sun; nor like the creator *Khnumu*, a potter; but he is the Divine architect who ordains. And his companion goddess is even more abstract; *Maat* is law and orderly regulation, justice and principle, expressed in sign by the cubit measuring-rod.

Such is one great abstract conception, the creator working by law and measure.

Another pair of abstractions was that of the Divine Father, and of universal Mother Nature. The great father god was *Min* (otherwise rendered as *Khem*), represented by images furnished with a *phallos*, in whom all the beauty and life and vigor of nature rejoiced. And parallel to him was *Hathor*, the great mother, who was worshiped in every capital of the country, and identified in turn with all the other goddesses. In some places she was the sky, being identified with *Nut*, from whom sprang everything. In other places she was *Isis*, the principal Divine mother of the earlier mythologies. In the early times, before 2000 B. C., she seems to have received a quarter of the whole devotion of the land, but in later periods her importance diminished.

There are some other gods of importance which do not form part of the main groups here represented, and which were strictly local in origin.

W. M. F. P.

EGYPTIAN, THE (ē-jīp'shan), (Gr. ὁ Αἰγύπτιος, *ho ai-gup'tee-os*). In Acts xxi:38 Claudius Lysias, the chief captain (Chiliarch), is represented as saying to St. Paul, 'Art thou not then the Egyptian, which before these days stirred up to sedition and led out into the wilderness the four thousand men of the Assassins?'

This Egyptian is mentioned by Josephus in both his works. While describing the procuratorship of Felix, he mentions the Sicarii or Assassins, then in distinction to these the religious impostors, then a certain Egyptian. The latter professed to be a prophet, and collected together a body of 30,000 persons, whom he led to the Mount of Olives, asserting that the wall of Jerusalem would fall down before him, and that he could capture the city. Felix attacked him with a considerable force, and dispersed his followers, slaying 400, and taking prisoner 200. The Egyptian himself escaped. (A. C. Headlam, *Hastings' Bib. Dict.*)

EGYPT, RIVER OF (ē-jīpt rīv'ēr), occurs repeatedly in A. V. (Num. xxxiv:5; Josh. xv:47; 1 Kings viii:65; 2 Kings xxiv:7; 2 Chron. vii:8; Is. xxvii:12).

It is not the Nile but the *Wady el-Arish*, which flows through the northern portion of the Sinaitic peninsula, draining into itself the waters of many other wadies, and flows into the Mediterranean midway between Pelusium and Gaza (*Maspero, Dawn of Civilization*, 348). It derives its name from the village *el-Arish* (the ancient *Rhinocolura*, Diodor. i:60), situated near its mouth. (J. A. Selbie, *Hastings' Bib. Dict.*)

EHI (ē'hī), (Heb. אֶחָי, *ay-khee'*, brotherly, brother, i. e., friend of Jehovah), head of one of the houses of Benjamin according to Gen. xlvi:21.

He seems to be the same as Ahiram of Num. xxvi:38. If they are identical Ahiram is probably right as the family were called Ahiramites. The same name seems to have the form, Aharah (1 Chron. viii:1), Ahoah (1 Chron. viii:4), Ahiah (1 Chron. viii:7), Aher (1 Chron. vii:12). These variations seem to indicate the effacement of the original copies by time or injury.

EHUD (ē'hūd), (Heb. אֶחָד, *ay-hood'*, union).

1. Son of Gera, of the tribe of Benjamin, one of the 'Judges' of Israel, or rather of that part of Israel which he delivered from the dominion of the Moabites by the assassination of their king Eglon.

These were the tribes beyond the Jordan and

the southern tribes on this side the river. Ehud obtained access to Eglon as the bearer of tribute from the subjugated tribes, and being left-handed, or rather ambidextrous, he was enabled to use with a sure and fatal aim a dagger concealed under a part of his dress, where it was unsuspected, because it would there have been useless to a person employing his right hand. The Israelites continued to enjoy for eighty years the independence obtained through this deed of Ehud (Judg. iii:15-30).

2. Son of Bilhan, the son of Benjamin, the Patriarch (1 Chron. vii:10, viii:6). (B. C. before 1856).

EKER (ē'kēr), (Heb. אֶכֶר, *ay'ker*, transplanted, foreigner, Lev. xxv:47), a rooting up, perhaps one transplanted, a foreigner, a descendant of Judah through the families of Jeralmeel and Hezron (1 Chron. ii:27), B. C. after 1856.

EKRON (ĕk'ron), (Heb. אֶקְרוֹן, *ek-rone'*, extermination), one of the five Philistine states (Josh. xiii:3), and the northernmost of the five.

In the general distribution of territory (unconquered as well as conquered) Ekron was assigned to Judah, as being upon its border (Josh. xiii:3; xv:11, 45); but was afterwards apparently given to Dan, although conquered by Judah (Josh. xv:11, 45; xix:43; Judg. i:18; comp. Joseph. *Antiq.* v:1, 22; v:2, 4). In Scripture Ekron is chiefly remarkable from the ark having been sent home from thence, upon a new cart drawn by two milch kine (1 Sam. v:10; vi:1-8). In later days, it is named with the other cities of the Philistines in the denunciations of the prophets against that people (Jer. xxv:20; Amos. i:8; Zeph. ii:4; Zech. ix:5). The name of Ekron, or rather Accaron, occurs incidentally in the histories of the Crusades; and it has been recognized by Dr. Robinson (*Bib. Researches*, iii:24) in that of Akri, in a situation corresponding to all we know of Ekron. Akri is a small Moslem village, five miles south of Ramleh. It is built of unburnt bricks, and, as there are no apparent ruins, the ancient town was probably of the same materials.

EKRONITES, THE (ĕk'ron-ites), (Heb. אֶקְרוֹנִי, *ha-ek-roh-nee'*, with art, inhabitants of Ekron (1 Sam. v:10). In Josh. xiii:3, it should be singular, "the Ekronite."

EL (ĕl), (Heb. אֵל, *ale*, mighty, especially the Almighty), God, either Jehovah or a false god; sometimes a *hero* or magistrate. It occurs as a prefix (and suffix) to several Hebrew words, e. g., *el-shaddai*.

ELADAH (ĕl'a-dah), (Heb. אֵלְאָדָה, *el-aw-daw'*, God has decked), son of Tahath, a descendant of Ephraim (1 Chron. vii:20).

ELAH (ē'lah), (Heb. אֵלָה, *ay-law'*, oak or terebinth).

1. Son of Baasha, king of Israel. After a reign of two years (B. C. 930-929) he was assassinated while drunk, and all his kinsfolk and friends cut off, by Zimri, 'the captain of half his chariots.' He was the last king of Baasha's line, and by this catastrophe the predictions of the prophet Jehu were accomplished (1 Kings xvi:6-14).

2. Aholibamah's successor in the government of Edom (Gen. xxxvi:41; 1 Chron. i:52).

3. Father of Hoshea, the last king of Israel (2 Kings xv:30; xvii:1). (B. C. 729.)

4. An Edomite "duke," the son of Caleb, the son of Jephunneh (1 Chron. iv:15). (B. C. 1618.)

5. One of the chiefs of the tribe of Benjamin at the time of the settlement of the country. He was son of Uzzi (1 Chron. ix:8). (B. C. 536.)

6. Father of Shimei ben-Elah, a commissariat officer of Solomon in Benjamin (1 Kings iv:18). (B. C. 960.)

7. A valley in which the Israelites were encamped when David fought Goliath (1 Sam. xvii:19). It doubtless received this name, which some spell Alah (see ALLON), from the terebinth trees or from some remarkable terebinth tree, growing in it. Ecclesiastical traditions identify it with the present valley of Beit Hanina, about eight miles northwest from Jerusalem. In this valley olive trees and carob trees now prevail, and terebinth trees are few; but the brook is still indicated whence the youthful champion selected the 'smooth stones' wherewith he smote the Philistine. Dr. Robinson, however, disputes this ancient tradition, and finds that the conditions of the history require him to identify the valley of Elah with the Wady es-Sumt (acacia valley), which he crossed on the road from Jerusalem to Gaza, about eleven miles southwest from the former city. His reasons are given in *Biblical Researches*, iii. 350; and he remarks that the largest specimen of the terebinth tree which he saw in Palestine still stands in the vicinity.

ELAM (ē'lam), (Heb. אֵלָם, *ay-lam'*, hidden).

1. Mentioned in Gen. x:22, as a son of Shem, from whom the tribe or nation mentioned in chapter xiv:1, along with the kingdom of Shinar in Babylon, descended; in Is. xxi:2, and Jer. xxv:25, Elam is connected with Media. In Ezra iv:9, the Elamites are described among the nations of the Persian empire; and in Dan. viii:2, Susa is said to lie on the river Ulai (Eulæus or Choaspes) in the province of Elam. These accounts lead to the conclusion that Elam was the same land which was designated by the Greeks and Romans by the name of Elymais, and which formed a part of the ancient Susiana, the modern Khusistan. Elam was inhabited by various tribes of people. The Elymæi or Elamæi, together with the Kissi seem to have been the oldest inhabitants not only of Susiana proper but also of Persia; whence the sacred writers, under the name of Elam, comprehended the country of the Persians in general. They were celebrated for skill in archery, and hence the historical propriety of the scriptural allusions to the quiver and the bow of the Elamites (Is. xxii:6; Jer. xlix:34). Indeed, in the latter text the bow is distinctly mentioned as the chief instrument of Elamite power—'I will break the bow of Elam, the chief of his might.'

It would seem that Elam was very early a separate state with its own kings; for in the time of Abraham we find that Chedorlaomer, king of Elam, extended his conquests west of the Euphrates as far as the Jordan and the Dead Sea (Gen. xiv:1). (See "CHEDORLAOMER;" also "ARIOCH.") Ezekiel (xxxii:24) mentions Elam among the mighty uncircumcised nations which had been the terror of the world; and about the same period (B. C. 590) Jeremiah threatened it with conquest and destruction by the Chaldeans (Jer. xlix:30, 34, sq.) This was accomplished probably by Nebuchadnezzar, who subjected Western Asia to his dominion; for we find his successor Belshazzar residing at Susa, the capital of Elam, a province then subject to that monarch (Dan. viii:1, 2; Rosenmüller's *Biblical Geography*, etc.) With this the scriptural notices of Elam end, unless we add that Elamites are found among those who were at Jerusalem at

the feast of Pentecost (Acts ii:9); which implies that Jews descended from the exiles were settled in that country. Here also they are mentioned next to the 'Medians,' with whom they are also coupled by the prophets (Is. xxi:2; Jer. xxv:25).

2. A Korhite Levite, the fifth son of Meshelemiah; one of the Bene-Asaph in the time of David, the king (1 Chron. xxvi:3), B. C. 1014.

3. A chief in the tribe of Benjamin and a son of Shashak (1 Chron. viii:24). B. C. 536.)

4. The children of Elam, 1,254 in number, returned with Zerubbabel from Babylon (Ezra ii:7; Neh. vii:12). With Ezra 71 more returned (Ezra viii:7).

5. In the same lists is another Elam who also returned with the same number of men (Ezra ii:31; Neh. vii:34). (B. C. before 536.) The coincidence is curious and suspicious. For the sake of distinction he is called "the other Elam."

6. A priest who assisted Nehemiah in the dedication of the new wall of Jerusalem (Neh. xii:42). (B. C. 446.)

7. One of the chiefs of the people who signed the covenant with Nehemiah (Neh. x:14). (B. C. 410.)

ELAMITES (ē'lam-ītes), (Heb. אֵלָמִי, *ale-marw-ye'*), were the original inhabitants of the country of Elam, and descendants of Shem. They probably derived their name from Elam, son of Shem (Gen. x:22). A Cossæan or Cushite invasion seems to have driven the Elamites, in part, to the mountains. (See ELAM.)

ELASAH (ē'l'a-sah), (Heb. אֵלֶּסָא, *el-aw-saw'*, God created).

1. One of the sons of Pashur, a priest, who married a Gentile wife (Ezra x:22). (B. C. 458.)

2. Son of Shaphan, who with another was sent to Nebuchadnezzar by King Zedekiah on a mission, and with a letter from Jeremiah, the prophet, to the captives at Babylon (Jer. xxix:3). (B. C. 594.)

Eleasah is the more correct rendering of the Hebrew.

ELATH (ē'lath), (Heb. אֵילָת, *ay-lath'*, a grove),

or **ELOTH** (ē'loth), (Heb. אֵילוֹת, *ay-loth'*, a grove).

It was a city of Idumæa, having a port on the eastern arm or gulf of the Red Sea, which thence received the name of Sinus Elaniticus (Gulf of Akaba). According to Eusebius, it was ten miles east from Petra. It lies at the extremity of the valley of Elghor, which runs at the bottom of two parallel ranges of hills, north and south, through Arabia Petræa, from the Dead Sea to the northern parts of the Elanitic Gulf.

(1) **Early Mention.** The first time that it is mentioned in the scriptures is in Deut. ii:8, where, in speaking of the journey of the Israelites towards the Promised Land, these words occur—'When we passed by from our brethren the children of Esau, which dwelt in Seir, through the way of the plain from Elath, and from Eziongeber.' These two places are mentioned together again in 1 Kings ix:26, in such a manner as to show that Elath was more ancient than Eziongeber, and was of so much repute as to be used for indicating the locality of other places: the passage also fixes the spot where Elath itself was to be found: 'and King Solomon made a navy of ships in Eziongeber, which is beside Elath, on the shore (Num. xxxiii:35) of the Red Sea, in the land of Edom.'

(2) **Under Israel's Kings.** The use which

David made of the vicinity of Elath shows that the country was at that time in his possession. Accordingly, in 2 Sam. viii:14, we learn that he had previously made himself master of Idumæa, and garrisoned its strongholds with his own troops. Under one of his successors, Joram (2 Kings viii:20), the Idumæans revolted from Judah, and elected a king over themselves. Joram thereupon assembled his forces, 'and all the chariots with him,' and, falling on the Idumæans by night, succeeded in defeating and scattering their army. The Hebrews, however, could not prevail, but 'Edom revolted from under the hand of Judah unto this day;' thus exemplifying the striking language employed (Gen. xxvii:40) by Isaac—'by thy sword shalt thou live, and shalt serve thy brother: and it shall come to pass when thou shalt have the dominion, that thou shalt break his yoke from off thy neck.' From 2 Kings xiv:22, however, it appears that Uzziah recovered Elath, and, having so repaired and adorned the city as to be said to have built, that is rebuilt it, he made it a part of his dominions. This connection was not of long continuance; for in ch. xvi. ver. 6 of the same book, we find the Syrian king Rezin interposing, who captured Elath, drove out the Jews, and annexed the place to his Syrian kingdom, and 'the Syrians came to Elath, and dwelt there unto this day.'

(3) **Roman Rule.** At a later period it fell under the power of the Romans, and was for a time guarded by the tenth legion, forming part of Palæstina Tertia (Jerome, *Onom. S. V. Ailath*; Strabo, xxi:4, 4; Reland, p. 556). It subsequently became the residence of a Christian bishop. In the days of its prosperity it was much distinguished for commerce, which continued to flourish under the auspices of Christianity. In the sixth century it is spoken of by Procopius as being inhabited by Jews subject to the Roman dominion (*De Bell. Pers.* i:19).

(4) **Under Islamism.** In A. D. 630, the Christian communities of Arabia Petræa found it expedient to submit to Mohammed, when John, the Christian governor of Ailah, became bound to pay an annual tribute of 300 gold-pieces (Abulfeda, *Ann.* i. 171). Henceforward, till the present century, Ailah lay in the darkness of Islamism.

(5) **Present Condition.** Mounds of rubbish alone mark the site of the town, while a fortress, occupied by a governor and a small garrison under the Pasha of Egypt, serves to keep the neighboring tribes of the desert in awe, and to minister to the wants and protection of the annual Egyptian Haj, or pilgrim caravan. This place has always been an important station upon the route of the Egyptian Haj. Such is the importance of this caravan of pilgrims from Cairo to Mecca, both in a religious and political point of view, that the rulers of Egypt from the earliest period have given it convoy and protection. For this purpose a line of fortresses similar to that of Akaba has been established at intervals along the route, with wells of water and supplies of provisions (Robinson's *Biblical Researches*, vol. i. p. 250).

J. R. B.

EL-BETHEL (ël'-bèth'-el), (Heb. אֱלֹהֵי בֵּית־אֵל, *ale-bayth-ale'*, the God of Bethel), God of Bethel, the name given by Jacob to an altar which he built (Gen. xxxv:7), and which stood, probably, in the very spot where he had formerly seen the prophetic dream of the ladder (Gen. xxviii:12). (See BETHEL.)

ELDAAH (ël'dā-ah or ël-dā'ah), (Heb. אֱלֹהֵי דָּוָא, *el-daw-aw'*, God of knowledge), one of the sons of Midian. The name does not occur except in Gen.

xxv:4 and 1 Chron. i:33 (B. C. after 2063). If there was any tribe that took this appellation no trace of it has been found.

ELDAD and **MEDAD** (ël'dād and mē'dād), (Heb. מֵדָד וְאֵדָד, *may-dawd' and el-dawd'*).

Two of the seventy elders appointed by Moses to assist him in the government of the people (Num. xi:16, 26, 27). Although not present with the others at the door of the tabernacle, they were equally filled with the Divine spirit and began to 'prophesy' in the camp. Joshua, thinking this irregular, requested Moses to forbid them. This he refused to do and expressed a wish that the gift of prophecy might be widely diffused (Num. xi:26-29). (B. C. 1658.)

ELDER (ël'dēr), (Heb. זָקֵן, *zaw-kane'*, old).

(1) Since in ancient times older persons would naturally be selected to hold public offices, out of regard to their presumed superiority in knowledge and experience, the term came to be used as the designation for the office itself, borne by an individual, of whatever age. But the term 'elder' appears to be also expressive of respect and reverence in general. The word occurs in this sense in Gen. l:7, 'Joseph went up to bury his father, and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt'; Sept. *presbuteroi, old men or elders.*

(2) These elders of Egypt were, probably, the various state-officers. The elders of Israel, of whom such frequent mention is made, may have been, in early times, the lineal descendants of the patriarchs (Exod. xii:21). To the elders Moses was directed to open his commission (Exod. iii:16) *to the assembly of elders of the sons of Israel.* They accompanied Moses in his first interview with Pharaoh as the representatives of the Hebrew nation (verse 18); through them Moses issued his communications and commands to the whole people (Exod. xix:7; Deut. xxxi:9); they were his immediate attendants in all the great transactions in the wilderness (Exod. xvii:5); seventy of their number were selected to attend Moses, Aaron, Nadab, and Abihu, at the giving of the law (Exod. xxiv:1), on which occasion they are called the *nobles* of the children of Israel, who did eat and drink before God, in ratification of the covenant, as representatives of the nation. In Num. xi:16, 17, we meet with the appointment of seventy elders to bear the burden of the people along with Moses; these were selected by Moses out of the whole number of the elders, and are described as being, already, officers over the children of Israel. It is the opinion of Michælis, that this council, chosen to assist Moses, should not be confounded with the Sanhedrim, which, he thinks, was not instituted till after the return from the Babylonish captivity. (See SANHEDRIM.)

(3) After the settlement in Canaan the elders seem to have been the administrators of the laws in all the cities (Deut. xix:12; xxi:3, 4, 6, 19; xxii:15, 25). The continuance of the office may be traced during the time of the judges (Judg. ii:7); during that of Samuel (1 Sam. xvi:4); under Saul (1 Sam. xxx:26); and David (1 Chron. xxi:16). The elders of Israel are mentioned during the captivity (Ezra x:14), consisting either of those who had sustained that office in their own land, or were permitted by the Babylonians to exercise it still among their countrymen. We meet with them again at the restoration (Ezra v:5), and by them the Temple was rebuilt (vi:14). After the restoration and during the time of the

Maecabees, the Sanhedrim, according to Michaelis, was instituted, being first mentioned under Hircanus II (Joseph. *Antiq.* 9, 3); but elders are still referred to in 1 Macc. vii:33. Among the members of the Sanhedrim were the *presbuteroi*, *elders*. Thus we find *the chief priest*, or more frequently, also 'chief priests and elders,' 'elders and scribes,' and various other collocations. Like the scribes, they obtained their seat in the Sanhedrim by election, or nomination from the executive authority. The word elder, with many other Jewish terms, was introduced into the Christian church. In the latter it is the title of inferior ministers, who were appointed overseers *among* not *over* the flock; Gr. ἐν ᾧ, Vulg. 'in quo' (Acts xx:17, 28; Tit. i:5, 7; 1 Pet. v:1-5). The term is applied even to the apostles (2 John 1; 3 John 1). So also πρεσβυτέριον, *body of elders*, certainly includes even St. Paul himself (comp. 1 Tim. iv:14 and 2 Tim. i:6). Still the apostles are distinguished from the elders elsewhere (Acts xv:6). The elder was constituted by an apostle or some one invested with apostolic authority (Acts xiv:23; see also the epistles to Timothy and John). The elders preached, confuted gainsayers (Tit. i:9), and visited the sick (James v:14). The word elders is sometimes used in the sense of ancients, ancestors, predecessors, like the word ἀρχαῖοι, *those of old* (Matt. v:21; Heb. xi:2). It is used *symbolically* (Rev. iv:4, etc.). The term *presbuteros*, *elder*, is plainly the origin of our word '*priest*' (see PRESBYTER). (Jahn *Biblisches Archäol.*, sec. 244; Mede's *Works*, fol. p. 27; Gesenius, *Wörterbuch*, s. v.) J. F. D.

ELEAD (ē'le-äd) (Heb. אֵלֵאָד, *el-awd'*, God defender), a descendant of Ephraim, either through Shuthelah, the patriarch, or his son by the same name. Some regard the second Shuthelah as a repetition of the first (1 Chron. vii:21).

ELEALEH (ē'le-ā'leh), (Heb. אֵלֵאֵלֵי, *el-aw-lay'*, whither God ascends), a town of the Reubenites east of the Jordan (Num. xxxii:3, 37); but which is named by the prophets as a city of the Moabites (Is. xv:4; xvi:9; Jer. xlvi:34).

It is usually mentioned along with Heshbon; and accordingly travelers find in the neighborhood of that city a ruined place, bearing the name of El Aal, which doubtless represents Elealeh. It stands upon the summit of a hill, and takes its name from its situation, Aal meaning 'high.' It commands the whole plain, and the view from it is very extensive. It is about a mile and a quarter northeast of Heshbon.

ELEASAH (e-lē'a-sah), (Heb. אֵלֵאָשָׁא, *el-aw-saw'* God made).

1. Son of Helez, a descendant of Judah through the family of Hezron (1 Chron. ii:39). (B. C. 1395.)

2. Son of Rapha, or Rephajah, and a descendant of Saul and Jonathan (1 Chron. viii:37; ix:43). (B. C. 960.) Elsewhere the name is written ELASAH in the A. V.

ELEAZAR (ē'le-ā'zar), (Heb. אֵלֵעָזָר, *el-aw-zawr'*, God is helper); this was an exceedingly common name among the Hebrews.

1. Eldest son of Aaron (Exod. vi:23, 25), who acted in his father's lifetime as chief of the tribe of Levi (Num. iii:32) (B. C. 1619), and at his death succeeded him in the high-priesthood (Num. xx:28, sq.). His pontificate was contemporary with the military government of Joshua, whom he appears to have survived. A perfectly good understanding seems at all times to have subsisted between Eleazar and Joshua, as we constantly

trace that co-operation and mutual support which the circumstances of the time and of the nation rendered so necessary. Eleazar is supposed to have lived twenty-five years after the passage of the Jordan, and the book of Joshua concludes with a notice of his death and burial.

2. A son of Aminadab, to whose care the ark was committed, when sent back by the Philistines (1 Sam. vii:1). It is believed that Eleazar was a priest, or at least a Levite, though his name is not inserted among the Levites. (B. C. 1124.)

3. One of the three most eminent of David's heroes, who 'fought till his hand was weary' in maintaining with David and the other two a daring stand against the Philistines after 'the men of Israel had gone away.' He was also one of the same three when they broke through the Philistine host to gratify David's longing for a drink of water from the well of his native Bethlehem (2 Sam. xxiii:9, 10, 13). (B. C. about 1046.) (See DAVID.)

4. The fourth of the Maceabean brothers, sons of the priest Mattathias (1 Macc. ii:5). He was crushed to death by the fall of an elephant which he stabbed under the belly in the belief that it bore the king, Antiochus Eupator (1 Macc. vi:43-46). (B. C. 164.)

5. An aged and venerable scribe who, 'as became his age, and the excellency of his ancient years, and the honor of his grey head,' chose rather to submit to the most cruel torments than conform to the polluting enactments of Antiochus Epiphanes (2 Macc. vi:18-31). (B. C. about 167.)

6. Son of Mahli and grandson of Merari. He was a Merarite Levite who is mentioned as having only daughters who were married to their "brethren," i. e., their cousins (1 Chron. xxiii:21, 22; xxiv:28). (B. C. about 1618.)

7. A priest who was present at the feast of dedication under Nehemiah (Neh. xii:42). (B. C. 446.)

8. Son of Parosh, a layman, who married a foreign wife and had to put her away (Ezra x:25). (B. C. 410.)

9. A Levite, son of Phinehas (Ezra viii:33). (B. C. 459.)

10. Son of Eliud, three generations above Joseph, the husband of Mary (Matt. i:15).

ELECT (ē-lēkt'), (Heb. בָּחַר, *baw-kheer'*, chosen and so rendered in 2 Sam. xxi:6), used to denote those selected by God for special office, work, honor, etc. (Is. xlii:1; xlv:4; lxxv:9, 22).

General Application of the Term. (1) Besides its scriptural and theological use, it had also an ecclesiastical meaning. (2) It was sometimes applied to the highest class of catechumens *elect* to baptism. (3) It was applied at other times to the baptized, admitted to the full privileges of their profession, and sometimes called the perfect. (4) The Manichæans were divided into two great classes, the *Audientes* and *Elect*.

ELECTA or **ECLECTA** (ē-lēk'tā), (Gr. ἑκλεκτή, *ek-lek-tay'*, chosen).

She was, as is generally believed, a lady of quality, who lived near Ephesus, to whom John addressed his second Epistle, cautioning her and her children against heretics, who denied the divinity of Christ, and his incarnation. Some think Electa, which signifies *chosen*, is not a proper name, but an honorable epithet; (*elect lady*, Eng. trans.) and that the Epistle was directed to a church. The same apostle salutes Electa, and her children, in his third Epistle; but the accounts of this Electa are as confused as those of the former. The Authorized Version translates the

words in question 'the elect lady,' an interpretation approved by Castalio, Beza, Mill, Wolf, Le Clerc, and Macknight. Most modern critics, however, Schleusner and Breitschneider in their Lexicons, Bourger (1763), Vater (1824), Goeschen (1832), and Tischendorf (1841), in their editions of the New Testament, Neander (*History of the Planting of the Christian Church*, vol. ii, p. 71, Eng. transl.), De Wette (*Lehrbuch*, p. 339), and Lücke (*Commentary on the Epistles of St. John*, pp. 314-320, Eng. transl.), agree with the Syriac and Arabic Versions in making *Kypta* a proper name, and render the words 'to the elect Cyria.' Lardner has given a copious account of critical opinions in his *History of the Apostles and Evangelists*, c. xx. *Works*, vi:284-288. J. E. R.

ELECTION (ĕ-lĕk'shŭn), (Gr. ἐκλογή, *ek-log-ay'*, choice, a picking out).

The act of choice. This word has different applications in the scriptures. (1) It signifies God's taking a whole nation, community, or body of men, into external covenant with himself, by giving them the advantage of revelation as the rule of their belief and practice, when other nations are without it (Deut. vii:6). (2) A temporary designation of some person or persons to the filling up of some particular station in the visible church, or office in civil life (John vi:70; 1 Sam. x:24). (3) The gracious act of the Divine Spirit, whereby God actually and visibly separates his people from the world by effectual calling (John xv:19). (4) That eternal, gratuitous, sovereign, and immutable purpose of God, whereby he selected from among all mankind, and of every nation under heaven, all those whom he effectually calls to be sanctified and everlastingly saved by Christ (Eph. i:4; 2 Thess. ii:13). (For the distinct Arminian and Calvinistic views see PREDESTINATION.)

ELELOHE-ISRAEL (ĕl'e-lō'he-iz'ra-el), (Heb. אֱלֹהֵי יִשְׂרָאֵל, *ale el-o-hay' yis-ra-w-ale'*, God, the mighty God of Israel, the name of an altar built by Jacob in a piece of ground which he bought of Hamor, Shechem's father (Gen. xxxiii.20).

ELEMENTS (ĕl'ĕ-ments), (Gr. στοιχεῖα, *stōi-khe'ah*). Hesychius explains στοιχεῖα by πῦρ, ὕδωρ, γῆ, καὶ ἀήρ, ἀφ' ὧν τὰ σώματα *fire, water, earth, and air, of which bodies are formed*. This, which is the simplest, may be called the primary sense of the word. A secondary use of the word relates to the *organized* parts of which anything is framed. The word occurs in its primary sense in 2 Pet. iii:10, 12.

Figurative. The word occurs in a *secondary* sense in Gal. iv:3-9, 'the elements or rudiments of the world,' which the Apostle calls 'very weak and poor elements,' or *beggarly elements*. He introduces the word to preserve the unity of his comparison of the law to a *pedagogue* (iii:24), and of persons under it, to children under tutors; and by the elements or *rudiments* of the world he evidently means that state of religious knowledge which had subsisted in the world, among Jews and Gentiles, before Christ; the weakness of which, among the Jews, may be seen in Heb. vii:18, 19; x:1, and among the Gentiles, in the Epistle to the Romans.

The word *Stoikcia*, in Heb. v:12 is restricted, by the addition of the utterances of God, to the rudiments of Christianity. (See Rosenmüller and Benson on the passages.) J. F. D.

ELEPH (ĕ'leph), (Heb. אֵלֶפֶת, with the art. *ha-eh'lef*, the ox), a town allotted to Benjamin (Josh. xviii:28). From its name it may be inferred that the inhabitants followed pastoral pursuits,

ELEPHANT (ĕl'ĕ-fant), (Gr. ἐλέφας, *el-eh'phas*, ivory; for the meaning of אֵילָנֵי שֵׁן, *shen-hab-beem'*, see IVORY).

The word occurs frequently in the 1st and 2nd books of Maccabees. It is not mentioned in the A.V. of the canonical scriptures except in the marginal readings (Job xl:15; 1 Kings x:22; 2 Chron. ix:21). The elephant is the largest of all terrestrial animals, sometimes reaching to above eleven feet of vertical height at the shoulders, and weighing from five to seven thousand pounds; he is of a black or slaty ash color, and almost destitute of hair. The head, which is proportionately large, is provided with two broad pendulous ears, particularly in those of the African species, which are occasionally six feet in length. This species has also two molar teeth on each side of the jaw, both above and below, and only three toe-nails on each of the hind feet; whereas the Asiatic species is provided with only one tooth on each side above and below; and though both have tusks or defences, the last-mentioned has them confined solely to the males; they are never of more than seventy pounds weight, often much less, and in some breeds even totally wanting; while in the African both sexes are armed with tusks, and in the males they have been known seven feet in length, and weighing above 150 pounds each. The forehead of the African is low; that of the Asiatic high; in both the eyes are comparatively small, with a malevolent expression, and on the temples are pores which exude a viscous humor; the tail is long, hanging nearly to the heels, and forked at the end. But the most remarkable organ of the elephant, that which equally enables the animal to reach the ground and to grasp branches of trees at a considerable height, is the proboscis or trunk; a cylindrical elastic instrument, in ordinary condition reaching nearly down to the ground, but contractile to two-thirds of its usual length, and extensile to one-third beyond it; provided with nearly 4,000 muscles crossing each other in such a manner that the proboscis is flexible in every direction, and so abundantly supplied with nerves as to render the organ one of the most delicate in nature.

Elephants are peaceable towards all inoffensive animals, sociable among themselves, and ready to help each other; gregarious in grassy plains; but more inclined to frequent densely-wooded mountain glens; at times not unwilling to visit the more arid wastes, but fond of rivers and pools, where they wallow in mud and water among reeds and under the shade of trees. The Asiatic species, carrying the head higher, has more dignity of appearance, and is believed to have more sagacity and courage than the African; which, however, is not inferior in weight or bulk, and has never been in the hands of such experienced managers as the Indian mahouts. C. H. S.

ELEUTHEROPOLIS (ĕl'e-ū-ther-op'o-lis), (Gr. Ἐλευθερόπολις, *el-yoo-ther-op'o-lis*, a free city), a place not named in Scripture, but which was an episcopal city of such importance in the time of Eusebius and Jerome that they assumed it as the point whence to estimate the distances and positions of other cities in Southern Palestine.

It continued to be a great city until the sixth century; but after that we lose sight of it.

Prof. Robinson has identified it with Beit-Jibrin, a village of moderate size, the capital of a district in the province of Gaza. In and around this village are ruins of different ages, more extensive than any which had been seen in Palestine, excepting the substructions of the ancient

temple at Jerusalem and the Harem at Hebron. These ruins consist principally of the remains of a fortress of immense strength, in the midst of an irregular rounded enclosure, encompassed by a very ancient and strong wall. This outer wall is built of large squared stones, uncemented. Along this wall on the inside, towards the west and northwest, is a row of ancient massive vaults with fine round arches, apparently of the same age as the wall itself, and both undoubtedly of Roman origin. In the midst of the area stands an irregular castle, the lower parts of which seem to be as ancient as the exterior wall; but it has obviously been built up again in modern times. An inscription over the gate shows that it was last repaired by the Turks A. H. 958 (A. D. 1551), nearly two years after the present walls of Jerusalem were built. Remains of ancient walls and dwellings extend up the valley; and at the distance of twenty minutes from the present village are the ruins of an ancient church, bearing the name of Santa Hanneh (St. Anne). Only the eastern end is now standing, including the niche of the great altar and that of a side chapel, built of large hewn stones of strong and beautiful masonry. Beit-Jibrin is twenty miles east of Askelon, and thirteen miles east-northeast from Hebron.

ELHANAN (el-hā'nan), (Heb. אֶלְחָנָן, *el-khaw-narwn'*, God is gracious).

1. A warrior of the time of David, who distinguished himself against the Philistines. According to 2 Sam. xxi:19, he was the son of Jaare Oregim, the Bethlehemite, and slew Goliath the Gittite. The A.V. inserts the words "the brother of" Goliath, etc., to make the passage conform with 1 Chron. xx:5, which says that Elhanan was the son of Jair or Jaor and slew Lahmi, Goliath's brother. The last is probably the more correct as Goliath, the Gittite, was killed by David (1 Sam. xvii); though this has been questioned. (B. C. 1020.)

2. Son of Dodo of Bethlehem. He was one of David's guard of "thirty" (2 Sam. xxiii:24; 1 Chron. xi:26).

ELI (ē'li), (Heb. אֵלִי, *ay-lee'*, ascent, summit, raised up).

1. A descendant of Aaron through Ithamar (Lev. x:1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 Kings ii:27), had a son, Ahimelech, who is expressly stated to have been "of the sons of Ithamar" (1 Chron. xxiv:3; comp. 2 Sam. viii:17; Joseph. *Antiq.* v. 9, 1).

(1) **High-Priest.** Eli is generally supposed to have been the first high-priest of the line of Ithamar, Aaron's youngest son. This is deduced from 1 Chron. xxiv:3, 6 (comp. as above, Joseph. *Antiq.* v. 9, 1). It also appears from the omission of the names of Eli and his immediate successors in the enumeration of the high-priests of Eleazar's line in 1 Chron. vi:4-6. What occasioned this remarkable transfer is not known—most probably the incapacity or minority of the then sole representative of the elder line; for it is very evident that it was no unauthorized usurpation on the part of Eli (1 Sam. ii:27, 28).

(2) **Judge.** Eli also acted as regent or civil judge of Israel after the death of Samson. This function, indeed, seems to have been intended, by the theocratical constitution, to devolve upon the high-priest, by virtue of his office, in the absence of any person specially appointed by the Divine King, to deliver and govern Israel. He is said to have judged Israel forty years (1 Sam. iv:18);

the Septuagint makes it twenty; and chronologers are divided on the matter. But the probability seems to be that the forty years comprehend the whole period of his administration as high-priest and judge, including, in the first half, the twenty years in which Samson is said to have judged Israel (Judg. xvi:31), when some of his civil functions in southern Palestine may have been in abeyance. As Eli died at the age of ninety-eight (1 Sam. iv:15), the forty years must have commenced when he was fifty-eight years old.

(3) **His Sons.** His sons, Hophni and Phinehas, whom he invested with authority, misconducted themselves so outrageously as to excite deep disgust among the people, and render the services of the tabernacle odious in their eyes. Of this misconduct Eli was aware, but contented himself with mild and ineffectual remonstrances, where his station required severe and vigorous action.

(4) **Prophetic Warnings.** For this neglect the judgment of God was at length pronounced upon his house, through the young Samuel, who, under peculiar circumstances (see SAMUEL), had been attached from childhood to his person (1 Sam. ii:29; iii:18).

(5) **Death.** Some years passed without any apparent fulfillment of this denunciation—but it came at length in one terrible crash, by which the old man's heart was broken. The Philistines had gained the upper hand over Israel, and the ark of God was taken to the field, in the confidence of victory and safety from its presence. But in the battle which followed, the ark itself was taken by the Philistines, and the two sons of Eli, who were in attendance upon it, were slain. The high-priest, then blind with age, sat by the wayside at Shiloh, awaiting tidings from the war, 'for his heart trembled for the ark of God.' A man of Benjamin, with his clothes rent, and with earth upon his head, brought the fatal news; and Eli heard that Israel was defeated—that his sons were slain—that the ark of God was taken—at which last word he fell heavily from his seat, and died (1 Sam. iv:18).

The ultimate doom upon Eli's house was accomplished when Solomon removed Abiathar (the last high-priest of this line) from his office, and restored the line of Eleazar in the person of Zadok. (See ABIATHAR.)

(6) **Character.** Eli seems to have been a religious man; there was no indication of hypocrisy or want of faith in God. But, though he may have been vigorous in other respects in his earlier years, he apparently had no adequate sense of paternal authority, and contented himself with a mild rebuke, when the most unbending severity was demanded, if lighter measures failed. It was no case of disrespect to himself or to a fellow-man, but the foulest abuse of the priesthood of Jehovah, which he had been appointed, as head, to guard and honor. He must have been not only an easy or indulgent parent, but cold and phlegmatic by nature, else such a scandal would have roused him to prompt and vigorous action. (Geikie, *Hours with the Bible.*)

2. The last of our Saviour's ancestors according to the flesh (Luke iii:23).

3. The exclamation of Christ on the cross (Matt. xxvii:46), (meaning "My God").

ELIAB (e-lī'ab), (Heb. אֵלִיָּאֵב, *el-ee-awb'*, God is father).

1. Son of Helon and chief of the tribe of Zebulun, when the census was taken in the wilder-

ness of Sinai (Num. i:9; ii:7; vii:24, 29; x:16). (B. C. 1657.)

2. Son of Pallu or Phallu, who belonged to one of the chief families of the tribe of Reuben. His sons or descendants Dathan and Abiram were leaders in the revolt against Moses (Num. xxvi:8, 9; xvi:1, 12; Deut. xi:6). (B. C. after 1856.)

3. The eldest of David's brothers (1 Chron. ii:13; 1 Sam. xvi:6; xvii:13, 28), (B. C. 1063), whose daughter Abihail married her second cousin Rehoboam (2 Chron. xi:18).

4. A Levite who was both doorkeeper and musician in the time of David (1 Chron. xv:18, 20; xvi:5). (B. C. 1013.)

5. A Gadite refugee, who fleeing from Saul came to David (1 Chron. xii:9). (B. C. 1061.)

6. According to 1 Chron. vi:27, a Levite, son of Nahath and ancestor of Samuel, the prophet. The name appears as Elihu in 1 Sam. i:1, and Eliel in 1 Chron. vi:34). (B. C. 1250.)

ELIADA (e-li'a-dā), (Heb. עֲלִיאָדָא, *el-yaw-daw'*, God is knowing).

1. Next to the youngest of the sons born to David after his establishment in Jerusalem (2 Sam. v:16; 1 Chron. iii:8). He was apparently the son of a wife and not a concubine. In 1 Chron. xiv:7, the name seems to be changed to Beeliada, but why, it is not possible to say. (B. C. 1033.)

2. A Benjamite warrior, who led 200,000 of his tribe to Jehoshaphat's army (2 Chron. xvii:17). (B. C. 945.)

ELIADAH (e-li'a-dah), (Heb. עֲלִיאָדָה, *el-yaw-daw'*, God knows), a less correct form of Eliada, an Aramite of Zobah, and father of Rezon, who harassed Solomon with a band of marauders (1 Kings xi:23).

ELIAH (e-li'ah) (Heb. אֵלִיָּהוּ, *ay-lee-yaw'*, God-Jehovah).

1. A son of Jeroham, a Benjamite. He was chief of his tribe (1 Chron. viii:27). (B. C. 1300.)

2. One of the sons of Elam, or Bene-Elam, who had taken a foreign wife (Ezra x:26). (B. C. 456.)

ELIAHBA (e-li'ah-bā), (Heb. אֵלִיָּהָבָא, *el-yakh-baw'*, whom God hides), a Shaalbonite, who was one of David's guard of 'thirty' (2 Sam. xxiii:32; 1 Chron. xi:33), B. C. 1046.

ELIAKIM (e-li'a-kim), (Heb. אֵלִיָּאִים, *el-yaw-keem'*, God of raising).

1. Son of Hilkiah, steward of the household, or keeper of the palace under King Hezekiah (2 Kings xviii:18, 26, 37).

2. See JEHOIAKIM.

3. A priest who assisted Nehemiah in the dedication of the new wall of Jerusalem (Neh. xii:41). (B. C. 446.)

4. Brother of Joseph, and father of Azor (Matt. i:13).

5. Son of Melea and father of Jonan (Luke iii:30, 31). (B. C. after 1013.)

ELIAM (e-li'am), (Heb. אֵלִיָּאָם, *el-ee-awm'*).

1. Father of David's wife Bath-sheba (2 Sam. xi:3). In 1 Chron. iii:5, his name is given as Ammiel and the daughter's as Bath-shua. (B. C. 1046.) The transposition of letters in Ammiel does not alter the meaning.

2. Son of Ahithophel, the Gilonite; he was one of David's "thirty" guards (2 Sam. xxiii:34). (B. C. 1048.) An ancient Jewish tradition says that the Eliams were the same person.

ELIAS (e-li'as), (Gr. Ἠλίας, *ay-lee'as*). See ELIJAH.

ELIASAPH (e-li'a-sāph), (Heb. אֵלִיָּאֶשָׁפ, *el-yaw-sawf'*, added of God).

1. Son of Deuel, and head of the tribe of Dan when the census was taken in Sinai (Num. i:14; ii:14; vii:42, 47; x:20). (B. C. 1657.)

2. Son of Lael, and a Levite chief (Num. iii:24). (B. C. 1657.)

ELIASHIB (e-li'a-shīb), (Heb. אֵלִיָּאֶשֶׁב, *el-yaw-sheeb'*, God will restore).

1. A high-priest, of the race of Eleazar, who succeeded Joiakim, in the time of Nehemiah (Neh. iii:1, 20, 21). (B. C. 445.)

2. A priest in the time of David. He occupied the eleventh place in the order of the governors of the sanctuary (1 Chron. xxiv:12). (B. C. 1013.)

3. A son of Elioenai of the royal family of Judah (1 Chron. iii:24).

4. A musician of the time of Ezra who had married a foreign wife (Ezra x:24). (B. C. 458.)

5. Son of Zattu (Ezra x:27). (B. C. 458.)

6. Son of Bani (Ezra x:36). These last two had also married foreign wives. (B. C. 458.)

ELIATHAH (e-li'a-thah), (Heb. אֵלִיָּאֶתָּה, *el-ee-aw-thaw*, to whom God comes), a son of Heman. He with twelve of his family had charge of the twentieth division of the temple service (1 Chron. xxv:4, 27), B. C. 1013.

ELIDAD (e-li'dad), (Heb. אֵלִיָּאֶדָד, *el-ee-dawd'*, loved of God), son of Chislon, of Benjamin, a deputy, appointed to divide the land of Canaan (Num. xxxiv:21), B. C. 1619.

ELIEL (ē'li-el), (Heb. אֵלִיָּאֶל, *el-ee-ale'*, God of gods).

1. A head of that portion of the tribe of Manasseh which was on the east of the Jordan (1 Chron. v:24). (B. C. 1612.)

2. One of the chiefs in the tribe of Benjamin (1 Chron. viii:20). (B. C. about 1340.)

3. Son of Toah, a forefather of the prophet Samuel. He is probably identical with Elihu 2. and Eliab (1 Chron. vi:34). (B. C. about 1250.)

4. A Mahavite and prominent in David's guard (1 Chron. xi:46). (B. C. 1048.)

5. A chief in the tribe of Benjamin, and one of the Bene-Shashak (1 Chron. viii:22). (B. C. 1340.)

6. A Levite who had charge of the temple offerings in the time of Hezekiah (2 Chron. xxxi:13). (B. C. 726.)

7. A Kohathite Levite, who was chief of the Bene-Chebron, when the ark was removed from the house of Obed-edom to Jerusalem (1 Chron. xv:9, 11). (B. C. 1042.)

8. One of the Gadites, who came to David across the Jordan when he was hiding from Saul in the wilderness (1 Chron. xii:11).

9. One of David's guard of thirty men (1 Chron. xi:47). (B. C. 1048.)

ELIENAI (ē'li-ē'na-ī), (Heb. אֵלִיָּעֵנַי, *el-ee-ay-nah'ee*, toward Jehovah are my eyes), one of the Bene-Shimhi, a Benjamite, and chief in the tribe (1 Chron. viii:20), B. C. 1340.

ELIEZER (ē-li-ē'zer), (Heb. אֵלִיָּעֶזֶר, *el-ee-eh'zer*, God of help).

This is the same name as Eleazar—whence came the abbreviated Lazar or Lazarus of the New Testament. It is proper to note this here, because the parable which describes Lazarus in Abraham's bosom (Luke xvi:23) has been supposed to contain a latent allusion to the name of

Eliezer, whom, before the birth of Ishmael and Isaac, Abraham regarded as his heir.

1. A steward of Abraham. Abraham, being promised a son, says:—"I go childless, and the steward of my house is this Eliezer of Damascus . . . Behold, to me thou hast given no seed; and, lo, one born in mine house is mine heir" (Gen. xv:2,3). The common notion is that Eliezer was Abraham's house-born slave, adopted as his heir, and meanwhile his chief and confidential servant, and the same who was afterwards sent into Mesopotamia to seek a wife for Isaac. This last point we may dismiss with the remark that there is not the least evidence that 'the elder servant of his house' (Gen. xxiv:2), whom Abraham charged with this mission, was the same as Eliezer; and our attention may therefore be confined to the verses which have been quoted.

It is obvious that the third verse is not properly a sequel to the second, but a repetition of the statement contained in the second; and, being thus regarded as parallel passages, the two may be used to explain each other.

'Eliezer of Damascus,' or 'Damascene-Eliezer,' is the subject of both verses. The obvious meaning is, that Eliezer was born in Damascus; and how is this compatible with the notion of his being Abraham's house-born slave, seeing that Abraham's household never was at Damascus?

The expression, 'the steward of mine house,' in verse 2, will explain the sense of 'one born in mine house is mine heir,' in verse 3. The first phrase, literally translated, is 'the son of possession of my house,' *i. e.* one who shall possess my house, my property, after my death; and is therefore exactly the same as the phrase in the next verse, 'the son of my house (paraphrased by 'one born in mine house') is mine heir.' This removes every difficulty.

This view, that Eliezer was actually Abraham's near relative and heir-at-law, removes another difficulty, which has always occasioned some embarrassment, and which arises from the fact, that while he speaks of Eliezer as his heir, his nephew Lot was in his neighborhood, and had been, until lately, the companion of his wanderings. If Eliezer was Abraham's servant, it might well occasion surprise that he should speak of him and not of Lot as his heir. (B. C. 2088.)

2. The second of the two sons born to Moses while an exile in the land of Midian (Exod. xviii:4). Eliezer had a son called Zebadiah (1 Chron. viii:17).

3. One of the sons of Becher and grandson of Benjamin (1 Chron. vii:8). (B. C. after 1856.)

4. One of the priests, who in the time of David, was appointed to accompany the ark on its removal from the house of Obed-edom to Jerusalem (1 Chron. xv:24). (B. C. 1043.)

5. Son of Zichri, ruler of the Reubenites in the reign of David (1 Chron. xxvii:16). (B. C. before 1013.)

6. A prophet, son of Dodavah (2 Chron. xx:37), who uttered a rebuke against Jehoshaphat (2 Chron. xx:35-37). (B. C. 895.)

7. Son of Jorim, descendant of Nathan, David's son (Luke iii:29).

8. A chief Israelite sent by Ezra to Casiphia on a commission (Ezra viii:16). (B. C. 457.)

9. A priest, who in the time of Ezra had married a foreign wife (Ezra x:18). (B. C. 456.)

10. A Levite, guilty of the same offense as 9 (Ezra x:23).

11. An Israelite who had also taken a foreign wife (Ezra x:31).

ELIHABA (e-lī'ha-ba). See ELIAHBA.

ELIHOENAI (ēl'i-ho-ē'na-ī), (Heb. אֱלִיחֹנַי, *el-ye-ho-ay-nah'ee*, toward Jehovah are my eyes), one of the sons of Bene-Pahathmoab, who returned under Ezra with 200 men from captivity (Ezra viii:4), B. C. 1043-13.

ELIHOREPH (ēl'i-hō'reph), (Heb. אֱלִיחֹרֵף, *el-ee-kho'ref*, God of autumn), he and his brother Ahiah were of the scribes of Solomon (1 Kings iv:3), B. C. 1015.

ELIHU (e-lī'hu), (Heb. אֱלִיחֻ, *el-ee-hoo'*, my God is he).

1. One of Job's friends, described as 'the son of Barachel, a Buzite, of the kindred of Ram' (Job xxxii:2). This is usually understood to imply that he was descended from Buz, the son of Abraham's brother Nahor, from whose family the city called Buz (Jer. xxv:23) also took its name. Elihu's name does not appear among those of the friends who came in the first instance to condole with Job, nor is his presence indicated till the debate between the afflicted man and his three friends had been brought to a conclusion. Then, finding there was no answer to Job's last speech, he comes forward with considerable modesty, which he loses as he proceeds, to remark on the debate, and to deliver his own opinion on the points at issue. The character and scope of his orations are described elsewhere. (See Job, Book of.) It appears, from the manner in which Elihu introduces himself, that he was by much the youngest of the party; and it is evident that he had been present from the commencement of the discussion, to which he had paid very close attention. This would suggest that the debate between Job and his friends was carried on in the presence of a deeply-interested auditory, among which was this Elihu, who could not forbear from interfering when the controversy appeared to have reached an unsatisfactory conclusion. (B. C. about 2200.)

2. Son of Tohu, and forefather of the prophet Samuel (1 Sam. i:1). In 1 Chron. vi:34, Eliel occurs in the same position; Elihu is probably correct.

