W. W.	Rev. William Wright, M. A. and LL. D., of Trinity College, Dublin, Ireland. Translator of "Seiler's Biblical Hermeneutics."

INTRODUCTION.

THE present age is pre-eminently one of research and inquiry. The comparative sciences, relating to every realm of knowledge, have brought to the earnest student material for thought and investigation never before accessible.

It has been more than half a century since the Biblical cyclopædias by Kitto, Robinson and Watson were issued, and nearly as long since the scholarly works by Dr. William Smith appeared. All of these are now far out of date, and there is a growing demand for a help to Bible study in similar form, but containing the latest and best results of modern scholarship, arranged in the most convenient manner for ready reference, to take their place. The advancement in Biblical and physical learning in the last fifty years, and the clearer understanding of many things concerning the Jewish and contemporaneous oriental nations as well, have made great changes in Biblical reference works essential to intelligent investigation. In the light of modern science the ablest minds of the day are re-examining the claims of the Bible to be the Word of God. Its unity and consequent integrity have been challenged. New statements of Biblical truth are being made and new methods of interpretation employed. But it still maintains its supreme place as the Book of books. It has been cast into the furnace of criticism, heated seven times hotter than for any other book, and it has come forth without even the smell of fire upon its sacred leaves. The result of this testing process has been to reduce the study of the Bible to a science, which is pursued with a greater or less degree of intensity and application by people of intelligence generally. To commit portions of it to memory, to be catechised in its doctrines and to enter into its devotions are not adequate Bible study. These are elementary steps in securing scriptural knowledge, but they do not unfold all the truths which thoughtful people seek after. The liberation of the human mind from bondage to creeds has ushered in an era of independent thought. But while this age is one of reason, it should not be in the light of facts before us, any less one of devotion. Science is the handmaid of religion, as has been devoutly said, and where pure religion abounds, the highest degree of intelligence is attained. Men who are thoroughly loyal to the Bible as the unimpeachable word of God, have been foremost to strengthen the hand of the archæologist and to furnish the means which enable him to bring from the long buried past the story of the nations and the individuals mentioned in its sacred records. Their faith has taken a firmer hold upon its authenticity and inspiration through the surprising results which have been attained. From sunburnt bricks and monuments of stone, disinterred from mounds of ancient ruins, new witnesses have come forth bringing invaluable testimony to the accuracy of the Hebrew writers.

Unfriendly critics had decided long ago that some of the cities mentioned in the Old Testament were purely mythical, but the spade of the explorer has revealed the foundations of the cities themselves. It was held that the names of certain kings were merely allegorical or the interpolation of some ignorant scribe, but in several instances the documents and inscriptions of these kings have been found, and even their bodies have been produced as incontrovertible evidence of the accuracy of the record of the sacred writings. More light is also continually breaking upon the Scriptures by reason of the progress made in Biblical Literature and Hermeneutics through the superior critical scholarship of the day.

The aim of the Editors of this Encyclopædia is to furnish a work of ready reference for ministers, Sunday School workers and Bible students of every class, including the general public. It will be found to contain the best information accessible upon all the varied themes of Bible lore. It is especially rich in the results of the most recent discoveries in Bible lands. The pick and spade of the archæologist have forced the ancient ruins to yield up treasures richer than the gold of Ophir. The decipherment of historic inscriptions in the palaces and upon the tombs of ancient monarchs have

added a constantly increasing accumulation of testimony to the truthfulness of the Biblical record. Claims of adverse criticism have been dispersed in the light of these discoveries as clouds of fog and mist before the shining of the ascending sun. The growing intelligence of the people demands familiarity, not only of the ministry but of all who teach the Bible, with current facts which will enable them to arm the minds and hearts of the young with weapons defensive and offensive against the stalking foes of Christianity, namely, doubt, agnosticism, and scholastic infidelity. Such facts have been collated and arranged in this work in the most convenient form for reference. As a critical and popular Encyclopædia and Dictionary it will meet the needs both of men of learning and of those who have not received a classical training. To produce accuracy and fullness, more than one hundred and twenty writers have contributed articles to these volumes. Most of them are specialists in History, Geography, Philology, Ethnology, Theology, or Archæology, and among them are several of the greatest scholars of Europe and America. Never before have the services of so remarkable a corps of contributors been secured for any popular Biblical reference work. These writers differ in their opinions and views, and are alone responsible for them. But the whole work has been prepared on such a basis that it may confidently be regarded as a safe and reverent guide to the meaning of the Holy Scriptures. On controverted points in criticism and theology, as well as on ecclesiastical subjects, the questions at issue have been presented calmly and thoughtfully by recognized leaders of the different schools under discussion. The book has thus been divested of sectarian features and appeals to the whole Christian Church. Every Cyclopædia of value has been consulted in the preparation of this work; and to these due credit has been given in specific articles. Much that was pertinent in the scholarly work of Kitto has been reproduced, and the names of the distinguished men who contributed to it have been given. Inasmuch, however, as conditions have so materially changed since that work was written, it has been necessary to thoroughly revise the articles which have been utilized, eliminating those features that have been rendered invalid by reason of later discoveries and the advanced scholarship and science of the present day, and adding the features which are necessary in order to render them entirely modern and conformable to the knowledge now extant. In the practical, devotional and figurative treatment of many of the subjects Brown's Dictionary of the Bible, which is unexcelled in these particulars, has been freely used.

The plan of this Encyclopædia embraces many features of great advantage over other similar works. Among these some of the most notable are the following:

1. The Hebrew and Greek words at the heads of all articles are pronounced phonetically and their literal definition given, by which the reader is enabled to have a working knowledge of these languages, so far as such words are concerned, with little or no outside assistance. The English pronunciation of each Bible term is also indicated by diacritical marks in the body of the work; and in the Appendix all these words are grouped together alphabetically and pronounced by the phonetic method.

2. In these busy times it is often necessary to read rapidly, and yet intelligently, and therefore, to aid the eye and fix the attention, subheads and other convenient modes of division are employed in this work which enable one to see at a glance the part which may be especially sought.

3. There are many helps to Bible Study which cannot advantageously be placed in the body of such a work as this, yet which are frequently needed in the study of the Scriptures. Such features have been embodied in a conveniently arranged Appendix, which will be found to contain much matter of value and interest designed to aid in the study of the Bible. These have been carefully prepared especially for this work, and we feel warranted in the belief that taken together with the body of the work they make this book unrivaled in its kind.

It is confidently claimed that no other *popular* Biblical encyclopædia or dictionary approaches this in completeness, or presents such a great number of points of interest, convenience and usefulness.

THE POPULAR AND CRITICAL BIBLE ENCYCLOPÆDIA.

A, the first letter in almost all alphabets. In Hebrew, it is called *Aleph*, א, which signifies *ox*, from the shape of it in the old Phœnician alphabet, where it somewhat resembles the head and horns of that animal. (Plutarch, *Quæst. Sympos.* ix:2; Gesenii *Thesaur. Heb.* p. 1.) This Hebrew name has passed over, along with the letter itself, into the Greek *Alpha*. Both the Hebrews and Greeks employed the letters of their alphabets as numerals; and A, (*Aleph* or *Alpha*) therefore, denoted *one, the first*. Hence our Lord says of himself, that he is *Alpha and Omega*, i. e., the first and the last, the beginning and the ending, as he himself explains it (Rev. i:8, 11; xxi:6; xxii:13). This expression in the Old Testament was employed to denote the eternity of God (Is. xlv:6). The Church very early adopted these two letters as a symbol of the *eternal divinity* of our Lord, and used it extensively on monuments of every description, sometimes alone, but more frequently in connection with the cross and the monogram of Christ, in its various forms, as follows:

A. The use of *a* or *an* before a word which began with vocal *h* varied at the date of the Authorized Version (A. D. 1611). Thus we find *a* half in Exod. xxv:10, but *an* half in Dan. xii:7; *a* harp in 1 Chron. xxv:3, but *an* harp in 1 Sam. xvi:16; *a* hammer in Jer. xxiii:29, but *an* hammer in Judges iv:21 (see also Gen. xxvii:11; 2 Kings i:8; 2 Kings xii:9, and Exod. xxviii:32). *An* is sometimes abbreviated to *a* and appears to have been closely related to *on*—"Fell *a* sleep" Acts vii:60, "fell *on* sleep" (Acts xiii:36). In Exod. xix:18, "Mount Sinai was altogether on *a* smoke," means all Mount Sinai smoked. In 2 Chron. ii:18, "To set the people *a* work," means to set them to work. "A work" should be written with a hyphen (*a-work*). "Sets it *a-work*."—Shakespeare.

AARON (ā'ron, vulgarly pronounced ār'on), (Heb. אַהֲרֹן, *ā-har-one'*, perhaps mountaineer or enlightener).

The eldest son of the Levite Amram and Jochebed (Exod. vi:20; Num. xxvi:59). He was the brother of Moses and Miriam, being three years older than the great lawgiver (Exod. vii:7), and was born B. C. about 1725, which was the year before Pharaoh's edict for destroying the Hebrew male infants, and three years before his brother Moses (Exod. vii:7).

(1) Marriage. He married Elisheba (or Elizabeth), the daughter of Amminadab (Exod. vi:23), of the tribe of Judah (Matt. i:4; Luke iii:32), by whom he had four sons, Nadab and Abihu, Eleazar and Ithamar. The eldest two were destroyed by fire from heaven; from the other two

the race of the chief priests was continued in Israel (1 Chron. xxiv:2 *sq.*).

(2) Divine Appointment. The Lord having appeared to Moses and directed him to deliver the Israelites from their oppressive bondage in Egypt, appointed Aaron to be his assistant and speaker, he being the more eloquent of the two (Exod. iv:14-16; vii:1). Moses, having been directed by God to return into Egypt, left Midian, where he had been (B. C. 1688-1648), and with his family entered upon his journey. At Mount Horeb he met his brother Aaron, who had come thither by a divine direction (Exod. iv:27), and after the usual salutations, and conference as to the purposes of the Almighty, the brothers prosecuted their journey to Egypt (B. C. 1648). Upon their arrival in Egypt, they called together the elders of Israel, and having announced to them the pleasure of the Almighty, to deliver the people from their bondage (Exod. iv:29-31), they presented themselves before Pharaoh, and exhibited the credentials of their Divine mission by working several miracles in his presence.

(3) Conduct of Pharaoh. Pharaoh, however, drove them away, and for the purpose of repressing the strong hopes of the Israelites of a restoration to liberty, he ordered their laborious occupations to be greatly increased. Overwhelmed with despair, the Hebrews bitterly complained to Moses and Aaron, who encouraged them to sustain their oppressions, and reiterated the determination of God to subdue the obstinacy of Pharaoh, and procure the deliverance of his people (Exod. v). In all their subsequent intercourse with Pharaoh, during which several powerful remonstrances were made, and many astonishing miracles performed, Aaron appears to have taken a very prominent part, and to have pleaded with much eloquence and effect the cause of the injured Hebrews (Exod. vi-xii).

(4) Priest. Moses having ascended Mount Sinai, to receive the tables of the law, after the ratification of the covenant made with Israel, Aaron, his sons, and seventy elders, followed him partly up. They saw the symbol of the Divine presence, without sustaining any injury (Exod. xxiv:1-11), and were favored with a sensible manifestation of the good pleasure of the Lord. It was at this time that Moses received a divine command regarding the Hebrew ecclesiastical establishment and the investing of Aaron and his four sons with the priestly office (B. C. 1647), the functions of which they were to discharge before Jehovah forever (Lev. viii:12). (See TABERNACLE; PRIEST.) Under this new institution the whole tribe to which he belonged, that of Levi, was set apart as the sacerdotal or learned caste. (See LEVITES.)

In Ps. cxxxiii:2, the name of Aaron occurs as the first anointed priest.

(5) **The Golden Calf.** During the forty days that Moses continued in the mount, the people became impatient, and tumultuously addressed Aaron: "Make us gods," said they, "which shall go before us: for as to this Moses, the man that brought us up out of the land of Egypt, we know not what is become of him" (Exod. xxxii:1 sq.). Aaron desired them to bring their pendants, and the carrings of their wives and children, which, being brought, were melted down under his direction, and formed into a golden calf. This calf, or young bull, was doubtless that of the bull-god Apis, at Memphis, whose worship extended throughout Egypt. However, to fix the meaning of this image as a symbol of the true God, Aaron was careful to proclaim a feast to Jehovah for the ensuing day. On that day in front of this calf Aaron built an altar, and the people sacrificed, danced, and diverted themselves around it, after the fashion of the Egyptian festivals of the calf-idol, exclaiming, "These be thy gods, O Israel, which brought thee up out of the land of Egypt." The Lord having informed Moses of the sin of the Israelites (Exod. xxxii:7), he immediately descended, carrying the tables of the law, which, as he approached the camp, he threw upon the ground and broke (Exod. xxxii:19), reproaching the people with their transgression, and Aaron with his weakness.

(6) **Repentance and Consecration.** Aaron at first endeavored to excuse himself, but afterwards became penitent, humbled himself, and was pardoned. The Tabernacle having been completed, and the offerings prepared, Aaron and his sons were consecrated with the holy oil, and invested with the sacred garments (Exod. xl; Lev. viii). Scarcely, however, were the ceremonies connected with this solemn service completed, when his two eldest sons, Nadab and Abihu, were destroyed by fire from heaven, for presuming to burn incense in the Tabernacle with strange fire (Lev. x:1-11). It is recorded to his great honor that, at the words spoken by Moses, he "held his peace" when this terrible incident occurred. (See ABIHU.)

The high-priest applied himself assiduously to the duties of his exalted office, and during the period of nearly forty years that it was filled by him the incidents which bring him historically before us are very few. Aaron would seem to have been liable to some fits of jealousy at the superior influence and authority of his brother; for he at least sanctioned the invidious conduct of his sister Miriam (see MIRIAM), who, after the wife of Moses had been brought to the camp by Jethro, became apprehensive for her own position, and cast reflections upon Moses, much calculated to damage his influence, on account of his marriage with a foreigner—always an odious thing among the Hebrews. For this Miriam was struck with temporary leprosy, which brought the high-priest to a sense of his sinful conduct, and he sought and obtained forgiveness (Num. xii).

(7) **Conspiracy Against Moses and Aaron.** Some twenty years after (B. C. 1627), when the camp was in the wilderness of Paran, a formidable conspiracy was organized against the sacerdotal authority exercised by Aaron and his sons and the civil authority exercised by Moses. This conspiracy was headed by chiefs of influence and station—Korah, of the tribe of Levi, and Dathan and Abiram, of the tribe of Reuben. (See KORAH.) But the Divine appointment was confirmed by the signal destruction of the conspirators; and the next day, when the people assembled tumultuously and murmured loudly at the destruction which had overtaken their leaders and friends, a fierce pestilence broke out among them, and they fell by thousands on the spot. When this was seen,

Aaron, at the command of Moses, filled a censer with fire from the altar, and, rushing forward, 'he stood between the dead and the living' and the plague was stayed (Num. xvi).

(8) **Aaron's Rod.** This was, in fact, another attestation of the Divine appointment; and, for its further confirmation, the chiefs of the several tribes were required to lay up their staves overnight in the Tabernacle, together with the rod of Aaron for the tribe of Levi; and in the morning it was found that, while the other rods remained as they were, that of Aaron had budded, blossomed, and yielded the fruit of almonds. The rod was preserved in the Tabernacle (comp. Heb. ix:4) in evidence of the Divine appointment of the Aaronic family to the priesthood (Num. xvii:10).

(9) **Death.** Aaron was not allowed to enter the Promised Land, on account of the distrust which he, as well as his brother, manifested when the rock was stricken at Meribah (Num. xx:8-13). His death indeed occurred very soon after that event (B. C. 1602). For when the host arrived at Mount Hor, the Divine mandate came that Aaron, accompanied by his brother Moses and by his son Eleazar, should ascend to the top of that mountain in the view of all the people; and that he should there transfer his pontifical robes to Eleazar, and then die (Num. xx:23-29). He was one hundred and twenty-three years old when his career thus terminated (Num. xxxiii:32), and his son and his brother buried him in a cavern of the mountain. (See HOR, MOUNT.) The Israelites mourned for him thirty days; and, on the first day of the month Ab, the Jews yet hold a fast in commemoration of his death. The Arabs still show the traditional site of his grave (Num. xx:28; xxxiii:38; Deut. xxxii:50), reported to be in Petra.

(10) **Descendants.** His descendants, termed 'Children of Aaron' (Josh. xxi:4, 10, 13, etc.), and, poetically, 'House of Aaron' (Ps. cxv:10, 12), were the priesthood in general (his lineal descendants being the high-priests, who were confined to the firstborn in succession). (See AARONITES.) Even in the time of David these were a very numerous body (1 Chron. xii:27).

(11) **Character.** Judging from the acts of his life, we should suppose him to have been, like many eloquent men, a man of impulsive and comparatively unstable character, leaning almost wholly on his brother; incapable of that endurance of loneliness and temptation which is an element of real greatness; but at the same time earnest in his devotion to God and man, and therefore capable of sacrifice and of discipline by trial' (Smith's *Bib. Dict.*).

Figurative. Aaron's priesthood was designed as 'a shadow of heavenly things,' to lead the Israelites to look forward 'to better things to come,' when another priest should arise 'after the order of Melchizedek' (Heb. vi:20). (See MELCHIZEDEK.)

'Aaron was a type of Christ, not in his personal, but in his official, character: (1) As high-priest, offering sacrifice; (2) in entering into the holy place on the great day of atonement, and acting as intercessor; (3) in being anointed with the holy oil by *effusion*, which was prefigurative of the Holy Spirit with which our Lord was endowed; (4) in bearing the names of all the tribes of Israel upon his breast and shoulders, thus presenting them always before God, and representing them to him; (5) in being the medium of their inquiring of God by Urim and Thummim, and of the communication of his will to them' (McC. & S., *Cyc.*). 'With unequalled purity, patience, pity,

courage, and labor, Christ, amidst inconceivable injuries and temptations, faithfully executed his work. At the expense of his life he averted the burning plague of endless vengeance from his unreasonable foes; and, having finished his work of obedience, he publicly and willingly, on Calvary, surrendered himself unto death, bequeathing his robes of finished righteousness to his spiritual seed' (Brown's *Bib. Dict.*).

AARONITES (ā'ron-ites), (Heb. same as Aaron).

Levites of the family of Aaron; the priests who particularly served the sanctuary (Num. iv:5, *sq.*).

To the number of 3,700 fighting men, with Jehoiada, the father of Benaiah, at their head, they joined David at Hebron (1 Chron. xii:27). Later on in their history we find their chief was Zadok (1 Chron. xxvii:17). (See AARON; PRIEST; LEVITES).

AB (āb), (Heb. אב, *awb*, father).

1. Is found as the first member of several compound Hebrew proper names—such as Abner, *father of light*; Abiezer, *father of help*, etc. By a process which it is not difficult to conceive, the idea of a natural father became modified into that of *author, cause, source* (as when it is said, 'has the rain a father?' Job xxxviii:28). So that, in course of time, the original meaning was so far modified that the word was sometimes applied to a woman, as in Abigail, *father of joy* (1 Sam. xxv:14).

2. The Chaldee name of that month, which is the fifth of the ecclesiastical and eleventh of the civil year of the Jews. It commenced with the new moon of our *August* (the reasons for this statement will be given in the article MONTHS), and always had thirty days. This month is pre-eminent in the Jewish calendar as the period of the most signal national calamities. The 1st is memorable for the death of Aaron (Num. xxxiii:38). The 9th is the date assigned to the following events: The declaration that no one then adult, except Joshua and Caleb, should enter into the Promised Land (Num. xiv:30); the destruction of the first Temple by Nebuchadnezzar (2 Kings, xxv:8, comp. Jer. lii:12); (to these first two 'the fast of the fifth month,' in Zech. vii:5; xiii:19; Jer. i:3 is supposed to refer); the destruction of the second Temple by Titus; the devastation of the city Bettar, and the slaughter of Ben Cozibah (Bar Cocāb), and of several thousand Jews there; and the ploughing up of the foundations of the Temple by Turnus Rufus—the two last of which happened in the time of Hadrian.

The 9th of the month is observed by the Jews as a fast, in commemoration of the destruction of the first Temple; the 15th is the day appointed for the festival of the wood-offering, in which the wood for the burnt-offering was stored up in the court of the Temple; to which Nehemiah alludes in x:34, and xiii:31. Lastly, the 18th is a fast in the memory of the western lamp going out in the Temple in the time of Ahaz (2 Chron. xxix:7, where the extinction of the lamps is mentioned as a part of Ahaz's attempts to suppress the Temple service). For an inquiry into what is meant by the *western or evening lamp* see CANDLESTICK.

ABACUC (āb'a-kūk), (Lat. *Abacuc*, the Greek text being no longer extant), one of the minor prophets, Habakkuk (2 Esdr. i:40). (See HABAKKUK.)

ABADDON (a-bād'don), or Apollyon, (Heb. אפוליון, *ab-bad'yon*, destruction), (Gr. Ἀβaddon, *ab-au dohn'*, in Rev. ix:11, where it is rendered by the Greek Ἀπολλύων, *ap-ol-loo'ohn*, destroyer).

The former is the Hebrew name, and the latter the Greek name, ascribed (Rev. ix:11) to the angel of the abyss, or Tartarus, *i. e.*, the angel of death. He is represented as the king and head of the Apocalyptic locusts under the fifth trumpet

(Rev. ix:11). In the Bible, the word *Abaddon* means destruction (Job xxxi:12) or the place of destruction, *i. e.*, the subterranean world, Hades, the region of the dead (Job xxvi:6; xxviii:22; Prov. xv:11). There is a general connection with the *destroyer*—referred to in 1 Chron. xxi:15. It is in fact the second of the seven names which the Rabbins apply to that region; and they deduce it particularly from Ps. lxxxviii:11. 'Shall thy loving kindness be declared in the grave, or thy faithfulness in (*abaddon*) destruction?' (See HADES; LOCUST.)

ABADIAS (āb-a-dī'as), (Gr. Ἀβιδίας, *ab-ah-dee'-as*), Obadiah, son of Jehiel (1 Esdr. viii:35).

ABAGARUS (a-bāg'a-rūs). See ABGARUS.

ABAGTHA (a-bāg'thā), (Heb. אבגתא, *ab-ag-tharw'*, given by fortune).

One of the seven chamberlains of the Persian king Ahasucrus or Xerxes (Esth. i:10), who were commanded by the king to bring Queen Vashti into the royal presence (Esth. i:10), B. C. after 529.

ABANA (āb'a-nā), or Amana, (Heb. אבנא, *ab-aw-naw'*, or אבנא, *am-aw-naw'*, the former being the *kethib* or Hebrew text, and the latter the *keri* or marginal reading; Sept. Ἀβανά the name of one of the rivers which are mentioned by Naaman (2 Kings v:12), "Abana and Pharpar," as "rivers of Damascus."

Amana signifies 'perennial,' and is probably the true name. At the present day it is scarcely possible to discover with certainty the stream to which this name was applied. A recent conjecture seeks the Abana in the small river Fidgi, which rises in a pleasant valley fifteen or twenty miles to the northwest of Damascus and falls into the Barrada, the main stream by which Damascus is irrigated. The most recent opinion is that it must refer to some prominent stream like the Barrada, or Barada, rather than to a small river like the Fidgi or Fijih. Pharpar may be identified with the Arvaj. Robinson and J. L. Porter concur in this view. Dr. Mansford (*Scripture Gazetteer*, *s. v.*) remarks: 'Naaman may be excused for his national prejudice in favor of his own rivers, which, by their constant and bountiful supply render the vicinity of Damascus one of the most beautiful in the world.'

ABARIM (āb'a-rīm), (Heb. אבארם, *ab-aw-reem'*, regions beyond).

A mountain or, rather, chain of mountains which form or belong to the mountainous district east of the Dead Sea and the lower Jordan. It presents many distinct masses and elevations, commanding extensive views of the country west of the river (Num. xxi:11; xxvii:12; xxxiii:47, 48). From one of the highest of these, called Mount Nebo, Moses surveyed the Promised Land before he died. From the manner in which the names Abarim, Nebo and Pisgah are connected (Deut. xxxii:49, 'Get thee up into this mountain Abarim, unto Mount Nebo; and xxxiv:1, 'Unto the mountain of Nebo, to the top of Pisgah') it would seem that Nebo was a mountain of the Abarim chain, and that Pisgah was the highest and most commanding peak of that mountain. The loftiest mountain of the neighborhood is Mount Attarous, about ten miles north of the Arnou, and travelers have been disposed to identify it with Mount Nebo. It is represented as barren, its summit being marked by a wild pistachio tree overshadowing a heap of stones. (See NEBO.)

ABATTACHIM (a-bāt'ta-kim), (Heb. אבטחם, *ab-at-tah-kheem'*).

This word occurs only in Numbers xi:5, where the murmuring Israelites say, 'We remember the

fish which we did eat freely in Egypt, the cucumbers and the *abattachim*, etc. The last word has always been rendered 'MELONS.' The probable correctness of this translation may be inferred from melons having been known to the nations of antiquity; and it may be proved to be so by comparing the original term with the name of the melon in a cognate language such as the Arabic. (See MELONS.)

ABBA (äb'ba), (Heb. אָבָא, *ab-bah'*), (Gr. Ἀββᾶ), is the Hebrew word אָב, *avb*, father, under a form peculiar to the Chaldee idiom.

The Aramaic dialects do not possess the definite article in the form in which it is found in Hebrew. They compensate for it by adding a syllable to the end of the simple noun, and thereby produce a distinct form, called by grammarians the *emphatic*, or *definitive*, which is equivalent (but with much less strictness in its use, especially in Syriac) to a noun with the article in Hebrew. This emphatic form is also commonly used to express the vocative case of our language—the context alone determining when it is to be taken in that sense (just as the noun with the article is sometimes similarly used in Hebrew). Hence this form is appropriately employed in all the passages in which it occurs in the New Testament (Mark xiv:36; Rom. viii:15; Gal. iv:6), in all of which it is an invocation. Why *Abba* is, in all these passages, immediately rendered by ὁ πατήρ, instead of πατήρ may perhaps be in part accounted for on the supposition that, although the Hellenic (as well as the classical) Greek allows the use of the nominative with the article for the vocative, the writers of the New Testament preferred the former, because the article more adequately represented the force of the emphatic form. Probably to guard against the appearance of too great a familiarity, the writers of the New Testament, instead of using the Greek word πάπα, *papa*, retained the foreign form *Abba* to give greater emphasis and dignity. St. Paul says, 'Ye have received the Spirit of adoption, whereby we cry, *Abba, Father*' (Rom. viii:15). In some of the Eastern churches, as the Syriac, Coptic and Ethiopic, the title was given in an improper sense to their bishops.

ABDA (äb'dä), (Heb. אָבְדָא, *ab-daw'*, servant, slave, worshiper of God).

1. Father of Adoniram, who was an officer of the tribute under Solomon (1 Kings iv:6).

2. Son of Shammua (Neh. xi:17), called Obadiah in 1 Chron. ix:16 (B. C. after 444).

ABDEEL (äb'de-el), (Heb. אָבְדֵּעַל, *ab-deh-ale'*, servant of God), father of Shelemiah (Jer. xxxvi:26), B. C. 606.

ABDI (äb'di), (Heb. אָבְדִי, *ab-dee'*, my servant), the name of three great men.

1. A Levite or Merarite, who lived in the time of David, an ancestor of Ethan, the Singer (1 Chron. vi:44).

2. The father of Kish, a Merarite, in the reign of Hezekiah (2 Chron. xxix:12).

3. One of the 'sons' of Elam, who divorced his foreign wife after the return from Babylon (Ezra x:26), B. C. 459.

ABDIAS (äb-dī'as), (Lat. *Abdias*). See **ABADIAS**.

ABDIEL (äb'di-el), (Heb. אָבְדֵּיֵל, *ab-dee-ale'*, servant of God).

Son of Gemi and father of Ahi, one of the principal Gadites resident in Gilead (1 Chron. v:15), B. C. between 1093 and 782.

ABDON (äb'don), (Heb. אָבְדוֹן, *ab-dohn'*, a servant; Sept. Ἀβδών).

1. A son of Hillel, of the tribe of Ephraim, and twelfth judge of Israel. He succeeded Elon, and judged Israel eight years (B. C. 1233-1225). His administration appears to have been peaceful; for nothing is recorded of him but that he had forty sons and thirty nephews, who rode on young asses—a mark of their consequence (Judg. xii:13-15). Abdon died (B. C. 1225). He is probably the Bedan referred to in 1 Sam. xii:11.

2. The firstborn of Jehiel of the tribe of Benjamin (perhaps by his wife Maachah) and resident at Jerusalem (1 Chron. viii:30; ix:36), B. C. 1093.

3. The son of Michah, a contemporary of Josiah (2 Chron. xxxiv:20), B. C. 628. He is called Achbor in 2 Kings xxii:12.

4. A son of Shashak and chief Benjamite of Jerusalem (1 Chron. viii:23), B. C. 624.

5. An important city of the tribe of Asher, which was given to the Levites of Gershom's family (Josh. xxi:30; 1 Chron. vi:74). The same place according to several MSS. is mentioned in Josh. xix:28, instead of Hebron. It is probably identical with the ruined site *Ab'deh*, a few miles northeast of Accho.

ABEDNEGO (a-bēd-ne-gō' or a-bēd'ne-gō), (Heb. אָבְדֵּנְגוֹ, *ab-ade'nego'*, servant of Nego, *i. e.*, Nebo); the Chaldee name imposed by the king of Babylon's officer upon Azariah, one of the three companions of Daniel. With his two friends, Shadrach and Meshach, he was miraculously delivered from the burning furnace, into which they were cast for refusing to worship the golden statue which Nebuchadnezzar had caused to be set up in the plain of Dura (Dan. iii).

Some have supposed this Azariah to be Ezra, but without sufficient grounds, for Ezra was a priest of the tribe of Levi (Ezra vii:5), while this Azariah was of the royal blood and consequently of Judah (Dan. i:3, 6), B. C. about 606.

ABEL (ä'be), (Heb. אָבֵל, *heh-bel*, properly Hebel, a breath), the second son of Adam and Eve.

(1) **Personal History.** Cain and Abel having been instructed by their father Adam in the duty of worship to their Creator, each offered the first fruits of his labors. Cain, as a husbandman, offered the fruits of the field; Abel, as a shepherd, offered fatlings of his flock. God was pleased to accept the offering of Abel, in preference to that of his brother (Heb. xi:4), in consequence of which Cain sank into melancholy, and, giving himself up to envy, formed the design of killing Abel; which he at length effected, having invited him to go into the field (Gen. iv:8, 9; 1 John iii:12). It should be remarked that in our translation no mention is made of Cain inviting his brother into the field: 'Cain talked with Abel, his brother; and it came to pass when they were in the field, that Cain rose up against Abel his brother and slew him.' But in the Samaritan text the words are express; and in the Hebrew there is a kind of chiasm, thus: 'and Cain said unto Abel his brother,'—'and it came to pass,' etc., without inserting what he said to his brother.

(2) **Jewish Tradition.** The Jews had a tradition that Abel was murdered in the plain of Damascus; and accordingly his tomb is still shown on a high hill, near the village of Sinie or Seneiah, about twelve miles northwest of Damascus, on the road to Baalbek. The summit of the hill is still called *Nebbi Abel*; but circumstances lead to the probable supposition that this was the site, or in the vicinity of the site, of the ancient Abela or Abila. The legend, therefore, was most likely suggested by the ancient name of the place.

(3) **Two-Fold Interpretation.** To the name Abel a two-fold interpretation has been given. Its primary signification is *weakness* or *vanity*, as the word *Abel*, from which it is derived, indicates. By another rendering it signifies *grief* or *lamentation*, both meanings being justified by the Scripture narrative. Cain (*a possession*) was so named to indicate both the joy of his mother and his right to the inheritance of the firstborn; Abel received a name indicative of his weakness and poverty when compared with the supposed glory of his brother's destiny, and *prophetically* of the pain and sorrow which were to be inflicted on him and his parents.

(4) **Faith.** Paul, speaking in commendation of Abel, says (Heb. xi:4): 'By faith he offered unto God a more excellent sacrifice than Cain; by which he obtained witness that he was righteous, God testifying of his gifts; and by it he being dead yet speaketh,' even after his death. Our Savior places Abel at the head of those saints who had been persecuted for righteousness' sake, and distinguishes him by the title *righteous* (Matt. xxiii:35; comp. 1 John iii:12). It is probable that there was some command of God in reference to the rite of sacrifice with which Abel complied, and which Cain disobeyed. Abel by his faith was *justified*, or accepted as *righteous*. Cain had no faith; his offering was not expressive of this principle. He proudly rejected the ordinance of sacrifice. (See SACRIFICE.)

(5) **Conjectures.** Ancient writers abound in observations on the mystical character of Abel, and he is spoken of as the representative of the pastoral tribes, while Cain is regarded as the author of the nomadic life and character. St. Chrysostom calls him the *Lamb of Christ*, since he suffered the most grievous injuries solely on account of his innocency (*Ad Stagir.* ii:5); and he directs particular attention to the mode in which Scripture speaks of his offerings, consisting of the best of his flock, and of the fat thereof, while it seems to intimate that Cain presented the fruit which might be most easily procured (*Hom. in Gen.* xviii:5). St. Augustine, speaking of regeneration, alludes to Abel as representing the new or spiritual man in contradistinction to the natural or corrupt man, and says, 'Cain founded a city on earth, but Abel as a stranger and pilgrim looked forward to the city of the saints, which is in heaven' (*De Civitate Dei*, xv:1). Abel, he says in another place, was the first fruits of the Church, and was sacrificed in testimony of the future Mediator. And in Ps. cxviii (*Serm.* xxx, sec. 9) he says: 'this city' (that is, 'the city of God') 'has its beginning from Abel, as the wicked city from Cain.' Irenæus says that God, in the case of Abel subjected the just to the unjust, that the righteousness of the former might be manifested by what he suffered (*Contra Hæres.* iii:23).

ABEL (ā'bel), (Heb. אַבֵּל, *aw-bale'*, a grassy place or meadow).

Name of several villages in Israel, with additions in the case of the more important, to distinguish them from one another. From a comparison of the Arabic and Syriac, it appears to mean *fresh grass*; and the places so named may be conceived to have been in peculiarly verdant situations. In 1 Sam. vi:18 it is used as an appellative, and probably signifies *a grassy plain*, instead, as is usually supposed, of a great stone on which the Philistines set the ark.

ABEL-BETH-MAACHAH (ā'bel-bēth-mā'a-kah), (Heb. אַבֵּל בֵּית מַעֲכָה, *aw-bale' bayth-ma-a-kaw'*, meadow of the house of oppression).

A place in the north of Palestine, which seems

to have been of considerable strength from its history, and of importance from its being called 'a mother in Israel' (2 Sam. xx:19). The identity of the city under these different names will be seen by a comparison of 2 Sam. xx:14, 15, 18; 1 Kings xv:20; 2 Chron. xvi:4. The addition of 'Maacah' marks it as belonging to, or being near to, the region Maacah, which lay eastward of the Jordan under Mount Lebanon. This is the town in which Sheba posted himself when he rebelled against David. Eighty years afterwards it was taken and sacked by Benhadad, king of Syria; and 200 years subsequently by Tiglath-pileser, who sent away the inhabitants captives into Assyria (2 Kings xv:29).

ABEL-CHERAMIM (ā'bel-kēr'a-mim), (Heb. אַבֵּל כְּרָמִים, *aw-bale' ker-ah-meem'*, place of the vineyards). A village of the Ammonites, about six miles from Philadelphia, or Rabbath Ammon, according to Eusebius, in whose time the place was still rich in vineyards (Judg. xi:33).

ABEL-MACHEA (ā'bel-mā'kē-a). See ABEL-BETH-MAACHAH.

ABEL-MAIM (a'bel-mā'im), the same as ABEL-BETH-MAACHAH (1 Kings xv:20; 2 Chron. xvi:4), which see.

ABELMEA (ā'bel-mě'a). See ABEL-MEHOLAH.

ABEL-MEHOLAH (ā'bel-me-hō'lah), (Heb. אַבֵּל מְהוֹלָה, *aw-bale' mekh-o-law'*, meadow of dancing), a town supposed to have stood near the Jordan, and some miles (Eusebius says ten) to the south of Bethshan or Scythopolis (1 Kings iv:12). It was probably situated not far from where the Wady el-Maleh emerges into the Aulon or valley of the Jordan. It is remarkable in connection with Gideon's victory over the Midianites (Judg. vii:22), and as the birthplace of Elisha (1 Kings xix:16).

ABEL-MIZRAIM (ā'bel-mīz'ra-īm), (Heb. אַבֵּל מִצְרַיִם, *aw-bale' mits-rah-yim'*, the mourning of the Egyptians).

The name of a threshing floor, so-called on account of the 'great mourning' made there for Jacob by the funeral party from Egypt (Gen. 1:11). Jerome places it between Jericho and the Jordan, where Bethagla afterwards stood. (See ATAD.)

ABEL-SHITTIM (ā'bel-shīt'tim), (Heb. אַבֵּל שִׁטִּים, *aw-bale' shit-teem'*, place of acacias).

A town in the plains of Moab, on the east of the Jordan, between which and Beth-Jesimoth was the last encampment of the Israelites on that side the river (Num. xxxiii:49). It is more frequently called Shittim merely (Num. xxv:1; Josh. ii:1; Mic. vi:5). Eusebius says it was in the neighborhood of Mount Peor; and in the time of Josephus it was known as Abila, and stood sixty stadia from the Jordan (*Antiq.* iv:8, 1; v:1, 1). The place is noted for the severe punishment which was there inflicted upon the Israelites when they were seduced into the worship of Baal-Peor, through their evil intercourse with the Moabites and Midianites. (See BAAL.)

ABEZ (ā'bez), (Heb. אֲבֵז, *eh'bets*, to glean, conspicuous, Josh. xix:20).

A town in the tribe of Issachar, supposedly near the border mentioned between Kishion and Remeth (Josh. xix:20). It is probably the village of *Kunebiz*, called also *Karm-en-Abiz*, lying three miles west-southwest from Iksal.

ABGAR or **ABGARUS** (āb'gar or āb'gārus). A king of Edessa, and of the district Osrhoene, the seventeenth of the twenty kings who bore

this name, and contemporary with Christ. The name does not occur in Scripture, but is celebrated in ecclesiastical history, on account of the correspondence which is said to have passed between him and Christ. The legend is, that Abgar wrote to the Savior, requesting him to come and heal him of the leprosy; to which Christ replied, that he could not come to him, but would send one of his disciples. Accordingly he is said to have sent Thaddeus. Both letters are apocryphal, and may be found in Fabric. *Codex Apoc. N. T.*, p. 317.

ABHORRING (ăb-hôr'ring), (Heb. יִשְׁרָר, *day-rarv-one'*, from an unused root meaning to repulse); an object of aversion; abhorring, contempt (Is. lxvi:24). Translated "contempt" (Dan. xii:2).

ABI (ā'bī), (Heb. אֲבִי, *ab-ee'*).

1. An old form of *father of*, which forms the first part of several Hebrew proper names.

2. The mother of King Hezekiah (2 Kings xviii:2), called also Abijah (2 Chron. xxix:1). Her father's name was Zachariah, perhaps the same who was taken by Isaiah (viii:2) for a witness.

ABIA (a-bī'ā), (Gr. Ἀβιά, *ah-bee-ah'*), a Græcized form of Abijah (Matt. i:7; Luke i:5). Also found in 1 Chron. iii:10, instead of Abiah. (See **ABIAH**.)

ABIAH (a-bī'ah), (Heb. אֲבִיָּה, *ab-ee-yaw'*, father, *i. e.*, possessor or worshiper of Jehovah; a divinely endowed man).

1. Son of Becher, the son of Benjamin (1 Chron. vii:8).

2. Wife of Hezron (1 Chron. ii:24).

3. One of the sons of Samuel, who were intrusted with the administration of justice, and whose misconduct afforded the ostensible ground on which the Israelites demanded that their government should be changed into a monarchy (1 Sam. viii:1-5; 1 Chron. vi:28), B. C. before 1050.

4. Abijah or Abijam, the son of Rehoboam (1 Chron. iii:10; Matt. i:7).

5. Mother of King Hezekiah. (See **ABI**.)

6. Descendant of Eleazar and chief of the eighth of the 24 courses of priests (Luke i:5).

ABIALBON (ā-bī-āl'bon), (Heb. אֲבִי־בֹן, *ab-ee'al-bone'*, father of strength, valiant).

One of David's mighty men (2 Sam. xxiii:31), called in the parallel passage (1 Chron. xi:32) by the equivalent name Abiel. (See **ABIEL** 2.)

ABIASAPH (a-bī'a-sāph), (Heb. אֲבִי־סָפֵן, *ab-ee-aw-sawf'*, father of gathering).

The youngest of the three sons of Korah the Levite (Exod. vi:24), B. C. after 1740. He is not the Ebiasaph mentioned in 1 Chron. vi:23, 37; ix:19. (See **SAMUEL**.)

ABIATHAR (a-bī'a-thar), (Heb. אֲבִי־תָר, *eb-yaw-tharv'*, father of abundance), the thirteenth high-priest of the Jews and fourth in descent from Eli.

When Abiathar's father, the high priest Abimelech, was slain with the priests at Nob, for suspected partiality to the fugitive David, Abiathar escaped the massacre, and bearing with him the most essential part of the priestly raiment (See **ΕΡΗΘ**), repaired to the son of Jesse, who was then in the cave of Adullam (1 Sam. xxii:20-23; xxiii:6).

(1) **High Priest.** He was well received by David, and became the priest of the party during its exile and wanderings. As such he sought and received for David responses from God. When David became king of Judah he appointed Abi-

athar high priest. Meanwhile Zadok had been appointed high priest by Saul, and continued to act as such while Abiathar was high priest in Judah. The appointment of Zadok was not only unexceptionable in itself, but was in accordance with the Divine sentence of deposition which had been passed, through Samuel, upon the house of Eli (1 Sam. ii:30-36). When, therefore, David acquired the kingdom of Israel, he had no just ground on which Zadok could be removed, and Abiathar set in his place; and the attempt to do so would probably have been offensive to his new subjects, who had been accustomed to the ministrations of Zadok, and whose good feeling he was anxious to cultivate. The king got over this difficulty by allowing both appointments to stand; and until the end of David's reign Zadok and Abiathar were joint high priests. How the details of duty were settled, under this somewhat anomalous arrangement, we are not informed.

(2) **Deposed.** As a high priest Abiathar must have been perfectly aware of the Divine intention that Solomon should be the successor of David; he was therefore the least excusable, in some respects, of all those who were parties in the attempt to frustrate that intention by raising Adonijah to the throne. So his conduct seems to have been viewed by Solomon, who, in deposing him from the high priesthood, and directing him to withdraw into private life, plainly told him that only his sacerdotal character, and his former services to David, preserved him from capital punishment. This deposition of Abiathar completed the doom long before denounced upon the house of Eli, who was of the line of Ithamar, the younger son of Aaron. Zadok, who remained the high priest, was of the elder line of Eleazar. Solomon was probably not sorry to have occasion to remove the anomaly of two high priests of different lines, and to see the undivided pontificate in the senior house of Eleazar (1 Kings i:7-19; ii:26-27).

(3) **Apparent Discrepancy.** In Mark ii:26 a circumstance is described as occurring in the days of Abiathar, 'the high priest,' which appears, from 1 Sam. xxi:1, to have really occurred when his father Abimelech was the high priest. Numerous solutions of this difficulty have been offered. The most probable in itself is that which interprets the reference thus 'in the days of Abiathar, *who was afterwards* the high priest' (Bishop Middleton, *Greek Article*, pp. 188-190). But this leaves open another difficulty which arises from the precisely opposite reference (2 Sam. viii:17; 1 Chron. xviii:16; xxiv:3, 6, 31) to 'Abimelech, the son of Abiathar,' as the person who was high priest along with Zadok, and who was deposed by Solomon; whereas the history describes that personage as Abiathar, the son of Abimelech. The only explanation which seems to remove *all* these difficulties—although we cannot allege it to be altogether satisfactory—is, that both father and son bore the two names of Abimelech and Abiathar, and might be, and were called by, either. But although it was not unusual for the Jews to have two names, it was *not* usual for both father and son to have the same two names. We therefore incline to leave the passage in Mark ii:26 as explained above, and to conclude that the other discrepancies arose from an easy and obvious transposition of words by the copyists, which was afterwards perpetrated. In these places the Syriac and Arabic versions have 'Abiathar, the son of Abimelech.'

ABIB (ā'bib), (Heb. אֲבִיב, *aw-beeb'*, from אָבַב, to fructify; properly, an ear of grain), the month of *corn* or *grain*, (Lev. ii:14, "green ears;" Lev.

xxiii:10-14, "ears;" therefore the month of newly-ripe grain; Exod. xiii:4; xxiii:15; xxxiv:18; Deut. xvi:1). The first month of the ecclesiastical year of the Hebrews; afterwards called Nisan. It answered to our March, or part of April. Abib, as above, signifies green ears of corn, or fresh fruits. It was so named because corn, particularly barley, was in ear at that time. It was an early custom to name times, such as months, from observation of nature; and the custom is still in use among many nations. So it was with our Saxon ancestors; and the Germans to this day, along with the usual Latin names of the months, have also others of the above character, *e. g.*, June is also called *Brachmonath*, or month for ploughing; July, *Heumonath*, or Hay-month; November, *Windmonath*, or Wind-month, etc. (See MONTH; JEWISH CALENDAR, in Appendix.)

ABIDA (a-bī'dā), (Heb. אֲבִידָא, *ab-ee-daw'*, father of knowledge, *i. e.*, knowing, 1 Chron. i:33; Gen. xxv:4), the fourth of the five sons of Midian, the son of Abraham, by Keturah (Gen. xxv:4; 1 Chron. i:33). Probably the head of a tribe in the Arabian peninsula (B. C. after 2000).

ABIDAH (a-bī'dah or āb'ī-dah), (Gen. xxv:4). Same as ABIDA.

ABIDAN (a-bī'dan), (Heb. אֲבִידָן, *ab-ee-dawn'*, father of judgment, *i. e.*, judge), son of Gideoni, prince of Benjamin (Num. i:11; ii:22; x:24), B. C. 1210. At the erection of the tabernacle he made his contribution on the ninth day (Num. vii:60-65).

ABIDANI (Gen. xxv:4). Same as ABIDA.

ABIDE (a-bīde'). "Bonds and afflictions *abide* me." (Acts xx:23.) *Abide* means as in old English to *await*. It also takes the meaning to *endure*, to *hear*. "May *abide* the fire" (Num. xxxi:23). "Who can *abide* it" (Joel ii:11).

ABIEL (a-bī'el), (Heb. אֲבִיֵּאל, *ab-ee-ale'*, father of strength, *i. e.*, strong, or father is God).

1. The father of Kish, whose son Saul was the first king of Israel, and of Ner (1 Chron. viii:33; ix:39), whose son Abner was captain of the host to his cousin Saul (1 Sam. ix:1; xiv:51), B. C. 1093.

2. Abiel, an Arbathite, one of the thirty most distinguished men of David's army (1 Chron. xi:32), B. C. about 1000. He is called Abialbon (2 Sam. xxiii:31), a name which has precisely the same signification (*father of strength*) as the other.

The form Abialbon, under which this man's name now appears in the Heb. text of Samuel is due to textual corruption. Wellhausen (on 2 Sam. xxiii:31) supposes the original form to have been Abibaal; but there seems no sufficient reason to doubt the form (Abiel) preserved in Chron.; comp. Driver on 2 Sam. xxiii:31. (G. B. Gray, *Hastings' Bib. Dict.*)

ABIEZER (ā-bī-ē'zer), (Heb. אֲבִיעֶזֶר, *ab-ee-eh'zer*, father of help).

1. The second of three sons of Hammoloketh, sister of Gilead, grandson of Manasseh (Num. xxvi:30; 1 Chron. vii:18), B. C. 1170. He became the founder of the family to which Gideon belonged, and which bore his name as a patronymic—Abiezrites (Judg. vi:34; viii:2; Josh. xvii:2). (See OPHRAH.) Gideon himself has a very beautiful and delicate allusion to this patronymic in his answer to the fierce and proud Ephraimites, who, after he had defeated the Midianites with 300 men, chiefly of the family of Abiezer, came to the pursuit, and captured the two Midianitish princes Zeba and Zalmunna. They sharply rebuked him for having engrossed all the glory of the transaction by not calling them into

action at the first. But he soothed their pride by a remark which insinuated that their exploit, in capturing the princes, although late, surpassed his own in defeating their army:—"What have I done now in comparison with you? Is not the (grape) '*gleaning*' of Ephraim better than the *vine-tage* of Abiezer?" (Judg. viii:1-3).

2. A native of Anathoth, one of David's thirty chief warriors (2 Sam. xxiii:27; 1 Chron. xi:28), B. C. 1000.

ABIEZRITE (ā-bī-ēz'rīte), (Heb. אֲבִיעֶזְרִי, *ab-ee'haw-es-ree'*, father of the Ezrite), an ancestral designation of the descendants of Abiezer (Judg. viii:32; vi:2, 24).

ABIGAIL (āb'ī-gāl), (Heb. אֲבִיגַיִל, *ab-ee-gah'yil*, father of joy, *i. e.*, exultation), contracted Abigal in 2 Sam. xvii:25.

1. The wife of a prosperous sheepmaster, called Nabal, who dwelt in the district of Carmel, west of the Dead Sea (1 Sam. xxv:3; xxvii:3; B. C. 1000). She is known chiefly for her beauty and the promptitude and discretion of her conduct in taking measures to avert the wrath of David which, as she justly apprehended, had been violently excited by the insulting treatment which his messengers had received from her husband. (See NABAL.) She hastily prepared a liberal supply of provisions, of which David's troops stood in much need, and went forth to meet him, attended by only one servant. When they met, he was marching to exterminate Nabal and all that belonged to him; and not only was his rage mollified by her prudent remonstrances and delicate management, but he became sensible that the vengeance which he had purposed was not warranted by the circumstances, and was thankful that he had been prevented from shedding innocent blood. The beauty and prudence of Abigail made such an impression upon David on this occasion, that when, not long after, he heard of Nabal's death, he sent for her, and she became his wife (1 Sam. xxv:14-42). She accompanied him in all his future fortunes (1 Sam. xxvii:3; xxx:5; 2 Sam. ii:2). (See DAVID.) By her it is usually stated that he had two sons, Chileab and Daniel; but it is more likely that the Chileab of 2 Sam. iii:3 is the same as the Daniel of 1 Chron. iii:1; the son of Abigail being known by both these names.

2. The daughter of Nahash (Jesse?), sister of David, wife of Jether, or Ithra, an Ishmaelite, and mother of Amasa (1 Chron. ii:16, 17; 2 Sam. xvii:25), B. C. 1008.

ABIHAIL (āb-i-hā'il), (Heb. אֲבִיחַיִל, *ab-ee-khah'yil*, father of light or splendor).

1. The wife of Rehoboam, king of Judah. She is called the daughter of Eliab, David's elder brother (2 Chron. xi:18), B. C. 972; but as David began to reign more than eighty years before her marriage, and was 30 years old when he became king, we are doubtless to understand that she was only a descendant of Eliab. This name, as borne by a female, illustrates the remarks under AB.

אֲבִיחַיִל, (*ab-ee-kha'yil*, father of might, *i. e.*, mighty). This name, although the same as the preceding in the Authorized Version, is, in the original, different both in orthography and signification. It should be written Abichail. The name was borne by several persons:

2. Abichail, the son of Huri, one of the family chiefs of the tribe of Gad, who settled in Bashon (1 Chron. v:14), B. C. between 1093 and 782.

3. Abichail, the father of Zuriel, who was the father of the Levitical tribes of Merari (Num. iii:35).

4. Abichail, the father of Queen Esther, and

brother of Mordecai (Esth. ii:15), B. C. before 538.

5. The wife of Abishur and mother of Ahban and Molid (1 Chron. ii:29), B. C. considerably before 1612.

ABIHU (a-bi'hu), (Heb. אֲבִיחֻ, *ab-ee-hoo'*, to whom he, *i. e.*, God, is father).

Abihu was the second of the sons born to Aaron, by Elisheba (Exod. vi:23; Num. iii:2; xxvi:60; 1 Chron. vi:3; xxiv:1) who, with his brothers Nadab, Eleazar, and Ithamar, was set apart and consecrated for the priesthood (Exod. xxviii:1).

(1) Establishment of Ceremonial Worship.

When, at the first establishment of the ceremonial worship, the victims offered on the great brazen altar were consumed by fire from heaven, it was directed that this fire should always be kept up; and that the daily incense should be burned in censers filled with it from the great altar.

(2) Fatal Neglect. But one day, Nadab and Abihu presumed to neglect this regulation, and offered incense in censers filled with 'strange' or common fire. For this they were instantly struck dead by lightning, and were taken away and buried in their clothes without the camp (Lev. x:1-11; comp. Num. iii:4; xxvi:61; 1 Chron. xxiv:2). (See AARON.) There can be no doubt that this severe example had the intended effect of enforcing becoming attention to the most minute observances of the ritual service.

(3) Prohibition of Wine. As immediately after the record of this transaction, and in apparent reference to it, comes a prohibition of wine or strong drink to the priests, whose turn it might be to enter the tabernacle, it is not unfairly surmised that Nadab and Abihu were intoxicated when they committed this serious error in their ministrations. (See NADAB.)

ABIHUD (a-bi'hud), (Heb. אֲבִיחֻד, *ab-ee-hood'*, father of renown).

1. One of the two sons of Bela (1 Chron. viii:3), perhaps the same called Ahihud (v:7), B. C. after 1856. (See JACOB.)

2. The great-great-grandson of Zerubbabel and father of Eliakim; among the paternal ancestry of Jesus (Matt. i:13, called 'Abiud'). Probably the same with Juda, son of Joanna and father of Joseph in the maternal line (Luke iii:26), and perhaps with Obadiah, son of Arnan and father of Shecaniah in the O. T. (1 Chron. iii:21), B. C. before 410.

ABIJAH (a-bi'jah), (Heb. אֲבִיחַיָּהוּ, *ab-ee-yaww'*, whose father God is, 2 Chron. xiii:1). He is also called Abijam, 1 Kings xv:1; Neh. x:7; 'Αβίας in 1 Chron. xxiv:10; Neh. xii:4, 17; 'Αγιός in 1 Chron. vii:8; *Abiah* in 1 Sam. viii:2; 1 Chron. vi:28; *Abia* in 1 Chron. iii:10; Matt. i:7; Luke i:5.

1. A son of Becher, one of the sons of Benjamin (1 Chron. vii:8), B. C. post 1856.

2. The daughter of Machir and wife of Hezron (1 Chron. ii:21, 24), B. C. about 1612.

3. The second son of Samuel (1 Sam. viii:2; 1 Chron. vi:28), B. C. about 1093. (See SAMUEL.)

4. Son of Jeroboam, the first king of Israel. He having been seized with a dangerous disease, his mother disguised herself, and visited the prophet Ahijah to know whether he might recover. Ahijah answered her that he would die, and be the only person in his family who would receive funeral honors, and be lamented by Israel (1 Kings xiv:1-18), B. C. about 930. (See JEROBOAM.)

5. A descendant of Eleazar, son of Aaron, and head of the eighth of the twenty-four companies

of priests (1 Chron. xxiv:10; Luke i:5), B. C. about 1014.

6. Called Abijam (1 Kings xiv:31; xv:1), was the son of Rehoboam, and second king of Judah (1 Chron. iii:10). He succeeded his father (B. C. before 918) and reigned three years only. In the first book of Kings he is described as walking in all the sins of his father, and as waging war with Jeroboam, king of Israel. But in 2 Chron. xiii he is represented as professedly and boastfully zealous for the honor of God and for the Levitical priesthood. He is also there said to have obtained a decisive victory over Jeroboam.

7. The daughter of Zechariah, wife of Ahaz, and mother of Hezekiah, king of Judah (2 Chron. xxix:1); called Abi (2 Kings xviii:2).

8. One of the priests who probably affixed their signatures to the covenant made with Nehemiah (Neh. x:7), B. C. 410. He probably returned with Zerubbabel from Babylon, although very old (Neh. xii:4), B. C. 536, and had a son named Zichri (Neh. xii:17).

There is a difficulty connected with the maternity of Abijah, 6. In 1 Kings xv:2, we read, 'His mother's name was Maachah, the daughter of Abishalom;' but in 2 Chron. xiii:2, 'His mother's name was Michaiah, the daughter of Uriel of Gibeah.' Maachah and Michaiah are variations of the same name; and Abishalom is in all likelihood Absalom, the son of David. The word *ban*, rendered 'daughter,' is applied in the Bible not only to a man's child, but to his niece, granddaughter, or great-granddaughter. It is therefore probable that Uriel of Gibeah married Tamar, the beautiful daughter of Absalom (2 Sam. xiv:27), and by her had Maachah, who was thus the daughter of Uriel and granddaughter of Absalom. (See MAACHAH.)

ABIJAM (a-bi'jam), (Heb. אֲבִיחַיָּם, *ab-ee-yawm'*, father of the sea, *i. e.*, seaman). Same as Abijah, 6.

The reference in 1 Kings xiv:1 is to another person. He is called Abijah (1 Chron. iii:10; 2 Chron. xiii:1-22). (See ABIJAH.)

Lightfoot (*Harm. O. T. in loc.*) thinks that the writer in Chronicles, not describing his reign as wicked, admits the sacred *Jah* in his name; but which the book of Kings, charging him with following the evil ways of his father, changes into *Jam*. This may be fanciful; but such changes of name were not unusual (comp. Bethaven; Sychar).

ABILA (ăb'i-la), capital of the Abilene of Lysanias (Luke iii:1) and distinguished from other places of the same name as the Abila of Lysanias ('Αβίλη τοῦ Λυσανίου), and (by Josephus) as "the Abila of Lebanon." It is unnecessary to reason upon the meaning of this Greek name, for it is obviously a form of the Hebrew *Abel*, which was applied to several places, and means a *grassy spot*. This has been supposed to be the same as Abel-beth-Maacah, but without foundation, for that was a city of Naphtali, which Abila was not.

(1) Tradition. An old tradition fixes this as the place where Abel was slain by Cain, which is in unison with the belief that the region of Damascus was the land of Eden. But the same has been said of other places bearing the name of Abela or Abila, and appears to have originated in the belief (created by the Septuagint and the versions which followed it) that the words are identical; but, in fact, the name of the son of Adam is in Hebrew *Hebel*, and therefore different from the repeated local name of Abel. However, under the belief that the place and district derived their name from Abel, a monument upon the top of a high hill, near the source of the

river Barrada, which rises among the eastern roots of Anti-Libanus, and waters Damascus, has long been pointed out as the tomb of Abel, and its length (thirty yards) has been alleged to correspond with his stature.

(2) **Location.** This spot is on the road from Heliopolis (Baalbec) to Damascus, between which towns—thirty-two Roman miles from the former and eighteen from the latter—Abila is indeed placed in the Itinerary of Antoninus.

(3) **Inscription.** About the same distance northwest of Damascus is Souk Wady Barrada, where an inscription was found by Mr. Banks, which, beyond doubt, identifies that place with the Abila of Lysanias.

(4) **Medals.** There are several medals of Abila extant, two of which are of some importance, as they serve to identify the site of the town. On the reverse of one of these is a large bunch of grapes, from which it is to be inferred that the place where it was struck abounded in vineyards. But the most remarkable and decisive medal extant is one which bears a half-figure of the river, with the inscription, "Chrysoroas Claudiaion," and on the reverse, a figure of Victory, and the inscription "Leucadion," the Greek name of the city. We may also remark that Abila, adding the name of CLAUDIA to its other appellations, as it appears from this medal it did, affords a presumption that it was of some importance, and perhaps of considerable magnitude also.

ABILENE (ăb'i-lē'ne), (Gr. *Ἀβιληνή*, *ab-ee-lay-nay'*, Luke iii:1), the small district or territory which took its name from the chief town, Abila. Its situation is in some degree determined by that of the town; but its precise limits and extent remain unknown. Northward it must have reached beyond the Upper Barrada, in order to include Abila; and it is probable that its southern border may have extended to Mount Hermon (Jebel es-Sheikh). It seems to have included the eastern declivities of Anti-Libanus, and the fine valleys between its base and the hills which front the eastern plains. This is a very beautiful and fertile region, well wooded and watered by numerous springs from Anti-Libanus. It also affords fine pastures; and in most respects contrasts with the stern and barren western slopes of Anti-Libanus.

(1) **Government.** This territory had been governed as a tetrachate by Lysanias, son of Ptolemy and grandson of Mennæus (Joseph *Antiq.* xiv:13, 3), but he was put to death, B. C. 33, through the intrigues of Cleopatra, who then took possession of the province (*Antiq.* xiv:4, 1). (See **LYSANIAS.**) After her death it fell to Augustus, who rented it out to one Zenodorus; but as he did not keep it clear of robbers, it was taken from him, and given to Herod the Great (*Antiq.* xv:10, 1; *Bell. Jud.* i:20, 4). At his death, a part (the southern, doubtless) of the territory was added to Trachonitis and Ituræa to form a tetrarchy for his son Philip; but by far the larger portion, including the city of Abila, was then, or shortly afterwards, bestowed on another Lysanias, mentioned by Luke (iii:1), who is supposed to have been a descendant of the former Lysanias, but who is nowhere mentioned by Josephus. Indeed, nothing is said by him or any other profane writer of this part of Abilene until about ten years after the time referred to by Luke, when the emperor Caligula gave it to Agrippa I, as 'the tetrarchy of Lysanias' (Joseph. *Antiq.* xviii:6, 10), to whom it was afterwards confirmed by Claudius. At his death, it was included in that part of his possessions which went to his son Agrippa II.

(2) **Apparent Discrepancy.** This explanation (which we owe to the acuteness and research of Winer), as to the division of Abilene between Lysanias and Philip, removes the apparent discrepancy between Luke, who calls Lysanias tetrarch of Abilene at the very time that, according to Josephus (a part of) Abilene was in the possession of Philip.

"The region of Abilene is also noticed in a Gr. text found in 1873 at Burkush on Hermon, showing that the district included the Antilebanon and Hermon, N. W. of Damascus. There is a cemetery at Abila of Rom. rock-cut tombs on the left of the stream, which here forms a cascade. They are adorned with bas-relief busts, and there are several tombstones with Gr. texts, giving the names of Lucius, Archelaus, Phedistus, Antonia and Philander. N. of the river and E. of the town are foundations of a small Rom. temple" (R. A. Conder, *Hastings' Bib. Dict.*).

ABIMAEL (a-bīm'a-el), (Heb. אֲבִימָאֵל, *ab-ee-maw-ale'*, father is God, or father of Mael), one of the sons of Joktan in Arabia (Gen. x:28; 1 Chron. i:22), B. C. after 2414. (See **ARABIA.**) He was probably the father or founder of an Arabian tribe.

ABIMELECH (a-bīm'e-lĕk), (Heb. אֲבִימֶלֶךְ, *ab-ee-mel'ek*, father of the king, or perhaps royal father).

1. **Philistine King of Gerar.** The name of the Philistine king of Gerar in the time of Abraham (Gen. xx:1, *sqq.* B. C. about 2200) but, from its recurrence, it was probably less a proper name than a titular distinction, like Pharaoh for the kings of Egypt, or Augustus for the emperors of Rome. Abraham removed into his territory after the destruction of Sodom, and fearing that the extreme beauty of Sarah might bring him into difficulties, he declared her to be his sister. The conduct of Abimelech in taking Sarah into his harem shows that even in those early times kings claimed the right of taking to themselves the unmarried females not only of their natural subjects, but of those who sojourned in their dominions. Another contemporary instance of this custom occurs in Gen. xii:15, and one of later date in Esth. ii:3. But Abimelech, obedient to a divine warning communicated to him in a dream, accompanied by the information that Abraham was a sacred person who had intercourse with God, restored her to her husband. As a mark of his respect he added valuable gifts, and offered the patriarch a settlement in any part of the country; but he nevertheless did not forbear to rebuke, with mingled delicacy and sarcasm, the deception which had been practiced upon him (Gen. xx). The most curious point in this transaction seems to be that it appears to have been admitted, on all hands, that he had an undoubted right to appropriate to his harem whatever unmarried woman he pleased—all the evil in this case being that Sarah was already married, so early had some of the most odious principles of despotism taken root in the East. The interposition of Providence to deliver Sarah twice from royal harems will not seem superfluous when it is considered how carefully women are there secluded, and how impossible it is to obtain access to them, or get them back again (Esth. iv:5). It is scarcely necessary to add that these practices still prevail in some Eastern countries, especially in Persia. Nothing further is recorded of King Abimelech, except that a few years after he repaired to the camp of Abraham, who had removed southward beyond his borders, accompanied by Phichol, 'the chief captain of his host,' to invite the patriarch to contract with him a

league of peace and friendship. Abraham consented, and this first league on record (see ALLIANCE) was confirmed by a mutual oath, made at a well which had been dug by Abraham, but which the herdsmen of Abimelech had forcibly seized without his knowledge. It was restored to the rightful owner, on which Abraham named it Beersheba (*the Well of the Oath*), and consecrated the spot to the worship of Jehovah (Gen. xxi: 22-24).

2. Another King of Gerar, in the time of Isaac, who is supposed to have been the son of the preceding (B. C. about 1985). Isaac sought refuge in his territory during a famine, and, having the same fear respecting his fair Mesopotamian wife, Rebekah, as his father had entertained respecting Sarah, he reported her to be his sister. This brought upon him the rebuke of Abimelech, when he accidentally discovered the truth. The country appears to have become more cultivated and populous than at the time of Abraham's visit, nearly a century before, and the inhabitants were more jealous of the presence of such powerful pastoral chieftains. In those times, as now, wells of water were of so much importance for agricultural, as well as pastoral purposes, that they gave a proprietary right to the soil, not previously appropriated, in which they were dug. Abraham had dug wells during his sojourn in the country, and, to bar the claim which resulted from them, the Philistines had afterwards filled them up; but they were now cleared out by Isaac, who proceeded to cultivate the ground to which they gave him a right. (See WELL.) From this time Abimelech forbade his people to do any injury whatever to Isaac or to his wife. Isaac, increasing in riches and power, excited the envy of the Philistines, and Abimelech said to him, "Go from us, for thou art much mightier than we." Isaac, therefore, retired to the valley of Gerar, and afterwards to Beersheba, where Abimelech, with Ahuzzath, his favorite, and Phicol, his general, visited him. Isaac inquired, "Wherefore come ye to me, seeing ye hate me, and have sent me away from you?" To which Abimelech replied, that observing how much he was favored by God, he was desirous of cultivating his friendship, and had come to make a covenant with him. Isaac entertained them splendidly, and the next day concluded a treaty with Abimelech (Gen. xxvi:8-31).

3. King of Shechem, son of Gideon by a concubine, assumed the government of Shechem after the death of his father, and procured himself to be acknowledged king; first, by the inhabitants of Shechem, where his mother's family had an interest, and afterwards by a great part of Israel.

(1) His Conspiracy. At Gideon's house in Ophrah he killed his father's seventy sons, now orphans, on one stone (Judg. ix).

(2) The Bramble King. The youngest, Jotham, only remaining, who, when the people of Shechem assembled to inaugurate Abimelech, appeared on Mount Gerizim, and reproved them by his celebrated fable of the trees (Judg. ix:7-21). (See JOTHAM.)

(3) Revolt of Shechem. After three years, discord arose among the Shechemites, who, reflecting on their injustice, and detesting the cruelty of Abimelech, revolted from him in his absence, and laid an ambushade in the mountains, designing to kill him on his return to Shechem. Of this, Abimelech received intelligence from Zebul, his governor of Shechem. The Shechemites invited Gaal to their assistance, with whom, at a

great entertainment, they uttered many imprecations against Abimelech, who, having assembled some troops, marched all night towards Shechem (Judg. ix:22-29).

(4) Destruction of Shechem. In the morning, Gaal went out of Shechem and gave battle to Abimelech, but was defeated, and, as he was endeavoring to reënter the city, Zebul repulsed him. Abimelech afterwards defeated the Shechemites, destroyed the city and burnt their tower.

(5) Death of Abimelech. At the attack of Thebez, a town about thirteen miles to the N. E., a woman from the top of the tower threw an upper millstone upon his head, and fractured his skull. (See MILL.) He immediately called his armor-bearer and desired him to slay him, "that men say not of me, A woman slew him" (Judg. ix:50-56).

4. A High Priest in the time of David (1 Chron. xviii:16), the same as Abimelech (2 Sam. viii:17), and probably the same as Abiathar. (See ABIATHAR.)

ABINADAB (a-bīn'a-dāb), (Heb. אֲבִינָדָב, *ab-ee-naw-dawb'*, father of generosity).

There are several persons of this name, all of whom are also called Aminadab—the letters *b* and *m* being very frequently interchanged in Hebrew.

1. One of the eight sons of Jesse, and one of the three who followed Saul to the war with the Philistines (1 Sam. xvii:13).

2. One of Saul's sons, who was slain at the battle of Gilboa (1 Sam. xxxi:2), B. C. 1001.

3. A Levite of Kirjath-jearim, in whose house, which was on a hill, the Ark of the Covenant was deposited after being brought back from the land of the Philistines. It was committed to the special charge of his son Eleazar, and remained there seventy years, until it was removed by David, B. C. before 1030 (1 Sam. vii:1,2; 2 Sam. vi:3,4; 1 Chron. xiii:7). (See ARK.)

4. The father of one of the twelve officers appointed by Solomon to provide alternately, month by month, food for the king and his household (1 Kings iv:11), B. C. after 960.

ABINOAM (a-bīn'ō-ām), (Heb. אֲבִינוֹאֵם, *ab-ee-no'am*, father of pleasantness or grace, *i. e.*, gracious), the father of Barak, the judge (Judg. iv:6, 12; v:1, 12), B. C. after 1170.

ABIRAM (a-bī'ram), (Heb. אֲבִירָם, *ab-ee-rawm'*, father of altitude, *i. e.*, high or proud; Sept. Ἀβειρώμ).

1. One of the family-chiefs of the tribe of Reuben, who, with Nathan and On of the same tribe, joined Korah (see KORAH), of the tribe of Levi, in a conspiracy against Aaron and Moses (see AARON), (Num. xvi:1-7; xxvi:9; Deut. xi:6; Ps. cvi:17), B. C. about 1620.

2. Eldest son of Hiel the Bethelite (1 Kings xvi:34). (See HIEL; JERICHO.)

ABISEI (āb-i-sē'i). Same as Aishna mentioned in Esdr. i:2.

ABISHAG (āb'i-shäg), (Heb. אֲבִישָׁג, *ab-ee-shag'*, father of error).

A beautiful young woman of Shunam, in the tribe of Issachar, who was chosen by the servants of David to be introduced into the royal harem, for the special purpose of ministering to him, and cherishing him in his old age. She became his wife; but the marriage was never consummated. Some time after the death of David, Adonijah, his eldest son, persuaded Bathsheba, the mother of Solomon, to entreat the king that Abishag might be given to him in marriage (B. C. about 1013). But as rights and privileges peculiarly regal were associated with the control and possession of the harem of the deceased kings (2 Sam. xii:8), (see HAREM), Solomon detected in this application a

fresh aspiration to the throne, which he visited with death (1 Kings i:1-4; ii:13-25). (See **ADONIJAH**.)

ABISHAI (a-bish'a-ī), (Heb. אֲבִישַׁי, *ab-ee-shah-ee'*, father of gifts), a nephew of David by his sister Zeruiah, and brother of Joab and Asahel.

It is recorded that these three brothers devoted themselves zealously to the interests of their uncle during his wanderings. Though David had more reliance upon the talents of Joab, he appears to have given more of his private confidence to Abishai, who seems to have attached himself in a peculiar manner to his person, as we ever find him near, and ready for council or action, on critical occasions (2 Sam. ii:24; 1 Chron. xix:4). Abishai, indeed, was rather a man of action than of council; and although David must have been gratified by his devoted and uncompromising attachment, he had more generally occasion to check the impulses of his ardent temperament than to follow his advice (2 Sam. iii:30).

(1) **Accompanied David.** Abishai was one of the two persons whom David asked to accompany him to the camp of Saul; and he alone accepted the perilous distinction (1 Sam. xxvi:5-9), B. C. about 994. The desire he then expressed to smite the sleeping king, identifies him as the man who afterwards burned to rush upon Shimei and slay him for his abuse of David (2 Sam. xvi:9; xix:21). For when the king fled beyond the Jordan from Absalom, Abishai was again by his side; and he was entrusted with the command of one of the three divisions of the army which crushed that rebellion (2 Sam. xviii:2), B. C. 967. He was sent by David against Sheba (2 Sam. xx:6-10), B. C. about 1049.

(2) **Rescue of David.** Afterwards, in a war with the Philistines, David was in imminent peril of his life from a giant named Ishbi-benob; but was rescued by Abishai, who slew the giant (2 Sam. xx:15-17). He was also the chief of the three 'mighty ones' (2 Sam. xxiii:19; 1 Chron. xi:20), who, probably in the same war, performed the chivalrous exploit of breaking through the host of the Philistines to procure David a draught of water from the well of his native Bethlehem (2 Sam. xxii:14-17). Among the exploits of this hero it is mentioned that he withstood 300 men and slew them with his spear; but the occasion of this adventure, and the time and manner of his death are equally unknown. In 2 Sam. viii:13, the victory over the Edomites in the Valley of Salt is ascribed to David, but in 1 Chron. xviii:12, to Abishai. It is hence probable that the victory was actually gained by Abishai (1 Kings xi:16), but is ascribed to David as king and commander in chief (comp. 2 Sam. x:14). (See **DAVID**.)

ABISHALOM (a-bish'a-lōm), a fuller form of Absalom (1 Kings xi:16). See **ABSALOM**.

ABISHUA (a-bish'ū-ā), (Heb. אֲבִישׁוּא, *ab-ee-shoo'ah*, father of safety).

1. The son of Phinehas, and fourth high-priest of the Jews (1 Chron. vi:4, 5, 50). The commencement and duration of his pontificate are uncertain, but the latter is inferred from circumstances, confirmed by the Chronicon of Alexandria, to have included the period in which Ehud was judge, and probably the preceding period of servitude to Eglon of Moab. Blair places him from B. C. 1352 to 1302—equivalent to Hales, B. C. 1513 to 1463. This high-priest is called Abiezer by Josephus (*Antiq.* v, 12, 5). (See **PRIEST**, ETC.)

2. A son of Bela and grandson of Benjamin (1 Chron. viii:4), perhaps the same as Jerimoth (1 Chron. vii:7), B. C. after 1856. (See **JACOB**.)

ABISHUR (ăb'i-shur), (Heb. אֲבִישׁוּר, *ab-ee-shoor'*, father of the wall, *i. e.*, stronghold, or perhaps mason), the second named of the two sons of Shammai of the tribe of Judah (1 Chron. ii:28, 29), B. C. after 1612.

ABISUM (ăb'i-sūm). The son of Phinches and father of Boccas (1 Esdr. viii:2).

ABITAL (ăb'i-tāl), (Heb. אֲבִיטָל, *ab-ee-tal'*, father of the dew, *i. e.*, fresh), the fifth wife of David (2 Sam. iii:4; 1 Chron. iii:3), B. C. 1052.

ABITUB (ăb'i-tüb), (Heb. אֲבִיטוּב, *ab-ee-toob'*, father of goodness, *i. e.*, good). A Benjamite, first named of the two sons of Shaharaim (1 Chron. iii:3), B. C. 1052.

ABIUD (ă-bi'ud), a Græcized form (Matt. i:13) of **ABIHUD** (which see).

ABIYONAH (ăb-i-yō'nah), (Heb. אֲבִיוֹנָה, *ab-ee-yo'nah*).

This word occurs only once in the Bible (Eccles. xii:5): 'When the almond tree shall flourish and the grasshopper shall be a burden, and *desire* shall fail; because man goeth to his long home.' The word translated *desire* is *abiyonah*, which by others has been considered to signify the caper plant. The reasons assigned for the latter opinion are: that the Rabbins apply the term *abionoth* to the small fruit of trees and berries, as well as to

Caper Plant (*Capparis Spinosa*).

that of the caper bush; that the caper bush is common in Syria and Arabia; that its fruit was in early times eaten as a condiment, being stimulating in its nature, and therefore calculated to excite desire. (See **CAPER**.)

ABJECT (ăb'jĕkt), (Heb. נָקַי, *nay-keh'*, a smiter), one smiting with the tongue, *i. e.*, a railer, slanderer. Noun (*Lat. abjectus, cast aside*). 'The *abjects* gathered themselves together against me' (Ps. xxxv:15; comp. Jer. xviii:18). As a noun, *abject* was in common use in the seventeenth century, but is now obsolete. We still retain the adjective *abject*.

ABLUTION (ăb-lū'shun), the ceremonial washing whereby, as a symbol of purification from un-

cleanliness a person was considered—(1) to be cleansed from the taint of an inferior and less pure condition, and initiated into a higher and purer state (Lev. viii:6); (2) to be cleansed from the soil of common life, and fitted for special acts of religious service (Exod. xxx:17-21); (3) to be cleansed from defilements contracted by particular acts or circumstances, and restored to the privileges of ordinary life (Lev. xii-xv); (4) as absolving or purifying himself, or declaring himself absolved and purified, from the guilt of a particular act (Deut. xxi:1-9). We do not meet with any such ablutions in patriarchal times; but under the Mosaic dispensation they all occur.

(1) **Influence of Pharisees.** After the rise of the sect of the Pharisees, the practice of ablution was carried to such excess from the affectation of excessive purity, that it is repeatedly brought under our notice in the New Testament through the severe animadversions of our Saviour on the consummate hypocrisy involved in this fastidious attention to the external types of moral purity, while the heart was left unclean. All the practices there described come under the head of purification from uncleanness, the acts involving which were made so numerous that persons of the stricter sect could scarcely move without contracting some involuntary pollution.

For this reason they never entered their houses without ablution, from the strong probability that they had unknowingly contracted some defilement in the streets. They were especially careful never to eat without washing the hands (Mark vii:1-5), because they were peculiarly liable to be defiled. As unclean hands were held to communicate uncleanness to all food (excepting fruit) which they touched, it was deemed that there was no security against eating unclean food but by always washing the hands ceremonially before touching any meat. The Israelites, who, like other Orientals, fed with their fingers, washed their hands before meals, for the sake of cleanliness. (See WASHING.)

(2) **Distinct from Ceremonial Ablutions.** But these customary washings were distinct from the ceremonial ablutions. It was the latter which the Pharisees judged to be so necessary. When, therefore, some of that sect remarked that our Lord's disciples ate 'with unwashed hands' (Mark vii:2), it is not to be understood literally that they did not at all wash their hands, but that they did not *plunge* them ceremonially according to their own practice. In at least an equal degree the Pharisees multiplied the ceremonial pollutions which required the ablution of inanimate objects—'cups and pots, brazen vessels and tables;' the rules given in the law (Lev. vi:28; xi:32-36; xv:23) being extended to these multiplied contaminations. Articles of earthenware which were of little value were to be broken, and those of metal and wood were to be scoured and rinsed with water.

ABNAIM (ăb'na-im), (Heb. אַבְנַיִם, *ab-nay-yim'*). This word is the dual of the Hebrew word, *a stone*, and in this form occurs only twice (Exod. i:16, and Jer. xviii:3).

(1) **The Potter's Wheel.** In the latter passage it undeniably means *a potter's wheel*; but what it denotes in the former, or how to reconcile with the use of the word in the latter text any interpretation can be assigned to it in the former, is a question which (see Rosenmueller *in loc.*) has exercised the ingenuity and patience of critics and philologists.

(2) **Doubtful Meaning.** The meaning appears to have been doubtful, even of old,

and the ancient versions are much at variance. The LXX evades the difficulty by the general expression '*when they are about to be delivered*,' and is followed by the Vulgate, '*et partus tempus advenerit*;' 'and the time of parturition shall have come;' but our version is more definite, and has 'and see them upon *the stools*.' This goes upon the notion that the word denotes a particular kind of open stool or chair constructed for the purpose of delivering pregnant women. The usages of the East do not, however, acquaint us with any such utensil, the employment of which, indeed, is not in accordance with the simple manners of ancient times. Others, therefore, suppose the word to denote stone or other bathing troughs, in which it was usual to lave new-born infants. This conjecture is so far probable that the midwife, if inclined to obey the royal mandate, could then destroy the child without check or observation. (See STOOL.)

ABNER (ăb'ner), (Heb. אַבְנֵר, *ab-nare'*, father of light, *i. e.*, enlightener, 1 Sam. xiv:50).

Abner was the son of Ner, who was the brother of Kish, Saul's father (1 Chron. ix:36). He was, therefore, Saul's full cousin, and was made by him the commander-in-chief of his army (1 Sam. xvii:55; xx:25; xxvi:5; 1 Chron. xxvi:28), B. C. 1030.

(1) **Under Saul.** He does not come much before us until after the death of Saul B. C. 1000. Then the experience which he had acquired, and the character for ability and decision which he had established in Israel, enabled him to uphold the falling house of Saul for seven years, and he might probably have done so longer if it had suited his views. It was generally known that David had been divinely nominated to succeed Saul on the throne; when, therefore, that monarch was slain in the battle of Gilboa, David was made king over his own tribe of Judah, and reigned in Hebron. In the other tribes an influence adverse to Judah existed, and was controlled chiefly by the tribe of Ephraim. Abner, with great decision, availed himself of this state of feeling, and turned it to the advantage of the house to which he belonged, of which he was now the most important surviving member.

(2) **Under Ishbosheth.** He did not, however, venture to propose himself as king, but took Ishbosheth, a surviving son of Saul, whose known imbecility had excused his absence from the fatal fight in which his father and brothers perished, and made him king over the tribes, and ruled in his name (2 Sam. ii:8). This event appears to have occurred five years after Saul's death (2 Sam. ii:10). Ishbosheth reigned in Mahanaim, beyond Jordan, and David in Hebron. A sort of desultory warfare arose between them, in which the advantage appears to have been always on the side of David (2 Sam. ii:1). The only one of the engagements of which we have a particular account is that which ensued when Joab, David's general, and Abner, met and fought at Gibeon (2 Sam. ii:12 sq.).

(3) **Slays Asahel.** Abner was beaten and fled for his life, but was pursued by Asahel, the brother of Joab, and Abishai, who was 'swift of foot as a wild roe.' Abner, dreading a blood-feud with Joab, entreated Asahel, but in vain, to desist from the pursuit, and finding that his life was in danger, he at length ran his pursuer through the body (2 Sam. ii:8-32). This, according to the law of honor which still prevails in the East, put a strife of blood between Joab and Abner. (See BLOOD-REVENGE.) As time went on, Abner, probably rendered arrogant and presumptuous by the conviction that he was the

only remaining prop of the house of Saul, took to his own harem a woman who had been a concubine-wife of Saul (2 Sam. iii:7). This act, from the ideas connected with the harem of a deceased king, was not only a great impropriety, but was open to the suspicion of a political design, which Abner may very possibly have entertained.

(4) **Breaks with Ishbosheth.** A mild rebuke from Ishbosheth, however, enraged him so much that he immediately declared his intention henceforth to abandon his cause and to devote himself to the interests of David. Accordingly, after explaining his views to the elders of the tribes which still adhered to the house of Saul, he repaired to Hebron with authority to make certain overtures to David on their behalf (2 Sam. iii:12, sq.).

(5) **Joins David.** He was received with great attention and respect; and David even thought it prudent to promise that he should still have the chief command of the armies, when the desired union of the two kingdoms took place. Joab, David's general, happened to be absent at the time, but he returned to Hebron just as Abner had left it. He speedily understood what had passed, and his dread of the superior influence which such a man as Abner might establish with

Egyptian Girdles.

David quickened his remembrance of the vengeance which his brother's blood required.

(6) **Slain by Joab.** Unknown to the king, but apparently in his name, he sent a message after Abner to call him back, and as he returned, Joab met him at the gate, and, leading him aside, as if to confer privately with him, suddenly thrust his sword into his body (B. C. 1046). The lamentations of David, the public mourning which he ordered, and the funeral honors which were paid to the remains of Abner (2 Sam. iv:12), the king himself following the bier as chief mourner, exonerated him in public opinion from having been privy to this assassination (2 Sam. iii:31-39; Comp. 1 Kings ii:32). As for Joab, his privilege as a blood-avenger must to a great extent have justified his treacherous act in the opinion of the people, and that, together with his influence with the army, screened him from punishment (2 Sam. iii:6-39).

(7) **David's Lament.** David's short but emphatic lament over Abner (2 Sam. iii:33) may be rendered, with stricter adherence to the *form* of the original, as follows:

'Should Abner die as a villain dies?—

Thy hands—not bound,

Thy feet—not brought into fetters:

As one falls before the sons of wickedness,
fellest thou!

ABNET (äb'net), (Heb. אַבְנֵט, *awb-net'*, a bandage). As this word can be traced to no root in the Hebrew language, and as it occurs in the narrative immediately after the departure from Egypt, it is reasonably supposed by Professor Lewy to be Egyptian, in opposition, however, to Hottinger, who refers it to the Persic, and to Gesenius, who finds it in the Sanscrit. It means a *band*, a *bandage*. From the places in which it occurs, it appears to have been made of fine linen variously wrought, and used to bind as a girdle about the body of persons in authority, especially the Jewish priests (Exod. xxix:9; xxviii:39; xxxix:29; Lev. viii:13; Is. xxii:21). These girdles may be considered as fairly represented by those which we observe on such persons in the Egyptian paintings.

ABOMINATION (ä-bö'm-i-nā'shün), (Heb. אֲבִיזָה, *pig-gool'*, filth, Lev. vii:18; שִׁקְכוּטִים, *shik-koots'*, unclean, Deut xxix:17, etc.; שְׁרֵפִים, *sheh'kets*, rejected, Lev. vii:21, etc.; תֹּאֲבָחוֹת, *to-ay-baw'*, causing abhorrence, Gen. xliii:32; Gr. βδέλυγμα, *bdel'oog-mah*, Matt. xxiv:15, etc.).

These words describe generally any object of detestation or disgust (Lev. xviii:22; Deut. vii:25); and are applied to an impure or detestable action (Ezek. xxii:11; xxx:26; Mal. ii:11, etc.); to anything causing a ceremonial pollution (Gen. xliii:32; xlv:34; Deut. xiv:3); but more especially to idols (Lev. xviii:22; xx:13; Deut. vii:26; 1 Kings xi:5, 7; 2 Kings xxiii:13); and also to food offered to idols (Zech. ix:7); and to filth of every kind (Nahum iii:6). (See also Deut. xxix:17; 1 Kings xi:5, 7; 2 Kings xxiii:13, 24; 2 Chron. xv:8; Is. lxvi:3; Jer. iv:1; vii:30; xliii:27; xvi:18; xxxii:34; Ezek. v:11; vii:20; xi:18, 21; xx:7, 8, 30; xxxvii:23; Dan. ix:27; xi:31; xii:11; Hos. ix:10; Nah. iii:6; Zech. ix:7).

(1) **Difficulty.** There are two or three of the texts in which the word occurs, to which, on account of their peculiar interest or difficulty, especial attention has been drawn. The *first* is Gen. xliii:32: 'The Egyptians might not eat bread with the Hebrews; for that is an abomination unto the Egyptians.' This is best explained by the fact that the Egyptians considered themselves ceremonially defiled if they ate with *any* strangers. The primary reason appears to have been that the cow was the most sacred animal among the Egyptians, and the eating of it was abhorrent to them; whereas it was both eaten and sacrificed by the Jews and most other nations, who on that account were abominable in their eyes. It was for this, as we learn from Herodotus (ii:41), that no Egyptian man or woman would kiss a Greek on the mouth, or would use the cleaver of a Greek, or his spit, or his dish, or would taste the flesh of even clean beef (that is, of oxen) that had been cut with a Grecian carving-knife. It is true that Sir J. G. Wilkinson (*Anc. Egyptians*, iii:358) ascribes this to the repugnance of the fastidiously clean Egyptians to the comparatively foul habits of their Asiatic and other neighbors; but it seems scarcely fair to take the *facts* of the father of history, and ascribe to them any other than the

very satisfactory *reason* which he assigns. We collect then that it was as *foreigners*, not pointedly as Hebrews, that it was an abomination for the Egyptians to eat with the brethren of Joseph. The Jews themselves subsequently exemplified the same practice; for in later times they held it unlawful to eat or drink with foreigners in their houses, or even to enter their houses (John xviii:28; Acts x:28; xi:3); for not only were the houses of Gentiles unclean, but they themselves rendered unclean those in whose houses they lodged.

(2) **Instructions of Joseph.** The *second* passage is Gen. xlv:34. Joseph is telling his brethren how to conduct themselves when introduced to the king of Egypt, and he instructs them that when asked concerning their occupation they should answer: 'Thy servants' trade hath been about cattle from our youth even until now, *both we and also our fathers.*' This last clause has emphasis, as showing that they were hereditary nomade pastors, and the reason is added: 'That ye may dwell in the land of Goshen—for every shepherd is an abomination unto the Egyptians.' In the former instance they were 'an abomination' as *strangers*, with whom the Egyptians could not eat; here they are a further abomination as nomade shepherds, whom it was certain that the Egyptians, for that reason, would locate in the border land of Goshen, and not in the heart of the country. That it was nomade shepherds, or Bedouins, and not simply shepherds, who were abominable to the Egyptians, is evinced by the fact that the Egyptians themselves paid great attention to the rearing of cattle. This is shown by their sculptures and paintings, as well as by the offer of this very king of Egypt to make such of Jacob's sons as were men of activity 'overscers of his cattle' (xlvii:6). For this aversion to nomade pastors two reasons are given, and it is not necessary that we should choose between them, for both of them were, it is most likely, concurrently true. One is that the inhabitants of Lower and Middle Egypt had previously been invaded by, and had remained for many years subject to, a tribe of nomade shepherds (see EGYPT), who had only of late been expelled, and a native dynasty restored—the grievous oppression of the Egyptians by these pastoral invaders and the insult with which their religion had been treated. The other reason, not necessarily superseding the former, but rather strengthening it, is that the Egyptians, as a settled and civilized people, detested the lawless and predatory habits of the wandering shepherd tribes, which then, as now, bounded the valley of the Nile, and occupied the Arabias.

(3) **Abomination of the Egyptians.** The *third* marked use of this word again occurs in Egypt. The king tells the Israelites to offer to their god the sacrifices which they desired, without going to the desert for that purpose. To which Moses objects, that they should have to sacrifice to the Lord '*the abomination of the Egyptians,*' who would thereby be highly exasperated against them (Exod. viii:25, 26). A reference back to the first explanation shows that this 'abomination' was the cow, the only animal which *all* the Egyptians agreed in holding sacred; whereas, in the great sacrifice which the Hebrews proposed to hold, not only would heifers be offered, but the people would feast upon their flesh.

(4) **The Abomination of Desolation.** In Dan. ix:27, literally, '*the abomination of the desolater,*' which, without doubt, means the idol or idolatrous apparatus which the desolater of Jerusalem should establish in the holy place. This appears to have been a prediction of the pollution of the

temple by Antiochus Epiphanes, who caused an idolatrous altar to be built on the altar of burnt offerings, whereon unclean things were offered to Jupiter Olympius, to whom the temple itself was dedicated. Josephus distinctly refers to this as the accomplishment of Daniel's prophecy, as does the author of the first book of Maccabees, in declaring that 'they set up the abomination of desolation upon the altar'—*ἠκοδομησαν τὸ βδελυγμα τῆς ἐρημώσεως ἐπὶ τῷ θυσιαστήριον* (1 Macc. i:59; vi:7; 2 Macc. vi:2-5; Joseph. *Antiq.* xii:5, 4; xii:7, 6).

(5) **Terms Quoted by Jesus.** The phrase is quoted by Jesus in the form of 'the abomination of desolation' (Matt. xxiv:15), and is applied by him to what was to take place at the advance of the Romans against Jerusalem. They who saw 'the abomination of desolation standing in the holy place' were enjoined to 'flee to the moun-

Roman Standards.

tains.' And this may with probability be referred to the advance of the Roman army against the city with their image-crowned standards, to which idolatrous honors were paid, and which the Jews regarded as idols.

(6) **Later Appearance.** Nor was this the last appearance of 'the abomination of desolation in the holy place,' for not only did Hadrian, with studied insult to the Jews, set up the figure of a boar over the Bethlehem gate of the city (Ælia Capitolina), which rose upon the site and ruins of Jerusalem (Euseb. *Chron.* l. i., p. 45, ed. 1658), but he erected a temple to Jupiter upon the site of the Jewish temple (Dion Cass. lxix:12), and caused an image of himself to be set up in the part which answered to the most holy place (Nicephorus Callist. iii:24). This was a consummation of all the abominations which the iniquities of the Jews brought upon their holy place.

ABRAHAM (ā'bra-ham), (Heb. אַבְרָהָם, *ab-rav-hawm'*, father of a multitude), the founder of the Hebrew nation. Up to Gen. xvii:4, 5, he is uniformly called Abram (Heb. אַבְרָם, *ab-ravwm'*, high father or father of elevation), and this was his original name, but the extended form, which it always afterward bears, was given to it to make it

significant of the promise of a numerous posterity which was at the same time made to him.

The attempt has been made to deprive the story of Abraham of all historic value, and to represent the patriarch either as a mythical personage or as the typical impersonation of the virtues of the religious Israel, but as yet no evidence has been found to connect the name of Abraham with that of a tribal deity, while the endeavor to find in his story a philosophical description of abstract qualities seems to presuppose a stage of literary development to which the materials of the Hexateuch can make no claim, and to desiderate a literary unity which those materials emphatically contradict (H. E. Ryle, *Hastings' Bib. Dict.*).

1. Early History. Abraham was a native of Chaldea, and descended, through Heber, in the ninth generation, from Shem, the son of Noah. His father was Terah, who had two other sons, Nahor and Haran. Haran died prematurely 'before his father,' leaving a son, Lot, and two daughters, Milcah and Iscah. Lot attached himself to his uncle Abraham; Milcah became the wife of her uncle Nahor; and Iscah, who was also called Sarai, became the wife of Abraham (Gen. xi:26-29; Comp. Joseph. *Antiq.* i:6, 5). (See ISCAH.)

In Gen. xiv:13 Abraham is called the Hebrew, and in Gen. xl:15 the term Hebrew is first used in its plural form. Abraham was born B. C. about 2333, in 'Ur of the Chaldees' (Gen. xi:28). There is no positive certainty about any date in Scripture until near the year B. C. 800.

(1) Birth. The concise history in Genesis states nothing concerning the portion of his life prior to the age of about 70; and respecting a person living in times so remote, no authentic information can be derived from any other source.

(2) Traditions. There are, indeed, traditions, but they are too manifestly *built up* on the foundation of a few obscure intimations in Scripture to be entitled to any credit. Thus it is intimated in Josh. ~~xxiv~~ ^{xiv}:2, that Terah and his family 'served other gods' beyond the Euphrates. Upon this has been founded the romance that Terah was not only a worshiper, but a maker of idols; that the youthful Abraham, discovering the futility of such gods, destroyed all those his father had made, and justified the act in various conversations and arguments with Terah, which we find repeated at length.

(3) Ur of the Chaldees. Again, 'Ur of the Chaldees' was the name of the place where Abraham was born, and from which he went forth to go, he knew not whither, at the call of God. Now Ur means *fire*; and we may therefore read that he came forth from *the fire of the Chaldees*. Upon this has been built the story that Abraham was, for his disbelief in the established idols, cast by king Nimrod into a burning furnace, from which he was by special miracle delivered. And to this the premature death of Haran has suggested the addition that he, by way of punishment for his disbelief of the truths for which Abraham suffered, was marvelously destroyed by the same fire from which his brother was still more marvelously preserved. Again, the fact that Chaldea was the region in which astronomy was reputed to have been first cultivated, suggested that Abraham brought astronomy westward, and that he even taught that science to the Egyptians (Joseph. *Antiq.* i:8). These are goodly specimens of tradition-building; and more of them may be found in the alleged history of Abraham by those who think them worth the trouble of the search. It is just to Josephus to state that most of these stories are rejected by him, although the tone of some of

his remarks is in agreement with them. (Comp. *Legends of the Patriarchs and Prophets*, by S. Baring Gould.)

2. First Period—The Call

(1) Removal to Charran. Although Abraham is, by way of eminence, named first, it appears probable, that he was the youngest of Terah's sons, and born by a second wife, when his father was *one hundred and thirty* years old. Terah was seventy years old when the eldest son was born (Gen. xi; Comp. Hales, ii:107): and that eldest son appears to have been Haran, from the fact that his brothers married his daughters, and that his daughter Sarai was only ten years younger than his brother Abraham (Gen. xvii:17). Abraham was sixty years old when the family left their native city of Ur, and went and abode in Charran. The reason for this movement does not appear in the Old Testament. Josephus alleges that Terah could not bear to remain in the place where Haran had died (*Antiq.* i:6, 5); while the apocryphal book of Judith, in conformity with the traditions still current among the Jews and Moslems, affirms that they were cast forth because they would no longer worship the gods of the land (Judith v:6-8). Dr. Davidson suggests that upon his defeat as a leader of a horde worsted in some encounter, he had emigrated at the head of his adherents in quest of better fortune (Ency. Brit., *Abraham*). Abraham was at the head of the first division of one people (the second division being led by Jacob), which migrated into Canaan, whose inhabitants themselves had come from the same center as Abraham, and who spoke a kindred tongue; in fact, a tongue which differed but slightly from that of Abraham. (The Early Religion of the Hebrews, Bibliotheca Sacra, Oct., 1898, Rev. Arthur E. Whatham.) The real cause of the movement is given in *Acts vii:2-4*: 'The God of glory appeared to our father Abraham while he was (at Ur of the Chaldees) in Mesopotamia, *before he dwelt in Charran*, and said unto him, Depart from *thy land*, and from thy kindred, and come hither to a *land* (γῆν) which I will shew thee. It has been a mooted question among Biblical scholars whether Abraham was at this time a *monotheist*, i. e., one worshiping the only true God, or a *henotheist*, i. e., a worshiper of the one God, but still recognizing other gods. However this may be, he became entirely *monotheistic* later on in life. Departing from the land of the Chaldees, he dwelt in Charran. This *first* call is not recorded, but only implied in Gen. xii; and it is distinguished by several pointed circumstances from the *second*, which alone is there mentioned. Accordingly Abraham departed, and his family, including his aged father, removed with him. They proceeded not at once to the land of Canaan, which indeed had not been yet indicated to Abraham as his destination; but they came to Charran, and tarried at that convenient station for fifteen current years (five years according to McClintock & Strong) until Terah died at the age of 205 years.

(2) Leaves Charran. Being free from his filial duties, Abraham, now 75 years of age, received a second and more pointed call to pursue his destination: 'Depart from thy land, and from thy kindred, and *from thy father's house*, unto *the land* which I will shew thee' (Gen. xii:1). The difference of the two calls is obvious; in the former the *land* is indefinite, being designed only for a temporary residence; in the latter it is definite, intimating a permanent abode. A third condition was also an-

nexed to the latter call, that he should separate from his father's house, and leave his brother Nahor's family behind him in Charran. This must have intimated to him that the Divine call was personal to himself, and required that he should be isolated not only from his nation, but from his family. He, however, took with him his nephew Lot, whom, having no children of his own, he appears to have regarded as his heir, and then went forth 'not knowing whither he went' (Heb. xi:8), but trusting implicitly to the Divine guidance. And it seems to have been the intention of Him by whom he had been called, to open gradually to him the high destinies which awaited him and his race, as we perceive that every successive communication with which he was favored rendered more sure and definite to him the objects for which he had been called from the land of his birth. (See UR; HARAN.)

(3) **Reaches Canaan.** No particulars of the journey are given. Abraham arrived in the land of Canaan, which he found occupied by the Canaanites in a large number of small independent communities, which cultivated the districts around their several towns. The country was, however, but thinly peopled; and, as in the more recent times of its depopulation, it afforded ample pasture grounds for the wandering pastors. One of that class Abraham must have appeared in their eyes. In Mesopotamia the family had been pastoral, but dwelling in towns and houses, and sending out the flocks and herds under the care of shepherds. But the migratory life to which Abraham had now been called compelled him to take to the tent-dwelling as well as the pastoral life, and the usages which his subsequent history indicates are therefore found to present a condition of manners and habits analogous to that which still exists among the nomade pastoral or Bedouin tribes of southwestern Asia.

The rich pastures in that part of the country tempted Abraham to form his first encampment in the vale of Moreh, which lies between the mountains of Ebal and Gerizim. Here the strong faith which had brought the childless man thus far from his home was rewarded by the grand promise: 'I will make of thee a great nation, and I will bless thee and make thy name great and thou shalt be a blessing; and I will bless them that bless thee, and curse them that curse thee; and in thee shall all the families of the earth be blessed' (Gen. xii:2, 3). It was further promised that to his posterity should be given the rich heritage of that beautiful country into which he had come (v. 7). It will be seen that this important promise consisted of two parts, the one temporal, the other spiritual. The *temporal* was the promise of posterity, that he should be blessed himself, and be the founder of a great nation; the *spiritual*, that he should be the chosen ancestor of the Redeemer, who had been of old obscurely predicted (Gen. iii:15), and thereby become the means of blessing all the families of the earth. The implied condition on his part was, that he should publicly profess the worship of the true God in this more tolerant land; and accordingly 'he built there an altar unto the Lord, who appeared unto him.' He soon after removed to the district between Bethel and Ai, where he also built an altar to that Jehovah whom the world was then hastening to forget (Gen. xii:8).

(4) **In Egypt.** His farther removal tended southward, until at length a famine in Palestine compelled him to withdraw into Egypt, where corn abounded. Here his apprehension that the beauty of his wife Sarai might bring him into danger with the dusky Egyp-

tians overcame his faith and rectitude, and he gave out that she was his sister (Gen. xii: 11-13). As he had feared, the beauty of the fair stranger excited the admiration of the Egyptians, and at length reached the ears of the king, who forthwith exercised his regal right of calling her to his harem, and to this Abraham, appearing as only her brother, was obliged to submit (Gen. xii:15, 16). As, however, the king had no intention of acting harshly in the exercise of his privilege, he loaded Abraham with valuable gifts, suited to his condition, being chiefly in slaves and cattle. These presents could not have been refused by him without an insult which, under all the circumstances, the king did not deserve. A grievous disease inflicted on Pharaoh and his household relieved Sarai from her danger, by revealing to the king that she was a married woman; on which he sent for Abraham, and, after rebuking him for his conduct, restored his wife to him and recommended him to withdraw from the country (Gen. xii:17-20).

(5) **Return to Canaan.** He accordingly returned to the land of Canaan, much richer than when he left it 'in cattle, in silver, and in gold' (Gen. xiii:1, 2).

Lot also had much increased his possessions; and soon after their return to their previous station near Bethel, the disputes between their respective shepherds about water and pasturage soon taught them that they had better separate (Gen. xii:7, 8). The recent promise of posterity to Abraham himself, although his wife had been accounted barren, probably tended also in some degree to weaken the tie by which the uncle and nephew had hitherto been united. The subject was broached by Abraham, who generously conceded to Lot the choice of pasture grounds. Lot chose the well-watered plain in which Sodom and other towns were situated and removed thither (Gen. xiii:11, 12). (See LOT.) Thus was accomplished the dissolution of a connection which had been formed before the promise of children was given, and the disruption of which appears to have been necessary for that complete isolation of the coming race which the Divine purpose required. Immediately afterward the patriarch was cheered and encouraged by a more distinct and formal reiteration of the promises which had been previously made to him, of the occupation of the land in which he lived by a posterity numerous as the dust (Gen. xiii:14-17). Not long after he removed to the pleasant valley of Mamre, in the neighborhood of Hebron (then called Arba), and pitched his tent under a terebinth tree (Gen. xiii:18).

(6) **Rescues Lot.** It appears that fourteen years before this time the south and east of Palestine had been invaded by a king called Chedorlaomer, from beyond the Euphrates, who brought several of the small disunited states of those quarters under tribute (Gen. xiv:1-5). (See CHEDORLAOMER.) Among them were the five cities of the Plain of Sodom, to which Lot had withdrawn. This burden was borne impatiently by these states, and they at length withheld their tribute. This brought upon them a ravaging visitation from Chedorlaomer, and four other (perhaps tributary) kings who scoured the whole country east of the Jordan, and ended by defeating the kings of the plain, plundering their towns, and carrying the people away as slaves. Lot was among the sufferers (Gen. xiv:8-12). When this came to the ears of Abraham, he immediately armed such of his slaves as were fit for war, in number 318, and being joined by the friendly Amoritic chiefs, Aner, Eshcol, and Mamre, pursued the retiring invad-

ers. They were overtaken near the springs of the Jordan; and their camp being attacked on opposite sides by night, they were thrown into disorder, and fled (Gen. xiv:13, 14). Abraham and his men pursued them as far as the neighborhood of Damascus, and then returned with all the men and goods which had been taken away. Although Abraham had no doubt been chiefly induced to undertake this exploit by his regard for Lot, it involved so large a benefit, that, as the act of a sojourner it must have tended greatly to enhance the character and power of the patriarch in the view of the inhabitants at large. In fact, we afterwards find him treated by them with high respect and consideration (Gen. xiv:15-17).

(7) **Meets Melchizedek.** When they had arrived as far as Salem on their return, the king of that place, Melchizedek, who was one of the few native princes, if not the only one, who retained the knowledge and the worship of 'the Most High God,' whom Abraham served, came forth to meet them with refreshments, in acknowledgment for which, and in recognition of his character, Abraham presented him with a tenth of the spoils (Gen. xiv:18-20). (See MELCHIZEDEK.) By strict right, founded on the war usages which still subsist in Arabia (Burckhardt's *Notes*, p. 97), the recovered goods became the property of Abraham, and not of those to whom they originally belonged. This was acknowledged by the king of Sodom, who met the victors in the valley near Salem. He said, 'Give me the persons, and keep the goods to thyself' (Gen. xiv:21). But with becoming pride, and with a disinterestedness which in that country would now be most unusual in similar circumstances, he answered, 'I have lifted up mine hand (*i. e.*, I have sworn) unto Jehovah, the most high God, that I will not take from a thread even to a sandal-thong, and that I will not take anything that is thine, *lest thou shouldest say, I have made Abram rich*' (Gen. xiv:22-24).

3. Second Period—The Promise of a Lineal Heir.

(1) **Vision of Abraham.** Soon after his return to Mamre the faith of Abraham was rewarded and encouraged not only by a more distinct and detailed repetition of the promises formerly made to him, but by the confirmation of a solemn covenant contracted, as nearly as might be, 'after the manner of men' (see COVENANT) between him and God (Gen. xv:1-11). It was now that he first understood that his promised posterity were to grow up into a nation under foreign bondage; and that, in four hundred years after (or, strictly, four hundred and five years, counting from the birth of Isaac to the Exode), they should come forth from that bondage as a nation to take possession of the land in which he sojourned (Gen. xv:12-21).

(2) **Birth of Ishmael.** After ten years' residence in Canaan, Sarai, being then 75 years old, and having long been accounted barren, chose to put her own interpretation upon the promised blessing of a progeny to Abraham, and persuaded him to take her woman slave Hagar, an Egyptian, as a secondary or concubine wife, with the view that whatever child might proceed from this union should be accounted her own (see HAGAR), (Gen. xvi:4). The son who was born to Abraham by Hagar and who received the name of Ishmael (see ISHMAEL) was considered the heir of his father and of the promises (Gen. xvi).

4. Third Period—Establishment of the Covenant (Gen. xxvii:21).

(1) **Change of Name.** Thirteen years after, when Abraham was 99 years old, he was favored with still more explicit declarations of the Divine purposes. He was reminded that the promise to him was that he should be the father of *many* nations; and to indicate this intention his name was now changed (as before described) from *Abram* to *Abraham* (Gen. xvii:1-9).

(2) **Circumcision.** The Divine Being then solemnly renewed the covenant to be a God to him and to the race that should spring from him; and in token of that covenant directed that he and his should receive in their flesh the sign of circumcision (Gen. xvii:10-14). (See CIRCUMCISION.)

Abundant blessings were promised to Ishmael; but it was then first announced, in distinct terms, that the heir of the special promises was not yet born, and that the barren Sarai, then 90 years old, should twelve months thence be his mother. Then also her name was changed from Sarai to Sarah (*the princess*); and to commemorate the laughter with which the prostrate patriarch received such strange tidings, it was directed that the name of Isaac (*he laughed*) should be given to the future child (Gen. xvii:15-22). The very same day, in obedience to the Divine ordinance, Abraham himself, his son Ishmael, and his house-born and purchased slaves were all circumcised (Gen. xvii:23-27).

(3) **Visit of Angels.** Three months after this, as Abraham sat in his tent door during the heat of the day, he saw three travelers approaching, and hastened to meet them, and hospitably pressed upon them refreshment and rest. They assented, and under the shade of a terebinth tree partook of the abundant fare which the patriarch and his wife provided, while Abraham himself stood by in respectful attendance (Gen. xviii:1-8). From the manner in which one of the strangers spoke, Abraham soon gathered that his visitants were no other than the Lord himself and two attendant angels in human form. The promise of a son by Sarah was renewed; and when Sarah herself, who overheard this within the tent, laughed inwardly at the tidings, which, on account of her great age, she at first disbelieved, she incurred the striking rebuke, 'Is anything too hard for Jehovah?' (Gen. xviii:9-15).

(4) **Destruction of Sodom.** The strangers then continued their journey, and Abraham walked some way with them. The two angels went forward in the direction of Sodom, while the Lord made known to him that, for their enormous iniquities, Sodom and the other 'cities of the plain' were about to be made signal monuments of his wrath and of his moral government (Gen. xviii:16-22). Moved by compassion and by remembrance of Lot, the patriarch ventured, reverently, but perseveringly, to intercede for the doomed Sodom; and at length obtained a promise that, if but ten righteous men were found therein, the whole city should be saved for their sake (Gen. xviii:23-33). Early the next morning Abraham arose to ascertain the result of this concession; and when he looked towards Sodom, the smoke of its destruction (B. C. 2223) rising 'like the smoke of a furnace,' made known to him its terrible overthrow (Gen. xix:1-28). (See SODOM.)

(5) **Sarah Taken by Abimelech.** He probably soon heard of Lot's escape: but the consternation which this event inspired in the neighbor-

hood induced him, almost immediately after, to remove farther off into the territories of Abimelech, king of Gerar (Gen. xx:1).

By a most extraordinary infatuation and lapse of faith, Abraham allowed himself to stoop to the same mean and foolish prevarication in denying his wife, which, twenty-three years before, had occasioned him so much trouble in Egypt (Gen. xx:2-10). The result was also similar (see ABIMELECH), except that Abraham answered to the rebuke of the Philistine by stating the fears by which he had been actuated—adding, 'And yet indeed she is my sister; she is the daughter of my father, but not the daughter of my mother; and she became my wife' (Gen. xx:11-18). This mends the matter very little, since in calling her his sister he designed to be understood as saying she was *not* his wife.

As he elsewhere calls Lot his 'brother,' this statement that Sarah was his 'sister' does not interfere with the probability that she was his niece.

(6) **Isaac Born.** The same year Sarah gave birth to the long promised son (Gen. xxi:2). It is, however, supposed by some biblical critics that the preceding adventure with Abimelech is related out of its order, and took place at an earlier date. Their chief reason is that Sarah was now 90 years of age. But the very few years by which such a supposition might reduce this age seems scarcely worth the discussion. (See SARAH.)

(7) **The Banishment of Hagar and Ishmael.** According to previous direction, the name of Isaac was given to him (see ISAAC), (Gen. xvii:19; xxi:3). This greatly altered the position of Ishmael, who had hitherto appeared as the heir both of the temporal and the *spiritual* heritage; whereas he had now to share the former, and could not but know that the latter was limited to Isaac. This appears to have created much ill-feeling both on his part and that of his mother towards the child; which was in some way manifested so pointedly, on occasion of the festivities which attended the weaning, that the wrath of Sarah was awakened, and she insisted that both Hagar and her son should be sent away (Gen. xxi:8-11). This was a very hard matter to a loving father; and Abraham was so much pained that he would probably have refused compliance with Sarah's wish, had he not been told by the Lord that it was in accordance with the Divine intentions respecting both Ishmael and Isaac. With his habitual uncompromising obedience, he then hastened them away early in the morning, with provision for the journey (Gen. xxi:12-14). Their adventures belong to the article HAGAR.

5. *The Fourth Period.*

(1) **Abraham's Great Trial.** When Isaac was about 20 years old it pleased God to subject the faith of Abraham to a severer trial than it had yet sustained, or than has ever fallen to the lot of any other mortal man. He was commanded to go into the mountainous country of Moriah (probably where the temple afterwards stood), and there offer up in sacrifice the son of his affection, and the heir of so many hopes and promises, which his death must nullify (Gen. xxii:1, 2). It is probable that human sacrifices already existed; and as, when they did exist, the offering of an only or beloved child was considered the most meritorious, it may have seemed reasonable to Abraham that he should not withhold from his own God the costly sacrifice which the heathen offered to their idols. The trial and peculiar difficulty lay in the singular position of Isaac, and in the unlikelihood that his loss could

be supplied. But Abraham's 'faith shrunk not, assured that what God had promised he would certainly perform, and that he was able to restore Isaac to him even from the dead' (Heb. xi:17-19), and he rendered a ready, however painful, obedience. Assisted by two of his servants, he prepared wood suitable for the purpose, and without delay set out upon his melancholy journey. On the third day he descried the appointed place, and informing his attendants that he and his son would go some distance farther to worship, and then return, he proceeded to the spot (Gen. xxii:3-6). To the touching question of his son respecting the victim to be offered, the patriarch replied by expressing his faith that God himself would provide the sacrifice, and probably he availed himself of this opportunity of acquainting him with the Divine command (Gen. xxii:7, 8). At least, that the communication was made either then or just after is unquestionable; for no one can suppose that a young man of 20 could, against his will, have been bound with cords and laid out as a victim on the wood of the altar. Isaac would most certainly have been slain by his father's uplifted hand, had not the angel of Jehovah interposed at the critical moment to arrest the fatal stroke. A ram which had become entangled in a thicket was seized and offered, and a name was given to the place—*Jehovah-Jireh*—'the Lord will provide,' commemorating the believing answer which Abraham had given to his son's inquiry respecting the victim (Gen. xxii:9-14). The promises before made to Abraham—of numerous descendants, superior in power to their enemies, and of the blessings which his spiritual progeny, and especially the Messiah, were to extend to all mankind—were again confirmed in the most solemn manner, for Jehovah swore by himself (Comp. Heb. vi:13-17) that such should be the rewards of his uncompromising obedience. The father and son then rejoined their servants, and returned rejoicing to Beersheba (Gen. xxii:15-19).

(2) **Death of Sarah.** Eight years after Sarah died at the age of one hundred and twenty-seven years, being then at or near Hebron (Gen. xxiii:1). This loss first taught Abraham the necessity of acquiring possession of a family sepulchre in the land of his sojourning. His choice fell on the cave of Machpelah (see MACHPELAH), (Gen. xxiii:9), and after a striking negotiation with the owner in the gate of Hebron, he purchased it and had it legally secured to him, with the field in which it stood and the trees that grew thereon. (See Thomson's *Land and Book*, ii, 381 seq.) This was the only possession he ever had in the Land of Promise (Gen. xxiii:17-20). The next care of Abraham was to provide a suitable wife for his son Isaac.

(3) **Marriage of Isaac.** It has always been the practice among pastoral tribes to keep up the family ties by intermarriages of blood relations (Burckhardt, *Notes*, p. 154) and now Abraham had a further inducement in the desire to maintain the purity of the separated race from foreign and idolatrous connections. He therefore sent his aged and confidential steward, Eliezer, under the bond of a solemn oath, to discharge his mission faithfully, to renew the intercourse between his family and that of his brother Nabor, whom he had left behind in Charran. (See ELIEZER.) He prospered in his important mission (see ISAAC), and in due time returned, bringing with him Rebekah, the daughter of Nabor's son Bethuel, who became the wife of Isaac, and was installed as

chief lady of the camp in the separate tent which Sarah had occupied (Gen. xxiv).

Some time after Abraham himself took a wife named Keturah, by whom he had several children. (See KETURAH.) These, together with Ishmael, seem to have been portioned off by their father in his lifetime, and sent into the east and south-east, that there might be no danger of their interference with Isaac, the divinely appointed heir.

(4) **Death.** There was time for this, for Abraham lived to the age of 175 years, 100 of which he had spent in the land of Canaan. He died (B. C. 2158?), and was buried by his two eldest sons in the family sepulchre which he had purchased of the Hittites (Gen. xxv:1-10).

6. **New Testament References.** In the New Testament Abraham is referred to in a variety of ways. The words of John the Baptist in Matt. iii:9; Luke iii:8, and of St. Paul, Rom. ix:7, rebuke the popular Jewish supposition that descent from Abraham carried with it any special claim upon Divine favor. Our Lord speaks of Abraham as one with whom all the partakers of Divine redemption shall be privileged to dwell (Matt. viii:11); and as of one who is both cognizant of things on earth and is also entrusted with the special charge over the souls of the blest (Luke xvi:22). Our Lord employs the imagery of current religious belief; Abraham is the typical representative of 'the righteous' who have been redeemed; he is 'the father of the faithful.' Hence he says (John viii:56), 'Your father Abraham rejoiced to see my day; and he saw it, and was glad.' He obtained a vision of the meaning of the promises, and rejoiced in the hope of their future fulfillment. Christ was the consummation of all the aspirations of Abraham the father of the race (Hastings' *Bib. Dict.*).

7. **Character.** Abraham's character merits the tribute paid it in all ages. Its strength is seen in the choice of Jehovah as his God when all around were idolators, and in his grand loyalty to Him amidst every temptation. Neither disappointment, nor delay, nor the strain of the sternest demands, for a moment shook his faith. Knowing Him in whom he believed, he trusted Him with an immovable confidence. Nor was his bearing less worthy towards his fellow-men. Though the elder, he gives the choice to Lot when the two must part; willing, for peace and kindness, to take contentedly what his nephew leaves. He is too magnanimous to claim the spoil which war had made his, after the defeat of the kings, but renders the great service freely, without reward. If Hagar and Ishmael live ill at ease with Sarah, they have no such feeling towards him; for they knew how unwilling he had been to send them away, and must have seen how the heart clung to them, which broke out in the fatherly prayer, "O that Ishmael might live before thee." The pity even for the unworthy that marks his intercession for Sodom is a lesson for every age. His bearing to the three mysterious strangers under the oaks of Mamre is the ideal of patriarchal courtesy and hospitality. He runs to meet them, and, bowing low, begs them to let him entertain them, and himself hastens the meal. That he should have maintained relations so friendly with the races among whom he lived at Shechem, Bethel, and Hebron, speaks for his prudence, integrity, and neighborly worth. No wonder that his descendants, regarding him at once in his relations to God and to his fellow-men, should speak to him as "incomparable in his generation," or that they have fabled of him that, in Jeremiah's day, when the temple had been de-

stroyed, 'Abraham's form was seen over the ruins, his hands uplifted, pleading with God for the sons of his people led off to captivity (Geike, *Hours with the Bible*, vol. I. 410, 11).

8. **Typical.** 1. Abraham himself with his family may be regarded as a type of the Church of God in future ages. They indeed constituted God's ancient Church. Not that many scattered patriarchal and family churches did not remain, such was that of Melchizedek; and such probably was that of Nahor, whom Abraham left behind in Mesopotamia. But a visible Church relation was established between Abraham's family and the Most High, signified by the visible and distinguishing sacrament of circumcision, and followed by new and enlarged revelations of truth. Two purposes were to be answered by this: *the preservation of the true doctrine of salvation in the world*, which is the great and solemn duty of every branch of the Church of God,—and *the manifestation of that truth to others*. Both were done by Abraham. Wherever he sojourned, he built his altars to the true God, and publicly celebrated his worship; and, as we learn from St. Paul, he lived in tents in preference to settling in the land of Canaan, though it had been given to him for a possession, in order that he might thus proclaim his faith in the eternal inheritance of which Canaan was a type; and in bearing this testimony his example was followed by Isaac and Jacob, the "heirs with him of the same promise," who also thus "confessed that they were strangers and pilgrims," and that "they looked" for a continuing and eternal city in heaven. So also now is the same doctrine of immortality committed to the Church of Christ; and by deadness to the world ought its members to declare the reality of their own faith in it.

2. The numerous natural posterity promised to Abraham was also a type of the spiritual seed, the true members of the Church of Christ, springing from the Messiah, of whom Isaac was the symbol. Thus St. Paul expressly distinguishes between the fleshly and the spiritual seed of Abraham; to the latter of which, in their ultimate and highest sense, the promises of increase as the stars of heaven, and the sands of the seashore, are to be referred, as also the promise of the heavenly Canaan.

3. The intentional offering up of Isaac, with its result, was probably that transaction in which Abraham, more clearly than in any other, "saw the day of Christ, and was glad." He received Isaac from the dead, says St. Paul, "in a figure." This could be a figure of nothing but the resurrection of our Lord; and if so, Isaac being laid upon the altar was a figure of his sacrificial death, scenically and most impressively represented to Abraham. The *place*, the same ridge of hills on which our Lord was crucified; the *person*, an only son, to die for no offense of his own; the *sacrificer*, a father; the *receiving back*, as it were, from death to life; the *name* impressed upon the place, importing, "*the Lord will provide*," in allusion to Abraham's own words to Isaac, "the Lord will provide a lamb for a burnt-offering;" all indicate a mystery which lay deep beneath this transaction, and which Abraham, as the reward of his obedience, was permitted to behold. "The day" of Christ's humiliation and exaltation was thus opened to him; and served to keep the great truth in mind that the true burnt-offering and sacrifice for sin was to be something higher than the immolation of lambs and bulls and goats; nay, something more than what was merely human.

4. The expulsion of Hagar was a type: It was an allegory in action by which St. Paul teaches us to understand that the son of the bondwoman represented those who are under the law and the child of the free woman those who are by faith supernaturally begotten into the family of God. The casting out of the bondwoman and her son represents also the expulsion of the unbelieving Jews from the Church of God, which is composed of true believers of all nations, all of whom, whether Jews or Gentiles, were to become "fellow-heirs."

9. Covenant Relation. 1. Abraham is to be regarded as standing in a *federal* or *covenant* relation, not only to his natural seed, but specially and eminently to all believers. "The gospel," we are told by St. Paul, "was preached to Abraham, saying, In thee shall all nations be blessed." "Abraham believed in God, and it was accounted to him for righteousness;" in other words, he was justified. A covenant of gratuitous justification through faith was made with him and his believing descendants; and the rite of circumcision, which was not confined to his posterity by Sarah, but appointed in every branch of his family, was the sign or sacrament of this covenant of grace, and so remained till it was displaced by the sacraments appointed by Christ. Wherever that sign was, it declared the doctrine, and offered the grace, of this covenant—free justification by faith, and its glorious results—to all the tribes that proceeded from Abraham. This same grace is offered to us by the gospel, who become "Abraham's seed," his spiritual children with whom the covenant is established, through the same faith, and are thus made "the heirs with him of the same promise."

2. Abraham is also exhibited to us as the *representative* of true believers; and in this especially, that the true nature of faith was exhibited in him. This great principle was marked in Abraham with the following characters: An entire, unhesitating belief in the word of God; an unfaltering trust in all his promises; a steady regard to his almighty power, leading him to overlook all apparent difficulties and impossibilities in every case where God had explicitly promised; and habitual and cheerful and entire obedience. The apostle has described faith in Heb. xi:1; and that faith is seen living and acting in all its energy in Abraham, (Watson's *Dict.*; Miemayer, *Charakt.*, ii. 72 sq; The Histories of Israel, by Ewald, Reuss and Kittel; Sayce, *Patr. Pal.*; Price, *Mon. and O. T.*; Tompkins, *Times of Abraham*, Whately, *Prototypes*).

ABRAHAM, BOOK OF (ā'bra-ham, bōōk of). A work bearing this title is found in the list of Jewish apocryphal writings, preserved from a much earlier period, in an appendix to the *Chronographia Compendiaria* of Nicephorus (c. 800 A. D.).

Origen probably quotes from it as to a conquest between the angels of righteousness and iniquity with regard to the salvation of Abraham (*In Luc. Hom.* 35).

ABRAHAM'S BOSOM (ā'bra-ham's bōōz' ūm). There was no name which conveyed to the Jews the same associations as that of Abraham. As undoubtedly he was in the highest state of felicity of which departed spirits are capable, 'to be with Abraham' implied the enjoyment of the same felicity; and 'to be in Abraham's bosom' meant to be in repose and happiness with him. The latter phrase is obviously derived from the custom of sitting or reclining at table which

prevailed among the Jews in and before the time of Christ. (See ACCUBATION). By this arrangement, the head of one person was necessarily brought almost into the bosom of the one who sat above him, or at the top of the triclinium; and the guests were so arranged that the most favored were placed so as to bring them into that situation with respect to the host (Comp. John xiii:23; xxi:20). These Jewish images and modes of thought are amply illustrated by Lightfoot, Schoettgen, and Wetstein, who illustrate Scripture from Rabbinical sources. It was quite usual to describe a just person as being with Abraham, or lying on Abraham's bosom; and as such images were unobjectionable, Jesus accommodated his speech to them, to render himself the more intelligible by familiar notions, when, in the beautiful parable of the rich man and Lazarus, he describes the condition of the latter after death under these conditions (Luke xvi:22, 23). (See HADES.)

ABRAM (ā'bram), (Heb. אַבְרָם, *ab-rawm'*, father of height, *i. e.*, high father), the original name (Gen. xvii:5) of Abraham.

ABRECH (āb'rech), (Heb. אַבְרֵךְ, *ab-rake'*, bow the knee). This word occurs only in Gen. xli:43, where it is used in proclaiming the authority of Joseph. Something similar happened in the case of Mordecai; but then several words were employed (Esth. vi:11). If the word be Hebrew, it would then mean, as in our version, 'bow the knee!' We are indeed assured by Wilkinson (*Anc. Egyptians*, ii:24) that the word *abrek* is used to the present day by the Arabs, when requiring a camel to kneel and receive its load. But Luther and others suppose the word to be of Chaldee origin. It is, however, probably Egyptian, and Dr. Lee is inclined with De Rossi (*Etym. Egypt.* p. 1) to repair to the Coptic, in which *Aberck* or *Abrek* means 'bow the head.' It is right to add, that Origen, a native of Egypt, and Jerome, both of whom knew the Semitic languages, concur in the opinion that *Abrech* means 'a native Egyptian;' and when we consider how important it was that Joseph should cease to be regarded as a foreigner (See ABOMINATION), it has in this sense an importance and significance which no other interpretation conveys. It amounts to a proclamation of naturalization, which, among such a people as the Egyptians, was essential to enable Joseph to work out the great plan he had undertaken. We believe, however, that it is not now possible to determine the significance of the word with certainty.

As an Egyptianized Semitic word, it was probably carried down into Egypt during the centuries of Hyksos rule. This opinion receives support, too, from the evidence of the Tel el-Amarna tablets that there had been for many centuries before Joseph's day free international communication between Egypt and Asia. (Ira M. Price, *Hastings' Bib. Dict.*).

ABROAD (ā-brād'). "And he had thirty sons and daughters whom he sent *abroad*" (Judges xii:9). (See also 1 Kings ii:22.) *Abroad* in early English literature denotes merely *away from home*, or *out of doors*, and not, as now more frequently, *out of the country*. *To come abroad* (Mark iv:22; Rom. xvi:19) denotes to become publicly known. It is equivalent to our common saying, *to get abroad*.

ABSALOM (ăb'sa-lom), (Heb. אֲבִישׁוֹן, *ab-shaw-lome'*, אֲבֵי-שׁוֹן, *ab-ee-shaw-lome'*, father of peace, that is, peaceful).

(1) **Name and Family.** The third son of David, and his only son by Maacah, the daughter of Talmai, king of Geshur (2 Sam. iii:3), born B. C. about 1000.

(2) **Personal History.** He was deemed the handsomest man in the kingdom; and was particularly noted for the profusion of his beautiful hair, which appears to have been regarded with great admiration; but of which we can know nothing with certainty, except that it was very fine and very ample. We are told that when its inconvenient weight compelled him to cut it off 'every year' (as in the A. V.), it was found to weigh '200 shekels after the king's weight;' but as this has been interpreted as high as 112 ounces (Geddes) and as low as 7½ ounces (A. Clarke), we may be content to understand that it means a quantity unusually large.

(3) **Avenges Tamar.** David's other child by Maachah was a daughter named Tamar, who was also very beautiful. She became the object of lustful regard to her half-brother Amnon, David's eldest son; and was violated by him in pursuance of a plot suggested by the artful Jonadab (2 Sam. xiii:1-20; B. C. about 1050). (See AMNON.) In all cases where polygamy is allowed, we find that the honor of a sister is in the guardianship of her full brother, more even than in that of her father, whose interest in her is considered less peculiar and intimate. We trace this notion even in the time of Jacob (Gen. xxxiv:6, 13, 25, *sq.*). So in this case the wrong of Tamar was taken up by Absalom, who kept her secluded in his own house, and said nothing for the present, but brooded silently over the wrong he had sustained and the vengeance which devolved upon him. It was not until two years had passed, and when this wound seemed to have been healed, that Absalom found opportunity for the bloody revenge he had meditated. He then held a great sheep-shearing feast at Baal-hazor, near Ephraim, to which he invited all the king's sons; and, to lull suspicion, he also solicited the presence of his father. As he expected, David declined for himself, but allowed Amnon and the other princes to attend. They feasted together; and, when they were warm with wine, Amnon was set upon and slain by the servants of Absalom, according to the previous directions of their master (Sam. xiii:23-29). Horror-struck at the deed, and not knowing but that they were included in the doom, the other princes took to their mules and fled to Jerusalem, filling the king with grief and horror by the tidings which they brought. As for Absalom, he hastened to Geshur and remained there three years with his grandfather, king Talmai (2 Sam. xiii:30-38). (See GESHUR.)

(4) **Return to Jerusalem.** Now it happened that Absalom, with all his faults, was eminently dear to the heart of his father. His beauty, his spirit, his royal birth, may be supposed to have drawn to him those fond paternal feelings which he knew not how to appreciate. At all events, David mourned every day after the banished fratricide, whom a regard for public opinion and a just horror of his crime forbade him to recall. His secret wishes to have home his beloved though guilty son were, however, discerned by Joab, who employed a clever woman of Tekoah to lay a sup-

posed case before him for judgment; and she applied the anticipated decision so adroitly to the case of Absalom, that the king discovered the object and detected the interposition of Joab (2 Sam. xiv:1-20). Regarding this as in some degree expressing the sanction of public opinion, David gladly commissioned Joab to 'call home his banished.' Absalom returned; but David, still mindful of his duties as a king and father, controlled the impulse of his feelings, and declined to admit him to his presence. After two years, however, Absalom, impatient of his disgrace, found means to compel the attention of Joab to his case; and through his means a complete reconciliation was effected, and the father once more indulged himself with the presence of his son (2 Sam. xiv:21-33), B. C. about 1036.

(5) **Preparations for Revolt.** The position at this time occupied by Absalom was very peculiar, and the view of it enables us to discover how far the general Oriental laws of primogeniture were affected by the peculiar conditions of the Hebrew constitution. At the outset he was the third son of David, Amnon and Chileab being his elder brothers. But it was possible that he might even then, while they lived, consider himself entitled to the succession; and Oriental usage would not have discountenanced the pretension.

He alone was of royal descent by the side of his mother; and royal or noble descent by the mother is even now of itself a sufficient ground of preference over an elder brother whose maternal descent is less distinguished. This circumstance, illustrated by Absalom's subsequent conduct, may suggest that he early entertained a design upon the succession to the throne, and that the removal of Amnon was quite as much an act of policy as of revenge. The other elder brother, Chileab, appears to have died, as no mention is made of him after (2 Sam. iii:3), and if the claims of Absalom, or rather his grounds of pretension, were so important while Amnon and Chileab lived, his position must have been greatly strengthened when, on his return from exile, he found himself the eldest surviving son, and, according to the ordinary laws of primogeniture, the heir apparent of the crown. Such being his position, and his father being old, it would seem difficult at the first view to assign a motive for the conspiracy against the crown and life of his indulgent father, in which we soon after find him engaged. It is then to be considered that the king had a dispensing power, and was at liberty, according to all Oriental usage, to pass by the eldest son and to nominate a younger to the succession. This could not have affected Absalom, as there is every reason to think that David, if left to himself, would have been glad to have seen the rule of succession take its *ordinary* course in favor of his best loved son. But then, again, under the peculiar theocratical institutions of the Hebrews, the Divine King reserved and exercised a power of dispensation, over which the human king, or viceroy, had no control. The house of David was established as a reigning dynasty; and although the law of primogeniture was allowed eventually to take in general its due course, the Divine King reserved the power of appointing any member of that house whom He might prefer. That power had been exercised in the family of David by the preference of Solomon, who was at this time a child, as the successor of his father. David had known many years before that his dynasty

was to be established in a son not yet born (2 Sam. vii:12); and when Solomon was born, he could not be ignorant, even if not specially instructed, that *he* was the destined heir. This fact must have been known to many others as the child grew up, and probably the mass of the nation was cognizant of it. In this we find a clear motive for the rebellion of Absalom—to secure the throne which he deemed to be his right by the laws of primogeniture, during the lifetime of his father; lest delay, while awaiting the natural term of his days, should so strengthen the cause of Solomon with his years as to place his succession beyond all contest.

(6) **Revolt.** The fine person of Absalom, his superior birth, and his natural claim, predisposed the people to regard his pretensions with favor; and this predisposition was strengthened by the measures which he took to win their regard. In the first place he insinuated that he was the heir apparent, by the state and attendance with which he appeared in public; while that very state the more enhanced the show of condescending sympathy with which he accosted the suitors who repaired for justice or favor to the royal audience, inquired into their various cases, and hinted at the fine things which might be expected if he were on the throne and had the power of accomplishing his own large and generous purposes. By these influences 'he stole the hearts of the men of Israel' (2 Sam. xv:1-6); and when at length, four years after his return from Geshur, he repaired to Hebron and there proclaimed himself king, the great body of the people declared for him. So strong ran the tide of opinion in his favor that David found it expedient to quit Jerusalem and retire to Mahanaim, beyond the Jordan (2 Sam. xv:7-18).

(7) **Entry Into Jerusalem.** When Absalom heard of this, he proceeded to Jerusalem and took possession of the throne without opposition. Among those who had joined him was Ahithophel, who had been David's counsellor, and whose profound sagacity caused his counsels to be regarded like oracles in Israel (2 Sam. xv:30-31). This defection alarmed David more than any other single circumstance in the affair, and he persuaded his friend Hushai to go and join Absalom, in the hope that he might be made instrumental in turning the sagacious counsels of Ahithophel to foolishness (2 Sam. xv:32-37). The first piece of advice which Ahithophel gave Absalom was that he should publicly take possession of that portion of his father's harem which had been left behind in Jerusalem; thus fulfilling Nathan's prophecy (2 Sam. xii:10-12). This was not only a mode by which the succession to the throne might be confirmed (see ABISHAG: Comp. Herodotus, iii:68), but in the present case, as suggested by the wily counsellor, this villainous measure would dispose the people to throw themselves the more unreservedly into his cause, from the assurance that no possibility of reconciliation between him and his father remained. Hushai had not then arrived. Soon after he came, when a council of war was held, to consider the course of operations to be taken against David. Ahithophel counselled that the king should be pursued that very night, and smitten, while he was 'weary and weak handed, and before he had time to recover strength' (2 Sam. xvii:1, 2). Hushai, however, whose object was to gain time for David, speciously urged, from the known valor of the king, the possibility and fatal conse-

quences of a defeat, and advised that all Israel should be assembled against him in such force as it would be impossible for him to withstand (2 Sam. xvii:5-13). Fatally for Absalom, the counsel of Hushai was preferred to that of Ahithophel; and time was thus given to enable the king, by the help of his influential followers, to collect his resources, as well as to give the people time to reflect upon the undertaking in which so many of them had embarked (2 Sam. xvii:14).

(8) **Organization of Royal Forces.** The king soon raised a large force, which he properly organized and separated into three divisions, commanded severally by Joab, Abishai, and Ittai of Gath (2 Sam. xviii:2). The king himself intended to take the chief command; but the people refused to allow him to risk his valued life, and the command then devolved upon Joab. The battle took place in the borders of the forest of Ephraim; and the tactics of Joab, in drawing the enemy into the wood, and there hemming them in, so that they were destroyed with ease, eventually, under the providence of God, decided the action against Absalom (2 Sam. xviii:3-6). Twenty thousand of his troops were slain, and the rest fled to their homes.

(9) **Death.** Absalom himself fled on a swift mule; but as he went, the boughs of a terebinth tree caught the long hair in which he gloried, and he was left suspended there. The charge which David had given to the troops to respect the life of Absalom prevented anyone from slaying him; but when Joab heard of it, he hastened to the spot, and pierced him through with three darts. His body was then taken down and cast into a pit there in the forest, and a heap of stones was raised upon it (2 Sam. xviii:7-17), B. C. 967.

David's fondness for Absalom was unextinguished by all that had passed; and as he sat, awaiting tidings of the battle, at the gate of Mahanaim, he was probably more anxious to learn that Absalom lived, than that the battle was gained; and no sooner did he hear that Absalom was dead, than he retired to the chamber above the gate, to give vent to his paternal anguish (2 Sam. xviii:24-33). The victors, as they returned, slunk into the town like criminals, when they heard the bitter wailings of the king:—'O my son Absalom! my son, my son Absalom! would God I had died for thee, O Absalom, my son, my son!' The consequence of this weakness—not in his feeling, but in the inability to control it—might have been most dangerous, had not Joab gone up to him, and, after sharply rebuking him for thus discouraging those who had risked their lives in his cause, induced him to go down and cheer the returning warriors by his presence (2 Sam. xix:1-8). (Comp. Ps. lii. title.) Absalom is elsewhere mentioned only in 2 Sam. xx:6; 1 Kings ii:7, 28; xv:2, 10; 2 Chron. xi:10, 21. From the last two of these passages he appears to have left only a daughter, (having lost three sons; 2 Sam. xiv:27; comp. xviii:18), who was the grandmother of Abijah. (See ABIJAH.) Tamar is with much probability identified with Maacah of 1 Kings xv:2, the wife of Rehoboam. (Comp. 2 Sam. iii:2; 2 Chron. xi:20 *sq.*) The sons must have predeceased their father, or else a different tradition is followed in 2 Sam. xviii:18, where we are told that Absalom had no son.

ABSALOM'S TOMB (ăb'sa-loms tŏmb). A remarkable monument bearing this name makes a

conspicuous figure in the Valley of Jehoshaphat, outside Jerusalem; and it has been noticed and described by almost all travelers. It is close by the lower bridge over the Kedron, and is a square isolated block hewn out from the rocky ledge so as to leave an area or niche around it. The body of this monument is about 24 feet square, and is ornamented on each side with two col-

Absalom's Tomb.

umns and two half columns of the Ionic order, with pilasters at the corners. The architrave exhibits triglyphs and Doric ornaments. The elevation is about 18 or 20 feet to the top of the architrave, and thus far it is wholly cut from the rock.

The old travelers who refer to this tomb, as well as Calmet after them, are satisfied that they find the history of it in 2 Sam. xviii:18, which states that Absalom, having no son, built a monument to keep his name in remembrance, and that this monument was called 'Absalom's Hand'—that is, *index, memorial, or monument*. (See *HAND*.) With our later knowledge, a glance at this and the other monolithic tomb bearing the name of Zecharias is quite enough to show that they had no connection with the times of the persons whose names have been given to them. (See *JERUSALEM*.)

ABSINTHIUM (ăb-sin'thî-ŭm), (Gr. ἄψινθιον, *apsin'thion*, in New Testament, by which also the Sept. renders the corresponding Hebrew term in the A. V. *wormwood*). This proverbially bitter plant is used in the Hebrew, as in most other languages, metaphorically, to denote the moral bitterness of distress and trouble (Deut. xxix:18; Prov. v:4; Jer. ix:15; xxiii:15; Lam. iii:15, 19; Amos v:7; vi:12). Thence also the name given to the fatal star in Rev. viii:10-11. *Artemisia* is the botanical name of the genus of plants in which the different species of wormwoods are found. The plants of this genus are easily recognized by the multitude of fine divisions into which the leaves are usually separated, and the numerous clusters of small, round, drooping, greenish-yellow or brownish flower-heads with which the branches are laden. It must be understood that our common wormwood (*Artemisia absinthium*) does not appear to exist in Palestine, and cannot therefore be that specially denoted by the Scriptural term. Indeed, it is more than

probable that the word is intended to apply to *all* the plants of this class that grew in Palestine, rather than to any one of them in particular. (See *WORMWOOD*.)

ABSTINENCE (ăb'sti-nens), is a refraining from the use of certain articles of food usually eaten; or from all food during a certain time for some particular object. It is distinguished from Temperance, which is moderation in ordinary food; and from Fasting, which is abstinence from a religious motive.

(1) **Jewish.** The first example of abstinence which occurs in Scripture is that in which the use of blood is forbidden to Noah (Gen. ix:4). (See *BLOOD*.) The next is that mentioned in Gen. xxxii:32: 'The children of Israel eat not of the sinew which shrank, which is upon the hollow of the thigh, *unto this day*, because he (the angel) touched the hollow of Jacob's thigh in the sinew that shrank.' This practice of particular and commemorative abstinence is here mentioned by anticipation long after the date of the fact referred to, as the phrase 'unto this day' intimates. No actual instance of the practice occurs in the Scripture itself, but the usage has always been kept up; and to the present day the Jews generally abstain from the whole hind-quarter on account of the trouble and expense of extracting the particular sinew. By the law, abstinence from blood was confirmed, and the use of the flesh of even lawful animals was forbidden, if the manner of their death rendered it impossible that they should be, or uncertain that they were, duly exsanguinated (Exod. xxii:31; Deut. xiv:21). A broad rule was also laid down by the law, defining whole classes of animals that might not be eaten (Lev. xi). (See *ANIMAL*; *FOOD*.) Certain parts of lawful animals, as being sacred to the altar, were also interdicted. These were the large lobe of the liver, the kidneys and the fat upon them, as well as the tail of the 'fat-tailed' sheep (Lev. iii:9-11). Everything consecrated to idols was also forbidden (Exod. xxxiv:15). In conformity with these rules the Israelites abstained generally from food which was more or less in use among other people. Instances of abstinence from allowed food are not frequent, except in commemorative or afflictive fasts. The forty days' abstinence of Moses, Elijah and Jesus are peculiar cases requiring to be separately considered. (See *FASTING*.) The priests were commanded to abstain from wine previous to their actual ministrations (Lev. x:9), and the same abstinence was enjoined to the Nazarites during the whole period of their separation (Num. vi:5). A constant abstinence of this kind was, at a later period, voluntarily undertaken by the Rechabites (Jer. xxxv:16, 18). (See *RECHABITES*.)

(2) **Christian.** Among the early Christian converts there were some who deemed themselves bound to adhere to the Mosaical limitations regarding food, and they accordingly abstained from flesh sacrificed to idols, as well as from animals which the law accounted unclean; while others contemned this as a weakness, and exulted in the liberty wherewith Christ had made his followers free. This question was repeatedly referred to St. Paul, who laid down some admirable rules on the subject, the purport of which was, that everyone was at liberty to act in this matter according to the dictates of his own conscience; but that the strong-minded had better abstain from the exercise of the freedom they

possessed, whenever it might prove an occasion of stumbling to a weak brother (Rom. xiv. 1-3; 1 Cor. viii). In another place the same apostle reproves certain sectaries who should arise forbidding marriage and enjoining abstinence from meats which God had created to be received with thanksgiving (1 Tim. iv:3, 4). The council of the apostles at Jerusalem decided that no other abstinence regarding food should be imposed upon the converts than 'from meats offered to idols, from blood, and from things strangled' (Acts xv:29).

St. Paul says (1 Cor. ix:25) that wrestlers, in order to obtain a corruptible crown, abstain from all things; or from everything which might weaken them. He requires Christians to abstain from all appearance of evil (1 Thess. v:22); and, with much stronger reason, from everything really evil, and contrary to religion and piety.

The Essenes, a sect among the Jews which is not mentioned by name in the Scriptures, led a more abstinent life than any recorded in the sacred books. As there is an account of them elsewhere (see ESSENES), it is only necessary to mention here that they refused all pleasant food, eating nothing but coarse bread and drinking only water; and that some of them abstained from food altogether until after the sun had set.