3. Chief of the tribe of Judah (1 Chron. xxvii:18). It is probably a variation of Eliab 3.

4. One of the captains of "thousands" from the tribe of Manasseh who assisted David against the band of Amalekites (1 Chron. xii:20). (B. C. 1053.)

5. A porter in the house of Jehovah in the time of David. He was a Korhite Levite, the son of Shemaiah, of the family of Obed-edom (1 Chron. xxvi:7). (B. C. 1013.)

ELIJAH (e-lī'jah), (Heb. אֵלִיָּהוּ, *ay-lee-yaw'*, God-Jehovah).

This wonder-working prophet is introduced to our notice like another Melchizedek (Gen. xiv:18; Heb. vii:3), without any mention of his father or mother, or of the beginning of his days. From this silence of scripture as to his parentage and birth, much vain speculation has arisen.

1. Elijah and Ahab. Some suppose that Elijah is called a Tishbite from Tishbeh, a city beyond the Jordan. Others suppose that Tishbite means *converter* or *reformer*.

(1) **Denunciation.** The very first sentence that the prophet utters is a direful denunciation of Ahab; and this he supports by a solemn oath. 'As the Lord God of Israel liveth, before whom I stand, there shall not be dew or rain these years (*i. e.* three and a half years, Luke iv: 25; James

v:17), but according to my word' (1 Kings xvii:1). Before, however, he spoke thus, it would seem that he had been warning this most wicked king as to the fatal consequences which must result both to himself and his people, from the iniquitous course he was then pursuing: and this may account for the apparent abruptness with which he opens his commission.

We can imagine Ahab and Jezebel being greatly incensed against Elijah for having foretold and prayed that such calamities might befall them. For some time they might attribute the drought under which the nation suffered to natural causes and not to the interposition of the prophet.

(2) **The Brook Cherith.** When, however, they saw the denunciation of Elijah taking effect far more extensively than had been anticipated, they would naturally seek to wreak their vengeance upon him as the cause of their sufferings. But we do not find him taking one step for his own preservation, till the God whom he served said, 'Get thee hence, and turn thee eastward, and hide thyself by the brook Cherith, that is before Jordan; and it shall be that thou shalt drink of the brook; and I have commanded the ravens to feed thee there' (1 Kings xvii:3, 4). Other and better means of protection from the impending danger might seem open to him; but, regardless of these, he hastened to obey the Divine mandate, and 'went and dwelt by the brook Cherith that is before Jordan' (1 Kings xvii:5). (See **CHERITH.**)

Some commentators, availing themselves of the fact that *orebin*, which we translate *ravens*, means, in Ezek. xxvii:27, *merchants*, have tried to explain away the miraculous character of God's preservation of his servant at Cherith. Others again have thought that the original signifies *Arabians*, as in 2 Chron. xxi:16; Neh. iv:7; where the like word is used; or possibly the inhabitants of the city Arabah, near Beth-shan (Josh. xv:6, and xviii:18, etc.). In the face of such opinions as these, we still believe that ravens and not men were the instruments which God, on this occasion, employed to carry needful food to his exiled and persecuted servant; and in this he would give us a manifest proof of His sovereignty over all creatures. But, it has been inquired, how could these birds obtain food of a proper kind, and of a sufficient quantity, to supply the daily wants of the prophet? The answer to this inquiry is very simple. We cannot tell. It is enough for us to know that God engaged to make a provision for him, and that He failed not to fulfill his engagement. We need not to speculate, as some have done, as to whether this supply was taken from Ahab's or Jehoshaphat's table, or from that of one of the seven thousand of Israel who had not bowed the knee to Baal.

A fresh trial now awaits this servant of God, and in the manner in which he bears it we see the strength of his faith. For one year, as some suppose, God had miraculously provided for his bodily wants at Cherith; but the brook which heretofore had afforded him the needful refreshment there became dried up.

(3) **Zarephath.** Encouraged by past experience of his heavenly Father's care of him, the prophet still waited patiently till He said, 'Arise (1 Kings xvii:9), get thee to Zarephath, which belongeth to Zidon, and dwell there; behold, I have commanded a widow woman there to sustain thee.' He then, at once, set out on the journey, and now arrived at Zarephath, he, in the arrangement of God's providence, met, as he entered its gate, the very woman who was deputed to give him immediate support.

But his faith is again put to a sore test, for he found her engaged in a way which was well calculated to discourage all his hopes; she was gathering sticks for the purpose, as she assured him, of cooking the last meal, and now that the famine prevailed there, as it did in Israel, she saw nothing before her and her only son but starvation and death. How then could the prophet ask for, and how could she think of giving, a part of her last morsel?

The same Divine Spirit inspired him to assure her that she and her child should be even miraculously provided for during the continuance of the famine; and also influenced her heart to receive, without doubting, the assurance. The kindness of this widow in baking the first cake for Elijah was well requited with a prophet's reward (Matt. x:41, 42). She afforded one meal to him, and God afforded many to her (see 1 Kings xvii:16).

(4) **Answered Prayer.** God saw fit to visit them with a temporary calamity which is narrated as follows: 'And it came to pass that the son of the woman, the mistress of the house, fell sick; and his sickness was so sore that there was no life left in him' (1 Kings xvii:17). Verse 18 contains the expostulation with the prophet of this bereaved widow; she rashly imputes the death to his presence. Elijah retaliates not, but calmly takes the dead child out of the mother's bosom, and lays it on his own bed (verse 19), that there he may, in private, pray the more fervently for its restoration. His prayer was heard, and answered by the restoration of life to the child, and of gladness to the widow's heart.

(5) **Message to Ahab.** Since now, however, the long-protracted famine, with all its attendant horrors, failed to detach Ahab and his guilty people from their abominable idolatries, God mercifully gave them another opportunity of repenting and turning to Himself. For three years and six months (James v:17) the destructive famine had spread its deadly influence over the whole nation of Israel. Such was the state of things in Israel when Elijah once again stood before Ahab. Wishing not to tempt God by going unnecessarily into danger, he first presented himself to good Obadiah (1 Kings xviii:7). This principal servant of Ahab was also a true servant of God; and in recognizing the prophet he treated him with honor and respect. Elijah requested him to announce to Ahab that he had returned. Obadiah, apparently stung by the unkindness of this request, replied, 'What have I sinned, that thou shouldest thus expose me to Ahab's rage, who will certainly slay me for not apprehending thee, for whom he has so long and so anxiously sought in all lands and in all confederate countries, that they should not harbor a traitor whom he looks upon as the author of the famine,' etc. Moreover, he would delicately intimate to Elijah how he had actually jeopardized his own life in securing that of one hundred of the Lord's prophets, and whom he had fed at his own expense. Satisfied with Elijah's reply to this touching appeal, wherein he removed all his fears about the Spirit's carrying himself away (as 2 Kings ii:11-16; Acts viii:39), he resolves to be the prophet's messenger to Ahab.

(6) **Meeting with the King.** Intending to be revenged on him, or to inquire when rain might be expected, Ahab now came forth to meet Elijah. He at once charged him with being the main cause of all the calamities which he and the nation had suffered. But Elijah flung back the charge upon himself, assigning the real cause to be his own sin of idolatry. Regarding, however, his magis-

terial position, while he reproved his sin, he requests him to exercise his authority in summoning an assembly to Mount Carmel, that the controversy between them might be decided, whether the king or the prophet was Israel's troubler.

(7) **Mount Carmel.** Whatever the secret motives which induced Ahab to comply with this proposal, God directed the result. Elijah offered to decide this controversy between God and Baal by a miracle from Heaven (1 Kings xviii:19). As fire was the element over which Baal was supposed to preside, the prophet proposes (wishing to give them every advantage), that, two bullocks being slain, and laid each upon a distinct altar, the one for Baal, the other for Jehovah, whichever should be consumed by fire must proclaim whose the people of Israel were, and whom it was their duty to serve.

(8) **Priests of Baal.** Elijah wills to have summoned not only all the elders of Israel, but also the four hundred priests of Baal belonging to Jezebel's court, and the four hundred and fifty who were dispersed over the kingdom (verse 19). Confident of success, because doubtless God had revealed the whole matter to him, he enters the lists of contest with the four hundred and fifty priests of Baal. Having reconstructed an altar which had once belonged to God, with twelve stones—as if to declare that the twelve tribes of Israel should again be united in the service of Jehovah—and having laid thereon his bullock, and filled the trench by which it was surrounded with large quantities of water, lest any suspicion of deceit might occur to any mind, the prophet gives place to the Baalites—allows them to make trial first. In vain did these deceived and deceiving men call, from morning till evening, upon Baal—in vain did they now mingle their own blood with that of the sacrifice: no answer was given—no fire descended (verse 26).

(9) **Descent of Fire.** Elijah having rebuked their folly and wickedness with the sharpest irony, and it being at last evident to all that their efforts to obtain the wished-for fire were vain, now, at the time of the evening sacrifice, offered up his prayer. The Baalites' prayer was long, that of the prophet is short—charging God with the care of His covenant, of His truth, and of His glory—when, behold, 'the fire came down, licked up the water, and consumed not only the bullock, but the very stones of the altar also' (verse 38). The effect of this on the mind of the people was what the prophet desired: acknowledging the awful presence of the Godhead, they exclaim, as with one voice, 'The Lord He is God; the Lord He is God!' Seizing the opportunity whilst the people's hearts were warm with the fresh conviction of this miracle, he bade them take those juggling priests and kill them.

(10) **Answer to Prayer for Rain.** All this Elijah might lawfully do at God's direction, and under the sanction of His law (Deut. xiii:5; xviii:20). Ahab having now publicly vindicated God's violated law by giving his royal sanction to the execution of Baal's priests, Elijah informed him that he may go up to his tent on Carmel to take refreshment, for God will send the desired rain (verse 41). In the meantime he prayed earnestly (James v:17, 18) for this blessing: God hears and answers: a little cloud arises out of the Mediterranean sea, in sight of which the prophet now was, diffuses itself gradually over the entire face of the heavens, and now empties its refreshing waters upon the whole land of Israel! Here was another proof of the Divine mission of the prophet, from which, we should imagine, the whole nation

must have profited; but subsequent events would seem to prove that the impression produced by these dealings of God was of a very partial and temporary character. Impressed with the hope that the report of God's miraculous actings at Carmel might not only reach the ear, but also penetrate and soften the hard heart of Jezebel, and anxious that the reformation of his country should spread in and about Jezreel also, Elijah, strengthened, as we are told, from on high, now accompanies Ahab thither on foot.

(11) **Jezebel.** How ill-founded the prophet's expectation was, subsequent events too painfully proved. Jezebel, instead of receiving Elijah obviously as the messenger of God for good to her nation, now secretly conceives and openly declares her fixed purpose to put him to death (1 Kings xix:1). Terrified by the knowledge of this vile woman's design he fled into the wilderness and there longed for death.

(12) **Angel Ministry.** But God is still gracious to him. He now, alone in the wilderness and at Mount Horeb, will at once touch his heart and correct his petulance by the ministration of His angel, and by a fearful exhibition of His Divine power. And having done this, revealing Himself in the gentle accents of a still voice, He announces to him that he must go and anoint Hazael king over Syria, Jehu king over Israel, and Elisha prophet in his own place, ere death can put a period to his labors (1 Kings xix:15). When God had comforted His prophet by telling him of these three instruments he had in store to vindicate his own insulted honor, then he convinced him of his mistake in saying 'I only am left alone,' etc., by the assurance that there were seven thousand in Israel who had not bowed the knee to Baal.

(13) **Elisha.** Leaving the cave of Horeb, Elijah now proceeded to the field where he found Elisha in the act of ploughing, and, without uttering a word, he cast his prophet's mantle over him, which was a symbol of his being clothed with God's spirit (verse 19). The Divine impression produced upon the mind of Elisha by this act of Elijah made him willing to leave all things and follow him.

(14) **Naboth.** For about six years from this calling of Elisha we find no notice in the sacred history of Elijah, till God sent him once again to pronounce sore judgments upon Ahab and Jezebel for the murder of unoffending Naboth (1 Kings xxi:17, etc.). How he and his associate in the prophetic office employed themselves during this time we are not told. We need not dwell upon the complicated character of Ahab's wickedness (1 Kings xxi) in winking at the murderous means whereby Jezebel procured for him the inalienable property of Naboth. (See АНАБ; НАВОТН.) When he seemed to be triumphing in the possession of his ill-obtained gain, Elijah stood before him, and threatened him, in the name of the Lord (1 Kings xxi:19-25), B. C. 869 (comp. 2 Kings ix:21-26 inclusive), that God would retaliate blood for blood, and that not on himself only—'his seventy sons shall die, and (comp. 2 Kings ix:10) Jezebel shall become meat for dogs.' Fearing that these predictions would prove true, as those about the rain and fire had done, Ahab now assumed the manner of a penitent; and, though subsequent acts proved the insincerity of his repentance, yet God rewards his temporary abasement by a temporary arrest of judgment. We see, however, in after parts of this sacred history, how the judgments denounced against

him, his abandoned consort, and children, took effect to the very letter.

2. Elijah and Ahaziah. Elijah again retires from the history till an act of blasphemy on the part of Ahaziah, the son and successor of Ahab, causes God to call him forth.

(1) Message to Ahaziah. Ahaziah met with an injury, and, fearing that it might be unto death, he, as if to prove himself worthy of being the son of idolatrous Ahab and Jezebel, sent to consult Baalzebub, the idol-god of Ekron; but the Angel of the Lord told Elijah to go forth and meet the messengers of the king (2 Kings i:3, 4), and assure them that he shall not recover. Suddenly reappearing before their master, he said unto them, 'Why are ye now turned back?' when they answered, 'there came a man up to meet us, and said unto us, Go, turn again unto the king that sent you, and say unto him, thus saith the Lord: is it not because there is no God in Israel that thou sendest to inquire of Baalzebub, the god of Ekron? Wherefore thou shalt not come down from that bed on which thou art gone up, but shalt surely die.'

(2) Armed Men. Conscience seems to have at once whispered to him that the man who dared to arrest his messengers with such a communication must be Elijah, the bold but unsuccessful reprover of his parents. Determined to chastise him for such an insult, he sent a captain and fifty armed men to bring him into his presence; but lo! at Elijah's word the fire descends from Heaven and consumes the whole band! Attributing this destruction of his men to some natural cause, he sent forth another company, on whom though the same judgment fell, this impious king is not satisfied till another and a similar effort is made to capture the prophet. The captain of the third band implored mercy at the hands of the prophet, and mercy was granted.

(3) Death of Ahaziah. Descending at once from Carmel, he accompanies him to Ahaziah. Fearless of his wrath Elijah now repeats to the king himself what he had before said to his messengers, and agreeably thereto, the sacred narrative informs us that Ahaziah died.

(4) Translation of Elijah. The above was the last more public effort which the prophet made to reform Israel. His warfare being now accomplished on earth, God, whom he had so long and so faithfully served, will translate him in a chariot of fire to Heaven. Conscious of this, he determines to spend his last moments in imparting Divine instruction to, and pronouncing his last benediction upon, the students in the colleges of Beth-el and Jericho; accordingly, he made a circuit from Gilgal, near the Jordan, to Beth-el, and from thence to Jericho. Wishing either to be alone at the moment of being caught up to Heaven; or, what is more probable, anxious to test the affection of Elisha (as Christ did that of Peter), he delicately intimates to him not to accompany him in this tour. But the faithful Elisha, to whom, as also to the schools of the prophets, God had revealed his purpose to remove Elijah, declares with an oath his fixed determination not to forsake his master now at the close of his earthly pilgrimage. Ere yet, however, the chariot of God descended for him, he asks what he should do for Elisha. The latter, feeling that, as the former's successor, he was, in a sense, his son, and, therefore, entitled to a double portion; or rather, conscious of the complicated and difficult duties which now awaited him, asks for a double portion of Elijah's spirit. Elijah, acknowl-

edging the magnitude of the request, yet promises to grant it on the contingency of Elisha seeing him at the moment of his rapture. Possibly this contingency was placed before him in order to make him more on the watch, that the glorious departure of Elijah should not take place without his actually seeing it. Whilst standing on the other side of the Jordan, whose waters were miraculously parted for them to pass over on dry ground, and possibly engaged in discourse about anointing Hazael king over Syria, angels descended, as in a fiery chariot, and, in the sight of fifty of the sons of the prophets and Elisha, carried Elijah into Heaven. Elisha, at this wonderful sight, cries out, like a bereaved child, 'My Father, my Father, the chariot of Israel and the horsemen thereof;' as if he had said, Alas! the strength and saviour of Israel is now departed! But no; God designed that the mantle which fell from Elijah as he ascended should now remain with Elisha as a pledge that the office and spirit of the former had now fallen upon himself. J. W. D.

(5) Elijah on the Mount of Transfiguration. That wild figure, that stern voice, those deeds of blood, which stand out in such startling relief from the pages of the old records of Elijah, are seen by us all silvered over with the "white and glistering" light of the Mountain of Transfiguration (Matt. xvii:2; Mark ix:2). When he last stood on the soil of his native Gilead he was destitute, afflicted, tormented, wandering about "in sheep-skins and goat-skins, in deserts and mountains, and dens and caves of the earth." But these things have passed away into the distance, and with them has receded the fiery zeal, the destructive wrath, which accompanied them. Under that heavenly light they fall back into their proper proportions, and Ahab and Jezebel, Baal and Ash-toreth are forgotten, as we listen to the prophet talking to our Lord—talking of that event which was to be the consummation of all that he had suffered and striven for—"talking of his decease which he should accomplish at Jerusalem." (Smith, *Bib. Dict.*)

3. Character. Elijah's character was one of great moral sublimity and unquestioning faith in God. The sterner side of his nature is mainly portrayed in the Old Testament. But the references in the New Testament set forth a very different side of his character to that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (James v:17); of his kindness to the widow of Sarepta (Luke iv:25); of his "restoring all things" (Matt. xvii:11); "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv:5, 6; Luke i:17). The moral lessons to be derived from these facts must be expanded elsewhere than here; it will be sufficient in this place to call attention to the great differences which may exist between the popular and contemporary view of an eminent character, and the real settled judgment formed in the progress of time, when the excitement of his more brilliant but more evanescent deeds has passed away. Precious indeed are the scattered hints and faint touches which enable us thus to soften the harsh outlines or the discordant coloring of the earlier picture. (Smith, *Bib. Dict.*)

ELIKA (e-lī'kā), (Heb. אֵלִיקָא, *el-ee-kaw'*, God his rejecter), one of David's guard (2 Sam. xxiii:25). He was a Harodite, i. e., from some place called Charod, but his name is wanting in the corresponding list (1 Chron. xi:27), B. C. 1046.

ELIM (ē'lim), (Heb. עֵלִים, *ay-leem'*, trees), second station in the desert of Israel (Exod. xv:27; Num. xxxiii:9), where they encamped for a month (Exod. xvi:1).

ELIMELECH (e-līm'e-lēk), (Heb. אֵלִמֶלֶךְ, *el-ee-meh'lek*, God the king), a native of Bethlehem, husband of Naomi, and father by her of two sons, Mahlon and Chilion (B. C. 1368). In a time of scarcity he withdrew with his family into the land of Moab, where he died (Ruth i:1-3). (See NAOMI; RUTH).

ELIOENAI (e-lī-o-ē'na-ī), (Heb. אֵלִיֹּעֲנַי, *el-yo-ay-nah'ee*, a contracted form of the name Elihoenai, *toward Jehovah are my eyes*).

1. A descendant of Benjamin and head of one of the families of the sons of Becher (1 Chron. vii:8). (B. C. 1856.)

2. Head of one of the families of the Simeonites (1 Chron. iv:36). (B. C. 1618.)

3. Grandson of Kore and son of Meshelemiah. He was a Korhite Levite, who with his father and sixteen others of his brothers and relatives guarded the east-gate of the "house of Jehovah." As there were six Levites daily on guard at this gate, his turn would come every third day (1 Chron. xxvi:3, 17). (B. C. 1015.)

4. Eldest son of Neariah, son of Shemaiah. This would make him in the seventh generation from Zerubbabel (1 Chron. iii:23, 24). (B. C. 460.)

5. Son of Pashur, and one of the priests in the days of Ezra, who married foreign wives (Ezra x:22). Perhaps he is the same as the one mentioned in (Neh. xii:41), who assisted with trumpets at the dedication of the wall of Jerusalem. (B. C. 457.)

6. Son of Zattu (Ezra x:27). He had married a foreign wife. (B. C. 457.)

ELIPHAL (ēl'i-phāl), (Heb. אֵלִיפָאֵל, *el-ee-fawl'*, God his judge), one of David's guard, the son of Ur (1 Chron. xi:35), B. C. 1046. In 2 Sam. xxiii:34, the name is given ELIPHELET. (See UR.)

ELIPHALET (e-līph'a-lēt), (Heb. אֵלִיפָאֵלֶת, *el-ee-feh'let*, God delivers), the thirteenth and last of the sons born to David after his establishment in Jerusalem (2 Sam. v:16; 1 Chron. xiv:7). In 1 Chron. iii:8 the name appears as ELIPHELET. ELPALET and PHALTIEL are also equivalents. (See ELIPHELET.)

ELIPHAZ (ēl'i-phāz), (Heb. אֵלִיפָאֵז, *el-ee-faz'*, God the strong).

1. A son of Esau and Adah (Gen. xxxvi:4, 10, 11, 16; 1 Chron. i:35, 36). (B. C. after 1963.)

2. One of the three friends who came to condole with Job in his affliction, and who took part in that remarkable discussion which occupies the book of Job. (B. C. about 2200). He was of Teman in Idumæa; and as Eliphaz the son of Esau had a son called Teman, from whom the place took its name, there is reason to conclude that this Eliphaz was a descendant of the former Eliphaz. Some, indeed, even go so far as to suppose that the Eliphaz of Job was no other than the son of Esau. This view is of course confined to those who refer the age of Job to the time of the patriarchs.

Eliphaz is the first of the friends to take up the debate, in reply to Job's passionate complaints. The scope of his argument and the character of his oratory are described under another head. (See JOB, BOOK OF.) He appears to have been the oldest of the speakers, from which circumstance, or from natural disposition, his language is more

mild and sedate than that of any of the other speakers. He begins his orations with delicacy, and conducts his part of the argument with considerable address. His share in the controversy occupies chapters iv, v, xv, xxii.

ELIPHELEH (e-līph'e-lēh), (Heb. אֵלִיפְּהֵלֵי, *el-ee-fe-lay'hoo*, whom God makes distinguished, whom God distinguishes), a Merarite Levite. David appointed him to play the harp at the time the Ark was brought up to Jerusalem (1 Chron. xv:18, 21), B. C. 982.

ELIPHELET (e-līph'e-lēt), (Heb. אֵלִיפְּהֵלֶת, *el-ee-feh'let*, God of deliverance).

1. One of the sons of David, born after his establishment in Jerusalem (1 Chron. iii:6). The name is given Elpalet (1 Chron. xiv:5, 6). In 1 Chron. iii:8, the name occurs again as one of the sons of David. It is believed by some that there were not two sons by this name, but that it is a transcriber's mistake. Both are omitted in Samuel; but both appear in two separate lists in Chronicles. (B. C. 989.)

2. One of David's "thirty," son of Ahasbai, son of the Maachathite (2 Sam. xxiii:34). (B. C. 1048.) In 1 Chron. xi:35, the name appears as Eliphai.

3. Son of Eshek and descendant of Saul and Jonathan (1 Chron. viii:39). (B. C. 830.)

4. A leader of the Bene-Adonikam, who returned with Ezra from Babylon (Ezra viii:13). (B. C. 459.)

5. One of the Bene-Hashum who, in the time of Ezra, married a foreign wife (Ezra x:33). (B. C. 458.)

ELISABETH (e-līz'a-bēth), (Gr. Ἑλισάβετ, *el-ee-sab'et*, from Heb. אֵלִישֶׁבַת, *el-ee-sheh'bah*, God her oath), wife of Zacharias, and mother of John the Baptist (Luke i:5). The name in this precise shape does not occur in the Old Testament, where the names of few females are given. But it is a Hebrew name, the same in fact as ELISHEBA (which see).

ELISEUS (ēl'i-sē'us), (Gr. Ἐλισσαῖος), the same as Elisha in the English Translation of the New Testament (Luke iv:27).

ELISHA (e-lī'shà), (Heb. אֵלִישָׁע, *el-ee-shaw'*, God the deliverer).

(1) **Call.** For the manner and the circumstances in which Elisha was called to the prophetic office, see ELIJAH.

(2) **Successor to Elijah.** Anxious to enter at once upon the duties of his sacred office, Elisha determined to visit the schools of the prophets which were on the other side of the Jordan. Accordingly, returning to this river, and wishing that sensible evidence should be afforded, both to himself and others, of the spirit and power of his departed master resting upon him, he struck its waters with Elijah's mantle, when they parted asunder and opened a way for him to pass over on dry land. Witnessing this miraculous transaction, the fifty sons of the prophets, who had seen from the opposite side Elijah's ascension, and who were awaiting Elisha's return, now, with becoming reverence, acknowledged him their spiritual head. (B. C. about 846.)

(3) **Divine Authority.** The Divine authority by which Elisha became the successor of Elijah received further confirmation from the miracle whereby the bitter waters of Jericho were made sweet, and the place thereby rendered fit for the habitation of man (2 Kings ii:19-22).

As the general visitor of the schools of the

prophets, Elisha now passes on from Jericho to the college which was at Bethel.

(4) **Mocked.** Ere, however, he entered Bethel, there met him from thence (2 Kings ii:23, 24) children, or young people, who, no doubt instigated by their idolatrous parents, tauntingly told him to ascend into heaven, as did his master, Elijah. There was in their expressions an admixture of rudeness, infidelity, and impiety. But the inhabitants of Bethel were to know from bitter experience, that to dishonor God's prophets was to dishonor Himself; for Elisha was at the moment inspired to pronounce the judgment which at once took effect: God, who never wants for instruments to accomplish his purposes, caused two she-bears to emerge from a neighboring wood, and destroy the young delinquents.

(5) **Assists Jehoram.** Jehoram, who reigned over Israel at this time, though not a *Baalite*, was yet addicted to the sin of Jeroboam: still he inherits the friendship of Jehoshaphat, the good king of Judæa, whose counsel, possibly, under God, had detached him from the more *gross idolatry* of his father Ahab. Wishing to see the now revolted king of Moab reduced to his wonted allegiance to Israel, Jehoshaphat determined to go up to battle against him, together with Jehoram, and his own tributary the king of Edom. These combined armies met together on the plains of Edom. Confident in their own powers they press onward against the enemy; but, not meeting him, another of a more formidable character started up before them. In the midst of the arid plains of Arabia Petræa they could find no water. Jehoram deploras the calamity into which they had fallen, but Jehoshaphat inquired for a prophet. On this, one of his courtiers said to Jehoram, 'Here is Elisha, the son of Shaphat, who poured water on the hands of Elijah.' No sooner were they made acquainted with the fact that Elisha was at hand than the three kings waited upon him. Elisha, feeling that it was nought but superstitious fear, joined to the influence of Jehoshaphat, which led Jehoram thus to consult him, now indignantly and tauntingly advises him to go for succor to the gods of his father Ahab and of his mother Jezebel. The reprovèd monarch was then led to acknowledge the impotency of those gods in whom he had trusted, and the power of that God whom he had neglected. Still the man of God, seeing the hollowness of Jehoram's humiliation, continues: 'As the Lord liveth, before whom I stand, surely were it not that I regard the presence of Jehoshaphat, the king of Judah, I would not look toward thee.' Having thus addressed Jehoram, Elisha desired a minstrel to be brought before him; and now when his spirit is calmed by, perhaps, one of the songs of Zion, Jehovah approaches His prophet in the power of inspiration, as it is written, 'The hand of the Lord came upon him.' The minstrel ceases, and Elisha communicates the joyful intelligence that not only should water be miraculously supplied, but also that Moab should be overcome. Accordingly the next morning they realized the truth of this prediction. But the same water which preserves their lives becomes the source of destruction to their enemies. The Moabites, who had received intelligence of the advance of the allied army, were now assembled upon their frontiers. When the sun was up, and its rosy light first fell upon the water, their vanguard, beholding it at a distance, supposed it to be blood. Thus the notion was rapidly spread from one end to another that the kings were surely slain, having fallen out amongst themselves. Hence there was a universal

shout, 'Moab, to the spoil!' and they went forward confident of victory. But beholding the Israelitish squadrons advancing to meet them they fled in the utmost panic and confusion (2 Kings iii:4-24, etc).

The war having terminated in the signal overthrow of the revolters, Elisha, who had returned home, is again employed in ministering blessings.

(6) **The Widow's Oil.** The widow of a pious prophet presents herself before him (2 Kings iv:), informs him that her husband having died in debt, his creditors were about to sell her two only sons, which, by an extension of the law (Exod. xxi:7, and Lev. xxv:39), and by virtue of another (Exod. xxii:3), they had the power to do; and against this hard-hearted act she implores the prophet's assistance. Elisha therefore inquired how far she herself had the power to avert the threatened calamity. She replies that the only thing of which she was possessed was one pot of oil. By multiplying this, as did his predecessor Elijah in the case of the widow of Zarephath, he enabled her at once to pay off her debts and thereby to preserve the liberty of her children (2 Kings iv:1-7).

(7) **Elisha and the Shunammite.** In his visitations to the schools of the prophets his journey lay through the city of Shunem, where lived a rich and godly woman. Wishing that he should take up, more than occasionally, his abode under her roof, she proposed to her husband to construct for him a chamber. The husband at once consented, and, the apartment being completed and fitted up in a way that showed their proper conception of his feeling, the prophet becomes its occupant. The woman was childless, and the gratitude of the prophet for her disinterested kindness was evinced by the gift of a son, which the Lord, in answer to his prayer, bestowed upon her. This new pledge of their affection grows up till he is able to visit his fond father in the harvest-field, when all the hopes they had built up in him were overthrown by his being suddenly laid prostrate in death.

The bereaved mother, with exquisite tenderness towards the feelings of the father, concealed the fact that the child was no more till she should see if it might please God, through Elisha, to restore him to life. She therefore hastens to Carmel, where she found the prophet, and informed him what had taken place. Conceiving probably that it was a case of mere suspended animation, or a swoon, the prophet sent Gehazi, his servant, to place his staff on the face of the child, in the hope that it might act as a stimulus to excite the animal motions. But the mother, conscious that he was actually departed, continued to entreat that he himself would come to the chamber of the dead. He did so, and found that the soul of the child had indeed fled from the earthly tenement. Natural means belong to man; those that are supernatural belong to God: we should do our part, and beg of God to do his. On this principle the prophet on this occasion acted. God blesses the means used, and answers the prayer presented by Elisha. The child is raised up and restored to the fond embrace of its grateful and rejoicing parents.

(8) **Healing of Naaman.** The next remarkable event in the history of Elisha was the miraculous healing of the malignant and incurable leprosy of the Syrian general, Naaman (2 Kings v:1, 27), whereby the neighboring nation had the opportunity of learning the beneficence of that God of Israel, whose judgments had often brought them very low. The particulars are given under another head. (See NAAMAN.)

(9) **Elisha at Gilgal.** Soon after this transaction we find this man of God in Gilgal miraculously neutralizing the poison which had, by mistake, been mixed with the food of the prophets, and also feeding one hundred of them with twenty small loaves which had been sent for his own consumption (2 Kings iv:38, etc.)

(10) **Ax Raised.** Notwithstanding the general profligacy of Israel, the schools of the prophets increased (B. C. 894.) This was, doubtless, owing to the influence of Elisha. Accompanied by their master, a party of these young prophets, or theological students, came to the Jordan, and whilst one of them was 'felling a beam (for the purpose of constructing there a house) the ax-head fell into the water.' This accident was the more distressing because the ax was borrowed property. Elisha, however, soon relieved him by causing it miraculously to rise to the surface of the river.

(11) **Thwarts the Syrians.** The sacred record again leads us to contemplate the prophet's usefulness, not only in such individual points of view, but also in reference to his country at large. Does the king of Syria devise well-concerted schemes for the destruction of Israel? God inspires Elisha to detect and lay them open to Jehoram. Benhadad, on hearing that it was he that thus caused his hostile movements to be frustrated, sent an armed band to Dothan in order to bring him bound to Damascus. (See BENHADAD.) The prophet's servant on seeing the host of the enemy which invested Dothan, was much alarmed, but by the prayer of Elisha God reveals to him the mighty company of angels which were set for their defense. Regardless of consequences, the prophet went forth to meet the hostile band; and having again prayed, God so blinded them that they could not recognize the object of their search. The prophet then promised to lead them to where they might see him with the natural eye. Trusting to his guidance they followed on till they reached the center of Samaria, when, the optical illusion being removed, Elisha stands in his recognized form before them. The king was for putting them all to death; but, through the interposition of him whom they had just before sought to destroy, they were honorably dismissed to their own country. (B. C. 892.)

(12) **Famine in Samaria.** But a year had scarcely elapsed from this time when Benhadad, unmindful of Israel's kindness and forbearance, invests Samaria and reduces its inhabitants to a state of starvation. Still the king of Israel plunges deeper and deeper into sin, for he orders Elisha to be put to death, conceiving that it was his prayer which brought these sufferings upon himself and the nation. But God forewarns him of his danger, and inspires him to predict to the wicked king that by to-morrow 'a measure of fine flour should be sold for a shekel, and two measures of barley for a shekel, in the gate of Samaria.' This assurance was not more comfortable than *incredible*; but when the lord on whose hand the king leaned expressed his disbelief, he was awfully rebuked by the assurance that he should see but not enjoy the benefit. The next night God caused the Syrians to hear the noise of chariots and horses; and conceiving that Jehoram had hired against them the kings of the Hittites and the king of Egypt, they fled from before the walls of Samaria—leaving their tents filled with gold and provisions—in the utmost panic and confusion. In this way did God, according to the word of Elisha, miraculously deliver the inhabitants of Samaria

from a deadly enemy without, and from sore famine within, its walls; another prediction moreover was accomplished; for the distrustful lord was trampled to death by the famished people in rushing through the gate of the city to the forsaken tents of the Syrians (2 Kings vii:5).

(13) **Elisha at Damascus.** We next find the prophet in Damascus, but are not told what led him thither (B. C. 885). Benhadad, the king, whose counsels he had so often frustrated, rejoiced to hear of his presence; and now, as if he had forgotten the attempt he once made upon his life, dispatches a noble messenger with a costly present, to consult him concerning his sickness and recovery. The prophet replied that he should then die, though his indisposition was not of a deadly character. Seeing moreover, in prophetic vision, that the man Hazael, who now stood before him, should be king in Benhadad's stead; and that, as such, he would commit unheard-of cruelties upon his country, the prophet was moved to tears. How these painful anticipations of Elisha were realized the subsequent history of this man proved.

(14) **Jehu Anointed.** For a considerable time after Elisha had sent to anoint Jehu king over Israel we find no mention of him in the sacred record. We have reason to suppose that he was utterly neglected by Jehu, Jehoahaz, and Joash, who reigned in succession. Neither the sanctity of his life nor the stupendous miracles he wrought had the effect of reforming the nation at large: much of the time of his latter years was, doubtless, spent in the schools of the prophets.

(15) **Death.** At length, worn out by his public and private labors, and at the age of 90—during 60 of which he is supposed to have prophesied—he is called into eternity. Nor was the manner of his death inglorious; though he did not enter into rest as did Elijah (2 Kings xiii:14, etc.). Amongst his weeping attendants was Joash, the king of Israel. He was probably stung with remorse for having so neglected to acknowledge his national worth; yet, though late, God does not suffer this public recognition of his aged and faithful servant to go unrequited. The spirit of prophecy again entering the dying Elisha, he informs Joash that he should prevail against the Syrians. Even after death God would put honor upon Elisha; a dead body having touched his bones came to life again (2 Kings xiii:21).

(16) **Character.** Elisha was greater yet less, less yet greater, than Elijah. He is less. We cannot dispense with the mighty past even when we have shot far beyond it. Those who follow cannot be as those who went before. A prophet like Elijah comes once and does not return. Elisha, both to his countrymen and to us, is but the successor, the faint reflection of his predecessor. Less, yet greater; for the work of the great ones of this earth is carried on by far inferior instruments but on a far wider scale, and it may be in a far higher spirit. The life of an Elijah is never spent in vain. Even his death has not taken him from us. He struggles, single-handed as it would seem, and without effect; and in the very crisis of the nation's history is suddenly and mysteriously removed. But his work continues; his mantle falls; his teaching spreads; his enemies perish. The prophet preaches and teaches, the martyr dies and passes away; but other men enter into his labors. What was begun in fire and storm, in solitude and awful visions, must be carried on through winning arts, and healing acts, and gentle words of peaceful and social intercourse; not in the desert of Horeb, or on the top of Carmel, but in the crowded thoroughfares of Samaria, in the gar-

dens of Damascus, by the rushing waters of Jordan." (Prof. H. R. Hackett, Smith, *Bib. Dict.*)

ELISHAH (e-li'shah), (Heb. אֵלִישָׁה, *el-ee-shaw'*, God is salvation).

A son of Javan (Gen. x:4), who seems to have given name to 'the isles of Elishah,' which are described as exporting fabrics of purple and scarlet to the markets of Tyre (Ezek. xxvii:7). If the descendants of Javan peopled Greece, we may expect to find Elishah in some province of that country, but it is difficult to find any name on either the Italian or the African coast which can be compared with that of Elishah.

The Tel-el-Amarna tablets have thrown a new light on the question. Several of them are letters to the pharaoh from 'the king of Alasia,' a country which a hieratic docket attached to one of them identifies with the Egyptian Alsa. Alsa, sometimes read Arosa, was overrun by Thothmes III, and is mentioned in the list of his Syrian conquests engraved on the walls of Karnak (Nos. 213 and 236). Maspero (*Recueil de Travaux*, x. p. 210) makes Alsa or Alasia the northern part of Coele-Syria. An unpublished hieratic papyrus, however, now in the Hermitage of St. Petersburg, which describes an embassy sent by sea to the king of Gebal in the time of the high priest Hir-Hor, states that the Egyptian envoys were wrecked on the coast of Alsa, where they were afterwards hospitably entertained by the queen of the country. Alsa or Alasia therefore must have adjoined the Mediterranean, and Winckler and W. Max Müller accordingly propose to see in it the island of Cyprus. Conder had already suggested that Alasia and Elishah are one and the same. The two chief objections to the identification with Cyprus are that the ordinary Egyptian name of that island was Asi, and that Thothmes III includes the country among his Syrian conquests. (A. H. Sayce, *Hastings' Bib. Dict.*)

ELISHAMA (e-lish'a-mà), (Heb. אֵלִישָׁמָע, *el-ee-shaw-marw'*, whom God hears).

1. Son of Ammihud, prince of the tribe of Ephraim in the wilderness of Sinai (Num. i:10; ii:18; vii:48, 53; x:22). (B. C. 1658.) According to 1 Chron. vii:26, he was grandfather of Joshua.

2. One of the sons of David, born after his establishment at Jerusalem (2 Sam. v:16; 1 Chron. iii:8; xiv:7). (B. C. 1050.) In 1 Chron. iii:6, occurs this same name for another son of David, but in the other lists he is called *Elishua*. (B. C. 1050.)

3. Son of Jekamiah, a descendant of Judah (1 Chron. ii:41). (B. C. 1280.)

4. The father of Nethaniah and grandfather of Ishmael. By Jewish traditions he is identified with 3 (2 Kings xxv:25; Jer. xli:1). (B. C. 588.)

5. A scribe under Jehoiakim (Jer. xxxvi:12, 20, 21). (B. C. 604.)

6. One of the priests sent in the time of Jehoshaphat, through the cities of Judah, to teach the people the law (2 Chron. xvii:8). (B. C. after 875.)

ELISHAPHAT (e-lish'a-phât), (Heb. אֵלִישָׁפָת, *el-ee-shaw-fawt'*, God of judgment), son of Zichri; assisted Jehoiada, the high-priest, to enthroned the young king Joash (2 Chron. xxiii:1, etc.) B. C. 836.

ELISHEBA (e-lish'e-bâ'), (Heb. אֵלִישֶׁבַע, *el-ee-sheh'bah*, covenant-God), wife of Aaron, and hence the mother of the priestly family (Exod. vi:23), B. C. about 1210.

ELISHUA (ël'i-shu'á), (Heb. אֵלִישׁוּעַ, *el-ee-shoo'-ah*, God is salvation), son of David, born at Jerusalem (2 Sam. v:15; 1 Chron. xiv:5) B. C. 1044. In the list (1 Chron. iii:6) the name is given as Elishama.

ELIUD (e-li'ud), (Gr. *Ελιούδ*, *el-ee-ood'*, from the Heb. אֵלִיְהוּד, *el-ee-hud'*, God of majesty), son of Achim, and father of Eleazar. In the paternal genealogy of Jesus the fifth in ascent (Matt. i:14, 15).

ELIZAPHAN (e-liz'a-phân), (Heb. אֵלִיזָפָן, *el-ee-tsaw-fawn'*, God a protector).

1. Son of Uzziel, uncle of Aaron, and head of the family of Kohath (Num. iii:30; Exod. vi:22). Moses commanded Elizaphan to carry the corpses of Nadab and Abihu out of the camp (Lev. x:4). (B. C. 1210). In Exodus and Leviticus the name is contracted into *Elzaphan*. His family assisted in the ceremony of bringing the ark to Jerusalem in the time of David (1 Chron. xv:8) and took part in the revival under Hezekiah (2 Chron. xxix:13). (See ELZAPHAN.)

2. Son of Parnach, of Zebulun, a deputy appointed to divide the land (Num. xxxiv:25). (B. C. 1490.)

ELIZUR (e-li'zur), (Heb. אֵלִיזוּר, *el-ee-tsoor'*, God his rock), son of Shedeur, prince of the house of Reuben at the time of the taking of the census in the wilderness of Sinai (Num. i:5; ii:10; vii:30, 35; x:18) B. C. about 1210.

ELKANAH (ël'ka-nah), (Heb. אֵלְכָנָה, *el-kaw-naw'*, God the jealous or God creates), the name of several descendants of Korah mentioned in the Old Testament, for we are expressly told that "the children of Korah died not" in the rebellion of Korah (Num. xxvi:11).

1. The chief one is the husband of Hannah and father of Samuel. 1 Sam. i:1 ff.; ii:11, 20; 1 Chron. vi:27, 34. The few words that are spoken of him set him in a very favorable light. He was a kind and faithful husband, a pious Hebrew, and a self-sacrificing father. Although he was a Levite, he did not apparently perform any of the usual offices. Judging from the sacrifices he offered annually, 1 Sam. i:4, and from the present he brought to the Lord when Samuel was dedicated, he was a man of wealth.

2. A descendant of Korah in the line of Ahimoth, otherwise Mahath (1 Chron. vi:26, 35).

3. Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chron. xii:6). From the terms of verse 2 it is doubtful whether this can be the well-known Levitical family of Korhites. Perhaps the same who afterwards was one of the doorkeepers for the ark (xv:23). (B. C. about 982.)

4. An officer in the household of Ahaz, king of Judah, who was slain by Zichri, the Ephraimite, when Pekah invaded Judah (2 Chron. xxviii:7). (B. C. about 735.)

5. The father of one Asa, and head of a Levitical family resident in the "villages of the Netophathites" (1 Chron. ix:16). (B. C. long before 536.)

6. Son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Exod. vi:24, where his brothers are represented as being Assir and Abiasaph. But in 1 Chron. vi:22, 23 (Heb. vii:8) Assir, Elkanah, and Ebiasaph are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson respectively; and this seems to be undoubtedly correct. If so, the passage in Exodus must be understood as merely giving the families of the

Korhites existing at the time the passage was penned, which must, in this case, have been long subsequent to Moses.

ELKOSH (ĕl'kosh), (Heb. עֶלְקוֹשׁ, *el-kosh*).

The prophet Nahum is called an Elkoshite, that is, a native of some place called Elkosh (Nahum i:1). There was a village of this name in Galilee in the time of Jerome; but the prophet was more probably born of Jewish exiles at Elkosh or Alkush in Assyria, near Mosul. The Jews themselves believe that he was born and buried there; and Jewish pilgrims from all parts still visit his alleged tomb. Alkosh is thirty-four miles north of Mosul (Nineveh), and is situated a little way up the side of a mountain, in the range to which it gives its name. It is entirely inhabited by Chaldee Christians, who have a convent higher up the mountains. A credible, but unproven, identification is with the town Elcesi or Helcesæi in Galilee, which was pointed out to Jerome as the birth-place of the prophet.

ELKOSHITE (ĕl'kosh-ite). See **ELKOSH**.

ELLASAR (ĕl'la-sar), (Heb. עֶלְלָסָר, *el-law-sarw'*), a territory in Asia, whose king, Arioch, was one of the four who invaded Canaan in the time of Abraham (Gen. xiv:1). See **ARIOCH**.

The place is not improbably Larsa, the remains of which now constitute the mounds of Senkereh, to the southeast of Erech.

ELM (ĕlm), (Heb. עֶלְמ, *ay-law'*).

The Authorized Version has this word in Hosea iv:13. It is differently translated in every other place **ALAH**. (See **OAK**.)

ELMODAM (el-mō'dam), (Gr. Ἐλμωδάμ, *el-mo-dam'*), the son of Er in the genealogy of Joseph (Luke iii:28), B. C. 700.

ELNAAM (ĕl'na-ām), (Heb. עֶלְנָאָם, *el-nah'am*, God his delight), father of Zeribai and Joshaviah, two of David's guard (1 Chron. xi:46), B. C. 1050.

ELNATHAN (ĕl'na-thān), (Heb. עֶלְנָתָן, *el-naw-tharwn*).

1. Son of Achbor, and father of Nehushta, who was the mother of Jehoiakim, king of Judah. He opposed the king's burning of Jeremiah's prophecies; and was sent into Egypt to bring back the prophet Urijah (Jer. xxvi:22; xxxvi:12; 2 Kings xxiv:8), B. C. 597.

2. The name of three Levites in the time of Ezra (Ezra viii:16), B. C. 457.

ELOHIM (ĕl'o-hīm). See **GOD**.

ELOI (e-lō'i). See **GOD**.

ELON (ē'lon), (Heb. עֵלֹן, *ay-lone'*, strong, a man).

1. An Israelite of the tribe of Zebulun, who judged Israel ten years. He was preceded by Ibzan of Bethlehem, and succeeded by Abdon of Ephraim. The whole period covered by their administration was twenty-five years (from B. C. 1190 to 1174); but it is probable that they were for a part of this time contemporary, each exercising authority over a few of the tribes. They appear to have overawed the enemies of Israel by their judicious administration; for no war is mentioned in their time (Judg. xii:8-15). (B. C. 1243-34.)

2. The Hittite, father of Bashemath, wife of Esau (Gen. xxvi:34; xxxvi:2). (B. C. before 1963.)

3. Chief of a family of Zebulun (Num. xxvi:26; Gen. xlv:14), and founder of the Elonites. (B. C. 1856.)

4. A city of Dan (Josh. xix:43) perhaps the same with Elon-beth-hanan (1 Kings iv:9). Its site has not been identified.

ELON-BETH-HANAN (ē'lon-bēth-hā'nān), (Heb. עֵלֹן בֵּית חָנָן, *bayth-haw-nawn'*, oak of the house).

This, with two Danite towns, formed one of Solomon's commissariat districts (1 Kings iv:9). Perhaps identical with Elon. Its site is not Beit 'Anān, eight and a half miles northwest of Jerusalem. This place is in Benjamin, a different tax district, and the name is differently spelled (Davis, *Bib. Dict.*).

ELONITES (ē'lon-ites), (Num. xxvi:26). See **ELON**, 3.

ELOTH (ē'loth), (Heb. עֵלוֹת, *ay-lōth'*, grove of strong trees, 1 Kings ix:26; 2 Chron. viii:17; xxvi:2). See **ELATH**.

ELPAAL (ĕl'pa-āl), (Heb. עֶלְפָּאָל, *el-pah'al*, God his reward), a Benjamite, son of Hushim (1 Chron. viii:11), the founder of a numerous family (viii:12-18), B. C. 1618. The Bene-Elpaal seem to have lived in the neighborhood of Lydda (Lod), and extended to the Danite frontier.

ELPALET (ĕl'pa-lēt), (Heb. עֶלְפָּלֵט, *el-paw-let'*). See **ELPHELET**, 1.

EL-PARAN (ĕl'pā'ran), (Heb. עֵלְפָּרָן, *el-paw-rarwn'*, oak of Paran, Gen. xiv:6). See **PARAN**.

ELTEKEH (ĕl'te-kēh), (Heb. עֵלְתֵּכֶה, *el-te-kay'*, God is its fear), a city of Dan, given to the Levites of Kohath's family (Josh. xix:44; xxi:23).

ELTEKON (ĕl'te-kōn), (Heb. עֵלְתֵּקוֹן, *el-te-kone'*, God is straight). A town in the mountainous district of Judah (Josh. xv:59). It is unidentified.

ELTOLAD (el-tō'lad), (Heb. עֵלְתוֹלָד, *el-to-lad'*, God's kindred, allied to him), a town of Judah (Josh. xv:30) given to Simeon (Josh. xix:4; 1 Chron. iv:29).

ELUL (ē'lul), (Heb. עֵלּוּל, *el-ool'*, Neh. vi:15).

This is the name of that month which was the sixth of the ecclesiastical, and twelfth of the civil, year of the Jews, and which began with the new moon of our September. According to the Megillat Taanith, the 17th day of this month was a public fast for the death of the spies who brought back a bad report of the land (Num. xiv:37).
J. N.

ELUZAI (e-lū'za-i or e-lū'za-i), (Heb. עֵלּוּזַי, *el-oo-zah'ee*, God is defensive), one of the Benjamite warriors who joined David at Ziklag when he was fleeing from Saul (1 Chron. xii:5), B. C. 1000.

ELYMAS (ĕl'y-mās), (Gr. Ἐλύμας, *el-oo'mas*), an appellative commonly derived from the Arabic *Ahman* (a wise man), which Luke interprets by ὁ μάγος; it is applied to a Jew named Bar-jesus, mentioned in Acts xiii:6-11 (*v. Neander's Hist. of First planting of the Christian Church*, i, p. 125, Eng. transl.). Chrysostom observes, in reference to the blindness inflicted by the Apostle on Bar-jesus, that the limiting clause 'for a season' shows that it was not intended so much for the punishment of the sorcerer as for the conversion of the deputy.

ELZABAD (ĕl'za-bād), (Heb. עֵלְזָבָד, *el-zaw-bawd'*, given of God).

1. One of the thirty gallant men in David's army (1 Chron. xii:12). (B. C. before 1000.)

2. A Korhite Levite (1 Chron. xxvi:7), son of Shemaiah. He was of the family of Obed-edom and a porter in the temple. (B. C. 1000.)

ELZAPHAN (ě'l'za-phăn). See ELIZAPHAN.

EMBALM (ěm-băm'), (Heb. עֲבָרָה, *khaw-nat'*, to spice), the process of preserving a corpse by means of spices (Gen. 1:2, 3, 26). (See BURIAL.)

Three methods were employed by the Egyptians in embalming the bodies of the dead. Their choice depended chiefly upon the financial resources of the dead person's friends. It is estimated that the first cost about twelve hundred and fifty dollars, the second about three hundred dollars, and the third was quite inexpensive. Embalming was employed by the Hebrews in preserving the remains of Jacob and Joseph. We infer that it was common in the time of Christ (John xii:7; xix:39).

EMBROIDERER (ěm-broid'ěr-ěr). This is the translation of the Heb. רַקְמָה, *raw-kam'*, in A. V.

But if *embroidery* be confined to needlework it is almost certain that the word is never used in that sense. It rather refers to the patterns made by weaving different colored threads (Exod. xxvi:1, 31; xxviii:4, 39).

EMEKEKEZIZ (ě'měk-kě'ziz), in A. V. Valley of Keziz (a vale cut off or vale of fissure).

A town of Benjamin, evidently in a valley and apparently near Jericho and Beth-hoglah (Josh. xviii:21). Scarcely to be connected with wady el-Kaziz, a branch of the Kidron, which seems to lie too far west and south. (Davis, *Bib. Dict.*)

EMERALD (ěm'ěr-ald), (Heb. יָפֶה, *no'fek*, shining; N. T. and Apoc., Gr. σμάραγδος, *smar'ag-dos*, a precious stone). See NOPHECH.

EMERODS (ěm'ěr-odz), (Heb. עֲפָלָה, *o'fel*, tumor, Deut. xxviii:27, etc.), a painful disease, especially promoted by sitting.

For a punishment, it was sent upon the Philistines. It probably resembled the modern disease of the piles. It was customary with the heathens to offer to their gods figures of wax or metal representing the parts which had been cured of disease, whence it is inferred, in connection with 1 Sam. vi:5, that the priests and diviners of the Philistines recommended a similar course.

EMIM (ě'mim), (Heb. עַמִּים, *ay-meem'*, terrors), a numerous and gigantic race of people who, in the time of Abraham, occupied the country beyond the Jordan, afterwards possessed by the Moabites (Gen. xiv:5; Deut. ii:10).

The Emim may have belonged to the aggregation of nations sometimes called Turanian. If so we may compare their name, Emim, with *aima*, "tribe" or "horde," which appears with little change in several languages, as the Tunguse, *aiman*; Buriat, *aimah*; Mongol, *aimak*; Livonian, *aim*. (Smith, *Bib. Dict.*, 2d ed., s. v. "Emin.")

EMMANUEL (ěm-măn'ū-el), (Gr. Ἐμμανουήλ, *em-man-oo-ale'*, God with us; i. e., *savior* (Matt. i:23). See IMMANUEL.

EMMAUS (ěm'ma-ūs), (Gr. Ἐμμαοὺς, *em-mah-ooce'*, hot baths).

1. A village 60 stadia, or seven and a half miles, from Jerusalem, noted for our Lord's interview with two disciples on the day of his resurrection (Luke xxiv:13). The same place is mentioned by Josephus (*De Bell. Jud.* vii:6, 6), and placed at the same distance from Jerusalem, in stating that Vespasian left 800 soldiers in Judæa, to whom he gave the village of Emmaus. The site is not now known. Eusebius and Jerome make it identical with the city of Emmaus, or 'Amwas,'

which lies not far from 160 stadia from Jerusalem. It is also identified with Lusium, about midway between Jerusalem and Ramleh. There was another Emmaus, near Tiberias, on the lake of the same name, where the hot baths which gave name to it are still frequented, and have a temperature of 130 Fahrenheit.

2. A walled town of some note 18 miles, or 160 stades, westward from Jerusalem by a circuitous Roman road (1 Macc. iii:40; ix:50; War ii:20, 4). Now 'Amwas.'

EMMOR (ěm'môr), (Gr. Ἐμμόρ), a Grecized form of the name Hamor, the father of Sycien (Acts vii:16). (See HAMOR.)

EN (ěn), (Heb. אֵן, *ayn*, fountain), a prefix to many names of places in Hebrew from there being a living spring in the vicinity.

ENAM (ě'nam), (Heb. עֵינָם, *ha-ay-nawm'*, the double), a city in the lowland of Judah (Josh. xv:34). It is probably the place in the "doorway" of which Tamar sat (Gen. xxxviii:14).

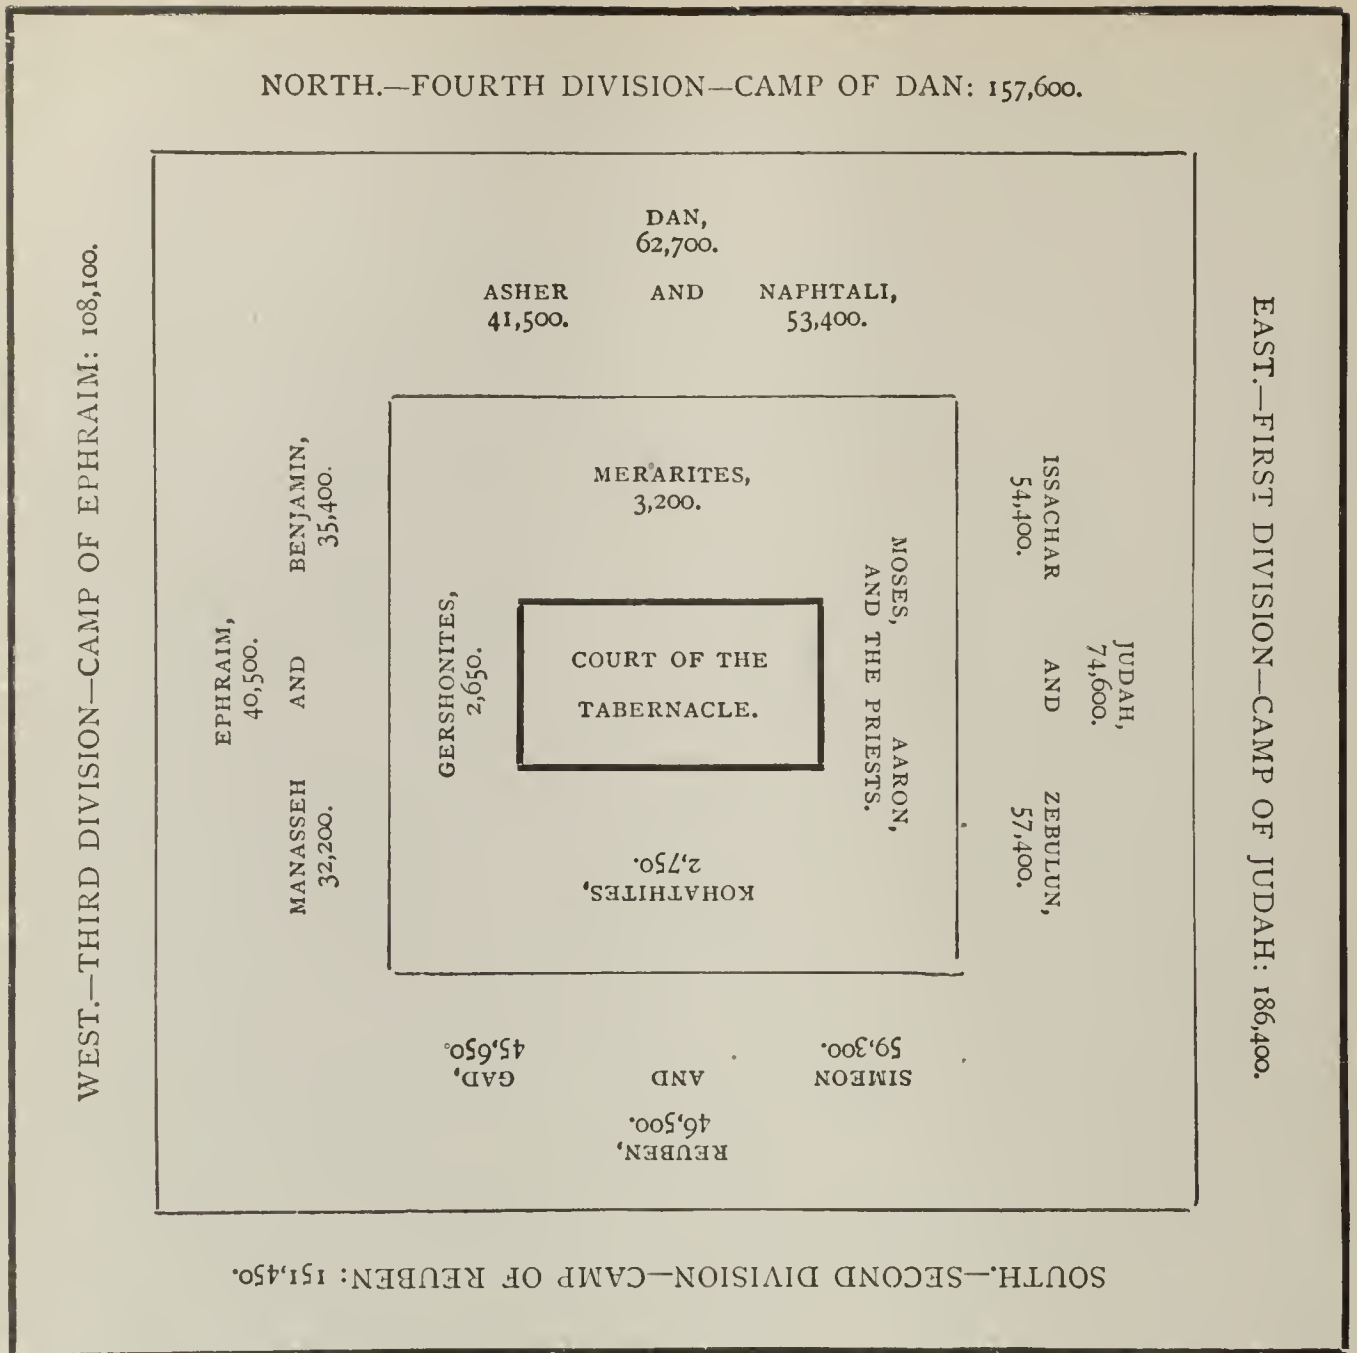

In verse 21 the proper name Enaim, R. V., is more appropriate than the present translation "openly."

ENAN (ě'nan), (Heb. עֵינָן, *ay-nawn'*, having eyes), the father of Ahira, who was "prince" of the tribe of Naphtali when Israel was numbered in the desert of Sinai (Num. i:15; ii:29; vii:78, 83; x:27). B. C. 1210.

ENCAMPMENT (ěn-kämp'ment).

(1) The following renderings are given in the O. T. (Heb. מַחֲנֵה, *makh-an-eh'*, from יָשָׁב, *khaw-naw'*, to sit down, to pitch tent): A term applied to any band or company presenting a regular and settled appearance; a standing camp; a predatory or nomad party at rest (Gen. xxxii:21); an army or caravan when on its march (Exod. xiv:9; Josh. x:5; xi:4; Gen. xxxii:7, 8), and the resting-place of an army or company (Exod. xvi:13). Sometimes the verb refers to the casual arrangement of a siege (Ps. xxvii:3) or campaign (1 Sam. iv:1). (Barnes' *Bib. Dict.*; Mc. & Str. *Cyc.*)

(2) Of the Jewish system of encampment the Mosaic books have left a detailed description. From the period of the sojourn in the wilderness to the crossing of the Jordan the twelve tribes were formed into four great armies, encamping in as many fronts, or forming a square, with a great space in the rear, where the tabernacle of the Lord was placed, surrounded by the tribe of Levi and the bodies of carriers, etc., by the stalls of the cattle and the baggage: the four fronts faced the cardinal points while the march was eastward, but as Judah continued to lead the van, it follows that when the Jordan was to be crossed the direction became westward, and therefore the general arrangement, so far as the cardinal points were concerned, was reversed, unless Judah and his two wings formed the rear in crossing the Jordan. It does not appear that, during this time, Israel ever had lines of defense thrown up; but in after ages, when only single armies came into the field, it is probable that the castral disposition was not invariably quadrangular; and, from the many positions indicated on the crests of steep mountains, the fronts were clearly adapted to the ground and to the space which it was necessary to occupy. The rear of such positions, or the square camps in the plain, appear from the marginal reading of 1 Sam. xvii:20, and xxvi:5 to have been enclosed with a line of carts or chariots, which from the remotest period was a practice among all the nomadic nations of the north. C. H. S.

ENCHANTMENT (ĕn-chânt'ment), the rendering in the A. V. of several Hebrew words:

1. *Lekh-aw-sheem'* (Heb. לִשְׁמַעְמַע, *whispers*), is mentioned in Eccles. x:11.

2. *Naw-khash'* (Heb. נָחַשׁ, to *hiss*), the auguries sought by Baalim (Num. xxiv:1), supposed to allude *generally* to ophiomancy (divination by serpents).

3. *Kheh'ber* (Heb. קְבַר, *society, spell*, Is. xlvi: 9, 12), binding by incantations. (See DIVINATION.)

ENDAMAGE (en-dam'áj), (Heb. נֶזֶק, *nez-ak'*, Ezra iv:13), damage, hurt, the present form of the word.

END OF THE WORLD. See ESCHATOLOGY.

ENDOR (ĕn'dôr), (Heb. אֵי־דוֹר, *ane-dore'*, fountain of Dor).

A town of Galilee, assigned to Manasseh, although lying beyond the limits of that tribe (Josh. xvii:11). It is mentioned in connection with the victory of Deborah and Barak (Ps. lxxxiii:10); but it is chiefly memorable as the abode of the sorceress whom Saul consulted on the eve of the

battle in which he perished (1 Sam. xxviii:7, sq.). The name is not found in the New Testament; but in the time of Eusebius and Jerome the place still existed as a large village, four miles south of Mount Tabor. It has been identified as the village of Endôr or Endûr, on the northern shoulder of Little Hermon, six miles southeast of Nazareth.

ENEAS (ĕ'ne-as). See ÆNEAS.

EN-EGLAIM (ĕn'ĕg'la-ĭm or ĕn'ĕg-lā'ĭm), (Heb. אֵי־עֵגְלַיִם, *ane eg-lah'yim*, fountain of two calves).

A town of Moab (Ezek. xlvii:10), which Jerome places at the northern end of the Dead Sea, at the influx of the Jordan. From this statement it has been conjectured that it is to be found in *Ain el-Feshkhah*, a spring at the north end of the coast.

EN-GANNIM (ĕn'găn'nim), (Heb. אֵי־גַנִּים, *ane gan-neem'*, gardens' fountain).

1. A town of Judah (Josh. xv:34), which Jerome places near Bethel.

2. A Levitical city in Issachar (Josh. xix:21; xxi:29), probably the same as the Ginaen of Josephus (*Antiq.* xx:6, 1), and which Biddulph (in

Purchas, vol. ii. p. 135) identifies with the present Jenin, a town fifteen miles south of Mount Tabor, and which he and others describe as still a place of gardens and abundant water. It contains about four thousand inhabitants.

EN-GEDI (ĕn-gē'dī), (Heb. עֵינֵי גֵדִי, *ane geh' aee*, kids' fountain).

1. A city of Judah, which gave its name to a part of the desert to which David withdrew for fear of Saul (Josh. xv:62; 1 Sam. xxiv:1-4). Its more ancient Hebrew name was Hazezon-tamar; and by that name it is mentioned before the destruction of Sodom, as being inhabited by the Amorites, and near the cities of the plain (Gen. xiv:7). In 2 Chron. xx:1, 2, bands of the Moabites and Ammonites are described as coming up against king Jehoshaphat, apparently round the south end of the Dead Sea, as far as En-gedi. And this, as we learn from Dr. Robinson, is the route taken by the Arabs in their marauding expeditions at the present day. It has been identified with Ain-jidy of the Arabs, situated at a point on the western shore nearly equidistant from both extremities of the lake. This spot was visited by Dr. Robinson, and he confirms the identification. The site lies among the mountains which here confine the lake, a considerable way down the descent to its shore. Here is the beautiful fountain of Ain-jidy, bursting forth at once in a fine stream upon a sort of narrow terrace or shelf of the mountain, above 400 feet above the level of the lake. The whole of the descent below appears to have been once terraced for tillage and gardens; and near the foot are the ruins of a town, exhibiting nothing of particular interest, and built mostly of unhewn stones. This we may conclude to have been the town which took its name from the fountain (*Robinson*, ii. 209-216).

2. The Wilderness of En-gedi is doubtless the immediately neighboring part of the wild region, west of the Dead Sea, which must be traversed to reach its shores. It was here that David and his men lived among the 'rocks of the wild goats,' and where the former cut off the skirts of Saul's robe in a cave (1 Sam. xxiv:1-5). On all sides the country is full of caverns, which might then serve as lurking-places for David and his men, as they do for outlaws at the present day.

ENGINE (ĕn'jīn), a term exclusively applied to military affairs in the Bible. The Hebrew הַשְּׁבִי'ן, *khish-shaw-bone'* (2 Chron. xxvi:15) is its counterpart in etymological meaning, each referring to the *ingenuity* (engine, from *ingenium*) displayed in the contrivance.

Assyrian War Engines.

The chief projectiles were the catapulta for throwing darts, and the balista for throwing stones. Both these kinds of instruments were prepared by Uzziah for the defense of Jerusalem (2 Chron. xxvi:15), and battering the wall is mentioned in the reign of King David (2 Sam. xx:

15); but the instrument itself for throwing it down may have been that above noticed, and not the battering-ram. The ram was, however, a simple machine, and capable of demolishing the strongest walls, provided access to the foot was practicable; for the mass of cast metal which formed the head could be fixed to a beam lengthened sufficiently to require between one and two hundred men to lift and impel it.

Battering Ram.

Of the balistæ and catapultæ it may be proper to add that they were of various powers. For battering walls there were some that threw stones of fifty, others of one hundred, and some of three hundred weight; in the field of battle they were of much inferior strength. Darts varied similarly from small beams to large arrows, and the range they had exceeded a quarter of a mile, or about 450 yards. All these engines were constructed upon the principle of the sling, the bow, or the spring, the last being an elastic bar, bent back by a screw or a cable of sinews, with a trigger to set it free, and contrived either to impel darts by

Balista.

its stroke, or to throw stones from a kind of spoon formed towards the summit of the spring.

C. H. S.

ENGRAVING (ĕn-grāv-īng). Engraved seals are spoken of at a very early period of the world.

The names of the children of Israel were directed to be engraved on two stones, and the words "Holiness to the Lord" were also to be engraved on the high priest's breastplate, both to be like the engravings of a signet. (Exod. xxviii:11, 36). The signet is mentioned before Joseph was sold into Egypt. Job also speaks of engraving with an iron pen upon a rock (Job xix:24). The ten commandments were engraved (Exod. xxxii:16), and graven images were undoubtedly among the earliest objects of idolatrous worship (Exod. xx:4; xxxii:4). Allusion is also made to the engraver's art in Ezek. xxiii:14. The engraved lines were probably filled in with coloring matter. See also Acts xvii:29. (See SEALS; WRITING.)

Figurative. (1) The *engraving* of the names of the twelve tribes, in the stones of the high-priest's shoulder and breastplate, denoted Christ's perpetual remembrance, esteem, and support of his people, and the impossibility of their separation from him (Exod. xxviii:11, and xxxix:14). (2) God's *engraving the graving* of the choice stone may denote his conferring on Christ every saving office, his preparing for him a human nature adorned with all gracious excellencies and his inflicting on him the deep penetrating strokes of his wrath (Zech. iii:9). (3) So the saints are *graven* on the palms of God's hands; he perpetually thinks of, cares for, and does them good (Is. xlix:16).

EN-HADDAH (ĕn'hād-dah), (Heb. עֵין הַדָּדָה, *ane-khad-daw'*, sharp or swift spring), a town of Issachar (Josh. xix:21). Eusebius mentions a place of this name between Eleutheropolis and Jerusalem, ten miles from the former place.

According to Knobel it is either the place by Gilboa called *Judeideh*, or else *Beit-kad*, near Gilboa.

EN-HAKKORE (ĕn'hāk'ko-re), (Heb. עֵין הַקּוֹרֵה, *ane-hak-ko-ray'*, fountain of the crier).

The spring which appeared in answer to the cry of Samson (Judg. xv:19). Van de Velde would identify it with a spring at Tell-el-Lekiyeh, four miles north of Beer-sheba; but as Samson's exploits were confined to a small circle there is no reason for extending them 30 miles from Gaza. Conjecturally it is near En-gannim. It has been identified by others with Ayun Kara, near Zoreah.

EN-HAZOR (ĕn-hā'zor), (Heb. עֵין הַצּוֹר, *ane-khaw-tsore'*, fountain of a village), one of the fenced cities in the inheritance of Naphtali, distinct from Hazor (Josh. xix:37).

It has not yet been identified, although R. W. Conder, *Hastings' Bib. Dict.* says: The most probable place for En-hazor seems to be *Hazireh*, on the western slopes of the mountains of Upper Galilee, west of Kedesh.

ENLARGE (ĕn-lārj'), (Heb. רָחַב, *raw-khab'*, 2 Sam. xxii:37; Ps. iv:1), to broaden, to make room, to set at liberty, to render more extensive.

Figurative. (1) *Enlarging of borders or coasts* imports conquest of more territory to dwell in (Deut. xii:20, and xix:8). (2) *To enlarge nations* is to grant them deliverance, liberty, happiness and increase of numbers, territory, or wealth (Esth. iv:14; Job xii:23; Deut. xxxiii:20). (3) *Enlargement of heart* imports loosing of spiritual bands, fulness of inward joy (Ps. cxix:32); or extensive love, care, and joy (2 Cor. vi:11). (4) *Enlargement of mouth*, denotes readiness to answer reproaches, and to pour forth praise to God for his kindness (1 Sam. ii:1). (5) God *enlarges men* in trouble, or *enlarges their steps*, when he grants them remarkable deliverances, and liberty to go where they please (Ps. iv:1, and xviii:36).

ENLIGHTEN (ĕn-līt'n), (Heb. נִסָּה, *ore*, illumination in every sense), means to give evidence of returning strength (1 Sam. xiv:27, 29; Job xxxiii:30).

Figurative. (1) (Heb. נָאֵר, *naw-gāh'*). God *enlightens* his people's darkness when he frees them from trouble, grants them prosperity, and gives them knowledge and joy (Ps. xviii:28).

(2) (Gr. φωτίζω, *fo-tid'zo*). He *enlightens* their eyes when, by his word and spirit, he savingly teaches them his truth and shows them his glory (Ps. xiii and xix:8; Eph. i:18).

EN-MISHPAT (ĕn'mīsh'pat), (Heb. עֵין מִשְׁפָּט, *ane-mish-pawt'*, fountain of judgment). Moses says (Gen. xiv:7) that Chedorlaomer and his allies, having traversed the wilderness of Paran, came to the fountain of Mishpat, otherwise **KADESH** (which see).

ENMITY (ĕn'mī-tŷ), (Heb. אִי־בָאָה, *ay-baw'*; Gr. ἐχθρα, *ekh'thrah*), deep-rooted hatred, irreconcilable hostility (Gen. iii:15; James iv:4).

(1) There is enmity between mankind and some of the serpent tribe (Gen. iii:15). (2) Friendship with this world, in its wicked members and lusts, is *enmity with God*; is opposed to the love of him, and amounts to an actual exerting of ourselves to dishonor and abuse him (James iv:4; 1 John ii:15, 16). (3) The carnal mind, or minding of fleshly and sinful things, is *enmity against God*; is opposed to his nature and will in the highest degree; and, though it may be removed, cannot be reconciled to him, nor he to it (Rom. viii:7, 8). (4) The ceremonial law is called *enmity*; it marked God's enmity against sin, by demanding atonement for it; it occasioned men's enmity against God by its burdensome services; and was an accidental source of standing variance between Jews and Gentiles; or perhaps the *enmity* here meant is the state of variance between God and men which was abolished by the death of Christ (Eph. ii:15, 16).

ENOCH (ĕ'nok), (Heb. כַּחַן-וֹקֵה, *khan-oke'*, initiated or initiating; perhaps *teaching* or *teacher*).

1. Son of Cain (Gen. iv:17), after whom the first city noticed in Scripture was called. (B. C. 4041.) It was east of Eden, and its name is thought to be preserved in Hanuchta, which Ptolemy places in the Susiana. The spurious Berosus, and Adrichomius after him, place the city Enochia, built by Cain, east of Libanus, towards Damascus.

2. Son of Jared and father of Methuselah. According to the Old Testament, *he walked with God*; and, after 365 years, *he was not, for God took him* (Gen. v:24). (B. C. 3550-3185.) The inspired writer of the Epistle to the Hebrews says, 'By faith Enoch was translated that he should not see death, and was not found, because God had translated him' (xi:5). *Walking with God* implies the closest fellowship with Jehovah which it is possible for a human being to enjoy on earth. As a reward, therefore, of his extraordinary sanctity, he was transported into heaven without the experience of death. Elijah was in like manner translated; and thus was the doctrine of immortality palpably taught under the ancient dispensation.

The traditions of the Jews have ascribed to Enoch many fabulous qualities. They have invested him with various attributes and excellencies for which the Bible furnishes no foundation. Accordingly, he is represented as the inventor of letters, arithmetic, and astronomy; as the *first author*, from whom several books emanated. Visions and prophecies were commonly ascribed to him, which he is said to have arranged in a book. This book was delivered to his son, and preserved by Noah in the ark. After the flood it was made known to the world, and handed down from one generation to another. Hence the Arabians call him *Edris*, i. e., *the learned* (Koran, Sur. xix).

3. The first city mentioned in Scripture (Gen. iv:17), built by Cain, east of Eden and in the land of Nod.

S. D.

ENOCH, BOOK OF (ĕ'nok, bōōk ōv). The interest that once attached to the apocryphal book

of Enoch has now partly subsided. Yet a document quoted, as is generally believed, by an inspired apostle, can never be wholly devoid of importance or utility in sacred literature.

(1) **Authorship and Date.** With regard to the author and the time when the Book of Enoch was written various opinions have been advanced. But it seems to us to have been composed a little before Christ's appearance by a Jew who had studied well the book of Daniel. At the same time we freely confess that the Savior is spoken of in terms expressive of his dignity, character, and acts, surpassing the descriptions which other Jewish books present. Several circumstances render it apparent that it was originally composed in the Hebrew or Chaldee language.

The Greek translation, in which it was known to the fathers, appears to be irrecoverably lost. There is no trace of it after the eighth century. The last remnant of it is preserved by Syncellus.

(2) **Object.** The leading object of the writer, who was manifestly imbued with deep piety, was to comfort and strengthen his contemporaries. He lived in times of distress and persecution, when the enemies of religion oppressed the righteous. The outward circumstances of the godly were such as to excite doubts of the Divine equity in their minds, or at least to prevent it from having that hold on their faith which was necessary to sustain them in the hour of trial. In accordance with this, the writer exhibits the reward of the righteous and the punishment of the wicked. To give greater authority to his affirmations, he puts them into the mouth of Enoch. Thus they have all the weight belonging to the character of an eminent prophet and saint. Various digressions are not without their bearing on the author's main purpose. The narrative of the fallen angels and their punishment, as also of the flood, exemplifies the retributive justice of Jehovah; while the Jewish history, continued down to the Maccabees, exhibits the final triumph of His people, notwithstanding all their vicissitudes. Doubtless the author lived amid fiery trial; and, looking abroad over the desolation, sought to cheer the sufferers by the consideration that they should be recompensed in another life. As for their wicked oppressors, they were to experience terrible judgments. The writer seems to delight in uttering dire anathemas against the wicked. It is plain that the book grew out of the time when the author lived and the circumstances by which he was surrounded. It gives us a glimpse not only of the religious opinions, but also of the general features that characterized the period.

(3) **Possibly Quoted by Jude.** Much unnecessary discussion has arisen over the question whether Jude really quoted the Book of Enoch or not. Some are most unwilling to believe that an inspired writer could cite an Apocryphal production. Such an opinion destroys, in their view, the character of the writing said to be inspired, and reduces it to the level of an ordinary composition. But this is preposterous. The Apostle Paul quotes several of the heathen poets; yet who ever supposed that by such references he sanctions the productions from which his citations are made, or renders them of greater value? All that can be reasonably inferred from such a fact is, that if the inspired writer cites a particular sentiment with approbation, it must be regarded as just and right, irrespective of the remainder of the book in which it is found. The Apostle's sanction extends no farther than the passage to which he alludes. Other portions of the original document may exhibit the most absurd and super-

stitious notions. Others suppose that Jude quoted a *traditional* prophecy or saying of Enoch, and we see no improbability in the assumption. Others again believe that the words apparently cited by Jude were suggested to him by the Holy Spirit. But surely this hypothesis is unnecessary. Until it can be shown that the book of Enoch did not exist in the time of Jude, or that his quoting it is unworthy of an Apostle, or that such knowledge was not handed down traditionally within the Apostle's reach, we abide by the opinion that Jude really quoted the book of Enoch. While there are probable grounds for believing that Jude might have become acquainted with the circumstance independently of inspiration, we ought not to have recourse to the hypothesis of *immediate suggestion*. On the whole, it is most likely that the book of Enoch existed before the time of Jude, and that the latter really quoted it in accordance with the current tradition. If so, the prophecy ascribed to Enoch was *truly* ascribed to him, because it is scarcely credible that Jude writing by inspiration would have sanctioned a false statement.

(4) **Historical Value.** Presuming that it was written by a Jew, the book before us is an important document in the history of Jewish opinions. It indicates an essential portion of the Jewish creed before the appearance of Christ, and assists us in comparing the theological views of the later with those of the earlier Jews. It also serves to establish the fact that some doctrines of great importance in the eyes of evangelical Christians ought not to be regarded as the growth of an age in which Christianity had been corrupted by the inventions of men. We would not appeal to it as possessing *authority*. The place of *authority* can be assigned to the Bible alone. But apart from all ideas of *authority*, it may be fairly regarded as an index of the state of opinion at the time when it was written. Hence it subserves the confirmation of certain opinions, provided they can be shown to have a good foundation in the word of God. If it be conceded that certain doctrines are contained by express declaration or fair inference in the volume of inspiration, it is surely some attestation of their truth that they lie on the surface of this ancient book. Let us briefly allude to several representations which occur in its pages:—

(5) **Doctrines.** (a) Respecting the nature of the Deity.—There are distinct allusions to a plurality in the Godhead. The doctrine of the Trinity seems to have been received by the writer and his contemporaries. In accordance with this view Christ is represented as *existing from eternity*; as an object of invocation and worship; and as the supreme Judge of men and angels.

(b) The doctrine of a future state of retribution is implied in many passages, and the *eternity* of future punishment is also distinctly contained in the book of Enoch. Whatever value may be attached to the theological opinions expressed in the book of Enoch, it is apparent from the preceding extracts that certain sentiments to which evangelical Christians assign a high importance, because, in their view, they are contained in Scripture, appear to have prevailed at the commencement of the Christian era. To the serious inquirer they can never be of trifling interest.

S. D.

ENOCH, CITY OF (ē'nok). See ENOCH, I.

ENON (ē'non). See ÆNON.

ENOS (ē'nos), (Heb. עִנֹּשׁ, *en-ōsh'*, man, especially as *mortal, decaying*), the son of Seth and

father of Cainan. He died at the age of 905. (B. C. 3937-3932). More properly ENOSH (Gen. iv:26; v.6, 7, 9, 10, 11; Luke iii:38).

ENOSH (ē'nosh), (1 Chron. i:1). Same as ENOS.

ENQUIRE (ēn'kwīr), (Heb. שָׁרַשׁ, *daw-rash'*, to search, ask. Ps. xxvii:4; Acts ix:11; Gen. xxiv:57).

(1) God's *enquiry* after men's iniquity imports his bringing it to light, and punishing for it. Job x:6. (2) Men's *enquiring of God*, or of the Lord, denotes their asking his mind by his priests or prophets, or immediately from himself, what they should do, or that he would grant what they need. Judg. xx:27; 1 Sam. ix:9; x:22; 2 Sam. ii:1; v:19, 23; 1 Kings xxii:5; Gen. xxv:22; Ezek. xxxvi:37. (3) To *enquire after God* is to pray to him. (Ps. lxxviii:34). (4) To *make enquiry after vows* is to consider how the vow may be eluded and broken (Prov. xx:25).

EN-RIMMON (ēn-rīm'mon), (Heb. עַיִן רִמּוֹן, *ane-rim-mone'*, fountain of pomegranates).

A place reinhabited after the return from captivity (Neh. xi:29). It is very probable that the name is the same as "Ain and Rimmon" (Josh. xv:32), Ain, Remmon (Josh. xix:7), and Ain Rimmon (1 Chron. iv:32; Neh. xi:29). Van de Velde and Wilton place it at *Um er-Rumâmîn*, between Eleutheropolis and Beersheba, where there is a large spring.

EN-ROGEL (ēn'rō'gel), (Heb. עַיִן רֹגֵל, *ane-ro-gale'*), name means *Foot-fountain*, and is construed by the Targum into 'Fuller's Fountain' because the fullers trod the clothes there with their feet.

It was near Jerusalem, on the boundary-line between the tribes of Judah and Benjamin (Josh. xv:7; xviii:6; 2 Sam. xvii:17; 1 Kings i:9). It has been usually supposed the same as the Fountain of Siloam. But Dr. Robinson is more inclined to find it in what is called by Frank Christians the Well of Nehemiah, but by the native inhabitants the Well of Job (*Bir Eyyāb*). There are only three sources, or rather receptacles of living water, now accessible at Jerusalem, and this is one of them. It is situated just below the junction of the Valley of Hinnom with that of Jehoshaphat. It is a very deep well, of an irregular quadrilateral form, walled up with large squared stones, terminating above in an arch on one side, and apparently of great antiquity. The well measures 125 feet in depth. In the rainy season the well becomes quite full, and sometimes overflows at the mouth. Usually, however, the water runs off under the surface of the ground, and finds an outlet some forty yards below the well. "But it has been proved to be the spring called by the natives 'the mother of steps' and by Christians the Virgin's Well" (Harper, *Bib. and Mod. Dict.*). Conder (*Palestine*, p. 26) identifies En-rogel with the Virgin's Well, and thinks it the same as Bethesda.

ENSAMPLE (ēn-sām'p'l). See EXAMPLE.

EN-SHEMESH (ēn-shē'mesh), (Heb. עַיִן שֶׁמֶשׁ, *ane sheh'mesh*, fountain of the sun), a landmark between Judah and Benjamin (Josh. xv:7; xviii:17), east of the Mount of Olives.

It is usually identified with the "well of the Apostles," about a mile and a half below or east of Bethany, on the road to Jericho.

ENSIGN (ēn-sīn), (Heb. אֵת, *ōth*, Num. ii:2), signal, sign, banner, standard.

Figurative. (1) God's *setting up an ensign* to the Assyrians, or others, imports his providen-

tial leading them forth to chastise his people, and punish his enemies, by war and spoil (Is. v:26, and xviii:3). (2) The setting up *standards* in a country imports approaching war and destruction (Jer. xlvi:21, and i:2). (3) Christ is a *standard*, or *ensign*; preached to Jews and Gentiles, he is the great means of assembling them to himself, and distinguishing them from others; he directs and animates them in their spiritual journey, and their warfare with sin, Satan, and the world; and enables them to oppose corruption and error: and for the same reason he is called a *standard-bearer* (Is. lix:19; xi:10; xlix:22, and lxii:10). (4) God *gives a banner to his people, to be displayed because of truth*, when he accomplishes his promise, signally protects and delivers them, or affords them a valiant army to conquer their foes. Or it may refer to Christ, the promised Messiah, as the great security of the Jewish nation (Ps. lx:4). (5) The destruction of Sennacherib's army was like the *fainting of a standard-bearer*: it was very sudden, and so universal among the commanders that scarce one remained to bear the colors (Is. x:18). (6) The Jews in these times were as an *ensign on a high hill*; they were reduced to a small number, and obliged to flee to mountains and hills for safety (Is. xxx:17). (See STANDARD.)

ENSUE (ēn-sū), (Gr. διώκω, *dee-ō'ko*, 1 Pet. iii:11), to pursue, to follow after, to overtake, to persecute.

EN TAPPUAH (ēn'tāp'pu-ah), (Heb. עַיִן תַּפּוּאָה, *ane tap-poo'akh*, fountain of Tappuah), a spring that marked one of the boundaries of Manasseh (Josh. xvii:7). It is probably identical with TAPPUAH.

ENTREAT (ēn-trēt').

1. Gr. ὑβρίσσω, *hoo-brid'zo*, to abuse, to use shamefully, Luke xviii:32; Gr. χράομαι, *khrah'om-ahēe*, Acts xxvii:3, in same sense.

2. Gr. ἐρωτάω, *er-oh-tah'oh*, Phil. iv:3 (A. V., "intreat"), to ask, pray, beseech.

ENVY (ēn'vŷ), (Heb. קִנְיָה, *kin-aw'*; Gr. φθόνος, *fthon'os*).

1. Feeling of uneasiness and displeasure at the prosperity of another, with the illicit wish that it was ours, not theirs (Ps. xxxvii:1; lxxiii:3; Prov. xxiv:1, 19, etc.).

2. The despicable passion which desires to bring another down below one's own level, while it covets the thing which he possesses (Prov. xxvii:4; Matt. xxvii:18; Rom. i:29, etc.). The *envious* man sickens at the sight of enjoyment; he is easy only in the misery of others: all endeavors, therefore, to satisfy an *envious* man are fruitless. (1) So Rachel *envied* her sister Leah because of her fruitfulness (Gen. xxx:1). (2) Joseph's brethren *envied* him because his father loved him (Gen. xxxvii:11). (3) The Jews *envied* Paul and Barnabas because they preached the gospel of Christ (Acts xiii:4, 5). (4) Some preached Christ *out of envy* and strife, from discontent at the high honors of the apostle Paul, and in order to vex his spirit and diminish his reputation (Phil. i:15). (5) *Envy* is more dangerous than open outrageous anger and fury, as it is more abiding, and will make a man turn himself into every shape to undo his neighbor (Prov. xxvii:4). It is often pointed against the most excellent and useful works (Eccl. iv:4). (6) It is its own punishment, is *rotteness* to the bones, and slays the silly one; it stops the blessings of heaven, and torments the soul where it dwells, even unto death (Prov. xiv:30; Job v:2).

EPÆNETUS (ep-æn'ē-tus), (Gr. Ἐπαίνετος, *ep-i-net-os*, praised).

A Christian resident at Rome when Paul wrote his Epistle to the Church in that city, and one of the persons to whom he sent special salutations (Rom. xvi:5). In the received text he is spoken of as being 'the first fruits of Achaia,' but 'the first fruits of Asia' is the reading of the best MSS.

EPAPHRAS (ēp'a-phrās), (Gr. Ἐπαφρᾶς, *ep-af-ras*), probably a contraction of *Epaphroditus*.

An eminent teacher in the church at Colossæ, denominated by Paul 'his dear fellow-servant,' and 'a faithful minister of Christ' (Coloss. i:7; iv:12). From Paul's Epistle to Philemon it appears that he suffered imprisonment with the apostle at Rome. It has been inferred from Coloss. i:7, that he was the founder of the Colossian Church; and Dr. Neander supposes that the apostle terms him a *servant of Christ in our stead*, because he committed to him the office of proclaiming the gospel in the three Phrygian cities, Colossæ, Hierapolis, and Laodicea, which he could not visit himself (*Hist. of Planting*, etc. i: pp. 200, 373, Eng. transl.). This language, however, is by no means decisive: yet most probably Epaphras was one of the earliest and most zealous instructors of the Colossian Church.

EPAPHRODITUS (e-pāph-ro-dī'tus), (Gr. Ἐπαφροδίτος, *ep-af-rod'ee-tos*), a messenger (ἀπόστολος, *ap-os'to-los*) of the church at Philippi to the Apostle Paul during his imprisonment at Rome, who was entrusted with their contributions for his support (Phil. ii:25; iv:18).

Paul's high estimate of his character is shown by an accumulation of honorable epithets; *brother, fellow worker, and my fellow soldier*. Epaphroditus, on his return to Philippi, was the bearer of the epistle which forms part of the canon. Grotius and some other critics conjecture that Epaphroditus was the same as the Epaphras mentioned in the Epistle to the Colossians. But though the latter name may be a contraction of the former, the fact that Epaphras was most probably in prison at the time sufficiently marks the distinction of the persons.

J. E. R.

EPENETUS (ēp'e-nē'tus). See EPÆNETUS.

EPHAH (ē'phah), (Heb. אֵפָה, *ay-faw'*, darkness).

1. The eldest son of Midian dwelt in Arabia Petraea, and gave name to the city Ephah (Gen. xxv:4; 1 Chron. i:33). (B. C. about 1988.) The town and the small extent of land around it made part of Midian on the eastern shore of the Dead Sea very different from another country of this name on the Red Sea. Ptolemy speaks of a town called Ippos on the eastern coast of the Dead Sea, a little below Modian or Midian. Is. lx:6, 7, seems to clearly connect the descendants of Ephah with the Midianites, Keturahite Sheba, and the Ishmaelites.

2. A concubine of Caleb, in the tribe of Judah (1 Chron. ii:46). (B. C. after 1856.)

3. Son of Jahidai, in the tribe of Judah (1 Chron. ii:47). (B. C. bet. 1836 and 1455.)

EPHAH (ē-fā), (Heb. אֵפָה, *ay-faw'*), a dry measure of capacity, equivalent to the bath for liquids. It contained three pecks and three pints. (See WEIGHTS AND MEASURES.)

EPHAI (ē'phāi), (Heb. אֵפָי, *o-fah'ee*, birdlike).

A man whose sons were left in Judah after the deportation to Babylon (Jer. xli:8). (B. C. 548.) They seem to have been massacred by Ishmael (Jer. xli:3).

EPHER (ē'pher), (Heb. אֵפֶר, *ay'fer*, gazelle).

1. The second son of Midian, and brother of Ephah (1 Chron. i:33). He dwelt beyond Jordan (1 Kings iv:10), and might people the isle of Upher in the Red Sea, or the city of Orpha, in the Diarbekr. (B. C. bet. 1988 and 1800.)

2. Son of Ezra (1 Chron. iv:17). (B. C. bet. 1618 and 1400.)

3. Head of a family of Manassites (1 Chron. v:24). (B. C. about 800.)

EPHES-DAMMIM (ē'phes-dām'mim), (Heb. אֵפֶס דַּמִּיִּם, *eh'fes dam-mee'm'*, boundary of blood, called Pas-dammim, 1 Chron. xi:13).

A place where the Philistines encamped between Socoh and Azekah just before Goliath was killed (1 Sam. xvii:1). Commonly identified with the ruins Damun, about four miles to the northeast of Socoh.

EPHESIAN (e-fē'zhan), (Gr. Ἐφέσιος, *eph-eh'-see-os*), an inhabitant of Ephesus, used only of Trophimus (Acts xxi:29). In the plural it is used for the whole city, noted for the worship of Diana (Acts xix:28, 34).

"Ye men of Ephesus, what man is there that knoweth not how that the city of the Ephesians is a worshiper of the great goddess Diana, and of the image which fell down from Jupiter?" (Acts xix:35).

This question of the town clerk is beautifully illustrated by an inscription which has been discovered by Chandler near the aqueduct at Ephesus, which states that "It is notorious that not only among the Ephesians but also everywhere among the Greek nations, temples are consecrated to her (Diana)."

The similar adjective, *Ephesine*, "of Ephesus," also occurs in Rev. ii:1, in some Greek MSS.

EPHESIANS, EPISTLE TO THE.

(1) **Structure and Content.** This writing begins with the usual superscription of the Pauline letters including a self-naming of the writer and a benediction upon the readers (i:1, 2). This is immediately followed by a doxology or thanksgiving section, also characteristic of Paul's letters. In this case, however, the thanksgiving is somewhat lengthier and more meditative in its tone, including the writer's thoughts on the subject of God's grace as exhibited in the foreordination of believers to be holy and without blemish before him. The ground of foreordination is God's "good pleasure," and the end of it, "the praise of his glory." The means through which it is realized in the world is the redemption secured through the Beloved (i:3-14). From this thanksgiving for the foreordaining grace of God the writer passes to a prayer for the readers that they might appreciate and "measure the whole range of the work accomplished in them by faith, the greatness of the Divine power that has been displayed in their behalf, and the beauty of the hope to which this change entitles them" (i:15-23). Thus far the writer introduces himself to his readers and makes known his hopes and prayer for them. From this point on he conveys to them his special message. This is given in two parts—a didactic and a practical one. In the didactic part of this message, the apostle begins with the thought already expressed in his prayer for a sense of appreciation of the magnitude of God's grace. He calls their attention to the nature of this grace (ii:1-10); the former alienation of the readers from God and their present reconciliation with Him as a result of this grace (ii:11-22); his own share in the work of transmitting this grace to

men and building up the community of those who accept it into a living body (iii:1-13); and his new prayer for them that they might know their privileges and be strengthened spiritually and filled with the fulness of God (iii:14-21). The practical part of the Epistle which begins with ch. iv urges upon the readers the realization of their membership in the one church which is the body of Christ. This should issue in endeavors to maintain the unity of the body (iv:1-6), and is the one of the various gifts bestowed upon them towards the healthy growth of the whole body (iv:7-16). All this they should do as a church, but also as individuals they should live worthily of their membership in Christ by cultivating a pure and spotless morality (iv:17; v:21). Then, as families, they should obey those laws of mutual subordination and consideration which are to make their domestic relations perfect. First, husbands and wives (v:22-33), then children and parents (vi:1-4) and finally servants and masters are thus urged to a perfect life. These exhortations the apostle brings to a conclusion by returning to the thought of the church and her warfare and calling on his readers to gird themselves for this warfare (vi:10-20), and closes with a few words of a personal import to which he appends the usual benediction (vi:21-24).

(2) **To Whom Addressed.** But who were the readers thus addressed by the apostle? The question has received different answers. The occasion for difference of opinion is the doubt cast on the genuineness of the words *ἐν Ἐφέσῳ*, in Ephesus, in i:1, through the omission of these words in a combination of ancient MSS. characterized by Lightfoot as almost always representing the original text in the Epistles of Paul. The various views proposed on the subject are briefly: (1) That the letter was addressed as traditionally held to the Church at Ephesus and that the omission of the words in question from the ancient MSS. and versions is due to some critical conjecture of an ancient copyist who thought that the contents of the Epistle did not bear out this address and therefore left them out. This view, however, has not found favor. Critically, such omission must have been made late, but, as a matter of fact, it is the earlier MSS. that makes it. Moreover, this view is based on the existence of a critical spirit in the early church which cannot be proved. A mere accidental omission is not probable and in general no sufficient reason can be given for such omission.

(2) A second class of critics, led by Grotius, revive the view of the ancient Gnostic Marcion and maintain that the church addressed is that at Laodicea and that we have in this Epistle the letter written to that church and alluded to in Col. iv:16, which was commonly supposed to have been lost. While this view is plausible for many reasons, it has been in modern times set aside in favor of another theory held in the following two varieties.

(3) That the letter was an encyclical or circular addressed to a circle of churches without the special designation of any of them in the original copy. Such an encyclical might be localized at Ephesus and the phrase in Ephesus being inserted in i:1, would be perpetuated. In such a case the address would read, "to the saints existing (*τοῖς ὄντων*) and faithful in Christ Jesus." (See Milligan, *Encyclopædia Britannica*, art. "EPHESIANS.") As this construction is one unusual in Greek, many have objected to the whole view associated with it and have resorted to another explanation.

(4) That the encyclical was addressed to a definite circle of churches and issued in separate copies to each of these churches. The original

had a blank wherein the name of each of the cities of the circle could be inserted in each separate copy. The name Ephesus among others (Laodicea, Hierapolis) was thus introduced into one of these copies and gradually displaced the others by serving as the original of subsequent copies made for collections of Paul's Epistles. As the original character and purpose of the Epistle, however, was remembered long after this period, the omission from the text of some MSS. would also be natural. This view, proposed first by Ussher, has been accepted and held with some modifications by Bengel, Neander, Olshausen, Reuss, Ellicott, Lightfoot, Hort, B. Weiss, Moule, Abbott, etc. It best explains the facts of the case and may be safely taken as fairly well established.

(3) **Genuineness.** The genuineness of the Epistle to the Ephesians was not called in question until the first quarter of the nineteenth century. Although Erasmus did express his appreciation of the difference of style between it and the other epistles of Paul, no one in the ancient or mediæval church doubted that it was a writing of Paul's. In fact, the testimony of antiquity is fuller and clearer for the authenticity of Ephesians than for any of the other Pauline letters. This testimony goes back to Marcion, who, as already referred to, ascribed it to Paul, though alleging that it was addressed to the Laodiceans. Polycarp somewhat earlier quotes from it, and Ignatius addressing the Ephesians says to them in effect that they are the church to which "the sanctified Paul" "remembers them in Christ" in "the whole letter" (Ign. *ad Eph.* xii:3). This testimony, however, did not seem sufficiently strong to Usteri, a disciple of Schleimacher, who upon the basis of internal evidence surmised that it was written by Tychicus or some other companion of Paul and signed by the Apostle himself, who in general agreed with its content and adopted it as his own. DeWette elaborated the objections to the authenticity of the epistle and came to the conclusion that it was a "verbose amplification" of the Epistle to the Colossians. These objections were further taken up by the Tübingen school (Baur, Schwegler, Köstlin, Hilgenfeld, Hausrath) and woven into their system of New Testament criticism. These critics ascribed Ephesians as well as Colossians to a writer of the middle of the second century who proposed it as an irenicon for the purpose of uniting the various factions of the Church. From these radical positions the criticism of more recent years has been very slow to recede, if indeed it may be said to have receded at all. Davidson in England, Hockstra and others in Holland, and Pfeleiderer, Weizsäcker, Ritschl, and the Ritschlians in Germany, together with Von Soden, Schmidel and others, still deny the Pauline authorship of Ephesians. On the other hand, however, there are not lacking critics of the highest type of scholarship who stoutly defend the older belief. Some of these are B. Weiss, Salmon, Godet, Zahn, and in fact the great body of conservative scholars. To these may be added further some who, like Jülicher, take the position that though the Pauline authorship of the Epistle cannot be demonstrated, neither can the denial of such authorship be established. The external testimony is certainly exceedingly strong. In fact apart from theoretical and *a priori* grounds the argument for authenticity is more than sufficient to overcome all the objections alleged against it. Accordingly we may safely regard the Epistle as neither the work of a second-century disciple of Paul nor "deutero-Pauline" in the sense that it was thought out and

composed by a close companion of the Apostle's and adopted and signed by himself.

(4) Time and Place of Composition. But when and upon what occasion did the Apostle write the Epistle? A clue to the answer is furnished by its relations to the Epistle to the Colossians. These two letters were carried to their respective destinations by the same messenger, Tychicus (Eph. vi:21, 22; Col. iv:7, 8). In fact, the words in which the apostle announces the fact and manner of sending Tychicus with the letters are nearly identical. If we add to this consideration the fact that the style of language and the cycle of thought in the two writings present strikingly close resemblances we shall be forced to the conclusion that Ephesians, like Colossians, was written from Rome about the end of the year 62 or the beginning of 63.