ABUNDANCE (ă-bun'dans). The translation of a great many Heb. and Gr. terms. It denotes in general a great deal of anything (2 Chron. ix:9; Rom. v:17; 2 Cor. xii:7). Great plenty and wealth (Deut. xxviii:47). *The abundance of the seas*, imports plenty of fishes, and of profits arising from sea trade (Deut. xxxiii:19).

The meaning of the word in Mark xii:44 is *superfluity* as in the Revised Version, 'They cast in of their *superfluity*' (Comp. Luke xxi:4).

ABUSE (ă-būz'). In general it means to use persons or things from wrong ends or motives, or in a sinful and dishonorable manner (Judg. xix:25). The New Testament Gr. word *καταχράσασθαι*, *kat-ah-krah'oh-my*, means to "use to the full," regardless of consequences (1 Cor. vii:31), 'Those that use the world as not abusing it' (Revised Version) means 'using it to the full' (1 Cor. ix:18), 'that I abusing not my power in the gospel' (Revised Version), 'so as not to use the full my right in the gospel.'

ABYSS (ă-bīs') (Gr. "ἄβυσσος, *a'būs-sos*). The Greek word means literally 'without bottom,' but actually *deep*, *profound*. It is used in the Sept. for the Hebrew word, which we find applied either to the *ocean* (Gen. i:2; vii:11), or to the *under world* (Ps. lxxi:20; cvii:26). In the New Testament it is used as a noun to describe Hades, or the place of the dead generally (Rom. x:7); but more especially that part of Hades in which the souls of the wicked were supposed to be confined (Luke viii:31; Rev. ix:1, 2, 11; xx:1, 3; Comp. 2 Pet. ii:4).

(1) **Bottomless Pit.** In the Revelation the authorized version invariably renders it 'bottomless pit,' elsewhere 'deep.'

Most of these uses of the word are explained by reference to some of the cosmological notions which the Hebrews entertained in common with other Eastern nations. It was believed that the abyss, or sea of fathomless waters, encompassed the whole earth. The earth floated on the abyss, of which it covered only a small part. According to the same notion, the earth was founded upon the waters, or, at least, had its foundations in the abyss beneath (Ps. xxiv:2; cxxxvi:6).

Under these waters, and at the bottom of the abyss, the wicked were represented as groaning, and undergoing the punishment of their sins. There were confined the Rephaim—those old giants who, while living, caused surrounding nations to tremble (Prov. ix:18; vii:27, see margin). In those dark regions the sovereigns of Tyre, Babylon and Egypt are described by the prophets as undergoing the punishment of their cruelty and pride (Jer. xxv:14; Ezek. xxviii:10, etc.). This was 'the deep' into which the evil spirits in Luke viii:31 besought that they might not be cast, and which was evidently dreaded by them. (See COSMOGONY; HADES.)

(2) **Celtic Druids.** The notion of such an abyss was by no means confined to the East. It was equally entertained by the Celtic Druids, who held that *Annwn* (the deep, the low port), the abyss from which the earth arose, was the abode of the evil principle (Gwathlawn), and the place of departed spirits, comprehending both the Elysium and the Tartarus of antiquity. With them also wandering spirits were called *Plant annwn*, 'the children of the deep' (Davis' *Celtic Researches*, p. 175; *Myth. and Rites of the B. Druids*, p. 49). (See HELL.)

Fountains and rivers, in the opinion of the Hebrews, are derived from the abyss or sea; issuing from thence through invisible channels, and returning through others (Eccl. i:7). We notice a few special applications of the word "deep" or "abyss" in the Scriptures. Isaiah (xlv:27) refers to the method by which Cyrus took Babylon. Jeremiah (1:38 and li:36) refers to the same event (Comp. Is. xix:5), where reference is made to the exhaustion of the country by its enemies. In Rom. x:7 we have: "Who shall descend into the *abyss*" (Deut. xxx:13, "beyond the sea") "to bring up Christ again from the dead?" The *abyss* metaphorically means calamities (Ps. xlii:7; lxxi:20).

ABYSSINIA (ăb-īs-sin'ī-a). "There is no part of Africa, Egypt being excepted, the history of which is connected with so many objects of interest as Abyssinia. A region of Alpine mountains, ever difficult of access by its nature and peculiar situation, concealing in its bosom the long-sought sources of the Nile, and the still more mysterious origin of its singular people, Abyssinia has alone preserved, in the heart of Africa, its peculiar literature and its ancient Christian church. What is still more remarkable, it has preserved existing remains of a previously existing and widespread Judaism, and with a language approaching more than any living tongue to the Hebrew, a state of manners, and a peculiar character of its people, which represent in these latter days the habits and customs of the ancient Israelites in the times of Gideon and of Joshua. So striking is the resemblance between the modern Abyssinians and the Hebrews of old, that we can hardly look upon them but as branches of one nation; and if we had not convincing evidence to the contrary, and knew not for certain that the Abrahamidæ originated in Chaldea, and to the northward and eastward of Palestine, we might frame a very probable hypothesis, which should bring them down as a band of wandering shepherds from the mountains of Habesh (Abyssinia), and identify them with the pastor kings, who, according to Manetho, multiplied their bands of the Pharaohs, and being, after some centuries, expelled thence by the will of the gods, sought refuge in Judea, and built the walls of Jerusalem. Such an

hypothesis would explain the existence of an almost Israelitish people, and the preservation of a language so nearly approaching to the Hebrew, in intertropical Africa. It is certainly untrue, and we find no other easy explanation of the facts which the history of Abyssinia presents, and particularly the early extension of the Jewish religion and customs through that country' (Prichard's *Physical History of Man*, pp. 279, 280).

ACCAD (ak'käd), (Heb. אַכַּד, *ak-kad'*, a fortress), the name of one of the four cities in Babylonia mentioned in Genesis (Gen. x:10) as belonging to the kingdom of Nimrod in the country of

Nimrod's Hill.

Shinar. It was the residence of the first historical ruler of all Babylonia, Sargon I, whose active reign dates from 3800 B. C., according to the statement of Nabonidus (555-538 B. C.) an inscription discovered in 1881 on the site of Sippar. With Accad are named Babel, Erech and Calneh. Erech and Babel are well known in later history, and their sites have not been lost. The ruins of Calneh have recently been discovered. (See CALNEH.) Accad is probably the city which is known in the early Babylonian inscriptions under the name of Agade, or Agadi, which is on the Euphrates, north of Babylon. Rawlinson places it at *Aker-Kuf*, 10 miles west by north of Bagdad. Delitzsch conjectures that it may have been one of the two cities which bore the name of Sepharvaim, but McCurdy locates this double city in N. Syria (Sec. 349). The Wolfe expedition to Babylonia, in 1884-85 (cf. *Report*, pp. 24, 25), located it at *Anbar*, on the Euphrates, N. W. of the ruins of Babylon. It was probably the capital city of *mat Akkadi*. The people who first formed this kingdom were the ancient Sumerians, whose racial connections are not yet known. Some suppose them to have been the inventors of the cuneiform system of writing, and laid the basis upon which the whole system of culture of the ancient Babylonians rested.

On the other hand, there is a growing school which maintains that the Semites, whom we know as possessing the cuneiform characters, were the inventors of these last and the developers of Semitic culture, and that the so-called 'Sumerians' and 'Accadians' are but figments of an over-zealous scientific spirit. Among the members of this school are Profs. McCurdy and Ira M. Price, Hastings' *Bib. Dict.*; McCurdy, *His. Proph. and the Mon.*; Price, *The Mon.*, O. T. (See ASSYRIA AND BABYLONIA.)

ACCARON (äk'ka-rön). See EKRON.

ACCEPT, ACCEPTABLE, ACCEPTATION (ak'sëpt, ak-sëpt'abl, ak-sëp-tä'shun), (Heb. אָבַח, *raw-*

tsaw', to take pleasure in; Gr. δέχομαι, *dekh'om-ahee*, to take with the hand, *i. e.*, to receive with hospitality). 'Peradventure, he will *accept* of me' (Gen. xxxii:20). *To accept* of meant to receive with favor and approval, or as *acceptable*. It is so used by Bacon, "God above * * * *accepteth* of both." In general the terms denote (1) To receive favorably (Mal. i:10-13; (2) To take pleasure in (Jer. xiv:10); (3) To esteem highly (Luke iv:24). To be *accepted* of God, is to be received into his grace and favor (Acts x:35). The saints are *accepted in the beloved*: through union to Jesus Christ they are received into the Divine favor, and entitled to all the blessings of eternal life (Eph. i:6). The sinful *accepting* of persons, is the showing them partial respect in judgment or otherwise, on the ground of flattery or some expected advantage (Prov. xviii:5; Job xxxii:21; Gal. ii:6).

ACCEPTANCE (äk-sëpt'ans). Accept and kindred words are used in Scripture to denote the relation of favor and approval in which one man may stand to other men, and especially to God. In Acts x:35 we learn that "in every nation he that feareth him and worketh righteousness is *accepted* of him." In Christ Jesus only are we *accepted* to God (Eph. i:6).

ACCESS (äk-sës'), (Gr. προσαγωγή, *pros-ag-ogue-ay'*, act of moving to), free admission; unhampered entrance. The way of our *access* to a gracious state, and to God, is *through Christ*, as our ransom and ground of acceptance; actually *by the spirit*, as applying to us the person and fullness of Christ; and *by faith*, as the means of receiving and improving Christ, as the Lord our righteousness and strength (Eph. ii:18; iii:12; Rom. v:2). To obtain acceptance with God we must ask according to his will. St. John (1 John v:14, 15) says: "This is the confidence that we have in him, that, if we ask anything according to his will, he heareth us: and if we know that he hear us, whatsoever we ask, we know that we have the petitions that we desired of him."

ACCHABIS (äk'ka-bis). See SPIDER.

ACCHO (äk'ko), (Heb. אַכּוֹ, *ak-ko*, Sept. Ἀκχω, *Ak-khoh*), a town and haven within the nominal territory of the tribe of Asher, which, however, never acquired possession of it (Judg. i:31). The Greek and Roman writers call it Ἀκη, *Ace* (Strab. xvi:877; Diod. Sic. xix:93; C. Nep. xiv:5); but it was eventually better known as **PTOLEMAIS** (Plin. *Hist. Nat.* v:19), which name it received from the first Ptolemy, king of Egypt, by whom it was much improved. By this name it is mentioned in the Apocrypha (1 Macc. x:56; xi:22, 24; xii:45, 48; 2 Macc. xiii:14), in the New Testament (Acts xxi:7), and by Josephus (*Antiq.* xiii:12, 2, *seq.*). It was also called *Colonia Claudii Caesaris*, in consequence of its receiving the privileges of a Roman city from the Emperor Claudius (Plin. v:17; xxxvi:65). But the names thus imposed or altered by foreigners never took with the natives, and the place is still known in the country by the name of Akka. It continued to be called Ptolemais by the Greeks of the lower empire, as well as by Latin authors, while the Orientals adhered to the original designation.

(1) **Situation.** This famous city and haven is situated in N. lat. 32 deg. 55 min., and E. long. 35 deg. 5 min., and occupies the northwestern point of a commodious bay, called the Bay of Acre, the opposite or southwestern point of which is formed by the promontory of Mount Carmel.

The city lies on the plain to which it gives its name. Its western side is washed by the waves of the Mediterranean, and on the south lies the bay, beyond which may be seen the town of Caipha, on the site of the ancient Calamos, and, rising high above both the shrubby heights of Carmel. The mountains belonging to the chain of Anti-Libanus are seen at the distance of about four leagues to the north, while to the east the view is bounded by the fruitful hills of the Lower Galilee. The bay, from the town of Acre to the promontory of Mount Carmel, is three leagues wide and two in depth. The port, on account of its shallowness, can only be entered by vessels of small burden; but there is excellent anchorage on the other side of the bay, before Caipha, which is, in fact, the roadstead of Acre.

(2) **History.** In the course of time Ptolemais was absorbed, with all the country, into the Roman empire; and the rest of its *ancient* history is obscure and of little note. It is only mentioned in the New Testament from St. Paul having spent a day there on his voyage to Cæsarea (Acts xxi:7). It continued a place of importance, and was the seat of a bishopric in the first ages of the Christian Church. The see was filled sometimes by orthodox and sometimes by Arian bishops; and it has the equivocal distinction of having been the birthplace of the Sabellian heresy. Accho, as we may now again call it, was an imperial garrison town when the Saracens invaded Syria, and was one of those that held out until Cæsarea was taken by Amru in A. D. 638.

(3) **Medals.** There are several medals of Accho or Ptolemais extant, both Greek and Latin. Most of the former have also the Phœnician name of the city, 𐤀𐤊𐤏𐤀 or Accho.

Of the 10,000 or 12,000 inhabitants, two-thirds are Moslems, the remainder being Greek and Catholic Christians, with a few Jews and Persians. It is the seat of a provincial governor, under whom are the districts of Haifa, Nazareth, Tiberias and Safed. The chief trade is the export of grain brought by camels from *Haurân*. About 1,000 tons of oil from the olive groves of Galilee are also annually exported.

ACCOMMODATION (ăk-kôm'mo-dă'shun) (exegetical or special) is principally employed in the application of certain passages of the Old Testament to events in the New, to which they had no actual historical or typical reference. In this sense it is also called *illustration*. Citations of this description are apparently very frequent throughout the whole New Testament, but especially in the Epistle to the Hebrews. As the system of exegetical accommodation has in modern times been the occasion of much angry controversy, it will be necessary to enter somewhat minutely into its character and history.

It cannot be denied that many such passages, although apparently introduced as referring to, or predictive of, certain events recorded in the New Testament, seem to have, in their original connection, an exclusive reference to quite other objects. The difficulty of reconciling such *seeming* misapplications, or deflections from their original design, has been felt in all ages, although it has been chiefly reserved to recent times to give a solution of the difficulty by the theory of *accommodation*. By this it is meant that the prophecy or citation from the Old Testament was not designed literally to apply to the event in question, but that the New Testament writer

merely adopted it for the sake of ornament, or in order to produce a strong impression, by showing a remarkable parallelism between two analogous events, which had in themselves no mutual relation.

Calmet, Doddridge, Rosenmüller, and John are among the commentators who look upon passages introduced by the formula "that it might be fulfilled," as equally accommodations with those which are prefaced by the words "then was fulfilled;" while those who deny the accommodative theory altogether considered both as formulas of direct prophecies, at least in a secondary or typical sense. This, for instance, is the case especially in regard to the two citations of this description which first present themselves in the New Testament, viz., Matt. ii:15, and Matt. ii:17, the former of which is introduced by the first, and the latter by the second of these formulas. But inasmuch as the commentators above referred to cannot perceive how the citation from Hosea xi:1, 'Out of Egypt have I called my son,' although prefaced by the formula 'that it might be fulfilled,' and which literally relates to the calling of the children of Israel out of Egypt, can be prophetically diverted from its historical meaning, they look upon it as a simple accommodation, or applicable quotation, and consider the *ἵνα πληρωθῆ* as a Jewish formula of accommodation. Mr. T. H. Horne, in his *Introduction to the Critical Study of the Holy Scriptures*, says: 'The apostles, who were Jews by birth, and wrote and spoke in the Jewish idiom, frequently thus cite the Old Testament, intending no more by this mode of speaking than that the words of such an ancient writer might with equal propriety be adopted to characterize any similar occurrence which happened in their times. The formula "that it might be fulfilled," does not therefore differ in signification from the phrase "then was fulfilled," applied in the following citation in Matt. ii:17, 18, from Jer. xxxi:15, 17, to the massacre of the infants at Bethlehem. They are a beautiful quotation, and not a prediction of what then happened, and are therefore applied to the massacre of the infants according not to their original and historical meaning, but according to Jewish phraseology.' Dr. Adam Clarke also, in his *Commentary on Jeremiah* (xxx:15-17), takes the same view:—"St. Matthew, who is ever fond of accommodation, applied these words to the massacre of the children of Bethlehem; that is, they were suitable to that occasion, and therefore he applied them, but they are not a prediction of that event."

Among those who, in modern times, have most ably vindicated the system of the typical interpretation of prophecy, as opposed to the accommodation theory, is Professor Tholuck, of Berlin, in the Dissertation affixed to his *Commentary on Hebrews*. He does not, indeed, deny all instances of accommodation, but refers a great number of passages which had been so interpreted (as Matt. ii:15-18; xxvii:9-35; John iii:14; xix:24, 36; Acts i:20; ii:27-31) to the class of typical prophecies.

The following list of passages Mr. Horne subjoins as accommodated from the Old Testament by the writers of the New. Many of them may be included, however, among the typical interpretations of prophecy:

ACCOMPLISH (äk-köm-plish). (1) To perform; fulfill; fully execute (Jer. xlv:25). (2) To bring to pass what is desired, purposed, or promised (Prov. xiii:1-9). (3) To finish; so days are accomplished (Acts xxi:5).

ACCORD (äk-kôrd'), of its or his own accord; freely, without pains or constraint, or human agency (Lev. xxv:5; 2 Cor. viii:17). With one accord, with universal harmony and agreement (Acts i:14; ii:46; v:12). From the Gr. *αὐτόματος*, *au-tom'ah-tos*, we get our word "automatically."

ACCORDING (äk-kôrd'ing). (1) Agreeably to (2 Tim. i:9). (2) Even as; in proportion to (Acts iv:35). God rewards all men *according to their works*; that is, agreeably to the nature of their works (2 Cor. v:10; Rev. xxii:12); but deals not with his elect *according* to the merit of their works, whether good or bad (2 Tim. i:9; Tit. iii:5).

ACCOUNT (äk-kount'), in general to reckon; judge; value. Deut. ii:11. The Hebrews *made account* for the paschal lamb; every eater paid his share of the price. Exod. xii:14. To put a thing to one's *account*, is to charge it on him as his debt, or reckon it to him as his good deed. Philem. 18; Phil. iv:17. To *take account*, is to search into and judge a matter. Matt. xviii:23. To *give account*, is to have our conduct tried, whether it be reasonable and lawful or not. Rom. xiv:12; Heb. xiii:17; I Pet. iv:5. God *giveth not account of his matters*: he does not ordinarily inform his creatures of the reasons and circumstances of his conduct, nor is he under obligation to do it. Job. xxxiii:13.

It is used for *reckon* or *impute* (Gal. iii:6). To seem or be reputed (Mark x:42; Luke xxii:24).

ACCOUNTABILITY (äk-kount'ä-bil'ity), the abstract term for the use of one's opportunities and talents which all must make to God. Matt. xii:36; Rom. xiv:10; Heb. xiii:17, and I Pet. iv:5.

It is the obligation under which every man lives of giving an account of himself to God, in order to future retribution. Matt. xii:36; Rom. xiv:10, 12; 2 Cor. v:10; Heb. xiii:17; I Pet. iv:5. The wisdom of God in this constitution of things may be understood by a very little reflection. There manifestly wants some husbanding and equalizing power to make the faculties of man turn to the most account. Powers are slumbering for want of a call, instruments rusting for want of an occupation, and energies of every kind are lavished upon idle or evil doing that should be occupied in doing good. A full conviction of accountability to God, firmly seated in the soul, would change the aspect of the world.

ACCUBATION (äk'ku-bä'shun), the posture of reclining on couches at table, which prevailed among the Jews in and before the time of Christ.

(1) **Roman Custom.** We see no reason to think that, as commonly alleged, they borrowed this

custom from the Romans after Judea had been subjugated by Pompey. But it is best known to us as a Roman custom, and as such must be described. The dinner-bed, or *triclinium*, stood in the middle of the dining-room, clear of the walls, and formed three sides of a square which enclosed the table. The open end of the square, with the central hollow, allowed the servants to attend and serve the table. In all the existing representations of the dinner-bed it is shown to have been higher than the enclosed table. Among the Romans the usual number of guests on each couch was three, making nine for the three couches, equal to the number of the Muses; but sometimes there were four to each couch. The Greeks went beyond this number (Cic. *In Pis.* 27).

(2) **Lord's Supper.** The Jews appear to have had no particular fancy in the matter, and we know that at our Lord's last supper *thirteen* persons were present. As each guest leaned, during the greater part of the entertainment, on his left elbow, so as to leave the right arm at liberty, and as two or more lay on the same couch, the head of one man was near the breast of the man who lay behind him, and he was, therefore, said 'to lie in the bosom' of the other. This phrase was in use among the Jews (Luke xvi:22, 23; John i:18; xiii:23), and occurs in such a manner as to show that to lie next below, or 'in the bosom' of the master of the feast, was considered the most favored place; and is shown by the citations of Kypke and Wetstein (on John xiii:23) to have been usually assigned to near and dear connections. So it was 'the disciple whom Jesus loved' who 'reclined upon his breast' at the last supper. Lightfoot and others supposed that as, on that occasion, John lay next below Christ, so Peter, who was also highly favored, lay next above him. This conclusion is founded chiefly on the fact of Peter beckoning to John that he should ask Jesus who was the traitor. But this seems rather to prove the contrary—that Peter was not near enough to speak to Jesus himself. If he had been there, Christ must have lain near *his* bosom, and he would have been in the best position for whispering to his master, and in the worst for beckoning to John. The circumstance that Christ was able to reach the sop to Judas when he had dipped it seems to us rather to intimate that *he* was the one who filled that place. Any person who tries the posture may see that it is not easy to deliver anything but to the person next above or next below. And this is not in contradiction to, but in agreement with, the circumstances. The morsel of favor was likely to be given to one in a favored place; and Judas, being so trusted and honored as to be the treasurer and almoner of the whole party, might, as much as any other of the apostles, be expected to fill that place. This also gives more point to the narrative, as it aggravates by contrast the turpitude and baseness of his conduct.

(3) **Dinner-bed.** The frame of the dinner-bed was laid with mattresses variously stuffed, and, latterly, was furnished with rich coverings and hangings. Each person was usually provided with a cushion or bolster on which to support the upper part of his person in a somewhat raised position, as the left arm alone could not long without weariness sustain the weight. The lower part of the body being extended diagonally on the bed, with the feet outward, it is at once per-

ceived how easy it was for 'the woman that was a sinner' to come behind between the dinner-bed and the wall and anoint the feet of Jesus (Matt. xxvi:7; Mark xiv:3).

Reclining on Couches at a Feast.

(4) **Improbable Derivation.** It is utterly improbable that the Jews derived this custom from the Romans, as is constantly alleged. They certainly knew it as existing among the Persians long before it had been adopted by the Romans themselves (Esth. i:6; vii:8); and the presumption is that they adopted it while subject to that people. The Greeks also had the usage (from the Persians) before the Romans; and with the Greeks of Syria the Jews had very much intercourse. Besides, the Romans adopted the custom from the Carthaginians (Val. Max. xii:1, 2; Liv. xxviii:28); and that *they* had it, implies that it previously existed in Phœnicia, in the neighborhood of the Jews. Thus, that in the time of Christ the custom had been lately adopted from the Romans, is the last of various probabilities. It is also unlikely that in so short a time it should have become usual and even (as the Talmud asserts) obligatory to eat the Passover in that posture of indulgent repose and in no other.

ACCURSED (ăk-kûrst'). The Heb. word אָרְרָה, *kheh'rem*, and the Gr. ἀνάθεμα, *an-ath'em-ah*, which the A. V. often renders *accursed*, signify things set apart or devoted; and with Jews and Christians marked the highest degree of excommunication. They generally imported the cutting off one from the community of the faithful, the number of the living, or the privileges of society, and of a thing from existence and common use. The cities of king Arad, the seven nations of Canaan, the sacrifices of false gods, were *accursed*, or devoted to destruction. Num. xxi:2, 3; Deut. vii:2, 26; Exod. xxii:19. The Hebrews devoted to a curse such as did not assist in punishing the Benjamites. Judg. xxi:5. Jephthah devoted whatever should first meet him from his house. Judg. xi:30. Saul devoted such in his host as should taste any food before sunset while he pursued the Philistines. 1 Sam. xiv:24. About forty Jews devoted themselves under a curse, if they did eat or drink before they had killed Paul. Acts xxiii:12-13. Nothing devoted to the Lord, under the form of a curse, could be redeemed. Lev. xxvii:28, 29. The wealth of Jericho was *accursed*; the gold, silver, brass and iron were under the form of a curse, set apart to the service of God, and the rest devoted to ruin. Josh. vi:16, 19; vii:1. The hanged malefactors were *accursed of God*, devoted to public punishment. Deut. xxi:23. To promote the salvation

of his Jewish brethren, Paul could have wished himself *accursed from Christ*; not cast into hell, and forever under the power of sin, and employed in blaspheming God, but cast out of the church, and made himself a temporary monument of God's wrath (Rom. ix:3). The difficulty is removed at once by adopting what seems the proper translation—"I have great heaviness and continual sorrow in my heart, for I was *wont to wish myself accursed from Christ*." His sorrow was for his kindred who determined to be accursed from Christ, a state which Paul, who once was in it, could now appreciate. (See ANATH-EMA.)

ACCUSER (ak-kū'zer,) (Heb. יִצְחָק, *law-shan'*, to lick, to use the tongue; in the New Testament, *κατήγορος*, *kal-ay'gor-os*, prosecutor; *Ἀντιδικός*, *an-tik'i-dos*. The original word, which bears this leading signification, means one who has a cause or matter of contention; the accuser, opponent, or plaintiff in any suit (Judg. xii:2; Matt. v:25; Luke xii:58).

(1) **Hebrew Courts.** We have little information respecting the manner in which causes were conducted in the Hebrew courts of justice, except from the Rabbinical authorities, who, in matters of this description, may be supposed well informed as to the later customs of the nation. Even from these we learn little more than that great care was taken that, the accused being deemed innocent until convicted, he and the accuser should appear under equal circumstances before the court, that no prejudicial impression might be created to the disadvantage of the defendant, whose interests, we are told, were so anxiously guarded that any one was allowed to speak whatever he knew or had to say in his favor, which privilege was withheld from the accuser. (Lewis, *Origines Hebraeae* i:68.) The word is, however, to be understood in regard to the real plaintiff, not to the advocates, who only became known in the later period of the Jewish history. (See ADVOCATE.)

(2) **Biblical Use.** The word is also applied in Scripture, in the general sense, to any adversary or enemy (Luke xviii:3; 1 Pet. v:8). In the latter passage there is an allusion to the old Jewish notion that Satan was the accuser or calumniator of men before God (Job i:6, *sq.*; Rev. xii:10, *sq.*; Comp. Zech. iii:1). In this application the forensic sense was still retained, Satan being represented as laying to man's charge a breach of the law, as in a court of justice, and demanding his punishment. (See SATAN.)

ACELDAMA (a-kēl'da-mā), (Gr. Ἀκελδαμά, *ak-el-dam-ah'*, from the Syro-Chaldaic, field of blood), the field purchased with the money for which Judas betrayed Christ, and which was appropriated as a place of burial for strangers (Matt. xxvii:8; Acts i:19). It was previously 'a potter's field.'

(1) **Possible Location.** The field now shown as Aceldama lies on the slope of the hills beyond the valley of Hinnom, south of Mount Zion. This is obviously the spot which Jerome points out (*Onomast.*, *s.v.* 'Acheldamach'), and which has since been mentioned by almost every one who has described Jerusalem. Sandys thus writes of it: 'On the south side of this valley, neere where it meeteth with the valley of Jehoshaphat, mounted a good height on the side of the mountain, is *Aceldama*, or the field of blood, purchased with the restored reward of treason, for a burial place for strangers.'

(2) **Mother of Constantine.** 'In the midst whereof a large square roome was made by Helena, the mother of Constantine; the south side, walled with the naturall rocke; flat at the top, and equall with the vpper level; out of which ariseth certaine little cupoloes, open in the midst to let doune the dead bodies. Thorow these we might see the bottome, all couered with bones, and certaine corses but newly let doune, it being now the sepulchre of the Armenians. A greedy graue, and great enough to deuoure the dead of a whole nation. For they say (and I believe it), that the earth thereof within the space of eight and forty houres will consume the flesh that is laid thereon' (*Relation of a Journey*, p. 187). He then relates the common story, that the empress referred to caused two hundred and seventy ship-loads of this flesh-consuming mold to be taken to Rome, to form the soil of the Campo Sancto, to which the same virtue is ascribed. Richardson (*Travels*, p. 567) affirms that bodies were thrown in as late as 1818; but Dr. Robinson alleges that it has the appearance of having been for a much longer time abandoned.

(3) **Present Condition.** 'The field or plat is not now marked by any boundary to distinguish it from the rest of the hillside; and the former charnel-house, now a ruin, is all that remains to point out the site. * * * An opening at each end enabled us to look in; but the bottom was empty and dry, excepting a few bones much decayed' (*Biblical Researches*, i:524).

ACHAIA (ā-kā'yā), (Gr. Ἀχαΐα, *ach-ah-ee'ah*), a region of Greece, which in the restricted sense occupied the northwestern portion of the Peloponnesus, including Corinth and its isthmus (Strabo, viii, p. 438, *sq.*). By the poets it was often put for the whole of Greece, whence Ἀχαιοί, the Greeks. Under the Romans, Greece was divided into two provinces, Macedonia and Achaia, the former of which included Macedonia proper, with Illyricum, Epirus, and Thessaly; and the latter, all that lay southward of the former (Cellar. i, pp. 1170, 1322). It is in this latter acceptance that the name of Achaia is always employed in the New Testament (Acts xviii:12-16; xix:21; Rom. xv:26; 1 Cor. xvi:15; 2 Cor. i:1; ix:2; xi:10; 1 Thess. i:7, 8). Achaia was at first a senatorial province, and, as such, was governed by proconsuls (Dion Cass. liii, p. 704). Tiberius changed the two into one imperial province under procurators (Tacit. *Annal.* i:76); but Claudius restored them to the senate and to the proconsular form of government (Suet. *Claud.* 25). Hence the exact and minute propriety with which St. Luke expresses himself in giving the title of proconsul to Gallio, who was appointed to the province in the time of Claudius (Acts xviii:12).

ACHAICUS (a-kā'i-kūs), (Gr. Ἀχαϊκός, *ach-ah-ee-kos'*), a native of Achaia and a follower of the apostle Paul. He, with Stephanus and Fortunatus, was the bearer of the 1st Epistle to the Corinthians, and was recommended by the apostle to their special respect (1 Cor. xvi:17).

ACHAN (ā'kan), (Heb. אֲחָז, *aw-kawn'*, troublesome, Josh. vii:1). In the parallel passage (1 Chron. ii:7) the name is spelt אֲחָז, *aw-kawr*, and as it has there the meaning of *troubling*, it is thought by some that this is an intentional change after the fact, to give the name a significant reference to the circumstance which renders it notorious.

While Joshua and his army were besieging Jericho it was put under that awful ban of which there are other instances in the early

Scripture history, whereby all the inhabitants (excepting Rahab and her family) were devoted to destruction, all the combustible goods to be consumed by fire, and all the metals to be consecrated to God.

(1) **Vow of Devotement.** This vow of devotement was rigidly observed by all the troops when Jericho was taken, save by one man, Achan, a Judahite, who could not resist the temptation of secreting an ingot of gold, a quantity of silver, and a costly Babylonish garment, which he buried in his tent, deeming that his sin was hid (Josh. vii:20-22). But God made known this infraction, which, the vow having been made by the nation as one body, had involved the whole nation in his guilt. The Israelites were defeated, with serious loss, in their first attack upon Ai; and as Joshua was well assured that this humiliation was designed as the punishment of a crime which had inculpated the whole people, he took immediate measures to discover the criminal.

(2) **Punishment of Achan.** As in other cases, the matter was referred to the Lord by the lot, and the lot ultimately indicated the actual criminal. The conscience-stricken offender then confessed his crime to Joshua; and his confession being verified by the production of his ill-gotten treasure, the people, actuated by the strong impulse with which men tear up, root and branch, a polluted thing, hurried away not only Achan, but his tent, his goods, his spoil, his cattle, his children, to the valley (afterwards called) of Achor, north of Jericho, where they stoned him, and all that belonged to him; after which the whole was consumed with fire, and a cairn of stones raised over the ashes (Josh. vii:25). The severity of this act, as regards the *family* of Achan, has provoked some remark. Calmet says: "The sentence passed on the *family* of Achan may be justified by reflecting, (1) that probably he was assisted by them in this theft; for, if not, (2) he could never have secreted such articles *in the earth under his tent*, without being observed and detected by them, who ought to have opposed him, or immediately to have given notice of the transaction to the elders. As they did not do this, they became, by concealment, at least, partakers of his crime." Kitto, however, disagrees with this position, and says: "Instead of vindicating it, as is generally done, by the allegation that the members of Achan's family were probably accessories to his crime after the fact, we prefer the supposition that they were included in the doom by one of those sudden impulses of indiscriminate popular vengeance to which the Jewish people were exceedingly prone, and which, in this case, it would not have been in the power of Joshua to control by any authority which he could under such circumstances exercise. It is admitted that this is no more than a conjecture; but, as such, it is at least worth as much, and assumes considerably less than the conjectures which have been offered by others" (Josh. vii:26).

ACHAR (ā'kār), (Heb. אַחַר, *aw-kawr'*, trouble), another form of the name Achan, given to him in 1 Chron. ii:7. (See **ACHAN**.)

ACHASHDARPENIM (ā'kash-dār-pē'nim), (Heb. אַחַשְׁדַּרְפְּנִים, *akh-ash-dar-pen-ecm'*, A. V., 'lieutenants,' or 'rulers of provinces.' It occurs in Esth. iii:12; viii:9; ix:3; and with the Chaldean termination *an*, in Dan. iii:2, 3, 27; vi:2, 3). The word is undoubtedly merely another form

of writing the Persian word *satrap*, the origin of which has been much disputed, and does not claim to be here considered. These satraps are known in ancient history as the governors or viceroys of the provinces into which the Persian empire was divided. Strictly speaking, they had an extended civil jurisdiction over several smaller provinces, each of which had its own satrap or governor. Thus Zerubbabel and Nehemiah were 'governors' of Judea, under the Persian satraps of Syria (Ezra iv:3, 6; Neh. ii:9). The power and functions of the Persian satraps were not materially different from those of the modern Persian governors and Turkish pashas; and, indeed, the idea of provincial government by means of viceroys, entrusted with almost regal powers in their several jurisdictions, and responsible only to the king, by whom they are appointed, has always been prevalent in the East. (See **LIEUTENANTS**.)

ACHAZ (ā'kaz), (Matt. i:9), elsewhere **AHAZ** (which see).

ACHBAR (āk'bar). See **MOUSE**.

ACHBOR (āk'bôr), (Heb. אַכְבוֹר, *ak-bore'*, mouse, gnawing).

1. The father of Baal-hanan, king of the Edomites (Gen. xxxvi:38, 39; 1 Chron. i:49).

2. An officer of Josiah (2 Kings xxii:12, 14; Jer. xxvi:22; xxxvi:12; called Abdon in 2 Chron. xxxiv:20), B. C. 624.

ACHIM (ā'kim), (Hebrew form is Jaclin, a contraction of Jehoiachin, *the Lord will establish*), an ancestor of Christ (Matt. i:14).

ACHIOR (ā'ki-ör), general of the Ammonites, who joined Holofernes with auxiliary troops, in that general's expedition into Egypt. Bethulia having shut its gates against Holofernes, he called the princes of Moab and Ammon, and demanded of them, with great passion, who those people were that opposed his passage; presuming that the Moabites and Ammonites, being neighbors to the Hebrews, could best inform him.

(1) **Advice to Holofernes.** Achior answered, "My lord, these people are originally of Chaldea; but because they would not worship the gods of the Chaldeans they were obliged to leave their country." He related, also, Jacob's descent into Egypt, the miracles of Moses, and the conquest of Canaan; observing that the people were visibly protected by God while they continued faithful to him; but that God never failed to take vengeance on their infidelity. "Now, therefore," added he, "learn whether they have committed any fault against their God; if so, attack them, for he will deliver them up into your hands: if not, we shall not be able to resist them, because God will undertake their defense, and cover us with confusion" (Judith v:2, 3, etc.).

(2) **Threat of the Invader.** Holofernes, transported with fury, answered him, "Since you have taken upon you to be a prophet, in telling us that the God of Israel would be the defender of his people, to show you there is no other god besides Nebuchodonosor, my master, when we have put all these people to the edge of the sword, we will destroy you likewise, and you shall understand that Nebuchodonosor is lord of all the earth." Achior was then carried out near to the city, and left bound, that the inhabitants might take him into the city. This was done, and Achior declaring what had happened, the people of Bethulia fell with their faces to the ground, and with great cries begged God's assistance, beseeching him to vindicate the honor of his name, and to humble the pride of their enemies. After this they

consoled Achior, and Ozias, one of the leaders of the people, received him into his house, where he continued during the siege.

(3) **Joined the Israelites.** After the death of Holofernes and the discomfiture of his army, Achior abandoned the heathen superstitions, and was received into Israel by circumcision (Judith xiv:6, seq.)

ACHISH (ā'kish), (Heb. אַחִישׁ, *aw-keesh'*, signification uncertain) (called Abimelech in the title of Ps. xxxiv), the Philistine king of Gath, with whom David twice sought refuge when he fled from Saul (1 Sam. xxi:10-15; xxvii:1-3). The first time David was in imminent danger; for he was recognized and spoken of by the officers of the court as one whose glory had been won at the cost of the Philistines. They said, "Is not this David the king of the land?" etc.

(1) **Stratagem.** This talk filled David with such alarm that he feigned himself mad when introduced to the notice of Achish, who, seeing him 'scrabbling upon the doors of the gate, and letting his spittle fall down upon his beard,' rebuked his people sharply for bringing him to his presence, asking, 'Have I need of madmen, that ye have brought this fellow to play the madman in my presence? Shall this fellow come into my house?' After this David lost no time in quitting the territories of Gath. Winer illustrates David's conduct by reference to the similar proceeding of some other great men, who feigned themselves mad in difficult circumstances—as Ulysses (Cic. *Off.* iii:26; Hygin, f:95, *Schol. ad Lycophr.* 818), the astronomer Meton (Ælian, *Hist.* xiii:12), L. Junius Brutus (Liv. i:56; Dion. Hal. iv:68), and the Arabian king Bacha (Schultens, *Anth. Vet. Hamasa*, p. 535).

(2) **Later Visit.** About four years after, when the character and position of David became better known, and when he was at the head of not less than 600 resolute adherents, he again repaired with his troop to King Achish, who received him in a truly royal spirit, and treated him with a generous confidence, of which David took rather more advantage than was creditable to him (1 Sam. xxvii:2-7). (See DAVID.)

ACHMETHA (äk'me-thä), (Heb. אַחְמֶתָה, *akh-methaw'*, station or fortress, Ezra vi:2; 'Εκβάταινα, 2 Macc. ix:3; Judith xi:1; Tob. v:9; Joseph. *Antiq.* x:11, 7; xi:4, 6; also, in Greek authors *Egbatana* Εγβάταινα and *Agbatana* Ἀγβάταινα), a city in Media. The derivation of the name is doubtful; but Major Rawlinson (*Geogr. Journal*, x:134) has left little question that the title was applied exclusively to cities having a fortress for the protection of the royal treasures.

(1) **Jews' Petition.** In Ezra we learn that in the reign of Darius Hystaspes the Jews petitioned that search might be made in the king's treasure-house at Babylon for the decree which Cyrus had made in favor of the Jews (Ezra v:17). Search was accordingly made in the record-office ('house of the rolls'), where the treasures were kept at Babylon (vi:1); but it appears not to have been found there, as it was eventually discovered 'at Achmetha, in the palace of the province of the Medes' (vi:2).

(2) **Septuagint.** It is here worthy of remark that the LXX regarded 'Achmetha,' in which they could hardly avoid recognizing the familiar title of Ecbatana, as the generic name for a city, and, accordingly rendered it by πάλις; and that Josephus, as well as all the Christian Greeks,

while retaining the proper name of Ecbatana, yet agree, with the Greek Scriptures, in employing the word Baris, βάρις, to express the Hebrew *Birtha* ('the palace'), which is used as the distinctive epithet of the city.

(3) **Apoeryphal Account.** In Judith i:2, there is a brief account of Ecbatana, in which we are told that it was built by Arphaxad, king of the Medes, who made it his capital.

(4) **Identification.** This Ecbatana has been usually identified with the present Hamadan. Major Rawlinson, however, while admitting that Hamadan occupies the site of the Median Ecbatana, has a learned and most elaborate paper in the *Geographical Journal* (x:65-158; *On the Site of the Atropatenian Ecbatana*), in which he endeavors to show that the present Takht-i-Suleiman was the site of another, the Atropatenian Ecbatana; and that to it, rather than to the proper Median Ecbatana, the statement in Herodotus and most of the other ancient accounts are to be understood to refer. Our only business is with the Achmetha of Ezra; and that does not require us to enter into this question.

(5) **Present Condition.** Hamadan is still an important town, and the seat of one of the governments into which the Persian kingdom is divided. It is situated in north lat. 34 deg. 53 min., east long. 40 deg., at the extremity of a rich and fertile plain, on a gradual ascent, at the base of the Elwund Mountains, whose higher summits are covered with perpetual snow. Some remnants of ruined walls of great thickness and also of towers of sun-dried bricks present the only positive evidence of a more ancient city than the one on the spot.

Heaps of comparatively recent ruins, and a wall fallen to decay, attest that Hamadan has declined from even its modern importance. The population is said by Southgate to be about 30,000. Many Jews reside here, claiming to be descended from those of the Captivity who remained in Media. They speak the broken Turkish of the country, and have two synagogues. They derive the name of the town from 'Haman' and 'Mede,' and say that it was given to that foe of Mordecai by King Ahasuerus. In the midst of the city is a tomb which is in their charge, and which is said to be that of Mordecai and Esther.

ACHOR (ā'kor), (Heb. אַחֹר, *aw-kore'*, trouble; Sept. Ἀχὼρ, *a-kore'*), a valley between Jericho and Ai, which received this name (signifying *trouble*) from the trouble brought upon the Israelites by the sin of Achan (Josh. vii:24). (See ACHAN.)

ACHSA (äk'sà), a less correct mode (1 Chron. ii:49) of anglicizing the name ACHSAH (which see).

ACHSAH (äk'sah), (Heb. אַחְסָה, *ak-saw'*, an anklet), the daughter of Caleb, whose hand her father offered in marriage to him who should lead the attack on the city of Debir and take it. The prize was won by his nephew Othniel; and as the bride was conducted with the usual ceremonies to her future home, she alighted from her ass and sued her father for an addition of springs of water to her dower in lands. It is probable that custom rendered it unusual, or at least ungracious, for a request tendered under such circumstances by a daughter to be refused; and Caleb, in accordance with her wish, bestowed upon her 'the upper and the nether springs' (Josh. xv:16-19; Judg. i:9-15).

ACHSHAPH (äk'säf), (Heb. אַחְשָׁפַי, *ak-shawf'*, fascination), a royal city of the Canaanites (Josh.

xi:1), has been supposed by many to be the same as Achziḅ, both being in the tribe of Asher. But a careful consideration of Josh. xix:25 and 29 will make it probable that the places were different. There is more reason in the conjecture (Hamelsveld iii:237) that Achshaph was another name for Accho or Acre, seeing that Accho otherwise does not occur in the list of towns in the lot of Asher, although it is certain, from Judg. i:31, that Accho was in the portion of that tribe.

ACHU (ā'ku), (Heb. אָחֻ, *aw'koo*). This word occurs in Job viii:11, where it is said, 'Can the rush grow up without mire? Can the flag grow without water?' Here *flag* stands for *achu*; which would seem to indicate some specific plant, as *gome*, or rush, in the first clause of the sentence, may denote the papyrus. *Achu* occurs also twice in Gen. xli:2, 18, 'And, behold, there came up out of the river seven well-favored kine and fat-fleshed, and they fed in a meadow:' here it is rendered *meadow*, and must, therefore, have been considered by our translators as a general, and not a specific, term.

From the context of the few passages in which *achu* occurs, it is evident that it indicates a plant or plants which grew in or in the neighborhood of water, and also that it or they were suitable as pasturage for cattle.

ACHZIB (äk'zib), (Heb. אֶחְזִיב, *ak-zeeb'*, falsehood, deceit). There are two places of this name, not usually distinguished.

1. Achzib, in the tribe of Asher nominally, but almost always in the possession of the Phœnicians; being, indeed, one of the places from which the Israelites were unable to expel the former inhabitants (Judg. i:31). In the Talmud it is called Chezib. The Greeks called it Ecdippa, from the Aramæan pronunciation, and it still survives under the name of Zib. It is upon the Mediterranean coast, about ten miles north of Acre. It stands on an ascent close by the seaside, and is described as a small place, with a few palm-trees rising above the dwellings (Pococke, ii:115; Richter, p. 70; Maundrell, p. 71; Irby and Mangles, p. 196; Buckingham, ch. iii).

2. Achzib (Sept. Ἀχζέβ, *Ach-zeb'*), in the tribe of Judah (Josh. xv:44; Mic. i:14), of which there is no historical mention, but, from its place in the catalogue, it appears to have been in the middle part of the western borderland of the tribe, towards the Philistines. This is very possibly the *Chezib* of Gen. xxxviii:5.

ACKNOWLEDGE (äk-nöl'ej), (Gr. ἐπίγνωσις, *ep-ig'no-sis*, precise and correct knowledge). (1) To own or confess (Gen. xxxviii:26). (2) To observe; take notice of (Is. xxxiii:13). (3) To esteem and respect (Is. lxi:9; 1 Cor. xvi:8). (4) To approve of (2 Cor. i:13; Philem. 6). (5) To worship, profess and own as a God (Dan. xi:39). (6) To know experimentally of his holy will and of the blessings which he has bestowed and constantly bestows through Christ (Eph. i:17; Col. i:10; 2 Pet. i:2); of Christ, *i. e.*, the true knowledge of Christ's nature, dignity, benefits (Eph. iv:13; 2 Pet. i:8; ii:20). We *acknowledge the Lord in all our ways*, when in every matter we request and wait for his direction and assistance; when we observe what direction or encouragement his Word and providence afford us, in our affairs temporal or spiritual (Prov. iii:6).

ACQUAINT (äk-kwānt'). 1. To get a familiar knowledge and intimacy (Ps. cxxxix:3; Is. liii:3).

To acquaint one's self with God is by repeated endeavors to get a spiritual knowledge of and intimacy with him (Job xxii:21).

2. *Acquaintance*, persons to whom one is familiarly and intimately known (Job xix:13).

ACRA (äk'ra), (Gr. Ἀκρα), a Greek word signifying a citadel, in which sense *chakra*, אֶרְבֵּי, also occurs in the Syriac and Chaldaic. Hence the name of Acra was acquired by the eminence north of the Temple, on which a citadel was built by Antiochus Epiphanes to command the holy place. It thus became, in fact, the *Acropolis* of Jerusalem. Josephus describes this eminence as semi-circular, and reports that when Simon Maccabæus had succeeded in expelling the Syrian garrison, he not only demolished the citadel, but caused the hill itself to be leveled, that no neighboring site might thenceforth be higher or so high as that on which the Temple stood. The people had suffered so much from the garrison that they willingly labored day and night, for three years, in this great work (*Antiq.* xiii:6, 6; *Bell. Jud.* v:4, 1). At a later period the palace of Helena, queen of Adiabene, stood on the site, which still retained the name of Acra, as did also, probably, the council-house and the repository of the archives.

ACRABATTENE (äk'ra-bat-tē'nē).

1. A district or toparchy of Judæa, extending between Shechem (now Nablus) and Jericho, inclining east. It was about twelve miles in length. It is not mentioned in Scripture, but it occurs in Josephus (*Bell. Jud.* ii:12, 4; iii:3-5). It took its name from a town called Acrabi in the *Onomasticon* (*s. v.* Ἀκραβειν) where it is described as a large village, nine Roman miles east of Neapolis, on the road to Jericho. In this quarter Dr. Robinson (*Bib. Researches*, iii:103) found a village still existing under the name of Akrabeh.

2. Another district in that portion of Judæa which lies towards the south end of the Dead Sea, occupied by the Edomites during the Captivity, and afterwards known as Idumæa. It is mentioned in 1 Macc. v:3; Joseph. *Antiq.* xii:8, 1. It is assumed to have taken its name from the Maaleh Akrabbim or *Steep of the Scorpions*, mentioned in Num. xxxiv:4, and Josh. xv:3, as the southern extremity of the tribe of Judah. (See AKRABBIM.)

ACRE (ā'ker), (Heb. אֶרֶץ, *tseh'med*, a yoke), the rendering of the Hebrew word which is used as a measure of land, *i. e.*, so much as a yoke of oxen can plow in a day (1 Sam. xiv:14; Is. v:10).

ACRE (äk'är or ä'kär). See ACCHO.

ACROSTIC (Gr. ἀκρον, *ak'ron*, extremity, and στίχος, *stikh'os*, verse), a composition, generally in verse, in which the first or the last letters of the lines in their stanzas, or of words, one in each line, spell a name or sentence. In Ps. cxix the lines or verses begin with the letters of the Hebrew alphabet. Each strophe has eight lines, each beginning with the same letter, the first eight lines beginning with א, Aleph, the next with ב, Beth, and so on. Ps. xxv and xxxiv have one verse to each letter in its order. Other Psalms, as cxi and cxii, have verses each of which is divided into two parts, and these *hemistichs* follow the alphabetical arrangement.

In ecclesiastical history the term *acrostic* is employed to describe a mode of performing the psalmody of the ancient Church. The precentor began a verse and the people joined him at the close. (Mc. and Str., *Bib. Dict.*)

The acrostic was also commonly used for epigraphs. But the most famous of all ancient acrostics is the one used by ancient Christians as a secret symbol of the faith. This is the Greek word Ἰχθύς, *ichthys*, *fish*, formed from the initial letters of five titles of our Lord, "Jesus Christ, God's Son, Saviour."

Ἰησοῦς.....I ēsous.
Χριστός.....CH ristos.
Θεός.....TH eos.
Υἱός.....U ios.
Σωτήρ.....S otēr.

(Barnes, *Peop. Bib. Dict.*)

ACTS OF THE APOSTLES (Acts of the A-pōs'tles).

(1) **Title and Order.** This is the title of one of the canonical books of the New Testament, the fifth in order in the common arrangement, and the last of those properly of an historical character.

(2) **Contents.** Commencing with a reference to an account given in a former work of the sayings and doings of Jesus Christ before his ascension, its author proceeds to conduct us to an acquaintance with the circumstances attending that event, the conduct of the disciples on their return from witnessing it, the outpouring on them of the Holy Spirit according to Christ's promise to them before his crucifixion, and the amazing success which, as a consequence of this, attended the first announcement by them of the doctrine concerning Jesus as the promised Messiah and the Saviour of the World.

After following the fates of the mother-church at Jerusalem up to the period when the violent persecution of its members by the rulers of the Jews had broken up their society and scattered them, with the exception of the apostles, throughout the whole of the surrounding region; and after introducing to the notice of the reader the case of a remarkable conversion of one of the most zealous persecutors of the church, who afterwards became one of its most devoted and successful advocates, the narrative takes a wider scope and opens to our view the gradual expansion of the church by the free admission within its pale of persons directly converted from heathenism and who had not passed through the preliminary stage of Judaism (Acts i-viii).

The first step towards this more liberal and cosmopolitan order of things having been effected by Peter, to whom the honor of laying the foundation of the Christian church, both within and without the confines of Judaism, seems, in accordance with our Lord's declaration concerning him (Matt. xvi:18), to have been reserved, Paul, the recent convert and the destined apostle of the Gentiles, is brought forward as the main actor on the scene (Acts ix). On his course of missionary activity, his successes and his sufferings, the chief interest of the narrative is thenceforward concentrated, until, having followed him to Rome, whither he had been sent as a prisoner to abide his trial, on his own appeal, at the bar of the emperor himself, the book abruptly closes, leaving us to gather further information concerning him and the fortunes of the church from other sources (Acts x-xxxiii).

(3) **Authorship.** Respecting the *authorship* of this book there can be no ground for doubt or hesitation. It is unquestionably the production of the same writer by whom the third of the four Gospels was composed, as is evident from the introductory sentences of both (Comp. Luke i:1-4, with Acts i:1). That this writer was Luke there

is abundant evidence to show. With regard to the book now under notice, tradition is firm and constant in ascribing it to Luke (Irenæus, *Adv. Har.* lib. i. c. 31; iii:14; Clemens Alexandr. *Strom.* v. p. 588; Tertullian, *Adv. Marcion.* v. 2; *De Jejun.* c. 10; Origen, apud Euseb. *Hist. Eccl.* vi:23, etc. Eusebius himself ranks this book among the *ὁμολογούμενα*, *H. E.* iii:25).

From the book itself, also, it appears that the author accompanied Paul to Rome when he went to that city as a prisoner (xxviii). Now, we know from two epistles written by Paul at that time, that *Luke* was with him at Rome (Col. iv:14; Phil. 24), which favors the supposition that he was the writer of the narrative of the apostle's journey to that city.

(4) **Dogmatical Objections.** The only parties in primitive times by whom this book was rejected were certain heretics, such as the Marcionites, the Severians and the Manicheans, whose objections were entirely of a dogmatical, not of a historical, nature; indeed, they can hardly be said to have questioned the authenticity of the book; they rather cast it aside because it did not favor their peculiar views.

(5) **Acknowledged Genuine.** At the same time, whilst this book was acknowledged as genuine, where it was known, it does not appear to have been at first so extensively circulated as the other historical books of the New Testament; for we find Chrysostom complaining that by many in his day it was not so much as known (*Hom. i. in Act.* sub init.). Perhaps, however, there is some rhetorical exaggeration in this statement; or, it may be, as Kuinoel (*Prolg. in Acta App. Comment.* tom. iv. p. 5) suggests, that Chrysostom's complaint refers rather to a prevalent omission of the Acts from the number of books publicly read in the churches, which would, of course, lead to its being comparatively little known among the people attending those churches.

(6) **The Former and Latter Treatise.** Many critics are inclined to regard the Gospel by Luke and the Acts of the Apostles as having formed originally only one work, consisting of two parts. For this opinion, however, there does not appear to be any satisfactory authority; and it is hardly accordant with Luke's own description of the relation of these two writings to each other; being called by him, the one the former and the other the latter *treatise* (λόγος), a term which would not be appropriate had he intended to designate by it the first and second parts of the *same* treatise. It would be difficult, also, on this hypothesis to account for the two, invariably and from the earliest times, appearing with *distinct titles*.

(7) **An Eye Witness.** Of the greater part of the events recorded in the Acts the writer himself appears to have been witness. He is for the first time introduced into the narrative in ch. xvi:11, where he speaks of accompanying Paul to Philippi. He then disappears from the narrative until Paul's return to Philippi, more than two years afterwards, when it is stated that they left that place in company (xx:6); from which it may be justly inferred that Luke spent the interval in that town. From this time to the close of the period embraced by his narrative he appears as the companion of the apostle. For the materials, therefore, of all he has recorded from ch. xvi:11 to xxviii:31 he may be regarded as having drawn upon his own recollection or on that of the apostle. To the latter source, also,

may be confidently traced all he has recorded concerning the earlier events of the apostle's career; and as respects the circumstances recorded in the first twelve chapters of the Acts, and which relate chiefly to the church at Jerusalem and the labors of the apostle Peter, we may readily suppose that they were so much matter of general notoriety among the Christians with whom Luke associated, that he needed no assistance from any other merely human source in recording them.

Some of the German critics have labored hard to show that he must have had recourse to written documents in order to compose those parts of his history which record what did not pass under his own observation, and they have gone the length of supposing the existence of a work in the language of Palestine, of which the Apocryphal book *Præcis Petron* or *Kerugma Petron*, *Πράξεις Πέτρου* or *Κήρυγμα Πέτρου*, *Acts of Peter* or *Discourses of Peter*, mentioned by Clement of Alexandria and Origen, was an interpolated edition (Heinrichs, *Proleg. in Acta App.*, p. 21; Kuinoel, *Proleg.*, p. 14). All this, however, is mere ungrounded supposition.

There is not the shadow of evidence that any written documents were extant from which Luke could have drawn his materials, and with regard to the alleged impossibility of his learning from traditionary report the minute particulars he has recorded (which is what these critics chiefly insist on), it is to be remembered that, in common with all the sacred writers, he enjoyed the superintending and inspiring influence of the Divine Spirit, whose office it was to preserve him from all error and to guide him into all truth.

(8) **Design.** An important inquiry respects the *design* of the evangelist in writing this book. A prevalent popular opinion on this head is, that Luke, having in his Gospel given a history of the life of Christ, intended to follow that up by giving in the Acts a narrative of the establishment and early progress of his religion in the world. That this, however, could not have been his design is obvious from the very partial and limited view which his narrative gives of the state of things in the church generally during the period through which it extends. As little can we regard this book as designed to record the official history of the apostles Peter and Paul, for we find many particulars concerning both these apostles mentioned incidentally elsewhere, of which Luke takes no notice (Comp. 2 Cor. xi; Gal. i:17; ii:11; 1 Pet. v:13). Much more deserving of notice is the opinion of Haecklein, with which that of Michaelis substantially accords, that 'the general design of the author of this book was, by means of his narratives, to set forth the co-operation of God in the diffusion of Christianity, and along with that, to prove, by remarkable facts, the dignity of the apostles and the perfectly equal right of the Gentiles with the Jews to a participation in the blessings of that religion' (*Einleitung*, th. iii. s. 156. Comp. Michaelis, *Introduction*, vol. iii, p. 330). Perhaps we should come still closer to the truth if we were to say that the design of Luke in writing the Acts was to supply, by select and suitable instances, an illustration of the power and working of that religion which Jesus had died to establish. In his gospel he had presented to his readers an exhibition of Christianity as embodied in the person, character, and works of its great founder; and having followed him in his narration until he was taken up out of the sight of his disciples into

heaven, this second work was written to show how his religion operated when committed to the hands of those by whom it was to be announced 'to all nations, beginning at Jerusalem' (Luke xxiv:47). In this point of view the recitals in this book present a theme that is practically interesting to Christians in all ages of the church and all places of the world. They exhibit to us what influences guided the actions of those who laid the foundations of the church, and to whose authority all its members must defer—what courses they adopted for the extension of the church—what ordinances they appointed to be observed by those Christians who, under their auspices, associated together for mutual edification—and what difficulties, privations, and trials were to be expected by those who should zealously exert themselves for the triumph of Christianity. We are thus taught not by dogmatical statement, but by instructive narrative, under what sanctions Christianity appears in our world, what blessings she offers to men, and by what means her influence is most extensively to be promoted and the blessings she offers to be most widely and most fully enjoyed.

(9) **Time and Place.** Respecting the time when this book was written it is impossible to speak with certainty. As the history is continued up to the close of the second year of Paul's imprisonment at Rome, it could not have been written before A. D. 63. A number of New Testament critics contend that Luke's gospel not only presupposes sufficient time for the writing of many other treatises (Luke i:1), but also the destruction of Jerusalem (Luke xxi:20), and hence could not have been composed before A. D. 70. This means for the Acts a date as late as A. D. 75 or 80. Still greater uncertainty hangs over the *place* where Luke composed it, but as he accompanied Paul to Rome, perhaps it was at that city and under the auspices of the apostle that it was prepared.

(10) **Style.** The *style* of Luke in Acts is, like his style in his Gospel, much purer than that of most other books of the New Testament. The Hebraisms which occasionally occur are almost exclusively to be found in the speeches of others which he has reported. These speeches are indeed, for the most part, to be regarded rather as summaries than as full reports of what the speaker uttered; but as these summaries are given in the speakers' own words, the appearance of Hebraisms in them is as easily accounted for as if the addresses had been reported in full. His mode of narrating events is clear, dignified, and lively; and, as Michaelis observes, he 'has well supported the character of each person whom he has introduced as delivering a public harangue, and has very faithfully and happily preserved the manner of speaking which was peculiar to each of his orators' (*Introduction*, vol. iii, p. 332).

(11) **Chronology of Events.** Lardner and others have very satisfactorily shown (Lardner's *Credibility*, Works, vol. i; Biscoe, *On the Acts*; Paley's *Horæ Paulinæ*; Benson's *History of the First Planting of Christianity*, vol. ii., etc.), the *credibility* of the events recorded by Luke is fully authenticated both by internal and external evidence, but a very great obscurity attaches to the *chronology* of these events. Of the many conflicting systems which have been published for the purpose of settling the questions that have arisen on this head, it is impossible within such limits as those to which this article is necessarily confined, to give any minute account. As

little do we feel ourselves at liberty to attempt an original investigation of the subject, even did such promise to be productive of any very satisfactory result. The only course that appears open to us is to present, in a tabular form, the dates affixed to the leading events by those writers whose authority is most deserving of consideration in such an inquiry.

ACTS, SPURIOUS (ǎcts, spū'ri-ouš), see Apocrypha. This term has been applied to several ancient writings pretended to have been composed by, or to supply historical facts respecting our Blessed Savior and his disciples, or other individuals whose actions are recorded in the holy Scriptures. Of these spurious or pseudepigraphal writings several are still extant; others are only known to have existed by the accounts of them which are to be met with in ancient authors.

(1) **Spurious Acts of Christ.** Several sayings attributed to our Lord, and alleged to be handed down by tradition, may be included under this head, as they are supposed by some learned men to have been derived from histories which are no longer in existence. As explanatory of our meaning it will suffice to refer to the beautiful sentiment cited by St. Paul (Acts xx:35), *It is more blessed to give than to receive.* Μακάριον ἔστι μᾶλλον δίδόναι ἢ λαμβάνειν, to which the term apocryphal has been sometimes applied, inasmuch as it is not contained in any of the written biographies of our Lord. This term is so applied by M. Gausson of Geneva, in his *Theopneustia* (English translation, Bagster, 1842). The learned Heinsius is of opinion that the passage is taken from some lost apocryphal book, such as that entitled, in the *Recognitions* of Clement, 'the Book of the Sayings of Christ, or the pretended *Constitutions of the Apostles.*' Others, however, conceive that the apostle, in Acts xx:35, does not refer to any one saying of our Saviour's in particular, but that he deduced Christ's sentiments on this head from several of his sayings and parables (see Matt. xix:21; xxv, and Luke xvi:9). But the probability is that St. Paul received this passage by tradition from the other apostles.

(2) **Spurious Acts of the Apostles.** Of these several are extant, others are lost, or only fragments of them are come down to us.

Of the following we know little more than that they once existed. They are here arranged chronologically: *The Preaching of Peter*, referred to by Origen, in his *Commentary on St. John's Gospel*, lib. xiv; also referred to by Clemens Alexandrinus. *The Acts of Peter*, supposed by Dr. Cave to be cited by Serapion. *The Acts of*

Paul and Thecla, mentioned by Tertullian, *Lib. de Baptismo*, cap. xvii; this is, however, supposed by some to be the same which is found in a Greek MS. in the Bodleian Library, and has been published by Dr. Grabe, in his *Spicil. Patrum Secul. I. The Doctrine of Peter*, cited by Origen, 'Proœm.' in *Lib. de Princip. The Acts of Paul*, *ib. de Princip. 1:2. The Preaching of Paul*, referred to by St. Cyprian, *Tract. de non iterando Baptismo. The Preaching of Paul and Peter at Rome*, cited by Lactantius, *De vera Sap. iv:21. The Acts of Peter*, thrice mentioned by Eusebius, *Hist. Eccles. iii:3*: 'as to that work, however, which is ascribed to him, called "The Acts" and the "Gospel according to Peter," we know nothing of their being handed down as Catholic writings, since neither among the ancient nor the ecclesiastical writers of our own day has there been one that has appealed to testimony taken from them. *The Acts of Paul, ib. The Revelation of Peter, ib. The Acts of Andrew and John, ib. cap. 25.* 'Thus,' he says, 'we have it in our power to know * * * those books that are adduced by the heretics, under the name of the apostles, such, viz., as compose the gospels of Peter, Thomas, and Matthew * * * and such as contain the Acts of the Apostles by Andrew and John, and others of which no one of those writers in the ecclesiastical succession has condescended to make any mention in his works, and, indeed, the character of the style itself is very different from that of the apostles, and the sentiments and the purport of those things that are advanced in them, deviating as far as possible from sound orthodoxy, evidently proves they are the fictions of heretical men; whence they are to be ranked not only among the spurious writings, but are to be rejected as altogether absurd and impious.' *The Acts of Peter, John, and Thomas, Athanasius, Synops. Sec. 76. The Writings of Bartholomew the Apostle*, mentioned by the pseudo-Dionysius. *The Acts, Preaching and Revelation of Peter*, cited by Jerome, in his *Catal. Script. Eccles. The Acts of the Apostles by Seleucus, ib. Epitl. ad Chrom, etc. The Acts of Paul and Thecla, ib. Catalog. Script. Eccles. The Acts of the Apostles, used by the Ebionites*, cited by Epiphanius *Adversus Hæres, Sec. 16. The Acts of Leucius, Lentius, or Lenticus*, called the Acts of the Apostles, Augustin. *Lib. de Fid. c. 38. The Acts of the Apostles*, used by the Manichees. *The Revelations of Thomas, Paul, Stephen, etc. Gelasius, de Lib. Apoc. apud Gratian. Distinct. 15 c. 3.*

(3) **Acts of Pilate.** To these may be added the *genuine Acts of Pilate*, appealed to by Tertullian and Justin Martyr, in their *Apologies*, as being then extant. Tertullian describes them as 'the records which were transmitted from Jerusalem to Tiberius concerning Christ.' He refers to the same for the proof of our Saviour's miracles.

ADADAH (ǎd'a-dah), (Heb. אֲדָדָה, *ad-aw-daw'*, festival), a town in the south of Judah (Josh. xv:22); probably either the modern *el-Foka* or *Adadah*.

ADAD-RIMMON (ǎ'dad-rim'mon), properly Hadad-Rimmon, (Heb. הַבְּרִימון, *ad-ad-rim-mone'*, a garden of pomegranates), a city in the valley of Jezreel, where was fought the famous battle between King Josiah and Pharaoh-Necho (2 Kings xxiii:29; Zech. xii:11). Adad-rimmon was afterwards called Maximianopolis, in honor of the emperor Maximian (Jerome, *Comment. in Zach. xii*). It was seventeen Roman miles from Cæsarea, and ten miles from Jezreel (*Itin. Hieros.*) (See HADAD-RIMMON.)

ADAH (ā'dah), (Heb. אָדָה, *aw-daw'*, adornment, comeliness).

1. One of the wives of Lamech (Gen. iv:19).
2. One of the wives of Esau, daughter of Elon the Hittite (Gen. xxxvi:4). She is called Judith in Gen. xxvi:34.

ADAI AH (a-dā'i-ah), (Heb. אָדָיִה, *ad-aw-yaw'*, whom Jehovah adorns).

1. The maternal grandfather of King Josiah (2 Kings xxii:1).
2. A Levite of the family of Gershom. Probably the same as Iddo, the latter born B. C. 632 (1 Chron. vi:20, 21, 41).
3. A "son of Bani," an Israelite who divorced his Gentile wife after the captivity (Ezra x:29).
4. Another descendant guilty of the same offense (Ezra x:39).
5. One of the Benjamites resident in Jerusalem before the captivity (1 Chron. viii:21), B. C. before 586.
6. Father of Maaseiah, who was one of the "captains of hundreds" who supported Jehoiada (2 Chron. xxiii:1).
7. Son of Joiarib and father of Hazaiah, of the tribe of Judah (Neh. xi:5), some of whose posterity dwelt at Jerusalem after the captivity (B. C. 445).
8. A priest, son of Jeroham, who, after the return from Babylon, was employed in the work of the sanctuary (1 Chron. ix:12; Neh. xi:12).

ADALIA (äd'a-lī'ä), (Heb. אָדָלְיָה, *ad-al-yaw'*, of Persian origin), one of the ten sons of Haman, the enemy of the Jews. He was slain by the Jews under the royal edict at Shushan (Esth. ix:8), B. C. 447.

ADAM (äd'am), (Heb. אָדָם, *aw-dawm'*, red), the word by which the Bible designates the first human being.

It is evident that, in the earliest use of language, the vocal sound employed to designate the first perceived object of any kind would be an appellative, and would be formed from something known or apprehended to be a characteristic property of that object. The word would, therefore, be at once the appellative and the proper name. But when other objects of the same kind were discovered, or subsequently came into existence, difficulty would be felt; it would become necessary to guard against confusion, and the inventive faculty would be called upon to obtain a discriminative term for each and singular individual, while some equally appropriate term would be fixed upon for the whole kind. Different methods of effecting these two purposes might be resorted to, but the most natural would be to retain the original term in its simple state, for the first individual, and to make some modification of it by prefixing another sound, or by subjoining one, or by altering the vowel or vowels in the body of the word, in order to have a term for the kind, and for the separate individuals of the kind.

This reasoning is exemplified in the first applications of the word before us: (Gen. i:26), 'Let us make man [Adam] in our image;' (i:27), 'And God created the man [the Adam] in his own image.' The next instance (ii:7) expresses the source of derivation, a character or property, namely, the material of which the human body was formed: 'And the Lord God [Jehovah Elohim] formed the man [the Adam] dust from the ground [the adamah].' The meaning of the primary word is, most probably, any kind of *reddish tint*, as a beautiful human complexion (Lam. iv:7); but its various derivatives are applied to different objects of a red or brown hue, or approaching to such. The word *Adam*, therefore,

is an appellative noun made into a proper one. It is further remarkable that, in all the other instances in the second and third chapters of Genesis, which are nineteen, it is put with the article, *the man*, or *the Adam*. It is also to be observed that, though it occurs very frequently in the Old Testament, and though there is no grammatical difficulty in the way of its being declined by the dual and plural terminations and the pronominal suffixes (as its derivatives דָּם, *dam*, blood, is), yet it never undergoes those changes; it is used abundantly to denote *man* in the general and collective sense—*mankind*, *the human race*, but it is never found in the plural number. When the sacred writers design to express *men* distributively they use either the compound term, *sons of men* (בְּנֵי אָדָם, *benei adam*), or the plural of אָנוּשׁ *enosh*, or אִישׁ *ish*.

1. Unity of the Race. The question of the *unity of the human race*, or the descent of the race from a single pair, has given rise to much discussion.

It is among the clearest deductions of reason, that men and all dependent beings have been *created*, that is, produced or brought into their first existence by an intelligent and adequately powerful being. A question, however, arises, of great interest and importance, Did the Almighty Creator produce only one man and one woman, from whom all other human beings have descended?—or did he create several parental pairs, from whom distinct stocks of men have been derived? The affirmative of the latter position has been maintained by some, and, it must be confessed, not without apparent reason. The manifest and great differences in complexion and figure, which distinguish several races of mankind, are supposed to be such as entirely to forbid the conclusion that they have all descended from one father and one mother. The question is usually regarded as equivalent to this: whether there is only one species of men, or there are several. But we cannot, in strict fairness, admit that the questions are identical. It is hypothetically *conceivable* that the Adorable God might give existence to any number of creatures, which should all possess the properties which characterize identity of species, even without such differences as constitute varieties, or with any degree of those differences.

Among the later writers in opposition to the descent of mankind from a single pair is Professor Alexander Winchell, in *Preadamites, or a Demonstration of the Existence of Men Before Adam*, Chicago, 1880. A multitude of able writers may be found who have advocated the unity of the human races. Among them may be enumerated Sir James Mackintosh, Sharon Turner, Chevalier Bunsen, Bishop Berkeley, John Locke, Lord Brougham, Linnæus, Cuvier, Professor Buckland, Sir Charles Bell, Baron Humboldt. The arguments for this unity may be briefly summed up as follows:

(1) Animals Widely Dispersed. The animals which render eminent services to man, and peculiarly depend upon his protection, are widely diffused—the horse, the dog, the hog, the domestic fowl. Now, of these the varieties in each species are numerous and different, to a degree so great that an observer ignorant of physiological history would scarcely believe them to be of the same species. But man is the most widely diffused of any animal. In the progress of ages and generations he has naturalized himself to every climate and to modes of life which would prove fatal to an individual man suddenly transferred from a remote point of the field. The alterations

produced affect every part of the body, internal and external, without extinguishing the marks of the specific identity.

(2) **Comparison of Races.** A further and striking evidence is, that when persons of different varieties are conjugally united, the offspring, especially in two or three generations, becomes more prolific and acquires a higher perfection in physical and mental qualities than was found in either of the parental races. From the deepest African black to the finest Caucasian white, the change runs through imperceptible gradations, and, if a middle hue be assumed, suppose some tint of brown, all the varieties of complexion may be explained upon the principle of divergence influenced by outward circumstances. The conclusion may be fairly drawn, in the words of the able translators and illustrators of Baron Cuvier's great work: 'We are fully warranted in concluding, both from the comparison of man with inferior animals, so far as the inferiority will allow of such comparison, and, beyond that, by comparing him with himself, that the great family of mankind loudly proclaim a descent, at some period or other, from one common origin.'

(3) **Cradle of Man.** Follow the clue of history and it will lead us to the Mosaic Cradle of Man. Were mankind now reduced to a single family only time would be wanting, even without civilization, to overspread the earth.

(4) **Comparative Philology.** Comparative Philology brings us to the same point. The striking analogies of language reveal man's essential unity.

(5) **Mental Unity.** There is a deep, real *mental* unity of the universal soul embracing the same intellect, affections, instincts, conscience, sense of superior Divine power and susceptibility of religion; there is the same power in the cross of Christ for the European, the Esquimaux, and the Hottentot.

(6) **Comparatively Recent Origin.** Geology demonstrates the comparatively recent origin of man and fails to reveal any arguments for a diversity of races.

We may say, with Baron Humboldt, in his *Cosmos*: "Deeply rooted in the man's inmost nature, as well as commanded by his highest tendencies, the full recognition of the bond of humanity of the community of the whole human race, with the sentiments and sympathies which spring therefrom, becomes a leading principle in the history of man" (vol. I, p. 351).

Thus, by an investigation totally independent of historical authority, we are brought to the conclusion of the inspired writings, that the Creator 'hath made of one blood all nations of men, for to dwell on all the face of the earth' (Acts xvii:26).

2. The Original Capacities and Condition of Our First Parents have also been the subject of much discussion, but here again we shall find that the *best* conclusions of reason harmonize fully on this point with the succinct Scriptural account of the facts as they occurred.

(1) **Created in Maturity.** It is evident upon a little reflection, and the closest investigation confirms the conclusion, that the first human pair must have been created in a state equivalent to that which all subsequent human beings have had to reach by slow degrees, in growth, experience, observation, imitation, and the instruction of others; that is, a state of prime maturity. They must have been endowed also with an infusion, concreation, or whatever we may call it, of knowledge and habits, both physical and intellectual, suitable to the place which man had to occupy

in the system of creation, and adequate to his necessities in that place.

Had it been otherwise, the new beings could not have preserved their animal existence, nor have held rational converse with each other, nor have paid to their Creator the homage of knowledge and love, adoration and obedience, and reason clearly tells us that the last was the noblest end of existence.

The Bible coincides with this dictate of honest reason, expressing these facts in simple and artless language, suited to the circumstances of the men to whom revelation was first granted. 'And Jehovah God formed the man [*Heb.* the Adam], dust from the ground and blew into his nostrils the breath of life, and the man became a living animal' (Gen. ii:7). Here are two objects of attention, the organic mechanism of the human body, and the vitality with which it was endowed.

(2) **Mechanical Material.** The mechanical material, formed (moulded, or arranged, as an artificer models clay or wax) into the human and all other animal bodies, is called 'dust from the ground.' This would be a natural and easy expression to men in the early ages, before chemistry was known or minute philosophical distinctions were thought of, to convey, in a general form, the idea of *earthy matter*, the constituent substance of the ground on which we tread.

To say that of this the human and every other animal body was formed, is a position which would be at once the most easily apprehensible to an uncultivated mind, and which yet is the most exactly true upon the highest philosophical grounds. We now know, from chemical analysis, that the animal body is composed, in the inscrutable manner called *organization*, of carbon, hydrogen, oxygen, nitrogen, lime, iron, sulphur, and phosphorus. Now, all these are mineral substances, which in their various combinations form a very large part of the solid ground.

(3) **Organic Life.** The Hebrew expression, *nephesh hhaya*, *living animal*, sets before us the organic life of the animal frame, that mysterious something which man cannot create nor restore, which baffles the most acute philosophers to search out its nature, and which reason combines with Scripture to refer to one immediate agency of the Almighty—'in him we live, and move, and have our being' (Acts xvii:28).

But the Scripture account also declares that 'God created man in his own image; in the image of God created he him; male and female, created he them' (Gen. i:27; 1 Cor. xi:7). *The image*, the resemblance (such as a shadow bears to the object which casts it) *of God*, is an expression which breathes at once a primitive simplicity and the most recondite wisdom; for what term could the most cultivated and copious language bring forth more suitable to the purpose? It presents to us man as made in a resemblance to the author of his being, a true resemblance, but faint and shadowy; an outline, faithful according to a distant form of the *intelligence, wisdom, power, rectitude, goodness, and dominion* of the Adorable Supreme.

(4) **Dominion.** To the inferior sentient beings with which he is connected man stands in the place of God. We have every reason to think that none of them are capable of conceiving a being higher than man. All, in their different ways, look up to him as their superior; the ferocious generally flee before him, afraid to encounter his power, and the gentle court his protection and show their highest joy to consist in serving and pleasing him. Even in our degenerate

state it is manifest that if we treat the domesticated animals with wisdom and kindness, their attachment is most ardent and faithful.

Thus had man the shadow of the Divine *dominion* and *authority* over the inferior creation. The attribute of *power* was also given to him, in his being made able to convert the inanimate objects and those possessing only the vegetable life, into the instruments and the materials for supplying his wants, and continually enlarging his sphere of command.

(5) **Knowledge and Wisdom.** In such a state of things *knowledge* and *wisdom* are implied; the one quality, an acquaintance with those substances and their changeful actions which were necessary for a creature like man to understand, in order to his safety and comfort; the other, such sagacity as would direct him in selecting the best objects of desire and pursuit, and the right means for attaining them.

(6) **Moral Excellence.** Above all, *moral excellence* must have been comprised in this 'image of God,' and not only forming a part of it, but being its crown of beauty and glory. The Christian inspiration, than which no more perfect disclosure of God is to take place on this side of eternity, casts its light upon this subject; for the apostle Paul, in urging the obligations of Christians to perfect holiness, evidently alludes to the endowments of the first man in two parallel and mutually illustrative epistles; '—the new man, renewed in knowledge after the image of Him that created him; the new man which, after [*κατά*, according to] God, is created in righteousness and true holiness' (Col. iii:10; Eph. iv:24).

(7) **Activity and Enjoyment.** In this perfection of faculties, and with these high prerogatives of moral existence, did human nature, in its first subject, rise up from the creating hand. The whole Scripture narrative implies that this state of existence was one of correspondent *activity* and *enjoyment*. It plainly represents the Deity himself, or his direct representative, as condescending to *assume a human form and to employ human speech*, in order to instruct and exercise the happy creatures whom (to borrow the just and beautiful language of the Apocryphal 'Wisdom') 'God created for incorruptibility, and made him an image of his own nature.'

The noble and sublime idea that man thus had his Maker for his teacher and guide, precludes a thousand difficulties. It shows us the simple, direct, and effectual method by which the newly-formed creature would have communicated to him all the intellectual knowledge, and all the practical arts and manipulations, which were needful and beneficial for him.

(8) **Religious Knowledge.** Religious knowledge and its appropriate habits also required an immediate transmission, and these are pre-eminently comprehended in the 'image of God.' On the one hand, it is not to be supposed that the newly-created man and his female companion were inspired with a very ample share of the doctrinal knowledge which was communicated to their posterity by the successive and accumulating revelations of more than four thousand years; and on the other, that they were left by God in gross ignorance regarding the existence and excellencies of the Being who had made them, their obligations to him, and the way in which they might continue to receive the greatest blessings from him. It is self-evident that, to have attained such a kind and degree of knowledge, by spontaneous effort, under even the favorable circumstances of a state of negative innocence, would have been a long and arduous work. But the sacred nar-

ative leaves no room for doubt upon this head. In the primitive style it tells of God as speaking to them, commanding, instructing, assigning their work, pointing out their danger, and showing how to avoid it. All this, reduced to the dry simplicity of detail, is equivalent to saying that the Creator, infinitely kind and condescending, by the use of forms and modes adapted to their capacity, fed their minds with truth, gave them a ready understanding of it and that delight in it which constituted holiness, taught them to hold intercourse with Himself by direct addresses in both praise and prayer, and gave some disclosures of a future state of blessedness when they should have fulfilled the conditions of their probation.

(9) **Practical Habits.** An especial instance of this instruction and information concerning practical habits is given to us in the narrative: 'Out of the ground Jehovah God formed every beast of the field and every fowl of the air [*Hebr.* of the heavens]; and brought them unto the man [*Hebr.* the Adam], to see what he would call them' (Gen. ii:19). This, taken out of the style of condescending anthropomorphism, amounts to such a statement as the following: The Creator had not only formed man with organs of speech, but he taught him the use of them, by an immediate communication of the practical faculty and its accompanying intelligence. He guided the man, as yet the solitary one of his species, to this among the first applications of speech, the designating of the animals with which he was connected, by appellative words which would both be the help of his memory and assist his mental operations, and thus would be introductory and facilitating to more enlarged applications of thought and language.

We are further warranted, by the recognized fact of the anecdotal and fragmentary structure of the Scripture history, to regard this as the selected instance for exhibiting a whole kind or class of operations or processes; implying that, in the same or similar manner, the first man was led to understand something of the qualities and relations of vegetables, earthy matters, the visible heavens, and the other external objects to which he had a relation.

(10) **Creation of Woman.** The next important article in this primeval history is the creation of the human female. It has been maintained that the Creator formed Adam to be a sole creature, in some mode of androgynous constitution capable of multiplying from his own organization without a conjugate partner. This notion was advanced by Jacob (or James) Bœhmen, the Silesian 'Theosophist,' and one very similar to it has been recently promulgated by Baron Giraud (*Philosophie Catholique de l'Histoire*, Paris 1841), who supposes that the 'deep sleep' (Gen. ii:21) was a *moral fainting* ('*défaillance*'), the first step in departing from God, the beginning of sin, and that Eve was its personified product by some sort of Divine concurrence or operation. To mention these vagaries is sufficient for their refutation. Their absurd and unscriptural character is stamped on their front.

The second of the narratives is more circumstantial: 'And Jehovah God said, it is not good the man's being alone: I will make for him a help suitable for him.' Then follows the passage concerning the review and the naming of the inferior animals; and it continues—'but for Adam he found not a help suitable for him. And Jehovah God caused a deep sleep to fall upon the man [the Adam], and he slept; and he took out one of his ribs, and closed up the flesh in its place; and Jehovah God built up the rib which he had taken from the man into a woman, and he brought

her to the man, and the man said, this is now bone out of my bones, and flesh out of my flesh; this shall be called woman [*lishah*], for this was taken from out of man [*lish*]' (Gen. ii:18-23).

This *peculiar manner* of the creation of the woman has, by some, been treated as merely a childish fable; by others, as an allegorical fiction intended to represent the close relation of the female sex to the male, and the tender claims which women have to sympathy and love. That such was the intention we do not doubt; but why should that intention be founded upon a mythic allegory? Is it not taught much better, and impressed much more forcibly, by its standing not on a fiction, but on a fact? We have seen that, under the simple archaic phrase that man was made of the 'dust of the ground,' is fairly to be understood the truth, which is verified by the analysis of modern chemistry; and, in the case of the woman, it is the same combination of materials, the same carbon, and hydrogen, and lime, and the rest; only that, in the first instance, those primordial substances are taken *immediately*, but in the second, *mediately*, having been brought into a state of organization.

(11) **Nakedness.** The next particular into which the sacred history leads us, is one which we cannot approach without a painful sense of its difficulty and delicacy. It stands thus in the authorized version: 'And they were both naked, the man and his wife, and were not ashamed' (ii:25). The common interpretation is, that, in this respect, the two human beings, the first and only existing ones, were precisely in the condition of the youngest infants, incapable of perceiving any incongruity in the total destitution of artificial clothing. But a little reflection will tell us, and the more carefully that reflection is pursued the more it will appear just, that this supposition is inconsistent with what we have established on solid grounds, the supernatural transmission into the minds of our first parents and into their nervous and muscular faculties, of the knowledge and practical habits which their descendants have had to acquire by the long process of instruction and example. We have seen the necessity that there must have been communicated to them, by their Creator, no inconsiderable measure of natural knowledge and the methods of applying it, or their lives could not have been secured; and of moral and spiritual 'knowledge, righteousness and true holiness,' such a measure as would belong to the sinless state, and would enable them to render an intelligent and perfect worship to the Glorious Deity.

It seems impossible for that state of mind and habits to exist without a correct sensibility to proprieties and decencies which infant children cannot understand or feel; and the capacities and duties of their conjugal state are implied in the narrative. Further, it cannot be overlooked that, though we are entitled to ascribe to the locality of Eden the most bland atmosphere and delightful soil, yet the action of the sun's rays upon the naked skin, the range of temperature through the day and the night, the alternations of dryness and moisture, the various labor among trees and bushes, and exposure to insects, would render some protective clothing quite indispensable.

From these considerations we feel ourselves obliged to understand the word *arom*, in that which is its *most usual* signification in the Hebrew language, as importing *not an absolute*, but a *partial* or *comparative* nudity. It is one of a remarkable family of words which appear to have branched off in different ways from the same root,

originally *ar* or *er*, but assuming several early forms, and producing five or six divergent participials; but they all, and especially this *arom*, are employed to denote a stripping off of the upper garment, or of some other usual article of dress, when all the habiliments were not laid aside; and this is a more frequent signification than that of entire destitution. If it be asked, Whence did Adam and Eve derive this clothing? we reply, that, as a part of the Divine instruction which we have established, they were taught to take off the inner bark of some trees, which would answer extremely well for this purpose. If an objection be drawn from Gen. iii:7, 10, 11, we reply that, in consequence of the transgression, the clothing was disgracefully injured.

(12) **Period of Innocence.** Another inquiry presents itself. How long did the state of paradisiacal innocence and happiness continue? Some have regarded the period as very brief, not more even than a single day; but this manifestly falls short of the time which a reasonable probability requires. The first man was brought into existence in the region called Eden. He was introduced into a particular part of it, the garden, replenished with the richest productions of the Creator's bounty for the delight of the eye and the other senses. The most agreeable labor was required 'to dress and to keep it,' implying some arts of culture, preservation from injury, training flowers and fruits, and knowing the various uses and enjoyments of the produce. He made observations upon the works of God, of which an investigation and designating of animals is expressly specified; nor can we suppose that there was no contemplation of the magnificent sky and the heavenly bodies; above all, the wondrous communion with the condescending Deity, and probably with created spirits of superior orders, by which the mind would be excited, its capacity enlarged, and its holy felicity continually increased. It is also to be remarked that the narrative (Gen. ii:19, 20) conveys the implication that some time was allowed to elapse that Adam might discover and feel his want of a companion of his own species, 'a help correspondent to him.'

These considerations impress us with a sense of probability, amounting to a conviction, that a period not very short was requisite for the exercise of man's faculties, the disclosures of his happiness, and the service of adoration which he could pay to his Creator. But all these considerations are strengthened by the recollection that they attach to man's solitary state, and that they all require new and enlarged application when the addition to conjugal life is brought into the account. The conclusion appears irresistible that a duration of many days, or rather weeks or months, would be requisite for so many and important purposes.

Thus divinely honored and happy were the progenitors of mankind in the state of their creation.

(13) **Disobedience.** The next scene which the sacred history brings before us is a dark reverse. Another agent comes into the field and successfully employs his arts for seducing Eve, and by her means Adam, from their original state of rectitude, dignity and happiness.

(14) **Two Trees.** Among the provisions of Divine wisdom and goodness were two vegetable productions of wondrous qualities and mysterious significancy—the tree of life in the midst of the garden, and the tree of knowledge of good and evil' (Gen. ii:9). It would add to the precision of the terms, and perhaps aid our understanding

of them if we were to adhere strictly to the Hebrew by retaining the definite prefix; and then we have 'the tree of the life' and 'the tree of the knowledge.' Thus would be indicated the particular *life* of which the one was a symbol and instrument, and the fatal *knowledge* springing from the abuse of the other. At the same time we do not maintain that these appellations were given to them at the beginning. We rather suppose that they were applied afterwards, suggested by the events and connection, and so became the historical names.

(15) Tree of Life. We see no sufficient reason to understand, as some do, 'the tree of the life,' collectively, as implying a species, and that there were many trees of that species. The figurative use of the expression in Rev. xxii:2, where a plurality is plainly intended, involves no evidence of such a design in this literal narrative. The phraseology of the text best agrees with the idea of a single tree, designed for a special purpose, and not intended to perpetuate its kind. Though in the state of innocence, Adam and Eve might be liable to some corporal suffering from the change of the seasons and the weather, or accidental circumstances, in any case of which occurring, this tree had been endowed by the bountiful Creator with a medicinal and restorative property, probably in the way of instantaneous miracle. We think also that it was designed for a sacramental or symbolical purpose, a representation and pledge of 'the life,' emphatically so called, heavenly immortality when the term of probation should be happily completed. Yet we by no means suppose that this 'tree of life' possessed any intrinsic property of communicating immortality. In the latter view, it was a sign and seal of the Divine promise. But, with regard to the former intention, we see nothing to forbid the idea that it had most efficacious medicinal properties in its fruit, leaves and other parts. Such were called *trees of life* by the Hebrews (Prov. iii:18; xi:30; xiii:12; xv:4).

(16) The Tree of Knowledge. The 'tree of the knowledge of good and evil' might be any tree whatever; it might be of any species even yet remaining, though, if it were so, we could not determine its species, for the plain reason that no name, description, or information whatever is given that could possibly lead to the ascertainment. One cannot but lament the vulgar practice of painters representing it as an apple-tree, and thus giving occasion to profane and silly witticisms.

Yet we cannot but think the more reasonable probability to be that it was a tree having poisonous properties, stimulating and intoxicating, such as are found in some existing species, especially in hot climates. On this ground the prohibition to eat or even touch the tree was a beneficent provision against the danger of pain and death.

Should any cavil at the placing of so perilous a plant in the garden of delights, the abode of sinless creatures, we reply, that virulent poisons, mineral, vegetable and animal, though hurtful or fatal to those who use them improperly, perform important and beneficial parts in the general economy of nature.

But the revealed object of this 'tree of the knowledge of good and evil' was that which would require no particular properties beyond some degree of external beauty and fruit of an immediately pleasant taste. That object was to be a *test of obedience*. For such a purpose, it is evident that to select an indifferent act, to be the object prohibited, was necessary; as the obligation

to refrain should be only that which arises simply, so far as the subject of the law can know, from the sacred will of the Lawgiver. This does not, however, nullify what we have said upon the possibility, or even probability, that the tree in question had noxious qualities; for upon either the affirmative or the negative of the supposition, the subjects of this positive law, having upon all antecedent grounds the fullest conviction of the perfect rectitude and benevolence of their Creator, would see in it the simple character of a test, a means of proof, whether they would or would not implicitly confide in him. For so doing they had every possible reason, and against any thought or mental feeling tending to the violation of the precept, they were in possession of the most powerful motives. There was no difficulty in the observance. They were surrounded with a paradise of delights, and they had no reason to imagine that any good whatever would accrue to them from their seizing upon anything prohibited. If perplexity or doubt arose they had ready access to their Divine benefactor for obtaining information and direction. But they allowed the thought of disobedience to form itself into a disposition, and then a purpose.

(17) Man Not Deceived. Thus was the seal broken, the integrity of the heart was gone, the sin was generated, and the outward act was the consummation of the dire process. Eve, less informed, less cautious, less endowed with strength of mind, became the more ready victim. 'The woman, being deceived, was in the transgression;' but 'Adam was not deceived' (1 Tim. ii:14). He rushed knowingly and deliberately to ruin. The offense had grievous aggravations. It was the preference of a trifling gratification to the approbation of the Supreme Lord of the universe; it implied a denial of the wisdom, holiness, goodness, veracity and power of God; it was marked with extreme ingratitude, and it involved a contemptuous disregard of consequences, awfully impious as it referred to their immediate connection with the moral government of God, and cruelly selfish as it respected their posterity.

(18) The Serpent. The instrument of the temptation was a serpent, whether any one of the existing kinds it is evidently impossible for us to know. Of that numerous order many species are of brilliant colors and playful in their attitudes, so that one may well conceive of such an object attracting and fascinating the first woman. Whether it spoke in an articulate voice, like the human, or expressed the sentiments attributed to it by a succession of remarkable and significant actions, may be a subject of reasonable question. The latter is possible, and it seems the preferable hypothesis, as, without a miraculous intervention the mouth and throat of no serpent could form a vocal utterance of words, and we cannot attribute to any wicked spirit the power of working miracles.

This part of the narrative begins with the words 'And the serpent was crafty above every animal of the field' (Gen. iii:1). It is to be observed that this is not said of the order of serpents, as if it were a general property of them, but of *that* particular serpent. Had the noun been intended generically, as is often the case, it would have required to be without the substantive verb; for such is the usual Hebrew method of expressing universal propositions: of this the Hebrew scholar may see constant examples in the Book of Proverbs.

Indeed, this 'cunning craftiness, lying in wait to deceive' (Eph. iv:14), is the very character of

that malignant creature of whose wily stratagems the reptile was a mere instrument. The existence of spirits, superior to man, and of whom some have become depraved, and are laboring to spread wickedness and misery to the utmost of their power, has been found to be the belief of all nations, ancient and modern, of whom we possess information. It has also been the general doctrine of both Jews and Christians that one of those fallen spirits was the real agent in this first and successful temptation. Of this doctrine, the declarations of our Lord and his apostles contain strong confirmation. (See 2 Cor. ii:11; xi:3,14; Rev. xii:9; xx:2; John viii:44). The summary of these passages presents almost a history of the Fall—the tempter, his manifold arts, his serpentine disguises, his falsehood, his restless activity, his bloodthirsty cruelty, and his early success in that career of deception and destruction.

The younger Rosenmüller says upon this passage, 'That it was not a natural serpent that seduced Eve, but a wicked spirit which had assumed the form of a serpent, and although Moses does not expressly say so, yet it is probable that he designed to intimate as much, from the very fact of his introducing the serpent as a rational being, and speaking; also, that this opinion was universal among the nations of Central and Upper Asia, from the remotest antiquity, appears from this, that, in the system of Zoroaster, it is related that Ahriman, the chief of wicked spirits, seduced the first human beings to sin by putting on the form of a serpent' (*Schol. in Gen. iii:1*; and he refers to Kleuker's German version of the *Zendavesta*, and his own *Ancient and Modern Oriental Country*). (See Commentary by Adam Clarke regarding the serpent, whereby he endeavors to show that it was an animal of the monkey tribe.)

(19) The Penalty. The condescending Deity, or his representative, who had held gracious and instructive communion with the parents of mankind, assuming a human form and adapting all his proceedings to their capacity, visibly stood before them; by a searching interrogatory drew from them the confession of their guilt, which yet they aggravated by evasions and insinuations against God himself, and pronounced on them and their seducer the sentence due. On the woman he inflicted the pains of child-bearing, and a deeper and more humiliating dependence upon her husband. He doomed the man to hard and often fruitless toil, instead of easy and pleasant labor. On both, or rather on human nature universally, he pronounced the awful sentence of death. The denunciation of the serpent partakes more of a symbolical character, and so seems to carry a strong implication of the nature and the wickedness of the concealed agent. The human sufferings threatened are all, excepting the last, which will require a separate consideration of a remedial and corrective kind.

Of a quite different character are the penal denunciations upon the serpent. If they be understood literally, and of course applied to the whole order of Ophidia (as, we believe, is the common interpretation), they will be found to be so flagrantly at variance with the most demonstrated facts in their physiology and economy, as to lead to inferences unfavorable to belief in revelation. Let us examine the particulars:—'Because thou hast done this, cursed art thou above all cattle, above every *behemah*.' But *the serpent tribe cannot be classed* with that of the *behemoth*. The word is of very frequent occurrence in the Old Testament, and though, in a few instances, it seems to be put for brevity so as to be inclusive

of the flocks as well as the herds, and in poetical diction it sometimes stands metonymically for *animals* generally (as Job xviii:3; Ps. lxxiii:22; Eccles. iii:18, 19, 21); yet its proper and universal application is to the large animals (pachyderms and ruminants), such as the elephant, camel, deer, horse, ox, rhinoceros, hippopotamus, etc. (See *BEHEMOTH*.)

As little will the declaration, 'cursed—,' agree with natural truth. It may, indeed, be supposed to be verified in the shuddering which persons generally feel at the aspect of any one of the order of serpents, but this takes place also in many other cases. It springs from fear of the formidable weapons with which some species are armed, as few persons know beforehand which are venomous and which are harmless; and, after all, this is rather an advantage than a curse to the animal. It is an effectual defense without effort. Indeed, we may say that no tribe of animals is so secure from danger, or is so able to obtain its sustenance and all the enjoyments which its capacity and habits require, as the whole order of serpents. If, then, we decline to urge the objection from the word *behemah*, it is difficult to conceive that serpents have more causes of suffering than any other great division of animals, or even so much.

Further, 'going upon the belly' is to none of them a punishment. With some differences of mode, their progression is produced by the pushing of scales, shields, or rings against the ground, by muscular contractions and dilatations, by elastic springings, by vertical undulations, or by horizontal wriggings; but, in every variety, the *entire organization*—skeleton, muscles, nerves, integuments—is *adapted* to the mode of progression belonging to each species. That mode, in every variety of it, is sufficiently easy and rapid (often very rapid) for all the purposes of the animal's life and the amplitude of its enjoyments. To imagine this mode of motion to be, in any sense, a change from a prior attitude and habit of the erect kind, or being furnished with wings, indicates a perfect ignorance of the anatomy of serpents. Yet it has been said by learned and eminent theological interpreters that, before this crime was committed, the serpent probably did 'not go upon his belly, but moved upon the hinder part of his body, with his head, breast and belly upright' (Clarke's *Bible*, p. 1690). This notion may have obtained credence from the fact that some of the numerous serpent species, when excited, raises the neck pretty high; but the posture is to strike, and they cannot maintain it in creeping except for a very short distance.

Neither do they 'eat dust.' All serpents are *carnivorous*; their food, according to the size and power of the species, is taken from the tribes of insects, worms, frogs, and toads, and newts, birds, mice and other small quadrupeds, till the scale ascends to the pythons and boas, which can master and swallow very large animals. The excellent writer just cited, in his anxiety to do honor, as he deemed it, to the accuracy of Scripture allusions, has said of the serpent, 'Now that he creeps with his very mouth upon the earth, he must necessarily take his food out of the dust, and so lick in some of the dust with it.' But this is not the fact. Serpents habitually obtain their food among herbage or in water; they seize their prey with the mouth, often elevate the head, and are no more exposed to the necessity of swallowing adherent earth than are carnivorous birds or quadrupeds. At the same time, it may be understood figuratively. 'Eating the dust' is but another term for groveling in the dust, and this is equiva-

lent to being reduced to a condition of meanness and contempt. (See Micah vii:17.)

But these and other inconsistencies and difficulties (insuperable they do indeed appear to us) are swept away when we consider the fact before stated that the Hebrew *hannachash haiah*, literally rendered, is the *serpent was*, etc., and that it refers specifically and personally to a rational and accountable being, *the spirit of lying and cruelty, the devil, the Satan, the old serpent*. That God, the infinitely holy, good, and wise, should have permitted any one or more celestial spirits to apostatize from purity, and to be the successful seducers of mankind, is indeed an awful and overwhelming mystery. But it is not more so than the permitted existence of many among mankind, whose rare talents and extraordinary command of power and opportunity, combined with extreme depravity, have rendered them the plague and curse of the earth, and the whole merges into the awful and insolvable problem, Why has the All-perfect Deity permitted evil at all? We are firmly assured that He will bring forth, at last, the most triumphant evidence that 'He is righteous in all His ways, and holy in all His works.' In the meantime our happiness lies in the implicit confidence which we cannot but feel to be due to the Being of Infinite Perfection.

(20) The Deliverer. The remaining part of the denunciation upon the false and cruel seducer sent a beam of light into the agonized hearts of our guilty first parents. 'And enmity will I put between thee and the woman, and between thy seed and her seed; he will attack thee [on] the head, and thou wilt attack him [at] the heel.' The verb here used twice occurs in only two other places of the O. T.: Job ix:17, 'Who breaketh upon me with a tempestuous horror,' and Ps. cxxxix:11, 'And if I say, Surely darkness will burst upon me,' *i. e.*, as a sudden and impervious covering. The meaning is established by Gesenius after Umbreit as the idea of a *violent and eager assault*. Christian interpreters generally regard this as the *Protevangelium*, the first gospel promise, and we think with good reason. It was a manifestation of mercy; it revealed a Deliverer, who 'should be a human being, in a peculiar sense the offspring of the female, who should also, in some way not yet made known, counteract and remedy the injury inflicted, and who, though partially suffering from the malignant power, should, in the end, completely conquer it and convert its very success into its own punishment' (J. Pye Smith, *Scripture Testimony to the Messiah*, vol. i, p. 226).

The awful threatening to man was, 'In the day that thou eatest of it, thou wilt die the death.' *Beyom*, literally *in the day*, was also used as a general adverb of time, denoting *when*, without a strict limitation to a natural day. The verbal repetition is a Hebrew idiom to represent not only the *certainty* of the action, but its *intensity and efficacy*; we therefore think that the phrase *die the death* would more exactly convey the sense of the original than what some have proposed, *dying thou shalt die*. The infliction is *Death* in the most comprehensive sense, that which stands opposed to *Life*, the life of not only animal enjoyment, but holy happiness, the life which comported with the image of God. This was lost by the fall, and the sentence of physical death was pronounced, to be executed in due time. Divine mercy gave a long respite.

The same mercy was displayed in still more tempering the terrors of justice. The garden of delights was not to be the abode of rebellious

creatures. But before they were turned out into a bleak and dreary wilderness God was pleased to direct them to make clothing, suitable to their new and degraded condition, of the skins of animals (Gen. iii:21). That those animals had been offered in sacrifice is a conjecture supported by so much probable evidence that we may regard it as a well-established truth. Any attempt to force back the way, to gain anew the tree of life, and take violent or fraudulent possession, would have been equally impious and nugatory. The sacrifice (which all approximative argument obliges us to admit), united with the promise of a deliverer, and the provision of substantial clothing, contained much hope of pardon and grace. The terrible debarring by lightning flashes and their consequent thunder, and by visible supernatural agency (Gen. iii:22-24), from a return to the bowers of bliss, are expressed in the characteristic patriarchal style of anthropopathy, but the meaning evidently is, that the fallen creature is unable by any efforts of his own to reinstate himself in the favor of God, and that whatever hope of restoration he may be allowed to cherish must spring solely from free benevolence.

Thus, in laying the first stone of the temple which shall be an immortal habitation of the Divine glory, it was manifested that 'Salvation is of the Lord,' and that 'grace reigneth through righteousness unto eternal life' (Rom. v:21).

(21) After Life. From this time we have little recorded of the lives of Adam and Eve. Their three sons are mentioned with important circumstances in connection with each of them. (See the articles CAIN, ABEL, and SETH.) Cain was probably born in the year after the fall; Abel, possibly some years later; Seth, certainly one hundred and thirty years from the creation of his parents. After that, Adam lived eight hundred years, and had sons and daughters, doubtless by Eve, and then he died, nine hundred and thirty years old. In that prodigious period many events, and those of great importance, must have occurred; but the wise providence of God has not seen fit to preserve to us any memorial of them, and scarcely any vestiges or hints are afforded of the occupations and mode of life of men through the antediluvian period.—J. P. S. (See ANTEDILUVIANS.)

(22) Adam in the New Testament. Adam is twice mentioned in the New Testament in a merely historical fashion—in Jude. v:14, where we read of 'Enoch the seventh from Adam,' and in Luke iii:38, where the genealogy of Jesus is traced up to him, and Adam himself is '*the son of God*.' The extension of the genealogy beyond David or Abraham is no doubt due to the universalist sympathy of the Pauline evangelist. There are two other passages in which reference is made to the Old Testament story of the first man, with a view to regulating certain questions about the relations of men and women, especially in public worship. The first is 1 Cor. xi:9ff.; the other is 1 Tim. ii:13ff. The use made of Adam in these passages may strike a modern reader as not very conclusive; it has the form rather than the power of what may have suggested it—the similar use of part of the Old Testament story by Jesus to establish the true law of marriage (Matt. xix:4ff.; Comp. Gen. ii:24). (J. Denney, *Hasting's Bib. Diet.*)

Figurative. Adam is represented in Scripture as a covenant-breaker; as a coverer of his transgressions; as a source of guilt and death to his posterity, and as a figure of the promised Messiah (Gen. iii, iv, v; Hos. vi:7; Job xxxi:33; Rom. v:12-19; 1 Cor. xv:21, 22, 45-49).

Jesus Christ is called the second Adam, because of his similitude to the first (Rom. v:14). (1) He is in a peculiar manner the *Son of God*, the express image of his person and brightness of his glory. (2) He is a *new thing created in the earth*, by the influence of the Holy Ghost overshadowing his mother. (3) He is the glorious fruit of the earth, the product of the chief counsels of God and the ornament and center of all his works. (4) He is the head and representative of his people in the new and better covenant; he is their common parent, who communicates to them his spiritual image and entitles them to all the fullness of God; he is their great prophet, priest and governor. (5) All things without reserve are subjected to him for their sake. Having by his blood regained the celestial paradise, he resides in it, and cultivates the whole garden of his church, and has authority to give men power to eat of the tree of life. (6) His church is one with him, more closely and intimately than Eve was with Adam. The whole body of believers were chosen in him, are united to him, live by him and are divinely espoused to him (1 Cor. xv:22, 45-49; Eph. v:25-35).

ADAM, CITY OF (ăd'am, city of), a city at some distance east from the Jordan, to which, or beyond which, the overflow of the waters of that river extended when the course of the stream to the Dead Sea was stayed to afford the Israelites a passage across its channel. Our public version follows the *keri*, or marginal reading, of Josh. iii:16, 'very far from Adam.' It appears from 1 Kings iv:12; vii:46, that Zarethan was on the west side of the Jordan, in the tribe of Manasseh; whereas certainly Adam was on the east side of that river, where the Israelites already were. The text must therefore signify that the overflow reached on the east side to Adam, and on the west to Zarethan; and it admits of the construction that the 'heap of waters' was 'beside' Zarethan and beyond Adam, instead of that Zarethan itself was 'beside Adam.' The name of the city Adam (*red*) was probably derived from the color of the clay in the neighborhood.

ADAM, BOOKS OF (ăd'am, bōōks ōv). The Talmud speaks of a Book of Adam, and such legendary lore furnished suitable pabulum for Mohammedanism. The *Apostolic Constitutions* (vi:16) mention an apocryphal 'Αδάμ. Epiphanius (*Har.* xxvi:8) tells of a Gnostic work, *Revelations of Adam*, and the Decretum Gelasii prohibits Christians from reading the two works, *Penitentiæ Adæ* and *De filiabus Adæ*. The Cypriote Syncellus (8th cent.) makes quotations from a Βίβλος 'Αδάμ which closely resemble the Book of Jubilees. The Jewish Book of Adam is lost, but it probably furnished matter for still further elaboration in several Christian works which survive. (J. T. Marshall, *Hastings' Bib. Dict.*)

ADAMAH (ăd'a-mah) (Heb. אֲדָמָה, *ad-aw-maw'*, earth), a fortified city of Naphtali (Josh. xix:36), probably *Dâmieh*, west of the Sea of Galilee.

ADAMANT (ăd'a-mant). See SHAMIR.

ADAMI (ăd'ami), (Heb. אֲדָמִי, *ad-aw-mee'*, earthy, Josh. xix:33), a place in Palestine, near the border of Naphtali. Rosenmüller, Keil and others join Adami with the following name Nekeb. Keil renders the two "Adami of the pass." The site is probably at the present village *Ed-Dâmieh* on the plateau northeast of Tabor, where the basaltic soil is reddish. The site of Nekeb (*Seiyâdeh*) is not far off.

ADAR (ădar), (Heb. אֲדָר, *ad-awr*, Esth. iii:7, the Macedonian Δύστροπος), is the sixth month of the

civil and the twelfth of the ecclesiastical year of the Jews. The name was first introduced after the Captivity. The following are the chief days in it which are set apart for commemoration:

(1) **Death of Moses.** The seventh is a fast for the death of Moses (Deut. xxxiv:5, 6). There is some difference, however, in the date assigned to his death by some ancient authorities. Josephus (*Antiq.* iv:8) states that he died on *first* of this month; which also agrees with Midrash Megillath Esther, cited by Reland (*Antiq. Hebr.* iv:10): whereas the Talmudical tracts, Kiddushim and Sota, give the *seventh* as the day. It is at least certain that the latter was the day on which the fast was observed.

(2) **Hillel and Shammai.** On the 9th there was a fast in memory of the contention or open rupture of the celebrated schools of Hillel and Shammai, which happened but a few years before the birth of Christ. The cause of the dispute is obscure (Wolf's *Biblioth. Hebr.* ii:826).

(3) **Fast of Esther.** The 13th is the so-called 'Fast of Esther.' Iken observes (*Antiq. Hebr.* p. 150) that this was not an actual fast, but merely a commemoration of Esther's fast of three days (Esth. iv:16), and a preparation for the ensuing festival. Nevertheless, as Esther appears, from the date of Haman's edict, and from the course of the narrative, to have fasted in Nisan, Buxtorf adduces from the Rabbins the following account of the name of this fast, and of the foundation of its observance in Adar (*Synag. Jud.* p. 554): That the Jews assembled together on the 13th, in the time of Esther, and that, after the example of Moses, who fasted when the Israelites were about to engage in battle with the Amalekites, they devoted that day to fasting and prayer, in preparation for the perilous trial which awaited them on the morrow. In this sense this fast would stand in the most direct relation to the feast of Purim. The 13th was also, 'by a common decree,' appointed as a festival in memory of the death of Nicanor (2 Macc. xv:36).

(4) **Feast of Purim.** The 14th and 15th were devoted to the feast of Purim (Esth. ix:21). In case the year was an intercalary one, when the month of Adar occurred twice, this feast was first moderately observed in the intercalary Adar, and then celebrated with full splendor in the ensuing Adar. The former of these two celebrations was then called the *lesser*, and the latter the *great Purim*. These designations do not apply, as Horne has erroneously stated (*Introduction* iii:177), to the two days of the festival in an ordinary year, but to its double celebration in an intercalary year.—J. N. (See NINE.)

ADARCONIM (ădar-kō'nim), (Heb. אֲדָרְכוֹנִים, *ad-ar'ko-nim*; Sept. δραχμή, *drack-mah'*, and χρυσούς, *kroo-soos'*; Vulg. *drachma* and *aureus*).

(1) **Daric.** Gesenius and most others are of opinion that these words, which occur in 1 Chron. xxix:7; Ezra viii:27; ii:69; Neh. vii:70-72, denote the *Persian Daric*, a gold coin, which must have been in circulation among the Jews during their subjection to the Persians.

Probably before the time of Darius Hystaspes the Persians had no coinage of their own, and that the *daricus* coined by him was probably a medal (Herod. iv:166) of the finest gold. When the darics became current, especially after the mercenary troops were paid in them, their numbers must have been greatly augmented; yet Strabo assures us (l, xv, p. 1068) that the coin was by no means abundant among the Persians,

and that gold was employed by them rather in decoration than as a circulating medium. This, however, is of little real consequence, for it proceeds on the erroneous supposition that the coin derived its name from the first Darius, and could not have previously existed. In the later day of Strabo the coin may have become scarce, although once plentiful. Be this as it may, the daric is of interest, not only as the most ancient gold coin of which any specimens have been preserved to the present day, but as the earliest coined money which we can be sure was known to and used by the Jews.

(2) **Crowned Archer.** The distinguishing mark of the coin was a crowned archer, who appears with some slight variations on different specimens. His garb is the same which is seen in the sculptures at Persepolis, and the figure on the coin is called, in numismatics, Sagittarius.

(3) **Weight.** The specimens weighed by Dr. Bernard were fifteen grains heavier than an English guinea, and their intrinsic value may, therefore, be reckoned at twenty-five shillings, about five dollars and a half (Eckhel, *Doctrina Numorum Veterum*; Bernard, *De Mensuris et Ponderibus*). (See MONEY.)

ADARGAZERIN (ā'dar-gāz'erin), (Heb. אֲדָרְגָזֵרִין, *ad-ar'gaw-ze-rin'*). This is a Chaldee word which occurs in Dan. iii:2, 3, where the titles of the Babylonian officers are enumerated.

It is not only difficult, but perhaps impossible, to determine the particular office which the word describes, and opinions and versions have differed greatly. The Sept., which is followed by the Vulgate, has *τύραννοι*, *toō'ran-noy*. Our version has 'treasurers,' and although we do not know the reason on which they proceeded, we may find one in the fact that *gaza* (γάζα), which seems the principal element of the word, means a treasury, and was avowedly adopted by the Greeks from the Persians. Jacchiades, who identifies all these officers with those of the Turkish court and government, compares the present to the *defterdars*, who have the charge of the receipts and disbursements of the public treasury. The Adargazerin were probably officers of state who presided over the ordeals by fire and other matters connected with the government of Babylon. This last explanation is not, however, new, being the one rejected by Gesenius. (See TREASURER.)

ADASA or **ADARSA** (ād'a-sa or a-dār'sa), (Gr. Ἀδασά, *a-das-sah'*), called also by Josephus Adazer, Adaco and Acodaco, a city in the tribe of Ephraim, said to have been four miles from Beth-horon, and not far from Gophna (Joseph. *Antiq.* xii:17; Euseb. *Onomast.* on Ἀδασά); was the scene of some important transactions in the history of the Maccabees (1 Macc. vii:40, 45; Joseph. *Antiq.* xii:17; *Bell. Jud.* i, l).

ADASHIM (ā-dāsh'im), (Heb. אֲדָשִׁים, *ad-aw'-shim*). "Lentiles" is the interpretation given by our own and most other versions, and there is no reason to question its accuracy. In Syria lentiles are still called in Arabic *addas* (Russel, *N. H. of Aleppo.* i:74).

(1) **Red Pottage.** Lentiles appear to have been chiefly used for making a kind of pottage. The red pottage for which Esau bartered his birthright was of lentiles (Gen. xxv:29-34). The term *red* was, as with us, extended to *yellowish brown*, which must have been the true color of the pottage, if derived from lentiles. The Greeks and Romans also called lentiles red. (See authorities in Celsius i:105).

(2) **Brought to David.** Lentiles were among the provisions brought to David when he fled from Absalom (2 Sam. xvii:28), and a field of lentiles was the scene of an exploit of one of David's heroes (2 Sam. xxiii:11).

(3) **Used for Bread.** From Ezek. iv:9 it would appear that lentiles were sometimes used as bread. This was, doubtless, in times of scarcity, or by the poor. Sonnini (*Travels*, p. 603, English translation) assures us that in southernmost Egypt, where corn is comparatively scarce, lentiles mixed with a little barley form almost the only bread in use among the poorer classes. It is called *bettan*, is of a golden-yellow color, and is not bad, although rather heavy. In that country, indeed, probably even more than in Palestine, lentiles anciently, as now, formed a chief article of food among the laboring classes. This is repeatedly noticed by ancient authors, and so much attention was paid to the culture of this useful pulse that certain varieties became remarkable for their excellence.

(4) **Egyptian Lentiles.** The lentiles of Pelusium, in the part of Egypt nearest to Palestine, were esteemed both in Egypt and foreign countries (Vir. Georg. i:228), and this is probably the valued Egyptian variety which is mentioned in the *Mishna* (tit. *Kilvim* xviii:8) as neither large nor small. Large quantities of lentiles were exported from Alexandria (Augustin. *Comm. in Ps.* xlvi). Pliny, in mentioning two Egyptian varieties, incidentally lets us know that one of them was red, by remarking that they like a red soil, and by speculating whether the pulse may not have thence derived the reddish color which it imparted to the pottage made with it (*Hist. Nat.* xviii:12). This illustrates Jacob's red pottage. Dr. Shaw (i:257) also states that these lentiles easily dissolve in boiling, and form a red or chocolate colored pottage, much esteemed in North Africa and Western Asia. Putting these facts together, it is likely that the reddish lentile, which is now so common in Egypt (*Descript. de l'Egypte* xix:65), is the sort to which all these statements refer. (See POTTAGE; LENTILES.)

ADBEEL (ād'be-el), (Heb. אֲדִבְעֵל, *ad-beh-ale'*, disciplined of God), one of the twelve sons of Ishmael and founder of an Arabian tribe (Gen. xxv:13, 16)

ADDAN (ād'dan), (Heb. אֲדָן, *ad-dawn'*), another form (Ezra ii:59) of the name (Neh. vii:61) Addon

ADDAR (ād'dar), (Heb. אֲדָר, *ad-dawr'*, thrashing floor or wide-open place), a son of Bela and grandson of Benjamin (1 Chron. viii:3), elsewhere called Ard, in Gen. xlvi:21; Num. xxvi:40.

ADDER (ād'der), the English name of a kind of serpent, is a dialectical variation of the same word in a variety of languages of the Gothic and Teutonic family. Another name, varying, in the old European tongues, from *ag*, *ach* to *hag*, has more connection with the Semitic; and in the south of Europe, where the Latin and its derivatives prevail, both are represented by the word *vipera* (viper). The first radically indicates poison; the second, pain, distress, strife; the third, parturition of offspring, not in the state of an egg, but of the perfect animal. Though not clearly distinguished, in common acceptance, from innocuous snakes, all strictly indicate serpents armed with poisonous fangs, and therefore all are truly viviparous. In the English version of the Bible the name 'adder' occurs several times. (See SERPENT.)

(1) **Cobra.** The most prominent species of the genus at present is the *naja tripudians*, *cobra*

di capello, hooded or spectacled snake of India, venerated by the natives; even by the serpent-charmers styled the good serpent to this day, and yet so ferocious that it is one of the very few that will attack a man when surprised in its haunt, although it may be gorged with prey. This species is usually marked on the nape with two round spots, transversely connected in the

Egyptian Adder.

form of a pair of spectacles; but among several varieties, one, perhaps distinct, is without the marks, and has a glossy golden hood, which may make it identical with the *naja haje* of Egypt, the undoubted *Ihh-nuphi*, *oneph*, or *agathodæmon* of ancient Egypt, and accurately represented on the walls of its temples, in almost innumerable instances, both in form and color. This serpent also inflates the skin on the neck, not in the expanded form of a hood, but rather into an intumescence of the neck. As in the former, there is no marked difference of appearance between the sexes, but the psilli, or charmers, by a particular pressure on the neck, have the power of rendering the inflation of the animal, already noticed as a character of the genus, so intense, that the serpent becomes rigid, and can be held out horizontally as if it were a rod.

(2) **Soothsayers.** This practice explains what the soothsayers of Pharaoh could perform when they were opposing Moses, and reveals one of the names by which the Hebrews knew the species; for although the text (Exod. iv:3) uses, for the rod of Aaron converted into a serpent, the word *nachash*, and subsequently (vii:15) *thannin*, it is plain that, in the second passage, the word indicates 'monster,' as applied to the *nachash* just named—the first being an appellative, the second an epithet. That the rods of the magicians of Pharaoh were of the same external character is evident from no different denomination being given to them; therefore, we may infer that they used a real serpent as a rod—namely, the species now called *haje*—for their imposture, since they no doubt did what the present serpent-charmers perform with the same species, by means of the temporary *asphyxiation*, or suspension of vitality, before noticed, and producing restoration to active life by liberating or throwing down. Thus we have the miraculous character of the prophet's mission shown by his real rod becoming a serpent, and the magicians' real serpents merely assuming the form of rods, and when both were opposed in a state of animated existence, by the rod devouring the living animals, conquering the

great typical personification of the protecting divinity of Egypt. *Nachash* may, therefore, with some confidence, be assumed to have been the Hebrew name, or at least one of the names, of the *naja haje*, *el haje* and *haje nacher* of the Arabs.

(3) **Sacred Serpent.** *Nachash* was intensely the serpent of serpents with the Hebrews, and when figured with the crowns or caps of Upper and Lower Egypt, was the crowned serpent and basilisk. It is evident that *nach-ash* led authors, and Pliny among the number, to affix the term *aspis* to the *haje*, which, however, he did not recognize as the sacred serpent of Egypt. The true *asp* is a small viper, notwithstanding the opinion of M. Geoffroy to the contrary.

This species may be regarded as extending to India and Ceylon, and probably the *naja tripudians* is likewise an inhabitant of Arabia, if not of Egypt, although the assertion of the fact (common in authors) does not exclude a supposition that they take the two species to be only one.

(4) **Flying Serpents.** We are disposed to refer the 'winged' or 'flying' serpent to the *naja tripudians*, in one of its varieties, because—with its hood dilated into a kind of shining wings on each side of the neck, standing, in undulating motion, one-half or more erect, rigid, and fierce in attack, and deadly poisonous, yet still denominated 'good spirit,' and in Egypt ever figured in combination with the winged globe—it well may have received the name of *saraph*, and may thus meet all the valid objections, and conciliate seemingly opposite comments (see Num. xxi:6, 8; Deut. viii:15; Is. xiv:29; xxx:6, and Paxton's *Illustrations*).

In Isaiah xiv:29 and xxx:6, the epithet *meophph*, 'vibrating' (rendered 'flying' in A. V.), is another form for 'winged,' and occurs in passages unconnected with the events in Exodus. Both bear metaphorical interpretations.

(5) **Fiery Serpents.** A further confirmation of the 'fiery serpents,' or 'serpents of the burning bite,' being *najas* occurs in the name *Ras om Haye* (Cape of the Haje serpents), situated in the locality where geographers and commentators agree that the children of Israel were afflicted by these reptiles. Should it be objected that these are the *haje*, and not the spectacle snake, it may be answered that both Arabs and Hindoos confound the species.—C. H. S.

(6) **Puff Adder.** (Heb. עֲשׂוּב, *ak-shoob*, from root to coil, an adder.) This is another name of a serpent found only in Ps. cxi:3: "They have sharpened their tongues like a serpent, adder's poison is under their lips." St. Paul quotes the latter half of this verse from the LXX in Rom. iii:13. The root of the name implies bending back, recurving, but not coiling up, for all snakes have that faculty. The syllable *ach*, however, shows a connection with the former denominations, and both are perfectly reconcilable with a serpent very common at the Cape of Good Hope, not unfrequent in Western Africa, and probably extending over that whole continent, excepting, perhaps, Morocco. It is the 'puff adder' of the Dutch colonists, about three feet in length and about six inches in circumference at the middle of the body; the head is larger than is usual in serpents; the eyes are large and very brilliant; the back beautifully marked in half-circles, and the colors black, bright yellow and dark brown, the belly yellow; the appearance at all times, but chiefly when excited, extremely brilliant; the upper jaw greatly protruding, some-

what like what occurs in the shark, places the mouth back towards the throat, and this structure is said to be connected with the practice of the animal when intending to bite, to swell its skin till it suddenly rises up, and strikes backwards as if it fell over. It is this faculty which appears to be indicated by the Hebrew name *acksub*, and therefore we believe it to refer to that species, or to one nearly allied to it. (See SERPENT.)

ADDI (ăd'di), (Heb. אָדִי, *a-di'*; Gr. Ἀδδῖ, *ad-dee'*, ornament, Luke iii:28), son of Cosam and father of Melchi, the third above Salathiel in the genealogy of Christ.

ADDON (ăd'don), (Heb. אֲדוֹן, *ad-done'*, powerful), a place mentioned in Ezra ii:59, to which those Israelites returned who could not show their pedigree (see Neh. vii:61).

ADER (ă'der), (Heb. אֶדֶר, *eh-der'*, a flock), a Benjamite, son of Beriah, chief of the inhabitants of Aijalon. The name is more correctly Eder (1 Chron. viii:15), B. C. before 588.

ADIABENE (ă-dī-ă-bē'ne), (Gr. Ἀδιαβηνή, *ah-dee-a-bay-nay'*), the principal of the six provinces into which Assyria was divided. Pliny (*Hist. Nat.* v:12) and Ammianus (xxiii:6, sec. 20) comprehend the whole of Assyria under this name, which, however, properly denoted only the province which was watered by the rivers Diab and Adiab, or the Great and Little Zab (Dhab), which flow into the Tigris below Nineveh (Mosul) from the northeast. This region is not mentioned in Scripture, but in Josephus, its queen Helena and her son Izates, who became converts to Judaism, are very often named (Joseph. *Antiq.* xx:2, 4; *Bell. Jud.* ii:16, 19; v:4, 6, 11).

ADIDA (ăd'i-dā), (Gr. Ἀδιδά, *ah-dee-dah'*, Vulg. *Addus*), a fortified town in the tribe of Judah. In 1 Macc. xii:38, we read that Simon Maccabæus set up "*Adida in Sephela*" (Ἀδιδά ἐν τῇ Σεφῆλα), and made it strong with bolts and bars. Eusebius says that Sephela was the name given in his time to the open country about Eleutheropolis. And this Adida in Sephela is probably the same which is mentioned in the next chapter (1 Macc. xiii:13) as 'Adida over against the plain,' where Simon Maccabæus encamped to dispute the entrance into Judæa of Tryphon, who had treacherously seized on Jonathan at Ptolemais. In the parallel passage Josephus (*Antiq.* xiii:6, 4) adds that this Adida was upon a hill, before which lay the plains of Judæa. Lightfoot, however, contrives to multiply the single place mentioned in the Maccabees and Josephus into four or five different towns (see *Chorog. Decad.* sec. 3). One of the places which Josephus calls Adida (*Bell. Jud.* iv:9, 1) appears to have been near the Jordan, and was probably the Hadid of Ezra ii:33. (See HADID.)

ADIEL (ă'diel), (Heb. אֲדִיֵּל, *ad-ee-ale'*, ornament of God).

1. One of the chiefs of the tribe of Simeon, who seem to have dispossessed the aborigines of Gedor (1 Chron. iv:36).

2. A priest, son of Jahzerah and father of Maasiai. The latter assisted in reconstructing the temple after the captivity (1 Chron. ix:12), B. C. 536.

3. The father of Azmaveth, which latter was treasurer under David (1 Chron. xxvii:25).

ADIN (ă'din), (Heb. אֲדִין, *aw-deen'*, effeminate).

1. The head of one of the Israelitish families, whose descendants returned with Zerubbabel to Jerusalem from Babylon (B. C. 536).

The number according to Ezra ii:15 is four

hundred and fifty-four; in Neh. vii:20, as six hundred and fifty-five, the discrepancy being occasioned by an error in the hundreds and the including or excluding of himself (Mc. and Str. *Cyc.*), (see Ez. viii:6), B. C. 457.

2. One who sealed the covenant made by Nehemiah and the people after their return to Jerusalem (Neh. x:16), B. C. about 445.

ADINA (ăd'i-na), (Heb. אֲדִינָה, *ad-ee-naw'*, slender, delicate), the son of Shiza, a Reubenite, captain of thirty of his tribesmen—one of David's warriors (1 Chron. xi:42); B. C. before 1000.

ADITHAIM (ăd-i-thā'im), (Heb. אֲדִיתַיִם, *ad-ee-thah'yim*, double prey), a city of Judah (Josh. xv:36), whose location is unknown. At a later time the name appears to have been changed to HADID (Chadid) and ADIDA.

ADJURATION (ăd-ju-rā'shun), (Heb. אָשׁוּבָה, *aw-law'*, in Hiph., to cause to swear, in 1 Kings viii:31; 2 Chron. vi:22; אָשׁוּבָה, *shaw-bah'*, to make swear; Gr. ἐξορκίζω, *ex-or-kid'zo*, to exact an oath).

1. This is a solemn act or appeal, whereby one man, usually a person vested with natural or official authority, imposes upon another the obligation of speaking or acting as if under the solemnity of an oath. We find the word *shawbah* used in this sense in Cant. ii:7; iii:5, etc.

2. In the New Testament the act of adjuration is performed with more marked effect, as when the high-priest thus calls upon Christ, 'I adjure thee by the living God, tell us,' etc. (Matt. xxvi:63). The word used here is that by which the LXX render the Hebrew (see also Mark v:7; Acts xix:13; 1 Thess. v:27). An oath, although thus imposed upon one without his consent, was not only binding, but solemn in the highest degree, and when connected with a question, an answer was compulsory, which answer being as upon oath, any falsehood in it would be perjury. Thus our Saviour, who had previously disdained to reply to the charges brought against him, now felt himself bound to answer the question put to him. The abstract moral right of any man to impose so serious an obligation upon another without his consent may very much be doubted—not, indeed, as compelling a true answer, which a just man will give under all circumstances, but as extorting a truth which he might have just reasons for withholding.

3. In the Roman Catholic Church it means the use of the name of God, or of some holy thing, to induce one to do what is required of him.

ADMAH (ăd'mah), (Heb. אֲדָמָה, *ad-maw'*, red earth), one of the cities in the vale of Siddim (Gen. x:19), which had a king of its own (Gen. xiv:2). It was destroyed along with Sodom and Gomorrah (Gen. xix:24; Deut. xxix:23; Hos. xi:8).

ADMATHA (ăd'ma-thā), (Heb. אֲדָמָתָה, *ad-maw-thaw'*, perhaps earthy, dark-colored), the third named of seven princes or courtiers of Ahasuerus (Esth. i:14); B. C. about 519.

ADMINISTER (ăd-mĭn'is-ter), (Gr. διακονία, *dec-ak-on-ee'ah*, service), to manage and give out as stewards (2 Cor. viii:19). *Administration*, a public office, and the execution thereof (1 Cor. xii:5). Specifically "to relieve," "to minister" (2 Cor. ix:12). Here the meaning is "the ministration of the gift."

ADMIRE, ADMIRATION (ăd-mĭre', ăd-mĭ-rā'shun). These words occur in A. V. as the expression of simple wonder, without including approbation. 2 Thess. i:10, 'When he shall come to be glorified

in his saints, and to be admired (RV 'marveled at') in all them that believe'; Jude, ver. 16, 'having men's persons in admiration' (Gr. θαυμάζοντες πρόσωπα. RV 'showing respect of persons'); Rev. xvii:6, 'When I saw her, I wondered with great a'. (RV 'with a great wonder'). (Hastings' *Bib. Dict.* xvii:6).

ADMONI (ăd-mō'ni), (Heb. אֲדוֹנִי, *ad-mo'nee*).

This word means *red-haired*, and is so rendered in the ancient versions, although ours understands a *ruddy complexion*. It would thus appear that Esau (Gen. xxv:25) and David (1 Sam. xvi:12; xvii:42) were red-haired. Red hair is so uncommon in the East, that it forms a particular distinction, as in the Scriptural instances; but it is by no means unknown, especially in mountainous countries. The writer has observed it in Persia repeatedly, accompanied with the usual fresh complexion. Such hair and complexion together seem to have been regarded as a beauty among the Jews. The personal characters of Esau and David appear to agree well with the temperament which red hair usually indicates. (See **RUDDY**).

ADNA (ăd'na), (Heb. אֲדָנָה, *ad-naw'*, pleasure).

1. An Israelite descended from the family of Pahath-moab, who divorced his Gentile wife after the Captivity (Ezra x:30).

2. A chief priest, son of Harim, who was contemporary with Joiakim (Neh. xii:15), B. C. about 536.

ADNAH (ăd'nah), (Heb. אֲדָנָה, *ad-naw'*, pleasure).

1. One of the chief men of the tribe of Manasseh, who joined David at Ziklag (1 Chron. xii:20), B. C. before 1000.

2. A warrior of the tribe of Judah and captain under Jehoshaphat (2 Chron. xvii:14), B. C. about 863.

ADONAI (a-dō'nī), (Heb. אֲדוֹנָי, *ad-o'nee*; Sept.

Κύριος, *ku'ree-os*, lord, master), the old plural form of the noun אֲדוֹן, *adon*, similar to that with the suffix of the first person; used as the *pluralis excellentiæ* by way of dignity, for the name of Jehovah. The similar form *with the suffix* is also used of men, as of Joseph's master (Gen. xxxix:2, 3, *sq.*); of Joseph himself (Gen. xlii:30, 33; so also Is. xix:4). The Jews, out of superstitious reverence for the name of Jehovah, always in reading pronounce *Adonai* where *Jehovah* is written; and hence the letters of *Jehovah* are usually written with the points belonging to *Adonai*. (See **JEHOVAH**.)

ADONIBEZEK (a-dō-ni-bē'zek), (Heb. אֲדוֹנִיבֶזֶק, *a-do'nee-beh'zek*,

lord of Bezek), king or lord of Bezek, a town which Eusebius (in *Βεζέκ*) places 17 miles east of Neapolis or Shechem. The small extent of the kingdoms in and around Palestine at the time of its invasion by the Hebrews is shown by the fact that this petty *melek* had subdued no less than seventy of them and the barbarity of the war usages in those early times is painfully shown by his cutting off all the thumbs and great toes of his prisoners, and allowing them no food but that which they gathered under his table. These conquests made Adonibezek 'a triton among the minnows;' and we find him at the head of the confederated Canaanites and Perizzites, against whom the tribes of Judah and Simeon marched after the death of Joshua. His army was routed and himself taken prisoner. The victors failed not to express their indignation at the mode in which he had treated his captives, by dealing with him in the same manner (B. C. about 1145). His conscience was then awakened to the enormity of his conduct, and in his own treat-

ment he recognized a severe but just application of the *lex talionis*. That the act was so intended by the captors is very clear, and it is strange that this strong reprobation of his conduct by the Israelites should have been construed into an example of their own barbarous usages in war. Adonibezek was taken to Jerusalem, where he died (Judg. i:5-7).

ADONIJAH (ăd-o-nī'jah), (Heb. אֲדוֹנִיָּהוּ, *ad-o-nee-yaw'*, Jehovah [is] my Lord).

(1) **Son of David.** The fourth son of David by Haggith. He was born after his father became king, but when he reigned over Judah only (2 Sam. iii:4). According to the Oriental notion developed in the article Absalom, Adonijah might have considered his claim superior to that of his eldest brother Amnon, who was born while his father was in a private station, but not to that of Absalom, who was not only his elder brother, and born while his father was a king, but was of royal descent on the side of his mother. When, however, Amnon and Absalom were both dead, he became, by order of birth, the heir apparent to the throne. But this order had been set aside in favor of Solomon, who was born while his father was king of all Israel. Absalom perished in attempting to assert his claim of primogeniture, in opposition to this arrangement. Unawed by this example, Adonijah took the same means of showing that he was not disposed to relinquish the claim of primogeniture which now devolved upon him.

(2) **Proclaimed King.** He assumed the state of an heir apparent, who, from the advanced age of David, must soon be king. But it does not appear to have been his wish to trouble his father as Absalom had done; for he waited till David appeared at the point of death, when he called around him a number of influential men, whom he had previously gained over, and caused himself to be proclaimed king. This was a formidable attempt to subvert the appointment made by the Divine king of Israel, for Adonijah was supported by such men as Joab, the general-in-chief, and Abiathar, the high-priest, both of whom had followed David in all his fortunes. The adhesion of such men, and the previous defection of the nation to Absalom, show the strength of the hereditary principle among the Israelites. In all likelihood, if Absalom had waited till David was on his death-bed, Joab and Abiathar would have given him their support, but his premature and unnatural attempt to dethrone his father disgusted these friends of David, who might not otherwise have been adverse to his claims. This danger was avoided by Adonijah, but his plot was, notwithstanding, defeated by the prompt measure taken by David, who directed Solomon to be at once proclaimed, and crowned, and admitted to the real exercise of the sovereign power.

(3) **Pardoned.** Adonijah then saw that all was lost, and fled to the altar, which he refused to leave without a promise of pardon from King Solomon. This he received, but was warned that any further attempt of the same kind would be fatal to him.

(4) **Death.** Accordingly, when, some time after the death of David, Adonijah covertly endeavored to reproduce his claim through a marriage with Abishag, the virgin widow of his father (see **ABISHAG**), his design was at once penetrated by the king, by whose order he was instantly put to death (1 Kings ii:23-25), B. C. 960.

ADONIKAM (a-dōn-i-kām), (Heb. אֲדוֹנִיכָם, *ad-o-nee-kawm'*, whom the Lord sets up, or lord of the

enemy, the sons of Adonikam, numbering six hundred and sixty-six, who were among those who returned with Zerubbabel from Babylon (Neh. vii:18; 1 Esdr. v:14). In the last two passages the number is put down at six hundred and sixty-seven. The rest of the family returned with Ezra (Ezra viii:13; 1 Esdr. viii:39), B. C. 458. In Neh. x:16 the name is given as Adonijah.

ADONIRAM (ăd-o-nî'ram), (Heb. אֲדוֹנִירָם, *ad-nee-rāwm'*, lord of height, *i. e.*, high lord, 1 Kings iv:6).

1. This name is exhibited in the contracted form of Adoram in 2 Sam. xx:24; 1 Kings xii:18, and of Hadoram in 2 Chron. x:18 (B. C. 930).

2. Adoniram, or Hadoram, son of Toi, king of Hamath, who was sent by his father to congratulate David on his victory over their common enemy, Hadarezer, king of Syria (1 Chron. xviii:10). This prince is called Joram in 2 Sam. viii:10.

3. A person of this name is mentioned as receiver-general of the imposts in the reigns of David, Solomon and Rehoboam. Commentators have been much at a loss to determine whether the office was held by one person for so long a period, or by two or three persons of the same name. It appears very unlikely that even two persons of the same name should successively bear the same office, in an age when no example occurs of the father's name being given to his son. We find also that not more than forty-seven years elapse between the first and last mention of the Adoniram who was over the tribute; and as this, although a long term of service, is not too long for one life, and as the person who held the office in the beginning of Rehoboam's reign had served in it long enough to make himself odious to the people, it appears on the whole most probable that one and the same person is intended throughout. Only one incident is recorded in connection with this person. When the ten tribes seceded from the house of David and made Jeroboam king, Rehoboam sent Adoniram among them, for the purpose, we may presume, of collecting the usual imposts, which had become very heavy. Perhaps he had been rigid in his invidious office under Solomon; at all events, the collector of the imposts which had occasioned the revolt was not the person whose presence was the most likely to soothe the exasperated passions of the people. They rose upon him, and stoned him till he died. Rehoboam, who was not far off, took warning by his fate, and, mounting his chariot, returned with all speed to Jerusalem (1 Kings xii:18).

ADONIS (ă-dō'nis). See TAMMUZ.

ADONIZEDEK (a-dō-nī-zē'dek), (Heb. אֲדוֹנִיזֶדֶק, *ad-o'nee-zee'deb*; Sept. Ἀδωνιβεζέκ, *ah-doh-nee-bee-zek'*, confounding him with Adonibezek). The name denotes *lord of justice*, *i. e.*, *just lord, king of Zedek*.

(1) **Canaanitish King.** He was the Canaanitish king of Jerusalem when the Israelites invaded Palestine, and the similarity of the name to that of a more ancient king of (as is supposed) the same place, Melchi-zedek (*king of justice, or king of Zedek*), has suggested that Zedek was one of the ancient names of Jerusalem. Be that as it may, this Adonizedek was the first of the native princes that attempted to make head against the invaders.

(2) **Confederacy.** After Jericho and Ai were taken, and the Gibeonites had succeeded in forming a treaty with the Israelites, Adonizedek was the first to rouse himself from the stupor which had fallen on the Canaanites (Josh. x:1-5), and he induced the other Amoritish kings of Hebron

—Jarmuth, Lachish and Eglon—to join him in a confederacy against the enemy. They did not, however, march directly against the invaders, but went and besieged the Gibeonites, to punish them for the discouraging example which their secession from the common cause had afforded. Joshua no sooner heard of this than he marched all night from Gilgal to the relief of his allies, and falling unexpectedly upon the besiegers, soon put them to utter rout.

(3) **The Five Kings.** The pursuit was long, and was signaled by Joshua's famous command to the sun and moon, as well as by a tremendous hailstorm, which greatly distressed the fugitive Amorites. (See JOSHUA.) The five kings took refuge in a cave, but were observed, and by Joshua's order the mouth of it was closed with large stones and a guard set over it until the pursuit was over. When the pursuers returned the cave was opened and the five kings brought out. The Hebrew chiefs then set their feet upon the necks of the prostrate monarchs—an ancient mark of triumph, of which the monuments of Persia and Egypt still afford illustrations. They were then slain, and their bodies hung on trees until the evening, when, as the law forbade a longer exposure of the dead (Deut. xxi:23), they were taken down and cast into the cave, the mouth of which was filled up with large stones, which remained long after (Josh. x:1-27). The severe treatment of these kings by Joshua has been censured and defended with equal disregard of the real circumstances, which are, that the war was avowedly one of extermination, no quarter being given or expected on either side, and that the war usages of the Jews were neither worse nor better than those of the people with whom they fought, who would most certainly have treated Joshua and the other Hebrew chiefs in the same manner had they fallen into their hands.

ADOPTION (a-dōp'shun), (Gr. *υιοθεσία, hwee-oth-es-ee'ah*, the placing as a son). The Old Testament does not contain any word equivalent to this; but the act occurs in various forms. The New Testament has the word *υιοθεσία* often (Rom. viii:15, 23; ix:4; Gal. iv:5; Eph. i:5), but no example of the act occurs. The term itself is well defined, and the act described, in the *literal* signification of the Greek word. It is the *placing as a son of one who is not so by birth*.

The practice of adoption had its origin in the desire for male offspring among those who have, in the ordinary course, been denied that blessing, or have been deprived of it by circumstances. This feeling is common to our nature, but its operation is less marked in those countries where the equalizing influences of high civilization lessen the peculiar privileges of the paternal character, and where the security and the well-observed laws by which estates descend and property is transmitted withdraw one of the principal inducements to the practice.

(1) **Among the Hebrews.** Almost all of the instances in the Bible occur in the patriarchal period. The law of Moses, by settling the relations of families and the rules of descent, and by formally establishing the Levirate law, which in some sort secured a representative posterity even to a man who died without children, appears to have put some check upon this custom.

(2) **Greeks and Romans.** The allusions in the New Testament are mostly to practices of adoption which then existed among the Greeks and Romans, and rather to the latter than to the former, for among the more highly civilized

Greeks adoption was less frequent than among the Romans. In the East the practice has always been common, especially among the Semitic races, in whom the love of offspring has at all times been strongly manifested. And here it may be observed that the additional and peculiar stimulus which the Hebrews derived from the hope of giving birth to the Messiah was inoperative with respect to adoption, through which that privilege could not be realized.

(3) **Confined to Sons.** It is scarcely necessary to say that adoption was confined to sons. The whole Bible history affords no example of the adoption of a female, for the Jews certainly were not behind any Oriental nation in the feeling expressed in the Chinese proverb—'He is happiest in daughters who has only sons' (*Mem. sur les Chinois*, t. x:149).

The first instances of adoption which occur in Scripture are less the acts of men than of women, who, being themselves barren, give their female slaves to their husbands, with a view of adopting the children they may bear. Thus Sarah gave her handmaid Hagar to Abraham, and the son who was born, Ishmael, appears to have been considered as her son as well as Abraham's, until Isaac was born. In like manner Rachel, having no children, gave her handmaid Bilhah to her husband, who had by her Dan and Naphtali (Gen. xxx:5-9), on which his other wife, Leah, although she had sons of her own, yet fearing that she had left off bearing, claimed the right of giving her handmaid Zilpah to Jacob, that she might thus increase their number, and by this means she had Gad and Asher (Gen. xxx:9-13). In this way the greatest possible approximation to a natural relation was produced. The child was the son of the husband, and, the mother being the property of the wife, the progeny must be her property also; and the act of more particular appropriation seems to have been that, at the time of birth, the handmaid brought forth her child 'upon the knees of the adoptive mother' (Gen. xxx:3). Strange as this custom may seem, it is in accordance with the notions of *representation* which we find very prevalent in analogous states of society. We do not see the use of explaining away customs we do not like, or which do not agree with our own notions, by alleging that by this expression nothing more is meant than that the son was to be dandled and brought up *upon the knees* of the adoptive mother. In this case the vicarious bearing of the handmaid for the mistress was as complete as possible, and the sons were regarded as fully equal in right of heritage with those by the legitimate wife. This privilege could not, however, be conferred by the adoption of the wife, but by the natural relation of such sons to the husband.

(4) **Sarah's Case.** A curious fact is elicited by the peculiar circumstances in Sarah's case, which were almost the only circumstances that could have risen to try the question whether a mistress retained her power, as such, over a female slave whom she had thus vicariously employed, and over the progeny of that slave, even though by her own husband. The answer is given rather startlingly, in the affirmative in the words of Sarah, who, when the birth of Isaac had wholly changed her feelings and position, and when she was exasperated by the offensive conduct of Hagar and her son, addressed her husband thus: 'Cast forth *this bondswoman* and her son; for *the son of this bondswoman* shall not be heir with *my son*, even with Isaac' (Gen. xxi:10).