(5) Design of the Epistle. The design of the Epistle has also called forth a variety of views. The Tübingen School of critics ascribed to the author the desire to lift the church to a sense of her own unity by presenting her to herself as the Body of Jesus Christ and by holding before her at the same time a higher conception of the person of Jesus Christ than had been held hitherto. Such a presentation of unity would repress and cause to vanish all remnants of the conflict between Judaists and Paulinists. Others with Weiss and Gore hold that the Unity of the Church was more directly and primarily the theme of the Apostle. The occasion and need for emphasizing this idea was furnished by the existence of churches in Asia Minor which were planted by Paul alongside of others planted by others. These did not always harmonize with each other. Still others with Holtzmann and Reuss find the theme of the Epistle in the idea of a Divine plan dominating the development of the moral plan of the universe. In this plan the apparent difference between Judaism and paganism finds its solution and disappears. Sabatier (*Apostle Paul*) takes the ground that the epistle had a speculative aim. Hitherto the Apostle had preached the Gospel as a means of salvation; in this letter he raises it to the plane of a key to a cosmic philosophy. He shows that redemption "is the eternal thought of God embracing not only all the ages, but also the entire universe." The key to the design of the letter is to be found rather with *Godet* in iv:1, "I therefore beseech you to walk worthily of the calling wherewith ye were called." The aim is practical. The appeal to the sense of the greatness of the salvation enjoyed by believers, of the exaltation of Christ their redeemer, of the dignity and unity of the church, is in order that a desire for pure and dignified living might be fostered thereby. The Christology, Soteriology, and Ecclesiology of the Epistle are seen in the light of this central thought and purpose of it to be not subjects of study for themselves, but means towards the ethically practical end of raising the readers to a higher life in holiness.

(6) Relations of Ephesians and Colossians. The similarities between the epistles to the Colossians and Ephesians have already been mentioned. They are striking and call for an explanation. They cover not merely the circle of thought in the two writings, but extend into verbal coincidences. The first theory set forth to account for them was that of DeWette. Assuming the genuineness of Colossians, this scholar asserted that the writer of Ephesians had borrowed from this letter of Paul's. Holtzmann on the contrary thinks that the priority is on the side of Ephesians. He does

not, however, concede the authenticity of either epistle in its present form, but alleges that, Paul having written a short letter to the Colossians, this was used by the author of Ephesians as the basis of his writing. The same writer, however, later added to and expanded the original Colossian Epistle. This view, though not accepted in its entirety, is thought by many to indicate the line along which a solution of the problem is to be sought (Hausrath, Mangold, Pfeiderer). It is difficult, however, to believe that a writer so well acquainted with the thought of Paul should have limited himself to but a single one of the Apostle's writings, and that a very brief one.

As has already been shown, no theory that proceeds upon the assumption of the non-authenticity of this Epistle can be considered correct. Nor is Colossians to be considered non-Pauline (see **COLOSSIANS**). But if both are Paul's writings the most natural explanation of their resemblances is to be found in the fact that he wrote both about the same time. But if so, he must have written Colossians first. The reasons for this order are the following: First, it would be natural that a specific need such as there was in Colossæ for a message should receive attention first before the Apostle could think of a more general communication such as he gives in Ephesians. Secondly, it is easier to account for the occurrence of the larger and freer working over of the thought in Ephesians if we assume that the Colossians precedes than for the more condensed form in Colossians upon the basis of the precedence of Ephesians. Progress is generally from the briefer to the more lengthy form. Thirdly, it is more natural that Paul should have used in dealing with the broader and more general theme before him in writing Ephesians the material already in his mind in treating of the narrower and more specific theme of Colossians than the reverse. That the theme of Ephesians was more general may be easily seen from the diversity of view among scholars on this point. The use of the phrase "you also" in Ephesians vi:21 has been alleged as a proof that the Colossian letter was already written, but the phrase simply implies that the apostle looks upon the Ephesians in connection with all other Christians, not simply the Colossians. Col. iv:16, where the apostle suggests that the epistle from Laodicea (our *Ephesians*) should be read at Colossæ, is said to support the supposition that the Ephesian Epistle was in existence when Colossians was written. But the reasoning is not conclusive. The truth is, as above stated, the two letters were composed so nearly at the same time that either of them might be referred to in the other as already in existence.

(7) Helps to the Study of Ephesians. The large works of Meyer, Alford, Olshausen, and Lange contain good commentaries on the Epistle to the Ephesians. Of separate treatises for the English reader, Abbott's (in the *International Critical Series*) is the most scientific and thorough in method and scope. Barry's (in *Ellicott's New Testament Com. for English Readers*), Beet's, Ellicott's, Eadie's, L. J. Davies', Sadler's, and McPherson's are also all good from the point of view of exegetical and linguistic study. Findlay's (in the *Expositor's Bible*), Blaikie's (in the *Pulpit Com.*), Gore's and Moule's (*Ephesian Studies*), are purely expository. Moule has also written the volume on Ephesians in the *Cambridge Bible*. Hodge's and Dale's works are doctrinal expositions. For the reader of German, Harless and von Soden (in the *Hand Kommentar* of Holtzmann and Lipsius) may be recommended as good. A. C. Z.

EPHESUS (ěph'e-sūs), (Gr. Ἐφεσος, *ef'es-os*), an old and celebrated city, capital of Ionia, one of the twelve Ionian cities in Asia Minor in the Mythic times.

(1) **Location.** It lay on the river Cayster, not far from the coast of the Icarian sea, between Smyrna and Miletus. It was also one of the most considerable of the Greek cities in Asia Minor; but while, about the epoch of the introduction of Christianity, the other cities declined, Ephesus rose more and more. It owed its prosperity in part to the favor of its governors, for Lysimachus named the city Arsinoe, in honor of his second wife, and Attalus Philadelphus furnished it with splendid wharfs and docks; in part to the favorable position of the place, which naturally made it the emporium of Asia on this side the Taurus (Strabo, xiv. pp. 641, 663).

(2) **History.** Under the Romans Ephesus was the capital not only of Ionia, but of the entire

as one of the seven wonders of the world. It stood on a platform about 425 feet in length and 239½ feet in width, measured from the lowest step. A flight of ten steps led to the pavement of the platform, and three more steps to the pavement of the temple. The temple itself was 342½ feet in length and 164 feet in width. It consisted of two rows of eight columns each in front and rear, and two rows of twenty columns each on either side of the sanctuary. These with two columns at each entrance of the sanctuary made one hundred in all. Each was a monolith of marble 55 feet in height, and the eighteen at each end were sculptured. The roof was covered with large white marble tiles. The cella or inner sanctuary, which these columns surrounded, was 70 feet wide and 105 long. Its internal ornamentation was of surpassing splendor, adorned with works of art by Phidias and Praxiteles, Scopas, Parrhasius, and Apelles. (Davis, *Bib. Dict.*)

Site of Ephesus.

province of Asia, and bore the honorable title of the first and greatest metropolis of Asia. The Bishop of Ephesus in later times was the president of the Asiatic dioceses, with the rights and privileges of a patriarch. In the days of Paul Jews were found settled in the city in no inconsiderable number (compare Joseph. *Antiq.* xiv:10, 11), and from them the Apostle collected a Christian community (Acts xviii:19; xix:1; xx:16), which being fostered and extended by the hand of Paul himself, became the center of Christianity in Asia Minor. On leaving the city the Apostle left Timothy there (1 Tim. i:3): at a later period, according to a tradition which prevailed extensively in ancient times, we find the Apostle John in Ephesus, where he employed himself most diligently for the spread of the gospel, and where he not only died, at a very old age, but was buried, with Mary the mother of the Lord. Some make John bishop of the Ephesian communities, while others ascribe that honor to Timothy. In the book of Revelation (ii:1) a favorable testimony is borne to the Christian churches at Ephesus.

(3) **Temple of Diana.** The classic celebrity of this city is chiefly owing to its famous temple, and the goddess in whose honor it was built, namely, 'Diana of the Ephesians.' The temple was a magnificent work of Ionic architecture, and ranked

The earlier temple was burnt down on the night in which Alexander was born (B. C. 355), by an obscure person of the name of Eratostratus, who thus sought to transmit his name to posterity; and, as it seemed somewhat unaccountable that the goddess should permit a place which redounded so much to her honor to be thus recklessly destroyed, it was given out that Diana was so engaged with Olympias, in aiding to bring Alexander into the world, that she had no time nor thought for any other concern. At a subsequent period, Alexander made an offer to rebuild the temple, provided he was allowed to inscribe his name on the front, which the Ephesians refused. Aided, however, by the whole of Asia Minor, they succeeded in erecting a still more magnificent temple, which the ancients have lavishly praised and which it took two hundred and twenty years to complete. The theater was one of the largest known of all that have remained to modern times. The auditorium was semicircular, 495 feet in diameter, and the orchestra was 110. The stage was 22 feet wide. The theater seated 24,500 persons. Among his other enormities Nero is said to have despoiled the temple of Diana of much of its treasure. It continued to conciliate no small portion of respect till it was finally burnt by the Goths in the reign of Gallienus. The 'silver shrines' of

the Ephesian Artemis mentioned in Acts xix:24, have been already noticed. (See DEMETRIUS.)

(4) **Sorcery and Magic.** The Ephesian multitude were addicted to sorcery; indeed, in the age of Jesus and his Apostles, adepts in the occult sciences were numerous: they traveled from country to country, and were found in great numbers in Asia, deceiving the credulous multitude and profiting by their expectations. They were sometimes Jews, who referred their skill and even their forms of proceeding to Solomon, who is still regarded in the East as head or prince of magicians (Joseph. *Antiq.* viii:2, 5; Acts viii:9; xiii:6, 8). In Asia Minor Ephesus had a high reputation for magical arts (Ortlob, *De Ephes. Libris combustis*).

The books mentioned, Acts xix:19, were doubtless books of magic. How extensively they were in use may be learned from the fact that 'the price of them' was 'fifty thousand pieces of silver.' Very celebrated were the Ephesian letters ('*Ἐφέσια γράμματα*'), which appear to have been a sort of magical formulæ written on paper or parchment, designed to be fixed as amulets on different parts of the body, such as the hands and the head (Plut. *Sym.* vii). Erasmus (*Adag. Cent.* ii. 578) says that they were certain signs or marks which rendered their possessor victorious in everything.

(5) **Ruins.** The ruins of Ephesus lie two short days' journey from Smyrna, in proceeding from which towards the southeast the traveler passes the pretty village of Sedekuy; and two hours and a half onwards he comes to the ruined village of Danazzi, on a wide, solitary, uncultivated plain, beyond which several burial grounds may be observed; near one of these, on an eminence, are the supposed ruins of Ephesus, consisting of shattered walls, in which some pillars, architraves, and fragments of marble have been built. The soil of the plain appears rich. It is covered with a rank, burnt-up vegetation, and is everywhere deserted and solitary, though bordered by picturesque mountains. A few corn-fields are scattered along the site of the ancient city, which is marked by some large masses of shapeless ruins and stone walls. Towards the sea extends the ancient port, a pestilential marsh. Along the slope of the mountain and over the plain are scattered fragments of masonry and detached ruins, but nothing can now be fixed upon as the great temple of Diana. There are some broken columns and capitals of the Corinthian order of white marble; there are also ruins of the theater above mentioned, consisting of some circular seats and numerous arches.

The supposed site still retains the name of the parent city, *Asalook* or *Ayasaluk*, a Turkish word, which is associated with the same idea as Ephesus, meaning the City of the Moon (Fellows). But Kiepert, the noted German geographer, and Isaac Taylor, a great authority on names, say that *Ayasaluk* is a corruption of *Hagios Theologos*, the holy theologian, that is, St. John. A church dedicated to St. John is thought to have stood near, if not on the site of, the present mosque. Arundell (*Discoveries*, vol. ii. p. 253) conjectures that the gate, called the Gate of Persecution, and large masses of brick wall, which lie beyond it, are parts of this celebrated church, which was fortified during the great Council of Ephesus. The tomb of St. John was in or under his church. Though Ephesus presents few traces of human life, and little but scattered and mutilated remains of its ancient grandeur, yet the environs, diversified as they are with hill and dale, and not scant-

ily supplied with wood and water, present many features of great beauty.

(6) **Church at Ephesus.** However much the Church at Ephesus may (Rev. ii:2), in its earliest days, have merited praise for its 'works, labor, and patience,' yet it appears soon to have 'left its first love,' and to have received in vain the admonition—'Remember, therefore, from whence thou art fallen, and repent and do the first works; or else I will come unto thee quickly, and will remove thy candlestick out of his place, except thou repent.' If any repentance was produced by this solemn warning, its effects were not durable, and the place has long since offered an evidence of the truth of prophecy, and the certainty of the Divine threatenings, as well as a melancholy subject for thought to the contemplative Christian. Its fate is that of the once-flourishing seven churches of Asia: its fate is that of the entire country—a garden has become a desert. Busy centers of civilization, spots where the refinements and delights of the age were collected, are now a prey to silence, destruction, and death. Consecrated first of all to the purposes of idolatry, Ephesus next had Christian temples almost rivaling the pagan in splendor, wherein the image of the great Diana lay prostrate before the cross; and, after the lapse of some centuries, Jesus gives place to Mahomet, and the crescent glitters on the dome of the recently Christian church. A few more scores of years, and Ephesus has neither temple, cross, crescent, nor city, but is 'a desolation, a dry land, and a wilderness.' Even the sea has retired from the scene of devastation, and a pestilential morass, covered with mud and rushes, has succeeded to the waters which brought up ships laden with merchandise from every part of the known world. Several important councils were held in Ephesus, among which was the third ecumenical council (June 22-August 31, A. D. 431). A small Turkish town to-day represents the once noted city. (Mc. & Str. *Cyc.*; *Modern Discoveries on the Site of Ancient Ephesus*. J. T. Wood. 1890.) J. R. B.

EPHLAL (ěph'lal), (Heb. *עֲפָלָל*, *ef-lawl'*, judge), son of Zabad, of the house of Hezron and Jerahmeel; a descendant of Judah (1 Chron. ii:37), B. C. 1618.

EPHOD (ě'phod), (Heb. *אֵפֹד*, *ay-fode'*, ephod or image).

A man whose son Hanniel, as head of the tribe of Manasseh, was one of those designated to assist Joshua and Eleazar in the division of the land of Canaan (Num. xxxiv:23). (B. C. ante 1618.)

EPHOD (ě'od), (Heb. *אֵפֹד*, *ay-fode'*), an article of dress worn by the Hebrew priests.

It was made of plain linen (1 Sam. ii:18; 2 Sam. vi:14), except the ephod of the high priest, which was embroidered with various colors. It consisted of two parts, one covering the back and the other the breast, clasped together upon each shoulder with a large onyx stone, upon which were engraved the names of the twelve tribes, six on each stone; and upon the place where it crossed the breast was the breastplate. (See BREAST-PLATE OF THE HIGH PRIEST.) It was further fastened by a "curious girdle of gold, blue, purple, scarlet, and fine twined linen." The ephod, or something resembling it and called by the same name, was worn by others besides the priests. (1 Chron. xv:27 and passages before cited). (See PRIEST, HEBREW PRIESTHOOD.)

EPHPHATHA (ěph'pha-thà), (Gr. *ἐφφαθά*, *ef-fath-ah'*, be thou opened), a Syriac word, which our Saviour pronounced when he cured one deaf and dumb (Mark vii:34).

EPHRAIM (ē'phra-īm), (Heb. עִפְרַיִם, *ef-rah'yim*, fruitful).

1. The younger son of Joseph, but who received precedence over the elder in and from the blessing of Jacob (Gen. xli:52; xlviii:1). That blessing was an adoptive act, whereby Ephraim and his brother Manasseh were counted as sons of Jacob in the place of their father; the object being to give to Joseph, through his sons, a double portion in the brilliant prospects of his house.

(1) **Two Tribes.** Thus the descendants of Joseph formed *two* of the tribes of Israel, whereas every other of Jacob's sons counted but as one. There were thus, in fact, thirteen tribes of Israel; but the number twelve is usually preserved, either by excluding that of Levi (which had no territory), when Ephraim and Manasseh are separately named, or by counting these two together as the tribe of Joseph, when Levi is included in the account. The intentions of Jacob were fulfilled, and Ephraim and Manasseh were counted as tribes of Israel at the departure from Egypt, and as such shared in the territorial distribution of the Promised Land (Num. i:33; Josh. xvii:14; 1 Chron. vii:20).

(2) **Population.** At the departure from Egypt, the population of the two tribes of Ephraim and Manasseh together amounted to 72,700 men capable of bearing arms, greatly exceeding that of any single tribe, except Judah, which had somewhat more. During the wandering, their number increased to 95,200, which placed the two tribes much higher than even Judah. At the Exode, Ephraim singly had 40,500, and Manasseh only 32,200; but a great change took place in their relative numbers during the wandering. Ephraim lost 8,000, and Manasseh gained 20,500; so that just before entering Canaan, Ephraim stood at 32,500, and Manasseh at 52,700. At the departure from Egypt, Ephraim, at 40,500, was above Manasseh and Benjamin in numbers; at the end of the wandering it was, at 32,500, above Simeon only, which tribe had suffered a still greater loss of numbers (Comp. Num. i and xxvi).

(3) **Territory.** One of the finest and most fruitful parts of Palestine, occupying the very center of the land, was assigned to this tribe. It extended from the borders of the Mediterranean on the west to the Jordan on the east: on the north it had the half-tribe of Manasseh, and on the south Benjamin and Dan (Josh. xvi:5, *sq.*; xvii:7, *sq.*). This fine country included most of what was afterwards called Samaria, as distinguished from Judæa on the one hand, and from Galilee on the other. The tabernacle and the ark were deposited within its limits, at Shiloh; and the possession of the sacerdotal establishment, which was a central object of attraction to all the other tribes, must, in no small degree, have enhanced its importance, and increased its wealth and population.

(4) **Subsequent History.** The domineering and haughty spirit of the Ephraimites is more than once indicated (Josh. xvii:14; Judg. viii:1-3; xii 1) before the establishment of the regal government; but the particular enmity of Ephraim against the other great tribe of Judah, and the rivalry between them, do not come out distinctly until the establishment of the monarchy.

In the election of Saul from the least considerable tribe in Israel, there was nothing to excite the jealousy of Ephraim; and, after his heroic qualities had conciliated respect, it rendered the new king true allegiance and support. But when the great tribe of Judah produced a king in the person of David, the pride and jealousy of Eph-

raim were thoroughly awakened, and it was doubtless chiefly through their means that Abner was enabled to uphold for a time the house of Saul; for there are manifest indications that by this time Ephraim influenced the views and feelings of all the other tribes. They were at length driven by the force of circumstances to acknowledge David upon conditions; and were probably not without hope that, as the king of the nation at large, he would establish his capital in their central portion of the land. But when he not only established his court at Jerusalem, but proceeded to remove the ark thither, making his native Judah the seat both of the theocratical and civil government, the Ephraimites became thoroughly alienated, and longed to establish their own ascendancy. The building of the temple at Jerusalem, and other measures of Solomon, strengthened this desire; and although the minute organization and vigor of his government prevented any overt acts of rebellion, the train was then laid, which, upon his death, rent the ten tribes from the house of David, and gave to them a king, a capital, and a religion suitable to the separate views and interests of the tribe.

Thenceforth the rivalry of Ephraim and Judah was merged in that between the two kingdoms, although still the predominance of Ephraim in the kingdom of Israel was so conspicuous as to occasion the whole realm to be called by its name, especially when that rivalry is mentioned.

2. A city in the wilderness of Judæa, to which Jesus withdrew from the persecution which followed the miracle of raising Lazarus from the dead (John xi:54). It is placed by Eusebius (*Ephron*) eight Roman miles north of Jerusalem. This indication would seem to make it the same with the Ephraim which is mentioned in 2 Chron. xiii:19, along with Bethel and Jeshanah, as towns taken from Jeroboam by Abijah.

3. The mountain of Ephraim was a mountain or group of mountains in central Palestine, in the tribe of the same name, on or towards the borders of Benjamin (Josh. xvii:15; xix:50; xx:7; Judg. vii:24; xvii:1; 1 Sam. ix:4; 1 Kings iv:8). From a comparison of these passages it may be collected that the name of 'Mount Ephraim' was applied to the whole of the ranges and groups of hills which occupy the central part of the southernmost border of this tribe, and which are prolonged southward into the tribe of Benjamin. In the time of Joshua these hills were densely covered with trees (Josh. xvii:18), which is by no means the case at present. In Jer. l:19, Mount Ephraim is mentioned in opposition with Bashan, on the other side of the Jordan, as a region of rich pastures, suggesting that the valleys among these mountains were well watered and covered with rich herbage, which is true at the present day.

4. The forest of Ephraim in which Absalom lost his life (2 Sam. xviii:6-8), was in the country east of the Jordan, not far from Mahanaim. How it came to bear the name of a tribe on the other side the river is not known. Some think it was on account of the slaughter of the Ephraimites here in the time of Jephthah (Judg. xii:4-6); but others suppose that it was because the Ephraimites were in the habit of bringing their flocks into this quarter for pasture, for the Jews allege that the Ephraimites received from Joshua, who was of their tribe, permission to feed their flocks in the woodlands within the territories of any of the tribes of Israel; and that as this forest lay near their territories on the other side the Jordan, they were wont to drive their flocks over to feed there.

(See Jarchi, Kimchi, Abarbanel, etc.) (2 Sam. xviii:6.)

5. A place by the name of Ephraim is also mentioned in 2 Sam. xiii:23. If it is a town there is no clue to its situation.

EPHRAIM, GATE OF (ē'phra-im). This was one of the gates of Jerusalem (2 Kings xiv:13; 2 Chron. xxv:23; Neh. viii:16; xii:39).

As the gates of oriental cities were named after the locality towards which they looked, this was on the north side; probably near the present "gate of Damascus."

EPHRAIMITE (ē'phra-im-ite), belonging to the tribe of Ephraim (Judg. xii:5). Elsewhere written Ephrathite.

EPHRAIN (ē'phra-īn), (Heb. עֲפְרַיִם, *ef-rone'*), a city of Israel which Abijah captured from Jeroboam (2 Chron. xiii:19).

It has been conjectured that this place is identical with the Ephraim "by" which Absalom's sheep farm was situated (2 Sam. xiii:23); with Ephraim (John xi:54); and with Ophrah (Josh. xviii:23); but nothing can be definitely stated.

EPHRATAH or **EPHRATH** (ēph'ra tah or ēph'rath), (Heb. עֲפְרַתָּה, *ef-raw'thaw*, fruitfulness, fruitful).

1. The ancient name for BETHLEHEM (which see).

2. The second wife of Caleb, son of Hezron. She was the grandmother of Caleb the spy (1 Chron. ii:19, 50; perhaps also 24, and iv:4). (B. C. after 1856.)

EPHRATHITE (ēph'rath-ite), (Heb. עֲפְרַתִּי, *ef-rawth-ee'*).

1. Applied to Elimelech and family as an inhabitant of Bethlehem (Ruth i:2).

2. The designation of Elkanah, father of Samuel (1 Sam. i:1).

EPHRON (ē'phron), (Heb. עֲפְרָן, *ef-rone'*, fawn-like), a Hittite residing in Hebron, who sold to Abraham the cave and field of Machpelah as a family sepulcher (Gen. xxiii:6-17; xxv:9; xlix:29, 30; i:13), B. C. 2027.

EPHRON, MOUNT (ē'phron, mount), (Heb. הַר עֲפְרָן, *har-ef-rone'*), one of the landmarks of the northern boundary of the tribe of Judah, between the water of Nepltoah and Kirjath-jearim (Josh. xv:9). It is, therefore, probably the range of hills on the west of the *Wady Beit-Hamina*.

EPICUREANS (ēp'i ku-rē'anz or ēp'i-kū're-anz), (Gr. Ἐπικούρειοι, *ep-ee-koo'ri-oy*).

This was a sect of Gentile philosophers founded by Epicurus, B. C. 342-271, who was born on the island of Samos, but taught his philosophy at Athens. They were in high repute at Athens in Paul's day (Acts xvii:18). Among their doctrines were these—that the world came into being and will be dissolved by chance, or by the effect of mechanical causes moved by chance; that all events happen by chance or are occasioned by mechanical causes; that the soul dies with the body; that there is no future retribution; and that man's chief happiness lies in pleasure or bodily ease. This philosophy obtained a wide popularity in Asia Minor and in Rome as well as in the city and land of its originator. It derided the mythology of the ancients, but proposed nothing better. It created a frame of mind hostile to all religion, and particularly to the serious doctrines of the gospel. (See PHILOSOPHY.)

EPIPHANES (ē-pīph'a-nēz). See ANTIOCHUS, 4.

EPISCOPACY (i-pīs'kō-pā-sŷ).

(1) **Definition.** Episcopacy expresses the form of governing the Christian church which is followed in the great majority of Christian communions. It is the plan of government in the vast Roman Catholic and Greek communions, in the widespread Anglican communion, the American Episcopal Church, the Swedish national church, with many other smaller bodies; in a modified form in the large Methodist communion, and a few other Protestant bodies. In fine, it is the form of government of at least four-fifths of the believers in Christ. The meaning of the word Episcopacy is a division of a country occupied by the church into dioceses of greater or less extent, each one having at its head a bishop, who has under him priests and deacons. The powers of these bishops vary in various communions, but one power, at least, is the same in all—the power of ordination as belonging to the bishop alone. He alone sets apart, ordains, lays hands on certain persons to serve as priests and deacons, and in churches holding this doctrine only episcopally ordained ministers are allowed to officiate.

(2) **Apostolic Succession.** Apostolic succession, as connected with Episcopacy, means that this power of ordination vested in the bishop was received by him from other bishops, back in an unbroken line to apostolic times. Anglican theologians differ in their view of the apostolic succession. Some hold it a part of the essence of the church, others consider it historic and scriptural; but a Christian church can exist without it. It is false to say that in any part of the episcopally governed bodies it is held that no one can be saved outside the Episcopal communions. Even the most bigoted Romanist would be unwilling to declare that any person loving God and his neighbor, and following after the example of Christ, was not in a state of salvation.

(3) **Three Orders of the Ministry.** To give a broad definition (to which, however, neither Methodist nor Reformed Episcopalians would assent), Episcopal communions hold that the being a part of one holy Catholic Apostolic Church involves the Catholic doctrine of three orders of clergy, tracing their succession back to apostolic times. Of course, this view is not held otherwise than on the weightiest grounds, and it is very unjust to the holders of it to say that they are the greatest obstacles in the way of accomplishing the union of all Christians, an end so dear to every devout heart. In the first place, a view held by four-fifths of the Christian world cannot be rightly called obstructive by the small minority not holding it. The obstruction would seem to be the other way. Then, again, no Christians pray more earnestly for the unity of Christendom, dwell on it, and plan for it, than the various Episcopal bodies.

(4) **Episcopacy Essential to a Perfect Church.** Let us briefly examine the grounds on which Episcopacy is essential to the constitution of a perfect church, and so held. We assume that our Lord, when on earth, organized some sort of a body for the propagation of his teachings. It would not have been reasonable to expect that any doctrines could long continue in life unless they had human keepers and teachers. It is also assumed that it is a certain and undebatable fact that all Christians, from the second to the sixteenth century, were under Episcopal government. No attempt will be made to argue from the constitution of the Jewish church as to the Christian. Such an argument would not be valid.

It will be granted that nowhere in Scripture is any sort of church government categorically ordered. The basis of the argument will be the first words of the Preface to the ordination office in the Prayer Book: "It is evident unto all men diligently reading Holy Scripture and ancient authors that from the Apostles' time there have been three orders of ministers in the Christian church—bishops, priests and deacons. Now, our Lord certainly chose twelve ministers of His future church, whom he called apostles. We find these apostles in various parts of the New Testament ordaining others, whom they called bishops, or presbyters, inferior to themselves, and still others more inferior, whom they called deacons. We find, then, in the apostolic church three orders—apostles, bishops or presbyters, and deacons. It may be said that after all the apostles died only two orders remained; but as there are eleven more outside the twelve called apostles in the New Testament, it is evident that the Apostolate was not confined to the twelve. It is conceded that the titles, bishop and presbyter, are given to the same person in the New Testament, and that there was no difference in their rank; but, granting all that, the apostolic church evidently was ruled by apostles, presbyters, and deacons. The moment we step beyond the Bible and consult the earliest Christian authorities, we find a thoroughly satisfactory explanation of the reason why the highest rank in the ministry dropped the title apostle and took that of bishop for its designation. There are many who vouch for this. We give the words of but one, Theodoret. He says: "In process of time the name of apostle was left to those who were in the strict sense apostles, and the name of bishop was confined to those who were anciently called apostles." Humility was undoubtedly the reason for this, though the title died hard, since we find in that lately discovered fragment called the "Didache," which cannot well be later than the second century, the words, "Let every Apostle who cometh to you be received as the Lord." It is not necessary to cite any of the fathers about Episcopacy. They knew nothing else; no other kind of government existed until the Reformation, in the sixteenth century, and surely if there had been any other, some mention would be made of it somewhere. It is not pretended that Episcopacy, with all its present formalities and limitations, existed in the primitive church; those have been the growth of centuries; but certainly the thing itself was there. Such is the argument of those who hold Episcopacy to be the essence of a perfect branch of the Catholic church. There is a large party in both the Anglican and American Episcopal churches which holds that while Episcopacy is Scriptural and thoroughly historical, yet it is not one of the articles of a standing or a falling church, and Christian bodies well-pleasing to God exist without it. Even this school, however, does not look for any real unity of Christendom, unless, among other things, it be agreed that the government of the united body rest upon the ancient Episcopal lines. (See EPISCOPALIAN.)

C. L.

EPISCOPALIAN (ĕ-pĭs'kō-pā'ĭ-an).

The term Episcopalian is a very broad one. In its generic meaning it would include every person who believes that Episcopacy is either the best form of church government or else the one divinely appointed form in the administration of ecclesiastical affairs. It would thus include members of the Roman Catholic Church, the Greek Church, the Church of England, the Protestant

Episcopal Church, the Reformed Episcopal Church, and of all other churches having bishops among their high officials. Common usage, however, has limited the term to Protestants who adhere to Episcopacy derived through bishops from the Church of England as distinguished from those who are Presbyterians, Congregationalists, and the like.

Episcopalians may be divided into four schools—the High Church, the Low Church, the Broad Church, and the Reformed Episcopal Church.

(1) **The Advanced High Churchmen.** High churchmen, especially those of the most advanced order, desire to be called Catholics. They are extremely unwilling that "the Holy Roman Church" should have a monopoly of the term. Their views may be epitomized as follows: In the Jewish Church there were high priests, priests, and Levites, representing three distinct orders in the Old Testament ministry; so there are three distinct orders in the Christian Church—bishops, priests, and deacons. Christ Jesus Himself the great head of the church, in its very organization, instituted this threefold ministry with the two sacraments of baptism and the Lord's supper. As the entity or essence of the first church was to be found in the Apostolate, so it is now contained in the Episcopate. The church in all the ages has preserved its visible structure, or corporate body, through the presence and functions of its bishops. The line of succession has been unbroken. Where there is no bishop there is no church. Authority flows down through these divinely appointed officers. They are the heaven-ordained conduits of saving and sustaining grace. From them the priesthood derive their powers, and without such priesthood no sacraments can be validly administered. The subject of baptism has a moral or spiritual change wrought in him by the application of water duly blessed. The Holy Ghost cannot operate to renew the soul without this outward ordinance. In this sacrament we have "the creation of a new heart, new affections, new desires, an actual birth from above, a gift coming down from God through the Holy Spirit."

If one receiving baptism shall willfully sin, he loses the life imparted to him, which can be restored only by confession and absolution. The regenerating and absolving priest holds that "the bread and wine offered and consecrated in the liturgy or service of the holy Eucharist are by such consecration made to be truly and really the body and blood of our Lord Jesus Christ." A minister who has received "the grace of orders" in the regular apostolical succession can alone bring about this mysterious change and he alone can declare judicially the forgiveness of sins. High churchmen who are not enrolled as ritualists, and who do not subscribe to the doctrine of the real presence of our Lord in the Eucharist, and who do not erect the confessional in their churches, are yet as tenacious as the ritualists are of the dogma of apostolic succession and of baptismal regeneration.

(2) **Low Churchmen.** Low churchmen, so-called, are somewhat difficult to portray. All of them adhere to the historic Episcopate and believe that special blessings flow to the world through its possession by the church. They will use the verbiage of baptismal regeneration and yet give at least seven meanings to the term, no one of which teaches that a moral change is wrought in the heart by this sacramental rite. They are evangelical in their doctrinal beliefs.

(3) **Broad Churchmen.** Broad churchmen are still more difficult to describe. Like the low churchmen they cling to Episcopacy. But it is not

the sole channel through which God communicates His grace to men. The Episcopate form of government is orderly, dignified and ancient, and therefore very desirable. The extremes of liberalism in doctrine are to be found among them.

(a) *Subdivision.* The Rev. W. J. Conybeare, a well-known Church of England clergyman, has made the following subdivision: (1) High Church—normal type, Anglican; exaggerated type, Tractarian (or Ritualistic); stagnant type, high and dry. (2) Low Church—normal type, "evangelical;" exaggerated type, Recondite; stagnant type, low and slow. (3) Broad Church—normal type, liberal; exaggerated type, concealed infidels; stagnant type, only a score in number.

(b) *Laws and Usages.* By the laws and usages of the Church of England and the Protestant Episcopal Church, those only who have been Episcopally ordained can officiate as ministers in their sanctuaries. Ministerial interchange is forbidden with non-Episcopal clergymen. The re-ordination of all ministers joining them from churches not Episcopal is required. All persons to be communicants in full must be confirmed by a bishop.

(4) **Reformed Episcopalians.** Reformed Episcopalians hold that Episcopacy is not necessary to the being, but to the well-being of the church. They have, therefore, carefully preserved through their bishops the historic succession of the ministry as found in the Church of England and the Protestant Episcopal Church of America. They have eliminated the word "priest" from their prayer-book, the dogma of baptismal regeneration from the office of baptism, and everything savoring of transubstantiation from the communion service. They receive members from other Christian churches without requiring them to be confirmed, leaving confirmation to their own choice, although the rite of confirmation is administered by their bishops to all who, for the first time, ratify their former baptismal vows. They recognize the validity of the orders of the clergy of other Christian communions who are regularly ordained to the sacred office of the ministry and receive them into their ranks without demanding re-ordination. They conduct their services without candles, incense or colored vestments, and have no sacerdotal features, such as a sacrificing altar, super-altar and the like. Their clergy preach the great essential doctrines of the Christian faith as taught by the fathers of "The Reformed Church of England" by which title it is known in law, and as they were also taught by the evangelical bishops and clergy of the Protestant Episcopal Church.

(5) **General Facts.** During the American Revolution, some of the leading patriots, including Washington, and a majority of the signers of the Declaration of Independence, were Episcopalians. The marked influence of the wisdom and conservative spirit of these and others of their co-religionists was felt in our wisely planned, generous and comprehensive civil government.

The Episcopal Church, in its broadest sense, has stood preëminently for the Christian nurture of children, for improved styles of ecclesiastical architecture, for rich and reverent music, for the observance of sacred seasons, and for multiplied forms of practical philanthropy. The Episcopal Church is recognized more or less in every church thoroughly organized and aggressive. Bishops in fact, if not in name, exercise administrative Episcopal authority among them, as witnessed in presiding officers bearing various titles, and in local, state and national secretaries with other functionaries of kindred character. (See EPISCO-

PACY; PROTESTANT EPISCOPAL CHURCH; REFORMED EPISCOPAL CHURCH; ROMAN CATHOLIC CHURCH).

S. F.

EPISTLES (ĕ-pis'tl'z).

Origin and Division. Epistles, which lay down the doctrines of the Christian religion, originate, not from one apostle alone, but from all the four principal apostles; so that one and the same Divine truth is presented to our eyes in various forms as it were in various mirrors, by which its richness and manifold character are the better displayed. The Epistles of the New Testament divide themselves into two parts—the *Pauline* and the so-called *Catholic*.

(1) **The Pauline Epistles.** The Pauline Epistles are thirteen in number; or fourteen, if we add to them the Epistle to the Hebrews. The very peculiar character of the Pauline Epistles is so striking to any one who is not ignorant of the want of ease and originality conspicuous in the counterfeit writings of early times, as to leave not the least doubt of their genuineness. Depth of thought, fire of speech, firmness of character—these manly features, joined withal to the indulgence of feelings of the most devoted love and affection, characterize these epistles. The amiable personal character of the apostle may be most beautifully traced in his Epistles to the Philippians and to Philemon.

All the Epistles, except the one to the Romans, were called forth by circumstances and particular occasions in the affairs of the communities to which they were addressed. Not all, however, were preserved. It is at least evident from 1 Cor. v:9 that a letter to the Corinthians has been lost; from Col. iv:16, it has also been concluded—though probably erroneously, since there perhaps the letter to the Ephesians is referred to—that another letter to the community of Laodicea has likewise been lost. Press of business usually compelled Paul—what was, besides, not uncommon in those times—to use his companions as amanuenses. He mentions (Gal. vi:11), as something peculiar, that he had written this letter with his own hand. Paul alludes to this (2 Thess. ii:2), and therefore writes the greeting (2 Thess. iii:17) with his own hand. Paul himself exhorted the communities mutually to impart to each other his letters to them, and read them aloud in their assemblies (Col. iv:16). It is therefore probable that copies of these letters had been early made by the several communities, and deposited in the form of collections. So long therefore as the various communities transmitted the manuscripts to each other, no other letters, it is obvious, could come into the collections than those to whose genuineness the communities to whom they were originally addressed, bore witness. Even Peter (2 Pet. iii:16) seems to have had before him a number of Paul's letters, as, about forty years later, a number of letters of Ignatius were transmitted by Polycarp to Smyrna, while the church of Philippi forwarded to him those directed to them (*Ep. Polic. sub fin.*; Euseb. *Hist. Eccles.* iii:36). This Pauline collection, in contradistinction to the gospels, passed by the name of ὁ ἀπόστολος.

The letters of Paul may be chronologically arranged into those written before his Roman imprisonment, and those written during and after it; thus beginning with his first letter to the Thessalonians, and concluding with his second to Timothy, embracing an interval of about ten years (A. D. 54-64). In our Bibles, however, the letters are arranged according to the pre-eminent parts and stations of the communities to whom they

were addressed, and conclude with the epistles to the two bishops and a private letter to Philemon.

(2) **The Catholic Epistles.** There is, in the first instance, a diversity of opinion respecting their name: some refer it to their writers (letters from all the other apostles who had entered the stage of authorship along with Paul); some, again, to their contents (letters of no special but general Christian tenor); others, again, to the receivers (letters addressed to no community in particular). None of these views, however, is free from difficulties. The last opinion is most decidedly justified by passages from the ancient writers (Euseb. *Hist. Eccles.* v. 18; Clem. Alex. *Strom.* iv:15, ed. Potter, p. 606; Orig. *c. Cels.* i. 63). The Pauline Epistles had all their particular directions, while the letters of Peter, James, 1 John, and Jude were circular epistles. The Epistles 2 and 3 John were subsequently added, and included on account of their shortness, and to this collection was given the name Catholic Letters, in contradistinction to the Pauline, which were called ὁ ἀπόστολος.

A. T.

EPISTLES OF THE APOSTOLIC FATHERS.

Under this head come those remains of Christian antiquity which are ascribed to the writers usually styled the Apostolic Fathers, from the circumstance that they were converted to the Christian faith during the lifetime and probably by the instrumentality of the Apostles. One of these is said to have been written by Barnabas. (See BARNABAS, EPISTLE OF.)

(1) **Clement or Clemens Romanus.** It will probably be generally admitted that no production of the early church approaches so near the apostolic writings, in the union of devout feeling with justness and sobriety of thought, as that denominated the 'First Epistle of Clement to the Corinthians' but addressed in the name of 'the Church, sojourning at Rome (ἡ παροικοῦσα Ῥώμην) to the Church of God sojourning at Corinth.

The main object of this Epistle was to allay the dissensions which had arisen in the Corinthian church, and especially to repress the unruly spirit shown by many against their teachers. It is worthy of notice that Clement uniformly speaks of the opposition of the Corinthians against their presbyters, never of their insubordination to their bishop.

In Clement's Epistle only one book of the New Testament is expressly named, Paul's first Epistle to the Corinthians; but though the Evangelists are not named, several sayings of Christ contained in our Gospels are repeated. There are also evident allusions to the Acts, all the Pauline Epistles (1 Thessalonians excepted), the Epistles of Peter and James, and the Epistle to the Hebrews. A tabular view of these passages is given by Dr. Lardner (*Credibility of the Gospel History*, pt. ii. ch. ii.; *Works*, vol. ii. pp. 35-53). Eusebius, speaking of Clement's Epistle, says, 'He has inserted in it many sentiments taken from the Epistle to the Hebrews, and sometimes makes use of the identical expressions, from which it is evident that that composition is not a recent one.'

Paul having addressed the Hebrews in their native language, some say that the Evangelist Luke, and others that this very Clement, translated the document; an opinion which is supported by the fact that the Epistle of Clement and that to the Hebrews are marked by the same peculiarities of style, and in both compositions the sentiments are not unlike.' (*Hist. Eccles.* iii:38, ed. Valessii, 1672, p. 110.)

As to the date of this epistle it has been fixed

by Grabe, Galland, Wotton, and Hefele about the year 68; but Cotelierius, Tillemont, and Lardner think that it was written at the close of the Diocletian Persecution in 96 or 97.

The following works have also been attributed to Clement, but, as they are unquestionably spurious, we shall merely give their titles. (1) *The Apostolic Constitutions*, in eight books. (2) *The Apostolic Canons*. (3) *The Recognitions of Clement*. (4) *The Clementina*. They are all printed in the *Patres Apostolici* of Cotelierius, vol. i. (Mosheim's *Commentaries*, translated by Vidal, vol. i. pp. 270-274).

(2) **Ignatius.** According to Eusebius (*Hist. Eccles.* iii. 36) and Origen (*Hom. vi. in Luc.; Opera*, ed. Lommatszsch, v. 104), the second bishop, or, according to Jerome (*De Vir. Illustr.* xvi.), the third bishop of Antioch in Syria. Fifteen epistles bear his name. Three of these (one addressed to the Virgin Mary, the other two to St. John) are preserved only in a Latin version. The rest are extant in Greek and in an ancient Latin version, and are addressed to Mary of Cassabolis or Neapolis, to Hero, to the churches at Tarsus, Antioch, Philippi, Ephesus, Magnesia, Trallium, Rome, Philadelphia, Smyrna, and to Polycarp. The first eight are unanimously allowed to be spurious. Of the remaining seven (which were written on his journey from Antioch to Rome, where he suffered martyrdom by exposure to wild beasts), there are two recensions, one longer, the other shorter.

(3) **Polycarp's Epistle to the Philippians.** Irenæus, in a letter to Florinus the Valentinian, preserved in part by Eusebius (*Hist. Eccles.* v. 20), gives an interesting account of his early recollections of Polycarp, and refers to the epistles which he sent to the neighboring churches. Only one, however, has been preserved; it was addressed to the Philippians, and in Jerome's time was publicly read in the assembly of Asia.

(4) **Shepherd of Hermas.** (See HERMAS.)
J. E. R.

EPISTLES, SPURIOUS (see APOCRYPHA). Of these many are lost, but there are several still extant; the principal are:

The Epistle of Paul to the Laodiceans;
The Third Epistle of Paul to the Corinthians;
The Epistle of Peter to James;
The Epistles of Paul and Seneca.

(1) **Epistle to the Laodiceans.** There was an Epistle to the Laodiceans extant in the beginning of the second century, which was received by Marcion; but whether this is the same with the one now extant in the Latin language is more than doubtful. The original Epistle was most probably a forgery founded on Coloss. iv:16.

'There are some,' says Jerome, 'who read the Epistle to the Laodiceans, but it is universally rejected.' The original Epistle was most probably a forgery founded on Coloss. iv:16. 'And when this Epistle is read among you, cause that it be read also in the church of the Laodiceans, and that ye likewise read the Epistle from Laodicea. The apparent ambiguity of these last words has induced some to understand St. Paul as speaking of an epistle written by him to the Laodiceans, which he advises the Colossians to procure from Laodicea, and read to their church. 'Some,' says Theodoret, 'imagine Paul to have written an Epistle to the Laodiceans, and accordingly produce a certain forged epistle; but the Apostle does not say, the Epistle to, but the Epistle from, the Laodiceans.' Bellarmine, among the Roman Catholics, and among the Protestants Le Clerc and others, suppose that the passage in Colossians

refers to an epistle of St. Paul, now lost, and the Vulgate translation—*eam quæ Laodicensium est*—seems to favor this view. Grotius, however, conceives that the Epistle to the Ephesians is here meant, and he is followed by Hammond, Whitby, and Mill, and also by Archbishop Wake (*Epistles of the Apostolic Fathers*). Theophylact, who is followed by Dr. Lightfoot, conceives that the epistle alluded to is 1 Timothy. Others hold it to be 1 John, Philemon, etc. Mr. Jones conjectures that the epistle now passing as that to the Laodiceans (which seems entirely compiled out of the Epistle to the Philippians) was the composition of some idle monk not long before the Reformation; but this opinion is scarcely compatible with the fact mentioned by Mr. Jones himself, that when Sixtus of Sienna published his *Bibliotheca Sancta* (A. D. 1560), there was a *very old* manuscript of this epistle in the library of the Sorbonne. This was first published by James Le Fevre of Estaples in 1517. It was the opinion of Calvin, Louis Capell, and many others, that St. Paul wrote several epistles besides those now extant. One of the chief grounds of this opinion is the passage in 1 Cor. v:9. There is still extant, in the Armenian language, an epistle from the Corinthians to St. Paul, together with the Apostle's reply. This is considered by Mr. La Croze to be a forgery of the tenth or eleventh century, and he asserts that it was never cited by any one of the early Christian writers. In this, however, he is mistaken, for this epistle is expressly quoted as Paul's by St. Gregory the Illuminator in the third century, Theodore Chrethenor in the seventh, and St. Nierses in the twelfth. Neither of them, however, is quoted by any ancient Greek or Latin writer (Henderson, *On Inspiration*, p. 497. The passages are cited at length in Father Paschal Aucher's *Armenian and English Grammar*, Venice, 1819).

(2) **The Epistle of Peter to James.** Omitting the supposed epistle of Paul to the Corinthians, we notice the supposed epistle of Peter to James which is a very ancient forgery. It was first published by Cotelerius, and is supposed to have been a preface to the *Preaching of Peter*, which was in great esteem among some of the early Christian writers, and is several times cited as a genuine work by Clement of Alexandria, Theodotus of Byzantium, and others. It was also made use of by the heretic Heracleon, in the second century. Origen observes of it, that it is not to be reckoned among the ecclesiastical books, and that it is neither the writing of Peter nor of any other inspired person.

(3) **The Epistles of Paul and Seneca** consist of eight pretended Latin letters from the philosopher Seneca to St. Paul, and six from the latter to Seneca. Their antiquity is undoubted. St. Jerome had such an idea of the value of these letters that he was induced to say, 'I should not have ranked Seneca in my catalogue of saints, but that I was determined to it by those Epistles of Paul to Seneca and Seneca to Paul, which are read by many. The letters do not appear to have been mentioned by any other ancient writer; but it seems certain that those now extant are the same which were known to Jerome and Augustine. The genuineness of these letters has been maintained by some learned men, but by far the greater number reject them as spurious. W. W.

EPOCH (ē'pōk), a point of time distinguished by some remarkable event, and from which succeeding years are numbered. (See ERA.)

EPWORTH LEAGUE, THE (ēpwūth lēg), OF THE METHODIST EPISCOPAL CHURCH.

(1) **Birth of the Epworth League.** The Church will always honor the cradles of great men and great institutions. Jerusalem, Bethlehem and Tarsus are prominent in the thought of all Christians. Epworth, Oxford, John Street, New York, and St. George's in Philadelphia, will ever remain Meccas of Methodism. To this royal line must be added Cleveland, Ohio, where on May 14, 1889, the Epworth League was born. It was the fruit of the union of five other young people's societies which had sprung up in the church. Twenty-seven delegates, after two days of prayerful conference, evolved the plans of the Epworth League. Within a few hours it received the official sanction of the Board of Bishops, then in session at Delaware, Ohio. Hundreds of existing societies promptly adopted the new name and constitution, many new chapters were organized, and this new brigade of the church wheeled into line with a precision unparalleled.

(2) **Its Organ.** "Our Youth," an existing paper for young Methodists, became the representative of the League during its first year. The Board of Control at its first meeting advised that a regular League organ be established at Chicago. The first number of *The Epworth Herald* appeared June 7, 1890. The new paper met with a cordial reception. It has had a steady growth from the first, and is just now completing the eleventh year of its history. It has attained the largest circulation of any denominational weekly in the world, having a list of 115,000 subscribers.

(3) **Its Early Growth.** During the first year 1,820 chapters were registered. The following year there were 3,782 new chapters added. The third year there was an increase of 2,500 chapters. Though the advance could not possibly continue at this rate, a notable increase has been made each year, until there are now registered in the central office, 20,699 Senior and 7,424 Junior Chapters.

(4) **Its Formal Adoption by the Church.** The General Conference at Omaha, in May, 1892, formally adopted the League, and made it a department of the church, with the central office at Chicago. Its privileges and limitations were carefully defined. Its government was vested in a Board of Control of twenty-nine members. The Board is composed of both laymen and ministers. It meets regularly twice during the quadrennium to elect a cabinet, revise the local constitution when necessary, and give general direction to the work.

(5) **Conventions.** The young people soon began to meet in conventions for counsel and inspiration. District and state conventions followed each other in rapid succession. The climax of this rising tide of enthusiasm and connectionalism was reached in 1893 and 1894, when the first International Convention was held at Cleveland, the birthplace of the League. The attendance, the program, the fellowship, the mighty impulse for larger accomplishments, were all that could be desired. Similar gatherings were held at Chattanooga in 1895, Toronto in 1897, Indianapolis in 1899 and at San Francisco in 1901.

(6) **In Other Churches.** The year 1894 witnessed the formal adoption of the Epworth League by the Methodist Episcopal Church South, and the Methodist Church of Canada.

(7) **Its Object.** The object of the League, as stated in the constitution, is "to promote intelligent and vital piety in the young members and friends of the church; to aid them in the attainment of purity of heart and in constant growth in grace, and to train them in works of mercy and help."

(8) **Its Membership.** Young persons of good moral character may become members on nomination by the cabinet and election by the local chapter. The cabinet is composed of the president, the five vice-presidents, the secretary and treasurer.

(9) **Its Departments.** The work is carried out through seven departments, as follows: (1) Department of Spiritual Work. (2) Department of Mercy and Help. (3) Department of Literary Work. (4) Department of Social Work. (5) Department of Correspondence. (6) Department of Church Benevolence and Finance. (7) Department of Junior League Work. These departments with their subordinate items of work are arranged in the symbolism of a wheel—referred to as the Epworth League Wheel. The colors are crimson and white. There are three mottoes, the chief of which is "Look up—Lift Up."

(10) **Classes of Members.** Whenever a chapter so decides, there may be two classes of members, active and associate. Active members subscribe to the following pledge:

"I will earnestly seek for myself, and do what I can to help others attain, the highest New Testament standard of experience and life. I will abstain from all those forms of worldly amusement forbidden by the Discipline of the Methodist Episcopal Church, and I will attend, so far as possible, the religious meetings of the Chapter and Church, and take some active part in them."