(5) **Previous Instance.** A previous instance of adoption in the history of Abraham, when as

yet he had no children, appears to be discoverable in his saying, 'One born in my house is mine heir.' This unquestionably denotes a house-born slave, as distinguished from one bought with money. Abraham had several such, and the one to whom he is supposed here to refer is his faithful and devoted steward Eliezer. This, therefore, is a case in which a slave was adopted as a son—a practice still very common in the East. A boy is often purchased young, adopted by his master, brought up in his faith, and educated as his son; or, if the owner has a daughter, he adopts him through a marriage with that daughter, and the family which springs from this union is counted as descended from him. But house-born slaves are usually preferred, as these have never had any home but their master's house, are considered members of his family, and are generally the most faithful of his adherents.

(6) **Among the Romans.** This practice of slave adoption was very common among the Romans, and, as such, is more than once referred to by St. Paul (Rom. viii:15; Gal. iv:5); the transition from the condition of a slave to that of a son, and the privilege of applying the tender name of 'Father' to the former 'Master,' affording a beautiful illustration of the change which takes place from the bondage of the law to the freedom and privileges of the Christian state.

As in most cases the adopted son was to be considered dead to the family from which he sprung, the separation of natural ties and connections was avoided by this preference of slaves, who were mostly foreigners or of foreign descent.

(7) **The Chinese.** For the same reason the Chinese make their adoptions from children in the hospitals, who have been abandoned by their parents.

(8) **The Tartars.** The Tartars are the only people we know who prefer to adopt their near relatives—nephews or cousins, or, failing them, a Tartar of their own banner.

(9) **Biblical Example.** The only Scriptural example of this kind is that in which Jacob adopted his own grandsons, Ephraim and Manasseh, to be counted as his sons. Some have questioned whether this was really an act of adoption, but it seems to us that there is no way in which an act of adoption could be more clearly expressed. Jacob says to Joseph, their father—'Thy two sons, Ephraim and Manasseh, shall be mine; * * * as *Reuben and Simeon* (his two eldest sons), *they shall be mine*. But thy issue which thou begettest after them shall be thine' (Gen. xlviii:6).

(10) **Result.** The object of this remarkable adoption was, that whereas Joseph himself could only have one share of his father's heritage along with his brothers, the adoption of his two sons enabled Jacob, through them, to bestow two portions upon his favorite son. One remarkable effect of this adoption was that the sons of Jacob, and the tribes which sprang from them, thus became thirteen instead of twelve; but the ultimate exclusion of Levi from a share of territory rectified this so far as regarded the distribution of lands in Canaan.

(11) **Moses.** The adoption of Moses by Pharaoh's daughter (Exod. ii:1-10) is an incident rather than a practice, but it recalls what has just been stated respecting the adoption of outcast children by the Chinese.

A man who had only a daughter would naturally wish to build up a family, to be counted as his own, through her. We have seen that, under such circumstances, the daughter is often married to a freed slave, and the children counted as those of the woman's father, or the husband

himself is adopted as a son. An instance of the former kind occurs in 1 Chron. ii:34, *sq.* Sheshan, of the tribe of Judah, gives his daughter to Jarha, an Egyptian slave (whom, as the Targum pre-mises, he no doubt liberated on that occasion); the posterity of the marriage are not, however, reckoned to Jarha, the husband of the woman, but to her father, Sheshan, and as *his* descendants they take their heritage and station in Israel. The same chapter gives another instance (1 Chron. ii:21; Num. xxvii:1):

(12) **Machir.** Machir (grandson of Joseph) gives his daughter in marriage to Hezron, of the tribe of Judah. She gave birth to Segub, who was the father of Jair. This Jair possessed twenty-three cities in the land of Gilead, which came to him in right of his grandmother, the daughter of Machir, and he acquired other towns in the same quarter, which made up his possessions to threescore towns or villages (1 Chron. ii:21-24; Josh. xiii:30; 1 Kings iv:13). Now this Jair, though of the tribe of Judah by his grandfather, is, in Num. xxxii:41, counted as of Manasseh, for the obvious reason which the comparison of these texts suggests, that, through his grandmother, he inherited the property, and was the lineal representative of Machir, the son of Manasseh.

(13) **Genealogy.** This case is of some importance from the ground which it offers for the opinion of those who account for the difference between the pedigree of Christ as given by Matthew, and that in Luke, by supposing that the former is the pedigree through Joseph, his supposed father, and the latter through his mother Mary. This opinion, which will be examined in another place (see GENEALOGY), supposes that Mary was the daughter of Heli, and that Joseph is called his son (Luke iii:23), because he was adopted by Heli when he married his daughter, who was an heiress, as is proved by the fact of her going to Bethlehem to be registered when in the last stage of pregnancy.

(14) **Theological.** In John viii:36, 'If the Son shall make you free, ye shall be free indeed,' is supposed by Grotius and other commentators to refer to a custom in some of the cities of Greece, and elsewhere, called *ἀδελφοθεσία*, *a-del-pho-the-si'a*, whereby the son and heir was permitted to adopt brothers and admit them to the same rights which he himself enjoyed. But it seems more likely that the reference was to the more familiar Roman custom, by which the son, after his father's death, often made free such as were born slaves in his house.

In Gal. iv:5, 6, there is a very clear allusion to the privilege of adopted slaves to address their former master by the endearing title of *Abba*, or Father. Slaves were not allowed to use this word in addressing the master of the family to which they belonged, nor the corresponding title of *Mama*, mother, when speaking to the mistress of it. But this *adoption* believers have received; and the evidences of it consist in the indwelling of the Holy Ghost testifying that they are God's children, enabling them to say "Abba, Father," and as children to keep their father's commandments, and abound in supplication (Rom. viii:15-17; Jer. iii:19; John i:12).

ADORA (a-dō'ra) or ADOR. See ADORAIM.

ADORAIM (ăd-o-rā'im), (Heb. אֲדֹרַיִם, *ad-o-rah'-yim*, two mounds, or dwellings), a town in the south of Judah, enumerated along with Hebron and Mareshah, as one of the cities fortified by Rehoboam (2 Chron. xi:9). Under the name of Adora

it is mentioned in the Apocrypha (1 Macc. xiii:20, and also often by Josephus, *Antiq.* viii:10, 1; xiii:6, 4, 15, 4; *Bell. Jud.* i:2, 6, 8, 4), who usually connects Adora with Maressa, as cities of the later Idumæa. It was captured by Hyrcanus at the same time with Maressa, and rebuilt by Gabinius (Joseph. *Antiq.* xiii:9, 1; xiv:5, 3). This town does not occur in any writer after Josephus, until the recent researches of Dr. Robinson, who discovered it under the name of Dura, the first feeble letter having been dropped. It is situated five miles W. by S. from Hebron, and is a large village, seated on the eastern slope of a cultivated hill, with olive groves and fields of grain all around. There are no ruins (Robinson's *Bib. Researches*, iii:2-5).

ADORAM (a-dō'ram), (Heb. אֲדֹרָם, *ad-o-rawm'*), an officer of the customs under David (2 Sam. xx:24; 1 Kings xii:18), elsewhere called Adoniram. (See ADONIRAM; HADORAM.)

ADORATION (ăd-o-rā'shūn). This word is compounded of *ad*, "to," and *os, oris*, "the mouth," and literally signifies to apply the hand to the mouth, that is, "to kiss the hand."

(1) **Act of Worship.** The act is described in Scripture as one of worship. Job says: 'If I had beheld the sun when it shined, or the moon walking in brightness; and my heart had been secretly enticed, or my mouth had kissed my hand; this also were an iniquity to be punished by the judge' (Job xxxi:26, 27). And this very clearly intimates that kissing the hand was considered an overt act of worship in the East.

(2) **Reverence for Royalty.** The same act was used as a mark of respect in the presence of kings and persons high in office or station. Or rather, perhaps, the hand was not merely kissed and then withdrawn from the mouth, but held continuously before or upon the mouth, to which allusion is made in such texts as Judg. xviii:19; Job xxi:5; xxix:9; xl:4; Ps. xxxix:9; in which 'laying the hand upon the mouth' is used to describe the highest degree of reverence and submission; as such, this posture is exhibited on the monuments of Persia and of Egypt. In one of the sculptures at Persepolis a king is seated on his throne, and before him a person standing in a bent posture, with his hand laid upon his mouth as he addresses the sovereign. Exactly the same attitude is observed in the sculptures at Thebes, where one person, among several (in various postures of respect) who appear before the scribes to be registered, has his hand placed thus submissively upon his mouth. Prayer is most commonly commenced with the act of *adoration* (Ps. civ:1-6; cii:25, 27; Jer. xxxii:16-19).

ADORN (ă-dōrn'), (Gr. κοσμέω, *kos-meh'o*, to ornament), to deck; to make beautiful (1 Tim. ii:9), followed by participle designating the act by which the honor is gained (Tit. ii:10; 1 Pet. iii:5).

Figurative. (1) By a holy conversation we *adorn* the doctrine of God; thus practically showing to the world the purity, power, glory, and excellence of his truths, laws, promises, threatenings (Tit. ii:10). (2) The church is *adorned* when her ordinances are pure and efficacious; her officers faithful and zealous; her members clothed with the imputed righteousness of Christ, and his sanctifying grace. (Is. lxi:10; Rev. xxi:2.)

ADRA (ă'dra). See ARAD.

ADRAMMELECH (a-drām'me-lĕk), (Heb. אֲדַרְמֵלֶךְ, *ad-ram-meh'lek*, splendor of the king, *i. e.*, of Moloch).

(1) **An Idol.** 1. He is mentioned, together with Anammelech, in 2 Kings xvii:31, as one of the idols whose worship the inhabitants of Sepharvaim established in Samaria, when they were transferred thither by the king of Assyria, and whom they worshiped by the sacrifice of their children by fire. This constitutes the whole of our certain knowledge of this idol. As to the figure under which this idol was worshiped, the Babylonian Talmud (cited at length in Carpzov's *Apparatus*, p. 516) asserts that he was adored under that of a *mule*; whereas Kimchi says it was under that of a *peacock*; statements upon which little reliance can be placed. There is greater unanimity in the opinion that the power adored under this name was one of the heavenly bodies, in general accordance with the astrological character of the Assyrian idolatry (Gesenius, *Jesaia*, iii:327 seq.).

(2) **Identified with Moloch.** Selden (*De Diis Syris* i:6) and others have identified him with Moloch, chiefly on the ground that the sacrifice of children by fire, and the general signification of the name, are the same in both. According, then, to the great difference of opinion concerning Moloch, authorities of nearly equal weight may be adduced for the opinion that Adrammelech represents the planet *Saturn*, or the *Sun*; the kind of sacrifice being the chief argument in favor of the former; the etymology of the name being that in favor of the latter. (See **MOLOCH**.)

(3) **A son of Sennacherib, king of Assyria.** The king was dwelling at Nineveh after his disastrous expedition against Hezekiah. While worshipping in the house of Nisroch, his god, Sennacherib was murdered by Adrammelech and his brother Shareza, B. C. 681. After the murder the two brothers fled into Armenia (2 Kings xix:36, 37; Is. xxxvii:38).

ADRAMYTTIUM (ăd'ra-myt'ti-ŭm), (Gr. Ἀδραμύττιον, *ad-ram-ool'ti-on*), a seaport town in the province of Mysia in Asia Minor, opposite the isle of Lesbos, and an Athenian colony (Strabo, xiii, p. 606; Herod. vii:42). It is mentioned in Scripture only (Acts xxvii:2) from the fact that the ship in which Paul embarked at Cæsarea as a prisoner on his way to Italy belonged to Adramyttium. It was rare to find a vessel going direct from Palestine to Italy. The usual course therefore was to embark in some ship bound to one of the ports of Asia Minor, and there go on board a vessel sailing for Italy. This was the course taken by the centurion who had charge of Paul. The ship of Adramyttium took them to Myra in Lycia, and here they embarked in an Alexandrian vessel bound for Italy. Some commentators (Hammond, Grotius, Witsius, etc.) strangely suppose that *Adrametum* in Africa (Plin. v:3; Ptol. iv:3) was the port to which the ship belonged.

It suffered greatly during the Mithridatic wars, and rather declined in importance; but even as late as the third century, under Caracalla, it still ranked sufficiently high to strike alliance coins with Ephesus (implying certain reciprocal rights in respect of religious festivals and games).

Adramyttium is still called '*Adramyt*.' It is built on a hill, contains about 1,000 houses, and is still a place of some commerce (Turner, *Tour*. iii:265).

ADRIA (ă'dri-à), (Gr. Ἀδρια, *ad-ree'as*), an ancient city of Italy, on the Tartaro, in the state of Venice. It gave name to the Adriatic sea, or the sea of Adria (Acts xxvii:27).

It appears from the narrative of Paul's voyage just referred to, that, although the name of Adria

belonged in a proper sense only to the sea within the Adriatic gulf, it was given in a looser manner to a larger extent, including the Sicilian and Ionian sea. Thus also Ptolemy says (lib. iii, cap. 4), that Sicily was bounded east by the Adriatic, and (cap. 16) that Crete was washed on the west by the Adriatic sea; and Strabo says (lib. vii) that the Ionian gulf is a part of that which in his time was called the Adriatic sea. (See **ADRIATIC SEA**.)

ADRIAN (ă'dri-an), the fifteenth emperor of Rome. This prince is not mentioned in the New Testament, but some interpreters are of opinion that he is alluded to in Rev. viii:10, 11, where Barchochebas, the famous Jewish impostor, is thought to be foretold, but without sufficiently good grounds. The Jews having created several disturbances in the reign of Trajan, Adrian sent a colony to Jerusalem, for the purpose of keeping them in subjection, and also built within the walls of the city a temple to Jupiter.

(1) **Jewish Mutiny.** Not enduring that a strange colony should occupy their city, and introduce a foreign religion, the Jews began to mutiny, about A. D. 134, and Barchochebas, who about the same time made his appearance under the assumed character of the Messias, animated them in their rebellion against the Romans. The presence of Adrian, who was at this time in Syria or Egypt, restrained in some measure their proceedings, but after his return to Rome, they fortified several places, and prepared for a vigorous resistance. Their proceedings, and the great increase in the numbers of the seditious, induced Adrian to send Tinnius Rufus into Judea.

(2) **Defeat.** The Roman generals marched against them, and a dreadful slaughter ensued. The Jews fought desperately, and Rufus having been defeated in several conflicts, Adrian sent to his assistance Julius Severus, one of the greatest generals of his age. Severus besieged Bether, or Betheron, where the Jews had entrenched themselves, which he at length took, and put many to the sword. Others were sold as cattle, at the fairs of Mamre and Gaza; and the rest were sent into Egypt, being forbidden, under a severe penalty, to return to their own city. Jerome (in Zech. xi:7) applies to this calamity of the Jews the words of Zechariah: "I will feed the flock of slaughter." And the Hebrew doctors apply Jer. xxxi:15: "A voice was heard in Ramah, lamentation and bitter weeping; Rachel weeping for her children," etc. The Jews purchased with a sum of money the liberty, not of entering Jerusalem, but only of looking from a distance on it, and going to lament its fall and desolation. This may have been included in Christ's prophecy (Matt. xxiv).

(3) **Length of the War.** The number of Roman soldiers and auxiliary troops that perished in the course of this war, which lasted, as Jerome and the Rabbins say, three years and a half (Jeronym. in Dan. ix; Basnage Hist. des Juifs, tom. ii, page 133), or, as others suppose, only two years, was very great. Dio remarks, that the emperor, in writing of the termination of the war to the senate, did not use the common form in the beginning of his letters, "If you and your children are in good health, I am glad of it; I and the army are in good condition;" in consequence of the great losses he had sustained. (Dio, lib. 69, page 794.)

After this revolt, Adrian finished the building of Jerusalem, and changed its name to **ELIA**, which see.

ADRIATIC SEA (a'drī-āt'ik sē), (Gr. 'Αδρίας, *ad-ree'as*, Acts xxvii:27). This name is now confined to the gulf lying between Italy on one side, and the coasts of Dalmatia and Albania on the other. But in St. Paul's time it extended to all that part of the Mediterranean between Crete and Sicily. Thus Ptolemy (iii:16) says that Sicily was bounded on the east by the Adriatic, and that Crete was bounded by the Adriatic on the west; and Strabo (ii, p. 185; vii, p. 488) says that the Ionian gulf was a part of what was in his time called the Adriatic Sea. This fact is of importance, as relieving us from the necessity of finding the island of Melita on which Paul was shipwrecked in the *present* Adriatic gulf; and consequently removing the chief difficulty in the way of the identification of that island with the present Malta.

ADRIEL (ā'dri-el), (Heb. אֲדִרְיֵל, *ad-ree-ale'*, the flock of God), the person to whom Saul gave in marriage his daughter Merab, who had been originally promised to David (1 Sam. xviii:19). Five sons sprang from this union, who were taken to make up the number of Saul's descendants, whose lives, on the principle of blood-revenge, were required by the Gibeonites to avenge the cruelties which Saul had exercised towards their race. (See GIBEONITES.) In 2 Sam. xxi:8, the name of *Michal* occurs as the mother of these sons of Adriel; but as it is known that Merab, and not Michal, was the wife of Adriel, and that Michal never had any children (2 Sam. vi:23), there only remains the alternative of supposing either that Michal's name has been substituted for Merab's by some ancient copyist, or that the word which properly means *bare* (which Michal *bare* unto Adriel), should be rendered *brought up* or educated (which Michal *brought up* for Adriel).

ADULLAM (a-dūl'lam), (Heb. אֲדֻלָּם, *ad-ool-lawm'*), an old city (Gen. xxxviii:1, 12, 20) in the plain country of the tribe of Judah (Josh. xv:35), and one of the royal cities of the Canaanites (Josh. xii:15).

(1) **Fortified Town.** It was one of the towns which Rehoboam fortified (2 Chron. xi:7; Micah i:15), and is mentioned after the captivity (Neh. xl:30; 2 Macc. xii:38). Eusebius and Jerome state that it existed in their time as a large village, ten miles to the east of Eleuthropolis; but they follow the Sept. in confounding it with Eglon. However, it is certain that these were different places, and had distinct kings in the time of Joshua (xii:12, 15). It is evident that Adullam was one of the cities of 'the valley,' or plain between the hill country of Judah and the sea; and from its place in the lists of names (especially 2 Chron. xi:7), it appears not to have been far from the Philistine city of Gath.

(2) **Cave of Adullam.** This circumstance would suggest that the 'cave of Adullam' (1 Sam. xxii:1), to which David withdrew immediately from Gath, was near the city of that name. But there is no passage of Scripture which connects the city and the cave, and it is certainly not in a plain that one would look for a cave capable of affording a secure retreat to 400 men; nor has any such cave been found in that quarter.

(3) **Mountainous Region.** It is therefore far from improbable that the cave of Adullam was in the mountainous wilderness in the west of Judah towards the Dead Sea, where such caves occur, and where the western names (as Carmel) are sometimes repeated. This conjecture is favored by the fact that the usual haunts of David were in this quarter;

whence he moved into the land of Moab, which was quite contiguous, whereas he must have crossed the whole breadth of the land, if the cave of Adullam had been near the city of that name.

(4) **Probable Location.** Other reasons occur which would take too much room to state; but the result is, that there appears at length good grounds for the local tradition which fixes the cave on the borders of the Dead Sea, although there is no certainty with regard to the particular cave usually pointed out. The cave so designated is at a point to which David was far more likely to summon his parents, whom he intended to take from Bethlehem into Moab, than to any place in the western plains. It is about six miles southwest of Bethlehem, in the side of a deep ravine (Wady Khureitun) which passes below the Frank mountain (see HERODION) on the south. It is an immense natural cavern, the mouth of which can be approached only on foot along the side of the cliff.

It seems probable that David, as a native of Bethlehem, must have been well acquainted with this remarkable spot, and had probably often availed himself of its shelter when out with his father's flocks. It would therefore naturally occur to him as a place of refuge when he fled from Gath; and his purpose of forming a band of followers was much more likely to be realized here, in the neighborhood of his native place, than in the westward plain, where the city of Adullam lay.

As supporting the opposite view, W. Muir, in Hastings' *Bib. Dict.*, says: "The Cave of Adullam, famous through its association with the early history of David, has usually been supposed to have had no connection with the city of that name, and has been located by tradition, as well as by many travelers, in the Wady Khareitun, about six miles southeast of Bethlehem. The most recent authorities, however, are strongly of opinion that an entirely suitable site for it can be found in the vicinity of the city, and that there is no reason for separating the two. Half-way between Shochoh and Keilah, and ten miles northwest of Hebron, some caves have been found, the position of which suits all we are told about David's stronghold, and which are at once central and defensible. It may be regarded as practically settled that the Cave of Adullam was not far from where David had his encounter with Goliath."

ADULTERY (ā-dūl'tēr-y).

(1) **Defined.** In the common acceptance of the word adultery denotes the sexual intercourse of a married woman with any other man than her husband, or of a married man with any other woman than his wife.

(2) **Jewish.** But the crime is not understood in this extent among Eastern nations, nor was it so understood by the Jews. With them, adultery was the act whereby any married man was exposed to the risk of having a spurious offspring imposed upon him. An adulterer was, therefore, any man who had illicit intercourse with a married or betrothed woman; and an adulteress was a betrothed or married woman who had intercourse with any other man than her husband.

(3) **Fornication.** An intercourse between a married man and an unmarried woman was not, as with us, deemed adultery, but fornication—a great sin, but not, like adultery, involving the contingency of polluting a descent, of turning aside an inheritance, or of imposing upon a man a charge which did not belong to him. Adultery was thus considered a great social wrong, against which society pro-

tected itself by much severer penalties than attended an unchaste act not involving the same contingencies.

(4) **Polygamy.** It will be seen that this Oriental limitation of adultery is intimately connected with the existence of polygamy. If adultery be defined as a breach of the marriage covenant, then, where the contract is between one man and one woman, as in Christian countries, the man as much as the woman infringes the covenant, or commits adultery, by every act of intercourse with any other woman; but where polygamy is allowed—where the husband may marry other wives, and take to himself concubines and slaves, the marriage contract cannot and does not convey to the woman a legal title that the man should belong to her alone. If, therefore, a Jew associated with a woman who was not his wife, his concubine, or his slave, he was guilty of unchastity, but committed no offense which gave a wife reason to complain that her legal rights had been infringed. If, however, the woman with whom he associated was the wife of another, he was guilty of adultery—not by infringing his own marriage covenant, but by causing a breach of that which existed between that woman and her husband (Michaelis, *Mosäisches Recht*. art. 259; Jahn's *Archäologie*, th. i. b. 2, sec. 183).

(5) **Punishment.** By thus excluding from the name and punishment of adultery the offense which did not involve the enormous wrong of imposing upon a man a supposititious offspring, in a nation where the succession to landed property went entirely by birth, so that a father could not by his testament alienate it from anyone who was regarded as his son—the law was enabled, with less severity than if the inferior offense had been included, to punish the crime with death. It is still so punished wherever the practice of polygamy has similarly operated in limiting the crime—not, perhaps that the law expressly assigns that punishment, but it recognizes the right of the injured party to inflict it, and, in fact, leaves it, in a great degree, in his hands. Now death was the punishment of adultery before the time of Moses; and if he had assigned a less punishment, his law would have been inoperative, for private vengeance, sanctioned by usage, would still have inflicted death. But by adopting it into the law, those restrictions were imposed upon its operation which necessarily arise when the calm inquiry of public justice is substituted for the impulsive action of excited hands. Thus, death would be less frequently inflicted; and that this effect followed seems to be implied in the fact that the whole biblical history offers no example of capital punishment for the crime.

In the law which assigns the punishment of death to adultery (Lev. xx:10), the mode in which that punishment should be inflicted is not specified, because it was known from custom. It was not, however, *strangulation*, as the Talmudists contend, but *stoning*, as we may learn from various passages of Scripture (e. g. Ezek. xvi:38-40; John viii:5); and as, in fact, Moses himself testifies (Deut. xxii:22-24). If the adulteress was a slave, the guilty parties were both scourged with a leathern whip, the number of blows not exceeding forty. In this instance the adulterer, in addition to the scourging, was subject to the further penalty of bringing a trespass offering (a ram) to the door of the tabernacle, to be offered in his behalf by the priest (Lev. xix:20-22).

(6) **Teaching of Christ.** In Matt. v:32, Christ seems to assume that the practice of divorce for adultery already existed. In later times, it certainly did; and Jews who were averse to parting

with their adulterous wives were compelled to put them away (Maimon. in *Gerushin*, c:2). In the passage just referred to, our Lord does not appear to render divorce compulsory, even in case of adultery; he only permits it in that case alone, by forbidding it in every other.

(7) **Roman Law.** It seems that the Roman law made the same important distinction with the Hebrew, between the infidelity of the husband and of the wife. 'Adultery' was defined by the civilians to be the violation of another man's bed so that the infidelity of the husband could not constitute the offense. The more ancient laws of Rome, which were very severe against the offense of the wife, were silent as to that of the husband. The offense was not capital until made so by Constantine, in imitation of the Jewish law; but under Leo and Marcian the penalty was abated to perpetual imprisonment, or cutting off the nose; and, under Justinian, the further mitigation was granted to the woman, that she was only to be scourged, to lose her dower, and to be shut up in a convent.

The punishment of cutting off the nose brings to mind the passage in which the prophet Ezekiel (xxiii:25), after, in the name of the Lord, reproving Israel and Judah for their adulteries (i. e., idolatries) with the Assyrians and Chaldeans, threatens the punishment—'they shall take away thy nose and thy ears,' which Jerome states was actually the punishment of adultery in those nations. One or both of these mutilations, most generally that of the nose, were also inflicted by other nations, as the Persians and Egyptians, and even the Romans; but we suspect that among the former, as with the latter, it was less a judicial punishment than a summary infliction by the aggrieved party.

It would also seem that these mutilations were more usually inflicted on the male than the female adulterer. In Egypt, however, cutting off the nose was the female punishment, and the man was beaten terribly with rods (Diod. Sic. i:89, 90). The respect with which the conjugal union was treated in that country in the earliest times is manifested in the history of Abraham (Gen. xii:19). (See MARRIAGE.)

Symbolical. Adultery, in the symbolical language of the Old Testament, means idolatry and apostasy from the worship of the true God (Jer. iii:8, 9; Ezek. xvi:32; xxiii:37; also Rev. ii:22). Hence an *Adulteress* meant an apostate church or city, particularly 'the daughter of Jerusalem,' or the Jewish church and people (Is. i:21; Jer. iii:6, 8, 9; Ezek. xvi:22; xxiii:7). This figure resulted from the primary one, which describes the connection between God and his separated people as a marriage between him and them. By an application of the same figure, 'An adulterous generation' (Matt. xii:39; xvi:4; Mark viii:38) means a faithless and impious generation.

ADULTERY, TRIAL OF (á'dŭl'tēr-ŷ, trī'al ōv).

(1) **Water of Jealousy.** It would be unjust to the spirit of the Mosaic legislation to suppose that the trial of the suspected wife by the bitter water, called the *Water of Jealousy*, was by it first produced. It is to be regarded as an attempt to mitigate the evils of, and to bring under legal control, an old custom which could not be entirely abrogated. The original usage, which it was designed to mitigate, was probably of the kind which we still find in Western Africa; and a comparison of the two may suggest the real points of the evil which the law of Moses was designed to rectify, and the real advantages which it was calculated to secure. The matter deserves particular at-

tention, inasmuch as it relates to the only ordeal in use among the Israelites, or sanctioned by their law.

(2) **Trial by Red Water.** The illustrative details of the *Trial by Red Water*, as it is called, vary among different nations, in minute particulars, which it would be tiresome to distinguish. The substantial facts may be embodied in one statement:

(3) **Differences.** The ordeal is, in some tribes, confined to the case of adultery, but in others it is used in all cases. *Differences*, rather than resemblances, must indicate the particular points in which the Mosaic law, while retaining the form, abandoned the substance and obviated the evils of this institution. The differences are, in fact, all-important. In Africa the drink is poisonous, and calculated to produce the effects which the oath imprecates; whereas, the 'water of jealousy,' however unpleasant, was prepared in a prescribed manner, with ingredients known to all to be perfectly innocuous. It could not therefore injure the innocent; and its action upon the guilty must have resulted from the consciousness of having committed a horrible perjury, which crime, when the oath was so solemnly confirmed by the draught, and attended by such awful imprecations, was believed to be visitable with immediate death from heaven. It cannot be too strongly inculcated, that in the African examples the effect is not ascribed to the drink, but to a supernatural visitation upon a perjury which the confirmation of the 'oath-drink' renders so awful.

(4) **Oath-Drink.** This name of 'oath-drink' is commonly applied to it on the Gold Coast. And it was, doubtless, to strengthen such an impression that this awful drink, so much dreaded in Africa, was with the Jews exclusively appropriated to the only ordeal trial among them.

(5) **Result.** The result of these views and illustrations will be, that the trial for suspected adultery by the bitter water amounted to this—that a woman suspected of adultery by her husband was allowed to repel the charge by a public oath of purgation, which oath was designedly made so solemn in itself, and was attended by such awful circumstances, that it was in the highest degree unlikely that it would be dared by any woman not supported by the consciousness of innocence. And the fact that no instance of the actual application of the ordeal occurs in Scripture, affords some countenance to the assertion of the Jewish writers—that the trial was so much dreaded by the women, that those who were really guilty generally avoided it by confession; and that thus the trial itself early fell into disuse. And if, as we have supposed, this mode of trial was only *tolerated* by Moses, the ultimate neglect of it must have been desired and intended by him. In later times, indeed, it was disputed in the Jewish schools, whether the husband was bound to prosecute his wife to this extremity, or whether it was not lawful for him to connive at and pardon her act, if he were so inclined. There were some who held that he was bound by his duty to prosecute while others maintained that it was left to his pleasure (*T. Hieros. tit. Sotah, fol. 16, 2*).

(6) **Abrogated.** From the same source we learn that this form of trial was finally abrogated about forty years before the destruction of Jerusalem. The reason assigned is, that the men themselves were at that time generally adulterous; and that God would not fulfil the imprecations of the ordeal oath upon the wife while the husband was guilty of the same crime (*John viii:1-8*).

ADUMMIM (a-düm'mim), (Heb. אֲדֻמִּים, *ad-oom-meem'*), a place which is only twice named in Scripture. Once (*Josh. xv:7*), where, from the context, it seems to indicate the border between Judah and Benjamin, and that it was an ascending road between Gilgal (and also Jericho) and Jerusalem. The second notice (*Josh. xviii:17*) adds no further information, but repeats '*the ascent to Adummim.*' Most commentators take the name to mean *the place of blood*, and follow Jerome, who finds the place in the dangerous or mountainous part of the road between Jerusalem and Jericho, and supposes that it was so called from the frequent effusion of blood by the robbers, by whom it was much infested. These are curious interpretations of the original word, which merely denotes the redness of the soil or rock. It does not appear that any traveler mentions the geological aspect of the spot, and therefore this must be regarded only as a probable conjecture. However, as a difficult pass in a desolate rocky region, between important cities, the part of the road indicated by Jerome, and all after him, was as likely to be infested by robbers in earlier times as in those of Jerome and at the present day. Indeed, the character of the road was so notorious that Christ lays the scene of the parable of the good Samaritan (*Luke x:30*) upon it; and Jerome informs us that Adummim or Adommim was believed to be the place where the traveler (taken as a real person) 'fell among thieves.' He adds that a fort and garrison was maintained here for the safeguard of travelers.

The travelers of the present century mention the spot and neighborhood nearly in the same terms as those of older date, and describe the ruins as those of '*a convent and a khan*' (*Hardy, 193*). They all represent the road as still infested by robbers, from whom some of them have not escaped without danger. The place thus indicated is about eight miles from Jerusalem and four from Jericho.

ADVANTAGE (äd-vän'täj). The word has no connection with the Lat. prep. *ad*, but comes from *avant*, before. It denotes *superiority* and not *profit* (*Rom. iii:1; 2 Cor. ii:1; see also 2 Cor. vii:2; xii:17, 18*). In *Job xxxv:3; Jude v:16*, it means *profit*.

ADVENT, SECOND (äd'vent, sĕk'ünd). See MILLENNIUM.

ADVENTISTS (SEVENTH-DAY).

Strictly speaking, the denomination of Seventh-Day Adventists originated in 1845. A large number who at that time, or shortly afterward, became Seventh-Day Adventists were formerly Adventists. They had been actively connected with the great Advent movement of 1840-44. The disappointment which they had suffered in the passing of the time at which they had expected the Lord to come in 1844 was caused by the almost universally accepted theory that the earth was the Sanctuary which was to be cleansed at the end of the prophetic periods of the Book of Daniel, which had been the basis of their calculations. When they had given to the subject a more careful study they found that the sanctuary which was to be cleansed at the end of the prophetic days was "the sanctuary and the true tabernacle" "in heaven," "which the Lord pitched," and of which the sanctuary built by Israel in the Wilderness was but a figure (*Heb. viii:1; ix:11, 23, 24; Rev. xi:19*).

(1) **Ten Commandments.** The study of this subject led them irresistibly to the contempla-

tion of the Ten Commandments, which, "written with the finger of God," were deposited "in the ark of the testament" in both the figure and the true. In this study they were very strongly impressed with the conviction that the fourth commandment of the ten requires the observance of the seventh day, or Saturday, as the Sabbath; and not the first day, or Sunday, as was, and is, the teaching of the churches.

In their proclamation of the soon coming of the Lord in 1840-44, the two messages of Revelation, xiv:6-8, "Fear God and give glory to Him, for the hour of His judgment is come," and "Babylon is fallen," had been the keynotes. And now, as they reviewed their positions and more carefully studied the Scriptures they saw that there is a third message following these two, and belonging inseparably with them, being indeed the essential complement of the former two. And in this third angel's message they also read the remarkable words, "Here are they which keep the commandments of God and the faith of Jesus." Having, in the study of the sanctuary, their attention already directed to the commandments, and their minds so strongly convinced that they were not keeping the fourth commandment, this voice of the third angel, calling upon all to "keep the commandments of God," as well as the faith of Jesus, was to them the irresistible voice of God. They could not hesitate; they at once planted themselves firmly upon the Word in the keeping of all the commandments of God and also the faith of Jesus. From that day forward their motto has ever been the word of the third angel of Revelation xiv:12, "Here are they which keep the commandments of God and the faith of Jesus."

Upon this leading and experience, the positive and clearly defined object, the well-understood purpose of existence, of the Seventh-Day Adventists, has ever been to proclaim to every nation and kindred and tongue and people upon the earth, the threefold message of God, as written in Revelation xiv:6-12.

The chief subject of this proclamation as there recorded is, in a word, "the everlasting gospel," emphasized by the fact that "the hour of his judgment is come." With this law of God, the Ten Commandments is unavoidably interwoven; because that law is the standard in the judgment. All who in that day are found justified by the Gospel—the faith of Jesus—their justification will be witnessed by the law; and all who in that day are not found justified by the Gospel will be irrevocably condemned by the law. Men are justified by the Gospel and judged by the law.

(2) **Everlasting Gospel.** This everlasting Gospel which we preach is the whole Gospel for the whole man. It is a Gospel of the salvation of the whole man, "body, soul and spirit." The body is as certainly a part of the man as is the soul or spirit. Jesus Christ died for the whole man. He redeems the body as well as the soul. This requires that the Christian shall care for his body as well as for his soul.

Accordingly, in this Gospel, health of body is a Christian grace, and the recovery and the preservation of health is a Christian virtue, as it is written, "I wish above all things that thou mayest prosper and be in health, even as thy soul prospereth (3 John 2).

Purity of body, as well as of spirit, is also an essential element of this Gospel, because it is written, "Having these promises, dearly beloved, let us cleanse ourselves from all filthiness of the flesh and of the spirit, perfecting holiness in the

fear of God" (2 Cor. vii:1). Consequently, tobacco in any form, or any kindred thing, can have no place.

Perfect temperance is likewise an essential of this everlasting gospel; for when the great apostle was heard "concerning the faith in Christ," he reasoned of "temperance" as well as of "righteousness" and of "judgment to come" (Acts xxiv:24, 25). Wherefore, neither stimulant nor narcotic of any sort can be used by the believer in this everlasting Gospel. Temperance is self-control. Perfect temperance is perfect self-control. The everlasting Gospel aims at nothing short of perfection in all things in Christ Jesus. Therefore, in the total rejection of every kind of stimulant or narcotic, as to the body, and absolute surrender to the Spirit of God, as to the soul, thus being cleansed from all filthiness of the flesh and of the spirit, the believer goes on "perfecting holiness in the fear of God," prospering and being in health even as his soul prospers; is sanctified wholly, body, soul and spirit, and so is preserved blameless unto the coming of the Lord (1 Thess. v:23).

So much in brief for the *principles* of the Seventh-Day Adventists.

"How far have these principles been found realizable?" To a considerable extent, indeed; though not yet to the extent that our profession justly demands.

(a) As for the realizing of our principles of temperance, purity and health, and righteousness and holiness, much progress has been made; as we believe every one will agree who understands that in a membership of above fifty thousand, gathered from many nationalities and every condition of life, even to the lowest enslaved, wrecked and abandoned victim of tobacco, strong drink, opium or morphine, it is almost impossible to find one who uses tobacco, very few who use even tea or coffee, and absolutely none who use anything stronger than tea or coffee.

(b) As for the realizing of the original and ultimate purpose of our existence as a separate denomination, that is, the proclaiming of the message of God to every nation, kindred, tongue, and people, considerable progress has been made in this also. We have organized conferences in twenty-eight states of the Union, with churches in all the other states and in the territories; also in New Zealand, Australia, South Africa, Switzerland, Germany, Denmark, Norway, England, Quebec, and Ontario; churches in Manitoba, Hawaiian Islands, India, Russia, Turkey, Holland, British Guiana, Brazil, Argentina, Chili, in the islands of Trinidad, Jamaica, Ruatan, Pitcairn, Tahiti, Norfolk Islands; and missions in Fiji, Cook Islands, Tonga, Society Islands, China, India, Matabeleland, and Gold Coast. We have educational institutions—academies or colleges—in Massachusetts, Ohio, Tennessee, Michigan, Nebraska, Texas, California, Washington, New South Wales, Cape Colony, Germany, and Denmark; and schools in Hawaiian Islands, Japan, Switzerland, Sweden, and Brazil. We have health institutions in Michigan, Illinois, Nebraska, Colorado, California, Oregon, Mexico, Hawaiian Islands, Samoa, New South Wales, Victoria, Cape Colony, India, and Switzerland. We have publishing houses in New York, Michigan, California, Australia, Cape Colony, Germany, Norway, and England; and from these are issued publications in more than forty languages.

"How far can these principles be hoped to be realized in the future?" As for the Christian life itself, the principles can be hoped to be realized

even to the absolute perfecting of the individual membership in Christ Jesus (Eph. iv:7, 14). The power of God manifested in the everlasting Gospel is able to save a man from sin, to keep him from sinning, to make him perfect in every good work to do the will of God, and to present him faultless in the presence of God with exceeding joy. This consummation we sincerely expect to see realized in thousands upon thousands of men upon the earth, who thereby shall be prepared to meet the Lord Jesus in peace when he comes in the clouds of heaven in all his glory.

And as for the proclamation of the message—completely to the earth's bounds—since already our evangelical, educational, health, and publishing institutions are all established twice clear round the earth—both north and south of the equator,—it will be easy enough for the principles to spread from these to the earth's bounds, when all who are connected with all the institutions shall be baptized with the Holy Ghost as at Pentecost, for which we are constantly praying and waiting.

A. T. J.

ADVENTURE (ăd-vĕn'tūr), now obsolete as a verb. 'Which would not *adventure* to set the sole of her foot upon the ground' (Deut. xxviii:56). *Venture* has taken its place in later usage.

Yet I will *adventure*. SHAKESPEARE.

ADVERSARY (ăd'vĕr-să-rĭ), in its general meaning, is an enemy; as "The Lord will take vengeance upon his adversaries" (Nah. i:2); specifically, one who justly or unjustly sets himself in opposition to another, so Peninnah is called the adversary of Hannah (1 Sam. i:6). It is sometimes derived from Heb. צור, *tsur*, to bind; in 1 Sam. ii:10, צור, *rib*, to strive. In the New Testament the terms occur ἀντικείμενος, ὑπεναντίας, one who opposes; and ἀντίδικος, opponent in law. In Is. 1:8, the expression בער מִשְׁפָּט, *Baal mishpat*, means "he who has a judicial cause or lawsuit against me;" just as in Roman law *dominus litis* is distinguished from the procurator; i. e., from the person who represents him in court (Delitzsch. *Com.*; Barnes, *Bib. Dict.*).

This use of the word was common in the literature of the seventeenth century.

And do as *adversaries do in law*,
Strike mightily, but eat and drink as friends.
SHAKESPEARE.

Emphatically (Heb. שָׂטָן, *Satan*, the devil, is the general enemy of mankind. "Be sober, be vigilant; because your adversary the devil," etc. (1 Pet. v:8). (See ACCUSER; SATAN.)

With the most obstinate and implacable malice he sets himself to defame and dishonor God; to reproach, accuse, and harass the saints; and to ruin the souls and bodies of men.

ADVERTISE (ăd'vĕr-tĭz). In Num. xxiv:14, the word means to inform, to give notice. In Ruth iv:4, it means to disclose.

ADVICE (ăd-vis'), **ADVISE** (ăd-vĭz'), **ADVISEMENT** (ăd-vĭz'ment). In Judg. xix:30, and 2 Chron. xxv:17, to take advice means to consult with oneself and give an opinion.

Advise, in the sense of deliberating with oneself, is found twice in 2 Sam. xxiv:13, * * * now advise, and see what answer shall return to him that sent me.'

Advisement occurs in 1 Chron. xii:19 (in an obsolete sense) for *deliberation*, 'for the lords of the Philistines upon advisement sent him away.'

ADVOCATE (ăd'vo-kat), (Gr. Παράκλητος, *paraklētōs*, paraclete), one who pleads the cause of another; also one who exhorts, defends, com-

forts, pray for another. It is an appellation given to the Holy Spirit by Christ (John xiv:16; xv:26; xvi:7), and to Christ himself by an apostle (1 John ii:1; see also Rom. viii:34; Heb. vii:25). (See PARACLETUS.)

In the forensic sense, advocates or pleaders were not known to the Jews until they came under the dominion of the Romans, and were obliged to transact their law affairs after the Roman manner. Being then little conversant with the Roman laws, and with the forms of the jurists, it was necessary for them, in pleading a cause before the Roman magistrates, to obtain the assistance of a Roman lawyer or *advocate*, who was well versed in the Greek and Latin languages. In all the Roman provinces such men were found, who devoted their time and labor to the pleading of causes and the transacting of other legal business in the provincial courts. It also appears (Cic. *pro. Calio*, c. 30) that many Roman youths who had devoted themselves to forensic business used to repair to the provinces with the consuls and prætors, in order, by managing the causes of the provincials, to fit themselves for more important ones at Rome. Such an advocate was Tertullus, whom the Jews employed to accuse Paul before Felix (Acts xxiv:1); for although *Rhetor*, ῥήτωρ, the term applied to him, signifies primarily an *orator* or *speaker*, yet it also denotes a pleader or *advocate* (Kuinoel, *Comment*, and Bloomfield, *Recens. Synopt.* ad. Act. xxiv:2). (See ACCUSER; SPIRIT, HOLY.)

ADYTUM (ăd'y-tŭm), that which is inaccessible or impenetrable; and hence considered as descriptive of the Holy of Holies in the temple of Jerusalem, and of the innermost chambers, or penetralia, of other edifices accounted sacred, and of the secret places to which the priests only were admitted. It is used metaphorically by ecclesiastical writers, and employed to signify the heart and conscience of a man, and sometimes the deep, spiritual meaning of the Divine word.

ÆGYPT (æ'jĭpt). See EGYPT.

ÆLIA CAPITOLINA (ĕ'li-a căp-i-to-li'na), Jerusalem.

ÆNEAS (æ'ne-as), (Gr. Αἰνέας, *ahē-neh'as*), a paralytic of Lydda cured by Peter (Acts ix:33, 34).

ÆNON (æ'nŏn), (Gr. Αἰνών, *ahē'nohn*, springs), the name of a place near Salem, where John baptized (John iii:23); the reason given, 'because there was much water there,' would suggest that he baptized at the springs from which the place took its name. On the situation of Ænon nothing certain has been determined, although Eusebius places it eight Roman miles south of Scythopolis (Bethshan) and fifty-three northeast of Jerusalem. Dr. Barclay locates it at Wady Farah, five miles north of Jerusalem.

It is accessible by roads from all quarters, and is situated by one of the main roads from Jerusalem to Galilee, the road passing Jacob's Well (John iv:6) which our Lord may have taken to meet the Baptist in view of threatened misunderstandings and jealousies of his disciples. For a full description, see Conder's *Tent Work*, ii, pp. 57, 58.

ÆON (æ'on), (Gr. αἰών, age), a human lifetime; life itself (according to Homer, Herodotus, etc.); an unbroken age; perpetuity of time; eternity. With this signification the Hebrew and Rabbinic idea of the word עוֹלָם, *o-lawm'*, concealed, combines in the biblical and ecclesiastical writers. (See TIME; ETERNAL.)

ÆRA (æ'ra). See CHRONOLOGY.

ÆTHIOPIA (æ-thĭ-ŏ'pĭ-ă). See ETHIOPIA.

AFFINITY (af-sin'i-ty), is relationship by marriage, as distinguished from consanguinity, which is relationship by blood.

(1) **Marriages Forbidden by Mosaic Law.** Marriages between persons thus related, in various degrees, which previous usage, in different conditions of society, had allowed, were forbidden by the law of Moses. These degrees are enumerated in Lev. xviii:7 sq. The examples before the law are those of Cain and Abel, who, as the necessity of the case required, married their own sisters. Abraham married Sarah, the daughter of his father by another wife; and Jacob married the two sisters, Leah and Rachel. In the first instance, and even in the second, there was an obvious consanguinity, and only the last offered a previous relationship of affinity merely. So also, in the prohibition of the law, a consanguinity can be traced in what are usually set down as degrees of affinity merely.

(2) **Degrees of Affinity.** The degrees of real affinity interdicted are, that a man shall not (nor a woman in the corresponding relations) marry—1. his father's widow (not his own mother); 2. the daughter of his father's wife by another husband; 3. the widow of his paternal uncle; 4. nor his brother's widow if he has left children by her; but, if not, he was bound to marry her to raise up children to his deceased brother. (See LEVIRATE MARRIAGE).

(3) **Other Restrictions.** The other restrictions are connected with the condition of polygamy, and they prohibit a man from having—1. a mother and her daughter for wives at the same time; 2. or two sisters for wives at the same time. These prohibitions, although founded in Oriental notions, adapted to a particular condition of society, and connected with the peculiarities of the Levitical marriage law, have been imported wholesale into our canon law. The fitness of this is doubted by many: but as, apart from any moral questions, the prohibited marriages are such as few would, in the present condition of European society, desire to contract, and such as would be deemed repugnant to good taste and correct manners, there is little real matter of regret in this adoption of the Levitical law.

(4) **Objections.** Indeed, the objections to this adoption have rested chiefly upon one point; and that happens to be a point in which the law itself happens to have been egregiously misunderstood. This is in the injunction which, under permitted polygamy, forbade a man to have two sisters at once; an injunction which has been construed, under the Christian law, which allows but one wife, to apply equally to the case of a man marrying the sister of a deceased wife. The law itself, however, is so plain that it is difficult to conceive how its true object—concerning which nearly all commentators are agreed—could have been thus interpreted. It is rendered in our version, 'Neither shalt thou take a wife to her sister, to vex her, to uncover her nakedness, beside the other in her lifetime.' Clear as this seems, it is still clearer if, with Gesenius and others, we take the Hebrew word, rendered *to vex*, to mean *to rival*, as in the Sept., Arabic, and Vulgate. The Targum of Jonathan, the Mishna, and the celebrated Jewish commentators Jarchi and Ben Gerson, are satisfied that *two sisters at once* are intended; and there seems an obvious design to prevent the occurrence of such unseemly jealousies and contentions between sister-wives as embittered the life of Jacob—the father of the twelve tribes.

(5) **Recondite Sense.** The more recondite sense has been extracted, with rather ungentle violence

to the principles of Hebrew construction, by making 'vex her' the antecedent of 'in her lifetime,' instead of 'take her sister to her, in her lifetime.' Under this view it is explained that the married sister should not be 'vexed' in her lifetime by the prospect that her sister might succeed her. It may be safely said that such an idea would never have occurred in the East, where unmarried sisters are far more rarely than in Europe brought into such acquaintance with the husband of the married sister as to give occasion for such 'vexation' or 'rivalry' as this. Yet, this view of the matter, which is completely exploded among sound biblical critics, has received the sanction of several Christian Councils (*Concil. Illiber.* can. 61; *Aurat.* can. 17; *Auxer.* can. 30); and is perhaps not calculated to do much harm, except under peculiar circumstances, and except as it may prove a snare to some sincere but weak consciences. It may be remarked that in those codes of law which most resemble that of Moses on the general subject, no prohibition of the marriage of two sisters *in succession* can be found.

In 1 Kings iii:1, 'Solomon made affinity with Pharaoh;' 2 Chron. xviii:1, 'Jehoshaphat * * * joined affinity with Ahab;' and Ezra ix:14 'Should we * * * join in affinity with the people of these abominations?' affinity has the special sense of relationship by marriage, being distinguished from consanguinity or relationship by blood (Hastings).

AFFIRMATIVES (af-fērm'ā-tīvs). Among the Jews the formula of assent or affirmation was, *thou hast said, or, thou hast rightly said.* It is stated by Aryda and others that this is the prevailing mode in which a person expresses his assent, at this day, in Lebanon, especially when he does not wish to assert anything in express terms. This explains the answer of our Saviour to the high-priest Caiaphas (Matt. xxvi:64), when he was asked whether he was the Christ, the son of God, and replied *σὺ εἶπας* (see also Matt. xxvi:25). Instances occur in the Talmud; thus, 'A certain man was asked, "Is Rabbi dead?" He answered, "Ye have said;" on which they rent their clothes'—taking it for granted from this answer that it was so (*T. Hieros. Kilaim xxxii:2*). All readers even of translations are familiar with a frequent elegance of the Scriptures, or rather of the Hebrew language, in using an affirmative and negative together, by which the sense is rendered more emphatic; sometimes the negative first, as Ps. cxviii:17, 'I shall not die, but live,' etc.; sometimes the negative first, as Is. xxxviii:1, 'Thou shalt die, and not live.' In John i:20 there is a remarkable instance of emphasis produced by a negative being placed between two affirmatives.—'And he confessed, and denied not, but confessed, I am not the Christ.'

AFFLICTION (ăf-flīk'shūn), (generally Heb. אָפְּסָה; *on-ee'*, depressed Gr. *θλιψις*, *thlip'sis*, pressure). *Affliction* denotes all manner of distress, oppression, persecution, or anything that causes sorrow (Job v:6; Exod. iii:7; Mark iv:17). The affliction of the afflicted (Ps. xxii:24), denotes the peculiar affliction which Christ endured in his agony under the wrath of God and the fear of death (Heb. v:7). (See ABHOR.) As an instrument in the hands of God it varies in its character and results according to the character of the soul that suffers it. When laid on reprobates, it is proper *punishment* (Nah. i:9). When laid on the saints, it is fatherly *chastisement*, springing from God's love to them; it is merited by the death of Christ, secured by the new covenant, and works for their good (2 Cor. iv:17; Ps. lxxxix:

30). In consequence of its being promised as a covenant-mercy, God *afflicts* his people in faithfulness, and they know it (Ps. cxix:75).

They "fill up what is behind of the *afflictions* of Christ in their flesh, for his body's sake" (Col. i:24); that is, they are made like unto Christ in the fellowship of his sufferings.

AFRICA (ăf'ric-a). This "quarter of the world" is not mentioned as such by any general name in Scripture, although some of its regions are indicated. It is thought by some, however, that Africa, or as much of it as was then known, is denoted by 'the land of Ham' in several of the Psalms. But we are inclined to think that the context rather restricts this designation to Egypt. Whether Africa was really 'the land of Ham,' that is, was peopled by the descendants of Ham, is quite another question. (See HAM; ARABIA.)

AFTER (ăft'ēr). (1) Behind (Job xxx:5). (2) Later in time; at the end of (Acts xv:16). (3) According to the direction and influence (Is. xi:3; Rom. viii:1, 4, 13); *inquire after*, is to search for (Job x:6); *to go after*, to serve and worship (Deut. vi:14); *to walk after*, to follow an example, to imitate (Hos. xi:10). *After*, according to the Spirit of (Col. ii:8).

AFTERNOON (ăf'tēr-nōōn), (Heb. יְהִימָוֶה אַחֲרֵי הַיּוֹם, *ne-toth' ha-yom'*, the day's declining, Judg. xix:8), according to the Jewish reckoning the fifth of the six divisions of the day. (See TIME.)

AGABA (ăg'a-bà), a fortress near Jerusalem, which Galesus, its governor, restored to Aristobulus, son of Alexander Jannæus (Joseph. *Antiq. lib.* xiii, cap. 24).

AGABUS (ăg'a-bus), (Gr. Ἀγαβος, *ag'ab-os*, perhaps, to love), the name of "a prophet," supposed to have been one of the seventy disciples of Christ. He, with others, came from Judæa to Antioch, while Paul and Barnabas (A. D. 43) were there and announced an approaching famine, which actually occurred the following year. Some writers suppose that the famine was general, but most modern commentators unite in understanding that the large terms of the original Ὀλην τὴν οἰκουμένην, apply not to the whole world, nor even to the whole Roman empire, but, as in Luke ii:1, to Judea only. Statements respecting four famines, which occurred in the reign of Claudius, are produced by the commentators who support this view; and as all the countries put together would not make up a tenth part of even the Roman empire, they think it plain that the words must be understood to apply to that famine which, in the fourth year of Claudius, overspread Palestine. The poor Jews, in general, were then relieved by the Queen of Adiabene, who sent to purchase corn in Egypt for them (Joseph. *Antiq.* xx:2, 6); and for the relief of the Christians in that country contributions were raised by the brethren at Antioch, and conveyed to Jerusalem by Paul and Barnabas (Acts xi:27-30). Many years after, this same Agabus met Paul at Cæsarea, and warned him of the sufferings which awaited him if he prosecuted his journey to Jerusalem (Acts xxi:11-14).

AGAG (Heb. אַגַּג, *ag-ag'*, flame), the name of two kings of the Amalekites, and perhaps a common name of all their kings, like Pharaoh in Egypt (Comp. Num. xxiv:7; 1 Sam. xv:8, 9, 20, 32), B. C. 1169. 1. The first of these passages would imply that the king of the Amalekites was, then at least, a greater monarch, and his people a greater people, than is commonly imagined. (See AMALEKITES.) 2. The latter references

are to that king of the Amalekites who was spared by Saul, contrary to the solemn vow of devotion to destruction, whereby the nation, as such, had of old precluded itself from giving any quarter to that people (Exod. xvii:10; Num. xiv:45). Hence, when Samuel arrived in the camp of Saul, he ordered Agag to be brought forth. He came 'pleasantly,' deeming secure the life which the king had spared. But the prophet ordered him to be cut in pieces; and the expression which he employed—'As thy sword hath made women childless, so shall thy mother be childless among women' (1 Sam. xv:32)—indicates that, apart from the obligations of the vow, some such example of retributive justice was intended, as had been exercised in the case of Adonibezek; or, in other words, that Agag had made himself infamous by the same treatment of some prisoners of distinction (probably Israelites) as he now received from Samuel. The unusual mode in which his death was inflicted strongly supports this conclusion.

AGAGITE (ă'gag-ite), used as a Gentile name for Amalekite in Esth. iii:1, 10; viii:3, 5.

AGAPE or **AGAPÆ** (ag'a-pē), (Gr. ἀγάπη, *ag'apai*, *ag-a'pay*), the Greek term for *love*, used by ecclesiastical writers (most frequently in the plural) to signify the social feasts of friendship, love, or kindness, in use among the primitive Christians. It is very probable that they were instituted in memory of the last supper of Jesus Christ with his disciples, which supper was concluded before he instituted the eucharist.

(1) **Festival.** These festivals were kept in the assembly, or church, towards evening, after prayers and worship were over. Upon these occasions, the faithful ate together, with great simplicity and union, what each had brought; so that rich and poor were in no way distinguished. After a supper, marked by much frugality and modesty, they partook of the sacramental signs of the Lord's body and blood, and gave each other the kiss of peace.

(2) **Before the Eucharist.** The Agapæ are placed *before* the eucharist (1 Cor. xi:21), and if they did refer to our Lord's supper *before* he instituted the eucharist, this seems to be their natural order. But it is probable that, at least in some places, or on some occasions, the holy eucharist preceded the Agapæ; perhaps when persecution rendered extreme caution necessary; for it seems very likely that Pliny speaks of these Agapæ in his famous letter to Trajan: 'After their service to Christ (*quasi Deo*) they departed, and returned to take a harmless repast in common.'

(3) **History.** The history of the Agapæ among the primitive Christians is so closely connected with the manners, customs, and opinions of times and places that to treat it satisfactorily would lead us too far; we may, therefore, only offer a few remarks. There seems reason to conclude that the social intercourse of early believers might enable them to discover many excellencies in each other, which might contribute to justify and to promote the observations of heathen strangers, 'See how these Christians love one another!'

These Agapæ were not only very powerful means, among the primitive Christians, of cultivating mutual affection throughout their body, and of gaining the good will of those who observed their conduct; but, in all probability, they contributed to the promotion of the Christian

cause, by leading to conversions, and by supporting the minds of young converts under the difficulties attending their situation. Tertullian (Apol. cap. 39) speaks of them thus: 'Nothing low or unseemly is committed in them; nor is it till after having prayed to God that they sit down to table. Food is taken in moderation, as wanted; and no more is drank than it becomes discreet persons to drink. Each takes such refreshment as is suitable, in connection with the recollection that he is to be engaged, in the course of the night, in adorations to God; and the conversation is conducted as becometh those who know that the Lord heareth them. After water has been brought for the hands, and fresh lights, everyone is invited to sing, and to glorify God, whether by passages from the sacred Scriptures, or of his own composition. This discovers whether proper moderation has been observed at the table. In short, the repast concludes as it began; that is to say, with prayer.'

(4) **Abuse.** These institutions, however, even in the time of the apostles, appear to have degenerated, and become abused. Paul (1 Cor. xi:20, 21) complains, that the rich despised the poor in these assemblies, and would not condescend to eat with him: 'When ye come together,' says he, 'in one place—this coming together, merely, is not eating the Lord's supper; one taking before another his own supper; one being hungry, another over full. What! have ye not houses to eat and to drink in? or despise ye the church of God, and shame them that have not?' In this discordant state of its members, a church could not but be unfit to celebrate the great commemoration of Divine love. (Jude 12. 'Spots in your feasts of charity—Agapæ—feasting themselves, etc.')

It certainly seems to us extraordinary, that on any occasion, much more on occasion of a Christian institution recently attended to, and a solemn Christian ordinance about to be attended to, the Corinthians should, any of them, indulge to excess of any kind: but when we consider that public suppers and other meals were customary among the Greeks (to which they might assimilate these Agapæ), and besides, that the sacrifices at which these Corinthians had been accustomed to attend, were followed (and some accompanied) by merriment, we shall see less reason to wonder at their falling into intemperance of behavior so very different from the genius of the gospel. Certainly the eucharist itself is, as the name implies, a feast for joy; but for joy of a much more serious kind. However, we must, in justice, vindicate the Corinthians from that gross profanation of the eucharist itself, with which, from our translation, or rather from the common acceptance of the phrase "Lord's supper," they have been reproached.

The Agapæ were abolished by the Council of Laodicea, Can. 28, Synod of Trullo, Can. 74, and the Council of Carthage, Can. 42.

(5) **Other Devotional Entertainments.** The Jews had certain devotional entertainments, in some degree related to the Agapæ. On their great festival days, they made feasts for their family, for the priests, the poor, and orphans; or they sent portions to them. These repasts were made in Jerusalem, before the Lord. There were also certain sacrifices and first-fruits appointed by the law, to be set apart for that purpose (Deut. xxvi:10-12; Neh. viii:10, 12; Esth. ix:19). A similar custom obtained among the heathen; at

least, so far as to partake convivially of what had been offered in sacrifice; and perhaps, also, sending portions to such as were absent. The Essenes also had their repasts in common; and probably many other confraternities or sects. To this fellowship, the institution of the Sodales or brotherhoods, which had become popular since the days of Augustus, might greatly contribute.

AGAR (ā'gar), a Greek form (Gal. iv:24, 25) of the name HAGAR (which see).

AGATE (äg'ate), (Heb. אֶגֶט, *sheb-oo'*, signifying unknown; Sept. ἀχάτης; Vulg. *achates*), a precious or rather ornamental stone, which was one of those in the pectoral of the high-priest (Exod. xxviii:19; xxxix:12). The word *agate*, indeed, occurs also in Is. liv:12, and Ezek. xxvii:16, in our translation; but in the original the word in these texts is altogether different, being *Kadkod*. It seems not to have been questioned that some stone of the agate kind is intended. This stone is popularly known in England under the name of Scotch pebble.

There are few countries in which agates of some quality or other are not produced. The finest are those of India; they are plentiful, and sometimes fine, in Italy, Spain, and Germany; but those found in this country are seldom good. Agate is one of the numerous modifications of form under which silica presents itself, almost in a state of purity, forming 98 per cent. of the entire mineral. The siliceous particles are not so arranged as to produce the transparency of rock crystal, but a semi-pellucid, sometimes almost opaque substance, with a resinous or waxy fracture; and the various shades of color arise from minute quantities of iron. The same stone sometimes contains parts of different degrees of translucency, and of various shades of color; and the endless combinations of these produce the beautiful and singular internal forms, from which, together with the high polish they are capable of receiving, agates acquire their value as precious stones. The Scripture text shows the early use of this stone for engraving; and several antique agates, engraved with exquisite beauty, are still preserved in the cabinets of the curious.

AGE (āj), in the A. V. is the word used to represent several Hebrew and Greek words: *Generation*, (Heb. דּוֹר, *dore*, the circle of the years of human life, Job. viii:8; Is. xxxviii:12); *old age* (Heb. זָקֵן, *zaw-kane'*, *aged*, Gen. xlviii:10); *lifetime* (Heb. יָמֵי, *kheh'led*, that which is fleeting, Job xi:17; Ps. xxxix:5; *grayheadedness* (Heb. שֵׁבִי, *sabe*, 1 Kings xiv:4); *day* (Heb. יוֹם, *yome*, so-called from the diurnal heat, Gen. xviii:11; xxiv:1; Josh. xxiii:1, 2; Zech. viii:4); *maturity*, a particular period of life (Gr. ἡλικία, *hay-lik-ee'ah*, Heb. xi:11).

In general (1) The time of life when a woman is fit for conceiving of children (Heb. xi:11). (2) The time when men's natural powers and faculties are at their perfection, or near it (John xi:21, 23; Heb. v:14). (3) Long continuance of life (Job v:26; Zech. viii:4). (4) A period of time, past, present, or future (Eph. iii:5; ii:7). (5) The people living in such periods (Col. i:26). (See **ÆON**; **TIME**; **LONGEVITY**.)

AGEE (äg'ee), (Heb. אָגֵי, *aw-gay'*, fugitive), a Hararite, father of Shammah, which latter was one of David's mighty men (2 Sam. xxiii:11).

AGE, OLD (āj, ōld). The strong desire of a protracted life, and the marked respect with which

aged persons were treated among the Jews, are very often indicated in the Scriptures. The most striking instance which Job can give of the respect in which he was once held, is that *even* old men stood up as he passed them in the streets (Job xxix:8), the force of which is illustrated by the injunction in the law, 'Before the hoary head thou shalt stand up, and shalt reverence the aged' (Lev. xix:32). Similar injunctions are repeated in the Apocrypha, so as to show the deportment expected from young men towards their seniors in company. Thus, in describing a feast, the author of Ecclesiasticus (xxxii:3, 7) says, 'Speak thou that art the elder, for it becometh thee. Speak, young man, if there be need of thee, and yet scarcely, when thou art twice asked.'

The attainment of old age is constantly promised or described as a blessing (Gen. xv:15; Job v:26), and communities are represented as highly favored in which old people abound (Is. lxxv:20; Zech. viii:4, 9), while premature death is denounced as the greatest of calamities to individuals, and to the families to which they belong (1 Sam. ii:32); the aged are constantly supposed to excel in understanding and judgment (Job xii:20; xv:10; xxxii:9; 1 Kings xii:6, 8), and the mercilessness of the Chaldeans is expressed by their having 'no compassion' upon the 'old man, or him who stooped for age' (2 Chron. xxxvi:17).

The strong desire to attain old age was necessarily in some degree connected with or resembled the respect paid to aged persons; for people would scarcely desire to be old, were the aged neglected or regarded with mere suffering.

AGMON (Heb. אַגְמוֹן, *ag-mon'*), occurs in Job xl:21; xli:2; Is. ix:14; xix:15; lviii:5; in the first of which passages it is translated in our Authorized Version by *flag*; in the second by *hook*; in the next two by *rush*; and in the last by *bulrush*. As no plant is known under this name in the Hebrew or cognate languages, its nature has been sought for by tracing the word to its root, and by judging of its nature from the context. Thus *agom* is said to mean a lake or pool of water, also a reed; and in Arabic is translated reed-bed, cane-bed. *Agom* is also considered to be derived from the same root as *goma*, the papyrus. Some have even concluded that both names indicate the same thing, and have translated them by *juncus*, or *rush*.—J. F. R. (See PAPHYRUS.)

AGONE (a-gôn'). My master left me because three days *agone* I fell sick (1 Sam. xxx:13).

Agone, past and gone, old form of the past participle of the verb *to go*; then as an adverb, *past*, for which *ago* is now used.

It was long *agone* prophesied in the Psalm.

Udal, *Erasmus's Paraphrase*.

For long *agone* I have forgot to court.

Shakespeare (*Swinton's Bib. Hand Bk.*).

AGONY (äg'ô-nÿ), (Gr. ἄγωνα, *agoni'a*), a word generally denoting *contest*, and especially the contest by wrestling, etc., in the public games; whence it is applied, metaphorically, to a severe *struggle or conflict* with pain and suffering.

(1) **Struggle with Present Evil.** *Agony* is the actual struggle with present evil, and is thus distinguished from *anguish*, which arises from the reflection on evil that is past. In the New Testament the word is only used by Luke (xxii:44), and is employed by him with terrible significance to describe the fearful struggle which

our Lord sustained in the garden of Gethsemane. The circumstances of this mysterious transaction are recorded in Matt. xxvi:30-46; Mark xiv:32-42; Luke xxii:39-48; Heb. v:7, 8. None of these passages, taken separately, contains a full history of our Saviour's agony. Each of the three Evangelists has omitted some particulars which the others have recorded, and all are very brief. The passage in Hebrews is only an incidental notice. The three Evangelists appear to have had the same design, namely, to convey to their readers an idea of the intensity of the Lord's distress; but they compass it in different ways. Luke alone notices the agony, the bloody sweat, and the appearance of an angel from heaven strengthening him. Matthew and Mark alone record the change which appeared in his countenance and manner, the complaint which he uttered of the overpowering sorrows of his soul, and the repetition of the same prayer. All agree that he prayed for the removal of what he called 'this cup,' and are careful to note that he qualified this earnest petition by a preference of his Father's will to his own.

(2) **Let This Cup Pass.** With regard to the cause of his overwhelming distress, Jesus himself points it out in the prayer, 'If it be possible, *let this cup pass from me;*' the cup which his Father had appointed for him; and the question is, what does he mean by 'this cup.' Doddridge and others think that he means the instant agony, the trouble that he then actually endured. But this is satisfactorily answered by Dr. Mayer, who shows by reference to John xviii:11 that the cup respecting which he prayed was one that was then before him, which he had not yet taken up to drink, and which he desired, if possible, that the Father should remove. It could, therefore, be no other than the scene of suffering upon which he was about to enter. It was the death which the Father had appointed for him—the death of the cross—with all the attending circumstances which aggravated its horror; that scene of woe which began with his arrest in the garden, and was consummated by his death on Calvary. Jesus had long been familiar with this prospect, and had looked to it as the appointed termination of his ministry (Matt. xvi:21; xvii:9-12; xx:17, 19, 28; Mark x:32-34; John x:18; xii:32, 33). But when he looked forward to this destination, as the hour approached, a chill of horror sometimes came over him, and found expression in external signs of distress (John xii:27; Comp. Luke xii:49, 50).

(3) **More Than the Cross.** It is manifest, therefore, that something more than the cross was now before him, and that he was now placed in a new and hitherto untried situation. Dr. Mayer says: 'I have no hesitation in believing that he was here put upon the trial of his obedience. It was the purpose of God to subject the obedience of Jesus to a severe ordeal, in order that, like gold tried in the furnace, it might be an act of more perfect and illustrious virtue, and for this end he permitted him to be assailed by the fiercest temptation to disobey his will and to refuse the appointed cup. In pursuance of this purpose the mind of Jesus was left to pass under a dark cloud, his views lost their clearness, the Father's will was shrouded in obscurity, the cross appeared in tenfold horror, and nature was left to indulge her feelings, and to put forth her reluctance.' (See BLOODY SWEAT.)

AGORA (äg'o-ra), (Gr. ἄγορά *ag-oh-rah'*), a word of frequent occurrence in the New Testament; it denotes generally any place of public

resort in towns and cities where the people came together, and hence more specially it signifies: (1) A public place, a broad street, etc., as in Matt. xi:16; xx:3; xxiii:7; Mark vi:56; xii:38; Luke vii:32; xi:43; xx:46. (2) A forum or market-place, where goods were exposed for sale, and assemblies or public trials held, as in Acts xvi:19; xvii:17. In Mark vii:4 it is doubtful whether ἀγορὰ denotes the market itself or is put for that which is brought from the market; but the known customs of the Jews suggest a preference of the former signification.

AGORAIOS (a-gör-i'os), (Gr. Ἀγοραῖος, ag-oh-ray'-os), a Greek word signifying the things belonging to or persons frequenting, the *Agora*. In Acts xix:38, it is applied to the days on which public trials were held in the forum, and in ch. xvii:5, it denotes idlers, or persons lounging about in the markets and other places of public resort. There is a peculiar force in this application of the word, when we recollect that the market-places or bazaars of the East were, and are at this day, the constant resort of unoccupied people, the idle and the newsmongers.

AGRAMMATOS (a-gräm'ma-tos), (Gr. Ἀγράμματος, ah-gram'mah-tos), a Greek word meaning *unlearned, illiterate*. In Acts iv:13, the Jewish literati apply the term to Peter and John, in the same sense in which they asked, with regard to our Lord himself, 'How knoweth this man letters, having never learned?' (John vii:15). In neither case did they mean to say that they had been altogether without the benefits of the common education, which consisted in reading and writing, and in an acquaintance with the sacred books; but that they were not learned men, had not sat at the feet of any of the great doctors of the law, and had not been instructed in the mysteries and refinements of their peculiar learning and literature.

AGRAPHIA (äg'raf-a). See UNWRITTEN SAYINGS.

AGRARIAN LAW (a-grā-ri-an law). To this or some such heading belongs the consideration of the peculiar laws by which the distribution and tenure of land were regulated among the Hebrew people, while the modes and forms in which the land was cultivated belong to AGRICULTURE.

(1) **Pastoral People.** The Hebrews were for the most part a pastoral people until they were settled in Palestine, and their pastoral habits were mainly instrumental in keeping them distinct and separate from the Egyptians, who were agriculturists and had a strong dislike to a shepherd life (Gen. xlvi:34). But when they became an independent and sovereign nation, the same result of separation from other nations was to be aided by inducing them to devote their chief attention to the culture of the soil.

It was, doubtless, in subservience to this object, and to facilitate the change, that the Israelites were put in possession of a country already in a state of high cultivation (Deut. vi:11). And it was in order to retain them in this condition, to give them a vital interest in it, and to make it a source of happiness to them, that a very peculiar agrarian law was given to them.

(2) **Basis of Agrarian Law.** An equal distribution of the soil (Num. xxvi:53, 54) was the basis of the agrarian law. By it provision was made for the support of 600,000 yeomanry, with (according to different calculations) from sixteen to twenty-five acres of land each. This land they held independent of all temporal superiors, by direct tenure from Jehovah their sovereign, by whose power they were to acquire the

territory, and under whose protection they were to enjoy and retain it.

(3) **Guarded by Other Provisions.** But this law was guarded by other provisions equally wise and salutary. The accumulation of debt was prevented, first, by prohibiting every Hebrew from accepting of interest (Lev. xxv:35, 36) from any of his fellow-citizens; next, by establishing a regular release of debts every seventh year, and, finally, by ordering that no lands could be alienated forever, but must, on each year of Jubilee, or every seventh Sabbatic year, revert to the families which originally possessed them. Thus, without absolutely depriving individuals of all temporary dominion over their landed property, it re-established, every fiftieth year, that original and equal distribution of it, which was the foundation of the national polity; and as the period of such reversion was fixed and regular, all parties had due notice of the terms on which they negotiated, so that there was no ground for public commotion or private complaint.

(4) **Country Property.** This law, by which landed property was released in the year of Jubilee from all previous obligations, did not extend to houses in towns, which, if not redeemed within one year after being sold, were alienated forever (Lev. xxv:29, 30). This must have given to property in the country a decided preference over property in cities, and must have greatly contributed to the essential object of all those regulations, by affording an inducement to every Hebrew to reside on and cultivate his land. Further, the original distribution of the land was to the several tribes according to their families, so that each tribe was, so to speak, settled in the same country, and each family in the same township or subdivision. Nor was the estate of any family in one tribe permitted to pass into another, even by the marriage of an heiress (Num. xxvii); so that not only was the original balance of property preserved, but the closest and dearest connections of affinity attached to each other the inhabitants of every vicinage.

For this land a kind of quit-rent was payable to the sovereign proprietor, in the form of a tenth or tithe of the produce, which was assigned to the priesthood. (See TITHES.)

(5) **Military Service.** The condition of military service was also attached to the land, as it appears that every freeholder (Deut. xx:5) was obliged to attend at the general muster of the national army, and to serve in it, at his own expense (often more than repaid by the plunder), as long as the occasion required. In this direction, therefore, the agrarian law operated in securing a body of 600,000 men, inured to labor and industry, always assumed to be ready, as they were bound, to come forward at their country's call. This great body of national yeomanry, every one of whom had an important stake in the national independence, was officered by its own hereditary chiefs, heads of tribes and families (Comp. Exod. xviii and Num. xxxi:14); and must have presented an insuperable obstacle to treacherous ambition and political intrigue, and to every attempt to overthrow the Hebrew commonwealth and establish despotic power.

(6) **Security of State.** Nor were these institutions less wisely adapted to secure the state against foreign violence, and at the same time prevent offensive wars and remote conquests. For while this vast body of hardy yeomanry were always ready to defend their country, when assailed by foreign foes, yet, being constantly employed in agriculture, attached to domestic life,

and enjoying at home the society of the numerous relatives who peopled their neighborhood, war must have been in a high degree averse to their tastes and habits. Religion also took part in preventing them from being captivated by the splendor of military glory.

(7) **Return from Battle.** On returning from battle, even if victorious, in order to bring them back to more peaceful feelings after the rage of war, the law required them to consider themselves as polluted by the slaughter, and unworthy of appearing in the camp of Jehovah until they had employed an entire day in the rites of purification (Num. xix:13-16; xxxi:19).

AGRICULTURE (ag'ri-cult'üre). The antiquity of agriculture is intimated in the brief history of Cain and Abel (Gen. iv:2, 3).

(1) **Before the Deluge.** But of the actual state of agriculture before the deluge we know nothing. Whatever knowledge was possessed by the old world was doubtless transmitted to the new by Noah and his sons, and that this knowledge was considerable is implied in the fact that one of the operations of Noah, when 'he began to be a husbandman,' was to plant a vineyard and to make wine with the fruit (Gen. ix:20). There are few agricultural notices belonging to the patriarchal period, but they suffice to show that the land of Canaan was in a state of cultivation, and that the inhabitants possessed what were at a later date the principal products of the soil in the same country.

(2) **Land Under Cultivation.** In giving to the Israelites possession of a country already under cultivation, it was the Divine intention that they should keep up that cultivation, and become themselves an agricultural people, and in doing this they doubtless adopted the practices of agriculture which they found already established in the country.

(3) **The Seasons.** As the condition of the seasons lies at the root of all agricultural operations, it should be noticed that the variations of sunshine and rain, which with us extend throughout the year, are in Palestine confined chiefly to the latter part of autumn and the winter. During all the rest of the year the sky is almost uninterruptedly cloudless, and rain very rarely falls. The autumnal rains usually commence at the latter end of October or the beginning of November, not suddenly, but by degrees, which gives opportunity to the husbandman to sow his wheat and barley. The rains continue during November and December, but afterwards they occur at longer intervals, and rain is rare after March, and almost never occurs as late as May. The cold of winter is not severe, and as the ground is never frozen, the labors of the husbandman are not entirely interrupted. Snow falls in different parts of the country, but never lies long on the ground. In the plains and valleys the heat of summer is oppressive, but not in the more elevated tracts. In such high grounds the nights are cool, often with heavy dew. The total absence of rain in summer soon destroys the verdure of the fields, and gives to the general landscape, even in the high country, an aspect of drought and barrenness. No green thing remains but the foliage of the scattered fruit trees, and occasional vineyards and fields of millet. In autumn the whole land becomes dry and parched, the cisterns are nearly empty, and all nature, animate and inanimate, looks forward with longing for the return of the rainy season. In the hill country the time of harvest is later than in the plains of the Jordan and of the seacoast. The barley harvest is about

a fortnight earlier than that of wheat. In the plain of the Jordan the wheat harvest is early in May; in the plains of the coast and of Esdraelon it is towards the latter end of that month, and in the hills not until June. The general vintage is in September, but the first grapes ripen in July, and from that time the towns are well supplied with this fruit.

(4) **The Soil.** The geological characters of the soil in Palestine have never been satisfactorily stated, but the different epithets of description which travelers employ enable us to know that it differs considerably, both in its appearance and character, in different parts of the land, but wherever soil of any kind exists, even to a very slight depth, it is found to be highly fertile. As parts of Palestine are hilly, and as hills have seldom much depth of soil, the mode of cultivating them in terraces was anciently, and is now, much employed. A series of low stone walls, one above another, across the face of the hill, arrest the soil brought down by the rains, and afford a series of levels for the operations of the husbandman. This mode of cultivation is usual in Lebanon, and is not unfrequent in Palestine, where the remains of terraces across the hills, in various parts of the country, attest the extent to which it was anciently carried.

(5) **Irrigation.** In such a climate as that of Palestine, water is the great fertilizing agent. The rains of autumn and winter, and the dews of spring, suffice for the ordinary objects of agriculture, but the ancient inhabitants were able, in some parts, to avert even the aridity which the summer droughts occasioned, and to keep up a garden-like verdure, by means of aqueducts communicating with the brooks and rivers (Ps. i:3; lxxv:10; Prov. xxi:1; Is. xxx:25; xxxii:2; 20; Hos. xiii:15). Hence springs, fountains and rivulets were as much esteemed by husbandmen as by shepherds (Josh. xv:19; Judg. i:15). The soil was also cleared of stones, and carefully cultivated, and its fertility was increased by the ashes to which the dry stubble and herbage were occasionally reduced by being burned over the surface of the ground (Prov. xxiv:31; Is. vii:23; xxxii:13). Dung, and, in the neighborhood of Jerusalem, the blood of animals, were also used to enrich the soil (2 Kings ix:37; Ps. lxxxiii:10; Is. xxv:10; Jer. iv:22; Luke xiv:34, 35).

That the soil might not be exhausted, it was ordered that every seventh year should be a sabbath of rest to the land; there was then to be no sowing or reaping, no pruning of vines or olives, no vintage or gathering of fruits, and whatever grew of itself was to be left to the poor, the stranger and the beasts of the field (Lev. xxv:1-7; Deut. xv:1-10). But such an observance required more faith than the Israelites were prepared to exercise. It was for a long time utterly neglected (Lev. xxvi:34, 35; 2 Chron. xxxvi:21), but after the captivity it was more observed. By this remarkable institution the Hebrews were also trained to habits of economy and foresight, and invited to exercise a large degree of trust in the bountiful providence of their Divine King.

(6) **Fields.** Under the term *דָגָן*, *dagan*, which we translate 'grain' and 'corn,' the Hebrews comprehended almost every object of field culture. Syria, including Palestine, was regarded by the ancients as one of the first countries for corn (Pliny, *Hist. Nat.* xviii:7). Wheat was abundant and excellent, and there is still one bearded sort, the ear of which is three times as heavy, and contains twice as many grains, as our common English wheat (Irby and Mangles, p. 472). Bar-

ley was also much cultivated, not only for bread, but because it was the only kind of corn which was given to beasts, for oats and rye do not grow in warm climates. Hay was not in use, and therefore the barley was mixed with chopped straw to form the food of cattle (Gen. xxiv:25, 32; Judg. xix:19, etc.). Other kinds of field culture were millet, spelt, various species of beans and peas, pepperwort, cummin, cucumbers, melons, flax and, perhaps, cotton. Many other articles might be mentioned as being now cultivated in Palestine; but, as their names do not occur in Scripture, it is difficult to know whether they were grown there in ancient times, or not.

Anciently, as now, in Palestine and the East the arable lands were not divided into fields by hedges, as in this country. The ripening products therefore presented an expanse of culture unbroken, although perhaps variegated, in a large view, by the difference of the products grown. The boundaries of lands were therefore marked by stones as landmarks, which, even in patriarchal times, it was deemed a heinous wrong to remove (Job xxiv:2), and the law pronounced a curse upon those, who, without authority, removed them (Deut. xix:14; xxvii:17). The walls and hedges which are occasionally mentioned in Scripture belonged to orchards, gardens and vineyards.

Agricultural Operations.

Of late years much light has been thrown upon the agricultural operations and implements of ancient times, by the discovery of various representations on the sculptured monuments and painted tombs of Egypt. As these agree surprisingly with the notices in the Bible, and indeed differ little from what we find employed in Syria and Egypt, it is very safe to receive them as guides on the present subject.

(1) **Plowing.** This has always been a light and superficial operation in the East. At first, the ground was opened with pointed sticks; then a kind of hoe was employed; and this, in

Plowing with Oxen.

many parts of the world, is still used as a substitute for the plow. But the plow was known in Egypt and Syria before the Hebrews became cultivators (Job i:14). In the East, however, it has always been a light and inartificial implement. At first, it was a little more than a stout branch of a tree, from which projected another limb, shortened and pointed. This, being turned into the ground, made the furrow; while at the farther end of the larger branch was fastened a transverse yoke, to which the oxen were harnessed. Afterwards a handle to guide the plow was added. Thus the plow consisted of: 1, the pole; 2, the point or share; 3, the handle; 4, the yoke. The Syrian plow is, and doubtless was, light enough for a man to carry in his hand (Russell's *Nat. Hist. of Aleppo*, i:73). We annex a figure of the ancient Egyptian plow, which had the most resemblance to the one now used, and the comparison between them will probably suggest a fair idea of the plow which was in use among the Hebrews. The following cut (from

Sir Charles Fellowes' work on Asia Minor) shows the parts of a still lighter plow used in Asia Minor and Syria, with but a single handle, and with different shares according to the work it has to execute.

The plow was drawn by oxen, which were sometimes urged by a scourge (Is. x:26; Nahum iii:2); but oftener by a long staff, furnished at one end with a flat piece of metal for clearing the plow, and at the other with a spike for goading the oxen. The ox-goad might easily be used as a spear (Judg. iii:31; 1 Sam. xiii:21). Sometimes men followed the plow with hoes to break the clods (Is. xxviii:24); but in later times a kind of harrow was employed, which appears to have been then, as now, merely a thick block of wood, pressed down by a weight, or by a man sitting on it, and drawn over the plowed field.

(2) **Sowing.** The ground, having been plowed as soon as the autumnal rains had mollified the soil, was fit, by the end of October, to receive the seed; and the sowing of wheat continued, in different situations, through November into December. Barley was not generally sown till January and February. The seed appears to have been sown and harrowed at the same time; although sometimes it was plowed in by a cross furrow.

(3) **Plowing in the Seed.** The Egyptian paintings illustrate the Scriptures by showing that in those soils which needed no previous preparation by the hoe (for breaking the clods) the sower followed the plow, holding in the left hand a basket of seed, which he scattered with the right hand, while another person filled a fresh basket. We also see that the mode of sowing was what we call 'broad-cast,' in which the seed is thrown loosely over the field (Matt. xiii:3-8). In Egypt, when the levels were low, and the water had continued long upon the land, they often dispensed with the plow altogether; and probably, like the present inhabitants, broke up the ground with hoes, or simply dragged the moist mud with bushes after the seed had been thrown upon the surface. To this cultivation without plowing Moses probably alludes (Deut. xi:10), when he tells the Hebrews that the land to which they were going was *not* like the land of Egypt, where they 'sowed their seed and watered it with their foot as a garden of herbs.' It seems, however, that even in Syria, in sandy soils, they sow without plowing, and then plow down the seed (Russell's *N. H. of Aleppo*, i:73, etc.). It does not appear that any instrument resembling our harrow was known; the word rendered to harrow, in Job xxxix:10, means literally to break the clods, and is so rendered in Is. xxviii:24; Hos. x:11; and for this purpose the means used have been already indicated. The passage in Job, however, is important. It shows that this breaking of the clods was not always by the hand, but that some kind of instrument was drawn by an

animal over the plowed field, most probably the rough log which is still in use.

(4) **Harvest.** It has been already mentioned that the time of the wheat harvest in Palestine varies, in different situations, from early in May to late in June; and that the barley harvest is about a fortnight earlier than that of wheat. Among the Israelites, as with all other people, the harvest was a season of joy, and as such is more than once alluded to in Scripture (Ps. cxxvi:5; Is. ix:3).

(5) **Reaping.** Different modes of reaping are indicated in Scripture, and illustrated by the Egyptian monuments. In the most ancient times, the corn was plucked up by the roots, which continued to be the practice with particular kinds of grain after the sickle was known. In Egypt, at this day, barley and dourra are pulled up by the roots. The choice between these modes of operation was probably determined, in Palestine, by the consideration pointed out by Russell (*N. H. of Aleppo*, i:74), who states that 'wheat, as well as barley in general, does not grow half as high as in Britain; and is, therefore, like other grain, not reaped with the sickle, but plucked up by the roots with the hand. In other parts of the country, where the corn grows ranker, the sickle is used.' When the sickle was used, the wheat was either cropped off under the ear or cut close to the ground. In the former case, the straw was afterwards plucked up for use; in the latter, the stubble was left and burnt on the ground for manure. As the Egyptians needed not such manure, and were economical of straw, they generally followed the former method; while the Israelites, whose lands derived benefit from the burnt stubble, used the latter; although the practice of cutting off the ears was also known to them (Job xxiv:24). Cropping the ears short, the

Egyptians did not generally bind them into sheaves, but removed them in baskets. Sometimes, however, they bound them into *double* sheaves; and such as they plucked up were bound into single long sheaves. The Israelites appear generally to have made up their corn into sheaves (Gen. xxxvii:7; Lev. xxiii:10-15; Ruth ii:7, 15; Job xxiv:10; Jer. ix:22; Mich. iv:12), which were collected into a heap, or removed in a cart (Amos ii:13) to the thrashing-floor. The carts were probably similar to those which are still employed for the same purpose.

(6) **Sickles.** With regard to sickles, there appear to have been two kinds, indicated by the different names *chermesh* and *meggol*; and as the former occurs only in the Pentateuch (Deut. xvi:9; xxiii:25), and the latter only in the Prophets (Jer. ii:16; Joel iii:13), it would seem that the one was the earlier and the other the later instrument. One was very much like our common reaping-hook, while the other had more resemblance in its shape to a scythe, and in the Egyptian examples appears to have been toothed. This last is probably the same as the Hebrew *meggol*, which is indeed rendered by *scythe* in the margin of Jer. i:16. The reapers were the owners and their children men-servants and women-servants, and day-laborers (Ruth ii:4, 6, 21, 23; John iv:36; James v:4). Refreshments were provided for them, especially drink, of which the gleaners were allowed to partake (Ruth ii:9). So in the Egyptian harvest-scenes, we perceive a provision of water in skins, hung against trees, or in jars upon stands, with the reapers drinking, and gleaners applying to share the draught. Among the Israelites, gleaning was one of the stated provisions for the poor: and for their benefit the corners of the field were left unreaped, and the reapers might not return for a forgotten sheaf.

Thrashing Corn with Oxen.

The gleaners, however, were to obtain in the first place the express permission of the proprietor or his steward (Lev. xix:9, 10; Deut. xxiv:19; Ruth ii:2, 7).

(7) **Thrashing.** The ancient mode of thrashing, as described in Scripture and figured on the Egyptian monuments, is still preserved in Palestine. Formerly the sheaves were conveyed from the field to the thrashing-floor in carts; but now they are borne, generally, on the backs of camels and asses. The thrashing-floor is a level plot of ground, of a circular shape, generally about fifty feet in diameter, prepared for use by beating down the earth till a hard floor is formed (Gen. 1:10; Judg. vi:37; 2 Sam. xxiv:16, 24). Sometimes several of these floors are contiguous to each other. The sheaves are spread out upon them; and the grain is trodden out by oxen, cows, and young cattle, arranged five abreast, and driven in a circle, or rather in all directions, over the floor. This was the common mode in the Bible times; and Moses forbade that the oxen thus employed should be muzzled to prevent them from tasting the corn (Deut. xxv:4; 1 Cor. ix:9). *Flails*, or sticks, were only used in thrashing small quantities, or for the lighter kinds of grain (Ruth ii:17; Is. xxviii:27). There were, however, some kinds of thrashing-machines, which are still used in Palestine and Egypt. One of them, represented in the annexed figure, is very much used in Palestine. It is composed of

Thrashing Instrument with Sharp Teeth.

two thick planks, fastened together side by side, and bent upwards in front. Sharp fragments of stone are fixed into holes bored into the bottom. This machine is drawn over the corn by oxen—a man or boy sometimes sitting on it to increase the weight. It not only separates the grain, but cuts the straw and makes it fit for fodder (2 Kings xiii:7). This is most probably the *Charutz*, צרזר, or 'corn-drag,' which is mentioned in Scripture (Is. xxviii:27; xli:15; Amos i:3, rendered 'thrashing instrument'), and would seem to have been sometimes furnished with iron points instead of stones. The Bible also notices a machine called a *Moreg*, מורג (2 Sam. xxiv:22; 1 Chron. xxi:23; Is. xli:15), which is unquestionably the same which bears in Arabic the name of *Noreg*.

This machine is not now often seen in Palestine, but is more used in some parts of Syria, and is common in Egypt. It is a sort of frame of wood, in which are inserted three wooden rollers, armed with iron teeth, etc. It bears a sort of seat or chair, in which the driver sits to give the benefit of his weight. It is generally drawn over the corn by two oxen, and separates the grain, and breaks up the straw even more effectually than the drag. In all these processes, the corn is occasionally turned by a fork, and, when sufficiently thrashed, is thrown up by the same fork against the wind to separate the grain, which is then gathered up and winnowed.

(8) **Winnowing.** This was generally accomplished by repeating the process of tossing up the

grain against the wind with a fork (Jer. iv:11, 12), by which the broken straw and chaff were dispersed while the grain fell to the ground. The grain afterward passed through a sieve to separate the bits of earth and other impurities. After this, it underwent a still further purification, by being tossed up with wooden scoops or short-handed shovels.

AGRIELAIA (a'gri-ē-lī'a), (Gr. Ἀγριελαία, *a-gri-ee-lai'ah*; New Testament ἀγριέλμος). The wild olive tree is mentioned by St. Paul in Rom. xi:17, 24. Here different opinions have been entertained, not only with respect to the plant, but also with respect to the explanation of the metaphor. One great difficulty has arisen from the same name having been applied to different plants.

From the account of Dioscorides it is clear that the Ethiopic was distinguished from the wild, and this from the cultivated olive, and as the plant was well known both to the Greeks and Romans, there was no danger of mistaking it for any other plant except itself in a wild state; that is, the true Ἀγριελαία, Oleaster, or *Olea europæa*, in a wild state. That this is the very plant alluded to by the apostle seems to be proved from its having been the practice of the ancients to graft the wild upon the cultivated olive tree.

The apostle, therefore, in comparing the Romans to the wild olive tree grafted on a cultivated stock, made use of language which was most intelligible, and referred to a practice with which they must have been perfectly familiar.—J. F. R. (See OLIVE.)

AGRIPPA (a-gríp'pā), (Gr. Ἀγρίππας, *agr-ríp'pas*, perhaps wild horse tamer). Although of the two Herods, father and son, who also bore the name of Agrippa, the latter is best known by his Roman name, it seems proper to include him with the other members of the Herodian dynasty, under the name which he bore among his own people. (See HERODIAN FAMILY.)

AGUE (ā'gū). See PLAGUE.

AGUR (ā'gur), (Heb. אגור, *aw-goor'*, gathered), the author of the sayings contained in Prov. xxx, which the inscription describes as composed of the precepts delivered by 'Agur, the son of Jakeh,' to his friends 'Ithiel and Ucal.' Beyond this everything that has been stated of him, and of the time in which he lived, is pure conjecture. Some writers have regarded the names as an appellative, but differ as to its signification.

AH (āh), (Heb. אח, *ach*, brother), or rather Ach, is frequently found, according to the adequate representation of the guttural which is followed in our version, as the first syllable of compound Hebrew proper names. The observations already offered in the article AB may be referred to for some illustration of the metaphorical use of the term *brother* in such combinations, as well as for the law of their construction, whenever the two members are nouns of which one is dependent as a genitive on the other.—J. N.

AHAB (ā'hāb), (Heb. אחאב, *akh-awb'*, father's brother), son of Omri, and the sixth king of Israel, who reigned twenty-one years, from B. C. 918 to 897. Ahab was, upon the whole, the weakest of all the Israelitish monarchs, and although there are occasional traits of character which show that he was not without good feelings and dispositions, the history of his reign proves that weakness of character in a king may sometimes be as injurious in its effects as wickedness. Many of the evils of his reign may be ascribed to the close connection which he formed with the Phœnicians.

(1) **Phœnician Influence.** There had long been a beneficial commercial intercourse between that people and the Jews, and the relations arising thence were very close in the times of David and Solomon. After the separation of the kingdoms the connection appears to have been continued by the nearer kingdom of Israel, but to have been nearly, if not quite, abandoned by that of Judah.

(2) **Jezebel.** The wife of Ahab was Jezebel, the daughter of Ethbaal, or Ithobaal, king of Tyre. She was a woman of a decided and energetic character, and, as such, soon established that influence over her husband which such women always acquire over weak, and not infrequently also over strong, men.

Ahab, being entirely under the control of Jezebel, sanctioned the introduction, and eventually established the worship of the Phœnician idols, and especially of the sun-god Baal.

(3) **Idolatry.** Hitherto the golden calves in Dan and Bethel had been the only objects of idolatrous worship in Israel, and they were intended as symbols of Jehovah. But all reserve and limitation were now abandoned. The king built a temple at Samaria, and erected an image, and consecrated a grove to Baal. A multitude of priests and prophets of Baal were maintained. Idolatry became the predominant religion; and Jehovah, with the golden calves as symbolical representations of him, was viewed with no more reverence than Baal and his image. So strong was the tide of corruption, that it appeared as if the knowledge of the true God was soon to be forever lost among the Israelites.

(4) **Elijah.** But a man suited to this emergency was raised up in the person of Elijah the prophet, who boldly opposed himself to the regal authority, and succeeded in retaining many of his countrymen in the worship of the true God. The greater the power which supported idolatry, the more striking were the prophecies and miracles which directed the attention of the Israelites to Jehovah, and brought disgrace on the idols, and confusion on their worshippers.

(5) **Death of Naboth.** Hard by his palace in Jezreel, a citizen named Naboth had a vineyard, and Ahab being desirous of obtaining it as a kitchen-garden, demanded that Naboth should sell him his vineyard, or exchange it for a better. Naboth absolutely refused to violate the Divine law, in an unnecessary alienation of the inheritance of his fathers. Stung with this refusal, Ahab went home greatly displeased, threw himself on his bed, and would eat nothing. Informed of the cause of his disorder, Jezebel, to comfort him, assured him that she would quickly put him in possession of Naboth's vineyard. By issuing forth orders to the elders of the city, and suborning false witnesses against Naboth, she got him murdered as guilty of blasphemy and treason. Informed of his death, Ahab went and took possession of his vineyard. In his return home to Samaria, Elijah met him, and divinely assured him that for his murder of Naboth and seizing of his vineyard, dogs should lick his blood on the spot where they licked the blood of Naboth, or perhaps because they licked it; that Jezebel his wife should be eaten by dogs by the wall of Jezreel; and the rest of his family have their carcasses devoured by the dogs in the city, or wild beasts and fowls without it. Terrified with this prediction, Ahab rent his clothes, put on sackcloth and mourned for his conduct. To reward his repentance, God deferred the full execution of the stroke until after his death, in the reign of Jehoram his son (1 Kings xxi). At length the

judgment of God on Ahab and his house was pronounced by Elijah, who announced that, during the reign of his son, his whole race should be exterminated.

(6) **Death of Ahab.** Ahab died of the wounds which he received in a battle with the Syrians, according to a prediction of Micaiah, which the king disbelieved, but yet endeavored to avert by disguising himself in the action (1 Kings xvi:29: xxii:40).

"That Ahab's rule was firm though despotic, and maintained the military traditions inaugurated by Omri, is indicated by the Moabite Stone, which informs us (lines 7,8) that Omri and his son ruled over the land of Mehdeba (conquered by the former) for 40 years. It was not till the concluding part of Ahab's reign, when he was occupied with his Syrian wars, that Moab rose in insurrection" (Hastings' *Bib. Dict.*).

AHAB and ZEDEKIAH. The names of two false prophets who deceived the Israelites at Babylon. For this they were threatened by Jeremiah, who foretold that they should be put to death by the king of Babylon in the presence of those whom they had beguiled, and that in following times it should become a common malediction to say, 'The Lord make thee like Zedekiah and Ahab, whom the king of Babylon roasted in the fire' (Jer. xxix:21, 22).

AHALIM (äh'a-līm), (Heb. אֲחַלִּים, *a-haw-leem'*), and **AHALOTH** (äh-a-löth'), (Heb. אֲחַלוֹת, *a-haw-loth'*), usually translated Aloes, occur in several passages of the Old Testament, as in Psalm xlv:8, 'All thy garments smell of myrrh, and *ahaloth*, and cassia;' Prov. vii:17, 'I have perfumed my bed with myrrh, with cinnamon and *ahalim*;' Canticles, iv:14, 'Spikenard and saffron, calamus and cinnamon, with all trees of frankincense, myrrh and *ahaloth*, with all the chief spices.' From the articles which are associated with *ahaloth* and *ahalim* (both names indicating the same thing), it is evident that it was some odoriferous substance, probably well known in ancient times. Why these words have been translated 'aloes,' not only in the English, but in most of the older versions, it may not be easy to ascertain; but there is little doubt that the odoriferous *ahaloth* of the above passages ought not to be confounded with the bitter and nauseous aloes famed only as a medicine. (See ALOES.)

AHARAH (a-här'ah), (Heb. אַחֲרָה, *akh-rakh'*, after the brother), a son of Benjamin (1 Chron. viii:1), elsewhere called Ehi (Gen. xlvi:21), Ahiram (Num. xxvi:38), and Aher (1 Chron. vii:12).

AHARHEL (a-här'hel), (Heb. אַחֲרֵל, *akh-ar-khale'*, behind the breastwork), a son of Harum, a descendant of Judah (1 Chron. iv:8).

AHASAI (a-häs'a-i), (Heb. אַחַזַּי, *akh-zah'ee*, a contracted form of Ahaziah, whom Jehovah holds), a grandson of Immer, and a priest (Neh. xi:13) called Jalizerah, the grandson of Immer (1 Chron. ix:12). (See JAHZERAH.)

AHASBAI (a-häs'ba-i), (Heb. אַחַזְבַּי, *akh-as-bah'ee*, I have taken refuge in Jehovah), a Maachathite, father of Eliphelet, one of David's mighty men (2 Sam. xxiii:34). He is apparently called Ur in 1 Chron. xi:35. (See UR.)

AHASUERUS (a-häs-u-ē'rus), (Heb. אַחַשְׁוֵרֶשׁ, *akh-ash-vay-rosh'*), or Achashverosh, is the name, or rather the title, of four Median and Persian monarchs mentioned in the Bible.

(1) **Father of Darius.** The first Ahasuerus is incidentally mentioned in Dan. ix:1, as the father of Darius the Mede. It is generally agreed that the person here referred to is the Astyages of profane history (see the article DARIUS).

(2) **Successor of Cyrus.** The second Ahasuerus occurs in Ezra iv:6, where it is said that in the beginning of his reign the enemies of the Jews wrote an accusation against them, the result of which is not mentioned. The Persian king here meant seems to be the immediate successor of Cyrus, the frantic tyrant Cambyses, who came to the throne B. C. 529, and died after a reign of seven years and five months.

(3) **Ahasuerus of the Book of Esther.** The third Ahasuerus is the Persian king of the book of Esther. The chief facts recorded of him there, and the *dates* of their occurrence, which are important in the subsequent inquiry, are these: In the *third* year of his reign he made a sumptuous banquet for all his nobility, and prolonged the feast for 180 days. Being on one occasion merry with wine, he ordered his queen Vashti to be brought out, to show the people her beauty. On her refusal to violate the decorum of her sex, he not only indignantly divorced her, but published an edict concerning her disobedience, in order to insure to every husband in his dominions the rule in his own house.

In the *seventh* year of his reign he married Esther, a Jewess, who, however, concealed her parentage. In the *twelfth* year of his reign, his minister, Haman, who had received some slights from Mordecai the Jew, offered him 10,000 talents of silver for the privilege of ordering a massacre of the Jews in all parts of the empire on an appointed day. The king refused this immense sum, but acceded to his request; and couriers were dispatched to the most distant provinces to enjoin the execution of this decree. Before it was accomplished, however, Mordecai and Esther obtained such an influence over him that he so far annulled his recent enactment as to dispatch other couriers to empower the Jews to defend themselves manfully against their enemies on that day; the result of which was that they slew 800 of his native subjects in Shushan, and 75,000 of them in the provinces.

(4) **Late Research.** Almost every Medo-Persian king, from Cyaxares I. down to Artaxerxes III (Ochus), has in his turn found some champion to assert his title to be the Ahasuerus of Esther, but the question has at last been authentically settled by the decipherment of the cuneiform inscriptions.

In a personal letter on this subject, Prof. A. H. Sayce says: "Ahasuerus and Xerxes are the same name, and there is only one Xerxes to whom the account in the book of Esther can refer. That is the famous Xerxes I. Thanks to the decipherment of cuneiform inscriptions, we now know that the Persian kings did not have two names, so that the old attempt to identify Xerxes of Esther with Darius or Artaxerxes can never be renewed." J. A. Selbie, *Hastings' Bib. Dict.*, says the Ahasuerus of Dan. ix, the father of Darius the Mede, is a personage whose identity is as difficult to establish as the existence of 'Darius the Mede' is problematical.

(5) **The Fourth Ahasuerus.** Still another Ahasuerus is mentioned in Tobit. xiv:15 in connection with the destruction of Nineveh. This indicates that Cyaxares was the man to whom allusion is made by Herodotus (Herod. i:106).

AHAVA (ahāvā), (Heb. אַחַוָּא, *ā-hav-aw'*, water, Ezra viii:21, 31), the river by which the Jewish

exiles assembled their second caravan under Ezra, when returning to Jerusalem. It would seem from ch. viii:15, that it was named from a town of the same name: 'I assembled them at the river that flows toward Ahava.' In that case, it could not have been of much importance in itself; and possibly it was no other than one of the numerous canals with which Babylonia then abounded. This is probably the true reason that biblical geographers have failed to identify it.

Ewald conjectured that the river Ahava or Peleg-Ahava was the same as the Pallacopas, a stream to the south of Babylon. Rawlinson identifies it with the Is (see Herod. i:179), a river flowing by a town of the same name, now called Hit, which is about eight days' journey from Babylon (*Hastings' Bib. Dict.*).

AHAZ (a'hāz), (Heb. אֲחָז, *aw-khawz'*, possessor).

1. Son of Jotham, and twelfth king of Judah. He reigned sixteen years, from B. C. 735-719. About the tenth year of his age he espoused Abijah, the daughter of Zechariah, by whom, about a year after, he had his son Hezekiah. At twenty years of age Ahaz came to the crown.

(1) **Idolatry.** In imitation of the kings of Israel, he abandoned himself to the most abominable idolatries. One of his sons he sacrificed to the idol Moloch; and, perhaps, caused the rest to pass through the fire for lustration. He did not merely connive at the people offering sacrifices in high places, as sundry of his predecessors had done; but himself ordered sacrifices and incense to be offered in high places, hills, groves, and under green trees.

(2) **Wars.** Toward the end of his father's reign, the Syrians under Rezin, and the Israelites under Pekah, had begun to harass Judah. Observing Ahaz to be a weak prince, they agreed to dethrone him, and make a son of Tabeel, their deputy, king in his stead. Their armies invaded his kingdom all at once. He and his people were seized with the utmost consternation. The prophet Isaiah assured him that none of their projects should prosper; and that since the Messiah was not yet come, there was no reason to fear the departure of the sceptre from Judah (Is. vii). This stroke was diverted; but Ahaz proceeding from evil to worse, the two kings made a fresh attack upon him. Rezin marched to Elath, a noted seaport on the Red Sea, and peopled it with Syrians. Pekah attacked Ahaz' army and killed 120,000 of them in one day, besides Maasciah his son, and carried off 200,000 prisoners, men, women and children. Moved with the remonstrance of Oded the prophet, the princes of Israel, Azariah, Bercchiah, Jehizkiah, and Amasa, persuaded the troops to dismiss their prisoners; and they accordingly clothed and fed them, and brought them back comfortably to Judah. Meanwhile the Edomites from the south ravaged the country, and carried off a number of the people for slaves. The Philistines from the west invaded the low country, adjacent to their territories, and the south; and took Bethshemesh, Ajalon, Gederath, Shocho, Timnath, and Gimzo, and peopled them with a colony of their nation.

(3) **Becomes a Vassal.** In his distress, Ahaz grew more and more wicked; he sought not to the Lord; but, stripping the temple and city of all the gold he could find, he sent it as a present to Tiglath-pileser, king of Assyria; he surrendered himself his vassal, and begged his assistance against his enemies. Accordingly Tiglath-pileser attacked and defeated the Syrians that distressed him in the East; but, by imposing on his

kingdom a tribute, he rather hurt than helped him. Ahaz went to Damascus to congratulate the Assyrian monarch on his victory over Syria, and, observing there an idolatrous altar which greatly suited his taste, he sent off a plan of it to Urijah the high priest, ordering him to form one similar, and to have it finished before he returned to Jerusalem. Ahaz ordered it to be placed in the room of the brazen altar erected by Solomon, and to offer all the sacrifices thereon. To gratify the king of Assyria who, it seems, returned him his visit, he turned about the royal entrance to the court of the temple; he took away the covert of the Sabbath, where, it seems, the priests stood to read the law, or the royal family to hear it; he disgraced the brazen lavers and sea by removing their pedestals, and setting them on the earth, or upon a pavement of stone.

(4) **Idols of Syria.** Proceeding in his wickedness, he sacrificed to the idols of Syria, which, he imagined, had been the authors of his calamities, in order to render them more favorable; he brake in pieces the sacred vessels; he shut in every corner of the temple, and erected altars in every corner of Jerusalem and city of Judah, for burning incense.

(5) **Death.** He died in the 16th year of his reign, and was buried in Jerusalem; but had not the honor of interment in the royal tombs (2 Kings xv:37; xvi; 2 Chron. xxviii; Is. vii). It is contended by some that there are differences between the account of Ahaz in the Book of Kings and the alleged later account in Chronicles. "The Syrians carry away a large number of captives, and Pekah slays 120,000 in one day and carries away 200,000 captives, who, however, are sent back at the advice of a prophet. The invasions have no political motive assigned, they are a punishment for the king's sin, while the figures are altogether incredible. Tiglath-pileser is called in, not to crush the coalition, but to help him against the Philistines and Edomites. He did not help him, however, but apparently came against him, and was bought off with tribute. The religious apostasy of Ahaz comes out in much darker colors, and the account is really in conflict with the older. He burns his children, and not his son merely, in the fire; closes the temple and destroys its vessels, though we know that he took great interest in its services; and worships the gods of Damascus because of the success of the Syrians in war, though when Ahaz visited Damascus their power had been utterly broken. Of all this the older history says nothing" (A. S. Peake, *Hastings' Bib. Dict.*). But although there are differences there may not of necessity be contradictions.

(6) **Character.** It would appear as though Ahaz was the most corrupt monarch that had hitherto appeared in Judah. He respected neither Jehovah, the law, nor the prophets; he broke through all the restraints which law and custom had imposed upon the Hebrew kings, and had regard only to his own depraved inclinations. He introduced the religion of the Syrians into Jerusalem, erected altars to the Syrian gods, altered the temple in many respects after the Syrian model, and at length ventured to shut it up altogether. Such a man could not exercise that *faith* in Jehovah, as the political head of the nation, which ought to animate the *courage* of a Hebrew king.

2. A great-grandson of Jonathan, son of King Saul. He was one of the four sons of Micah, and father of Jehoadah or Jarah (1 Chron. viii:35, 36; ix:42).

AHAZIAH (ā-ha-zī'ah), (Heb. אַחֲזִיאָה, *akh-az-yaw'*, whom Jehovah sustains).

1. Son and successor of Ahab, and eighth king of Israel (1 Kings xxii:40, 51). He reigned two years (B. C. 853-852). It seems that Jezebel exercised over her son the same influence which had guided her husband; and Ahaziah pursued the civil courses of his father.

(1) **Revolt.** The most signal public event of his reign was the revolt of the Moabites, who took the opportunity of the defeat and death of Ahab to discontinue the tribute which they had paid to the Israelites. Ahaziah became a party in the attempt of Jehoshaphat, king of Judah, to revive the maritime traffic by the Red Sea; in consequence of which the enterprise was blasted, and came to nothing (2 Chron. xx:35, 37).

(2) **Consults Weather Oracle.** Soon after Ahaziah, having been much injured by a fall from the roof-gallery of his palace, had the infatuation to send to consult the oracle of Baalzebub, the god of Ekron, respecting his recovery (2 Kings i:2). But the messengers were met and sent back by Elijah, who announced to the king that he should rise no more from the bed on which he lay (2 Kings i:4). He was succeeded by his brother Jehoram (2 Kings i:17; 2 Chron. xx:35).

2. Otherwise Jehoahaz (2 Chron. xxi:17; xxv:23), son of Jehoram by Athaliah, daughter of Ahab and Jezebel, and sixth king of Judah (2 Kings viii:24-27).

(1) **Short Reign.** He reigned but one year (B. C. 843), and that in suffering himself in all things to be guided by the wicked counsels of his idolatrous mother, Athaliah. He cultivated the connections which had unhappily grown up between the two dynasties, and which had now been cemented by marriage. Hence he joined his uncle Jehoram of Israel in an expedition against Hazael, king of Damascus-Syria, for the recovery of Ramoth-Gilead; and afterward paid him a visit while he lay wounded in his summer palace of Jezreel.

(2) **Death.** The two kings rode out in their several chariots to meet Jehu; and when Jehoram was shot through the heart, Ahaziah attempted to escape, but was pursued, and being mortally wounded, had only strength to reach Megiddo, where he died. His body was conveyed by his servants in a chariot to Jerusalem for interment (2 Kings ix:22-28). In 2 Chron. xxii:7-9, the circumstances are somewhat differently stated; but the variation is not substantial, and requires no particular notice. It appears from that passage, however, that Jehu was right in considering Ahaziah as included in his commission to root out the house of Ahab. He was Ahab's descendant (grandson by the mother's side) both in blood and character; and his presence in Jezreel at the time of Jehu's operations is considered as an arrangement of Providence for accomplishing his doom.

AHBAN (āh'ban), (Heb. אֲחִבָּן, *akh-bawn'*, brother of the wise, *i. e.*, *discreet, amiable*); the first named of the two sons of Abishur by Abihail, of the descendants of Judah (1 Chron. ii:29), B. C. about 1471.

AHER (ā'her), (Heb. אַחֵר, *akh-air'*, after), a descendant of Benjamin (1 Chron. vii:12), the same person as Aharah (1 Chron. viii:1), or Ahiram. (See **AHIRAM**.)

AHI (ā'hī), (Heb. אֶחָי, *akh-ee'*, brotherly), the name of two men.

1. The first named of the four sons of Shamer, one of the chieftains of the tribe of Asher (1 Chron. vii:34), B. C. about 1600.

2. A son of Abdiel and one of the chieftains of the tribe of Gad, resident in Bashan (1 Chron. v:16), B. C. about 782.

AHIAH (a-hī'ah), (Heb. אֶחְיָא, *akh-ee-yaw'*, *frater Jehovah*, i. e., friend of God, 1 Sam. xiv:3, 18), son of Ahitub, and high priest in the reign of Saul, and brother and predecessor of the Abimelech whom Saul slew for assisting David. Seeing that Abimelech, a son of Ahitub, was also high priest in the same reign (1 Sam. xxii:12), some have thought that both names belong to the same person; but this seems less likely than the explanation which has just been given. There are several others of this name, but none of importance (1 Kings iv:3; 1 Chron. viii:7; 1 Kings xi:29, 30; 2 Chron. ix:29; 1 Kings xiv:2; 1 Kings xv:27, 33; 1 Chron. viii:7; 1 Chron. xxvi:20). Ahiah is also called AHIJAH (which see).

AHIAM (a-hī'am), (Heb. אֶחְיָא, *akh-ee-awm'*, perhaps for Achiab, father's brother), a son of Sharar, the Hararite, and one of David's thirty heroic warriors (2 Sam. xxiii:33; 1 Chron. xi:35), B. C. 1000. In 1 Chron. xi:35, his father is called Sacar.

AHIAN (a-hī'an), (Heb. אֶחְיָא, *akh-yawn'*, brotherly), a member of the tribe of Manasseh (1 Chron. vii:19), B. C. after 1856.

AHIEZER (ā'hī-ē'zer), (Heb. אֶחְיָזֶר, *akh-ee-eh'zer*, brother of help, i. e., helpful).

1. Son of Ammishaddai, and chief of the tribe of Dan, who came out of Egypt at the head of 72,000 men of his tribe (Num. i:12; ii:25). His offering was the same as that of his fellow-chiefs (Num. vii:66, 67; x:25).

2. Ahiezer is also found in 1 Chron. xii:3. He was a Danite chief who joined David when lying at Ziklag for fear of Saul.

AHIHUD (a-hī'hud), (Heb. אֶחְיָהוּד, *akh-ee-hood'*, brother of renown).

1. A prince of the tribe of Asher, who, with the other chiefs of tribes, acted with Joshua and Eleazer in dividing the Promised Land (Num. xxxiv:27), B. C. 1172.

2. (Heb. אֶחְיָהוּד, *akh-ee-khood'*, brother of a riddle, i. e., mysterious), a Benjamite of the family of Ehud (1 Chron. viii:7).

AHIJAH (a-hī'jah), (Heb. אֶחְיָה, *akh-ee-yaw'*, brother of Jehovah).

1. Ahijah (same name as Ahiah), a prophet residing in Shiloh in the times of Solomon and Jeroboam. He appears to have put on record some of the transactions of the former reign (2 Chron. ix:29). It devolved on him to announce and sanction the separation of the ten tribes from the house of David, as well as the foundation (1 Kings xi:29-39), B. C. 1160, and, after many years, the subversion of the dynasty of Jeroboam (1 Kings xiv:2-18). (See JEROBOAM.)

2. The last named of the five sons of Jerahmeel (1 Chron. ii:25), B. C. about 1600.

3. A son of Ahitub and high priest in the reign of Saul (1 Sam. xiv:3, 18), probably same as Abimelech (which see).

4. One of Solomon's princes (1 Kings iv:3).

5. Father of Baasha, King of Israel (1 Kings xv:27, 33), B. C. 953.

6. One of David's mighty men (1 Chron. xi:35), B. C. 1050.

7. A Levite in David's reign (1 Chron. xxvi:20), B. C. 1015.

8. One of the chief Israelites who joined in the covenant with Nehemiah (Neh. x:26), B. C. 445.

AHIKAM (a-hī'kam), (Heb. אֶחְיָקָם, *akh-ee-kawm'*, brother of rising, i. e., high; according to Gesenius, brother of the enemy), one of the four persons of distinction whom Josiah sent to consult Huldah, the prophetess (2 Kings xxii:12-14). Ahikam and his family are honorably distinguished for their protection of the prophet Jeremiah (Jer. xxvi:24; xxxix:14).

AHILUD (a-hī'lud), (Heb. אֶחְיָלוּד, *akh-ee-lood'*, brother of one born or brother of the Lydian).

1. Father of Jehoshaphat, the chronicler or recorder of the kingdom during the reigns of David and Solomon (2 Sam. viii:16; xx:24; 1 Kings iv:3; 1 Chron. xviii:15).

2. Father of Baana, one of Solomon's purveyors (1 Kings iv:12), B. C. before 1000.

AHIMAAZ (a-hīm'a-āz), (Heb. אֶחְיָמָאז, *akh-ee-mah-atz'*, brother of anger, i. e., irascible), son and successor of Zadok, who was joint high priest in the reign of David, and sole high priest in that of Solomon. His history chiefly belongs to the time of David, to whom he rendered an important service during the revolt of Absalom. David having refused to allow the ark of God to be taken from Jerusalem when he fled thence, the high priests, Zadok and Abiathar, necessarily remained in attendance upon it; but their sons, Ahimaaz and Jonathan, concealed themselves outside the city, to be in readiness to bear off to David any important information respecting the movements and designs of Absalom which they might receive from within. Accordingly, Hushai having communicated to the priests the result of the council of war, in which his own advice was preferred to that of Ahithophel (see ABSALOM), they instantly sent a girl (probably to avoid suspicion) to direct Ahimaaz and Jonathan to speed away with the intelligence. The transaction, however, was witnessed and betrayed by a lad, and the messengers were so hotly pursued that they took refuge in a dry well, over which the woman of the house placed a covering, and spread thereon parched corn. She told the pursuers that the messengers had passed on in haste; and when all was safe, she released them, on which they made their way to David (2 Sam. xv:27-36; xvii:17-20). As may be inferred from his being chosen for this service, Ahimaaz was swift of foot. Of this we have a notable example soon after, when, on the defeat and death of Absalom, he prevailed on Joab to allow him to carry the tidings to David. Another messenger, Cushai, had previously been dispatched, but Ahimaaz outstripped him, and first came in with the news. He was known afar off by the manner of his running, and the king said, 'He is a good man, and cometh with good tidings;' and this favorable character is justified by the delicacy with which he waived that part of his intelligence concerning the death of Absalom, which he knew would greatly distress so fond a father as David (2 Sam. xviii:19-29).

AHIMAN (a-hī'man), (Heb. אֶחְיָמָן, *akh-ee-man'*, brother of a gift, i. e., liberal).

1. One of the three famous Anakim giants dwelling at Hebron, seen by the spies and Caleb (Num. xiii:22), B. C. about 1600. They were afterward exterminated by Joshua (Josh. xi:21), and themselves slain by the tribe of Judah (Judg. i:10).

2. One of the Levitical Temple gate-keepers after the exile (1 Chron. ix:17), B. C. about 1593.

AHIMELECH (a-him'e-lĕk), (Heb. אֶחֱיָמֶלֶךְ, *akh-ee-meh'lek*, brother of the king, i. e., the king's friend.

1. Ahimelech, son of Ahitub, and brother of Ahiah, who was most probably his predecessor in the high priesthood. (See AHIAH.) When David fled from Saul, he went to Nob, a city of the priests in Benjamin, where the tabernacle then was; and by representing himself as on pressing business from the king, he obtained from Ahimelech, who had no other, some of the sacred bread which had been removed from the presence-table. He was also furnished with the sword which he had himself taken from Goliath, and which had been laid up as a trophy in the tabernacle (1 Sam. xxi:1-9). These circumstances were witnessed by Doeg, an Edomite in the service of Saul, and were so reported by him to the jealous king as to appear acts of connivance at, and support to, David's imagined disloyal designs. Saul immediately sent for Ahimelech and the other priests then at Nob, and laid this treasonable offence to their charge; but they declared their ignorance of any hostile designs on the part of David toward Saul or his kingdom. This, however, availed them not; for the king commanded his guard to slay them. Their refusal to fall upon persons invested with so sacred a character might have brought even Saul to reason; but he repeated the order to Doeg himself, and was too readily obeyed by that malignant person, who, with the men under his orders, not only slew the priests then present, eighty-six in number, but marched to Nob, and put to the sword every living creature it contained. The only priest that escaped was Abiathar, Ahimelech's son, who fled to David, and afterward became high priest (1 Sam. xxii:9-20). (See ABIATHAR.)

2. A Hittite, one of David's warriors, whom David invited to accompany him at night into the camp of Saul in the wilderness of Ziph; but Abishai seems alone to have gone with him (1 Sam. xxv:7), B. C. about 1000.

AHINADAB (a-hin'a-dăb), (Heb. אֶחֱיָנָדָב, *akh-ee-naw-dawb'*, liberal brother), one of the twelve officers who, in as many districts into which the country was divided, raised supplies of provisions in monthly rotation for the royal household. Ahinadab's district was the southern half of the region beyond the Jordan (1 Kings iv:14).

AHINOAM (a-hin'o-ăm), (Heb. אֶחֱיָנוֹם, *akh-ee-no'am*, brother of grace).

1. A woman of Jezreel, one of the wives of David, and mother of Amnon. She was taken captive by the Amalekites when they plundered Ziklag, but was recovered by David (1 Sam. xxv:43; xxvii:3; xxx:5; 2 Sam. ii:2; iii:2). After Saul's death Ahinoam and Abigail went up to Hebron with David, and there Ahinoam gave birth to David's firstborn, Amnon (1 Sam. xxv:43; xxvii:3; xxx:5; 2 Sam. ii:2; iii:2; 1 Chron. iii:1).

2. Daughter of Ahimaaz and wife of Saul (1 Sam. xiv:50).

AHIO (a-hi'o), (Heb. אֶחֱיָיֹ, *akh-yo'*, brotherly), one of the sons of Abinadab, who, with his brother Uzzah, drove the new cart on which the ark was placed when David first attempted to remove it to Jerusalem. Ahio went before to guide the oxen, while Uzzah walked by the cart (2 Sam. vi:3, 4). (See UZZAH.)

AHIRA (a-hi'ra), (Heb. אֶחֱיָרָא, *akh-ee-rah'*, brother of evil, i. e., unlucky), chief of the tribe of Naphtali when the Israelites quitted Egypt (Num. i:15; Num. ii:29).

AHIRAM (a-hi'ram), (Heb. אֶחֱיָרָם, *akh-ee-rawm'*, brother of the height, or high), a son of Bela and grandson of Benjamin (Num. xxvi:38), perhaps the same with Aharah (1 Chron. viii:1), with Aher (1 Chron. vii:12), and with Ehi (Gen. xlvi:21).

AHIRAMITE (a-hi'ram-ite), (Heb. אֶחֱיָרָמִי, *akh-ee-raw-mee'*), a descendant of Ahiiram (Num. xxvi:38).

AHISAMACH (a-his'a-măk), (Heb. אֶחֱיָסַמַּח, *akh-ee-saw-marwk'*, brother of help, i. e., aiding), the father of Aholiab, the Danite, one of the famous workmen upon the tabernacle. (Ex. xxxi:6; xxxv:34; xxxviii:23), B. C. before 1657.

AHISHAHAR (a-hish'a-här), (Heb. אֶחֱיָשָׁחַר, *akh-ee-shakh'ar*, brother of the dawn, i. e., early), a warrior, son of Bilhan, the grandson of Benjamin (1 Chron. vii:10), B. C. before 1658.

AHISHAR (a-hi'shar), (Heb. אֶחֱיָשָׁר, *akh-ee-shaw'r'*, brother of song, or of the upright), the ruling officer over Solomon's household (1 Kings iv:6).

AHITHOPHEL (a-hith'o-phĕl), (Heb. אֶחֱיָהוּפֶל, *akh-ee-tho'fel*, brother of foolishness, i. e., foolish), Sept. Ἀχιτόφελ, *achitophel*, the very singular name of a man who, in the time of David, was renowned throughout all Israel for his worldly wisdom.

(1) **Political Sagacity.** He is, in fact, the only man mentioned in the Scriptures as having acquired a reputation for political sagacity among the Jews; and they regarded his counsels as oracles (2 Sam. xvi:23). He was of the council of David; but was at Giloh, his native place, at the time of the revolt of Absalom, by whom he was summoned to Jerusalem.

(2) **Defection.** And it shows the strength of Absalom's cause in Israel that a man so capable of foreseeing results, and estimating the probabilities of success, took his side in so daring an attempt (2 Sam. xv:12). The news of his defection appears to have occasioned David more alarm than any other single incident in the rebellion. He earnestly prayed God to turn the sage counsel of Ahithophel 'to foolishness' (probably alluding to his name), and being immediately after joined by his old friend Hushai, he induced him to go over to Absalom with the express view that he might be instrumental in defeating the counsels of this dangerous person (xv:31-34). Psalm lv:12-14 is supposed to contain a further expression of David's feelings at this treachery of one whom he had so completely trusted, and whom he calls 'My companion, my guide, and my familiar friend.' The detestable advice which Ahithophel gave Absalom to appropriate his father's harem, committed him absolutely to the cause of the young prince, since after that he could hope for no reconciliation with David (2 Sam. xvi:20-23). His proposal as to the conduct of the war undoubtedly indicated the best course that could have been taken under the circumstances; and so it seemed to the council, until Hushai interposed with his plausible advice, the object of which was to gain time to enable David to collect his resources. (See ABSALOM.)

(3) **Suicide.** When Ahithophel saw that his counsel was rejected for that of Hushai, the far-

seeing man gave up the cause of Absalom for lost; and he forthwith saddled his ass, returned to his home at Giloh, deliberately settled his affairs, and then hanged himself, and was buried in the sepulchre of his fathers (B. C. 1023), (2 Sam. xvii). This is the only case of suicide which the Old Testament records, unless the last acts of Samson and Saul may be regarded as such.

AHITOB (a-hi'tob). See AHITUB 3.

AHITUB (a-hi'tub), (Heb. אֶחֱיָבוּב, *akh-ee-toob'*, brother of goodness, or benignity, *i. e.*, benign).

1. Son of Phinehas, and grandson of the high-priest Eli. His father Phinehas having been slain when the ark of God was taken by the Philistines, he succeeded his grandfather Eli (B. C. 1141) and was himself succeeded by his son Ahiab (1 Sam. xiv:3), B. C. 1093.

2. Ahitub was also the name of the father of Zadok, who was made high-priest after the death of Abimelech (2 Sam. viii:17; 1 Chron. vi:8). There is not the slightest ground for the notion that this Ahitub was ever high-priest himself—indeed, it is historically impossible.

3. Another Ahitub, son or descendant of Amariah and father of another Zadok (1 Chron. vi:11, 12; Ezra vii:2).

AHLAB (äh'läb), (Heb. אֶחְלָב, *akh-lawb'*, fatness, *i. e.*, fertile), a city of Asher, identified by Robinson as *el-Jish*, in Upper Galilee, near Safed (Judg. i:31).

AHLAI (äh'läi), (Heb. אֶחְלָי, *akh-lah'ee*, Oh that! wishful, ornamental), the name of a woman and also of a man.

1. Daughter of Sheshan, whom he married to his Egyptian slave, Jarha (1 Chron. ii:31, 35).

2. The father of Zabab, one of David's body-guard (1 Chron. xi:41), B. C. before 1046.

AHOAH (a-hö'ah), (Heb. אֶחְוָה, *akh-o'akh*, brotherly), son of Bela, son of Benjamin (1 Chron. viii:4). He is called Ahiah (verse 7). Perhaps he is the Iri of 1 Chron. vii:7. (B. C. before 1856.)

AHOHITE (a-hö'hite), (Heb. אֶחְוִיטִי, *akh-o-khee'*), a descendant of Ahoah. The name was applied to Dodo or Dodai, who was one of Solomon's captains (1 Chron. xxvii:4).

AHOLAH (a-hö'lah) and **AHOLIBAH** (a-hö'l-i-bah), (Heb. אֶחְוֵלָה *a-hol aw'*, her own tent, and אֶחְוֵלָבָה, *oholiäb'*), two fictitious or symbolical names adopted by Ezekiel (xxiii:4) to denote the two kingdoms of Samaria (Israel) and Judah. There is a significant force in these names which must be noted. Aholah, אֶחְוֵלָה, is usually rendered "a tent," but more properly *tentorium suum* (habet illa), 'she has her own tent or temple,' signifying that she has a tent or tabernacle of her own or of human invention. Aholibah, אֶחְוֵלָבָה, means, 'my tent, *i. e.*, temple, is in her,' that is to say—*I, Jehovah, have given her a temple and religious service.*

They are both symbolically described as lewd women, adulteresses, prostituting themselves to the Egyptians and the Assyrians, in imitating their abominations and idolatries; wherefore Jehovah abandoned them to those very people for whom they showed such inordinate and impure affection. They were carried into captivity, and reduced to the severest servitude. But the crime of Aholibah was greater than that of Aholah, for she possessed more distinguished privileges, and refused to be instructed by the awful example of her sister's ruin. The allegory is an epitome of the history of the Jewish church.

AHOLIAB (a-hö'li-äb), (Heb. אֶחְוֵלָבָה, *o-hol-awb'*, tent of his father), of the tribe of Dan, a skillful artificer appointed along with Bezaleel to construct the tabernacle (Exod. xxxv:34).

AHOLIBAMAH (ä'ho-lïb'a-mah), (Heb. אֶחְוֵלָבָה מַרְוֹ, *o-hol-e-baw-marw'*, tent of the height), probably the second of the three wives of Esau (Gen. xxxvi:2, 25), B. C. about 1064. In the earlier narrative she is called Judith (Gen. xxvi:34). We must regard the concluding list of the genealogical table as a list of the names of places and not of persons (Gen. xxxvi:40-43).

AHUMAI (a-hü'ma-i), (Heb. אֶחְמוּי, *akh-oo-mah'ee*, brother of water), one of the two sons of Jahath, a Zorathite, a descendant of Judah (1 Chron. iv:2).

AHUZAM (a-hü'zam), (Heb. אֶחְזָם, *akh-ooz-zawm'*, their possession), son of Ashur, a descendant of Judah, father or founder of Tekoa (1 Chron. iv:6).

AHUZZATH (a-hüz'zath), (Heb. אֶחְזָזָת, *akh-ooz-zath'*, a possession), the 'friend' of Abimelech II, king of Gerar, who attended him on his visit to Isaac (Gen. xxvi:26). In him occurs the first instance of that unofficial but important personage in ancient Oriental courts, called 'the king's friend,' or favorite. Several interpreters, following the Chaldee and Jerome, take *Ahuzzath* to be an appellative, denoting a *company of friends*, who attended Abimelech.

AI (ä'i), (Heb. אֵי, *ah'ee*), Gen. xii:8; xiii:3; Josh. vii:2-5; viii:1-29; x:1, 2; xii:9; Ezra ii:28; Neh. vii:32; Jer. xlix:3), a city of the Canaanites, which lay east of Bethel. It existed in the time of Abraham, who pitched his tent between it and Bethel (Gen. xii:8; xiii:3); but it is chiefly noted for its capture and destruction by Joshua (vii:2-5; viii:1-29). This, as a military transaction, is noticed elsewhere (see *AMBUSCADE*). At a later period Ai was rebuilt, and is mentioned by Isaiah (x:28), and also after the captivity. The site was known, and some scanty ruins still existed in the time of Eusebius and Jerome, but Dr. Robinson was unable to discover any certain traces of either. He remarks (*Bib. Researches*, ii:313), however, that its situation with regard to Bethel may be well determined by the facts recorded in Scripture. That Ai lay to the east of Bethel is distinctly stated; and the two cities were not so far distant from each other but that the men of Bethel mingled in the pursuit of the Israelites when they feigned to flee before the king of Ai, and thus both cities were left defenseless (Josh. viii:17); yet they were not so near but that Joshua could place an ambush on the west (or southwest) of Ai, without its being observed by the men of Bethel while he himself remained behind in a valley, to the north of Ai (Josh. viii:4, 11-13). A little to the south of a village called Deir Diwan, and one hour's journey from Bethel, the site of an ancient place is indicated by reservoirs hewn in the rock, excavated tombs, and foundations of hewn stone. This, Dr. Robinson inclines to think, may mark the site of Ai, as it agrees with all the intimation as to its position.

It is a hill of stones, Lee-el-Hajjar, a quarter of an hour from Beitin (Bethel) and less than four hours from Ain-es-Sultân, by way of Jericho. Near it, on the north, is the deep Wady-el-Mutyâh, and towards the southwest other smaller wadys, in which the ambushade of the Israelites might easily have been concealed.

AIAH (a-ī'ah), (Heb. אִיָּאֵה, *ah-yaw'*, a cry, often hawk).

1. Father of Rizpah, who was Saul's concubine. David delivered her children to the Gideonites, to be hanged before the Lord (2 Sam. xxi:8-11).

2. Son of Zibeon, son of Seir, the Horite (B. C. about 1500).

AIATH (a-ī'ath), (Heb. אִיָּאֵת, *ah-yawth'*, Is. x:28), another form of the city Ai. (See AI.)

AIJA (a-ī'ja), (Heb. אִיָּאֵ, *ah-yaw'*, Neh. xi:31), probably like Aiath, another variation of the name Ai (Neh. xi:31).

AIJALON (āj'j'a-lōn), another form of the city AJALON (which see).

AIJELETH SHAHAR (āj'j'a-lēth shā'har), (Heb. אִיָּלֵת שָׁהָר, *ah-yeh-leth'*, hind; *hash-shakh'ar*, dawn (Ps. xxii, title), 'Hind of the dawn,' i. e., the rising sun, found only once in the Bible as the introductory verse or title of Ps. xxii. It was used to describe to the musician the melody to which the psalm was to be played (see MUSIC).

AIL (ā'il), (Heb. אֵיל, *a'yil'*, deer, generically, according to Dr. Shaw. (See FALLOW DEER.)

AIN (ā'in), (Heb. אֵינַי, *ah'yin'*, a fountain, literally, an eye).

1. One of the landmarks of the eastern boundary of Palestine (Num. xxxiv:11). It is probably *Ain-el' Azy*, the main source of the Orontes.

2. A city first assigned to the tribe of Judah (Josh. xv:32); and afterward to Simeon (Josh. xix:7; 1 Chron. iv:32). It was one of the Levitical cities (Josh. xxi:16).

Ashan takes the place of Ain in 1 Chron. vi:59. It is situated in the northeast of Canaan between Riblah and the Sea of Gennesareth.

AIR (âir), (Gr. ἀήρ, *ah-ayr'*), the atmosphere as opposed to the ether (*αιθήρ, ay-thayer'*), or higher and purer region of the sky (Acts xxii:23; 1 Thess. iv:17; Rev. ix:2; xvi:17). (See WINDS.)

The air or atmosphere surrounding the earth is often denoted by the word *heaven*; so *the birds of the heaven*—for *the birds of the air*. God rained fire and brimstone on Sodom from heaven, that is, from *the air* (Gen. xix:24). "Let fire come down from heaven," that is, from *the air* (2 Kings i:10). Moses menaces Israel with the effects of God's wrath, by destruction with a pestilential air (Deut. xxviii:22), or perhaps with a scorching wind, producing mortal diseases; or with a blast which ruins the corn (1 Kings viii:37). (See WINDS.)

Figurative. To "beat the air" and to "speak in the air" (1 Cor. ix:26; xiv:9) are modes of expression used in most languages, signifying—to speak or act without judgment, or understanding; or to no purpose; to fatigue ourselves in vain. "The powers of the air" (Eph. ii:2) probably mean devils, who exercise their powers principally in the air; exciting winds, storms, and tempests, or other malign influences (see Job i:7), and to which, perhaps, the apostle may allude; if it be not rather an accommodation to the Jewish belief which was current in his days, that the air was the abode of evil spirits. (See ANGEL.)

AIRUS (a-ī'rus), (comp. Jairus of the New Testament), one of the servants of the Temple whose sons are said to have returned from the Captivity (1 Esdr. v:31), probably a corruption of Gahar of the genuine text, Ezra ii:47.

AJAH (ā'jah), same as AIAH (Gen. xxxvi:24).

AJALAH (ā'ja-lah), (Heb. אִיָּאֵלָה, *ah-yaw-law'*, hind), in Gen. xlix:21; 2 Sam. xxii:34; Job xxxix:1; Ps. xviii:13; Prov. v:19; Cant. ii:7; Jer. xiv:5; Habak. iii:19. (See HART.)

AJALON (āj'a-lon), (Heb. אִיָּאֵלֹן, *ah-yaw-lone'*), place of deer, or oaks.

1. Town and valley in the tribe of Dan (Josh. xix:42), which was given to the Levites (Josh. xxi:24; 1 Chron. vi:69). It was not far from Bethshemesh (2 Chron. xxviii:18), and was one of the places which Rehoboam fortified (2 Chron. xi:10), and among the strongholds which the Philistines took from Ahaz (2 Chron. xxviii:18). But the town, or rather the valley to which the town gave name, derives its chief renown from the circumstance that when Joshua, in pursuit of the five kings, arrived at some point near Upper Beth-horon, looking back upon Gibeon and down upon the noble valley before him, he uttered the celebrated command: 'Sun, stand thou still on Gibeon, and thou moon, in the valley of Ajalon' (Josh. x:12). From the indications of Jerome, who places Ajalon two Roman miles from Nicopolis, on the way to Jerusalem, joined to the preservation of the ancient name in the form of Yâlo, Dr. Robinson (*Bibl. Researches*, iii:63) appears to have identified the valley and the site of the town. From a house-top in Beit Ur (Beth-horon) he looked down upon a broad and beautiful valley, which lay at his feet, towards Ramleh. This valley runs out west by north through a tract of hills, and then bends off southwest through the great western plain. It is called Merj Ibu'Omeir. Upon the side of the long hill which skirts the valley on the south, a small village was perceived, called Yâlo, which cannot well be any other than the ancient Ajalon; and there can be little question that the broad wady to the north of it is the valley of the same name.

2. A city of the tribe of Zebulun (Judg. xii:12). It has been identified as the modern Jalun.

AKAN (ā'kân), (Heb. אָקָן, *aw-kawn'*, twisted), son of Ezer, son of Seir, the Horite of Idumæa (Gen. xxxvi:27). He is elsewhere called Jakan (1 Chron. i:42).

AKKUB (āk'kub), (Heb. אָקֻב, *ak-koob'*, insidious, a contracted form of Jacob).

1. Son of Elioenai, of the family of David (1 Chron. iii:24).

2. A porter in Solomon's Temple (1 Chron. ix:17).

3. A family of hereditary porters in the Temple (Ezra ii:42; Neh. vii:45).

4. The chief of a family of the Nethinim who came up to Jerusalem after the exile (Ezra ii:45).

5. A priest employed by Ezra to make the people understand the law (Neh. viii:7).

AKRABBIM (a-krâb'bim), (Heb. אַכְרַבִּים, *ak-rab-beem'*, scorpion, Josh. xv:3; xxxiv:4), an ascent, hill, or chain of hills, which, from the name, would appear to have been much infested by scorpions and serpents, as some districts in that quarter certainly were (Deut. viii:15; Comp. Volncy, ii:256). It was one of the points which are only mentioned in describing the frontier line of the Promised Land southward (Judg. i:36). Shaw conjectures that Akrabbim may probably be the same with the mountains of Akabah, by which he understands the easternmost range of the μέλανα ὄρη, 'black mountains' of Ptolemy, extending from Paran to Judæa.

This range has lately become well known as the mountains of Edom, being those which bound

the great valley of Arabah on the east (*Travels*, ii:120). More specifically, he seems to refer Ak-rabbim to the southernmost portion of this range, near the fortress of Akabah, and the extremity of the eastern gulf of the Red Sea; where, as he observes, 'from the badness of the roads, and many rocky passes that are to be surmounted, the Mohammedan pilgrims lose a number of camels, and are no less fatigued than the Israelites were formerly in getting over them.'

Burckhardt (*Syria*, p. 509) reaches nearly the same conclusion, except that he rather refers 'the ascent of Ak-rabbim,' to the acclivity of the western mountains from the plain of Akabah. This ascent is very steep, 'and has probably given to the place its name of Akabah, which means a cliff, or steep declivity.' The probability of this identification depends upon the question, whether the southeastern frontier of Judah would be laid down so far to the south in the time of Moses and Joshua. If so, the identification is fair enough; but if not, it is of no weight or value in itself. The apparent analogy of names can be little else than accidental, when the *signification* in the two languages is altogether different.

AKROTHINION (äk'ro-thin'i-on), (Gr. Ἀκροθίνιον, *ak-roh-thin'ee-on*). This Greek word, which occurs in Heb. vii:4, means *the best of the spoils*. The Greeks, after a battle, were accustomed to collect the spoils into a heap, from which an offering was first made to the gods; this was the ἀκροθίνιον (Xenoph., *Cyrop.* vii:5, 35; Herodot. viii:121, 122; Pind. *Nem.* 7, 58). In the first cited case, Cyrus, after the taking of Babylon, *first* calls the magi, and commands them to choose the ἀκροθίνια of certain portions of the ground for sacred purposes.

ALABASTER (äl'a-bäs'ter), (Gr. ἀλάβαστρον), a genus of fossils having the color of the human nail, nearly allied to marbles, and, according to Pliny, found in the neighborhood of Thebes, in Egypt, and about Damascus in Syria. This material being very generally used to fabricate vessels for holding unguents, and perfumed liquids, many vessels were called alabaster, though made

Alabaster Vessels.

of a different substance, as gold, silver, glass, etc. In Matt. xxvi:6, 7; Mark xiv:3; Luke vii:37, we read that, Jesus being at table in Bethany, in the house of Simon the leper, a woman (Mary, sister of Lazarus, John xii:3) poured an alabaster box of precious ointment on his head. Mark says "she brake the box," signifying, probably, that the seal upon the box, or upon the neck of the vase or bottle, which kept the perfume from

evaporating, had never been removed, but was, on this occasion, *first opened*.

ALAMETH (a-lä'meth), (properly Alemeth), son of Becher, grandson of Benjamin (1 Chron. vii:8).

ALAMMELECH (a-läm'me-lëch), (Heb. אלמלך, *al-lam-meh'lek*, oak of [the] king, or king's oak), a town in Asher, marked at the present time by the Wady-el-Melek, six miles inland from Hhaiffa.

ALAMOTH (äl'a-möth), (Heb. אלמות, *al-a-mothi'*, virgins), either a musical instrument or a melody (Ps. xlv, title; 1 Chron. xv:20).

ALCIMUS or **JACIMUS** (äl'ci-müs), (Gr. Ἀλκιμος, *al-kee-mos'*, and Ἰάκειμος, *ee-a'ky-mos*, Joseph. *Antiq.* xii:9, 3, Græcized forms of Eliakim and Joachim—names often interchanged in Hebrew), a usurping high-priest of the Jews in the time of Judas Maccabæus. (See MACCABEES; PRIEST, HEBREW PRIESTHOOD.)

ALEMA (äl'e-ma), a city in Gilead beyond Jordan (1 Macc. v:26).

ALEMETH (äl'e-mëth or a-lë'meth), (Heb. אלמת, *aw-leh'meth*, covering, otherwise adolescence), the name of two persons and also of a place.

1. A son of Jehoadah, or Jarah, a Benjamite descended from Jonathan, the son of Saul (1 Chron. viii:36; ix:42).

2. The last named of the nine sons of Becher, the son of Benjamin (1 Chron. vii:8), B. C. after 1856. (Same as ALAMETH.)

3. A city of refuge, in the tribe of Benjamin (1 Chron. vi:60), called Almon in Josh. xxi:18.

ALEXANDER (äl-egz-än'der), (Gr. Ἀλέξανδρος, *A-lex'an-dros*, helper of men).

1. *Alexander the Great*, son of Philip and Olympias, king of Macedon, ruler of the greatest empire of antiquity.