(11) **General Officers.** The general officers of the League for the current four years are as follows:

President—Bishop I. W. Joyce, LL. D., Minneapolis, Minn.

First Vice-President—W. W. Cooper, Kenosha, Wis.

Second Vice-President—Rev. W. H. Jordan, D. D., Sioux Falls, S. D.

Third Vice-President—Rev. R. J. Cooke, D. D., Chattanooga, Tenn.

Fourth Vice-President—F. W. Tunnel, Germantown, Pa.

Secretary-Editor—Rev. Joseph F. Berry, LL. D., 57 Washington Street, Chicago.

Treasurer—R. S. Copeland, M. D., Ann Arbor, Mich.

(12) **Its Broad Fellowship.** While the Epworth League is a denominational society, loyal to its own church, it has always kept open doors for fellowship with all other Christian young people's societies. This spirit of comity is positively declared in two of the mottoes. The responsible leaders have always been willing to meet others on an equal footing of mutual rights and privileges. This spirit of fraternity received quickening in January, 1898, when the Young People's Society of Christian Endeavor and the various Epworth Leagues agreed to select uniform topics for the devotional meetings. The Baptist Young People's Union and the societies of several other churches subsequently adopted them. So that now thousands of young Christians throughout the world study the same great truth each week. What a proof and bond of faith and fellowship this is!

(13) **Its Increasing Prospects.** The present

is by far the most prosperous year in the history of the organization. The extension plans outlined by the General Secretary have been received with cordial approval everywhere. District organizations are particularly active. The training school idea has been given great prominence. Special emphasis is now being placed upon the study of the English Bible, Missions, Christian Stewardship and personal evangelism. The horoscope is crowded with tokens of good and the horizon is bright with the gleams of a better age.

J. F. B.

EQUAL (ē'kwāl), (Heb. ^{אָוָן}, *taw-kan'*, Ezek. xviii:25), primitive root, balance, to measure out. (Heb. ^{מַשָּׂוֶה}, *may-shaww'*, Ps. xvii:2), from primitive root, ^{שָׂוָה}, *yaw-shar'*, to make even. (Heb. ^{יָשָׁר}, *yo-sheh'*, Prov. xvii:26), to be straight or even, upright; equal in the sense of equity, justice, righteousness. In general then it signifies (1) Just; righteous (Ezek. xviii:25). (2) Of the same excellency and dignity (John v:18; Phil. ii:6). (3) An intimate companion; one of the same age, station, and opportunities (Ps. lv:13; Gal. i:14).

ER (ēr), (Heb. ^{עֵר}, *ayr*, watchful).

1. Judah's eldest son, who married Tamar, but who, being wicked, brought himself to an untimely end (Gen. xxxviii:7; Num. xxvi:19), B. C. 1806.

2. A descendant of Shelah, the son of Judah (1 Chron. iv:21), B. C. about 1896.

3. In the genealogy of Christ he is given as the son of Jose, and father of Elmodam (Luke iii:28), B. C. about 725.

ERA (ē'rā), a series of years commencing from a certain point of time called an *epocha*.

The generality of authors use the terms era and epocha in a synonymous sense; that is, for the point of time from which any computation begins.

(1) **Jewish.** The ancient Jews made use of several eras in their computation: (1) Sometimes they reckoned from the deluge; (2) sometimes from the division of tongues; sometimes from their departure out of Egypt; (3) and at other times from the building of the temple; (4) and sometimes from the restoration after the Babylonish captivity; (5) but their common era was from the creation of the world, which falls in with the year of the Julian period 953; and consequently they supposed the world created 294 years sooner than according to our computation; (6) but when the Jews became subject to the Syro-Macedonian kings, they were obliged to make use of the era of the Seleucidæ in all their contracts, which from thence was called the era of contracts. This era begins with the year of the world 3692, of the Julian period 4402, and before Christ 312.

(2) **Profane History.** In profane history are reckoned five eras: (1) The founding of the Assyrian empire, B. C. 1267; (2) the era of Nabonassar, or death of Sardanapalus, B. C. 747; (3) the reign of Cyrus at Babylon, B. C. 538; (4) the reign of Alexander the Great over the Persians, B. C. 330; (5) and the beginning of the calendar of Julius Cæsar, B. C. 45.

(3) **Christian.** The era in general use among the Christians is that from the birth of Jesus Christ, concerning the true time of which chronologers differ; some place it two years, others four, and again others five, or even seven years before the Vulgar era, which is fixed for the year of the world 4004; but Archbishop Usher, and after him the generality of modern chronologers, place it in the year of the world 4000.

(4) **Julian Period.** In 1582 Joseph Scaliger proposed a new method of chronological compu-

tation by what he called the Julian Period. He found chronologers, astronomers, and ecclesiastical authorities using the cycle of the sun, 28 years; the lunar cycle, 19 years, and the period of the Roman Indiction, 15 years. The year *one* of each of these cycles he found might have occurred 4,713 years before the Christian era, and that such unity or concurrence of their unitary years could not happen again for 7,980 years ($28 \times 19 \times 15 = 7980$). This arbitrary point he proposed to assume as a starting point for chronology, and to name the ensuing period the Julian—an unfortunate name, leading an ordinary reader to confuse it with Julius Cæsar's reformed calendar. In it the year *one* of the Christian era is Julian 4714, which was 10 of the solar cycle, 2 of the lunar, and 4 of indiction.

Chronologers have found this arbitrary period convenient for certain purposes, especially for denoting without ambiguity the years before our common era, and for comparing different eras. Thus the Olympiads began in July of Julian period 3938 (B. C. 776); the Seleucid era in Julian 4402 (B. C. 312); the Varronian Roman era April 21, Julian 3961 (B. C. 753); Usher's era of Creation, Julian 710 (B. C. 4004); Julius Cæsar's reformed calendar Jan. 1, Julian 4669 (B. C. 45). Observe the sum of these pairs of numbers is always 4714. From the number of a year of the Julian period during the Christian era subtract 4713 to get the common date; thus the French Revolutionary era is Julian 6505, Sept. 22; $6505 - 4713 = 1792$, our date.

For much information on these matters see Du Cange, *Glossarium Mediæ et Infimæ Latinitatis*, s. v. Annus; Nicholas, *Chronol. of Hist.*; *Oxford Tables*, and *Encyc. Brit.*, s. vv. Calendar and Chronology. (See CHRONOLOGY.) S. W.

ERAN (ē'ran), (Heb. עֲרָן, *ee-ravn'*, watching), son of Shutelah, son of Ephraim (Num. xxvi:36), and the founder of the family of Eranites (B. C. 1856).

ERANITES (ē'ran-ites). See ERAN.

ERASTUS (e-rās'tus), (Gr. Ἐραστός, *er'as-tos*, beloved).

1. A Corinthian, and one of Paul's disciples, whose salutations he sends from Corinth to the Church at Rome as those of 'the chamberlain of the city' (Rom. xvi:23), A. D. 55. The words so rendered (*treasurer of the city*) denote an officer of great dignity in ancient times (comp. Joseph. *Antiq.* vii:8, 2).

2. We find an Erastus with Paul at Ephesus, whence he was sent along with Timothy into Macedonia (Acts xix:22). They were both with the apostle at Corinth when he wrote, as above, from that city to the Romans; at a subsequent period Erastus was still at Corinth (2 Tim. iv:20), which would seem to have been the usual place of his abode. (A. D. 64.) He is probably not the same with 1, for, in case he were, we must assume that he is mentioned (Rom. xvi:23) by the title of an office which he had once held and afterward resigned.

ERECH (ē'rek), (Heb. עֲרֵךְ, *eh'rek*), cities which formed the beginning of Nimrod's kingdom in the plain of Shinar (Gen. x:10).

It is not said that he built these cities, but that he established his power over them; from which we may conclude that they previously existed. Borchart seeks the name in the Aracca or Aracha of the old geographers, which was on the Tigris, upon the borders of Babylonia and Susiana (Ptolemy, vi:3; Ammian. Marcell, xxxiii:6, 26). This was

probably the same city which Herodotus (i:185; vi:119) calls Arderikka, *i. e.*, Great Erech. The site of this ancient city has been recently identified by archeological research at Nippur. It was a very important city—the capital, in fact, of the mythical hero-king Gilgames. The ruins found on its site show the remains of elegant buildings with fluted walls, sometimes decorated with patterns formed with the circular ends of various colored cones imbedded in mortar, bricks bearing archaic Accadian and Babylonian inscriptions, etc. Remains of canals traverse the mass of hillocks (which in some parts are nearly ninety feet high) and the country around the city, showing that it must have been well drained in ancient times. Those portions of the walls of the city which can be traced seem to have been in the form of an irregular circle about forty feet high, and show that its average circumference was about six miles. The houses of the people are supposed to have extended beyond the walls. (I. A. Pinches, *Hastings' Bib. Dict.*) It was the place of worship of the goddess Nana of the Sumerians, with whom the Semitic inhabitants identified their goddess Ishtar. The temple dedicated to the goddess and called E-Anna (house of heaven) was built by Ur-Gur and Dungi and often restored.

It now forms the ruin of El-Buwarije, while the general mass of ruins is called Warka, which has unhappily not been dug up. The city had independence at an early period, and is coupled by Hebrew tradition with the earliest centers of the land, and Babylonian records go far to prove that this is correct. It was, however, much more than a mere center of power. It was a seat of learning and must have had a library at a very early period. Many books in the library of Assur-bani-pal, and especially religious hymns, bear colophons which show that they were copied from originals at Uruk. Strabo adds to this fact the statement that at Orchoë there was a school of Chaldeans, that is in his use of the word "astrologists." This would indicate that culture was still resident in this city, though it had vanished from other more ancient centers. The political, literary, and religious history of the city all make it of so great interest and importance that it is especially a matter for regret that it has never been properly excavated. (Rogers, *Hist. of Bab. and Assyr.* vol. I, p. 289.)

Among the inscribed and stamped bricks found in Erech are many of the time of the historical kings—Dungi, Ur-Bau, Gudea, Sin-ga'sid, Merodachbaladan I., etc. Tablets of the reigns of Nabopolassar, Nebuchadrezzar, Nabonidus, Cyrus, Darius, and some of the Seleucidæ, have been excavated in the site. In the ruins of the town and the country around, a large number of glazed earthenware coffins and other receptacles, used no doubt for the burial of the dead, mostly of the Parthian period, have been found, showing that part of the town and its neighborhood must have been used as a necropolis. (*Hastings' Bib. Dict.*)

ERES or **ÆRES** (ē'rez) (Heb. עֲרֵשׁ, *eh'rez*), occurs in numerous places of Scripture, but authors are not agreed on the exact meaning of the term.

(1) **Pine or Cedar.** Celsius (*Hierobot.* i:106, sq.), for instance, conceives that it is a general name for the pine tribe, to the exclusion of the cedar of Lebanon, which he considers to be indicated by the word BEROSH. The majority of authors, however, are of opinion that the cedar of Lebanon (*Pinus Cedrus* or *Cedrus Libani* of botanists) is alone intended.

If we proceed to compare the several passages of Scripture in which the word Eres occurs, we shall

equally find that one plant is not strictly applicable to them all.

(2) **Early Notices of Cedar.** The earliest notice of the cedar is in Lev. xiv:4, 6, where we are told that Moses commanded the leper that was to be cleansed to make an offering of two sparrows, cedar wood, wool dyed in scarlet, and hyssop; and in verses 49, 51, 52, the houses in which the lepers dwell are directed to be purified with the same materials. Again, in Num. xix:6, Moses and Aaron are commanded to sacrifice a red heifer. 'And the priest shall take cedar wood and hyssop and scarlet.' The cedar was not a native of Egypt, nor could it have been procured in the desert without great difficulty; but the juniper is most plentiful there, and takes deep root in the crevices of the rocks of Mount Sinai. That some, at least, of the cedars of the ancients

Celsius was of opinion that the *eres* indicated the *Pinus sylvestris* or Scotch pine, which yields the red and yellow deals of Norway, and which is likewise found on Mount Lebanon. This opinion seems to be confirmed by Ezekiel (xxvii:5), 'They have made all thy ship boards of fir trees of Senir, they have taken cedar from Lebanon to make masts for thee,' for it is not probable that any other tree than the common pine would be taken for masts when this was procurable.

Though Celsius appears to us to be quite right in concluding that *eres*, in some of the passages of Scripture, refers to the pine tree, yet it seems equally clear that there are other passages to which this tree will not answer.

(3) **Cedar of Lebanon.** It certainly appears improbable that a tree so remarkable for the magnificence of its appearance as the cedar of Leba-

Cedars of Lebanon.

were a species of juniper is evident from the passages we have quoted; the wood of most of them is more or less aromatic.

At a later period we have notices of the various uses to which the wood of the *eres* was applied, as 2 Sam. v:11; vii:2-7; 1 Kings v:6, 8, 10; vi:9, 10, 15, 16, 18, 20; vii:2, 3, 7, 11, 12; ix:11; x:27; 1 Chron. xvii:6; 2 Chron. ii:8; ix:27; xxv:18. In all these passages the word *eres* is employed, for which the Arabic translation, according to Celsius, gives *sunobar* as the synonym. There is nothing distinctive stated respecting the character of the wood from which we might draw any certain conclusion further than that, from the selection made and the constant mention of the material used, it may be fairly inferred that it must have been considered as well fitted, or, rather, of a superior quality, for the purpose of building the temple and palace. From this, however, proceeds the difficulty in admitting that what we call the cedar of Lebanon was the only tree intended by the name *Eres*. For modern experience has ascertained that its wood is not of a superior quality.

non should not have been noticed in the Sacred Scriptures, and this would be the case if we applied *eres* exclusively to the pine, and *berosh* to the cypress. If we consider some of the remaining passages of Scripture, we cannot fail to perceive that they forcibly apply to the cedar of Lebanon and to the cedar of Lebanon only. Thus, in Ps. xcii:12, it is said: 'The righteous shall flourish like a palm tree, and spread abroad like a cedar of Lebanon.' It has been well remarked 'that the flourishing head of the palm and the spreading abroad of the cedar are equally characteristic.'

But the prophet Ezekiel (ch. xxxi) is justly adduced as giving the most magnificent and, at the same time, the most graphic description of this celebrated tree (verse 3): 'Behold, the Assyrian was a cedar in Lebanon with fair branches and with a shadowy shroud, and of an high stature, and his top was among the thick boughs;' (verse 5) 'Therefore his height was exalted above all the trees of the field, and his boughs were multiplied, and his branches became long because of the multitude of waters;' (verse 6) 'All the

fowls of heaven made their nests in his boughs, and under his branches did all the beasts of the field bring forth their young.'

Few trees divide so many fair branches from the main stem, or sprcad over so large a compass of ground. 'His boughs are multiplied,' as Ezekiel says, 'and his branches become long,' which David calls spreading abroad. His very boughs are equal to the stem of a fir or a chestnut. The second characteristic is what Ezekiel, with great beauty and aptness, calls his shadowy shroud. No tree in the forest is more remarkable than the cedar for its close-woven, leafy canopy. Ezekiel's eedar is marked as a tree of full and perfect growth, from the circumstance of its top being among the thick boughs.' The other principal passages in which the cedar is mentioned are 1 Kings iv:33; 2 Kings xix:23; Job xl:17; Ps. xxix:5; lxxx:10; xcii:12; civ:16; cxlviii:9; Cant. i:17; v:15; viii:9; Is. ii:13; ix:10; xiv:8; xxxvii:24; xli:19; xlv:14; Jer. xxii:7, 14, 23; Ezek. xvii:3, 22, 23; Amos ii:9; Zeph. ii:14; Zech. xi:1, 2.

The cedar of Lebanon is well known to be a widely-spreading tree, generally from 50 to 80 feet high, and when standing singly often covering a space with its branches, the diameter of which is much greater than its height. The horizontal branches, when the tree is exposed on all sides, are very large in proportion to the trunk, being disposed in distinct layers or stages, and the distance to which they extend diminishes as they approach the top, where they form a pyramidal head, broad in proportion to its height. The branchlets are disposed in a flat, fan-like manner on the branches. The leaves, produced in tufts, are straight, about one inch long, slender, nearly cylindrical, tapering to a point, and are on short footstalks. The male catkins are single, solitary, of a reddish hue, about two inches long, terminal and turning upwards. The female catkins are short, erect, roundish and rather oval; they change after fecundation into oval oblong cones, which, when they approach maturity, become from two and one-half inches to five inches long. Every part of the cone abounds with resin, which sometimes exudes from between the scales.

ERI (ē'ri), (Heb. עֵרִי, *ay-ree'*, watching), son of Gad, and head of a family (Gen. xlv:16; Num. xxvi:16), B. C. 1856.

ERITES (ē'rītes), (Heb. עֵרִיָּהוּ, *haw-ay-ree'*), a branch of the family of Gad descended from Eri (Num. xxvi:16).

ERR or **ERROR** (ēr or ēr-rēr), (Heb. עָרָה, *taw-aw'* Ps. xcv:10), primitive root, to hesitate; to be undecided; to vacillate; to go astray; to wander; to be out of the right way; to mistake.

In the Bible error is: (1) A mistake or oversight (Eccl. v:6). (2) False doctrine, whereby one wanders from the rule of God's word (1 John iv:6). (3) Sin of any kind, which is a wandering from the path of duty, and missing the end of God's glory and our own good (Ps. xix:12). (4) Unnatural lust (Rom. i:27). (5) The *error* of Balaam was his love of gain; and, in order to obtain it, tempting the Israelites to uncleanness and idolatry (Jude 11). (6) *Be it indeed that I have erred, mine error remaineth with myself; i. e. if I have mistaken views, I am likely to retain them for aught you have said; or, if I have offended, I now suffer for it, and do not need that you should add to my affliction with your reproachful speeches* (Job xix:4).

ESAIAS (e-zā'yas), (Gr. Ἡσαίας, *hay-sah-ee'as*), a common New Testament form of ISAIAH.

ESAR-HADDON (ē'sar-hād'don), (Heb. אֶסַרְחַדְדִּן, *ay-sar'khad-dohn'*, gift of fire), the son of Sennacherib. The death of Sennacherib and the accession of his son marked the opening of a new era in the history of the Assyrian empire.

(1) **Sources of Information.** The Biblical record (2 Kings xix:37) states that the assassins of Sennacherib "escaped into the land of Ararat, and Esar-haddon his son reigned in his stead." This two-line notice covers a multitude of events. Fortunately, we have a brief inscription in the Babylonian chronicle that gives us a fragmentary portraiture of the political situation. "In the month of Tebet (December, 681 B. C.), the 20th day, Sennacherib, king of Assyria, his son in an insurrection slew him. Twenty-three years Sennacherib administered the kingdom of Assyria. From the twentieth day of the month Tebet until the second day of the month Adar (February, 680), the insurrection prevailed in Assyria. In the month Sivan (May, 680), the eighteenth day, Esar-haddon, his son, seated himself upon the throne in Assyria." The power of the insurrection in Nineveh was broken at the end of one month and a half.

(2) **Coming to the Throne.** But the new king, who was probably occupied in suppressing rebellious subjects outside of Nineveh, was not formally installed as king until five months after the murder of his father.

(3) **Rebuilds Babylon.** This new king inaugurated a new policy of administration and control. He sought to restore to prosperity the Babylon and Babylonia which Sennacherib had so wantonly and cruelly laid waste and destroyed. He conciliated the population of that region by restoring to their former position the humiliated gods of Babylon. He lifted the royal city out of its wasteness and ruin, and made it the proud abode of Nebo and Merodach. He declared himself ruler of Babylon, but subordinate to those chief deities. His popular policy elevated him at once in the estimation of the people, and gave him almost undisputed command of this territory. His next move (678 B. C.) was toward the West-land. Phœnicia was the first to feel his power, and readily yielded, except the island city, Tyre. No resistance of any kind seems to have interfered with his southward march until he struck the Arabian desert. Here he spent presumably two years (675-674 B. C.) in the subjugation of Arab tribes on the east and southeast of the Gulf of Akaba, and in the Sinaitic peninsula. These conquests cut off from Egypt all supplies and allies from their eastern friends and dependencies, and made Esar-haddon master of all the eastern roads to Egypt. (Prof. Ira M. Price, *The Monuments and the Old Testament*, pp. 194-5.)

(4) **Division of Egypt.** He divided all the valley of the Nile from Thebes to the Mediterranean into twenty satrapies, over the less important of which he set governors of native descent, while over those which were important he placed Assyrian governors. It is highly creditable to Esar-haddon that, when he found himself conqueror of Egypt, he had the wisdom to act in a conciliatory manner to the vanquished.

(5) **Death.** In B. C. 668 Egypt revolted, and while on the march to punish it Esar-haddon fell ill and died on the 10th of Marcheshvan (October). His empire was divided between two of his sons, Samas-sum-ukin having Babylonia, while the rest of the empire passed to an older son, Assurbani-pal, whose suzerainty Samas-sum-ukin was

called upon to acknowledge. A third son, Assurmukin-paliya, was raised to the priesthood, while a fourth became priest of the moon-god at Haran. (Sayce, *Hastings' Bib. Dict.*)

(6) **Character.** He had sore trials and great difficulties. He had endured grievous defeats and sustained severe losses, but he had, nevertheless, had a glorious reign. That the provinces which once paid great tribute were lost to the Indo-Europeans upon the northeast and northwest was less his fault than his misfortune. No king could well have done more than he, and it is to the credit of his ability that he did not lose much more, even the whole of Mesopotamia or even Assyria, for no army, however well led, was of permanent value against a moving mass of men with unknowing and unthinking thousands pressing from the rear. These losses were far more than compensated by the gaining of the fertile and beautiful valley of the Nile. With this added, even though much was lost, Esar-haddon left the Assyrian empire larger and greater than it had ever been before. In battle and in siege, in war against the most highly civilized people and in war upon barbarians, Esar-haddon had been so successful that he must rank with Sargon and Tiglath-pileser II, and must be placed far in advance of his father, Sennacherib. In him, in spite of mercy shown a number of times, there raged a fierceness and a thirst for blood and revenge that remind us forcefully of Asshur-nazir-pal. His racial inheritance had overcome his personal mildness.

In works of peace no less than in war he was great and successful. (Rogers, *Hist. of Bab. and Assy.*, vol. II, pp. 244-5.)

ESAU (ē'sau), (Heb. עֵשָׂו, *ay-saww'*, hairy; Sept. *Ἡσαῦ*).

1. **Name and Family.** The origin and meaning of the name are not quite free from ambiguity.

(1) **Name.** Simon renders it *pilis opertus* (covered with hair), and some such reason as this implies seems involved in the passage Gen. xxv:25. Cruden, however, explains the name as meaning *one who does* (qui facit), an actor or agent. His surname of Edom (red) was given him, it appears (Gen. xxv:30) from the red pottage which he asked of Jacob, or, according to Gen. xxv:25, from the red color of the infant child.

(2) **Family.** Esau was the eldest son of 'Isaac, Abraham's son' (Gen. xxv:19) by Rebekah, 'the daughter of Bethuel the Syrian of Padan-aram, the sister to Laban the Syrian.' The marriage remaining for some time (about nineteen years; compare xxv:20, 26) unproductive. Isaac entreated Jehovah, and she became pregnant. Led by peculiar feelings 'to inquire of Jehovah,' Rebekah was informed that she should give birth to twins whose fate would be as diverse as their character, and, what in those days was stranger still, that the elder should serve the younger. On occasion of her delivery the child that was born first was 'red, all over like an hairy garment; and they called his name Esau.' Immediately afterward Jacob was born (B. C. between 2004 and 1770).

2. **Personal History.** In process of time the different natural endowments of the two boys began to display their effects in dissimilar aptitudes and pursuits. While Jacob was led by his less robust make and quiet disposition to fulfill the duties of a shepherd's life, and pass his days in and around his tent, Esau was impelled, by the ardent and lofty spirit which agitated his bosom,

to seek in the toils, adventures and perils of the chase his occupation and sustenance; and, as is generally the case in natures like his, he gained high repute by his skill and daring.

(1) **Sells His Birthright.** A hunter's life is of necessity one of uncertainty as well as hardship; days pass in which the greatest vigilance and the most strenuous exertions may fail even to find, much less capture, game. Esau had on one occasion experienced such a disappointment, and, wearied with his unproductive efforts, exhausted for want of sustenance, and despairing of capturing any prey, he was fain to turn his steps to his father's house for succor in his extremity. On reaching home he found his brother enjoying a carefully prepared dish of pottage, attracted by the odor of which he besought Jacob to allow him to share in the meal. His brother saw the exigency in which Esau was, and determined not to let it pass unimproved. Accordingly he puts a price on the required food. Esau was the elder, and had, in consequence, immunities and privileges which were of high value. The surrender of these to himself Jacob makes the condition of his complying with Esau's petition. Urged by the cravings of hunger, alarmed even by the fear of instant death, Esau sold his birthright to his younger brother, confirming the contract by the sanction of an oath. Jacob, having thus got his price, supplied the famishing Esau with needful refreshments.

(2) **Marries.** Arrived now at years of maturity, Esau, when 40 years of age, married two wives, Judith and Bashemoth. Some unhappy feelings appear to have previously existed in the family; for, while Esau was a favorite with his father, in consequence, it appears, of the presents of venison which the youth gave him, Jacob was regarded with special affection by the mother. These partialities and their natural consequences in unamiable feelings were increased and exaggerated by Esau's marriage. Even his father's preference of him may have been injuriously affected. The way was in some measure smoothed for the transference of the coveted birthright to the younger son.

(3) **Loses His Father's Blessing.** The time for the fulfillment of the compact between the brothers at length arrived. Isaac is 'sick unto death.' His appetite, as well as his strength, having failed, is only to be gratified by provocatives. He desires some savory venison and gives the requisite instructions to Esau, who accordingly proceeds in quest of it. On this Rebekah begins to feel that the critical time has come. If the hated Hittites are not to enter with her less favored son into possession of the family property, the sale of the birthright must now in some way be confirmed and consummated. One essential particular remained—the father's blessing. If this should be given to Esau all hope was gone; for this, like our modern wills, would deed the inheritance and the accompanying headship of the tribe to Esau and his wives.

Isaac, however, had lost his sight—indeed, all his senses were dull and feeble. It was therefore not very difficult to pass off Jacob upon him as Esau. Rebekah takes her measures, and, notwithstanding Jacob's fears, succeeds. Isaac, indeed, is not without suspicion, but a falsehood comes to aid Jacob in his otherwise discreditable personation of Esau. The blessing is pronounced, and thus the coveted property and ascendancy are secured. The affectionate endearments which pass between the deceiver and the abused old blind father stand in painful contrast with the

base trickery by which mother and son had accomplished their end.

Esau, however, returns from the field, approaches his decrepit and sightless father, declaring who he is. 'And Isaac trembled very exceedingly, and said, Who? where is he that hath taken venison and brought it me, and I have eaten of all before thou camest, and have blessed him?—yea, and he shall be blessed.' On this Esau becomes agitated, and entreats a blessing for himself—'Bless me, even me also, O my father.' Urging this entreaty again and again, even with tears, Isaac at length said unto him, 'Behold, thy dwelling shall be the fatness of the earth, and of the dew of heaven from above; and by thy sword shalt thou live, and shalt serve thy brother, and it shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck' (Gen. xxvii).

Thus deprived forever of his birthright, in virtue of the irrevocable blessing, Esau but too naturally conceived and entertained a hatred of Jacob, and even formed a resolution to seize the opportunity for slaying him, which the days of mourning consequent on the approaching decease of their father would be likely to afford. Words to this effect, which Esau let drop, were repeated to his mother, who thereupon prevailed on her younger son to flee to his uncle Laban, who lived in Haran, there to remain until time, with its usual effect, might have mitigated Esau's wrath.

(4) Reconciled to Jacob. Meanwhile Esau had grown powerful in Idumæa and when, after many years, Jacob intended to return within the borders of the Jordan, he feared lest his elder brother might intercept him on his way, to take revenge for former injuries. He accordingly sent messengers to Esau in order, if possible, to disarm his wrath. Esau appears to have announced in reply that he would proceed to meet his returning brother. When, therefore, Jacob was informed that Esau was on his way for this purpose with a band of four hundred men, he was greatly distressed, in fear of that hostility which his conscience told him he had done something to deserve. What, then, must have been his surprise when he saw Esau running with extended arms to greet and embrace him? and Esau 'fell on his neck and kissed him, and they wept.' Jacob had prepared a present for Esau, hoping thus to conciliate his favor, but Esau at first courteously refused the gift—'I have enough, my brother, keep that thou hast unto thyself' (Gen. xxxiii).

The whole of this rencounter serves to show that if Jacob had acquired riches, Esau had gained power and influence as well as property, and the homage which is paid to him indirectly, and by implication, on the part of Jacob, and directly, and in the most marked and respectful manner, by the females and children of Jacob's family, leads to the supposition that he had made himself supreme in the surrounding country of Idumæa.

(5) Later Events. Esau from this time appears but very little in the sacred narrative. He was ready to accompany Jacob, or to send with him an escort, probably for protection, but Jacob's fears and suspicions induced him to decline these friendly offers, and they separated on the same day that they met, after an interview in which Jacob's bearing is rather that of an inferior to his lord than that of a brother, and Esau's has all the generousness which a high nature feels in forgiving an injury and aiming to do good to the injurer. The latter, we are merely told, 'returned on his way to Seir' (Gen. xxxiii:16).

Jacob and Esau appear together again at the funeral rites which were paid to their deceased father, but the book of Genesis furnishes no particulars of what took place.

Esau is once more presented to us (Gen. xxxvi) in a genealogical table, in which a long line of illustrious descendants is referred to 'Esau, the father of the Edomites' (Gen. xxxvi:43).

3. Character. Esau, with his wild Arab nature, was in this respect a true child of his age. He has the virtues, but also the defects, of his time and race. The strong, sinewy son of the desert, with its boundless horizons and lawless freedom, his rough and hairy manhood marks splendid physical vigor, which urges to excitement and adventure. The old nomadic instincts of his race had come back in him in all their force. Restless, impulsive and fearless, he delighted to roam the wilderness free as the air or the bird, far from the restraints and tameness of settled habitations. Like a true Arab, he hated the dull pursuits of industry, and turned to his spear and bow as alone worthy a man's regard. Light-hearted as a child, he was as careless of the future. With no self-control or manly thoughtfulness, the enjoyment of the day was more to him than the greatest promises, for the realization of which he must wait. His bounding health and animal spirits engrossed him, and he found his delight only in their gratification.

With all this, he had in him the making of a splendid man, for it must have been long a question whether his restless, unsettled ways were not the mere effervescence of youth; and he showed the elements of a character that would have adorned home had he once sobered into a quiet life. He was free-handed and generous, frank and honest, kindly and forgiving. If he was not devoted to his mother, he could hardly be expected to be so when there was no warmth shown to attract him, but he worshiped his father, who paid him with kind words and looks, and he thought no toil too great to minister to his happiness (Gen. xxv:28; xxvii:1).

There was a radical defect, however, in his character that spoiled all and left nothing from the promise of the youth but a disappointing and unfruitful manhood. Life could not be so light and thoughtless as he made it, and ripen to anything worthy. He had no deeper and more sober nature to steady him as he grew older; no settled habits of honest toil; no fixed religious principle; no reverence for the future and unseen, and thus had nothing on which his better nature might fall back when the heyday of animal spirits and mere physical enjoyment were over. Brought up at the feet of Isaac, he might have learned to fear God, and live before Him, from his father's example, even if he noted the blemishes with which religiousness was stained in the persons of his mother and his brother. But he had no seriousness in his nature, and lived only for excitement and pleasure. Indifferent to the godliness of his father's home in his youth and earlier manhood, he passed, in his later years, into the chieftain of a warlike tribe, a stranger at once to the religion and traditions of his forefathers, and the bitter enemy of the "people of God" in later generations. (Geike, *O. T. Characters.*)

ESCHATOLOGY (ēs-kā-tōl'ō-jý), (from Gr. *ἔσχατος*, *es'khat-os*, the last things).

Eschatology gives an account of the final condition of man and the world as this is represented in Scripture. It refers principally to the second coming of Christ, the resurrection of the dead, the final judgment, and the consummation of all things.

But besides exhibiting the Scripture views of the final condition of things, eschatology may take notice of the phenomena, the physical convulsions, or the national commotions amidst which the final condition is ushered in; or it may go a step farther back and refer to the moral forces bringing about these manifestations and revealed in them. Hence it may refer to the views in the Old Testament regarding the coming of Christ into the world as the Messiah of God as well as to the views entertained regarding his coming again.

For a fuller discussion of the subject, we refer the reader to the articles on MESSIAH; MILLENNIUM; COMING OF CHRIST; WORLD, END OF THE; HEAVEN; HELL.

ESCHEW (ēs-chū'), (Gr. ἐκκλίνω, *ek-klee'no*, I Pet. iii:11), to turn away from, to shun. To keep free from (Job i:1).

ESDRAELOM (ēs-dra-ē'lom). See ESDRAELON, PLAIN OF.

ESDRAELON, PLAIN OF (ēs'dra-ē'lon), (Gr. Ἐσδρηλών, *es-dray-lōn'*).

"The great plain of Esdraelon" extends across central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee.

The western section of it is properly the plain of Accho, or 'Akka. The main body of the plain is a triangle. Its base on the east extends from Jenin (the ancient En-gannim) to the foot of the hills below Nazareth, and is about fifteen miles long; the north side, formed by the hills of Galilee, is about twelve miles long, and the south side, formed by the Samaria range, is about eighteen miles. The apex of the west is a narrow pass opening into the plain of 'Akka. This vast expanse has a gently undulating surface—in spring all green with corn where cultivated, and rank weeds and grass where neglected—dotted with several low gray tells, and near the sides with a few olive groves. This is that *Valley of Megiddo*, so called from the city of Megiddo, which stood on its southern border, where Barak triumphed and where king Josiah was defeated and received his death wound (Judg. v; 2 Chron. xxxv). Probably, too, it was before the mind of the Apostle John when he figuratively described the final conflict between the hosts of good and evil who were gathered to a place called *Ar-mageddon* (from the Hebrew, meaning, *the city of Megiddo*; Rev. xvi:16). The river *Kishon*—"that ancient river" so fatal to the army of Sisera (Judg. v:21)—drains the plain, and flows off through the pass westward to the Mediterranean.

Two things are worthy of special notice in the plain of Esdraelon—its *wonderful richness* and its *desolation*. If we except the eastern branches there is not a single inhabited village on its whole surface, and not one-sixth of its surface is cultivated. It is dotted with places of great historic and sacred interest, which are treated under their several names. On the east we have Endor, Nain, and Shunem, ranged around the base of the "hill of Moreh;" Beth-shean, in the center of the plain where the "valley of Jezreel" opens toward Jordan; Gilboa, with the "well of Harod" and the ruins of Jezreel at its western base. On the south are En-gannim, Taanach, and Megiddo. On the west apex, on the overhanging brow of Carmel, is the scene of Elijah's sacrifice; while close by runs the Kishon, on whose banks the false prophets of Baal were slain. On the north are Nazareth and Tabor. The modern Syrians call Esdraelon *Merj ibn-'Amer*, "the Plain of the Son of 'Amer." (Smith, *Hist. Geog.*, chap. 19; McC. and S., *Cyc.*; Smith, *Bib. Dict.*)

ESDRAS (ēs'draz), **APOCRYPHAL BOOKS OF** (Gr. Ἐσδρας, *esdras*).

Books of Ezra. In several manuscripts of the Latin Vulgate, as well as in all the printed editions anterior to the decree of the Council of Trent, and in many since that period, there will be found four books following each other, entitled the first, second, third, and fourth books of Ezra. The two first are the canonical books of Ezra and Nehemiah, the third and fourth form the subject of the present article. They are the same which are called first and second Esdras in the English Authorized Version.

(1) **Third Book.** The Third Book of Ezra is found in all the manuscripts of the Seventy, where it is called the *first* book, and precedes the second or canonical Ezra, which, in this version, includes the book of Nehemiah. It contains 109 κεφάλαια. It is a little more than a recapitulation of the history contained in the canonical Ezra, interspersed with some remarkable interpolations, the chief of which are chapter i, taken from 2 Chron. xxxv, xxxvi, part of the last chapter, from Neh. viii, and the narration of the themes or sentences of Zorobabel and the two other young men of Darius's bodyguard (3 Esdr. iii:4). The book is more properly a version than an original work. The style is acknowledged to be elegant, and not unlike that of Symmachus. This book was made use of by Josephus, who cites it largely in his *Antiquities*, but nothing further has been ascertained respecting the age either of the original or the translation. It is cited by Clemens Alexandrinus (*Stromata*, i.), the author of the *Imperfect Work on Matt.* (Hom. i), Athanasius (*Orat. iii. cont. Arianos*), and by Cyprian (*Epist. ad Pompeium*).

From the circumstance of Jerome's having declined to translate the third and fourth books of Ezra, they are (with the exception of the book of Job and the Psalms) the only portions either of the canonical or apocryphal writings of the Old Testament which have been preserved to us entire in the old Latin translation.

This book does not, however, appear to have been included in the catalogue of any council, nor has any portion of it been read in the offices of the church. Having been rejected as apocryphal by the Council of Trent, it has been removed, together with the fourth book, in the Sixtine and Clementine editions of the Vulgate, to the end of the volume, with the observation that they are thus retained in order to 'preserve from being altogether lost, books which had been sometimes cited by some of the holy fathers. The following is the order of the books of the Old Testament declared to be canonical by this council: Five of Moses; Joshua; Judges; Ruth; four of Kings; two of Chronicles; two of Ezra (viz., Ezra and Nehemiah); Tobit; Judith; Esther; Job; Psalms; Proverbs; Ecclesiastes; Canticles; Wisdom; Ecclesiasticus; Isaias; Jeremiah with Baruch; Ezekiel; Daniel; twelve minor Prophets (viz., Hosea, Joel, Amos, Abdias, Jonas, Micah, Nahum, Habakkuk, Zephaniah, Haggai, Zecharias, Malachi), and two of Maccabees.

(2) **Fourth Book.** The fourth book of Ezra is quite of a different character from the former, and it has been even doubted whether it more properly belongs to the Apocrypha of the Old or the New Testament, but the circumstance of the author's personating the celebrated scribe of that name has been supposed to have led to its obtaining a place in the former. It consists of a number of similitudes or visions, resembling in some passages the Apocalypse. The descriptions are

acknowledged to be sometimes most spirited and striking, occasionally rising to great sublimity of thought, energy of conception, and elegance of expression.

Jahn supposes the author to have been a Jew, educated in Chaldea, who borrowed his style from Daniel, and who, having become a Christian, still retained his reverence for Cabalistic traditions. He places him in the first or early in the second century.

(a) *When Written.* Dr. Laurence concludes from internal grounds that the book was written before the Christian era, after the death of Mark Antony, and before the accession of Augustus, or about the year thirty before Christ. Upon this hypothesis he conceives that besides that the doctrine of the immortality of the soul and a separate state of spiritual existence between death and judgment are distinctly described as the general and popular belief, the most important use of the book consists in the testimony which it bears to the Jewish idea of the Messiah, who is herein clearly and familiarly denominated by the appellation of the *Son of God*—as well as to the belief that previously to his appearance on earth he existed in heaven.

(b) *Author.* Dr. Lee is strongly of opinion that the author of this book was contemporary with the author of the book of Enoch, or rather that both these books were written by one and the same author. It does not appear that Josephus was aware of its existence.

(c) *Remarkable Passage.* Among the most remarkable passages in this book is that famous one (4 Ezra xiv) which ascribes the recension of the entire Scriptures to Ezra. It is well known that the Rabbins have a tradition, preserved in the Talmud, that on the rebuilding of the Temple Ezra assembled a college of 120 literati, known by the name of the Great Synagogue, for the purpose of collecting and arranging the Scriptures. Among the members are enumerated Daniel, Shadrach, Meshach, and Abednego, Haggai, Zechariah, Ezra and Nehemiah, and Simon the Just. Ezra, who, they say, was the same with the prophet Malachi, they represent as the first, and Simon the Just, its latest surviving member, as the last president of the college. They further represent all these eminent men as living at the same period under Darius Hystaspis, whom they suppose to be the same Darius who was subdued by Alexander, and also as that Artaxerxes who sent Ezra and Nehemiah to Jerusalem. Daniel is thus made to have lived to the time of Alexander the Great, and Simon the Just they hold to be the same with Jadduah, the high priest, who received Alexander in Jerusalem. To this synagogue the Rabbins ascribe the formation of the canon, to which they add that its members wrote Ezekiel, the twelve minor Prophets, Daniel and Esther, while Ezra wrote the book bearing his name, and the genealogies in Chronicles down to his time (*Bava Bathra*). Jahn (*Einleitung*, 28) supposes that as there is no authority whatever for the existence of this synagogue, all that can be meant is that the canon was settled by Ezra and the others named as members of the synagogue, and closed by Simon, who filled the office of high priest for nine years till his death (B. C. 292).

Dean Prideaux supposes that Ezra gave a new edition of the Scriptures, corrected the errors of transcribers, adding what appeared necessary for illustrating, correcting or completing them, changing names and supplying what was wanting.

(d) *Possible Mistake.* Eichhorn thinks it possible that Simon the Just has been confounded in the Talmudical fable with Simon the Maccabee,

as he supposes that all the books in the canon could not have been written so early as the time of Simon the Just, but that the canon may have been closed under Simon the Maccabee (B. C. 141-135). St. Jerome mistakes him for Simeon, the contemporary of our Savior. (See *MACCABEES*; *WISDOM OF SIRACII*; *SYNAGOGUE*.)

Although Esdras is included in the sixth article among the other books read for edification, etc. (DEUTERO-CANONICAL), it will be observed that no lessons are taken from it in the offices of the Church of England. References are, however, made from it in the Authorized Version to parallel passages in the Old and New Testament. Grabe and others have conceived that this was the book cited as the *Wisdom of God* (*Luc.* xi.49, comp. with 4 Esdras i:32). W. W.

ESEK (ē'sek), (Heb. אֶסֶק, *ay-sek'*, strife), the name of a well dug by the patriarch Isaac, in the valley of Gerar. It received its name "strife" from the fact that the herdmen of the valley contended with him for its possession (*Gen.* xxvi:20).

ESHBAAL (ēsh'bā'al), (Heb. אֶשְׁבַּעַל, *esh-bah'al*, Baal's man), the fourth son of King Saul (1 *Chron.* viii:33; ix:39). He is doubtless the same person as *Ish-bosheth* (1 *Sam.* xxxi:2; comp. with 2 *Sam.* ii:8). (See *ISHBOSHETH*.)

ESHBAN (ēsh'ban), (Heb. אֶשְׁבַּן, *esh-bawn'*, wise hero), a Horite, son of Dishon, or more accurately Dishan (*Gen.* xxxvi:26; 1 *Chron.* i:41), B. C. 1963.

ESHCOL (ēsh'kōl), (Heb. אֶשְׁכּוֹל, *esh-kole'*, a bunch, cluster, especially of grapes).

1. One of the Amoritish chiefs with whom Abraham was in alliance when his camp was near Hebron, and who joined with him in the pursuit of Chedorlaomer and his allies, for the rescue of Lot (*Gen.* xiv:13, 24).

2. The name of the valley in which the Hebrew spies obtained the fine cluster of grapes which they took back with them, borne 'on a staff between two,' as a specimen of the fruits of the Promised Land (*Num.* xiii:24). The cluster was doubtless large; but the fact that it was carried in this manner, does not, as usually understood, imply that the bunch was as much as two men could carry, seeing that it was probably so carried to prevent its being bruised in the journey. The valley of Eshcol probably took its name from the distinguished Amorite already mentioned, and is hence to be sought in the neighborhood of Hebron. Accordingly the valley through which lies the commencement of the road from Hebron to Jerusalem is indicated as that of Eshcol. This valley is now full of vineyards and olive-yards; the former chiefly in the valley itself, the latter up the sides of the enclosing hills. These vineyards are still very fine, and produce the finest and largest grapes in all the country.

ESHEAN (ē'she-ān), (Heb. אֶשְׁעַן, *esh-awn'*, support), a town of Judah, in the mountainous district (*Josh.* xv:52). The place has not been fully identified, although it has been supposed to be the same as the ruin es-Sîmia, near Dumah, and about eight and a half miles southwest by south of Hebron.

ESHEK (ē'shēk), (Heb. אֶשְׁחֶק, *ay-shek'*, oppression), a Benjamite, descendant of Saul and founder of a noted family of archers (1 *Chron.* viii:39), B. C. before 588.

ESHEL (esh'el), (Heb. אֶשֶׁל, *ay'shel*), which should be translated *tamarisk*, as in R. V. (*Gen.* xxi:33; 1 *Sam.* xxii:6, marg.).

(1) The first notice of this tree is in Gen. xxi:33, 'And Abraham planted a *grove* (*eshel*) in Beersheba, and called there on the name of the Lord.' The second notice is in 1 Sam. xxii:6: 'Now Saul abode in Gibeah under a *tree* (*eshel*) in Ramah, having his spear in his hand, and all his servants were standing about him.' Under such a tree also he and his sons were buried, for it is said (1 Sam. xxxi:13): 'And they took their bones and buried them under a *tree* (*eshel*) at Jabesh, and fasted seven days.' In the parallel passage of 1 Chron. x:12, the word *alah* is employed. This signifies a 'terebinth tree,' but is translated oak in the Authorized Version.

From the characteristics of the tamarisk tree of the East, it certainly appears as likely as any to have been planted in Beersheba by Abraham, because it is one of the few trees which will flourish and grow to a great size even in the arid desert.

Tamarisk Tree.

It has also a name in Arabic, *asul*, very similar to the Hebrew *eshel*. Besides the advantage of affording shade in a hot country, it is also esteemed on account of the excellence of its wood, which is converted into charcoal. It is no less valuable on account of the galls with which its branches are often loaded, and which are nearly as astringent as oak-galls. The only difficulty is to ascertain the exact species. But as they are all so similar, any of the arboreous species or varieties which flourish in the most barren situations would have the name *asul* applied to it, and this name would appear to an Arab of those regions the most appropriate translation for *eshel*, in the passage where Abraham is described as planting a tree and calling on the name of the Lord, the everlasting God. (See OAK; TAMARISK.)

J. F. R.

(2) **ESHTEL**, also *Eschel* and *Aishel*, occurs in three places in the Scriptures, in one of which, in our Authorized Version, it is rendered *grove*, and in the other two *tree*. If we compare the passages in which the word *eshel* occurs, we shall see that there is no necessity for considering it a generic term.

ESHKALONITE (*ësh'ka-lon-ite*), (Heb. אֶשְׁכֶּלֹנִי, *esh-kel-o-nee'*), the patrial designation (Josh. xiii:3) of an inhabitant of ASHKELON (which see).

ESHTAOL (*ësh'ta-öl*), (Heb. אֶשְׁתָּאֹל, *esh-taw-ole'*), a town of Dan, though it belonged first to Judah (Josh. xv:33; Judg. xiii:25; xvi:31; xviii:2, 8, 11, 12). Eusebius says it was ten miles from Eleutheropolis, toward Nicopolis, between Azotus and Askalon. It is called by Jerome, Asco. Eshtaol is thought to be the village of Eshû'a, about one and a half miles east by north from Zorah, and thirteen miles west, slightly north from Jerusalem.

ESHTAULITE (*ësh'ta-ul-ite'* or *ësh'tau-lite*) (Heb. אֶשְׁתָּאֹלִי, *esh-taw-oo-lee'*), an inhabitant of Eshtal, and who at a later period, with the Zareathites, belonged to the families of Kirjath-jearim (1 Chron. ii:53).

ESHTEMOA (*ësh'te-mō'á*), (Heb. אֶשְׁתֵּמוֹעַ, *esh-tem-o'ah*, obedience), or **ESHTEMOH** (Heb. אֶשְׁתֵּמוֹה, *esh-tem-o'*, Josh.)

1. A town of Judah (Josh. xxi:14; xv:50; 1 Sam. xxx:28). Eusebius says it was a large town in the district of Eleutheropolis, north of that city. It was ceded to the priests (1 Chron. vi:57). The site has been found at Semû'a, nine miles south of Hebron, a considerable village with the foundation of ancient walls designed for a large town.

2. In 1 Chron. iv:19 the name seems to be applied to a person.

ESHTON (*ësh'ton*), (Heb. אֶשְׁתֹּן, *esh-tone'*, restful), a son of Mehir and grandson of Chelub, of the tribe of Judah (1 Chron. iv:11, 12), but Grove thinks it was probably a place in Judah.

ESLI (*ësh'li*), (Gr. Ἐσλι, *es-lee'*), son of Nagge (Naggai) and father of Naum, of the maternal ancestry of Christ after the exile (Luke iii:25).

He has been held to be the same with *Elioenai*, the son of Neariah and father of Johanan (1 Chron. iii:23, 24).

ESPOUSAL, ESPOUSE (*ësh-pouz'al*, *ësh-pouz'*). To espouse (fr. Lat. *sponsus*, ptec. of *spondere*, to betroth, through Old Fr. *espouser*), meant either to betroth or to marry.

Figurative. St. Paul says in 2 Cor. xi:2: 'I have espoused to you one husband'; literally, 'joined you unto,' and here the reference seems to be to marriage, not betrothal; 'I have given you in marriage,' though the betrothal, which was also carried out by the bridegroom's friend, may be meant. The promise of God to *betroth* Israel (Hos. ii:19, 20) is very significant. He was to renew his covenant, not as a man remarries a divorced wife, but as one espouses a maid; the past is forgiven, and Jehovah makes a new covenant with his church, such as is made with a spotless virgin. He betroths his people *forever*, by an everlasting covenant, that neither time, sin nor anything else can disannul; and in *righteousness*, consistently with his essential righteousness, and in *judgment*, with great wisdom and prudence; and in *faithfulness*, in fulfillment of his covenant and promise, and sincerely determined to fulfill the marriage trust toward them; and in *loving kindness and mercies* to their persons, so wretched, guilty and rebellious.

ESROM (*ësh'rom*), (Matt. i:3; Luke iii:33). See HEZRON.

ESSENCE (*ësh'sens*), **THE DIVINE**. (Essence from Latin verb *esse*, to be).

Berkeley says: "The absolute existence of unthinking things without any relation to their being perceived is . . . unintelligible. Their *esse* is *percipi*; nor is it possible that they should have any existence out of the minds or thinking things which perceive them." *Esse simpliciter*, unconditioned being, applied to God as self-subsistent.

J. H. Fichte says: "It is that true being, which remains in itself the same, over against the infinitely non-being, the appearance." Hegel says it is "being (*Sein*), coming into mediation with self through the negativity of itself—the truth of being, the concept as established."

Kant teaches that it is "the primary internal

principle (the ground) of all that belongs to the possibility of a thing."

Schelling says: "It is that whereby a thing is in conformity with all things; opposed to Form, that whereby it is itself."

These are more philosophical than theological definitions. But theology has an intimate relation to philosophy. And while the Scriptures do not contain such abstract terms as essence and substance, at the same time it must be admitted that some of the names under which God has revealed himself, as Elohim and Jehovah, refer directly to the eternal Divine essence. At all events theology has often made large use of these terms in its attempts to arrive at the proper and scriptural conception of God.