(1) *In Prophecy*. He was denoted in the prophecies of Daniel, by a leopard with four wings, signifying his great strength, and the unusual rapidity of his conquests, Chap. vii:6; also as a one-horned he-goat, running over the earth so swiftly as not to touch it; attacking a ram with two horns, overthrowing him, and trampling him under foot, without any being able to rescue him, Chap. viii:4-7. The he-goat prefigured Alexander; the ram, Darius Codomannus, the last of the Persian kings. In the statue beheld by Nebuchadnezzar, in a dream, Chap. ii:39, the belly of brass was the emblem of Alexander, and the legs of iron designated his successors. He was appointed by God to destroy the Persian empire, and to substitute the Grecian monarchy.

Tetradrachm of Alexander the Great.

(2) *Victories*. He reduced Tyre and Gaza and treated the conquered cities with exceptionally cruel severity. He next set out for Jerusalem, intending to punish the High-Priest Jaddus for refusing to submit to him.

The Lord, in a dream, commanded Jaddus to open the gates to the conqueror, and, dressed in

his pontifical ornaments, attended by the priests, in their formalities, at the head of his people, to receive Alexander in triumph. Jaddus obeyed; and Alexander, seeing from a distance this company advancing, was struck with admiration, and approaching the high-priest, he saluted him first, then adored God, whose name was engraven on a thin plate of gold worn by the high-priest on his forehead. The people, in the meanwhile, surrounded Alexander, with great acclamations.

(5) **His Vision.** The kings of Syria, who accompanied him, and the great officers about Alexander, could not comprehend the meaning of his conduct. Parmenio alone ventured to ask, Why he, to whom all people prostrated themselves, had prostrated himself before the high-priest of the Jews? Alexander replied that he paid this respect to God and not to the high-priest, "for," added he, "while I was yet in Macedonia I saw the God of the Jews, who appeared to me in the same form and dress as this high-priest, he encouraged me to march my army with expedition into Asia, promising, under his guidance, to render me master of the Persian empire. For this reason, as soon as I perceived this habit, I recollected the vision, and understood that my undertaking was favored by God, and that, under his protection, I might expect very soon to obtain the Persian empire, and happily to accomplish all my designs."

(4) **Offered Sacrifice.** Having said this, Alexander accompanied Jaddus into the city, and offered sacrifices in the temple, punctually conforming to the directions of the priests, and leaving to the high-priest the honors and functions annexed to his dignity. Jaddus showing him the prophecies of Daniel, in which it was said that a Grecian prince should destroy the Persian empire, the king was confirmed in his opinion, that God had chosen him to execute that great work.

(5) **Favors to the Jews.** At his departure he bade the Jews ask what they would of him, but the high-priest desired only the liberty of living under his government, according to their own laws, with an exemption from tribute every seventh year, because in that year the Jews neither tilled their grounds, nor reaped their products. Alexander readily granted this request, and as they besought him to grant the same favor to the Jews beyond the Euphrates, in Babylonia and Media, he promised that privilege as soon as he had conquered those provinces. This done, he left Jerusalem and visited other cities, being everywhere received with great testimonies of friendship and submission. The Samaritans who dwelt at Sichem, observing how kindly Alexander had treated the Jews, resolved to say that they also were, by religion, Jews, for it was their practice, when they saw the affairs of the Jews prosper to boast that they were descended from Manasseh and Ephraim, but when they thought it their interest to say the contrary, they would not fail to affirm, and even to swear, that they had no relation to the Jews. They came, therefore, with many demonstrations of joy, to meet Alexander, entreated him to visit their temple and city, and petitioned him for an exemption from taxes every seventh year, because they also neither tilled nor reaped that year. Alexander replied that he had granted this exemption only to Jews, but at his return he would inquire into the matter and do them justice. (Joseph. *Antiq.* xi:8.)

(6) **Death.** The great founder of Alexandria died in his thirty-second year (B. C. 323). The empire which he then left to be quarreled for by his generals comprised the whole dominions of Persia, with the homage and obedience of Greece

superadded. But on the final settlement which took place after the battle of Ipsus (B. C. 301), Seleucus, the Greek representative of Persian majesty, reigned over a less extended district than the last Darius. Not only were Egypt and Cyprus severed from the eastern empire, but Palestine and Cœlesyria also fell to their ruler, placing Jerusalem for nearly a century beneath an Egyptian monarch. On this subject, see further notice under ANTIUCHUS.

The word Alexander, as before stated, means *the helper or rescuer of men*, denoting military prowess. It is Homer's ordinary name for Paris, son of Priam, and was borne by two kings of Macedon before the great Alexander.

2. Alexander, surnamed Balas, from his mother Bala, a personage who figures in the history of the Maccabees and in Josephus (1 Macc. x). He was the husband of Cleopatra, and claimed the throne of Syria.

3. Son of Simon, the Cyrenian, and brother of Rufus, men well known among the early Christians. He was compelled to bear the cross for our Lord (Mark xv:21).

4. One of the kindred of Annas and evidently holding some high office (Acts iv:6).

5. A Jew, or perhaps a Christian convert from Judaism, whom the mob at Ephesus, excited by Demetrius, refused to hear (Acts xix:33).

6. An Ephesian Christian, reprobated by St. Paul (1 Tim. i:20).

7. A coppersmith, probably of Ephesus, who did much mischief to St. Paul (2 Tim. iv:14). He may have been the same person as the pervert mentioned above in 1 Tim. i:20.

ALEXANDRIA (ăl'egz-än-dri'a), (Gr. Ἀλεξάνδρεια, *al-esc-and'ree-ah*), the chief maritime city, and long the metropolis of lower Egypt. (Comp. Acts vi:19; xviii:24; xxvii:6; xxviii:11). As this city owed its foundation to Alexander the Great, the Old Testament canon had closed before it existed; nor is it often mentioned in the Apocrypha, or in the New Testament. But it was in many ways most importantly connected with the later history of the Jews—as well from the relations which subsisted between them and the Ptolemies, who reigned in that city, as from the vast numbers of Jews who were settled there, with whom a constant intercourse was maintained by the Jews of Palestine. It is perhaps safe to say that, from the foundation of Alexandria to the destruction of Jerusalem, and even after, the former was of all foreign places that to which the attention of the Jews was most directed. And this appears to have been true even at the time when Antioch first, and afterwards Rome, became the seat of the power to which the nation was subject.

(1) **Situation.** Alexandria is situated on the Mediterranean, twelve miles west of the Canopic mouth of the Nile, in 31 deg. 13 min. N. lat. and 25 deg. 53 min. E. long. It owes its origin to the comprehensive policy of Alexander, who perceived that the usual channels of commerce might be advantageously altered, and that a city occupying this site could not fail to become the common emporium for the traffic of the eastern and western worlds, by means of the river Nile and the two adjacent seas, the Red Sea and the Mediterranean, and the high prosperity which, as such, Alexandria very rapidly attained, proved the soundness of his judgment, and exceeded any expectations which even he could have entertained. For a long period Alexandria was the greatest of known cities, for Nineveh and Babylon had fallen, and Rome had not yet risen to pre-eminence, and even when Rome became the mistress of the world, and

Alexandria only the metropolis of a province, the latter was second only to the former in wealth, extent and importance, and was honored with the magnificent titles of the second metropolis of the world, the city of cities, the queen of the East, a second Rome (Diod. Sic. xvii; Strab. xvii; Ammian. Marell. xxii; Hegesipp. iv:27; Joseph. *Bell. Jud.* iv:11, 5).

(2) **Seat of Commerce and Science.** Alexandria became not only the seat of commerce, but of learning and the liberal sciences. This distinction it owed to Ptolemy Soter, himself a man of education, who founded an academy, or society of learned men, who devoted themselves to the study of philosophy, literature and science. For their use he made a collection of choice books, which, by degrees, increased under his successors until it became the finest library in the world and numbered 700,000 volumes (Strab. xvii, p. 791; Euseb. *Chron.*).

(3) **Burning of the Library.** It sustained repeated losses, by fire and otherwise, but these losses were as repeatedly repaired, and it continued to be of great fame and use in those parts, until it was at length burnt by the Saracens when they made themselves masters of Alexandria in A. D. 642. Undoubtedly the Jews at Alexandria shared in the benefit of these institutions, as the Christians did afterwards, for the city was not only a seat of heathen, but of Jewish, and subsequently of Christian learning. The Jews never had a more profoundly learned man than Philo, nor the Christians men more erudite than Origen and Clement; and if we may judge from these celebrated natives of Alexandria, who were remarkably intimate with the heathen philosophy and literature—the learning acquired in the Jewish and Christian schools of that city must have been of that broad and comprehensive character which its large and liberal institutions were fitted to produce.

(4) **The Septuagint.** It will be remembered that the celebrated translation of the Hebrew Scriptures into Greek (see SEPTUAGINT) was made, under every encouragement from Ptolemy Philadelphus, principally for the use of the Jews in Alexandria, who knew only the Greek language, but partly, no doubt, that the great library might possess a version of a book so remarkable, and, in some points, so closely connected with the ancient history of Egypt. The work of Josephus against Apion affords ample evidence of the attention which the Jewish Scriptures excited.

(5) **Three Classes.** The inhabitants of Alexandria were divided into three classes: (1) The Macedonians, the original founders of the city; (2) the mercenaries who had served under Alexander; (3) the native Egyptians. Through the favor of Alexander and Ptolemy Soter, the Jews were admitted into the first of these classes, and this privilege was so important that it had great effect in drawing them to the new city (Heetaëtus, in Joseph. *Contra Apion*, I, ii).

(6) **Christian Church Founded by St. Mark.** St. Mark is said to have first preached the gospel in Egypt and founded the Christian Church in Alexandria. The Christians were very numerous in this city in the second century.

Alexandria and New Testament.

A masterpiece, whether in literature, art or life, by its very inspiration urges us to study its secret. Work on the New Testament has been tireless and abundant along two lines—one in setting forth the power, beauty and worth of the truth itself; the other in making clear the conditions which were antecedent to its deliverance,

the environment in which it was proclaimed and the results which its deliverance brought about.

Along this latter line there is one very important question: "*What did Alexandria do in the preparation of the New Testament message?*" To any one who knows anything of the thought and life of the first Christian centuries, there can be no question about the wide reaching influence of the Egyptian capital. Her schools were the pride of scholarship, and her methods the charm of both teacher and pupil. In order to prepare the way for an estimate of the influence exerted upon the preparation of the New Testament, it is necessary to linger for a moment at three points in this city—in the Jewish quarter, at the Museum and in the market place. These are critical points for the study of Alexandria's peculiar place and purpose, in the earlier part of the third century B. C., the golden age of Hellenism.

The mission of Alexandrian Judaism was peculiar. From the first it bore a conspicuous part in the history of the city. Alexander had given the Jews equal rights and privileges with other citizens at its foundation. They had their own *alabarch* or governor, who, in conjunction with the Sanhedrin, exercised control over them. At one time a wall about the Jewish quarter marked the hostility which they experienced from the Greeks and native Egyptians, because of political jealousy and religious hatred, but within it the Jews prospered financially and intellectually. Within that inner wall Plato was studied as well as Moses, and Greek was the common language.

In this northwestern part of the old city began that amalgamation which was to be serviceable for so long in the history of thought.

Here were started the questions which brought the law into comparison with philosophy, and which opened the way for the interpretation of one into the terms of the other. It was from here doubtless that the call came for the Greek version of the books of Moses. That busy, thriving section was linked in a strange way with the fortunes of the gospels and epistles.

Our use of the word museum does not lead us to think of a university, but as the muses and their priest were associated with the schools it is nothing less than the great center of learning that here opens before us. Here was a theater for lectures and great public assemblies, and also the famous library open to all who would use it, thus bringing to the very door of the Jews the wisdom and culture of the heathen world. It was a place of marked intellectual activity, and that, too, with a fascination which comes from untrammelled speculation and comparative study.

The third point of interest for us is the market-place, where wares from every part of the world were exhibited.

Greeks, Egyptians, Romans and merchants from the provinces of Asia Minor were busy in trade, and the variegated scene on the shore was matched by the harbor itself, where ships from many ports lay at anchor.

One fact invests this scene with supreme interest for us. There is everywhere one medium of communication—the Greek. Cosmopolitan as the life was, it found its unification in this. There was one language in palace, court, school, theater and shop.

The Jews, the culture of heathendom, and the language which was the common vehicle of thought, these were the factors toward the result into which we wish to make inquiry. In looking into the New Testament for marks of their influence our attention must be directed to two things: the language and the thought.

The Language of the New Testament.

It does not take a student long to discover that in reading the Greek of the New Testament he has not before him the diction of the prose classics with which he had become familiar. Not only, generally speaking, is there greater simplicity of structure, but there are peculiarities of idiom and forms of expression which at once demand attention. The whole atmosphere is changed.

There were Greek colonists in Egypt before Alexander came to it, but it was his arrival and his policy that put Greek into the foremost place and made it the language of intercourse. But it was not the pure Greek of the classics that Alexander brought to Egypt. A living language can never be insensible to its environment, and Macedonians, Egyptians, Jews and Romans, meeting in the market place, were not there to indulge in fine phrases. They were there to be understood, and they took hold of the plainest Greek they could find, and also turned some of their own words and idioms into Greek forms. Add the resultant modifications to that which already existed in the predominating type of Greek of the court and official life, viz., the Macedonian, and you have the kind of Greek which was characteristic of Alexandria, and perhaps also in some degree of other cities under the sway of Alexander's policy.

If we have rightly conceived of the position and importance of this city, it is not difficult to see how it became a new center for the diffusion of this speech. But important as this modified speech is, for it appears in the New Testament, it is not the chief point of interest in the inquiry into the development of language here. The Jews of the city were as important a factor in its commercial life as they have been ever since, where they have had an equal chance, and commerce brought them into close contact with the Greek. It was, therefore, with this later Greek that they had to do, and they gradually took it up as their own speech, coloring it, of course, largely with Hebrew idiom. It is this peculiar kind of Hebraistic Greek that appears in the Septuagint and in a less degree in the New Testament.

Surrounded as they were by Greek life and customs, and compelled to use the common medium of intercourse, it is not strange that the Jews forgot their own tongue, and the most plausible reason for the Greek version itself was this very need of the sacred books in a tongue that they could understand.

In two particulars, the Septuagint, the preparation of which ranged over perhaps a period of a hundred years, is supposed to have influenced the vocabulary of the New Testament. These two particulars are the range of vocabulary, and its significance. It would be natural to suppose that the Greek version which came into immediate and widespread use in the dispersion would have had the effect of stereotyping the speech of the Jews. That it was thus widely used, the quotations from it in the New Testament seem to show, as do also the allusions to it and reminiscences of it found all through the epistles.

If we leave out proper names and their derivatives there are 4,829 words in the New Testament vocabulary; of these, 3,850 are found in Greek previous to Aristotle (322 B. C.), that is, in the period of classic Greek. That leaves about 950 post-Aristotelian words in the New Testament; of these, 314 are found in the Septuagint.

As about one-half of this latter number occurs in the writings of the "common dialect we have

about 150 which are peculiar to the Septuagint and the New Testament." About thirty per cent of the total number of Biblical words in the New Testament occur in the Septuagint.

These figures must change the usual conception of the relation of the Septuagint to the New Testament as far as range of vocabulary is concerned. Much might be said in relation to the influence of the Hebrew idiom upon the Greek, and it is beyond question that this was, in a measure, stereotyped by the Septuagint. There is a much greater advance in vocabulary than in diction in the New Testament, though the Greek of the Acts, of James and of the Epistle to the Hebrews attains a high level of pure expression.

To be sure the writers of the New Testament were themselves Jews, and the influence of their mother tongue, the Aramaic, is evident, but beyond, and in addition to this, they carry over the familiar idioms of the Hebraistic Greek of the Old Testament.

Turning from the range of the vocabulary to the significance of it, we are no longer in the region where mere numbers can tell the whole story. Words must be weighed rather than counted. The contact of Hebrew and heathen thought compelled the transfer of the conceptions of the Old Testament into a medium which, flexible as it was, and finished as it had been, was yet a stranger to all those conceptions. Two factors were adapting the medium to its more effective use for Christ's own truth: the actual work of the translators of the Septuagint and that discussion of the relation of the Old Testament conceptions to philosophical dogmas which gave a broader, richer meaning to some of the Greek words afterwards to go into the New Testament.

These words had all their own meanings in classic Greek, but no dictionary of simple classic speech could define them. Take such a word as *πνεῦμα*, *phnyoo'mah*. Professor Jowett tells us that "to have given a Greek in the times of Socrates a notion of what was meant by Holy Spirit would have been like giving the blind a conception of colors, or the deaf of musical sounds." That very word starts in the Old Testament with a conception entirely foreign to Greek thought.

This latter connects it always with its physiological aspect: *wind, breath*. As the expression of a psychological conception it is unknown in classic Greek. Of course the New Testament has deepened and more sharply defined the word, but the beginnings of the process are in the Old Testament. The word was carried over to a new sphere by the Septuagint. The deeply interesting study of these changes is brought out in Cremer's great work, which deserves faithful usage by all New Testament students.

The center of philosophical discussion in Alexandria was the Museum. Here through all the years of the city's glory was carried on that development, refinement and adjustment of thought which demanded a developed medium of expression. All philosophy in Alexandria had a deeply theological interest, so much so that it has been denied that philosophy pure and simple could be heard there. Out of it all came the power to express in more significant forms the highest truths of which we are capable. It prepared the way for the "Logos," indeed, made that word familiar all about the Mediterranean.

It is to be noted that all that was serviceable for the New Testament was the *vehicle* of thought, not the thought itself. John's Logos differs from the Logos of Philo, but that John took a term familiar in Alexandria and Ephesus is beyond

doubt. Professor Jowett's reflection upon the language of Philo will confirm what is meant: "As we read his works the truth flashes upon us that the language of the New Testament is not isolated from the language of the world in general; the spirit rather than the letter is new, the whole, not the parts, the life more than the form. No study brings one more clearly face to face with the divine in this message from heaven to us than just this.

Such, in brief, is the part Alexandria had to take in helping toward the formation of the Greek of the New Testament. By reason of it she stands upon that line which begins in the days of Athens' glory and runs on through five hundred years of varied Greek life. Even as concerns the language in which the New Testament was written, had Christ come sooner than he actually did, the "medium" for his truth would not have been ready. The form in which we now have the New Testament belongs also to the "fullness of time." Alexandria had a definite mission in regard to that form. (See SEPTUAGINT.) (See Alexandria and the New Testament, by J. S. Riggs, *The American Journal of Theology*.)

ALEXANDRIANS (ăl'egz-ăn'dri-ans), (Acts vi: 9), Jews of Alexandria settled at Jerusalem, where they had a synagogue.

ALGUM or **ALMUG** (ăl'gum or äl'mug), (Heb. אֶלְמוּג, *al-goom-meem'*), a kind of wood which

Hiram brought from Ophir (1 Kings x:11; 2 Chron. ii:8; ix:10, 11.). The rabbins generally render it *coral*; others, *ebony* or *pine*. It certainly is not coral, for this is not proper to make musical instruments, nor to be used in rails, or a staircase, to which uses the Scripture tells us the wood was put. The pine tree is too common in Judea and the neighboring country to search for it as far as Ophir. The wood *thyinum* (by which the word is rendered in the Vulgate) is that of the citron tree, known to the ancients, and much esteemed for its odor and beauty. It came from Mauritania (Plin. xiii:16). Almug occurs in 1 Kings xv:11, 12.

Calmet is of opinion that by *almug*, or *algum*, or simply *gum*, taking *al* for an article, is to be understood oily and gummy wood, particularly of the tree which produces *gum Arabic*. It is said *gum Ammoniac* proceeds from a tree resembling that which bears myrrh, and *gum Arabic* comes from the black acacia, which he takes to be the same as the Shittim wood, frequently mentioned by Moses.

ALIAH (a-li'ah), (Heb. אֲלִיָּהּ, *al-ee-yaw'*, perhaps evil), a less correct form of the name of Alvah (Gen. xxxvi:40; 1 Chron. i:51). He was the son of Shobal, a duke of Edom, descended from Esau.

ALIAN or **ALVAN** (a-li'an or äl'van), (Heb. אֲלִיָּן, *al-yawn'*, tall), a son of Shobal, a descendant of Levi (Gen. xxxvi:23; 1 Chron. i:40), B. C. about 1927.

ALLEGORY (al'le-go-ry), (Gr. Ἀλληγορέω, *al-lay-gor-eh'o*), occurs only once in Scripture (Gal. iv: 24), where the apostle, referring to the story of Hagar and Ishmael, Sarah and Isaac, says, "Which things are to be allegorized" (Gr. ἀτινά ἐστιν ἀλληγορούμενα); a figurative form of teaching, in which from certain facts, real or imaginary, instruction is conveyed through some other application of the facts themselves. For examples of pure and mixed allegory, see Ps. lxxx; Luke xv: 11-32; John xv:1-8.

"The allegory of Melchizedek, based not on the historical personage so much as on the nature of

the two passing allusions to him, combined with the significance of the great silence elsewhere in the Old Testament as to his birth and descent, as well as of the two names, Melchizedek and Salem, all these together being made the foundation of a logical construction of the person and work of Christ as an embodiment of the preconceived idea, can hardly be considered without regard to Philo's treatment of Melchizedek as an allegory of his apparently impersonal Logos. And yet, with the expression in the 110th Psalm before us, 'Thou art a priest for ever after the order of Melchizedek,' we must allow Dr. Westcott a certain margin of justification when he maintains that the treatment of Melchizedek is typical rather than allegorical, though he appears to be too sweeping when he affirms, 'There is no allegory in this epistle.'" J. Massie, *Hastings' Bib. Dict.*) (See MELCHIZEDEK.)

ALLELUIA (ăl'le-lü'yá). See HALLELUJAH.

ALLIANCES (al-li'an-sez). From a dread lest the example of foreign nations should draw the Israelites into the worship of idols, they were made a peculiar and separate people, and intercourse and alliance with such nations were strongly interdicted (Lev. xviii:3, 4; xx:22, 23).

(1) **Mosaic Interdiction**. The tendency to idolatry was in those times so strong that the safety of the Israelites lay in the most complete isolation that could be realized, and it was to assist this object that a country more than usually separated from others by its natural boundaries was assigned to them. It was shut in by the sea on the west, by deserts on the south and east, and by mountains and forests on the north. Among a people so situated we should not expect to hear much of alliances with other nations.

(2) **Solomon and Hiram**. By far the most remarkable alliance in the political history of the Hebrews is that between Solomon and Hiram, king of Tyre. It is in a great degree connected with considerations which belong to another head. (See COMMERCE.)

(3) **Time of David**. But it may primarily be referred to a partial change of feeling which originated in the time of David, and which continued to operate among his descendants. During his wanderings he was brought into contact with several of the neighboring princes, from some of whom he received sympathy and support, which, after he ascended the throne, he gratefully remembered (2 Sam. x:2).

There was probably more of this friendly intercourse than the Scripture has had occasion to record. Such timely aid, combined with the respect which his subsequently victorious career drew from foreign nations, must have gone far to modify in him and those about him that aversion to strangers which the Hebrews generally had been led to entertain. He married the daughter of a heathen king, and had by her his favorite son (2 Sam. iii:3); the king of Moab protected his family (1 Sam. xxii:3, 4); the king of Ammon showed kindness to him (2 Sam. x:2); the king of Gath showered favors upon him (1 Sam. xxvii; xxviii; 1, 2); the king of Hamath sent his own son to congratulate him on his victories (2 Sam. viii:15). In short, the rare power which David possessed of attaching to himself the good opinion and favor of other men, extended even to the neighboring nations, and it would have been difficult for a person of his disposition to repel the advances of kindness and consideration which they made.

Among those who made such advances was

Hiram, king of Tyre; for it eventually transpires that 'Hiram was ever a lover of David' (1 Kings v:2), and it is probable that other intercourse had preceded that relating to the palace which Hiram's artificers built for David (2 Sam. v:11). The king of Tyre was not disposed to neglect the cultivation of the friendly intercourse with the Hebrew nation which had thus been opened. He sent an embassy to condole with Solomon on the death of his father, and to congratulate him on his accession (1 Kings v:1).

(4) **League with Hiram.** The plans of the young king rendered the friendship of Hiram a matter of importance, and accordingly 'a league' was formed (1 Kings v:12) between them, and that this league had a reference not merely to the special matter then in view, but was a general league of amity, is evinced by the fact that more than 250 years after a prophet denounces the Lord's vengeance upon Tyre, because she 'remembered not the brotherly covenant' (Amos i:9). Under this league large bodies of Jews and Phœnicians were associated, first in preparing the materials for the temple (1 Kings v:6-18), and afterwards in navigating the Red Sea and the Indian Ocean (1 Kings ix:26-28), and this increasing intercourse with the heathen appears to have considerably weakened the sentiment of separation, which, in the case of the Hebrews, it was of the utmost importance to maintain.

(5) **Results.** The disastrous consequences of even the seemingly least objectionable alliances may be seen in the long train of evils, both to the kingdom of Israel and of Judah, which ensued from the marriage of Ahab with Jezebel, the king of Tyre's daughter. (See AHAB; JEZEBEL.) These consequences had been manifested even in the time of Solomon, for he formed matrimonial alliances with most of the neighboring kingdoms, and to the influence of his idolatrous wives are ascribed the abominations which darkened the latter days of the wise king (1 Kings xi:1-8).

(6) **The Voice of the Prophets.** The prophets, who were alive to these consequences, often raised their voices against such dangerous connections (1 Kings xx:38; 2 Chron. xvi:7; xix:2; xxv:7, etc.; Is. vii:17); but it was found a difficult matter to induce even the best kings to place such absolute faith in Jehovah, the head of their state, as to neglect altogether those human resources and alliances by which other nations strengthened themselves against their enemies.

(7) **Blood Covenant.** From the time of the patriarchs a covenant of alliance was sealed by the blood of some victim. A heifer, a goat, a ram, a turtle dove and a young pigeon were immolated in confirmation of the covenant between the Lord and Abraham (Gen. xv:9). The animal or animals sacrificed were cut in two (except birds, ver. 10), to typify the doom of perjurers. This usage often recurs in the prophets, and there are allusions to it in the New Testament (Jer. xxxiv:18; Dan. xiii:55; Matt. xxiv:51; Luke xii:46). The perpetuity of covenants of alliance thus contracted is expressed by calling them 'covenants of salt' (Num. xviii:19; 2 Chron. xiii:5), salt being the symbol of incorruption.

(8) **Scrupulous Adherence.** The case of the Gibeonites affords an exemplary instance, scarcely equaled in the annals of any nation, of scrupulous adherence to such engagements. The Israelites had been absolutely cheated into the alliance, but, having been confirmed by oaths, it was deemed to be inviolable (Josh. ix:19). Long afterwards, the treaty having been violated by Saul, the whole nation was punished for the

crime by a horrible famine in the time of David (2 Sam. xxi:1, *sqq*). The prophet Ezekiel (xvii:13-16) pours terrible denunciations upon king Zedekiah for acting contrary to his sworn covenant with the king of Babylon. In this respect the Jews were certainly most favorably distinguished among the ancient nations, and, from numerous intimations in Josephus, it appears that their character for fidelity to their engagements was so generally recognized after the captivity as often to procure for them highly favorable consideration from the rulers of Western Asia and of Egypt.

ALLON (äl'lon), (Heb. אֵלֹן, *al-lone'*, oak; Vulg., *Quercus*; Auth. Vers., oak).

1. The Hebrew word, thus pointed, as it occurs in Gen. xxxv:8; Josh. xix:32; Is. ii:13; vi:13; xlv:14; Hos. iv:13; Amos ii:9; Zech. xi:2, was understood by the ancient translators, and has been supposed by most interpreters, to denote the oak, and there is no reason to disturb this conclusion. In our version other words are also rendered by 'oak,' particularly *Alah*, which more probably denotes the terebinth-tree. The oak is, in fact, less frequently mentioned in the original than in the A. V., where it occurs so often as to suggest that the oak is as conspicuous and as common in Palestine as in this country. But in Syria oaks are by no means common, except in hilly regions, where the elevation gives the effect of a more northern climate, and even in such circumstances it does not attain the grandeur in which it often appears in our latitudes. The 'oaks of Bashan' are in Scripture mentioned with peculiar distinction (Is. ii:3; Ezek. xxvii:6; Zech. xi:2), as if in the hills beyond the Jordan the oaks had been more abundant and of larger growth than elsewhere. This is the case even at the present day. In the hilly regions of Bashan and Gilead, Burckhardt repeatedly mentions forests of thick oaks, thicker than any forests he had seen elsewhere in Syria. (See OAK.)

2. A town on the border of Naphtali, between Keleph and Zaananim (Josh. xix:33), but perhaps only some remarkable tree as a landmark.

3. The son of Jedaiah and father of Shipli (1 Chron. iv:37).

ALLON-BACHUTH (äl'lon-bäk'uth), (Heb. אֵלֹן בְּכוּת, *al-lone'barw-kooth'*, oak of weeping), the oak beneath which Deborah, Rachel's nurse, was buried (Gen. xxxv:8).

ALLOW (äl-lou'). 'Truly ye bear witness that ye *allow* the deeds of your fathers' (Luke xi:48).

Allow has here the sense of *approving* or *praising*,—that ye *approve* the deeds of your fathers. In modern English it means merely to *permit*. However, *allow* has the meaning of praise in its original root (Latin *allaudare*, and that from "laus," *praise*. Compare our *laud*.)

The less he is worthy, the more art thou therefore *allowed* of God, and the more art thou commended of Christ (*Homilies against Contention*).—Swinton's *Bib. Hand Bk*.

ALMODAD (al-mō'dad), (Heb. אֶלְמוֹדָד, *al-mo-dawd'*, meaning unknown, perhaps agitator), son of Joktan, of the family of Shem (Gen. x:26; 1 Chron. i:20).

ALMON (äl'mon), (Heb. אֶלְמוֹן, *al-mone'*, hidden), one of the three cities which belonged to the priests in the tribe of Benjamin (Josh. xxi:18). It is supposed to be the same as the Alemeth of 1 Chron. vi:60. Jarchi and Kimchi identify it with Baharim, which name the Targum (2 Sam. iii:16) renders by Almeth—both words signify 'youth.' The site is unknown.

ALMON-DIBLATHAIM (ăl'mon-dîb'la-thā'im), (Heb. הַקְּלַיִתָּה עֲלֵמֹן, *al-mone' dib-law-thaw'yem-aw*), the fifty-first station of the Israelites on their way from Mount Hor to the plains of Moab, round by Mount Seir (Num. xxxiii:46). Probably identified with Beth-diblathaim, a Moabite city mentioned by Jeremiah (xlviii:22).

ALMOND (ă'münd), (Heb. שָׁקֵד, *shaw-kade'*, wakeful, probably from its early blossoming) (Gen. xliii:11; Num. xvii:8; Eccles. xii:5; Jer. i:11). This tree is a native of Syria and Palestine, and is highly ornamental from the beauty of its

Terebinth.

blossoms. The form of the almond would lead to its selection for ornamental carved work (Exod. xxv:33, 34; xxxvii:19), independently of its forming an esteemed esculent, as well as probably yielding a useful oil. In Eccles. xii:5, it is said, 'The almond tree shall flourish, and the fruit of the caper droop, because man goeth to his long home.' This evidently refers to the profuse flowering and white appearance of the almond tree when in full bloom, and before its leaves appear. It is hence adduced as illustrative of the hoary hairs of age, in the same way as the drooping of the fruit of the caper seems to refer to the hanging down of the head. Dr. Kitto mentions the almond among the first trees that flower in January. 'There are two species of *Amygdalus* in Palestine; the common *almond* tree, and the *peach* tree, and both are this month in blossom in every part of Palestine, on both sides of the Jordan. It was doubtless from this winter blossoming of the almond tree, not less than from the snowy whiteness of the blossoms, that the hoary head of the aged man is, by a beautiful metaphor, said in Scripture to flourish like the almond tree' (*Physic. Hist. of Palestine*).

G. E. Post, Hastings' *Bib. Dict.*, says: "The usual interpretation of Eccles. xii, 'the almond tree shall flourish,' is that the old man's hair shall turn white like the almond tree. To this Gesenius objects, that the blossom of the almond is pink, not white. He prefers to translate

the word for flourish by *spurn* or *reject*, making the old man reject the almond because he has no teeth to eat it. But this objection has no force. The pink color of the almond blossom is very light, usually mainly at the base of the petals, and fades as they open, and the general effect of the tree as seen at a distance is snowy-white. We may therefore retain the beautiful imagery which brings to mind the silver hair of the aged, and draw from the snowy blossom the promise of the coming fruit."

Figurative. In Jer. i:11, 12, the Hebrew words for almond are *Shamkade'* and *Show-Kad'*, and signify the 'waker,' in allusion to its being the first tree to wake to life in the winter. The word also contains the signification of 'watching' and 'hastening.' The almond was the emblem of the divine forwardness in bringing God's promises to pass. A similar instance in the name of another rosaceous plant is the *apricot*, which was named from *præcocia* (*early*) on account of its blossoms appearing early in the spring, and its fruit ripening earlier than its congener the peach (Pliny, xv:11).

ALMS (ămz), (Gr. ἐλεημοσύνη, *el-eh-ay-mos-oo'-nay*). The English word is an abridged form of the Greek, brought down in several successive corruptions, still to be found in the Anglo-Saxon and early English dialects: thus the Saxon translation of the original term is (Matt. vi:4) *ælmesan*; Luther's, *almsen*; Wycliffe's, *almesse*; Cranmer's, *almose*; Tyndale's, *almes*. The Greek word is derived from *ἔλεος*, pity or mercy; and hence comes to denote our manifestations of pity, namely, benefactions to the needy—'an *almes-deede*,' as it is translated in the Rheims version of the New Testament. The primary meaning of 'alms' does not, as is the case in its Greek original, appear on the face of the word, and the derivative signification only remains in the English term; so that a word which properly signified merciful feelings and merciful actions towards the indigent has, in process of time, been restricted to one particular kind of charitable deeds, denoting now scarcely anything more than giving money to beggars. This departure from the etymological meaning of the original word should be carefully borne in mind by those who undertake to expound such passages of Scripture as bear on the subject.

(1) **Mosaic Law.** The regulations of the Mosaic law respecting property, and its benign spirit towards the poor, went far to prevent the existence of penury as a permanent condition in society, and, consequently, by precluding beggary, to render the need of almsgiving unnecessary. However, the duty of almsgiving, especially in kind, is strictly enjoined in the law (Lev. xix:9, 10; xxiii:22; Deut. xv:11; xxiv:19; xxvi:2-13; Ruth ii:2). Every third year also tithes were to be shared (Deut. xiv:28, 29). The following passages indicate the theological estimate of almsgiving (Job xxxi:17; Esth. ix:22; Ps. cxii:9; Acts ix:36, in the case of Dorcas; Acts x:2, Cornelius; to which may be added apocrypha Tobit iv:10, 11; xiv:10, 11; and Eccles. iii:30; xl:24).

(2) **General Spirit of Christianity.** The general spirit of Christianity, in regard to succoring the needy, is nowhere better seen than in 1 John iii:17: 'Whoso hath this world's good, and seeth his brother have need, and shutteth up his bowels from him, how dwelleth the love of God in him?' With the faithful and conscientious observance of the 'royal law' of love, particular manifestations of mercy to the poor seem

to be left by Christianity to be determined by time, place, and circumstances; and it cannot be supposed that a religion, one of whose principles is 'that, if any would not work, neither should he eat' (2 Thess. iii:10), can give any sanction to indiscriminate almsgiving, or intend to encourage the crowd of wandering, idle beggars with which some parts of the world are still infested. The emphatic language employed by the Lord Jesus Christ and others (Luke iii:11; vi:30; xi:41; xii:33; Matt. vi:1; Acts ix:36; x:2, 4; Gal. ii:10), is designed to enforce the general duty of a merciful and practical regard to the distresses of the indigent; while the absence of ostentation, and even secrecy, which the Saviour enjoined in connection with almsgiving, was intended to correct actual abuses, and bring the practice into harmony with the spirit of the Gospel. In the remarkable reflections of Jesus on the widow's mite (Mark xii:42) is found a principle of great value, to the effect that the magnitude of men's offerings to God is to be measured by the disposition of mind whence they proceed; a principle which cuts up by the very roots the idea that merit attaches itself to almsgiving as such, and increases in proportion to the number and costliness of our alms-deeds.

(3) **Early Effects.** One of the earliest effects of the working of Christianity in the hearts of its professors was the care which it led them to take of the poor and indigent in the 'household of faith.' Neglected and despised by the world, cut off from its sympathies, and denied any succor it might have given, the members of the early churches were careful not only to make provision in each case for its own poor, but to contribute to the necessities of other though distant communities (Acts xi:29; xxiv:17; 2 Cor. ix:12). This commendable practice seems to have had its Christian origin in the deeply interesting fact (which appears from John xiii:29) that the Saviour and his attendants were wont, notwithstanding their own comparative poverty, to contribute out of their small resources something for the relief of the needy.

"In Christendom during many centuries the duty of almsgiving (primary, no doubt, from a desire of obeying the commands of Christ) received great, and sometimes exaggerated, attention. The danger now is rather that, through fear of the ill-effects of indiscriminate almsgiving (as referred to above) the disposition to give and the habit of doing so should be discouraged. A practice, however, enjoined as this one is, must permanently hold a high place in the Christian rule of life. It is the function of modern economic and social knowledge only to make its exercises more wise and beneficial." (V. H. Stanton, *Hastings' Bib. Dict.*)

ALMUG TREES (äl'mug trēs). See **ALGUM**.

ALNATHAN (äl-nā'thān), one of the principal chiefs at the return from Babylon (1 Esdr. viii:44).

ALOES, LIGN ALOES (al'ōz, lin'äl'ōz or lig-näl'ōz), (Heb. אֶלְעִי, *ā-haw-leem'*; Gr. *ἀλόη*, *al-ō-ay'*). This is doubtless the *lignum aloes* of the ancients, the products of *Aquilaria Agallocha* (Roxburg) and other trees of the same genus, growing in India, China and Arabia. It was a tree of very great value. From its blossom comes fruit, like a large pea, white and red. The juice of the leaves is drawn by cutting them with a knife, which afterwards is received in bottles (Num. xxiv:6; Ps. xlv:8). It is worth more than its weight in gold; and is esteemed a sovereign cordial against fainting fits, and other nervous disorders. From this

account the reader will perceive the rarity and value of this perfume, implied in the notice taken of it by the spouse in the Canticles (iv:14) and the boast of the prostitute (Prov. vii:17). The sandal-wood approaches to many of its properties; and is applied to similar uses, as a perfume at sacrifices, etc. The aloes of Syria, Rhodes, and Candia, called *Aspalathus*, is a shrub full of thorns; the wood of which is used by perfumers, after they have taken off the bark, to give consistency to their perfumes. It must not, therefore, be confounded with the bitter and nauseous aloes famed only as a medicine.

In the English name *Aloe*, for the plant now under consideration, and for the officinal Aloes, we have an instance of two very different plants, of widely diverse properties, bearing the same name. It is then quite possible that the *tree* of Numbers might be totally different from the *aromatic substance* of the other passages. In Eng. the labiate genus *Melissa* is called *balm*. *Impatiens* is called *balsam*. *Populus balsamifera*, L., var. *candicans*, is called *balm of Gilead*, a very different plant from the balm of Gilead of Scripture, and the word *balm* is applied to many diverse substances. There is nothing, however, to prevent the supposition that the tree of Numbers is that which produced the substance of the other passages. It is true that the tree is one of tropical Arabia, India, or China. But Balaam's prophecy was uttered in full view of the tropical valley of the Jordan, where the climate would have made it quite possible to cultivate these trees. There is nothing to forbid the idea that this and other trees not now known in Palestine were cultivated in the then wealthy and populous Jordan Valley. At least twenty-five distinctly tropical wild plants are indigenous in this valley. (G. E. Post, *Hastings' Bib. Dict.*)

ALPHA and OMEGA (äl'fā and ō'mē'gā or ō'mē-gā), (Gr. *ἄλφα*, *al'fah*; *ὀμεγα*, *ō'meg-ah*), the first and last letters of the Greek alphabet, corresponding to the Hebrew א. *Aleph*. Both the Hebrews and the Greeks employed the letters of their alphabets as numerals, and A (Alpha or Aleph) therefore denoted one or the first. Hence our Lord says of himself, that he is (τὸ Α) *Alpha* and (τὸ Ω) *Omega*, i. e., the first and the last, the beginning and the ending, as he himself explains it (Rev. i:8, 11; xxi:6; xxii:13).

ALPHABET (äl'fā-bět). The origin of alphabetical writing belongs to a period long antecedent to the date of any historical testimonies, or ancient monuments, which have come down to us. The earliest and surest data, however, on which any sound speculation on this subject can be based, are found in the genuine palæographical monuments of the Phœnicians; in the manifest derivation of all other Syro-Arabian and almost all European characters from that type, and in the testimony which history bears to the use and transmission of alphabetical writing. (See **WRITING**.)

ALPHÆUS (al-phē'us), (Gr. *Ἀλφαῖος*, *al-fah'-yos*, successor).

1. Father of James the Less (Matt. x:3; Acts i:13; Luke vi:15), and husband of Mary, the sister of our Lord's mother (John xix:25); for which reason James is called 'the Lord's brother' (See **BROTHER**). By comparing John xix:25, with Luke xxiv:10, and Matt. x:3, it appears that Alphæus is the same person as Cleophas; Alphæus being his Greek, and Cleophas his Hebrew or Syriac name, according to the custom of the provinces or of the time, when men had often two names, by one of which they were

known to their friends and countrymen, and by the other to the Romans or strangers. Possibly, however, the double name in Greek arises, in this instance, from a diversity in pronouncing the א in his Aramæan name, a diversity which is common also in the Septuagint. (See Kuinoel in *Joan.* xix:25.) (See NAMES.)

2. The father of the evangelist Levi or Matthew (*Mark* ii:14).

ALPHEUS. See ALPHÆUS.

ALTANEUS (ăl-ta-nē'us), another name of Mat-tenai, son of Hashum, who had married a foreign wife (*Ezra* x:33).

ALTAR (al'tēr), (Heb. מִזְבֵּחַ, *miz-bay'akh*, place of sacrifice, but used also for the altar of *incense*).

(1) **Noah's Altar.** The first altar we read of in the Bible was that erected by Noah on leaving the ark. According to a Rabbinical legend, it was partly formed from the remains of one built by Adam on his expulsion from Paradise, and

particular instances, such as those of Gideon (*Judg.* vi:26) and David (*2 Sam.* xxiv:18). It is said of Solomon that 'he loved the Lord, walking in the statutes of David his father, only he sacrificed and burnt incense on the high places' (*1 Kings* iii:3). Altars were sometimes built on the roofs of houses; in *2 Kings* xxiii:12 we read of the altars that were on the top of the upper chamber of Ahaz. In the tabernacle, and afterwards in the temple, two altars were erected, one for sacrifices, the other for incense; the table for the shew-bread is also sometimes called an altar.

(4) **The Altar of Burnt Offering** (Heb. מִזְבֵּחַ הַבְּרָאָה, *miz-bakh' haw-o-law'*, *Exod.* xxx:28; brazen altar, מִזְבֵּחַ הַנְּחֹשֶׁת, *miz-bakh' han-nekh-sheth'*, *Exod.* xxxix:39; table of the Lord, *Mal.* i:7, 12).

(a) *Altar of Burnt Offering*, belonging to the tabernacle, was a hollow square, five cubits in length and breadth, and three cubits in height. It was made of Shittim-wood (see SHITTIM), and

Altar of Burnt Offering and Altar of Incense.

afterwards used by Cain and Abel on the identical spot where Abraham prepared to offer up Isaac (*Zohar, In Gen.* fol. 51, 3, 4; *Targum, Jonathan, Gen.* viii:20).

(2) **Patriarchal.** Mention is made of altars erected by Abraham (*Gen.* xii:7; xiii:4; xxii:9); by Isaac (xxvi:25); by Jacob (xxxiii:20; xxxv:1, 3); by Moses (*Exod.* xvii:15).

(3) **Hebrew.** After the giving of the law, the Israelites were commanded to make an altar of earth. They were also permitted to employ stones, but no iron tool was to be applied to them. This has been generally understood as an interdiction of sculpture, in order to guard against a violation of the second commandment. Altars were frequently built on high places, the word being used not only for the elevated spots, but for the sacrificial structures upon them. Thus Solomon built an high place for Chemosh (*1 Kings* xi:7), and Josiah brake down and burnt the high place, "and stamped it small to powder" (*2 Kings* xxiii:15).

This practice, however, was forbidden by the Mosaic law (*Deut.* xii:13; xvi:5), except in par-

overlaid with plates of brass. In the middle there was a ledge or projection, on which the priest stood while officiating; immediately below this, a brass grating was let down into the altar to support the fire, with four rings attached, through which poles were passed, when the altar was removed.

In *Exod.* xxvii:3, the following utensils are mentioned as belonging to the altar, all of which were to be made of brass: (1) *siroth*, pans or dishes to receive the ashes that fell through the grating; (2) *yaim*, shovels (*forcipes*, *Vulg.*) for cleaning the altar; (3) *mizrakoth* (*basons*, *Auth. Vers.*; *φιάλαι*, *Sept.*; *patera sacrificia*, *Gesenius*), vessels for receiving the blood and sprinkling it on the altar; (4) *mizlagoth* (*flesh-hooks*, *Auth. Vers.*; *κρεάγραι*, *Sept.*; *fuscinula*, *Vulg.*), large forks to turn the pieces of flesh or to take them off the fire (see *1 Sam.* ii:13); (5) *machthoth* (*firepans*, *Auth. Vers.*; *τὸ πυρεῖον*, *Sept.*); the same word is elsewhere translated *censers* (*Num.* xvi:17); but in *Exod.* xxv:38, *'suuff-dishes.'*

(b) **Solomon's Temple.** The altar of burnt-offering in Solomon's temple was of much larger

dimensions, 'twenty cubits in length and breadth, and ten in height' (2 Chron. iv:1), and was made entirely of brass. It is said of Asa that he renewed—that is, either *repaired* (in which sense the word is evidently used in 2 Chron. xxiv:4) or *reconsecrated* the altar of the Lord that was before the porch of the Lord (2 Chron. xv:8). This altar was removed by king Ahaz (2 Kings xvi:14); it was 'cleansed' by Hezekiah, and in the latter part of Manasseh's reign was rebuilt.

(c) *In the Second Temple.* Of the altar of burnt offering in the second temple the canonical scriptures give us no information excepting that it was erected before the foundations of the tem-

Another Form of Altar of Burnt Offering.

ple were laid (Ezra iii:3, 6) on the same place where it had formerly been built. From the Apocrypha, however, we may infer that it was made, not of brass, but of unhewn stone.

(d) *In Herod's Temple.* The altar of burnt offering erected by Herod is thus described by Josephus: 'Before this temple stood the altar, fifteen cubits high, and equal both in length and breadth, each of which dimensions was fifty cubits. The figure it was built in was a square, and it had corners like horns, and the passage up to it was by an insensible acclivity from the south. It was formed without any iron tool, nor did any iron tool so much as touch it at any time.' The dimensions of this altar, however, are differently stated in the Mishna. On the south side was an inclined plane, 32 cubits long and 16 cubits broad, made likewise of unhewn stones. A pipe was connected with the southwest horn, through which the blood of the victims was discharged by a subterraneous passage into the brook Kedron. Under the altar was a cavity to receive the drink offerings, which was covered with a marble slab, and cleansed from time to time. On the north side of the altar several iron rings were fixed to fasten the victims. Lastly, a red line was drawn round the middle of the altar to distinguish between the blood that was to be sprinkled above and below it.

(5) **Altar of Incense** (Heb. מִזְבֵּחַ מִקְטָר קְטֹרֶת, *miz-bakh' mik-tar' ket-o'reth*, altar of offering of incense, Exod. xxx:1; called also the *golden altar*, מִזְבֵּחַ הַזָּהָב, *miz-bakh' haz-zaw-hawb'*, Exod. xxxix:38; Num. iv:11).

It was placed between the table of shew-bread and the golden candlestick, in the most holy place.

(a) *Altar of Shittim-wood.* This altar was made of Shittim-wood, overlaid with gold plates, one cubit in length and breadth and two cubits in height. It had horns (Lev. iv:7) of the same materials, and round the flat surface was a border of gold, underneath which were the rings to receive 'the staves made of Shittim-wood, overlaid with gold to bear it withal' (Exod. xxx:i-5).

(b) *Cedar.* The altar in Solomon's temple was similar, but made of cedar (1 Kings vi:20; vii:48; 1 Chron. xxviii:18), overlaid with gold.

The altar in the second temple was taken away by Antiochus Epiphanes (1 Macc. i:23), and restored by Judas Maccabæus (1 Macc. iv:49). On the arch of Titus there appears no altar of incense; it is not mentioned in Heb. ix, nor by Joseph. *Antiq.* xiv:4, 4.

ALTARS, FORMS OF (al'tēr-z, fôrms òv or ùv). In the preceding article the reader is furnished with all the positive information which we possess respecting the altars as mentioned in Scripture; but as, with regard to material objects so frequently named as altars, we feel a desire to have distinct images in the mind, some further remarks respecting the forms which they probably bore may not be unacceptable.

(1) **Unhewn Stone.** The direction to the Israelites, at the time of their leaving Egypt, to construct their altars of unhewn stones or of earth, is doubtless to be understood as an injunction to follow the usage of their patriarchal ancestors; and not to adopt the customs, full of idolatrous associations, which they had seen in Egypt, or might see in the land of Canaan. As they were also strictly enjoined to destroy the altars of the Canaanites, it is more than probable that the direction was leveled against such usages as those into which that people had fallen. The conclusion deducible from this, that the patriarchal altars were of unhewn stones or of earth, is confirmed by the circumstances under which they were erected, and by the fact that they are always described as being 'built.' The provision that they *might* be made of earth applies doubtless to situations in which stones could not be easily obtained, as in the open plains and wildernesses. Familiar analogies lead to the inference that the largest stones that could be found in the neighborhood would be employed to form the altar, but where no large stones could be had, that heaps of smaller ones might be made to serve.

(2) **Cromlechs.** As these altars were erected in the open air, and were very carefully preserved, there is at least a strong probability that some of those ancient monuments of unhewn stone, usually called Druidical remains, which are found in all parts of the world, were derived from the altars of primitive times. These are various in their

Cromlechs.

forms, and their peculiar uses have been very much disputed. It is admitted, however, that some of them must have been altars, but the difficulty is to determine whether these altars are to be sought in the Cromlechs.

The arguments preponderate in favor of the opinion that the Cromlechs are the representatives of the primitive altars, and that the Kistvaens (stones disposed in a chest-like form) are analogous to the arks of the Jewish ritual and of some of the pagan religions. (See **ARK OF COVENANT.**)

Cromlechs, as is well known, are somewhat in the form of a table, one large stone being supported, in a horizontal or slightly inclined position, upon three or more, but usually three stones, set upright. That they were used as altars is almost instinctively suggested to every one that views them, and this conclusion is strengthened when, as is often the case, we observe a small circular hole through which probably the rope was run by which the victims, when slaughtered, were bound to the altar, as they were to the angular projections or 'horns' of the Jewish altar (Ps. cxviii:27).

(3) **Cairn Altars.** It was natural that where a sufficiency of large stones could not be found, heaps of smaller ones should be employed, and that, when practicable, a large flat stone would be placed on the top, to give a proper level for the fire of the sacrifice. Such are the cairn altars, of which many still remain; but as they are sometimes found in places where stones of large size might have been obtained, it seems that in later times *such* altars had a special appropriation, and Toland (*Hist. B. Druids*, 101) shows that the sacred fires were burned on them, and sacrifices offered to Bel, Baal, or the Sun.

Cairn Altar.

The injunction that there should be no ascent by steps to the altar appears to have been imperfectly understood. There are no accounts or figures of altars so elevated in their fabric as to require such steps for the officiating priests; but when altars are found on rocks or hills, the ascent to them is sometimes facilitated by steps cut in the rock. This, therefore, may have been an indirect way of preventing that erection of altars in high places which the Scriptures so often reprobate.

(4) **Horns of the Altar.** It is usually supposed, however, that the effect of this prohibition was that the tabernacle altar, like most ancient altars, was so low as to need no ascent, or else that some other kind of ascent was provided. The former is probably right, for the altar was but three cubits high, and was designed to be portable. There is one error in these and other figures of the Jewish altars composed from the descriptions; namely, with regard to the 'horns,' which were placed at the corners, called 'the horns of the altar' (Exod. xxvii:2; xxix:12; 1 Kings ii:28), and to which the victims were tied at the time of sacrifice. The word horn was applied by the Jews as an epithet descriptive of any point projecting in any direction after the manner of a horn (not necessarily like a horn in shape); and there is no reason to doubt that the horns of the successive altars of burnt offerings resembled those corners projecting upwards which are seen in many ancient altars. These are shown in the view depicting the probable form of the Jewish altar of burnt offerings.

(5) **Solomon's Altar.** By the time of Solomon it appears to have been understood that the interdiction of steps of ascent did not imply that the altar was to be low, but rather that it was to be

high, and that only a particular mode of ascent was forbidden. The altar of the temple was not less than ten cubits high, and some means of ascent must have been provided. The usual representations of Solomon's altar are formed chiefly from the descriptions of that in Herod's temple given by Josephus and the Rabbins, and although this last was almost one-third higher and larger than the other, it was doubtless upon the same model. The altar of the first temple had been seen, and could be described, by many of those who were present when that of the second temple was created, and the latter was known to those by whom Herod's altar was built. Very different figures, however, have been formed from these descriptions, and that which we here introduce is perhaps the best and most probable of them.

(6) **The Altar of Incense,** being very simple in its parts and uses, has been represented with so little difference, except in some ornamental details, that one of the figures designed from the descriptions may suffice.

It is not our object to describe the altars of other nations; but, to supply materials for comparison and illustration, a group of the altars of the principal nations of Oriental and classical antiquity is here introduced. One obvious remark occurs, namely, that all the Oriental altars are square or oblong, whereas those of Greece and Rome are more usually round, and that, upon the whole, the Hebrew altars were in accordance with the general Oriental type. In all of them

Various Altars.

1-2. Egyptian. 3. Assyrian. 4. Babylonian.
5. Assyrian, from Khorsabad.

we observe bases with corresponding projections at the top, and in some we find the true model of the horns, or prominent and pointed angles. (See ASYLUM; CENSER; INCENSE; SACRIFICE.)

(7) **Altar at Athens.** St. Paul, in his admired address before the judges of the Areopagus at Athens, declares that he perceived that the Athenians were in all things too superstitious. The Greek word *Δεισιδαιμονιστέρον* occurs here only, and is of ambiguous signification, being capable of a good, bad, or indifferent sense. Most modern, and some ancient, expositors hold that it is here to be taken in a good sense (*very religious*), as it was not the object of the apostle to give needless offense. This explanation also agrees best with the context, and with the circumstances of the case. A man may be 'very religious,' though his religion itself may be false.

The Apostle states that, as he was passing by and beholding their devotions, he found an altar, inscribed 'To the Unknown God,' and adds, with unexpected force, 'Him whom ye worship without knowing, I set forth unto you' (Acts xvii:22, 23).

The questions suggested by the mention of an altar at Athens, thus inscribed 'to the unknown God,' have engaged much attention, and different opinions have been, and probably will continue to be, entertained on the subject.

The principal difficulty arises from this, that the Greek writers, especially such as illustrate the Athenian antiquities, make mention of *many altars dedicated to the unknown gods*, but not of *any one dedicated to the unknown god*.

We must be content to rest in the conclusion of Professor Robinson: 'So much at least is certain, that altars to an unknown god or gods existed at Athens. But the attempt to ascertain definitely whom the Athenians worshiped under this appellation must ever remain fruitless for want of sufficient data. The inscription afforded to Paul a happy occasion of proclaiming the Gospel, and those who embraced it found indeed that the being whom they had thus "ignorantly worshiped" was the one only living and true God.'

AL-TASCHITH (äl-täs'kith), (Heb. אֶל־תַּשְׁחִית, *al-tash-khayth'*, destroy, or corrupt not), title to the following Psalms: lvii; lviii; lix; lxxv. It seems to indicate that the tune to which it is sung is a vintage song. (See Is. lxxv:8.)

ALUSH (ä'lush), (Heb. אֲלוּשׁ, *aw-loosh'*, perhaps desolation, one of the places at which the Hebrews rested on their way to Mount Sinai (Num. xxxiii:13, 14. It was between Dophkah and Rephidim. The Jewish Chronology (*Seder Olam Rabba*, c. 5, p. 27) makes it twelve miles from the former and eight from the latter station. The Targum of Jonathan calls it 'a strong fort;' and it is alleged (upon an interpretation of Exod. xvi:30) that in Alush the Sabbath was instituted, and the first Sabbath kept.

ALVAH (äl'vah), (Heb. אֶלְוָה, *al-vaw'*, perhaps evil), a duke of Edom, descended from Esau (Gen. xxxvi:23; 1 Chron. i:51), B. C. between 1905 and 1740.

ALVAN (äl'van), (Heb. אֶלְוָן, *al-vaw'n'*, tall, sublimed), son of Shobal, a descendant of Seir (Gen. xxxvi:23; 1 Chron. i:40), B. C. between 1927 and 1760.

AMAD (ä'mäd), (Heb. אַמְאָד, *am-awd'*, people of duration), a town on the border of Asher, near Alammelech (Josh. xix:26); probably identified with *Shefa Omar* or *Shefa Amar*, a large market town on a ridge east of Haifa (Robinson, later *Re-searches*, iii:103).

AMADATHA or **AMADATHUS** (a-mäd'a-thä or a-mäd'a-thüs), (Esdr. xvi:10, 17; Esdr. xii:6; *Apocrypha*)

AMAL (ä'mal), (Heb. אַמְלֵל, *aw-mawl'*, toil), an Asherite, the last named of the four sons of Helem (1 Chron. vii:35), B. C. between 1658 and 1600.

AMALEK (äm'a-lëk), (Heb. אַמְלֵק, *am-aw-lake'*, dweller in a valley, son of Eliphaz and Timna his concubine, and grandson of Esau. He succeeded Gatam in the government of Edom, south of Judah (Gen. xxxvi:12, 16; 1 Chron. i:36).

He was the chieftain of an Idumæan tribe (B. C. about 1740). This tribe was probably not the same as the Amalekites so often mentioned in Scriptures, for Moses speaks of the Amalekites long before this Amalek was born (Gen. xiv:7). (See AMALEKITES.)

AMALEKITES (äm'a-lek-ites), (Heb. mostly אַמְלֵק, *am-aw-lake'*, Amalek; more rarely אַמְלֵקִים, *am-aw-lay-kee'*, the Amalekite), the name of a nation inhabiting the country to the south of Palestine between Idumæa and Egypt, and to the east of the Dead Sea and Mount Seir. 'The Amalekites dwell in the land of the south' (Num. xiii:29). 'Saul smote the Amalekites from Havilah until thou comest to Shur, that is over against Egypt' (1 Sam. xv:7). 'David went up and invaded the Geshurites, and Gezrites, and the Amalekites, for those nations were of old the inhabitants of the land as thou goest to Shur, even unto the land of Egypt' (1 Sam. xxvii:8). In 1 Chron. iv:42, it is said that the sons of Simeon went to Mount Seir and smote the rest of the Amalekites that were escaped. According to Josephus the Amalekites inhabited Gobolitis and Petra, and were the most warlike of the nations in those parts, and elsewhere he speaks of them as 'reaching from Pelusium of Egypt to the Red Sea.' We find, also, that they had a settlement in that part of Palestine which was allotted to the tribe of Ephraim. The first mention of the Amalekites in the Bible is Gen. xiv:7; 'Chedorlaomer and his confederates returned and came to En-Mishpat, which is Kadesh, and smote all the Amorites that dwelt in Hazezon-tamar'.

(1) **First Assailants of the Israelites.** The Amalekites were the first assailants of the Israelites after their passage through the Red Sea (Exod. xvii:8-13). It has been thought improbable that in so short a period the descendants of Esau's grandson could have been sufficiently numerous and powerful to attack the host of Israel, but within nearly the same period the tribe of Ephraim had increased so that it could muster 40,500 men able to bear arms, and Manasseh 32,200; and admitting in the case of the Israelites an extraordinary rate of increase (Exod. i:12, 20), still, if we consider the prostrating influence of slavery on the national character, and the absence of warlike habits, it is easy to conceive that a comparatively small band of marauders would be a very formidable foe to an undisciplined multitude, circumstanced as the Israelites were, in a locality so adapted to irregular warfare. It appears, too, that the attack was made on the most defenseless portion of the host. 'Remember (said Moses) what Amalek did unto thee by the way when ye were come forth out of Egypt; how he met thee by the way and smote the hindmost of thee, even all *that were feeble behind thee*, when thou wast faint and weary' (Deut. xxv:17, 18). In the Pentateuch the Amalekites are frequently mentioned in connection with the Canaanites (Num. xiv:25, 43, 45), and, in the book of Judges, with the Moabites and Ammonites (Judg. iii:13); with the Midianites (Judg. vi:3; vii:12: 'The Midianites, and the Amalekites, and all the children of the East lay along in the valley like grasshoppers for multitude, and their camels were without number, as the sand by the seaside for multitude'); with the Kenites (1 Sam. xv:6).

(2) **Retribution.** By divine command, as a retribution for their hostility to the Israelites on leaving Egypt (1 Sam. xv:2), Saul invaded their country with an army of 210,000 men, and 'utterly destroyed all the people with the edge of the sword;' but he preserved their king Agag alive, and the best of the cattle, and by this act of disobedience forfeited the regal authority over Israel. Josephus states the number of Saul's army to be 400,000 men of Israel and 30,000 of Judah. He also represents Saul as besieging and taking the cities of the Amalekites, 'some by warlike ma-

chines, some by mines dug underground, and by building walls on the outside; some by famine and thirst, and some by other methods' (*Antiq.* vi:7, Sec. 2).

(3) **Attacked by David.** About twenty years later they were attacked by David during his residence among the Philistines (1 Sam. xxvii:8). It is said 'that he smote the land and left neither man nor woman alive;' this language must be taken with some limitation, for shortly after the Amalekites were sufficiently recovered from their defeat to make reprisals, and burnt Ziklag with fire (1 Sam. xxx). David, on his return from the camp of Achish, surprised them while celebrating their success, 'eating, and drinking, and dancing,' and 'smote them from twilight even unto the evening of the next day, and there escaped not a man of them, save 400 young men which rode upon camels, and fled' (1 Sam. xxx:17). At a later period we find that David dedicated to the Lord the silver and gold of Amalek and other conquered nations (2 Sam. viii:10-12). The last notice of the Amalekites as a nation is in 1 Chron. iv:43, from which we learn that in the days of Hezekiah, king of Judah, 500 men of the sons of Simeon 'went to Mount Seir, and smote the rest of the Amalekites that were escaped.'

In the book of Esther, Haman is called the Agagite, and was probably a descendant of the royal line (Num. xxiv:7; 1 Sam. xv:8). Josephus says that he was by birth an Amalekite (*Antiq.* xi:6, Sec. 5).

(4) **Three Tribes.** The editor of Calmet supposes that there were no less than three distinct tribes of Amalekites: 1. Amalek the ancient, referred to in Gen. xiv; 2. A tribe in the region east of Egypt, between Egypt and Canaan (Exod. xvii:8; 1 Sam. xv, etc.); 3. Amalek, the descendants of Eliphaz. No such distinction, however, appears to be made in the biblical narrative; the national character is everywhere the same, and the different localities in which we find the Amalekites may be easily explained by their habits, which evidently were such as belong to a warlike nomade people.

(5) **Territory.** The territory proper of the Amalekites was bounded by Philistia, Egypt, Idumæa and the desert of Sinai. This is evident from the scriptural notices of their location south of Palestine (Num. xiii:29), in the region traversed by the Israelites (Exod. xvii:8), and their connection with the Ammonites (Judg. iii:13), the Midianites (Judg. vi:3; vii:12), the Kenites (1 Sam. xv:6), as well as their near proximity to the Philistines (1 Sam. xxvii:8), and the town of Shur or Pelusium (1 Sam. xv:7).

"Outside of the Old Testament we have no reliable accounts of the Amalekites. In the works of the Arabian historians very extensive and detailed reports are given of the progress and achievements of the Amalekites, but these, as Nöldeke has convincingly shown, are credible only in so far as they are based on the statements of the historical books of our own canonical Scriptures." (J. Macpherson, *Hastings' Bib. Dict.*)

AMAM (ā'mam), (Heb. אַמָּם, *am-amum'*, gathering place), a city near Shema and Moladah in the southern part of the tribe of Judah (Josh. xv:26), perhaps situated in the tract afterwards assigned to Simeon (Josh. xix:1-9).

AMAN (ā'man). The Græcized form of the name of Haman (Tob. xiv:2; Esdr. x:7; xii:6; xiii:3, 12; xiv:17; xvi:10, 17).

AMANA (ām'a-nā or a-mā'nā), (Heb. אַמָּנָה, *am-aw-naw'*, fixed, i. e., a covenant.)

1. A mountain mentioned in Cant. iv:8. Some have supposed it to be Mount Amanus in Cilicia, to which the dominion of Solomon is alleged to have extended northward. But the context, with other circumstances, leaves little doubt that this Mount Amana was rather the southern part or summit of Anti-Libanus, and was so called perhaps from containing the sources of the river Amana or Abana (2 Kings v:12). (See ABANA.)

2. A river of Damascus. (See ABANA.)

AMARANTHINE (ām'a-rān'thin), (Gr. ἀμαράντινος, *am-ar-an'tee-nos*, unfading), the original of A. V. "that fadeth not away" (1 Pet. v:4; Comp. i; 4, Gr. ἀμάραντος), and "meaning composed of *amaranth*." It is so called because the amaranth is a flower which does not wither when cut off. It is a symbol of immortality.

AMARIAH (ām'a-rī'ah), (Heb. אַמָּרְיָהוּ, *am-ar-yaw'*, word of Jehovah).

1. A person mentioned in 1 Chron. vi:7, 52, in the list of descendants of Aaron by his eldest son Eleazer. He was the son of Meraioth and the father of Ahitub, who was (not the grandson and successor of Eli of the same name, but) the father of that Zadok in whose person Saul restored the high-priesthood to the line of Eleazer. The years during which the younger line of Ithamar enjoyed the pontificate in the persons of Eli, Ahitub, and Abimelech (who was slain by King Saul at Nob) doubtless more than cover the time of Amariah and his son Ahitub; and it is therefore sufficiently certain that they never were high-priests in fact, although their names are given to carry on the direct line of succession to Zadok. (B. C. 1100.)

2. A high-priest at a later period, the son of Azariah, and also father of a second Ahitub (1 Chron. vi:11; Ezra vii:3) or rather perhaps of Urijah (2 Kings xvi:10), B. C. about 1015. In like manner, in the same list, there are three high-priests bearing the name of Azariah.

3. A descendant of Kohath, son of Levi (1 Chron. xxiii:19; xxiv:23), B. C. about 1015.

4. Chief priest in the time of Jehoshaphat (2 Chron. xix:11), B. C. between 912 and 895.

5. A Levite appointed by Hezekiah to distribute the temple dues among the priestly cities (2 Chron. xxxi:15), B. C. about 726.

6. Great-grandfather of the prophet Zephaniah (Zeph. i:1), B. C. about 630.

7. A son of Bani who married a foreign wife in the time of Ezra (Ezra. x:42), B. C. 465.

8. A descendant of Pharez, the son of Judah (Neh. xi:4), probably the same as Imri (in 1 Chron. ix:4), B. C. about 465.

9. A priest who with Nehemiah sealed the covenant (Neh. x:3; xii:2, 13), B. C. about 430.

AMARIAS (ām-a-rī'as), the Græcized form of Amariah (1 Esdr. viii:2; 2 Esdr. i:2; Ezra vii:3).

AMASA (ām'a-sā), (Heb. אַמָּסָה, *am-aw-saw'*, burden, or burden bearer.)

1. Son of Jether or Ithra and Abigail, David's sister. Absalom, during his rebellion against David, placed his cousin; Amasa, at the head of his troops (2 Sam. xvii:25; 1 Chron. ii:17; 1 Kings ii:5, 32), but he was defeated by Joab. After the extinction of Absalom's party, David, from dislike to Joab, who had killed Absalom, offered Amasa his pardon and the command of the army, in room of Joab, whose insolence rendered him insupportable (2 Sam. xix:13). On

the revolt of Sheba, son of Bichri, David ordered Amasa to assemble all Judah against Sheba; but Amasa delaying, David directed Abishai to pursue Sheba, with what soldiers he then had about his person. Joab, with his people, accompanied him; and when they had reached the great stone in Gibeon, Amasa joined them with his forces. Joab's jealousy being excited, he formed the dastardly and cruel purpose of assassinating his rival—"Then said Joab to Amasa, Art thou in health, my brother? and took him by the beard with the right hand to kiss him;" but at the same time smote him with the sword (2 Sam. xx:4-14), B. C. 1022. (See ABNER; ABSALOM; JOAB.)

2. A chief of Ephraim, who, with others, vehemently resisted the retention as prisoners of the persons whom Pekah, king of Israel, had taken captive in a successful campaign against Ahaz, king of Judah (2 Chron. xxviii:12), B. C. about 741.

AMASAI (a-mäs'a-i), (Heb. עַמְסַי, *am-aw-sah'ee*, burden bearer).

1. A Kohathite, father of Mahath, and ancestor of Samuel (1 Chron. vi:25, 35; 2 Chron. xxix:12), B. C. between 1410 and 1045.

2. The principal captain of men from the tribes of Judah and Benjamin, who joined David at Ziklag (1 Chron. xii:18), B. C. about 1061.

3. A priest who aided in bringing up the ark to the house of Obed-Edom (1 Chron. xv:24), B. C. about 1043.

4. Another Kohathite, father of a different Mahath, in the reign of Hezekiah (2 Chron. xxix:12). Perhaps the name of a family.

AMASHAI (a-mäsh'a-i). Probably one form of Amasai, the son of Azareh, a valiant priest in the time of Nehemiah (Neh. xi:13), perhaps the same as Maasiai (1 Chron. ix:12), B. C. about 445.

AMASIAH (äm-a-si'ah), (Heb. עַמְסִיָּה, *am-asyaw'*, Jah has strength), son of Zichri and chief captain of the army of Jehoshaphat (2 Chron. xvii:16), B. C. about 440.

AMASIS (äm'a-sis). Supposed to be the Pharaoh whose house in Tahpanhes is mentioned in Jer. xliii:9, and who reigned B. C. 569-525.

AMATH (ä'math). See HAMATH.

AMATHEIS (am-a-thē'is). The Athlai of the genuine text (Ezra x:28).

AMBASSADOR (am-bäs'sa-dôr), (Heb. יָרֵךְ, *ts'er*, one who goes on an errand; לוֹט, *loots*, interpreter; מַלְאָכִים, *mal-awk'*, messenger), a messenger sent by a king or state to carry important tidings, or transact affairs of great moment with another prince or state. An *ambassador* is always the public representative of the monarch or state from whom he receives his commission. In the Old Testament *loots* is used in 2 Chron. xxxii:31; *malawk* in 2 Chron. xxxv:21; Is. xxx:4; xxxiii:7; Ezek. xvii:15. The earliest examples of ambassadors employed occur in the cases of Edom, Moab and the Amorites (Num. xx:14; xxi:21; Judg. xi:17-19); afterward in that of the fraudulent Gibeonites (Josh. ix:4, etc.), and in the instances of civil strife narrated in Judg. xi:12, and xx:12. Eliakim, Shebna, and Joah, the servants of King Hezekiah, are called ambassadors of peace. In their master's name they earnestly solicited a peace from the Assyrian monarch Sennacherib; but were made to weep bitterly with the disappointment and refusal (2 Kings xviii:14-37; Is. xxxiii:7). They returned to Hezekiah in bitter grief, with their clothes rent (see 2 Kings xiv:8; 1 Kings xx:2, 6).

Figurative. The word occurs once in the New Testament (2 Cor. v:20, Gr. *προσβέω*, *presbyoo'o*, to be a senior), being employed by Paul to designate the nature and dignity of the office of a minister of the Gospel. They are representatives of Christ, because in the name of Jesus Christ the King of kings they declare his will to men, and transact the important business of their reconciliation with God (Eph. vi:20).

AMBER (äm'ber). See CHASMIL.

AMBIDEXTER (äm'bi-dëx'ter). One who can use the left hand as well as the right, or more literally, one whose hands are both right hands. It was long supposed that both hands are naturally equal, and that the preference of the right hand, and comparative incapacity of the left, are the result of education and habit. But it is now known that the difference is really physical, and that the ambidextrous condition of the hands is *not* a natural development.

The capacity of equal action with both hands was highly prized in ancient times, especially in war. Among the Hebrews this quality seems to have been most common in the tribe of Benjamin, as all the persons noticed as being endued with it were of that tribe. By comparing Judg. iii:15; xx:16 with 1 Chron. xii:2, we may gather that the persons mentioned in the two former texts as 'left-handed,' were really ambidexters. In the latter text we learn that the Benjamites who joined David at Ziklag were 'mighty men, helpers of the war. They were armed with bows, and could use both the right hand and the left in hurling (slinging) and shooting arrows out of a bow.' There were thirty of them; and as they appear to have been all of one family, it might almost seem as if the greater commonness of this power among the Benjamites arose from its being a hereditary peculiarity of certain families in that tribe. It may also partly have been the result of cultivation; for, although the left hand is not naturally an equally strong and ready instrument as the right hand, it may doubtless be often rendered such by early and suitable training.

AMBUSCADE and **AMBUSH** (äm'büs-käde, äm'bush), (Heb. אָרַב, *aw-rab'*, to lie in wait), in military phraseology, are terms used promiscuously, though it is understood that the first more properly applies to the act, and the second to the locality, of a stratagem which consists mainly in the concealment of an army, or of a detachment, where the enemy, if he ventures, in ignorance of the measure, within the sphere of its action, is suddenly taken at a disadvantage, and liable to be totally defeated. The principles which must guide the contrivers of an ambush have been nearly the same in all ages; embracing concealment from the observation of an enemy so as to create no suspicion; a position of advantage in case of being attacked by superior forces, and having the means of retreating, as well as of issuing forth to attack, without impediment, when the proper moment is arrived. The example of Joshua at the capture of Ai shows the art to have been practiced among the Jews on the best possible principles (Josh. viii:21).

In the attempt to surprise Shechem (Judg. ix:30, *sqq.*) the operation, so far as it was a military maneuver, was unskillfully laid, although ultimately successful in consequence of the party spirit within, and the intelligence which Abimelech maintained in the fortress.—C. H. S.

AMEN (ä'mën or ä'mën), (Heb. אָמֵן, *aw-mane'*; New Testament, Ἀμήν, *aw-mane'*). This word is strictly an adjective, signifying 'firm,' and, meta-

phorically, 'faithful.' Thus in Rev. iii:14, our Lord is called 'the *amen*, the *faithful* and *true* witness.' In Is. lxxv:16, the Heb. has 'the God of *amen*,' which our version renders 'the God of *truth*,' i. e., of *fidelity*. In its adverbial sense *amen* means *certainly*, *truly*, *surely*. It is used in the beginning of a sentence by way of emphasis—rarely in the Old Testament (Jer. xxviii:6), but often by our Savior in the New, where it is commonly translated '*verily*.' In John's gospel alone it is often used by him in this way double, i. e., '*verily*, *verily*.' In the end of a sentence it often occurs singly or repeated, especially at the end of hymns or prayers, as '*amen* and *amen*' (Ps. xli:13; lxxii:19; lxxxix:53). The proper signification of it in this position is to confirm the words which have preceded, and invoke the fulfilment of them: 'so be it,' *fiat*; Sept. *γένοιτο*. Hence in oaths, after the priest has repeated the words of the covenant or imprecation, all those who pronounce the *amen* bind themselves by the oath (Num. v:22; Deut. xxvii:15, 17; Neh. v:13; viii:6; 1 Chron. xvi:36; comp. Ps. cvi:48).

AMETHYST (äm'e-thĭst), (Heb. אֶמֶתֶשֶׁת, *akk-law'maw*), a precious stone, mentioned in Scripture as the ninth in the breastplate of the high-priest (Exod. xxviii:19; xxxix:12), and the twelfth in the foundations of the New Jerusalem (Rev. xxi:20). The concurrence of various circumstances leaves little doubt that the stone anciently known as the *amethyst* is really denoted by the Hebrew word, and as the stone so called by the ancients was certainly that which still continues to bear the same name, their identity may be considered as established.

(1) **Color.** The transparent gems to which this name is applied are of a color which seems composed of a strong blue and deep red, and according as either of these prevails, exhibit different tinges of purple, sometimes approaching to violet and sometimes declining even to a rose color. From these differences of color the ancients distinguished five species of the *amethyst*; modern collections afford at least as many varieties, but they are all comprehended under two species—the *Oriental Amethyst* and the *Occidental Amethyst*. These names, however, are given to stones of essentially different natures, which were, no doubt, anciently confounded in the same manner.

(2) **The Oriental Amethyst.** The Oriental *amethyst* is very scarce, and of great hardness, luster and beauty. It is in fact a rare variety of the adamantine spar, or corundum. Next to the diamond, it is the hardest substance known.

(3) **The Occidental Amethyst.** *Amethysts* were much used by the ancients for rings and cameos, and the reason given by Pliny—because they were easily cut—'*sculpturis faciles*' (*Hist. Nat.* xxxvii:9), shows that the Occidental species is to be understood. The ancients believed that the *amethyst* possessed the power of dispelling drunkenness in those who wore or touched it, and hence its Greek name, *ab a privativo et μεθύω, ebrius sum*' (Martini, *Excurs.*, p. 158). In like manner the Rabbins derive its Jewish name from its supposed power of procuring dreams to the wearer.

AMI (ä'mē), (Heb. אָמִי, *aw-mee'*), one of the servants of Solomon (Ezra ii:57).

AMINADAB. Same as AMMINADAB.

AMITTAI (a-mit'tāi), (Heb. אִמִּיטַי, *am-it-tah'ee*, true), a native of Gath-hepher and the father of the prophet Jonah (2 Kings xiv:25; Jonah i:1).

AMMAH (äm'mah), (Heb. אֲמָה, *am-maw'*, a cubit), one of the places reached by Joab and his attendant while in pursuit of Abner (2 Sam. ii:24).

AMMI (äm'mī), (Heb. אָמִי, *am-mee'*, my people), a symbolic name applied to Israel (see margin of A. V.). It is in contrast with *Lo-ammi* (see Hosea ii:1).

AMMIEL (äm'mi-el), (Heb. אֲמִיֵּאל, *am-mee-ale'*, people of God).

1. The father of Machir (2 Sam. ix:4, 5; xvii:27).

2. The son of Gemalli, one of the twelve spies sent by Moses to explore the land of Canaan (Num. xiii:12).

3. The sixth son of Obed-edom and one of the doorkeepers of the temple (1 Chron. xxvi:5).

4. The father of Bathsheba, wife of Uriah (1 Chron. iii:5).

AMMIHUD (am-mi'hud), (Heb. אֲמִיהוּד, *am-mee-hood'*, people of glory).

1. The father of Pedahel, who was a prince of the tribe of Naphtali (Num. xxxiv:28).

2. An Ephraimite whose son was appointed as chief of the tribe (Num. i:10; ii:28; vii:48-53; x:22; 1 Chron. vii:26).

3. The father of a Simeonite chief (Num. xxxiv:20).

4. The father of Talmi, king of Geshur (2 Sam. xiii:37).

AMMINADAB (am-mĭn'a-däb), (Heb. אֲמִינָדָב, *am-mee-naw-dawb'*, people of liberality).

1. Son of Ram, or Aram, and father of Nashon (or Naasson, Matt. i:4; Luke iii:32), who was prince of the tribe of Judah at the first numbering of Israel in the second year of the Exodus (Num. i:7; ii:3), B. C. before 1210. He was the fourth in descent from Judah, the sixth in ascent from David (Ruth iv:19, 20; 1 Chron. ii:10), and one of the ancestors of Jesus Christ (Matt. i:4). Little is recorded concerning him; but the marriage of his daughter to Aaron (Exod. vi:23) is marked as the earliest instance of alliance between the royal line of David and the priestly line of Aaron. The name Nadab given to Aaron's eldest son was probably in honor of his grandfather, Ammi-nadab.

2. (Cant. vi:12.) The chariots of this Amminadab are mentioned as proverbial for their swiftness. Of himself we know nothing more than what is here glanced at, from which he appears to have been, like Jehu, one of the most celebrated charioteers of his day. In many MSS. the Hebrew term is divided into two words אֲמִי נָדִיב, *Ami nadib*; in which case, instead of the name of a person, it means 'of my willing,' or 'loyal people.' This division has been followed in the Syriac by the Jews in their Spanish version, and by many modern translators; but, taken in this way, it is difficult to assign any satisfactory meaning to the passage. In the LXX and the A. V. the same Hebrew word (Cant. vii:1) is rendered "O prince's daughter!"

AMMINADIB (am-mĭn'a-dĭb), (Heb. אֲמִינָדִיב, *am-mee'naw-deeb'*, another form of Amminadab), a man whose chariots were proverbial for their swiftness (Cant. vi:12).

AMIR (ä-mēr'), (Heb. אֲמִיר, *aw-meer'*, 'uppermost bough'). The word occurs only in Is. xvii:6, 9, A. V. It has been usual to derive it from an Arabic word which means a general, or emir, and hence, in the present text, the higher or upper branches of a tree. Gesenius admits

that this interpretation is unsatisfactory, and Lee, who regards it as very fanciful, endeavors (*Lex. in voce*) to establish that it denotes the caul or sheath in which the fruit of the date palm is enveloped. According to this view he translates the verse thus: 'Two or three berries in the head (or upper part) of the caul (or pod, properly sheath), four or five in its fissures.' This would make the scriptural allusion refer to the fact that the fruit of the date palm is, during its growth, contained in a sheath, which rends as the fruit ripens, and at first partially, and afterwards more fully, exposes its precious contents. (See TAMAR.)

AMMAN (ăm'man). See RABBAH.

AMMON (ăm'mon). See NO-AMON.

AMMONITES (ăm'mon-ites), (Heb. אַמּוֹנִי, *am-monites*; אַמּוֹנִי, *am-mo-ne'*, the sons of Ammon, the Ammonitai), the descendants of the younger son of Lot (Gen. xix:38).

The Ammonites originally occupied a tract of country east of the Amorites, and separated from the Moabites by the river Arnon. It was previously in the possession of a gigantic race called Zamzummin (Deut. ii:20), 'but the Lord destroyed them before the Ammonites, and they succeeded them and dwelt in their stead.' The Israelites, on reaching the borders of the Promised Land, were commanded not to molest the children of Ammon for the sake of their progenitor Lot. But, though thus preserved from the annoyance which the passage of such an immense host through their country might have occasioned, they showed them no hospitality or kindness; they were therefore prohibited from 'entering the congregation of the Lord' (*i. e.* from being admitted into the civil community of the Israelites) 'to the tenth generation for ever' (Deut. xxiii:3). This is evidently intended to be a perpetual prohibition, and was so understood by Nehemiah (Neh. xiii:1).

(1) **Active Hostility.** The first mention of their active hostility against Israel occurs in Judges iii:13: 'The king of Moab gathered unto him the children of Ammon and Amalek, and went and smote Israel.' About 140 years later we are informed that the children of Israel forsook Jehovah and served the gods of various nations, including those of the children of Ammon, and the anger of Jehovah was kindled against them, and he sold them into the hands of the Philistines and of the children of Ammon.

The Ammonites crossed over the Jordan and fought with Judah, Benjamin and Ephraim, so that 'Israel was sore distressed.'

(2) **Jephthah.** In answer to Jephthah's messengers (Judg. xi:12), the king of Ammon charged the Israelites with having taken away that part of his territories which lay between the rivers Arnon and Jabok, which, in Joshua xiii:25, is called 'half the land of the children of Ammon,' but was in the possession of the Amorites when the Israelites invaded it, and this fact was urged by Jephthah, in order to prove that the charge was ill-founded. Jephthah 'smote them from Aroer to Minnith, even twenty cities, with a very great slaughter' (Judg. xi:33; Joseph. *Antiq.* v:7). (See JEPHTHAH.)

(3) **Saul and David.** The Ammonites were again signally defeated by Saul (1 Sam. xi:11), B. C. 1095, and, according to Josephus, their king Nahash was slain (*Antiq.* vi:5). (See SAUL.) His successor, who bore the same name, was a friend of David, and died some years after his accession to the throne. In consequence of the

gross insult offered to David's ambassadors by his son Hanun (2 Sam. x:4; Joseph. *Antiq.* vii:6), a war ensued, in which the Ammonites were defeated, and their allies, the Syrians, were so daunted 'that they feared to help the children of Ammon any more' (2 Sam. x:19). Continuing the war, in the following year David took their metropolis, Rabbah, and great abundance of spoil, which is probably mentioned by anticipation in 2 Sam. viii:12 (2 Sam. x:14; xii:26-31; Joseph. *Antiq.* vii:7). (See DAVID.)

(4) **Jehoshaphat.** In the reign of Jehoshaphat (B. C. 896) the Ammonites joined with the Moabites and other tribes belonging to Mount Seir to invade Judah; but, by the divine intervention, were led to destroy one another. Jehoshaphat and his people were three days in gathering the spoil (2 Chron. xx:25).

In 2 Chron. xx:1, it is said, 'It came to pass after this also, that the children of Moab and the children of Ammon, and *with them (other) besides the Ammonites*, came against Jehoshaphat to battle.' (See JEHOSHAPHAT.)

The Ammonites 'gave gifts' to Uzziah (2 Chron. xxvi:8), and paid a tribute to his son Jotham for three successive years, consisting of 100 talents of silver, 1,000 measures of wheat, and as many of barley.

(5) **Captivity of the Israelites.** When the two and a half tribes were carried away captive, the Ammonites took possession of the towns belonging to the tribe of Gad (Jer. xlix:1). 'Bands of the children of Ammon' and of other nations came up with Nebuchadnezzar against Jerusalem (B. C. 607), and joined in exulting over its fall (Ezek. xxv:3, 6). Yet they allowed some of the fugitive Jews to take refuge among them, and even to intermarry (Jer. xl:11; Neh. xiii:13). On the return of the Jews from Babylon the Ammonites manifested their ancient hostility by deriding and opposing the rebuilding of Jerusalem (Neh. iv:3, 7, 8). Both Ezra and Nehemiah expressed vehement indignation against those Jews who had intermarried with the heathen, and thus transgressed the divine command (Deut. vii:3; Ezra x; Neh. xiii:25). Judas Maccabæus (B. C. 164) fought many battles with the Ammonites, and took Jazer with the towns belonging to it. Justin Martyr affirms that in his time the Ammonites were numerous. Origen speaks of their country under the general denomination of Arabia. Josephus says that the Moabites and Ammonites were inhabitants of Cœle-Syria (*Antiq.* i:11, sec. 5).

(6) **National Idol.** The national idol was Molech or Milcom, whose worship was introduced among the Israelites by the Ammonitish wives of Solomon (1 Kings xi:5, 8); and the high places built by that sovereign for this 'abomination' were not destroyed till the reign of Josiah (2 Kings xxiii:13), B. C. 610.

Besides Nahash and Hanun, an Ammonitish king, Baalis, is mentioned by Jeremiah (xl:14). Sixteen manuscripts read Baalim; and Josephus, Baalim, Βαάλειμ (*Antiq.* x:9, sec. 3).

(7) **Denunciations of the Prophets.** In the writings of the prophets terrible denunciations are uttered against the Ammonites on account of their rancorous hostility to the people of Israel; and the destruction of their metropolis, Rabbah, is distinctly foretold (Zeph. ii:8; Jer. xlix:1-6; Ezek. xxv:1-5, 10; Amos i:13-15). (See RABBAH.)

AMNON (ăm'non), (Heb. אַמְנוֹן, *am-nohn'*, faithful).

1. The eldest son of David, by Ahinoam of

Jezreel. He was born at Hebron, about B. C. 1056. He is only known for his atrocious conduct towards his half sister Tamar, which her full brother Absalom avenged two years after, by causing him to be assassinated while a guest at his table (2 Sam. xiii), B. C. 1032.

2. Son of Shimon (1 Chron. iv:20).

AMOK (ā'mok), (Heb. אִמּוֹק, *aw-moke'*, deep, the father of Eber (Neh. xii:7-20).

AMOMUM (am-ō'mūm), (Lat. from Gr. ἄμωμον, *am'moh-mon*). This word is found only in Rev. xviii:13. It denoted an odoriferous plant, or seed, used in preparing precious ointment. It differed from the modern amomum of the druggists, but the exact species is not known.

AMON (ā'mon), (Heb. אֲמוֹן, *aw-mone'*, builder, Jer. xlvi:25).

1. The name of an Egyptian god, in whom the classical writers unanimously recognize their own Zeus and Jupiter. The primitive seat of his worship appears to have been at Meroë, from which it descended to Thebes, and thence, according to Herodotus (ii:54), was transmitted to the Oasis of Siwah and to Dodona; in all which places there were celebrated oracles of this god. His chief temple and oracle in Egypt, however,

The god Amon.

were at Thebes, a city peculiarly consecrated to him, and which is probably meant by the No and No Amon of the prophets. He is generally represented on Egyptian monuments by the seated figure of a man with a ram's head, or by that of an entire ram, and of a blue color. In honor of him the inhabitants of the Thebaid abstained from the flesh of sheep, and they annually sacrificed a ram to him and dressed his image in the hide. A religious reason for that ceremony is assigned by Herodotus (ii:42); but Diodorus (iii:72) ascribes his wearing horns to a more trivial cause. There appears to be no account of the manner in which his oracular responses were given; but as a sculpture at Karnak, which Creuzer has copied from the *Description d'Égypte*, represents his portable tabernacle mounted on a boat and borne on the shoulders of forty priests, it may be conjectured, from the resemblance between several features of that representation and the description of the oracle of Jupiter Ammon in Diodorus (xvii:50), that his responses were communicated by some indication during the solemn transportation of his tabernacle.

There is no reason to doubt that the name of this god really occurs in the passage 'Behold, I will visit Amon of No,' in Jer. xlvi:25. The context and all internal grounds are in favor of this view. The Septuagint has rendered it by Ἀμμών, as it has also called No, in Ezek. xxx:14, Διόσπολις, *Dee-os'poh-lis* (city of Zeus). The Peshito likewise takes it as a proper name, as *Amon* does not exist in Syriac in the signification which it bears as a pure Hebrew word. The Targum of Jonathan and the Vulgate, however, have rendered the passage 'the multitude of Alexandria.' The reason of their taking *Amon* to mean 'multitude' may perhaps be found in the fact that, in Ezek. xxx:13-16, we read *Hamon*, which does bear that sense. Nevertheless, modern scholars are more disposed to emend the latter reading by the former, and to find Amon, the Egyptian god, in both places.

2. The son of Manasseh, and fifteenth king of Judah, who began to reign B. C. 644, and reigned two years. He restored idolatry, and again set up the images which Manasseh had cast down. He was assassinated in a court conspiracy; but the people put the regicides to death, and raised to the throne his son Josiah, then but eight years old (2 Kings xxi:18-26; 2 Chron. xxxiii:21-25).

3. Governor of the city of Samaria, in the time of Ahab (1 Kings xxii:26; 2 Chron. viii:25), B. C. 900.

4. A descendant of the servants of Solomon (called *Ami* in Ezra ii:57); the head of one of the families that returned from Babylon. (B. C. 536.)

5. A son of Manasses, in Christ's ancestry (Matt. i:10)

AMORITES (ām'o-rites), (Heb. אֲמֹרִי, *haw-em-o-ree'*, dweller on the summits), the descendants of one of the sons of Canaan; Auth. Vers. the Emorite.

The Amorites were the most powerful and distinguished of the Canaanitish nations. We find them first noticed in Gen. xiv:7—'the Amorites that dwelt in Hazeron-tamar,' *the cutting of the palm tree*, afterwards called Engedi, *fountain of the kid*, a city in the wilderness of Judæa not far from the Dead Sea. In the promise to Abraham (Gen. xv:16,21), the Amorites are specified as one of the nations whose country would be given to his posterity. But at that time three confederates of the patriarch belonged to this tribe; Mamre, Aner, and Eshcol (Gen. xiv:13, 24). When the Israelites were about to enter the promised land, the Amorites occupied a tract on both sides of the Jordan. That part of their territories which lay to the east of the Jordan was allotted to the tribes of Reuben, Gad, and half the tribe of Manasseh.

(1) **Sihon and Og.** They were under two kings—Sihon, king of Heshbon (frequently called king of the Amorites), and Og, king of Bashan, who 'dwelt at Ashtaroth [and] in [at] Edrei' (Deut. i:4, compared with Josh. xii:4; xiii:12). Before hostilities commenced messengers were sent to Sihon, requesting permission to pass through his land; but Sihon refused, and came to Jahaz and fought with Israel; and Israel smote him with the edge of the sword, and possessed his land from Arnon (Modjeb) unto Jabbok (Zerka) (Num. xxi:24). Og also gave battle to the Israelites at Edrei, and was totally defeated (Num. xxi:33, 35; Deut. iii:1, 8). After the capture of Ai, five kings of the Amorites, whose dominions lay within the allotment of the tribe of Judah, leagued together to wreak vengeance on the Gibeonites for having made a separate peace with the invaders.

(2) **Joshua.** Joshua, on being apprised of their design, marched to Gibeon and defeated them with great slaughter (Josh. x:10). Another confederacy was shortly after formed on a still larger scale (Josh. xi:4). Josephus says that they consisted of 300,000 armed foot soldiers, 10,000 cavalry, and 20,000 chariots (*Antiq.* v:1). Joshua came suddenly upon them by the waters of Merom (the lake Samachonites of Josephus, *Antiq.* v:6, Sec. 1, and the modern Bahrat-al-Hule), and Israel smote them until they left none remaining (Josh. xi:8). (See JOSHUA.) Still, after their severe defeats, the Amorites, by means of their war-chariots and cavalry, confined the Danites to the hills, and would not suffer them to settle in the plains: they even succeeded in retaining possession of some of the mountainous parts.

It is mentioned as an extraordinary circumstance that in the days of Samuel there was peace between Israel and the Amorites (1 Sam. vii:14). In Solomon's reign a tribute of bond-service was levied on the remnant of the Amorites and other Canaanitish nations (1 Kings ix:21; 2 Chron. viii:8).

(3) **Stature.** From the language of Amos (ii:9) it has been inferred that the Amorites in general were men of extraordinary stature, but perhaps the allusion is to an individual, Og, king of Bashan, who is described by Moses as being the last 'of the remnant of the giants.' His bedstead was of iron, 'nine cubits in length and four cubits in breadth' (Deut. iii:11). Though the Gibeonites in Josh. ix:7, are called *Hivites*, yet in 2 Sam. xxi:2, they are said to be 'of the remnant of the Amorites,' probably because they were descended from a common stock. After the conquest of Canaan nothing is heard in the Bible of the Amorites, except the mention of their name as the early inhabitants of the country.

AMOS (ā'mos), (Heb. אָמוֹס, *aw-moce'*, carried, or a burden).

1. One of the twelve minor prophets, a contemporary of Isaiah and Hosea, and not to be confounded with Amoz (which see). Gesenius conjectures that the name may be of Egyptian origin, and the same as Amasis or Amosis, which means *son of the moon*.

(1) **Nativity.** He was a native of Tekoah (2 Sam. xiv:2; 2 Chron. xx:20), about six miles south of Bethlehem, inhabited chiefly by shepherds, to which class he belonged, being also a dresser of sycamore trees. Though some critics have supposed that he was a native of the kingdom of Israel, and took refuge in Tekoah when persecuted by Amaziah; yet a comparison of the passages Amos i:1; vii:14, with Amaziah's language vii:12, leads us to believe that he was born and brought up in that place.

"Bethel was the principal scene of his preaching, perhaps the only one. When he had delivered several addresses there, Amaziah, the chief priest of the royal sanctuary, sent a message to the king, who does not seem to have been present, accusing the preacher of treason, and at the same time ordered the latter to quit the realm. Evidently there was some reason to fear that the oppressed poor might be stirred up to revolt against their lords and masters. The threats of coming judgment would disturb many hearers. The denunciation of cruelty and injustice would awake many echoes. Yet the priest's language evinces all the contempt which a highly-placed official feels towards an interfer-

ing nobody, a fellow who, as he thinks, gains a precarious livelihood by prophesying. Jeroboam does not seem to have paid much heed. In the Bab. Talm. *Pesachim*, fol. 87b, it is said: 'How is it proved that Jeroboam did not receive the accusation brought against Amos? . . . The king answered (in reply to Amaziah), 'God forbid that that righteous man should have said this; and if he hath said it, what can I do to him? The Shechinah hath said it to him.' The conversation is fictitious; but Amos doubtless withdrew unmolested, after disclaiming any official and permanent standing as a prophet, predicting Amaziah's utter destruction because of his impious hindrance of the divine word (Amos vii:14-17, and completing the delivery of his own message to Israel (Amos viii, ix). On reaching home he doubtless put into writing the substance of his speeches, and the roll thus written is the earliest book of prophecy that has come down to us." (J. Taylor, *Hastings' Bib. Dict.*).

The period during which he filled the prophetic office was of short duration, unless we suppose that he uttered other predictions which are not recorded.

(2) **Time of His Prophecy.** It is stated expressly that he prophesied in the days of Uzziah, king of Judah, and the days of Jeroboam, the son of Joash, king of Israel, two years before the earthquake (Amos i:1). As Jeroboam died in the fifteenth year of Uzziah's reign, this earthquake, to which there is an allusion in Zechariah (xiv:5), could not have happened later than the seventeenth year of Uzziah. Josephus indeed (*Antiq.* ix:10), and some other Jewish writers, represent the earthquake as a mark of the divine displeasure against Uzziah (in addition to his leprosy) for usurping the priest's office. This, however, would not agree with the sacred narrative, which informs us that Jotham, his son, acted as regent during the remainder of his reign, was twenty-five years old when he became his successor, and consequently was not born till the twenty-seventh year of his father's reign. As Uzziah and Jeroboam were contemporaries for about fourteen years, from B. C. 798 to 784, the latter of these dates will mark the period when Amos prophesied. Others have placed the beginning of his ministry at about 760 B. C., and still others at 734.

(3) **Closing Life.** "It is quite likely that he reached Tekoa in peace, resumed his shepherd life, and eventually was gathered to his fathers. Jerome and Eusebius affirm that his sepulchre was still shown at Tekoa in their days. When Maundrell was in the neighborhood in 1737 he was told that the tomb was in the village on the mountain. The Roman Church places Amos amongst the martyrs, and commemorates him on the 31st of March, the Greek Church on the 15th of June. Amongst the Jews his freedom of speech gave offense even after his death, for the *Koh. Rab.* blames Amos, Jeremiah, and Ecclesiastes for their fault-finding, and states that this is the reason why the superscriptions to their books run, "The words of Amos," etc., and not "The words of God." (Hastings).

2. Son of Nahum, and father of Mattathias, in the genealogy of the Saviour (Luke iii:25), B. C. about 400.

AMOS, PROPHECY OF (ā'mos, prōf'e-sy ōv). When Amos received his commission, the kingdom of Israel, which had been 'cut short' by Hazael (2 Kings x:32) towards the close of Jehu's reign, was restored to its ancient limits and splendor by Jeroboam the Second (2 Kings

xiv:25). But the restoration of national prosperity was followed by the prevalence of luxury, licentiousness, and oppression, to an extent that again provoked the divine displeasure, and Amos was called from the sheep-folds to be the har-binger of the coming judgments. Not that his commission was limited entirely to Israel. The thunder-storm rolls over all the surrounding kingdoms, touches Judah in its progress, and at length settles upon Israel. Chap. i; ii:1-5, form a solemn prelude to the main subject; nation after nation is summoned to judgment, in each instance with the striking idiomatical expression (similar to that in Proverbs xxx:15, 18, 21). 'For three transgressions—and for four—I will not turn away' the punishment thereof.' Israel is then addressed in the same style, and in chap. iii (after a brief rebuke of the twelve tribes collectively) its degenerate state is strikingly

ii:1; iv:11; v:26; to agricultural or pastoral employments and occurrences, i:3; ii:13; iii:5, 12; iv:2, 9; v:19; vii:1; ix:9, 13, 15; and to national institutions and customs, ii:8; iii:15; iv:4; v:2; vi:4-6, 10; viii:5, 10, 14.

Some peculiar expressions occur; such as 'cleanness of teeth,' a parallelism to 'want of bread,' vi:6. 'God of Hosts' is found only in Amos and the Psalms. 'The high places of Isaac,' vii:9; 'the house of Isaac,' vii:16. 'He that createth the wind,' iv:13.

(2) **The Canonicity of the Book.** The canonicity of the book of Amos is amply supported both by Jewish and Christian authorities. Philo, Josephus, and the Talmud include it among the minor prophets. It is also in the catalogues of Melito, Jerome, and the sixtieth canon of the Council of Laodicea. Justin Martyr, in his *Dialogue with Trypho* (Sec. 22), quotes a

Amphipolis.

portrayed, and the denunciations of divine justice are intermingled, like repeated thunderclaps, to the end of chap. vi. The seventh and eighth chapters contain various symbolical visions, with a brief historical episode (vii:10-17). In the ninth chapter the majesty of Jehovah and the terrors of his justice are set forth with a sublimity of diction which rivals and partly copies that of the royal Psalmist (Comp. verses 2, 3, with Ps. cix., and ver. 6 with Ps. civ.). Towards the close the scene brightens, and from the eleventh verse to the end the promises of the divine mercy and returning favor to the chosen race are exhibited in imagery of great beauty taken from rural life.

(1) **Various Allusions.** The allusions in the writings of this prophet are numerous and varied; they refer to natural objects, as in iii:4, 8; iv:7, 9; v:8; vi:12; ix:3; to historical events, i:9, 11, 13;

considerable part of the fifth and sixth chapters, which he introduces by saying, 'Hear how he speaks concerning these by Amos, one of the twelve.' There are two quotations from it in the New Testament: the first (v:25, 26) by the proto-martyr Stephen (Acts vii:42), the second (ix:11) by the apostle James (Acts xv:16).

AMOSIS (a-mō'sis), an Egyptian monarch, the founder of the eighteenth dynasty, who ascended the throne B. C. 1585.

The period of his accession, and the change which then took place in the reigning family, strongly confirm the opinion of his being the 'new king who knew not Joseph' (Exod. i:8); and if it be considered that he was from the distant province of Thebes, it is reasonable to expect that the Hebrews would be strangers to him, and that he would be likely to look upon them with distrust and contempt.

That these *lechashim* were charms inscribed on silver and gold was the opinion of Aben Ezra. The Arabic has *boxes of amulets*, manifestly concluding that they were similar to those ornamental little cases for written charms which are still used by Arab women. Amulets of this kind are called *hhegab*, and are especially adapted to protect and preserve those written charms on which the Moslems, as did the Jews, chiefly rely. The writing is covered with waxed cloth, and inclosed in a case of thin embossed gold or silver, which is attached to a silk string, or a chain, and generally hung on the right side, above the girdle, the string or chain being passed over the left shoulder. In the specimen here figured there are three of these hhegabs attached to one string. The square one in the middle is almost an inch thick, and contains a folded paper; the others contain scrolls.

The later Jews regarded also as amulets the phylacteries, or sentences of the law which Moses had commanded them to wear on their foreheads and wrists; although this command of Moses is probably to be understood no more literally than the command to *impress* them upon their hearts. (Deut. vi:6, 8).

AMZI (ām'zī), (Heb. אֲמִזִּי, *am-tsee'*, strong).

1. Son of Bani (1 Chron. vi:46).

2. Son of Zechariah and ancestor of Adaiiah (Neh. ii:22).

ANAB (ā'nāb), (Heb. אֲנָב, *an-awb'*, grape town), one of the cities in the mountains of Judah, from which Joshua expelled the Anakim (Josh. xi:21; xv:13, 14).

ANAH (ā'nah), (Heb. אָנָה, *an-aw'*, answering).

1. Son of Zibeon, the Hivite, and father of Esau's wife Aholibamah (Gen. xxxvi:20, 24), B. C. 1760. While feeding asses in the desert he discovered 'warm springs' (*aque calide*), as the original *yemim* is rendered by Jerome, who states that the word had still this signification in the Punic language. Gesenius and most modern critics think this interpretation correct, supported as it is by the fact that warm springs are still found in the region east of the Dead Sea at Callirrhoe. Our version of 'mules' is now generally abandoned, but is supported by the Arabic and Veneto-Greek versions. The revised version reads, "*Anah found the hot springs.*"

2. A son of Seir, the Horite, and one of the heads of a tribe (Gen. xxxvi:29; 1 Chron. i:38).

ANAHARATH (ān'a-hā'rath), (Heb. אֲנָחֲרָת, *an-aw-kha-ravth'*, gorge), city of Issachar (Josh. xix:19), probably in the northern part of that territory. *Meskarah*, and also *en-Naurah*, just east of Little Hermon, have been suggested as the site of Anaharath.

ANAI AH (ān'a-ī'ah), (Heb. אֲנִי־אֵהָ, *an-aw-yaw'*, Jah has answered).

1. One of the persons (probably priests) who stood at the right hand of Ezra while he read the law to the people (Neh. viii:4).

2. One of the chiefs of the people who joined Nehemiah in a sacred covenant (Neh. x:22), B. C. 445.

ANAK (ā-nāk), (Heb. אֲנָכִי, *aw-nawk'*, long-necked, i. e., a giant), the son of Arba. He was the progenitor of a race of giants called Anakim.

ANAKIM (ān'a-kim), (Heb. אֲנָכִים, *ah-nawk-kim'*, giants), or Beni-Anak (בְּנֵי־אֲנָכִים) and Beni Anakim (בְּנֵי־עַמְּנֵי־אֲנָכִים), a wandering nation of southern Canaan,

It was composed of three tribes, descended from and named after the three sons of Anak (Josh. xi:21)—Ahiman, Sesai, and Talmai. When the Israelites invaded Canaan, the Anakim were in possession of Hebron, Debir, Anak, and other towns in the country of the south. Their formidable stature and appearance alarmed the Hebrew spies; but they were eventually overcome and expelled by Caleb when the remnant of the race took refuge among the Philistines (Num. xiii:22, 28, 32, 33; Deut. ix:2; Josh. xi:21, 22; xiv:12; Judg. i:20). This favors the opinion of those who conclude that the Anakim were a tribe of Cushite wanderers from Babel, and of the same race as the Philistines, the Phœnicians, the Philistim, and the Egyptian shepherd kings.

ANAMIM (ān'a-mim), (Heb. אֲנָמִים, *an-aw-meem'*, rockmen), second son of Mizraim (Gen. x:13), who made certain settlements about which little is known (1 Chron. i:11).

Knobel claims that these sons of Mizraim inhabited the Delta of Egypt. "Ebers identifies them with the Amu or Naamu (*Anamaima*) i. e. cowherds, who are included among the tribes ruled by the Pharaohs, fifteenth or fourteenth centuries B. C. They occupy the second place in the procession (after the Rutu or Lutu), and are represented as reddish men of Sem. type, as is shown by the head of the man who represents them in the grave of Seti I. They immigrated into Egypt before the Hyksos from Asia. Their capital was on the Bueolie arm of the Nile, and, in addition to being cattle rearers, they were importers of Asiatic products to Egypt." (J. Milton, *Hastings' Bib. Dict.*).

ANAMMELECH (a-nām'me-lēk), (Heb. אֲנָמְמֶלֶךְ, *an-am'meh-lek*, the king's rock, 2 Kings xvii:31), is mentioned, together with Adrammelech, as a god in honor of whom the people of Sepharvaim, who colonized Samaria, burned their children in sacrifice to their idols. No satisfactory etymology of the name has been discovered.

ANAN (ā'nan), (Heb. אָנָן, *aw-nawn'*, cloud).

1. A chief Israelite, who sealed the sacred covenant on the return from Babylon (Neh. x:26), B. C. between 445 and 410.

2. Hanan (1 Esdr. v:10).

ANANI (a-nā'nī), (Heb. אָנָנִי, *an-aw-nee'*, protected), son of Elioenai, of the family of David (1 Chron. iii:24).

ANANIAH (ān'a-nī'ah), (Heb. אֲנָנִיָּהּ, *an-an-yaw'*, protected by Jehovah).

1. Grandfather of Azariah, a returned exile (Neh. iii:23), B. C. before 446.

2. A place in the tribe of Benjamin, between Nob and Hazor (Neh. xi:32).

ANANIAS (ān'a-nī'as), (Gr. Ἀνανίας, *an-an-ee'-as*, of Gr. *Ananiah*, protected by Jehovah).

1. High-Priest. Ananias, son of Nebedæus, was made high-priest in the time of the procurator Tiberius Alexander (about A. D. 47), by Herod, king of Chalcis, who for this purpose removed Joseph, son of Camydus, from the high priesthood (Joseph. *Antiq.* xx:5, 2). He held the office also under the procurator Cumanus, who succeeded Tiberius Alexander. Being implicated in the quarrels of the Jews and Samaritans, Ananias was, at the instance of the latter (who, being dissatisfied with the conduct of Cumanus, appealed to Ummidius Quadratus, president of Syria), sent in bonds to Rome, to answer for his conduct before Claudius Cæsar. The emperor decided in favor of the accused party. Ananias appears to have returned with credit, and

to have remained in his priesthood until Agrippa gave his office to Ismael, the son of Tabi (*Antiq.* xx:8, 8), who succeeded a short time before the departure of the procurator Felix, and occupied the station also under his successor Festus. Ananias, after retiring from his high-priesthood, 'increased in glory every day' (*Antiq.* xx:1, 2), and obtained favor with the citizens and with Albinus, the Roman procurator, by a lavish use of the great wealth he had hoarded.

The prosperity of Ananias met with a dark and painful termination. The assassins (*sicarii*) who played so fearful a part in the Jewish war, set fire to his house in the commencement of it, and compelled him to seek refuge by concealment, but being discovered in an aqueduct he was captured and slain (*Antiq.* xx:9, 2; *Bell. Jud.* ii:17, 9).

It was this Ananias before whom Paul was brought, in the procuratorship of Felix (*Acts* xxiii:2, 3). The noble declaration of the apostle, 'I have lived in all good conscience before God until this day,' so displeased him that he commanded the attendant to smite him on the face. Indignant at so unprovoked an insult, the apostle replied, 'God shall smite thee, thou whited wall,' a threat which the previous details serve to prove wants not evidence of having taken effect. Paul, however, immediately restrained his anger, and allowed that he owed respect to the office which Ananias bore. After this hearing Paul was sent to Cæsarea, whither Ananias repaired in order to lay a formal charge against him before Felix, who postponed the matter, detaining the apostle meanwhile, and placing him under the supervision of a Roman centurion (*Acts* xxiv).

2. Husband of Sapphira. A Christian belonging to the infant church at Jerusalem, who, conspiring with his wife Sapphira to deceive and defraud the brethren, was overtaken by sudden death, and immediately buried. The Christian community at Jerusalem appear to have entered into a solemn agreement that each and all should devote their property to the great work of furthering the gospel and giving succor to the needy. Accordingly they proceeded to sell their possessions and brought the proceeds into the common stock of the church (*Acts* iv:32, 37). The apostles then had the general disposal, if they had not also the immediate distribution, of the common funds. The contributions, therefore, were designed for the sacred purposes of religion (*Acts* v:1-11).

As all the members of the Jerusalem church had thus agreed to hold their property in common, for the furtherance of the holy work in which they were engaged, if any one of them withheld a part, and offered the remainder as the whole, he committed two offenses—he defrauded the church and was guilty of falsehood; and as his act related not to secular but to religious affairs, and had an injurious bearing, both as an example and as a positive transgression against the Gospel, while it was yet struggling into existence, Ananias lied not unto man, but unto God, and was guilty of a sin of the deepest dye. Had Ananias chosen to keep his property for his own worldly purposes, he was at liberty, as Peter intimates, so to do, but he had in fact alienated it to pious purposes, and it was therefore no longer his own. Yet he wished to deal with it in part as if it were so, showing at the same time that he was conscious of his misdeed, by presenting the residue to the common treasury as if it had been his entire property. He wished to satisfy his selfish cravings, and at the same time to enjoy the reputation of being purely dis-

interested, like the rest of the church. He attempted to serve God and Mammon. The original *ἐνοσφίσαρο*, *en-os-fis'ah-to*, is much more expressive of the nature of his misdeed than our common version, 'kept back' (part of the price). The Vulgate renders it 'fraudavit,' and both Wycliffe and the Rheims Version employ a corresponding term, 'defraudid,' 'defrauded.' In the only other text of the New Testament where the word is found (*Tit.* ii:10), it is translated 'purloining.' It is, indeed, properly applied to the conduct of persons who appropriate to their own purposes money destined for public uses.

It is the more important to place the crime of Ananias and his wife in its true light because unjust reflections have been cast upon the apostle Peter (*Wolfenb. Fragm. Zweck Jesu*, p. 256) for his conduct in the case. Whatever that conduct may have been, the misdeed was of no trivial kind, either in itself or in its possible consequences. If, then, Peter reproves it with warmth, he does no more than nature and duty alike required; nor does there appear in his language on the occasion any undue or uncalled for severity.

With strange inconsistency on the part of those who deny miracles altogether, unbelievers have accused Peter of cruelly smiting Ananias and his wife with instant death. The sacred narrative, however, ascribes to Peter nothing more than a spirited exposure of their aggravated offense. Their death, the reader is left to infer, was by the hand of God; nor is any ground afforded in the narrative (*Acts* v:1-11) for holding that Peter was in any way employed as an immediate instrument of the miracle. On the other hand, J. A. Selbie (*Hastings' Bib. Dict.*) says: "As to its *cause*, whatever this may have been from a secondary point of view, there can be no doubt that in *Acts* it is traced to the deliberate will and intention of St. Peter. (Note especially v. 9, and compare the parallel case of St. Paul and Elymas in *Acts* xiii:11.)"

3. A Christian of Damascus (*Acts* ix:10-17; xxii:12), held in high repute, to whom the Lord appeared in a vision, and bade him proceed to 'the street which is called Straight, and inquire in the house of Judas for one called Saul of Tarsus, for, behold, he prayeth.' Ananias had difficulty in giving credence to the message, remembering how much evil Paul had done to the saints at Jerusalem, and knowing that he had come to Damascus with authority to lay waste the church of Christ there. Receiving, however, an assurance that the persecutor had been converted and called to the work of preaching the Gospel to the Gentiles, Ananias went to Paul, and, putting his hands on him, bade him receive his sight, when immediately there fell from his eyes as it had been scales, and, recovering the sight which he had lost when the Lord appeared to him on his way to Damascus, Paul, the new convert, arose, and was baptized, and preached Jesus Christ.

Tradition represents Ananias as the first that published the Gospel in Damascus, over which place he was subsequently made bishop, but having roused, by his zeal, the hatred of the Jews, he was seized by them, scourged and finally stoned to death in his own church. There is a very fine church where he was interred, and the Turks, who have made a mosque of it, preserve a great respect for his monument.

ANAPHA (än'a-fä), (Heb. אָנָפָה, *an-aw-phaw'*, Vulg. *caradryon* and *caradrium*; Eng. Vers. heron, *Lev.* xi:10, and *Deut.* xiv:18), an unclean bird, but the particular bird denoted by the

Hebrew word has been much disputed. The kite, woodcock, curlew, peacock, parrot, crane, lapwing and several others have been suggested. Since the word occurs but twice, and in both instances is isolated, no aid can be derived from a comparison of passages.

Recourse has consequently been had to etymology. The root *anaph* signifies to breathe, to snort, especially from *anger*, and thence, figuratively, to *be angry*. Parkhurst observes that 'as the heron is remarkable for its *angry* disposition, especially when *hurt* or *wounded*, this bird seems to be most probably intended.' But this equally applies to a great number of different species of birds. Bochart supposes it may mean the *mountain falcon*, called *ἀνοπαία* by Homer (*Odys.* i:320), because of the similarity of the Greek word to the Hebrew. But if it meant any kind of *cagle* or *hawk*, it would probably have been reckoned with one or other of those species mentioned in the preceding verses.

On the whole, the preponderance of evidence derived from an unbroken chain of well ascertained facts seems in favor of the conclusion that the Hebrew word *anapha* designates the numerous species of the *plover* (may not this be the genus of birds alluded to as *the fowls of the mountain*, Ps. 1:11; Is. xviii:6?) Various species of the genus are known in Syria and Palestine as the *C. pluvialis* (golden plover), *C. edicuemus* (stone-curlew), and *C. spinosus* (lapwing). (Kitto's *Physical Hist. of Palestine*, p. 106.) And, in connection with some of the preceding remarks, it is important to observe that in these species a yellow color is more or less marked. (See HERON.)

ANATHEMA (â-năth'ê-mâ), (Gr. ἀνάθεμα, *an-ath'em-a*), literally, anything laid up or suspended, and hence anything laid up in a temple, set apart as sacred.

(1) **Setting Apart.** In this general sense the form employed is ἀνάθημα, *an-ath'ay-ma*, a word of not unfrequent occurrence in Greek classic authors, and found once in the New Testament (Luke xxi:5). The form ἀνάθεμα, as well as its meaning, appears to be peculiar to the Hellenistic dialect. The distinction has probably arisen from the special use made of the word by the Greek Jews. In the Septuagint, ἀνάθεμα, *a thing set apart or accursed*, is the ordinary rendering of the Hebrew word כִּחְרֵם, *khch'rcm*, to consecrate (although in some instances it varies between the two forms, as in Lev. xxvii:28, 29), and in order to ascertain its meaning it will be necessary to inquire into the signification of this word.

We find that the *Khch-rem* was a person or thing consecrated or devoted irrevocably to God, and that it differed from anything merely vowed or sanctified to the Lord in this respect, that the latter could be redeemed (Lev. xxvii:1-27), whilst the former was irreclaimable (Lev. xxvii:21, 28; Num. xviii:14; Ezek. xlv:29); hence, in reference to living creatures, the devoted thing, whether man or beast, must be put to death (Lev. xxvii:29). The prominent idea, therefore, which the word conveyed was that of a person or thing *devoted to destruction*, or *accursed*. Thus the cities of the Canaanites were anathematized (Num. xxi:2, 3), and after their complete destruction the name of the place was called Hormah (הֲרָמָה; Sept. ἀνάθεμα). Thus, again, the city of Jericho was made an anathema to the Lord (Josh. vi:17), that is, every living thing in it (except Rahab and her family) was devoted to death; that which could be destroyed by fire was burnt, and all that could not be thus consumed

(as gold and silver) was forever alienated from man and devoted to the use of the sanctuary (Josh. vi:24). The prominence thus given to the idea of a *thing accursed* led naturally to the use of the word in cases where there was no reference whatever to consecration to the service of God, as in Deut. vii:26; xiii:17, where an idol is called *cherem*, or ἀνάθεμα (*a thing accursed*), and the Israelites are warned against idolatry lest they should be anathema like it. In these instances the term denotes the object of the curse, but it is sometimes used to designate the curse itself (e. g. Deut. xx:17, Sept.; Comp. Acts xxiii:14), and it is in this latter sense that the English word is generally employed.

(2) **Among the Later Jews.** In this sense, also, the Jews of later times use the Hebrew term, though with a somewhat different meaning as to the curse intended. The *Khch-rem* of the Rabbins signifies excommunication or exclusion from the Jewish church. The more recent Rabbinical writers reckon three kinds or degrees of excommunication, all of which are occasionally designated by the generic term *Khch-rem* (Elias Levita, in *Sepher Tisbi*). The first of these is merely a temporary separation or suspension from ecclesiastical privileges, involving, however, various civil inconveniences, particularly seclusion from society to the distance of four cubits. The person thus excommunicated was not debarred entering the temple, but instead of going in on the right hand, as was customary, he was obliged to enter on the left, the usual way of departure; if he died whilst in this condition there was no mourning for him, but a stone was thrown on his coffin to indicate that he was separated from the people and had deserved stoning. Buxtorf (*Lex. Chald., Talm. et Rabbin.*, col. 1304) enumerates twenty-four causes of this kind of excommunication; it lasted thirty days and was pronounced without a curse. If the individual did not repent at the expiration of the term (which, however, according to Buxtorf, was extended in such cases to sixty or ninety days), the second kind of excommunication was resorted to. This was called simply and more properly *Khch-rem*. It could only be pronounced by an assembly of at least ten persons, and was always accompanied with curses. The formula employed is given at length by Buxtorf (*Lex.* col. 828). A person thus excommunicated was cut off from all religious and social privileges; it was unlawful either to eat or drink with him (Compare I Cor. v:11). The curse could be dissolved, however, by three common persons, or by one person of dignity. If the excommunicated person still continued impenitent, a yet more severe sentence was, according to the later Rabbins, pronounced against him.

It is described as a complete excision from the church and the giving up of the individual to the judgment of God and to final perdition. There is, however, reason to believe that these three grades are of recent origin. The Talmudists frequently use the terms by which the first and last are designated interchangeably, and some Rabbinical writers (whom Lightfoot has followed in his *Horeæ Hebr. et Talm.*, ad I Cor. v:5) consider the last to be a lower grade than the second; yet it is probable that the classification rests on the fact that the sentence was more or less severe according to the circumstances of the case, and though we cannot expect to find the three grades distinctly marked in the writings of the New Testament, we may not improbably consider the phrase ἀποσυνάγαγον ποιῆν *to exclude from the assemblies* (John xvi:2; Comp. ix:

22, xii:42) as referring to a lighter censure than is intended by one or more of the three terms used in Luke vi:22, where perhaps different grades are intimated. The phrase, *to give over to the adversary* (1 Cor. v:5; 1 Tim. i:20), has been by many commentators understood to refer to the most severe kind of excommunication. Even admitting the allusion, however, there is a very important difference between the Jewish censure and the formula employed by the Apostle. In the Jewish sense it would signify the delivering over of the transgressor to final perdition, whilst the Apostle expressly limits his sentence to the 'destruction of the flesh' (i. e., the depraved nature), and resorts to it in order 'that the spirit may be saved in the day of the Lord Jesus.'

But whatever diversity of opinion there may be as to the degrees of excommunication, it is on all hands admitted that the term *Khesh-rem*, with which we are more particularly concerned as the equivalent of the Greek *anathema*, a *setting apart*, properly denotes, in its Rabbinical use, an excommunication accompanied with the most severe curses and denunciations of evil.

(3) **In the New Testament.** We are therefore prepared to find that the *anathema* of the New Testament always implies execration, but it yet remains to be ascertained whether it is ever used to designate a judicial act of excommunication. That there is frequently no such reference is very clear; in some instances the individual denounces the anathema on himself, unless certain conditions are fulfilled. The noun and its corresponding verb are thus used in Acts xxiii:12, 14, 21, and the verb occurs with a similar meaning in Matt. xxvi:74; Mark xiv:71. The phrase 'to call Jesus anathema' (1 Cor. xii:3) refers not to a judicial sentence pronounced by the Jewish authorities, but to the act of any private individual who execrated him and pronounced him accursed. That this was a common practice among the Jews appears from the Rabbinical writings. The term, as it is used in reference to any who should preach another gospel, 'Let him be anathema' (Gal. i:8, 9), has the same meaning as, "let him be accounted execrable and accursed." In none of these instances do we find any reason to think that the word was employed to designate specifically and technically excommunication either from the Jewish or the Christian church. There remain only two passages in which the word occurs in the New Testament, both presenting considerable difficulty to the translator. With regard to the first of these (Rom. ix:3) Grotius and others understand the phrase to be *anathema*, (or *accursed*) *from Christ*, to signify *excommunication from the Christian church*, while most of the fathers, together with Tholuck, Rückert and a great number of modern interpreters, explain the term as referring to the Jewish practice of excommunication. On the other hand, Deyling, Olshausen, De Wette and many more adopt the more general meaning of accursed. The great difficulty is to ascertain the extent of the evil which Paul expresses his willingness to undergo; Chrysostom, Calvin and many others understand it to include final separation, not indeed from the love, but from the presence of Christ; others limit it to a violent death, and others, again, explain it as meaning the same kind of curse as that under which the Jews then were, from which they might be delivered by repentance and the reception of the Gospel (Deylingii *Observatt. Sacra* P. II. p. 495 and *sqq.*). It would occupy too much space to refer to other interpretations of the passage, or to pursue the in-

vestigation of it further. There seems, however, little reason to suppose that a judicial act of the Christian Church is intended, and we may remark that much of the difficulty which commentators have felt seems to have arisen from their not keeping in mind that the Apostle does not speak of his wish as a possible thing; and their consequently pursuing to all its results what should be regarded simply as an expression of the most intense desire.

The phrase, let him be *anathema maran-atha* seems, in the view of some, to be intended simply as an expression of detestation. Others hold that it is a Syriac exclamation, signifying, *Let him be accursed, the Lord is at hand*, a reminder that at the coming of the Lord rewards and punishments would be meted out (1 Cor. xvi:22).

ANATHEMATA (ā-nāth-ē-mā'tā), (from Gr. ἀνατίθημι, *an-at-ith'ay-mee*, to lay up).

Ornaments which were set apart for the decoration of churches. In Luke xxi:5 the word is applied to the ornaments which were used in the temple. In a stricter sense the word is used to denote memorials of great favors which men had received from God. Very early a custom, still existing, sprang up of anyone receiving a signal cure presenting to the church what was called his *ectypoma*, or figure of the member cured, in gold or silver.

ANATHOTH (ān'ā-thōth), (Heb. אַנְתוֹת, *an-aw-thoth'*, answers, i. e., to prayer).

1. One of the towns belonging to the priests in the tribe of Benjamin, and as such a city of refuge. (Josh. xxi:18; Jer. i:1). It occurs also in 2 Sam. xxiii:27; Ezra ii:23; Neh. vii:27, but is chiefly memorable as the birthplace and usual residence of the prophet Jeremiah (Jer. i:1; xi:21-23; xxix:27), whose name it seems to have borne in the time of Jerome, '*Anathoth, quæ hodie appellatur Jeremie*' (*Onomast. s. v.* Anathoth). The same writer (*Comment. in Jer. i:1*) places Anathoth three Roman miles north of Jerusalem, which corresponds with the twenty stadia assigned by Josephus (*Antiq. x:7, 3*). Professor Robinson appears to have discovered this place in the present village of *Anata*, at the distance of an hour and a quarter from Jerusalem. It is seated on a broad ridge of hills, and commands an extensive view of the eastern slope of the mountainous tract of Benjamin, including also the valley of the Jordan, and the northern part of the Dead Sea. It seems to have been once a walled town and a place of strength. It is now a small and very poor village. From the vicinity a favorite kind of building stone is carried to Jerusalem. Troops of donkeys are met with employed in this service, a hewn stone being slung on each side; the larger stones are transported on camels (Robinson, *Researches*, ii:109; Raumer's *Palastina*, p. 169).

2. Eighth of the nine sons of Becher, a son of Benjamin (1 Chron. vii:8), B. C. between 1856 and 1650.

3. One of the chief Israelites that sealed the covenant with Nehemiah (Neh. x:19) B. C. about 445.

ANATHOTHITE (ān-ā-thōth'ite), (Heb. אַנְתוֹתִי, *haw-an-nah-thoth'ee*), is the uniform designation in R. V. of an inhabitant of Anathoth. A. V. offers such variants as Anethite, Anethothite, Antothite.

ANCHOR (ān'kēr). See SHIP.

ANCIENT OF DAYS (ān'shənt öv dāz), (Chald. אֲנִיִּן עֲלֵיךְ יוֹם מֵעַן, *at-teek' yov-meen'*, advanced in days), an expression applied to Jehovah in a vision of Daniel (vii:9; 13, 22).

ANCIENTS (ān'shents), (Heb. זָקֵן, *zaw-kane'*, old). This word has the meaning of *aged* (Gen. xviii:12, 13; xix:31; xxiv:1, etc.). It has also the meaning of *elders*, i. e., chief men, magistrates (Is. iii:14; xxiv:23; Jer. xix:1; Ezck. vii:26; viii:11, 12, etc.).

ANDREW (än'drū) (Gr. Ἀνδρέας, *an-dreh'as*, manly), one of the twelve apostles. His name is of Greek origin, but was in use among the Jews, as appears from a passage quoted from the Jerusalem Talmud by Lightfoot (*Harmony*, Luke v:10).

Personal History. He was a native of the city of Bethsaida in Galilee, and brother of Simon Peter.

(1) **Receives Christ.** He was at first a disciple of John the Baptist, and was led to receive Jesus as the Messiah in consequence of John's expressly pointing him out as 'the Lamb of God' (John i:36, 40). His first care, after he had satisfied himself as to the validity of the claims of Jesus, was to bring to him his brother Simon. Neither of them, however, became at that time stated attendants on our Lord, for we find that they were still pursuing their occupation of fishermen on the sea of Galilee when Jesus, after John's imprisonment, called them to follow him (Mark i:14, 17).

(2) **As an Apostle.** Very little is related of Andrew by any of the evangelists. The principal incidents in which his name occurs during the life of Christ are the feeding of the five thousand (John vi:9); his introducing to our Lord certain Greeks who desired to see him (John xii:22); and his asking, along with his brother Simon and the two sons of Zebedee, for a further explanation of what our Lord had said in reference to the destruction of the temple (Mark xiii:3). Of his subsequent history and labors we have no authentic record.

(3) **Tradition.** Tradition assigns Scythia (Euseb. iii:1, 71), Greece (Theodoret, i: 1425), and Thrace (Hippolytus, ii:30) as the scenes of his ministry; he is said to have suffered crucifixion at Patræ in Achaia, on a cross of the form called *Cruz decussata* (X), and commonly known as 'St. Andrew's cross' (Winer's *Bibl. Realwörterbuch*, *sub voce*). The modern Greeks make him founder of the church of Byzantium. An apocryphal book, bearing the title of 'The Acts of Andrew,' is mentioned by Eusebius, Epiphanius and others. It is now completely lost, and seems never to have been received except by some heretical sects, as the Encratites, Origenians, etc. This book, as well as a 'Gospel of St. Andrew,' was declared apocryphal by the decree of Pope Gelasius (Jones, *On the Canon*, vol. i, p. 179 and *sqq.*). (See ACTS, SPURIOUS; GOSPELS, SPURIOUS.)

ANDRONICUS (än'dro-nī'kus or än-drön'i-kus), (Gr. Ἀνδρονίκος, *an-dron-ee'kos*, man of victory).

1. The regent governor of Antioch in the absence of Antiochus, Epiphanes, who, at the instigation of Menelaus, put to death the deposed high priest Onias, for which deed he was himself ignominiously slain on the return of Antiochus (2 Macc. iv), B. C. 169.

2. A Jewish Christian of Rome, the kinsman and fellow-prisoner of Paul (Rom. xvi:7).

ANEM (ā'nem), (Heb. אָנֵם, *aw-name'*, two fountains), a city of Issachar, given to the Levites, 1 Chron. vi:73. In the parallel passage, Josh. xix:21, it is called *En-gannim*, i. e., fountain of the gardens. This place, which is well watered—whence perhaps its name, 'two springs'—is the Anea of the fourth century A. D. (*Onomasticon*,

s. v. Aniel and Bethana), which had good baths, lying fifteen Roman miles from Cæsarea. Eusebius, however, identifies this site with Aner.

ANER (ā'ner), (Heb. אָנֵר, *aw-nare'*, a youth, an exile).

1. Aner, Eshcol and Mamre, three Canaanites who joined their forces with those of Abraham in pursuit of the kings Chedorlaomer, Amraphel, and their allies, who had pillaged Sodom, and carried off Lot, Abraham's nephew, Gen. xiv:24. They did not imitate the disinterestedness of the patriarch, however, but retained their share of the spoil.

As Mamre is an old name for Hebron (Gen. xxiii:2), and Eshcol is the name of a valley not far from Hebron (Num. xiii:23), it is natural to suppose that Aner also was the name of a locality which gave its name to a clan. Dillmann (*in loc.*) compares *Ne'ir*, which is the name of a range of hills in the vicinity.

2. A city of Manassch, given to the Levites of Kohath's family (1 Chron. vi:70).

ANETHON (a'nē-thon), (Gr. ἀνηθον, *an'ay-thon*, dill), occurs in Matt. xxiii:23, where it is rendered *anise*, 'Woe unto you—for ye pay tithe of mint and *anise* and cummin.'

By the Greek and Roman writers it was employed to designate a plant used both medicinally and as an article of diet. The Arabian translators of the Greek medical authors give as its synonym *shabūt*, the name applied in eastern countries to an umbelliferous plant with flattened fruit commonly called 'seed,' which is surrounded with a dilated margin. In Europe the word has always been used to denote a similar plant, which is familiarly known by the name of Dill. Hence there is no doubt that in the above passage, instead of 'anise,' *anathon* should have been translated 'dill;' and it is said to be rendered by a synonymous word in every version except our own.

The common dill, or *anethum graveolens*, is an annual plant, growing wild among the corn in Spain and Portugal, and on the coast of Italy, in Egypt, and about Astracan. It resembles *fennel*, but is smaller, has more glaucous leaves, and a less pleasant smell. The fruit or seeds, which are finely divided, have a warm and aromatic taste, owing to the presence of a pale yellow volatile oil, which itself has a hot taste and a peculiar penetrating odor.

ANGEL (än-jël), (Gr. ἄγγελος, *ang'el-os*, used in the Sept. and New Testament for the Heb. singular, מַלְאָכִים, *mal-awk'*), a word signifying *messengers*, both in Hebrew and Greek, and therefore used to denote whatever God employs to execute his purposes, or to manifest his presence or his power. In some passages it occurs in the sense of an ordinary messenger (Job i:14; 1 Sam. xi:3; Luke vii:4; ix:52); in others it is applied to prophets (Is. lxiii:19; Hag. i:13; Mal. iii); to priests (Eccl. v:5; Mal. ii:7); to ministers of the New Testament (Rev. i:20). It is also applied to impersonal agents; as to the pillar of cloud (Exod. xiv:19; xiii:21; xxxii:34); to the pestilence (2 Sam. xxiv:16, 17; 2 Kings xix:30); to the winds ('who maketh the winds his angels,' Ps. civ:4); so, likewise, plagues generally are called 'evil angels' (Ps. lxxviii:49), and Paul calls his thorn in the flesh an 'angel of Satan' (2 Cor. xii:7; Gal. iv:13, 14).

(1) **Spiritual Beings.** But this name is more eminently and distinctively applied to certain spiritual beings or heavenly intelligences, employed by God as the ministers of His will and usually distinguished as *angels of God* or *angels of Jehovah*. In this case the name has respect

to their official capacity as 'messengers,' and not to their nature or condition. The term 'spirit,' on the other hand (in Greek, *pneuma*, in Hebrew *mach*), has reference to the nature of angels, and characterizes them as incorporeal and invisible essences. But neither the Hebrew *mach* nor the Greek *pneuma*, nor even the Latin *spiritus*, corresponds exactly to the English *spirit*, which is opposed to matter, and designates what is immaterial; whereas the other terms are not opposed to matter, but to body, and signify not what is immaterial, but what is incorporeal. The modern idea of spirit was unknown to the ancients. They conceived spirits to be incorporeal and invisible, but not immaterial, and supposed their essence to be a pure air or a subtle fire. The proper meaning of *πνεῦμα*, *pneuma* (from *πνέω*, I blow, I breathe) is air in motion, wind, breath.

(2) **Spiritual Bodies.** The Hebrew *mach* is of the same import; as is also the Latin *spiritus*, from *spiro*, I blow, I breathe. When, therefore, the ancient Jews called angels *spirits*, they did not mean to deny that they were endued with bodies. When they affirmed that angels were incorporeal, they used the term in the sense in which it was understood by the ancients—that is, as free from the impurities of gross matter. The distinction between 'a natural body' and 'a spiritual body' is indicated by St. Paul (1 Cor. xv:44), and we may, with sufficient safety, assume that angels are spiritual bodies, rather than pure spirits in the modern acceptance of the word.

It is disputed whether the term *Elohim* is ever applied to angels, but the inquiry belongs to another place. (See GOD.) It may suffice here, perhaps, to observe that both in Ps. viii:5 and xcvi:7 the word is rendered by *angels* in the Sept. and other ancient versions; and both these texts are so cited in Heb. i:6; ii:7, that they are called *Beni-Elohim*, *Sons of God*.

(3) **Spiritual Intelligences.** In the Scriptures we have frequent notices of spiritual intelligence, existing in another state of being, and constituting a celestial family, or hierarchy, over which Jehovah presides. The Bible does not, however, treat of this matter professedly and as a doctrine of religion, but merely adverts to it incidentally as a fact, without furnishing any details to gratify curiosity. It speaks of no obligations to these spirits, and indicates no duties to be performed towards them. A belief in the existence of such beings is not, therefore, an essential article of religion, any more than a belief that there are other worlds besides our own; but such a belief serves to enlarge our ideas of the works of God, and to illustrate the greatness of his power and wisdom (Mayer, *Am. Bib. Repos.* xii:360). The practice of the Jews, of referring to the agency of angels every manifestation of the greatness and power of God, has led some to contend that angels have no real existence, but are mere personifications of unknown powers of nature; and we are reminded that, in like manner, among the Gentiles, whatever was wonderful, or strange, or unaccountable, was referred by them to the agency of some one of their gods. Among the numerous passages in which angels are mentioned, there are, however, a few which cannot, without improper force, be reconciled with this hypothesis (Gen. xvi:7-12; Judg. xiii:1-21; Matt. xxviii:2-4), and if Matt. xx:30 stood alone in its testimony, it ought to settle the question. Christ there says that 'in the resurrection they neither marry nor are given in marriage, but are as *the angels of God*.' The force of this

passage cannot be eluded by the hypothesis (see ACCOMMODATION) that Christ mingled with his instructions the erroneous notions of those to whom they were addressed, seeing that he spoke to Sadducees, who did *not* believe in the existence of angels (Acts xxiii:8). So likewise, the passage in which the high dignity of Christ is established, by arguing that he is superior to the angels (Heb. i:4, *sqq.*), would be without force or meaning if angels had no real existence.

(4) **Numerous.** That these superior beings are very numerous is evident from the following expressions: Dan. vii:10, 'thousands of thousands,' and 'ten thousand times ten thousand.' Ps. lxxviii:17; Matt. xxvi:53, 'more than twelve legions of angels.' (Comp. Gen. xxviii:12; xxxii:1, 2; Ps. ciii:20, 21; cxlviii:2). Luke ii:13, 'multitude of the heavenly host.' Heb. xii:22, 23, 'myriads of angels.' It is probable, from the nature of the case, that among so great a multitude there may be different grades and classes, and even natures—ascending from man towards God, and forming a chain of being to fill up the vast space between the Creator and man—the lowest of his intellectual creatures. This may be inferred from the analogies which pervade the chain of being on the earth whereon we live, which is as much the Divine creation as the world of spirits.

(5) **Biblical Allusions.** Accordingly the Scripture describes angels as existing in a society composed of members of unequal dignity, power and excellence, and as having chiefs and rulers. It is admitted that this idea is not clearly expressed in the books composed before the Babylonish captivity; but it is developed in the books written during the exile and afterwards, especially in the writings of Daniel and Zechariah. In Zech. i:11 an angel of the highest order, *one who stands before God*, appears in contrast with angels of an inferior class, whom he employs as his messengers and agents (Comp. iii:7). In Dan. x:13, the appellation, "one of the chief princes," and in xii:1, "the great prince," are given to Michael. The Grecian Jews rendered this appellation by the term *ἀρχάγγελος*, *ark-ang'el-os*, *archangel*, which occurs in the New Testament (Jude 9; 1 Thess. iv:16), where we are taught that Christ will appear to judge the world *ἐν φωνῇ ἀρχαγγέλου*, *foh-nay' ark-ang-el'oo*, *with the voice of an archangel*. This word denotes, as the very analogy of the language teaches, a chief of the angels, one superior to the other angels, like the term *chief priest*. The opinion, therefore, that there were various orders of angels was not peculiar to the Jews, but was held by Christians in the time of the apostles, and is mentioned by the apostles themselves. The distinct divisions of the angels, according to their rank in the heavenly hierarchy, which we find in the writings of the later Jews, were either almost or wholly unknown in the apostolical period.

(6) **In Human Form.** In the Scriptures angels appear with bodies, and in the human form, and no intimation is anywhere given that these bodies are not real, or that they are only assumed for the time and then laid aside. It was manifest indeed to the ancients that the matter of these bodies was not like that of their own, inasmuch as angels could make themselves visible and vanish again from their sight. But this experience would suggest no doubt of the reality of their bodies; it would only intimate that they were not composed of gross matter. After his resurrection Jesus often appeared to his disciples and vanished again before them; yet they never doubted that they saw the same body which had been crucified, although they must have per-

ceived that it had undergone an important change. The fact that angels always appeared in the human form does not, indeed, prove that they really have this form, but that the ancient Jews believed so. That which is not pure spirit must have some form or other, and angels may have the human form, but other forms are possible. We sometimes find angels, in their terrene manifestations, eating and drinking (Gen. xviii:8; xix:3), but in Judg. xiii:15, 16, the angel who appeared to Manoah declined, in a very pointed manner, to accept his hospitality. The manner in which the Jews obviated the apparent discrepancy, and the sense in which they understood such passages, appears from the apocryphal book of Tobit (xii:19), where the angel is made to say, 'It seems to you, indeed, as though I did eat and drink with you, but I use invisible food, which no man can see.' Milton, who was deeply read in the 'angelical' literature, derides these questions:

'So down they sat
And to their viands fell; nor seemingly
The angel, nor in mist (the common gloss
Of theologians), but with keen dispatch
Of real hunger, and concoctive heat
To transubstantiate; what redounds
Transpires through spirits with ease.'
—*Par. Lost*, v:433-439.

The same angel had previously satisfied the curiosity of Adam on the subject, by stating that

'Whatever was created, needs
To be sustained and fed.'

If this dictum were capable of proof, except from the analogy of *known* natures, it would settle the question. But if angels do *not* need it, if their spiritual bodies are inherently *incapable* of waste or death, it seems not likely that they gratuitously perform an act designed, in all its known relations, to promote growth, to repair waste and to sustain existence.

The passage already referred to in Matt. xxii:30, teaches by implication that there is no distinction of sex among the angels. The Scripture never makes mention of female angels. The Gentiles had their male and female divinities, who were the parents of other gods. But in the Scriptures the angels are all males, and they appear to be so represented not to mark any distinction of sex, but because the masculine is the more honorable gender. Angels are never described with marks of age, but sometimes with those of youth (Mark xvi:5). The constant absence of the features of age indicates the continual vigor and freshness of immortality. The angels never die (Luke xx:36). But no being besides God himself has essential immortality (1 Tim. vi:16); every other being therefore is mortal in itself and can be immortal only by the will of God. Angels, consequently, are not eternal, but had a beginning.

(7) **Attributes.** The preceding considerations apply chiefly to the *existence* and *nature* of angels. Some of their *attributes* may be collected from other passages of Scripture. That they are of superhuman intelligence is implied in Mark xiii:32: 'But of that day and hour knoweth no man, not *even* the angels in heaven.' That their power is great may be gathered from such expressions as 'mighty angels' (2 Thess. i:7); 'angels powerful in strength' (Ps. ciii:20); 'angels who are greater (than man) in power and might.' The moral perfection of angels is shown by such phrases as 'holy angels' (Luke ix:26); 'the elect

angels' (2 Tim. v:21). Their felicity is beyond question in itself, but is evinced by the passage (Luke xx:36) in which the blessed in the future world are said to be 'like unto the angels and sons of God.'

(8) **Ministry.** The *ministry* of angels, or that they are employed by God as the instruments of His will, is very clearly taught in the Scriptures. The very name, as already explained, shows that God employs their agency in the dispensations of His Providence. And it is further evident, from certain actions which are ascribed wholly to them (Matt. xiii:41, 49; xxiv:31; Luke xvi:22), and from the Scriptural narratives of other events, in the accomplishment of which they acted a visible part (Luke i:11, 26; ii:9, *sq.*; Acts v:19, 20; x:3, 19; xii:7; xxvii:23), that their agency is employed principally in the guidance of the destinies of man. In those cases also in which the agency is concealed from our view, we may admit the probability of its existence, because we are told that God sends them forth 'to minister to those who shall be heirs of salvation' (Heb. i:14; also Ps. xxxiv:8, 91; Matt. xviii:10). But the angels, when employed for our welfare, do not act independently, but as the instruments of God, and by His command (Ps. ciii:20; civ:4; Heb. i:13, 14); not unto them, therefore, are our confidence and adoration due, but only unto Him (Rev. xix:10; xxii:9) whom the angels themselves reverently worship.