The questions have been earnestly discussed to what extent, if any, the Divine essence can be known to us; and, secondly, as to the relation existing between the attributes of God and his essence. His attributes are the living realization of his essence. Accordingly, while the Divine essence is incomprehensible, we have nevertheless some measure of true knowledge of God, knowledge that relates to his very essence. (See GOD, ATTRIBUTES OF.)

The various books on systematic theology may be consulted, such as Hodge, Raymond, Pope, etc.; also Mansell's *Limits of Relig. Thought*.

ESSENES (ēs-sēnz'), (Gr. 'Ἐσσηνοί, *es-se-noi'*), one of the three great Jewish sects, of which the other two were the Pharisees and the Sadducees.

(1) **Name.** The derivation of the name Essenes is by no means certain. Philo (*Quod omnis probus liber*, sec. 12) deduces it from ἅγιος, 'holy.' Some have found its origin in the Hebrew נָצַר, *aw-say-yaw'*, 'to heal,' supporting their opinion by reference to the fact that the Essenes were a class of men who professed to heal both mind and body. De Wette gives the preference to the Syriac word signifying 'pious.'

(2) **Origin.** These sects sprung up in the decline of the Jewish state, after the Babylonish captivity, influenced in their rise and spread not less by ascetic philosophy than by the national degradation and the decay of morality. In all states religion comes first, for it is spontaneous, the natural answer of the heart to God.

While the Pharisees gave their countenance to sustain the past, with all its transmitted influences, indiscriminately, and the Sadducees adhered to the rejection of what was traditionary and adventitious, the Essenes attempted to form a third way, which, without neglecting the past, should bring new and powerful appliances to bear on the actual ills of society, seeking not merely to reform and repair, but rather to heal and revive. For this purpose they gave themselves up to a contemplative mode of life, as well as to those labors by which only thought and practice can be united in harmony, and the good which God designed he wrought out for man. Making small account of the outward observances of the Pharisee, and standing religiously aloof from the skepticism and narrow worldly spirit of his opponent the Sadducee, the Essenes aimed at something practical—sought to originate an influence which should stem the advance of corruption and pour a sanatory and life-giving power into the veins of society.

(3) **Organization.** For this purpose they founded a brotherhood, devised institutions, and became the earliest example, if not the actual parent, of all the teeming brood of hermits, monks, friars and nuns, which have since been seen.

They were a moral and religious order, while the Pharisees partook more of the character of a party (in the modern and political sense of the word), and the Sadducees exhibited not a few of the features of a sect.

(4) **Ethics, Manners and Customs.** (a) The Essenes were ascetics. The ordinary pleasures of life they avoided as something morally bad, and held self-control and freedom from the slavery of the passions to be virtue. Marriage they despised. Selecting among the children of others those whom they considered the most promising, they endeavored to form them according to their own model. Neither riches nor poverty were known in their body. None had less, none more than enough.

(b) Stewards were appointed by them, whose business it was to take due care of what in each case was entrusted to them, not for their own individual advantage, but for the common good.

(c) Buying and selling, as might be expected, were unknown among them; give and take was their simple plan, which appears to have been observed no less between the members of different communities than between those of the same.

(d) Their entire manner of life, indeed, was subject to the strictest rule. Only in their ministrations of charity were they left free to the spontaneous movements and impulses of their breasts.

(e) Next to God, Moses was the object of their reverent homage. To blaspheme the name of Moses was a capital offense. As might be expected, their observance of the Sabbath was more strict than ordinary. Their food they cooked the day before. On the Sabbath day they would not remove a vessel from its place, even for the most pressing wants of nature.

(f) Their pursuits, trades and professions were such as conduce to human good. They tilled the ground; they made useful articles; they bred and pastured cattle, but in the fabrication of arms they took no part. Even peaceful pursuits which ministered to vice they carefully avoided. It must not be concealed, however, that some of their notions bordered on extravagance, and that some of their practices betrayed a fastidiousness which amounts to the ridiculous.

(g) In morals they seem to have attained no ordinary excellence. Over anger they kept a guard like just stewards. All the passions they knew how to restrain. They were eminent for fidelity and ministers of peace. Their word was more to be trusted than some men's oaths.

(h) The great aim of their inquiries, whether they searched the books of the ancients or studied the virtues of plants, was to gather such lessons of wisdom as might render them able to administer, like skillful physicians, to the maladies both of the mind and the body.

(i) They had no slaves; all were free, serving one another. They repudiated lordships as unjust, as destructive of natural equality, as irreligious, as opposed to the laws of nature. Nature they held to be the common mother and instructress of all, and with them all men were brethren, not in name, but in reality.

Thus, while they were careful to preserve a practical subordination in their communities, without which social existence is an impossibility, those who were highest amongst them held office merely for the common good, and in themselves were neither richer nor better clad than others, nor had they any political power.

(j) Pain they disregarded; the miseries of life they held of small account, and they even preferred death to living always.

The calm and unmoved firmness with which they endured at the hands of the Romans, during 'the Jewish war,' the cruellest tortures, and death itself, rather than be faithless to their convictions or forswear their order, serves to show that the ascetic spirit and the martyr spirit have no little in common, and exhibits within the limits of Palestine the very same results, from the very same discipline, as Sparta was proud to call her own.

(k) With their ascetic notions it was natural they should disregard the body, and the usual care which, especially among the ancients, was taken of it. Accordingly they considered oil a defilement, and if any one was anointed contrary to his will the body was carefully cleansed.

ESTHER (ēs'tēr), (Heb. אֶסְתֵּר, *es-tare'*, from Persian *sitarah*, star, the planet *Venus*).

1. Name and Family. She was a maiden of the tribe of Benjamin, born during the Exile, and whose family did not avail itself of the permission to return to Palestine under the edict of Cyrus. Her parents being dead, Esther was brought up by her uncle, Mordecai. It should be observed that Esther is the name which the damsel received upon her introduction into the royal harem, her Hebrew name having been Hadassah, *myrtle* (Esth. ii:7). Esther is a Persian word. Gesenius cites from that diffuse Targum on this book, which is known as the second Targum on Esther, the following words: 'She was called Esther from the name of the star Venus, which in Greek is *Aster*.' Gesenius then points to the Persian word *Satirah*, star, as that of which Esther is the Syro-Arabian modification, and brings it, as to signification, into connection with the planet Venus, as a star of good fortune, and with the name of the Syrian goddess, Ashtōreth, according to the etymology of the word, already referred to in that article.

2. Personal History. (1) Chosen Queen. The reigning king of Persia, Ahasuerus, having divorced his queen, Vashti, on account of the becoming spirit with which she refused to submit to the indignity which a compliance with his drunken commands involved, search was made throughout the empire for the most beautiful maiden to be her successor. Those whom the officers of the harem deemed the most beautiful were removed thither, the eventual choice among them remaining with the king himself. That choice fell on Esther, who found favor in the eyes of Ahasuerus, and was advanced to a station enviable only by comparison with that of the less favored inmates of the royal harem. Her Jewish origin was at the time unknown; and hence, when she avowed it to the king she seemed to be included in the doom of extirpation which a royal edict had pronounced against all the Jews in the empire.

(2) Saves Her People. This circumstance enabled her to turn the royal indignation upon Haman, the chief minister of the king, whose resentment against Mordecai had led him to obtain from the king this monstrous edict. The laws of the empire would not allow the king to recall a decree once uttered; but the Jews were authorized to stand on their defense; and this, with the known change in the intentions of the court, averted the worst consequences of the decree. The Jews established a yearly feast in memory of

this deliverance, which is observed among them to this day (see *PURIM*). Such is the substance of the history of Esther, as related in the book which bears her name.

3. Character. Esther appears in the Bible as a woman of deep piety, faith, courage, patriotism and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favor with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us to infer. And there must have been a singular grace and charm in her aspect and manners, since she "obtained favor in the sight of all that looked upon her" (ii:15). That she was raised up as an instrument in the hands of God to avert the destruction of the Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. (Archdeacon Hervey, *Smith's Bib. Dict.*)

Dr. Hervey adds: "But to impute to her the sentiments put into her mouth by the apocryphal author of chapter xiv, or to accuse her of cruelty because of the death of Haman and his sons and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact the simplicity and truth to nature of the Scriptural narrative afford a striking contrast, both with the forced and florid amplifications of the apocryphal additions and with the sentiments of some later commentators."

J. A. McClymont, *Hastings' Bib. Dict.*, says: "While there are some things recorded of Esther that offend our Christian feeling—in particular her vindictive treatment of the bodies of Haman's sons (chap. ix:7), and her request for an extension of time to the Jews at Susa for the slaughter of their enemies (chap. ix:13)—regard must be had to the spirit of the age in which she lived and to the passions that had been excited by Haman's inhuman malignity."

Dr. William Wright in *Kitto's Bib. Cyc.*, says: "With reference to the somewhat sanguinary character of Esther and Mordecai, John remarks that no difficulty arises from thence, seeing that they are not represented as saints, but as deliverers of their nation."

ESTHER (ēs'tēr), **BOOK OF**, one of the eleven books styled *Ketubim* (see *HAGIOGRAPHIA*), and of the five *Megilloth* (see *CANTICLES*).

(1) Name. It is called by the Jews *Megillah Esther*, and sometimes simply *Megillah*, as it forms by itself a distinct roll. In the Christian Church it has been also called *Ahasuerus*, which name it bears in some copies and printed editions of the Vulgate. In the Hebrew it is placed with the other *Megilloth*, after the Pentateuch, between the books of Joshua and Ecclesiastes, and sometimes among the *Hagiographa*, between Ecclesiastes and Daniel. In the Vulgate, Tobit and Judith are placed between Nehemiah and Esther. Luther placed it immediately after Nehemiah, so as to make it the last among the historical books, although the book of Nehemiah was supposed to refer to a later history. His design in this arrangement was to prevent the books of Nehemiah and Ezra from being disunited. It has continued to retain this position in the Reformed versions.

The Jews hold this book in veneration next to the books of Moses (see Carpvov's and Eichhorn's

Introductions). Aside from the subject of this book, which has been treated under AHASUERUS, the book of Esther has this peculiarity among the historical books, that although the author, a Persian Jew, records a remarkable preservation from destruction of that portion of his countrymen which remained in Persia after the exile, he does not refer their deliverance to the act of God, whose name is not even once mentioned. This has been explained by supposing that the author wished to avoid giving offense to the Persians, or that the whole was taken from the Persian annals, to which an appeal is made (chap. x:2). (See Pareau's *Principles of Interpretation* and Hottinger's *Theol. Phil.*, p. 488.)

(2) **Date.** Esther was written in the late reign of Xerxes or in the first years of Artaxerxes Longimanus.

(3) **Author.** Of the author nothing is known, nor have we any data on which to form a reasonable conjecture. Augustine (*De Civitate Dei*) ascribes the book to Ezra. Eusebius (*Chronic.* xlvii. d. 4), who observes that the facts of the history are posterior to the time of Ezra, ascribes it to some later but unknown author. Clemens Alexandrinus (*Stromata*, lib. i. p. 329) assigns it, and the book of Maccabees to Mordecai. The pseudo-Philo (*Chronographia*) and Rabbi Azarias maintain that it was written at the desire of Mordecai by Jehoiakim, son of Joshua, who was high priest in the twelfth year of the reign of Artaxerxes. The minute details given of the banquet, the customs and regulations of the palace, and the names of people connected with the court, indicate that the author lived at Shushan, and probably at the court. The intimate knowledge of the private affairs of Esther and Mordecai bear out the hypothesis that the writer was Mordecai himself, and, like Daniel, Ezra and Nehemiah, who wrote an account of the affairs of their nation, so he wrote of the events recorded in Esther.

(4) **Relations of the King with Esther.** The King Ahasuerus is probably Xerxes, son of Darius Hystaspis (see AHASUERUS), and Esther, a captive, one of the king's harem, was certainly not of the highest rank of wives, because it is known that the Persian kings chose their wives not from among the concubines, but from the noblest Persian families. The title of wife or queen may have been given to her, as to Vashti before her, as the favorite concubine, whose children, however, would never have succeeded to the throne.

This view of the relations of Esther and Ahasuerus removes all difficulty in reconciling the history of Esther with the scanty accounts left us by profane authors of the reign of Xerxes.

(5) **Canonical Authority.** Some doubts have been thrown on the canonical authority of this book from the fact that it is never referred to in the New Testament, that it is not cited by Philo, and that it is omitted in several of the ancient catalogues, some of which expressly exclude it from the canon. As to the New Testament, there are several other books whose authority is unquestioned which are never once referred to therein, viz. the books of Ruth, Ezra, Nehemiah, Canticles, Lamentations, and Ezekiel; and the same may be said of Philo, who, although he mentions or refers to all the other books of the Jewish Canon, makes no reference to Ruth, Chronicles, Nehemiah, Esther, Lamentations, Daniel, Ecclesiastes, and Canticles. Carpzov (*Introduction*) maintains that it is referred to in Matt. i:11. Its omission by Melito, A. D. 170 (see DEUTERO-CANONICAL BOOKS) has been accounted for by supposing that he included it, as well as the book of Nehemiah,

under the name of Ezra, and there are, in fact, some manuscripts of the Vulgate extant, in which Esther is called the sixth book of Ezra (Whiston's *Josephus*, b. xi, chap. 6, note).

There are two works attributed to Athanasius, in both of which the book of Esther is excluded from the canon, the *Festal Epistle*, and the *Synopsis Scripturæ*. It is, however, held in great veneration in the Greek Church, and holds the same place in the authorized Bibles of that communion which Jerome's prefaces do in the Latin Vulgate.

It has been questioned whether Josephus considered the book of Esther as written before or after the close of the canon. All other ancient writers and catalogues include Esther among the books of the Jewish canon. Jerome expressly names it as the ninth book of the Hagiographa (*Prologus Galeatus*). It has, however, been classed by Sixtus of Sienna, Bellarmine, and others of the Roman church, in the second order of sacred books, or as *deutero-canonical*; that is, according to these writers, among those prophetic and apostolical books whose authority has not been always equally certain, in opposition to those of the first class respecting whose authority there has never been any dispute. Eichhorn considers as conclusive of Esther's having formed part of the Jewish canon, the fact of its having been translated by the Seventy, under the reign of Ptolemy Philometor, about the middle of the second century before Christ, before the time usually assigned to the translation of the prophets. For this date we have the authority of the subscription to the Septuagint Version. So whatever doubts may have existed among some of the Christian fathers as to the authenticity of Esther, it does not appear that it was ever doubted by the Jews, or by the Christian Church in its collective capacity. The objections which have been advanced against the book of Esther on the ground of the follies, wickedness and cruelties narrated in it, have been ably refuted by Jahn and other critics, who have shown that these things are not recorded with approbation, but simply as facts of history, illustrative of the operations of the providence of God, with a view to effect the deliverance of his people (Henderson, *On Inspiration*, p. 48).

W. W.

(6) **Apocryphal Additions To.** In the version of the Seventy the book of Esther, besides other variations, is enriched with several detached fragments which are not found in the Hebrew. These were also contained in the old Latin, which was translated from the Greek, and were retained in his own version by Jerome, who removed them to the end of the book, in which position they are still found in all manuscripts and printed editions of the Vulgate, forming the last seven chapters according to Cardinal Hugo's division. Luther proceeded still further, and removed them to a separate place among the *Apocrypha*. They are as follows:

(1) The Greek version commences with what forms the 11th chapter in the Vulgate, 'In the fourth year of the reign of Ptolemy and Cleopatra,' describing Mordecai's dream of the two dragons and the conspiracy of the two eunuchs (Vulg. xii).

(2) The king's letter for the destruction of the Jews (Vulg. xiii) follows in the Greek the 13th verse of chap. iii to verse 14.

(3) The Prayer of Esther (Vulg. xiv), Septuagint iv, commencing after the 17th verse in the Vulgate.

(4) A detailed and embellished description of

Esther's visit to the king (Vulg. xv), Septuagint v to verse 3.

(5) The king's letter in favor of the Jews (Vulg. xvi), Septuagint viii, after 13th verse.

(6) The whole concludes in the Septuagint with Mordecai's recollection of his dream of the great and little fountain and the two dragons (Vulg. i), after which is the subscription, purporting that the letter concerning the feast of Purim was brought into Egypt by Dositheus and translated by Lysimachus in the fourth year of the reign of Ptolemy and Cleopatra (B. C. 165).

ETAM (ē'tam), (Heb. עֵתָם, *ay-tawm'*, lair of wild beasts).

1. A town in the tribe of Judah, which was decorated by Solomon with gardens and streams of water, and fortified by Rehoboam along with Bethlehem and Tekoa (1 Chron. iv:3; 2 Chron. xi:6; Joseph. *Antiq.* viii:7, 3). From this place, according to the Rabbins, water was carried by an aqueduct to Jerusalem. Josephus places it at fifty stadia (in some copies sixty) from Jerusalem (southward), and alleges that Solomon was in the habit of taking a morning drive to this favored spot in his chariot. Scholars are inclined to find Etam at a place about a mile and a half south of Bethlehem, where there is a ruined village called Urtas, at the bottom of a pleasant valley of the same name. Here there are traces of ancient ruins, and also a fountain, sending forth a copious supply of fine water, which forms a beautiful purling rill along the bottom of the valley.

2. A village of the tribe of Simeon (1 Chron. iv:32). As the cities of Simeon were all in the extreme south this cannot be the same as 1.

3. *Etam the Rock*. It is usually supposed that 'the rock Etam,' to which Samson withdrew (Judg. xv:8, 11), was near the town of the same name now called Urtas, which seems to correspond to the ancient Etam.

ETERNAL (ē-tēr'nal). The general rendering in the A. V. of the Heb. עֵלָם, *o-lawm'*; the Gr. αἰών, *ahee-ohn'*, age, or αἰώνιος, *ahee-o'nee-os*, perpetual, and occasionally עֵרֵךְ, *keh'dem*, early, of yore. Both *o-lawm'* and *ahee-ohn'* are properly represented by "eternal," inasmuch as they usually refer to indefinite time, *past* or *future*.

1. *O-lawm'*, which means to *hide*, strictly designates the occult time of the past, "time out of mind," or time immemorial (Ps. xxv:6; Jer. vi:16).

2. *Ahee-ohn'* corresponds remarkably with the Hebrew *o-lawm'* in nearly all of its meanings. Its derivation is from a verb meaning to *breathe*, *blow*, and denotes that *which causes life*.

In the sense of *unlimited duration* must it always be taken, unless something appears in the subject or connection in which it occurs, to limit its signification; that is, to show that it is used figuratively, and not in its proper acceptance.

When applied to God and spiritual things it indicates the endless succession of ages, which is the popular and necessary conception of the eternal. The New Testament usage is indicated as follows:

In its adjective form it denotes *forever* (John vi:51, 58; xiv:16; Heb. v:6; vi:20, etc.); *unto the ages*, i. e., as long as the time shall be (Rom. i:25; ix:5; xi:36); *from the ages*, i. e., from eternity (Col. i:20; Eph. iii:9); *before time was*; i. e., before the foundation of the world (1 Cor. ii:7). In poetical and popular usages *from the ages* means *from of old* (Luke i:70; Acts iii:21), *from the most ancient times*. Elsewhere of the future it is

used in an unlimited sense, *endless* (2 Cor. iv:18; v:1; Luke xvi:9; Heb. ix:12; xiii:20, etc.), especially of the happy future of the righteous, as "life everlasting" (Matt. xix:16, 29; xxv:46), and often of the miserable fate of the wicked (Mark iii:29; Matt. xviii:8, etc.). (J. Newton Brown, *Bib. Cyc.*; Mc. and Str. *Bib. Cyc.*; Barnes, *Bib. Cyc.*)

ETERNAL LIFE. See LIFE.

ETERNITY OF GOD (ē-tēr'nī-tŷ òv gòd) is the perpetual continuance of his being, without beginning, end, or succession.

(1) *That he is without beginning* may be proved (1) From his necessary self-existence (Exod. iii:14). (2) From his attributes, several of which are said to be eternal (Rom. i:20; Acts xv:18; Ps. ciii:17; Jer. xxxi:3). (3) From his purposes, which are also said to be from eternity (Is. xxv:1; Eph. iii:11; Rom. ix:11; Eph. i:4). (4) From the covenant of grace, which is eternal (2 Sam. xxiii:5; Mic. v:2).

(2) *That he is without end* may be proved from (1) His spirituality and simplicity (Rom. i:23). (2) From his independency (Rom. ix:5). (3) From his immutability (1 Pet. i:24, 25; Mal. iii:6; Ps. cii:26, 27). (4) From his dominion and government, said never to end (Jer. x:10; Ps. x:16; Dan. iv:3).

(3) *That he is without succession*, or any distinctions of time succeeding one to another, as moments, minutes, etc., may be proved from (1) His existence before such were in being (Is. xliii:13). (2) The distinctions and differences of time are together ascribed to him, and not as succeeding one another; he is the same yesterday, to-day and forever (Heb. xiii:8; Rev. i:4). (3) If his duration were successive, or preceded by moments, days and years, then there must have been some first moment, day and year when he began to exist, which is incompatible with the idea of his eternity; and besides one day would be but one day with him, and not a thousand, contrary to the express language of Scripture (2 Pet. iii:8). (4) He would not be immutable and perfect if this were the case, for he would be older one minute than he was before, which cannot be said of him. (5) As the eternal, supreme cause he must of necessity have such a perfect, independent, unchangeable comprehension of all things that there can be no one point or instant of his eternal duration, wherein all things that are past, present and to come will not be as entirely known and represented to him in one single thought or view, and all things present and future be equally entirely in his power and direction, as if there was really no succession at all, but all things were actually present at once.

ETHAM (ē'tham), (Heb. עֵתָם, *ay-thawm'*), a place to the east of the present Suez Canal, on the border of the desert, where Israel made its second station after leaving Egypt (Exod. xiii:20; Num. xxxiii:6).

Canon Cook would identify it with *Pithom* or ancient Hierapolis; others with *Seba Beer*, "seven wells," about three miles west of the Red Sea; Trumbull, with a "wall" from the Red to the Great Sea.

ETHAN (ē'than), (Heb. עֵתָן, *ay-thawm'*, perpetuity).

1. One of the four persons ("Ethan the Ezrahite, and Heman and Chalcol and Darda") who were so renowned for their sagacity that it is mentioned to the honor of Solomon that his wisdom excelled theirs. In 1 Kings iv:31 Ethan is distinguished as 'the Ezrahite' from the others,

who are called 'sons of Mahol'—unless, indeed, this word *Mahol* be taken not as a proper name, but appellatively, for 'sons of music, dancing,' etc., in which case it would apply to Ethan as well as to the others. This interpretation is strengthened by our finding the other names associated with that of Ethan in 1 Chron. ii:6 as 'sons of Zerah, i. e., of Ezra, the same as Ezrahites. The evidence of identity afforded by this collocation of names is too strong to be resisted, and we must therefore conclude that Ethan and the others, the tradition of whose wisdom had descended to the time of Solomon, are the same who, in 1 Chron. ii:6, appear as sons of Zerah, who was himself the son of the patriarch Judah. With this agrees the Jewish chronology, which counts them as prophets during the sojourn in Egypt (B. C. after 1856).

2. A Levite, the son of Kishi, and one of the masters of the temple music (1 Chron. vi:44; xv:17), to whom the 89th Psalm is ascribed, and whom some interpreters suppose to be the Ethan of 1 Kings iv:31, to whose wisdom that of Solomon is compared (B. C. 1014).

3. A Gershonite Levite, ancestor of Asaph, the singer (1 Chron. vi:42). (B. C. 1585.)

ETHANIM (ĕth'a-nĭm), another name for the month TISRI (which see).

ETHBAAL (ĕth'bā'al), (Heb. אֶתְבַּעַל, *eth-bah'al*, with Baal), a king of Sidon, father of Jezebel, the wife of Ahab (1 Kings xvi:31), B. C. before 875.

Josephus says that he was also king of Tyre. By this we may identify him with Eithobalus, a priest of Astarte, who usurped the throne of Tyre for thirty-two years (B. C. 940-908). The office which Ethbaal held may explain Jezebel's idolatrous zeal. In the account of Sennacherib's campaign against the Hittites he says: "The power of the weapons of Assur, my lord, overwhelmed the cities of Great Sidon, Little Sidon . . . and they submitted unto me. *Ethbaal* (Tubahlu) I set on the royal throne over them, and I laid upon him annual tribute and gifts to my sovereignty, never to be discontinued" (Sayce, *Higher Criticism*, pp. 428, 429).

ETHER (ĕ'ther), (Heb. אֶתֶר, *eh'ther*, abundance), a city twenty miles from Eleutheropolis, near Malatha, in the south of Judah. Allotted first to Judah, afterwards to Simeon (Josh. xv:42; xix:7). In the time of Eusebius it was quite a large town, placed by him near Malatha, in the interior of Daroma, that is below Hebron, east of Beersheba. It is called Tochen in 1 Chron. iv:32. The best suggestion as to its site is the ruined village of 'Atr, about a mile northwest by north of Beit Jibrin.

ETHIOPIA (ĕ'thi-ō'pi-à), (Heb. כּוּשׁ, *koosh*, country of burnt faces, Judith i:10), is the name by which the English and most other versions render the Hebrew CUSH.

1. **Name.** As used among the Greeks and Romans, the word was employed in all the latitude of its etymological meaning, to denote any of the countries where the people are of a sable, sun-burnt complexion—*Αἰθιοψία* (Acts viii:27), *Ἀιθιοπίσσα* (Num. xii:1), *Αἰθιοπες* (2 Chron. xiv:12), from *αἶθωμαι*, to burn, and *ὄψ*, the face. But its use in the language of Scripture is much more restricted, and while it may sometimes include part of Southern Arabia, it for the most part exclusively designates the 'Ethiopia of Africa.' (See CUSH.)

2. **Locality.** By Ethiopia, or African Cush, in the widest acceptance of the name, the Hebrews understood the whole of the region lying south of

Egypt above Syene, the modern Assouan (Ezek. xxix:10; xxx:5). Its limits on the west and south were undefined, but they probably regarded it as extending eastward as far as the Red Sea, if not as including some of the islands in that sea, such as the famous Topaz Isle (Job xxviii:19). It thus corresponded, though only in a vague and general sense, to the countries known to us as Nubia and Abyssinia, so famous for the Nile and other great rivers. Hence the allusions in Scripture (Is. xviii:1; Zeph. iii:10) to the far distant 'rivers of Ethiopia,' a country which is also spoken of (Is. xviii:2) in our version as the land 'which the rivers have spoiled,' there being a supposed reference to the ravages committed by inundations (Bruce's *Travels*, iii, p. 158, and Taylor's *Calmet*, iii, pp. 593-4); but recent translators prefer to render the Hebrew 'divide,' as if he should say, 'a land intersected by streams.'

But that part of the vast region of Cush which seems chiefly intended in the passages of Scripture is the tract of country in Upper Nubia which became famous in antiquity as the *kingdom of Ethiopia*, or the state of Meroë. Its surface exceeded that of Sicily more than a half, and it corresponded pretty nearly to the present province of Atbara, between 13 and 18 degrees N. latitude. In modern times it formed a great part of the kingdom of Sennaar, and the southern portion belongs to Abyssinia. Upon the island of Meroë lay a city of the same name, the metropolis of the kingdom, the site of which has been discovered near a place called Assur, about twenty miles north of the town of Shendy, under 17 degrees N. latitude. The splendid ruins of temples, pyramids and other edifices found here and throughout the district attest the high degree of civilization and art among the ancient Ethiopians.

3. **Seba.** Josephus, in his account of the expedition of Moses when commander of the Egyptian army against the Ethiopians, says that the latter 'at length retired to Saba, a royal city of Ethiopia which Cambyses afterward called Meroë, after the name of his own sister.' The opinion of Josephus that Meroë was identical with Seba accords well with the statement in Gen. x. Seba was the eldest son of Cush. He is not to be confounded with either of the Shebas who are mentioned as descendants of Shem (Gen. x:28; xxv:3). Now this country of African Seba is classed with the Arabian Sheba as a rich but far-distant land (Ps. lxxii:10). In Is. xliii:3 God says to Israel, 'I have given Egypt for thy ransom, Cush and Sheba in thy stead,' and in Is. xlv:14, 'The wealth of Egypt and the merchandise of Cush and of the Sebam men of stature shall pass over to thee and shall be thine.' In common with the other Cushite tribes of Africa, the Ethiopian's skin was black, to which there is an obvious allusion in Jer. xliii:23: 'Can the Cushite change his skin?'

4. **Inhabitants.** Among the aboriginal inhabitants of Ethiopia the first place is due to the Nubians. Next comes the territory of the Berbers, strictly so called, who, though speaking Arabic, evidently belong to the Nubian race. Above these regions beyond the Tacazzé and along the Nile the great mass of the inhabitants, though sometimes with a mixture of other blood, may be regarded as of Arab origin. But between the valley of the Nile and the Red Sea there is still, as of old, a variety of scattered aboriginal tribes, among whom the Arabic is much less common. Some of them spread themselves over the plains of the Astaboras, or Tacazzé, being compelled to remove

their encampments, sometimes by the inundations of the river, at other times by the attacks of the dreaded *zimb*, or gadfly, described by Bruce, and which he supposes to be the 'fly which is in the utmost part of the rivers of Egypt' (Is. vii:18). Another remarkable Ethiopic race in ancient times was the *Macrobians*, so called from their supposed longevity. They were represented by the ambassadors of Cambyses as a very tall race, who elected the highest in stature as king; gold was so abundant that they bound their prisoners with golden fetters—circumstances which again remind us of Isaiah's description of Ethiopia and Seba in chap. xlv:14.

5. History. The government was in the hands of a race or caste of priests, who chose from among themselves a king; and this form continued down to the reign in Egypt of the second Ptolemy, when Ergamenes, at that time king, massacred the priests in their sanctuary, and became absolute monarch.

Of the history of Ethiopia, previous to that last revolution, only scanty information has been preserved, but it is enough to evince its high antiquity and its early aggrandizement.

(1) An Independent State. In the Persian period it was certainly an independent and important state, which Cambyses in vain endeavored to subdue. But its most flourishing era was between the years B. C. 800 and 700, when arose three potent kings, Sabaco, Sevechus, and Tarihako, or Tirhakah, who extended their conquests over a great part of Egypt. Sevechus is supposed to have been the So or Sua king of Egypt, to whom an embassy was sent by Hoshea, king of Israel (2 Kings xvii:4), whose reign ended B. C. 722. He was thus the contemporary of Salmanassar or Shalmaneser IV, king of Assyria, as was Tirhakah of the next Assyrian monarch, Sennacherib, who (about the year B. C. 714) was deterred from the invasion of Egypt merely by the rumor that Tirhakah was advancing against him (2 Kings xix:9). There seems no reason to doubt that the remarkable prophecy in the eighteenth chapter of Isaiah was addressed to Tirhakah and his people to announce to them the sudden overthrow of the Assyrian host before Jerusalem. In verse 7 it is intimated that, struck at the mighty deeds of the God of Judah, this distant people should send gifts to his dwelling-place at Zion. They were, no doubt, among the 'many' who are described in 2 Chron. xxxii:23, as having 'brought gifts unto Jehovah at Jerusalem, and presents to king Hezekiah, so that he was magnified in the sight of all the nations.' The expectation of the entire conversion of the Ethiopians is frequently expressed by the Hebrew prophets (Zeph. iii:10; Ps. lxxviii:32; lxxxvii:4) and those who take pleasure in tracing the fulfillment of such predictions in subsequent history may find it in Acts viii:27 (the conversion both to Judaism and Christianity of the treasurer of Queen Candace).

(2) Egypt and Ethiopia. Isaiah often mentions Egypt and Ethiopia in so close political relation (see especially chap. xx:3-6). The same fact is noticeable in the latter prophets, and proves the continuance of a friendly understanding (Ezek. xxx:4, *sq.*; Jer. xlvi:9; Nahum iii:9; Dan. xi:43). In fine, Ethiopia is employed chiefly as the name of the national and royal family that were now in the ascendancy.

If we go back about two centuries, to the reign of Asa, king of Judah (B. C. about 950), we read of Zerah, or rather Zerach, an Ethiopian going out against him with a host of a thousand thousand men and three hundred chariots (2 Chron. xiv:9).

It is doubtful whether this was an Ethiopian monarch or commander, or only a mere Cushite adventurer; but that his army was mainly of African and not Arabian origin is evident from the fact of its having included Libyans as well as Cushites (2 Chron. xvi:8), and from the mention of war-chariots, which never were in use in Arabia.

There is every reason to conclude that the separate colonies of the priest-caste spread from Meroë into Egypt; and the primeval monuments in Ethiopia strongly confirm the native traditions reported by Diodorus Siculus, that the worship of Anmon and Osiris originated in Meroë, and thus render highly probable the opinion that commerce and civilization, science and art, descended into Egypt from Nubia and the upper regions of the Nile. In proportion as we ascend into the primeval ages, the closer seems the connection between Egypt and Ethiopia. The Hebrew poets seldom mention the former without the latter; the inhabitants of both are drawn as commercial nations. When Isaiah celebrates the victories of Cyrus their submission is spoken of as his most magnificent reward (Is. xlv:14). When Jeremiah extols the great victory of Nebuchadnezzar over Pharaoh-nechoh, near Carchemish, the Ethiopians are allied to the Egyptians (Jer. xlvi:9). When Ezekiel threatens the downfall of Egypt he unites it with the distant Ethiopia (Ezek. xxx:4). Every page, indeed, of Egyptian history exhibits proofs of the close intimacy in which they stood.

(3) Queen Candace, who is mentioned in Acts viii:27, was doubtless the reigning sovereign of Meroë (see CANDACE), where it is likely a form of Judaism was at that period professed by a portion of the inhabitants, as seems to have been the case in the adjacent region of Abyssinia. The prophets (*e. g.* Is. xi:11) sometimes allude to the Jews who were scattered throughout Cush. Ebed-melech, the benevolent eunuch of King Zedekiah, who showed such kindness to the prophet Jeremiah, was an Ethiopian (Jer. xxxviii:7; comp. Acts viii:27). Josephus calls the Queen of Sheba, who visited Solomon, a queen of Egypt and Ethiopia, and with this agrees the tradition of the Abyssinians, who claim her as a native queen, give her the name of Maqueda, and maintain that she had a son by Solomon, called Menilek, who bore the title of David I. Yet Sheba was undoubtedly in Arabia Felix, though it is possible that, in remote antiquities, the sovereignty of its monarchs extended across the Red Sea to the coast of Ethiopia.

N. M.

ETHIOPIAN (ē'thi-ō'pi-an), the designation of Zerah (2 Chron. xiv:9), and Ebed-melech (Jer. xxxviii:7, 10, 12; xxxix:16).

ETHIOPIAN EUNUCH (ū'nūk), baptized by Philip on the way between Jerusalem and Gaza (Acts viii:26 ff.).

His office of chamberlain under Candace was one of high rank. Tradition has it that this man, whose name was said to be Indich, first preached the gospel in Ethiopia.

ETHIOPIANS (ē'thi-ō'pi-ans), (Heb. כּוּשׁ, *koosh*; כּוּשִׁי, *koosh-ee'*, properly "Cush" or "Ethiopia" in two passages, Is. xx:4; Jer. xlvi:9). Elsewhere "Cushites," or inhabitants of Ethiopia (2 Chron. xii:3, xiv:12; xvi:8; xxi:16; Dan. xi:43; Amos ix:7; Zeph. ii:12; Acts viii:27). (See ETHIOPIA).

ETHIOPIAN WOMAN, the designation of Moses' wife Zipporah (Num. xii:1). As Zipporah is elsewhere termed a Midianite, the allusion may be to a later wife.

ETHIOPIC LANGUAGE. The ancient Ethiopic or Geez, which is the only one of the three

dialects which either has been, or is now, generally used in written documents of a sacred or civil kind, is to be classed as an ancient branch of the Arabic. This affinity is evident from the entire grammatical structure of the language; it is confirmed by the relation of its written character to that of the Himyarite alphabet, and either supports or is supported by the assumption that Habesh was actually peopled by a colony from Southern Arabia. The grammatical structure of the Geez shows a largely predominant identity with that of Arabic, but it also possesses some traits which are in closer accordance with the other Syro-Arabian idioms and some which are peculiar to itself alone. (Habesh is Abyssinia.)

The literature of the Geez language is very scanty indeed, and that little is almost exclusively of a Biblical or ecclesiastical character. The Geez has ceased ever since the beginning of the fourteenth century to be the vernacular language of any part of the country, having been supplanted at the court of the sovereign by the Amharic. It still continues, however, to be the language used in religious rites, in domestic affairs of state and in private correspondence. J. N.

ETHIOPIC VERSION. This version of the Old Testament was made from the Greek of the Septuagint, according to the Alexandrian recension, as is evinced, among other things, by the arrangement of the Biblical books and by the admission of the Apocrypha without distinction. It is divided into four parts: *The Law*, or the Octateuch, containing the Pentateuch and the books of Joshua, Judges and Ruth; *The Kings*, in thirteen books, consisting of two books of Samuel, two of Kings, two of Chronicles, two of Ezra (Ezra and Nehemiah), Tobit, Judith, Esther, Job, the Psalms; *Solomon*, in five books, consisting of Proverbs, Ecclesiastes, Canticles, Wisdom and Sirach; *Prophets*, in eighteen books, consisting of Isaiah, Jeremiah's prophecy and Lamentations, Baruch, Ezekiel, Daniel and the twelve minor prophets; lastly they have also two books of the Maccabees. Besides this they possess an apocryphal book of Enoch, which they place next to that of Job. The critical uses of this version are almost exclusively confined to the evidence it gives as to the text of the Septuagint. The version of the New Testament was made direct from the Greek original. It is impossible to ascertain the date of the execution of either of these translations, but they may both be ascribed with much probability to the beginning of the fourth century. J. N.

ETHNAN (ěth'nan), (Heb. אֶתְנָן, *eth-nawn'*, a gift), son of Ashur and Helah, descendant of Judah (1 Chron. iv:7), B. C. after 1618.

ETHNARCH (ěth'närk), (2 Cor. xi:32), Greek word for governor.

ETHNI (ěth'nī), (Heb. אֶתְנִי, *eth-nee'*, munificent), a Gershonite Levite, forefather of Asaph the singer (1 Chron. vi:41), B. C. about 1420.

ETHUN (ěth'un), (Heb. אֶתּוּן, *ay-toon'*, from an unused root probably meaning to bind, probably twisted yarn, i. e., tapestry).

The word occurs in Prov. vii:16, in connection with Egypt, and as a product of that country. It is translated *fine linen* in the Authorized Version. As Egypt was from very early times celebrated for its cultivation of flax and manufacture of linen, there can be little doubt that *ethun* is correctly rendered, though some have thought that it may signify rope or string of Egypt. Hesychius states, no doubt correctly,

'that *óthvny*, *oth-o'nay*, was applied by the Greeks to any fine and thin cloth, though not of linen.' Mr. Yates further adduces from ancient Scholia that *óthvny* were made both of flax and of wool.

In the New Testament the word *óthvnyon*, of *linen*, occurs in John xix:40: 'Then took they the body of Jesus and wound it in *linen clothes*,' *othonccois*; in the parallel passage (Matt. xxvii:59) the term used is *σινδών*, *sin-don'ee*, *cambric* or *muslin*, as also in Mark xv:46 and in Luke xxiii:53. We meet with it again in John xx:5, 'and he stooping down saw the *linen clothes lying*.' It is generally used in the plural to denote 'linen bandages.' *Otho'nay*, *linen*, occurs in Acts x:11, 'and (Peter) saw heaven opened and a certain vessel descending unto him, as it had been a great *sheet* knit at the four corners, and let down to the earth,' and also in xi:5, where this passage is repeated.

From the preceding observations it is evident that *otho'necon* may signify cloth made either of *linen* or *cotton*, but most probably the former, as it was more common than cotton in Syria and Egypt. (See COTTON and LINEN.) J. F. R.

ETZ-ABOTH (etz'ä-böth), (Heb. עֵץ אָבוֹת, *aytz-awboth'*), occurs in Lev. xxiii:40, and Neh. viii:15, and in both passages is mentioned along with *etz-shemen*.

These words occur also in Ezek. xx:28, where, as well as in the other passages, they are translated *thick trees*: 'For when I had brought them into the land, etc., then they saw every high hill and all the *thick trees* (*etz-aboth*), and they offered there their sacrifices. The word *etz* or *otz*, used in several places in Scripture to designate a tree, is said to be derived from the verb *otze*, 'to fix,' 'to make steady.' The word *aboth*, according to Celsius (*Hierobot.* i, p. 322), is by the Rabbins, as well as in the Chaldee and Syriac versions, understood to mean the *myrtle*.

In the above passages it is more than probable that *etz-aboth* has a general and not a specific signification. There is no proof of the myrtle being intended; in fact, it is not likely to have been found in any part of the wilderness, and no better material can be required for the construction of booths than the boughs of thick or shady trees. J. F. R.

ETZ-HADAR (ětz-hä'dar), (Heb. עֵץ הָדָר, *ates-haw-dawr'*), occurs only once in Scripture, in Lev. xxiii:40, where the Israelites are directed, in remembrance of their dwelling in tents or booths when they were brought out of the land of Egypt, to leave their homes and dwell in booths for a season every year. 'And ye shall take you on the first day the *boughs of goodly trees* (*peri etz-hadar*),' etc. Various translations have been made of the word, such as the olive and citron, but it is probable, as maintained by the majority of commentators, that the term is general, rather than specific, and therefore that the fruit or branches of any goodly tree might be thus employed.

ETZ-SHEMEN (ětz-shē-men), (Heb. עֵץ שֶׁמֶן, *ates-sheh-men'*), occurs three times in Scripture, and is differently translated in all the three passages in the Authorized Version.

At the rebuilding of the temple, Nehemiah (viii:15) directs the Israelites to 'go forth unto the mount and fetch *olive* and *pine branches* (*etz-shemen*).

This term occurs also in Is. xli:19: 'I will plant in the wilderness the cedar, the shittah-tree, and the myrtle, and the *etz-shemen* (here translated 'oil tree'). The third mention of *etz-shemen* is in 1 Kings vi:23, where its wood is

described as being employed: 'And within the oracle he made two cherubim of *etz-shemen* (translated *olive-tree*), each two cubits high.' If we collate the several passages in which *etz-shemen* occurs, we shall find reason to conclude that it is not the olive tree, as it is translated in 1 Kings vi:23, since in Neh. viii:15, the olive tree (*sait*) is distinguished from *etz-shemen*, which is there rendered *pine tree*; and that it is as little likely to be the pine tree, since in Is. xli:19 *etz-shemen*, translated *oil-tree*, is mentioned as distinct from both the fir and the pine. As no tree has yet been pointed out having a name similar either in meaning or sound to the Hebrew, and with wood of a good quality, it is better to consider *etz-shemen* as one of those not yet ascertained, than to add one more to the other unsatisfactory guesses.

J. F. R.

EUBULUS (eū-bū'lus), (Gr. Εὐβουλος, *yoo'boo-los*, good in counsel).

One of those at Rome, mentioned by Paul as a Christian (2 Tim. iv:21), A. D. 64.

EUCCHARIST (ū'kā-rīst), (Gr. εὐχαριστία, giving of thanks), the sacrament of the Lord's Supper.

The word in its original Greek (*eucharistia*) properly signifies *giving thanks*; from the hymns and thanksgivings which accompanied that holy service in the primitive church. (See LORD'S SUPPER.)

EUERGETES (eū-ēr'ge-tēz), (Gr. Εὐεργέτης, *yoo-er-get'ace*, benefactor).

A title of honor, conferred at Athens by public vote, and so notorious as to pass into a proverb Luke xxii:25). Especially, title of Ptolemy III of Egypt.

EUNICE (ū-nī'sē or ū'nīs), (Gr. Εὐνίκη, *yoo-nee'-kay*, good victory).

The mother of Timotheus (2 Tim. i:5). Her Christianity is also mentioned (Acts xvi:1), and even her mother, Lois, lived in the faith of the expected Messiah, if she did not live to know that he had come in the person of Jesus of Nazareth (A. D. ante 47). (See TIMOTHY.)

EUNUCH (ū'nūk), (Heb. סַוּרְעָה, *saw-reece'*; Gr. εὐνοῦχος, *yoo-noo'khos*).

This word, which we have adopted from the Greek, has, in its literal sense, the harmless meaning of 'bed keeper,' i. e., one who has the charge of beds and bedchambers; but as only persons deprived of their virility have, from the most ancient times, been employed in Oriental harems, and as such persons are employed almost exclusively in this kind of service, the word 'bed keeper' became synonymous with 'castratus.' It fact there are few Eastern languages in which the condition of those persons is more directly expressed than by the name of some post or station in which they are usually found. The admission to the recesses of the harem, which is in fact the domestic establishment of the prince gives the eunuchs such peculiar advantages of access to the royal ear and person as often enables them to exercise an important influence and to rise to stations of great trust and power in Eastern courts. Hence it would seem that in Egypt, for instance, the word which indicated an eunuch was applied to any court officer, whether a castratus or not. The word which describes Joseph's master as 'an officer of Pharaoh' (Gen. xxxvii:36; xxxix:1) is *saris*, which is used in the Hebrew to denote an eunuch and in these places is rendered 'prince' in the Targum, and εὐνοῦχος, 'eunuch,' in the Septuagint.

Authority would be superfluous in proof of a matter of such common knowledge as the em-

ployment of eunuchs, and especially of black eunuchs in the courts and harems of the ancient and modern East. A noble law which, however, evinces the prevalence of the custom prior to Moses, made castration illegal among the Jews (Lev. xxi:20; Deut. xxiii:1). But the Hebrew princes did not choose to understand this law as interdicting the use of those who had been made eunuchs by others; for that they had them, and that they were sometimes, if not generally, blacks, and that the chief of them was regarded as holding an important and influential post, appears from 1 Kings xxii:9; 2 Kings viii:6; ix:32, 33; xx:18; xxiii:11; Jer. xxxviii:7; xxxix:16; xli:16. Samuel was aware that eunuchs would not fail to be employed in a regal court, for he thus forewarns the people: 'He (the king) will take the tenth of your seed and of your vineyard and give to his eunuchs (A. V., 'officers') and to his servants' (1 Sam. viii:15).

Figurative In Matt. xix:12 the term 'eunuch' is applied figuratively to persons naturally impotent. In the same verse mention is also made of persons 'who have made themselves eunuchs for the kingdom of heaven's sake;' which is a manifestly hyperbolic description of such as lived in voluntary abstinence (Comp. Matt. v:29, 30).

EUODIA (eū-ō'di-ā), the correct form of EUODIAS (which see).

EUODIAS (eū-ō'di-as), (Gr. Εὐωδίας, *yoo-od-ee'as*, fragrant. The English form is properly Euodia, which is the nominative case of Εὐωδίας), a female member of the church at Philippi, A. D. 57, who seems to have been at variance with another female member named Syntyche.

Paul describes them as women who had 'labored much with him in the gospel,' and implores them to be of one mind (Philip. iv:2, 3).

EUPHRATES (eū-phrā'tēz), Heb. פְּרָת, *per-awth'*, to break forth; Gr. Εὐφράτης, *yoo-frat'ace*), termed in Deut. i:7, 'the great river,' where it is mentioned as the eastern boundary of the land which (verse 8) God gave to the descendants of Abraham. In Gen. ii:14 the Euphrates (*Perath*), is stated to be the fourth of the rivers which flowed from a common stream in the garden of Eden. Its modern name is Phrat.

Divines and geographers have taken much trouble in order to learn the position of Eden from the geographical particulars given in the Bible, without remembering that probably nothing more than a popular description was intended.

In consequence of its magnitude and importance, the Euphrates was designated and known as 'the river,' being by far the most considerable stream in Western Asia. Thus in Exod. xxiii:31 we read, 'from the desert unto the river' (Comp. Is. viii:7).

(1) **Sources.** It has two sources and two arms—a western and an eastern—which rise in the mountains of Armenia. Of these streams, the western is the shorter, and is called Kara Sou, or Melas; the eastern is itself made up of several streams, the longest of which bears the name of Murad, or Phrat. The two arms unite about three days' journey from Erzeroom, near which rise two of the tributaries that concur in forming the Phrat. Thus uniting, they give rise to the Euphrates strictly so called, which, flowing to the south, divides Armenia from Cappadocia; but, being driven westward by the Anti-Taurus and Taurus Mountains, it works its circuitous way through narrow passes and over cataracts, until, breaking through a defile formed by the eastern

extremity of Mons Amanus (Alma Dagh), and the northwestern extremity of Mons Taurus, it reaches the plain country not far from Samosata (Schemisat), then winds south and southeast, passing the north of Syria and the northeast of Arabia Deserta, and at length, after many windings, unites with the Tigris, and thus united finds its termination in the Persian Gulf. In conjunction with the Tigris it forms the rich alluvial lands of Mesopotamia, over which it flows or is carried by canals, and thus diffuses abroad fertility and beauty. At Bagdad and Hillah (Babylon), the Euphrates and Tigris approach comparatively near to each other, but separate again, forming a kind of ample basin, till they finally become one at Koorma. Under the Cæsars the Euphrates was the eastern boundary of the Roman empire, as under David it was the natural limit of the Hebrew monarchy.

(2) **Size.** Although occasionally much more, the breadth of the Euphrates varies between 200 and 400 yards; but for a distance of sixty miles through the Lemlun marshes the main stream narrows to about 80 yards. The general depth of the Upper Euphrates exceeds eight feet. In point of current it is for the most part a sluggish stream, for, except in the height of the flooded season, when it approaches five miles an hour, it varies from two and a quarter to three and a half, with a much larger portion of its course under three than above. But it is shallow enough in some places for loaded camels to pass in autumn, the water rising to about four and a half feet.

The length of the entire stream is about 1,780 miles. Of this distance, 1,200 miles is navigable for boats. It is very abundant in fish. The water is somewhat turbid, but, when purified, is pleasant and salubrious. The Arabians set a high value on it, and name it Morad Sou—that is water of desire, or longing.

The river begins to rise in March, and continues rising till the latter end of May. The consequent increase of its volume and rapidity is attributable to the early rains, which, falling in the Armenian Mountains, swell its mountain tributaries, and also in the main to the melting of the winter snows in these lofty regions. About the middle of November the Euphrates has reached its lowest ebb, and, ceasing to decrease, becomes tranquil and sluggish.

The Euphrates is, on many accounts, an object of more than ordinary interest. 'The great river' is linked with the earliest times and some of the most signal events in the history of the world. Appearing among the few notices we have of the first condition of the earth and of humankind, it continues, through the whole range of Scripture history down to the present hour, an object of curiosity, interest, wonder, hope or triumph.

In ancient, as well as in modern times, the Euphrates was used for navigation. Herodotus states that boats—either coracles or rafts, floated by inflated skins—brought the produce of Armenia down to Babylon. The trade thus carried on was considerable.

Figurative. The prophets made use of the Euphrates as a figurative description of the Assyrian power, as the Nile with them represented the power of Egypt; thus in Is. viii:7: 'The Lord bringeth up upon them the waters of the river, strong and many, even the king of Assyria' (Jer. ii:18). (Rawlinson's *Herodotus*, vol. 1, essay ix).
J. R. B.

EUPOLEMUS (eū-pōl'e-mūs) (Gr. Εὐπόλεμος, *yoo-pol'ee-mos*, good in war), the "son of John, the son

of Accos," one of the envoys sent to Rome by Judas Maccabæus, cir. B. C. 161 (1 Macc. viii:17; 2 Macc. iv:11; Joseph: *Ant.* xii:10, sec. 6).

EUROCLYDON (ū-rok'li-dōn). See WINDS.

EUTYCHUS (eū'ti-kūs), (Gr. Εὐτυχος, *yoo'tookhos*, fortunate).

A young man of Troas, who sat in the open window of the third floor while St. Paul was preaching late in the night, and who, being overcome by sleep, fell out into the court below (A. D. 55). He was 'taken up dead,' but the Apostle, going down, extended himself upon the body and embraced it, like the prophets of old (1 Kings xvii:21; 2 Kings iv:34); and when he felt the signs of returning life, restored him to his friends with the assurance that 'his life was in him.' Before Paul departed in the morning the youth was brought to him alive and well. It is disputed whether Eutychus was really dead or only in a swoon, and hence, whether a miracle was performed or not. It is admitted that the circumstances and the words of Paul himself sanction the notion that the young man was not actually dead, but, on the other hand, it is contended that the words of the narrator, 'taken up dead,' are too plain to justify us in receiving them in the modified sense of 'taken up for dead,' which that interpretation requires (Acts xx:5-12).

EVANGELISTS (ē-vān'jēl-ists), (Gr. εὐαγγελιστής, *yoo'ang-ghel-is-tace'*, a messenger of good news).

This term is applied in the New Testament to a certain class of Christian teachers who were not fixed to any particular spot, but traveled either independently or under the direction of one or other of the Apostles, for the purpose of propagating the Gospel. Philip, one of the seven deacons, is termed *the Evangelist* (Acts xxi:8). St. Paul exhorts Timothy 'to do the work of an *Evangelist*' (2 Tim. iv:5), and though this name is not given to Titus, the injunctions addressed to him, and the services he rendered, are so similar as to render the propriety of applying it to him unquestionable. In the Epistle to the Ephesians (iv:11) the *Evangelists* are expressly distinguished from the *pastors and teachers*. The chief points of difference appear to be that the former were itinerant, the latter stationary; the former were employed in introducing the Gospel where it was before unknown; the business of the latter was to confirm and instruct the converts steadily and permanently. (Campbell's *Lectures on Ecclesiastical History*, vol. i. pp. 148-150. J. F. R.)

EVANGELICAL ASSOCIATION. See article on page 1756.

EVE (ēve), (Heb. חַוָּה, *khav-vav'*, life giver), the name given by Adam to the first woman, his wife (Gen. iii:20).

EVENING (ē'v'n-īng). See DAY.

EVI (ē'vī), (Heb. עֵוִי, *ev-ee'*, desire), one of the five princes of Midian slain by the Israelites. His lands were allotted to Reuben (Num. xxxi:8; Josh. xiii:21), B. C. 1452.

EVIDENCE (ēv'ī-dens), (Heb. סִפְרָה, *sif-rav'*, Jer. xxxii:10 ff.), a "bill of sale," a register, document, deed, written paper).

In general it is that perception of truth which arises either from the testimony of the senses or from an induction of reason. The evidences of revelation are divided into internal and external. That is called *internal* evidence which is drawn from the consideration of those declarations and doctrines which are contained in it; and that is called *external* which arises from some other cir-

cumstances referring to it, such as predictions concerning it, miracles wrought by those who teach it, its success in the world, etc. (1) Moral evidence is that which, though it does not exclude a mere abstract possibility of things being otherwise, yet shuts out every reasonable ground of suspecting that they are so. (2) Evidences of grace are those dispositions and acts which prove a person to be in a converted state, such as an enlightened understanding, love to God and his people, a delight in God's word, worship and dependence on him, spirituality of mind, devotedness of life to the service of God, etc.

EVIL (ē'v'l), is the comprehensive term under which are included all disturbances of the divinely appointed harmony of the universe. Christian doctrine, in accordance with the Scriptures, carefully distinguishes between physical and moral evil.

(1) **Physical Evil.** Physical or natural evil is whatever destroys or any way disturbs the perfection of natural beings, such as blindness, diseases, death, etc.

(2) **Moral Evil.** Moral evil is the disagreement between the actions of a moral agent, and the rule of those actions, whatever it be. Applied to choice, or acting contrary to the moral or revealed laws of the Deity, it is termed *wickedness*, or *sin*. Applied to an act contrary to a mere rule of fitness, it is called a *fault*.

(3) **Origin of Evil.** Dr. Samuel Clarke, in his "*Demonstration of the Being and Attributes of God*," deduces from the possibility and real existence of human liberty an answer to the question, What is the cause and origin of evil? For liberty, he says, implying a natural power of doing evil, as well as good, and the imperfect nature of finite beings making it possible for them to abuse this their liberty to an actual commission of evil, and it being necessary to the order and beauty of the whole, and for displaying the infinite wisdom of the Creator, that there should be different and various degrees of creatures, whereof, consequently, some must be less perfect than others, hence there necessarily arises a possibility of evil, notwithstanding that the Creator is infinitely good. In short, thus: all that we call evil is: An evil of imperfection, as the want of certain faculties and excellencies which other creatures have; natural evil, as pain, death and the like; or moral evil, as all kinds of vice.

(1) The first of these is not properly an evil, for every power, faculty or perfection which any creature enjoys, being the free gift of God, which he was no more obliged to bestow than he was to confer being or existence itself, it is plain the want of any certain faculty or perfection in any kind of creatures which never belonged to their nature, is no more an evil to them than their never having been created or brought into being at all could properly have been called an evil.

(2) The second kind of evil, which we call natural evil, is either a necessary consequence of the former—as death to a creature on whose nature immortality was never conferred, and then it is no more properly an evil than the former—or else it is counterpoised, in the whole, with as great or greater good, as the afflictions and sufferings of good men, and then also it is not properly an evil; or else, lastly, it is a punishment; and then it is a necessary consequent of the third and last sort of evil, namely, moral evil.

(3) This arises wholly from the abuse of liberty, which God gave to his creatures for other purposes, and which it was reasonable and fit to give them for the perfection and order of the

whole creation; only they, contrary to God's intention and command, have abused what was necessary for the perfection of the whole, to the corruption and depravation of themselves. And thus all sorts of evils have entered into the world, without any diminution to the infinite goodness of its Creator and Governor.

This is obviously all the answer which the question respecting the origin of evil is capable of receiving. It brings us to the point to which the Scriptures themselves lead us. And though many questions may yet be asked respecting a subject so mysterious as the permission of evil by the Supreme Being, this is a part of his *counsels* of which we can have no cognizance, unless he is pleased to reveal them; and as revelation is silent upon this subject, except generally, that all his acts, his permissive ones as well as others, are "wise and just and good," we may rest assured that, beyond what is revealed, human wisdom in the present state can never penetrate. (See **SIN**.)

EVILDOER (ē'v'l-dōō'ēr), one who is wicked, from the Heb. עָוֵר, *ra'w-ah'*, to break, and so to render of no account or worthless (Ps. xxxvii:1; Is. i:4, etc.). The Greek word (κακοποιός, *kakopoy-os'*) is the same as the English "Doer of evil" (1 Pet. ii:12, 14; iii:16; iv:15).

EVIL-FAVOREDNESS (ē'v'l fā'vēr-d-nēs), scurvy, etc., the general term for such blemish, wound, or imperfection, as rendered an animal unfit for sacrifice (Deut. xvii:1; comp. Lev. xxii:22-24).

EVIL-MERODACH (ē'vil-me-rō'dak), (Heb. אֵיל מֶרֶדַךְ, *ev-eel'-mer-o-dak'*), son and successor of Nebuchadnezzar, king of Babylon, who, on his accession to the throne (B. C. 562), released the captive king of Judah, Jehoiachin, from prison, treated him with kindness and distinction, and set his throne above the thrones of the other conquered kings who were detained at Babylon (2 Kings xxv:27; Jer. lli:31-34). (See **CHALDÆANS**.)

A Jewish tradition (noticed by Jerome on Is. xiv:29) ascribes this kindness to a personal friendship which Evil-merodach had contracted with the Jewish king when he was himself consigned to prison by Nebuchadnezzar, who, on recovering from his seven years' monomania, took offense at some part of the conduct of his son, by whom the government had in the meantime been administered. This story was probably invented to account for the fact.

The cuneiform equivalent of his name is *Amēl* (*Avēl*)-*Maruduk* (cf. Haupt in *Zeitsch. f. Assyriol.* ii:266 and 284 f.), 'man (servant) of Merodach.' According to Berosus he administered the kingdom during his two years' reign (562-560) with indiscretion and wanton unrestraint. Tiele (*Bab. Assyriol. Ges.* pp. 457, 464) concludes, on the basis of this character of Evil-merodach, that the benevolent act toward Jehoiachin should be attributed to his successor on the throne of Babylon. We possess as yet none of his annals, though several contract tablets date from his reign. In the year 560 his brother-in-law, Neriglissar (*Nergal-sar-usur*, 'Nergal preserve the king'), in a conspiracy, slew him and seized the throne. (Ira M. Price, *Hastings' Bib. Dict.*)

EWER (ū'ēr), or pitcher accompanying a wash-basin (John xiii:5).

EWES (ūz), the rendering in the A. V. of several Hebrew words for the female sheep. (See **SHEEP**.)

EXACTOR (ëgz-äkt'ër), (Heb. שגג, *naw-gas'*, to drive, tax, tyrannize, Is. lx:17), a word used to denote a *driver* (taskmaster, Exod. iii:7; Job iii:18; Is. ix:4).

EXACTRESS (ëgz-äkt'rës), (Is. xiv:4, marg.); Lat. *exactor*, collector of taxes. The city of Babylon as an exactress of gold.

EXALTATION OF CHRIST (ëgz'al-tä'shün), consisted in his rising again from the dead on the third day; in ascending up into heaven; in sitting at the right hand of God the Father, and in coming to judge the world at the last day. (See articles RESURRECTION; ASCENSION; INTERCESSION and WORLD, END OF THE.)

EXAMPLE (ëgz-äm'p'l).

(1) The rendering in the A. V. of several Greek words: (1) In Matt. i:19, *par-ad-igüe-mat-id'zo* (παράδειγμα, to show alongside the public), is to *expose* to infamy; (2) *Digh-mah* (δείγμα, Jude 7) and *hoop-od'igüe-mah* (ὑπόδειγμα, John xiii:15; Heb. iv:11, viii:5; ix:23; James v:10; 2 Pet. ii:6) mean a *specimen*, an *exhibit*, with the idea of imitation; (3) *Hoop-og-ram-mos'* (ὑπογραμμός, an *underwriting*, 1 Pet. ii:21) is a copy for imitation; (4) *Too-pos* (τύπος, *scar*, 1 Cor. x:16) is something struck, and so a *die*, *resemblance*. (Mc. & Str. *Bib. Cyc.*; Barnes' *Bib. Dict.*)

(2) Example in a moral sense is either taken for a type, instance, or precedent for our admonition, that we may be cautioned against the faults or crimes which others have committed, by the bad consequences which have ensued from them; or example is taken for a pattern for our imitation, or a model for us to copy after.

That *good examples* have a peculiar power above mere precepts to dispose us to the practice of virtue and holiness, may appear by considering: "(1) That they most clearly express to us the nature of our duties in their subjects and sensible effects. General precepts form abstract ideas of virtue, but in examples, virtues are most visible in all their circumstances. (2) Precepts instruct us in what things are our duty, but examples assure us that they are possible. (3) Examples, by secret and lively incentive, urge us to imitation. We are touched in another manner by the visible practice of good men, which reproaches our defects and obliges us to the same zeal, which laws, though wise and good, will not effect."

(3) The life of Jesus Christ forms the most beautiful example the Christian can imitate. Unlike all others, it was absolutely *perfect* and uniform, and every way accommodated to our present state. In him we behold all light without a shade, all beauty without a spot, all the purity of the law, and the excellency of the gospel. Here we see piety without superstition and morality without ostentation; humility without meanness, and fortitude without temerity; patience without apathy, and compassion without weakness; zeal without rashness, and beneficence without prodigality. The obligation we are under to imitate this example arises from duty, relationship, engagement, interest and gratitude. (See article JESUS CHRIST.)

EXCOMMUNICATION (ëks'kôm - mū'nī - kā'-shun), (Gr. ἀφορισμός, *aphorismos*).

The act of excommunicating, or rejecting, a cutting off, deprivation of communion or the privileges of fellowship or intercourse, specifically a penalty, or censure, whereby persons who are guilty of any notorious crime or offense are separated from the communion of the church and deprived of all spiritual advantages.

(1) **Jewish.** The Jewish excommunication was threefold, as designated by the Hebrew terms, נידוּי, *nid-doo'i*; קריאת, *khay'rem*; שמת-מתת, *sham-math-thaw'*. But the first and third are used synonymously in the Talmud, and only the distinction between two kinds has been handed down: the *temporary* exclusion (נידוּי) and the *permanent* ban (קריאת), the Anathema. (See ANATHEMA.) The first is intimated in John ix:32, the second in 1 Cor. v:5, and the third in 1 Cor. xvi:22.

(2) **Christian.** Excommunication is founded upon a natural right which all societies have of excluding out of their body such as violate the laws thereof, and it was originally instituted by our Lord (Matt. xviii; 1 Cor. v, etc.) for preserving the purity of the church. Christian excommunication is of three kinds: (1) The greater, by which the person offending is separated from the body of the faithful; thus Paul excommunicated the incestuous Corinthian (1 Cor. v:1-5). (2) The lesser, by which the sinner is forbidden the sacraments. (3) That which suspends him from the company of believers; which seems to be hinted at (2 Thess. iii:6).

(3) **Effect of Excommunication.** The principal effect of excommunication is to separate the excommunicated from the society of Christians, from the privilege of being present in religious assemblies, from the eucharist, from attendance at the prayers, the sacraments, and all those duties by which Christians are connected in one society and communion. An excommunicated person is, with regard to the church, as a heathen man and a publican (Matt. xviii:17).

EXECRATION (eks'ë-krā'shün). The Greek word so rendered, κατάρα, *kat-ah'rah*, curse, occurs in Num. xxiii:8; xxiv:9; Josh. vi:26; 1 Sam. xvii:43. It is used also in profane authors to denote the imprecations which it was customary among ancient nations to pronounce upon their enemies for the purpose of calling down the divine wrath, branding them with infamy, and exciting against them the passions of the multitude.

(1) **By Priests.** These imprecations were chiefly pronounced by priests, enchanters, or prophets (see BALAAM). The Athenians made use of them against Philip of Macedon. They convened an assembly, in which it was decreed that all statues, inscriptions, or festivals among them, in any way relating to him or his ancestors, should be destroyed, and every other possible reminiscence of him profaned; and that the priests, as often as they prayed for the success of the Athenian affairs, should pray for the ruin of Philip. It was also customary, both among the Greeks and Romans, after having destroyed cities in war, the revival of whose strength they dreaded, to pronounce execrations upon those who should rebuild them.

(2) **Against Rebuilding.** The Romans published a decree full of execrations against those who should rebuild Carthage (Zonaras, *Annal.*). An incident somewhat analogous is related (Josh. vi:26) after the taking of Jericho. From the words 'and Joshua adjured them at that time,' it is likely that he acted under a divine intimation that Jericho should continue in ruins, as a monument of the divine displeasure and a warning to posterity. The words 'cursed be the man (the individual) before the Lord that riseth up and buildeth this city Jericho,' although transformed into an execration by the word supplied by the translators, amount to no more than a *prediction*

that 'he shall lay the foundation thereof in his firstborn, and in his youngest son shall he set up the gates of it,' that is, he shall meet with so many impediments to his undertaking that he shall *outlive* all his children, *dying in the course of nature* before he shall complete it.

(3) **In the Psalms.** The execrations in Ps. lxxxiii, probably written on the occasion of the confederacy against Jehoshaphat, and other instances of a like nature, partake of the execrations of the heathens in nothing but form, being the inspired predictions or denunciations of divine vengeance against the avowed enemies of the God of Israel, notwithstanding the proofs they had witnessed of his supremacy; and the object of these imprecations, as in many other instances, is charitable, namely, their conversion to the true religion (verse 18; see also Ps. lix:12). J. F. D.

EXERCISE, BODILY (ěks'ěr-siz, bőd'ĩ-lŷ), (Gr. *σωματική γυμνασία*, *so-mat-ee-kay' goom-nas-ee'-ah*), physical training, gymnastics (1 Tim. iv:8).

The apostle seems to disparage, not the athletic discipline, but rather that ascetic mortification of the fleshly appetites and even innocent affections (comp. 1 Tim. iv:8; Col. ii:23) characteristic of some Jewish fanatics, especially the **ESSENES** (which see).

EXHORTATION (ěks'hör-tā'shŭn), (Gr. *παρακλήσις*, *par-ak'lay-sis*, literally a *calling near*, invitation and thus *entreaty*, 2 Cor. viii:4); *admonition* or hortatory public instruction (Luke iii:18; Acts xiii:15; 1 Tim. iv:13); also *consolation* or *comfort* (Rom. xv:4, etc.)

It has been defined as "the act of presenting such motives before a person as may excite him to the performance of duty." The Scriptures enjoin ministers to exhort men, i. e., to rouse them to duty by proposing suitable motives (Is. lviii:1; Rom. xii:8; 1 Tim. vi:2; Heb. iii:13); and it was also the constant practice of prophets (Is. i:17; Jer. iv:14; Ezek. xxxvii), apostles (Acts xi:23), and of Christ himself (Luke iii:18). (McC. and S., *Cyc.*)

EXILE (ěks'ıl), (Heb. *גָּלוּת*, *gaw-law'*, to *denude*, 2 Sam. xv:19; *תִּפְּסָה*, *tsaw-aw'*, to *tip* over in order to *spill*, figuratively to *depopulate*, Is. li:14), a *transported captive* or *captive exile*. (See **CAPTIVITY**.)

EXODUS, BOOK OF (ěks'ō-dŭs), (Gr. *Ἔξοδος*, *eks'o-dos*, in the Hebrew canon, the second book of Moses, so called from the principal event recorded in it, namely, *the departure* of the Israelites from Egypt.

With this book begins the proper history of that people, continuing it until their arrival at Sinai, and the erection of the sanctuary there. It transports us in the first instance to Egypt, and the quarter in which the Israelites were domiciled in that country. We do not find in the Pentateuch a real history of the people of Israel during that period. Such a history, in the more strict acceptation of the term, has no place in an historical sketch of the kingdom of God, where the mere description of the situation and condition of the people is all that is requisite. From that description we learn satisfactorily how the people of the Lord were negatively prepared for the great object which God had decreed with regard to them. This is the important theme of the history of the Pentateuch during the whole long period of four hundred years.

(1) **Life of Moses.** Exodus is very circumstantial in its account of the life of Moses, which, instead of partaking of the character of usual biography, manifests in all its details a decided

aim of evincing how, by the miraculous dispensation of the Lord, Moses had been even from his earliest years prepared and reared to become the chosen instrument of God. In this book is developed, with particular clearness, the summons of Moses to his sacred office, which concludes the first important section of his life (Exod. i-vi). No human choice and no self-will, but an immediate call from Jehovah alone, could decide in so important an affair. Jehovah reveals himself to him by his covenant name, *Yahveh*, and vouchsafes him the power to work miracles such as no man before him had ever wrought. It was not the natural disposition and bent of his mind that induced Moses to accept the office, but solely his submission to the express will of God, his obedience alone, that influenced him, the law-giver, to undertake the mission. The external relation of Moses to his people is also clearly defined (comp. *ex. gr.* Exod. vi:14, *sq.*) This furnishes the firm basis on which is founded his own as well as Aaron's personal authority, and the respect for his permanent regulations.

(2) **Deliverance from Bondage.** A new section (vii-xv) then gives a very detailed account of the manner in which the Lord glorified himself in Israel, and released the people from the land of bondage. This section of the history then concludes with a triumphal song, celebrating the victory of Israel. In ch. xvi-xviii, we find the introduction to the second principal part of this book, in which is sketched the manifestation of God in the midst of Israel, as well as the promulgation of the law itself, in its original and fundamental features. This preparatory section thus furnishes us with additional proof of the special care of God for his people; how he provided their food and water, and how he protected them from the assaults of their foes. In ch. xv:22, *sq.*, not all, but only the remarkable resting places are mentioned, where Jehovah took special care of his people.

(3) **Civil Regulations.** In the account (xviii) of the civil regulations framed by the advice of Jethro, a strong line of demarcation is drawn between the changeable institutions of man and the divine legislation which began then to be established, and which thenceforth claims by far the greatest part of the work. At the commencement of the legislation is a brief summary of the laws, with the Decalogue at their head (xix-xxiii). The Decalogue is the true fundamental law, bearing within itself the germ of the entire legislation. The other legal definitions are only further developments of the Decalogue. These definitions manifest the power and extent of the law itself, showing what an abundance of new regulations result from the simple and few words of the Decalogue.

(4) **Conclusion of Covenant.** Upon this basis the covenant is concluded with the Israelites, in which God reveals himself in agreement with the understanding and the exigencies of the people. Not until this covenant was completed did it become possible for the Israelites to enter into a communion with God, confirmed and consecrated by laws and offerings, and thereby to receive further revelations from him (ch. xxiv).

(5) **Dwelling of God in the Midst of Israel.** Whatsoever after this, in the twenty-fifth and in the following chapters, is communicated to the people, concerns the dwelling of God in the midst of Israel. By this dwelling of God among Israel it is intended to show, that the communion is permanent on the part of God, and that on the part of the people it is possible to persevere in communion with God.

(6) **Sanctuary and Sacred Symbols.** Consequently there follows the description of the sanctuary, the character of which is symbolical. The sacred symbols are, however, not so much expressed in formal declarations, as contained in the whole tenor of the descriptions. The symbolics begin with the central point, the holy of holies, which unites in itself the impeaching law and the redeeming symbol of divine mercy, and thus sets forth the reconciliation of God with the people. This is followed by the description of the sanctuary, representing those blessings which through the holy of holies were communicated to the subjects of the theocracy, and serving as a perpetual monument of Israel's exalted destiny, pointing at the same time to the means of attaining it. Last comes the description of the fore-court, symbolizing the participation of the people in those blessings, and their sanctified approach to the Lord. The description then proceeds from the sanctuary to the persons officiating in it, the priests, characterized both by their various costumes (xxviii), and the manner of their inauguration (xxix). Then follows, as a matter of course, the description of the service in that sanctuary and by those priests, but merely in its fundamental features, confining itself simply to the burnt and incense offerings, indicating by the former the preparatory inferior service, and by the latter the complete and higher office of the sacerdotal function. But, by contributing to the means of establishing public worship, the whole nation shares in it; and therefore the description of the officiating persons very properly concludes with the people (xxx).

(7) **Tabernacle and Furniture.** As a suitable sequel to the former follows the description of the use and nature of the implements requisite for the service of the priests, such as the brass laver for sacred ablutions, the preparation of the perfume and anointing oil (xxx:17-38). These regulations being made, men endowed with the Spirit of God were also to be appointed for making the sacred tabernacle and all its furniture (xxx:1-2). The description of the sanctuary, priesthood, and mode of worship, is next followed by that of the sacred times and periods (xxx:12, *sq.*) Of the sacred times there is here only appointed the Sabbath, in which the other regulations are contained as in their germ. God having delivered to Moses the tables of the law, the construction and arrangement of the tabernacle might thus at once have been begun, had its further progress not been interrupted by an act of idolatry on the part of the people, and their punishment for that offense, which form the subject of the narrative in ch. xxxii-xxxiv. Contrary and in opposition to all that had been done by Jehovah for and in the presence of Israel, the subjective formidable apostasy of the latter manifests itself in a most melancholy manner, as an ominously significant prophetic fact, which is incessantly repeated in the history of subsequent generations. The narrative of it is therefore closely connected with the foregoing accounts—Jehovah's mercy and gracious faithfulness on the one hand, and Israel's barefaced ingratitude on the other, being intimately connected. This connection forms the leading idea of the whole history of the theocracy. It is not till after the narrative of this momentous event that the account of the construction and completion of the tabernacle can proceed (xxxv-xi), which account becomes more circumstantial in proportion as the subject itself is of greater importance. Above all, it is faithfully shown that all was done according to the commands of Jehovah.

In the descriptive history of Exodus a fixed

plan, in conformity with the principles above stated, is consistently and visibly carried through the whole of the book, thus giving us the surest guarantee for the unity of both the book and its author.

(8) **Criticism.** (a) For neological criticism it was of the utmost importance to stamp this book as a later production, the miracles contained in its first part but too manifestly clashing with the principles in which that criticism takes its starting point. Its votaries therefore have endeavored to show that those miracles were mythological fictions which had been gradually developed in process of time, so that the very composition of the book itself must necessarily have been of a later date. Neither do we wonder at such attempts and efforts, since the very essence and central point of the accounts of the miracles given in that book are altogether at variance with the principles of rationalism and its criticism, which can by no means admit the rise and formation of a people under such miraculous circumstances, such peculiar belief, and, in a religious point of view, such an independent existence, at the side of all the other nations of antiquity. Indeed, the spiritual substance of the whole, the divine idea which pervades and combines all its details, is in itself such a miracle, such a peculiar and wondrous phenomenon, as to lend natural support and undeniable confirmation to the isolated and physical wonders themselves; so that it is impossible to deny the latter without creating a second and new wonder, an unnatural course in the Jewish history. Nor is that part of the book which contains the miracles deficient in numerous historical proofs in verification of them. (b) As the events of this history are laid in Egypt and Arabia, we have ample opportunity of testing the accuracy of the Mosaical accounts, and surely we find nowhere the least transgression against Egyptian institutions and customs; on the contrary, it is most evident that the author had a thorough knowledge of the Egyptian institutions and the spirit that pervaded them. Exodus contains a mass of incidents and detailed descriptions which have gained new force from the modern discoveries and researches in the field of Egyptian antiquities. (See EXODUS, GEOGRAPHY OF THE.) The description of the passage of the Israelites through the desert also evinces such a thorough familiarity with the localities as to excite the utmost respect of scrupulous and scientific travelers of our own time for the authenticity of the Pentateuch. Nor is the passover-festival, its rise and nature, less confirmatory of the incidents connected with it. (c) The arrangements of the tabernacle, described in the second part of Exodus, likewise throw a favorable light on the historical authenticity of the preceding events; and the least tenable of all the objections against it are, that the architectural arrangements of the tabernacle were too artificial, and the materials and richness too costly and precious for the condition and position of the Jews at that early period, etc. But the critics seem to have overlooked the fact that the Israelites of that period were a people who had come out from Egypt, a people possessing wealth, Egyptian culture and arts, which we admire even now, in the works which have descended to us from ancient Egypt; so that it cannot seem strange to see the Hebrews in possession of the materials or artistical knowledge requisite for the construction of the tabernacle. Moreover, the establishment of a tent as a sanctuary for the Hebrews can only be explained from their abode in the desert, being in perfect unison with their then roving and nomadic life. (d) The extremely

simple and sober style and views throughout the whole narrative afford a sure guarantee for its authenticity and originality. All these incidents are described in plain and clear terms, without the least vestige of later embellishments and false extolling of former ages. The Pentateuch, some critics assert, is written for the interest and in favor of the hierarchy; but can there be more anti-hierarchical details than are found in that book? The whole representation indicates the strictest impartiality and truth. (See PENTATEUCH.)

H. A. C. H.

(9) **Three Authors.** G. Harford-Battersby, in presenting the view that three authors were concerned in the production of Exodus, says: "But when it is shown that the present narrative is made up of three, so far contrasting with one another as to prove themselves much later in date than the period of which they treat, and the work, not merely of different individuals, but of different schools of historical writing; and when the further step is taken of disentangling, with infinite pains of many laborers in many lands, the several threads of narrative, and recombining them in something like their original connections, the work of constructive criticism must be held to have been well known. Each document has its individual standpoint, even as each of the synoptic Gospels presents its own picture of the life of Christ. The Book of Exodus is like a grand symphony, which was once thought to give harmony without discord, but is now being found, in virtue of elements which by themselves are sharply discordant, to sound forth a yet richer harmony."

EXODUS, GEOGRAPHY OF THE. The geography of "the Exodus" was for a long time a problem which seemed to be beyond solution. Many critics who knew nothing of the physical conditions of the country, and nothing of the surroundings were free to declare that so great a multitude of people could never have passed over the route which the author of the Pentateuch claims that they did pass over, that they never could have been fed in such a wilderness, and that there never was any "manna from Heaven," etc.

But science came to the rescue and the whole Peninsula of Sinai was carefully surveyed by the officers of the English government. The Ordnance Survey in the Peninsula of Sinai has settled many questions which were before open to discussion even among scholars, therefore a new presentation of this subject in the light of all available scientific information must be of great value.

1. Testimony of Sir William Dawson. In this important field we have no higher authority than Sir J. William Dawson, C.M.G., LL.D., F.R.S., who was one of the most eminent among modern geologists. This careful scholar not only studied all the official reports upon this subject, but gave a great deal of time to the actual individual investigation of the land, in the light of modern science, and rigidly examined the route over which this people passed. We therefore present the following abridgment of the discussion of the subject from his pen:

(1) **The Ordnance Survey.** In so far as the journey of the Hebrews from the Red Sea to Sinai is concerned, little remains to be done with reference to the geographical details. The admirable work of the Ordnance Survey, has forever settled all questions respecting the Mount of the Law and the way thither. It has done more than this; for the accurate labors of the scientific surveyor, while they have dissipated multitudes of theories formed by unscientific travelers,

have vindicated in the most remarkable manner the truthfulness of the narratives in Exodus and Numbers.

Every scientific man who reads the reports of the Survey and studies its maps, must agree with the late Professor Palmer that they 'afford satisfactory evidence of the contemporary character of the narrative.' They prove, in short, that the narrator must have personally traversed the country and must have been a witness of the events he narrates. More than this; they show that the narrative must have been a sort of a daily journal, written from time to time as events proceeded, and not corrected even to reconcile apparent contradictions, the explanation of which only becomes evident on study of the ground.

(2) **From Rameses to the Red Sea.** The labors of the Survey did not extend to the route of the Exodus from Rameses to the Red Sea; and on that portion of it, some uncertainty existed until a very recent date. More especially was this true in consequence of the theory advanced by the learned Egyptologist, M. Brugsch, who, having arrived at the conclusion that the city of Rameses, the point of departure of the Exodus, is identical with ZOAN, (which see), concluded that the route of the Israelites lay, not to the Red Sea, but along the border of the Mediterranean. Fortunately the recent discovery by M. Naville (*The Store City of Pithom*, London) of the true site of Pithom at Tel el Maskhulah in the wady Tumilat, when conjoined with the fact that Pithom was the chief city of the district of Succoth mentioned in the Exodus, and that it was one of the two 'store cities' or garrison towns, that the Israelites are said to have been compelled to build for Pharaoh in the land of Goshen, has thrown a flood of light on the subject.

It marks one stake of the Exodus, and also carries with it the consequence that as Rameses must have been one day's march, or thereabout, to the west of Succoth, it also was in Wady Tumilat, but at the western end of it. Certain ruins at the entrance of the wady Tumilat, hitherto regarded by many as marking the site of Pithom, are therefore in all probability those of Rameses. Further, as the monuments at both places indicate that Rameses the Great (or Rameses II) was their builder, the view held by the majority of Egyptologists, that this king was the Pharaoh of the oppression, is confirmed.

The site of Pithom is distinctly visible from the railway, about twelve miles west of Ismailia, and presents the ruins of fortifications and extensive granaries built with crude brick, some portions of which probably date from before the Exodus, though the site was occupied down to Roman times as the chief town of Succoth and an important frontier post. (See PITHOM.)

(3) **A New Dynasty.** It is interesting to notice that Rameses I, the grandfather or grand-uncle of Rameses II, was the founder of a new dynasty, that Seti I and his son Rameses II were both constructors of important public works in Lower Egypt, that both carried on great foreign wars, draining the resources of Egypt, and that both were great temple builders, and devoted to the interests of the priesthood.

These facts illustrate the statement respecting a new king who 'knew not Joseph,' (Exod. i:8) and afford reasons for the hardness of the bondage to which the Israelites were subjected as a foreign people doomed to compulsory labor.

Taking it for granted, then, that the time of the Exodus was in the reign of Menephtah, the son and successor of Rameses, that the wady

Tumilat was the land of Goshen, or a principal part of it, and that Rameses and Succoth were in this valley let us study the geographical conditions of the question.

(4) **Geographical Conditions.** On the east side of the delta of the Nile, about fifty miles northeast of Cairo, a narrow valley of cultivated soil extends eastward about eighty miles. This valley, wady Tumilat, anciently the land of Goshen or Gesen, is only a few miles wide at its western end, and gradually narrows towards the east.

The recent surveys of the British Military Engineers (Lt.-Col. Ardagh, Major Spaight, and Lieut. Burton, R. E.) also render it certain that this valley once carried a branch of the Nile, which discharged its waters into the Red Sea. This branch, or a canal representing it, must have existed in the days of Moses. At present this valley is watered by the Sweetwater Canal, running from the Nile to Suez; and though probably inferior to the land of Goshen, in its best days (see GOSHEN) is still one of the most beautiful districts in Egypt, at least in its western part.

The position of this valley accords wonderfully with the scriptural notices of it. It would be the only convenient entrance into Egypt for Jacob with his flocks and herds. It was separated to a great degree from the rest of Egypt, and was eminently suited to be the residence of a pastoral and agricultural people, differing in their habits from the Egyptians, and accustomed in their modes of life to the habits of Palestine.

At the date of the Exodus, as we are informed by Psalms lxxviii:12, the court of Pharaoh was held in Zoan or Tanis, about thirty miles to the north of the land of Goshen.

Goaded by oppression and stimulated by the exhortations and prophecies of Moses and Aaron, the Hebrew bondsmen had assumed an attitude of passive resistance, and had probably gathered in great numbers at Rameses and its vicinity, a most convenient rallying place, both for those in the land of Goshen and those scattered over other parts of Egypt. Moses and Aaron passed to and fro between Zoan and Rameses acting as ambassadors of their people (Exod. iv:29; v:1). The king's chariot force, assembled at or near Zoan, commanded the land of Goshen. The Hebrews, therefore, could not move without the king's consent. Knowing this, and knowing also that the beginning of actual civil war might be the signal for rebellion among other subject Asiatic people, the king thought best to temporize. In such cases of political deadlock, providence often cuts the knot. It was so in this instance.

(5) **Beginning of the Exodus.** The continued plagues inflicted upon Egypt at length produced such discontent among the people that the king was forced to let the Hebrews go. The mandate was no sooner given than it was acted upon, for if Pharaoh should change his mind, he still had them in his power for two days' march at least. The camp at Rameses was therefore broken up; and, gathering up their countrymen as they passed, and receiving from the Egyptians gifts and contributions in lieu of the property they had to leave behind, they hurried on eastward, executing in one day apparently a march of twelve or fifteen miles. This is a long march for such a body of fugitives; but their haste was great and their tribal organization was good, while their powers of walking may be supposed to have resembled those of the present fellahs of Egypt.

They are said to have reached the district of

SUCCOTH (which see), and to have encamped within its limits, probably to the west of Pithom. There is no more likely place for this encampment than the neighborhood of Kassassin, where there is abundance of forage and water, and a defensible position, reasons which weighed in our own time with Sir Garnet Wolseley in selecting this as a halting point in his march on Tel-el-Kebir.

Meeting with no molestation or pursuit, they continued their march on the following day, and encamped at Etham, on the edge of the desert of Etham, at the eastern end of the wady Tumilat. We learn from Numbers xxxiii:8 that all the desert east of the present Suez Canal was called *the desert of Etham*, and the 'edge' of this desert on the route followed by the Israelites must have been near the present town of Ismailia, at the head of Lake Timsah.

Probably the encampment was not far from the present Nefish station, a little west of the town, and it is worthy of note that here the desert presents, in consequence of a slight elevation above the bottom of the wady, a better defined 'edge' than usual.

When at Ismailia we rode over this ground and could imagine the Hebrew leader looking out from the sand hills behind his encampment, with anxious eyes, to the east and the south, where his alternative lines of march lay, and to the west, whence Pharaoh's chariots might be expected to follow him.

But here a new, and at first sight, a strange order is given to the fugitives. They are not to go any farther eastward in what seems the direct road to Canaan. They are to turn to the south, at right angles to their former course along the west side of Lake Timsah and the Bitter Lake, the latter then probably the northern end of the Yam Suph or Red Sea. The explanation given to Moses is that by this movement God will be honored upon Pharaoh, and upon all his host' (Exod. xiv:4); but in what way is not stated beforehand.

In executing this apparently retrograde movement, Moses appears to have kept in view, as heretofore, the wisest means to protect his people in all events, and without reference to any possible miracle. And here I would note that the gathering at Rameses, the holding the people in readiness for instant motion, the march by the wady Tumilat, and the position taken up at Etham, are all vindicated by the ground as good and wisely planned strategical movements. Moses and the elders of Israel were not mere waiters on Providence. They were men of thought and action.

(6) **Place of Crossing.** The full responsibility of his position was now upon the leader of the Exodus. He had, it is true, passed over the perilous open country between Etham and the defile of Geneffeh, but here he must make a stand. The children of Israel were, however, in no mood to fight for their liberty, and it appears from Exod. xix that they would rather surrender and return to Egypt. Moses remonstrated and assured them that the Lord would fight for them; but it was of no avail. And when he 'cried unto the Lord' the order was given to plunge into the sea and cross it. The people who would not fight were willing to flee. They had faith in God, though their long bondage had made them cowards as regarded the Egyptians. Their faith was rewarded by a miraculous passage, in regard to which a 'strong east wind' driving the waters before it, is especially mentioned as a secondary cause (Exod. xiv:21). After a somewhat care-

ful examination of the country in reference to the crossing place, I believe that only one spot can be found which will satisfy the conditions of the Mosaic narrative, namely, the south part of the Bitter Lake, between station Fayid on the railway and station Geneffeh. Near this place are some inconsiderable ancient ruins, and flats covered with arundo and scirpus which may represent Pi-hahiroth. On the west is a somewhat detached peak, known as Jebel Shebremet, more than five hundred feet high, commanding a wide prospect and forming a most conspicuous object to the traveler approaching from the north. Here also is a basin-like plain, suitable for an encampment, and at its north side the foot of Jebel Shebremet juts out so as to form a narrow pass, easy of defense. Here also the Bitter Lake narrows and its shallow part begins, and a north-east wind, combined with a low tide, would produce the greatest possible effect in lowering the water.

It may be further observed as an incidental corroboration that the narrative in Exodus states that after crossing the sea the Israelites journeyed three days and found no water.

From the place above referred to, three days' journey would bring them to the Wells of Moses, opposite Suez, which thus come properly into place as the Marah of the narrative, whereas the ordinary theory of crossing at Suez would bring the people at once to these wells. After crossing the Red Sea they journeyed through the wilderness of Etham into the wilderness of Shur, and in three days encamped at the wells of Marah (Comp. Exod. xiii:20; Num. xxxiii:8; Exod. xv:22).

The three days' journey here would not be long ones, but there was now no reason for haste, and the absence of water would not be favorable to long marches.

(7) **Physical Changes.** The question has often been raised whether at the time of the Exodus, the Red Sea extended farther north than at present. In answer to this it may be stated, in the first place, that the terms of the narrative in Exodus imply, and the geological structure of the country proves that there must have been a land connection between Africa and Asia, north of Ismailia, at the place which is now the highest point of the isthmus.

Further, without entering into details, I may say that there are also good geological reasons for the belief that there has been in modern times a slight elevation of the isthmus on the south side, corresponding to the slight depression known to have occurred on the north side. It seems also certain that in the time of Moses a large volume of the Nile water was during the inundation sent eastward toward the Red Sea. There is, therefore, nothing unreasonable in supposing that the Bitter Lake at the time of the Exodus constituted an extension of the sea. Further, such an extension would be subject to considerable fluctuations of level, occasioned by the winds and tides. These now occur towards the head of the sea.

Near Suez I passed over large surfaces of desert, which I was told were inundated on occasion of high tides and easterly winds, and at levels which the sea now fails to reach, there are sands holding recent marine shells in such a state of preservation that not many centuries may have elapsed since they were at the bottom of the sea.

2. **Other Scientists.** Professor Hull takes nearly the same view with reference to the condition of the isthmus at the time of the Exodus. It has also been advocated by Ritter and by Mr.

Reginald S. Poole. It appears to be strongly confirmed by the inscriptions discovered by Naville at Pithom. He finds also that a place called Pikerchet lay at no great distance eastward from Pithom, and supposes that this may be the Pi-hahiroth of Exodus xiv:2, 9. (See PI-HAHIROTH.) He also finds that down to Roman times Pithom, or Heroöpolis (Hieröpolis), as it was called, is described as being near to the Red Sea, which must to some extent, have been navigable up to Lake Timsah. Naville is disposed to place Pi-hahiroth and consequently the place of crossing, farther up to the north than Bitter Lake, or between this and Lake Timsah. My impression is, however, that these places are too near Etham, and too far from the probable site of Marah, to fulfill the conditions of the narrative.

3. **Biblical Statements.** There are two statements in Exodus and Numbers which have always appeared to me to fix the meaning of the author of the narrative, who has been found in other cases scrupulously exact in his geographical statements.

(1) **Opinion of Pharaoh.** The first is the opinion attributed to Pharaoh, when he heard of the southward march from Etham, that the Israelites were entangled in the land, and that the wilderness had shut them in. Unless the Red Sea or some other impassable obstacle existed south of Lake Timsah he could not have formed this opinion.

(2) **Etham and Shur.** The second statement referred to is in the use of the terms 'Etham' and 'Shur,' and the three days' journey before reaching Marah, which I take to be the wells of Moses opposite Suez, though I know the site is usually placed farther south. Putting together the statements in Exodus and Numbers, we find the first desert encampment at Etham on the border of that desert. Then, after crossing the Red Sea, we find the people still in the desert of Etham, and journeying in it three days into the desert of Shur in the south.

Now, if the desert of Etham is that of the Atamu or border land of Egypt, and the desert of Shur, or the wall, is that bounded by the wall of the escarpment of the Tih, and if the wells of Marah are the first great springs that issue from the base of this escarpment, we have a clear and accurate topographical description, given in a few words, but in a manner to emphasize the first journeys in the waterless desert and the first experience of the brackish desert springs, so different from the sweet waters of the Nile.

(3) **Strategical Reasons.** Another point of inquiry relates to the reason why the army of Israel did not cross the neck of land between Lake Timsah and the Bitter Lake rather than go farther south. A sufficient reason for this may appear to be the command to pass southward to the Red Sea, that God's purpose with reference to the Egyptians might be fulfilled. But if we look for prudential and strategical reasons in addition, these may be found in the difficulty of crossing at this place in face of an approaching Egyptian army, even if crossing there was practicable, which the considerations above stated render at least doubtful, and in the possible existence of Egyptian garrisons in this part of the isthmus, where at other periods they are known to have been posted. With reference to this last consideration, it has often been overlooked that the king of Egypt was about this time obliged to meet a serious invasion of Libyans and other peoples on the west, and that this may have compelled him to withdraw or weaken his garrisons in the east. This would give

special facilities to the movement of the Israelites, and was a providential aid in their favor, while the particular places from which troops had been removed may have been a factor in certain movements. The recent revelations of the Egyptian records give us the right to affirm that a remarkable preparatory provision was made in the providence of God for the deliverance of His people by political and military events altogether beyond their control." *Egypt and Syria*, by Sir J. William Dawson, C. M. G., LL. D., F. R. S. (pp. 51-74).

The reader may refer to Dr. Kellogg's *Lectures on Abraham, Joseph and Moses; Report of the Ordnance Survey on Sinai* (British Government); *Pithon*, by Naville; Trumbull's *Kadesh Barnea*; and Palmer's *Desert of the Exodus*.

Egypt and Syria, by Sir J. William Dawson, C. M. G., LL. D., F. R. S. (pp. 51-74).

EXODUS, THE (ěks'ō-dūs), (Heb. *שְׂמוֹת אֵלֶּה*, *ve-ale'leh she-moth'*, a going out, a way out).

The intention of Jehovah to deliver the Israelites from Egyptian bondage was made known to Moses from the burning bush at Mount Horeb, while he kept the flock of Jethro, his father-in-law.

(1) **Preparatory History.** Under the divine direction Moses, in conjunction with Aaron, assembled the elders of the nation, and acquainted them with the gracious design of Heaven. After this they had an interview with Pharaoh, and requested permission for the people to go, in order to hold a feast unto God in the wilderness. The result was, not only refusal, but the doubling of all the burdens which the Israelites had previously had to bear. Moses hereupon, suffering reproach from his people, consults Jehovah, who assures him that he would compel Pharaoh 'to drive them out of his land.' 'I will rid you out of their bondage, and I will redeem you with a stretched-out arm and with great judgments' (Exod. iii-vi:6). Then ensue a series of miracles, commonly called the plagues of Egypt (Exod. vi-xii). (See **PLAGUE**.)

(2) **Departure.** At last, overcome by the calamities sent upon him, Pharaoh yielded all that was demanded, saying, 'Rise up, and get you forth from among my people, both ye and the children of Israel; and go serve the Lord as ye have said; also take your flocks and your herds, and be gone.' Thus driven out, the Israelites, to the number of about 600,000 fighting men, ready for war (Num. i:46), beside women and children, and men not fit for war, left the land, attended by a mixed multitude, with their flocks and herds, even very much cattle (Exod. xii:31, *sq.*) Being 'thrust out' of the country, they had not time to prepare for themselves suitable provisions, and therefore they baked unleavened cakes of the dough which they brought forth out of Egypt.

On the night of the selfsame day which terminated a period of 430 years, during which they had been in Egypt, were they led forth from Rameses, or Goshen. (See **GOSHEN**.)

(3) **Route.** There is considerable difficulty in settling the exact route of the Exodus. The miracles by the hand of Moses were wrought at Zoan, that is Tanis (Ps. lxxviii:12), and Rameses was a suburb of that capital. Thence the Israelites journeyed to Succoth (Exod. xii:37), the site of which is marked by Tell el-Maskhutah in the wady Tumilat, 32 miles south-southcast of Tanis and 11 miles west of Ismailia. They did not take the shortest route to Palestine, which lay through the land of the Philistines, but they went by the way of the wilderness by the Red Sea

(xiii:17, 18). Their first encampment after leaving Succoth was Etham. The site has not been identified; but it was on the edge of the wilderness (verse 20). Thence they turned back and encamped before Pi-hahiroth, between Migdol and the sea, before Baal-zephon (xiv:2; Num. xxxiii:7). This camp has not been definitely located. It was, however, west of the Red Sea. (Davis, *Bib. Dict.*)

(4) **Passage of the Sea.** When they were encamped before PI-HAHIROTH (which see) between Migdol and the Red Sea, news is carried to Pharaoh which leads him to see that the Israelites had really fled from his yoke; and also that, through some (to him) unaccountable error, they had gone towards the southeast, had reached the sea, and were hemmed in on all sides. He summons his troops and sets out in pursuit—'all the horses and chariots of Pharaoh, and his horsemen and his army;' and he 'overtook them encamping by the sea, beside Pi-hahiroth, before Baal-zephon, (Exod. xiv:9). The Israelites see their pursuing enemy approach, and are alarmed. Moses assures them of divine aid. A promise was given as of God that the Israelites should go on dry ground through *the midst* of the sea; and that the Egyptians, attempting the same path, should be destroyed; 'and I will get me honor upon Pharaoh and all his host, upon his chariots and his horsemen' (verse 17). Here a very extraordinary event takes place: 'The angel of God, which went before the camp of Israel, removed and went behind them; and the pillar of the cloud went from before their face and stood behind them; and it came between the camp of the Egyptians and the camp of Israel; and it was a cloud and darkness to them, but it gave light by night to these; so that the one came not near the other all the night' (verses 19, 20). Then comes the division of the waters, which we give in the words of the sacred historian: 'And Moses stretched out his hand over the sea, and the Lord caused the sea to go back by a strong east wind all that night, and made the sea dry land, and the waters were divided. And the children of Israel went into the midst of the sea upon the dry ground; and the waters were a wall unto them on their right hand and on their left. And the Egyptians pursued and went in after them to *the midst of the sea*, even all Pharaoh's horses, his chariots, and his horsemen,' but not Pharaoh himself. Delays are now occasioned to the Egyptians; their chariot-wheels are supernaturally taken off, so that 'in the morning-watch they drave them heavily.' The Egyptians are troubled; they urge each other to fly from the face of Israel. 'Then Moses stretched forth his hand over the sea, and the sea returned to his strength when the morning appeared; and the Egyptians fled against it; and the Lord overthrew the Egyptians in *the midst of the sea*. And the waters returned and *covered the chariots and the horsemen and all the host of Pharaoh* that came into the sea after them; there remained not as much as one of them. But the children of Israel walked upon dry land in the midst of the sea, and the waters were a wall unto them on their right hand and on their left. And Israel saw the Egyptians dead upon the seashore; and the people feared the Lord, and believed the Lord and his servant Moses' (verses 28, 31).

(5) **Objections.** The opposition to the scriptural account has been of two kinds. Some writers (Wolfenb. *Fragm.* p. 64, *sq.*) have at once declared the whole fabulous; a course which appears to have been taken as early as the time of Josephus (*Antiq.* ii:16, 5). Others have striven to explain the facts by the aid of mere natural

causes; for which see Winer, *Handwörterbuch*, in Meer Rothes. A third mode of explanation is pursued by those who do not deny miracles as such, and yet, with no small inconsistency, seek to reduce this particular miracle to the smallest dimensions. Writers who see in the deliverance of the Hebrews the hand of God and the fulfillment of the divine purposes, follow the account in Scripture implicitly, placing the passage at Ras Attaka, at the termination of the Valley of Wandering; others, who go on rationalistic principles, find the sea here too wide and too deep for their purpose, and endeavor to fix the passage a little to the south or the north of Suez.