(9) **Guardianship.** It was a favorite opinion of the Christian fathers that every individual is under the care of a particular angel, who is assigned to him as a guardian. The Jews (excepting the Sadducees) entertained this belief, as do the Moslems. The heathen held it in a modified form—the Greeks having their tutelary *dæmon* and the Romans their *genius*. There is, however, nothing to support this notion in the Bible. The passages (Ps. xxxiv:7; Matt. xviii:10) usually referred to in support of it have assuredly no such meaning. The former, divested of its poetical shape, simply denotes that God employs the ministry of angels to deliver his people from affliction and danger, and the celebrated passage in Matthew cannot well mean anything more than that the infant children of believers, or, if preferable, the least among the disciples of Christ, whom the ministers of the church might be disposed to neglect from their apparent insignificance, are in such estimation elsewhere that the angels do not think it below their dignity to minister to them. (See SATAN.) (*Literature*: Storr & Flatt's *Lehrbuch der Ch. Dogmatik*, Sec. xlviii; Dr. L. Mayer, *Scriptural Idea of Angels*, in *Am. Bib. Repository*, xii:356-388; Moses Stuart's *Sketches of Angelology* in Robinson's *Bibliotheca Sacra*, No. 1; Merheim, *Hist. Angelor. Spcc.*; Schulthens, *Engelwelt*; etc.)

ANGELIC HYMN (än-jěl'ík hĭm), the hymn *Gloria in excelsis*, so called because the former part of it is composed of the words of the angels when announcing the birth of Jesus (Luke ii:14).

In several Oriental liturgies it is used in the earlier part of the service. Before the time of Edward VI it was sung before the collect, epistle and gospel, but was afterward transferred to the closing part of the office, as a song of thanksgiving after communion.

ANGELIC SALUTATION (än-jěl'ík sāl'û-tā'-shŭn), the greeting given to the Virgin Mary by the angel when he announced to her that she was to become the mother of Jesus (Luke i:28). (See AVE MARIA.)

ANGELS OF THE SEVEN CHURCHES

(an'jĕls òv the sĕv'n chŭrch'ez).

If these angels are men, they cannot be less than bishops ruling their several churches. In favor of this we have: (1) Mal. ii:7; iii:1, where the words may be used of men; (2) of the one who was not an officer of the synagogue, but one of the congregation called up for the occasion to pronounce the prayer; (3) the settled character of episcopacy in Asia in the time of Ignatius. Against it are: (1) *ἄγγελος* never used of men in New Testament, except Luke ix:52; Jas. ii:25, of ordinary messengers; (2) the figurative character of the Apoc. generally, and of this part in particular. There are seven angels for seven churches, and from the Saviour walking in a figurative tabernacle each of them receives a letter in figurative form and full of figurative promises and threats (Hastings' *Bib. Dict.*).

ANGER (än'gĕr), (usually Heb. אַף, *af*; Gr. ὀργή, *or-gay'*), a strong emotion which is sinful or otherwise according to its object and motive.

When ascribed to holy beings it is used figuratively to denote high displeasure at sin. Anger, then, is either holy and approvable, or sinful and blamable. Thus, anger, wrath, and fury are ascribed to God; but when ascribed to him they denote no tumultuous passion; but merely his holy aversion to sin, and his just displeasure with sinners, both of which are evidenced in his terrible threatenings or righteous judgments (Ps. vi:1; vii:11; Gen. vi:7; Exod. iv:14). Jesus was angry with the hypocritical Pharisees, and with Peter, when he would have dissuaded him from bearing the cross, (Matt. xvi:23). Jacob was justly angry with Laban (Gen. xxxi:36). Moses was angry with the sons of Aaron (Lev. x:16), and justly chided the officers who, contrary to the commandment, had spared the Midianitish women (Num. xxxi:14). And so, in every case where sin is the object of anger, it is reasonably and justly displayed; for a man may be angry and yet not sin (Eph. iv:26). But sinful and unholy anger abounds among men, far more than holy resentment against sin. Anger is then a work of the flesh (Gal. v:20); is a fruit of pride (Prov. xiii:10), and uniformly leads to disgraceful conduct; it prompted Cain to murder; it urged on Simeon and Levi to cruelty and bloodshed; it provoked Saul to seek, and that maliciously, David's destruction; and it never rose so high, never displayed itself so awfully, as when it provoked the Jews to crucify Jesus the Son of God.

ANGLE (än'g'l) (Heb. חֶקֶל, *khak-kaw'*, Is. xix:8; Hab. i:15), mediæval English for "hook" (Job xli:1). It is connected with the idea of piercing.

ANGLING (än'glĭng). The word (Heb. חֶקֶל, *khak-kaw'*, angle or hook) which the Auth. Vers. renders 'angle,' in Is. xix:8; Hab. i:15, is the same that is rendered 'hook' in Job xli:1, 12.

In fact, 'angling' is described as 'fishing with a hook.' The Scripture contains several allusions to this mode of taking fish. The first of these occurs as early as the time of Job: 'Canst thou draw out leviathan with an hook; or his tongue (*palate*, which is usually pierced by the hook) with a cord (line), which thou lettest down? Canst thou put a hook into his nose, or bore his jaw through with a thorn?' (Job xli:1, 2). This last phrase obviously refers to the thorns which were sometimes used as hooks, and which are long after mentioned as *the thorns of fishing* (Amos iv:2), in the Auth. Vers. 'fish-hooks.'

Of the various passages relating to this subject, the most remarkable is that which records, as an

important part of the 'burden of Egypt,' that 'the fishers also shall mourn; and all they that cast angle (the hook) into the brooks shall lament, and they that spread nets upon the waters shall languish' (Is. xix:8). In this poetical description of a part of the calamities which were to befall Egypt we are furnished with an account of the various modes of fishing practiced in that country, which is in exact conformity with the scenes depicted in the old tombs of Egypt. Angling appears to have been regarded chiefly as an amusement, in which the Egyptians of all ranks found much enjoyment. They constructed within their ground spacious sluices or ponds for fish (Is. xix:10), like the *vivaria* of the Romans, where they fed them for the table, where they amused themselves by angling, and by the dexterous use of the *bident*.

ANIAM (ā'ni-ām), (Heb. אֲנִיָּא, *an-ee-awm'*, sighing of the people), a son of Shemidah the Manassite (1 Chron. vii:10).

ANIM (ā'nĭm), (Heb. אֲנִים, *aw-neem'*, fountains), a city among the mountains northwest of Judah (Josh. xv:50).

ANIMAL (än'ĭ-mal), an organized living body, endowed with sensation.

In the Hebrew there are several terms rendered "creature," "living thing," "cattle," etc. "The animals are in Lev. xi divided into four classes: (1) Larger terrestrial animals (v. 2); (2) aquatic animals (vv. 9, 10); (3) birds (v. 13); (4) smaller animals (vv. 20, 29, 41, *sq.*); and these classes were again distinguished into clean, i. e., eatable, and into unclean, whose flesh was not to be eaten (Comp. Lev. xi: and Deut. xiv:1-20). The larger terrestrial animals were, moreover, in the Old Testament separated into cattle, i. e., tame domestic animals, and into beasts of the field or wild beasts (Keil. *Bib. Arch.*; Mc. and Str. *Bib. Cyc.*).

ANISE (än'is), (Gr. ἀνηθον, *an'ay-thon*), which occurs in Matt. xxiii:23, was commonly employed

Anise. [*Anethum graveolens.*]

by the Greek and Roman writers to designate a plant used both medicinally and as an article of diet.

In Europe the word has always been used to denote a similar plant, which is familiarly known by the name of Dill, and there is no doubt that in the above passage it should have been so rendered. The common dill is an annual plant, growing wild among the corn in Spain and Portugal; and on the coast of Italy, in Egypt, and about Astracan. It resembles *fennel*, but is smaller, has more glaucous leaves, and a less pleasant smell; the fruit or seeds, which are finely divided by capillary segments, are elliptical, broader, flatter, and surrounded with a membranous disk. They have a warm and aromatic taste, owing to the presence of a pale yellow volatile oil, which itself has a hot taste and a peculiar penetrating odor.

The error in translation here pointed out is not of very great consequence, as both the *anise* and the *dill* are umbelliferous plants, which are found cultivated in the south of Europe. The seeds of both are employed as condiments and carminatives, and have been so from very early times; but the *anethon* is more especially a genus of Eastern cultivation, since either the *dill* or another species is reared in all the countries from Syria to India. Jewish authorities state that the seed, the leaves, and the stem of *dill* were 'subject to tithes,' which indicates that the herb was eaten, as is indeed the case with the Eastern species in the present day.

ANKLET (ăn'klĕt), (Heb. אַנְקֵלֶת, *eh'kes*).

This word does not occur in Scripture, but the ornament which it denotes is clearly indicated by 'the tinkling (or *jingling*) ornaments about the feet,' mentioned in the curious description of female attire which we find in Is. iii. The sculptures show that they were worn by men as well as women (Wilkinson's *Anc. Egyptians*, iii:375). Their present use among the women of Arabia and Egypt sufficiently illustrates the Scriptural allusion. The Koran (xxiv:31) forbids women 'to make a noise with their feet,' which, says Mr. Lane (*Mod. Egyptians*, i:221), 'alludes to the practice of knocking together the anklets, which the Arab women in the time of the prophet used to wear, and which are still worn by many women in Egypt.' Elsewhere (ii:364) the same writer states, 'Anklets of solid gold and silver were once frequently worn by some ladies, but are more uncommon than they formerly were. They are of course very heavy, and, knocking together as the woman walks, make a ringing noise.' He thinks that in the text referred to (Is. iii:16) the prophet alludes to this kind of anklet, but admits that the description may apply to another kind, of which he thus speaks further on (ii:368): 'Anklets of solid silver are worn by the wives of some of the richer peasants, and of the sheykhs of villages. Small ones of iron are worn by many children. It was also a common custom among the Arabs for girls or young women to wear a string of bells on their feet. I have seen many little girls in Cairo with small round bells attached to their anklets. Perhaps it is to the sound of ornaments of this kind, rather than of the more common anklet, that Isaiah alludes' (see also Chardin, tom. i:133, 148, 194). These belled anklets occur also in India among the several sorts which the dancing-girls employ. It is right to add that the anklets which the present writer has himself seen in use among the Arab women in the country of the Tigris and Euphrates are not usually solid, but hollow, so that, in striking against each other, they emit a much more sharp and sonorous sound than solid ones.

ANNA (ăn'nâ), (Gr. Ἄννα, *an'nah*).

1. Wife of Tobit, whose history is contained in the apocryphal book named after him (Tob. i:9, etc.).

2. An aged widow, daughter of Phanuel, of the tribe of Asher. She had married early, but after seven years her husband died, and during her long widowhood she daily attended the morning and evening services of the Temple. Anna was eighty-four years old when the infant Jesus was brought to the Temple by his mother, and entering as Simeon pronounced his thanksgiving, she also broke forth in praise (Luke ii:36, 37).

ANNAS (ăn'nas), a contracted form of Ananias.

1. A high-priest of the Jews (Luke iii:2; John xviii:13, 24; Acts iv:6). He is mentioned in Luke as being high-priest *along with* Caiaphas, his son-in-law. He is called by Josephus, Ananius the son of Seth. In the passages of the New Testament above cited, therefore, it is apparent that Caiaphas was the only actual and proper high-priest; but Annas, being his father-in-law, and having been formerly himself high-priest, and being also perhaps his substitute, *Sagan*, had great influence and authority, and could with great propriety be still termed high-priest along with Caiaphas (John ii:49).

The interview of Jesus with Annas is described (John xviii:19-23). It could have only one issue. Jesus was sent as a condemned prisoner for a more formal trial before Caiaphas and the Sanhedrin, as described by the Synoptists, but merely implied by St. John. The Sanhedrin at this time met in the headquarters of the Annas faction, so that it may have been when passing through the court from the apartments of Annas to the council chamber that 'the Lord turned, and looked upon Peter' (Luke xxii:61). (Westcott on John xviii:25).

2. A corruption of Harim (1 Esdr. ix:32; Comp. Ezra. x:31).

ANNIS (ăn'nis), (A. V. Ananias, R. V. Annias), the eponym of a family that returned with Zerubabel (1 Esdr. v:16). Omitted in parallel passages of Ezra and Neh.

ANNUNCIATION (ăn-nŭn'shĭ-ă'shŭn). This word, like many others, has obtained a particular signification in theological writings.

As a general term, it expresses the communication of important intelligence by chosen messengers of Heaven; but it became, at an early period of Christianity, restricted to the announcement of the blessed Virgin's miraculous conception. The first formal mention that we meet with of its being commemorated among the festivals of the church, is in the decrees of the Council of Trullo, convened at the close of the seventh century. By one of the acts of this assembly it is ordered to be observed, though occurring in the solemn season of Lent, like the Sabbath and the Lord's day. Sermons attributed to St. Athanasius and other fathers have been referred to as proving the observance of the day long before the seventh century; but the best critics consider these discourses as spurious.

The effect of the solemn announcement upon the mind of the blessed Mary was doubtless deep and permanent. It is conjectured by some that her hastening to Elizabeth was the consequence of an eager desire to prove at once the reality of the angelic visitation. The pious writers who have hazarded this opinion seem to have forgotten that such a notion represents the Virgin as more wanting in faith than Zacharias himself, and

that it can scarcely be made to agree with the beautiful and devout sentiment, 'Behold the handmaid of the Lord: Be it unto me according to thy word!'

The annunciation of the birth of John the Baptist illustrates and confirms much of that respecting Him of whom he was the forerunner.

ANNUS (ăn'nūs) (A. V. Ānus), a Levite (1 Esdr. ix:48; Neh. viii:7). (See BANĪ.)

ANOINTED (ā-noint'ed), (Heb. מָשֻׁחַ, *maw-shee'akhh*, anointed), a consecrated person, as king (1 Sam. xxiv:6); by way of signal preëminence, Jesus the Messiah.

ANOINTING (ā-noint'ing), (Heb. usually מָשַׁח, *maw-shakh'*; Gr. *χρίω*, *khree'o*, to rub).

The practice of anointing with perfumed oils or ointments appears to have been very common among the Hebrews as it was among the ancient Egyptians. The practice, as to its essential meaning, still remains in the East, but perfumed waters are now far more commonly employed than oils or ointments.

In the Scriptures three kinds of anointing are distinguishable:—1. For consecration and inauguration; 2. For guests and strangers; 3. For health and cleanliness. Of these in order.

(1) Consecration and Inauguration. The act of anointing appears to have been viewed as emblematical of a particular sanctification; or a designation to the service of God; or to a holy and sacred use. Hence the anointing of the high-priests (Exod. xxix:29; Lev. iv:3), and even of the sacred vessels of the tabernacle (Exod. xxx:26, etc.); and hence also, probably, the anointing of the king, who, as 'the Lord's anointed,' and, under the Hebrew constitution, the viceroy of Jehovah, was undoubtedly invested with a sacred character.

The first instance of anointing which the Scriptures record is that of Aaron, when he was solemnly set apart to the high-priesthood. Being first invested with the rich robes of his high office, the sacred oil was poured in much profusion upon his head. It is from this that the high-priest, as well as the king, is called 'the Anointed' (Lev. iv:3; v:16; vi:15, 20; Ps. exxxiii:2). In fact, anointing being the principal ceremony of regal inauguration among the Jews, as crowning is with us, 'anointed,' as applied to a king, has much the same significance as 'crowned.' It does not, however, appear that this anointing was repeated at every succession, the anointing of the founder of the dynasty being considered efficient for its purpose as long as the regular line of descent was undisturbed; hence we find no instance of unction as a sign of investiture in the royal authority, except in the case of Saul, the first king of the Jews, and of David, the first of his line; and, subsequently, in those of Solomon and Joash, who both ascended the throne under circumstances in which there was danger that their right might be forcibly disputed (1 Sam. xix:24; 2 Sam. ii:4; v:1-3; 1 Chron. xi:1, 2; 2 Kings xi:12-20; 2 Chron. xxiii:1-21). Those who were inducted into the royal office in the kingdom of Israel appear to have been inaugurated with some peculiar ceremonies (2 Kings ix:13). But it is not clear that they were anointed at all; and the omission (if real) is ascribed by the Jewish writers to the want of the holy anointing oil which could alone be used on such occasions, and which was in the keeping of the priests of the Temple in Jerusalem. The private anointing which was

performed by the prophets (2 Kings ix:3; Comp. 1 Sam. x:1) was not understood to convey any abstract right to the crown; but was merely a symbolical intimation that the person thus anointed should eventually ascend the throne.

As the custom of inaugural anointing first occurs among the Israelites immediately after they left Egypt, and no example of the same kind is met with previously, it is fair to conclude that the practice and the notions connected with it were acquired in that country. With the Egyptians, as with the Jews, the investiture to any sacred office, as that of king or priest, was confirmed by this external sign; and as the Jewish lawgiver mentions the ceremony of pouring oil upon the head of the high-priest *after* he had put on his entire dress, with the mitre and crown, the Egyptians represent the anointing of their priests and kings *after* they were attired in their full robes, with the cap and crown upon their heads.

(2) For Guests and Strangers. The anointing of our Saviour's feet by 'the woman who was a sinner' (Luke vii:38) led to the remark that the host himself had neglected to anoint his head (v:46); whence we learn that this was a mark of attention which those who gave entertainments paid to their guests. As this is the only direct mention of the custom, the Jews are supposed by some to have borrowed it from the Romans at a late period, and Wetstein and others have brought a large quantity of Latin erudition to bear on the subject. But the careful reader of the Old Testament knows that the custom was an old one, to which there are various indirect allusions. The circumstances connected with feasts and entertainments are indeed rarely intimated; nor would the present direct reference to this custom have transpired but for the remarks which the act of a woman in anointing the feet of Jesus called forth. Such passages, however, as Ps. xxiii:5; Prov. xxi:7; xxvii:9; Wisd. ii:7, as well as others in which the *enjoyments* of oil and wine are coupled together, may be regarded as containing a similar allusion. It is, therefore, safer to refer the origin of this custom among the Hebrews to their nearer and more ancient neighbors the Egyptians, than to the Romans or the Greeks, who themselves had probably derived it from the same people. Among the Egyptians the antiquity of the custom is evinced by their monuments, which offer in this respect analogies more exact than classical antiquity, or modern usage, can produce. With them the custom of anointing was not confined to the appointment of kings and priests to the sacred offices they held. It was the ordinary token of welcome to guests in every party at the house of a friend; and in Egypt, no less than in Judæa, the metaphorical expression "anointed with the oil of gladness" was fully understood, and applied to the ordinary occurrences of life.

(3) Health and Cleanliness. It is probable, however, that the Egyptians, as well as the Greeks and Jews, anointed themselves at home, before going abroad, although they expected the observance of this etiquette on the part of their entertainer. That the Jews thus anointed themselves, not only when paying a visit, but on ordinary occasions, is shown by many passages, especially those which describe the omission of it as a sign of mourning (Deut. xxviii:40; Ruth iii:3; 2 Sam. xiv:2; Dan. x:3; Amos vi:6; Mic. vi:15; Esth. ii:12; Ps. civ:15; Is. lxi:3; Eccles. ix:8; Cant. i:3; iv:10; also Judith x:3; Sus. 17; Ecclus. xxxix:26; Wisd. ii:7). One of these

passages (Ps. civ:15, 'oil that maketh the face to shine') shows very clearly that not only the hair but the skin was anointed. In our northern climates this usage may not strike us as a pleasant one, but as the peculiar usages of most nations are found, on strict examination, to be in accordance with the peculiarities of their climate and condition, we may be assured that this Oriental predilection for external unction must have arisen from a belief that it contributed materially to health and cleanliness.

Oil, by closing up the pores of the skin, is supposed to prevent that too copious transpiration which enfeebles the frame; *perhaps, too, these Arabians think a glistening skin a beauty.* When the intense heat comes in, they always anoint their bodies with oil.

(4) **Anointing the Sick.** The Orientals are indeed strongly persuaded of the sanative properties of oil; and it was under this impression that the Jews anointed the sick, and applied oil to wounds (Ps. cix:18; Is. i:6; Mark vi:13; xxvi:18; Luke x:34; James v:14). Anointing was used in sundry disorders, as well as to promote the general health of the body. It was hence, as a salutary and approved medicament, that the seventy disciples were directed to 'anoint the sick' (Mark vi:13); and hence also the sick man is directed by St. James to send for the elders of the church, who were 'to pray for him, anointing him with oil in the name of the Lord.' The Talmudical citation of Lightfoot on Matt. vi:16, shows that the later Jews connected charms and superstitious mutterings with such anointings, and he is therefore probably right in understanding this text to mean—'It is customary for the unbelieving Jews to use anointing of the sick joined with a magical and enchanting muttering; but how infinitely better is it to join the pious prayers of the elders of the church to the anointing of the sick.'

(5) **Anointing the Dead** The practice of anointing the bodies of the dead is intimated in Mark xiv:1, and Luke xxiii:56. This ceremony was performed after the body was washed, and was designed to check the progress of corruption (Num. v:22; Jer. viii:22).

Figurative. The anointing or pouring of sacred oil on the heads of persons set apart to these offices implied the gift of those qualifications from God which could alone fit them for their work; and it was typical of the communication of the gift of the Holy Ghost to Christ, as the prophet, priest, and king of his church. Hence persons set apart to these offices were termed the Lord's anointed; and especially so, because Jesus, of whom they were lively types, was the Lord's anointed, or his Christ. This anointing of Jesus, by which he became Christ, or the anointed one, implied his call and separation to the office of Mediator, and the communication of those gifts of the Spirit beyond measure, which qualified him to be the prophet, priest, and king of his people, as well as the recipient of those ineffable communications of love which the Spirit of God, in his office as the Comforter, imparts to him (1 Sam. ii:35; Ps. lxxxiv:9; Dan. ix:24). The anointing of Messiah was predicted (Ps. xlv:7). He was anointed with the oil of gladness above his fellows; that is, he was called to high offices, and more abundantly filled with the Holy Spirit than any of his people; "for God giveth not the Spirit by measure unto him" (John iii:34). The unction with which God anointed his Son, and with which he yet anoints all his chosen people, and of which the anointing oil is

typical, is the influence of the Holy Spirit. The grace of the Spirit shed abroad in them is that unction from the Holy One, by which they know all things (1 John ii:20, 27). By this grace they are separated to his service (Rom. i:1); endowed with all graces and comforts, and blessed with all *spiritual* activity and prosperity in the service of God (2 Cor. i:21; Ps. xxiii:5; xcii:10). (Brown, *Bib. Dict.*)

ANSWER (än'sēr), (Heb. אָנַשׁ, *aw-naw'*, to testify; Gr. ἀποκρίνομαι, *ap-ok-ree'nom-ahēe*, to respond), has in Scripture several meanings.

1. To reply to a question, or call (John xix:9). 2. To make a defense, or apology before a judge (2 Tim. iv:16). 3. To respond when speaking by turns (Deut. xxvii:15). 4. To begin to speak (Dan. ii:26). 5. To witness for (Gen. xxx:33). 6. To obey a call (Is. lxxv:12). 7. To grant what is prayed for (Ps. xxvii:7). 8. To account for (Job ix:3; xl:2). 9. To render a suitable punishment (Ezek. xiv:7). 10. To suit, correspond to, to be analogous (Prov. xxvii:19; Gal. iv:23).

ANSWERABLE (än'sēr-ä-b'l), correspondent to; meet for (Exod. xxxviii:18; Matt. iii:8). The answer of peace, from a city attacked in war (Deut. xx:11), implied a desire to come to terms of peace. The answer of peace from God (Gen. xii:16), implies a gracious hearing to our prayers. The answer of a good conscience toward God, by the resurrection of Jesus Christ, implies the testimony of a conscience delivered from guilt and fear, through faith in the blood of the risen Saviour. A fool is to be answered according to his folly, and yet not according to it (Prov. xxvi:4, 5); that is, his folly ought to be exposed; but not in a spirit and manner chargeable with the folly which we rebuke in him.

ANT (ánt), (Heb. אַנְתָּ, *nem-aw-law'*, creeping, fifth order of insects; *Hymenoptera*, Linn.; occurs Prov. vi:6; xxx:25). Ants have only latterly become the subjects of accurate observation.

(1) The investigations of Latreille, Gould, Geer, Huber, Kirby, Spence, Moggridge, Bates, Belt and Sir John Lubbock, have dissipated many erroneous notions respecting them, and revealing much interesting information concerning their domestic polity, language, migrations, affections, passions, virtues, wars, diversions, etc. The following facts are selected as relevant to Scriptural illustration: Ants dwell together in societies; and although they have no 'guide, overseer, or ruler,' yet they have all one soul, and are animated by one object—their own welfare, and the welfare of each other. Each individual strenuously pursues his own peculiar duties; and regards (except in the case of females), and is regarded by, every other member of the republic with equal respect and affection. They devote the utmost attention to their young. The egg is cleaned and licked, and gradually expands under this treatment, till the worm is hatched, which is then tended and fed with the most affectionate care. They continue their assiduity to the pupa, or chrysalis, which is the third transformation. They heap up the pupæ, which *greatly resemble so many grains of wheat, or rather rice*, by hundreds in their spacious lodges, watch them in an attitude of defense, carry them out to enjoy the radiance of the sun, and remove them to different situations in the nest, according to the required degree of temperature; open the pupa, and at the precise moment of the transformation, disen- thrall the new-born insect of its habiliments.

(2) The most prevalent and inexcusable error, however, respecting ants, has been the belief that they hoard up grains of corn, chiefly wheat, for their supply during winter, having first bitten out the germ to prevent it from growing in their nests. The learned Bochart has collected an immense array of the most eminent authors and naturalists of antiquity (Jewish, Greek, Roman, and Arabian), who all gravely propound this assertion. Even Solomon himself, whose renowned attainments in natural history included the knowledge of insects (1 Kings iv:33), has been inconsiderately supposed to have sanctioned the same opinion in the two passages in his writings which refer to the ant. The mistake has no doubt arisen from the great similarity, both in shape, size, and color, before mentioned, of the pupa or chrysalis of the ant to a grain of corn, and from the ants being observed to carry them about, and to open the cuticle to let out the inclosed insect. Leeuwenhoek was the first who distinguished, with precision, the precise forms which the ant assumes in the several stages of its development, from the egg to the larva, from the larva to the pupa, and thence to the perfect insect. Swammerdam renewed the inquiry, and discovered the encasement of all parts of the future ant, and showed that it appeared in such different forms only from the nature of its envelopes, each of which, at its proper period, is cast off. It is now also ascertained beyond a doubt that no European ants, hitherto properly examined, feed on *corn* or *wheat* or *any other kind of grain*. Bonnet found that however long they had been kept without food, they would not touch *wheat*. Nor do they attack the roots or stems of *wheat*, nor any other vegetable matter. Nor has any species of ant been yet found with food of *any kind* laid up in its nest. The truth is that ants are chiefly carnivorous, preying indiscriminately on all the soft parts of other insects, and especially the viscera; also upon worms, whether dead or alive, and small birds or animals.

(3) It is highly probable that the exotic ants subsist by similar means. The account given us of the termites, or ants, inhabiting the hottest climates, clearly shows that they are carnivorous. Bosman, in his description of Guinea, says that they will devour a sheep in one night, and that a fowl is amusement to them only for an hour. In these situations living animals often become their victims. Man himself, as related by Prevost in his *Histoire General des Voyages*, is even subject to the attacks of ants (*Encyclopedia Britannica*, 9th Ed. Art. 'Ant').

(4) With regard to Solomon's words respecting the ant, Kirby and Spence are of opinion 'that if they are properly considered it will be found that the interpretation which seems to favor the ancient error respecting ants has been fathered upon them rather than fairly deduced from them. He does not affirm that the ant, which he proposes to the sluggard as an example, laid up in her magazine stores of grain against winter, but that, with considerable prudence and foresight, she makes use of *proper seasons* to collect a supply of provisions sufficient for her purposes. There is not a word in them implying that she stores up grain or other provisions, nor has the modern study of the insect ever discovered any such habit. She prepares her bread and gathers her food (namely, such food as is suited to her) in summer and harvest (that is, when it is most plentiful), and thus shows her wisdom and prudence by using the advantages offered to her.' A brief examination of the passages (Prov. vi:6;

xxx:25) with reference to their context will serve to confirm these observations. In the preceding verses, Solomon has cautioned his readers against incurring dangerous responsibilities on behalf of another. Should this have inadvertently been done, he advises the surety to give no *sleep to his eyes*, nor *slumber to his eyelids*, till he has delivered himself from his rash engagement. He then adds, 'Go to the ant, thou sluggard, consider her ways, and be wise: which having no guide, overseer, or ruler, provideth her meat in the summer, and gathereth her food in the harvest.' The sense is thus ably given by Dr. Hammond: '*As in the matter just mentioned the least delay is pernicious, so in all things else sluggishness, or negligence of those things which concern us most nearly, should ever be avoided; and if we need any instructor on this head, we may go to one of the least and meanest of creatures.*' The *moral*, then, intended in Solomon's allusion to the ant, is simply to avail one's self of the *favorable time without delay*. The description which follows, of the sluggard sleeping, evidently *during the day*, the proper season of activity, and of the consequences of his vice, agrees with this interpretation. The other passage (xxx:25), probably by a different writer, also considers the ant simply as the symbol of *diligence*.

(5) On the other hand the well-known entomologist, the Rev. F. W. Hope, in a paper "*On Some Doubts Respecting the Economy of Ants*" (*Mass. Entom. Soc.*, ii:211), is of the opinion that there are species of exotic ants which store up food for winter consumption.

And so it is asserted that there are certain facts in regard to the ants of the Holy Land which settle this controversy in favor of the rigid accuracy of the author of the Proverbs. They are: (1) The ants of these countries lay up vast stores of grain in their nests. (2) To facilitate this act of providence they place their nests as near as possible to the places where grain is thrashed or stored. (3) They certainly eat this grain during the winter season. (4) They encourage certain insects which secrete sweet juices to consort with them, and collect and store their eggs with their own, that they may have them at hand for future use when they shall have hatched. (*Barnes Bib. Cyc.*)

ANTEDILUVIANS (ăn'tê-dî-lū'vî-ans), the name given collectively to the people who lived before the Deluge.

The interval from the Creation to that event is not less, even according to the Hebrew text, than 1657 years, being not more than 691 years shorter than that between the Deluge and the birth of Christ, and only 167 years less than from the birth of Christ to the present time, and equal to about two-sevenths of the whole period from the Creation. By the Samaritan and Septuagint texts (as adjusted by Hales) a much greater duration is assigned to the antediluvian period—namely, 2256 years, which nearly equals the Hebrew interval from the Deluge to the birth of Christ, and much exceeds the interval from the birth of Christ to the present time. (See CHRONOLOGY.)

All our authentic information prior to the wonderful discoveries during the past few years made in Babylonia and Egypt, respecting this long and interesting period was contained in 49 verses of Genesis (iv:16 to vi:8), more than half of which are occupied with a list of names and ages, invaluable for chronology, but conveying no particulars regarding the primeval state of man.

In a most remarkable manner the testimony of the Old Testament and that of the monuments agree,

It is very evident from these accounts that society did not begin afresh after the Deluge; but that, through Noah and his sons, the new families of men were in a condition to inherit, and did inherit, such sciences and arts as existed before the Flood. This enables us to understand how settled and civilized communities were established, and large and magnificent works undertaken, within a few centuries after the Deluge.

After that event, Nimrod, although a hunter (Gen. x:9), was not a savage, and did not belong to hunting tribes of men.

(1) **Savagism and Degeneracy.** In fact, savagism is not discoverable before the Confusion of Tongues, and was in all likelihood a degeneracy from a state of cultivation eventually produced in particular communities by that great social convulsion. At least that a degree of cultivation was the primitive condition of man, from which savagism in particular quarters was a degeneracy, and that he has not, as too generally has been supposed, worked himself up from an original savage state to his present position, has been powerfully argued by Dr. Philip Lindsley (*Am. Bib. Repos.* iv:277-298; vi:1-27), and is strongly corroborated by the conclusions of modern ethnographical research; from which we learn that, while it is easy for men to degenerate into savages, no example has been found of savages rising into civilization but by an impulse from without, administered by a more civilized people; and that, even with such impulse, the *vis inertia* of established habits is with difficulty overcome. The aboriginal traditions of all civilized nations describe them as receiving their civilization from without—generally through the instrumentality of foreign colonists; and history affords no example of a case parallel to that which must have occurred if the primitive races of men, being originally savage, had civilized themselves.

The scriptural account clearly shows (see ADAM) that the father of men was something more than 'the noble savage,' or rather the grown-up infant, which some have represented him. He was an instructed man;—and the immediate descendants of a man so instructed could not be an ignorant or uncultivated people. It is not necessary indeed to suppose that they possessed at first more cultivation than they required; and for a good while they did not stand in need of that which results from, or is connected with, the settlement of men in organized communities. They probably had this before the Deluge, and at first were possessed of whatever knowledge or civilization their agricultural and pastoral pursuits required. Such were their pursuits from the first; for it is remarkable that of the strictly savage or hunting condition of life there is not the slightest trace before the Deluge. Astronomy, architecture, writing, music, manufactures, poetry, metallurgy, mineralogy, zoölogy, and kindred sciences and arts were all known, some of them to quite a degree, to these antediluvians.

(2) **Patriarchal Government.** It is impossible to speak with any decision respecting the form or forms of government which prevailed before the Deluge. The slight intimations to be found on the subject seem to favor the notion that the particular governments were patriarchal, subject to a general theocratical control—God himself manifestly interfering to uphold the good and check the wicked. The right of property was recognized, for Abel and Jabal possessed flocks, and Cain built a city. As ordinances of religion sacrifices certainly existed (Gen. iv:4), and some think that the Sabbath was observed; while some interpret the words, "Then men began to call upon

the name of the Lord' (Gen. iv:26), to signify that public worship then began to be practiced. From Noah's familiarity with the distinction of clean and unclean beasts (Gen. vii:2), it would seem that the Levitical rules on this subject were by no means new when laid down in the code of Moses.

(3) **Marriage.** Marriage, and all the relations springing from it, existed from the beginning (Gen. ii:23-25); and although polygamy was known among the antediluvians (Gen. iv:19), it was most probably unlawful; for it must have been obvious that, if more than one wife had been necessary for a man, the Lord would not have confined the first man to one woman. The marriage of the sons of Seth with the daughters of Cain appears to have been prohibited, since the consequence of it was that universal depravity in the family of Seth so forcibly expressed in this short passage, 'All flesh had corrupted his way upon the earth' (Gen. vi:12). This sin, described Orientally as an intermarriage of 'the sons of God' with 'the daughters of men' (Gen. vi:2), appears to have been in its results one of the grand causes of the Deluge; for if the family of Seth had remained pure and obedient to God, he would doubtless have spared the world for their sake, as he would have spared Sodom and Gomorrah had ten righteous men been found there, and as he would have spared his own people, the Jews, had they not corrupted themselves by intermarriages with the heathen.

Light is thrown upon the above statement made by Kitto, in *Fresh Light from the Ancient Monuments*, by Prof. Sayce, pp. 26, 27. He says: "Like *cherub*, Adam also was a Babylonian word. It has the general sense of 'man,' and is used in this sense both in Hebrew and in Assyrian. But, as in Hebrew it has come to be the proper name of the first man, so, too, in the old Babylonian legends, the 'Adamites' were 'the white race' of Semitic descent, who stood in marked contrast to 'the black heads' or Accadians of primitive Babylonia. Originally, however, it was this dark race itself that claimed to have been 'the men' whom the god Merodach created; and it was not until after the Semitic conquest of Chaldea that the children of Adamu or Adam were supposed to denote the white Semitic population. Hence it is that the dark race continued to the last to be called the Adamatu or 'redskins,' which a popular etymology connected with *Adamu* 'man.' Sir H. Rawlinson has suggested a parallel between the dark and white races of Babylonia and the 'sons of God' and 'daughters of men' of Genesis. Adam, we are told, was 'the son of God' (Luke iii:38). But nothing similar to what we read in the sixth chapter of Genesis has as yet been met with among the cuneiform records, and though these speak of giant heroes, like Ner and Etanna, who lived before the Flood, we know nothing as yet as to their parentage."

ANTELOPE (än'tê-lōp), (Heb. יְחִמּוּר, *yoch'mur*).

Although this word does not occur in our version of the Scriptures, yet there can be no doubt that in the Hebrew text several ruminants to which it is applicable are indicated under different denominations.

In scientific nomenclature, the term antelope, at first applied to a single species, has gradually become generic, and is now the designation of a tribe, or even of a family of genera, containing a great many species. According to present usage, it embraces some species that are of considerable size, so as to be invariably regarded

by the natives as having some affinity to cattle, and others delicate and rather small, that may be compared with young deer, to which, in truth, they bear a general resemblance.

The antelopes, considered as a family, may be distinguished from all others by their uniting the light and graceful forms of deer with the perma-

Nubian Oryx.

nent horns of goats, excepting that in general their horns are round, annulated, and marked with striæ, slender, and variously inflected, according to the subdivision or group they belong to. They have usually large, soft, and beautiful eyes, tear-pits beneath them, and round tails. They are often provided with hair tufts or brushes to protect the knees from injury.

Antelopes are elegantly formed, active, restless, timid, shy, and astonishingly swift, running with vast bounds, and springing or leaping with surprising elasticity; they frequently stop for a moment in the midst of their course to gaze at their pursuers, and then resume their flight.

There are no less than 29 species of antelopes in all. Among the first of the subordinate groups

Dishon or Pygarg.

is the subgenus oryx, consisting of five or six species, whereof we have to notice the following:

The *Leucoryx*, as the name implies, is white, having a black mark down the nose, black cheeks and jowl, the legs from the elbow and heel

to the pastern joints black, and the lower half of the thighs usually, and often the lower flank, bright rufous; hence the epithet *hommar* (*rubere*, to redden).

Wild Ox (Deut. xiv:5; Is. li:20), (*Oryx tao*, the Nubian oryx, Ham. Smith), is either a species or a distinct variety of leucoryx.

Oryx addax may have been known to the Hebrews by the name of *dishon*. It is three feet seven inches at the shoulder, has the same structure as the others, but is somewhat higher at the croup; it has a coarse beard under the gullet, a black scalp and forehead, divided from the eyes and nose by a white bar on each side, passing along the brows and down the face to the cheek, and connected with one another between the eyes. The general color of the fur is white, with the head, neck and shoulders more or less liver-color gray; but what distinguishes it most from the others are the horns, which in structure and length assimilate with those of the other species, but in shape assume the spiral flexures of the Indian antelope. The animal is figured on Egyptian monuments, and may be the *pygarg* or *dishon*, uniting the characters of a white rump

Dorcas.

with strepsicerotine horns, and even those which Dr. Shaw ascribes to his '*lidmee*.'

We have now to notice the second group of antilopidæ, classified under the subgenus *gazella*, whereof at least one species, but more probably four or five, still inhabit the uplands and deserts of Egypt, Arabia, and the eastern and southern borders of Palestine. They are named in the Greek *dorcas*, and in the Hebrew *sebi*, both terms being applicable to the whole group; and the Hebrew name is by distant nations now used for allied species which are unknown in Arabia and Syria. The biblical species clearly included in the section *gazella* are *Antilope dorcas*, Linn., *Ariel* or *A. Arabica*, Licht.; more remotely, *A. kevella*, *A. corinna*, auctor.; and for Eastern Arabia, *A. cora*, Ham. Smith; while *A. subgutturosa*, Guldenst., may be claimed for the north-eastern countries, where the species exists both in Asia Minor and Armenia, and therefore on the borders of Syria.

One or other of these, according to geographical localities, occurs in the Authorized Version under the name of *roe*, in Deut. xii:15, 22; xiv:5; xv:22; 1 Kings iv:23; 1 Chron. xii:8; 2 Sam. ii:18; Prov. vi:5; Is. xiii:14; or *dorcas*, Eccles. xxvii:20.

The Jaclmur, yoch-mur. (1 Kings iv:23) is not, as in our Authorized Version, 'the fallow-deer,' but the *Oryx leucoryx* of the moderns, the true oryx of the ancients, and of Niebuhr, who quotes R. Jona, and points out the Chaldaic *jachmura*, and Persian *kutzkohi* (probably a mistake for *maskandos*), and describes it as a great goat. The eastern Arabs still use the name *jazmur*.
C. H. S.

Jachmur.

ANTHEDON (an-the'don), a city of Palestine, lying on the Mediterranean, about twenty furlongs south of Gaza. Herod the Great called it Agrippias, in honor of Agrippa (Calmet).

ANTHROPOMORPHISM (än'thrō-pō-mōr'-fīz'm), (Gr. ἄνθρωπος, *anth'ro-pōs*, man; and μορφή, *mor-fay'*, form); a term in theology used to denote that figure whereby words derived from *human* objects are employed to express something which relates to the Deity.

As a finite being can have no intuitive knowledge of an infinite, so no language of rational creatures can fully express the nature of God and render it comprehensible.

All further knowledge of God must be communicated by words used to express ourselves intelligibly concerning human and other terrestrial objects. Such words and phrases have their foundation in a resemblance which, according to our conceptions, exists between the Deity and mankind. This resemblance, when essential, is such as regards the pure perfections of our minds, that is, such as are unaccompanied with any imperfection, as reason, liberty, power, life, wisdom, and goodness. Those expressions afford an analogical knowledge, from whence arise analogical phrases, which are absolutely necessary whenever we speak of God, and would acquire or communicate some knowledge of his perfections.

Such analogical expressions must, however, be understood *properly*, although they give no immediate and intuitive, but only a symbolical knowledge of the Deity. In this sense it is that in Gen. ii:16; iii:9; vi:13; xii:1; xv; xvii; xviii; Exod. iii:4, 5—*speech is immediately* ascribed to the Deity while addressing Adam, Noah, Abraham and Moses. The Deity is also in this sense said to speak *mediately* to man, viz. by his messengers. But although the speech here ascribed to the Deity is to be understood in a different manner from the language of men, it is not to be understood in such instances figuratively, or in the anthropomorphic sense, but *really* and *properly*. 'Either,' says St. Augustine, 'immutable truth speaks to man in-

effably of itself to the minds of rational creatures, or speaks by a mutable creature, either by spiritual images to our minds, or by corporeal voices to the bodily senses.' But God speaks not *properly*, but *anthropopathically*, when his decrees and their execution are described in human methods, or in the form of dialogues and conversations, as in the phrase (Gen. i:3) 'Let there be light, and there was light.' 'This,' says Maimonides, 'is to be understood of the will, not the speech;' and, in like manner, St. Augustine, 'This was performed by the intellectual and eternal, not by the audible and temporal word' (*City of God*, ch. vii.).

Anthropomorphic phrases, generally considered, are such as ascribe to the Deity mixed perfections and human imperfections.

(1) **Human Actions.** A rational being, who receives impressions through the senses, can form conceptions of the Deity only by a consideration of his own powers and properties. Anthropomorphic modes of thought are therefore unavoidable in the religion of mankind; and although they can furnish no other than corporeal or sensible representations of the Deity, they are nevertheless true and just when we guard against transferring to God qualities pertaining to the human senses. It is, for instance, a *proper* expression to assert that God *knows* all things; it is improper, that is, tropical or anthropomorphic, to say that He *sees* all things. Anthropomorphism is thus a species of *accommodation*, inasmuch as by these representations the Deity as it were lowers himself to the comprehension of men. And it is altogether consonant to his wisdom and benevolence in communicating divine revelations to address mankind in language adapted to their inferior capacities. Therefore it is that this figure is called by the Fathers *Divine Economy* (Theodoret, *Dialog.* 2) and *Condeseension* (Gregory of Nazianzus, *Orat.* 1).

'Divine affections,' says Tertullian, 'are ascribed to the Deity by means of figures borrowed from the human form, not as if he were endued with corporeal qualities: when eyes are ascribed to him, it is denoted that he sees (viz. knows) all things; when ears, that he hears all things; the speech denotes the will; nostrils, the perception of prayer; hands, creation; arms, power; feet, immensity; for he has no members, and performs no office for which they are required, but executes all things by the sole act of his will. How can he require eyes, who is light itself? or feet, who is omnipresent? How can he require hands, who is the silent creator of all things? or a tongue, to whom to think is to command. Those members are necessary to men, but not to God, inasmuch as the counsel of men would be inefficacious unless his thoughts put his members in motion;—but not to God, whose operations follow his will without effort.'

(2) **Human Affections.** In the same manner human affections, as grief, repentance, anger, revenge, jealousy, etc., are ascribed to the Deity. These affections are not, properly speaking, in the mind of God, who is infinitely happy and immutable, but are ascribed to him anthropopathically by way of similitude. For instance, when God forgives the penitent what he had denounced against the wicked who continue in sin, he is said to act as men do in similar cases. Thus St. Augustine observes, 'By repentance is signified a change of events. For as a man when he repents bewails the crime which he had committed, so, when God alters anything unexpectedly, that is, beyond man's expectation, he, figuratively, is said to have repented of the punishment when man repents of

the sin' (Ps. cx). Thus, also, when ignorance is ascribed to the Deity (Gen. iv:9), the same Father remarks, 'He inquires, not as if really ignorant, but as a judge interrogates a prisoner;' and Luther, in reference to the passage (Ps. ii:4) where laughter is ascribed to the Deity, thus observes, 'Not that God laughed as men do, but to point out the absurdity of men's undertaking impossibilities; meaning, that the matter was as ridiculous as it would be for a fool with a long stick to attempt to thrust the sun out of the firmament, and to rejoice as if he had performed his task to admiration' (*Works*, ii. Ep. ps. 37).

(3) **Anthropomorphic Phrases.** Anthropomorphic phrases are found throughout the whole Scriptures of the Old and New Testaments. In the infancy of mankind conceptions derived from the human senses were universal, and the Deity is constantly spoken of in anthropomorphic phrases. We find these ideas more pure after the times of Moses, who forbade the making of any representation of the Deity (see DECALOGUE). The conceptions of men became still less sensuous in the times of the Prophets, who propounded still clearer notions of the sublime perfections of the Deity. But even under the Christian dispensation anthropomorphic modes of expression were unavoidable; for although Christianity imparts purer and more spiritual sentiments than the former revelations, the inspired teachers could not express themselves without the aid of images derived from human objects, if they would make their communications in regard to divine things intelligible to their hearers, who were habituated to the anthropomorphic expressions of the Old Testament. Such a mode of teaching was therefore indispensable in itself, and tended to promote the instruction and enlightenment of mankind; 'the attention was more easily kept up among the sensuous hearers and readers of the sayings and writings of Jesus and his apostles; the truths, figuratively presented, made a deeper impression on the mind; it introduced variety into the discourse; the affections were moved, and religious instruction the more readily communicated' (see Seiler's *Biblical Hermeneutics*, part i, sec. 2, sec. 54-62, London, 1835, and Glass's *Philologia Sacra*).

W. W.

ANTHROPOPATHISM (än'thrō-pōp'ä-thīz'm), (Gr. ἀνθρωποπάθεια, with human feelings), the attributing of human emotions, such as anger, grief, joy, etc., to God. Traces of this are found in Scripture (Gen. vi:6; viii:21; xi:5, 6, and many other passages). If we understand such expressions as imperfect approximating expressions of eternal truth, then they become the means of a better knowledge of God. (See ANTHROPOMORPHISM.)

ANTICHRIST (än'tī-krist), (Gr. ἀντίχριστος, *ante-khris-tos*, against Christ; some, instead of Christ), a word used only by the apostle John (Epistles 1 and 2).

(1) **Meaning.** The meaning attached to this word has been greatly modified by the controversies of various churches and sects. In Scripture, however, and the early Christian writers, it has an application sufficiently distinct from partial interpretations. Antichrist, according to St. John, is the ruling spirit of error, the enemy of the truth of the Gospel as it is displayed in the divinity and holiness of Christ (1 John ii:18, 22; iv:3; 2 John 7). This is the primary meaning of the term, and we are led at once to consider it as the proper title of Satan.

(2) **Many Antichrists.** But the same apostle speaks of the existence of many antichrists;

whence we learn that it is applicable to any being who opposes Christ in the high places of spiritual wickedness. St. Paul speaks of 'the man of sin' as not yet revealed (1 Tim. iv:1), and it is supposed by most interpreters that *Antichrist* is to be understood as the object alluded to by the apostle; but if we attend strictly to his words, the antichrist of whom he spoke must have been then, and at the time when he was writing, 'opposing and exalting himself above all that is called God,' although awaiting some distant season for the open display of his power and wickedness.

St. Paul's picture (2 Thess. ii:3, 4) seemed so like Nero that many of the ancients thought that prince was antichrist.

(3) **Views of Early Writers.** Justin Martyr, in his *Dialogue with Trypho*, describes him as exercising his wrath against Christians with especial fury in the period immediately preceding the Second Advent. Cyril of Jerusalem represents him as reigning three years and six months preparatory to the entire destruction of his dominion at the second coming of Christ. The same father says that he will deceive both Jews and Gentiles; the former by representing himself as the Messiah; the latter, by his magical arts and incantations. St. Chrysostom observes, on the passage in the Second Epistle to the Thessalonians, that antichrist will not lead men to idolatry, but will rather abolish the worship of false gods, as well as that of the true God, commanding the world to worship himself alone as the only Deity.

These views of the early writers, as well as the expressions of Scripture, have been perverted by many men of warm imaginations to the worst purposes of controversy. The effects of general corruption have often been charged upon offices and individuals; and the appellation of *antichrist* as readily applied to them as if it had actually been coupled in Scripture with their names and titles.

H. S.

ANTILEGOMENA (än'tī-lē-gōm'ēn-ä), (Gr. ἀντιλεγόμενα, *an-tee-leg-om'en-a*, contradicted or disputed), an epithet applied by the early Christian writers to denote those books of the New Testament which, although known to all the ecclesiastical writers, and sometimes publicly read in the churches, were not for a considerable time admitted to be genuine, or received into the canon of Scripture. These books are so denominated in contradistinction to the *Homologoumena*, or universally acknowledged writings. The following is a catalogue of the *Antilegomena*: *The Second Epistle of St. Peter; the Epistle of St. James; the Epistle of St. Jude; the Second and Third Epistles of St. John; the Apocalypse, or Revelation of St. John; the Epistle to the Hebrews*. The earliest notice which we have of this distinction is that contained in the *Ecclesiastical History* of Eusebius, the learned bishop of Cæsarea, who flourished A. D. 270-340. He seems to have formed a triple, or, as it appears to some, a quadruple division of the books of the New Testament, terming them—1, the *homologoumena* (received); 2, the *antilegomena* (controverted); 3, the *notha* (spurious); and, 4, those which he calls the *utterly spurious*, as being not only spurious in the same sense as the former, but also *absurd* or *impious*. Among the *spurious* he reckons the *Acts of Paul*, the *Shepherd of Hermas*, the *Revelation of Peter*, the *Epistle of Barnabas*, and the *Instructions of the Apostles*. He speaks doubtfully as to the class to which the *Apocalypse* belongs, for he himself includes it among the *spurious*; he then observes that some

reject it, while others reckon it among the *acknowledged* writings (homologoumena). Among the spurious writings he also enumerates the Gospel according to the Hebrews. He adds, at the same time, that all these may be classed among the *antilegomena*. His account is consequently confused, not to say contradictory. Among the *utterly spurious* he reckons such books as the heretics brought forward under pretense of their being genuine productions of the apostles, such as the so-called *Gospels of Peter, Thomas, and Matthias*, and the *Acts of Andrew, John*, and the other apostles. These he distinguishes from the *antilegomena*, as being works which not one of the ancient ecclesiastical writers thought worthy of being cited. Their style he considers so remote from that of the apostles, and their contents so much at variance with the genuine doctrines of Scripture, as to show them to have been the inventions of heretics, and not worthy of a place even among the *spurious* writings.

of four townships or quarters, each surrounded by a separate wall, and all four by a common wall. The first was built by Seleucus Nicator, who peopled it with inhabitants from Antigonía; the second by the settlers belonging to the first quarter; the third by Seleucus Callinicus; and the fourth by Antiochus Epiphanes (Strabo, xvi:2; iii:354). It was the metropolis of Syria (*Antiochiam, Syria caput*. Tac. *Hist.* ii:79), the residence of the Syrian kings (the Seleucidæ) (1 Macc. iii:37; vii:2), and afterwards became the capital of the Roman provinces in Asia. It ranked third, after Rome and Alexandria, among the cities of the empire (Joseph., *De Bell. Jud.* iii:2, sec. 4), and was little inferior in size and splendor to the latter, or to Seleucia (Strabo, xvi:2; vol. iii, p. 355, ed. Tauch.).

In the immediate neighborhood in a luxuriant grove was the suburb Daphne, with its celebrated sanctuary of Apollo (2 Macc. iv:33); whence the city was sometimes called "Antioch

Antioch.

(See the articles on the several epistles and the REVELATION.)

W. W.

ANTI-LIBANUS (än'ti-lib'a-nüs). See LEBANON.

ANTIOCH (än'ti-ök), (Gr. Ἀντιόχεια, *an-tee-okh'*, *i-a*). Two places of this name are mentioned in the New Testament.

(1) **In Syria.** A city on the banks of the Orontes, 300 miles north of Jerusalem, and about 30 from the Mediterranean. It was situated in the province of Seleucia, called Tetrapolis (Τετραπόλις), from containing the four cities, Antioch, Seleucia, Apamea, and Laodicea; of which the first was named after Antiochus, the father of the founder; the second after himself; the third after his wife Apamea, and the fourth in honor of his mother. The appellation *Tetrapolis* was given also to Antioch, because it consisted

by Daphne." A multitude of Jews resided in it. Seleucus Nicator granted them the rights of citizenship, and placed them on a perfect equality with the other inhabitants (Joseph. *Antiq.* xii:3, sec. 1). These privileges were continued to them by Vespasian and Titus—an instance (Josephus remarks) of the equity and generosity of the Romans, who, in opposition to the wishes of the Alexandrians and Antiocheans, protected the Jews, notwithstanding the provocations they had received from them in their wars. They were also allowed to have an Archon or Ethnarch of their own (Joseph. *De Bell. Jud.* vii:3). Antioch is called *libera* by Pliny (*Hist. Nat.*, v. 18), having obtained from Pompey the privilege of being governed by its own laws. This fact is commemorated on a coin bearing the inscription, ANTIOXEΩΝ ΜΗΤΡΟΠΟΛΙΣ ΑΤΤΟΝΟΜΟΥ, *Antiocheon Metropol. Autonomou*, a coin of the independent metropolis of Antioch.

The Christian faith was introduced at an early period into Antioch, and with great success (Acts xi:19, 21, 24). The name '*Christians*' was here first applied to its professors (Acts xi:26), and the city became the see of the four chief bishops, who were called Patriarchs. Antioch soon became a central point for the diffusion of Christianity among the Gentiles, and maintained for several centuries a high rank in the Christian world. A controversy which arose between certain Jewish believers from Jerusalem and the Gentile converts at Antioch respecting the permanent obligation of the rite of circumcision was the occasion of the first apostolic council or convention (Acts xv). Antioch was the scene of the early labors of the apostle Paul, and the place whence he set forth on his first missionary labors (Acts xi:26; xiii:2). Ignatius was the second

Gate of St. Paul, Antioch.

bishop or overseer of the church, for about forty years, till his martyrdom in A. D. 107. In the third century three councils (the last in A. D. 269) were held at Antioch relative to Paul of Samosata, who was bishop there about A. D. 260 (Neander's *Allgemeine Geschichte*, etc. i:3, p. 1013; Gieseler's *Lehrbuch*, i:242; Moshemii *Commentarii*, p. 702). In the course of the fourth century a new theological school was formed at Antioch, which aimed at a middle course in Biblical Hermeneutics, between a rigorously literal and an allegorical method of interpretation. Two of its most distinguished teachers were the presbyters Dorotheus and Lucian, the latter of whom suffered martyrdom in the Dioclesian persecution, A. D. 312 (Neander's *Allgemeine Geschichte*, i:3, p. 1237; Gieseler's *Lehrbuch*, i:272; Lardner's *Credibility*, pt. ii. ch. 55, 58). Libanius (born A. D. 314), the rhetorician, the friend and panegyrist of the emperor Julian, was a native of Antioch (Lardner's *Testimonies of Ancient Heathens*, ch. 449; Gibbon's *Decline and Fall*, etc., ch. 24). It had likewise the less equivocal honor of being the birthplace of his illustrious pupil, John Chrysostom (born A. D. 347; died A. D. 407). (Lardner's *Credibility*, pt. ii, ch. 118; Neander's *Allgemeine Geschichte*, ii:3, pp. 1440-56.)

At the present time there are three prelates in Syria who claim the title of patriarchs of Antioch, namely: (1) the patriarch of the Greek church; (2) of the Syrian Monophysites; (3) of the Maronites (Murdoch's *Mosheim*, edited by Soames, p. 304-11).

Few cities have undergone and survived greater vicissitudes and disasters than Antioch. In A. D. 260 Sapor, the Persian king, surprised and pillaged it, and multitudes of the inhabitants were slain or sold as slaves. It has been frequently brought to the verge of utter ruin by earthquakes (A. D. 340, 394, 396, 458, 526, 528), by that of A. D. 526 no less than 250,000 persons were destroyed, the population being swelled by an influx of strangers to the festival of the Ascension. The emperor Justinian gave forty-five centenaries of gold (£180,000) \$900,000.00, to restore the city. Scarcely had it resumed its ancient splendor (A. D. 540) when it was again taken and delivered to the flames by Chosroes. In A. D. 658 it was captured by the Saracens. Its safety was ransomed with 300,000 pieces of gold, but the throne of the successors of Alexander was degraded under the yoke of the caliphs to the secondary rank of a provincial town. In A. D. 975 it was retaken by Nicephorus Phocas. In A. D. 1080 the son of the governor Philaretus betrayed it into the hands of Soliman. Seventeen years after the Duke of Normandy entered it at the head of 300,000 Crusaders; but as the citadel still held out, the victors were in their turn besieged by a fresh host under Kerboga and twenty-eight emirs, which at last gave way to their desperate valor (Gibbon, chap. 58). In A. D. 1268 Antioch was occupied and ruined by Boadochar or Bibars, sultan of Egypt and Syria; this first seat of the Christian name being dispeopled by the slaughter of 17,000 persons, and the captivity of 100,000. About the middle of the fifteenth century the three patriarchs of Alexandria, Antioch, and Jerusalem convoked a synod, and renounced all connection with the Latin church.

Antioch at present belongs to the Pashalic of Haleb (Aleppo), and bears the name of *Antakia* (Pococke, ii:277 sq.; Niebuhr, iii:15 sq.). The inhabitants are said to have amounted to twenty thousand before the earthquake of 1822, which destroyed four or five thousand. On the southwest side of the town is a precipitous mountain ridge, on which a considerable portion of the old Roman wall of Antioch is still standing, from 30 to 50 feet high and 15 feet in thickness.

(2) **Antioch in Pisidia.** Antioch *in* (or *near*) *Pisidia* (*Ἀντιόχεια τῆς Πισιδίας*), a city belonging to the province of Pisidia in Asia Minor, but situated within the limits of Phrygia. When Paul and Barnabas visited this city (Acts xiii:14), they found a Jewish synagogue and a considerable number of proselytes, and met with great success among the Gentiles (xiii:48), but, through the violent opposition of the Jews, were obliged to leave the place, which they did in strict accordance with their Lord's injunction (xiii:51, compared with Matt. x:14; Luke ix:5).

Till within a comparatively recent period Antioch was supposed to have been situated where the town of *Ak-Sheker* now stands; but the researches of the Rev. F. Arundell, British chaplain at Smyrna in 1833, confirmed by the still later investigations of Mr. Hamilton, secretary of the Geographical Society, have determined its site to be adjoining the town of Yalowatch, and consequently that *Ak-Sheker* is the ancient Philomelion described by Strabo (xii:8; vol. iii, p. 72, ed. Tauch.). J. E. R.

ANTIOCHUS (an-ti'o-kūs).

Of the many kings who bore this name, Antiochus, called Epiphanes, has the chief claim on our attention in a Biblical Cyclopædia, since in the Books of Maccabees and in the prophecies of Daniel his person is so prominent. Nevertheless,

it will be our business to set forth, not that which readers of the Bible can gather for themselves, but such preliminary and collateral information as will tend to throw light on the position of the Jews towards the Syrian monarchy.

The name Antiochus may be interpreted *he who withstands*, or *lasts out*; and denotes military prowess, as do many other of the Greek names.

(1) **Antiochus I.** The first Seleucus, father of Antiochus I, built a prodigious number of cities with Greek institutions, not, like Alexander, from military or commercial policy, but to gratify ostentation, or his love for Greece. This love, indeed, led him to fix his capital, not at Babylon, where Alexander would have placed it, but in the north of Syria (see **ANTIOCH**), and in extreme old age his life fell a sacrifice to his romantic passion for revisiting his native Macedonia.

Scarcely, indeed, had the second of the line, Antiochus I, begun to reign (B. C. 280) when four sovereigns in Asia Minor established their complete independence, the kings of Pontus, Bithynia, Cappadocia and Pergamus. Then the Gauls, that had ravaged Greece, Macedon and Thrace, invaded Asia Minor, killed him, and established themselves in Galatia.

(2) **Antiochus II (Theos).** In the next reign, that of Antiochus II, Theos, the revolt of the Parthians under Arsaces (B. C. 250) was followed speedily by that of the distant province of Bactriana. For thirty years together the Parthians continued to grow at the expense of the Syrian monarchy. This king was followed by Seleucus II, Callinicus, 247-226 B. C., who was beset by rebellion and wars with Egypt and Parthia. The next, Seleucus III, Ceraunus, a youth, was murdered in 223, and his brother, the great Antiochus III, followed.

(3) **Antiochus III (the Great).** Through the great revolution of Asia the Hebrews of Palestine were now placed nearly on the frontier of two mighty monarchies, and it would seem that the rival powers *bid* against one another for their good will—so great were the benefits showered upon them by the second Ptolemy. Even when a war broke out for the possession of Cœle-Syria, under Antiochus the Great and the fourth Ptolemy (B. C. 218, 217), though the people of Judæa, as part of the battlefield and contested possession, were exposed to severe suffering, it was not the worse for their ultimate prospects, for Antiochus, when left master of southern Syria (B. C. 198), took occasion to heap on the Jews and Jerusalem new honors and exemptions (Joseph. *Antiq.* xii: 3, 3). In short, in days in which no nation of those parts could hope for political independence, there was none which seemed so likely as the Hebrew nation to enjoy an honorable social and religious liberty. The great Antiochus passed a life of war (B. C. 223-187). In his youth he had to contend against his revolted satrap of Media and afterwards against his kinsman Achæus, in Asia Minor. We have already noticed his struggles in Cœle-Syria against the Ptolemies. Besides this, he was seven years engaged in successful campaigns against the Parthians and the king of Bactriana, and, finally, met unexpected and staggering reverses in war with the Romans, so that his last days were inglorious and his resources thoroughly broken. The Syrian empire, as left by Antiochus the Great to his son, was weaker than that which the first Seleucus founded. Respecting the reign of this son, Seleucus IV (Philopator), B. C. 187-176, we know little, except that he left his kingdom tributary to the

Romans (Livy, xiii:6). In Dan. xi:20 he is named a *raiser of taxes*, which shows what was the chief direction of policy in his reign.

(4) **Antiochus IV (Epiphanes).** Seleucus IV having been assassinated by one of his courtiers, his brother Antiochus Epiphanes hastened to occupy the vacant throne, although the natural heir, Demetrius, son of Seleucus, was alive, but a hostage at Rome. In Dan. xi:21, it is indicated that he gained the kingdom *by flatteries*; and there can be no doubt that a most lavish bribery was his chief instrument. According to the description in Livy (xli:20), the magnificence of his largesses had almost the appearance of insanity. Antiochus, apprehending that the Jews would never be constant in obedience to him, unless he obliged them to change their religion, and to embrace that of the Greeks, issued an edict, enjoining them to conform to the laws of other nations, and forbidding their usual sacrifices in the temple, their festivals and their sabbath. The statue of Jupiter Olympus was placed on the altar of the temple. Many corrupt Jews complied with these orders, but others opposed them. Mattathias and his sons retired to the mountains, and old Eleazar and the seven brethren, Maccabees, suffered death with great courage at Antioch (2. Macc. vii). After the death of Mattathias, Judas Maccabæus put himself at the head of those Jews who continued faithful, and opposed with success the generals who were sent against him. Finding his treasures exhausted, Antiochus went into Persia to levy tributes. When he arrived at Ecbatana he received news of the defeat of Nicanor and Timotheus, and that Judas Maccabæus had retaken the temple of Jerusalem and restored the worship of the Lord. On receiving this intelligence, transported with indignation, he commanded the driver of his chariot to urge the horses forward, threatening to make Jerusalem a grave for the Jews. He fell from his chariot, however, and died, overwhelmed with pain and grief.

The change of policy from conciliation to cruel persecution, which makes the reign of Epiphanes an era in the relation of the Jews to the Syrian monarchy, has perhaps had great permanent moral results. It is not impossible that perseverance in the conciliating plan might have sapped the energy of Jewish national faith; while it is certain that persecution kindled their zeal and cemented their unity. Jerusalem, by its sufferings, became only the more sacred in the eyes of its absent citizens, who vied in replacing the wealth which the sacrilegious Epiphanes had ravished.

(5) **Antiochus V (Eupator) and Antiochus VI.** Besides Antiochus Epiphanes, the book of Maccabees mentions his son, called Antiochus Eupator, and another young Antiochus, son of Alexander Balas, the usurper, both of whom were murdered at a tender age.

(6) **Antiochus VII.** In the two last chapters of the book another Antiochus appears, called by the Greeks *Sidetes*, from the town of Sida, in Pamphylia. This is the last king of that house whose reputation and power were not unworthy of the great name of Seleucus. In the year B. C. 134 he besieged Jerusalem, and having taken it next year, after a severe siege, he pulled down the walls and reduced the nation once more to subjection, after only ten years' independence. His moderation and regard for their religious feelings are contrasted by Josephus with the impiety of Epiphanes.

An outline of the deeds of the kings of Syria in war and peace, down to Antiochus Epiphanes, is

presented in the 11th chapter of Daniel, in which Epiphanes and his father are the two principal figures. Nothing but ignorance or a heated imagination can account for some modern expositors referring that chapter to the events of the eighteenth century after Christ.

(7) **Table of Kings.** The most compact and unbroken account of the kings of this dynasty is to be found in Appian's book (*De Rebus Syriacis*), at the end. The dates of the following table are taken from Clinton's *Fasti Hellenici*, vol. iii, Appendix, chap. iii:

1. Seleucus Nicator, B. C. 312-280.
2. Antiochus Soter, his son, 280-261.
3. Antiochus Theos, his son, 261-247.
4. Seleucus Callinicus, his son, 247-226.
5. (Alexander, or) Seleucus Ceraunus, his son, 226-223.
6. Antiochus the Great, his brother, 223-187.
7. Seleucus Philopator, his son, 187-176.
8. Antiochus Epiphanes, his brother, 176-164.
9. Antiochus Eupator, his son (a minor), 164-162.
10. Demetrius Soter, son of Seleucus Philopator, 162-150.
11. Alexander Balas, a usurper, who pretends to be son of Antiochus Epiphanes, and is acknowledged by the Romans, 152-146.
12. Antiochus Theos, or Alexander (a minor), son of the preceding. He is murdered by the usurper Trypho, who contests the kingdom till 140.
13. Demetrius Nicator, son of Demetrius Soter, reigns 146-141, when he was captured by the Parthians.
14. Antiochus Sidetes, his brother, 141-128.

ANTIPAS (än'ti-päs), (Gr. Ἀντίπας, *an-tee'pas*).

1. A faithful witness or martyr mentioned in Rev. ii:13 (A. D. before 100). He is said to have been one of our Savior's first disciples and a bishop of Pergamos, and to have been put to death in a tumult there by the priests of Æsculapius, who had a celebrated temple in that city. Tradition relates that he was burned in a brazen bull under Domitian.

2. Antipas, or Herod Antipas, was the son of Herod the Great by Malthace, a Samaritan. He inherited of his father's dominions Galilee and Perea, as tetrarch. He was the Herod who executed John the Baptist. (See HERODIAN FAMILY.)

ANTIPATER (an-tip'a-ter). See HERODIAN FAMILY.

ANTIPATRIS (an-tip'a-tris), (Gr. Ἀντιπατρίς, *an-tip-at-reece'*), a city built by Herod the Great on the site of a former place called Caphar-saba (Joseph. *Antiq.* xiii:15, 1).

Caphar-saba was 120 stadia from Joppa; and between the two places Alexander Balas drew a trench, with a wall and wooden towers, as a defense against the approach of Antiochus (*Antiq.* xiii:15, 1; *De Bell. Jud.* i:4, 7). Antipatris also lay between Cæsarea and Lydda, its distance from the former place being twenty-six Roman miles (*Itin. Hieros.* p. 600). These circumstances indicate that Antipatris was in the midst of a plain, and not at Arsuf, where the Crusaders supposed they had found it (Reland, *Palæst.* pp. 569, 570). On the road from Ramlah to Nazareth, north of Ras-el Ain, Prokesch (*Reise ins Heilige Land.* Wien, 1831) came to a place called Kaffr Saba; and the position which Brighaus assigns to this town in his map is almost in exact agreement with the position assigned to Antipatris in the *Itin. Hieros.* Perceiving this, Professor Raumer (*Pal-äst.* pp. 144, 462) happily conjectured that this Kaffr Saba was no other than the reproduced

name of Caphar-saba, which, as in many other instances, has again supplanted the foreign arbitrary and later name of Antipatris. This conjecture has been supported by Professor Robinson, who gives Kefr Sâba as the name of the village in question (*Researches*, iii:46-48). Wilson and Conder place it at *Kala'at Ras el'Ain*, ruins between Lydda and Cæsarea, thirty miles southeast of the latter and eleven miles northeast of Joppa. The old Roman road from Jerusalem runs to this place, and thence to Cæsarea. "One of the finest springs in the country is near." It did not seem probable to Wilson and Conder that any large town like Antipatris had been at *Kefr Saba*.

St. Paul was brought from Jerusalem to Antipatris by night, on his route to Cæsarea (Acts xxiii:31).

ANTONIA (an-tō'ni-â), (*fem. of Antonius*), a fortress in Jerusalem on the north side of the area of the temple, often mentioned by Josephus in his account of the later wars of the Jews.

It was originally built by the Maccabees, under the name of Baris, and was afterwards rebuilt with great strength and splendor by the first Herod. In a more particular description, Josephus states (*De Bell. Jud.* v:5, 8) that the fortress stood upon a rock or hill fifty cubits high, at the northwest corner of the temple area, above which its wall rose to the height of 40 cubits. Within it had the extent and appearance of a palace, being divided into apartments of every kind, with galleries and baths, and broad halls or barracks for soldiers; so that, as having everything necessary within itself, it seemed a city, while in magnificence it resembled a palace. At each of the four corners was a tower. Three of these were fifty cubits high, but the fourth, at the southeast corner, was seventy cubits high, and overlooked the whole temple with its courts. The fortress communicated with the northern and western porticoes of the temple area, and had flights of stairs descending into both, by which the garrison could at any time enter the courts of the temple and prevent tumults. On the north it was separated from the hill Bezetha by a deep trench, lest it should be approachable from that quarter, and the depth of the trench added much to the apparent elevation of the towers (*De Bell. Jud.* v:4, 2).

This fortress is called *parembola*, *soldiers' barracks*, in the New Testament (Acts xxi:34, 37). The Romans generally kept a garrison in it, and from hence it was that the tribune ran with his soldiers to rescue Paul out of the hands of the Jews, who had seized him in the temple and designed to kill him (Acts xxi:31, 32).

Professor Robinson (*Researches*, i:422), conceives that the deep and otherwise inexplicable excavation called 'the pool of Bethesda' was part of the trench below the north wall of this fortress; in which case, as he remarks, its extent must have been much more considerable than has usually been supposed.

ANTOTHIJAH (än'to-thi'jah), (Heb. אַנְתוֹתִיָּהוּ, *an-tho-thee-yaw'*, answers of Jah), a Benjamite, one of the sons of Shashak (1 Chron. viii:24), B. C. before 536.

ANUB (ā'nüb), (Heb. אֲנוּב, *aw-noob'*, bound together, confederate), son of Coz and descendant of Judah, through Ashur, the father of Tekoa (1 Chron. iv:8), B. C. after 1618.

ANVIL (än'vil), (Heb. אַנְוִיָּה, *pah'am*, beaten), the iron block on which the smith lays his metal to be forged.

It varies in shape according as the metal varies in which the smith works. It generally has a beak or horn at one end for forging hollow or rounded work, and stands on a wooden block (Is. xli:7).

The description of the metal worker in Is. xli:6, 7, is one that might have been taken from the Arab workshop of the present day. As the Oriental artisan has only a few simple tools at his command, his work lacks the precision and uniformity attained in the West by elaborate machinery. Hence vivacious comment during the process of manufacture, and a feeling of triumph at times when the article turns out according to sample. The act of welding on the anvil, to which the prophet alludes, is especially a moment of noisy enthusiasm and mutual encouragement between the smith and his fellow-workman on the other side of the anvil. They then call out to each other to strike more rapidly and vigorously, before the metal cools, crying 'shidd! shidd!' the Arabic equivalent of Isaiah's 'hazak!' 'be of good courage!' Then the term applied to the soldering—'tob!' Arabic 'tayyib!' that is, 'good!'—is at once a call to cease from further hammering and a declaration that the work is satisfactory. (G. M. Mackie, Hastings' *Bib. Dict.*)

APE (āp), (Heb. אָפֶה, *koph*, whence the Latinized name *Cephus*).

In the Hebrew and Semitic cognate tongues, and in the classical languages, these names, under various modifications, designate the Simiadæ, including, no doubt, species of Cercopithecus, Macacus and Cynocephalus, or Guenons, apes and baboons; that is, all the animals of the quadrumanous order known to the Hebrews, Arabs, Egyptians and the classical writers. Accordingly, we find Pliny and Solinus speaking of Ethiopian Cephi exhibited at Rome, and in the upper part of the celebrated Prænentine mosaic representing the inundation of the Nile, figures of Simiadæ occur in the region which indicates Nubia; among others, one in a tree with the name *Ke-i-pen* beside it, which may be taken for a Cercopithecus

Monkey from the Prænentine Mosaic.

of the Guenon group. But in the triumphal procession of Thothmes III at Thebes, nations from the interior of Africa, probably from Nubia, bear curiosities and tribute, among which the Camelopardalis or Giraffe and six quadrumana may be observed. The smallest and most effaced animals may be apes, but the others, and in particular the three figured and colored from careful drawings, in Plate xxi of Rosellini's work, are undoubtedly Macaci or Cynocephali, that is, species of the genus baboon, or baboon-like apes. Naturalists and commentators, not deterred by the interminable list of errors which the practice has occasioned, are often unnecessarily anxious to assign the names of animals noticed in Scripture and in the ancient classics to species characterized by the moderns, although the original designations are to be taken in a familiar sense, and often extend even beyond a generical meaning.

Among the articles of merchandise imported by Solomon's fleet was the *Kophe* (1 Kings x:22; 2 Chron. ix:21). The Greek writers mention a sort of ape, native of Ethiopia and around the Red Sea, called *Kephos*, or *Keipos*, or *Kebos*, which comes near to the Hebrew *Kuph*, or *Koph*. It was about the size of a roebuck. The Egyptians of Babylon, in Egypt, adored a kind of ape, which Strabo calls *Keipos*, and they are still worshiped in many places of India.

The only species of ape of the baboon form known in Arabia is the Mocko.

Comparing the characters of this species, we find it by configuration, colors and manners peculiarly adapted to the purposes of idolatry in its grossest and most debasing aspect. The Hebrew people, already familiar with a similar worship in Egypt, may have copied the native tribes in the wilderness, and thus drawn upon themselves the remonstrance in Lev. xvii:7, where the allusion to these animals is very descriptive, as is that in Is. xlii:21; and again, xxxiv:14, where the image is perfect, when we picture to ourselves the 'hairy ones' lurking about the river in the juniper and licorice jungle. It is not unlikely that the baboon idol may have had goat's horns, since we find the same attribute on rams' heads in Egypt; on lions' heads on coins of Tarsus, and on horses' and elephants' heads on medals of Syrian kings.

APELLES (a-pél'lēz), (Gr. Ἀπελλῆς, *ap-el-lace'*), a Christian at Rome, whom Paul salutes in his Epistle to the Church there (Rom. xvi:10), and calls 'approved in Christ,' an approved Christian.

Origen doubts whether he may not have been the same person with Apollos; but this is far from likely. (See APOLLOS.) According to the old church traditions Apelles was one of the seventy disciples and bishop either of Smyrna or Heracleia (Epiph. *Cont. Hæres*, p. 20; Fabrici *Lex. Evangelii*, pp. 115, 116, etc.). The name itself is notable from Horace's 'Credat Judæus Apella, non ego' (*Sat.* i:5), by which he less probably means a circumcised Jew in general, as many think, than a particular Jew of that name well-known at Rome.

APHARSACHITES (a-phär'sak-ites or a-phär-sath-kites), (Heb. אַפְרַסְחַיִּים, *af-ar-sek-ah'ee*, Ezra v:6; vi:6), or **APHARSATHCHITES** (Heb. אַפְרַסְחַיִּים, *af-ar-sath-kah'ee*), the name of the nation to which belonged one portion of the colonists whom the Assyrian king planted in Samaria (Ezra iv:9; v:6). Schultness (*Parad.*, p. 362) identifies the Apharsachites with the Persian, or rather Median Paratacene of the Greek geographers (Strabo xi:522; xv:732; Plin. xvi:29). This conclusion is strengthened by the fact that the A is often prosthetic in Strabo, as in xv:764, where the names Mardi and Amardi are interchanged.

APHARSITES (a-phär'sites), (Heb. אַפְרַסְיִים, *af-aw-re-sah'ee*), a tribe removed (B. C. 464-424) to Samaria by the king of Assyria (Ezra iv:9).

APHEK (ä'fëk), (Heb. אֶפֶק, *af-ake'*). The name signifies *strength*; hence a citadel or fortified town. There were at least four places so called.

1. A city in the tribe of Asher (Josh. xii:18; xiii:4; xix:30), called *Aphik* in Judg. i:33, where we also learn that the tribe was unable to gain possession of it. This must be the same place with the *Ἀφακα*, which Eusebius (*Constant.* iii:55) and Sozomen (pp. 2, 5) place in Lebanon, on the river Adonis, where there was a famous temple of

Venus. A village called Afka is still found in Lebanon, situated at the bottom of a valley, and may possibly mark the site of this Aphek.

2. A city near which Benhadad was routed by the Israelites (1 Kings xx:26, *seq.*), to which the *Aphaca* of Eusebius corresponds, situated to the east of the sea of Galilee, and mentioned by Seetzen and Burckhardt, under the name of Feik.

3. A city in the tribe of Issachar, near to Jezreel, where the Philistines twice encamped before battles with the Israelites (1 Sam. iv:1; xxix:1; Comp. xxviii:4). Either this or the Aphek first above mentioned is probably the royal city of the Canaanites spoken of in Josh. xii:18.

4. A city, most probably the place called at present Fik, six miles east of the Sea of Galilee (2 Kings xiii:17).

APHEKAH (a-fē'ka), (Heb. אֶפְקָא, *af-ay-kaw'*, fortress), a town in the mountains of Judah near Beth-tappaah, site unknown (Josh. xv:53).

APHEREMA (a-fēr'e-mā), (Gr. Ἀφαιρέμα, *aph-i'reh-mah*, part taken away), one of the three toparchies added to Judæa by the kings of Syria (1 Mace. xi:34). This is perhaps the Ephræm or Ephraim mentioned in John xi:54.

APHIAH (a-phi'ah), (Heb. אֶפְיָא, *af-ee'akh*, blown upon, *i. e.*, refreshed), the father of Bechorath, a Benjamite and a forefather of Saul (1 Sam. ix:1).

APHIK (ā'phik), (Heb. אֶפְיָא, *aphik*, strong), a city of Asher, in the north of Canaan, from which the Asherites were unable to drive out the Canaanites (Judg. i:31); perhaps the same as Aphek (Josh. xiii:4; xix:30).

APHRAH (āph'rah). See OPHRAH.

APHSES (āph'sēz), (Heb. אֶפְסֵס, *pits-tsates'*, the dispersed), head of the eighteenth sacerdotal family, of the twenty-four which David chose for temple service (1 Chron. xxiv:15).

APOCALYPSE (ā-pōk'ā-līps). See REVELATION.

APOCRYPHA (ā-pōk'rī-fā), (Gr. ἀπόκρυφα, *ap-ok'roo-fa*, hidden, secreted, mysterious), a term in thicology applied in various senses to denote certain books claiming a sacred character. The word occurs in Mark iv:22, Matt. x:26, Luke xii:2: 'There is nothing hid, which shall not be manifested, neither was anything kept secret (*ap-ok'roo-son*), but that it should come abroad;' also Luke viii:17 and Col. ii:3: 'In whom are hid (*ἀπόκρυφοί*) all the treasures of wisdom and knowledge.' It is first found, as denoting a certain class of books, in Clemens Alexandrinus, *Stromata*, 13, c. 4, *from the unrecognized books of a certain one.*

(1) **Early Definition.** In the early ages of the Christian church this term was frequently used to denote books of an uncertain or anonymous author, or of one who had written under an assumed name. Its application, however, in this sense is far from being distinct, as, strictly speaking, it would include *canonical* books whose authors were unknown or uncertain, or even *pseudopigraphal*. 'Let us omit,' says St. Augustine, 'those fabulous books of Scripture which are called *apocryphal*, because their secret origin was unknown to the fathers.' 'This is plain, that many examples have been adduced by the apostles and evangelists, and inserted in the New Testament, which we do not read in the canonical Scriptures which we possess, but which are found in the *Apocrypha*' (Origen, *Præf. in Cantic.*). So also Jerome, referring to the words (Eph. v:14), 'Awake, thou that sleepest, and arise from the

dead,' observes that 'the apostle cited this from *hidden* (reconditis) prophets, and such as seem to be apocryphal, as he has done in several other instances.' Epiphanius thought that this term was applied to such books as were not placed in the Ark of the Covenant, but put away in some other place. (See Suicer's *Thesaurus* for the true reading of the passage in this father). Under the term *apocryphal* have been included books of a religious character which were in circulation among private Christians, but were not allowed to be read in the public assemblies, such as 3 and 4 Esdras, and 3 and 4 Maccabees.

(2) **Spurious Gospels Invented by Heretics.**

In regard to the New Testament, the term has been usually applied to books invented by heretics to favor their views, or by Catholics under fictitious signatures. Of this description were many spurious or apocryphal gospels (which see). It is probably in reference to such that Basil, Cyril of Jerusalem and Jerome gave cautions against the reading of apocryphal books; although it is possible, from the context, that the last-named father alludes to the books which were also called *Ecclesiastical*, and afterwards *Deutero-canonical*.

In the *Bibliothèque Sacré*, by the Rev. Dominican Fathers Richard and Giroud (Paris, 1822), the term is defined to signify: (1) Anonymous or pseudopigraphal books; (2) those which are not publicly read, although they may be read with edification in private; (3) those which do not pass for authentic and of divine authority, although they pass for being composed by a sacred author or an apostle, as the *Epistle of Barnabas*; and (4) dangerous books, composed by ancient heretics to favor their opinions. They also apply the name 'to books which, after having been contested, are put into the canon by consent of the churches, as Tobit, etc.' And Jahn applies it in its most strict sense, and that which it has borne since the fourth century, to books which, from their inscription, or the author's name, or the subject, might easily be taken for inspired books, but are not so in reality. It has also been applied, by Jerome, to certain books not found in the Hebrew canon, but yet publicly read from time immemorial in the Christian church for edification, although not considered of authority in controversies of faith. These were also termed *Ecclesiastical* books, and consisted of the books of Tobit, Wisdom, Ecclesiasticus, Baruch, the first two books of Maccabees, the last seven chapters (according to Cardinal Hugo's division) of the book of Esther, and those (so-called) parts of the book of Daniel which are not found in Hebrew, viz., the Song of the Children, the Speech of Azariah, the History of Susannah, and the Fable (as Jerome calls it) of Bel and the Dragon. These have been denominated, for distinction's sake, the *deutero-canonical* books, inasmuch as they were not in the original or Hebrew canon. In this sense they are called by some the *Antilegomena* of the Old Testament. 'The uncanonical books,' says Athanasius, or the author of the *Synopsis*, 'are divided into *antilegomena* and *apocrypha*.' (See DEUTERO-CANONICAL.)

(3) **As Distinct from Ecclesiastical.** *Of Spurious and Apocryphal Books, as distinct from Antilegomena or Ecclesiastical.*—Among this class are doubtless to be considered the third and fourth books of Esdras, and it is no doubt in reference to these that, in his letter to Vigilantius, Athanasius speaks of a work of Esdras which he says that he had never even read.

Of the same character are also the Book of Enoch, the Testament of the Twelve Patriarchs,

the Assumption of Moses, etc., which, as well as 3 and 4 Esdras, being by many considered as the fictions of Christians of the second and third centuries, it is doubtful whether they ought to be classed in the Apocrypha of the Old or of the New Testament. Origen, however, believed the New Testament to have contained citations from books of this kind written before the times of the apostles, and in reference to such observes, in his preface to the *Canticles*, 'This, however, is manifest, that many passages are cited either by the apostles or the evangelists, and inserted in the New Testament, which we do not read in those Scriptures of the Jews which we call canonical, but which are nevertheless found in *apocryphal* books, or are taken from them. But this will give no authority to apocryphal writings, for the bounds which our fathers have fixed are not to be removed; and possibly the apostles and evangelists, full of the Holy Ghost, might know what should be taken out of those Scriptures and what not. But we, who have not such a measure of the Spirit, cannot, without great danger, presume to act in that manner.' Then, in his *Letter to Apianus*, he observes that there were many things kept from the knowledge of the public, but which were preserved in the hidden or *apocryphal* books, to which he refers the passage (Heb. xi: 37), 'They were sawn asunder.'

(4) **Apocryphal Books of the New Testament.** The apocryphal books of the New Testament are not destitute of interest. Although the spurious Acts extant have no longer any defenders of their genuineness, they are not without their value to the Biblical student, and have been applied with success to illustrate the style and language of the genuine books, to which they bear a close analogy. The American translator of Mosheim's *Ecclesiastical History* terms them 'harmless and ingenious fictions, intended either to gratify the fancy or to silence the enemies of Christianity.' The mass of Christians who have neither time nor other means of satisfying themselves must confide, in questions of this kind, either in the judgment of the learned, or the testimony at least, if not the authority, of the Church; and it ought to be a matter of much thankfulness to the private Christian that the researches of the most learned and diligent inquirers have conspired, in respect to the chief books of Scripture, in adding the weight of their evidence to the testimony of the Church Universal.

(5) **Apocryphal Books of the Old Testament.** The following are the principal apocryphal (or spurious) books of the Old Testament which have descended to our times. The greater number of them can scarcely be considered as properly belonging to the Apocrypha of the Old Testament, as they have been most probably written since the Christian era, and not before the second century:

BOOKS.

- I. 1 Esdras.
- II. 2 Esdras.
- III. Tobit.
- IV. Judith.
- V. The rest of the chapters of the Book of Esther (*i. e.*, x:4; xvi:24).
- VI. The Wisdom of Solomon.
- VII. The Wisdom of Jesus the son of Sirach, *or* Ecclesiasticus.
- VIII. Baruch.
(Ch. vi. = The Epistle of Jeremy).
- IX. The Song of the Three Holy Children.
(*i. e.*, The Prayer of Azarias and the Song of the Three.)
- X. The History of Susannah.

XI. The History of the Destruction of Bel and the Dragon.

(ix, x, and xi are the additions to the Book of Daniel.)

XII. The Prayer of Manasses.

XIII. 1 Maccabees.

XIV. 2 Maccabees.

(Comp. works by Dr. Tischendorf, Dr. Laurence of Oxford, and Lardner.) (See ACTS; GOSPELS; EPISTLES.)

APOLLONIA (ăp'ol-lō'ni-à), (Gr. Ἀπολλωνία, *ap-ol-lo-nee'ah*), a city of Macedonia, in the province of Mygdonia (Plin. iv:17), situated between Amphipolis and Thessalonica, about twenty-eight miles from the former and thirty-three from the latter (*Itiner. Anton.*). St. Paul passed through Amphipolis and Apollonia on his way to Thessalonica (Acts xvii:1).

APOLLONIUS (ăp'ol-lō'ni-ūs).

1. A general whom Antiochus Epiphanes sent into Judæa, and who took Jerusalem, but who was eventually defeated and slain by Judas Maccabæus (1 Macc. iii:10, 11), B. C. 166. He is called Misanarches in the Greek (2 Macc. v:24).

2. A governor of Cœle-Syria, and general of Demetrius Nicanor, who was defeated by Jonathan on behalf of Alexander Balas (1 Macc. x: 69-76) B. C. 148.

3. Son of Genneus, was one of those governors whom Lysias had left in Judæa, after the treaty formed between the Jews and the young king Antiochus Eupator, and who endeavored to compel the Jews to break it (2 Macc. xii:2).

APOLLOS (a-pōl'los), (Gr. Ἀπολλῶς, *ap-ol-loce'*, belonging to Apollo), a Jew of Alexandria, is described as a *learned*, or, as some understand it, an *eloquent* man, well versed in the Scriptures and the Jewish religion (Acts xviii:24; xix:1).

About A. D. 56 he came to Ephesus, where, in the synagogues, he spoke about the baptism of John (verse 25), by which we are probably to understand that he knew and taught the doctrine of a Messiah, whose coming John had announced, but knew not that *Jesus* was the Christ. His fervor, however, attracted the notice of Aquila and Priscilla, whom Paul had left at Ephesus, and they instructed him in this higher doctrine, which he thenceforth taught openly, with great zeal and power (verse 26).

Having heard from his new friends, who were much attached to Paul, of that apostle's proceedings in Achaia, and especially at Corinth, he resolved to go thither, and was encouraged in this design by the brethren at Ephesus, who furnished him with letters of introduction. On his arrival there he was very useful in watering the seed which Paul had sown and was instrumental in gaining many new converts from Judaism.

There was, perhaps, no apostle or apostolical man who so much resembled Paul in attainments and character as Apollos. His immediate disciples became so much attached to him, as well nigh to have produced a schism in the church, some saying, 'I am of Paul;' others, 'I am of Apollos;' others, 'I am of Cephas' (1 Cor. i:12; iii:4-7, 22). There must, probably, have been some difference in their mode of teaching to occasion this, and from the First Epistle to the Corinthians it would appear that Apollos was not prepared to go so far as Paul in abandoning the figments of Judaism, and insisted less on the, to the Jews, obnoxious position that the Gospel was open to the Gentiles. There was nothing, however, to prevent these two eminent men from being perfectly united in the bonds of Christian affection and

brotherhood. When Apollos heard that Paul was again at Ephesus he went thither to see him, and as he was there when the First Epistle to the Corinthians was written (A. D. about 59), there can be no doubt that the apostle received from him his information concerning the divisions in that church which he so forcibly reproves. It strongly illustrates the character of Apollos and Paul that the former, doubtless in disgust at those divisions with which his name had been associated, declined to return to Corinth; while the latter, with generous confidence, urged him to do so (1 Cor. xvi:12). Paul again mentions Apollos kindly in Tit. iii:13, and recommends him and Zenas, the lawyer, to the attention of Titus, knowing that they designed to visit Crete, where Titus then was. Apollos was so dissatisfied with the division which had happened on his account at Corinth that he retired into Crete with Zenas, but this interruption of Christian harmony having been appeased by the letter of Paul to the Corinthians, Apollos returned to that city, and afterwards, according to the best authority, became bishop there. The Greeks make him bishop of Duras; but, in their Menæa, they describe him as second bishop of Colophon, in Asia. Ferrarius says he was bishop of Iconium, in Phrygia; others say he was bishop of Cæsarea.

APOSTLE (â-pôs's'l), (Gr. Ἀπόστολος, *ap-os'tol-*, one sent).

(1) **In General.** It occurs only once in the Septuagint (1 Kings xiv:6), and there, as uniformly in the New Testament, it signifies *a person sent by another, a messenger* (Heb. iii:1, 2).

(2) **Hebrew.** It has been asserted that the Jews were accustomed to term the collector of the half-shekel, which every Israelite paid annually to the Temple, an apostle; and we have better authority for asserting that they used the word to denote one who carried about encyclical letters from their rulers. It is even yet a custom among the Jews to call those who carry about circular letters from their rulers by the name of 'apostles.' To this use of the term Paul has been supposed to refer (Gal. i:1) when he asserts that he was 'an apostle, not of men, neither by men'—an apostle, not like those known among the Jews by that name, who derived their authority and received their mission from the chief priests or principal men of their nation. The import of the word is strongly brought out in John xiii:16, where it occurs along with its correlate, 'The servant is not greater than his Lord, neither *he who is sent* greater than he who sent him.'

(3) **Christian.** The term is generally employed in the New Testament as the descriptive appellation of a comparatively small class of men, to whom Jesus Christ entrusted the organization of his church and the dissemination of his religion among mankind. At an early period of his ministry he ordained twelve of his disciples that they should be with him. These he named apostles. Some time afterwards he gave to them power against unclean spirits to cast them out, and to heal all manner of disease; and he sent them to preach the kingdom of God (Mark iii:14; Matt. x:1-5; Mark vi:7; Luke vi:13; ix:1). To them he gave the keys of the kingdom of God, and constituted them princes over the spiritual Israel, that 'people whom God was to take from among the Gentiles, for his name' (Matt. xvi:19; xviii:18; xix:28; Luke xxii:28-30). Previously to his death he promised to them the Holy Spirit, to fit them to be the founders and governors of the Christian church (Luke xxiv:49; John xiv:16, 17, 26, 28; xv:26, 27; xvi:7-15). After his resurrection he solemnly confirmed their call, saying:

As the Father hath sent me, so I send you, and gave them a commission to preach the gospel to every creature (John xx:21-23; Matt. xxviii:18-20). After His ascension (Acts ii), on the day of Pentecost, he communicated to them those supernatural gifts which were necessary to the performance of the high functions he had commissioned them to exercise; and in the exercise of these gifts they, in the Gospel history and in their epistles, with the Apocalypse, gave a complete view of the will of their Master in reference to that new order of things of which he was the author.

There was among the apostles no external distinction of rank; indeed, the whole teaching of Jesus was directed to do away with all such distinction, had it been otherwise possible for it to exist (Matt. xx:24, 27, *sq.*; xxiii:11, 12; Mark i:35; x:44). Nevertheless, there appears to have been a difference of character and standing among them in respect to influence and activity, so far as this, that Peter, and James, and John act a more prominent part than any of the others, both during the lifetime of Christ and also after his death, when they became especially *pillars* in the church at Jerusalem (Gal. ii:9).

The names of the twelve apostles are:

- | | |
|-----------------|-------------------------------|
| 1. Peter. | 8. Matthew (Levi). |
| 2. Andrew. | 9. Simon. |
| 3. John. | 10. Jude (Lebbeus, Thaddeus). |
| 4. Philip. | 11. James Minor. |
| 5. James Major. | 12. Judas Iscariot. |
| 6. Bartholomew. | |
| 7. Thomas. | |

The last betrayed his Master; and, having hanged himself, Matthias was chosen in his place (Acts i:15-26).

They were, for the most part at least, Galileans, and from the lower class of society. The greater part of them were fishermen, who prosecuted their employment on the shores of the lake of Tiberias. Matthew was a publican or tax-gatherer employed by the Romans; an occupation regarded by the Jews in general with the utmost contempt and abhorrence. They were 'unlearned and ignorant men' (Acts iv:13), and Paul justly regards it as a proof of the wisdom and power of God that he had chosen, through the preaching of unlearned men, to overthrow the whole edifice of human wisdom, and lead the world to the light of truth (1 Cor. i:19, 27, *seq.*).

They authoritatively taught the doctrine and the law of their Lord; they organized churches and required them to keep the traditions, the doctrines and ordinances *delivered* to them (Acts ii; 1 Cor. ii:16; ii:7, 10, 13; 2 Cor. v:20; 1 Cor. xi:2). Saul of Tarsus, afterwards termed Paul, was also miraculously added to the number of these permanent rulers of the Christian society (Acts ix:xx:4; xxvi:15-18; 1 Tim. i:12; ii:7; 2 Tim. i:11).

(4) **Apostolic Office.** The characteristic features of this highest office in the Christian church were: (1) That they should have seen the Lord, and been eye and ear witnesses of what they testified to the world (John xv:27). This is laid down as an essential requisite in the choice of one to succeed Judas (Acts i:21, 22). Paul is no exception here, for, speaking of those who saw Christ after his resurrection, he adds, 'and last of all he was seen of me' (1 Cor. xv:8). And this he elsewhere mentions as one of his apostolic qualifications: 'Am I not an apostle? have I not seen the Lord?' (1 Cor. ix:1). So that his seeing that Just One and hearing the word of his mouth was necessary to his being 'a witness of what he thus saw and heard' (Acts xxii:14,

15). (2) They must have been immediately called and chosen to that office by Christ himself. This was the case with every one of them (Luke vi:13; Gal. i:1), Matthias not excepted; for, as he had been a chosen disciple of Christ before, so the Lord, by determining the lot, declared his choice, and immediately called him to the office of an apostle (Acts i:24-26). (3) Infallible inspiration was also essentially necessary to that office (John xvi:13; 1 Cor. ii:10; Gal. i:11, 12). They had not only to explain the true sense and spirit of the Old Testament (Luke xxiv:27; Acts xxvi:22, 23; xxviii:23), which were hid from the Jewish doctors, but also to give forth the New Testament revelation to the world, which was to be the unalterable standard of faith and practice in all succeeding generations (1 Pet. i:25; 1 John iv:6). It was therefore absolutely necessary that they should be secured against all error and mistake by the unerring dictates of the spirit of truth. Accordingly Christ promised and actually bestowed on them the Spirit to teach them all things, to 'bring all things to their remembrance whatsoever he had said to them' (John xiv:26), to 'guide them into all truth,' and 'to show them things to come' (John xvi:13). Their word, therefore, must be received, 'not as the word of men, but as it is in truth, the word of God' (1 Thess. ii:13), and as that whereby we are to distinguish 'the spirit of truth from the spirit of error' (1 John iv:6). (4) Another apostolic qualification was the power of working miracles (Mark xvi:20; Acts ii:43), such as speaking with divers tongues, curing the lame, healing the sick, raising the dead, discerning of spirits, conferring these gifts upon others, etc. (1 Cor. xii:8-11). These were the credentials of their divine mission. 'Truly,' says Paul, 'the signs of an apostle were wrought among you in all patience, in signs and wonders and mighty deeds' (2 Cor. xii:12). Miracles were necessary to confirm their doctrine at its first publication, and to gain credit to it in the world as a revelation from God, and by these 'God bare them witness' (Heb. ii:4). (5) To these characteristics may be added the *universality* of their mission. Their charge was not confined to any particular visible church, like that of ordinary pastors, but, being the oracles of God to men, they had the care of all the churches (2 Cor. xi:28). They had a power to settle their faith and order as a model to future ages, to determine all controversies (Acts xvi:4), and to exercise the rod of discipline upon all offenders, whether pastors or flock (1 Cor. v:3-6; 2 Cor. x:8; xiii:10).

(5) **No Successors.** It must be obvious, from this scriptural account of the apostolical office, that the Apostles had, in the strict sense of the term, no successors. Their qualifications were supernatural, and their work, once performed, remains in the infallible record of the New Testament, for the advantage of the Church and the world in all future ages. They are the only authoritative teachers of Christian doctrine and law. All official men in Christian churches can legitimately claim no higher place than expounders of the doctrines and administrators of the laws found in their writings. Few things have been more injurious to the cause of Christianity than the assumption on the part of ordinary office-bearers in the Church of the peculiar prerogatives of 'the holy apostles of our Lord Jesus.' It is true indeed that the word is used in this loose sense by the Fathers. Thus we find in Archippus, Philemon, Apphia, the seventy disciples (Luke x:1-17), termed apostles; and even Mary Magdalene is said to be an *apostle to the Apostles*. No satis-

factory evidence, however, can be brought forward of the term being thus used in the New Testament. Andronicus and Junia (Rom. xvi:7) are indeed said to be *of note among the Apostles*; but these words by no means necessarily imply that these persons were apostles; they may, and probably do, signify merely that they were persons well known and much esteemed by the Apostles. The *fellow-workers* of the Apostles are by Chrysostom denominated *fellow-apostles*.

The argument founded on 1 Cor. iv:9, compared with verse 6, to prove that Apollos is termed an apostle, cannot bear a close examination. The only instance in which it seems probable that the word, as expressive of an office in the Christian church, is applied to an individual whose call to that office is not made the subject of special narration, is to be found in Acts xiv:4, 14, where Barnabas, as well as Paul, is termed an apostle. At the same time, it is by no means absolutely certain that the term *apostles*, or messengers, does not in this place refer rather to the mission of Paul and Barnabas by the prophets and teachers at Antioch, under the impulse of the Holy Ghost (Acts xiii:1-4), than to that direct call to the Christian apostleship which we know Paul received, and which, if Barnabas had received, we can scarcely persuade ourselves that no trace of so important an event should have been found in the sacred history, but a passing hint, which admits, to say the least, of being plausibly accounted for in another way. We know that on the occasion referred to, 'the prophets and teachers, when they had fasted and prayed, and laid their hands on Barnabas and Saul, *sent them away*;' so that, in the sense in which we will immediately find the words occurring, they were *apostles* of the prophets and teachers.

(6) **Divinely Commissioned.** The word 'apostle' occurs once in the New Testament (Heb. iii:1) as a descriptive designation of Jesus Christ: 'The apostle of our profession,' *i. e.*, the apostle whom we profess or acknowledge. The Jews were in the habit of applying the corresponding Hebrew term to the person who presided over the synagogue, and directed all its officers and affairs. The Church is represented as 'the house or family of God,' over which he had placed, during the Jewish economy, Moses, as the superintendent,—over which he has placed, under the Christian economy, Christ Jesus. The import of the term *apostle*, is—divinely-commissioned superintendent; and of the whole phrase, '*the apostle of our profession*,' the divinely-commissioned superintendent, whom we Christians acknowledge, in contradistinction to the divinely-appointed superintendent Moses, whom the Jews acknowledged.

(7) **Messengers of the Churches.** In 2 Cor. viii:23, we meet with the phrase, *the messengers of the churches*. These 'apostles or messengers of the churches' were those who were chosen of the churches to travel with the Apostle with the gift of the churches of Macedonia to the impoverished and persecuted saints of Judæa (2 Cor. viii:1-4, 19). Theophylact explains the phrase thus: *Those sent and chosen by the churches*.

With much the same meaning and reference Epaphroditus (Phil. ii:25) is termed *ἀπόστολος*—a messenger of the Philippian Church—having been employed by them to carry pecuniary assistance to the Apostles (Phil. iv:14-18).

The Canons and Constitutions, called apostolical, are generally admitted to be forgeries, probably of the fifth century.

In the early ecclesiastical writers we find the term *ho ap-os'toh-los*, the *Apostle*, used as the designation of a portion of the canonical books, consisting chiefly of the Pauline Epistles. 'The Psalter' and 'the Apostle' are often mentioned together.

APOSTLES' CREED (â-pös's'ls kräd).

The creed thus named is not to be ascribed to the Apostles themselves.

It has been a growth or evolution of the doctrine (or commission) given by Christ to the Apostles (Matt. xxviii:19).

From this simple acknowledgment of the three-fold name have sprung all the more elaborated creeds of the Christian churches. The Apostles' Creed has never been regarded and treated as Scripture, but has been subjected at various times to changes or modifications.

One of the first expansions of the creed after the manner of the Apostles is to be found in a Greek writer, Epiphanius, who, in the seventy-second book of his "Treatise on Heresies," quotes the Confession of Faith, presented by Marcellus, Bishop of Ancyra in Galatia, to Julius, Bishop of Rome, in which one small change is made, and afterward is thus quoted in one of our own Church hymns, *i. e.*, "and sitteth at the right hand of God."

The definite authority of the Apostles' Creed has been supposed to be St. Augustine, but this is in obscurity. However, no authority places its origin farther back than the fifth century. Its growth extended over four hundred years, from the first conception of a creed, when Jesus spoke to Peter at Cæsarea Philippi, saying, "But whom say ye that I am? And Simon Peter answered and said, Thou art the Christ, the son of the living God" (Matt. xvi:16). These forms and expressions of belief were set forth again and again by Peter and Paul.

On the day of Pentecost (Acts ii:22, 36) Peter was filled with the Holy Ghost and spoke of Christ's supernatural life, of the crucifixion, the resurrection, ascension, and that Christ had received of the Father the promise of the Holy Ghost, and the remission of sins. Paul, as he preached at Antioch in Pisidia (Acts xiii:27-38) gives the same doctrine in substance, but adds that the people desired that Pilate should crucify Jesus, though he was without fault. And in the book of Acts (iii:12-22 and iv:10-12) Peter speaks on all the points before touched upon. And later Peter, before Cornelius (Acts x:36-43), says, "God anointed Jesus of Nazareth with the Holy Ghost . . . and he . . . was ordained of God to be the judge of the quick and the dead." The simplicity and vivid appeal of the Apostles' Creed to the uneducated mind, and to children, impresses all, and probably it was its short, terse sentences, so full of faith, of tragedy, of light upon the here and the hereafter, that attracted the men of great minds and diverse beliefs, as Calvin, Wesley, Luther, St. Augustine, and hosts of others. It is conceded by all authorities to be the concentrated essence of scriptural belief. How simple and concrete are all its expressions! The divine life of Christ is emphasized and faith centered in him through the promise of remission of sins and the assurance of the resurrection—the sure foundation of the hope of immortality. The creed is not a definite statement in regard to the difference between the corruptible mortal body and the incorruptible body which shall finally clothe the soul. It does express absolute belief in the life everlasting and the personal or individual identity hereafter. And we understand at once the divin-

ity and the humility of Christ in the words, as we say them reverently, "Conceived of the Holy Ghost and born of the Virgin Mary." The great purpose of the creed is thus to make prominent the supernatural character of the Christian religion.

A full and satisfactory account of the creed will be found in Lord King's *History of the Apostles' Creed, with Critical Observations on Its Several Articles; What is the Apostles' Creed?* by Prof. W. E. C. Wright, *Bib. Sacra*, Apr., 1900, p. 377, sq.

APOSTOLATE (â-pös'tô-lâte), in a general sense, is used for mission; but it more properly denotes the dignity or office of an apostle of Christ. It is also used in ancient writers for the office of a bishop. But as the title *apostolicus* has been appropriated to the pope, so that of apostolate became at length restrained to the sole dignity of the popedom.

APOSTOLIC AGE (âp-ös-töl'ik âj), that period of Church history which covers the time between the day of Pentecost and the death of John, the last apostle.

The apostolic age is commonly divided into three periods: 1. From the Pentecost until the second appearance of Paul (about A. D. 41). 2. Until the death of Paul (about 67). 3. The Johannean period (about 100).

APOSTOLIC, APOSTOLICAL (âp-ös-töl'ik, âp-ös-töl'ikal), belonging or relating to or traceable to the apostles, as *apostolical* age, *apostolical* doctrine, *apostolical* character, constitutions, traditions, etc.

Apostolic, in the primitive church, was an appellation given to all such churches as were founded by the apostles; and even to the bishops of those churches, as being the reputed successors of the apostles. These were confined to four, viz., Rome, Alexandria, Antioch and Jerusalem. In after times, the other churches assumed the same quality, on account, principally, of the conformity of their doctrine with that of the churches which were apostolical by foundation, and because all bishops held themselves successors of the apostles, or acted in their diocese with the authority of apostles.

The first time the term *apostolical* is attributed to bishops, as such, is in a letter of Clovis to the council of Orleans, held in 511, though that king does not there expressly denominate them *apostolical*, but (*apostolica sede dignissimi*) highly worthy of the apostolical see. In 581, Guntram calls the bishops met at the council of Macon, *apostolical* pontiffs, *apostolici pontifices*.

In progress of time, the bishop of Rome growing in power above the rest, and the three patriarchates of Alexandria, Antioch, and Jerusalem falling into the hands of the Saracens, the title *apostolical* was restrained to the pope and his church alone; though some of the popes, and St. Gregory the Great, not contented to hold the title by this tenure, began at length to insist that it belonged to them by another and peculiar right, as being the successors of St. Peter. The council of Rheims, in 1049, declared that the pope was the sole apostolical primate of the universal church. And hence a great number of *apostolical*s; *apostolical* see, *apostolical* nuncio, *apostolical* notary, *apostolical* brief, *apostolical* chamber, *apostolical* vicar, etc.

APOSTOLICAL COUNCIL (âp-ös - töl'ï - kal koun'sil), the assembly of the apostles and elders held in Jerusalem (A. D. 50), an account of which is given in Acts xv.

APOSTOLICAL CONSTITUTIONS (ăp-ôs-tôl'-î-kal kôn'stî-tû'shŭns), a collection of regulations attributed to the apostles, and supposed to have been collected by St. Clement, whose name they likewise bear.

It is the general opinion, however, that they are spurious, and that St. Clement had no hand in them. They appeared first in the fourth century, but have been much changed and corrupted since. There are so many things in them different from and even contrary to the genius and design of the New Testament writers, that no wise man would believe, without the most convincing and irresistible proof, that both could come from the same hand.

APOSTOLIC FATHERS (ăp'ôs-tôl'îk fâ'thêrz), an appellation usually given to the writers of the first century who employed their pens in the cause of Christianity. Of these writers, Cotelierius, and, after him, Le Clerc, have published a collection in two volumes, accompanied both with their own annotations and the remarks of other learned men. See, also, the Genuine Epistles of the Apostolic Fathers, by Abp. Wake.

APPAIM (ăp-pa'im), (Heb. אַפַּיִם, *ap-pah'yim*, the nostrils), son of Nadab (B. C. 1400), and descended from Jerahmeel, the founder of an important family of the tribe of Judah (1 Chron. ii:30, 31).

APPAREL (ăp-păr'ěl), (generally Heb. בְּגָדִים, *behg'ed*, dress, or some form of Chald. לְבוּשׁ, *leb-oosh'*, clothing). See DRESS.

APPARENTLY (ăp-păr'ent-lŷ). "With him will I speak mouth to mouth even *apparently* and not in dark speeches" (Num. xii:8). The word *apparently* means *manifestly, openly, clearly*, and not according to modern usage, *seemingly*.

APPEAL (ăp-pēl'). The right of appeal to superior tribunals has generally been considered an essential concomitant of inferior judicatories. When, from the paucity of the population or any other cause, the subjects of litigation are few, justice is usually administered by the first authority in the state, from whose award no appeal can lie. But when the multiplication of causes precludes the continuance of this practice, and one or more inferior courts take cognizance of the less important matters, the right of appeal to the superior tribunal is allowed, with increasing restrictions, as, in the course of time, subjects of litigation multiply, and as the people become weaned from the notion that the administration of justice is the proper function of the chief civil magistrate.

(1) **In Patriarchal Times.** In the patriarchal times, as among the Bedouins, the patriarch or head of the tribes, that is to say, the Sheikh, administered justice; and, as there was no superior power, there could be no appeal from his decisions. The only case of procedure against a criminal which occurs during the patriarchal period is that in which Judah commanded the supposed adulterous Tamar to be brought forth and burnt (Gen. xxxviii:24). But here the woman was his daughter-in-law and the power which Judah exercised was that which a man possessed over the females of his own immediate family. If the case had been between man and man, Judah could have given no decision, and the matter would, without doubt, have been referred to Jacob.

(2) **In the Desert.** In the desert Moses at first judged all causes himself; and when, finding his time and strength unequal to this duty, he, at the suggestion of Jethro, established a series of

judicatories in a numerically ascending scale (Exod. xviii:13-26), he arranged that cases of difficulty should be referred from the inferior to the superior tribunals, and in the last instance to himself. Although not distinctly stated, it appears from various circumstances that the clients had a right of appeal, similar to that which the courts had of reference. When the prospective distribution into towns, of the population which had hitherto remained in one compact body, made other arrangements necessary, it was directed that there should be a similar reference of difficult cases to the metropolitan court or chief magistrate for the time being (Deut. xvi:18; xvii:8-12). That there was a concurrent right of appeal appears from the use Absalom made of the delay of justice which arose from the great number of cases that came before the king, his father (2 Sam. xv:2-4).

(3) **Time of the Judges.** The appeal lay in the time of the Judges to the judge (Judg. iv:5), and under the monarchy to the king, who appears to have deputed certain persons to inquire into the facts of the case, and record his decision thereon (2 Sam. xv:3). Jehoshaphat delegated his judicial authority to a court permanently established for the purpose (2 Chron. xix:8). These courts were re-established by Ezra (Ezra vii:25). After the institution of the Sanhedrim the final appeal lay to them.

(4) **In the New Testament.** The most remarkable case of appeal in the New Testament belongs to another class. It is the celebrated appeal of St. Paul from the tribunal of the Roman procurator Festus to that of the emperor; in consequence of which he was sent as a prisoner to Rome (Acts xxv:10, 11, 25). Such an appeal having been once lodged, the governor had nothing more to do with the case; he could not even dismiss it, although he might be satisfied that the matter was frivolous, and not worth forwarding to Rome. Accordingly, when Paul was again heard by Festus and king Agrippa (merely to obtain materials for a report to the emperor), it was admitted that the apostle might have been liberated if he had not appealed to Cæsar (Acts xxvi:32). Paul might therefore seem to have taken a false step in the matter, did we not consider the important consequences which resulted from his visit to Rome.

It may easily be seen that a right of appeal which, like this, involved a long and expensive journey, was by no means frequently resorted to. In lodging his appeal Paul exercised one of the high privileges of Roman citizenship which belonged to him by birth (Acts xxii:28). The right of appeal connected with that privilege originated in the Valerian, Porcian, and Sempronian laws, by which it was enacted that if any magistrate should order flagellation or death to be inflicted upon a Roman citizen, the accused person might appeal to *the judgment of the people*, and that meanwhile he should suffer nothing at the hands of the magistrate until the people had judged his cause. But what was originally the prerogative of the people had in Paul's time become that of the emperor, and appeal therefore was made to *him*. Hence Pliny (*Ep.* x:97) mentions that he had sent to Rome some Christians, who were Roman citizens, and had appealed unto Cæsar. This privilege could not be disallowed by any magistrate to any person whom the law entitled to it.

APPEARING (ăp-pēr'îng), of our Lord (1 Tim. vi:14; 2 Tim. i:10; iv:1, 8, etc.). See MILLENIUM.

APPHIA (ăf'fī-à), (Gr. Ἀπφία, *ap-fee'a*), the name of a woman (Philemon ii), addressed jointly with Archippus and Philemon and probably the wife of the latter (A. D. 64), with whom, according to tradition, she suffered martyrdom.

APPII-FORUM (ăp'pī-i-fō'rum), (Gr. Ἀππιου φόρον, *ap-pee'oo foh'ron*), a market town in Italy, 43 miles from Rome (*Itiner. Anton.*, p. 107), on the great road (*via Appia*) from Rome to Brundisium, constructed by Appius Claudius.

The remains of an ancient town, supposed to be Appii-Forum, are still preserved at a place called Casarillo di Santa Maria, on the border of the Pontine marshes. Its vicinity to the marshes accounts for the badness of the water, as mentioned by Horace (*Sat.* i:5, 7). When St. Paul was taken to Italy, some of the Christians of Rome, being apprised of his approach, journeyed to meet him *as far as Appii-Forum and the Three Taverns* (Acts xxviii:15). The Three Taverns were eight or ten miles nearer to Rome than Appii-Forum. The probability is that some of the Christians remained at the Three Taverns, where it was known the advancing party would rest, while some others went on as far as Appii-Forum to meet Paul on the road. It must be understood that *Tres Tabernæ* was, in fact, the name of a town; for in the time of Constantine, Felix, bishop of *Tres Tabernæ*, was one of the nineteen bishops who were appointed to decide the controversy between Donatus and Cæcilianus.

APPLE, APPLE-TREE (ăp'p'l trē). See **TAPPUACH**. (Cant. ii:3-5; vii:8; viii:5; Joel i:12). Spoken of in the Scriptures as excellent "among the trees of the wood," of pleasant shadow, with sweet, beautiful and fragrant fruit. The Hebrew word, by its meaning, is thought to emphasize the latter property.

The apple proper is rare in Syria, and its fruit is inferior. Writers have urged the citron, orange, quince, and apricot as the trees meant. The fruit of the latter two alone is specially aromatic, and of these the quince is not sweet in taste.

The apricot is everywhere abundant in the Holy Land, and of it Tristram says: "Many times have we pitched our tents in its shade and spread our carpets secure from the rays of the sun." "There can scarcely be a more deliciously-perfumed fruit than the apricot; and what fruit can better fit the epithet of Solomon, 'apples of gold in pictures of silver,' than this golden fruit as its branches bend under the weight in their setting of bright, yet pale, foliage?" The expression of Solomon just referred to (Prov. xxv:11) is also supposed to compare *fruit in silver baskets*, or salvers curiously wrought like basket-work, and perhaps representing animals or landscapes, to seasonable advice wisely and courteously administered (Schaff, *Bib. Dict.*).

APPLE OF THE EYE (ăp'p'l òv the ī), (Heb. יְעוֹן, *ee-shone'*, little man, or pupil of the eye. Prov. vii:2; Zech. ii:8).

Apple here represents an entirely different word from the word of the preceding topic, meaning the front and most sensitive part of the organ of vision. The same figure is used (Deut. xxxii:10; Ps. xvii:8) to denote the most complete protection and security. And in Lam. ii:18, the phrase "apple of thine eye" is figuratively used for tears.

APPLES OF SODOM (ăp'p'lz òv sòd'òm), is a phrase associated with the Dead Sea, as the name of a fruit said to have all the appearance of the most inviting apple while it was filled with nauseous and bitter dust only.

It has furnished many moralists with allusions, and also our poet Milton, in whose infernal regions—

A grove sprung up—laden with fair fruit—
—greedily they plucked

The fruitage, fair to sight, like that which grew
Near that bituminous lake, where Sodom flamed.
This, more delusive, not the touch, but taste
Deceived. They, fondly thinking to allay
Their appetite with gust, instead of fruit
Chewed bitter ashes, which the offended taste
With spattering noise rejected:—

Tacitus and Josephus both refer to it. M. Seetzen, a renowned traveler of the last century, writes as follows regarding the subject:

"The information which I have been able to collect on the apples of Sodom (*Solanum Sodomæum*) is very contradictory and insufficient; I believe, however, that I can give a very natural explanation of the phenomenon, and that the following remark will lead to it. While I was at Karrak, at the house of a Greek curate of the town, I saw a sort of cotton, resembling silk, which he used as a tinder for his match-lock, as it could not be employed in making cloth. He told me that it grew in the plains of el-Gôr, to the east of the Dead Sea, on a tree like a fig tree, called Aoéschaer. The cotton is contained in a fruit resembling the pomegranate; and by making incisions at the root of the tree, a sort of milk is procured, which is recommended to barren women, and is called Lébbin Aoéschaer. It has struck me that these fruits, being, as they are, without pulp, and which are unknown throughout the rest of Palestine, might be the famous apples of Sodom. I suppose, likewise, that the tree which produces it, is a sort of fromager (*Bombyx*, Linn.), which can only flourish under the excessive heat of the Dead Sea, and in no other district of Palestine."

This curious subject is further explained, in a note added by M. Seetzen's editor, who considers the tree to be a species of *Asclepias*, probably the *Asclepias Gigantea*. The remark of M. Seetzen is corroborated by a traveler, who passed a long time in situations where this plant is very abundant. The same idea occurred to him when he first saw it in 1792, though he did not then know that it existed near the lake Asphaltites. The umbella, somewhat like a bladder, containing from half a pint to a pint, is of the same color with the leaves, a bright green, and may be mistaken for an inviting fruit, without much stretch of imagination. That, as well as the other parts, when green, being cut or pressed, yields a milky juice, of a very acrid taste; but in winter, when dry, it contains a yellowish dust, in appearance resembling certain fungi common in South Britain, but of pungent quality, and said to be particularly injurious to the eyes. The whole so nearly corresponds with the description given by Solinus (Polyhistor), Josephus, and others, of the *Poma Sodomæ*, allowance being made for their extravagant exaggerations, as to leave little doubt on the subject.

Seetzen's account is partly confirmed by the lamented Burckhardt. He says: "The tree *Ashey* is very common in the Ghor. It bears a fruit of a reddish yellow color, about three inches in diameter, which contains a white substance, resembling the finest silk. The Arabs collect the silk, and twist it into matches for their fire-locks, preferring it to the common match because it ignites more readily. More than twenty camel loads might be produced annually." p. 392.

Chateaubriand describes it as thorny, with small taper leaves, and its fruit is exactly like the small Egyptian lemon in size and color. Before the fruit is ripe it is filled with a corrosive and saline juice; when dried, it yields a blackish seed, which may be compared to ashes, and which in taste resembles bitter pepper. Mr. King found the same shrub and fruit near Jericho, and seems also inclined to regard it as the apple of Sodom. (Miss. Herald for 1824, p. 99; Mod. Traveler, i. p. 206.)

Most probably, however, the whole story in Tacitus and Josephus is a fable, which sprung up in connection with the singular and marvelous character of this region and its history. The whole account of the Dead Sea in Tacitus is of a similar kind. Even to the present day a like fable is current among the Arabs who dwell in the vicinity. Burckhardt says: "They speak of the spurious pomegranate tree, producing a fruit precisely like that of the pomegranate, but which, on being opened, is found to contain nothing but a dusty powder. This, they pretend, is the Sodom apple tree; other persons, however, deny its existence," p. 392.

Robinson refers to the *Osher* as being in accord in its appearance with the ancient story (*Bib. Researches* ii:236, sq.; Comp. Wilson, *Bible Lands* i:8, sq.; Kitto, *Phys. His. of Palestine*, p. ccxc, sq.).

AQUILA (āk'wī-lā), (Gr. Ἀκύλας, *ak-oo'las*, an eagle), a Jew with whom Paul became acquainted on his first visit to Corinth, a native of Pontus and by occupation a tent-maker.

He and his wife Priscilla had been obliged to leave Rome in consequence of an edict issued by the Emperor Claudius, by which all Jews were banished from Rome—*Judeos, impulsore Chresto, assidue tumultuantes Roma expulit* (Sueton. *Claud.* c. 25; Neander's *History of the Planting of the Christian Church*, vol. i. p. 231; Lardner's *Testimonies of Heathen Authors*, ch. viii.). This decree was made not by the senate, but the emperor, and lasted only during his life, if even so long. Whether Aquila and Priscilla were at that time converts to the Christian faith cannot be positively determined; Luke's expression, προσῆλθεν αὐτοῖς *he came to them* (Acts xviii:2), as Kuinoel observes, rather implies that Paul sought their society on grounds of friendship, than for the purpose of persuading them to embrace Christianity. On the other hand, if we suppose that they were already Christians, Paul's joining himself to them is highly probable; while, if they were still adherents to Judaism, they would have been less disposed than even unconverted Gentiles to form an intimacy with the Apostle. At all events, they had embraced Christianity before Paul left Corinth; for we are informed that they accompanied him to Ephesus, and meeting there with Apollos, who 'knew only the baptism of John,' they 'instructed him in the way of God more perfectly' (Acts xviii:25, 26). From that time they appear to have been zealous promoters of the Christian cause. Paul styles them his 'helpers in Christ Jesus,' and intimates that they had exposed themselves to imminent danger on his account (Rom. xvi:3, 4), though of the time and place of this transaction we have no information. When Paul wrote his epistle to the Romans they were at Rome; but some years after they returned to Ephesus, for Paul sends salutations to them in his Second Epistle to Timothy (2 Tim. iv:19; Lardner's *Credibility*, part ii. ch. 11). Their occupation as tent-makers probably rendered it necessary for them to keep a number of workmen

constantly resident in their family, and to these (to such of them at least as had embraced the Christian faith) may refer the remarkable expression, 'the Church that is in their house,' τὴν κατ' οἶκον αὐτῶν ἐκκλησίαν.

The Greeks call Aquila bishop and apostle, and honor him on July 12. The festival of Aquila and Priscilla is placed in the Roman Calendar, where he is denoted Bishop of Heraclea, on July 8, (Calmet).

AR (ār), (Heb. אַר, *awr*, a city), the capital city of the Moabites (Num. xxi:28; Deut. ii:9, 18, 29), near the river Arnon (Num. xxi:13-15).

It appears to have been burnt by King Sihon (Num. xxi:28), and Isaiah, in describing the future calamities of the Moabites, says, 'In the night Ar of Moab is laid waste and brought to silence' (Is. xv:1). In his comment on this passage, Jerome states that in his youth there was a great earthquake, by which Ar was destroyed in the night time. This he evidently regards as a fulfilment of the prediction. The Greek name became Areopolis. The city was also called Ariel of Moab, Rabbah or Rabbath, and, to distinguish it from Rabbath of Ammon, Rabbath-Moab. Ptolemy calls it Rabmathon; Steph. Byzantinus, Rabbathmoma; and Abulfeda (*Tab. Syr.*, p. 90), Rabbath, and also Mab. The site still bears the name of Rabbah. Is. xvi:7, 11 calls it "the city with walls of burnt brick;" in Hebrew *Kirharscheth*, or *Kirjathharses*.

The spot has been visited and described by Seetzen, Burckhardt, Legh, Macmichael, and Irby and Mangles. It is about 17 miles east of the Dead Sea, 10 miles south of the Arnon (Modjeb), and about the same distance north of Kerek. The ruins of Rabbah are situated on a low hill, which commands the whole plain. They present nothing of interest except two old Roman temples and some tanks. Irby and Mangles (*Letters*, p. 457) remark, with surprise, that the whole circuit of the town does not seem to have exceeded a mile; but it is obvious from the descriptions that the city whose ruins they saw was a comparatively modern town, less important and extensive than the ancient metropolis of Moab.

ARA (ā'rā), (Heb. אַרְא, *ar-aw'*, lion), one of the sons of Jether (1 Chron. vii:38), B. C. before 1017.

ARAB (ā'rab), (Heb. אַרְבַּ, *ar-awb'*, ambush, a court), a city in the mountains of Judah near Hebron (Josh. xv:48-52).

ARABAH (ār'a-bah), (Heb. אַרְבַּע, *ar-aw-baw'*, the plain), a Hebrew word signifying in general a *desert plain* or *steppe*.

In the Authorized Version it is translated 'the plain,' but in the original it appears to be supplied with the article on purpose, as the proper name (*ha Arabah, the Arabah*) of the great plain or valley in its whole extent, which is partly occupied by the Jordan and its lakes, and is prolonged from the Dead Sea to the Elanitic Gulf.

(1) **Descriptive.** Arabah is now applied only to that portion of the valley which stretches from the chalk-cliffs below the Dead Sea southward to the Gulf of Akabah—Elanitic Gulf. It is about 100 miles long and from 4 to 16 miles wide. The limestone walls on the west of the valley are from 1,500 to 1,800 feet in height; the mountain wall on the east side of the valley rises from 2,000 to 2,300 in height, and in Mount Hor to 5,000 feet, and is chiefly composed of granitic and basaltic rock. The surface of the valley is covered with

loose gravel, blocks of porphyry, and is furrowed with torrents, with scarcely a trace of vegetation. It is oppressively hot, is swept with burning winds, the Sirocco blowing at some seasons without intermission, a region dreary and desolate. The theory that the Jordan once ran through this valley into the Red Sea is now held to be untenable. Arabah in Josh. xviii:18 has also been mistaken for the name of a city, and confounded with Beth-arabah of Josh. xv:61; xviii:22; but in xviii:18 the word has the article before it in the Hebrew, and hence refers to the plain, as elsewhere.

(2) **Historical.** The Wady el Arabah appears to have been twice traversed by the Israelites; first on their way from Horeb to Kadesh Barnea, and afterwards when obliged to retrace their steps owing to the refusal of the king of Edom to allow them to pass through his land (Num. xx:21; Deut. ii:8).

No passage for the host by which to circumvent Mount Seir was practicable till they reached the stony gorge of the Wady el Ithem, which enters the Arabah four miles north of Akabah. Traversing this rough and glistening ravine under the rays of an almost vertical sun, it is not surprising that, as we read, the soul of the people was much discouraged because of the way' (Num. xxi:4). In later times the Arabah became a caravan route from Arabia to Palestine and Syria. The fort and harbor of Akabah (Ezion-geber) now constitute an outpost for the Egyptian government, beyond which its authority does not extend; the Arabah, as well as the Arabian desert, being held by independent Arab chiefs. (See ARABIA; JORDAN, RIVER OF).

ARABIA (a-rā'bi-à), (Heb. אֲרָבָה, *ar-awb'*, wilderness), an extensive region occupying the southwestern extremity of Asia, between 12° 45' and 34½° N. lat. and 32½° and 60° E. long. from Greenwich; having on the W. the Isthmus of Suez and the Red Sea (called from it the *Arabian Gulf*), which separate it from Africa; on the S. the Indian Ocean, and on the E. the Persian Gulf and the Euphrates.

1. Description and Designation. The boundary to the north has never been well defined, for in that direction it spreads out into interminable deserts, which meet those of Palestine and Syria on the west, and those of *Irak-Arabi* (*i. e.*, *Babylonia*) and Mesopotamia on the east; and hence some geographers include that entire wilderness in Arabia. The form of the peninsula is that of a trapezoid, whose superficial area is estimated at four times the extent of France.

With the history of no country save that of Palestine are there connected so many hallowed and impressive associations as with that of Arabia. Here lived and suffered the holy patriarch Job; here Moses, when 'a stranger and a shepherd,' saw the burning, unconsuming bush; here Elijah found shelter from the rage of persecution; here was the scene of all the marvelous displays of divine power and mercy that followed the deliverance of Israel from the Egyptian yoke, and accompanied their journeyings to the Promised Land; and here Jehovah manifested himself in visible glory to his people. From the influence of these associations, combined with its proximity to Palestine, and the close affinity in blood, manners, and customs between the northern portion of its inhabitants and the Jews, Arabia is a region of peculiar interest to the student of the Bible; and it is chiefly in its relation to subjects of Bible study that we are now to consider it. The sacred historian of the children of Israel will never be thoroughly understood so long as we are not

minutely acquainted with everything relating to the Arab Bedouins and the countries in which they move and pasture.

(1) **Early and Vague Names.** In early times the Hebrews included a part of what we call Arabia among the countries they vaguely designated as *Kedem, the East*, the inhabitants being numbered among the *Beni-Kedem, Sons of the East*. But there is no evidence to show (as is asserted by Winer, Rosenmüller, and other Bible-geographers) that these phrases are ever applied to the *whole* of the country known to us as Arabia. They appear to have been commonly used in speaking of those parts which lay due east of Palestine, or on the northeast and southeast; though occasionally they do seem to point to tracts which lay indeed to the south and southwest of that country, but to the east and southeast of Egypt. Hence Joseph Mede (who is followed by Bellermann, *Handbuch d. Bib. Literat.* th. iii. p. 220) is of opinion that the phraseology took its rise at the period when the Israelites were in Egypt, and was retained by them as a mode of speech after they were settled in Canaan. That conjecture would, doubtless, considerably extend the meaning of the term; yet even then it could scarcely embrace the extreme south of Arabia, a queen of which (on the supposition of Yemen being identical with Sheba) is, in the New Testament, styled not 'a queen of the East,' but *a queen of the South*. Accordingly, we find that whenever the expression *Kedem* has obviously a reference to Arabia, it invariably points to its northern division only. Thus in Gen. xxv:6, Abraham is said to have sent away the sons of Hagar and Keturah to the *Eretz-Kedem—Kedemah, i. e.*, the East country eastward; and none of them, so far as we know, were located in peninsular Arabia; for the story which represents Ishmael as settling at Mecca is an unsupported native tradition. The patriarch Job is described (Job i:3) as 'the greatest of all the men of the east,' and though opinions differ as to the precise locality of the land of Uz, all are agreed that it was in some part of Arabia, but certainly not in Arabia Felix. In the Book of Judges (vi:3; vii:12; viii:10) among the allies of the Midianites and Amalekites (tribes of the north) are mentioned the '*Beni-Kedem*,' which Josephus translated by '*Αραβας*, the Arabs. In Is. xi:14, the parallelism requires that by 'sons of the east' we understand the *Nomades* of Desert Arabia, as corresponding to the Philistines 'on the west;' and with these are conjoined the Edomites, Moabites, and Ammonites, who were all northern Arabians. The command was given (Jer. xlix:28) to the Babylonians 'to smite the Beni-Kedem,' who are there classed with the Kedarenes, descendants of Ishmael (comp. 1 Kings iv:30). In more modern times a name of similar import was applied to the Arabs generally; they were called *Saracens* (Sharakiyun, *i. e.*, *Orientalis*) from the word *shark*, 'the east,' whence also is derived the term *sirocco*, the east wind.

It is to be remarked here that though in Scripture *Kedem* most commonly denotes Northern Arabia, it is also used of countries farther east, *e. g.* of the native country of Abraham (Is. xli:2; comp. Gen. xxix:1), of Balaam (Num. xxiii:7), and even of Cyrus (Is. xlvi:11); and, therefore, though the Magi who came to Jerusalem (Matt. ii:1) were *from the east*, it does not thence follow that they were natives of Arabia.

(2) **Ancient Name.** We find the name *Arab* first beginning to occur about the time of Solomon. It designated a portion of the country, an

inhabitant being called Arabi, an Arabian (Is. xiii:20), or in later Hebrew, Arbi (Neh. ii:19), the plural of which was Arbim (2 Chron. xxi:16), or Arbiim (*Arabians*) (2 Chron. xvii:11). In some places these names seem to be given to the Nomadic tribes generally (Is. xiii:20; Jer. iii:2) and their country (Is. xxi:13). The kings of Arabia from whom Solomon (2 Chron. ix:14) and Jehoshaphat (2 Chron. xvii:11) received gifts were, probably, Bedouin chiefs; though in the place parallel to the former text (1 Kings x:15), instead of *Arab* we find *Ereb*, rendered in Jer. xxv:20, 24, 'mingled people,' but which Gesenius, following the Chaldec, understands to mean 'foreign allies.' In all the passages where the word *Arab* occurs it designates only a small portion of the territory known to us as Arabia. Thus, in the account given by Ezckiel (xxvii:21) of the Arabian tribes that traded with Tyre, mention is specially made of *Arab* (comp. Jer. xxv:24). In 2 Chron. xxi:16; xxii:1; xxvi:7; Neh. iv:7, we find the Arabians classed with the Philistines, the Ethiopians (*i. e.*, the Asiatic Cushites, of whom they are said to have been neighbors), the Melunims, the Ammonites, and Ashdodites. At what period this name *Arab* was extended to the whole region it is impossible to ascertain. From it the Greeks formed the word *'Αραβία*, which occurs twice in the New Testament; in Gal. i:17, in reference, probably, to the tract adjacent to Damascus Syria, and in Gal. iv:25, in reference to the

it included the plains (Arboth) of Jericho and Moab (Josh. v:10; Deut. xxxiv:1, 8). In the list of the cities of Judah contained in the book of Joshua we find (xv:61), 'in the wilderness, Beth-Arabah,' in the Hebrew *Beth-Ha-Arabah*, *the house of the plain*. It had been mentioned in v. 6, as on the northern borders; and hence, in xviii:22, it appears also as a city of Benjamin, one of whose boundaries, it is said in v. 18, 'passed over against [the] Arabah northward, and went down into [the] Arabah.' Now it is a remarkable circumstance that the southern part of this great valley is still known by the name of *Wady-el-Arabah*, and there is no improbability in the conjecture that this designation, which was applied at so early a period as the days of Moses to one particular district, was gradually extended to the entire region. No designation, indeed, could be more comprehensive or correct; for, looking to Arabia as a whole, it may fitly be described as one vast desert of arid and barren plains, intersected by chains of rocky mountains, where the *oases*, or spots of living green (probably a corruption of the Arabic word *wady*, a valley or watercourse), exist but in a very small proportion to the sterility and desolation which reign around.

(3) **Modern Name.** The modern name, *Jeshiat-el-Arab*, *the peninsula of the Arabs*, applies to the southern part of the region only. Another native appellation is *Beled-el-Arab*, *the land of the Arabs*. The Persians and Turks call it *Arabistan*. Mr. Lane informs us that in Egypt the term *Arab* is now generally limited to the Bedawces, or people of the desert; but formerly it was used to designate the townspeople and villagers of Arabian origin, while those of the desert were called *Aarab* or *Aarabees*; the former now call themselves *Ow-lad-el-Arab*, or sons of the Arabs.

2. **Two Classes of Inhabitants.** The inhabitants of Arabia have, from remote antiquity, been divided into two great classes, viz., the *townsmen* (including villagers), and the *men of the desert*, such being, as we remarked, the meaning of the word '*Bedawees*' or Bedouins, the designation given to the 'dwellers in the wilderness.' From the nature of their country, the latter are necessitated to lead the life of *nomades*, or wandering shepherds, and since the days of the patriarchs (who were themselves of that occupation) the extensive *steppes*, which form so large a portion of Arabia, have been traversed by a pastoral but warlike people, who, in their mode of life, their food, their dress, their dwellings, their manners, customs and government have always continued, and still continue, almost unalterably the same.

They consist of a great many separate tribes, who are collected into different encampments dispersed through the territory which they claim as their own, and they move from one spot to another (commonly in the neighborhood of pools or wells) as soon as the stinted pasture is exhausted by their cattle.

It is only here and there that the ground is susceptible of cultivation, and the tillage of it is commonly left to peasants, who are often the vassals of the Bedawces, and whom (as well as all 'townsmen') they regard with contempt as an inferior race. Having constantly to shift their residence, they live in movable tents (Comp. Is. xiii:20; Jer. xlix:29), from which circumstance they received from the Greeks the name of *Σκηπῦται*, *dwellers in tents* (Strabo, xvi. p. 747; Diod. Sic. p. 254; Ammian. Marcell. xxiii:6).

As the independent lords of their own deserts the Bedawees have from time immemorial de-

Arabians, Showing Dress.

peninsula of Mount Sinai. Among the strangers assembled at Jerusalem at the Pentecost there were *Arabs* (Acts ii:11), the singular being *Arab*.

As to the etymology of the name *Arab*, various opinions have been expressed.

The most obvious etymology of the name is from *Arabah*, a *steppe*, a *desert*, *plain* or *wilderness*. That was, in point of fact, the name given by the ancient Hebrews to the tract of country extending northward from Elath, on the Arabian Gulf to the Dead Sea (Deut. i:1; ii:8), and even as far as the Lake of Tiberias (Josh. xii:3). It was called *Ha-Arabah*, commonly rendered in our version by 'the plain' (hence the Dead Sea was styled the 'sea of the Arabah,' Josh. iii:16); and

manded tribute or presents from all travelers or caravans (Is. xxi:13) passing through their country; the transition from which to robbery is so natural that they attach to the latter no disgrace, plundering without mercy all who are unable to resist them or who have not secured the protection of their tribe. Their watching for travelers in the frequented routes through the desert is alluded to in Jer. iii:2; Ezra viii:31, and the fleetness of their horses in carrying them into the depths of the wilderness, beyond the reach of their pursuers, seems what is referred to in Is. lxiii:13, 14.

Their warlike incursions into more settled districts are often noticed (*e. g.*, Job i:15; 2 Chron. xxi:16; xxvi:7). The acuteness of their bodily senses is very remarkable, and is exemplified in their astonishing sagacity in tracing and distinguishing the footsteps of men and cattle, a faculty which is known by the name of *athr*. The law of *thar*, or blood revenge, sows the seeds of perpetual feuds, and what was predicted (Gen. xvi:12) of the posterity of Ishmael, *the wild-ass man*, holds true of the whole people.

3. Commerce. The principal source of the wealth of ancient Arabia was its *commerce*. So early as the days of Jacob (Gen. xxxvii:28) we read of a mixed caravan of Arab merchants, Ishmaelites and Midianites, who were engaged in the conveyance of various foreign articles to Egypt, and made no scruple to add Joseph to their other purchases. The Arabs were, doubtless, the first navigators of their own seas, and the great carriers of the produce of India, Abyssinia and other remote countries to Western Asia and Egypt. Various Indian productions thus obtained were common among the Hebrews at an early period of their history (Exod. xxx:23, 25). The traffic of the Red Sea was to Solomon a source of great profit, and the extensive commerce of *Sabaa* (Sheba, now Yemen), is mentioned by profane writers as well as alluded to in Scripture (1 Kings v:10-15). In the description of the foreign trade of Tyre (Ezek. xxvii:19-24) various Arab tribes are introduced (Comp. Is. ix:6; Jer. vi:20; 2 Chron. ix:14). The Nabathæo-Idumæans became a great trading people, their capital being Petra. The transit trade from India continued to enrich Arabia until the discovery of the passage to India by the Cape of Good Hope, but the Suez Canal has now restored the ancient route for travelers by the Red Sea.

The settlers in Arabia are by native writers divided into two classes—the old tribes, who belonged to the fabulous period of history, and are long since extinct, and the present inhabitants. The latter are classed either among the 'pure or genuine,' or the *Mostarabi*, the mixed or naturalized Arabs. A 'pure' Arab boasts of being descended from Kachtan (the Joktan of Scripture, Gen. x:29), and calls himself *al Arab al Araba*, 'an Arab of the Arabs,' a phrase of similar emphasis with St. Paul's 'Hebrew of the Hebrews' (Phil. iii:5). The mixed Arabs are supposed to be descended from Ishmael by a daughter of Modad, king of Hedjaz, the district where the Ishmaelites chiefly settled. The Kachtanites, on the other hand, occupied the southern part of the peninsula, for Kachtan's great-grandson Saba gave name to a kingdom, one of whose queens (called by the Arabians Balkis) visited Solomon (1 Kings x:1). A son of Saba was Himyar, who gave name to the famous dynasty of the *Himyarites* (improperly written Homerites), that seem to have reigned for many centuries over Sabæa and part of Hhadramaut.

4. Soil. The soil of the Sinaitic peninsula is in general very unproductive, yielding only palm-trees, acacias, tamarisks from which exudes the gum called *manna*, colocintida, and dwarfish, thorny shrubs. Among the animals may be mentioned the mountain goat, the *beden* of the Arabs, gazelles, leopards, a kind of marmot called *wober*, the *sheeb*, supposed by Colonel Hamilton Smith to be a species of wild wolf-dog, etc.; of birds there are eagles, partridges, pigeons, the *katta*, a species of quail, etc. There are serpents, as in ancient times (Num. xxi:4, 6); and travelers speak of a large lizard called *dhob*, common in the desert, but of unusually frequent occurrence here. The peninsula is inhabited by Bedouin Arabs, and its entire population was estimated by Burckhardt at not more than 4,000 souls.

This part of Arabia must ever be memorable as the scene of the journeying of the Israelites from Egypt to the Promised Land. According to Niebuhr, Robinson, etc., they crossed the Red Sea near Suez (see also Von Ritter, Sir J. W. Dawson and others), but the tradition of the country fixes the point of transit eight or ten miles south of Suez, opposite the place called Ayoun Mousa, *i. e.*, the Fountains of Moses, where Robinson recently found seven wells, some of which, however, were mere excavations in the sand. About 15½ hours (33 geographical miles) southeast of that is the Well of Hawārah, the *Marah* of Scripture, whose bitter water is pronounced by the Arabs to be the worst in these regions. Two or three hours south of Hawārah the traveler comes to the Wady Ghūründel, supposed to be the *Elim* of Moses. From the plain of El-Kaa, which Robinson takes to be the desert of Sin, not to be confounded with that of *Zin*, which belonged to the great desert of Kadesh, they would enter the Sinaitic range probably along the upper part of Wady Feiran and through the Wady-esh-Sheikh, one of the principal valleys of the peninsula. The Arabs call this whole cluster of mountains *Jebel-et-Tur*; the Christians generally designate it as '*Sinai*,' and give the name of *Horeb* to a particular mountain, whereas in Scripture the names are used interchangeably.

5. Productions. The principal animals are the horse, famed for its form, beauty and endurance, camels, sheep, asses, dogs, the gazelle, tiger, lynx and monkey, quails, peacocks, parrots, ostriches, vipers, scorpions and locusts. Of fruits and grains, dates, wheat, millet, rice, beans and pulse are common. It is also rich in minerals, especially in lead.

6. Zoölogy. In the *animal* kingdom Arabia possesses, in common with the adjacent regions, the camel, panthers, lynxes, hyænas, jackals, gazelles, asses, wild and tame, monkeys, etc. But the glory of Arabia is its *horse*. As in no other country is that animal so much esteemed, so in no other are its noble qualities of swiftness, endurance, temper, attachment to man, so finely developed. Of the insect tribes, the locust, both from its numbers and its destructiveness, is the most formidable scourge to vegetation. The Arabian seas swarm with fish, sea-fowl, and shells; coral abounds in the Red Sea, and pearls in the Persian Gulf.

7. Divisions. The early Greek geographers, such as Eratosthenes and Strabo, mention only two divisions of this vast region, *Happy* and *Desert* Arabia. But after the city of Petra, in Idumæa, had become celebrated as the metropolis of a commercial people, the Nabathæans, it gave name to a third division, *viz.*, Arabia *Petraea*, not *Stony*, but *Petræan* Arabia; and this threefold

division, which first occurs in the geographer Ptolemy, who flourished in the second century, has obtained throughout Europe ever since.

I. Arabia Felix, Arabia Eudæmon, or Pliny's *Happy Arabia*. The name has commonly been supposed to owe its origin to the variety and richness of the natural productions of this portion of the country, compared with those of the other two divisions. Some, however, regard the epithet 'happy' as a translation of its Arabic name *Yemen*, which, though primarily denoting the land of the *right hand*, or *south*, also bears the secondary sense of *happy, prosperous*. This part of Arabia lies between the Red Sea on the west and the Persian Gulf on the east, the boundary to the north being an imaginary line drawn between their respective northern extremities, Akaba and Basra or Bussora. It thus embraces by far the greater portion of the country known to us as Arabia.

Arabia may be described generally as an elevated table-land, the mountain ranges of which are by some regarded as a continuation of those of Syria, but Ritter (*Erdkunde*, th. i. p. 172) views them as forming a distinct and independent *plateau*, peculiar to the country. In Arabia Felix the ridges, which are very high in the interior, slope gently on the east toward the Persian Gulf, and on the northeast toward the vast plains of the desert. On the west the declivities are steeper, and on the northwest the chains are connected with those of Arabia Petræa.

(a) **Hedjaz.** Commencing our survey at the north end of the Red Sea, the first province which lies along its shores is the *Hedjaz*, which Niebuhr and others reckon as belonging to Arabia Petræa, but which the editor of Burckhardt's *Travels in Arabia* has shown to belong properly to Arabia Felix. This was the cradle of Mohammedan superstition, containing both Mecca, where the prophet was born, and Medina, where he was buried; and hence it became the Holy Land of the Moslem, whither they resort in pilgrimage from all parts of the East. It is on the whole a barren tract, consisting chiefly of rugged mountains and sandy plains. Still more unproductive, however, is the long, flat, dreary belt, of varying width, called *Tehama*, which runs along the coast to the south of Hedjaz, and was at no distant period covered by the sea.

(b) **Yemen.** But next to this comes *Yemen* (the name of a particular province, as well as of the whole country), the true Arabia Felix of the ancients, 'Araby the Blest' of modern poets, and doubtless the finest portion of the peninsula. Yet if it be distinguished for fertility and beauty, it is chiefly in the way of contrast, for it is far from coming up to the expectations which travelers had formed of it. Here is Sanaa (supposed to be the *Usal* of Scripture), the seat of an imam; Mareb, which some identify with Sheba; Mocha, the chief mart for coffee; and Aden, a place rapidly increasing in importance since taken possession of by England.

(c) **Hhadramaut.** Turning from the west to the south coast of the peninsula, we next come to the extensive province of *Hhadramaut* (the *Hazarmaveth* of the Bible), a region not unlike Yemen in its general features, with the exception of the tracts called *Mahrah* and *Sahar*, which are dreary deserts. The southeast corner of the peninsula, between Hhadramaut and the Persian Gulf, is occupied by the important district of *Oman*, which has been in all ages famous for its trade,

(d) **El Hassa.** Along the Persian Gulf northward stretches the province of *Lahsa*, or rather *El Hassa*, to which belong the Bahrein Islands, famous for their pearls. The districts we have enumerated all lie along the coast, but beyond them to the south stretches the vast desert of Akhaf, or Roba-el-Khali, *the empty abode*, a desolate and dreary unexplored waste of sand.

(e) **Nedsched.** To the north of this extends the great central province of *Nedsched*, or *Nejd*. Ritter regards it as forming nearly a half of the entire peninsula. It may be described as having been the great *officina gentium* of the south, as were Scandinavia and Tartary of the north; for it is the region whence there issued at different periods those countless hordes of Arabs which overran a great part of Asia and Africa. Here too, was the origin and the seat of the Wahabees, so formidable until subdued in 1818 by Mehemet Ali, pasha of Egypt.

(f) **Geology and Mineralogy.** The *geological* structure and *mineralogical* productions of this part of Arabia are in a great measure unknown. In the mountains about Mecca and Medina the predominant rocks are of grey and red granite, porphyry, and limestone. This is also the case in the great chain that runs southward toward Maskat; only that in the ridge that rises behind the Tehama there is found schistus and basalt instead of granite. Traces of volcanic action may be perceived around Medina, as also at Aden, and in many other parts of the peninsula. Hot-springs are of frequent occurrence on the Hadjee or pilgrim road to Mecca. The ancients believed that Arabia yielded both gold and precious stones, but Niebuhr doubts if this ever was the case. The most valuable ore found now is the lead of Oman; what is called the Mocha stone is a species of agate that comes from India. The native iron is coarse and brittle; at Loheia and elsewhere there are hills of fossil salt.

(g) **Botany.** The *botany* of Yemen was investigated by Forskäl, one of the fellow-travelers of Niebuhr. Arabia Felix has always been famous for frankincense, myrrh, aloes, balsam, gums, cassia, etc.; but it is doubtful whether the last-mentioned and other articles supposed to be indigenous were not imported from India. Here are found all the fruits of temperate and warm climates, among which the *date*, the fruit of the palm-tree, is the most common, and is, along with the species of grain called *dhourra*, the staple article of food. But the most valuable vegetable production is coffee (Arab. *kahveh*, an old term for wine, the fruit being called *bunn*); for Yemen, if not its native country, is the *habitat* where it has reached the greatest state of perfection. Cultivation here is not confined to the plains, but is carried up the sides of the mountains, which are laid out in terraces and supplied with water by means of artificial reservoirs.

II. Arabia Deserta, called by the Greeks *tented Arabia*, and by the Arabs *El-Badiah*, *the Desert*. This takes in that portion of the country which lies north of Arabia Felix, and is bounded on the northeast by the Euphrates, on the northwest by Syria, and on the west by Palestine and Arabia Petræa. The Arabs divide this great wilderness into three parts, so called from their proximity to the respective countries, viz., *Badiah esh Sham* (Syria), *Badiah el Jeshirah* (the peninsula, *i. e.*, Arabia), and *Badiah el Irak* (Babylonia). From this word *Badiah* comes the name of the nomadic tribes by whom it is traversed, viz., *Bedawees*, better known to us by the French corruption of *Bedouins*, who are not, however,

confined to this portion of Arabia, but range throughout the entire region.

(a) **Physical Features.** So far as it has been explored, Desert Arabia appears to be one continuous, elevated, interminable *steppe*, occasionally intersected by ranges of hills. Sand and salt are the chief elements of the soil, which in many places is entirely bare, but elsewhere yields stunted and thorny shrubs or thinly-scattered saline plants. That part of the wilderness called *El Hammad* lies on the Syrian frontier, extending from the Hauran to the Euphrates, and is one immense dead and dreary level, very scantily supplied with water, except near the banks of the river, where the fields are irrigated by wheels and other artificial contrivances.

(b) **Climate.** The sky in these deserts is generally cloudless, but the burning heat of the sun is moderated by cooling winds, which, however, raise fearful tempests of sand and dust. Here, too, as in other regions of the East, occasionally prevails the burning, suffocating southeast wind, called by the Arabs *El Hharur* (*the Hot*), but more commonly *Samum*, and by the Turks *Sam-yeli*, *the Poisonous*, the effects of which, however, have by some travelers been greatly exaggerated. This is probably the 'east wind' and the 'wind from the desert' spoken of in Scripture. Another phenomenon, which is not peculiar, indeed, to Desert Arabia, but is seen there in greatest frequency and perfection, is what the French call the *mirage*, the delusive appearance of an expanse of water, created by the tremulous, undulatory movement of the vapors raised by the excessive heat of a meridian sun. It is called in Arabic *serab*, and is no doubt the Hebrew *sarab* of Is. xxxv:7, which our translators have rendered 'the parched ground.'

III. **Arabia Petraea** appears to have derived its name from its chief town *Petra*, a rock, in Heb. *Selah*; although the epithet is also appropriate on account of the rocky mountains and stony plains which compose its surface. It embraces all the northwestern portion of the country; being bounded on the east by Desert and Happy Arabia, on the north by Palestine and the Mediterranean, on the west by Egypt, and on the south by the Red Sea. This division of Arabia has been of late years visited by a great many travelers from Europe, and is consequently much better known than the other portions of the country.

(a) **General Description.** Confining ourselves at present to a general outline, we refer for details to the articles SINAI, EXODUS, EDM, MOABITES. Beginning at the northern frontier one meets the elevated plain of Belka, to the east of the Dead Sea, the district of Kerak (Kir), the ancient territory of the Moabites, their kinsmen of Ammon having settled to the north of this, in Arabia Deserta. The north border of Moab was the brook Arnon, now the Wady-el-Môjib; to the south of Moab, separated from it by the Wady-el-Ahsy, lay Mount Seir, the dominion of the Edomites, or *Idumæa*, reaching as far as to Elath on the Red Sea. The great valley which runs from the Dead Sea to that point consists, first, of El-Ghor, which is comparatively low, but gradually rises by a succession of limestone cliffs into the more elevated plain of *El-Arabah*, formerly mentioned.

It was once believed that through this great valley the Jordan anciently flowed, before the catastrophe of the cities of 'the plain (Arabah)'; but from the depressed level of the Dead Sea found by Lieut. Symonds to be no less than 1337

feet below that of the Mediterranean, and from the great elevation of the Arabah, the long descent northward, and the run of the watercourses in the same direction, the hypothesis is found to be no longer tenable.

(b) **Mountains of Edom.** The structure of the mountains of Edom on the east of the Arabah is thus described by Robinson (vol. ii, p. 551): 'At the base low hills of limestone or argillaceous rocks; then the lofty masses of porphyry, constituting the body of the mountain; above these sandstone broken up into irregular ridges and grotesque groups of cliffs; and again, farther back and higher than all, long elevated ridges of limestone without precipices. East of all these stretches off indefinitely the high plateau of the great eastern desert. The character of these mountains is quite different from those on the west of the Arabah. The latter, which seemed to be not more than two-thirds as high, are wholly desert and sterile; while these on the east appear to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. This mountainous region is divided into two districts: that to the north is called *Jebal* (*i. e.* mountains, the Gebal of Ps. lxxxiii:7); that to the south *Esh-Sherah*, which has erroneously been supposed to be allied to the Hebrew 'Seir;' whereas the latter (written with a *ש*) means 'hairy,' the former denotes a tract or region. To the district of Esh-Sherah belongs Mount Hor, the burial place of Aaron, towering above the Wady Mousa (valley of Moses), where are the celebrated ruins of Petra (the ancient capital of the Nabathæo-Idumæans), brought to light by Seetzen and Burckhardt.

(c) **Wilderness.** To the west of Idumæa extends the 'great and terrible wilderness' of *Et-Tih*, *the Wandering*, so called from being the scene of the wanderings of the children of Israel. It consists of vast interminable plains, a hard gravelly soil, and irregular ridges of limestone hills. The researches of Robinson and Smith furnish new and important information respecting the geography of this part of Arabia and the adjacent peninsula of Sinai. It appears that the middle of this desert is occupied by a long central basin, extending from *Jebel-et-Tih*, *the mountain of the wandering*, a chain pretty far south, to the shores of the Mediterranean. This basin descends towards the north with a rapid slope, and is drained through all its length by Wady-el-Arish, which enters the sea near the place of the same name, on the borders of Egypt. 'West of this basin other wadys run by themselves down to the sea. On the east of the same central basin is another similar and parallel one between it and the Arabah. North of this last basin the tract between the Arabah and the basin of the Arish is filled up by ranges or clusters of mountains, from which, on the east, short wadys run to the Arabah, and on the west longer ones to Wady-el-Arish, until, farther north, these latter continue by themselves to the sea nearer Gaza.'

(d) **Sinai.** This description of the formation of the northern desert will enable us to form a more distinct conception of the general features of the peninsula of Sinai, which lies south of it, being formed by the two arms of the Red Sea, the Gulfs of Akaba and Suez. If the parallel of the north coast of Egypt be extended eastward to the great Wady-el-Arabah, it appears that the desert, south of this parallel, rises gradually towards the south, until on the summit of the ridge Et-Tih, between the two gulfs, it attains, according to Russegger, the elevation of 4,322 feet. The waters of all this great tract flow off northward either to the Mediterranean or the Dead

Sea. The Tih forms a sort of offset, and along its southern base the surface sinks at once to the height of only about 3,000 feet, forming the sandy plain which extends nearly across the peninsula. After this the mountains of the peninsula proper commence, and rise rapidly through the formations of sandstone, grüenstein, porphyry, and granite, into the lofty masses of St. Catherine and Um Shaumer, the former of which, according to Russegger, has an elevation of 8,168 Paris feet, or nearly double that of the Tih. Here the waters all run eastward or westward to the Gulfs of Akaba and Suež.

8. The People. Having now taken a rapid survey of this extensive region in its three divisions, let us advert to the people by whom it was at first settled, and by whose descendants it is still inhabited. There is a prevalent notion that the Arabs, both of the south and north, are descended from Ishmael; but the idea of the southern Arabs being of the posterity of Ishmael is entirely without foundation, and seems to have originated in the tradition invented by Arab vanity, that they, as well as the Jews, are of the seed of Abraham—a vanity which, besides figuring and falsifying the whole history of the patriarch and his son Ishmael, has transferred the scene of it from Palestine to Mecca. If we go to the most authentic source of ancient ethnography, the book of Genesis, we there find that the vast tracts of country known to us under the name of Arabia gradually became peopled by a variety of tribes of different lineage, though it is now impossible to determine the precise limits within which they fixed their permanent or nomadic abode. We shall here exhibit a tabular view of these races in chronological order, *i. e.*, according to the successive eras of their respective progenitors:

(1) **Hamites.** The posterity of *Cush*, Ham's eldest son, whose descendants appear to have settled in the south of Arabia, and to have sent colonies across the Red Sea to the opposite coast of Africa; and hence *Cush* became a general name for 'the south,' and specially for Arabian and African Ethiopia. The sons of *Cush* (Gen. x:7) were *Seba*, *Havilah*, *Sabtah*, *Ramah* or *Ragma* (his sons, *Sheba* and *Dedan*), and *Sabthea*.

The three most illustrious Hamite nations were the Cushites, the Phœnicians and the Egyptians; but all were greatly mixed with foreign peoples. Their architecture has a solid grandeur that we look in vain for elsewhere, and they possess other characteristics that distinguish them from the descendants of *Shem* and *Japheth*.

(2) **Shemites.** The descendants of *Shem*, the eldest son of *Noah* (Gen. v:32), whose land intersected the portions of *Ham* and *Japheth* and extended from the Indian Ocean to the Mediterranean. It embraced the countries of *Syria* (*Aram*), *Chaldæa* (*Arphaxed*), parts of *Assyria* (*Asshur*), or *Persia* (*Elam*), and of the Arabian Peninsula (*Joktan*).

(3) **Joktanites.** These were the descendants of *Joktan*, called by the Arabs *Kachtan*, the second son of *Eber*, *Shem's* great-grandson (Gen. x:25, 26). According to Arab tradition *Kachtan* (whom they also regard as a son of *Eber*), after the confusion of tongues and dispersion at *Babel*, settled in *Yemen*, where he reigned as king. *Ptolemy* speaks of an Arab tribe called *Katanites*, who may have derived their name from him; and the richest *Bedouins* of the southern plains are the *Kahtan* tribe on the frontiers of *Yemen*. *Joktan* had thirteen sons, some of whose names

may be obscurely traced in the designations of certain districts in Arabia Felix. Their names were *Almodad*, *Shaleph*, *Hhazarmaveth* (preserved in the name of the province of *Hhadranaut*, the Hebrew and Arabic letters being the same); *Jarach*, *Hadoram*, *Uzal* (believed by the Arabs to have been the founder of *Sanaa* in *Yemen*); *Dilka*, *Obal*, *Abimael*, *Sheba* (father of the *Sabæans*, whose chief town was *Mariaba* or *Mareb*; their queen *Balkis*, supposed to be the queen who visited *Solomon*); *Ophir* (who gave name to the district that became so famous for its gold); *Havilah*, and *Jobab*.

(4) **Abrahamites.** Abrahamites are divided into:—

(a) *Hagarenes* or *Hagarites*, so called from *Hagar* the mother; otherwise termed *Ishmaelites* from her son; and yet in course of time these names appear to have been applied to different tribes, for in *Ps. lxxxiii:6*, the *Hagarenes* are expressly distinguished from the *Ishmaelites* (*Comp. 1 Chron. v:10, 19, 20*, and the apocryphal book of *Baruch i:35; iii:23*). The twelve sons of *Ishmael* (*Gen. xxv:13-15*), who gave names to separate tribes, were *Nebaioth* (the *Nabathæans* in *Arabia Petræa*), *Kedar* (the *Kedarenes*, sometimes also used as a designation of the *Bedouins* generally, and hence the Jewish rabbins call the Arabic language 'the *Kedarene*'), *Abdeel*, *Mibsam*, *Mishma*, *Dumah*, *Massa*, *Hadad* or *Hadar*, *Thema*, *Jetur*, *Naphish* (the *Ituræans* and *Naphishæans* near the tribe of *Gad* (*1 Chron. v:19, 20*), and *Kedmah*. They appear to have been for the most part located near to *Palestine* on the east and southeast.

(b) *Keturahites*, the descendants of *Abraham* and his concubine *Keturah*, by whom he had six sons (*Gen. xxv:2*); *Simram*, *Jokshan* (who, like *Ramah*, son of *Cush*, was also the father of two sons, *Sheba* and *Dedan*), *Medan*, *Midian*, *Jishbak*, and *Shuaeh*. Among these the posterity of *Midian* became the best known. Their principal seat appears to have been in the neighborhood of the *Moabites*, but a branch of them must have settled in the peninsula of *Sinai*, for *Jethro*, the father-in-law of *Moses*, was a priest of *Midian* (*Exod. iii:1; xviii:5; Num. x:29*). To the posterity of *Shuaeh* belonged *Bildad*, one of the friends of *Job*.

(c) *Edomites*, the descendants of *Esau*, who possessed *Mount Seir* and the adjacent region, called from them *Idumæa*. They and the *Nabathæans* formed in later times a flourishing commercial state, the capital of which was the remarkable city called *Petra*.

(d) *Nahorites*, the descendants of *Nahor*, *Abraham's* brother, who seem to have peopled the land of *Uz*, the country of *Job*, and of *Buz*, the country of his friend *Elihu*, the *Buzite*, these being the names of *Nahor's* sons (*Gen. xxii:21*).

(5) **Lotites** are divided into:

(a) *Moabites*, who occupied the northern portion of *Arabia Petræa*, as above described; and their kinsmen, the

(b) *Ammonites*, who lived north of them, in *Arabia Deserta*.

Besides these, the Scriptures mention various other tribes who resided within the bounds of *Arabia*, but whose descent is unknown, *e. g.* the *Amalekites*, the *Kenites*, the *Horites*, the inhabitants of *Maon*, *Hazor*, *Vedan* and *Javan-Meusal* (*Ezek. xxvii:19*), where the English version has 'Dan also and *Javan* going to and fro.'

In process of time some of these tribes were perhaps wholly extirpated (as seems to have been the case with the *Amalekites*), but the rest were more

or less mingled together by intermarriages, by military conquests, political revolutions and other causes of which history has preserved no record; and thus amalgamated, they became known to the rest of the world as the 'Arabs,' a people whose physical and mental characteristics are very strongly and distinctly marked. In both respects they rank very high among the nations, so much so that some have regarded them as furnishing the *prototype*—the primitive model form—the standard figure of the human species. (See Sayce, *Races of the Old Testament*.)

9. Secular History. Arabia in earliest history was divided into several kingdoms, of which Yemen was the chief. In the fifth century the northern Arabs overran Yemen; later, in A. D. 529, came the great Abyssinian invasion; then the era of Mohammed, 622-632, followed by the conquests of his followers, who swept over Arabia, Palestine, Syria and the whole of Western Asia, Northern Africa and into Europe. In the next century their power in Arabia was broken and lost by dissensions. Arabia was disorganized, but rearranged in 929; furnished rulers for Egypt until 1171, in the time of Saladin; in 1517 the Turkish sultan, Selim I, was invested with the Mohammedan caliphate, and Arabia became subject to, and has since continued under, the Ottoman rule.

10. Arabia and the Monuments. Assyriologists have collected some notices of Arabia from the cuneiform inscriptions in which the Arabs were concerned. "From these inscriptions, interesting as they are, we learn, however, little more than the names of states and occasionally of kings, many of which offer easy Arabian etymologies. The peninsula might seem to have been occupied by a number of independent tribes, subordinate to no central authority—a state of things to which the difficulty of communication has very frequently reduced it. Nor is much more light to be obtained from the classical authors, who, till the beginning of the third century B. C., had only vague ideas about the peninsula. Great collections of inscriptions have, however, been made both in North and South Arabia by European scholars, especially Arnaud, Halévy and Glaser, and although many of the most remarkable of these still await publication, the Arabian states, of which merely the names had been recorded by Pliny and Ptolemy, and of which only a vague tradition circulated among the Arabs, have become far more familiar than formerly, and something has been learnt about their lines of kings, the extent of their territory and their wars and alliances. To the English travelers Wellsted and Cruttenden belongs the merit of having first called attention to the existence of the ruined cities in South Arabia, whence the most important of these documents have been brought. Of the nations thus rescued from oblivion the most important were the Minæans, of the Hebrew records, and Sabæans, whose dialects differed in certain particulars, while both had more in common with Hebrew than with Arabic. A third monarchy, of which the indigenous name was Lihyan, has left traces of its existence and its language in North Arabia, but far less distinct in their nature than those of the former two" (D. S. Margolionth, *Hastings' Bib. Dict.*). (For further information on the inhabitants of Arabia, see article on NATIONS, DISPERSION OF).

ARABIC LANGUAGE (ār'ā-bīk).

That important family of languages of which the Arabic is the most cultivated and most widely

extended branch has long wanted an appropriate common name. Under a sense of the impropriety of the term Oriental languages, Eichhorn was the first, as he says himself (*Allg. Bibl. Biblioth.* vi: 772) to introduce the name *Semitic* languages, which was soon generally adopted, and which is the most usual one at the present day. Nevertheless, Stange (in his *Theolog. Symnikta*) justly objected to this name as violating the statements of the very Mosaic account (Gen. x) on which the propriety of its use professed to be based. For, according to that genealogical table, some nations, which in all probability did not speak a language belonging to this family, are descended from Shem, and others, which did speak such a language, are derived from Ham. Thus 'Elam and Asshur are deduced from Shem (verse 22), and the descendants of Cush in Arabia and Ethiopia, as well as all the Canaanites, from Ham (verse 7, sq.).

(1) **Syro-Arabian.** In modern times, however, the very appropriate designation *Syro-Arabian* languages has been proposed by Dr. Prichard, in his *Physical History of Man*. This term has the advantage of forming an exact counterpart to the name by which the only other great family of languages with which we are likely to bring the Syro-Arabian into relations of contrast or accordance, is now universally known—the *Indo-Germanic*. Like it, by taking up only the two extreme members of a whole sisterhood according to their geographical position when in their native seats, it embraces all the intermediate branches under a common band, and, like it, it constitutes a name which is not only at once intelligible, but one which in itself conveys a notion of that affinity between the sister dialects, which it is one of the objects of comparative philology to demonstrate and to apply.

Springing from the same root as the Hebrew, and possessing such traces of affinity to so late a period as the time of Solomon, this Syro-Arabian dialect was further enabled, by several circumstances in the social state of the nation, to retain its native resemblance of type until the date of the earliest extant written documents. These circumstances were, the almost insular position of the country, which prevented conquest or commerce from debasing the language of its inhabitants; the fact that so large a portion of the nation adhered to a mode of life in which every impression was, as it were, stereotyped, and knew no variation for ages; and the fact that the people had, and according to Burekhardt still have, a great and just pride in the purity of their language.

(2) Preserved from Foreign Influence.

These causes preserved the language from foreign influences at a time when, as the Koran and a national literature had not yet given it its full stature, such influences would have been most able to destroy its integrity. During this interval, nevertheless, the language received a peculiarly ample development in a certain direction. The limited incidents of a desert life still allowed valor, love, generosity, and satire to occupy the keen sensibilities of the chivalrous Bedouin. These feelings found their vent in ready verse and eloquent prose; and thus, when Islam first called the Arabs into the more varied activity and more perilous collision with foreign nations, which resulted from the union of their tribes under a common interest to hold the same faith and to propagate it by the sword, the language had already received all the development which it could derive from the pre-eminently creative and refining impulses of poetry and eloquence.

However great may be the amount of resemblance between Arabic and Hebrew which a due estimate of all the theoretical grounds for the affinity, and for the diversity, between them would entitle us to assume, it is certain that a comparison of the actual state of both in their purest form evinces a degree of proximity which exceeds expectation. Two-thirds of the Hebrew roots, according to the assertion of Aurivillius, in his *Dissertationes*, p. 11, Ed. J. D. Michaelis, may be found in Arabic under the same letters, and either in the same or a very kindred sense.

(3) **Fertility.** The Arabs glory in the fertility of their language, which, certainly, is one of the most ancient in the world; and is remarkable for its copiousness and the multitude of words which express the same thing. We read in Pococke's *Notes on Abulpharagius*, that Ibn Chalawaisch composed a book on the names of the lion, which amounted to five hundred; and those of the serpent to two hundred. Honey is said to have eighty names; and a sword one thousand. The greater part of these names, however, are poetical epithets; just as we say *the Almighty* for God. So in Arabic, the lion is *the strong, the terrible*, etc. Some specimens of their poetry are thought by Schultens to be of the age of Solomon. The present Arabic characters are modern. The ancient writing of Arabia was without vowels, like the Hebrew; and so is also the modern Arabic, except in the Koran and other specimens of exact chirography.

ARAD (ā'rād), (Heb. אָרָד, *ar-awd'*, perhaps flight), the name of a city and two men.

1. Arad, called also Arada, Arath, Adraa, or Adra, a city south of the tribe of Judah and the land of Canaan, in Arabia Petraea. The Israelites having advanced towards Canaan, the king of Arad opposed their passage, defeated them, and took a booty from them. But they devoted his country as accursed, and destroyed all its cities, when they became masters of the land of Canaan (Num. xxi:1).

2. A king who fought with the Israelites near Mount Hor and was defeated (Num. xxi:1; xxxiii:33, 40), B. C. 1452.

3. One of the sons of Beriah, the Benjamite, a principal inhabitant of Aijalon (1 Chron. viii:15), B. C. about 1400.

ARADUS (ār'a-dūs). See ARVAD.

ARAH (ā'rah), (Heb. אָרָח, *aw-rakh'*, *way-farer*), the name of three men.

1. One of the three sons of Ulla of the tribe of Asher (1 Chron. vii:39), B. C. about 1500.

2. The father of a family that returned from exile (Ezra ii:5; Neh. vii:10), B. C. about 536.

3. A Jew whose son Sheehaniah was father-in-law of Tobiah (Neh. vi:18), B. C. 536.

ARAM (ā'ram), (Heb. אָרָם, *ar-awm'*, probably from אָרָם, *ram*, high).

1. This was the name given by the Hebrews to the tract of country lying between Phœnicia on the west, Palestine on the south, Arabia Deserta and the River Tigris on the east, and the mountain range of Taurus on the north. The inhabitants were called Aramites. Many parts of this extensive territory have a much lower level than Palestine, but it might receive the designation of 'highlands,' because it does rise to a greater elevation than that country at most points of intermediate contact, and especially on the side of Lebanon, Aram, or Aramæa, seems to have corresponded generally to the *Syria* and

Mesopotamia of the Greeks and Romans. We find the following divisions expressly noticed in Scripture:

(1) **Aram-Dammesek**, the *Syria of Damascus*, conquered by David (2 Sam. viii:5, 6), where it denotes only the territory around Damascus; but elsewhere 'Aram' in connection with its capital Damascus, appears to be used in a wider sense for Syria Proper (Is. vii:1, 8; xvii:3; Amos i:5). At a later period Damascus gave name to a district, the *Syria Damascena* of Pliny (v:13).

(2) **Aram-Maachah** (1 Chron. xix:6), or simply *Maachah* (2 Sam. x:6, 8), which, if formed from the Hebrew, *to press together*, would describe a country inclosed and hemmed in by mountains, in contradistinction to the next division, Aram-beth-Rechob, *Syria, the wide or broad*; being used in Syriac for a *district of country*. Aram-Maachah was not far from the northern border of the Israelites on the east of the Jordan (Comp. Deut. iii:14 with Josh. xiii:11, 13). In 2 Sam. x:6, the text has *king Maachah*, but it is to be corrected from the parallel passage in 1 Chron. xix:7, *king of Maachah*.

(3) **Aram-beth-Rechob**, the meaning of which may be that given above, but the precise locality cannot with certainty be determined. Some connect it with the Beth-rehob of Judg. xviii.

(4) **Aram-Zobah**, or, in the Syriac form, *Zoba* (2 Sam. x:6). Jewish tradition has placed Zobah at Aleppo (see the *Itinerary* of Benjamin of Tudela), whereas Syrian tradition identifies it with Nisibis. We may gather from 2 Sam. viii:3; x:16, that the eastern boundary of Aram-Zobah was the Euphrates, but Nisibis was far beyond that river; besides that in the title of the sixtieth Psalm (supposing it genuine) Aram-Zobah is clearly distinguished from Aram-Naharaim or Mesopotamia. It is true, indeed, that in 2 Sam. x:16, it is said that Hadarezer, king of Zobah, brought against David 'Aramites from beyond the river;' but these were auxiliaries, and not his own subjects. The people of Zobah are uniformly spoken of as near neighbors of the Israelites, the Damascenes, and other Syrians; and in one place (2 Chron. viii:3) Hamath is called Hamath-Zobah, as pertaining to that district. We, therefore, conclude that Aram-Zobah extended from the Euphrates westward, perhaps as far north as to Aleppo. It was long the most powerful of the petty kingdoms of Aramæa, its princes commonly bearing the name of Hadadezer or Hadarezer.

(5) **Aram-Naharaim**, *Aram of the Two Rivers*, called in Syriac 'Beth-Nahrin,' *the land of the rivers*, following the analogy by which the Greeks formed the name *Μεσοποταμία*, *the country between the rivers*. The rivers which enclose Mesopotamia are the Euphrates on the west and the Tigris on the east; but it is doubtful whether the Aram-Naharaim of Scripture embraces the whole of that tract or only the northern portion of it (Comp. Gen. xxiv:10; Deut. xxiii:4; Judg. iii:8). A part of this region of Aram is also called *Padan-Aram*, *the plain of Aram* (Gen. xxv:20; xxviii:2, 6, 7; xxxi:18; xxxiii:18), and once simply *Padan* (Gen. xlviii:7), also *Sedeh-Aram*, *the field of Aram* (Hos. xii:13, whence the 'Campi Mesopotamiæ' of Quintus Curtius (iii:2, 3; iii:8, 1; iv:3, 6). But that the whole of Aram-Naharaim did not belong to the flat country of Mesopotamia appears from the circumstance that Balaam, who (Deut. xxiii:4) is called a native of Aram-Naharaim, says (Num. xxiii:7) that he was brought 'from Aram, out of the *mountains* of the east.' The Septuagint, in some of these places, has *Mesopotamia of Syria*,

and in others *Syria of the rivers*, which the Latins rendered by *Syria Interamnia*.

But though the districts now enumerated be the only ones *expressly named* in the Bible as belonging to Aram, there is no doubt that many more territories were included in that extensive region, *e. g.* Geshur, Hul, Arpad, Riblah, Tadmor, Hauran, Abilene, etc., though some of them may have formed part of the divisions already specified. A native of Aram was called *Arami*, an Aramæan, used of a Syrian (2 Kings v:20), and of a Mesopotamian (Gen. xxv:20). The feminine was *Aramiah*, an Aramitess (1 Chron. vii:14), and the plural *Aramim* (2 Kings viii:29).

2. A son of Shem (Gen. x:22, 23; 1 Chron. i:17), B. C. 2280. He was the progenitor of the Aramæans or, as in the English versions, Syrians. (See SYRIANS.)

The descent of the Aramæans from Aram is confirmed by their language, which was one of the branches of the Semitic family, and nearly allied to the Hebrew. Many writers maintain that the Aramæans came from Kir, appealing to Amos ix:7; but while that passage is not free from obscurity, it seems evidently to point, not to the aboriginal abode of the people, but to the country whence God would recover them when banished. The prophet has said (Amos i:5) that the 'people of Aram should go into captivity to Kir (probably the country on the river Kur or Cyrus), a prediction of which we read the accomplishment in 2 Kings xvi:9; and the allusion here is to their future restoration. Hartmann thinks Armenia obtained its name from Aram. Traces of the name of the Aramæans are to be found in the *Arami* and *Aramaioi* of the Greeks (Strabo, xiii:4, 6; xvi:4, 27; Comp. Homer's *Iliad*, ii:783). (See ASSYRIA.) They were so noted for idolatry that in the language of the later Jews their name was used as synonymous with heathenism.

3. A son of Kemuel, the nephew of Abraham (Gen. xxii:21), B. C. about 1838.

4. One of the sons of Shamer of the tribe of Asher (1 Chron. vii:34; Matt. i:3; Luke iii:33).

ARAMAIC LANGUAGE (är'ä-mä'ik), (Heb. אַרַמִּית, *ar-aw-meeth'*, 2 Kings xviii:26; Dan. ii:4).

The Aramaic language, of which the Chaldee and Syriac dialects form parts, constitutes the northern and least developed branch of the Syro-Arabian family. Its cradle was probably on the banks of the Cyrus, according to the best interpretation of Amos ix:7; but Mesopotamia, Babylonia, and Syria form what may be considered its home and proper domain. Political events, however, subsequently caused it to supplant Hebrew in Palestine; and then it became the prevailing form of speech from the Tigris to the shore of the Mediterranean, and, in a contrary direction, from Armenia down to the confines of Arabia. After obtaining such a wide dominion, it was forced, from the ninth century onwards, to give way before the encroaching ascendancy of Arabic; and it now survives as a living tongue only among the Syrian Christians in the neighborhood of Mosul.

According to historical records which trace the migrations of the Syro-Arabians from the East to the Southwest, and also according to the comparatively ruder form of the Aramaic language itself, we might suppose that it represents, even in the state in which we have it some image of that aboriginal type which the Hebrews and Arabians, under more favorable social and climatic influences, subsequently developed into

fulness of sound and structure. But it is difficult for us now to discern the particular vestiges of this archaic form; for, not only did the Aramaic not work out its own development of the original elements common to the whole Syro-Arabian sisterhood of languages, but it was pre-eminently exposed, both by neighborhood and by conquest, to harsh collision with languages of an utterly different family. Moreover, it is the only one of the three great Syro-Arabian branches which has no fruits of a purely national literature to boast of. We possess no monument whatever of its own genius; not any work which may be considered the product of the political and religious culture of the nation, and characteristic of it—as is so emphatically the case both with the Hebrews and the Arabs. The first time we see the language it is used by Jews as the vehicle of Jewish thought; and although, when we next meet it, it is employed by native authors, yet they write under the literary impulses of Christianity, and under the Greek influence on thought and language which necessarily accompanied that religion. These two modifications, which constitute and define the so-called Chaldee and Syriac dialects, are the only forms in which the normal and standard Aramaic has been preserved to us.

ARAMITESS (ā-ram-i'tess), (Heb. אַרַמִּיתָא, *ar-am-mee'yaw*, a female Aramite), an inhabitant of Aram (1 Chron. vii:14).

ARAMNAHARAIM (ä'räm-nā-ha-rā'im), (Heb. אַרַמְנַחַרַיִם, *ar-am'nah-har-ah'yim*, Aram of two rivers), the region between the Tigris and the Euphrates, called in Greek *Mesopotamia* (Ps. lx, *title*).

ARAN (ä'ran), (Heb. אֲרָן, *ar-awn'*, wild goat), a Horite, son of Dishan and brother of Uz (Gen. xxxvi:28; 1 Chron. i:42), B. C. about 1963.

ARARAT (är'a-rät), (Heb. אֲרָרָט, *ar-aw-rat'*, wilderness), occurs nowhere in Scripture as the name of a mountain, but only as the name of a country, upon the 'mountains' of which the ark rested during the subsidence of the flood (Gen. viii:4).

(1) **Various Locations.** In almost every part of the East, where there is the tradition of a deluge, the inhabitants connect the resting place of the 'great vessel' with some conspicuous elevation in their own neighborhood. Thus, where the Sufued Koh, or 'White Mountain,' rears its crest on one side, and the towering hill of Noorgill, or Kooner, on the other, here the Afghans believe the ark of Noah to have rested after the Deluge. Another sacred mountain in the East is Adam's Peak, in the island of Ceylon, and it is a curious circumstance that in Gen. viii:4, the Samaritan Pentateuch has 'Sarandib,' the Arabic name of Ceylon. In the Sibylline verses it is said that the mountains of Ararat were in Phrygia; but Bochart has ingeniously conjectured that the misconception arose from the city of Apamea there having been called *Kibotos* (the Greek word for *an ark*), because inclosed in the shape of an ark by three rivers. Shuekford, after Sir Walter Raleigh, would place Ararat far to the east, in part of the range anciently called Caucasus and Imaus, and terminating in the Himmaleh mountains, north of India; and to this opinion a late writer (Kirby) inclines in his *Bridgewater Treatise*, p. 45. Dr. Pye Smith also, when advocating the local and partial nature of the Deluge, seeks for a less elevated mountain than the Armenian Ararat, and

lays hold of this among other hypotheses (*The Relation between Scripture and Geological Science*, p. 302); whereas Kirby embraces it for the very opposite reason, viz., because, holding the universality of the Flood, he thinks that mountain is not high enough to account for the long period that elapsed (Gen. viii:5) before the other mountains became visible. Now, it is evident that these and such like theories have been framed in forgetfulness of what the Bible has recorded respecting the locality of Ararat. We may be unable to fix with precision where that region lay, but we can without difficulty decide that it was neither in Afghanistan nor Ceylon, neither in Asia Minor nor in Northern India.

The only other passages where 'Ararat' occurs are 2 Kings xix:37 (Is. xxxvii:38) and Jer. li:27. In the former it is spoken of as the country

Cimmerians (Gen. x:2, 3)—then we arrive at the same conclusion, viz., that Ararat was a mountainous region north of Assyria, and in all probability in Armenia. In Ezek. xxxviii:6 we find Togarmah, another part of Armenia, connected with Gomer, and in Ezek. xxvii:14, with Meshech and Tubal, all tribes of the north. With this agree the traditions of the Jewish and Christian churches, and likewise the accounts of the native Armenian writers, who inform us that Ararat was the name of one of the ancient provinces of their country, supposed to correspond to the modern pashaliks of Kars and Bayazced, and part of Kurdistan. According to the tradition preserved in Moses of Chorene, the name of Ararat was derived from Arai, the eighth of the native princes, who was killed in a battle with the Babylonians, about B. C. 1750;

Ararat.

whither the sons of Sennacherib, king of Assyria, fled after they had murdered their father. The apocryphal book of Tobit (i:21) says it was *to the mountains of Ararath*. This points to a territory which did not form part of the immediate dominion of Assyria, and yet might not be far off from it. The description is quite applicable to Armenia, and the tradition of that country bears that Sennacherib's sons were kindly received by king Paroyr, who allotted them portions of land bordering on Assyria.

(2) **Kingdom of Ararat.** The other Scripture text (Jer. li:27) mentions Ararat, along with Minni and Ashkenaz, as kingdoms summoned to arm themselves against Babylon. In the parallel place in Is. xiii:2-4, the invaders of Babylonia are described as 'issuing from the mountains;' and if by *Minni* we understand the *Minyas* in Armenia, mentioned by Nicholas of Damascus (Josephus, *Antiq.* i:3, 6), and by *Ashkenaz* some country on the *Euxine* Sea, which may have had its original name, *Axenos*, from Ashkenaz, a son of Gomer, the progenitor of the

in memory of which the whole province was called *Aray-iarat*, the ruin of Arai.

(3) **Babylonian Tablets.** In the Story of the Deluge, as given in the Accadian account found on the Babylonian Tablets, Sisuthros built the ship in which he was saved. It was in the land of Nizir in which the vessel of Sisuthros rested. This country was situated among the mountains of Pir Mam, to the northeast of Babylonia. Rowandiz, the highest peak in this part of Asia, rises a little to the north of the Pir Mam, and it seems probable, therefore, that it represents 'the mountain of Nizir.' The whole country had been included by the Accadians in the vast territory of Guti, or Gutium, which roughly corresponds with the modern Kurdistan. It is accordingly worth notice that a widespread Eastern tradition makes Gebel Gudi, or Mount Gudi, the mountain on which the ark rested, and that in early Jewish legend this mountain is called Lubar or Baris, the boundary between Armenia and Kurdistan, in the land of the Minni. Ararat, or Urardhu, as it is written in the cunei-

form inscriptions, denoted Armenia, and more particularly the district about Lake Van; so that 'the mountains of Ararat,' of which Genesis speaks, might easily have been the Kurdish ranges of Southern Armenia. It was not until a very late period that the name of Ararat was first applied and then confined to the lofty mountains in the north. (Sayce, *Fresh Light from Ancient Monuments*, pp. 33, 34. See also *The Monuments and the Old Testament*, by Ira Maurice Price, pp. 89. sq.).

But though it may be concluded with tolerable certainty that the land of Ararat is to be identified with a portion of Armenia, we possess no historical data for fixing on any one mountain in that country as the resting place of the ark.

The ancients attached a peculiar sacredness to the tops of high mountains, and hence the belief was early propagated that the ark must have rested on some such lofty eminence.

(4) **Early Tradition.** The earliest tradition fixed on one of the chain of mountains which separate Armenia on the south from Mesopotamia, and which, as they also inclose Kurdistan, the land of the Kurds, obtained the name of the Kardu, or Carduchian range, corrupted into Gordixean and Cordyxean. This opinion prevailed among the Chaldæans, if we rely on the testimony of Berossus as quoted by Josephus (*Antiq.* i:3, 6): 'It is said there is still some part of this ship in Armenia, at the mountain of the Cordyxæans, and that people carry off pieces of the bitumen, which they use as amulets.' The same is reported by Abydenus (in Euseb. *Præp. Evang.* ix:4), who says they employed the wood of the vessel against diseases. Hence we are prepared to find the tradition adopted by the Chaldee paraphrasts, as well as by the Syriac translators and commentators, and all the Syrian churches.

(5) **Known to Europeans.** The mountain thus known to Europeans as Ararat consists of two immense conical elevations, one peak considerably lower than the other, towering in massive and majestic grandeur from the valley of the Aras, the ancient Araxes. Smith and Dwight give its position N. 57° W. of Nakhchevan, and S. 25° W. of Erivan (*Researches in Armenia*, p. 267); and remark, in describing it before the recent earthquake, that in no part of the world had they seen any mountain whose imposing appearance could plead half so powerfully as this a claim to the honor of having once been the stepping-stone between the old world and the new.

Nothing can be more beautiful than its shape, more awful than its height. All the surrounding mountains sink into insignificance when compared to it. It is perfect in all its parts; no hard rugged feature, no unnatural prominences, everything is in harmony, and all combines to render it one of the sublimest objects in nature.

(6) **Attempted Ascents.** Several attempts had been made to reach the top of Ararat, but few persons had got beyond the limit of perpetual snow. The French traveler, Tournefort, in the year 1700, long persevered in the face of many difficulties, but was foiled in the end. Between thirty and forty years ago the Pasha of Bayazeed undertook the ascent with no better success. The honor was reserved to a German, Dr. Parrot, in the employment of Russia. The summit of the Great Ararat is in 39° 42' north lat. and 61° 55' east long. from Ferro. Its perpendicular height is 16,254 Paris feet above the level of the sea, and 13,350 above the plain of the Araxes. The Little Ararat is 12,284 Paris feet

above the sea and 9,561 above the plain of the Araxes. The summit of Mount Ararat is a slightly convex, almost circular platform, about 200 Paris feet in diameter, composed of eternal ice, unbroken by a rock or stone.

The ascent of the mountain by Dr. Parrot, and afterwards by a Mr. Antonomoff, is stoutly denied by the natives, and especially by the inmates of the neighboring convent of Echmiadzin, who have a firm persuasion that in order to preserve the ark no one is permitted to approach it. This is based on the tradition that a monk, who once made the attempt, was, when asleep from exhaustion, unconsciously carried down to the point whence he had started; but at last, as the reward of his fruitless exertions, an angel was sent to him with a piece of the ark, which is preserved as the most valuable relic in the cathedral of Echmiadzin.

(7) **Earthquake Effects.** Since the memorable ascent of Dr. Parrot, Ararat has been the scene of a fearful calamity. An earthquake, which in a few moments changed the entire aspect of the country, commenced on the 20th of June (o. s.), 1840, and continued, at intervals, until the 1st of September. Traces of fissures and landslips have been left on the surface of the earth, which the eye of the scientific observer will recognize after many ages. The destruction of houses and other property in a wide tract of country around was very great; fortunately, the earthquake having happened during the day, the loss of lives did not exceed fifty. The scene of greatest devastation was in the narrow valley of Akorhi, where the masses of rock, ice, and snow, detached from the summit of Ararat and its lateral points, were thrown at one single bound from a height of 6,000 feet to the bottom of the valley, where they lay scattered over an extent of several miles. (See Major Voskoboinikof's Report, in the *Athenæum* for 1841, p. 157.)

(8) **Cuneiform Characters.** "The cuneiform characters of Assyria were introduced into the kingdom of Ararat in the ninth century B. C. The syllabary was greatly simplified, each character having only a single phonetic value attached to it, and the greater number of characters expressing closed syllables being rejected. The vowels were usually denoted by separate characters, and a good many ideographs were borrowed. It is to the use of these ideographs that the decipherment of the Vannic inscriptions is mainly due. The inscriptions are carved on rocks, altar-stones, columns, and the like, and are in a language which shows little resemblance to any other with which we are acquainted, though it may be distantly related to modern Georgian." (Hastings' *Bib. Dict.*.)

ARAUNAH (a-rau'nah), (Heb. אַרְאֻנָּה, *ar-aw-naw'*), or **ORNAN** (Heb. אֹרְנָן, *or-nawn'*, a strong one, or a hero), was a Jebusite who lived at Jerusalem and owned a thrashing place or floor, where the temple was afterward built (2 Sam. xxiv:16).

David bought it of him because the destroying angel sent to desolate the nation, in consequence of David's sin of numbering the people, stayed his hand at the command of God just as he had reached the floor. Araunah refused at first to receive anything for it, but offered it to him, together with oxen for sacrifices, and the timber of the threshing instruments for fuel. David refused to receive them as a gift, as he would not offer to the Lord that which had cost him nothing. He therefore bought the oxen for fifty shekels of silver (2 Sam. xxiv:24), and the

whole place for six hundred shekels of gold (1 Chron. xxi:25), and offered his sacrifices, which were accepted and the plague stayed. 2 Sam. xxiv:23 may be better translated: "The whole, O king, does Araunah give unto the King." But taking the Authorized Version translation as it stands, it favors the view of some that the expression "Araunah the king" implies that he was one of the kings of the Jebusites.

ARBA (är'bà), (Heb. אַרְבָּה, *ar-bah'*, four). See HEBRON.

ARBATHITE (är'bath-ite), (Heb. אַרְבָּתִי, *ar-bath'-thi*, belonging to Arabah), a native of Arba.

ARBATTIS (ar-bät'tis), a city of Galilee, taken and destroyed by Simon Maccabæus (1 Macc. v:23).

ARBELA (ar-bē'là), a town of Zebulun (Hos. x:14). See BETH-ARBEI.

ARBITE (är'bite), (Heb. אַרְבִּי, *ar-bi'*), a native of Arabia. Paarai, the Arbite, was one of David's guards (2 Sam. xxiii:35).

ARCH (ärch), (Heb. אֶרְכָּה, *ay-larum'*).

Arches with vaulted chambers and domed temples figure so conspicuously in modern Oriental architecture that, if the arch did not exist among the ancient Jews, their towns and houses could not possibly have offered even a faint resemblance to those which now exist; and this being the case, a great part of the analogical illustrations of Scripture which modern travelers and Biblical illustrators have obtained from this source must needs fall to the ground. It is therefore of importance to ascertain whether the arch did or did not exist in these remote times to which most of the history of at least the Old Testament belongs. Nothing against its existence is to be inferred from the fact that no word signifying an arch can be found in the Hebrew Scriptures. The word so rendered in Ezek. xl:16, 22, 26, 29, has not that meaning. The architectural notices in the Bible are necessarily few and general; and we have at this day histories and other books, larger than the sacred volume, in which no such word as 'arch' occurs. There is certainly no absolute proof that the Israelites employed arches in their buildings; but if it can be shown that arches existed in Egypt at a very early period, we may safely infer that so useful an invention could not have been unknown in Palestine or unemphatic in their buildings. Palestine was indeed better wooded than Egypt; but still that there was a deficiency of wood suitable for building and for roofs is shown by the fact that large importations of timber from the forests of Lebanon were necessary (2 Sam. vii:2, 7; 1 Kings v:6; 1 Chron. xxii:4; 2 Chron. ii:3; Ezra iii:7; Cant. i:17), and that this imported timber, although of no very high quality, was held in great estimation.

ARCHÆOLOGY, THE NEW (är'kê-öl'ô-jÿ). Archæology itself is so new a word that it may seem strange to speak of the "new archæology" as we do of the "new astronomy."

But the contrast is intended in comparison with the old antiquarianism, and with the view of archæology which has been taken from that.

We have here exactly the old conflict which is seen in almost every other branch of learning—the intrusion of comparative methods of classification, and of the use of minute evidence, upon the older system of emotional and literary treatment.

The old antiquarian first loved his collections, and then read about them, and valued them as they illustrated his favorite authors; where the

written record failed he was lost in chartless seas of imagination. But now, in the newer system of research, *everything is a document to the archæologist*. He may love his collections emotionally, just as much as his fathers did, but he values them for the sake of their meaning, and not only for their beauty.

When once the idea of a meaning is attached to specimens—the idea that they spell facts, as plainly as may be done by means of words—an entirely new standard of value is set up.

Formerly things were collected entirely for their own sake; in which case their origins, their connections, and their dates are merely matters of curiosity. Now we collect things for the sake of the facts which they tell, and their value almost entirely rests on the precise knowledge of where they were found, with what other things they were accompanied, and of what date they are. The old collectors valued objects for their beauty or their rarity; we now value them as much as they did, and besides that, also for their meaning and for the tale they tell—we would not love them half so much, loved we not history more.

Now, this new interest considerably changes the new system of collections, and completely alters the mode of collecting.

In place of merely getting possession of antiquities, unlabeled, or with such labels as "found in a barrow in Ireland," or "from Thebes," and putting them together to make a collection, we now require to know exactly the locality, the circumstances of finding, the series of objects which were found together, and all indications of the age, and to have all this vouched for on sufficient authority.

(1) **Preserved by History**. Instead of digging merely to get *things*, we now dig to get history. We need not only to record everything found, but also to reason on all we see, to draw our inferences on the spot, to work slowly, so as to be in time to observe critical questions as we go on; in short, to reconstruct on paper the series of past events of which we see the product in the ground that we are excavating.

All this requires qualities different from a Belzoni, a Drovetti, or their later followers. The excavator must be brother to the geologist in the mode of inference, brother to the naturalist in his closeness of observation, brother to the physicist in his knowledge of matter, and he must work with the spirit of a detective who rejoices in every indication of the thoughts of men, and whose delight is to unravel the meaning of the traces of past actions and doings. The first aim must be to preserve as perfect a record as may be; even if it shall not be all of it intelligible to the observer. For unlike dealing with any natural science, history cannot be repeated; and when any deposit is once disturbed, it is a page of history either destroyed or recorded. What is not recorded is destroyed. And the responsibility of the excavator is therefore far heavier than that of the student of nature. The latter's mistakes can always be corrected by his successors, but the archæologist is often compelled to destroy all the evidence which he does not record. Even down to the present time, excavators are doing, every year, more harm than good; some few are recording with reasonable completeness, but on the whole *more historical facts are yearly destroyed than are recorded*. More is lost than is preserved by them, and more harm—unseen and unheeded—is being done than the good which is put on record.

We need far more conscience, and a far higher respect for our responsibilities. We curse the invaders who turned to the basest utility the priceless manuscripts of antiquity, while other such manuscripts are frequently being destroyed by sheer carelessness. We execrate the barbarian who knocked the head off a statue, while we stand by and see the whole history of a statue, or a building, thrown away by not noting all that is found in connection with it.

We scorn the ignorance of a savage who fancies that treasure is hidden in a monument, while our museum fillers are hunting for what has a market value, and ignoring whatever is not showy to vulgar eyes.

Though it is the essence of the new archæology to reason on everything that can be observed, however small or trivial, do not therefore think that small or trivial things are its object. By no means—they are only materials and not results.

The astronomer observes small and trivial things—hundredths of a second of angle, thousandths of an inch in the spectrum; and those are the materials for stupendous reasoning on the vast depths of space. The archæologist observes minute differences on a coin, a fragment of pottery, or the color of a scrap of glaze, and may from that safely deduce a lost page of distant history.

To turn now to what is being done well. Of the excellent works of record and comparison that are so liberally issued to the world by the Smithsonian Institution, it is needless for me to say anything, as they cannot but be regarded as comprising models of research in the New World. In England, the high-water mark, so far, has been shown in the volumes of results made public by General Pitt-Rivers. The splendid record of every object, however minute; the precision of the diagram sections of excavation, showing in the great dykes the exact nature of the ground, and the very place of every object found, so that any person can draw his own conclusions by simple inspection; the methods of registration, descending even to every single chip of pottery, and so enabling statistical results to be safely laid down, bearing on the races and periods; the preservation of the skeletons, and drawings of their exact positions; the measurements of all the skulls and skeletons; the abundant modeling of monuments and discoveries so that they can be referred to in future times,—in all these respects this work is a pattern which should be carefully studied and imitated so far as means may allow.

(2) **Barnabei.** In Italy, some fine work has been done by Professor Barnabei in the hill cemeteries, which have furnished the museum of the Villa Papaglinio at Rome. Here every tomb has been planned in a general plan with hill shading, and also drawn in detail, showing the place of each object. The work will be published by the Lincei, and in the museum the contents of each tomb of importance are preserved complete and kept together.

At Bologna there is a notable series of burials transported entire into the museum—every bone—every tool—every vase—lying still embedded in the earth as originally laid to rest.

Such are inspiring examples of the true method of work.

(3) **Bliss.** In Palestine the excavations of Mr. Bliss for the fund have been carried on with full care for details. The mound of Lachish has been cut away over a third of the area, and removed layer by layer, town under town,

until ten or eleven towns have been successively examined, planned, and the objects registered at their various levels.

Probably no such long series of dwellings on one site—sixty feet in height of ruins in all—has ever been so regularly explored, and so completely recorded. Poor as the ruins of Palestine are, this is the only possible means of reaching their history; and the loss of facts and objects has been reduced to a minimum in this careful work.

(4) **Eleven Years in Egypt.** Now, I have been asked to say somewhat on my own results of the past eleven years in Egypt. Each year I have had to make a choice of evils; the ground before me was far more than I could work single-handed; and either I must have left the greater part of it unexamined, to be ransacked and ruined by natives as soon as I retired, or I must—as I have done—let much go by without full record, and reserve my attention to step in and preserve or note whatever was of unusual importance. At least by the system of paying the workmen for their finds, I have the satisfaction of knowing that I have secured all that they discovered, and that nothing has wandered away through their hands.

(5) **Historical Results.** We will now summarize the principal results in chronological order. Of the earliest historical age, before 4000 B. C., there are the entire skeletons from Medûm, the contracted posture of which is so different from that of the ordinary Egyptians, and which may belong to an aboriginal race. The temple of Seneferu, the oldest dated building, was found at Medûm, quite perfect, beneath forty feet of rubbish; and the sole guide to this discovery was the inference from the position of the ruins of other pyramid temples. At the same place the beautiful and skillful means of setting out a building with sloping sides on an uneven foundation was fully revealed, and shows the correct system of working followed in the earliest times.

The accurate copying of the hieroglyphs in the same cemetery has thrown light on the origin of the signs and opened a whole chapter of the lost prehistoric age of Egyptian civilization.

At Gizeh the only work allowed to me was surveying, and not excavation for discoveries. But an accurate survey of the pyramids has given us a firm basis for judging of the grand skill and ability of the immediate successors of the Medûm builders at the beginning of the fourth dynasty.

Nothing but the finest instruments, and months of work, are sufficient to reach the limits of their accuracy and their care.

The fragments of the sculptor's waste left lying on the hillside have revealed the modes of cutting the hard stones and proved the use of jeweled saws and drills; the barracks of the masons have shown approximately the number of skilled hands permanently engaged. The measurements of the monuments have proved with what care they regulated their standard of measure.

(6) **XIIth Dynasty.** Descending to the XIIth dynasty, about 2500 B. C., an entire town, known as Kahun, has been exhausted, over two thousand chambers being completely cleaned out, the flooring searched for hidden objects, the houses planned and laid down in a survey. And we have as perfect a knowledge of every detail of a large town of over four thousand years ago, exactly as laid out by the architect, as if it were a set of modern offices on a draughtsman's plan. The household objects have revealed much of the life, the large series of papyri much extend our knowl-

edge of the language and writing of that age. We understand for the first time—from the wooden sickle set with flint saws—what was the purpose of the untold number of polished flint saws found in the Old World and in the New.

We find that flint and copper were used side by side, and that bronze was not yet employed.

The pyramid of Usertescn II, built by the workmen who inhabited this town, was opened, and the royal altar was found in it.

The sites of the two temples of the pyramids were turned over, and the chips showed the names both of the king who built the temples and of Ramessu II, who destroyed them. The oldest foundation deposit of model tools, etc., was found sunk in the rock bed of the temple. The pyramid of Hawara of the same dynasty was opened after months of mining, and by searching over the chips of stone lying deep in the water, the king's name was found—Amencmhat III.

(7) XVIIIth Dynasty. Descending to the XVIIIth dynasty, about 1500 B. C., another town was cleared—Medinet Gurob—and the products of that age were collected. Here many clear evidences proved that the "Mykenæan" or "Aegean" remains belong to this age. At both of these towns hundreds of signs have been found scratched on the pottery. These are not known in any kind of Egyptian writing, though many of them may be traced to an Egyptian origin, and these signs were used in combination to express words. In short, they appear to be the materials of the alphabet in course of gradual formation, growth and selection, and as every sign of the earliest Phœnician alphabet is almost exactly to be found among these, we can hardly refuse to see here the first stage of the Western scripts. Such signs are common in those towns which show strong traces of foreign occupation, but only about a fiftieth of the proportion are found in a thoroughly Egyptian town of the same age.

This again suggests that they were used by the foreign people, who were ignorant of the complications of the hieroglyphic system.

Of the end of the eighteenth dynasty the town built by Khuenaten about 1400 B. C., now known as Tell el Amarna, was excavated, principally over the palace, the rubbish heaps and the great temple. It had been most utterly destroyed anciently and only chips were to be found, yet these comprised highly valuable results. Over a thousand pieces of Greek vases of the "Aegean" or "Mykenæan" styles were found, mingled with dozens of the objects of Khuenaten, proving the age of that Greek culture; the house from which came the celebrated cuneiform tablets was cleared, and parts of the dictionaries of the scribes were recovered; two great painted pavements of the palace have revealed an unexpected style of naturalism; portions of the gorgeous inlaying of colored glazes and hard stones show the magnificence of the decorations. The sites of the glass factories have yielded every stage of the glass making, from crude materials to finished vases; the glaze factories have yielded thousands of molds, and innumerable fragments of sculpture have proved the brilliancy and novel style of the naturalistic school of art peculiar to that reign.

(8) XXVIth Dynasty. Of the twenty-sixth dynasty, about 600 B. C., a tomb was opened at Hawara, which contained the most complete and magnificent set of amulets yet known, and these are now preserved exactly in their original order.

We now come to the age of the Greek settlements. The two great camps of the Greek mercenaries, one on each flank of the Delta, were discovered at Daphnæ and Naukratis. At Daphnæ

the Talpanhes of Jeremiah (Jer. ii:16; xliii:7-9; xlv:1; xlvi:14), (see *TAHPANHES*), to which the Jewish princesses fled, the fort is still called "The Palace of the Jew's Daughter," and the pavement before the entrance named by Jeremiah was identified. Beneath the corners of the fort the foundation deposits of Psammetichus were discovered.

The chambers of the fort yielded a great variety of Greek vases of especial value, as it is historically certain that they belong to between the years 665 and 565 B. C., and the camp yielded a large quantity of arms, etc.

At Naukratis the rubbish trench of the temple of Apollo was found, filled with portions of Greek vases, bearing the earliest series of Ionic inscriptions known, and probably the very earliest examples. The celebrated temple of Aphrodite contained large quantities of painted Greek vases, many of the special wares of Naukratis. The Pan-hellenion and the other temples of the Dioskouroi and Hera were also identified. And here were first found the foundation deposits, now so much valued for historical purposes.

(9) Ptolemaic Times. Coming to Ptolemaic times the ignoble looking mummy coverings of the cemetery of Gurob have provided the oldest literary papyri known, the fragments of Plato, Euripides and Homer, the series of wills of Greek soldiers, and the many letters and accounts which explain the condition of the Fayum and the organization of the administration.

(10) Roman Age. Of the Roman age many more papyri have been found, including the large series of burnt documents at Tanis; two of these now published are unique—the school book of hieroglyphs and the geographical lists. These papyri were completely carbonized, but yet perfectly legible, and easily preserved by careful treatment. At Hawara the portrait paintings done in colored wax on panels, and attached to the mummies, have thrown much light on the style and methods of the Greek artists, and are astonishingly good considering the base period of the second and third centuries A. D. to which they belong.

In all the periods the most abundant objects are pottery and beads, hence they are the most ready keys for the archæologist to use in deciding historical questions. Special care has been taken in laying down clear results about these decisive materials. And though nothing was known about them ten years ago, yet now it is easy to name at once the date of a single chip of pottery or a single small bead.

(11) Conclusion. These results which I have thus briefly summarized will be seen to depend almost entirely on the use of small evidences and little objects such as would be quite neglected by the older system of work. If any justification of the scientific system of the new archæology were needed, such a series of results obtained in eleven years by a single worker at a small cost would be enough. But principles which are obvious to those who will to understand them need no support from their results. To the scientific principles of the new archæology we may look for harvests which shall exceed all our past gatherings when these methods are thoroughly carried out, by all who take the responsibility of attacking the past, and of making or marring a chapter of history.

W. M. F. P.

(12) Tablet Concerning Israel. Since this article was written "A Tablet Concerning Israel" has been found by Professor Petrie, which is the largest yet discovered, being ten feet and three

inches high and five feet and four inches wide. It is of black syenite, highly polished, and covered with a scene of offering, and an inscription of thirty-one lines of hieroglyphics. This inscription had been for the most part erased by Akhenaten, and then re-engraved by Seti I. Afterward it was stolen by Merenptah and engraved on the back with a long inscription.

This inscription recorded mainly the deliverance of Egypt from the Libyans, and the flight of their king by night alone and on foot, leaving all his women behind without either food or drink.

Towards the close he recited the various places taken in his Syrian war, and among these, apparently, in Northern Palestine, he spoiled "the people of Israel." The rendering of this name is most distinct and has been accepted by Dr. Naville, Dr. Spiegelberg and Professor Maspero.

Here we have the statement of the Egyptian king that he fought the people of Israel, apparently in Palestine, about 1200 B. C. This enormous tablet is one of the most important monuments yet found, on account of its great size, the length of the inscription, its completeness, and the unique importance of it to Biblical history.

ARCHANGEL (ärk'än-jël), (Gr. ἀρχάγγελος, chief angel, 1 Thess. iv:16; Jude 9.) See ANGEL.

ARCHELAUS (är'ke-lä'us), (Gr. Ἀρχέλαος, people's chief), son of Herod the Great, and his successor in Idumæa, Judæa, and Samaria (Matt. ii:22). (See HERODIAN FAMILY.)

ARCHERY (ärb'er-y). See ARMS, ARMOR.

ARCHEVITE (är'ke-vite), (Heb. אֲרַכְוִי, ar-kevi', meaning uncertain; Chald. אֲרַכְוִי, ar-kevi-ah'ee), perhaps the inhabitants of Erech, who had a colony in Samaria (Ezra iv:9).

ARCHI (är'ki), (Heb. with the art., אֲרַכְוִי, ha-ar-kee'), a city of Manasseh, near Bethel (Josh. xvi:2). Perhaps settled by a colony from Babylon, and named after Erech, in Babylonia. Conder identifies it with the village of 'Ain 'Arek, which is in the required position.

ARCHIPPUS (ar-kip'pus), (Gr. Ἀρχιππος, ar-khip'pos, chief groom).

A Christian minister, whom St. Paul calls his fellow-soldier, in Philen. ii, and whom he exhorts to renewed activity in Col. iv:17. Archippus had exercised the office of Evangelista sometimes at Ephesus, sometimes elsewhere. He finally resided at Colosse, and there discharged the office of presiding presbyter or bishop when St. Paul wrote to the Colossian church. The exhortation given to him in this epistle has, without sufficient grounds, been construed into a rebuke for past negligence.

ARCHISYNAGOGUS (ar'kis-syn-a-gō'gus), (Gr. ἀρχισυνάγωγος, ar-khis-u-nah'goh-gos, chief of the synagogue), called also ruler of the synagogue (Luke viii:41), and simply ἀρχων (Matt. ix:18).

In large synagogues there appears to have been a college or council of elders (πρεσβύτεροι, Luke vii:3), to whom the care of the synagogue and the discipline of the congregation were committed, and to all of whom this title was applied (Mark v:22; Acts xiii:15; xviii:8, compared with verse 17). Their duties were to preside in the public services, to direct the reading of the Scriptures and the addresses to the congregation (Vitringa, *De Synagoga Vetere*, lib. 3, part i. c. 7; Comp. Acts xiii:15), to superintend the distribution of alms and to punish transgressors either by scourging (Comp. Matt. x:17; xxiii:34; Acts xxii:19) or by excommunication. In a more

restricted sense the title is sometimes applied to the president of this council, whose office, according to Grotius (*Annotationes in Matt. ix:18; Luke xiii:14*) and many other writers, was different from and superior to that of the elders in general. Vitringa maintains that there was no such distinction of office.

ARCHITE (är'kite), (Heb. with the art., אֲרַכְוִי, ha-ar-kee', the long), the usual designation of David's friend Hushai (2 Sam. xv:32; xvi:16; xvii:5, 14), B. C. about 1050.

ARCHITECTURE (är-ki-tëct'ure), (Gr. ἀρχιτέκτων, ar-khee-tek'tone; Lat. *architectura*).

It was formerly common to claim for the Hebrews the invention of scientific architecture, and to allege that classical antiquity was indebted to the Temple of Solomon for the principles and many of the details of the art. A statement so strange, and even preposterous, would scarcely seem to demand attention at the present day; but as it is still occasionally reproduced, and as some respectable old authorities can be cited in its favor, it cannot be passed altogether in silence. (See TEMPLE.) It may here suffice to remark that temples previously existed in Egypt, Babylon, Syria and Phœnicia, from which the classical ancients were far more likely to borrow the ideas which they embodied in new and beautiful combinations of their own. But there are few notions, however untenable, which have not some apparent foundation in fact. So in the present case, it is shown, first, that a resemblance of plan and detail can be traced between certain heathen temples and the Temple at Jerusalem, and, secondly, it is alleged that this could not be owing to imitation in the latter, because the *tabernacle*, of which the Temple was a sort of imitation, was a divine suggestion, being framed according to a pattern shown to Moses on the Mount (Exod. xxv:40). This is the sole ground on which the claim made for the Hebrew architecture can be rested. But 'a pattern' is not necessarily or probably a new thing; in the usual sense it is almost always a new combination or adaptation of existing materials. And it may be shown, not only from historical probability, but from actual examples (see ARK) that nothing more than this is here to be understood—nothing more than that Moses was instructed how best to apply the materials of existing sacred architecture (more especially that of Egypt) to the object in view. The pattern was necessary to make him understand how this application was to be made, and to render it clear to him what parts of existing structures should be rejected or retained. Indeed, this is proved by the Scripture itself; for David, in his charge to Solomon concerning the Temple, says: 'All this the Lord made me understand in writing by his hand upon me, even all the works of this pattern (1 Chron. xviii:19). Now, whatever be the meaning of this, it must mean nearly the same thing as in the parallel passage respecting the tabernacle. Yet it is on all hands admitted that the Temple of which this is said was an application and extension of ideas already existing in the tabernacle. The text, therefore, must not be taken in the sense of complete origination.

There has never been any people for whom a peculiar style of architecture could with less probability be claimed than for the Israelites. On leaving Egypt they could only be acquainted with Egyptian art. On entering Canaan they necessarily occupied the buildings of which they had dispossessed the previous inhabitants, and the succeeding generations would naturally erect such buildings as the country previously contained.

The architecture of Palestine, and as such, eventually that of the Jews, had doubtless its own characteristics, by which it was suited to the climate and condition of the country, and in the course of time many improvements would no doubt arise from the causes which usually operate in producing change in any practical art. From the want of historical data and from the total absence of architectural remains, the degree in which these causes operated in imparting a peculiar character to the Jewish architecture cannot now be determined, for the oldest ruins in the country do not ascend beyond the period of the Roman domination. It does, however, seem probable that among the Hebrews architecture was always kept within the limits of a mechanical craft, and never rose to the rank of a fine art. Their usual dwelling-houses differed little from those of other eastern nations, and we nowhere find anything indicative of exterior embellishment. Splendid edifices, such as the palace of David and the Temple of Solomon, were completed by the assistance of Phœnician artists (2 Sam. v:11; 1 Kings v:6, 18; 1 Chron. xiv:1). After the Babylonish exile the assistance of such foreigners was likewise resorted to for the restoration of the Temple (Ezra iii:7). From the time of the Maccabæan dynasty, the Greek taste began to gain ground, especially under the Herodian princes, who seem to have been possessed with a sort of mania for building, as was shown in the structure and embellishment of many towns, baths, colonnades, theaters and castles (Joseph. *Antiq.* xv:8, 1; xv:19, 4; xv:10, 3; *De Bell. Jud.* i:4, 1). The Phœnician style, which seems to have had some affinity with the Egyptian, was not, however, superseded by the Grecian, and even as late as the Mishna (*Bava Bathra*, iii:6), we read of Tyrian windows, Tyrian porches, etc. (See HOUSE.)

With regard to the instruments used by builders—besides the more common, such as the ax, saw, etc., we find incidental mention of the compass and plumb-line (Amos vii:7).

ARCHITRICLINUS (ar'ki-tri-clī'nus), (Gr. Ἀρχιτρικλίνος, *ar-khi-trik'-lee-nos*, master of the triclinium, or dinner-bed), very properly rendered in John ii:8, 9, 'master of the feast,' equivalent to the Roman *Magister Convivii*.

The Greeks also denoted the same social officer by the title of *Symposiarch*, that is, *Master of the Symposium*. He was not the giver of the feast, but one of the guests specially chosen to direct the entertainment, and promote harmony and good fellowship among the company. In the apocryphal Ecclesiasticus (xxxv:1, 2) the duties of this officer among the Jews are indicated. He is there, however, called *director*. (See ACCUBATION.)

ARCTURUS (ark-tū'rus), (Heb. אַרְכִּיִּשׁ, *arush*, or אַרְכִּיִּשׁ, *ah'yish*), the Latin form of the Gr. ἀρκτοῦρος, signifies, properly, *the Bear's tail*, and denotes a star in the tail of the Great Bear, or constellation Ursa Major.

Job is supposed to speak of Arcturus, or the Bear, under the name of *Ash* (אַשׁ), chap. ix:9; xxxviii:32.

ARD (ärd), (Heb. אַרְדִּי, *ard*, perhaps fugitive), son of Bela and grandson of Benjamin (Gen. xlvi:21; Num. xxvi:40), B.C. about 1660.

In 1 Chron. viii:3 he is called Addar.

ARDITES (ärd-ites), (Heb. with the art, אַרְדִּיִּתִּי, *ha-ar-dee'*, the Ardite, belonging to Ard), the descendants of Ard (Num. xxvi:40; Gen. xlvi:21).

ARDON (är'don), (Heb. אֲרֹנָה, *ar-dohn'*, descendant), son of Caleb, the son of Hezron, by his wife Azubalı (1 Chron. ii:18), B.C. about 1560.

ARELI (a-rē'li), (Heb. אֲרֵלִי, *ar-ay-lee'*, heroic), a son of Gad (Gen. xlvi:16; Num. xxvi:17), B.C. 1700. His descendants, the Arelites, are mentioned in Num. xxvi:17.

AREOPAGUS (är'e-öp'a-güs), an Anglicized form of the original words (ὁ Ἀρειος πάγος), signifying *the Hill of Ares, or Mars*. The Council was also termed the *Council on Mars Hill*; sometimes *the Upper Council*, from the elevated position where it was held; and sometimes simply, but emphatically, *the Council*; but it retained, till a late period, the original designation of Mars Hill, being called by the Latins Scopulus Martis, Curia Martis (Juvenal, *Sat.* ix:101), and still more literally Areum Judicium (Tacit. *Annal.* ii:55).

The place and the Council are topics of interest to the biblical student, chiefly from their being the scene of the interesting narrative and sublime discourse found in Acts xvii, where it appears that the apostle Paul, feeling himself moved, by the evidences of idolatry with which the city of Athens was crowded, to preach Jesus and the resurrection, both in the Jewish synagogues and in the market-place, was set upon by certain Epicurean and Stoic philosophers, and led to the Areopagus, in order that they might learn from him the meaning and design of his new doctrine.

The Areopagites took cognizance of murders, impieties and immoralities; they punished vices of all kinds—idleness included; they rewarded or assisted the virtuous; they were peculiarly attentive to blasphemies against the gods, and to the performance of the sacred mysteries. It was, therefore, with the greatest propriety, that Paul was questioned before this tribunal. Whether or not the Apostle was criminally arraigned, as a setter forth of strange gods, before the tribunal, which held its sittings on the hill, may be considered as undetermined, though the balance of evidence seems to incline to the affirmative. Whichever view on this point is adopted, the dignified, temperate, and high-minded bearing of Paul under the peculiar circumstances in which he was placed are worthy of high admiration, and will appear the more striking the more the associations are known and weighed which covered and surrounded the spot where he stood. Nor does his eloquent discourse appear to have been without good effect; for though some mocked, and some procrastinated, yet others believed, among whom was a member of the Council, 'Dionysius, the Areopagite,' who has been represented as the first bishop of Athens, and is said to have written books on the 'Celestial Hierarchy;' but their authenticity is questioned.

The Court. The court of Areopagus was one of the oldest and most honored, not only in Athens, but in the whole of Greece, and, indeed, in the ancient world. Through a long succession of centuries it preserved its existence amid changes corresponding with those which the state underwent, till at least the age of the Cæsars (Tacitus, *Ann.* ii:55). The ancients are full of eulogies on its value, equity, and beneficial influence; in consequence of which qualities it was held in so much respect that even foreign states sought its verdict in difficult cases. Like everything human, however, it was liable to decline, and, after Greece had submitted to the yoke of Rome, retained probably little of its ancient character beyond a certain dignity, which was itself cold and barren.

The origin of the court ascends back into the darkest mythical period. From the first its constitution was essentially aristocratic; a character which to some extent it retained even after the democratic reforms which Solon introduced into the Athenian constitution. By his appointment the nine archons became for the remainder of their lives Areopagites, provided they had well discharged the duties of their archonship, were blameless in their personal conduct, and had undergone a satisfactory examination. Its power and jurisdiction were still further abridged by Pericles, through his instrument Ephialtes. Following the political tendencies of the state, the Areopagus became in process of time less and less aristocratical, and parted piecemeal with most of its important functions. First its political power was taken away, then its jurisdiction in cases of murder, and even its moral influence gradually departed. During the sway of the Thirty Tyrants its power, or rather its political existence, was destroyed. On their overthrow it recovered some consideration, and the oversight of the execution of the laws was restored to it by an express decree. Isocrates endeavored by his *Arcopagite speech* to revive its ancient influence. The precise time when it ceased to exist cannot be determined; but evidence is not wanting to show that in later periods its members ceased to be uniformly characterized by blameless morals.

It is not easy to give a correct summary of its several functions, as the classic writers are not agreed in their statements, and the jurisdiction of the court varied, as has been seen, with times and circumstances. They have, however, been divided into six general classes: (1) Its judicial function; (2) its political; (3) its police function; (4) its religious; (5) its educational; and (6) its financial. Notices on the subject may be found in the works of Tittman, Heffter, Hudtwalcker, Wachsmuth, Pauly, and Winer.

AREOPOLIS (är'e-öp'o-lis). See AR; AROER.

ARETAS (är'e-täs) (Gr. *'Apetas, ar-et'as*), the common name of several Arabian kings.

1. The first of whom we have any notice was a contemporary of the Jewish high-priest Jason and of Antiochus Epiphanes about B. C. 170 (2 Macc. v:8).

2. Josephus (*Antiq.* xiii:13, 3) mentions an Aretas, king of the Arabians (called Obodas, xiii:13, 5), contemporary with Alexander Jannæus (died B. C. 79) and his sons. After defeating Antiochus Dionsysus, he reigned over Cœle-Syria, *being called to the government by those that held Damascus*.

He took part with Hyrcanus in his contest for the sovereignty with his brother Aristobulus, and laid siege to Jerusalem, but, on the approach of the Roman general Scarus, he retreated to Philadelphia (*De Bell. Jud.* i:6, 3). Hyrcanus and Aretas were pursued and defeated by Aristobulus

at a place called Papyron, and lost above 6,000 men. Three or four years after, Scarus, to whom Pompey had committed the government of Cœle-Syria, invaded Petræa, but finding it difficult to obtain provisions for his army, he consented to withdraw on the offer of 300 talents from Arctas (Joseph. *Antiq.* xiv: 5, 1). Haver-

camp has given an engraving of a denarius intended to commemorate this event, on which Aretas appears in a supplicating posture, and taking hold of a camel's bridle with his left hand, and with his right hand presenting a branch of the frankincense-tree. (See Illustration.)

3. Aretas, whose name was originally Æneas, succeeded Obodas ('Obôdas). He was the father-in-law of Herod Antipas. The latter made proposals of marriage to the wife of his half-brother Herod-Philip, Herodias, the daughter of Aristobulus, their brother, and the sister of Agrippa the Great. In consequence of this, the daughter of Aretas returned to her father, and a war, which had been fomented by previous disputes about the limits of their respective countries, ensued between Aretas and Herod. The army of the latter was totally destroyed; and on his sending an account of his disaster to Rome, the emperor immediately ordered Vitellius to bring Aretas prisoner alive, or, if dead, to send his head (Joseph. *Antiq.* xviii: 5, 1). But while Vitellius was on his march to Petra, news arrived of the death of Tiberius, upon which, after administering the oath of allegiance to his troops, he dismissed them to winter-quarters and returned to Rome. It must have been at this juncture that Aretas took possession of Damascus, and placed a governor in it with a garrison. For a knowledge of this fact we are indebted to the apostle Paul. 'In Damascus the governor under Aretas the king kept the city of the Damascenes with a garrison, desirous to apprehend me; and through a window in a basket was I let down by the wall, and escaped his hands' (2 Cor. xi:32, compared with Acts ix:24). We are thus furnished with a chronological mark in the Apostle's history. From Gal. i:18, it appears that Paul went up to Jerusalem from Damascus three years after his conversion. The emperor Tiberius died in A. D. 37; and as the affairs of Arabia were settled in the second year of Caligula, Damascus was then most probably reoccupied by the Romans. If, then, Paul's flight took place in A. D. 39, his conversion must have occurred in A. D. 36 (Neander's *History of the Planting of the Christian Church*, i:107, English trans.; Lardner's *Credibility*, etc. Supplement, chap. xi; *Works*, ed. 1835, verse 497).

ARGAZ (är'gaz), (Heb. אַרְגָּז, *ar-gawz'*, that which is laid down), the receptacle called, in the Authorized Version, a 'coffer' (1 Sam. vi:8, 11, 15), which the Philistines placed beside the ark when they sent it home, and in which they deposited the golden mice and emerods that formed their trespass-offering.

ARGOB (är-göb), (Heb. אַרְגֹּב, *ar-gobe'*).

1. A district in Bashan, east of the Lake of Gennesareth, which was given to the half-tribe of Manasseh (Deut. iii:4, 13; 1 Kings iv:13; 2 Kings xv:25).

(1) **Description.** It is named only four times in the Bible. It is about 30 miles long by 20 miles wide, chiefly a field of basalt (black rock), elevated about 30 feet above the surrounding plain, and bordered by a rocky rampart of broken cliffs. It once contained 60 strong and fortified cities, the ruins of many of them being still to be seen. It is now called the *Lejah*.

(2) **History.** Jair took 60 of its cities (Deut. iii:4, 5, 14). Absalom fled thither (2 Sam. xii:38). Solomon placed an officer over its 60 great cities with brazen walls (1 Kings iv:13). Porter describes this region as "literally crowded with towns and large villages; and though a vast

majority of them are deserted, they are not ruined. I have more than once entered a deserted city in the evening, taken possession of a comfortable house, and spent the night in peace. Many of the houses in the ancient cities of Bashan are perfect as if only finished yesterday. The walls are sound, the roofs unbroken, and even the window-shutters in their places. These ancient cities of Bashan probably contain the very oldest specimens of domestic architecture in the world." (See *Giant Cities of Bashan*.) But these ruins are now ascertained to belong to the Roman period, and after the Christian era. The American Palestine Exploration Society has explored that East Jordan region and taken photographs of ruins of theaters, palaces, and temples (Schaff, *Bib. Dict.*).

2. The capital of the region of Argob. Eusebius says that Argob was fifteen miles west from Gerasa. It is probably the same as Ragab, or Ragabah, mentioned in the Mishna, in Menachoth (viii:3), and in Josephus (*Antiq.* lib. xiii, cap. 23). The Samaritan translation, instead of Argob, generally puts Rigobah.

ARIDAI (a-ri'd'a-i), (Heb. אֲרִידַי, *ar-ee-dah'ee*, meaning uncertain, perhaps strong), ninth son of Haman, hanged with his father (Esther ix:9).

ARIDATHA (a-ri'd'a-thā or ā'r'i-dā'thā), (Heb. אֲרִידַתָּא, *ar-ee-daw-thaw'*, strong), the sixth son of Haman, slain by the Jews (Esth. ix:8) B. C. about 510.

ARIEH (a-ri'eh or ā'ri-eh), (Heb. אֲרִיֵּה, *ar-yay'*, the lion), an accomplice of Pekah in his conspiracy against Pekahiah, or one of the princes of Pekahiah, who was put to death with him (2 Kings xv:25), B. C. 761.

ARIEL (ā'ri-el or a-ri'el), (Heb. אֲרִיֵּל, *ar-ee-ale'*, lion of God).

1. A word meaning 'lion of God,' and correctly enough rendered by 'lion-like,' in 2 Sam. xxiii:20; 1 Chron. xi:22.

It was applied as an epithet of distinction to bold and warlike persons, as among the Arabians, who surnamed Ali 'The Lion of God.'

2. The same word is used as a local proper name in Is. xxix:1, 2, applied to Jerusalem—'as victorious under God,' and in Ezek. xliii:15, 16, to the altar of burnt offerings. The Arabic means *fire-hearth*, which, with the Heb. *El, God*, supplies a more satisfactory signification. It is thus applied, in the first place, to the altar, and then to Jerusalem as containing the altar.

ARIMATHÆA or **ARIMATHEA** (ār-i-mathē'ā), (Gr. Ἀριμαθία, *ar-ee-math-ah-ee'ah*, a height), the birthplace of the wealthy Joseph, in whose sepulcher our Lord was laid (Matt. xxvii:57; John xxix:38).

Luke (xxiii:51) calls it 'a city of the Jews;' which may be explained by 1 Macc. xi:34, where King Demetrius thus writes—'We have ratified unto them [the Jews] the borders of Judæa, with the three governments of Aphereum, Lydda, and *Ramathaim*, that are added unto Judæa from the country of Samaria.' Eusebius (*Onomast.* s. v.) and Jerome (*Epit. Paulæ.*) regard the Arimathea of Joseph as the same place as the Ramathaim of Samuel, and place it near Lydda or Diospolis. Hence it has by some been identified with the existing Ramleh, because of the similarity of the name to that of Ramah, of which Ramathaim is the dual; and because it is near Lydda or Diospolis. Professor Robinson, however, disputes this conclusion on the following grounds: (1) That

Abulfeda alleges Ramleh to have been built after the time of Mohammed, or about A. D. 716, by Suleiman Abd-al Malik. (2) That Ramah and Ramleh have not the same signification. (3) That Ramleh is in a plain, while Ramah implies a town on a hill. To this it may be answered that Abulfeda's statement may mean no more than that Suleiman *rebuilt* the town, which had previously been in ruins, just as Rehoboam and others are said to have *built* many towns which had existed long before their time; and that the Moslems seldom built towns but on old sites and out of old materials; so that there is not a town in all Palestine which is with certainty known to have been founded by them. In such cases they retained the old names, or others resembling them in sound, if not in signification, which may account for the difference between Ramah and Ramleh. Neither can we assume that a place called Ramah could not be in a plain, unless we are ready to prove that Hebrew proper names were *always* significant and appropriate. This they probably were not. They were so in early times, when towns were few; but not eventually, when towns were numerous, and took their names arbitrarily from one another without regard to local circumstances. Further, if Arimathea, by being identified with Ramah, was necessarily in the mountains, it could not have been 'near Lydda,' from which the mountains are seven miles distant. This matter, however, belongs more properly to another place. (See RAMAH; RAMATHAIM-ZOPHIM.)

It is alluded to here merely to show that Dr. Robinson's objections have not entirely destroyed the grounds for following the usual course of describing Ramleh as representing the ancient Arimathea.

Ramleh is in N. lat. 31 deg. 59 min. and E. long. 35 deg. 28 min., 8 miles S. E. from Joppa, and 24 miles N. W. by W. from Jerusalem. It lies in the fine undulating plain of Sharon, upon the eastern side of a broad low swell rising from a fertile though sandy plain. Like Gaza and Jaffa, this town is surrounded by olive groves and gardens of vegetables and delicious fruits.

ARIOCH (a'ri-ōk), (Heb. אֲרִיֹךְ, *ar-yoke'*, lion-like or venerable).

1. Arioch, king of Ellasar, according to the fourteenth chapter of Genesis, was one of the four confederate kings who, under the lead of Chedorlaomer, king of Elam, invaded Palestine in the time of Abraham.

The entire interest of the name centers in George Smith's identification of Arioch with a king who had previously been known from the inscriptions, as Rim-Sin, king of Larsa. George Smith found evidence that the moon-god Sin bore the name of Agu or Aku in the Mongolian or Akkadian language. Translated from the Semitic into the Akkadian, the name Rim-Sin would be Eri-Agu or Eri-Aku.

These proper names in earlier times do not often appear spelled out in full, a single ideograph having the meaning *servant* to be read either Rim, or Eri, or Arad, or Agu; just as we read the same algebraic sign either minus or less, the one word being Latin and the other English. But in one case at least we find the name Eri-Agu spelled out in full, so that we know that this pronunciation was used as well as Rim-Sin. Now Eri-Agu or Eri-Aku is as near an approximation to Arioch as the language will allow.

As for the Ellasar of which Arioch of Genesis was king, that instantly suggests the Larsa over

which Eri-Aku ruled. We do not even need to suppose transposition of the *r* and *s*, for we have the spelling Larsa in the old monuments. Before the discovery that there was an Eri-Aku, king of Larsa, there was no other easy identification of the name Ellasar except *Kalah-Shergot*, the early capital of Assyria, on the Tigris, the old name of which was Alu-Asser or the "City of Assur," which might be transformed into Ellasare.

But the confederacy antedates, so far as we know, the founding of this northern city. We may then dismiss Alu-Asser and content ourselves with considering who was Eri-Aku, king of Larsa.

The only Ari-Aku we know of as a Babylonian king anywhere or at any time was this Ari-Aku, or Arioch, king of Larsa or Ellasar, and he reigned just at this time of Abraham. If there were to be such an invasion of Palestine in the time of Abraham, Eri-Aku, king of Larsa, would be one of the confederate kings.

This is a fact which could not possibly be known or confirmed except by the original records handed down from the time of the author of Genesis, and now carefully investigated. It is true some careful scholars like Tiele are slow to accept this identification, but Hommel and others have fully accepted and defended it, and in Billerbreck's "Susa," recently published, it is treated as now to be fully admitted.

We have no small number of inscriptions which mention Rim-Sin, or Eri-Aku, and the events of his life are fairly well known for the king of a small province who lived not far from two thousand years before Christ. Larsa was one of the vassal states of Babylonia, while it was subject to the king of Elam and its king was simply a ruler under the king of Elam up to the time when the Elamite or Mongol rule was overthrown by the Semitic Babylonian patriot, Hammurabi. The last of the kings of Larsa was this Eri-Aku, and it is quite possible, as argued by Schrader, that Hammurabi was no other than Amraphel, king of Shinar, who was another of the confederate kings, and who may have taken part in this invasion of Palestine before his rebellion.

Eri-Aku's father was Kudur-Mabug, and his mother was Rim-Nannar; his grandfather was Simitishilhak.

One of the most important of the old monuments which mentions Eri-Aku (Rim-Sin) is the record of the dedication of a temple and it gives us the genealogy of Eri-Aku, and shows that he and his father, Kudur-Mabug, ruled at the same time in Yamutbal, which lay on the eastern or Elamite side of the Tigris. The father was the "over-lord," while his son and vassal, Eri-Aku, reigned in Larsa; perhaps both were vassals of the Elamite king in Susa, who may have been Chederlaomer.

Another inscription of Kudur-Mabug, found at Ur, tells us very much the same thing, giving the names of the three generations. There are no less than three other similar inscriptions known in which Eri-Aku appears as the builder, and prays for the blessing of the god upon himself and his father.

The fact that Eri-Aku's mother's name was Rim-Sin has some suggestiveness. His father, Kudur-Mabug, seems to have married a princess of Ur. Her name, Rim-Nannar, means servant of Nannar, Nannar being the name of the moon-god of Ur. But Sin was the peculiarly Semitic name of the moon-god, and especially the name prevalent in Haran, where Abraham stopped in his journey from Ur to Palestine, and where there

was a famous temple of Sin. The fact that Kudur-Mabug, with his Mongol name, gave a purely Semitic name to Rim-Sin, his son, shows how thoroughly the rulers of Babylonia had become Semitized.

I have said that Eri-Aku was the last king of Larsa. Up to the time of the conquest of Hammurabi his reign had been a successful one. He seems at one time to have ruled over the whole of Southern Babylonia, for we hear of his extending his power as far as the river Tigris in the east, and across the Euphrates as far as Ur on the west. He ruled Nipper or Nipur as well as Larsa, and made a successful attack on Erech, and even approached nearly to Babylon on the north.

But he represented the foreign dynasty of Elam, which had for two or three centuries held Babylonia in subjection, and although considerably Semitized, yet the Babylonian Semites were ready to throw off the Elamite yoke; and Hammurabi, king of Babylon, making that city his new capital, conquered the whole of the country, overthrew all the vassals of Elam, and became the founder of a strong native dynasty. This dynasty lasted a few centuries, until a new Elamite or Kassite invasion again conquered Babylonia and set up another new dynasty.

A curious record of these successive Elamite invasions exists in this country. About 2750 B. C. the ruler of a city in Southern Babylonia dedicated an agate temple to Ishtar, "for the life of Dungi, the powerful champion, king of Ur." Some five hundred years later, probably about 2285 B. C., when the great Elamite King, Kudur-Nahunt, made the conquest of Babylonia, this tablet was carried, with the image of the goddess, to Elam, and there kept for a thousand years, until about 1300 B. C. King Kurigalzu brought it back to Nipper or Nipur, and presented it to his goddess, Beltis.

There it remained, covered up with the ruins of the city, for more than three thousand years, until the University of Pennsylvania sent an expedition to excavate the old mound of Nipur, when it was found there with the inscriptions which tell the story, and it is now in the University Museum at Philadelphia.

It is one of those witnesses, miraculously preserved, of a history supposed to be utterly lost.

It certainly is amazing that when Genesis tells us simply that one Arioch, king of Ellasar, was a member of an expedition that invaded Palestine in the time of Abraham, we can dig up the cities of Babylonia and learn who he was, who were his father and mother and grandfather, how long he reigned, and what were the chief events in his career, and how his kingdom, and the dynasty which he represented, came to an end.

See *Arioch, King of Ellasar*, by William Hayes Ward, D. D. "*Light on Scriptural Texts from Recent Discoveries.*"—Homiletic Review.

2. A captain in Nebuchadnezzar's bodyguard (Dan. ii:14, 25), B. C. 604.

ARISAI (a-ris'a-i or a-ris'ai), (Heb. אִרְסַי, *ar-ee-sah'ee*, arrow of Aria), eighth son of Haman (Esth. ix:9), B. C. about 473.

ARISTARCHUS (ar-is-tar'kus), (Gr. Ἀριστάρχος, *ar-is'tar-khos*, best leader), a faithful adherent of St. Paul, whose name repeatedly occurs in the Acts and Epistles (Acts xix:29; xx:4; xxvii:2; Col. iv:10; Philem. 24), A. D. 51-57.

He was a native of Thessalonica, and became the companion of St. Paul, whom he accompanied to Ephesus, where he was seized and nearly killed

in the tumult raised by the silversmiths. He left that city with the Apostle, and accompanied him in his subsequent journeys, even when taken as a prisoner to Rome: indeed, Aristarchus was himself sent thither as a prisoner, or became such while there, for Paul calls him his 'fellow-prisoner' (Col. iv:10). The traditions of the Greek church represent Aristarchus as bishop of Apamea in Phrygia, and allege that he continued to accompany Paul after their liberation, and was at length beheaded along with him at Rome in the time of Nero. The Roman martyrologies make him bishop of Thessalonica. But little reliance is to be placed on accounts which make a bishop of almost every one who happens to be named in the Acts and Epistles; and, in the case of Aristarchus, it is little likely that one who constantly traveled about with St. Paul exercised any stationary office.

ARISTOBULUS (ăr'is-to-bū'lus), (Gr. Ἀριστοβούλος, *ar-is-tob'oo-los*, best counsellor), a person named by Paul in Rom. xvi:10 (A. D. 55), where he sends salutations to his household.

He is not himself saluted; hence he may not have been a believer, or he may have been absent or dead. Nothing certain is known respecting him. But tradition has not neglected him; it represents him as brother of Barnabas, and one of the seventy disciples, and alleges that he was ordained a bishop by Barnabas, or by Paul, whom he followed in his travels; and that he was eventually sent into Britain, where he labored with much success, and where he at length died.

Aristobulus is a Greek name, adopted by the Romans, and in very common use among them. It was also adopted by the Jews, and was borne by several persons in the Maccabæan and Herodian families, viz.: (1) Aristobulus, son and successor of John Hyrcanus (see MACCABEES). (2) Aristobulus, second son of Alexander Jannæus, and younger brother of Hyrcanus, with whom he disputed the succession by arms (see MACCABEES). (3) Aristobulus, grandson of the preceding, and the last of the Maccabæan family, who was murdered by the contrivance of Herod the Great, B. C. 34 (see MACCABEES). (4) Aristobulus, son of Herod the Great by Mariamne (see HERODIAN FAMILY).

ARITHMETIC (ă-rith'mē-tĭk), or, as the word derived from the Greek ἀριθμός, *number*, signifies, the science of numbers or reckoning, was unquestionably practised as an art in the dawn of civilization; since to put things, or their symbols, together (addition), and to take one thing from another (subtraction), must have been coeval with the earliest efforts of the human mind; and what are termed multiplication and division are only abbreviated forms of addition and subtraction.

The origin, however, of the earliest and most necessary of the arts and sciences is lost in the shades of antiquity, since it arose long before the period when men began to take specific notice and make some kind of record of their discoveries and pursuits. In the absence of positive information we seem authorized in referring the first knowledge of arithmetic to the East. From India, Chaldæa, Phœnicia, and Egypt, the science passed to the Greeks, who extended its laws, improved its process, and widened its sphere. To what extent the Orientals carried their acquaintance with arithmetic cannot be determined. The greatest discovery in this department of the mathematics, namely, the establishment of our system of ciphers, or of figures considered as distinct from the letters of the alphabet, belongs undoubtedly not to

Arabia, as is generally supposed, but to the remote East, probably India. It is to be regretted that the name of the discoverer is unknown, for the invention must be reckoned among the greatest of human achievements. Our numerals were made known to these western parts by the Arabians, who, though they were nothing more than the medium of transmission, have enjoyed the honor of giving them their name. These numerals were unknown to the Greeks, who made use of the letters of the alphabet for arithmetical purposes.

The Hebrews were not a scientific, but a religious and practical nation. What they borrowed from others of the arts of life they used without surrounding it with theory or expanding and framing it into a system. So with arithmetic, by them called *manah*, from a word signifying to determine, limit, and thence to number. Of their knowledge of this science little is known more than may be fairly inferred from the pursuits and trades which they carried on, for the successful prosecution of which some skill at least in its simpler processes must have been absolutely necessary; and the large amounts which appear here and there in the sacred books serve to show that their acquaintance with the art of reckoning was considerable. Even in fractions they were not inexperienced (Gesenius, *Lehrgeb.* p. 704). For figures, the Jews, after the Babylonish exile, made use of the letters of the alphabet, as appears from the inscriptions on the so-called Samaritan coins (Eckhel, *Doctr. Num.* i, iii, 468); and it is not unlikely that the ancient Hebrews did the same, as well as the Greeks, who borrowed their alphabet from the Phœnicians, neighbors of the Israelites, and employed it instead of numerals.

ARK, NŌAH'S (ărk, nō'ah s), (Heb. תֵּבָא, *tay-baraw*, boat vessel, Gen. vi:14). The word here employed is different from *aron*, which is applied to the *ark of the covenant* and other receptacles which we know to have been chests or coffers.

But it is the same that is applied to the 'ark' in which Moses was hid (Exod. ii:3), the only other part of Scripture in which it occurs. In the latter passage the Septuagint renders it *θίβη*, a *ship*, in the former, *κιβωτός*, a *chest*. The truth seems to be that *aron* denotes any kind of chest or coffer, while the exclusive application of *tebah* to the vessels of Noah and of Moses would suggest the probability that it was restricted to such chests or arks as were intended to float upon the water, of whatever description. The identity of the name with that of the wickerbasket in which Moses was exposed on the Nile has led some to suppose that the ark of Noah was also of wicker-work, or rather was wattled and smeared over with bitumen (Auth. Vers. 'pitch,' Gen. vi:14). This is not *impossible*, seeing that vessels of considerable burden are thus constructed at the present day; but there is no sufficient authority for carrying the analogy to this extent.

(1) **Form and Arrangement.** Vast labor and ingenuity have been employed by various writers in the attempt to determine the form of Noah's ark and the arrangement of its parts. The success has not been equal to the exertion; for, on comparing the few simple facts in the Scripture narrative, every one feels how slight positive data there are for the minute descriptions and elaborate representations which such writers have given. That form of the ark which repeated pictorial representations have rendered familiar—a kind of house in a kind of boat—has not only no foundation in Scripture, but is contrary to reason. The form thus given to it is fitted for progression and

for cutting the waves; whereas the ark of Noah was really destined to float idly upon the waters, without any other motion than that which it received from them. If we examine the passage in Gen. vi:14-16, we can only draw from it the conclusion that the ark was a building in the form of a parallelogram, 300 cubits long, 50 cubits broad, and 30 cubits high. The length of the cubit, in the great variety of measures that bore this name, it is impossible to ascertain and useless to conjecture. So far as the *name* affords any evidence, it also goes to show that the ark of Noah was not a regularly-built vessel, but merely intended to float at large upon the waters. We may, therefore, probably with justice, regard it as a large, oblong, floating house, with a roof either flat or only slightly inclined. It was constructed with three stories, and had a door in the side. There is no mention of windows *in the side*, but *above*, *i. e.*, probably in the flat roof, where Noah was commanded to make them of a cubit in size (Gen. vi:16). That this is the meaning of the passage seems apparent from Gen. viii:13, where Noah removes the covering of the ark in order to ascertain whether the ground was dry; a labor unnecessary surely, had there been windows in the sides of the ark.

(2) **Purpose.** The purpose of this ark was to preserve certain persons and animals from the Deluge with which God intended to overwhelm the land, in punishment for man's iniquities. The persons were eight—Noah and his wife, with his three sons and their wives (Gen. vii:17; 2 Pet. ii:5). The animals were one pair of every 'unclean' animal, and seven pairs of all that were 'clean.' By 'clean,' we understand fit, and by 'unclean,' unfit for food or for sacrifice. Of birds there were seven pairs (Gen. vii:2, 3).

(3) **Species of Animals.** Those who have written professedly and largely on the subject have been at great pains to provide for all the existing species of animals in the ark of Noah, showing how they might be distributed, fed and otherwise provided for. But they are very far from having cleared the matter of all its difficulties. These difficulties, however, chiefly arise from the assumption that the species of *all the earth* were collected in the ark. The number of such species has been vastly underrated by these writers. They have usually satisfied themselves with a provision for three or four hundred species at most. But of the existing mammalia considerably more than one thousand species are known; of birds, fully five thousand; of reptiles, very few kinds of which can live in water, two thousand; and the researches of travelers and naturalists are making frequent and most interesting additions to the number of these and all other classes. Of insects, using the word in the popular sense, the number of species is immense; to say one hundred thousand would be moderate; each has its appropriate habitation and food, and these are necessary to its life; and the larger number could not live in water. Also the innumerable millions upon millions of animalcula must be provided for; for they have all their appropriate and diversified places and circumstances of existence (Dr. J. Pye Smith, *On the Relation Between the Holy Scriptures and Some Parts of Geological Science*, p. 135). Nor do these numbers form the only difficulty; for all land animals have their geographical regions, to which their constitutional natures are congenial, and many could not live in any other situation. We cannot represent to ourselves the idea of their being brought into one small spot, from the polar regions, the torrid zone, and all

the other climates of Asia, Africa, Europe, America, Australia, and the thousands of islands, their preservation and provision, and the final disposal of them, without bringing up the idea of miracles more stupendous than any which are recorded in Scripture.

The difficulty of assembling in one spot, and of providing for in the ark, the various mammalia and birds alone, even without including the otherwise essential provision for reptiles, insects and fishes, is quite sufficient to suggest some error in the current belief. We are to consider the different kinds of accommodation and food which would be required for animals of such different habits and climates, and the necessary provision for ventilation and for cleansing the stables or dens. And if so much ingenuity has been required in devising arrangements for the comparatively small number of species which the writers on the ark have been willing to admit into it, what provision can be made for the immensely larger number which, under the supposed conditions, would really have required its shelter?

(4) **Suggestions.** There seems no way of meeting these difficulties but by adopting the suggestion of Bishop Stillingfleet, approved by Matthew Poole, Dr. J. Pye Smith, Le Clerc, Rosenmüller, and others, namely, that, as the object of the Deluge was to sweep man from the earth, it did not extend beyond that region of the earth which man then inhabited, and that only the animals of that region were preserved in the ark.

The bishop expresses his belief that the Flood was universal as to mankind, and that all men, except those preserved in the ark, were destroyed; but he sees no evidence from Scripture that the whole earth was then inhabited; he does not think that it can ever be proved to have been so; and he asks what reason there can be to extend the Flood beyond the occasion of it. He grants that, as far as the Flood extended, all the animals were destroyed.

As Noah was the progenitor of all the nations of the earth, and as the ark was the second cradle of the human race, we might expect to find in all nations traditions and reports more or less distinct respecting him, the ark in which he was saved, and the Deluge in general. Accordingly no nation is known in which such traditions have not been found. They have been very industriously brought together by Banier, Bryant, Faber and other mythologists. (See DELUGE; NOAH.)

Our present concern is only with the ark. And as it appears that an ark, that is, a boat or chest, was carried about with great ceremony in most of the ancient mysteries, and occupied an eminent station in the holy places, it has with much reason been concluded that this was originally intended to represent the ark of Noah, which eventually came to be regarded with superstitious reverence. On this point the historical and mythological testimonies (as collected in the authors to whom we have referred) are very clear and conclusive. The tradition of a deluge, by which the race of man was swept from the face of the earth, has been traced among the Chaldæans, Egyptians, Phœnicians, Assyrians, Persians, Greeks, Romans, Goths, Druids, Chinese, Hindoos, Burmese, Mexicans, Peruvians, Brazilians, Nicaraguans, the inhabitants of Western Caledonia, and the islanders of the Pacific; and among most of them also the belief has prevailed that certain individuals were preserved in an ark, ship, boat or raft to replenish the desolated earth with inhabitants. Nor are these traditions uncorroborated by coins and monuments of stone. Of the latter

there are the sculptures of Egypt, Babylonia, Assyria, and of India; and, as hinted in a previous article (see ALTAR), it is not unlikely that those of the monuments called Druidical, which bear the name of kist-vaens, and in which the stones are disposed in the form of a chest or house, were intended as memorials of the ark. At least, it has been shown by Davis (*Celtic Researches*) that the ark was not only typified among the Celts by rafts and islands, but by a stone ark or chest, which is precisely the meaning of *kist* (chest) *vaen*.

(5) **Arkite Worship.** Being anxious to touch as lightly as possible upon the vast and curious subject of Arkite worship, we shall confine our medallion illustrations to the two famous medals of Apamea. There were six cities of this name, of which the most celebrated was that of Syria; next to it in importance was the one in Phrygia, called also *Κιβωτός*, *Kibotos*, which, as we have seen, means an ark or hollow vessel. This latter city was built on the river Marsyas, and there seems to have been a notion that the ark rested on the adjoining hills of Celænæ; and the Sibylline oracles, wherever they were written, also include these hills under the name of Ararat, and mention the same tradition. The medals in question belong, the one to the elder Philip, and the other to Pertinax. In the former it is extremely interesting to observe that on the front of the ark is the name of Noah, ΝΩΕ in Greek characters. The

designs on these medals correspond remarkably, although the legends somewhat vary. In both we perceive the ark floating on the water, containing the patriarch and his wife, the dove on wing, the olive branch, and the raven perched on the ark. These medals also represent Noah and his wife on *terra firma*, in the attitude of rendering thanks for their safety. On the panel of the ark, in the coin of Pertinax, is the word ΝΗΙΩΝ, perhaps a provincialism for *Nḥios*, 'an island,' or *Néw*, 'to revive.' On the exergue of the same medal we read distinctly of the *Apameans*, as we do also in that of the other, the first syllable terminating the first line. The genuineness of these medals has been established beyond all question

by the researches of Bryant and the critical inspection of Abbé Barthélemy. There is another medal, struck in honor of the emperor Hadrian, which bears the inscription, '*the ark and the marsyas of the Apameans.*' The coincidences which these medals offer are at least exceedingly curious, and they are scarcely less illustrative of the prevailing belief to which we are referring, if, as some suppose, the figures represented are those of Deucalion and Pyrrha.

ARKITES (ärk-ites), (Heb. אַרְכִּי, *ar-kee'*, a tush), the inhabitants of Arka, mentioned in Gen. x:17; 1 Chron. i:15, as descended from the Phœnician or Sidonian branch of the great family of Canaan.

This, in fact, as well as the other small northern states of Phœnicia, was a colony from the great parent state of Sidon. Arka, or Acra, their chief town, lay between Tripolis and Antaradus, at the western base of Lebanon (Joseph. *Antiq.* i:6, 2; Jerome, *Quæst. in Gen.* x:15). Josephus (*Antiq.* viii:2, 3) makes Bannah—who in 1 Kings iv:16, is said to have been superintendent of the tribe of Asher—governor of Akra by the sea; and if, as commonly supposed, the capital of the Arkites is intended, their small state must, in the time of Solomon, have been under the Hebrew yoke. Subsequently Akra shared the lot of the other small Phœnician states in that quarter; but in later times it formed part of Herod Agrippa's kingdom. The name and site seem never to have been unknown, although for a time it bore the name of Cæsarea Lebani from having been the birthplace of Alexander Severus (Mannert, p. 391). It is repeatedly mentioned by the Arabian writers (Michaelis, *Spicil.* pt. ii, p. 23; Schultens, *Vita Saladini*; Abulfeda, *Tab. Syria*, p. 11). It lay thirty miles from Antaradus, seventeen miles from Tripoli, and, according to Abulfeda, a parasang, or three and one-half miles, from the sea. In a position corresponding to these intimations, Shaw (*Observat.* p. 270), Burckhardt (*Syria*, p. 162), and others noticed the site and ruins. Burckhardt, in traveling from the northeast of Lebanon to Tripoli, at the distance of about four miles south of the Nahr-el-kebir (Eleutherus), came to a hill called Tel-Arka, which, from its regularly flattened conical form and smooth sides, appeared to be artificial. Upon an elevation upon its east and south sides are large and extensive heaps of rubbish, traces of ancient dwellings, blocks of hewn stone, remains of walls and fragments of granite columns. These are no doubt the remains of Arka; and the hill was probably the acropolis or citadel, or the site of a temple.

ARK OF BULRUSHES (ärk of bul'rüş-es).

This ark was made of the bulrush or papyrus, which grows in marshy places in Egypt. It was daubed with slime, which was probably the mud of which their bricks were made, and with pitch or bitumen (Ex. ii:3).

ARK OF THE COVENANT (ärk of the küv'ë-nant), (Heb. אֲרוֹן, *aw-rone'*, Septuagint and New Test. *κιβωτός*, *chest*). The word here used for ark is different from that which is applied to the ark of Noah.

(1) **Names.** It is the common name for a chest or coffer, whether applied to the ark in the tabernacle, to a coffin, to a mummy-chest (Gen. 1:26), or to a chest for money (2 Kings xii:9, 10). Our word *ark* has the same meaning, being derived from the Latin *arca*, a chest. The distinction between *aron* and the present word has already been suggested. The sacred chest is dis-

tinguished from others as the 'ark of God' (1 Sam. iii:3); 'ark of the covenant' (Josh. iii:6; Num. iv:5); 'ark of the law' (Exod. xxv:22). This ark was a kind of chest, of an oblong shape, made of shittim (acacia) wood, a cubit and a half broad and high, two cubits and a half long, and covered with the purest gold. It was ornamented on its upper surface with a border or rim of gold; and on each of the two sides, at equal distances from the top, were two gold rings, in which were placed (to remain there perpetually) the gold-covered poles by which the ark was carried, and which continued with it after it was deposited in the tabernacle. The lid or cover of the ark (translated *propitiatory offer-*

Ark of the Covenant with the Mercy Seat.

ing; mercy-seat) was of the same length and breadth, and made of the purest gold. Over it, at the two extremities, were two cherubim, with their faces turned towards each other and inclined a little towards the lid (otherwise called the *mercy-seat*). Their wings, which were spread out over the top of the ark, formed the throne of God, the King of Israel, while the ark itself was his footstool (Exod. xxv:10-22; Deut. x:3; xxxvii:1-9).

(2) **History.** This ark was the most sacred object among the Israelites. It was deposited in the innermost and holiest part of the tabernacle and temple, called 'the holy of holies,' where it stood so that one end of each of the poles by which it was carried (which were drawn out so far as to allow the ark to be placed against the back wall) touched the veil which separated the two apartments of the tabernacle (1 Kings viii:8). In the ark were deposited the tables of the law (Exod. xxv:16). A quantity of manna was laid up beside the ark in a vase of gold (Exod. xvi:32, 36; 1 Kings viii:9); as were also the rod of Aaron (Num. xvii:9), and a copy of the book of the law (Deut. xxxi:26).

Nothing is more apparent throughout the historical Scriptures than the extreme sanctity which attached to the ark, as the material symbol of the Divine presence. During the marches of the Israelites it was covered with a purple pall, and borne by the priests, with great reverence and care, in advance of the host (Num. iv:5, 6; x:33). It was before the ark, thus in advance, that the waters of the Jordan separated; and it remained in the bed of the river, with the attendant priests, until the whole host had passed over, and no sooner was it also brought up than the waters resumed their course (Josh. iii; iv:7, 10, 11, 17, 18). The ark was similarly conspicuous in the grand procession round Jericho (Josh. vi:4, 6, 8, 11, 12). It is not wonderful, therefore, that the neighboring nations, who had no notion of spiritual worship, looked upon it as the God of the Israelites (1 Sam. iv:6, 7), a delusion which may have been strengthened by the

figures of the cherubim on it. After the settlement of the Jews in Palestine the ark remained in the tabernacle at Shiloh, until, in the time of Eli, it was carried along with the army in the war against the Philistines, under the superstitious notion that it would secure the victory to the Hebrews. They were, however, not only beaten, but the ark itself was taken by the Philistines (1 Sam. iv:3-11; vi:2, 3), whose triumph was, however, very short-lived, as they were so oppressed by the hand of God that, after seven months, they were glad to send it back again (1 Sam. v:7, 8, 9, 10, 11). After that it remained apart from the tabernacle, at Kirjath-jearim (vii:1, 2), where it continued until the time of David, who purposed to remove it to Jerusalem; but the old prescribed mode of removing it from place to place was so much neglected as to cause the death of Uzzah, in consequence of which it was left in the house of Obed-edom (2 Sam. vi:1-11); but after three months David took courage and succeeded in effecting its safe removal, in grand procession, to Mount Zion (ver. 12-19). When the Temple of Solomon was completed, the ark was deposited in the sanctuary (1 Kings viii:6-9). The passage in 2 Chron. xxxv:3, in which Josiah directs the Levites to restore the ark to the holy place, is understood by some to imply that it had either been removed by Amon, who put an idol in its place, which is assumed to have been the 'trespass' of which he is said to have been guilty (2 Chron. xxxiii:23), or that the priests themselves had withdrawn it during idolatrous times and preserved it in some secret place, or had removed it from one place to another. But it seems more likely that it had been taken from the holy of holies during the purification and repairs of the Temple by this same Josiah, and that he, in this passage, merely directs it to be again set in its place. What became of the ark when the Temple was plundered and destroyed by the Babylonians is not known, and all conjecture is useless. The Jews believe that it was concealed from the spoilers, and account it among the hidden things which the Messiah is to reveal. It is certain, however, from the consent of all the Jewish writers, that the old ark was not contained in the second temple, and there is no evidence that any new one was made. Indeed the absence of the ark is one of the important particulars in which this temple was held to be inferior to that of Solomon. The most holy place is therefore generally considered to have been empty in the second temple (as Josephus states, *De Bell. Jud.* v:14), or at most (as the Rabbins allege) to have contained only a stone to mark the place which the ark should have occupied.

(3) **Design and Form.** We now come to consider the design and form of the ark, on which it appears to us that clear and unexpected light has been thrown by the discoveries which have of late years been made in Egypt, and which have unfolded to us the rites and mysteries of the old Egyptians. One of the most important ceremonies was the "procession of shrines," which is mentioned in the Rosetta stone, and frequently occurs on the walls of the temples. The shrines were of two kinds, the one a sort of canopy, the other an ark or sacred boat, which may be termed the great shrine. This was carried with grand pomp by the priests, a certain number being selected for that duty, who supported it on their shoulders by means of long staves, passing through metal rings at the side of the sledge on which it stood, and brought it into the temple, where it was deposited upon a stand or table, in order that the prescribed

ceremonies might be discharged before it. The stand was also carried in procession by another set of priests, following the shrine, by means of similar staves; a method usually adopted for carrying large statues and sacred emblems, too heavy or too important to be borne by one person. The same is stated to have been the custom of the Jews in some of their religious processions (Comp. 1 Chron. xv:2, 15; 2 Sam. xv:24, and Josh. iii:12), as in carrying the ark to its place, into the oracle of the house, to the most holy

(2) The boat or 'ark.' (3) The 'canopy.' This last is not, as the extract would suggest, an alternative for the second; but is most generally seen with and in the boat. This is shown in the first cut, which exhibits all the parts together, and at rest.

The points of resemblance to the Jewish ark are many and conspicuous, as in the 'stand,' which, in some of its forms, and leaving out the figures represented on the sides, bears so close a resemblance to the written description of the Hebrew ark that it may safely be taken as an authentic illustration of its form. Then the cherubim of the Hebrew ark find manifest representatives in the figures facing each other, with wings spread inwards and meeting each other, which we find within a canopy or shrine which sometimes rests immediately upon this 'stand,' but more generally in the boat, which itself rests thereon. We direct

attention also to the hovering wings above, which are very conspicuous in all Egyptian representations. (See CHERUBIM.) Other analogies occur in the persons who bear the shrine—the priests; and in the mode of carrying it, by means of poles inserted in rings; and it is observable that, as in the Hebrew ark, these poles were not withdrawn, but remained in their place when the shrine was at rest in the temple. Such are the principal resemblances.

That the Israelites during the latter part of their sojourn in Egypt followed the rites and religion of the country, and were (at least many of them) gross idolaters, is distinctly affirmed in Scripture (Josh. xxiv:14; Ezek. xxiii:3, 8, 19), and is shown by their ready lapse into the worship of the 'golden calf,' and by the striking fact that they actually carried about with them one of these Egyptian shrines or tabernacles in the wilderness (Amos v:26). From their conduct and the whole tone of their sentiments and character it appears that this stiff-necked and rebellious people were incapable (as a nation) of adhering to that simple form of worship and service which is most pleasing to God.

ARM (ärm), (Heb. usually ארֶמֶץ, *zer-o'ah*).

This word is frequently used in Scripture in a metaphorical sense to denote power. Hence, to 'break the arm' is to diminish or destroy the power (Ps. x:15; Ezek. xxx:21; Jer. xlviii:25). It is also employed to denote the infinite power of God (Ps. lxxxix:13; xlviii:2; Is. liii:1; John xii:38). In a few places the metaphor is, with great force, extended to the action of the arm, as—'I will redeem you with a stretched-out arm' (Exod. vi:5); that is, with a power fully exerted. The figure is here taken from the attitude of ancient warriors baring and outstretching the arm for fight. Thus, in Is. lii:10, 'Jehovah hath made bare his holy arm in the sight of all the nations.' Bishop Lowth has shown, from the Sept. and other versions, that in Is. ix:20, 'they shall eat

place, when the Temple was built by Solomon (1 Kings viii:6). Some of the arks or boats contained the emblems of life and stability, which, when the veil was drawn aside, were partially seen; and others presented the sacred beetle to the sun, overshadowed by the wings of two figures of the goddess Thenei, or Truth, which call to mind the cherubim of the Jews (*Anc. Egyptians*, by J. G. Wilkinson).

(4) **Points of Egyptian Resemblance.** The following points of resemblance will strike the Biblical student, and will attract his close attention to the subject. In the above description three objects are distinguished: (1) The 'stand.'

every one the flesh of his own arm,' should be 'the flesh of his neighbor;' similar to Jer. xix:9, meaning that they should harass and destroy one another.

ARMAGEDDON (är'ma-gēd'don), (Gr. Ἀρμαγεδδών, *ar-mag-ed-dohn*), hill of Megiddo), properly, the mountain of Megiddo, a city on the west of the river Jordan, rebuilt by Solomon (1 Kings ix:15). Both Ahaziah and Josias died there.

In the mystical language of prophecy, the word mountain represents the Church, and the events which took place at Megiddo are supposed to have had a typical reference to the sorrows and triumphs of the people of God under the gospel. 'In that day,' says Zechariah, xii:11, 'shall there be a great mourning in Jerusalem, as the mourning of Hadadrimmon in the valley of Megiddon,' referring to the death of Josias. But the same spot witnessed, at an earlier period, the greatest triumph of Israel (Judg. v:19.) 'He gathered them together into a place called in the Hebrew tongue Armageddon,' is the language of the Apocalypse; and the word has been translated by some as 'the mountain of destruction,' by others as 'the mountain of the gospel,' many ingenious speculations having been employed on the passage in which it occurs, but with little satisfaction to the more sober readers of Divine revelation.

ARMENIA (ar-mē'ni-à), (the Greek form of Ararat), a country of Western Asia; is not mentioned in Scripture under that name, but is supposed to be alluded to in the three following Hebrew designations, which seem to refer either to the country as a whole, or to particular districts.

1. Names. (1) **Ararat**, the land upon (or over) the mountains of which the ark rested at the Deluge (Gen. viii:4); whither the sons of Sennacherib fled after murdering their father (2 Kings xix:37; Is. xxxvii:38), and one of the 'kingdoms' summoned, along with Minni and Ashkenaz, to arm against Babylon (Jer. li:27). That there was a province of Ararat in ancient Armenia, we have the testimony of the native historian, Moses of Chorene. It lay in the center of the kingdom, was divided into twenty circles, and, being the principal province, was commonly the residence of the kings or governors. For other particulars respecting it, and the celebrated mountain which in modern times bears its name, see ARARAT.

(2) **Minni** is mentioned in Jer. li:27, along with Ararat and Ashkenaz, as a kingdom called to arm itself against Babylon. The name is by some taken for a contraction of 'Armenia,' and the Chald. in the text in Jeremiah has *Hurmini*. In Ps. xlv:8, where it is said 'out of the ivory palaces whereby they made thee glad,' the Hebrew word rendered 'whereby' is *minni*, and hence some take it for the proper name, and would translate 'palaces of Armenia,' but the interpretation is forced and incongruous.

(3) **Thogarmah**, in some MSS. *Thorgamah*, and found with great variety of orthography in the Septuagint and Josephus. In the ethnographic table in the tenth chapter of Genesis (ver. 3; Comp. 1 Chron. i:6) Thogarmah is introduced as the youngest son of Gomer (son of Japheth), who is supposed to have given name to the Cimmerians on the north coast of the Euxine Sea, his other sons being Ashkenaz and Riphath, both progenitors of northern tribes, among whom also it is natural to seek for the posterity of Thogarmah. The prophet Ezekiel (xxxviii:6) also classes along with Gomer 'the house of Thogarmah and the sides of the north' (in the Eng. Vers. 'of the north quarters'), where, as also at Ezek. xxvii:14, it is

placed beside Meshech and Tubal, probably the tribes of the Moschi and Tibareni in the Caucasus. According to Moses of Chorene (Whiston's edition, i:8, p. 24), and also King Wachtang's *History of Georgia* (in Klaproth's *Travels in the Caucasus*, vol. ii, p. 64), the Armenians, Georgians, Lesghians, Mingrelians, and Caucasians are all descended from one common progenitor, called Thargamos, a son of Awanan, son of Japheth, son of Noah (Comp. Eusebius, *Chron.* ii:12). After the dispersion at Babel he settled near Ararat, but his posterity spread abroad between the Caspian and Euxine seas. (Togarmah in A. V.)

2. Boundaries. The boundaries of Armenia may be described generally as the southern range of the Caucasus on the north, and a branch of the Taurus on the south; but in all directions, and especially to the east and west, the limits have been very fluctuating. It forms an elevated tableland, whence rise mountains which, with the exception of the gigantic Ararat, are of moderate height, the plateau gradually sinking towards the plains of Irān on the east and those of Asia Minor on the west.

3. Climate. The climate is generally cold, but salubrious. The country abounds in romantic forest and mountain scenery, and rich pasture land, especially in the districts which border upon Persia. Ancient writers notice the wealth of Armenia in metals and precious stones. The great rivers Euphrates and Tigris both take their rise in this region, as also the Araxes and the Kur or Cyrus.

4. Greater and Lesser. Armenia is commonly divided into *Greater* and *Lesser*, the line of separation being the Euphrates; but the former constitutes by far the larger portion, and indeed the other is often regarded as pertaining rather to Asia Minor. There was anciently a kingdom of Armenia, with its metropolis Artaxata; it was sometimes an independent state, but most commonly tributary to some more powerful neighbor. Indeed, at no period was the whole of this region ever comprised under one government, but Assyria, Media, Syria and Cappadocia shared the dominion or allegiance of some portion of it, just as it is now divided among the Persians, Russians, Turks and Kurds, for there is no doubt that that part of Kurdistan which includes the elevated basins of the lakes of Van and Oormiah anciently belonged to Armenia.

Schulz discovered in 1827, near the former lake, the ruins of a very ancient town, which he supposed to be that which is called by Armenian historians *Shamiramakert* (i. e., the town of Semiramis), because believed to have been built by the famous Assyrian queen. The ruins are covered with inscriptions in the arrow-headed character; in one of them Saint Martin thought he deciphered the words *Khshéarsha* son of *Daréioush* (Xerxes son of Darius).

5. Later Times. In later times Armenia was the border-country where the Romans and Parthians fruitlessly strove for the mastery, and since then it has been the frequent battle-field of the neighboring states. Toward the end of the last war between Russia and Turkey, large bodies of native Armenians emigrated into the Russian dominions, so that their number in what is termed Turkish Armenia is now considerably reduced. By the treaty of Turkomanshee (21st Feb. 1828) Persia ceded to Russia the Khanats of Erivan and Nakhshivan. The boundary line, drawn from the Turkish dominions, passes over the Little Ararat; the line of separation between Persian and Turkish Armenia also begins at Ararat, so that this

famous mountain is now the central boundary-stone of these three empires.

Christianity was first established in Armenia in the fourth century; the Armenian church has a close affinity to the Greek church in its forms and polity.

N. M.

Religious persecution and war have driven great numbers of Armenians from their native land into Asia Minor and Europe. The present number of Armenians is estimated to be from 2,500,000 to 3,000,000, of whom about 1,000,000 live in Armenia. Its chief modern towns are Erzeroum, Erivan and Van. (See ASSYRIA.)

ARMENIAN VERSION (är-mē'nĭ-an vēr'shūn).

The Armenian version of the Bible was undertaken in the year 410 by Miesrob, with the aid of his pupils, Joannes Ecclensis and Josephus Palnensis. It appears that the patriarch Isaac first attempted, in consequence of the Persians having destroyed all the copies of the Greek version, to make a translation from the Peshito; that Miesrob became his coadjutor in this work; and that they actually completed their translation from the Syriac.

ARMHOLE (ärm-höl), (Heb. אֶצֶל, *ats-tseel'*, Jer. xxxviii:12; Ezek. xiii:18, to select, refuse, separate meanings from the primitive root אָצַץ, *aw-tsal'*; hence the joint of the hand or knuckle), armpit.

ARMLET (ärm'lët).

Although this word has the same meaning as *bracelet*, yet the latter is practically so exclusively used to denote the ornament of the wrist that it seems proper to distinguish by *armlet* the similar ornament which is worn on the upper arm. There is also this difference between them, that in the East bracelets are generally worn by women and armlets only by men. The armlet, however, is in use among men only as one of the insignia of sovereign power. There are three different words which the Authorized Version renders by bracelet. These are (1) *Etzadah*, which occurs in Num. xxxi:50; 2 Sam. i:10, and which, being used with reference to men only, we take to be the *armlet*. (2) *Tzamid*, which is found in Gen. xxiv:22; Num. xxxi:50; Ezek. xvi:11. Where these two words occur together (as in Num. xxxi:50) the first is rendered by 'chain' and the second by 'bracelet.' (3) *Shiryah*, which occurs only in Is. iii:19. The first we take to mean armlets worn by men, the second, bracelets worn by women and sometimes by men, and the third, a peculiar bracelet of chainwork worn only by women. It is observable that the first two occur in Num. xxxi:50, which we suppose to mean that the men offered their own armlets and the bracelets of their wives. In the only other passage in which the first word occurs it denotes the royal ornament which the Amalekite took from the *arm* of the dead Saul, and brought with the other regalia to David. There is little question that this was such a distinguishing band of jeweled metal as we still find worn as a mark of royalty from the Tigris to the Ganges. The Egyptian kings are represented with armlets, which were also worn by the Egyptian women. These, however, are not jeweled, but of plain or enameled metal, as was in all likelihood the case among the Hebrews. In modern times the most celebrated armlets are those which form part of the regalia of the Persian kings, and which formerly belonged to the Mogul emperors of India. These ornaments are of dazzling splendor, and the jewels in them are of such large size and immense value that the pair are reckoned to be worth a million of our

money. The principal stone of the left armlet is famous in the East by the name of the *Devîâ-e-nur*, or *Sea of light*. It weighs 186 carats, and is considered the diamond of finest luster in the world. The principal jewel of the left armlet, although of somewhat inferior size (146 carats) and value, is renowned as the *Tâg-e-mah*, 'Crown of the moon.' The imperial armlets, generally set with jewels, may also be observed in most of the portraits of the Indian emperors. (See BRACELET.)

ARMON (är'mon), (Heb. אֶרְמוֹן, *ar-mown'*, A. V. 'chestnut-tree'), a tree which is named thrice in the Scriptures.

It occurs among the 'speckled rods' which Jacob placed in the watering-troughs before the sheep (Gen. xxx:37); its grandeur is indicated in Ezek. xxxi:8, as well as in Ecclus. xxiv:19. It is noted for its magnificence, shooting its high boughs aloft. This description agrees well with the plane tree (*Platanus Orientalis*), which is adopted by all the ancient translators, to which the balance of critical opinion inclines, and which actually grows in Palestine. This word has been translated *beech*, *maple*, and *chestnut*, but scarcely anyone now doubts that it means the plane tree.

ARMONI (ar-mō'nī), (Heb. אֶרְמוֹנִי, *ar-mo-nee'*, of a fortress), son of Saul by Rizpah (2 Sam. xxi:8), B. C. about 1018.

ARMOR-BEARER (är'mēr - bâr'ēr), (Heb. נֹשֵׂא כֶּלֶי, *naw-saw' kel-ee'*, bearer of weapon).

An officer selected from the bravest of the favorites of kings and generals to bear their armor and stand by them in times of danger (Judg. ix:5; 1 Sam. xiv:6; xvi:21; xxiii:4).

ARMS, ARMOR (ärms, är'mēr).

1. Offensive Arms. The instruments at first employed in the chase, but converted to the destruction of their fellow-men, or to oppose aggression, were naturally the most simple.

(1) Battle-axe and Mace. Among these were the club and the throwing-bat. The first consisted originally of a heavy piece of wood, variously shaped, made to strike with, and, according to its forms, denominated a mace, a bar. It is an instrument of great power when used among the Hebrews, for, in the time of the kings, wood had already been superseded by metal, and the *shevet barzel*, rod of iron (Ps. ii:9), is supposed to mean a mace, or gavellock, or crowbar. It is an instrument of great power when used by a strong arm. It is probable *maphiets* (Prov. xxv:18; Ps. lvii:4; cxx:3, 4) is a maul, a martel, or a war hammer. It is likely metal was only in general use at a later period, and that a heavy crooked billet continued long to serve both as a missile and a sword. The throwstick, made of thorn wood, is the same instrument which we see figured on Egyptian monuments. By the native Arabs it is still called *lissan*.

(2) Sword. These instruments, supplied with a sharp edge, would naturally constitute a battle-axe and a kind of sword, and such in the rudest ages we find them, made with flints set into a groove or with sharks' teeth firmly secured to the staff with twisted sinews.

Next came the dirk or poniard, which, in the Hebrew word *cherev*, may possibly retain some allusion to the original instrument made of the antelope's horn, merely sharpened, which is still used in every part of the East where the material can be procured. From existing figures, the dirk appears to have been early made of metal in Egypt and worn in the belt. From several texts

(1 Sam. xvii:39; 2 Sam. xx:8, and 1 Kings xx:11) it is evident that the real sword was slung in a belt, and that 'girding' and 'loosing the sword' were synonymous terms for commencing and ending a war. The blades were, it seems, always short (one is mentioned of a cubit's length), and

Persian Sword.

the dirk-sword, at least, was always double-edged. The sheath was ornamented and polished. But while metal was scarce, there were also swords which might be called quarter pikes, being composed of a very short wooden handle, surmounted by a spearhead.

(3) **Spear, Javelin and Dart.** The spear, *ramach*, was another offensive weapon common to all the nations of antiquity, and was of various size, weight and length. Probably the shepherd Hebrews, like nations similarly situated in northern Africa, anciently made use of the horn of an oryx, or a leucoryx, about three feet long, straightened in water and sheathed upon a thorn-wood staff. When sharpened, this instrument would penetrate the hide of a bull, and, according to Strabo, even of an elephant; it was light, very difficult to break, resisted the blow of a battle-axe, and the animals which furnished it were abundant in Arabia and in the desert east of Palestine. At a later period the head was of brass, and afterwards of iron. Very ponderous weapons of this kind were often used in Egypt by the heavy infantry, and, from various circumstances, it may be inferred that among the Hebrews and their immediate neighbors, commanders in particular were distinguished by heavy spears. Among these were generally ranked the most valiant in fight and the largest in stature, such as Goliath, 'whose spear was like a weaver's beam' (1 Sam. xvii:7; 2 Sam. xxi:16), and whose spear's head weighed six hundred shekels of iron, which by some is asserted to be equal to twenty-five pounds' weight. The spear had a point of metal at the butt-end to fix it in the ground, perhaps with the same massy globe above it, which is still in use, intended to counterbalance the point. It was with this ferrel that Abner slew Asahel (2 Sam. ii:22, 23).

The javelins, named *chaneth* and *kedon*, may have had distinct forms; from the context, where *chaneth* first occurs, it appears to have been a species of dart carried by light troops (1 Sam. xiii:22), while the *kedon*, which was heavier, was most likely a kind of pilum. In most nations of antiquity the infantry, not bearing a spear,

carried two darts, those lightly armed using both for long casts, and the heavy armed only one for that purpose; the second, more ponderous than the other, being reserved for throwing when close to the enemy, or for handling in the manner of a spear. This explanation may throw light on the fact of the *chaneth* being named in connection with the *tsenna*, or larger buckler (1 Chron. xii:34), and may reconcile what is said of the *kedon* (Job xxxix:23; xli:29; and Josh. viii:10). While on the subject of the javelin it may be remarked that, by the act of casting one at David (1 Sam. xix:9, 10), Saul virtually absolved him from his allegiance, for by the customs of ancient Asia, preserved in the usages of the Teutonic and other nations, the *Sachsen recht*, the custom of the East Franks, etc., to throw a dart at a freedman, who escaped from it by flight, was the demonstrative token of manumission given by his lord or master; he was thereby sent out of hand, *manumissus*, well expressed in the

1, 2, 3, 4. Bows. 5, 6. Quivers. 7, 8. Arrows.

old English phrase, 'scot-free.' But for this act of Saul, David might have been viewed as a rebel.

(4) **Bow and Arrow.** But the chief offensive weapon in Egypt, and, from the nature of the country, it may be inferred in Palestine also, was the war-bow, *keshtoth*, and *kesheth*, the arrows

Egyptian Slingers and Sling.

being denominated *hhitsem*, *hhitz*. The bow became in the course of time very strong and tall, was made of brass, of wood backed with horn, or of horn entirely, and even of ivory. The horned bows of the cavalry, shaped like those of the Chinese, occur on monuments of antiquity.

(5) **The Sling.** The last missile instrument to be mentioned is the sling, *kala* (Job xli:28), an improvement upon the simple act of throwing stones. It was the favorite weapon of the Benjamites, a small tribe, not making a great mass in an order of battle, but well composed for light troops. They could also boast of using the sling equally well with the left hand as with the right. The sling was made of plaited thongs, somewhat broad in the middle, to lodge the stone or leaden missile, and was twirled two or three times round before the stone was allowed to take flight. Stones could not be east above 400 feet, but leaden bullets could be thrown as far as 600 feet. The force as well as precision of aim which might be attained in the use of this instrument was remarkably shown in the case of David, and several nations of antiquity boasted of great skill in the practice of the sling.

2. Defensive Arms. The most ancient defensive piece was the shield, buckler, roundel or target, composed of a great variety of materials, very different in form and size, and therefore in all nations bearing a variety of names.

1. The Tsenna, or Great Shield. 2. Common Egyptian Shield.
3. Target. 4, 5. Ancient Shields of Unknown Tribes,
6. Roundel.

(1) **Shield.** The Hebrews used the word *tsenna*, for a great shield, defense, protection (Gen. xv:1; Ps. xlvii:9; Prov. xxx:5), which is commonly found in connection with spear, and was the shelter of heavily-armed infantry; *magin*, a buckler, or smaller shield, which, from a similar juxtaposition with sword, bow and arrows, appears to have been the defense of the other armed infantry and of chiefs, and *sohairah*, *parma*, a roundel, which may have been appropriated to archers and slingers, and there were *shclatim* and *shelti*, synonymous with *magin*, only different in ornament. In the more advanced areas of civilization shields were made of light wood not liable to split, covered with bull hide or two or more thicknesses and bordered with metal; the lighter kinds were made of wicker-work or osier, similarly, but less solidly covered, or of double ox-hide cut into a round form. There were others of a single hide, extremely thick from having been boiled; their surface presented an appearance of many folds, like round waves up and down, which might yield, but could rarely be penetrated.

We may infer that at first the Hebrews borrowed the forms in use in Egypt, and that their common shields were a kind of parallelogram,

broadest and arched at the top and cut square beneath, bordered with metal, the surface being covered with rawhide with the hair on. The lighter shields may have been soaked in oil and dried in the shade to make them hard; no doubt, hippopotamus, rhinoceros and elephant skin shields were brought from Ethiopia and purchased in the Phœnician markets, but small, round hand-bucklers of whaleskin, still used by Arabian swordsmen, came from the Erythræan Sea. During the Assyrian and Persian supremacy the Hebrews may have used the square, oblong and round shields of these nations, and may have subsequently copied those of Greece and Rome. The princes of Israel had shields of precious metals; all were managed by a wooden or leathern handle, and often slung by a thong over the neck. With the larger kinds a testudo could be formed by pressing the ranks close together, and while the outside men kept their shields before and on the flanks, those within raised theirs above the head and thus produced a kind of surface, sometimes as close and fitted together as a pantile roof, and capable of resisting the pressure even of a body of men marching upon it.

The *tsenna* was best fitted for men without any other armor, when combating in open countries or carrying on sieges. Shields were hung upon the battlements of walls, and, as still occurs, chiefly above gates of cities by the watch and ward. In time of peace they were covered to preserve them from the sun, and in war uncovered; this sign was poetically used to denote coming hostilities, as in Is. xxii:6, etc.

(2) **Helmet.** The *helmet* was next in consideration, and in the earliest ages was made of osier, or rushes, in the form of a beehive, or of a skull cap. The skins of the heads of animals—of lions, bears, wild boars, bulls and horses—were likewise adopted, and were adorned with rows of teeth, manes and bristles. Wood, linen cloth in many folds, and a kind of felt, were also in early use, and helmets of these materials may be observed worn by the nations of Asia at war with the conqueror kings of Egypt, even before the departure of Israel. At that time also these kings had helmets of metal, or rounded or pointed forms, adorned with a figure of the serpent *Kneph*.

1. Of Rushes. 8. Assyrian.
2. Egyptian. 9. Greek.
3, 4. Western Asia. 10. Ionian.
5. Carian (?). 11. Parthian.
6, 7. Egyptian. 12, 13. Other Asiatic tribes.

The nations of Asia, however, used the woolen or braided caps, still retained, and now called kaouk and fez, around which the turban is usually wound. These were almost invariably supplied with long lappets to cover the ears and the back of the head, and princes usually wore a

radiated crown on the summit. This was the form of the Syrian, and probably of the Assyrian helmets, excepting that the last mentioned were of brass, though they still retained the low cylindrical shape. The *koba*, some helmet of this kind, was worn by the trained infantry, who were spearmen among the Hebrews, but archers and slingers had round skullcaps of skins, gelts or quilted stuffs, such as are still in use among the Arabs. The form of Greek and Roman helmets, both of leather and of brass, is well known; they were most likely adopted also by the Hebrews and Egyptians during their subjection to those nations.

(3) **Body Armor.** The most ancient Persian idols are clad in shagged skins, such as the Ægis of Jupiter and Minerva may have been, the type being taken from a Cyrenæan or African legend. In Egypt cuirasses were manufactured of leather, of brass and of a succession of iron hoops, chiefly covering the abdomen and the shoulders, but a more ancient national form was a kind of thorax tippet, *shereyon*, or square, with an opening in it for the head, the four points covering the breast, back and both upper arms. This kind in particular was affected by the royal band of relatives who surrounded the Pharaoh.

1. Egyptian Tigulated. 2. Sleeve of Ring-mail, Ionian.

By their use of metal for defensive armor, the Carians appear to have created astonishment among the Egyptians, and therefore may be presumed to have been the first nation so protected in western Asia; nevertheless, in the tombs of the kings near Thebes, a tigulated hauberk is represented, composed of small three-colored pieces of metal—one golden, the others reddish and green. This kind of armor may be meant by the word *techera*, the closest interpretation of which appears to be *decussatio*, *tigulatio*, a tiling. The expression in 2 Chron. xviii:33, may be that Ahab was struck in one of the grooves or slits in the squares of his *techera*, or between two of them, where they do not overlap, or perhaps, with more probability, between the metal hoops of the trunk of the *shereyon*, where the thorax overlaps the abdomen. The term *kas-kasim*, 'scales,' in the case of Goliath's armor, denotes the squamous kind, most likely that in which the pieces were sewed upon a cloth and not hinged to each other, as in the *techera*. It was the defensive armor of northern and eastern nations, the Persian Cataphracti, Parthians and Sarmatians. But of true annular or ringed mail we doubt if there is any positive evidence, excepting where rings were sewed separately upon cloth, anterior to the sculpture at Takt-i-Boostan,

or the close of the Parthian era. The existence of mail is often incorrectly inferred from our translators using the word wherever flexible armor is to be mentioned. The *techera* could not well be worn without an undergarment of some density to resist the friction of metal, and this

Parthian Horseman Clad in Coat of Mail.

may have been a kind of sagram, the *shereyon* of the Hebrews, under another form—the dress Saul put upon David before he assumed the breastplate and girdle.

(4) **Cuirass.** The *Cuirass* and *Corslet*, strictly speaking, were of prepared leather (*corium*), but often also composed of quilted cloths; the former in ancient times generally denoted a suit with leathern appendages at the bottom and at the shoulder, as used by the Romans; the latter, one in which the barrel did not come down below the hips, and usually destitute of leathern *vittæ*, which was nationally Greek. In later ages it always designates a breast and back piece of steel. It is, however, requisite to observe that, in estimating the meaning of Hebrew names for armor of all

1, 2. Early Greek.
3. Greek.

4, 5. Roman.
6. Barbarian.

kinds, they are liable to the same laxity of use which all other languages have manifested; for

in military matters, more perhaps than in any other, a name once adopted remains the same, though the object may be changed by successive modifications, till there remains but little resemblance to that to which the designation was originally applied.

The girdle, or, more properly, the baldric or belt (*cingula* or *balteus*), was used by the Hebrews under the name of *izor*; it was of leather, studded with metal plates or bullæ; when the armor was slight, broad, and capable of being girt upon the hips; otherwise it supported the sword scarf-wise from the shoulder.

(5) **Greaves.** Greaves were likewise known, even so early as the time of David, for Goliath wore them. They consisted of a pair of shin-covers of brass or strong leather, bound by thongs round the calves and above the ankles. They reached only to the knees, excepting among the Greeks, whose greaves, clastic behind, caught nearly the whole leg, and were raised in front above the knees. The Hebrew word *soin*, in Isaiah ix:5, is supposed to mean a half-greave, though the passage is altogether obscure. Perhaps the war-boot may be explained by the war-shoe of Egypt with a metal point.