According to Mr. Blumhardt the Red Sea at Suez is exceedingly narrow, and it cannot be that the Israelites here experienced the power and love of God in their passage through the Red Sea. The breadth of the sea is at present scarcely a quarter of an hour by Suez. Now if this be the part which they crossed, how is it possible that all the army of Pharaoh, with his chariots, could have been drowned? It is his opinion that the Israelites experienced that wonderful deliverance about thirty miles lower down. This opinion is also strengthened by most of the Eastern churches, and the Arabs, who believe that the Israelites reached the opposite shore at a place called Gebel Pharaon, which on that account has received this name. If we accept this opinion, it agrees very well with the Scripture. Still more important is the evidence of Dr. Olin (*Travels in the East*, New York, 1843). Dr. Olin, agrees with Robinson in fixing Etham 'on the border of the wilderness which stretches along the eastern shore of the arm of the sea which runs up above Suez.' At this point he says the Hebrews were commanded to turn. They turned directly southward and marched to an exposed position, hemmed in completely by the sea, the desert, and Mount Attaka. A false confidence was thus excited in Pharaoh, and the deliverance was made the more signal and the more impressive alike to the Israelites and to Egypt. Admitting the possibility that the sea at Suez may have been wider and deeper than it is now, Olin remarks, 'it must still have been very difficult, if not impossible, for the army of Israel, encumbered with infants and aged people, as well as with flocks, to pass over (near Suez) in the face of their enemies' (i: 346). Besides, the peculiarities of the place must have had a tendency to disguise the character and impair the effect of the miracle. The passage made at the intervention of Moses was kept open all night. The Egyptians followed the Hebrews to *the midst of the sea*, when the sea engulfed them. 'The entire night seems to have been consumed in the passage. It is hardly credible that so much time should have been consumed in crossing near Suez, to accomplish which one or two hours would have been sufficient.' 'Nor is it conceivable that the large army of the Egyptians should have been at once within the banks of so narrow a channel. The more advanced troops would have reached the opposite shore before the rear had entered the sea; and yet we know that all Pharaoh's chariots and horsemen followed to the *midst* of the sea, and, together with all the host that came in after them, were covered with the returning waves' (i. 348). Preferring the position at Ras Attaka, Olin states that the gulf is here ten or twelve miles wide. 'The valley expands into a considerable plain, bounded by lofty precipitous mountains on the right and left, and by the sea in front, and is sufficiently ample to accommodate the vast number of human beings who composed the two

armies.' 'An east wind would act almost directly across the gulf. It would be unable to cooperate with an ebb tide in removing the waters—no objections certainly if we admit the exercise of God's miraculous agency;' but a very great impediment in the way of any rationalistic hypothesis. 'The channel is wide enough to allow of the movements described by Moses, and the time, which embraced an entire night, was sufficient for the convenient march of a large army over such a distance.' 'The opinion which fixes the point of transit in the valley or wady south of Mount Attaka derives confirmation from the names still attached to the principal objects in this locality. Jebel Attaka, according to Mr. Leider, who only confirms the statements of former travelers, means in the language of the Arabs "the Mount of Deliverance." Baiideah or Bedeah, the name of this part of the valley, means "the Miraculous," while Wady el Tih means "the Valley of Wanderings." Pi-hahiroth, where Moses was commanded to encamp, is rendered by scholars "the mouth of Hahiroth," which answers well to the deep gorge south of Attaka, but not at all to the broad plain about Suez' (i. 350). J. R. B.

(6) **Date of Passage.** Hales places the Exodus in B. C. 1648, Usher in B. C. 1491, Bunsen in B. C. 1520, and Poole in B. C. 1652. About B. C. 1658 may perhaps be deemed the probable date. (See EXODUS, GEOGRAPHY OF THE; MANNA; SINAI; WANDERING. But see CHRONOLOGY, which article shows that the latest conclusions of Egyptologists put the Exodus about 1200 B. C.)

EXORCISM and EXORCIST (ěks'ör-siz'm, ěks'or-sist), (Gr. *ἐξορκιστής*, *ex-or-kis-tace'*, he who exacts an oath, Acts xix:13).

The belief in demoniacal possessions, which may be traced in almost every nation, has always been attended by the professed ability, on the part of some individuals, to release the unhappy victims from their calamity. The allusions to the practice of exorcism among the Jews, contained both in their own authors and in the New Testament, are too well known to render quotations necessary. In some instances this power was considered as a divine gift; in others it was thought to be acquired by investigations into the nature of demons and the qualities of natural productions, as herbs, stones, etc., and of drugs compounded of them by the use of certain forms of adjurations, invocations, ceremonies, and other observances. Among all the references to exorcism, as practiced by the Jews, in the New Testament (Matt. xii:27; Mark ix:38; Luke ix:49, 50), we find only one instance which affords any clue to the means employed (Acts xix:13); 'from which passage it appears that certain professed exorcists took upon them to call over a demoniac the name of the Lord Jesus, saying, 'We adjure you by Jesus whom Paul preacheth.' Their proceeding seems to have been in conformity with the well-known opinions of the Jews in those days, that miracles might be wrought by invoking the names of the Deity, or angels, or patriarchs, etc. The epithet applied to these exorcists (*those traveling about*, Vulg. *de circumeuntibus Judæis*) indicates that they were traveling mountebanks, who, beside skill in medicine, pretended to the knowledge of magic. The office of the exorcist is not mentioned by Paul in his enumeration of the miraculous gifts (1 Cor. xii:9) though it was a power which he possessed himself, and which the Savior had promised (Mark xvi:17; Matt. x:8).

J. F. D.

Among the Reformers opinion and practice were divided respecting exorcism. Luther and Melancthon favored it, but it was decisively re-

jected by Zwingli and Calvin (*Instit.* iv. c. 15, 19). (See MAGI.)

EXPECT (ěks-pěkt), (Gr. ἐκδέχομαι, *ek-dekh'om-ahēe*, Heb. x:13), to look for, wait for. Thus in Douay Bible the comment on Sirach xi:8 is 'Expect the end of another man's speech, before you begin to answer. Expect also if anie that is elder, or better able wil answer first.' Expect is used in this way in Job xxxii:4 (marg.), 2 Macc. ix:25, and Heb. x:13, 'From henceforth expecting till his enemies be made his footstool.'

EXPEDIENCY (ěks-pě'dī-en-sŷ), **EXPEDIENT** (Gr. συμφέρω, *soom-fer'o*, to advantage).

Expedient is never found in A. V. in the sense of 'expeditious' as so often in Shakespeare. On the other hand, it never means merely 'convenient' (opposed to what is rigidly right), as in modern English. In 2 Cor. xii:1 the word means profitable as the A. V. and R. V. translate the term elsewhere except in Matt. xviii:6, "it were better" and in xix:10, A. V. *it is not good.* R. V. *it is not expedient.* Coverdale translates Jer. xxvi:14, 'Now as for me: I am in your handes, do with me as ye thinke expedient and good,' though his spirit is the opposite. (*Hastings' Bib. Dict.*) In the case of the declaration of St. Paul, "Wherefore, if meat make my brother to offend, I will eat no flesh while the world standeth, lest I make my brother to offend" (1 Cor. viii:13),—a true rule of expediency is laid down. "It is impossible to state more strongly than does the apostle the obligation to refrain from indulging in things indifferent when the use of them is an occasion of sin to others. Yet it is never to be forgotten that this, by its very nature, is a principle the application of which must be left to every man's conscience in the sight of God. No rule of conduct founded on expediency can be enforced by church discipline. It was right in Paul to refuse to eat flesh for fear of causing others to offend, but he could not justly be subjected to censure had he seen fit to eat. The same principle is illustrated in reference to circumcision. The apostle utterly refused to circumcise Titus, and yet he circumcised Timothy, in both cases acting wisely and conscientiously. Whenever a thing is right or wrong, according to circumstances, every man must have the right to judge of those circumstances. Otherwise he is judge of another man's conscience, a new rule of duty is introduced, and the catalogue of *adiaphora* (i. e., things indifferent or nonessential), which has existed in every system of ethics from the beginning, is simply abolished" (T. W. Chambers, D. D., in Meyer's *Com.* on 1 Cor. viii.)

EXPERIENCE (ěks-pě'rī-ens), (Heb. שָׁרָף, *naw-khash'*, to observe diligently, Gen. xxx:27; רָאָה, *raw-aw'*, to see, Eccles. i:16; δοκιμή, *dok-ee-may'*, proof, testing, Rom. v:4; 2 Cor. ix:13).

(1) It therefore denotes long proof and trial, by seeing, feeling, or the like. Patience works *experience*, and *experience* hope. (2) By bearing tribulation in a patient and resigned manner, we observe and feel much of the goodness of God to us, and of the working of his grace in us; and are thereby encouraged to hope for further support, deliverance, grace, and glory, and every good thing (Rom. v:4). (3) An *experiment* is a practical trial (2 Cor. ix:13).

EXPIATION (ěks-pī-ā'shŷn). See ATONEMENT; SACRIFICE.

EXPIATION, DAY OF (ěks-pī-ā'shŷn). See ATONEMENT, DAY OF.

EXPRESS (ěks-prěs'), (Gr. χαρακτήρ, *khar-aktarē'*, Heb. i:3, from to sharpen to a point, akin to γράφω, *graf'o*, to scratch, grave, write), exact image, likeness, copy, figure; hence, the word character as a figure graven or stamped upon.

The translation of the R. V. "the very image" is after Tyndale; the Geneva ("ingraved forme") tries to bring out the sense of the Greek word, which is properly what stands engraven on any object, as a seal (Davidson), and this is the meaning of A. V. *express image*; comp. Shaks. *Hamlet*, II ii:299, 'What a piece of work is a man! . . . in form and moving; how *express* and admirable!' which Aldis Wright explains thus: 'Exact, fitted to its purpose, as the seal fits the stamp.' (*Hastings' Bib. Dict.*)

EYE (ī), (Heb. עַיִן, *ah'yin*; Gr. ὀφθαλμός, *of-thal-mos'*).

In most languages this important organ is used by figurative application, as the symbol of a large number of objects and ideas. In the East such applications of the word 'eye' have always been uncommonly numerous; and they were so among the Hebrews.

Figurative. (1) A *fountain* frequently. (2) *Color* (Num. xi:7, in the Hebrew; see margin). (3) The *face* or *surface* (Exod. x:5, 15; Num. xxii:5, 11, as "the face, i. e., eye of the land"); the expression *between the eyes* means the *forehead* (Exod. xiii:9, 16). (4) In Cant. iv:9 "*eye*" seems to be used poetically for *look*. (5) "*Eye*" (Prov. xxiii:31, A. V. "color") is applied to the beads or bubbles of wine when poured out. (6) The *eyes* are *blinded*, *closed*, or *darkened* when the mind is destitute of spiritual knowledge; and so ignorant, obstinate, or biased, that it cannot discern between good and evil (Acts xxviii:27; Rom. xi:10; Deut. xvi:19). (7) *Eyes* are *toward the Lord*, as the eyes of servants to their masters, to observe what he is, and does, or requires; and to look for and expect necessary blessings from him (Ps. xxv:15 and cxxiii:2). And they *fail* for God's word, salvation, and presence when by long exercise they are nearly wearied out (Ps. cxix:82, 123, and lxix:3; Is. xxxviii:14). (8) Angels are *full of eyes* within, before, and behind, or on the back; they have an extensive knowledge of their own heart and way, and of the truths of Christ, and providence of God, and watchfully inspect and care for the souls of men (Rev. iv:6, 8; Ezek. i:18). (9) The *eyes of wise men* are *in their head*; their knowledge is useful, and properly applied (Eccl. ii:14): but the *eyes of fools* are *in the ends of the earth*; their thoughts and cares unsettledly go out after what they have no concern with (Prov. xvii:24). (10) Kings *scatter away evil with their eyes*; restrain it, and reform from it by a careful inspection of affairs, and by frowning on evil doers (Prov. xx:8). (11) Job was *eyes to the blind*, and *feet to the lame*; he was a helpful director, assistant, and comforter of the distressed; a teacher of the ignorant, and reliever of the weak (Job xxix:15). (12) To have a *single eye* is to have the mind divinely and clearly instructed, and unremittingly set upon knowing the mind and will of God, in order to glorify him. Where this is, the whole body is full of light, the person is rightly directed (Matt. vi:22). (13) To have an *evil eye* is to be of a churlish and envious disposition and behavior (Prov. xxiii:6; Matt. xx:15). (14) To have a *bountiful eye* is to show kindness, and seek opportunities of doing or bestowing favors (Prov. xxii:9). (15) *Lofty eyes* import pride and self-conceit (Prov. xxx:13). (16) To be *wise* or *pure*

in one's own eyes is to be so in his own opinion, without being really so (Prov. iii:7 and xxx:12). (17) *Wanton and adulterous eyes* are such as express wanton and lascivious looks (Is. iii:16; 2 Pet. ii:14). (18) *Open eyes* import full capacity and readiness to observe and regard (Num. xxiv:3; 1 Kings viii:29); or readiness to punish (Job xiv:3). (19) Sometimes the *opening of the eyes* denotes giving to persons who were blind their sight, or making them to observe what they did not before (John ix:32; Gen. xxi:19). (20) To *fix the eyes on* one imports delight in, and care of him (Ps. ci:6); to look favorably towards him (Gen. xlv:21); or expectation of some direction from him (1 Kings i:20). (21) To *have eyes that see not*, and ears that hear not, is to have natural faculties to discern, and even a natural knowledge of divine things, without any spiritual understanding thereof (Is. vi:10; Rom. xi:8). (22) As the eye is very useful and tender, and right hands and feet very useful, any earthly enjoyment, or lust, or whatever is very useful and dearly beloved by one is compared to *right eyes*, hands, and feet (Matt. v:29, 30, and xviii:8, 9). (23) To *pluck out the eyes*, and give them to one, is to love him so dearly as to be ready to part with the dearest things for his sake. (Gal. iv:15). Hence God's people are compared to the *apple of his eye*, to denote how dear they are to him, and how tenderly he sympathizes with them, and keeps them (Ps. xvii:8; Zech. ii:8). (24) Sins, greater or less, as they obstruct our clear views of God, and ought to be painful to our conscience, are likened to *motes and beams in the eye* (Matt. vi:3). (25) Sore troubles, or troublers, are likened to *prieks and thorns in the eyes* (Num. xxxiii:55; Josh. xxiii:13). (26) *In one's eyes* is in his sight, or in his view and opinion (Jer. vii:11; 2 Sam. xix:27). (27) *Before one's eyes* is *publicly* (Gen. xlii:24; or notoriously (Is. lxv:12). (28) *The eye is not satisfied* with riches; the covetous mind is not satisfied with them (Eccl. iv:8, and i:8). (29) *Men have the sword on their right eye*, and it is *utterly darkened* when their natural knowledge and sagacity is taken from them, as it was from the Jews before the taking of Jerusalem by Titus; or they were bereaved of their temples, and whatever else is dear to them (Zech. xi:17).

EYESALVE (i'säv), (Gr. κολούριον, *kol-loo'ree-on*, diminutive of κολύρα, *kol-loo'ra*, coarse bread of cylindrical shape), a preparation shaped like a *kolloora*: later, a poultice: still later a salve used for healing or strengthening the eyes (Rev. iii:18).

Symbolically, Christ's word and spirit are likened to eyesalve, as thereby our judgment is rectified, and we are enabled to discern the things of God (Rev. iii:18).

EYES, BLINDING OF. See PUNISHMENTS.

EYES, COVERING OF THE (Gen. xx:16).

This is a phrase on the meaning of which there is a variety of opinions. Some understand it to signify that Abimelech advised Sarah and her women, while in or near towns, to conform to the general custom of wearing veils. (See VEILS). Another view has been given as follows: "By the 'covering of the eyes' we are not to understand a veil, which Sarah was to procure for a thousand shekels, but it is a figurative expression for an atoning gift . . . so that he may forget a wrong done, and explained by the analogy of the phrase, he covereth the faces of the judges, i. e., he bribes them (Job ix:24)." (K. and D., *Com.*, in loc.)

EYESERVICE (i'sërv'is), (Gr. ὀφθαλμοδουλεία, *of-thal-mod-oo-li'ah*, Eph. vi:6; Col. iii:22), sight-labor, that is, that needs watching.

Eyeservice is a literal translation of the Greek,

and seems to have been coined by Tyndale, although he uses it only in Colossians, in Ephesians giving 'service in the eye sight.' The word was at once adopted into the language. The Greek word is found nowhere else: 'This happy expression,' says Lightfoot, 'would seem to be the apostle's own coinage. (Hastings' *Bib. Dict.*)

EYES, PAINTING THE. The custom of painting the eyes, or rather the eyelids, is more than once alluded to in Scripture, although this scarcely appears in the Authorized Version, as our translators, unaware of the custom, usually render 'eye' by 'face,' although 'eye' is still preserved in the margin. So Jezebel 'painted her eyes,' literally, 'put her eyes in paint,' before she showed herself publicly (2 Kings ix:30). This action is forcibly expressed by Jeremiah (iv:30), 'though thou rendest thine eyes with painting.' Ezekiel (xxiii:40) also represents this as a part of high dress—'For whom thou didst wash thyself, *paint-edst thy eyes*, and deckedst thyself with ornaments.' The custom is also, very possibly, alluded to in Prov. vi:25—'Lust not after her beauty in thine heart, neither let her take thee *with her eyelids*.' It certainly is the general impression in Western Asia that this embellishment adds much to the languishing expression and seducement of the eyes, although Europeans find some difficulty in appreciating the beauty which the Orientals find in this adornment.

The following description of the process is from Mr. Lane's excellent work on the *Modern Egyptians* (i:41-43): 'The eyes, with very few exceptions, are black, large, and of a long almond form, with long and beautiful lashes and an exquisitely soft, bewitching expression; eyes more beautiful can hardly be conceived: their charming effect is much heightened by the concealment of the other features (however pleasing the latter may be), and is rendered still more striking by a practice universal among the females of the higher and middle classes, and very common among those of the lower orders, which is that of blackening the edge of the eyelids, both above and below the eyes, with a black powder called *kohhl*. This is a collyrium, commonly composed of the smoke-black which is produced by burning a kind of *libam*—an aromatic resin—a species of frankincense, used, I am told in preference to the better kind of frankincense, as being cheaper, and equally good for the purpose. Kohhl is also prepared of the smoke-black produced from burning the shells of almonds. These two kinds, though believed to be beneficial to the eyes, are used merely for ornament; but there are several kinds used for their real or supposed medical properties; particularly the powder of several kinds of lead ore; to which are often added sarcocolla, long pepper, sugar-candy, fine dust of a Venetian squin, and sometimes powdered pearls. Antimony, it is said, was formerly used for painting the edges of the eyelids. The *kohhl* is applied with a small probe, of wood, ivory, or silver, tapering toward the end, but blunt: this is moistened, sometimes with rose water, then dipped in the powder, and drawn along the edges of the eyelids: it is called *mir'wed*; and the glass vessel in which the *kohhl* is kept, *mook'hhol'ah*. The custom of thus ornamenting the eyes prevailed among both sexes in Egypt in very ancient times: this is shown by the sculptures and paintings in the temples and tombs of this country; and *kohhl*-vessels, with the probes, and even with the remains of the black powder, have often been found in the ancient tombs. I have two in my possession. But, in many cases, the ancient mode of ornamenting with the *kohhl* was a little different from the modern. I have, however, seen this ancient

mode practiced in the present day in the neighborhood of Cairo; though I only remember to have noticed it in two instances. The same custom existed among the Greek ladies, and among the Jewish women in early times.'

Sir J. G. Wilkinson alludes to this passage in Mr. Lane's book, and admits that the lengthened form of the ancient Egyptian eye, represented in the paintings, was probably produced by this means. 'Such (he adds) is the effect described by Juvenal (*Sat.* ii:93), Pliny (*Ep.* vi:2), and other writers who notice the custom among the Romans. At Rome it was considered disgraceful for men to adopt it, as at present in the East, except medicinally, but if we may judge from the similarity of the eyes of men and women in the paintings at Thebes, it appears to have been used by both sexes among the ancient Egyptians. Many of the kohl-bottles have been found in the tombs, together with the bodkin used for applying the moistened powder. They are of various materials, usually of stone, wood or pottery; sometimes composed of two, sometimes of three or four separate cells, apparently containing each a mixture, differing slightly in its quality and hue from the other three. Many were simple round tubes, vases, or small boxes; some were ornamented with the figure of an ape or monster, supposed to assist in holding the bottle between his arms, while the lady dipped into it the pin with which she painted her eyes; and others were in imitation of a column made of stone, or rich porcelain of the choicest manufacture. (*Ancient Egyptians*, iii:382).

The name of one of Job's daughters (Job xlii:14), Keren-happuch, means paint-horn, a receptacle of the kohl or kohhl: she brought beauty to the family.

EZAR (ē'zar), the form found (1 Chron. i:38) in many editions of the A. V. in place of the correct form EZER.

EZBAI (ēz'ba-i), (Heb. עֲזַבַּי, *ez-bah'ee*, hyssop-like), the father of Naarai, who was one of David's guard of "thirty" (1 Chron. xi:37), B. C. 1046.

EZBON (ēz'bōn), (Heb. עֲזֹבֹן, *ets-bone'*, uncertain derivation).

1. Son of Gad, and founder of one of the Gadite families (Gen. xlii:16; Num. xxvi:16). In the latter passage the name appears as Ozni in the A. V., probably on account of a corruption (B. C. 1856).

2. Son of Bela and grandson of Benjamin (1 Chron. vii:7). Singularly, however, he is not elsewhere mentioned. He possibly belonged to a family incorporated into Benjamin after the slaughter mentioned (Judg. xx), B. C. 1020.

EZEKIAS (ēz'a-kī'as), a Grecized form (Matt. i:9, 10) of the name of King HEZEKIAH (which see).

EZEKIEL (e-zē'ki-el), (Heb. יְחֶזְקִאל, *yekh-ek-kalē'*, whom God will strengthen, or God will prevail).

(1) **Name and Family.** One of the greater prophets, whose writings, both in the Hebrew and Alexandrian canons, are placed next to those of Jeremiah. He was the son of Buzi the priest (ch. i:3), and, according to tradition, was a native of Sarera (Carpzov, *Introd.*, pt. iii. p. 200). Of his early history we have no authentic information. We first find him in the country of Mesopotamia, 'by the river Chebar' (ch. i:1), now *Khabār*, a stream of considerable length flowing into the Euphrates near Circesium, *Kirkesia* (Rosenmüller's *Bibl. Geog. of Central Asia* in *Bibl. Cabinet*, vol. ii. p. 180). On this river

Nebuchadnezzar founded a Jewish colony from the captives whom he brought from Jerusalem when he besieged it in the eighth year of king Jehoiachin (2 Kings xxiv:12). This colony, or at least a part of it) was settled at a place called Tel-Abib, which has been thought by some to answer to the Thallaba of D'Anville (Rosenm., *Bibl. Geog.*, vol. ii, p. 188); and it seems to have been here that the prophet fixed his residence.

(2) **Personal History.** He received his commission as a prophet in the fifth year of his captivity (B. C. 594). Many critics suppose (from ch. i:1) that this event took place in the 30th year of his age. Ezekiel is remarkably silent respecting his personal history; the only event which he records (and that merely in its connection with his prophetic office) is the death of his wife in the ninth year of the captivity (ch. xxiv:18). He continued to exercise the prophetic office during a period of at least twenty-two years, that is, to the 27th year of the captivity (ch. xxix:17); and it appears probable that he remained with the captives by the river Chebar during the whole of his life. That he exercised a very commanding influence over the people is manifest from the numerous intimations we have of the elders coming to inquire of him what message God had sent through him (ch. viii:1; xiv:1; xx:1; xxxiii:31, 32, etc.). Carpzov (pp. 203-204) relates several traditions respecting his death and sepulcher. It is there said that he was killed at Babylon by *the chief of the people* on account of his having reproved him for idolatry; that he was buried *in the field of Maur* in the tomb of Shem and Arphaxad, and that his sepulcher was still in existence. Such traditions are obviously of very little value.

Ezekiel was contemporary with Jeremiah and Daniel. The former had sustained the prophetic office during a period of thirty-four years before Ezekiel's first predictions, and continued to prophesy for six or seven years after. It appears probable that the call of Ezekiel to the prophetic office was connected with the communication of Jeremiah's predictions to Babylon (Jer. li:59), which took place the year preceding the first revelation to Ezekiel (Hävernick, p. ix). The greater part of Daniel's predictions are of a later date than those of Ezekiel; but it appears that his piety and wisdom had become proverbial even in the early part of Ezekiel's ministry (ch. xiv:14, 16; xxviii:3).

(3) **Character.** Most critics have remarked the vigor and surpassing energy which are manifest in the character of Ezekiel. The whole of his writings show how admirably he was fitted, as well by natural disposition as by spiritual endowment, to oppose the 'rebellious house,' the 'people of stubborn front and hard heart,' to whom he was sent. The figurative representations which abound throughout his writings, whether drawn out into lengthened allegory, or expressing matters of fact by means of symbols, or clothing truths in the garb of enigma, all testify by their definiteness the vigor of his conceptions. Things seen in visions are described with all the minuteness of detail and *sharpness* of outline which belong to real existences. But this characteristic is shown most remarkably in the entire subordination of his whole life to the great work to which he was called. We never meet with him as an ordinary man; he always acts and thinks and feels as a prophet. This energy of mind developed in the one direction of the prophetic office is strikingly displayed in the account he gives of the death of his wife (ch. xxiv:15-18). It is the only memorable event of his personal history

which he records, and it is mentioned merely in reference to his soul-absorbing work. There is something inexpressibly touching as well as characteristic in this brief narrative—the 'desire of his eyes' taken away with a stroke—the command not to mourn—and the simple statement, 'so I spake unto the people in the morning and at even my wife died; and I did in the morning as I was commanded.' That he possessed the common sympathies and affections of humanity is manifest from the beautiful touch of tenderness with which the narrative is introduced. We may even judge that a mind so earnest as his would be more than usually alive to the feelings of affection when once they had obtained a place in his heart. He then, who could thus completely subordinate the strongest interests of his individual life to the great work of his prophetic office, may well command our admiration and be looked upon as 'a truly gigantic phenomenon.' It is interesting to contrast Ezekiel in this respect with his contemporary Jeremiah, whose personal history is continually presented to us in the course of his writings; and the contrast serves to show that the peculiarity we are noticing in Ezekiel belongs to his individual character, and was not necessarily connected with the gift of prophecy.

That Ezekiel was a poet of no mean order is acknowledged by almost all critics.

EZEKIEL, BOOK OF (e-zē'ki-el).

(1) **Genuineness.** The genuineness of the writings of Ezekiel has been the subject of very little dispute. According to Jewish tradition doubts were entertained as to the canonicity of the book on the ground of its containing some apparent contradictions to the law, as well as because of the obscurity of many of its visions. These, however, were removed, it is said, by Rabbi Hananias, who wrote a commentary on the book, in which all these difficulties were satisfactorily solved (*Mischna*, ed. Surenhusius, *Præf. ad Part.* iv; *Carpzov. Introd.*, pt. iii. p. 215; but still, on account of their obscurity, the visions at the beginning and close of the book were forbidden to be read by those who were under thirty years of age (*Carpzov.*, p. 212).

Some minor continental critics of the last century have impugned the canonicity of the last nine chapters, but their arguments have little weight or probability. The book belongs to that not very numerous class which, from beginning to end, maintains by means of favorite expressions and peculiar phrases such a unity of tone as by that circumstance alone to prevent any suspicion that separate portions of it are not genuine.

(2) **Canonicity.** The canonicity of the book of Ezekiel in general is satisfactorily established by Jewish and Christian authorities. There is, indeed, no explicit reference to it, or quotation from it, in the New Testament. Eichhorn (*Einleit.* p. 218) mentions the following passages as having apparently a reference to this book (Rom. ii:24; comp. Ezek. xxxvi:21; Rom. x:5; Gal. iii:12; comp. Ezek. xx:11; 2 Pet. iii:4; comp. Ezek. xii:22, but none of these are quotations). The closing visions of Ezekiel are clearly referred to, though not quoted, in the last chapters of the Apocalypse. The prophet Ezekiel is distinctly referred to by the son of Sirach: *Ezekiel, who saw a vision worthy of belief, which the Cherubim pointed out to him upon a chariot*; and also by Josephus (*Antiq.* x:5, sec. 1; 6, sec. 3; 7, sec. 2; 8, sec. 2).

The book of Ezekiel is also mentioned as forming part of the canon in the catalogues of Melito, Origen, Jerome and the Talmud.

(3) **Unity.** There is no evidence that the book, as at present existing, was ever considered two; and the testimony of Josephus himself that only twenty-two books were received as sacred (*Contr. Apion.* i:8), appears quite opposed to such a supposition, since in whatever way the division of the Old Testament into twenty-two books is made there cannot be two out of the number left for Ezekiel.

(4) **Predictions.** The central point of Ezekiel's predictions is the destruction of Jerusalem. Previously to this catastrophe his chief object is to call to repentance those who were living in careless security; to warn them against indulging in blind confidence that, by the help of the Egyptians (Ezek. xvii:15, 17; comp. Jer. xxxvii:7), the Babylonian yoke would be shaken off, and to assure them that the destruction of their city and temple was inevitable and fast approaching. After this event his principal care is to console the captives by promises of future deliverance and return to their own land, and to encourage them by assurances of future blessings. His predictions against foreign nations stand between these two great divisions, and were for the most part uttered during the interval of suspense between the Divine intimation that Nebuchadnezzar was besieging Jerusalem (chap. xxiv:2), and the arrival of the news that he had taken it (chap. xxxiii:21). The predictions are evidently arranged on a plan corresponding with these, the chief subjects of them, and the time of their utterance is so frequently noted that there is little difficulty in ascertaining their chronological order. This order is followed throughout, except in the middle portion relating to foreign nations, where it is in some instances departed from to secure greater unity of subject (for example, chap. xxix:17).

(5) **Arrangement.** The arrangement, by whomsoever made, is very evidently designed, and it seems on many accounts most probable that it was made by Ezekiel himself. This is maintained by Hävernicks on the following grounds: (1) The arrangement proceeds throughout on a plan corresponding with the subjects of the predictions. In those against foreign nations chronological is united with material order, whilst in those which relate to Israel the order of time is strictly followed. (2) The predictions stand in such connection with each other that every part has reference to what has preceded it. Historical notices are occasionally appended to the predictions, which would scarcely be done by a transcriber; for example, the notice respecting himself in chaps. xi, xxiv, xxv, and the close of chap. xix, which Hävernicks translates 'This is a lamentation and was for a lamentation.'

(6) **Divisions.** The whole book is divided by Hävernicks into nine sections, as follows:

1. Ezekiel's call to the prophetic office (chap. i-iii:15).

2. Series of symbolical representations and particular predictions foretelling the approaching destruction of Judah and Jerusalem (chap. iii:16; vii).

3. Series of visions presented to the prophet a year and two months later than the former, in which he is shown the Temple polluted by the worship of Adonis—the consequent judgment on the inhabitants of Jerusalem and on the priests—and closing with promises of happier times and a purer worship (chap. viii-xi).

4. A series of reproofs and warnings directed especially against the particular errors and prejudices then prevalent amongst his contemporaries (chap. xii-xix).

5. Another series of warnings delivered about a year later, announcing the coming judgments to be yet nearer (chap. xx-xxiii).

6. Predictions uttered two years and five months later, when Jerusalem was besieged, announcing to the captives that very day as the commencement of the siege (comp. 2 Kings xxv:1), and assuring them of its complete overthrow (chap. xxiv).

7. Predictions against foreign nations (chap. xxv-xxxii).

8. After the destruction of Jerusalem a prophetic representation of the triumph of Israel and of the kingdom of God on earth (chap. xxxiii-xxxix).

9. Symbolic representation of Messianic times and of the establishment and prosperity of the kingdom of God (chap. xl-xlvi).

(7) **Obscurity.** The latter part of the book has always been regarded as very obscure. It will be seen by the brief notices of the contents of the section which we have given above that Hävernick considers the whole to relate to Messianic times. The predictions respecting Gog (chap. xxxviii-xxxix) have been referred by some to Antiochus Epiphanes; by others to Cambyses, to the Chaldæans, the Scythians, the Turks, etc. Mr. Granville Penn has interpreted them of Napoleon and the French (*The Prophecy of Ezekiel concerning Gogue*, etc., 1815). The description of the temple (chap. xl-xliii) has been thought by many to contain an account of what Solomon's temple was; by others of what the second temple should be. The difficulties of all these hypotheses seem to be insuperable.

(8) **Style.** Michaelis remarks truly that Ezekiel lived at a period when the Hebrew language was declining in purity, when the *silver* age was succeeding to the *golden* one. It is, indeed, to the matter rather than the language of Ezekiel that we are to look for evidence of poetic genius. His style is often simply didactic, and he abounds in peculiarities of expression, Aramaisms, and grammatical anomalies, which, while they give individuality to his writings, plainly convince the decline of the language in which he wrote.

F. W. G.

EZEL (ē'zel), (Heb. זֶלְזֵל, *eh'zel*, separation, departure), a stone near Saul's residence which was the scene of the parting of David and Jonathan (1 Sam. xx:19).

EZEM (ē'zem), (Heb. עֵזֶם, *eh'tsem*, bone), one of the towns belonging to Simeon (1 Chron. iv:29). In Josh. xix:3, the name appears slightly changed in the Heb., which gives the reading AZEM (which see).

EZER (ē'zer), (Heb. עֵזֶר, *eh'zer*, help).

1. A son of Ephraim, slain by the inhabitants of Gath while engaged in a foray on their cattle (1 Chron. vii:21), B. C. about 1680.

2. A priest who took part in the dedication of the walls of Jerusalem in the time of Nehemiah (Neh. xii:42), B. C. 446.

3. Son of Hur and father of Hushah (1 Chron. iv:4), B. C. 1658.

4. A Levite, son of Jeshua, who ruled Mizpeh. He helped repair the walls of Jerusalem in the time of Nehemiah (Neh. iii:19), B. C. 446.

5. A Gadite warrior who came to David in the wilderness (1 Chron. xii:9), B. C. 1054.

6. (Heb. אֵזֶר, *ay'zer*, treasure, Ges., union, Fürst), a son of Seir, and chief of Edom (Gen. xxxvi:21, 27, 30; 1 Chron. i:38, 42), B. C. about 1927. In 1 Chron. i:38 the form EZAR appears in many

modern editions; but the edition of 1611 has the correct form Ezer.

EZIONGEBER (ē'zi-on-gā'ber or gē'bur) (Heb. בֶּרֶךְ יִצְיֹן, *ets-yone'gheh'ber*, giant's back bone), a very ancient city lying not far from Elath, on the eastern arm of the Red Sea.

It is first mentioned in Num. xxxiii:35, as one of the stations where the Hebrews halted in their journeyings through the desert (Deut. ii:8). From its harbor it was that Solomon (1 Kings ix:26) sent the fleet which he had then built, to the land of Ophir, whence they fetched 420 talents of gold. Here, also, Jehoshaphat (1 Kings xxii:48; 2 Chron. xx:36) built a fleet 'to go to Ophir,' but because he had joined himself with Ahaziah, 'king of Israel, who did wickedly,' 'the ships were broken that they were not able to go to Tarshish.' No trace of Eziongeber seems now to remain, unless it be in the name of a small wady with brackish water, *Ain el-Ghudyan*, opening into el-Arabah from the western mountain, some distance north of Akabah. However different the names el-Ghudyan and Ezion may be in appearance, yet the letters in Arabic and Hebrew all correspond (see ELATH).

J. R. B.

EZNITE (ēz'nite), (Heb. אֵזְנִית, *ay'tsen*, spear, sharp), he was, according to 2 Sam. xxiii:8, named Adino, prefect of David's bodyguard.

This seems to be another name for Joshebbasshebeth, a Hachmonite. In the parallel sentence (1 Chron. xi:11) other not very different Hebrew words occur, translated in the A. V., "lifted up his spear." Gesenius (Thes. pp. 994, 995) and Kennicott (*Dissertation* i, pp. 71-128) maintain that the translation of the Chronicles is correct.

Luther expresses the following opinion: "We believe the text to have been corrupted by a writer, probably from some book in an unknown character and bad writing, so that *orer* should be substituted for *adino*, and *ha-eznib* for *eth hanitho*;" that is to say, the reading in the Chronicles (1 Chron. xi:11), "he swung his spear," should be adopted (K. and D., *Com.*). The phrase in 2 Sam. xxiii:8, "that sat in the seat," is taken by Gesenius to be the name of this warrior, as given above, Joshebbasshebeth; a name to be found in the R. V. at this place with the difference of an *s* for *sh*. The Douay Version gives "Jeshabam sitting in the chair. . . . was like the most tender little worm of the wood who killed 800 men at one onset." The name Adino is omitted, although it is in the LXX. Jashobeam is in 1 Chron. xi:11, A. V., as the name.

EZRA (ēz'ra), (Heb. עֲזָרָה, *ez-raw'*, help; Sept. *Ἐσδρας*, *es'dras*). The form of the name is Chaldaic or Aramaic.

1. One of the priests who returned with Zerubbabel from Babylon (Neh. xii:1). In Neh. x:2-8 the name is written AZARIAH.

2. A descendant of Judah, the father of several sons. His own parentage is not given (1 Chron. iv:17).

3. The celebrated Ezra was a Jewish scribe and priest, who, about the year B. C. 458, led the second expedition of Jews back from the Babylonian exile into Palestine. This Ezra ought to be distinguished from the Ezra who went up as one of the chiefs of the priests and Levites under Zerubbabel (Neh. xii:1, 13, 33).

1. **Family.** Ezra was a lineal descendant from Phinehas, the son of Aaron. He is stated in Scripture to be the son of Seraiah, the son of Azariah, which Seraiah was slain at Riblah by

order of Nebuchadnezzar, having been brought thither a captive by Nebuzaradan. But as 130 years elapsed between the death of Seraiah and the departure of Ezra from Babylon, and we read that a grandson of Seraiah was the high priest who accompanied Zerubbabel on the first return to Jerusalem, seventy years before Ezra returned thither, we may suppose that by the term *son* here, as in some other places, the relationship of grandson, or of a still more remote direct descendant, is intended. In addition to the information given in the books of Ezra and Nehemiah, that Ezra was a 'ready scribe of the law of Moses,' 'a scribe of the words of the Commandments of the Lord and of his statutes to Israel,' 'a scribe of the law of the God of Heaven,' and 'a priest.' We are told by Josephus that he was high priest of the Jews who were left in Babylon; that he was particularly conversant with the laws of Moses, and was held in universal esteem on account of his righteousness and virtue.

The rebuilding of the temple of Jerusalem, which had been decreed by Cyrus in the year B. C. 536, was, after much powerful and vexatious opposition, completed in the reign and by the permission of Darius Hystaspis, in the year B. C. 515.

2. History. (1) Appointed Leader. In the year B. C. 457 Ezra was sent by 'Artaxerxes Longimanus and his counsellors to inquire concerning Judah and Jerusalem, according to the law of his God, which was in his hand, and to carry the silver and gold which the king and his counsellors freely offered unto the God of Israel.' Permission was also granted to him to take with him all the silver and the gold which he could find in all the province of Babylon, together with the free-will offerings which the people and priests offered for the house of God at Jerusalem. Of this treasure he was directed to employ as much as was requisite in the purchase of offerings according to the law of Moses, and the surplus he was to lay out according to his discretion for the maintenance of the externals of religion. Ezra was also charged to convey vessels for the house of God in Jerusalem, and, lest these gifts should be insufficient, he was empowered to take from the king's treasure-house as much as should be wanted to supply everything needful for the house of the Lord. At the same time that this commission was given to Ezra, Artaxerxes Longimanus issued a decree to the keepers of the king's treasure beyond the river, to assist Ezra in everything in which he needed help, and to supply him liberally with money, corn, wine, oil and salt. It was further enacted that it should not be lawful to impose tribute upon any priest, Levite or other person concerned in ministration in the house of God. Ezra was commissioned to appoint 'according to the wisdom of God which was in his hand,' magistrates and judges to judge all the people beyond the river that knew the laws of his God; and was enjoined to teach them to those who knew them not. The reason of the interest for the worship of God at this time evinced by Artaxerxes, appears to have been a fear of the Divine displeasure, for we read in the conclusion of the decree to the treasurers beyond the river, 'Whatsoever is commanded by the God of Heaven let it be diligently done for the house of the God of Heaven; for why should there be wrath against the realm of the king and his sons?' We are also told (Ezra vii:6) that the king granted Ezra all his request, and Josephus informs us that Ezra, being desirous of going to Jerusalem, requested the king to grant him recommendatory letters to the governor of Syria. We may there-

fore suppose that the dread which Artaxerxes entertained of the Divine judgment, was the consequence of the exposition to him by Ezra of the history of the Jewish people.

(2) Preparations. Ezra assembled the Jews who accompanied him on the banks of the River Ahava, where they halted three days in tents. Here Ezra proclaimed a fast, as an act of humiliation before God and a season of prayer for Divine direction and safe conduct; for, on setting out, he 'was ashamed to require a band of soldiers and horsemen to help them against the enemy by the way,' because he had asserted to the king that the hand of his God is upon all them that seek him for good. Ezra next committed the care of the treasures which he carried with him to twelve of the chief priests, assisted by ten of their brethren, appointing these to take charge of the treasures by the way and deliver them safely in the house of the Lord at Jerusalem.

(3) At Jerusalem. On the twelfth day from their first setting out Ezra and his companions left the River Ahava and arrived safely at Jerusalem in the fifth month, having been delivered from the hand of the enemy and of such as lay in wait by the way. Three days after their arrival the treasures were weighed and delivered into the custody of some Levites. The returning exiles offered burnt offerings to the Lord. They delivered also the king's commissions to the viceroys and governors, and gave needful help to the people and the ministers of the Temple.

(4) Foreign Wives. When Ezra had discharged the various trusts committed to him the princes of the Jews came to him and complained that the Jewish people generally, who had returned from the captivity, and also the priests and Levites, but especially the rulers and princes, had not kept themselves separate from the people of the land, but had done according to the abominations of the remnant of the nations whom their forefathers had driven out, and married their daughters and allowed their children to intermarry with them. On hearing this Ezra was deeply afflicted; and, according to the Jewish custom, he rent his mantle and tore the hair of his head and beard. They gathered round him all those who still feared God and dreaded his wrath for the transgression of those whom he had brought back from captivity. Having waited till the time of the evening sacrifice, Ezra rose up, and, having again rent his hair and his garments, made public prayer and confession of sin. The assembled people wept bitterly, and Shechaniah, one of the sons of Elam, came forward to propose a general covenant to put away the foreign wives and their children. Ezra then arose and administered an oath to the people that they would do accordingly.

(5) Commission of Investigation. Proclamation was also made that all those who had returned from captivity should within three days gather themselves together unto Jerusalem, under pain of excommunication and forfeiture of their goods. The people assembled at the time appointed, trembling on account of their sin and of the heavy rain that fell. Ezra addressed them, declaring to them their sin, and exhorting them to amend their lives by dissolving their illegal connections. The people acknowledged the justice of his rebuke, and promised obedience. They then requested that, as the rain fell heavily, and the number of transgressors was great, he would appoint times at which they might severally come to be examined respecting this matter, accompanied by the judges and elders of every city. A commission was therefore formed, consisting of

Ezra and some others, to investigate the extent of the evil. This investigation occupied three months.

In Neh. viii. we read that, on the occasion of the celebration of the feast of the seventh month, subsequently to Nehemiah's numbering the people, Ezra was requested to bring the book of the law of Moses; and that he read therein standing upon a pulpit of wood, which raised him above all the people.

(6) **Later History.** Josephus tells us that Ezra died soon after this celebration of the Feast of Tabernacles, and was buried at Jerusalem with great magnificence. According to some Jewish chroniclers he died in the year in which Alexander came to Jerusalem, in the same year in which took place the death of the prophets Haggai, Zechariah and Malachi, and in which prophecy became ex-

EZRA, WRITINGS OF. The *canonical writings* of Ezra are, besides the book which bears his name, most likely the two books of the Chronicles.

The reasons for ascribing the books of Chronicles to the authorship of Ezra have already been investigated in the article CHRONICLES (which see). Some authors have ascribed the books of Nehemiah and Esther likewise to Ezra, although they differ in style. (See ESTHER; NEHEMIAH.)

1. **Book of Ezra.** (1) **Authenticity.** Ezra speaks from chap. vii:27 to chap. ix:15, in the first person. There is an essential difference between public events which a man recollects, though only as in a dream, to have heard of at the time when they occurred, and those which preceded his birth. The former we think of with reference to ourselves; the latter are foreign to us. The epoch

Tomb of Ezra.

tingent. According to other traditions Ezra returned to Babylon and died there at the age of 120 years.

(7) **Death.** The Talmudic statement is that he died at Zamzumu, a town on the Tigris, while on his road from Jerusalem to Susa, whither he was going to converse with Artaxerxes about the affairs of the Jews. A tomb said to be his is shown on the Tigris, about twenty miles above its junction with the Euphrates.

3. **Character.** Ezra was distinguished by an ardent love for the word of God. "He had prepared his heart to seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments" (Ezra vii:10). He was faithful in instruction, and delighted "to teach the laws of his God to such as knew them not" (verse 25). He is a conspicuous example of a man who devoutly believed in Divine providence and who was ever praying for the "good hand of God" to be upon him. While a man of prayer he was also thoroughly practical in attending to the affairs of life, and manifested a firm and inflexible will in carrying out his plans. He was willing to endure any privations or make any sacrifices to advance his national religion and secure the best interests of his people, whom he so ardently loved.

and duration of the former we measure by our own life; the latter belong to a period for which our imagination has no scale. Life and definiteness are imparted to all that we hear or read with respect to the events of our own life' (Niebuhr, *On the Distinction Between Annals and History*). These remarks, which Niebuhr made in reference to Tacitus, are, in a great measure, applicable also to Ezra and account for several of those differences between the various parts of his book, which have so much startled some modern Biblical scholars that they have presumptuously undertaken to show the precise seams or sutures by means of which various fragments of different authors were brought together. In this attempt they have been especially guided by the change of the third to the first person, for which change we account by the above remarks of Niebuhr.

Instances of similar change of person are so frequent in ancient authors that rhetoricians have introduced it among the rhetorical figures under the name of *enallage personarum*. The prophetic writings of the Old Testament furnish examples of such *ἐναλλαγή*. For instance, Ezek. i:1-3; Zech. i:1, vi:1, vii:1, 4, 8; Jer. xx:1, sq. Comp. with verse 7, sq. xxi:1; xxviii:1-5, xxxvii:1-8; Hos. i:2-3, iii:1. So also in Habakkuk, Dan-

iel, etc. The frequency of this *ἐναλλαγή*, especially in the prophetic parts of the Old Testament, arises from either the more objective or more subjective tendency of the style, which, of course, varies in harmony with the contents of the chapter. We may observe this *ἐναλλαγή* even in our own writings, from which we are certainly taught by modern scholastic usage to eradicate it, although it would, if preserved, frequently give greater freshness to our communications. We have made these remarks in order to show the perfect futility of the chief argument adduced by modern writers against the original unity of the book of Ezra, some of whom, on account of the *cnallage personarum*, assert that chap. vii:1-26 was written by an author different from that of the portion immediately following, up to chap. ix:15; and that, again, the subsequent portion to the end of the book was indited by a still different writer.

We pass over other still more futile arguments against the authenticity of the book and express our opinion that even Hävernäck does not rightly set forth the truth of the matter when, in his *Einleitung*, he says that this *cnallagé* arose from Ezra's imitation of the prophetic usage.

(2) **Contents.** The book of Ezra contains *memorabilia*, or records of events occurring about the termination of the Babylonian exile. It comprises accounts of the favors bestowed upon the Jews by Persian kings; of the rebuilding of the temple; of the mission of Ezra to Jerusalem, and his regulations and reforms. Such records forming the subject of the book of Ezra, we must not be surprised that its parts are not so intimately connected with each other as we might have expected if the author had set forth his intention to furnish a complete history of his times.

(3) **Period Covered.** The events narrated in the book of Ezra are spread over a period of about seventy-nine years, under the reigns of Cyrus; Cambyses; Magus, or Pseudo-Smerdis; Darius Hystaspis; Xerxes, and Artaxerxes, in the eighth year of whose reign the records of Ezra cease.

(4) **Similarities to Chronicles.** The beginning of the book of Ezra agrees verbatim with the conclusion of the second book of Chronicles, and terminates abruptly with the statement of the divorces effected by his authority, by which the marriages of Israelites with foreign women were dissolved.

Since the book of Ezra has no marked conclusion, it was, even in early times, considered to form part of the book of Nehemiah, the contents of which are of a similar description. As, however, the book of Ezra is a collection of detached records of remarkable events occurring at the conclusion of the exile and in the times immediately following it, attempting no display of the art of book-making, the mere want of an artificial conclusion cannot be considered a sufficient reason for regarding it as the first portion of Nehemiah. It is, however, likely that the similarity of the contents of the books of Ezra and Nehemiah was the cause of their being placed together in the Hebrew Bible.

(5) **Arrangement.** The arrangement of the facts in the book of Ezra is chronological. The book may be divided into two portions: (1) The *first* consists of chapters i-vi, and contains the history of the returning exiles and of their rebuilding of the temple, and comprises the period from the first year of Cyrus (B. C. 536) to the

sixth year of Darius Hystaspis (B. C. 515). (2) The *second* portion contains the personal history of the migration of Ezra to Palestine in the seventh year of Artaxerxes. This latter portion, embracing chapters vii-x, is an autobiography of Ezra during about twelve or thirteen months, in the seventh and eighth years of the reign of Artaxerxes Longimanus.

2. **Non-canonical Books.** Thus far mention has been made of the canonical book of Ezra; there are, however, four books that have received this name, viz., the book noticed above, the only one which was received into the Hebrew canon under that name; the book of Nehemiah and the two apocryphal books of Esdras, concerning which see *ESDRAS*.

C. H. F. B.

EZRACH (ěz'răk), (Heb. עֲרַח, *ez-rawch'*).

This word occurs only once in Scripture, namely, in Ps. xxxvii:35: 'I have seen the wicked in great power, spreading himself like a green bay tree' (*ezrach*). Commentators and translators have differed respecting the meaning of this word, some supposing it to indicate a specific tree, as the laurel; and others, supported by the Septuagint and Vulgate, the cedar of Lebanon. It is by some considered to mean an evergreen tree, and by others a green tree that grows in its native soil, or that has not suffered by transplanting, as such a tree spreads itself luxuriantly. It appears likely that the Hebrew word must have been derived from the Arabic *ashruk*, which is described in Arabic works on *Materia Medica* as a tree having leaves like the *ghar*, that is, the bay tree or *laurus nobilis* of botanists. If *ezrach*, therefore, was originally the same word as *ashruk*, then it would indicate some tree resembling the bay tree rather than the bay tree itself; but until that can be discovered the latter is, upon the whole, well suited to stand as its representative.

The bay tree is well known to be common in the south of Europe, as in Spain, Italy, Greece and the Levant. It is usually from twenty to thirty feet in height, often having a bushy appearance, from throwing up so many suckers; but in England it has attained a height of sixty feet, which is not unusual in warmer climates. It is unnecessary to allude further to the celebrity which it attained among the ancients—a celebrity which has not yet passed away, the laurel wreath being still the symbolical crown as well of warriors as of poets. Its ever-green, grateful appearance, its thick shade, and the agreeable spicy odor of its leaves, point it out as that which was most likely in the eye of the Psalmist. (See *BAY TREE*.) J. F. R.

EZRAH (ěz'răh), (Heb. עֲזָרָה, *ez-raw'*, a form of *ezer* or *ezra*), a descendant of Judah (1 Chron. iv:17).

EZRAHITE (ěz'ra-hîte), (Heb. עֲזָרָהִי, *ez-raw-kee'*), the designation of Ethan (1 Kings iv:31; Ps. lxxxix), and Heman (Ps. lxxxviii).

The word is derivable from *Ezrah*, or *Zerach*, which is almost the same in Hebrew. In 1 Chron. ii:6, Ethan and Heman are given as sons of Zerach. Another Heman and Ethan are given as musicians and Levites (1 Chron. vi) and elsewhere.

EZRI (ěz'rî), (Heb. עֲזִירָה, *ez-ree'*, help of Jehovah).

A son of Chelub and superintendent of those who worked in the field for David (1 Chron. xxvii:26), B. C. 1014.