C. H. S.

Figurative. (1) Armor, when ascribed to God, denotes his all-sufficiency to conquer and destroy the enemies of his people. (2) David employs a bold and truly believing prayer, when he prays God "to lay hold of shield and buckler, and draw out the spear" (Ps. xxxv:2). (3) The saint, being called to be a warrior under the Captain of Salvation, is provided with a panoply, or complete armor, both for defence and attack. (4) This spiritual armor consists of the following pieces: The "shield of faith;" that is, confidence in God as reconciled in the Son of his love, or the grace of faith implanted in us by the Spirit. By this we resist the fiery darts of Satan. The "helmet" is the hope of salvation; the "breast-plate" is the righteousness of Christ imputed to us, and implanted in us; the "girdle" is that of truth revealed to us and dwelling in us; the "shoes" are the preparation of the gospel of peace; our "sword" is that of the Spirit, or the word of God; and the whole is fastened on and wielded in the exercise of all prayer (Eph. vi:13-20). With these weapons we are to fight against sin, Satan and the world, and to defend ourselves from their many and dangerous attacks (Eph. vi:11-20). (5) In Scripture this armor receives various names. Because, provided and given by God, it is called "the armor of God." God the Son purchased it for us; God the Holy Ghost applies it, or bestows it on us. Its nature is Divine and spiritual; its success is of God; and by it we fight his battles and are made more than conquerors (Eph. vi:11). (6) Because given for the cause of righteousness, it is called "the armor of righteousness on the right hand and on the left;" it is purchased with the finished righteousness of Christ, and can in no case be successful unless righteously employed for the end intended by God (2 Cor. vi:7). (7) And inasmuch as it is openly wielded for the condemnation of the works of darkness, it is called "the armor of light;" it proceeds from the Father of light; it is possessed and used by the children of light; it is shining, glorious and honorable. By wielding it skillfully we manifest our spiritual light and knowledge, and fight our way to everlasting light (Rom. xiii:12).

ARMY, THE SALVATION (är'mÿ, sāl-vā'-shŭn).

In 1865 a man with a heart full of the love and passion of the man Christ Jesus stood on Mile-

End Waste, Whitechapel, London, and began a work among the poor and unchurched masses of the great metropolis that has since grown into the vast movement known as the Salvation Army.

This Army is a body of converted men and women, recruited almost exclusively from the non-churchgoing classes, thoroughly organized under a military form of government, and constituting a world-wide evangelistic agency to preach the Christ-old gospel and to bring all men to affectionately submit themselves to the claims of God as set forth in the Bible, and especially in the person, work and teachings of our Lord Jesus Christ.

It holds the great cardinal doctrines of evangelical Christianity: As believing in the Trinity; in the fall and the universality of sin "through the disobedience of one"; in the atonement for sin, both original and personal, through the vicarious sufferings of the Son of God, the benefits of which are for all men, conditioned solely upon repentance and "faith which works by love"; in the love and ever-present agency of the Holy Spirit seen in the conversion of sinners and the sanctification of believers; and in the everlasting blessedness of the righteous and the eternal punishment of those who die impenitent, in the world to come. It accepts the Bible as the inspired and authoritative word of God, and believes in taking the gospel to those who will not attend the ordinary places of worship; to this end it shapes its methods and nomenclature to compel the attention of those whom it seeks to reach. Its military titles, uniforms, bands, etc., are the fruitage of this principle of adaptation. It also believes in the ministry of woman, and has placed every office in its ranks within her reach. It requires of its members total abstinence, industry, separation from the fashions and follies of the world, benevolence, and self-sacrifice for the salvation of all men, and urges its people to purity of life in thought, word and act.

The founder and general of this movement, the Rev. William Booth, was born in Nottingham, England, April 10th, 1829, and was converted among the Wesleyans at the age of fifteen. At an early age he entered the ministry and at once took rank as one of the most successful pastors and evangelists in his denomination, which rank he held until he severed his relation with the church in order to devote his energies to the salvation of the poor in London.

This work, known at first as the Christian Mission, spread rapidly throughout England, and soon burst forth in other countries. In 1872 in Cleveland, and in 1879 in Philadelphia, work was begun by converts who had emigrated to America, but not until 1880 was the work formally opened in the United States by Commissioner George Railton and seven women officers duly commissioned by the General. Since then the Army's advance in America has been phenomenal, in spite of external difficulties arising from ignorance, misrepresentation and prejudice, and internal troubles occasioned by the secession in 1884 of Major Moore, who succeeded Commissioner Railton in the chief command, and later, in 1896, by the retirement of Commander and Mrs. Bal-lington Booth.

These defections in this most democratic age and country have tested to the utmost the Army's paternal or military principles of government, usually assumed to be its most vulnerable point. But, instead of weakening, this testing has rather strengthened the conviction in the minds of its people that these principles are from above, are

in harmony with the principles of the Divine government, as revealed in the Bible, and in the constitution of the human mind, and are best adapted to secure large and permanent results in dealing with the unchurched and undisciplined masses.

Commissioner Frank Smith succeeded Major Moore, while Commander and Mrs. Ballington Booth were succeeded by Commander and Mrs. Booth-Tucker, under whose leadership very remarkable advances are being made in all departments of the work, but especially in the development of the army's social operations.

The evangelistic and social operations are under the oversight of more than three thousand commanding officers, in the United States alone, who give their whole time to the work and receive a small salary sufficient for simple living expense, though no salary is guaranteed. Private soldiers receive no remuneration for any service they may give.

The Army publishes in America two *War Crys* weekly in English, one in Swedish, one in German, and one in Chinese. It also publishes *The Young Soldier*, for children, and *Harbor Lights*, a monthly magazine. The combined circulation of these papers, which is principally among the vicious, non-churchgoing and more illiterate classes, is about six million copies per annum. A large number of books, pamphlets and tracts are also issued by its publishing houses.

"The World for God" is the Army's motto, and such is the faith of its workers in the power of the gospel, and such has been their success with their kaleidoscopic methods, bottomed on changeless Scriptural and philosophic principles, that they look forward with confidence to the day when all men shall accept Jesus Christ as Saviour and Lord and be filled with love one to another. They are in no sense antagonistic to any denomination of Christian workers, but, on the contrary, are glad to co-operate with all lovers of God and man who believe in present salvation from sin through faith in the blood of Christ and who are seeking the rescue of the lost and the advancement of the Redeemer's Kingdom.

(1) **Principal Doctrines.** The following are the principal doctrines of the Army. We believe:

1. That the Scriptures were given by inspiration of God, and that they contain the Divine rule of faith and practice.

2. There is only one God, who is the Creator, Preserver and Governor of all things, and that He is the only proper object of religious worship.

3. That there are three persons in the Godhead—the Father, the Son and the Holy Ghost.

4. That in the person of Jesus Christ the Divine and human natures are united, so that He is truly and properly God, and truly and properly man.

5. That our first parents were created in a state of innocency, but that by their disobedience they lost their purity and happiness; and that, in consequence of their fall, all men have become sinners, totally depraved, and as such are justly exposed to the wrath of God.

6. That Jesus Christ has, by His sufferings and death, made an atonement for the whole world, so that whosoever will may be saved.

7. That repentance toward God, faith in our Lord Jesus Christ and conversion by the Holy Spirit are necessary to salvation.

8. That we are saved by grace, through faith in our Lord Jesus Christ, and that he that believeth hath the witness in himself.

9. That the Scriptures teach that not only does

continuance in the favor of God depend upon continued faith in and obedience to Christ, but that it is possible for those who have been truly converted to fall away and be eternally lost.

10. That it is the privilege of all believers to be "wholly sanctified," and that "their whole spirit and soul and body" may "be preserved blameless unto the coming of our Lord Jesus Christ." That is to say, we believe that after conversion there remain in the heart of the believer inclinations to evil, or roots of bitterness, which, unless overpowered by Divine Grace, produce actual sin; but that these evil tendencies can be entirely taken away by the Spirit of God, and the whole heart, thus cleansed from anything contrary to the will of God, or entirely sanctified, will produce the fruit of the Spirit only. And we believe that persons thus entirely sanctified may, by the power of God, be kept unblamable and unprovable before Him.

11. In the immortality of the soul; in the resurrection of the body; in the general judgment at the end of the world; in the eternal happiness of the righteous, and in the everlasting punishment of the wicked.—General Booth in *Orders and Regulations for Field Officers*, pp. 151, 152.

(2) **Articles of War.** In joining the Army a soldier is asked to sign what are known as the Articles of War, which set forth the principal doctrines that every soldier is supposed to believe, the main principles on which he is expected to act, and a brief description of the service he will have to render.

ARTICLES OF WAR.

Having received with all my heart the salvation offered to me by the tender mercy of Jehovah, I do here and now publicly acknowledge God to be my Father and King, Jesus Christ to be my Saviour, and the Holy Spirit to be my Guide, Comforter and Strength; and that I will, by His help, love, serve, worship and obey this glorious God through all time and through all eternity.

Believing solemnly that the Salvation Army has been raised up by God, and is sustained and directed by Him, I do here declare my full determination, by God's help, to be a true soldier of the Army till I die.

I am thoroughly convinced of the truth of the army's teachings.

Therefore, I do here, and now, and forever, renounce the world with all its sinful pleasures, companionships, treasures and objects and declare my full determination boldly to show myself a soldier of Jesus Christ in all places and companies, no matter what I may have to suffer, do, or lose, by so doing.

I do here and now declare that I will abstain from the use of all intoxicating liquors, and also from the habitual use of opium, laudanum, morphia and all other baneful drugs, except when in illness such drugs shall be ordered for me by a doctor.

I do here and now declare that I will abstain from the use of all low or profane language; from the taking of the name of God in vain, and from all impurity, or from taking part in any unclean conversation, or the reading of any obscene book or paper at any time, in any company, or in any place.

I do here declare that I will not allow myself in any falsehood, deceit, misrepresentation or dishonesty; neither will I practice any fraudulent conduct, either in my business, my home, or in any other relation in which I may stand to my fellow-men, but that I will deal truthfully, fairly, honorably and kindly with all those who may employ me or whom I may myself employ.

I do here declare that I will never treat any woman, child or other person whose life, comfort or happiness may be placed within my power, in an oppressive, cruel or cowardly manner, but that I will protect such from evil and danger so far as I can, and promote, to the utmost of my ability, their present welfare and eternal salvation.

I do here declare that I will spend all the time, strength, money and influence I can in supporting and carrying on this war, and that I will endeavor to lead my family, friends, neighbors and all others whom I can influence, to do the same, believing that the sure and only way to remedy all the evils in the world is by bringing men to submit themselves to the government of the Lord Jesus Christ.

I do here declare that I will always obey the lawful orders of my officers, and that I will carry out to the utmost of my power all the orders and regulations of the Army, and, further, that I will be an example of faithfulness to its principles, advance to the utmost of my ability its operations, and never allow, where I can prevent it, any injury to its interests or hindrance to its success.

And I do here and now call upon all present to witness that I enter into this undertaking and sign these articles of war of my own free will, feeling that the love of Christ who died to save me requires from me this devotion of my life to His service for the salvation of the whole world, and therefore wish now to be enrolled as a soldier of the Salvation Army.—General Booth in *Orders and Regulations for Soldiers*, pp. 41, 42. S. S. B.

ARNAN (är'nän), Heb. אַרְנָן, *ar-nawn'*, strong, nimble), whose sons are mentioned by the received Hebrew text in the genealogy of Zerubbabel (1 Chron. iii:21), B. C. after 536.

ARNON (är'non), (Heb. אַרְנוֹן, *ar-nohn'*, a murmur), a river forming the southern boundary of trans-Jordanic Palestine, and separating it from the land of Moab (Num. xxi:13, 26; Deut. ii:24; iii:8, 16; Josh xii:1; Is. xvi:2; Jer. xlvi:20).

Burckhardt was the first to give a satisfactory account of this river, under the name of Wady Modjeb, which it now bears. It rises in the mountains of Gilead, near Katrane, whence it pursues a circuitous course of about eighty miles to the Dead Sea. It flows in a rocky bed, so deep and precipitous as to appear inaccessible; yet along this, winding among huge fragments of rock, lies the most frequented road, and, not being far from Dibon, probably that taken by the Israelites. The stream is almost dried up in summer, but huge masses of rock, torn from the banks and deposited high above the usual channel, evince its fullness and impetuosity in the rainy season. The river is mentioned on the Moabite stone.

AROD (ä'röd), (Heb. אֲרֹד, *ar-ode'*, a wild ass), a son of Gad (Num. xxvi:17), called Arodi in Gen. xlv:16 (B. C. 1856).

ARODI (är'o-dī or a-rō'dī). See AROD.

ARODITES (ä'rod-ites), (Heb. אֲרֹדִיִּם, *haw-ar-od-i'*), descendants of Arod (Num. xxvi:17).

AROER (är'o-er or a-rō'er), (Heb. אֲרוֹר, *ar-oh-ayr'*, nudity).

1. A town on the north side of the river Arnon, and therefore on the southern border of the territory conquered from the Amorites, which was assigned to the tribes of Reuben and Gad (Deut. ii:36; Josh. xii:2; xiii:9).

The Amorites had previously dispossessed the

Ammonites of this territory; and although, in the texts cited, the town seems to be given to Reuben, it is mentioned as a Moabitish city by Jeremiah (xlviii:19). Burckhardt found the ruins of this town under the name of Araayr, on the edge of a precipice overlooking the river (*Travels in Syria*, 372).

Aroer is always named in conjunction with 'the city that is in the midst of the river;' whence Dr. Mansford (*Script. Gaz.*) conjectures that, like Rabbath Ammon [which see], it consisted of two parts, or distinct cities; the one on the bank of the river and the other in the valley beneath, surrounded, either naturally or artificially, by the waters of the river.

2. One of the towns built, or probably rebuilt, by the tribe of Gad (Num. xxxii:34). It is said in Josh. xiii:25 to be 'before Rabbah' [of Ammon]; but, as Raumer well remarks (*Palaestina*, p. 249), this could not possibly have been in the topographical sense of the words (in which *before* means *east of*), seeing that Aroer, as a town on the eastern border of Gad, must have been west of Rabbah. But to a person in Palestine proper, or coming from the Jordan, Aroer would be *before* Rabbah in the ordinary sense; and it appears to have been thus understood by Burckhardt.

3. A city in the tribe of Judah (1 Sam. xxx:28).

4. A city in the south of Judah, to which David sent presents after recovering the spoil of Ziklag (1 Sam. xxx:26, 28).

Dr. Robinson thinks this may have been the town in a valley twenty miles from Hebron. Here there are many pits for water, which are called Ararah, and which gave name to the valley. In the valley and on the western hill are evident traces of an ancient village or town, consisting only of foundations of unhewn stones, now much scattered, but yet sufficiently distinct to mark them as foundations. Small fragments of pottery are also everywhere visible. The identity of name satisfies the traveler that he has here found the Aroer of Judah.

AROERITE (är'o-er-ite or a-rō'erite), (Heb. אֲרוֹרִי, *ar-o-ay-ree'*, of Aroer). Hothan, the Aroerite, was father of two of David's captains (1 Chron. xi:44).

ARPHAD or **ARPAD** (är'phäd or är'päd), (Heb. אֲרַפְאֵד, *ar-pawd'*, spread out).

A Syrian city near Damascus, having its own king, and in Scripture always associated with Hamath, the Epiphania of the Greeks (2 Kings xviii:34; xix:13; Is. x:9; xxxvi:19; xxxvii:13); at one time it was apparently dependent on Damascus (Jer. xlix:23). Near the site of this forgotten city Mr. W. St. Chad. Boseawen recently purchased a large and beautiful axe-head of green stone. From others that had been found at Ephesus and elsewhere, it is clear that these axes belonged to the Hittites and that Arphad was once a Hittite city like Hamath.

ARPHAXAD (ar-phäx'ad), (Heb. אֲרַפְחָאֵד, *ar-pak-shad'*, border or fortress of the Chaldeans.)

1. The son of Shem, and father of Salah; born one year after the Deluge, and died at the age of 438 years (Gen. xi:12, etc), B. C. 2075.

2. King of Media, mentioned in Judith i:1, B. C. 592.

ARROW (är'rō), (Heb. חֶהַט, *khets*).

Figurative. (1) This word is frequently used as the symbol of calamity or disease inflicted by God (Job vi:4; xxxiv:6; Ps. xxxviii:2; Deut.

xxxii:23; Comp. Ezek. v:16; Zech. ix:14). The metaphor thus applied derived its propriety and force from the popular belief that all diseases were immediate and special inflictions from Heaven. (2) *Lightnings* are, by a very fine figure, described as the arrows of God (Ps. xviii:14; cxliv:6; Habak. iii:11. Comp. Wisd. v:21; 2 Sam. xxii:15). (3) 'Arrow' is occasionally used to denote some sudden or inevitable danger, as in Ps. xci:5:—'The arrow that flieth by day.' It is also figurative of anything injurious, as a deceitful tongue (Ps. cxxix:4; Jer. ix:8); a bitter word (Ps. lxxiv:3); a false testimony (Prov. xxv:18). (4) As symbolical of oral wrong, the figure may perhaps have been derived from the darting 'arrowy tongue' of serpents. (5) The arrow, however, is not always symbolical of evil. In Ps. cxxvii:4, 5, well-conditioned children are compared to 'arrows in the hands of a mighty man;' *i. e.*, instruments of power and action. (6) The arrow is also used in a good sense to denote the efficient and irresistible energy of the word of God in the hands of the Messiah (Ps. xlv:6; Is. xlv:2). (See ARMS, ARMOR.)

ARROWS (är-röz). See ARMS, ARMOR.

ARROWS, DIVINATION BY (är-röz, dīv'ī-nā'shūn by). See DIVINATION.

ARTAXERXES (är' tåg-zēr'k'sēz), (Hebrew אֲרַחְשָׁתַרְשָׁשׁ, *ar-takh-shash-taw'*; Gr. Ἀραξέρξης, *ar-tax-er'xace*, probably, 'the great warrior or king').

It is most frequently written *artachast* and is the title under which more than one Persian king is mentioned in the Old Testament. The Hebrew form is a slight corruption of the letters which De Sacy has deciphered in the inscriptions of Nakshi Rustam, and which he vocalizes *Artahshetr* (*Antiq. d. l. Perse*, p. 100). Gesenius pronounces them *Artachshatr*; and, by assuming the easy change of *r* into *s*, and the transposition of the *s*, makes *Artachshast* very closely represent its prototype. The word is a compound, the first element of which, *arta*—found in several Persian names—is generally admitted to mean *great*; the latter part De Sacy conceived to be the Zend *Khshethro*, *King*, to which Gesenius and Pott assent. Thus the sense of *great warrior*, which Herodotus (vi:98) assigned to the Greek form *Artaxerxes* accords with that which etymology discovers in the original Persian title.

Pott, according to his etymology of *Xerxes*, takes *Artaxerxes*, to be more than equivalent to *Artachshatr*—to be '*magnus regum rex*' (*Etym. Forsch.* i. p. lxxvii).

(1) **The First Artachshast** is mentioned in Ezra iv:7-24, as the Persian king who, at the instigation of the adversaries of the Jews, obstructed the rebuilding of the Temple, from his time to that of Darius, king of Persia. This king is the immediate predecessor of Darius Hystaspis, and can be no other than the Magian impostor, Smerdis, who seized on the throne (B. C. 521), and was murdered after a usurpation of less than eight months (Herod. iii:61-78). Profane historians, indeed, have not mentioned him under the title of *Artaxerxes*; but neither do Herodotus and Justin (the latter of whom calls him *Oropasta*, i. 9) agree in his name, so that this fact is not, of itself, enough to invalidate any deductions which are in other respects sound.

(2) **The Second Artachshast**, in the seventh year of whose reign (B. C. 457) Ezra led a second colony of the Jewish exiles back to Jerusalem (Ezra vii:1, *sq.*), the opinions are divided between Xerxes and his son *Artaxerxes Longimanus*. The

arguments brought forward by the advocates for Xerxes, among whom are J. D. Michaelis, Jahn, and De Wette, are briefly as follows: That, as the preceding portion of the book of Ezra relates to Darius Hystaspis, it is most natural to expect that the next following section should refer to his successor, Xerxes, but Ezra does not give a continuous history, and it is now demonstrable from the monuments that Xerxes I. is the Ahasuerus of Esther (see *AHASUERUS*). It is hard to suppose that he would have been called both Ahasuerus and Artaxerxes in addition to his regular name.

The authority of Josephus in this respect is very slender, since he makes Xerxes reign 35 years; whereas, we know from other accounts that he was assassinated in the twenty-first year of his reign. This Artaxerxes is said to have received the name of Longimanus from the unusual length of his arms, which were so much out of due proportion that when standing erect he could touch his knees.

In the twentieth year of his reign, he considerably allowed Nehemiah to go to Jerusalem for the furtherance of purely national objects, invested him with the government of his own people, and allowed him to remain there for twelve years (Neh. ii:1, *sq.*; v. 14). It is almost unanimously agreed that the king here intended is Artaxerxes Longimanus, who reigned from the year 464 to 425 B. C. The date of Nehemiah's departure, is, therefore, the year 444 B. C. Some few have indeed maintained (and it seems principally for the purpose of reconciling Neh. xiii:28, with Josephus, *Antiq.* xi. 8) that the king here referred to is Artaxerxes Mnemon, who reigned from the year B. C. 404 to 359. But Ezra and Nehemiah were contemporaries (Neh. viii:9), and it is difficult to believe that no events of Jewish history were recorded between the reigns of Darius Hystaspis (Ezra vi.) and Artaxerxes Mnemon. Besides this would separate Eliashib, the high-priest (Neh. iii:1), and his grandfather, Jeshua (Neh. xii:10) by an interval of 139 years, which is hardly possible.

ARTEMAS (är'te-mas), (Gr. Ἀρτεμάς, *ar-tem-as'*).

This name (which is a contraction for Artemidorus) occurs only once (Tit. iii:12), as that of an esteemed disciple whom St. Paul designed to send into Crete to supply the place of Titus, whom he invited to visit him at Nicopolis. When the Epistle was written, the Apostle seems not to have decided whether he should send Artemas or Tychicus for this purpose.

ARTEMIS (är-tē'mis), (Gr. Ἄρτεμις, *ar'tem-is*, *artemis*, Acts xix:24).

The Diana of the Romans is a goddess known under various modifications, and with almost incompatible attributes. As the tutelary divinity of

Ancient Coin Showing Image of Artemis.

Ephesus, in which character alone she concerns us here, she was undoubtedly a representative of the same power presiding over conception and

birth which was adored in Palestine under the name of *Ashtorath*. She is therefore related to all the cognate deities of that Asiatic Juno-Venus, and partakes, at least, of their connection with the *moon*. Creuzer has combined a number of testimonies in order to show how her worship was introduced into Ephesus from the coasts of the Black Sea; and endeavors to point out the several Medo-Persian, Egyptian, Libyan, Scythian and Cretan, elements of which she is compounded (*Symbolik*, ii. 115, sq.).

The later image with the full development of attributes is, as Creuzer says, a Pantheon of Asiatic and Egyptian deities. Even in it, however, we see how little influence Greek art had in modifying its antique rudeness. It is still more like a mummy than a Greek statue. Some of the most significant attributes in this figure are—The turreted head, like that of Cybele; the nimbus behind it representing the moon; the zodiacal signs of the bull, the twins, and the crab on her bosom; below them, two garlands, one of flowers and the other of acorns; the numerous breasts; the lions, stags, and cows in various parts; the bees and flowers on the sides; and others described in Millin's *Galerie Mythol.* i. 26. Her priests were called Megabyzi, and were eunuchs.

Artemis.

The Arabic version of the Acts renders Artemis, in the chapter cited, by *As Zuharat*, which is the Arabic name for the planet Venus.

ARUBOTH or **ARABOTH** (är'ü-böth or är'a-böth), (Heb. אַרְבוֹת, *ar-oob-both'*), a country belonging to Judah (1 Kings iv:10), the situation of which is not known.

It was probably a name for the rich corn-growing country of the *Shefelah*.

ARUMAH (a-ru'mah), otherwise Rumah, (Heb. אַרְמוֹהַ, *ar-oo-maw'*, height), a city near Shechem (Judges ix:41), where Abimelech, the son of Gideon, dwelt.

ARVAD (är'väd), (Heb. אַרְוַד, *ar-vad'*, place of fugitives, 1 Macc. xv:23), or, as it might be spelt, Aruad, whence the present name Ruad, a small island and city on the coast of Syria, called by the Greeks Aradus, by which name it is mentioned in 1 Macc. xv:23.

It is a small rocky island, opposite the mouth of the river Eleutherus, to the north of Tripolis, about one mile in circumference and two miles from the shore. Strabo (xvi. p. 753) describes it as a rock rising in the midst of the waves (*a rock washed all round*), and modern travelers state that it is steep on every side. Strabo also describes the houses as exceedingly lofty, and they were doubtless so built, on account of the scantiness of the site; hence, for its size, it was exceedingly populous (Pomp. Mela, l. ii. c. 7). Those of the Arvidites whom the island could not accommodate found room in the town and district of Antaradus, on the opposite coast, which also belonged to them. Arvad is *not* the same as Arpad or Arphad.

ARVADITES (är'vad-ites), (Heb. אַרְוַדִּיִּם, *ar-vad-eem'*, Gen. x:18; 1 Chron. i:16), the inhabitants of the island Aradus (see ARVAD), and doubtless also of the neighboring coast. The Arvadites were descended from Arvad, one of the sons of Canaan (Gen. x:18). Strabo (xvi, p. 731) describes the Arvadites as a colony from Sidon. They were noted mariners (Ezek. xxvii:8, 11; Strabo, xvi, p. 754), and formed a distinct state, with a king of their own (Arrian, *Exped. Alex.* ii, p. 90); yet they appear to have been in some dependence upon Tyre, for the prophet represents them as furnishing their contingent of mariners to that city (Ezek. xxvii:8, 11). The Arvadites took their full share in the maritime traffic for which the Phœnician nation was celebrated, particularly after Tyre and Sidon had fallen under the dominion of the Græco-Syrian kings. They early entered into alliance with the Romans, and Aradus is named among the states to which the consul Lucius formerly made known the league which had been contracted with Simon Maccabæus (1 Macc. xv:23).

ARZA (är'zà), (Heb. אַרְצָא, *ar-tsaw'*, earthiness), governor of Tirzah, in whose house Zimri killed Elah, king of Israel (1 Kings xvi:9, 10).

ASA (ä'sà), (Heb. אַשָּׂא, *aw-saw'*, healing or physician), son of Abijah, grandson of Rehoboam, and third king of Judah. He began to reign two years before the death of Jeroboam, in Israel, and he reigned forty-one years, from B. C. 915-875. As Asa was very young at his accession, the affairs of the government were administered by his mother, or, according to some (Comp. 1 Kings xv:1, 10), his grandmother Maachah, who is understood to have been a granddaughter of Absalom (see MAACHAH). She gave much encouragement to idolatry.

(1) **Religious Conduct.** The young king, on assuming the reins of government, zealously rooted out the idolatrous practices which had grown up during his minority and under the preceding reigns; and only the altars in the 'high places' were suffered to remain (1 Kings xv: 11-13; 2 Chron. xiv:2-5).

(2) **Wars.** He neglected no human means of putting his kingdom in the best possible military condition, for which ample opportunity was offered by the peace which he enjoyed in the first ten years of his reign. And his resources were so well organized, and the population had so increased, that he was eventually in a condition to count on the military services of 580,000 men (2 Chron. xiv:6-

8). In the eleventh year of his reign, relying upon the Divine aid, Asa attacked and defeated the numerous hosts of the Cushite king Zerah, who had penetrated through Arabia Petraea into the vale of Zephathah with an immense host. As the triumphant Judahites were returning, laden with spoil, to Jerusalem, they were met by the prophet Azariah, who declared this splendid victory to be a consequence of Asa's confidence in Jehovah, and exhorted him to perseverance.

(3) **Reforms.** Thus encouraged, the king exerted himself to extirpate the remains of idolatry, and caused the people to renew their covenant with Jehovah (2 Chron. xv: 1-15). It was this clear knowledge of his dependent political position, as the vicegerent of Jehovah, which won for Asa the highest praise that could be given to a Jewish king—that he walked in the steps of his ancestor David (1 Kings xv: 11).

(4) **Alliance with Ben-hadad.** Nevertheless, toward the latter end of his reign the king failed to maintain the character he had thus acquired. When Baasha, king of Israel, had renewed the war between the two kingdoms, and had taken Ramah, which he was proceeding to fortify as a frontier barrier, Asa, the conqueror of Zerah, was so far wanting to his kingdom and his God as to employ the wealth of the Temple and of the royal treasures to induce the king of Syria (Damascus) to make a diversion in his favor by invading the dominions of Baasha. By this means he recovered Ramah, indeed; but his treasures were squandered, and he incurred the rebuke of the prophet Hanani, whom he cast into prison, being, as it seems, both alarmed and enraged at the effect his address was calculated to produce upon the people. Other persons (who had probably manifested their disapprobation) also suffered from his anger (1 Kings xv: 16-22; 2 Chron. xvi: 1-10). In the last three years of his life, Asa was afflicted with a grievous 'disease in his feet;' and it is mentioned to his reproach that he placed too much confidence in his physicians.

(5) **Death.** At his death, however, it appeared that his popularity had not been substantially impaired; for he was honored with a funeral of unusual cost and magnificence (1 Chron. xvi: 11-14). He was succeeded by his son Jehoshaphat.

ASADIAS (ās-a-dī'as), (Baruch i:1). See HASADIAH.

ASAEL (ā'sā-el or ās'a-el). See JAHZEEL.

ASAHIEL (ā'sā-hēl or ās'a-hēl), (Heb. אֲשָׁחִיֵּל, *as-aw-ale'*, God's creature).

1. Son of David's sister Zeruah, and brother of Joab and Abishai. He was noted for his swiftness of foot; and after the battle at Gibeon, he pursued and overtook Abner, who, with great reluctance, in order to preserve his own life, slew him with a back thrust of his spear (B. C. 1055), (see ABNER), (2 Sam. ii: 18-23; iii: 27, 30; xxiii: 24; 1 Chron. xi: 26; xxvii: 7).

2. One of the Levites (B. C. 909), in the reign of Jehoshaphat, who instructed the people in the law (2 Chron. xvii: 8).

3. A priest, father of Jonathan, in the time of Ezra (Ezra x: 15). He is called Azael in Esdr. ix: 14 (B. C. before 459).

4. A Levite in the time of Hezekiah (B. C. 727), who had charge of the tithes (2 Chron. xxxi: 13).

ASAHIAH (ās'a-hi'ah), (Heb. אֲשָׁחִיָּהּ, *ah-saw-yaw*, Jah is doer or Jehovah made), one of the persons sent by king Josiah to consult Huldah, the prophetess, concerning the book of the law, found in the temple (2 Kings xxii: 14). Also called Asaiah (2 Chron. xxxiv: 20).

ASAIHAH (a-sā'yā or ās'a-i'ah), (Heb. as in *Asahiah*, Jehovah made).

1. A prince of the Simeonites who drove out the Hamite shepherds (B. C. 712), from Gedor (1 Chron. iv: 36).

2. A Levite of the reign of David (1 Chron. vi: 30). With 120 of his brethren he brought the ark to the city of David (B. C. 1033), (1 Chron. xv: 6, 11).

3. A son of "the Shilonite," dwelling at Jerusalem (1 Chron. ix: 5). In Neh. xi: 5 he is called Maaseiah (B. C. 536).

4. (See ASAHIAH).

ASAPH (ā'saph), (Heb. אָסָפִי, *aw-sawf'*, assembler). A Levite, son of Barachias (1 Chron. vi: 39; xv: 17), eminent as a musician, and appointed by David to preside over the sacred choral services which he organized. The 'sons of Asaph' are afterwards mentioned as choristers of the temple (1 Chron. xxv: 1, 2; 2 Chron. xx: 14; xxix: 13; Ezra ii: 41; iii: 10; Neh. vi: 44; xi: 22); and this office appears to have been made hereditary in his family (1 Chron. xxv: 1, 2). Asaph was celebrated in after times as a prophet and poet (2 Chron. xxix: 30; Neh. xii: 4), and the titles of twelve of the Psalms (lxxiii to lxxxiii), bear his name. (See PSALMS). There were two other persons named Asaph: one who occupied the distinguished post of *mazkir* (מְזַכֵּר) or 'recorder' to king Hezekiah (2 Kings xviii: 18, 37; Is. xxxvi: 3, 22); another who was keeper of the royal forests under Artaxerxes (Neh. ii: 8).

ASAREEL (a-sā' rā-el or a-sār'a-el), (Heb. אֲסָרְאֵל, *as-ar-ale'*, right of God or bound by Jehovah), a son of Jehaleleel of the tribe of Judah (1 Chron. iv: 16; B. C. after 1618).

ASARELAH (ās'a-rē'lah), (Heb. אֲסָרְאֵלָהּ, *as-ar-ale'-aw*, Jah is joined), one of the sons of Asaph, set apart by David to prophesy with harps (1 Chron. xxv: 2); called Jesharelah in verse 14.

ASCALON (ās'-ka-lōn). See ASHKELON.

ASCENSION (ās-sēn'shūn). The event spoken of under this title is among those which Christians of every age have contemplated with most profound satisfaction. It was in his ascension that Christ exhibited the perfect triumph of humanity over every antagonist, whether in itself, or in the circumstances under which it may be supposed to exist. The contemplation of this, the entrance of the Redeemer into glory, inspired the prophets of old with the noblest views of his kingdom. 'Thou hast ascended on high; thou hast led captivity captive; thou hast received gifts for men; yea, for the rebellious also, that the Lord God might dwell among them' (Ps. lxxviii: 18); and 'Lift up your heads, O ye gates; and be ye lifted up, ye everlasting doors, and the King of glory shall come in' (Ps. xxiv: 7). Our Saviour, having repeatedly conversed with his apostles after his resurrection, and afforded them many infallible proofs of its reality, led them from Jerusalem to Bethany, and was raised up to heaven in their sight; there to continue till he shall descend at the last day to judge the quick and the dead.

(1) **Evidences.** The evidences of this fact were numerous. The disciples saw him ascend (Acts i: 9, 10). Two angels testified that he did ascend (Acts i: 11). Stephen, Paul and John saw him in his ascended state (Acts vii: 55, 56; ix; Rev. i). The ascension was demonstrated by the descent of the Holy Ghost (John xvi: 7-14; Acts ii: 33); and the terrible overthrow and dispersion of the Jewish nation is still a standing proof of it (John viii: 21; Matt. xxvi: 64).

(2) **Time.** The time of Christ's ascension was forty days after his resurrection. He continued so

many days upon earth that he might give repeated proofs of his resurrection (Acts i:3); instruct his apostles in everything of importance respecting their office and ministry (Acts i:3); and might open to them the Scriptures concerning himself, and renew their commission to preach the Gospel (Acts i:5, 6; Mark xvi:15).

(3) **Manner.** As to the manner of his ascension, it was from Mount Olivet to heaven, not in appearance only, but in reality, and that visibly and locally. It was a real motion of his human nature; sudden, swift, glorious and in a triumphant manner. He was parted from his disciples while he was solemnly blessing them; and multitudes of angels attended him with shouts of praise (Ps. lxxviii:17; xlvii:5, 6).

(4) **Effects.** The effects or ends of his ascension were: 1. To fulfill the types and prophecies concerning it. 2. To "appear" as a priest "in the presence of God for us." 3. To take upon him more openly the exercise of his kingly office. 4.

ASHAN (ā'shan), (Heb. אֶשָׁן, *aw-shawn'*, smoke), a city of Judah (Josh. xv:42), but afterwards apparently yielding to Simeon (Josh. xix:7; 1 Chron. iv:32). Eusebius says that, in his time, Beth-Ashan was sixteen miles from Jerusalem, west. In 1 Sam. xxx:30 it is called Chor-ashan, i. e., *furnace of smoke*. In 1 Chron. vi:59, it is given as a priest's city.

ASHBEA (āsh'be-ā), (Heb. אֶשְׁבַּע, *ash-bay'ah*, adjuration), a proper name, but whether of a place or person is not certain (1 Chron. iv:21), B. C. about 1400.

ASHBEL (āsh'bel), (Heb. אֶשְׁבֵּל, *ash-bale'*, man of Baal), a son of Benjamin (Gen. xlvi:21; Num. xxvi:38; 1 Chron. viii:1), B. C. about 1856.

ASHBELITES (āsh'bel-ites), (Heb. with the art, אֶשְׁבֵּלִי, *haw-ash-ba-lee'*, belonging to Ashbel), descendants of Ashbel (B. C. 1700), son of Benjamin (Num. xxvi:38).

Ashdod.

To receive gifts for men, both ordinary and extraordinary (Ps. lxxviii:18). 5. To open the way to heaven for his people (Heb. x:19, 20). 6. To assure the saints of their ascension to heaven after their resurrection from the dead (John xiv:1, 2.)

ASENATH (ās'e-nāth or a-sē'nath), (Heb. אֶסְנַת, *aw-se-nath'*, dedicated to Neit), daughter of Potipherah, priest of On, whom the king of Egypt bestowed in marriage upon Joseph, with a view probably of strengthening his position in Egypt by this high connection. (See JOSEPH.) Attention is here required only to *the name*, which in common with other words of foreign origin, has attracted considerable notice. No better etymology of Asenath has been proposed than that by Jablonski, who (*Panth. Egypt* i:56, and *Opuscul.* ii:208) regards the forms Asenath and *Aseneth* as representative of a Coptic compound *Assheneit*, *she who is of Neith*. (See Gen. xli:45, 50; xlvi:20.)

ASER (ā'ser), Greek form of ASHER (which see) (Luke ii:36; Rev. vii:6).

ASH (āsh). See OREN.

ASHDOD (āsh'dōd), (Heb. אֶשְׁדּוֹד, *ash-dode'*, ravager), the Azotus of the Greeks and Romans, and so called in 1 Macc. iv:15; Acts viii:40 (see also Plin. *Hist. Nat.* v:14; Ptolem. v:16); a city on the summit of a grassy hill, near the Mediterranean coast, nearly midway between Gaza and Joppa, being 18 geog. miles N. by E. from the former, and 21 S. from the latter. Ashdod was a city of the Philistines, and the chief town of one of their five states (Josh. xiii:3; 1 Sam. vi:17). It was the seat of the worship of Dagon (1 Sam. v:1-5; 1 Macc. xi:4), before whose shrine in this city it was that the captured ark was deposited and triumphed over the idol (1 Sam. v:1-9). Ashdod was assigned to Judah; but many centuries passed before it and the other Philistine towns were subdued (see PHILISTINES); and it appears never to have been permanently in possession of the Judahites, although it was dismantled by Uzziah, who built towns in the territory of Ashdod (1 Chron. xxvi:6). It is mentioned to the reproach of the Jews after their return from captivity that they married wives of Ashdod, the result of which was

that the children of these marriages spoke a mongrel dialect, compounded of Hebrew and the speech of Ashdod (Neh. xiii:23, 24). These facts indicate the ancient importance of Ashdod. It was indeed a place of great strength; and being on the usual military route between Syria and Egypt, the possession of it became an object of importance in the wars between Egypt and the great northern powers. Hence it was secured by the Assyrians before invading Egypt (Is. xx:1, sq.); and at a later date it was taken by Psammetichus, after a siege of twenty-nine years, the longest on record (Herodot. ii:157). The destruction of Ashdod was foretold by the prophets (Jer. xxv:20; Is. xx:1; Amos i:8; iii:9; Zeph. ii:4; Zach. ix:6); and was accomplished by the Maccabees (1 Macc. v:68; x:77-84; xi:4). It is enumerated among the towns which Pompey joined to the province of Syria (Joseph. *Antiq.* xiv:4, 4; *De Bell. Jud.* i:7, 7), and among the cities ruined in the wars, which Gabinius ordered to be rebuilt (*Antiq.* xiv:5, 3). It was included in Herod's dominion, and was one of the three towns bequeathed by him to his sister Salome (*De Bell. Jud.* vii:8, 1). The evangelist Philip was found at Ashdod after he had baptized the Ethiopian eunuch (Acts viii:40). Azotus early became the seat of a bishopric; and we find a bishop of this city present at the councils of Nice, Chalcedon, A. D. 359, Seleucia and Jerusalem, A. D. 536 (Reland *Palastina*, p. 609).

ASHDODITES (ăsh'dōd-ites), (Neh. iv:7), inhabitants of Ashdod (q. v.); less correctly rendered Ashdodites (Josh. xiii:3). (See ASHDOTHITES).

ASHDOTHITES (ăsh'dōth-ites), (Heb. אֲשֶׁדּוֹתִים, *ash-do-dee'*), a less correct mode (Josh. xiii:3) of anglicizing the name ASHDODITES (which see).

ASHDOTH PISGAH (ăsh'doth-piz'gah), (Heb. אֲשֶׁדּוֹת הַפִּיִּסְגָּה, *ash-doth'ha-pis-gaw'*, springs of Pisgah), the water courses, spurs and ravines of Mount Pisgah (Deut. iii:17; iv:49; Josh. xii:3; xiii:20).

ASHER (ăsh'er), (Heb. אֲשֶׁר, *aw-share'*, happiness).

1. One of the sons of Jacob by Zilpah, the handmaid of Leah (Gen. xxx:13; xxxv:26; xlix:20), and founder of one of the twelve tribes (Num. xxvi:44-47). Asher had four sons and one daughter (Gen. xlix:20; Deut. xxxiii:24; 1 Chron. vii:30).

(1) **Tribe of Asher.** On quitting Egypt the number of adult males in the tribe of Asher was 41,500, which made it the ninth of the tribes (excluding Levi) in numbers—Ephraim, Manasseh and Benjamin only being below it. But before entering Canaan an increase of 11,900—an increase exceeded only by Manasseh—raised the number to 53,400, and made it the fifth of the tribes in population (Comp. Num. i:40, 41; xxvi:47).

(2) **Inheritance.** The inheritance of this tribe lay in a very fruitful country, on the seacoast, with Lebanon north, Carmel and the tribe of Issachar south, and Zebulun and Naphtali east. It is usually stated that the whole of the Phœnician territories, including Sidon, were assigned to this tribe. But there are various considerations which militate against this conclusion (Num. xxvi:24; Josh. xix:24; Judg. i:31), and tend to show that the assigned frontier-line was drawn out to the sea south of Sidon. The strongest text for the inclusion of Sidon (Tyre was not then founded) is that in which it is mentioned to the reproach of the Asherites that they did not drive out the Sidonians (Judg. i:31).

(3) **Among the Canaanites.** The Asherites were for a long time unable to gain possession of the territories actually assigned them, and 'dwelt among the Canaanites, the inhabitants of the land'

(Judg. i:32); and, 'as it is not usual to say of a larger number that it dwells among the smaller, the inference is that they expelled but comparatively few of the Canaanites, leaving them, in fact, a majority of the population' (Bush, note on Judg. i:32).

2. The name of the tribe descended from Asher, and also of that part of Canaan in which they dwelt (Num. i:13; ii:27; xxvi:44, 47; xxxiv:27; Josh. xix:24, 31, 34; xxi:6, 30; Judg. i:31; v:17; vi:35; vii:23; 1 Kings iv:16; 1 Chron. vi:62, 74; Ezek. xlviii:2, 3, 34).

3. A place that formed one boundary of the tribe of Manasseh on the south (Josh. xvii:7).

ASHERAH (a-shē'rah). See ASHTORETH.

ASHERITES (ăsh'er-ites), descendants of Asher (Judg. i:32). (See ASHER).

ASHES (ăsh'ez), (Heb. אֵשֶׁת, *ay'fer*; Gr. σποδος, *spod-os'*; also אֵשֶׁת, *deh'shen*, literally, fatness).

The ashes of the altar of burnt offering on the days of the great festivals were suffered to accumulate, and then taken away the next day by a priest chosen by lot to this work. There was a sort of lye made of the ashes of the heifer sacrificed on the great day of expiation, which was used for ceremonial purification (Num. xix:17, 18). (See SACRIFICE.)

Figurative. 1. *Ashes* in the symbolical language of Scripture denote human frailty (Gen. xviii:27), deep humiliation (Esth. iv:1; Jonah iii:6; Matt. xi:21; Luke x:13; Job xlii:6; Dan. ix:3).

2. *To sit in ashes* was a token of grief and mourning (Job ii:8; Lam. iii:16; Ezek. xxvii:30), as was also strewing them upon the head (2 Sam. xiii:10; Is. xli:3). (See MOURNING.)

3. *Feeding on ashes*, in Ps. cii:9, appears to express grief, as of one with whose food the ashes with which he is covered mingle. But in Is. xlv:20 'feeding on ashes' which afford no nourishment, is judged to denote ineffectual means, labor to no purpose. (Compare Hos. xii:1.)

ASHIMA (ă'shi-mâ or a-shî'mâ), (Heb. אֲשִׁימָה, *ash-i-maw'*, perhaps heaven, 2 Kings xvii:30), is only once mentioned in the Old Testament as the God of the people of Hamath. The Babylonian Talmud, in the treatise 'Sauliedrin' (cited in Carpzov's *Apparatus*, p. 516), and the majority of Jewish writers, assert that Ashima was worshiped under the form of a *goat without wool*; the Talmud of Jerusalem says, under that of a *lamb*. Elias Levita, a learned Rabbi of the sixteenth century, assigns the word the sense of *ape*; in which he was, in all probability, deceived by the resemblance in sound to the latin *simia*. Jurieu and Calmet have proposed other fanciful conjectures. The opinion, however, that this idol had the form of a goat, appears to be the one best supported by arguments as well as by authorities. It is worthy of mention that the name of this idol furnished Aben Ezra with an opportunity of displaying the inveterate hatred of the Jews against the Samaritans. In his preface to the book of Esther, he asserts that the Samaritan text of Gen. i:1, begins with the words 'In the beginning Ashima created.' It need hardly be said there is no trace of this reading either in the Samaritan text or version.

ASHKELON or **ASKELON** (ăsh'ke-lōn or as'ke-lon), (Heb. אֲשְׁכֶלֶן, *ash-kel-one'*, weighing; Gr. Ἀσκάλων).

(1) **Description.** One of the five cities of the Philistines, on the extreme edge of the shore of the Mediterranean Sea, ten miles north of Gaza. Thither Samson went when he slew thirty men

and took their spoil (Judg. xiv:19); it was assigned to the tribe of Judah (Judg. i:18); it is mentioned in the denunciations of the prophets (Jer. xxv:20; xlvii:5, 7; Amos i:8; Zeph. ii:4, 7; Zech. ix:5). The town forms a semicircle—in a hollow, declining toward the sea, surrounded on every side by artificial mounds.

(2) **History.** Ashkelon was the seat of worship of the Philistine goddess Astarte or Ashtoreth (which see), whose temple was plundered by the Scythians, B. C. 625; was the birthplace of Herod the Great; was taken by the Franks, A. D. 1099; partially destroyed by the Moslems; rebuilt by Richard Cœur de Lion; destroyed again in A. D. 1270. Ruins of walls, columns, marble pillars, and inscriptions on stone abound there now, though many of the good building stones have been dug up and used in Jaffa and Gaza. Sycamores, vines, olives and fruit trees are found there, and also thirty-seven wells of sweet water. Near the ruins of the old city is Jārah, a village of about 300 population. At Askelon there are visible at low water two shallows of crescent shape, which are perhaps remains of ancient moles, and at the bottom of the rocky basin, in which the mediæval city was confined, explorers think they can trace the lines of a little dock. Thomson, *Land and Book*, says: No site in this country has so deeply impressed my mind with sadness. O man, savage, ferocious, brutal, what desolations thou has wrought in the earth! They have stretched out upon Askelon the line of confusion and the stones of emptiness. Thorns have come up in her palaces, and *brambles in the fortresses thereof*, and it is a habitation of dragons and a court for owls (Is. xxxv:11-13). Askelon will surely be rebuilt at some future day of prosperity for this unhappy land. The position is altogether too advantageous to allow it to sink into total neglect. The inhabitants call the place El Jore, but they are also acquainted with the name Askelon, and in some degree with her ancient story, which closely resembles that of her neighbors, Ashdod and Gaza, and is to be found in the same books, sacred and profane (Vol. 11, pp. 329, 330).

ASHKENAZ (ăsh'ke-năz), (Heb. אֲשְׁכְנַז, *ash-ken-az'*, meaning unknown, Gen. x:3); and Ashchenaz (Jer. li:27), the proper name of a son of Gomer, the son of Japheth, and of a tribe of his descendants. In Jeremiah it is placed with Ararat and Minni, provinces of Armenia; whence it is probable that Ashkenaz was a province of Armenia; or at least that it lay not far from it, near the Caucasus, or toward the Black Sea. The commentators have been all bound to something like this conclusion by the passage in Jeremiah, and nothing more satisfactory is now attainable. The various fanciful attempts to trace the name may be seen in Wiener (*Bib. Realwört.*, s. v. 'Askenas'). The modern Jews fancy the name denotes the Germans. Exact site is unknown.

ASHNAH (ăsh'nah), (Heb. אֲשְׁנַח, *ash-naw'*, fortification, or bright).

1. A city of Judah (Josh. xv:33), northwest of Jerusalem.

2. Another Ashnah is mentioned (Josh. xv:43), southwest from Jerusalem. Neither has been identified.

ASHPENAZ (ăsh'pe-năz), (Heb. אֲשְׁפֶנַז, *ash-pen-az'*, perhaps horse-nose), chief of the eunuchs of king Nebuchadnezzar, to whose care Daniel and his companions were consigned, and who changed their names (Dan. i:3, 7) B. C. about 604. The request of Daniel that he might not be compelled to eat the provisions sent from the king's

table filled Ashpenaz with fear. But God had brought Daniel into favor with Ashpenaz, and he granted his request, which kindness the prophet gratefully records (Dan. i:16).

ASHRIEL (ăsh'ri-el), (Heb. אֲשֶׁרִיאֵל, *ash-ri-ale'*, God is joined), son of Gilead, and great-grandson of Manasseh (1 Chron. vii:14; Num. xxvi:31; Josh. xvii:2). It is more properly spelled Asriel.

ASHTAROTH (ăsh'ta-rōth), (Heb. אֲשֶׁת־רִוּת, *ash-taw-roth'*, a wife, and Ashtaroth-Carnaim, אֲשֶׁת־רִוּתִים, *ash-taw-roth'im*), a town of Bashan (Deut. i:4; Josh. ix:10) which was included in the territory of the half-tribe of Manasseh (Josh. xiii:31), and was assigned to the Levites (1 Chron. vi:71; Judg. ii:13; 1 Sam. vii:3; xii:10; xxxi:10; 1 Kings xi:5, 33; xxiii:13). It is placed by Eusebius 6 miles from Edrei, the other principal town of Bashan, and 25 miles from Bostra. The town existed in the time of Abraham (Gen. xiv:5); and as its name of Ashtaroth appears to be derived from the worship of the moon under that name (see ASHTORETH), there is little need to look further than the crescent of that luminary and its symbolical image for an explanation of the addition Carnaim, or rather Karnaim, 'horned.' In 2 Macc. xii:26, mention is made of the temple of Atergatis (Ashtaroth) in Carnion, which is described as a strongly fortified town of difficult access, but which was taken by Judas Maccabæus, who slew 25,000 of the people therein (2 Macc. xii:21, 26). Ashtaroth-Carnaim is now usually identified with Mezareib, the situation of which corresponds accurately enough with the distances given by Eusebius. Here is the first castle on the great pilgrim road from Damascus to Mecca. It was built about 340 years ago by the Sultan Selim, and is a square structure, about 100 feet on each side, with square towers at the angles and in the center of each face, the walls being 40 feet high. The interior is an open yard with ranges of warehouses against the castle wall to contain stores of provisions for the pilgrims. There are no dwellings beyond the castle, and within it only a few mud huts upon the flat roofs of the warehouses, occupied by the peasants who cultivate the neighboring grounds. Close to this building on the north and east side are a great number of springs, whose waters at a short distance collect into a lake or pond about a mile and a half in circumference. In the midst of this lake is an island, and at an elevated spot at the extremity of a promontory advancing into the lake, stands a sort of chapel, around which are many ruins of ancient buildings. There are no other ruins. (Burckhardt, p. 242; Buckingham's *Arab Tribes*, p. 162.) Porter thinks it possibly identical with Kenath and modern *Kunawat*. Others, with greater probability, suggest *Tell-Ashtârâ*, 20 miles east of the Sea of Galilee. "The antiquity of Ashtaroth (if the name be read and identified correctly) is attested independently by Egyptian and Assyrian inscriptions: an *Āstertu* occurs in the list of places in Southern Syria conquered by Tahutmes III, of the 18th dynasty, in his twenty-second year (Tomkins, *TSBA* ix, 262, and in *RP2* v. 45, No. 28; W. Max Müller, *Asien u. Eur. nach altäg. Denkm.*, p. 162; cf. Wiedemann, *Äg. Gesch.* 348 f., 371); and an *Ashtarti* is mentioned in the correspondence, from Palestine, with Amenôphis IV (15th cent. B. C.) as having been in the possession of the Egyptians, and being seized by rebels (Bezold and Budge, *The Tell-el-Amarna Tablets in the Brit. Mus.*, Nos. 43, 64; Sayce, *Patriarchal Age*, 1895, pp. 133, 153). The writers named identify these places with Ashtaroth-Carnaim; but they may equally well have been the

later capital of Og, 'Ashtaroth (supposing this to have been distinct)." (S. R. Driver, *Hastings' Bib. Dict.*)

ASHTERATHITE (ăsh' te - rath - ĩte), (Heb. אֲשֶׁת־רָחַו, *ash-ter-aw-thee'*), a designation of Uzziah (1 Chron. xi: 44), probably as being a citizen of Ashtaroth.

ASHTORETH (ăsh'to-rĕth or ash-tō'reth), (Heb. אֲשֶׁת־רֵת, *ash-tow-reth*, 1 Kings xi:5).

(1) **The Goddess of the Zidonians.** This is the name of *Astarte*, goddess of the Zidonians (1 Kings xi: 5, 33), and also of the Philistines (1 Sam. xxxi:10), whose worship was introduced among the Israelites during the period of the judges (Judg. ii:13; 1 Sam. vii:4), and was celebrated by Solomon himself (1 Kings xi:5), and was finally put down by Josiah (2 Kings xxiii:13). She is frequently mentioned in connection with Baal, as the corresponding female divinity (Judg. ii:13); and from the addition of the words 'and all the host of heaven,' in 2 Kings xxiii:4 (although *Ashĕrah* occurs there, and not *Ashtoreth*, which will be accounted for below), it is probable that she represented one of the celestial bodies.

(2) **Queen of Heaven.** There is also reason to believe that she is meant by the 'queen of heaven,' in Jer. vii:18; xlv:17, whose worship is there said to have been solemnized by burning incense, pouring libations, and offering cakes. Further, by comparing the two passages, 2 Kings xxiii:4 and Jer. vii:2, which last speaks of the 'sun and moon and all the host of heaven, whom they served,' we may conclude that the *moon* was worshiped under the names of queen of heaven and of *Ashtoreth*, provided the connection between these titles is established. This constitutes nearly the sum of all the indications in the Old Test. concerning *Ashtoreth*.

(3) **Rites.** The rites of her worship, if we may assume their resembling those which profane authors describe as paid to the cognate goddesses, agree with the few indications in the Old Test., in part complete the brief notices there into an accordant picture. The *cakes* mentioned in Jer. vii:18, which are called in Hebrew *Kavvanim*, were also known to the Greeks by the name *Chabōnes*, and were by them made in the shape of a sickle, in reference to the new moon. Among animals, the dove, the crab, and, in later times, the lion, were sacred to her; and among fruits, the pomegranate. No blood was shed on her altar; but male animals, and chiefly *kids*, were sacrificed to her (Tacit. *Hist.* ii:3). Hence some suppose that the reason why Judah promised the harlot a kid was that she might sacrifice it to *Ashtoreth* (see Tuch's note to Gen. xxxviii:17). The most prominent part of her worship, however, consisted of those libidinous orgies which Augustine, who was an eye witness of their horrors in Carthage, describes with such indignation (*De Civit. Dei*, ii:3). Her priests were eunuchs in women's attire (the peculiar name of whom is *Kadeshim'*, male devotees, *sacri*, 1 Kings xiv:24), and women *Dedeshoth'*, female devotees, *sacra*, i. e. *meretrices* or *prostitutes* (Hos. iv:14), which term ought to be distinguished from ordinary harlots, *Zonah*, who, like the Bayaderes of India, prostituted themselves to enrich the temple of this goddess. The prohibition in Deut. xxiii:18 appears to allude to the dedication of such funds to such a purpose. (See PROSTITUTION, SACRED.)

(4) **Places.** As for the places consecrated to her worship, although the numerous passages in which the Authorized Version has erroneously rendered *Asherah* by *grove* are to be deducted (as

is explained below), there are yet several occasions on which *gardens* and *shady trees* are mentioned as peculiar seats of (probably, *her*) lascivious rites (Is. i:29; lvii:5; lxvi:17; lxxv:3; 1 Kings xiv:23; Hos. iv:13, 14; Jer. ii:20; iii:13). She also had celebrated temples (1 Sam. xxxi:10).

"Lucian (*De dea Syria*, Sec. 4) visited a great temple of Aphrodite in Byblus (Gebal), in which the rites of Adonis (who corresponded to Tammuz), were performed; here such women as would not shave their hair in commemoration of his burial were obliged to sell themselves to a stranger, the money received being expended on a sacrifice to Aphrodite (Comp. the Babylonian custom referred to above). At Aphaka in the Lebanon there was a temple of Aphrodite, the rites practiced at which were of such a character that they were suppressed by Constantine (Euseb. *Vit. Const.* iii:55)." (R. S. Driver, *Hastings' Bib. Dict.*)

Ashtoreth.

With regard to *Asherah* (Judg. vi:25; Ex. xxxiv:13; Deut. vii:5): Selden was the first who endeavored to show that this word—which in the LXX and Vulgate is generally rendered *grove*, in which our Authorized Version has followed them—must in *some* places, for the sake of the sense, be taken to mean a *wooden image* of *Ashtoreth* (*De Diis Syriis*, ii:2). Not long after Spencer made the same assertion (*De Leg. Hebraeorum* L. ii:16). Vitringa then followed out the same argument, in his note to Is. xvii:8. Gesenius, at length, has treated the whole question so elaborately in his *Thesaurus* as to leave little to be desired, and has evinced that *Asherah* is a *name*, and also denotes an image of this goddess.

Some of the arguments which support this partial, or, in Gesenius's case, total rejection of the signification *grove* for *Asherah* are briefly as follows: It is argued that *Asherah* almost always occurs with words which denote *idols* and *statues of idols*; that the verbs which are employed to express the making an *Asherah* are incompatible with the idea of a grove, as they are such as *to build*, *to shape*, *to erect* (except in one passage, where, however, Gesenius still maintains that the verb there used means *to erect*); that the words used to denote the destruction of an *Asherah* are those of *breaking to pieces*, *subverting*; that the *image* of *Asherah* is placed in the Temple (2 Kings xxi:7; and that *Asherah* is coupled with *Baal* in precisely the same way as *Ashtoreth* is (Comp. Judg. ii:13; x:6; 1 Kings xviii:19; 2 Kings xxiii:4);

and particularly (Judg. iii:7 and ii:13) where the plural form of both words is explained as of itself denoting *images* of this goddess. Besides, Selden objects that the signification *grove* is even incongruous in 2 Kings xvii:10, where we read of '*setting up groves under every green tree.*' Moreover, the LXX has rendered by Asherah *Astarte*, in 2 Chron. xv:16, and the Vulgate has done the same in Judg. iii:7, and, conversely, has rendered *Ashtaroth* by groves, in 1 Sam. vii:3.

On the strength of these arguments most modern scholars assume that Asherah is a *name* for Ash-toreth, and that it denotes more especially the relation of that goddess to the *planet* Venus, as the lesser star of good fortune. It appears, namely, to be an indisputable fact that both Baal and Ash-toreth, although their primary relation was to the sun and moon, came in process of time to be connected, in the religious conceptions of the Syro-Arabians, with the planets Jupiter and Venus, as the two stars of good fortune (see the article BAAL). Although the mode of transition from the one to the other is obscure, yet many kindred circumstances illustrate it. For instance, the connection between Artemis and Selene; that between *Juno* and the planet Venus, mentioned in Creuzer ii:566; the fact that, in the Zendavesta, Anâhîd is the name of the genius of the same planet; and that *astro* (which word is only an Aramaic form of the same *sitarah* which, as was remarked above, furnishes the best derivation for Ash-toreth) is also the name of the same planet in the religious books of the Tsalians (Norberg's *Onomast. Cod. Nasaræi*, p. 20). It is in reference to this connection, too, that a *star* is so often found among the emblems with which Ash-toreth is represented on ancient coins. Lastly, whereas the word Asherah cannot, in the sense of *grove*, be legitimately deduced from the primitive or secondary signification of any Syro-Arabian root as a name of the goddess of good fortune, it admits of a derivation as natural in a philological point of view as it is appropriate in signification. Asherah is the feminine of an adjective signifying *fortunate, happy*.

J. N.

ASHUR (ăsh'ur), (Heb. אַשּׁוּר, *ash-shoor'*, successful, or else, *freeman*, or hero). He is mentioned (1 Chron. ii:24; iv:6) as the father of Tekoa, which likely means that he was the founder of that village (B. C. about 1568).

ASHURITES (ăsh'ur-îtes), (Heb. אַשּׁוּרִי, *ash-oo-ree'*, belonging to Ashur). The name occurs only in 2 Sam. ii:9; Ezek. xxvii:6. Perhaps it is better to read here *Beth-Asher*, which would mean the people of the region of the plain Esdraelon.

ASHVATH (ăsh'văth), (Heb. אֲשָׁוֶת, *ash-vavth'*, perhaps bright), the last mentioned of the three sons of Japhlet, great-grandson of Asher (1 Chron. vii:33).

ASIA (ă'shî-â). The ancients had no divisions of the world into parts or quarters; and hence the word Asia, in the extended modern sense, does not occur in Scripture. It does not indeed occur at all, in any sense, in the Hebrew Scriptures, but is found in the books of the Maccabees and in the New Testament. It there applies, in the *largest* sense, to that peninsular portion of Asia which, since the fifth century, has been known by the name of Asia Minor; and, in a narrower sense, to a certain portion thereof which was known as Asia Proper. Thus it is now generally agreed,—(1) that 'Asia' denotes the whole of Asia Minor, in the texts Acts xix:26, 27; xx:4, 16, 18; xxvii:2, etc.; but, (2) that only Asia Proper, the Roman or

Proconsular Asia, is denoted in Acts ii:9; vi:9; xix:10, 22; 2 Tim. i:15; Rev. i:4, 11.

(1) **Asia Minor.** Asia Minor comprehended Bithynia, Pontus, Galatia, Cappadocia, Cilicia, Pamphylia, Pisidia, Lycaonia, Phrygia, Mysia, Troas (all of which are mentioned in the New Testament), Lydia, Ionia, Æolis (which are sometimes included under Lydia), Caria, Doris, and Lycia.

(2) **Asia Proper.** Asia Proper, or Proconsular Asia, comprehended the provinces of Phrygia, Mysia, Caria, and Lydia (Cicero, *Pro Flacc.* 27; *Ep. Fam.* ii:15). But it is evident that St. Luke uses the term Asia in a sense still more restricted; for in one place he counts Phrygia (Acts ii:9, 10), and in another Mysia (xvi:6, 7), as provinces distinct from Asia. Hence it is probable that in many, if not all, of the second set of references the word Asia denotes only Ionia, or the entire western coast, of which Ephesus was the capital, and in which the seven churches were situated. This is called Asia also by Strabo. About A. D. 285, Asia was greatly reduced in size, Caria, Phrygia, Lydia, and Mysia (Hellespontus) being separated from it; and the name Asia was then restricted to the coast cities and the lower valleys of the Mæander, Cayster, Hermus, and Caicus. "Asia was one of the most wealthy and populous and intellectually active of the Roman provinces; hence the natural sequence of the work done by Paul and Barnabas on their first journey was to preach in the great cities of Asia; and this was evidently St. Paul's intention on his second journey, until he found himself prevented from speaking the word in Asia (Acts xvi:6). The evangelization of Asia was reserved for the third journey, when, during St. Paul's residence of two years and three months in Ephesus, 'the entire population of Asia heard the word' (Acts xix:10); partly on account of the frequency with which the provincials came to Ephesus for trade, religion, law, or festivals; partly through missions of St. Paul's coadjutors to the leading cities of the province." (W. M. Ramsay, *Hasting's Bib. Dict.*)

ASIARCHÆ (ă'shî-ărk'ee), (Gr. Ἀσιάρχαι, *as-ee-ar'khai*, chiefs of Asia, Acts xix:31; Vulg. *Asia principes*; Tertull. *præsides sacerdotales*; A. V. 'certain of the chief of Asia'). These asiarchæ, who derived their appellation from the name of the province over which they presided (as Syriarch, 2 Macc. xii:2, Lyciarch, Cariarch, etc.), were in Proconsular Asia the chief presidents of the religious rites, whose office it was to exhibit solemn games in the theatre every year, in honor of the gods and of the Roman emperor. This they did at their own expense (like the Roman ædiles), whence none but the most opulent persons could bear the office, although only of one year's continuance. The appointment was much as follows: at the beginning of every year (*i. e.* about the autumnal equinox) each of the cities of Asia held a public assembly, in order to nominate one of their citizens as asiarch. A person was then sent to the general council of the province, at some one of the principal cities, as Ephesus, Smyrna, Sardis, etc., to announce the name of the individual who had been selected. Of the persons thus nominated by the cities the council designated ten. As the asiarchs are repeatedly mentioned in the plural, some suppose that the whole ten presided as a college over the sacred rites (Comp. Strabo, xiv. p. 649). But in Eusebius (*Hist. Eccles.* iv:15) Polycarp is said to have suffered martyrdom when 'Philip was *asiarch* and Statius Quadratus proconsul of Asia,' from which and other circumstances it is deemed more probable that, as in the case of the Irenarch, the names of the ten nomi-

nated by the general council were submitted to the proconsul, who chose one of the number to be asiarch.

ASIEL (ā'si-el), (Heb. אֲשִׁיֵּל, *as-ee-ale'*, God is doer, or created by God), a Simeonite, (B. C. 800), whose descendant was Jehu (1 Chron. iv:35).

ASKEILON (ās'ke-lōn), (Heb. אֲשְׁקֵלֹן, *ash-ke-lon'*, migration), a city of the Philistines, and the seat of one of their five states (Judg. xiv:19; 1 Sam. vi:17; 2 Sam. i:20).

(1) **Location.** It was situated on the Mediterranean coast, between Gaza and Ashdod, twelve geog. miles north of the former, and ten S. by W. from the latter, and thirty-seven W. S. W. from Jerusalem. It was the only one of the five great Philistine towns that was a maritime port, and stood out close to the shore. Askelon was assigned to the tribe of Judah (Josh. xiii:13; Comp. Judg. i:18); but it was never for any length of time in possession of the Israelites. The part of the country in which it stood abounded in aromatic plants, onions, and vines (Plin. xix:32; Strabo. xvi, p. 759; Dioscor. i:124; Colum. xii:10; Alex. Trall. viii:3). It was well fortified (Joseph. *De Bell. Jud.* iii:21; Comp. Mela i:11), and early became the seat of worship of Decerto (Diod. Sic. ii:4). After the time of Alexander it shared the lot of Phœnicia and Judæa, being tributary sometimes to Egypt, and at others times to Syria (1 Macc. x:86; xi:60; xii:33; Joseph. *Antiq.* xii:4, 5).

(2) **Birthplace of Herod.** The magnificent Herod was born at Askelon, and although the city did not belong to his dominion, he adorned it with fountains, baths, and colonnades (*De Bell. Jud.* i:12, 11); and after his death, Salome, his sister, resided in a palace at Askelon, which Cæsar bestowed upon her (*Antiq.* xvii:11, 5). It suffered much in the Jewish war with the Romans (*De Bell. Jud.* ii:18, 5; iii:2, 1-3); for its inhabitants were noted for their dislike of the Jews, of whom they slew 2,500 who dwelt there (ii:18, 5; iii:2, 1).

(3) **In the Middle Ages.** After this Askelon again revived, and in the middle ages was noted not only as a stronghold, but as a wealthy and important town (Will. Tyr. xvii:21). As a seaport merely it never could have enjoyed much advantage, the coast being sandy and difficult of access. The town bears a prominent part in the history of the Crusades. After being several times dismantled and re-fortified in the times of Saladin and Richard, its fortifications were at length totally destroyed by the Sultan Bibars A. D. 1270, and the port filled up with stones, for fear of future attempts on the part of the Crusaders (Wilkin. *Gesch. der Kreuz.* vii:586). The place still bears the name of Askulan.

The prophecies concerning Askelon are found in Zech. ix:9; Jer. xxv:20; xlviii:5 and 18; Zeph. ii:4, 7; ix:5. (See ASHKELON.)

ASMODEUS (āz'mo-dē'us), (Gr. ἄσμοδαῖος, *as-moh-dai'us*, Tob. iii:8), a demon or evil spirit, mentioned in the Apocryphal book of Tobit as having beset Sarah, the daughter of Raguel, and killed the seven husbands whom she had married before Tobit (Tob. iii:8; vi:14; viii:2, 3). The Rabbins have a number of absurd traditions respecting Asmodeus, which may be seen in the original edition of Calmet, and in Lightfoot (*Hor. Hebr.* ad Luc. xi:15). They call him, as well as Beelzebub, 'the prince of devils,' whence the two names have been supposed to refer to the same demon. But this title they also gave to 'the angel of death,' as the destroyer of all mankind, hence some derive the name Asmodeus from the Hebrew *shamad*, to exterminate, which identifies it with Ashmodai and also ABADDON (see the word), the

same as Apollyon, the angel of death. This is likely, and thus the story in Tobit means no more than that the seven husbands died successively on their marriage with Sarah.

ASMONEANS (āz'mo-nē'anz). See MACCABEES.

ASNAPPER (as-nāp'per), (Heb. אֲסַנְפָּר, *as-nap-par'*), the name of the king, or possibly Assyrian satrap, who sent the Cuthean colonies into Palestine (Ezra iv:10). Taking him for king of Assyria, he is generally identified with Esarhaddon, although some believe the name to denote Shalmaneser. The title given him in the Auth. Vers., 'most noble', belonged to the satraps. In R. V. his name is Osnappar.

ASP (āsp), (Heb. אֲשָׁפ, *shaf-ee-fone'*), a kind of serpent, whose poison is of such rapid operation that it kills almost the instant it penetrates, without a possibility of remedy. It is said to be very small. The most remarkable mention of it in Scripture is in Ps. lviii:4 where the adder or *asp* is said to "stop its ears, that it may not hear the voice of the charmer." This is supposed by Forskal to be the *coluber Baetaen*, whose bite causes instant death.

Asp.

The true asp of the ancients seems to be entirely unknown. It is frequently mentioned by ancient writers; but in such a careless and indefinite manner that it is impossible to ascertain the species with precision. Critics are still undecided with respect to the species by which Cleopatra procured her death; and, indeed, whether she was bitten or stung at all. In the English Version the word is uniformly used for the Heb. *pethen*, the *coluber Baetaen* of Forskal. In Rom. iii:13, 14, the Greek word *aspis* occurs, and it is also used by the Seventy in Ps. cxl:4, where it is for the Heb. *akolmb*, *adder*. (See Deut. xxxii:33; Job xx:14; Is. xi:8.)

ASPALATHUS (ās-pāl'a-thūs), (Gr. ἀσπάλαθος, *as-pal'ah-thus*), a word which occurs only in Ecclus. xxiv:15) of the Apocrypha, where the substance which it indicates is enumerated with other spices and perfumes to which wisdom is compared. Though this drug is not mentioned in the canonical Scriptures, it is probable that it may have been one of the substances comprehended under the general name of spices. It was no doubt one of the substances employed by the ancients as a perfume and incense, as it is described by Dioscorides (i. c. 19), as well as enumerated by Theophrastus (ix c. 7), and by both among aromatic substances. It forms one of the ingredients of the *cyphi*, or compound incense made use of by the Egyptian priests as related both by Plutarch and Dioscorides. The substance which was called as-

palathus has not been very clearly ascertained, though several plants have been indicated as yielding it.

ASPATHA (äs'pa-thá), (Heb. אֶשְׁפָּתָא, *as-paw-thaw'*), the third of the sons of Haman slain by the Jews of Babylonia (Esth. ix:7), B. C. 510.

ASPHALTUM (äs-fäl'tüm), (Heb. אֶשְׁפָּלִיטָא, *khay-mawr'*, boiling up, to be red, also slime, and pitch). Luther, like the modern Rabbins, erroneously translates the Hebrew by 'clay.' The Hebrew and Arabic names probably refer to the reddish color of some of the specimens (Dioscorides i:99). The Greek name, whence the Latin Asphaltum is doubtless derived from the Lake Asphaltites (Dead Sea), whence it was abundantly obtained. Usually, however, asphaltum, or compact bitumen, is of a shining black color; it is solid and brittle, with a conchoidal fracture, altogether not unlike common pitch. To judge from Gen. xiv:10, mines of asphaltum must have existed formerly on the spot where subsequently the Dead Sea, or Lake Asphaltites, was formed, such as Mariti (*Travels*, iv:27) discovered on the western shore of that sea. The Palestine earth-pitch, however, seems to have had the preference over all the other sorts (Plin. xxviii:23; Discor. i, p. 100). It was used among the ancients partly for covering boats, paying the bottoms of vessels (Comp. Niebuhr ii, p. 336; Gen. vi:14; Exod. ii:3; Joseph. *De Bell. Jud.* iv:8, 4; Buckingham, *Mesopot.*, p. 346), and partly as a substitute for mortar in buildings; and it is thought that the bricks of which the walls of Babylon were built (Gen. xi:3; Strabo. xvi, p. 743; Herod i, 179; Plin. xxxv:51; Ammian. Marcell. xxiii:6; Virtruv. viii:3; Comp. Joseph. *Antiq.* i:4, 3) had been cemented with hot bitumen, which imparted to them great solidity.

ASS (äs), (Heb. אִשָּׁה, *kham-ore'*, the male ass; אִשָּׁה, *aw-thone'*, she ass; Gr. ὄνος, *on'os*, donkey; ὑποζύγιον, *hoop-od-zoog'ee-on*, under the yoke), *Equus Asinus* of Linnæus; by some formed into a subgenus containing that group of the Equidæ which are not striped like Zebras, and have forms and characters distinguishable from true horses, such as a peculiar shape of body and limbs, long ears, an upright mane, a tail only tufted at the end, a streak along the spine, often crossed with another on the shoulders, a braying voice, etc.

Besides the ordinary term *Chamor*, the Hebrews likewise used *Athon*, *Aton*, *Atun*; *Oirim*; *Para*; *Orad*, *Oredia*. By these words, no doubt, though not with the strict precision of science, different species and distinct races of the group, as well as qualities of sex and age, were indicated; but the contexts in general afford only slight assistance in discriminating them; and reliance on cognate languages is often unavailing, since we find that similar words frequently point to secondary and not to identical acceptations.

(1) **Chamor** we take to be the name of the common working ass of Western Asia; an animal of small stature, frequently represented on Egyptian monuments with panniers on the back, usually of a reddish color (the Arabic Hamar and Chamara denoting red), and the same as the Turkish Hymar. It appears to be a domesticated race of the wild ass of Arabia, Mesopotamia, and Southern Persia, where it is denominated Gour; in Scripture it is distinguished by the name of *Orud* (Job xxxix:5), and in the Chaldee of Daniel, *Orodia* (v:21); both terms being most likely derived from the braying voice of the animal.

In its natural state it never seeks woody, but upland pasture, mountainous and rocky retreats; and it is habituated to stand on the brink of precipices

(a practice not entirely obliterated in our own domestic races), whence, with protruded ears, it surveys the scene below, blowing, and at length braying in extreme excitement. This habit is beautifully depicted by Jeremiah, when speaking of the Para (xvii:6), and Orud (xlviii:6), where, instead *Oror*, heath, we should read *Orud*, *wild ass*; for there is no heath, *erica*, in Asia. *Oir*, *Oirim*; in the Chaldee *Ili*; Auth. Vers. young ass, colt; but this rendering does not appear on all occasions to be correct, the word being sometimes used where the Oirim or Ourim carry loads and till the ground, which seems to afford evidence of, at least, full growth (Is. xxx:6, 24). (See Ex. xiii:13; xxiii:4; 2 Kings vi:20; Num. xxii:20; Prov. xxvi:3; Is. i:3; Zech. ix:9; Matt. xxi:5; Luke xiii:15; xiv:5; John xii:14.)

By the law of Moses the ass was declared unclean, and therefore was not used as food, excepting, as it would appear, in cases of extreme famine. This inference, however, is drawn from a case where the term 'ass's head' may be explained to mean not literally the head of an ass, but a certain measure or weight so called, as in 1 Sam. xvi:20, where it is said that Jesse sent to Saul 'an ass of bread;' for, in our version, 'laden with' is an addition to the text. Although therefore the famine in Samaria may possibly have compelled the people to eat asses, and a head may have been very dear, still the expression may denote the measure or weight which bore the same name. The prohibition, however, had more probably an economical than a religious purpose: hunting was thus discouraged, and no horses being used, it was of importance to augment the number and improve the qualities of the ass.

As this animal was most serviceable to man, its name was held in respect rather than contempt. The slander, therefore, current among the Romans and directed against the Jews, that they adored the head of an ass in secret, may not have originated in direct malice or misinterpretation, but have arisen out of some Gnostic fancies, in which the Alexandrian Jews, who had nearly forsaken the Scriptures in search of the magical delusions of the Cabala, and new semi-Christians in that city, so deeply indulged during the first centuries of our era.

(2) **Para**, rendered likewise 'wild ass,' is a derivative of the same root which in Hebrew has produced *Paras*, horse, and *Parasim*, horse-men, Persians and Parthians. Though evidently a generic term, the Scripture uses it in a specific

Syrian Wild Ass.

sense, and seems to intend by it the horse-ass, or wild mule which the Greeks denominated *Hemionos*, and the moderns *Djiggetai*; though we think there still remains some commixture in the descriptions of the species and those of the Koulan, or wild ass of Northern Asia,

ASSEMBLIES, MASTERS OF (Heb. אֲשֵׁרֵי בָּהֳאֵלֵי, *bah-al-ay' as-up-poth'*). This phrase, found in Eccles. xii:11, is supposed to mean the master spirits or associates of the gatherings in the East, where sages and philosophers uttered their weighty sayings. The preacher endeavored so to speak the truth that it should impress the listener with its weight and authority. The aim was to take hold of men's consciences, and fasten instruction, as nails bind together boards through which they are driven, or to prompt them to duty as goads urge on the dull ox (Acts ii:37).

ASSEMBLY (äs-sēm'bly), the term used in the A. V. for several Hebrew words, frequently translated "Congregation." We note three Hebrew words: (1) אָוָּרָוּ, *ats-aw-raw'*, a coming together, especially for a festal occasion (Lev. xxiii:36; Num. xxix:35; Deut. xvi:8). (2) מִקְרָא, *mik-raw'*, something called a public meeting (Is. i:13; iv:5). (3) אֲשֵׁרֵי חָכְמִים, *as-up-paw'*, a collection of wise and learned men (Eccles. xii:11).

In the Greek, (1) "general assembly," *πανάγωρος*, is a festal gathering of all the people (Heb. xii:23), commonly held to be the same as the Church. (2) Ἐκκλησία is a term in use among the Greeks from the time of Thucydides for an assemblage of the people for the purpose of deliberating (Acts x:39).

Figurative. God has promised (Zeph. iii:18) to gather the sorrowful for the assembly again; that is, to restore the happy meetings of his people when converted to Christ. And to sorrow for the solemn assemblies is to be grieved for the want of these public ordinances of God, observed in a regular manner (Zeph. iii:18). The "general assembly of the firstborn," is the harmonious meeting of both Jews and Gentiles in one Christian church, and of all the redeemed in the heavenly state (Heb. xii:23).

ASSHUR (äsh'ur), (Heb. אַשּׁוּר, *ash-shoor'*, a step or level plain).

1. The second named of the sons of Shem (Gen. x:22; 1 Chron. i:17), B.C. before 2300. His descendants occupied Assyria (which see). Called "Asshur" in Gen. x:11; Num. xxiv:22-24; 1 Chron. i:17; Ezek. xxvii:23; xxxii:22; Hos. xiv:3. "Assur" in Ezra iv:2; Ps. lxxxiii:8; "Assyrian" or "Assyrians" in Is. xiv:25; xix:23; xxx:31; xxxi:8; liii:4; Lam. v:6; Ezek. xvi:28; xxiii:9, 12, 23; Hos. v:13; xi:5; xii:1; Mic. v:5, 6.

2. The builder of Nineveh, probably one of the descendants of Ham (Gen. x:11) or Assyria itself.

3. Asshur or Assur was originally the name of a city on the banks of the Tigris, the ruins of which are now known as Kalah Sherghat. The name was of Accadian derivation, and signified 'water bank.' The city long continued to be the capital of the district which was called after it Assyria, but was eventually supplanted by Ninua or Nineveh. Nineveh lay opposite the present town of Mosul, and it is from the remains of its chief palace, now buried under the mounds of Kouyunjik, that most of the Assyrian inscriptions in the British Museum have been brought (Sayce, *Fresh Light on the Monuments*, p. 41).

ASSHURIM (as-shu'rim), (Gen. xxv:3). See ASHURITES.

ASSIDÆANS (äs'si-dē'anz), (Heb. אֲסִידָיִם, *khassee-dem'*, 1 Macc. vii:13, the pious, or righteous); a name derived from the root *chasid*, a word used to denote a very good or a very bad action, but more frequently the former. As a description of a particular body of men it does not occur in the

canonical Scriptures, nor in Josephus; but in the First Book of Maccabees, as above, it is applied to the body of zealous and devoted men who rose at the signal for armed resistance given by Mattathias, the father of the Maccabees, and who, under him and his successors, upheld with the sword the great doctrine of the unity of God, and stemmed the advancing tide of Grecian manners and idolatries. The analogous Hebrew term Chasidim occurs in various passages of Scripture appellatively for good and pious men (Ps. cxlv:10; cxlix:1; Is. lviii:1; Mic. vii:2), but is never applied to any sect or body of men. Upon the whole, in the entire absence of collateral information, it seems the safest course to conclude that the Assidæans were a body of eminently zealous men, devoted to the Law, who joined Mattathias very early, and remained the constant adherents of him and his son Judas—not, like the mass of their supporters, rising occasionally and then relapsing into the ordinary pursuits of life. It is possible that, as Jennings conjectures (*Antiq.*, p. 298), the name *asidaios*, or 'saints,' came to be applied to them by their enemies as a term of reproach, like 'Puritans' formerly and 'saints' very often in the present day.

ASSIR (äs'sir), (Heb. אֲסִיר, *as-seer'*, prisoner).

1. Son of Korah (Ex. vi:24; Chron. vi:22; B.C. about 1620).

2. Son of Ebiasaph, and a forefather of Samuel (1 Chron. vi:23, 37), B.C. about 1740.

3. Son of Jeconiah (1 Chron. iii:17), or perhaps "Jeconiah the captive." (B.C. about 588).

ASSOS (äs'sös), (Gr. Ἄσσος, *as'sos*), a town of Lesser Mysia, or of Adramyttium, opposite the island of Lesbos, or Mitylene. Paul came hither on foot from Troas, to meet with his friends, in order to take shipping for Mitylene (Acts xx:13, 14).

"The harbor of Assos, formed by an artificial mole, was situated at the foot of the hill on which the city stood; and beside it now cluster the houses of the modern village Behram. This harbor gave the city considerable importance in the coasting trade of ancient times (Acts xx:13), as is attested by its coinage, which begins early in the fifth cent. (when the city was released from the Persian domination), and continues as late as A.D. 235. The importance of Assos under the Pergamenian kings is shown by its re-foundation with the name Apollonia, a favorite Pergamenian name (Pliny, *NH* v:123)." (W. M. Ramsay, *Hastings' Bib. Dict.*)

It is now a miserable village, called Beiram, built high upon the rocks on the side towards the land (Richter, p. 465, sq).

ASSUR (äs'sur), (Ezra iv:2; Ps. lxxxiii:8). See ASSYRIA.

ASSURANCE (ä-shur'ans). The sense in which this term is used theologically is that of a firm persuasion of our being in a state of salvation. The doctrine itself has been matter of dispute among divines, and when considered as implying not only that we are now accepted of God through Christ, but that we shall be finally saved, or when it is so taken as to deny a state of salvation to those who are not so assured as to be free from all doubt, it is in many views questionable.

1. Assurance of *final salvation* must stand or fall with the doctrine of personal unconditional election, and is chiefly held by divines of the Calvinistic school; and that nothing is an evidence of a state of present salvation but so entire a persuasion as amounts to assurance in the strongest sense, might be denied upon the ground that degrees of grace, of real saving grace, are undoubtedly mentioned in Scripture.

2. Assurance, however, is spoken of in the New Testament and stands prominent as one of the leading doctrines of religious experience. We have "full assurance of understanding," that is, a perfect knowledge and entire persuasion of the truth of the doctrine of Christ. The "assurance of faith," in Heb. ix:22, is an entire trust in the sacrifice and priestly office of Christ. The "assurance of hope," mentioned in Heb. vi:11, relates to the heavenly inheritance, and must necessarily imply a full persuasion that we are "the children of God," and therefore "heirs of his glory;" and from this passage it must certainly be concluded that such an assurance is what every Christian ought to aim at, and that it is attainable. This, however, does not exclude occasional doubt and weakness of faith from the earlier stages of his experience.

3. A comforting and abiding persuasion of present acceptance by God, through Christ, we may

sin is, in the present life, forgiven as often as it is thus repented of, and as often as we exercise the required and specific acts of trust in the merits of our Saviour; but that this forgiveness of our sins is not in any way made known unto us: so that we are left, as to our feelings, in precisely the same state as if sin were not forgiven till after death, namely, in grief and trouble of mind, relieved only by hope;—or, 3. The scriptural view is, that when sin is forgiven by the mercy of God through Christ, we are, by some means, assured of it, and peace and satisfaction of mind take the place of anxiety and fear.

4. The first of the above conclusions is sufficiently disproved by the authority of Scripture, which exhibits justification as a blessing attainable in this life, and represents it as actually experienced by true believers. "Therefore being justified by faith" (Rom. v:1). "There is *now* no condemnation to them who are in Christ Jesus"

The Acropolis at Assos.

therefore affirm, must in various degrees follow true faith. In support of this view, the following remarks may be offered:

If it is the doctrine of the inspired records that man is by nature prone to evil, and that in practice he violates that law under which as a creature he is placed, and is thereby exposed to punishment; if also it is there stated that an act of grace and pardon is promised on the conditions of repentance toward God, and faith in our Lord Jesus Christ; if that repentance implies consideration of our ways, a sense of the displeasure of Almighty God, contrition of heart, and consequently trouble and grief of mind, mixed, however, with a hope inspired by the promise of forgiveness, and which leads to earnest supplication for the actual pardon of sin so promised, it will follow from these premises—either: 1. That forgiveness is not to be expected till after the termination of our course of probation, that is, in another life; and that, therefore, this trouble and apprehension of mind can only be assuaged by the hope we may have of a favorable final decision on our case;—or, 2. That

(Rom. viii:1). The quotations might be multiplied, but these are decisive. The notion that though an act of forgiveness may take place, we are unable to ascertain a fact so important to us, is also irreconcilable with many Scriptures in which the writers of the New Testament speak of an experience, not confined personally to themselves, or to those Christians who were endowed with spiritual gifts, but common to all Christians. "Being justified by faith, we have *peace* with God" (Rom. v:1). "We joy in God, by whom we have received the *reconciliation*" (Rom. v:11). "Being reconciled unto God by the death of his Son" (Rom. v:10). "We have not received the spirit of bondage again to fear, but the Spirit of adoption, whereby we cry, Abba, Father" (Rom. viii:15). To these may be added innumerable passages which express the comfort, the confidence, and the joy of Christians; their "friendship" with God; their "access" to him; their entire union and delightful intercourse with him; and their absolute confidence in the success of their prayers. All such passages are perfectly consistent with deep

humility and self-diffidence; but they are irconcilable with a state of hostility between the parties, and with an unascertained and only hoped-for restoration of friendship and favor. Even in Old Testament times it was realized, as shown in the beautiful description of Isaiah (xxxii:17), where for A. V. 'quietness and assurance' R. V. reads 'quietness and *confidence*,' the original word denoting 'to hang upon something,' hence figuratively 'to trust.'

5. An assurance, therefore, that the sins which are felt to "be a burden intolerable" are forgiven, and that the ground of that apprehension of future punishment which causes the penitent to "*bewail* his manifold sins," is taken away by restoration to the favor of the offended God, must be allowed, or nothing would be more incongruous and impossible than the comfort, the peace, the rejoicing of spirit, which in the Scriptures are attributed to believers.

6. Few Christians of evangelical views have, therefore, denied the possibility of our becoming assured of the favor of God in a sufficient degree to give substantial comfort to the mind. Their differences have rather respected the means by which the contrite become assured of that change in their relation to Almighty God, whom they have offended, which in Scripture is expressed by the term justification. The question has been (where the notion of an assurance of eternal salvation has not been under discussion), by what means the assurance of the Divine favor is conveyed to the mind. Some have concluded that we obtain it by *inference*, others by the *direct testimony* of the Holy Spirit to the mind. (See HOLY GHOST.) (Watson's *Theol. Dict.*; Hastings' *Bib. Dict.*)

ASSYRIA (as'sŷr'i-à). We must here distinguish between the *country* of Assyria and the *Assyrian empire*. (Heb. אַשּׁוּר, *ash-shoor'*, or אַשּׁוּר, *ash-shoor'*), the name of a country, the people being also described by the same term, only that in the latter sense it is masculine, in the former, feminine. In the Septuagint it is commonly rendered by *Assour*, or *Assurios*, and in the Vulgate by *Assur* and *Assyrii*, and seldom or never by *Assuria*, or *Assyria*.

1. Name. The biblical derivation of the name seems to be from Asshur, son of Shem (Gen. x:22; 1 Chron. i:17).

The recovery of the monuments of ancient Nineveh, once the capital of Assyria (Gen. x:11), and the translation of their inscriptions, have thrown new and confirmatory light on scriptural statements and made the history of Assyria and its people of intense interest to Bible students.

Assyria, or the land of Assur, took its name from the city of Assur, 'water boundary,' which was the capital of a once small district on the west bank of the Tigris river between the greater and lesser Zab. This name, as well as Sar, the god who represented the firmamen, became somewhat changed by the Semitic Assyrians and the two names took the form of the word that meant 'gracious;' so that Assur became the divine personification of the power and constitution of Assyria, and at the same time he was also the 'gracious' divinity, and the primeval firmament of heaven.

2. General Physical Features. The country within these limits is of a varied character. On the north and east the high mountain chains of Armenia and Kurdistan are succeeded by low ranges of limestone hills of a somewhat arid aspect, which detach themselves from the principal ridges, running parallel to them, and occasionally enclosing between their northern or northeastern flank

and the main mountain line rich plains and fertile valleys. To these ridges there succeeds at first an undulating zone of country, well watered and fairly productive, which finally sinks down with some suddenness upon the great Mesopotamian plain, the modern district of *El-Jezireh*. This vast flat, which extends in length for 250 miles, from the latitude of *Mardin* (37 deg. 20 min.) to that of *Tekrit* (34 deg. 33 min.), and which is, in places, of nearly equal width, is interrupted only by a single limestone range—a narrow ridge, rising abruptly out of the plain; which, splitting off from Zagros in lat. 33 deg. 30 min. may be traced under the names of *Sarazur*, *Hamrin*, and *Sinjar*, from *Iwan* in Luristan nearly to *Rakkah* on the Euphrates. "From all parts of the plain the Sinjar is a beautiful object. Its limestone rocks, wooded here and there with dwarf oak, are of a rich golden color; and the numberless ravines which furrow its sides form ribs of deep purple shadow" (Layard, *Nineveh and Babylon*, p. 265). Above and below this barrier, stretching southward and westward further than the eye can reach, and extending northward and eastward 70 or 80 miles to the hill-country before mentioned, is an immense level tract, now for the most part a wilderness, scantily watered on the right bank of the Tigris, but abundantly supplied on the left, which bears marks of having been in early times throughout well cultivated and thickly peopled. This plain is not alluvial, and most parts of it are even considerably raised above the level of the rivers. It is covered in springtime with the richest vegetation, presenting to the eye a carpet of flowers, varying in hue from day to day; but as the summer advances it is parched up, and gradually changes to an arid and yellow waste, except along the courses of the rivers. All over this vast flat, on both sides of the Tigris, rise "grass-covered heaps, marking the site of ancient habitations" (Layard, p. 245; Smith, *Bib. Dict.*)

3. Climate. The proximity of hills and mountains materially affected the climate, which was in general cooler than that of Babylonia. It is, however, impossible to secure any definite information sufficiently comprehensive for a general view of the climate. The ancient inhabitants, who wrote so much concerning their lives, kept no records of temperature, and in modern times the passing traveler has only noted the temperature at irregular intervals. From the records it appears that the average maximum temperature indoors in Bagdad during June and July is 107 deg. Fahrenheit, while it sometimes goes up as high as 120 deg. or 122 deg. This average (107 deg.) seems now also to be reached in Assyria, at least along the river Tigris, in the neighborhood of the modern town of Mosul. There is little doubt, however, that this is higher than the regular temperature in ancient times, for the failure of the extensive system of irrigation, the encroachment of the desert sands, and the denudation of forests have all conspired to change the climate. (Barnes' *Bib. Dict.*)

4. Fauna. The fauna was formerly far more varied than it is to-day, as the pictures on the monuments and the statements in the inscriptions prove beyond the possibility of doubt. In addition to hares, roes, stags, and mountain goats, lions and wild oxen (*rimu*, Heb. *re'em*) were found in great numbers—the former in the tall reed plantations on the banks of the Tigris, the latter in the mountain districts, the happy hunting-grounds of the Assyrians. Magnificent horses—the famous Assyrian chargers, which were probably of the Medo-Elamite type—and cattle, goats, and sheep pastured on the slopes;

while wild asses and camels are known only in latter times, through the Assyrian incursions into the Syro-Arabian desert. The culture of bees was also actively carried on. Of domestic animals, the dog may be mentioned; of wild beasts, the panther, the wolf, the bear, and some others.

5. Flora. The mountains were covered with oak, plane, and wild pine trees; while on the plain proper, besides abundance of nuts, fig and olive trees flourished, together with the vine plant. These last were originally unknown to the East-Semitic districts, and were first imported by the Assyrian kings from Syria. Agriculture was confined mainly to the cultivation of wheat, barley, hemp, and millet. (F. Hommel, *Hastings' Bib. Dict.*)

6. Chief Cities. The chief cities of Assyria in the time of its greatness appear to have been the following: Nineveh, which is marked by the mounds opposite Mosul (*Nebbi-Yunus* and *Koyunjik*); Calah or Halah, now *Nimrud*; Asshur, now *Kileh Sherghat*; Sargina or Dur-Sargina, now *Khorsabad*; Arbela, still *Arbil*; Opis, at the junction of the *Diyaleh* with the Tigris; and Sittace, a little further down the latter river, if this place should not rather be reckoned to Babylonia.

7. History. Assur was at first but a dependency of the then old monarchy of Babylon. In the sixteenth or seventeenth century B. C. it had gained sufficient power to free itself from Babylon, but what the exact boundaries were, it is hard to tell, as they were constantly varying with the strength of the military power. At times they reached from the Tigris to the plateau of Mesopotamia, and from Babylonia to the Kurdish mountains, embracing a territory about equal to Italy in extent.

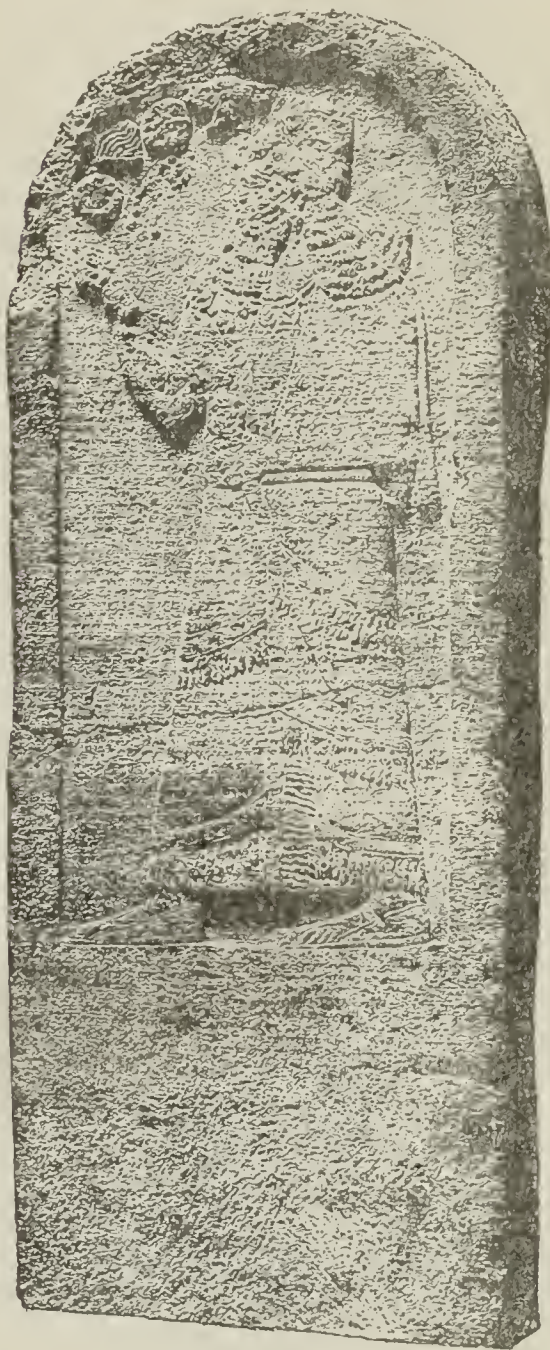

At an early period of time the capital of Assyria was moved to a group of cities composed of Nineveh, Calah, and Dur-Sargina, the sites of the modern Kouyunjik, Nimrud and Khorsabad. It was in the sixteenth or seventeenth century B. C. that Bel-kapkapi, the governor of the country of Assur, invested himself with the title of king. From this time little is known of the Assyrians, from their own records, until about 1320 B. C., when Rimmonnirari I recounts, in an inscription, his wars with the Babylonians, the Kurds, Shuites, and Aramæans.

(1) **Tiglath-pileser.** For two centuries his descendants occupied the throne in orderly succession until the reign of Tiglath-pileser I, whose conquests of the Hittites and capture of Babylon in 1130 B. C. made him virtually the founder of the Assyrian empire. With his death the Assyrian power languished for a time, and the kingdom of David and Solomon arose during the interim in the west.

(2) **Assur-natsir-pal.** In the reign of Assur-natsir-pal (883-58 B. C.) Assyria once more became a formidable power, Babylon, Phœnicia and the Hittite king of Carchemish poured their rich offerings of tribute into the Assyrian treasury. Splendid palaces arose at Calah, where a library was created, and it became the favorite city of the king.

(3) **Shalmaneser II.** Under his son, Shalmaneser II, Assyria reached the height of her imperial power. The annals of this king inscribed upon three monuments are now in the British Museum. One of these is a monolith from Kurkh, and a full length figure of Shalmaneser is sculptured upon it while the surface of the stone is covered with the inscription. Another is a small obelisk of polished black

stone, the upper part of which is shaped like three ascending steps. The third consists of the bronze framework of two colossal doors or gates more than twenty feet square. They are covered with relief work representing the va-

Monolith of Shalmaneser II.

rious campaigns of the king, and there are short texts which explain the figures. (See ASSYRIAN AND BABYLONIAN DISCOVERIES.)

Shalmaneser's first campaign was against the tribes of Kurdistan. He then fell upon the Armenian king of Van and Manna or Minni (*Jer. li:27*). He reduced the Hittites and their allies and regained Pethor which again gave the Assyrians the command of the ford over the Euphrates.

In B. C. 854 Shalmaneser came into conflict with the kingdom of Hamath, and the common danger roused Benhadad II of Damascus, who, with Ahab of Israel, and others, formed a confederacy to resist the Assyrian advance.

But the confederacy was shattered at Karkar or Aroer, although Shalmaneser had suffered too severely to be able to follow up his victory. For a time, therefore, Syria remained unmolested and

the Assyrian king turned his attention to Babylonia, which he reduced to a state of vassalage.

In B. C. 841 Shalmaneser was again in the West. Hazael had succeeded Ben-hadad upon the throne of Damascus, and against him the tide of Assyrian power was turned. He suffered a crushing defeat on the heights of Shenir (see Deut. iii:9), and his camp fell into the hands of the Assyrians. Damascus was besieged and the ambassadors of Jehu brought tributes and offers of submission. Shalmaneser made expeditions to Phœnicia, Kapadokia and Armenia for the purpose of exacting tribute, but the king was growing feeble and disaffections arose at home, and when he died about B. C. 823, the vigor of his kingdom was failing.

(4) **Other Princes.** He was succeeded by a few princes of his own line, but their reigns were short. One revolt followed another, and at last even the army declared itself against the king about B. C. 750, and he and his dynasty fell together.

(5) **Pul, or Tiglath-Pileser II.** Soon afterwards a military adventurer by the name of Pul seized the vacant throne and assumed the name of Tiglath-Pileser II. With him began the second Assyrian Empire, which differed essentially from the first, which was at best a loosely connected military organization. Campaigns had been made into distant countries for the sake of plunder, but almost as soon as the Assyrian armies returned, the conquered kingdoms threw off the the yoke of the invader. Tiglath-Pileser II, however, consolidated and organized his work, and for the first time in history carried out on a large scale the principle of centralization and bureaucracy.

His chief object was to divert the commerce of Western Asia into Assyrian hands, and to this end every effort was made to unite Babylonia with Assyria, to overthrow the Hittites, and to render Syria and the Phœnician cities tributary. The northern part of Babylonia was annexed to Assyria, the Kurdish tribes were severely punished, and a campaign was made against the confederacy of northern nations, which was led by Sarduris of Van. The confederacy was utterly defeated, 72,950 prisoners falling into the hands of the Assyrians, and the way opened into Syria. In B. C. 742, he conquered Arpad (now Tel Erfad) after a siege of two years, and this victory was followed by the submission of Northern Syria. Hamath was taken by storm, although it was in alliance with Uzziah of Judah, and the kings of Syria now hastened to do homage and offer tribute to the Assyrian conqueror. Menahem, king of Israel, against whom the God of Israel stirred up the spirit of Pul, king of Assyria (1 Chron. v:26), paid a tribute of a thousand talents of silver 'that his hand,' *i. e.*, 'his favor, might be with him to confirm the kingdom in his hand' (2 Kings xv:19, 20).

Three years after this Ararat or Armenia was again invaded and the country devastated for a space of four hundred and fifty miles. Ahaz, king of Judah, was hard pressed by the combined forces of Pekah, king of Israel, and Rezin, king of Damascene-Syria, in their attempt to overthrow the Davidic dynasty. He therefore purchased Tiglath-Pileser's assistance with a large sum, taken out of his own and the Temple treasury. The Assyrian king accordingly invaded the territories of both the confederated kings, and annexed a portion of them to his own dominions, carrying captive a number of their subjects (2 Kings xv:29; xvi:5-10; 1 Chron. v:26; 2 Chron. xxviii:16; Is. vii:1-11; Comp. Amos i:5; ix:7).

Damascus, too, was conquered, and Ahaz was at the feast of celebration in honor of the victory. It was here he saw the altar, of which he sent a pattern to Urijah, the priest (2 Kings xvi:10).

(6) **Shalmaneser IV.** Tiglath-Pileser was succeeded by Shalmaneser IV (Hos. x:4), B. C. 724. His reign of five years was marked by an unsuccessful attempt against Tyre, and the beginning of a war against the kingdom of Israel, but his death put an end to the projects (B. C. 722).

(7) **Sargon.** Sargon, a usurper, took the throne. (See SARGON.)

Two years after his accession he laid siege to Samaria, took it after an investment of three years (B. C. about 720), and then reduced the country of the ten tribes to a province of his empire, carrying into captivity the king and his people, and settling Cuthæans from Babylonia in their room (2 Kings xvii:3-6; xviii:9:11).

Babylon had revolted again and now accepted the leadership of Merodach-Baladan, the hereditary chieftain of Beth-Yagina in the marshes on the coast of the Persian Gulf. The southern portion of Sargon's dominions was threatened by Elam; the Kurdish tribes on the east renewed their depredations; the Hittite kingdom remained unsubdued; the Syrian conquests could be retained only with difficulty, and a new enemy appeared in the shape of Egypt.

Sargon's first act was to drive the Elamites back, but he was recalled to the west by the revolt of Hamath, whose king had secured the co-operation of Arpad, Damascus, Samaria and other cities. But the revolt was of short duration. Hamath was burned and the king flayed alive. Sargon next marched along the sea coast to the cities of the Philistines. Then the Egyptian army was routed at Raphia, and its ally Khanun of Gaza taken captive.

In B. C. 717 the rich Hittite city of Carchemish was stormed and sacked, and then placed under an Assyrian satrap, who thus held in his hands the key of the caravan trade between Eastern and Western Asia.

But the Hittites found avengers in the allied populations of the north, in Meshech and Tubal, in Ararat and Minni. The contest lasted for six years, but Sargon finally conquered, and B. C. 711 he was free to turn his attention to the west, where matters were in a serious condition.

Merodach-Baladan, knowing that his own turn would come as soon as Sargon had firmly established his power in Northern Syria, had dispatched ambassadors to the Mediterranean states, urging them to combine against the common foe.

In Is. xxxix we read of their arrival in Jerusalem, and, although Isaiah had faithfully warned Hezekiah, he listened to the persuasions of the Babylonian envoys, and encouraged by the promise of Egyptian support, besides that of Phœnicia, Moab, Edom and the Philistines, he determined to defy the Assyrian king. Hezekiah showed these strangers all the resources of his country and all the treasures of his house. He was severely rebuked by the prophet for his vainglory in so doing, and the terrible sequel proved that the words of Isaiah were faithful and true.

Before the confederacy could act Sargon fell upon Palestine. Phœnicia and Judah were subjugated, and Jerusalem captured. Ashdod (Is. xx:1) was burned, and Egypt made no effort to render aid, though an ally by treaty.

We are now enabled by the light of Assyrian records to state that the description of Isaiah (chap. x) of the onward march of the host against Jerusalem is not romance; the sufferings

of the beleaguered Jews (Is. xxii) are not imaginary, and the prophecy foretelling the fall of the devoted city (Is. x; xxii:1-14) was not an unfulfilled threat.

We know, too, that ten years before the campaign of Sennacherib, Sargon had swept through the land of Judah, and it is to his armies that Isaiah alluded as being at Nob, a half-hour to the north of Jerusalem.

Sargon was murdered by his own soldiers in his new city, Dur-Sargon (B. C. 707).

(8) **Sennacherib.** In the reign of Sargon's successor, *Sennacherib*, or *Sancherib*, we find Hezekiah, king of Judah, allying himself with Egypt (2 Kings xviii:7, 21). This brought against him Sennacherib with a mighty host, which, without difficulty, subdued the fenced cities of Judah, and compelled him to purchase peace by the payment of a large tribute. But 'the treacherous dealer dealt very treacherously' (Is. xxxiii:1), and, notwithstanding the agreement, proceeded to invest Jerusalem. In answer, however, to the prayers of the 'good king' of Judah, the Assyrian

taken and the Egyptian king was compelled to fly, first to Thebes and then to Ethiopia.

Egypt was divided into twenty satrapies, which were governed partly by Assyrians and partly by native princes. On his return to Assyria Esarhaddon associated Assur-bani-pal, the eldest of his four sons, with him in government, and died two years later.

(10) **Assur-bani-pal.** Assur-bani-pal is probably the 'great and noble' Assnapper of Ezra iv:10. He was luxurious, ambitious and cruel, but was a munificent patron of literature.

His first occupation was the crushing of a revolt in Egypt. Tirkakah was again driven out of the country, and Thebes, called 'No of the god Amun' in the Scriptures, was plundered and destroyed. It is to this destruction of the old capital of the Pharaohs that Nahum refers in his prophecy (iii:8). Tyre was besieged and forced to surrender, Cilicia paid homage to the Assyrian king, and Gog, or Gyges, of Lydia, sent him tribute.

The Assyrian Empire had now reached its widest limits. Elam had fallen, and its capital had been razed to the ground. The three last Elamite kings were bound to the yoke of Assur-bani-pal's chariot, and forced to drag their conqueror through the streets of Nineveh.

The Kedarites were chastised, as well as other nomad tribes of Northern Arabia, the land of Minni was overrun and the Armenians of Van begged for an alliance with the Assyrian king.

But the seeds of disruption were being fast sown by a luxurious king. At the very time that the empire reached its greatest limits in the subjugation of Elam a rebellion broke out in Babylon (B. C. 652). Egypt, Arabia, Palestine and Lydia made common cause, and nothing was left of the Assyrian Empire after the struggle but the old capital of Assur.

8. Art. Assyrian art was for the most part borrowed from Babylonia, even the palaces and temples being constructed of brick and raised on

mounds, although stone was plentiful and inundations which Babylon suffered were not feared. The walls of the houses, however, were adorned with sculptured slabs of alabaster, in place of the vermilion paintings of Babylon (Ezek. xxiii:14). The walls of Dur-Sargon were over a mile square. They were forty-six feet thick, flanked with eight towers, and their corners pointed to the four cardinal points. Columns, which had been a Babylonian invention, were plentifully used, sometimes in exaggerated forms, resting on the backs of dogs, lions or winged bulls.

Assyrian sculpture was mostly in relief. Its first efforts, which began about the time of Assurnatsir-pal, are characterized by boldness and lack of perspective. Later, about the time of the Second Empire, the foreground is filled with plant and other forms, drawn with great exactitude. This made the relief work of this period exceedingly rich.

In the reign of Assur-bani-pal the carving is again distinguished by boldness, but it is finished and accurate. The human form, however, never received justice at the hands of the Assyrians.

9. Literature. Assyrians learned the art of writing from the Babylonians, who in turn learned it from the Accadians, the inventors of the hieroglyphics, out of which the cuneiform characters of the Assyrians afterwards grew.

Assyrian King in His Chariot.

was diverted from his purpose, partly by the rumor (Is. xxxvii:6) of the approach of Tirhakah, king of Ethiopia, and partly by the sudden and miraculous destruction of a great part of his army (2 Kings xviii:13-37; xix; Is. xxxvi and xxxvii). He himself returned to Nineveh, where, in course of time, when worshiping in the temple of his god he was slain by his sons Adrammelech and Sharezer.

(9) **Esarhaddon.** About B. C. 681 Esarhaddon was proclaimed king. (See 2 Kings xix:37; Is. xxxvii:38).

Under his rule the Second Empire reached the zenith of its power. He was the only Assyrian king who ever attempted to conciliate the peoples who had been conquered. In the first year of his reign he rebuilt Babylon and made it the second capital of the empire, his court residing alternately there and at Nineveh.

It was while Esarhaddon was holding his winter court at Babylon that Manasseh of Judah was brought to him as prisoner (2 Chron. xxxiii:11).

His principal achievement was the conquest of Egypt, which began about B. C. 675, and was completed four years later, when Memphis was

The literature, as well as the writing of the Assyrians, came from the Accadians. Old documents were re-edited or translated. The writing material was at first papyrus leaves, but clay was plentiful and received easily the impress of the cuneiform characters by means of a metal wedge-shaped stylus. This mode of writing did away with curves, circles and continuous lines; pictures became symbols instead of exact representations, and in a few centuries a character would change beyond recognition in its transformation from a hieroglyphic to a cuneiform representation.

Nevertheless Assyrian literature was an exotic. The Babylonians, on the other hand, were by nature a literary people, while the Assyrian gloried in records of ferocity. He was the lion of Nahum, which delighted to tear its prey (Nah. i:8; ii:6, 8, 12).

Notwithstanding these changes that were going on, and the poor means for writing and reading, it would seem that there was a large proportion

lower classes are indicated. It is evident, however, that among the higher classes chairs, tables and couches were used, and wines were the usual beverage at their feast. Among the most highly prized of these was that of Khilbun, or Helbon, which is mentioned by Ezekiel (xxvii:18).

There was also a palm wine, made from dates, and beer, milk, cream, butter or ghee were much used. The tables were ornamented with flowers, and musicians amused the banqueters.

Next to hunting men, the great delight of the Assyrian kings was the hunt of wild animals. Tiglath-Pileser I had hunted elephants in the land of the Hittites, as the Egyptian Pharaohs had done before him. The reem, or wild bull, afterwards became their favorite game. It was not until the reign of Assur-bani-pal that lion hunting ceased to be a dangerous sport. With Esarhaddon, however, the old race of warrior kings had come to an end, and lions were afterward captured and kept in cages, until they were turned

Bas-relief Showing Assur-bani-pal and His Queen.

of the people who could read and write. Like Babylon, Assyria had her libraries, which were well stocked with books in papyrus and clay. One of these was at Nineveh, from which most of the Assyrian literature that we possess has come. There was another at Calah, and another at Assur. Many of these books were lexicographical, explaining the old Accadian and Aramaic forms. Aramaic was the language of diplomacy (2 Kings xviii:26), as well as of travel, and was used side by side with the Syrian. This explains why the Jews of the post-Babylonish captivity gave up their language in favor, not of the Assyrian, but of the Aramaic tongue.

All subjects of knowledge or science of the times were treated of in these libraries. Dispatches of generals, bills of sale, astrology, omens, religion, songs, poetry and astronomy are all found in these ancient books. Their works on astronomy show that records of eclipses had been kept for great periods. Time was measured by a water clock, as well as by the dial. The dial placed at Jerusalem by Ahaz (2 Kings xxii) was no doubt the result of contact with the Assyrians.

Even medical science was in quite an advanced state. Diseases were classified and modes of treatment prescribed, although much of superstition was mingled with the prescriptions. (See ASSYRIAN AND BABYLONIAN LIBRARIES.)

10. Manners and Customs. It is only incidentally that the manners and customs of the

out for the royal hunt, and as they then had to be whipped into activity the royal hunters were comparatively safe.

The Assyrians were not an agricultural people, but the kings had their parks and the wealthier classes their gardens. Summer houses were sometimes built in the midst of them, and as early as the time of Sennacherib we meet with a 'hanging garden' grown on the roof of a building (*Assyria: Its Princes, Priests and People*. A. H. Sayce, M. A., 1895).

ASSYRIAN AND BABYLONIAN DISCOVERIES.

This article contains a short account of the discoveries that have been made in the buried cities of Nineveh and Babylon since the middle of this century.

It must be very fascinating to all Biblical students to find that the names of all the Assyrian and Babylonian kings mentioned in the Bible, like Tiglath-Pileser, Shalmaneser, Sargon, Sennacherib, Esarhaddon, Nebuchadnezzar, Merodach-Baladan and Belshazzar have been identified from the discoveries made in the ruins of Nineveh and Babylon. It is also interesting to note that those buried cities of ancient civilization had remained in oblivion for more than twenty-five centuries until the spade of the zealous explorers, Mr. (now Sir Henry) Layard and M. Botta, brought them to light nearly fifty years ago.

(1) **Nineveh.** I was fortunate enough when I was quite a youth to meet Sir Henry Layard in 1845 at Mosul, which is situated on the bank of the river Tigris, opposite the site of ancient Nineveh. As he wanted some one to assist him, he invited me to stay with him and give him the necessary help in his intended explorations. I was with him more than four years during his explorations in Assyria and Babylonia, and to this opportunity I owe my success in archæological researches as well as other public services under the British Crown.

In 1844, while Sir Henry Layard was passing through Assyria, he noticed both at the mounds of Koyunjik, the principal seat of the kings of Assyria, and Nimroud, the Calah of the Bible (mentioned in the tenth chapter of Genesis), some indications of ancient remains which led him to obtain a firman from the Sultan to enable him to excavate there. He commenced operations in the last mentioned mound, and after a few days' work he was rewarded by the discovery of the palace of Assur-Nazir-pal, the father of Shalmaneser II, who was the first of the Assyrian kings who came in contact with the Israelites. The sculptures of Assur-Nazir-pal's palace, which now adorn one of the Assyrian galleries at the British Museum, were in better preservation than those of Khorsabad or any other edifice discovered in Assyria thereafter, but with the exception of the hunting and war scenes most of the bas-reliefs in the different chambers consisted largely of representations of kings, eagle-headed figures, eunuchs and sacred trees. A few of these were sent to the British Museum, and the remainder were acquired for different museums in Europe and America. As late as 1878 I carried to Constantinople sculptures from the same locality as a present from the trustees of the British Museum to the Sultan, and his majesty gave them to the Imperial Museum at the Turkish capital.

Besides the palace of Assur-Nazir-pal, Sir Henry Layard discovered a temple built by that monarch and the remains of the edifices erected by Tiglath-Pileser, Esarhaddon and Saracus, his grandson, who was the last of the Assyrian kings.

(2) **Palace of Sennacherib.** Afterwards Sir Henry Layard commenced work at Koyunjik (city of Nineveh) and was rewarded by the discovery of the grand palace of Sennacherib; but, unfortunately, the magnificent sculptures which adorned it were found in a dilapidated state, as they had been greatly damaged by fire, and though a great number of the bas-reliefs were sent to the British Museum, the greater part fell into pieces as soon as they were uncovered.

The most interesting and valuable inscriptions found by Sir Henry Layard in his explorations, which related to Biblical history, were the accounts given on a black marble obelisk and human-headed bulls, of the invasion of the Holy Land by Shalmaneser and Sennacherib. The former was discovered at Nimroud, and on it is recorded that Jehu, the son of Omri or Nimshi, paid a tribute to Shalmaneser II of "silver, gold, a golden cup, golden vases, golden vessels, lead, a staff for the hand of the king, and scepters." The latter was found in the palace of Sennacherib at Koyunjik, on which was inscribed the expedition of that monarch against Lachish, as it is recorded in the 18th chapter of 2 Kings and 36th chapter of Isaiah, wherefrom Rab-Shakch was sent with a threatening message to Hezekiah, king of Judah.

(3) **Palace of Assur-bani-pal.** After Sir Henry Layard's second successful expedition to Assyria he declined to go out again, and I was

therefore commissioned by the trustees of the British Museum to proceed to Mesopotamia to continue the researches in Nineveh, which were then conducted on a small scale under the general control of Major (late Sir Henry) Rawlinson, the then British consul-general at Bagdad. I had come to England to complete my studies at Oxford, but as I took a great interest in Assyrian researches, I willingly accepted the proffered task.

My exploration extended to Koyunjik, Nimroud and Kalaa-Shirgat (the ancient Asshur), but my great success was achieved in the former site. There I discovered in the northern part of the mound the edifice of Assur-bani-pal. The sculptures of this palace have been considered by competent authorities to be of a higher order of art than those of other Assyrian buildings. The royal lion hunt, especially, has been the admiration of every one. The animals are portrayed in every variety of posture and are sculptured with surprising vigor. In the lion hunt saloon, I discovered the library of Assur-bani-pal, and among the records were found the legends of the creation and the deluge.

To prove that there may be still invaluable treasures buried underground, both in Assyria and Babylonia, I will mention two important discoveries I made in the former country some years ago, which will show how necessary it is to examine thoroughly every ancient site without being discouraged by disappointment and failures.

(4) **Colossal Gates.** A few years ago, while an Arab was digging a grave in a mound, called Balawat, about fifteen miles to the east of Koyunjik, and nine miles to the northeast of Nimroud, he came upon a bronze band, covered with embossed illustrations and inscriptions, which he broke into a number of pieces and sold to different individuals. Fortunately one of those who purchased three or four portions of the rare antique sent me two pieces of it, and so, when I went out to Assyria for the trustees of the British Museum, in 1877, the first thing I did was to find out where that relic was obtained, and as I felt certain that the band discovered by the Arab digger was a part of a large trophy, I determined to find the remainder.

On arriving there I found to my great regret that the mound in which that object was buried had been used as a cemetery from time immemorial by the Mohammedans, and there was not a vacant space even of two feet where a grave had not been dug to the depth of five or six feet.

For nearly 2,500 years that monument of Assyrian grandeur was unknown to explorers, and no one happened to hit upon it, though it was buried only about five feet below the surface of the ground. It was both difficult and dangerous to dig there for antiquities, on account of the prejudice of the natives, but nothing daunted, I managed by the help of my Arab friends to try a spot on which there was no grave visible, and in a few hours' time I was rewarded by the discovery of that part of the trophy which was only five feet deep. There were, however, two good reasons why that mound was left untouched by European explorers before I commenced work in it; the first was its insignificance, quite unlike Koyunjik, Khorsabad or Nimroud; and, secondly, the existence of the graves on it would naturally debar an archæologist from attempting to dig in it from fear of coming into collision with the fanatical Arabs.

These bronzes, which are now exhibited at the British Museum, appear to have covered a two-leaf cedar gate, about twenty feet square by four

inches thick, and as the wood had rotted away I could only find out its thickness from the bend of the nails that were found fixed to it. The scrolls, or bands, of bronzes which I found lying flat on the soil in their original position did not cover the whole wooden frame, but between each of the scrolls there must have been some ornamented cedar work or some other rare material of which the monument was stripped when the Assyrian monarchy began to decay. The illustrations on this relic, which are of bas-reliefs in repose work, are minute in detail and artistic in style. They represent the battle scenes, marching order and religious ceremonies of the Assyrians. Each plate is divided into two sections and surrounded by a large number of rosettes, which answered the purpose of ornamentation, and also encircled the top of the nails that fastened the metal to the wood.

An Assyrian Book.
(From the original in the British Museum).

(5) **Cylinder.** The second valuable discovery I made at Koyunjik was a perfect ten-sided terra-cotta cylinder, with 1,300 lines of fine inscriptions

detailing the conquests of Assur-bani-pal. It was by a mere chance that this unique historical record was discovered, because, generally speaking, Sir Henry Layard and I did not think it necessary to waste our time and money in digging thick, solid brick walls to no purpose. But I was asked by the overseer superintending the work in the palace of Assur-bani-pal if he should remove a small remnant of brick wall, which was left in digging out two chambers, or leave it to be covered with rubbish which came out of the excavations. On seeing that its removal would not entail much expense I ordered it to be pulled down, and I was glad to find that the little labor and expense had gained us that most valuable record of Assyrian history. It was found built inside the solid brick wall.

There were four sites of the royal residences discovered on the left side of the Tigris, in what was considered Assyria proper, and which were, I believe, in the time of the preaching of the Prophet Jonah within the metropolis of Nineveh. These are Koyunjik, Nebbi-younis, Nimroud and Khorsabad, as London takes in now the city, Westminster and Kensington. There are other ruins within what I consider to be the radius of that "great city," such as Yarimja, Balawat, Karamlais, Bahsheks and Shareef-Khan. Taking the oblong dimensions of these different ruins, together with Koyunjik and Nebbi-younis on the western limit, Nimroud on its southern border, and Khorsabad on its northern boundary, we find the size of the old city to be about sixty miles in circumference, or three days' journey, as it is mentioned in the book of Jonah, because twenty miles is reckoned in that country, according to pedestrian traveling, about a day's journey.

That part of Nineveh is called Nebbi-younis, where the Prophet Jonah is alleged to have been buried, and which is still called officially "Nineveh," or Nineveh. The remains of the palace of Esarhaddon was discovered by a native of the village while digging a foundation for a house in 1852.

(6) **Babylon and Birs Nimroud.** As I had a great desire to conduct archæological research in Babylonia, I went down to Bagdad in 1879 for that purpose, after leaving a competent agent to carry on the necessary work at Koyunjik in search of inscriptions. I commenced excavating at once in Babylon and Birs Nimroud, the ancient Borsippa and the supposed site of the tower of Babel, where the famous temple of Belus stood. In both ruins I found important Babylonian records, and in the latter spot I discovered the palace of Nebuchadnezzar, where Nabonadius took refuge after the defeat of his army by Cyrus.

I found it very difficult to explore systematically in Babylon proper, because from time immemorial the spade of the digger has been at work there either in search of bricks for building purposes, or for treasure. The area on which the palaces of the kings of Babylon were erected is now divided into four different quarters by the natives, namely, Jimjima, Quarich, Omran and Injailecha, in all of which I carried on extensive explorations, but I was only able to find a small remnant of the great palace in the limit of the latter site. In all the four localities my workmen found inscribed terra cotta and clay tablets, but the most valuable of these were discovered in Jimjima, amongst which we found the contract clay document with some silver ornaments.

The present visible ruins of Babylon consist of a mound called by the Arabs "Babel."

In the mound of "Babel" I followed the excavations of the Arabs, who were digging for bricks

and stone, and uncovered four carefully built wells of granite placed parallel and within a few feet of each other in the northern center of the mound. The stones of which they were built were scientifically joined together, and it is most vexing to think that the Arabs are allowed to demolish them for the purpose of burning lime. Each well was built of circular blocks of granite, which must have been brought thither from a great distance higher up the Euphrates, as there is no stone quarry to be seen in Babylonia. Each stone, which measured about three feet in depth, had been bored and made to fit the one below it so perfectly and without cement that the whole structure looked as if the well had been hewn in one solid rock. These wells were connected with

its greatness and magnificence by different Greek writers and others were not exaggerated, especially as regards the dimensions of its walls, which are said to have been sixty miles square. Herodotus mentions that the wall of the city was three hundred and fifty feet in height, eighty-seven in thickness, and six chariots could move abreast upon it. Not a trace can now be seen of it. The prophetic denunciation of Jeremiah has been wonderfully fulfilled, for he said that "the Babylon shall be utterly broken and her high gates shall be burned with fire."

(8) **Tower of Babel.** The ruins of the tower termed by historians and travelers Borsippa, temple of Belus, Birs Nimroud, and tower of Babel, stand, up to the present day, as a memorable

Ruins of the Tower of Babel.

an aqueduct supplied with water from the Euphrates, and when I had two of them cleared out in the year 1879 the water was seen to ooze out through the debris in the watercourse during the rising of the river.

(7) **Hanging Gardens.** These wells prove that "Babel" was the site of the famous hanging gardens of Babylon, mentioned by Diodorus Siculus, as the mound stands higher than any other site there. Unfortunately I could not find any of the terraces mentioned by historians, because the work of destruction has been going on for centuries in those parts, and the only reliable ancient remains that can be identified now are the existing wells, which must have been at least one hundred and forty feet deep.

The destruction of Babylon was so complete that one wonders whether the accounts given of

monument of past splendor. It towers high above any other existing Babylonian ruin. As the country around it is perfectly flat, the top of the remaining brick masonry can be seen far and wide for a distance of about twenty-five miles. I was very much struck with what seemed to me supernatural destruction from the masses of vitrified brick scattered around the tower. Different travelers attributed the cause of vitrification to either lightning or extreme power of artificial heat, but I found on examining the different blocks that neither the work of man nor the effect of lightning could have caused such vitrification. The huge boulders are not large lumps of vitrified bricks, like those found in brick-kilns, but actual masonry which had been torn down from the top to the bottom. I consulted two scientific gentlemen in England, who understand the effect of lightning

upon such massive structures, and I was told that electric fluid could not have caused such wholesale vitrification.

(9) **Palace of Nebuchadnezzar.** At Birs Nimroud I was fortunate enough to discover, after three days' trail, the palace of Nebuchadnezzar. It contained about eighty chambers and halls, but nothing was found in them excepting in four rooms, where there were some remains of Babylonian antiquities, which proved that Nebuchadnezzar was the builder. In the first hall discovered we found broken pillars, capitals and fragments of enameled bricks, with cedar beams which must have belonged to its embellishment. At the grand entrance of the palace we found a solid or brass object ornamented, and inscribed on the side of it, recording its dedication by Nebuchadnezzar to his god for his restoration to health. I found it at the threshold of the entrance to the temple of Belus. I was quite convinced from its position that it was not made originally for that purpose and it must have been brought there from its original position. The shape of it seemed to me to point to quite a different use, and that is, that it belonged to a "two-leaved gate," which is mentioned in the 45th chapter of Isaiah. Herodotus also mentions (book 1, chap. 181) that the gates of Babylon were made of solid brass.

(10) **Other Mounds.** About a quarter of a mile to the northeast of Birs Nimroud there is a much larger mound, called Ibraheem-al-Khaleel, *i. e.*, "Abraham the Friend" (of God), as the natives of the country believe in a tradition that Nimroud, "the mighty hunter," had tried there to throw Abraham into the fiery furnace.

I also explored another large mound, called Habl-Ibraheem, that is to say, "the rope of Abraham," from the shape of the great canal which runs to it from the Euphrates, a distance of about thirty-five miles. That ruin is supposed to be the site of ancient Cuthah.

The most important discovery I made during my explorations in Babylonia was at a mound called "Aboo-Habba" about sixty miles to the north of Babylon and fifteen to the southwest of Bagdad. From the records I found there it has been proved that the place was the site of the ancient Sippara, the Sepharvaim of the Bible.

During my first expedition to Babylonia I took a trip to Shat-al-Hai, the channel which runs from the Tigris, at Koot-al-Amara, to the Euphrates, as I had heard of a mound called Tel-loh, about one hundred and fifty miles to the southeast of Babylon, which was said to contain ancient statues. I found on arriving there that Tel-loh was not included in the terms of my firman. However, I was able to dig there three days, and discovered a ruined temple, from which I sent some inscriptions to the British Museum, which proves that the ruin dates as far back as 2,000 B. C.

There are still, I am sure, invaluable historical records buried in different parts of Assyria and Babylonia, which will be lost to the world forever if men in authority do not use their energy and influence in checking the wicked traffic in antiques and save what remains of buried treasures for the benefit of science and Biblical knowledge.

H. R.

ASSYRIAN AND BABYLONIAN LIBRARIES.

It is only the older ones among us who are able to realize the profound change which the Oriental discoveries of the last half century have effected in our conceptions of the past history of civilized man. It is not so very long ago since

culture in the modern sense of the word was regarded as taking its origin in the age which saw the rise of the literature of classical Greece.

The Oriental civilizations of an earlier date were hardly recognized as civilizations at all—they were rather incarnations of brute force which was concentrated in the hands of a few.

A knowledge of the art of writing was grudgingly granted to the Egyptian and the Assyrian, but the possession of a literature was denied them, and still more a literary culture of an extended character. The possession of a literature had indeed to be allowed to the Hebrews, but it was looked upon as a unique and extraordinary fact, which it was necessary to minimize as much as possible. Today all is changed, the East is yielding up its dead, and we are beginning to learn that the ancient Oriental world was, after all, not so very unlike our own.

We know now that Egypt and Babylonia and Assyria possessed a culture and civilization of a high order, before the first Greek writer committed his thoughts to papyrus or parchment, or even before any people in Europe had risen above the level of barbarism.

We can never return to the complacent belief that Europe was the cradle of civilization, and that culture is the monopoly of the nations of the West. Such a belief was the last echoes of those mediæval doctrines which placed the earth in the center of the universe, and made man the sole object for which it had been created.

Astronomy and geology have not been more fatal to these doctrines than Oriental archæology has been to the equally unfounded and equally vainglorious theory that culture and civilization have been confined to Greece and Rome, and above all to ourselves of the modern world.

(1) **The Art of Writing.** The art of writing is in the East immensely old, and it was an art which in Egypt and Babylonia was not restricted to a special class. On the contrary, a knowledge of reading and writing was widely spread, and when we bear in mind the complicated nature of the system of writing employed in Egypt and Babylonia, and the enormous number of separate characters used in them, it is evident that education was far advanced.

In Egypt the rocks are covered with scribbles by ordinary passengers up and down the Nile, by the captains and sailors of boats, by merchants and traders, and even by quarrymen and laborers.

The cuneiform tablets found at Tel-el-Amarna prove that in the century before the Exodus, not only was the Babylonian language, and the Babylonian script, studied and known throughout Western Asia, but that correspondence, sometimes upon the most trivial subjects, was constantly being carried on from one extremity of the civilized East to the other. The epoch of Moses was as much a literary age in Egypt and Western Asia as the epoch of the Renaissance was in Europe.

(2) **Libraries.** A literary age implies the existence of libraries, and libraries, indeed, there were. In Babylonia the institution of public libraries went back to a remote period, and we know of private libraries in Egypt at a period almost equally remote.

One of the most famous of the Babylonian libraries had been established by Sargon of Accad, the founder of the first Semitic empire, who flourished as early as 3800 B. C. (See SARGON.)

It was for the library of Sargon that the standard works on astronomy, astrology, and terrestrial omens had been compiled, which re-

mained a sort of text-book to the astrologers and diviners of Babylon and Assyria down to the very last.

The astronomical treatises show that the phenomena of the heavens had been long observed and noted; eclipses of the moon, and within certain limits of the sun also, could be calculated and foretold.

The annual path of the sun through the sky had been mapped out among twelve constellations—the twelve signs of the Zodiac which are still familiar to the almanac-makers.

The library of Sargon was but one out of many Babylonian public libraries, and a large part of the latest and largest of them—the library of Nineveh—is now in the British Museum.

Its last and most generous benefactor was Assur-bani-pal, the Sardanapalus of the Greeks,

predecessors, it became necessary to translate the literary products of the older Chaldea into Semitic Babylonian. For many centuries, Babylonia possessed a bilingual population and the educated classes were required to know, not only inflectional Semitic, but also agglutinative Sumerian.

(3) **Two Languages.** As late as the reign of Khammurabi, with whom the history of united Babylonia begins, in the twenty-fourth century B. C., the public inscriptions of the king were written in the two leading languages of the country, and there are numerous legal documents of the same age, the language of which is still Sumerian. The two languages necessarily borrowed words and idioms, one from the other, so that a knowledge of Sumerian was as important to the student of Semitic Babylonian as a knowl-

Fragment Now in the British Museum Showing Primitive Hieroglyphics and Cuneiform Characters Side by Side.

who seems to have had a passion for literature. The cities of Babylonia were ransacked for books which related to the favorite studies of the Assyrian king, and a considerable body of scribes was kept busily at work in copying and so re-editing the older literature of the country. Assur-bani-pal is never weary of telling us that the literary treasures which he collected were for the benefit of the people—that the ancient books of Babylonia had been collected and re-edited “for the inspection of the reader.” The contents of a Babylonian or Assyrian library were sufficiently varied. All the branches of the knowledge of the day were represented in it. History and chronology, grammar and lexicography, religion and the sciences, as they were then understood and pursued, all alike found a place there.

The earliest philologists, so far as we know, were the scribes of Chaldea and Nineveh. The original language of literary Babylonia had been agglutinative, and differed *in toto* from the Semitic language of the later rulers of the country, therefore, when the latter adopted the culture, the script, and the literary productions of their

edge of Latin is to a student of English. The cuneiform syllabary itself could not be properly learned without some knowledge of the ancient language of Chaldea.

It had been a Sumerian invention, but it was an invention which, like all others of the same kind, had been of slow growth; when the Semites became dominant in Babylonia, it was still growing, and it was finally completed under Semitic supervision. The interlacing of Sumerian and Semitic elements which was the consequence of this double growth has been the cause of hasty and unfounded theories in regard to the Sumerian language. But it had much to do with making the old Babylonians a nation of philologists, for as soon as they began to learn, as it were, their alphabet, they were brought face to face with two languages utterly unlike one another, and a study of the ancient literature of their country brought the fact still further before them; hence originated the grammar and vocabularies, the reading books, and interlinear or parallel translations which formed so large a portion of the contents of a Babylonian or Assyrian library. A considerable part of the sacred literature of Chaldea

was written in Sumerian—so also was a great deal of the legal literature, and in order to understand it, comparative grammars and lexicons were necessary. It is not astonishing that when once the fact of the diversity of languages had been impressed upon the mind of the cultivated Babylonian, a philological interest should have been awakened in him. Babylonia was surrounded by populations of diversified speech, and some of these populations established themselves in Babylonia itself. Not long after the line of Khammurabi, for instance, the country was conquered and governed for several centuries by Kassites from the mountains of Elam, who spoke an agglutinative language, and the name of Khammurabi himself shows that although his native language was Semitic, it was not Semitic Babylonian.

Explanatory lists of the words and names of these foreign populations were drawn up by the Babylonian scribes, and a table has been discovered which contains a list of common Kassite terms with their Babylonian equivalents.

(4) **Philology of the Babylonians.** The Babylonians were consequently as regards philology, and the recognition of the fact that other languages besides their own were worthy of study, *far in advance* of either Greeks or Romans; what would we not give, for example, for a list of Etruscan words with their Latin renderings, like the list of Kassite words of which I have just spoken? Doubtless the philology of the Babylonians was still immature, and their ideas of etymology exceedingly imperfect, but so also was the philology of the European scholars only a hundred years ago. We can easily match the shortcomings of the Babylonian lexicographers by the similar shortcomings of the English lexicographers of the last century. Sumerian words were confounded with antiquated Semitic Babylonian words, or words belonging to the languages by which Chaldea was surrounded, and Semitic words were provided with Sumerian etymologies, just as Anglo-Saxon words were provided with Greek or Latin etymologies by our dictionary makers. The Semitic *Sabbatu*, "a Sabbath," is a curious example of this. A Babylonian scribe derives it from the Sumerian *sa*, "heart," and *bat*, "to end," and accordingly explains it as "a day of rest for the heart." However, the perverseness of the derivation is not greater than that of some modern Assyriologists, who have traced Sumerian words to Semitic roots.

People do not begin to compile grammars and dictionaries, or to speculate on the origin of words, until books and libraries abound, and a literary education is widespread. The daily necessities of life may originate works on law or astronomy; the vanity of princes may lead to the compilation of annals, and the composition of history, while religious and poetical literature belong to the earliest days of national culture, but the philologist is a late product of civilization and bears incontrovertible evidence of a long and familiar acquaintance with the art of writing.

It is just this fact which makes the philological works of the Babylonian scribes of such especial value. A considerable amount of the criticism which has been passed upon the Old Testament records has been based on the assumption that the civilized nations of the ancient East were as illiterate as the nations of northern Europe during the middle ages. But the revelations which have been made to us by the buried libraries of Babylonia and Assyria, and the discovery of the

cuneiform tablets of Tel-el-Amarna—testifying as they do, to an active literary correspondence throughout western Asia, in the fifteenth century B. C.—have finally and decisively proved that such an assumption is false.

The art of writing was generally known and practiced in the ancient East, and the natives of western Asia and Egypt were quite as fond of indulging in it as we moderns are to-day. So far as literary facilities were concerned, there was no reason why the contemporaries of Abraham or Moses should not have recorded on clay and papyrus the events which were passing before them. If in future we are to question the historical accuracy of the narratives which have been handed down to us, it must be upon other grounds than a want of literary knowledge and skill.

(5) **The Historic Sense.** Of course it does not follow that because a people is literary and fond of reading and writing, it should therefore be possessed of what has been called a historical sense. The Egyptians, for instance, were singularly deficient in this respect; the inscriptions which cover the walls of their temples and tombs seldom record a single historical fact. We find interminable lists of bombastic titles, wearisome invocations to the gods, and long accounts of the piety of the king or the dead man, but we look almost in vain for references to historical events. Even the papyri of Egyptian history contain historical romances rather than history in the true sense of the word. The Babylonians again, though their contempt for history was not so marked as that of the Egyptians, preferred to cover their clay tablets with religious texts rather than with the annals of their country.

The inscriptions of their kings tell us of the building of temples, and of offerings made to the gods, but of very little more.

Their neglect of history was doubtless due in some measure to the fact that the Babylonian monarchy was a species of theocracy. The king was the high priest and vicegerent of Bel, the supreme deity of Babylon; he derived his power from the god, and it was only as the adopted son of Bel that he possessed a valid title to the throne. (See BABYLONIA AND ASSYRIA, RELIGION OF).

It was far otherwise in Assyria. There we find a people eminently practical and matter of fact, who valued history and historical accuracy. The great ruins which Assyria has bequeathed to us are those of palaces, and not of temples like those of Babylonia. And the walls of the palaces were adorned with accounts of the campaigns and victories of their royal builders. The dates which are attached to each portion of the record, and the care with which the names of petty princes and towns were written down, give us a high idea of the historical precision at which the Assyrians aimed. The Assyrian monuments are alone sufficient to show that the historical sense was not altogether unknown to the ancient peoples of the east, and when we remember how closely related the Assyrians were to the Hebrews in both race and language the fact becomes important to the Biblical student. But whatever may be the conclusions which we draw from the facts already acquired by archaeological science, we must not forget that these facts are but a tithe of those we may hereafter hope to obtain.

(6) **Future Discoveries.** We are still at the beginning of discoveries; those that have been already made are only an earnest of others that shall follow. No libraries, either of Babylonia

or of Assyria, have as yet been thoroughly explored—at most but two-thirds of the library of Nineveh has been brought to the British Museum, and the library of the ancient Babylonian city of Nipur, which American enterprise has brought to light, has not yet yielded up the whole of its treasures.

It will take time to examine, to edit, and translate all cuneiform literature which is at present in Europe and America. How much more time will be needed before the last of the old clay documents of Babylonia and Assyria has been rescued from the soil and we know exactly what has been saved for us out of the libraries of the past? A. H. S.

ASSYRIANS (as-sÿr'i-ans), (Heb. same as *ass-hur*), the inhabitants of Assyria. In Hebrew the name is the same as that of the country (Is. x:5, 24; xiv:25; xxxi:8; Lam. v:6; Ezek. xvi:28; Jud. xii:13).

ASTAROTH (äs'ta-röth), or **ASTORETH** or **ASTARTE** (Deut. i:4). See **ASHTAROTH**.

ASTATH (äs'täth), (Gr. Ἀστάθ, *as-tath'*), probably the Azgad of the true text (Ezra viii:12).

ASTRONOMY (as-trön'o-my), (Gr. ἀστρον, *astare'*, star, and νόμος, *nom'os*, law), that science which treats of the laws of the stars, or heavenly bodies, considered in reference to their magnitude, movements and respective influence one upon another.

Astronomy may be divided into empirical and scientific, the first being founded on the apparent phenomena and movements of the heavenly bodies, the second upon their real phenomena and movements. The knowledge of the ancients was limited to the first; or if they possessed any truths connected with the second they were nothing more than bold or fortunate guesses, which were not followed out to their legitimate consequences, nor formed into a systematic whole.

(1) **Cradle of Astronomy.** The cradle of astronomy is to be found in Asia. The few and imperfect notices which have come down to these times give a concurrent testimony in favor of this statement, and therewith agrees the fact that the climate, the mode of life and the occupations of the Oriental nations that were first civilized prompted them to watch and observe the starry heavens. The Chaldæans are accounted to have excelled in astronomical knowledge.

Pliny, in his celebrated enumeration (*Hist. Nat.* vii:57) of the inventors of the arts, sciences and conveniences of life, ascribes the discovery of astronomy to Phœnician mariners: 'Siderum observationem in navigando Phœnices,' and in the same chapter he speaks of astronomical observations found on burnt bricks (*coctilibus laterculis*) among the Babylonians, which ascend to above 2200 years B. C. Alexander sent to Aristotle from Babylon a series of astronomical observations, extending through 1900 years. The astronomical knowledge of the Chinese and Indians goes up to a still earlier period (Plin. *Hist. Nat.* vi:17-21). From the remote East astronomy traveled in a westerly direction. The Egyptians at a very early period had some acquaintance with it. To them is to be ascribed a pretty near determination of the length of the year, as consisting of 365 days 6 hours (Herodotus ii:4). The Egyptians were the teachers of the Greeks.

Some portion of the knowledge which prevailed on the subject would no doubt penetrate to and become the inheritance of the Hebrews, who do not, however, appear to have possessed any views of astronomy which raised their knowledge to the rank of a science, or made it approach to a

more correct theory of the mechanism of the heavens than that which was generally held. Nor, if the Bible is taken as the witness, do the ancient Israelites appear to have had extensive knowledge in the matter. They possessed such an acquaintance with it as tillers of the ground and herdsmen might be expected to form while pursuing their business, having, as was natural, their minds directed to those regions of the heavens which night after night brought before their eyes; accordingly, the peculiar Oriental names of the constellations are derived from circumstances connected with a nomadic people. A peculiarity of the greatest importance belongs to the knowledge which the Israelites display of the heavens, namely, that it is thoroughly imbued with a religious character, nor is it possible to find in any other writings, even at this day, so much pure and elevated piety, in connection with observations on the starry firmament, as may be gathered even in single books of the Bible (Amos v:8; Ps. xix).

(2) **Days of the Patriarchs.** As early as the day of the patriarchs the minds of pious men were attracted and enraptured by the splendor of the skies (Gen. xxxvii:9); and imagery borrowed from the starry world soon fixed itself firmly in human speech. The sun and moon were distinguished from other heavenly bodies, in consequence of their magnitude and their brilliancy, as being the lights of heaven and earth (Gen. i:16); and from the course of the moon time was divided into parts, or months, of which the oldest form of the year, the lunar, was made up. Every new moon was greeted with religious festivities. While, however, the sun in his power, the moon walking in brightness, and all the stars of light conspired to excite devotion, their influence on the hearts of the ancient Israelites, who were happily instructed in a knowledge of the true God, the one Jehovah, the sole Creator of the world, stopped short of that idolatrous feeling, and was free from those idolatrous practices to which, among nations of less religious knowledge—and especially among their own neighbors, the Babylonians, for instance—it is unhappily known to have led.

As early as the time of the composition of perhaps the oldest book in the Bible, namely, that of Job, the constellations were distinguished one from another, and designated by peculiar and appropriate names (Job ix:9; xxxviii:31). In the Bible are found, (1) *Heyel'*, the morning star, the planet Venus (Is. xiv:12; Rev. ii:28). (2) *Kimah'* (Job ix:9; xxxviii:35; Amos v:8), the Pleiades. (3) *Kesil'*, Orion, a large and brilliant constellation, which stands in a line with the Pleiades. The Orientals seem to have conceived of Orion as a huge giant who had warred against God, and as bound in chains to the firmament of heaven (Job xxxviii:31), and it has been conjectured that this notion is the foundation of the history of Nimrod (*Gesen. Comment, zu Isaiah*, i:457). (4) *Ash* (Job ix:9), the Great Bear, which has still the same name among the Arabians (Niebuhr, b. 113). In the common version No. 4 is rendered 'Arcturus,' No. 3 'Orion,' and No. 2 'Pleiades.' See Job xxxviii:32, where the sons of Arcturus are the three stars in the tail of the Bear, which stand in a curved line to the left. (5) *Nachash'* (Job xxvi:13, 'the crooked serpent'), Draco, between the Great and the Little Bear: a constellation which spreads itself in windings across the heavens. (6) *Διδσκούροι*, *di-os'koo-roi*, the sons of Zeus, that is, the twins of Leda (Acts xxviii:11), Gemini, or the Twins, on the belt of the Zodiac, which is mentioned in 2 Kings xxiii:5, under the general name of

'the planets,' *Mazzaloth*, a word which signifies dwellings, stations in which the sun carries in his apparent course through the heavens (Comp. Gen. xxxvii:9). The entire body of the stars was called 'the host of heaven,' *tsaba hashamayem* (Is. xl:26; Jer. xxxiii:22).

No trace is found in the Old Testament of a division of the heavenly bodies into planets, fixed stars and comets; but in Jude 13, the phrase *wandering stars* is employed figuratively.

(3) **After the Exile.** After the Babylonish exile the Jews were compelled, even for the sake of their calendar, to attend at least to the course of the moon, which became an object of study, and delineations were made of the shapes that she assumes (*Mischna rosch hashsh.* ii:8.)

We find among the Babylonians Jupiter (Belus, Heb. *Gad*, Is. lxxv:11), Venus (Heb. *Meni*, Is. lxxv:11, where the first is rendered in the common version 'that troop,' the second 'that number'). Both these were considered good principles. Mercury, honored as the secretary of heaven, is also found in Is. xlvi:1, 'Nebo stoopeth;' Saturn, (Heb. *Kizun*, Amos v:26); Mars, (*Nergal*, 2 Kings xviii:30). The last two were worshiped as principles of evil. Astrology concerned itself also with the determination of lucky and unlucky days; so in Job iii:3, 'Let the day perish wherein I was born;' and Gal. iv:10, 'Ye observe days, and months, and times, and years.' The Chaldeans, who studied the stars at a very early period, were much given to astrology, and were celebrated for their skill in that pretended science (Is. xlvii:13). In Daniel ii:27; v:11, *astrologers*, *calculators of nativities*, are named.

ASUPPIM, HOUSE OF (a-süp'pim), (Heb. אֲשׁוּפִים, *haw-as-up'peem*, gatherings).

This word occurs in 1 Chron. xxvi:15, but considerable diversity of opinion exists as to its import. Dr. Geddes renders it, "the store-rooms," and understands it of the upper galleries of the temple, where the stores were probably kept. Others understand by it the treasury of the temple. The meaning of the word is *collections*, i. e. stores; and house of *Asuppim* is, therefore, a *storehouse* connected with the temple, probably on the southern part (1 Chron. xxvi:15, 17). In Neh. xii:25 the word is incorrectly rendered "thresholds."

ASYLUM (ä-si'lüm), (Heb. מִקְלָוֹת, *mik-lawt'*), a place of safety, where even a criminal might be free from violence from the avenger at least for a time.

(1) **Mosaic.** The altar of burnt sacrifices, and the temple at Jerusalem, were sanctuaries. Hither Joab retired (1 Kings ii:28, 29, 31), but Solomon, observing that he would not quit the altar, ordered him to be killed there. Moses commands (Exod. xxi:14) that any who had committed murder and fled for protection to the altar should be dragged from thence. Sanctuaries were not for the advantage of wicked men, but in favor of the innocent, when attacked unjustly. When criminals retired to the sanctuary of a temple they were either starved or forced thence by fires kindled around them.—*Galmet*. (See CITIES OF REFUGE.)

(2) **Pagan.** It has been supposed that Hercules' grandsons were the institutors of these places of refuge, in Greece, if not in Europe; for, apprehending the resentment of those whom Hercules had ill-treated, they appointed an asylum or temple of mercy at Athens. Cadmus erected another at Thebes, and Romulus another at Rome, on Mount Palatine. That of Daphne, near An-

tioc, was very famous (2 Macc. iv:34). Theseus built an asylum at Athens in favor of slaves, and of the poor who should fly thither from the oppression of the rich. There was one in the isle of Calauria. The temples of Apollo at Delphi, of Juno at Samos, of Esculapius at Delos, of Bacchus at Ephesus, and many others in Greece, had the privileges of being *asyla*. Romulus gave this right to a wood adjoining the temple of Vejovis (Virgil, *Æneid*, viii:342). Ovid speaks of a wood near Ostium that enjoyed the same privilege (Fast. i:1). Austin observes (de Civit. lib. i, cap. 34) that the whole city of Rome was an asylum to all strangers. The number of these privileged places was so much increased in Greece under the emperor Tiberius that he was obliged to recall their licenses and to suppress them. (Sueton, in *Tiberio. Tacit. Annal.* lib. iii, cap. 6). But his decree was little observed after his death.

(3) **Christian.** In the Christian Church the right of asylum was retained, and extended from the altar to all ecclesiastical buildings. By act of Theodosius II (A. D. 431), not only the church was to be considered sacred, but also the *atrium*, the garden, bath and cells. Many abuses crept in, until the custom has become practically extinct.

ASYNCRITUS (a-sŷn'kri-tŷs), (Gr. Ἀσύγκριτος, *as-oong'kree-tos*, incomparable), the name of a Christian at Rome to whom St. Paul sent a brotherly salutation (Rom. xvi:14), A. D. 55.

ATAD (ä'täd), (Heb. אֲתָד, *aw-tawd'*, a thorn).

1. The person on whose thrashing-floor the sons of Jacob and the Egyptians who accompanied them performed their final act of solemn mourning for Jacob (Gen. l:11), on which account the place was afterwards called Abel-Mizraim, 'the mourning of the Egyptians' (B. C. 1689).

2. See THORN.

ATARAH (ät'a-rah), (Heb. אֲתָרָה, *at-aw-raw'*, crown, ornament), a wife of Jerahmeel, and mother of Onam (1 Chron. ii:26), B. C. before 1658.

ATARGATIS (a-tär'ga-tis), (Gr. Ἀτεργάτης, *at-er-gat'ace*, or Ἀταργάτις, *at-ar-gat'is*), is the name of a Syrian goddess, whose temple (Ἀτεργατεῖον) is mentioned in 2 Macc. xii:26.

That temple appears, by comparing 1 Macc. v:43, to have been situated at Ashtaroth-Karnaim. Her worship also flourished at Mabûg (i. e., Bamyce or Hierapolis, which was, according to Rawlinson, the Carchemish of the Hittites. It is now Jerablus. The recent discoveries in the history of the Hittites seem to show that the sacred martial dances of the priestesses of Atargatis, clad in armor, gave rise to the Greek legend of the Amazons.

There is little doubt that Atargatis, or Atergatis, is the same divinity as Derketo. Besides internal evidences of identity, Strabo incidentally cites Ctesias to that effect (xvi, p. 1132), and Pliny uses the terms '*Prodigiosa, Atergatis, Græcis autem Derketo dicta*.' We read that Derketo was worshiped in Phœnicia and at Ascalon under the form of a woman with a fish's tail, or with a woman's face only and the entire body of a fish; that fishes were sacred to her, and that the inhabitants abstained from eating them in honor of her. These facts are found in Lucian (*De Dea Syria*, xiv), and, together with a mythological account of their origin, in Diodorus (ii:4). Further, by combining the passage in Diodorus with Herodotus (i:105), we may legitimately conclude that the Derketo of the former is the Venus Urania

of the latter. Atergatis is thus a name under which they worshiped some modification of the same power which was adored under that of Ash-toreth. That the *Ἀτεργατεῖον* of 2 Macc. xii:26 was at Ashtaroth-Karnaïm shows also an immediate connection with Ash-toreth. Whether, like the latter, she bore any particular relation to the moon, or to the planet Venus, is not evident. Macrobius makes Adargatis to be the *earth* (which as a symbol is analogous to the *moon*), and says that her image was distinguished from that of the sun by rays *'sursum versus inclinatis, monstrando radiorum vi superne missorum enasci quæcunque terra progenerat'* (*Saturnal.* i:23). Creuzer maintains that those representations of this goddess which contain parts of a fish are the most ancient; and endeavors to reconcile Strabo's statement that the Syrian goddess of Hierapolis was Atargatis with Lucian's express notice that the former was represented under the form of an entire woman, by distinguishing between the forms of different periods (*Symbolik*, ii:68). This fish-form shows that Atargatis bears some relation, perhaps that of a female counterpart, to DAGON (which see).

ATAROTH (ät'a-röth), (Heb. אַתְרוֹת, *at-aw-röth'*, crowns). Several places of this name occur in the Scriptures. 1. *Ataroth-beth-Joab*, in the tribe of Judah (1 Chron. ii:54). 2. *Ataroth*, on the borders of Ephraim (Josh. xvi:2, 7), which some identify with and others distinguish from, the *Ataroth-Addar* of the same tribe mentioned in Josh. xvi:5 xviii:13. 3. *Ataroth*, in the tribe of Gad, beyond the Jordan (Num. xxxii:3, 34). 4. *Ataroth-Shophan* in the same tribe (Num. xxxii:35), which some identify with the preceding; but it appears more likely that the addition was used to distinguish the one from the other. Eusebius and Jerome (*Onomasticon*, s. v. *Ataroth*, Ἀταρώθ) mention two places in the tribe of Benjamin called Ataroth, but they do not occur in Scripture. The site of one of these appears to have been discovered by Professor Robinson (*Bib. Researches*, ii:314) under the name of *Atara*. Another place of the same name (Atara) he found about six miles N. by W. of Bethel, which appears to represent the Ataroth of Ephraim (Josh. xvi:2, 7). It is now a large village on the summit of a high hill (Robinson iii:8).

ATBACH (ät'back), (Heb. אַתְבַּח, *awt'back*), or the similar word, **ATHBASH** (Heb. אַתְבַּשׁ, *awth-bash'*).

This is not a real word, but a fictitious cabalistic term, denoting by its very letters the mode of changing one word into another by a peculiar commutation of letters. Thus, as the technical term Athbash shows, א and ת, and כ and פ, are interchangeable, and so on throughout the whole series. By writing the Hebrew alphabet twice in two parallel lines, but the second time in an inverse order, the two letters which form every pair will come to stand in a perpendicular line.

ATER (ä'ter), (Heb. אַתֵּר, *aw-tare'*, shut up or dumb).

1. The children of Ater were among the gatekeepers of the temple who returned with Zerubbabel (Ezra ii:42; Neh. vii:45), B. C. 536.

2. The children of Ater of Hezekiah who returned from Babylon with Zerubbabel (Ezra ii:16; Neh. vii:21).

3. One among the heads of the people who signed the covenant with Nehemiah (Neh. x:17), B. C. 445.

ATHACH (a'thäk), (Heb. אַתַּח, *ath-awk'*, lodging, inn). One of the places in the tribe of Judah frequented by David and his men at the time he dwelt at Ziklag (1 Sam. xxx:30). As the word does not occur elsewhere it may be a corruption for Ether, in the low country of Judah.

ATHAIAH (a-thä'yä or äth'a-i'ah), (Heb. אַתַּיָּה, *ath-aw-yaw'*, Jah is helper), a descendant of Pharez, son of Judah. After the return from Babylon he dwelt at Jerusalem (Neh. xi:4, B. C. 536); called Uthai in 1 Chron ix:4.

ATHALIAH (äth'a-lí'ah), (Heb. אַתְלִיָּה, *ath-al-yaw'*, afflicted by Jehovah, or Jah is strong).

1. A daughter of Ahab, king of Israel, doubtless by his idolatrous wife Jezebel. She is also called the daughter of Omri (2 Chron. xxii:2), who was the father of Ahab; but by a comparison of texts it would appear that she is so called only as being his granddaughter.

(1) **Marriage.** Athaliah became the wife of Jehoram, the son of Jehoshaphat, king of Judah. This marriage may fairly be considered the act of the parents, and it is one of the few stains upon the character of the good Jehoshaphat that he was so ready, if not anxious, to connect himself with the idolatrous house of Ahab. Had he not married the heir of his crown to Athaliah, many evils and much bloodshed might have been spared to the royal family and to the kingdom.

When Jehoram came to the crown he, as might be expected, 'walked in the ways of the house of Ahab,' which the sacred writer obviously attributes to this marriage, by adding, 'for he had the daughter of Ahab to wife' (2 Chron. xxi:6).

This king died B. C. 885, and was succeeded by his youngest son, Ahaziah, who reigned but one year, and whose death arose from his being, by blood and by circumstances, involved in the doom of Ahab's house. (See AHAZIAH.) Before this Athaliah had acquired much influence in public affairs, and had used that influence for evil, and when the tidings of her son's untimely death reached Jerusalem, she resolved to seat herself upon the throne of David, at whatever cost.

(2) **Causes Murder.** To this end she caused all the male branches of the royal family to be massacred (2 Kings xi:1), and by thus shedding the blood of her own grandchildren, she undesignedly became the instrument of giving completion to the doom on her father's house, which Jehu had partially accomplished (B. C. 884). One infant son of Ahaziah, however, was saved by his aunt Jehosheba, wife of the high-priest Jehoiada, and was concealed within the walls of the temple, and there brought up so secretly that his existence was unsuspected by Athaliah.

(3) **Death.** But in the seventh year (B. C. 878) of her bloodstained and evil reign the sounds of unwonted commotion and exulting shouts within the temple courts drew her thither, where she beheld the young Joash standing as a crowned king by the pillar of inauguration, and acknowledged as sovereign by the acclamations of the assembled multitude. Her cries of 'Treason!' failed to excite any movement in her favor, and Jehoiada, the high-priest, who had organized this bold and successful attempt, without allowing time for pause, ordered the Levitical guards to remove her from the sacred precincts to instant death (2 Kings xi; 2 Chron. xxi:6; xxii:10-12; xxiii).

2. A Benjamite, son of Jeroham, who dwelt at Jerusalem (1 Chron. viii:26), B. C. about 536.

3. One of the Bene-Elam, whose son Jeshaiiah returned with Ezra in the second caravan from Babylon (Ezra viii:7), B. C. before 459.

ATHANASIAN CREED (ăth'ă-nă'zhan krēd).

(1) **Author of the Creed.** The orthodox followers of St. Athanasius, the great and able antagonist of Arius, were termed Athanasians. The Athanasian creed, though generally admitted not to be drawn up by this father (but probably, as Dr. Waterland says, by Hilary, bishop of Arles, in the fifth century), is universally allowed to contain a fair expression of his sentiments. This creed says: "The catholic faith is this: that we worship one god in trinity, and trinity in unity: neither confounding the persons, nor dividing the substance. For there is one person of the Father, another of the Son, and another of the Holy Ghost. But the Godhead of the Father, of the Son, and of the Holy Ghost, is all one; the glory equal, the majesty co-eternal. Such as the Father is, such is the Son, and such is the Holy Ghost;" namely, "uncreate, incomprehensible, eternal," etc. "The Father is made of none, neither created nor begotten. The Son is of the Father alone; neither made nor created, *but begotten*. The Holy Ghost is of the Father and the Son; neither made, nor created, nor begotten, *but proceeding*."

(2) **Key.** The true key to the Athanasian creed lies in the knowledge of the errors to which it was opposed. The Sabellians considered the Father, Son, and Holy Spirit as one in person;—this was "confounding the persons:" the Arians considered them as differing in essence—three beings;—this was "dividing the substance:" and against these two hypotheses was the creed originally framed. And since every sect was willing to adopt the language of Scripture, it was thought necessary to adopt scholastic terms, in order to fix the sense of Scripture language.

(3) **Essential Features.** The *eternal* generation of the Son of God forms an essential part of this creed, as well as of the Nicene: it is on this principle that the Son is called "God of God, Light of Light, very God of very God; begotten, not made;"—which certainly does not apply to the human nature of Christ, which was "made of a woman—made under the law." Most certain it is that many of the Christian fathers maintain this mysterious doctrine of eternal generation; and it has had able defenders, down to Dr. J. Owen, Dr. Waterland, Dr. Edward Williams, and Andrew Fuller. On the other hand, Trinitarians equally zealous have considered the opinion as both inconsistent in itself, and derogatory to the Son of God—"as implying derivation and inferiority"—though certainly not so intended by the Athanasians. Dr. Watts, and other advocates for the pre-existence of Christ's *human soul*, have considered the production of this first of creatures as the highest sense in which our Saviour is in Scripture called "the Son of God."—*Doddridge's Works (Parsons' edit.)* vol. v, p. 182.

(4) **Faults.** The chief fault in the creed itself is its overstepping the modesty of Scripture, and attempting to define, with accuracy, where the sacred writers seem designedly to have left the subject under the veil of mystery. The Supreme Being is, in all respects, so infinitely above the conception of men, and perhaps of angels, that it becomes us to conduct all speculations relative to the Deity with reverence, and even awe; to veil our faith under the wings of devo-

tion, as the seraphim cover their faces while they worship.

But the most exceptional part of this creed lies in what are commonly called "the damnatory clauses"—"Whosoever will be saved, before all things it is necessary that he hold the catholic faith; which faith, except everyone do keep whole and undefiled, without doubt he shall *perish everlastingly*. And the catholic faith is this"—proceeding to the statements of the doctrine of the trinity above given. Now, it is most certain that we cannot use too much caution on this subject. The Scripture indeed speaks of faith in Christ as necessary to salvation, but refers rather, perhaps, to the vital principle itself, than to any form of confession; and it seems above all things improper to mingle anathemas with our devotions. This has led many of the English clergy and bishops to wish they were "well rid" of this creed altogether, which is certainly a prevailing sentiment; and were the question now put, on admitting this formulary into the church service, there are perhaps but few comparatively that would vote for it. However orthodox it may be, it does not appear to be written in a Christian spirit.

ATHARIM (ăth'a-rĭm), (Heb. אֶתְרִים, *ath-aw-reem'*, regions), a place in southern Palestine, near which the Israelites passed on their way thither (Num. xxi:1), the Hebrew of which is incorrectly rendered in the English version "*the way of the spies*." Properly, by the way of Atharim.

ATHEISM (ă'thē-iz'm), (Gr. ἀθεος, *ath'eh-os*, without God), the denial of the existence of God.

(1) **General Use of the Term.** The Greeks termed a man ἀθεος, *atheist*, when he denied the existence of the gods recognized by the state. The Pagans called Christians *atheists* because they would not acknowledge the heathen gods and worship them. In the theological controversies of the early Church the opposite parties quite frequently called each other *atheists*.

Atheists have been also known by the name *infidels*; but the word *infidel* is now commonly used to distinguish a more numerous party, and is become almost synonymous with *deist*. He who disbelieves the existence of a God, as an infinite, intelligent, and a moral agent, is a direct or speculative *atheist*; he who confesses a Deity and providence in words, but denies them in his life and actions, is a practical *atheist*. That *atheism* existed in some sense before the flood, may be suspected from what we read in Scripture, as well as from heathen tradition; and it is not very unreasonable to suppose that the deluge was partly intended to evince to the world a heavenly power, as Lord of the universe, and superior to the visible system of nature. This was at least a happy consequence of that fatal catastrophe; for, as is observed by Dean Sherlock, "The universal deluge, and the confusion of languages, had so abundantly convinced mankind of a divine power and providence, that there was no such creature as an *atheist*, till their idolatries had tempted men rather to own no God than such as the heathens worshiped."

(2) **Atheism in Greece.** Atheistical principles were long nourished and cherished in Greece, and especially among the atomical, peripatetic, and sceptical philosophers; and hence some have ascribed the origin of *atheism* to the philosophy of Greece. This is true, if they mean that species of refined *atheism* which contrives any impious scheme of principles to account for the origin of the world, without a Divine Being.

(3) **Martyrs. and Professors.** Absurd and irrational as atheism is, it has had its votaries and martyrs. In the seventeenth century, Spinoza, a pantheist, was its noted defender. Lucilio Vanini, a native of Naples, also publicly taught atheism in France; and, being convicted of it at Toulouse, was condemned and executed in 1619. It has been questioned however, whether any man ever seriously adopted such a principle. The pretensions to it have been generally founded on pride or affectation. The open avowal of atheism by several of the leading members of the French convention seems to have been an extraordinary moral phenomenon. This, however, as we have seen, was too vague and uncomfortable a principle to last long.

(4) **Speculative Atheism.** Archbishop Tilotson justly observes that speculative atheism is unreasonable upon five accounts: 1. Because it gives no tolerable account of the existence of the world. 2. It does not give any reasonable account of the universal consent of mankind in this apprehension that there is a God. 3. It requires more evidence for things than they are capable of giving. 4. The atheist pretends to know that which no man can know. 5. Atheism contradicts itself.

Under the first of these he thus argues: "I appeal to any man of reason whether anything can be more unreasonable than obstinately to impute an effect to chance, which carries in the very face of it all the arguments and characters of a wise design and contrivance. Was ever any considerable work, in which there was required a great variety of parts, and a regular and orderly disposition of those parts, done by chance? Will chance fit means to ends, and that in ten thousand instances, and not fail in any one? How often might a man, after he had jumbled a set of letters in a bag, fling them out upon the ground, before they would fall into an exact poem; yea, or so much as to make a good discourse in prose? And may not a little book be as easily made by chance as the great volume of the world? How long might a man be in sprinkling colors upon canvas with a careless hand before they would happen to make the exact picture of a man? And is a man easier made by chance than his picture? How long might twenty thousand blind men, who should be sent out from several remote parts of England, wander up and down before they would all meet upon Salisbury plain, and fall into rank and file in the exact order of an army? And yet, this is much more easy to be imagined than how the innumerable blind parts of matter should rendezvous themselves into a world."

ATHENIANS (a-thē'ni-anz), (Gr. Ἀθηναῖος, *athay-nai'os*, belonging to Athens), natives of Athens (Acts xvii:21, 22). (See ATHENS.)

ATHENS (ăth'enz), (Gr. Ἀθῆναι, *ath-ay'nahee*). This celebrated city, as the birthplace of Plato, and through him so widely influential on Judaism and Christianity, deserves something else than a geographical notice here. We shall briefly allude to the stages of her history and remark on some of the causes of her pre-eminent greatness in arms, arts and intellectual subtlety.

(1) **Early History.** The earlier and more obscure period of the Grecian province named Attica reaches down nearly to the final establishment of democracy in it. Yet we know enough to see that the foundations of her greatness were then already laid. Even the unfertile soil and dry atmosphere of Attica, in connection with the slender appetite of the people, have been thought as favorable to their mental development as the

fertility of the neighboring Bœotia was injurious to its voracious inhabitants. The barrenness of the soil, moreover, prevented invaders from coveting it, so that through a course of ages the population remained unchanged, and a moral union grew up between the several districts. To a king named Theseus is ascribed the credit of uniting all the country towns of Attica into a single state, the capital of which was Athens. This is the first political event that we can trust as historical, although its date and circumstances are by no means free from obscurity.

(2) **Population.** The population of this province was variously called Pclasgian, Achaian and Ionian, and probably corresponds most nearly to what was afterwards called Æolian (Prichard, *Phys. Hist. of Man*, iii:494). The first name carries the mind back to an extremely primitive period. When the Dorians, another tribe of Greeks of very different temperament, invaded and occupied the southern peninsula, great numbers of its Achaian inhabitants took refuge in Attica. Shortly after, the Dorians were repulsed in an inroad against Athens, an event which has transmitted to legendary renown the name of King Codrus; and thenceforward Athens was looked upon as the bulwark of the Ionian tribes against the barbarous Dorians.

Overloaded with population, Attica now poured forth colonies into Asia; some of which, as Miletus, soon rose to great eminence, and sent out numerous colonies themselves; so that Athens was revered as a mother of nations, by powerful children scattered along the western and northern coasts of Anatolia.

(3) **Tradition.** Dim tradition shows us isolated priesthoods and elective kings in the earliest times of Attica; these however gradually gave way to an aristocracy, which in a series of years established themselves as a hereditary ruling caste. But a country 'ever unravaged' (and such was their boast) could not fail to increase in wealth and numbers; and after two or three centuries, while the highest commoners pressed on the nobles, the lowest became overwhelmed with debt.

(4) **Laws of Solon.** The disorders caused by the strife of the former were vainly sought to be stayed by the institutions of Draco; the sufferings of the latter were ended, and the sources of violence dried up, by the enactments of Solon. Henceforth the Athenians revered the laws of Solon (*Nomoi*) as the groundwork of their whole civil polity, yet they retained by the side of them the ordinances of Draco (*θεσμοί*) in many matters pertaining to religion. The date of Solon's reforms was probably B. C. 594.

The usurpation of Pisistratus and his sons made a partial breach in the constitution; but upon their expulsion a more serious change was effected by Cleisthenes, head of the noble house of the Alcmaeonidæ (B. C. 508), almost in the same year in which Tarquin was expelled from Rome. An entirely new organization of the Attic tribes was framed, which destroyed whatever remained of the power of the nobles as an order, and established among the freemen a democracy in fact, as well as in form. Out of this proceeded all the good and all the evil with which the name of Athens is associated, and though greatness which shot up so suddenly could not be permanent, there can be no difficulty in deciding that the good greatly preponderated.

(5) **Hostilities with Persia.** Very soon after this commenced hostilities with Persia, and the self-denying, romantic, successful bravery of Athens, with the generous affability and great talents of her statesmen, soon raised her to the

head of the whole Ionian confederacy. As long as Persia was to be feared, Athens was loved; but after tasting the sweets of power her sway degenerated into a despotism, and created at length, in the war called the Peloponnesian, a coalition of all Dorian and Æolian Greece against her (B. C. 431). In spite of a fatal pestilence and the revolt of her Ionian subjects, the naval skill of Athenian seamen and the enterprise of Athenian commanders proved more than a match for the hostile confederacy, and when Athens at last fell (B. C. 404), she fell by the effects of internal sedition more truly than by Spartan lances or Persian gold, or even by her own rash and overgrasping ambition. The demoralizing effects of this war on all Greece were infinitely the worst result of it, and they were transmitted to succeeding generations. It was substantially a *civil* war in every province, and, as all the inhabitants of Attica were every summer forced to take

of Alexandria. Its great effort was to unite the contemplative mysticism of Eastern sages with the accurate science of Greece; to combine, in short, the two qualities—intellectual and moral, argumentative and spiritual—into a single harmonious whole; and whatever opinion may be formed of the success which attended the experiment, it is not wonderful that so magnificent an aim attracted the desires and riveted the attention of thoughtful and contemplative minds for ages afterwards.

(7) **Sculpture and Painting.** In the imitative arts of sculpture and painting, as well as in architecture, it need hardly be said that Athens carried off the palm in Greece; yet, in all these, the Asiatic colonies vied with her. Miletus took the start of her in literary composition, and, under slight conceivable changes, might have become the Athens of the world. But all details on these subjects would be here out of place.

Mars Hill.

refuge in the few fortresses they possessed, or in Athens itself, the simple countrymen became transformed into a hungry and profligate town rabble.

(6) **Intellectual Culture.** From the earliest times the Ionians loved the lyre and the song, and the hymns of poets formed the staple of Athenian education. The constitution of Solon admitted and demanded in the people a great knowledge of law, with a large share in its daily administration. Thus the acuteness of the lawyer was grafted on the imagination of the poet. These are the two intellectual elements out of which Athenian wisdom was developed, but it was stimulated and enriched by extended political action and political experience. History and philosophy, as the words are understood in modern Europe, had their birth in Athens about the time of the Peloponnesian war. Then first, also, the oratory of the bar and of the popular assembly was systematically cultivated, and the elements of mathematical science were admitted into the education of an accomplished man.

This was the period of the youth of Plato, whose philosophy was destined to leave so deep an impress on the Jewish and Christian schools

(8) **Loss of Civil Liberty.** That Athens, after the Peloponnesian war, never recovered the political place which she previously held, can excite no surprise—that she rose so high towards it was truly wonderful. Sparta and Thebes, which successively aspired to the 'leadership' of Greece, abused their power as flagrantly as Athens had done, and, at the same time, more coarsely. The never-ending cabals, the treaties made and violated, the coalitions and breaches, the alliances and wars, recurring every few years, destroyed all mutual confidence and all possibility of again uniting Greece in any permanent form of independence, and, in consequence, the whole country was soon swallowed up in the kingdom of Macedonia. With the loss of civil liberty, Athens lost her genius, her manly mind, and whatever remained of her virtue; she long continued to produce talents, which were too often made tools of iniquity, panders to power, and petty artificers of false philosophy.

(9) **Christianity.** A Christian church existed in Athens soon after the apostolic times, but as the city had no political importance the church never assumed any eminent position.

St. Paul visited the city on his journey from

Macedonia, and remained there for some time (Acts xvii:14-34; 1 Thess. iii:1). During his stay he delivered his great address before the Areopagus (Acts xvii:22-31). (See AREOPAGUS.)

ATHLAI (ăth'lāi), (Heb. אֲתָלַי, *ath-lah'ee*), one of the sons of Bebai, who, at Ezra's wish, put away his foreign wife (Ezra x:28), B. C. 459.

ATONEMENT (ă-tōn'ment), (Heb. כַּוַּפָּר, *kaufar'*, to cover, cancel; Gr. καταλλαγή, *kat-al-lag-ay'*, exchange, reconciliation).

As a verb, the Hebrew literally signifies to cover; and, as a noun, a covering. Generally, wherever the word occurs, something that has given serious offense, and produced a permanent state of variance between the parties, is supposed, and then, in relation to the party offended, it signifies to pacify, to appease, or to render him propitious, as Gen. xxxii:20; Ezek. xvi:63. When applied to sin, it signifies to cover, or to expiate it; to atone, or make satisfaction for it (Ps. xxxii:1; Lev. xvi:30). When the term respects the sinner himself, it implies his being covered or protected from punishment, and is rendered a ransom or atonement for him (Exod. xxi:30; 2 Chron. xxx:12, 15). This seems to be the plain, unforced meaning of the Hebrew word *kaufar*. Other words convey the same truth. (a) *ilaskomai*, *hilaskomai*, translated (Heb. ii:17) "to make reconciliation." Also Rom. iii:25; 1 John ii:2; iv:10, where the kindred noun is rendered "propitiation." (b) *lutron*, translated "ransom," "redemption" (Matt. xx:23; Mark x:30; Luke ii:38; Heb. ix:12).

Three prominent views have been entertained of the atonement.

(1) **View of Anselm.** This is connected with the above view of the idea of the atonement as a satisfaction to Divine justice. His name is pre-eminently identified with it (A. D. 1100).

(2) **View of Abelard.** Foremost among his opponents of Anselm was Abelard (A. D. 1141). He declared the atonement to be due wholly to the love of God, and taught that there could be nothing in the Divine essence that required satisfaction for sin. The death of Christ upon the cross was solely an exhibition of Divine love. Men were to be won to Christ by this supreme act of voluntary self-sacrifice for the welfare of men. Thus Abelard stands as the father of what is known as the *moral influence* theory.

In cases where the party offending is unable to render adequate atonement in his own person, and where the punishment could not be endured by him without ruining him—as is the case in all capital offenses—if the suffering of another be accepted in his stead, the atonement thus made by a substitute is technically termed a *vicarious atonement*. This is a case that rarely happens in human governments. Yet this is the case in relation to the atonement made by Christ. "He was wounded for our transgressions; he was bruised for our iniquities; the chastisement of our peace was upon him, and by his stripes we are healed" (Is. lviii:5).

In the New Testament there are also forms of expression in which the idea of substitution, or that Christ stands as our substitute in the economy of Divine grace, appear with marked emphasis (Rom. v:6-8; 1 Cor. xv:3; 2 Cor. v:21; Gal. iii:13; Tit. ii:14; 1 Pet. ii:24; iii:18).

(3) **View of Grotius.** This celebrated author wrote in defense of the vicarious sufferings of Christ against Socinus (A. D. 1617). He maintained that the atonement was grounded not in the nature of God but in the nature of the Divine

government. In his view it was a *satisfaction* to the demands of moral government and not to Divine justice. His view is known as the *rectoral* or *governmental* theory.

(4) **Modern Views.** Between these three views the church of to-day is divided. But to the great truth that a real propitiation has been made by the Lord Jesus Christ every evangelical teacher holds.

(5) **Atonement and Redemption.** In the strictly evangelical view *atonement* must not be confounded with *redemption*. Between these two terms there are plain differences, and no one without a perception of these differences can treat this great subject with lucidness or accuracy. They differ in object and design, and, of course, are of a different nature, so that things may be truly affirmed of one which cannot be truly affirmed of the other.

(a) *First*, they differ in object. Atonement is offered to God as its object; redemption is purchased or procured for men as its object. Atonement is a sacrifice offered; redemption is a benefit conferred. *Secondly*, they differ in design. The design of the atonement is to render God propitious, as the Sovereign Ruler; the design of redemption, to make man everlastingly blessed. Hence, *thirdly*, they differ in nature. Atonement being made to God, and made by a sacrifice of inestimable value, is in its own nature infinite; nor is it possible for us to conceive how its intrinsic worth and glory, or its efficacy and adaptation to its end, could be increased. Its *sufficiency* is infinite, for who can overrate "the precious blood of Christ," or take exact account of His "unsearchable riches?" Its end was "that God might be just, and the justifier of him that believeth in Jesus." This end was infinitely desirable, for it involves an infinite good, *glory to God in the highest, on earth peace, and good-will to men*. But this end the atonement has accomplished. God is just, and the justifier of him that believeth in Jesus. Its *efficacy*, therefore, is complete. It could not be more so. *By one offering of himself*, says the apostle, *he hath perfected forever them that are sanctified* (Heb. x:14). *Christ is the end of the law for righteousness to every one that believeth* (Rom. x:10). *Who shall lay anything to the charge of God's elect? It is God that justifieth. Who is he that condemneth? It is Christ that died; yea, rather that is risen again; who is also at the right hand of God, and who maketh intercession for us* (Rom. viii:33, 34). Is not that atonement then in its nature infinite which is sufficient to satisfy God, the infinite Lawgiver and Judge, in the remission of sin to everyone who cordially confides in it, and which so effectually repairs the injury done by sin as to justify Him in the sight of the whole universe for so doing? Can we talk of limits to the value of such a sacrifice? Can we assign bounds to the efficacy of such an expiation? Can we apply terms of measurement to the nature of such an atonement for sin? Is not the covering ample enough to protect a universe from the punishment of sin, were they all in need of its protection, and to resort to it for shelter?

(b) *Redemption*, on the contrary, is in its very nature definite. It has an inseparable relation to men, as its object, and therefore in its very nature is limited to the number for whom its price is paid, in whose behalf it is accepted, and on whom the blessing is actually bestowed. Redemption is not expiation for sin, but the deliverance of men from sin, by means of such an expiation. Hence Christ is said *by his own blood to have obtained eternal redemption for us* (Heb.

ix:12). Hence, the word redemption is used for *pardon*, which is *our actual* deliverance from punishment (Ephes. i:7; Col. i:14); for *sanctification*, which is *our actual* deliverance from the dominion of sin (1 Pet. i:18; Is. lix:20), and for *the resurrection*, which is the actual deliverance of our body from the grave at the last day (Rom. viii:23; Ephes. i:14; iv:30). Hence it is clear that in Scripture usage atonement and redemption differ in their nature, and that the one is the cause and the other the effect. Atonement is the ground of redemption (Is. liii:4-9). Redemption is the result of the atonement (Is. liii:10-12). The atonement takes effect by changing the relations of God toward the guilty (Rom. iii:21). Redemption takes effect by changing the relations of the guilty towards God (Rev. xiv:4). The former was completely finished on the cross (Dan. ix:24; John xix:30). The latter is now in daily progressive operation, and will not be finished till the final consummation of all things (Ephes. iv:30).

(6) **Extent of Atonement.** As to the question whether the atonement be *general*, or *limited*, "that controversy," as Mr. Malcom observes, "has ever seemed rather the result of misunderstanding between the parties, or of each party looking too exclusively to those aspects of the doctrine which seemed best to comport with their system of theology. In some respects the atonement is general; in others limited; in respect of sufficiency it is infinite; in respect to its application in the final salvation of men it is *limited*; but in no respect is it *indefinite*."

(7) **Summary.** J. O. F. Murray, in *Hastings' Bib. Dict.*, sums up the question briefly as follows:

"The effect of the atonement is therefore to remove altogether the obstacle introduced by sin, to undo the work of the devil (1 John iii:8), and to open anew the way by which sinful men can return into communion with their Father in heaven (Heb. x:20). The blood of Christ, understood in the full measure of its spiritual reality, reveals the true law of man's being, and brings home to him the extent of his degradation. By its revelation of the love of God triumphant over sin, it wins men back from their spiritual alienation, making them ready to return to their allegiance, and willing to give up their sin. It cleanses their consciences from the stain of sin, and sets them free from the curse of the law, by the assurance that a perfect satisfaction has been offered to the righteous claims of the Divine justice, and by enabling them to make their own the perfect confession of their sins that has already been offered in their name. It is the well-spring of a new power of moral self-determination by which they may be enabled, in spite of the tyrannous domination of past habits acquired and inherited (1 Pet. i:18), and in the midst of an atmosphere of temptation, to live henceforward in obedience to God's will, submitting in patience and in hope to all the suffering that He may require from them, whether by way of discipline or of service. It thus robs even death itself of its sting.

"It is true that we can but dimly see why such a sacrifice as the death of Christ should have been necessary, and guess in the light of partial human analogies at the secret of its power. But it is enough for our present guidance to know that the sacrifice itself has been offered, and that there have been men in every age who, from their own experience, have borne witness that it is effectual."

(8) **Ecclesiastical.** In ecclesiastical writers, and in the canons of councils, *Katallagay* is em-

ployed to signify the reconciliation of offenders to the church after a due course of penitence. Of this there are said to have been two kinds; the one consisting merely in the remission of punishment; the other, in the restoration of the penitent to all the rights and privileges of communion.

ATONEMENT, DAY OF (â-tôn-ment), (Heb. יוֹם הַכִּיפּוּרִים, *yome hak-kip-poor-eeem'*, day of pardon, Lev. xxiii:27; xxv:9). In the Talmud this day is called *great fasting*, or merely *the day*; a circumstance which has suggested to some commentators the notion that by *hemeran* (Heb. vii:27) the apostle intended this *atonement day*.

(1) **Time.** Though perhaps originally meant as a temporary day of expiation for the sin of the golden calf (as some would infer from Exod. xxxiii), yet it was permanently instituted by Moses as a day of atonement for sins in general; and this day—the 10th of Tishri (our September or October)—is indeed the only fast ordained by Moses, though the later Jews, in commemoration of some disastrous events, especially those which occurred at and after the destruction of the two temples, instituted a few more fast days, which they observed with scarcely less rigor and strictness than the *one* ordained by Moses for the purpose of general absolution (Lev. xvi:1-34; Num. xix:7-11). This great fast, like all others among the Jews, commenced at sunset of the previous day and lasted twenty-four hours—that is, from sunset to sunset, or, as the Rabbins will have it, until three stars were visible in the horizon.

(2) **Ceremonies.** The ceremonies observed on this occasion are minutely described in Lev. xvi, and were of a very laborious character, especially for the high-priest, who had to prepare himself during the previous seven days in nearly solitary confinement for the peculiar services that awaited him, and abstain during that period from all that could render him unclean or disturb his devotions. The most remarkable ceremony of the day was the entrance of the high-priest into the sanctuary, a thing not allowed on any other day, and to which Paul alludes (Heb. ix:7). According to the Talmud and Maimonides, the entrance of the high-priest into the sanctuary took place four different times. The first time he was provided with the golden censer and the vessel filled with incense, when, after having entered, he placed the former between the two poles of the tabernacle and put the incense upon the coals. This done, he went out (according to the Talmud. *ibid.*, backwards, so as not to turn his back on the sanctuary). At his second entrance he took with him the blood of the bullock which he had offered in expiation for his own sins and those of the other priests, placed himself between the poles of the tabernacle, dipped his finger in the blood and sprinkled it seven times below and once above the mercy-seat. This done, he left the basin with the blood behind, and withdrew again. The third time he entered with the blood of the ram which he had offered for the sins of the nation, with which he sprinkled towards the veil of the tabernacle eight times, and having mixed it with the blood of the bullock, he sprinkled again towards the horns of the altar of incense seven times, and once above it towards the east, after which he poured out the whole on the floor of the altar of burnt offering, having again left the sanctuary and taken with him the basins of blood. The fourth time he entered merely to fetch back the censer and vessel of incense, and having returned he washed his hands and performed the other ceremonies of the day.

That the high-priest entered more than once into the sanctuary during this solemnity is certainly clear from the various rites which he had to perform there, as described in Lev. xvi:12, 14, 15. Nor does the assertion of the Talmud contradict Heb. ix:7, where the apostle tells us that the high-priest had entered only *once* on that day, since the expression which he uses may refer to the *one day in the year* when such a service alone took place.

(3) Other Duties of the High-Priest. The other duties of the high-priest on that day consisted in frequent washings, changing his clothes, lighting the lamps, burning incense, etc., which operations commenced soon after midnight of the 10th of the seventh month (Tishri). The ceremonies of worship peculiar to this day alone (besides those which were common to it with all other days) were: (1) That the high-priest, in his pontifical dress, confessed his own sins and those of his family, for the expiation of which he offered a bullock, on which he laid them; (2) that two goats were set aside, one of which was by lot sacrificed to Jehovah, while the other (Azazel), which was determined by lot to be set at liberty, was sent to the desert burdened with the sins of the people (Lev. xvi). According to the Talmud, both goats were to be alike in color, stature and age at the time of their being set aside for the purposes of that day.

On this day also the high-priest gave his blessing to the whole nation, and the remainder of the day was spent in prayers and other works of penance.

ATROTH (ät'röth), (Heb. אֶרֶוֹת, *at-aw-röth'*, crowns), a city of Gad (Num. xxxii:35), named with Aroer and Jaazer. It should probably be taken with the name following it, *Shophan*, to distinguish it from Ataroth in the same locality. It was in a fertile grazing district.

ATTAI (ät'täi), (Heb. אֶפֶי, *at-tah'ee*, opportune).

1. Grandson of Sheshan (B. C. 1658) through his daughter Ahlai, whom he gave as a wife to Jarha, his Egyptian slave (1 Chron. ii:35,36).

2. The sixth of David's mighty men (1 Chron. xii:11), B. C. about 1068.

3. Son of King Rehoboam and Maachah, daughter of Absalom (2 Chron. xi:20), B. C. about 972.

ATTALEIA (ät'ta-lī-ä), (Gr. Ἀτάλεια, *at-tal'ia*), a maritime city of Pamphylia, in Asia Minor, near the mouth of the river Catarrhactes. It derived its name from its founder, Attalus Philadelphus, king of Pergamos (Strabo, xiv, p. 667). It was visited by Paul and Barnabas, A. D. 45 (Acts xiv:25). It still exists under the name of Adalia, and extensive and important ruins attest the former consequence of the city (Leake's *Asia Minor*, p 193).

ATTITUDES (ät'tī-tūds).

The allusions in Scripture to attitudes and postures expressive of adoration, supplication and respect are very numerous. From these we learn enough to perceive that the usages of the Hebrews in this respect were very nearly, if not altogether, the same as those which are still practiced in the East, and which the paintings and sculptures of Egypt show to have been of old employed in that country. These sources supply ample materials for illustration, which it may be well to arrange under those heads into which such acts naturally divide themselves.

(1) Adoration and Homage. The Moslems in their prayers throw themselves successively, and according to an established routine, into the nine

various postures which they deem the most appropriate to the several parts of the service. We have no doubt that the Hebrews employed on one occasion or another nearly all the various postures which the Moslems exhibit on one occasion. This is the chief difference. In public and common worship the Hebrews prayed *standing* (1 Kings viii:54; Ezra iv:5; Dan. vi:10; 2 Chron. vi:13); but in their separate and private acts of worship they assumed the position which, according to their modes of doing homage or showing respect, seemed to them the most suitable to their present feelings or objects. It would appear, however, that some form of kneeling was most usual in private devotions.

(2) Standing in public prayer is still the practice of the Jews. This posture was adopted from the synagogue by the primitive Christians, and is still maintained by the Oriental churches. This appears, from their monuments, to have been the custom also among the ancient Persians and Egyptians, although the latter certainly sometimes kneeled before their gods.

While in this attitude of worship the hands were sometimes stretched forth towards heaven in supplication or invocation (1 Kings viii:22; 2 Chron. vi:12, 29; Is. xv). This was not perhaps so much the conventional posture in the Moslem series as the more natural posture of standing adoration with outspread hands, which we observe on the Egyptian monuments. The uplifting of one hand (the right) only in taking an oath was so common, that to say, 'I have lifted up my hands,' was equivalent to 'I have sworn' (Gen. xiv:22; Comp. xli:44; Deut. xxxii:40). This posture was also common among other ancient nations, and we find examples of it in the sculptures of Persia and Rome.

(3) Kneeling is very often described as a posture of worship (1 Kings viii:54; Ezra ix:5; Dan. vi:10; 2 Chron. vi:13; Comp. 1 Kings xix:18; Luke xxii:41; Acts vii:60). This is still an Oriental custom, and three forms of it occur in the Moslem devotions. It was also in use, although not very frequent, among the ancient Egyptians, who likewise, as well as the Hebrews (Exod. xxxiv:18; 2 Chron. xxix:29; Is. i:15), sometimes prostrated themselves upon the ground. The usual mode of prostration among the Hebrews by which they expressed the most intense humiliation, was by bringing not only the body but the head to the ground. The ordinary mode of prostration at the present time, and probably anciently, is that shown in one of the postures of Moslem worship, in which the body is not thrown flat upon the ground, but rests upon the knees, arms and head. In order to express devotion, sorrow, compunction or humiliation, the Israelites threw dust upon their heads (Josh. vii:6; Job ii:12; Lam. ii:10; Ezek. xxiv:7; Rev. xviii:19), as was done also by the ancient Egyptians, and is still done by the modern Orientals. Under similar circumstances it was usual to smite the breast (Luke xviii:13). This was also a practice among the Egyptians (Herod. ii:85), and the monuments at Thebes exhibit persons engaged in this act while they kneel upon one knee.

In 1 Chron. xvii:16, we are told that 'David the king came and *sat* before the Lord,' and in that posture gave utterance to eloquent prayer, or rather thanksgiving, which the sequel of the chapter contains. Those unacquainted with Eastern manners, are surprised at this. But there is a

mode of sitting in the East which is highly respectful and even reverential. It is that which occurs in the Moslem form of worship. The person first kneels and then sits back upon his heels. Attention is also paid to the position of the hands, which they cross, fold or hide in the opposite sleeves. The variety of this formal sitting which the following figure represents is highly respectful. The prophet Elijah must have been in this or some other similar posture when he inclined himself so much forward in prayer that his head almost touched his knees (1 Kings xviii:42).

(4) **Supplication**, when addressed externally to man, cannot possibly be exhibited in any other form than those which are used in supplication to God. Uplifted hands, kneeling, prostration, are

common to both. On the Egyptian monuments, suppliant captives, of different nations, are represented as kneeling or standing with outspread hands. This also occurs in the sculptures of ancient Persia (Persepolis). The first of the Egyptian figures is of peculiar interest, as representing an inhabitant of Lebanon. *Prostration* or *falling at the feet* of a person, is often mentioned in Scripture as an act of supplication or of reverence, or of both (1 Sam. xxv:24; 2 Kings iv:37; Esth. viii:3; Matt. xviii:29; xxviii:9; Mark v:22; Luke viii:41; John xi:32; Acts x:25). In the instance last referred to, where Cornelius threw himself at the feet of Peter, it may be asked why the apostle forbade an act which was not unusual among his own people, alleging as the reason—'I myself also am a man.' The answer is, that among the Romans prostration was *exclusively* an act of adoration, rendered only to the gods, and therefore it had in him a significance which it would not have had in an Oriental (Kuinoel, *ad Act.* x:26). This custom is still very general among the Orientals; but, as an act of reverence merely, it is seldom shown except to kings; as expressive of alarm or supplication, it is more frequent.

Sometimes in this posture, or with the knees

bent as before indicated, the Orientals bring their forehead to the ground, and before resuming an

erect position either kiss the earth, or the feet, or border of the garment of the king or prince before whom they are allowed to appear. There are allusions in Scripture to the act of kissing the feet, or the hem of the garment (Matt. ix:20; Luke vii:38, 45). *Kissing the hand* of another as a mark of affectionate respect, we do not remember as distinctly mentioned in Scripture. Kissing one's own hand is mentioned as early as the time of Job (xxxix:27) as an act of homage to the heavenly bodies.

It appears from 1 Sam. x:1; 1 Kings xix:18; Ps. ii:12, that there was a peculiar kiss of homage, the character of which is not indicated. It was probably that kiss upon the forehead expressive of high respect which was formerly, if not now, in use among the Bedouins (*Antar*, ii:119).

(5) **Bowing**. In the Scriptures there are different words descriptive of various postures of respectful bowing, as *gadad*, to *incline or bow down the head*; *kara*, to *bend down the body very low*; *barak*, to *bend the knee*, also to *bless*. These terms indicate a conformity with the existing usages of the East, in which the modes of bowing are equally diversified, and, in all likeli-

hood, the same. These are: (1) Touching the lips and the forehead with the right hand, with or without an inclination of the head or of the body, and with or without previously touching the ground; (2) placing the right hand upon the breast, with or without an inclination of the head or of the body; (3) bending the body very low, with folded arms; (4) bending the body and resting the hands on the knees—this is one of the postures of prayer and is indicative of the highest respect in the presence of kings and princes. In the Egyptian paintings we see persons drop their arms towards the ground while bowing to a superior, or standing respectfully with the right hand resting on the left shoulder.

It is observable that, as before noticed, the word *barak* means to *bless* and to *bend the knee*, which suggests the idea that it was usual for a person to receive a blessing in a kneeling posture. We know also that the person who gave the blessing laid his hands upon the head of the person blessed (Gen. xlviii:14). This is exactly the case at the present day in the East, and a picture of the existing custom would furnish a perfect illustration of the patriarchal form of blessing. This may be perceived from the annexed engraving.

AUGUSTUS (äu-güs'tus), (Gr. Αὐγούστος, *aw'-goos-tos*, venerable), the title assumed by Octavius,

who, after his adoption by Julius Cæsar, took the name of Octavianus (*i. e.*, *Kæsar-Octavius*), according to the Roman fashion, and was the first peacefully acknowledged emperor of Rome. He was emperor at the birth and during half the lifetime of our Lord; but his name has no connection with Scriptural events, and occurs only once (Luke ii:1) in the New Testament. He was one of the second so-called triumvirate, with Mark Antony and Lepidus. After the removal of the latter he fought a battle with Antony at Actium (B. C. 31), defeating him. The senate saluted him as emperor, and in B. C. 27 conferred on him the title of "Augustus." He comes into the New Testament in connection with Herod, whom he had reinstated in his kingdom and greatly honored, although Herod had espoused the cause of Antony. At Herod's death Augustus divided his kingdom in accordance with his will, and even educated two of his sons, since their relations had been very intimate. He reigned forty-one years, and was succeeded by Tiberius Cæsar (Luke iii:1).

The successors of the first Augustus took the same name or title, but it is seldom applied to them by the Latin writers. In the eastern part of the empire the Greek *see-bas-tos'* (which is equivalent) seems to have been more common, and hence is used of Nero (Acts xxv:21). In later times (after Diocletian) the title of Augustus was given to one of the two heirs-apparent of the empire, and Cæsar to their younger colleagues and heirs-apparent.

AUGUSTUS' BAND (äu-güs'tus'bänd), the title of the body to which the centurion who took Paul to Rome belonged (Acts xxvii:1).

AUL (aul). See AWL.

AUNT (änt), (Heb. אִמִּי, *do-daw'*, loving), a father's sister (Exod. vi:20); also an uncle's wife (Lev. xviii:14; xx:20).

AURANITIS (au-ran i'tis). See HAURAN.

AUTHORIZED VERSION (a'thör-izd vēr'-shün), (A. V.). See BIBLE.

AVA (a'vá), (Heb. אַוַּו, *av-vaw'*, ruin, 2 Kings xvii:24; also Ival, אִוַּל, *iv-vaw'*; Sept. Ἀβά, *a-ba'*, 2 Kings xviii:34; xix:13; Is. xxxvii:13), the capital of a small monarchical state conquered by the Assyrians, and from which King Shalmaneser sent colonies into Samaria.

Some take it for the river, or rather the town which gave name to the river Ahava of Ezra viii:21.

"As Ivvâh is placed by the side of Hena (2 Kings xviii:34; xix:13), Avva can hardly be any other than the country of Hebeh, situated on the Euphrates between Anah and the Chabur" (Keil, *Com. on Kings*).

AVE MARIA (ä'vä mã-rë'à), Hail Mary.

1. The words of the angel Gabriel to the Virgin Mary, when announcing the incarnation (Luke i:28), as rendered by the Vulgate.

2. The familiar prayer, or form of devotion, in the Roman Catholic Church, called also the "Angelic Salutation." It consists of three parts: (1) The Salutation of Gabriel, *Ave* (Maria) *gratia plena, Dominus tecum; benedicta tu in mulieribus*; (2) the words of Elizabeth to Mary, *et benedictus fructus ventris tui*; (3) an addition made by the Church, *Sancta Maria, Mater Dei, ora pro nobis peccatoribus nunc et in hora mortis nostræ*. The whole Ave Maria, as it now stands, is ordered in the breviary of Pius V (1568) to be used daily before each canonical hour and after compline; *i. e.*, the last of the seven canoni-

cal hours (*Cath. Dict.*; Barnes, *Bib. Dict.*; *Doctrine of the Rom. Cath. Ch.*).

AVEN (ä'ven), (Heb. אֵוֶן, *av'ven*; Sept. ὄν, *ohn*, nothingness), a plain, 'the plain of the sun,' of Damascene Syria (Amos i:5).

1. It is usually supposed to be the same as the plain of Baalbec, or valley of Baal, where there was a magnificent temple dedicated to the sun. Being between Lebanon and Anti-Lebanon, it is supposed by Rosenmüller and others to be the same plain or valley that is mentioned as 'the valley of Lebanon' in Josh. xi:17. Some, however, influenced by the Septuagint, would rather seek Aven in the plain of Un, four leagues from Damascus towards the desert.

2. In Hos. (x:8) "the high places of Aven," should be probably Beth-aven. Compare Hos. iv:15. The plain of Aven or 'the valley of Aven' is probably the Plain of Cœle-Syria, so called from the idolatrous worship of the Sun in the great temple of Baalbek.

3. On or Heliopolis of Egypt (Ezek. xxx:17).

AVENGER OF BLOOD (ävën'jër öv blüd),

(Heb. גֹּאֵל, *go-ale'*, avenger), a term applied to the nearest relative of a murdered man (2 Sam. xiv:7, 11; Josh. xx:3, 5, 9; Ps. viii:2). It became abused in practice (Deut. xix:1; Num. xxxv:9; Exod. xxi:13). See BLOOD-REVENGE.

AVIM (ä'vim), (Heb. אַוִּי, *av-veem'*, villagers), called also Avites and Hivites, a people descended from Canaan (Gen. x:17), who originally occupied the southernmost portion of that territory in Palestine along the Mediterranean coast which the Caphtorim or Philistines afterwards possessed (Deut. ii:23).

As the territory of the Avim is mentioned in Josh. xiii:3, in addition to the five Philistine states, it would appear that it was not included in theirs, and that the expulsion of the Avim was by a Philistine invasion prior to that by which the five principalities were founded. The territory began at Gaza and extended southward to 'the river of Egypt' (Deut. ii:23), forming what was the sole Philistine kingdom of Gerar in the time of Abraham, when we did not hear of any other Philistine states. There were then Avim, or Hivites, at Shechem (Gen. xxxiv:2), and we afterwards find them also at Gibeon (Josh. ix:7), and beyond the Jordan, at the foot of Mount Hermon (Josh. xi:3); but we have no means of knowing whether these were original settlements of the Avim, or were formed out of the fragments of the nation which the Philistines expelled from southern Palestine. The original country of the Avim is called Hazerim in Deut. ii:23. (See GERAR; PHILISTINES.)

AVITES (ä'vites), (Heb. אַוִּי, *av-vee'*), the name of two tribes of people. (See AVIM.)

AVITH (ä'vith), (Heb. אַוִּי, *av-veeth'*, hut, village), a city of Hadad ben-Bedad, one of the kings of Edom before there were kings of Israel (Gen. xxxvi:35; 1 Chron. i:46).

AWL (äwl), (Heb. אַוִּי, *mar-tsay'ah*, from verb signifying "to bore").

It denotes an awl or other instrument for boring a small hole, occurs in Exod. xxi:6; Deut. xv:17. Considering that the Israelites had at that time recently withdrawn from their long sojourn in Egypt, there can be no doubt that the instruments were the same as those of that country, the forms of which, from actual specimens in the British

Museum, are shown in the annexed cut. They are such as were used by the sandal-makers and other workers in leather.

AX or **AXE** (ăx), in most modern editions of A. V. spelt *ax*, although the edition of 1611 had *axe* throughout.

Several instruments of this description are so discriminated in Scripture as to show that the Hebrews had them of different forms and for various uses, which occurs in Deut. xix.

1. *Gar-zen'* (Heb. גַּרְזֵן, to cut, Deut. xix:5; xx:19; 1 Kings vi:7; Is. x:15). From these passages it appears that this kind was employed in felling trees, and in hewing large timbers for building. The conjecture of Gesenius that in 1 Kings vi:7 it denotes the axe of a stonemason, is by no means conclusive. The first text supposes a case of the head slipping from the helve in felling a tree. This would suggest that it was shaped like Fig. 3, which is just the same instrument as our common hatchet, and appears to have been applied by the ancient Egyptians to the same general use as with us. The reader will observe the contrivance in all the others (wanting in this) of fastening the head to the haft by thongs.

2. *Mah-ats-awd'* (Heb. מַחֲצָאוֹד, a hewing instrument), rendered "tongs" in Is. xlv:12; and "axe," Jer. x:3. From these passages it appears to have been a lighter implement than the former, or a kind of adze, used for fashioning or carving

wood into shape; it was, probably, therefore, like Figs. 4 to 7, which the Egyptians employed for this purpose. Some texts of Scripture represent them as being employed in carving images—the use to which the prophets refer. The differences of form and size, as indicated in the figures, appear to have been determined with reference to light or heavy work; Fig. 3 is a finer carving tool.

3. *Kar-dome'* (Heb. כַּרְדֹּמֶיךָ), this is the commonest name for an ax or hatchet. It is this of which we read in Judg. ix:48; Ps. lxxiv:5; 1

Assyrian Ax.

Sam. xiii:20, 21; Jer. xlvi:22. It appears to have been more exclusively employed than the *garzen* for felling trees, and had therefore probably a heavier head. In one of the Egyptian sculptures the inhabitants of Lebanon are represented as felling pine trees with axes like Fig. 1. As the one used by the Egyptians for the same purpose was also of this shape, there is little doubt that it was also in use among the Hebrews.

Egyptian Ax.

4. The word *mar-tsay'-ah*, rendered 'axe' in 2 Kings, vi:5, is literally 'iron;' but as an axe is certainly intended, the passage is valuable as showing that the axheads among the Hebrews were of iron. Those which have been found in Egypt are of bronze, which was very anciently and generally used for the purpose. But this does not prove that they had none of iron; it seems rather to suggest that those of iron have been consumed by the corrosion of three thousand years, while those of bronze have been preserved. All our figures are from actual specimens now in the British Museum.

5. *Mag-say-raw'* (Heb. מַגְסַי־רָאוֹרַי, "iron cutting tools" (2 Sam. xii:31). *Meg-ay-raw'* (Heb. מֵגַי־רָאוֹרַי) is also used in the same passage, also 1 Chron. xx:3, and means a saw.

6. *Kheh'reb* (Heb. כְּהֵרֵב), usually rendered "sword," is used of other cutting instruments; once rendered "ax" (Ezek. xxvi:9); probably a pickax, as it is said that "with his axes he shall break down thy towers."

7. *Kash-sheel'* (Heb. קַשְׁשֵׁלַי) occurs only in Ps. lxxiv:6, and appears to have been a later word denoting a large ax.

Ax in Greek is ἀξίλην, *ax-ee'nay* (Matt. iii:10; Luke iii:9).

Figurative. The Assyrians and Chaldeans are likened to an *ax*. By them God cut down, destroyed, and scattered the nations around (Is. x:15; Jer. 1:21). The *ax was laid to the root of the tree* with the Jews. In Christ's time the destructive judgments of God were ready to be executed on their church and state, if they did not speedily receive Christ, repent of their sins, and bring forth good works (Matt. iii:10).

AXHEAD (ăks'héd), (Heb. בַּר־זֶלֶזַל, *bar-zel'*, 2 Kings vi:5), is literally "iron;" but as an ax is evidently intended, the passage shows that the axheads among the Hebrews were of iron.

Those found in Egypt are of bronze, such as was anciently used for such instruments. They used iron axes also, which have become corroded by time.

AXLETREE (ăks'1-trē') occurs only in 1 Kings vii:32, 33, as translation of יָד, *yad*, hand, the whole phrase being *the hands of the wheels*.

AZAL (ā'zal), (Heb. אָזַל, *aw-tsalē'*, noble), a place, evidently in the neighborhood of Jerusalem, and probably east of the Mount of Olives (Zech. xiv:5).

AZALIAH (ăz-a-lī'ah), (Heb. אֲזַלְיָהוּ, *ats-al-yaw'hoō*, Jah is noble, or whom Jehovah has spared), the father of Shaphan the scribe in the reign of Josiah (2 Kings xxii:3; 2 Chron. xxxiv:8), B. C. before 625.

AZANIAH (ăz-a-nī'ah), (Heb. אֲזַנְיָהוּ, *az-an-yaw'*, Jah is hearer, A. V. 'ospray), an unclean bird, but there is a difference of opinion as to the particular species intended.

The etymology of the Hebrew word would seem to point to some bird remarkably *powerful fierce*, or *impudent*. Bochart supposes the *black eagle* to be meant, but reasons upon the *mere conjecture* that by the word *μελαναίετος* is intended *ἀλκίαιετος* (*Hieroz.* tom. iii. p. 188, etc.).

The following statement places the matter in a clear light: Aristotle, about B. C. 300, describes the *halceatos* as 'a species of eagle dwelling near seas and lakes; and remarks, it sometimes happens to it that having seized its prey, and not being able to carry it, it is drowned in the deep.' (*Hist. Animal*, ix. c. 32). (See **EAGLE**.)

AZARAEL (a-zār'a-el or a-zā'ra-el), (Neh. xii:36). See **AZAREEL**.

AZAREEL (a-zār'e-el or a-zā're-el), (Heb. אֲזַרְעֵל, *az-ar-ale'*, God has helped).

1. One of the Benjamite warriors, who came (B. C. 1058) to David at Ziklag (1 Chron. xii:6).

2. Head of the musicians of the temple (1 Chron. xxv:18), called Uzziel in verse 4, (B. C. 1015.)

3. Ruler of the tribe of Dan (B. C. 1015), under David and Solomon (1 Chron. xxvii:22).

4. An Israelite (B. C. 456), who renounced his Gentile wife (Ezra x:41).

5. The last of the chiefs (B. C. 445) of the one hundred and twenty-eight mighty men of the priests who served at the temple (Neh. xi:13).

AZARIAH (ăz-a-rī'ah), (Heb. אֲזַרְיָהוּ, *az-ar-yaw'*, whom Jehovah aids, answering to the German name *Gotthelf*), a very common name among the Hebrews, and hence borne by a considerable number of persons mentioned in Scripture

1. A son or descendant of Zadok, the high-priest, in the time of David, and one of Solomon's princes (1 Kings iv:2), B. C. 960. He is probably the same with No. 5 below.

2. Son of Nathan and a captain of Solomon's guards (1 Kings iv:5), B. C. about 1000.

3. Frequently called Uziah, tenth king of Judah, who began to reign at sixteen years of age, and reigned fifty-two years at Jerusalem (2 Kings xv:27; 2 Chron. xxvi:18, 19; 2 Kings xiv:21; 1 Chron. iii:12), B. C. about 809.

4. Son of Ethan (B. C. 1660), of the sons of Zerah. Perhaps Zerariah is the better reading (1 Chron. ii:8).

5. A high-priest, son of Ahimaaz and grandson of Zadok (1 Chron. vi:9), whom he seems

to have immediately succeeded (1 Kings iv:2). He is probably the same with No. 1.

6. The son of Johanan (B. C. 781), a high-priest (1 Chron. vi:10), whom some suppose the same as Zechariah, son of Jehoiada, who was killed B. C. 840 (2 Chron. xxiv:20-22).

7. Son of Jechu (B. C. 1330), descended from Jarha, the slave of Sheshan (1 Chron. ii:38, 39). Probably he is one of the captains mentioned in 2 Chron. xxiii:1, and called the son of Obed.

8. An Azariah inserted between Hilkiyah and Seraiah, in Josiah's reign. There seems scarcely room for him here, and it is possible the name was inserted to correspond with Ezra (vii:1). He was killed by Nebuchadnezzar (1 Chron. vi:13), B. C. 641-610.

9. Son of Zephaniah and forefather of Samuel, the prophet (1 Chron. vi:36). Apparently he is the same as Uziah of verse 24. (B. C. 1100).

10. A person (B. C. 941) to whom the high-priest Jehoiada made known the secret of the existence of the young prince Joash, and who assisted in placing him on the throne (2 Chron. xv:1).

11 and 12. The name of two sons of Jehoshaphat (B. C. 890), king of Judah. (2 Chron. xxi:2).

13. In 2 Chron. (xxii:6), a clerical error for Ahaziah (B. C. 885).

14. Son of Jeroham, and one of the captains of Judah (2 Chron. xxiii:1), B. C. 878.

15. The high-priest (B. C. 765) who opposed Uziah, king of Judah, in offering incense to the Lord (2 Chron. xxvi:17).

16. Son of Johanan, a captain of Ephraim (2 Chron. xxviii:12). He returned the captives and spoil taken in the invasion of Judah by Pekah (B. C. 726).

17. Father of Joel, in the reign of Hezekiah (2 Chron. xxix:12), B. C. 726.

18. Son of Jehalelel (B. C. 726), and a contemporary of the son of the former (2 Chron. xxix:12).

19. A high-priest (B. C. 726) in the time of Hezekiah (2 Chron. xxxi:10), who coöperated zealously with the king in the purification of the temple.

20. Son of Maaseiah (B. C. 445). He repaired a portion of the wall of Jerusalem in the time of Nehemiah (Neh. iii:23, 24).

21. One of the leaders who went up with Zerubbabel from Babylon (Neh. vii:7). In Ezra ii:2 he is called Seraiah (B. C. 590).

22. A Levite (B. C. 445), who instructed the people in the law under Ezra (Neh. viii:7).

23. One of the priests (B. C. 445), who solemnized the covenant with Nehemiah (Neh. x:2). Probably he was the one who helped in the dedication of the city wall (Neh. xii:33).

24. (See **JEZANIAH**.) Jer. xliii:2.

25. The Chaldean name of Abednego, one of Daniel's three friends who were cast into the fiery furnace (Dan. i:7; iii:9), B. C. 560.

AZAZ (ā'záz), (Heb. אָזָז, *aw-zawz'*, strong), a Reubenite father of Bela (1 Chron. v:8), B. C. 1700.

AZAZEL (a-zā'zel), (Heb. אֲזַזְעַל, the Hebrew term which is translated in the A. V. (Lev. xvi:8, 10, 26) "scapegoat."

AZAZIAH (ăz'a-zī'ah), (Heb. אֲזַזְיָהוּ, *az-az-yaw'hoō*, strengthened by Jehovah).

1. A Levite (B. C. 1040), appointed in the reign of David to play the harp in the service connected with bringing the Ark from the house of Obed-edom (1 Chron. xv:21),

2. The father of Hosea (B. C. 1040), and prince of the tribe of Ephraim, when David enumerated the people (1 Chron. xxvii:20).

3. A Levite, who, in the reign of Hezekiah (B. C. 726), had charge of the tithes and dedicated things in the Temple under Cononiah and Shimei (2 Chron. xxxi:13).

AZBUK (ăz'buk), (Heb. אֲזַבּוּק, *az-book'*, strong devastation or pardon), an ancestor, perhaps father of Nehemiah (B. C. 445), the prince of a part of Bethzur (Neh. iii:16).

AZEKAH (a-zē'kah), (Heb. אֲזַקָּה, *az-ay-kaw'*, tilled or breach), a town of Judah in the neighborhood of Adullam and Shaaraim (Josh. xv:35, 36; 2 Chron. xi:7; Neh. xi:30).

It was near "to the northern one," *i. e.* Shochoh (1 Sam. xvii:1). To this place Joshua pursued the Canaanites (Josh. x:10, 11). The city was still standing at the time of the invasion of the kings of Babylon (Jer. xxxiv:7), and is mentioned as one of the places reoccupied by the Jews when they returned from captivity (Neh. xi:30).

AZEL (ā'zel), (Heb. אֲזֵל, *aw-tsale'*, noble), a descendant of Saul (1 Chron. viii:37, 38; ix:43, 44).

AZEM (ā'zem), (Heb. אֲזֵם, *eh'tsem*, a bone or fortress), a city in the south of Judah (Josh. xv:29), apportioned to Simeon later (xix:3). (See EZEM).

AZGAD (ăz'gād), (Heb. אֲזַגָּד, *az-gawd'*, strong in torture or worship, supplication). The children of Asgad to the number of 1,222 returned B. C. 536 with Zerubbabel (Ezra ii:12). The number is 2,322 in Neh. (vii:17). In the second caravan 110 accompanied Ezra (Ezra viii:12). These joined in the covenant with Nehemiah (Neh. x:15).

AZIEL (ā'zi-el), (Heb. אֲזִיֵּל, *az-ee-ale'*, God is might), a Levite (1 Chron. xv:20). The name is shortened from Jaaziel (1 Chron. xv:18), B. C. 1042.

AZIZA (a-zī'zā), (Heb. אֲזִיזָה, *az-ee-zaw'*, strong); he belonged to the family of Zattu and married a foreign wife after the return from Babylon (Ezra x:27), B. C. 457.

AZMAVETH (ăz'ma-vēth or ăz-mā'vēth), (Heb. אֲזַמָּוֶת, *az-marw'veth*, strong as death).

1. A native of Bahurim (2 Sam. xxiii:31; 1 Chron. xi:33), probably a Benjamite, and one of David's mighty men (B. C. 1050).

2. A descendant of Mephibosheth or Merib-baal (1 Chron. viii:36; ix:42).

3. A Benjamite, father of Pelet and Jeziel, two skilled archers and slingers. The name has been identified with (1) by some; others refer the word to the name of a place (1 Chron. xii:3), B. C. 1050.

4. Master of the royal treasures under David (1 Chron. xxvii:25), B. C. 1015.

5. A town probably in Benjamin. Forty-two of the inhabitants returned with Zerubbabel (Ezra ii:24). It is mentioned in Nehemiah (xii:29), and several Benjamites of the kindred of Saul bore its name (1 Chron. viii:35; ix:42; xii:3). Now called *Hizmeh*.

AZMON or **JESHIMON** (ăz'mon), (Heb. אֲזַמּוֹן, *ats-mone'*, bonelike or fortress), a city in the wilderness of Maon, south of Judah, belonging to the tribe of Simeon (Num. xxxiv:4; Josh. xv:4) near the *Wady-el-arish*. Exact site unknown.

AZNOTH-TABOR (ăz'noth-tā'bor), (Heb. אֲזַנּוֹת תְּבוֹר, *az-nōth'taw-bore'*, tops of Tabor), a town in the W. of Naphtali, between the Jordan and Hukkok (Josh. xix:34).

AZOR (ā'zôr), (Gr. Ἀζόρ, *ad-zore'*, helper), son of Eliakim, in the line of our Lord (Matt. i:13, 14), B. C. 400.

AZOTUS (a-zō'tus), (Gr. Ἀζωτος, *ad'zo-tos*, fortress, castle). See ASHDOD.

AZRIEL (ăz'ri-el), (Heb. אֲזַרְיֵל, *az-ree-ale'*, help of God).

1. Head of the house of the half tribe of Manasseh beyond Jordan (1 Chron. v:24), B. C. 1400.

2. Ancestor of Jerimoth (B. C. 1015), a Naphthalite, and head of the tribe at the time of the census of David (1 Chron. xxvii:19).

3. Father of Seraiah, an officer of Jehoiakim (Jer. xxxvi:26), B. C. 606.

AZRIKAM (ăz'ri-kām), (Heb. אֲזַרְיָקָם, *az-ree-kawm'*, help against the enemy, or, help has risen).

1. Son of Neraiah of the royal line of Judah (B. C. 460), and descendant of Zerubbabel (1 Chron. iii:23).

2. Oldest son of Azel (B. C. 860), a descendant of Saul (1 Chron. viii:38; ix:44).

3. A Levite, ancestor of Shemaiah (1 Chron. ix:14; Neh. xi:15), B. C. 470.

4. Governor of the palace of Ahaz (B. C. 741), who was slain in the invasion under Pekah, king of Israel (2 Chron. xxviii:7).

AZUBAH (a-zū'bah), (Heb. אֲזוּבָה, *az-oo-baw'*, ruins, forsaken).

1. Wife of Caleb, son of Hezron (1 Chron. ii:18, 19), B. C. 1590.

2. Mother of King Jehoshaphat (1 Kings xxii:42; 2 Chron. xx:31), B. C. 914.

AZUR (ā'zur), (Heb. אֲזוּר, *az-zoor'*, a less correct form of Azzur, helper). See AZZUR.

AZZAH (ăz'zah), (Heb. אֲזָה, *az-zaw'*, a mode of spelling the Hebrew name which is elsewhere rendered Gaza. The difference arises from the uncertain power of the first letter ז, which, in proper names, some use as the consonant G, while others regard only the vowel sound connected with it, which in this case is A. (See ALPHABET.) The name occurs in this form in Deut. ii:23; Jer. xxv:20; which last clearly shows that Gaza is intended.

AZZAN (ăz'zan), (Heb. אֲזָן, *az-zawn'*, perhaps a thorn), the father of Paltiel, a prince of the tribe of Issachar (B. C. 1540), who represented his tribe at the division of the promised land (Num. xxxiv:26).

AZZUR (ăz'zur), (Heb. אֲזוּר, *az-zoor'*, helper).

1. One of those who signed the covenant (B. C. 445) with Nehemiah (Neh. x:17). It is probably a family name and in Hebrew is the same as Azur.

2. Father of Hananiah of Gibeon (B. C. 595), who was a prophet in the time of Zedekiah (Jer. xxviii:1).

3. Father of Jaazaniah (B. C. 593). The latter was one of the leaders of the people whom the prophet, in a vision, saw devising false schemes for Jerusalem (Ezek. xi:1).

B

BAAL (bā'al), (Heb. בַּאֵל, *bah'al*, lord, possessor), is a generic term for *god* in many of the Syro-Arabian languages. As the idolatrous nations of that race had several gods, this word, by means of some accessory distinction, became applicable as a name to many different deities. There is no evidence, however, that the Israelites ever called Jehovah by the name of Baal; for the passage in Hos. ii:16, which has been cited as such, only contains the word *baal* as the sterner, less affectionate representative of *husband*.

Baal.

(1) **Ho Baal**, with the definite article, Judg. ii:13; Sept. Gr. ὁ Βάαλ, the *masculine Baal*, but also ἡ Βάαλ, the *feminine Baal*, Jer. xix:5; xxxii:35; Rom. xi:4, is appropriated to the chief male divinity of the Phœnicians, the principal seat of whose worship was at Tyre. The idolatrous Israelites adopted the worship of this god (almost always in conjunction with that of Ashtoreth) in the period of the Judges (Judg. ii:13); they continued it in the reigns of Ahaz and Manasseh,

kings of Judah (2 Chron. xxviii:2; 2 Kings xxi:3); and among the kings of Israel, especially in the reign of Ahab, who, partly through the influence of his wife, the daughter of the Sidonian king Ethibaal, appears to have made a systematic attempt to suppress the worship of God altogether, and to substitute that of Baal in its stead (1 Kings xvi:31); and in that of Hoshea (2 Kings xvii:16), although Jehu and Jehoiada once severally destroyed the temples and priesthood of the idol (2 Kings, x:18, 57.; xi:18).

We read of altars, images and temples erected to Baal (1 Kings xvi:32; 2 Kings iii:2). The altars were generally on heights, as the summits of hills or the roofs of houses (Jer. xix:5; xxxii:29). His priesthood was a very numerous body (1 Kings xviii:19), and was divided into the two classes of prophets and of priests (unless the term 'servants,' which comes between those words, may denote a third order—a kind of Levites (2 Kings x:19). As to the rites by which he was worshiped, there is most frequent mention of incense being offered to him (2 Kings xxiii:5), but also of bullocks being sacrificed (1 Kings xviii:26), and even of children, as to Moloch (Jer. xix:5). According to the description in 1 Kings xviii, the priests, during the sacrifice, danced (or, in the sarcastic expression of the original, *limped*) about the altar, and, when their prayers were not answered, cut themselves with knives until the blood flowed, like the priests of Bellona (Lucan. *Pharsal.* i:565; Tertull. *Apologet.* ix; Lactant. *Div. Instit.* i:21). We also read of homage paid to him by bowing the knee, and by kissing his image (1 Kings xix:18; Comp. Cicero, *In Verrem* iv:43), and that his worshipers used to swear by his name (Jer. xii:16).

As to the power of nature which was adored under the form of the Tyrian Baal, many of the passages above cited show evidently that it was one

of the heavenly bodies; or, if we admit that resemblance between the Babylonian and Persian religions which Münter assumes, not one of the heavenly bodies really, but the *astral spirit* residing in one of them; and the same line of induction as that which is pursued in the case of Ashtoreth, his female counterpart, leads to the conclusion that it was the *sun*.

In a certain sense every argument which goes to show that Ashtoreth was the moon is also, on account of the close conjunction between her and Baal, as valid a reason for Baal being the sun; for the two gods are such exact correlates that the discovery of the true meaning of the one would lead, by the force of analogy, to that of the other. Nevertheless, as has been already observed in the article ASHTORETH, it must be admitted that the astrological view did subsequently prevail, and that the planets Jupiter and Venus became mysteriously connected with some modification of the same powers which were primarily worshiped under the cosmogonical ideas of Bel and Mylitta, sun and moon. This relation between Baal and the planet Jupiter is noticed in the article Gad. For the relation between Baal and Moloch, and that between Baal and Melkarth, the Tyrian Hercules, see MOLECH and HERAKLES.

(2) **Baal Berith**, *covenant-lord* (Judg. ix:4), is the name of a god worshiped by the people of Shechem (Judg. viii:33; ix:4, 46), who, on account of the signification of the name, has been compared to the *Zeus Horkeos*, guardian of oaths, *Zeus' Opktos* of the Greeks and the Latin *Deus Fidius*.

(3) **Baal Peor**, or sometimes only *Peor*, respectively represented in the Sept. by *Beelphegor*, and *Phogor*, appears to have been properly the idol of the Moabites (Num. xxv:1-9; Deut. iv:3; Josh. xxii:17; Ps. cvi:28; Hos. ix:10); but also of the Midianites (Num. xxxi:15, 16).

It is the common opinion that this god was worshiped by obscene rites; and, from the time of Jerome downwards, it has been usual to compare him to Priapus. Selden and J. Owen (*De Diis Syriis*, i:5; *Theologoumena*, v:4) seem to be the only persons who have disputed whether any of the passages in which this god is named really warrant such a conclusion. The utmost that these passages express is the fact that the Israelites received this idolatry from the women of Moab, and were led away to eat of their sacrifices (cf. Ps. cvi:28); but it is very possible for the sex to have been the means of seducing them into the adoption of their worship, without the idolatry itself being of an obscene kind.

(4) **Baalzebub**, *Fly-lora*, occurs in 2 Kings i:2-16, as the god of the Philistines at Ekron, whose oracle Ahaziah sent to consult. There is much diversity of opinion as to the signification of this name, according as authors consider the title to be one of honor, as used by his worshipers, or one of contempt.

The analogy of classical idolatry would lead us to conclude that all these Baals are only the same god under various modifications of attributes and emblems; but the scanty notices to which we owe all our knowledge of Syro-Arabian idolatry do not furnish data for any decided opinion on this subject. The name was so obnoxious to the Jews in later times that *bōsheth*, shame, was frequently substituted for it (see ISH-BOSHETH). Thus we get

Ishbosheth, Mephibosheth for Ishbaal, Meribbaal. (Hastings' *Bib. Dict.*)

BAAL (bā'al), (Heb. בַּאֵל, *bah'al*, master, possessor).

1. A Reubenite, descendant of Beerah (B. C. 1300), who was carried off by the Assyrian Tiglath-Pileser (1 Chron. v:5).

2. Grandfather of Saul (1 Chron. viii:30; ix:36), B. C. 1180.

3. (Heb. as above). This word is often found as the first element of compound names of places. In this case, Gesenius thinks that it seldom, if ever, has any reference to the god of that name; but that it denotes the place which *possesses*, which is the *abode* of the thing signified by the latter half of the compound—as if it was a synonym of *beth* (2 Kings i:8; Gen. xxviii:19). The best support of this opinion is the fact that *baal* and *beth* are used interchangeably of the same place; as Baalshalisha and Baaltamar are called by Eusebius Bethshalisha and Bethtamar.

BAALAH (bā'al-āh), (Heb. בַּאֵל־אָה, *bah-al-aw'*, mistress).

1. Another name for Kirjath-jearim (Josh. xv:9, 10), and for Baale of Judah (2 Sam. vi:2), and for Kirjath-Baal in Judah (Josh. xv:60; xviii:14). (See KIRJATH-JEARIM; BAAL JUDAH; KIRJATH BAAL).

2. A place in Judah (Josh. xv:29), the same as Balah (xix:3), and Bilhah (1 Chron. iv:29); now *Deir-el-Belah*, near Gaza.

3. A mountain (Josh. xv:11). Either the same as No. 1, or possibly a mountain in the northwestern part of Judah.

BAALATH (bā'al-āth), (Heb. בַּאֵל־אֶתְחָ, *bah-al-awth'*), a town in the tribe of Dan (Josh. xix:44), apparently the same that was afterwards rebuilt by Solomon (1 Kings ix:18). Many have conjectured this Baalath to be the same as Baalbek; but in that case it must have lain in northernmost Dan, whereas the possession of it is ascribed to that tribe when its territory was wholly in the south of Judah, and many years before the migration (recorded in Judg. xviii) which gave Dan a northern territory. Correspondingly, Josephus places the Baalath of Solomon (which he calls *Baleth*) in the southern part of Palestine, near to Gazara (*Antiq.* viii:2), within the territory which would have belonged to Dan, had it acquired possession of the lands originally assigned to it. The Talmud affirms that Baalath lay so near the line of separation between Dan and Judah that the fields only were in the former tribe, the buildings being in the latter.

BAALATH-BEER (bā'al-āth-bē'er), (Heb. בַּאֵל־אֶתְחָ־בֵּיר, *bah-al-ath' beh-ayr'*, holy well, Baal of the well), probably the same as the Baal of 1 Chron. iv:33—a city of Simeon; called also Ramath-Negeb, or Southern Ramath (Josh. xix:8; Comp. 1 Sam. xxx:27).

BAALBEK or BAALBEC (bā'al-bek).

(1) **Baalbek**, in the Syrian language, signifies *the city of Baal*, or of the sun; and, as the Syrians never borrowed names from the Greeks, or translated Greek names, it is certain that when the Greeks came into Syria they found the place bearing this name or some other signifying 'city of the sun,' since they termed it Heliopolis, which is doubtless a translation of the native designation.

If this should not seem satisfactory, we may conclude that *Baal* was so common an element in the composition of proper names, that it is not sufficiently distinctive to bear the stress of such an interpretation; and may rather take it to signify

(as Gesenius says it always does in geographical combinations) the place where a thing is found. According to this view Baal-gad would mean *the place of Gad*. Now Gad was an idol (Is. lxv:11), supposed to have been the god or goddess of good fortune (Vulg. *Fortuna*), and identified by the Jewish commentators with the planet *Jupiter* (see GAD).

Its origin appears to be lost in the most remote antiquity, and the historical notices of it are very scanty.

(2) **Situation**. Baalbek is pleasantly situated on the lowest declivity of Anti-Libanus, at the opening of a small valley into the plain El-Bekaa. Through this valley runs a small stream, divided into numberless rills for irrigation. The place is in N. lat. 34 deg. 1 min. 30 sec., and E. long. 36 deg. 11 min. distant 109 geog. miles from Palmyra, and 38¾ from Tripoli. In the absence of more positive information we can only conjecture that its situation on the high-road of commerce between Tyre, Palmyra, and the farther East, must have contributed largely to the wealth and magnificence which it manifestly attained.

(3) **Heliopolis**. It is mentioned under the name of Heliopolis by Josephus (*Antiq.* xiv:3, 4), and also by Pliny (*Hist. Nat.* v:22). Two Roman inscriptions of the time of Antoninus Pius give sanction to the statement of John of Antioch, who alleges that this emperor built a great temple to Jupiter at Heliopolis, which was one of the wonders of the world (*Hist. Chron.* lib. xi). From the reverses of Roman coins we learn that Heliopolis was constituted a colony by Julius Cæsar; that it was the seat of a Roman garrison in the time of Augustus; and obtained the *Jus Italicum* from Severus. Some of the coins of later date contain curious representations of the temple.

After the age of Constantine the splendid temples of Baalbek were probably consigned to neglect and decay, unless indeed, as some appearances indicate, they were then consecrated to Christian worship. From the accounts of Oriental writers Baalbek seems to have continued a place of importance down to the time of the Moslem invasion of Syria. They describe it as one of the most splendid of Syrian cities, enriched with stately palaces, adorned with monuments of ancient times, and abounding with trees, fountains, and whatever contributes to luxurious enjoyment. On the advance of the Moslems, it was reported to the emperor Heraclius as protected by a citadel of great strength, and well able to sustain a siege.

(4) **Investments**. After the capture of Damascus it was regularly invested by the Moslems, and—containing an overflowing population, amply supplied with provisions and military stores—it made a courageous defence, but at length capitulated. Its importance at that period is attested by the ransom exacted by the conquerors, consisting of 2,000 ounces of gold, 4,000 ounces of silver, 2,000 silk vests, and 1,000 swords, together with the arms of the garrison. In the year 1400 it was pillaged by Timour Beg, in his progress to Damascus, after he had taken Aleppo. Afterwards it fell into the hands of the Metaweli—a barbarous predatory tribe, who were nearly exterminated when Djezzar Pasha permanently subjected the whole district to Turkish supremacy.

(5) **Ruins**. The ruins of Heliopolis lie on an eastern branch of the mountain, and are called, by way of eminence, the Castle. The most prominent objects visible from the plain are a lofty portico of six columns, part of the great temple, and the walls and columns of another smaller temple a little below, surrounded by green trees. There is also a singular and unique circular temple, if it

may be so called, of which we give a figure. These, with a curious column on the highest point within the walls (which may possibly have been a clepsydra, or water-dial), form the only erect portions of the ruins. These ruins have been so often and so minutely described by scores of travelers, as well as in many works of general reference, that, since their identification as a Scriptural site is uncertain, a few additional observations only may suffice. The ruins at Baalbek in the mass are apparently of three successive eras: first, the gigantic hewn stones, in the face of the plat-

Ruins of Heliopolis.

form or basement on which the temple stands, and which appear to be remains of older buildings, perhaps of the more ancient temple which occupied the site. Among these are at least twenty standing upon a basement of rough stones, which would be called enormous anywhere but here. These celebrated blocks, which in fact form the great wonder of the place, vary from 30 to 40 feet in length; but there are three, forming an upper course 20 feet from the ground, which together measure 190 feet, being severally of the enormous dimensions of 63 and 64 feet in length, by 12 in breadth and thickness (Addison's *Damascus and Palmyra*, ii:55). 'They are,' says Richter (*Wallfahrten*, p. 281), 'the largest stones I have ever seen, and might of themselves have easily given rise to the popular opinion that Baalbek was built by angels at the command of Solomon. The whole wall, indeed, is composed of immense stones, and its resemblance to the remains of the Temple of Solomon, which are still shown in the foundations of the mosque Es-Sakkara on Mount Moriah, cannot fail to be observed.' This was also pointed out by Dr. Richardson. In the neighboring quarries, from which they were cut, one stone, hewn out but not carried away, is of much larger dimensions than any of those which have been mentioned. To the second and third eras belong the Roman temples, which, being of and about the time of Antoninus Pius, present some of the finest specimens of Corinthian architecture in existence, and possess a wonderful grandeur and majesty from their lofty and imposing situation (Addison ii:57).

The present Baalbek is a small village to the east of the ruins, in a sad state of wretchedness and decay. It is little more than a heap of rubbish, the houses being built of mud and sun-dried bricks. (See BAAL-GAD; ON.)

BAAL-BERITH (bā'al-bē'rith), Heb. בַּעַל בְּרִית, *bah'al ber-eeth'*, Baal of the covenant), worshiped by the people of Shechem after the death of Gideon (Judg. viii:33; ix:4) as god of the covenant, i. e., protector and guardian of engagements. Called simply "the god Berith" (Judg. ix:46).

BAALE (bā'al-ē). See BAALI.

BAALE JUDAH (bā'al-ē jū'dah), (Heb. בְּרִיתֵי יְהוּדָה, *bah-al-ay' yeh-hoo-daw'*, lords of Judah), a city of Judah (2 Sam. vi:2). Probably the same as Baalah, 1. It was the old name of Kirjath-jearim. (See BAALAH; KIRJATH-JEARIM.)

BAAL-GAD (bā'al-gād), (Heb. בַּעַל גַּד, *bah-al-gawd'*, lord of fortune), a city 'in the valley of Lebanon, under Mount Hermon' (Josh. xi:17; xii:7). We are also informed that among those parts of Palestine which were unsubdued by the Hebrews at the death of Joshua, was 'all Lebanon towards the sun-rising, from Baal-gad, under Mount Hermon, unto the entering into Hamath' (Josh. xiii:5). This position of Baal-gad is not unfavorable to the conclusion which some have reached, that it is no other than the place which, from a temple that stood there consecrated to the sun, was called by the Greeks *Heliopolis*, i. e., city of the sun; and which the natives called and still call Baalbek, a word apparently of the same meaning. The honor of being identified with Baalbek has also been claimed for the Baalath which Solomon built or fortified; but this claim has already been disposed of (see BAALATH); and no weight is to be attached to the local traditions which claim Solomon as the founder of Baalbek, seeing that it is the practice of the natives to ascribe to that great king every grand ancient work of unknown date which the country contains. It is also to be observed that those who contend for Baalath, admit its possible identity with Baal-gad, and hence there are no conflicting claims to adjust. Even those who suppose the Baal-hamon of the Canticles (viii:11) to be Baalbek conceive that to be a later name for Baal-gad; and hence the only question that remains is, whether Baal-gad be not the more ancient name of the place afterwards known as Heliopolis and Baalbek. The most probable site is at *Ain Jedeideh*, 'the strong spring,' in this direction, near the road to Damascus. (R. C. Conder, *Hastings' Bib. Dict.*)

BAAL-GUR (bā'al-gur), same as Gur-Baal. We read in 2 Chron. xxvi:7, that 'the Lord assisted Uzziah against the Philistines, and against the Arabians that dwelt in Gur-Baal.' The Septuagint renders this and *the Arabians that dwelt above Petra*. It was doubtless some town of Arabia Petræa. (See GUR-BAAL.)

BAAL-HAMON (bā'al-hā'mon), (Heb. בַּעַל הַמּוֹן, *bah'al-haw-mone'*, Baal of multitude), a place where Solomon is said to have had a vineyard (Cant. viii:11). Rosenmüller conceives that if this Baal-Hamon was the name of a place that actually existed, it may be reasonably supposed identical with Baal-Gad, or Heliopolis; for Hamon may have been a corruption of Amon, the Hebrew way of pronouncing the Ammon of the Egyptians (see Nah. iii:8), whom the Greeks identified with Jupiter (*Bib. Geog.* ii, p. 253). There was a place called Hamon, in the tribe of Asher (Josh. xix:28), which Ewald thinks was the same as Baal-Hamon. The book of Judith (viii:3) places a Balamon (*Βαλαμών*) or Belamon (*Βελαμών*) in central Palestine, which suggests another alternative.

BAAL-HANAN (bā'al-hā'nan), (Heb. בַּעַל חַנּוּן, *bah'al-khaw-naw-naw'n'*, lord of grace).

1. An early king of Edom (B. C. 1500), son of Achbor, successor of Saul (Gen. xxxvi:38, 39; 1 Chron. i:49, 50).

2. A Gederite (B. C. 1015) royal overseer of the olive and sycamore trees in the low plains, under David (1 Chron. xxvii:28).

BAAL-HAZOR (bā'al-hā'zor), (Heb. בַּעַל הַצֹּר, *bah'al-kharw-tsore'*, Baal's village), the place where Absalom kept his flocks and held his sheep-shearing feast (2 Sam. xiii:23). The Targum makes it 'the plain of Hazor.' It is said to have been 'beside Ephraim,' not in the tribe of that name, but near the city called Ephraim which was in the tribe of Judah, and is mentioned in 2 Chron. xiii:19; John xi:54. This Ephraim is placed by Eusebius eight miles from Jerusalem on the road to Jericho; and is supposed by Reland to have been between Bethel and Jericho.

BAAL-HERMON (bā'al-hēr'mon), Heb. הַרְמוֹן בַּעַל, *bah'al-kher-mone'*, lord of Hermon). The Septuagint makes two names of this in 1 Chron. v:23, *Baal Ermone*, and in Judg. iii:3, where the original has 'Mount Baal-Hermon,' it has *Mount Hermon*. It seems to have been a place in or near Mount Hermon, and not far from Baal-gad, if it was not, as some suppose, the same place.

BAALI (bā'al-i), (Heb. בַּעַלִּי, *bah-al-ee'*, my master). "Thou shalt call me Ishi; and shalt call me no more Baali" (Hos. ii:16).

BAALIM (bā'al-īm). See BAAL.

BAALIS (bā'a-līs), (Heb. בַּעַלִּים, *bah-al-ee'*, in exultation), a king of the Ammonites, who sent Ishmael to kill Gedaliah, who governed the remnant of the Jews not carried captive to Babylon (Jer. xl:14).

BAAL-MEON (bā'ai-mē'on), (Heb. בַּעַל מְעוֹן, *bah'al meh-one'*, lord of dwelling. Num. xxxii:38; 1 Chron. v:8; otherwise Beth-Meon, Jer. xlviii:23, and Beth-Baal-Meon, Josh. xiii:17), a town in the tribe of Reuben beyond the Jordan, but which was in the possession of the Moabites in the time of Ezekiel (xxv:9). At the distance of two miles southeast of Heshbon, Burckhardt found the ruins of a place called *Myoun*, or (as Dr. Robinson corrects it) *Mai'n*, which is doubtless the same, although Eusebius makes the distance greater. It is named on the Moabite Stone (l:9), as built by Mesha.

BAAL-PERAZIM (bā'al-pēr'a-zīm or bā'al-perā'zim), (Heb. בַּעַל פְּרָצִים, *bah'al-per-aw-tseem'*, lord of breaches). This name, meaning 'places of breaches,' which David imposed upon a place in or near the valley of Rephaim, where he defeated the Philistines (2 Sam. v:20; Comp. 1 Chron. xiv:11; Is. xxviii:21), is important as being the only one with the prefix Baal of which we know the circumstances under which it was imposed.

BAAL-SHALISHA (bā'al-shāl'i-shá), (Heb. בַּעַל שָׁלִישָׁה, *bah'al-shaw-lee-shaw'*, lord of Shalisha, 2 Kings iv:42), a place in the district of Shalisha (1 Sam. ix:4). Eusebius and Jerome describe it as a city fifteen Roman miles north from Diospolis, near Mount Ephraim. The village *Kefr Thilth* preserves the name of Shalisha.

BAAL-TAMAR (bā'al-tā'mar), (Heb. בַּעַל תְּמָר, *bah'al-taw-marw'*, lord of the palm, a place near Gibeah, in the tribe of Benjamin, where the other tribes fought with the Benjamites (Judg. xx:33). Eusebius calls it *Bethamar*, thus affording an instance of that interchange of *Beth* and *Baal* which is also exemplified in the preceding article and in

Baal-Meon. It was connected with the palm of Deborah (Judg. iv:5), which was between Bethel and Ramah,—a position which might suit the notice of Baal-tamar, whence Gibeah was attacked.

BAALZEBUB (ba'al-zē'bub). See BEELZEBUB.

BAAL-ZEPHON (bā'al-zē'phon), (Heb. בַּעַל זֵפּוֹן, *bah'al-tsef-ohn'*, Baal of winter, or north), a town belonging to Egypt, on the border of the Red Sea (Exod. xiv:2; Num. xxxiii:7). Nothing is definitely known of the situation of Baal-zephon; and whatever conjectures may be formed respecting it must be connected with a consideration of the route taken by the Israelites in leaving Egypt, for it was 'over against Baal-zephon' that they were encamped before they passed the Red Sea. It has been placed on the north shore of Egypt by Brugsch, who identifies it with Mt. Casius; about the middle of the present Isthmus, on some hill like Shekh Ennedek (Naville); at Jebel Atakah, or a spot on the east side of the modern canal nearly opposite fort Ajrud. The conjectures of Ebers (*Durch Gosen zum Sinai*, p. 570) that Phœnician sailors propitiated the god of the north wind when starting southwards on a voyage down the Gulf of Suez is a plausible one (A. T. Chapman, *Hasting's Bib. Dict.*)

BAANA (bā'a-nà), (Heb. בַּעַנָּא, *bah-an-aw'*, son of affliction, patient).

1. Son of Ahilud, officer of Solomon (1 Kings iv:12), B. C. 1015.

2. Father of Zadok, who helped to repair the wall of Jerusalem (B. C. 470) after the captivity (Neh. iii:4).

BAANAH (bā'a-nah), (Heb. as in Baana, of which this is another form).

1. A son of Rimmon, the Beerothite. He, with his brother Rechab, slew Ishbosheth while he lay in his bed, and took the head to David in Hebron. For this David caused them to be put to death, their hands and feet to be cut off, and their mutilated bodies to be hung up over the pool at Hebron (2 Sam. iv:2-12), B. C. about 992.

2. A Netophathite (B. C. 1075), one of David's mighty men (2 Sam. xxiii:29; 1 Chron. xi:30).

3. Son of Hushai (B. C. 1012), an officer of Solomon (1 Kings iv:16).

4. One of those who returned (B. C. 536), with Zerubbabel from captivity (Ezra ii:2; Neh. vii:7).

BAARA (bā'a-rà), (Heb. בַּעֲרָא, *bah-ar-aw'*, brutish, or a wood, daughter of the fresh), one of the wives of Shalisha, of the tribe of Benjamin (1 Chron. viii:8). In the next verse, by some mistake, she is called Hodesh.

BAASEIAH (bā'a-sē-yà), (Heb. בַּעֲשֵׂיָהּ, *bah-as-ay-yaw'*, work of Jehovah), a Gershonite Levite, forefather of Asaph the singer (1 Chron. vi:40), B. C. about 1310.

BAASHA (bā'a-shà), (Heb. בַּעֲשָׂא, *bah-shaw'*, offensiveness, valor), son of Ahijah, of the tribe of Issachar, third king of Israel, and founder of a dynasty, was probably of common birth (1 Kings xvi:2), but rose to the throne by his slaughter of Nadab, king of Israel, and all his family while the king was besieging Gibbethon, a city of the Philistines (1 Kings xv:27). By this cruel act he undesignedly fulfilled the prophecy respecting Jeroboam's posterity (1 Kings xiv:10). He followed in the wicked ways of Jeroboam, and was visited with the most fearful judgments of God. The warning he received of the consequences of his conduct (1 Kings xvi:1-5) did not induce him to

forsake his evil courses. He attempted to fortify Ramah, but was compelled to desist by the attack of Ben-hadad at Asa's prompting (1 Kings xv:16-21; 2 Chron. xvi:1-6). He reigned twenty-four years, B. C. 911-888. His reign was filled with war and treachery. For his sins and idolatries the prophet Jehu declared to him the determination of God to exterminate his family, which was accomplished in the days of his son Elah, by Zimri (1 Kings xvi:3-13).

BABEL, TOWER OF (bā'bel, tou'ēr öv), (Heb. בָּבֶל, *baw-bel'*, gate of God). After the flood, we are told in Genesis (chap. xi) that men journeyed from the East until they came to the plain of Shinar, where they built the tower of Babel, in the vain hope of ascending into heaven. God, however, confounded their language and scattered them over the face of the earth.

(1) **Confusion of Tongues.** The references in this narrative to Shinar and Babel, or Babylon, indicate that here again we may expect to find a Babylonian account of the Confusion of Tongues, just as we have found a Babylonian account of the Deluge. As we have seen, the Accadians regarded themselves as having come from the 'mountain of the east' where the ark had rested, while Shinar is the Hebrew form of the native name Sumir—or Sungir, as it was pronounced in the allied dialect of Accad—the southern half of pre-Semitic Babylonia. Now Mr. George Smith discovered some broken fragments of a cuneiform text which evidently related to the building of the Tower of Babel. It tells us how certain men had 'turned against the father of all the gods,' and how the thoughts of their leader's heart 'were evil.' At Babylon they essayed to build 'a mound' or hill-like tower, but the winds blew down their work, and Anu 'confounded great and small on the mound,' as well as their 'speech,' and 'made strange their counsel.' The very word that is used in the sense of 'confounding' in the narrative of Genesis is used also in the Assyrian text. The Biblical writer, by a play upon words, not uncommon in the Old Testament, compares it with the name of Babel, though etymologically the latter word has nothing to do with it. Babel is the Assyrian Babili, 'Gate of God,' and is merely a Semitic translation of the old Accadian (or rather Sumirian) name of the town, Ca-dimira, where Ca is 'gate' and dimira 'God.' Chaldean tradition assigned the construction of the tower and the consequent confusion of languages to the time of the autumnal equinox; and it is possible that the hero-king Etanna ('Titan in Greek writers), who is stated to have built a city in defiance of the will of heaven, was the wicked chief under whom the tower was raised (Sayce, "*Fresh Light from the Ancient Monuments*").

(2) **Tradition.** Plato also reports a tradition that, in the golden age, men and animals made use of one common language, but too ambitiously aspiring to immortality, were, as a punishment, confounded in their speech by Jupiter. In the details of the story of the war of the Titans against the gods may also be traced some traditional resemblance to the narrative of the Bible. 'The Sibyl,' says Josephus (*Antiq.* i:4), 'also makes mention of this town, and of the confusion of language, when she says thus: "When all men were of one language, some of them built a high tower as if they would thereby ascend up to heaven, but the gods sent storms of wind and overthrew the tower, and gave everyone his peculiar language, and for this reason it was that the city was called Babylon."'

(3) **Sacred Narrative.** The sacred narrative (Gen. xi:4) assigns as the reason which prompted men to the undertaking, simply a desire to possess a building so large and high as might be a mark and rallying point in the vast plains where they had settled, in order to prevent their being scattered abroad, and thus the ties of kindred be rudely sundered, individuals be involved in peril, and their numbers be prematurely thinned at a time when population was weak and insufficient.

Such an attempt agrees with the circumstances in which the sons of Noah were placed, and is in itself of a commendable nature. But that some ambitious and unworthy motives were blended with these feelings is clearly implied in the sacred record, which, however, is evidently conceived and set forth in a dramatic manner (ver. 6, 7) and may wear around an historical substance somewhat of a poetical dress.

(4) **Identification.** After the lapse of so many centuries, and the occurrence in 'the land of Shinar' of so many revolutions, it is not to be expected that the identification of the Tower of Babel with any actual ruin should be easy, or lead to any very certain result. (See article on "*Babylonian Cities*," by Hormuzd Rassam, Esq., *Jour. of Trans. of the Victoria Inst.*, vol. xvii, April 16, 1883, p. 221 sq.)

From the Holy Scriptures it appears that when Nebuchadnezzar conquered Jerusalem and leveled most of the city with the ground, 'he brought away the treasures of the temple, and the treasures of the king's house, and put them all into the temple of Bel at Babylon.' The brazen and other vessels which Solomon had caused to be made for the service of Jehovah are said to have been broken up by order of the Babylonian monarch, and formed into the famous gates of brass which so long adorned the superb entrances into the great area of the temple of Belus.

(5) **Its Purpose.** The purposes to which this splendid edifice was appropriated may have been partly gathered from the preceding statements. These purposes varied in some degree with the changes in opinions and manners which successive ages brought. The signal disappointment inflicted on its original founders shows that even in its origin there was connected with it something signally displeasing to God. It seems, indeed, always to have existed in derogation of the Divine glory. Consecrated at the first, as it probably was, to the immoderate ambition of the monotheistic children of the Deluge, it passed to the Sabæan religion and thus falling one degree from purity of worship, became a temple of the sun and the rest of the host of heaven, till, in the natural progress of corruption, it sank into gross idolatry; and, as the passage from Herodotus shows, was polluted by the vices which generally accompanied the observances of heathen superstition. In one purpose it undoubtedly proved of service to mankind. The Babylonians were given to the study of astronomy. This ennobling pursuit was one of the peculiar functions of the learned men, denominated by Herodotus, Chaldæans, the priests of Belus; and the temple was crowned by an astronomical observatory, from the elevation of which the starry heavens could be most advantageously studied over plains so open and wide, and in an atmosphere so clear and bright, as those of Babylonia.

To Nimrod the first foundation of the tower is ascribed: Semiramis enlarged and beautified it, but it appears that the temple of Bel, in its most renowned state, was not completed till the time of Nebuchadnezzar, who, after the accomplishment of his many conquests, consecrated this superb edifice to the idolatrous object to whom he ascribed

his victories. That the observatory on the tower was erected in remote times, there is good reason to believe. Prideaux mentions the circumstance that when Alexander made himself master of Babylon, Calisthenes, the philosopher, who attended him thither, found astronomical observations ascending upwards 1900 years.

(6) **Appearance.** The appearance of the tower is deeply impressive, rising suddenly as it does out of a wide desert plain, with its rent, fragmentary and fire-blasted pile, masses of vitrified matter lying around, and the whole hill itself on which it stands caked and hardened out of the materials with which the temple had been built. Hormuzd Rassam says: "The vitrified portion of the tower of Belus has ever been a great mystery to me, and although I have been trying for the last three years to find out, through scientific gentlemen in this country, the cause of the vitrification, I have as yet found no one who could explain the mystery satisfactorily. Every traveler who visited the place could not help noticing the almost supernatural sight, but not one of them could come to any tangible conclusion as to the cause. Benjamin, of Tudela, goes so far as to assert that the 'heavenly fire which struck the tower split it to its very foundation;' and my late friend Mr. Loftus gives the opinion of a 'talented companion,' who originated the idea, when they examined the Birs Nimroud in company, that in order to render their edifices more durable, the Babylonians submitted them, when erected, to the heat of a furnace. The former authority does not tell us whether his assertion was based upon his own conjecture, or that he quoted a tradition which existed then in the country when he visited the town about seven hundred years ago. As for the opinion of the latter, it cannot hold water, because it is against common sense that a huge tower like that of Birs Nimroud could be subjected to artificial heat after it was built. The tower must have been originally at least two hundred feet high; and to build a furnace to envelop it would be just like trying to cover a solid mass equal in size to the whole dome of St. Paul's Cathedral with one huge furnace, and subjecting it to artificial heat for the purpose of vitrifying it. Indeed, there is no visible sign of vitrification on any part of the remaining edifice, but the huge vitrified bowlders are scattered about the tower, and look as if they do not belong to the place at all. Some of these must be between ten and fifteen feet square; and the vitrification is so complete throughout that, when I tried to have a large piece broken to bring to the British Museum, I failed to do so until I obtained the services of a competent mason, who managed to break me two pieces, after having blunted half-a-dozen of his iron tools." (*Jour. of Transactions of the Victoria Inst., vol. xvii, Apr. 16, 1883, pp. 235, 236.*)

A very considerable space round the tower, forming a vast court or area, is covered with ruins, affording abundant vestiges of former buildings; exhibiting uneven heaps of various sizes, covered with masses of broken brick, tiles and vitrified fragments—all bespeaking some signal overthrow in former days. The towerlike ruin on the summit is a solid mass 28 feet broad, constructed of the most beautiful brick masonry. It is rent from the top nearly halfway to the bottom. It is perforated in ranges of square openings. At its base lie several immense unshapen masses of fine brick work—some changed to a state of the hardest vitrification, affording evidence of the action of fire, which seems to have been the lightning of heaven.

The base of the tower, at present, measures 2,082 feet in circumference. Hardly half of its former

altitude remains. From its summit, the view in the distance presents to the south an arid desert plain; to the west the same trackless waste; towards the northeast marks of buried ruins are visible to a vast distance.

(7) **Bricks.** The bricks which compose the tower are mostly stamped with several lines of inscription, in the Cuneiform or Babylonian character. Some extend to four or even seven lines, but the dimensions of all are the same. The bricks of Babylon are of two kinds, sun-dried and fire-burnt. The former are larger and of a coarser make than the latter; their solidity is equal to that of the hardest stone. They are composed of clay mixed with chopped straw or broken reeds, in order to increase their compactness. This is the sort of brick which the children of Israel made while in Egyptian bondage. The unburnt bricks commonly form the interior or mass of a building. This is the case with the great tower, while it was faced with the more beautiful fabric made in the furnace or kiln.

BABYLON (băb'y-lon), (Gr. Βαβυλών, *bab-u-lohn'*; (Heb. בָּבֶל, *bā-bel*, Babel, meaning confusion of tongues (Gen. xi:1-9).

1. **Name.** The biblical account ascribes its foundation to the descendants of Cush and followers of Nimrod (Gen. xi:2-9) who came from the east and settled in the plain of Shinar. This statement distinguishes the people who founded the city from the Semitic race who afterward possessed it. All that we have been able to learn of the city and its history points strongly to the same view. The Babylonians called the city *Bāb-ilī*, gate of god, and *Bāb-ilāni*, gate of the gods. In the Sumerian inscriptions (see BABYLONIA) it is called *Ka-din-gira*, gate of god; *Tin-tir*, seat of life; *Shuanna*, and *E-ki*. In Daniel iv:30 the place is appropriately termed 'Babylon the Great;' and by Josephus (*Antiq. viii:6*) *the Great Babylon*. It was the metropolis of the province of Babylon and of the Babylonio-Chaldaeian empire.

2. **Situation and Appearance.** The city was located on the Euphrates (Jer. xiii:4, 5, 7; xlvi:2, 6), *the great stream*, which corresponds to the name given in Gen. xv:18, etc. Two walls surrounded it. The outer one was said to have been built by Belus and repaired by Nebuchadnezzar. Babylon was laid out in the form of a square. The length of the wall surrounding it is variously given by historians. Ctesias makes it 360 furlongs in circumference; Quintus Curtius, 385; Strabo, 385; and Herodotus, 480. It was between 60 and 70 feet high (Sir Henry Rawlinson) and wide enough at the top for a four-horse chariot to turn around. These defenses were remarkable in strength for the times, and one of the greatest evils foretold by Jeremiah was their destruction (Jer. li:58). The cuneiform inscriptions do not sustain the account given by the classical writers of the height of the walls and the extent of the city.

3. **Nebuchadnezzar.** In the India House, London, is the large inscription of Nebuchadnezzar which is the chief authority regarding the structures of Babylon. From this we learn that Nebuchadnezzar filled the city with temples and public buildings. Among the ruins are countless numbers of bricks bearing the name of this king, which supports the statements of the inscription and of the Book of Daniel that Nebuchadnezzar was a builder-king. From the fallen towers of Babylon have arisen not only all the present cities in its vicinity, but others which, like itself, have long since gone down into the dust. Since the days of Alexander four capitals, at least have

been built out of its remains—Seleucia by the Greeks, Ctesiphon by the Parthians, Al Maidan by the Persians, and Kufa by the Caliphs; with towns, villages, and caravansaries without number. The necessary fragments and materials were transported along the rivers and the canals. The river ran through the city from north to south, and on each side was a quay of the same thickness as the

Brick Bearing the Name of Nebuchadnezzar.

walls of the city, and 100 stadia in length. In these quays were gates of brass, and from each of them steps descending into the river. A bridge was thrown across the river, of great beauty and admirable contrivance, a furlong in length and 30 feet in breadth. As the Euphrates overflows during the summer months, through the melting of the snows on the mountains of Armenia, two canals were cut to turn the course of the waters into the Tigris, and vast artificial embankments were raised on each side of the river.

4. Palace of Nebuchadnezzar. The palace built by Nebuchadnezzar was prodigious in size and superb in embellishments. Its outer wall embraced six miles; within that circumference were two other embattled walls, besides a great tower. Three brazen gates led into the grand area, and every gate of consequence throughout the city was of brass. In accordance with this fact are the terms which Isaiah (xlv:1, 2) employs when, in the name of Jehovah, he promises Cyrus that the city should fall before him. 'I will open before him the two-leaved gates; I will break in pieces the gates of brass'—a prophecy which was fulfilled to the letter when Cyrus made himself master of the place in the dead of the night. Having first by means of its canals turned the river into the great dry lake west of Babylon, and then marched through the emptied channel, he made his way to the outer walls of the fortified palace on its banks; when finding the brazen gates incautiously left open by the royal guards while engaged in carousals, he entered with all his train; 'the Lord of Hosts was his leader,' and Babylon, as an empire, was no more.

The palace was splendidly decorated with statues of men and animals, with vessels of gold and silver, and furnished with luxuries of all kinds brought thither from conquests in Egypt, Palestine, and Tyre. Its greatest boast were the hanging gardens, which acquired even from Grecian writers the appellation of one of the wonders of the world. They are attributed to the gallantry of Nebuchadnezzar, who constructed them in compliance with a wish of his queen, Amytis, to possess elevated groves such as she had enjoyed on the hills around her native Ecbatana.

Babylon was all flat; and to accomplish so

extravagant a desire an artificial mountain was reared, 400 feet on each side, while terraces one above another rose to a height that overtopped the walls of the city, that is, above 300 feet in elevation. The ascent from terrace to terrace was made by corresponding flights of steps, while the terraces themselves were reared to their various stages on ranges of regular piers, which, forming a kind of vaulting, rose in succession one over the other to the required height of each terrace, the whole being bound together by a wall of 22 feet in thickness. The level of each terrace or garden was then formed in the following manner: the top of the piers was first laid over with flat stones, 16 feet in length and 4 feet in width; on these stones were spread beds of matting, then a thick layer of bitumen; after which came two courses of bricks, which were covered with sheets of solid lead. The earth was heaped on this platform; and in order to admit the roots of large trees, prodigious hollow piers were built and filled with mold. From the Euphrates, which flowed close to the foundation, water was drawn up by machinery. The whole, says Q. Curtius (v:5), had, to those who saw it from a distance, the appearance of woods overhanging mountains. Such was the completion of Nebuchadnezzar's work when he found himself at rest in his house, and flourished in his palace. The king spoke and said, 'Is not this great Babylon that I have built for the house of the kingdom by the might of my power, and the honor of my majesty?' (Dan. iv:30), a picture which is amply justified by the descriptions of heathen writers. Nowhere could the king have taken so comprehensive a view of the city he had so magnificently constructed and adorned as when walking on the highest terrace of the gardens of his palace.

The remains of this palace are found in the vast mound or hill called by the natives Kasr. It is of irregular form, 800 yards in length and 600 yards in breadth.

5. Impure Worship. In Babylon were performed the rites of the lunar deity, who was worshiped by the Persians and the Chaldæans under the names of Mylitta and Abytta, or Araitas and Aranus. According to Maimonides, this Babylonish deity had numerous bands of young women devoted to her service; and here is seen a priestess introducing a virgin to her temple to receive the benediction of the priests. These dedicated females, Herodotus says, sat once in their lives in the shrine of Venus, their heads bound with garlands and their bodies with cords. Thus exposed, when strangers threw gold into their laps, they were obliged to retire with them into the temple, where their charms were subjected to its impure rites. The money was then laid on the altar to be consecrated to the goddess. These outrages seem to be referred to by Moses in the law, when he says, 'Thou shalt not bring the hire of a harlot into the house of the Lord thy God.'

6. Corrupt Morals. Babylon, as the center of a great kingdom, was the seat of boundless luxury, and its inhabitants were notorious for their addiction to self-indulgence and effeminacy. Q. Curtius (v:1) asserts that, 'nothing could be more corrupt than its morals, nothing more fitted to excite and allure to immoderate pleasures. The rites of hospitality were polluted by the grossest and most shameless lusts. Money dissolved every tie, whether of kindred, respect, or esteem. The Babylonians were very greatly given to wine, and the enjoyments which accompany inebriety. Women were present at their convivialities, first with some degree of propriety, but, growing worse and worse by degrees, they ended by throwing off

at once their modesty and their clothing.' On the ground of their awful wickedness the Babylonians were threatened with condign punishment, through the mouths of the prophets; and the tyranny with which the rulers of the city exercised their sway was not without a decided effect in bringing on them the terrific consequences of the Divine vengeance. Nor in the whole range of literature is there anything to be found approaching to the sublimity, force, and terror with which Isaiah and others speak on this painful subject (Is. xiv:11; xlvi:1; Jer. li:39; Dan. v:1).

7. History. Babylonian history, so far as we can go back, begins about 3800 B.C. with Sargon I, king of Agade.

(1) **Sargon.** This date is fixed by their own inscriptions, and since they were a nation of astronomers and observers of eclipses, sun-spots, and the phases of the moon, we can rely quite accurately on their dates. Nabonidus, who was king of Babylon about 554 B.C., was an archæologist and enthusiastic student of antiquity. He sought and found the foundation stone of the temple of the Sun-god. The literal translation of the inscription containing the announcement of his discovery is as follows: "That temple I excavated, its ancient foundation stone I sought, fifteen square cubits. I dug down (for) the foundation stone of Naram Sim, the son of Sargon, which for three thousand two hundred years no king, my predecessor, had found." This date added to 554 B.C., the date of King Nabonidas, takes us back to about 3800 B.C. The inscription of this very King Sargon was found at Sepharvaim by Hormuzd Rassam. The writing was on a small perforated hard stone of a mottled, pinkish-gray color and in the form of the very earliest known, and reads: "I, Sargon, the king, king of Agade, to the Sun-god (Samas) in Sippara have dedicated." There must of course have been kings before Naram-Sim and his father Sargon, and centuries which cannot be computed must have passed before the Babylonians had reached the high state of culture and civilization necessary to enable them to produce such an object as that described above; for the stone is most beautifully drilled and polished and the characters are carefully and remarkably well executed' (E. A. Wallis Budge, M.A., *Babylonian Life and History*, p. 40, London, 1891).

(2) **Earlier Date.** But, while the general consensus of opinion among Assyriologists has been that accurate Babylonian chronology fairly begins with Sargon I, king of Agade, 3800 B.C., the discoveries of the American expedition at Nippur or Niffer (see CALNEH) give us a much earlier date. Prof. H. V. Hilprecht found the fragments of pre-Sargonic times in which are narrated the achievements of En-shag-shur-ana in defending Kengi, the ancient name for Babyionia, from the enmity of the city of Kish. The capital of this early kingdom was probably the city of Erech (Gen. x:10). (See ERECH). The period of his reign was probably 5000 B.C. He was followed by other kings, among them Ur-Shulpaddu and Lugalzaygisi, the latter being the Alexander of his time (B.C. about 4500). (See Hilprecht, *The Babylonian Expedition of the University of Pennsylvania. Part II.*)

(3) **Ur-Bagas.** Of Nimrod, the grandson of Ham and the great-grandson of Noah (Gen. x:6, 10), in whose time, according to Scripture, the kingdom was established, no trace has been found in the Babylonian records. The most important kings after Naram-Sim were Ur-Bagas, who built many temples, and Dungi. The next line of kings came from Karrak, and they were followed by several viceroys. Later Simti-Sillah, an Elamite

from Larsa, was ruler, and was succeeded by his son Kudur-Mabug, and his grandson Rim-Agu.

(4) **Hammurabi.** These last two were defeated in about 2100 B. C. by Hammurabi, who was possibly a Kassite, and he became master of Babylon. Under him the kingdom prospered in all departments. It must have been at this period that Abraham made his departure from Ur of the Chaldees (see ABRAHAM). Hammurabi was followed by a long list of kings who have left no details of their reigns. A tablet has been found containing the names of about a hundred kings, but it is difficult to arrange their chronological order. Those ruling after the commonly accepted date of the flood are given, and the names are all Semitic in form.

Stone Object Containing an Inscription of Nebuchadnezzar I, Recording a Grant of Privileges to Ritti-Marduk, King of Bit-Karziyabku.

(5) **A Kassite Dynasty.** About 1700 B. C. a Kassite dynasty was established at Babylon. In 1450 B. C. a king called Kara-Indas made a treaty with the Assyrian king regarding the boundaries of their empires, as did also the next king, Burna-

Burgas. This ruler was called king of Gaddunigas, which some have identified with the Garden of Eden. About 1330 B. C. the Assyrian empire began to assert itself and a little later conquered Babylon, under Tukulti Ninipi. The next Babylonian king was apparently Belzakir-iskun, in whose reign the Elamites made several fierce attacks upon Babylonia.

(6) **Nebuchadnezzar I.** It was at this time that Nebuchadnezzar I. came to the Babylonian throne and made three wars against the Assyrians. In the last conflict he was defeated, and Tiglath-Pileser I. of Assyria completed the conquest of Babylon, marching against Nebuchadnezzar's successor, Marduk-nadin-ahi.

About this time the Jewish nation was rising in the west, but none of the surrounding nations were strong enough to oppose her, after David's defeat of Hadar-ezer, King of Zobah. Babylon at this time and until about 730 B. C. was in a perpetual conflict with Assyria, which gradually weakened her power until the Assyrians were absolute masters.

(7) **Merodach-Baladan.** But Merodach-Baladan, or Marduk-pal-iddina now began to reign and solicited aid from Hezekiah to oppose Sargon II. of Assyria. Hezekiah, however, did not support the Babylonian monarch, who was defeated together with Elamite allies. In 705 B. C. Sennacherib came to the Assyrian throne, who, it will be remembered, besieged Hezekiah in Jerusalem and captured many of the cities of Judah, sending away 200,150 prisoners into captivity. Under this king and his son, Esar-haddon, B. C. 680, Assyria became complete master of Babylon.

(8) **Nabopolassar.** About 609 B. C., Nabu-pol-usur (Nabopolassar) then king of Babylon made a league with Egypt and Media. After various conflicts they laid siege to Nineveh, captured it and completely sacked it. This was the end of the Assyrian dominion and Babylon again began to assert herself.

It was about this time that Josiah, king of Judah, made his courageous march against Egypt (2 Kings xxiii:29, 30).

(9) **Nebuchadnezzar the Great.** In the fourth year of Jehoiakim (Jer. xlvi:2), Nabopolassar of Babylon sent his son Nebuchadnezzar against Egypt; but news of his father's death brought him back to Babylon to receive the crown. He set at work the captive Jews, Syrians, and Egyptians to build huge walls and palaces, and to make Babylon the greatest city in the world. Judæa and Phœnicia now threw off his yoke. But he marched at once against Tyre and Jerusalem (2 Chron. xxxvi:6; 2 Kings xxiv:1-6). Jehoiakim, king of Judah, rebelled (2 Kings xxiv:1), but Nebuchadnezzar conquered and bound him and established Jeconiah in his place (2 Chron. xxxvi:6), whom he shortly carried off to Babylon, leaving Zedekiah as king (2 Kings xxiv:11-17). After thirteen years' siege Tyre probably yielded to the iron-willed Nebuchadnezzar, as its downfall was prophesied by Jer. (xxvii:3-6; and Ezek. xxvi). Before this event took place, however, Jerusalem rebelled, relying on Egypt for help (Jer. xxxvii:5-11; Ezek. xvii:15-20). Nebuchadnezzar again besieged Jerusalem (Jer. xxxvii:5), drove off the advancing Egyptians, and after two years took the city (Jer. lii:12). Zedekiah was captured, and after being deprived of his eyes, was carried to Babylon (Ezek. xii:13). Jerusalem was sacked, the temple destroyed and the greater part of the people deported (Jer. lii:12-30; 2 Kings xxv:8-12).

It was this Nebuchadnezzar who threw the three Hebrew children, or youths, into the fiery

furnace (Dan. iii:13-25), and who was so kind to the prophet Jeremiah. After having cast the three Hebrew children into the fiery furnace he had a dream in which he saw a vision that greatly troubled him. He called his astrologers and wise men, and asked them for an interpretation, which they were unable to give. Afterward Daniel was summoned into his presence, and was asked to declare the meaning and interpretation of the dream, which he did, showing the king that his dwelling should be with the beasts of the field, and that he should eat grass and be wet with the dew of heaven for seven years till he should know 'that the Most High ruleth in the kingdom of men, and giveth it to whomsoever He will.' This occurred one year after it was prophesied by Daniel. After this he extolled and honored God (Dan. iv). He died after a reign of 43 years.

Under Nebuchadnezzar Babylon reached the summit of her greatness and splendor. She was now the capital of the civilized world, and into her lap flowed, either through conquest or commerce, the wealth of almost all known lands. Justly, therefore, might the prophets call her *the great* (Dan. iv:30), *the praise of the whole earth* (Jer. li:41), *the beauty of the Chaldees' excellency* (Is. xliii:19), *the lady of kingdoms* (Is. xlvii:5), but also *the tender and delicate*, and *given to pleasures* (Is. xlvii:1, 8). Indeed, these last epithets are gentle, in comparison with the real state of the case; for, in consequence of the opulence and luxury of the inhabitants, the corruptness and licentiousness of manners and morals were carried to a frightful extreme. (See *New Light on the Bib. and Holy Land*, Basil T. A. Evetts.)

(10) **Nabonidus.** Amil-Marduk (Evil-Merodach of the Bible), followed his father, and about 556 B. C. Nabonidus came to the throne. He was the last king of the Babylonian empire. His son Belshazzar was master of the army; and he has become confused by writers with his father Nabonidus, because it was natural for foreigners to think that, as master of the army, he was king.

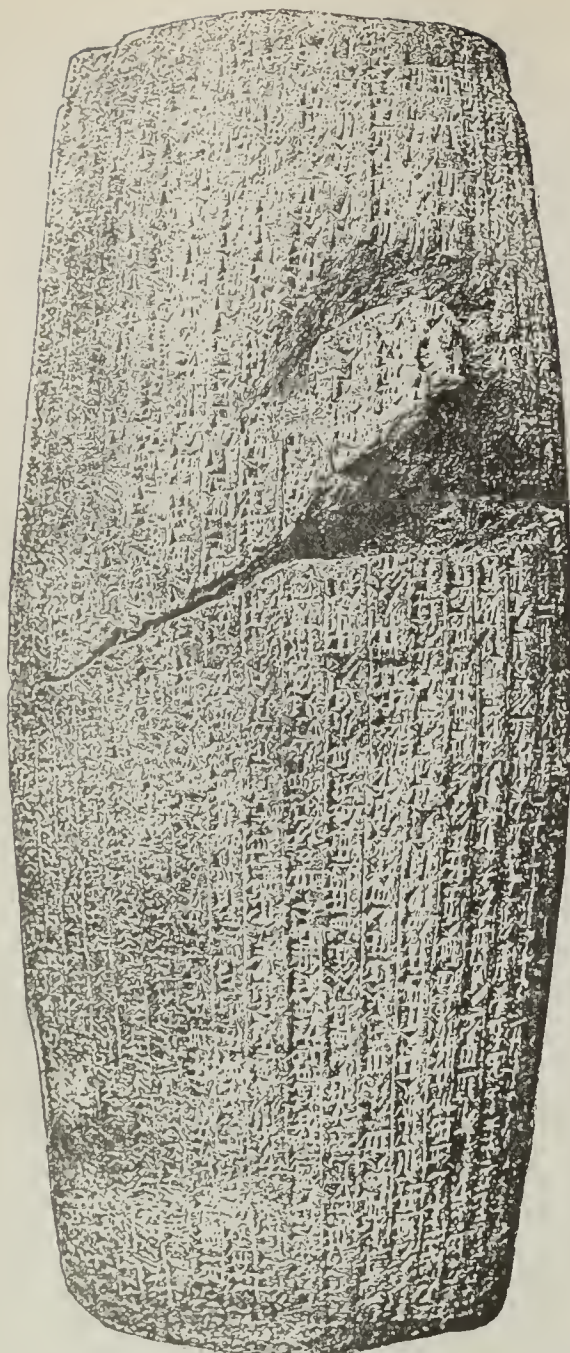

(11) **Capture of Babylon.** In the seventeenth year of Nabonidus (B. C. 539), Cyrus captured Babylon. The account in Daniel v has not yet been found mentioned on any of the records that have been recovered, but the accounts of Greek historians harmonize here with that of the Bible, that Cyrus entered Babylon on a night when the whole city, relying on the strength of the walls, had given themselves up to the riot and debauchery of a grand public festival.

Herodotus states that Cyrus had previously caused the *Pallacopas*, a canal which ran west of the city, and carried off the superfluous water of the Euphrates into the lake of Nitocris, to be cleared out, in order to turn the river into it; which, by this means, was rendered so shallow, that his soldiers were able to penetrate along its bed into the city.

But the cylinder record of Nabonidus, the vanquished king, (Nab.—Cyr. Chron. Col. i:12-24) does not mention such an incident. He states that "on the fourteenth day Sippar was taken without fighting. Nabonidus fled."

The Cylinder of Cyrus states that without clash or battle he (Merodach) made him (Cyrus) enter Babylon.

"In view of this direct testimony of two contemporaneous documents," says Dr. Ira Maurice Price (*The Monuments and the Old Testament*, p. 229) "we are forced to the conclusion that the story of Herodotus, that Cyrus diverted the waters

Terra-cotta Cylinder Containing the History of the Capture of Babylon by Cyrus the Great, King of Persia.

of the Euphrates from its channel and marched in under the unguarded gates of the river, cannot be true. It may refer to the later capture of Babylon by Darius in 516 B. C."

On the other hand, Mr. E. A. Wallis Budge (*Babylonian Life and History*, p. 88) maintains that while there is no mention of draining the river by Cyrus in the inscriptions, there is no reason why Cyrus should not have had recourse to this means as well as to fighting.

(12) **Decline.** After its capture, Babylon declined; for Cyrus made Susa the capital of his kingdom; and Babylon thus ceased to be the chief city of an independent state.

Under the rule of the Persians, Babylon fared moderately well. Cyrus earned the title of "My Shepherd" (Is. xlv:28; xlv:1), "Daniel prospered" (Dan. vi:28), the Jews were allowed to go up to Jerusalem, and the prophecies of Jeremiah were fulfilled (Jer. xxv:12; xxix:10; xxxiii:7-14). In 530 B. C. Cyrus was succeeded by Cambyses.

(13) **Darius Hystaspis.** An insurrection under Darius Hystaspis, the object of which was

to gain emancipation from Persian bondage, led that prince to punish the Babylonians by throwing down the walls and gates which had been left by Cyrus, and by expelling them from their homes. Xerxes plundered and destroyed the temple of Belus, which Alexander the Great would probably, but for his death, have restored. Under Seleucus Nicator the city began to sink speedily, after that monarch built Seleucia on the Tigris, and made it his place of abode. In the time of Strabo and Diodorus Siculus the place lay in ruins. Jerome, in the fourth century of the Christian era, learnt that the site of Babylon had been converted into a park or hunting-ground for the recreation of the Persian monarchs, and that, in order to preserve the game, the walls had been from time to time repaired.

Figurative. In the prophetic writings of the Apocalypse (xiv:8; xvi:19; xvii:5; xviii:2) Babylon stands for Rome, symbolizing Heathenism:—"Babylon is fallen, that great city, because she made all nations drink of the wine of the wrath of her fornication." This reference appears to have been derived from the practice of the Jews, who were accustomed to designate Rome, which they hated, by the opprobrious and not inappropriate name of Babylon.

This is also the sense given to Babylon in 1 Pet. v:13 by the fathers and many commentators; but others refer it to Babylon in Asia, since it is quite possible that Peter labored for a while in that city, where there was at that time a large Jewish colony. Another interpretation identifies Babylon with *Jerusalem*, i. e., with the Jerusalem which was false to its heavenly King. But in this view "Babylon is not the Jerusalem only of 'the Jews.' She is the great Church of God throughout the world when that Church becomes faithless to her true Lord and King" (Dr. William Milligan, *Com.*, Rev., ch. xvii; Barnes, *Bib. Dict.*).

II. Another Babylon lay in Egypt, south of Heliopolis, on the east bank of the Nile (Strabo, xvii:807). The Babylonians who had emigrated during the civil commotions between the two empires founded it (Diod. Sic. i:56; Josephus, *Ant.* ii:15, 1).

BABYLON—GERMAN EXPLORATIONS IN.

The recent work of German explorers on the site of ancient Babylon is producing rich results. The expedition began work in the spring of 1899 under the able leadership of Dr. Koldewey.

Two important points concerning ancient Babylon were already known; one of them is the location of the palace of Nebuchadnezzar, which is now called El Kasr, and the other was the great business center of the city which was connected with the Euphrates by a canal, enabling the merchants of Babylon to readily avail themselves of her extensive commerce by sea.

(1) **El Kasr.** At El Kasr, the site of the palace, the German explorers began their work by breaking through the massive circular wall which Ktesias says was eighty feet wide, and upon the top of whose great bulwark six chariots could be driven abreast.

Herodotus claimed that this wall was eighty-four feet wide and three hundred and thirty-six feet high. He also claimed that small one-story houses were built on the top of the wall on either side, and there was even then space enough between the houses to permit four chariots to drive abreast.

Herodotus has fared badly at the hands of modern critics, but in this instance the explorers found that this work of antiquity was even larger than he claimed. The outer, or retaining wall was twenty-three and a half feet thick and was made of baked bricks laid with asphalt. Inside of this there was a filling of sand and gravel which extended sixty-nine feet, and then the outer retaining wall, which was forty-four feet thick. The whole structure, therefore, was one hundred and thirty-six and a half feet wide. They also verified the statement of Diodorus to the effect that many of the bricks of the wall and its citadels were beautifully colored.

Dr. Koldewey was the first who succeeded in reconstructing any goodly portion of the many enameled fragments found here, and he has restored two of the lions which formed a frieze on both sides of the road. One of them is white with a yellow mane, and the other is yellow with a dark mane having a greenish appearance.

(2) *City of Babylon.* Behind this famous wall lay the buried ruins of Babylon, the city of Nebuchadnezzar, and also the city of Assur-bani-pal, the Assyrian king, for, as the tide of conquest swept backward and forward, the kings of Nineveh were often the kings of Babylon, while in some instances the situation was reversed.

Esar-haddon, the father of Assur-bani-pal, held his winter court at Babylon, and the dominion of the city and surrounding country was a part of his legacy to his son. This was the city which was "the lady of kingdoms," and the fame of her hanging gardens will ever live in the annals of history.

The excavators have already crossed the park surrounding the palace, and are now attacking the edifice in which Cyrus is supposed to have signed the edict authorizing the return of the Jews to their own land.

It is hoped that important documents may be found, for many a vault of hidden archives must be buried here. The favorite temple of Nebuchadnezzar has been uncovered, and here is a monument which is described as "the middle

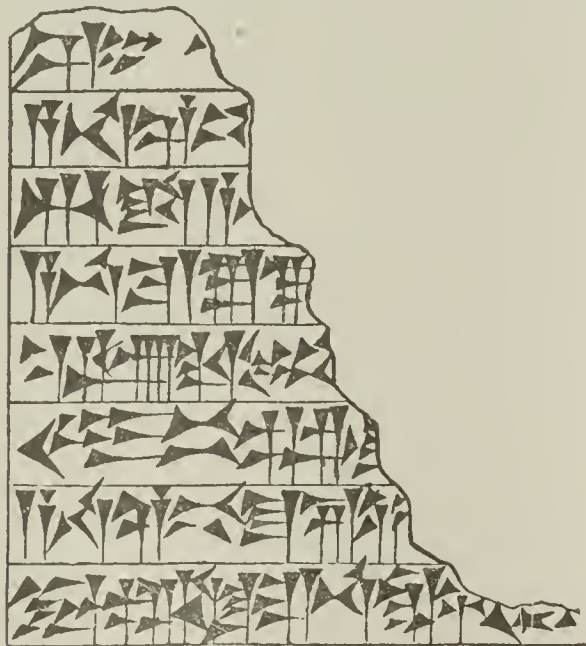

Euphrates, and this is identified as the east canal mentioned in inscriptions which had been previously found. It is thirty-nine feet wide.

(3) *Latest Report.* Under date of Feb. 10, 1900, Dr. Koldewey gives the latest information which we have so far obtained from his expedition. He says: "I have not found in any of the excavations, any *old* buildings or traces of them. There are some remains of the time of Nebuchadnezzar, such as the great Hittite stele, but wherever we dig, and we are now ten feet below the level of the Euphrates, we find seals of the time of Nebuchadnezzar, but nothing of more ancient date. The lowest that can yet be assigned is the lower part of the temple of Ishtar, which goes back to Sardanapalus (or Assur-bani-pal), and even around the cylinder of Sardanapalus, were the tablets of Nebuchadnezzar. It is probable that the old buildings will be found when we reach the southern part of the mound.

Figures from Engraved Cylinder Showing Babylonian Costumes.

It seems daily more certain that the entire Kasr was a new suburb built by Nebuchadnezzar and his father, and that the long line of rulers who

point of Babylon," and here also are the accounts of the workmen's wages, here is a psalm, and there a terra-cotta figure.

A canal has been found which crosses the

preceded them lived in some other part of the city. It seems that Amran, as the Arabs call another mound here, is the most likely spot, for this alone of all the mounds is high enough to hold the

ruins which we have a right to expect. On the surface is a layer of graves of late date, but of what is beneath it we know nothing at all.

This hill is to be the next point of attack, and we shall work with even a larger force than hitherto.

In the course of the excavations various fragments of cylinders have been found, as well as statuettes of different Babylonian deities. After searching the palace of Nebuchadnezzar, beyond

the East Canal, the rest of the mounds will be excavated" (Rogers, *His. of Bab. and Assy.*).

BABYLONIA AND ASSYRIA, RELIGION OF.

(1) Sources—Origin of the Pantheon. Before the discovery and the deciphering of the cuneiform inscriptions, our knowledge of the religion of the people that lived in ancient times on the borders of the Euphrates and Tigris was limited to the information given by Greek authors. Since 1835 a great number of documents have been found in the ruin-mounds of the now almost deserted country that bear testimony to the power and civilization of its ancient inhabitants. Parts of temples and palaces were laid bare, inscriptions were found and deciphered by the ingenuity of English and French scholars, and an almost unknown world was revealed. The excavations of the latest years, conducted by the French consul, de Sarzea, and by the University of Pennsylvania, added materials of the highest value to the large collections of monuments preserved in London, Paris, and Berlin.

One of the most remarkable finds was the discovery of the remains of Sardanapalus' (668-626 B. C.) library in the mound of Kojundshik (Nineveh), that provided us with numerous texts, copied by order of the king (see NINEVEH). These copies form the chief source for our knowledge of Babylonian religious life, and contain prayers, incantations, forecasts, lists of gods, lists of temples, etc. But as they do not mention the date of the originals they were taken from, and as there is only a small number of well-preserved texts (owing to the fragility of the tablets, made of baked clay), our knowledge of the religion, though increasing every year, is still very imperfect, especially as to its development.

In the oldest times a number of small kingdoms existed in North and South Babylonia (Ur, Uruk, Eridu, Larsa, Lagash, Nippur, Agade), the population being formed by tribes of different descent and race. Among these the Sumerians possessed a high civilization. Before 3800 B. C. Semitic tribes took possession of a part of the country (kingdom of Sargon of Agade, 3800 B. C.), and after 2250 B. C. Babel became the predominating town (conquests of King Khammurabi). One branch of the Semites, the Assyrians, settled in MESOPOTAMIA (which see); their might increased, and several times the Babylonian empire was overpowered by Assyrian kings. After the fall of Nineveh, the capital of the As-

syrians, there was a short time of glory for Babylon (Nabopolassar, Nebukadrezar), until it was conquered by the Persians under Cyrus (538 B. C.).

(2) History. The history of the religion runs to a certain degree parallel to the political history. The Sumerians were the inventors of the cuneiform script, became the teachers of the Semites, who in that period did not know how to write, and their language was for centuries used in religious texts. Their influence on the religion of the Semites has been important, but is not to be overrated, as the religious ideas of both were doubtless very similar. Each town possessed a

Heads of Statues from Tellah.

small pantheon, and was always governed by the Lord and Lady of the town. Where the population of a town was homogeneous, the gods were also of uniform nature; in the case of diverse origin among the inhabitants, there was a difference also between the characters of the gods; for men make their gods according to their own peculiar qualities.

As the Semites of Babylon became predominant in the country, the gods of their capital town took the leading place, but in many instances the lords of other places were brought into relation with them by the schools of priests. The gods were almost always believed to live in matrimony, and so it was easy to make genealogies, which, owing to the differences between the schools of priests, were not always in harmony. Local deities of the same character were often regarded as different manifestations of one god, and thus it happens that we have an enormous number of names for some twenty gods, representing distinct types.

(3) Gods, Local Cults. The Babylonian-Assyrian gods belong to the class of nature-gods. In many instances the heavenly bodies are believed to be their incorporations, but we must remember that gods and stars were not identified; it was only by means of them that the gods showed themselves. In other cases we find animals as an attribute of gods, because the peculiar power of a god was especially proper to a certain animal, but the animal itself was not esteemed as a god.

The first place of the Pantheon is taken by *Ana* or *Anu*, God of Heaven. In the inscriptions of Gudea, priest of Lagash, he and his companions, *Bel*, and *Ea*, are already mentioned at the head of the list of gods, but at the same time we know him as the local god of Urick, where he, his wife, *Anatu* and his daughter *Nana*, or *Ishtar* are worshiped in the temple E-anna, house of heaven.

Bel (the lord=*Baäl*), Lord of the Earth-mountain, takes the second place, and is the local god of Nippur. In ancient times his temple at Nippur was famous, but afterwards most of the glory of the ruler of mankind was transferred to *Maruduk*, the local god of Babylon.

Ea is the God of the Waters that surround the Earth-mountain, and also of the waters beneath the earth. The place of his local cult was Eridu, where he was worshiped as Lord of Wisdom. In the depth of the sea is his home. He speaks to mankind in dreams; he knows the secret exorcisms against evil spirits; as Lord of the Waters he bestows fertility; as Lord of Wisdom he is the patron of artists and workmen.

These three gods, with their wives, *Anat*, *Belit* and *Damkina*, are consequently the rulers of the universe (heaven, earth, and the deep waters around and beneath the earth).

Of little lower rank are the three gods, *Sin*, *Shamash* and *Ishtar*. *Sin*, the Lord of the Moon (the local god of Ur in Babylonia and of Harran in Mesopotamia), is often called the father of

ality; and in historical times, when the matriarchate had been long forgotten, she was worshiped as the Lady of Fertility, especially in Uruk. On the other hand, she reminds us of the Amazons, when as the Lady of the Battle (as she is often called in the historical inscriptions) she rides on a leopard, bearing bow and arrows.

The god *Ramman*, Lord of Wind, Thunder and Lightning, Rain and Storm, was imported in early times from the Syrian countries. His character is the same as that of the Israelitic *Jahwe* (*Jehovah*), the bull being his animal, while he bears powerful horns on his head.

The local god of Babylon was *Maruduk*. Under the famous king Khammurabi (2250 B. C.) his town became the capital of the country, and so *Maruduk's* glory rose. As son of *Ea* he is

Priest Introducing Votaries to Shamash, the Sun God, in His Shrine.

Shamash (the Sun). As some peasants still do, the Babylonians believed in the influence of the moonlight on the growth of plants, and so he is venerated as Lord of Fertility; owing to the mysterious transformations of his shape he is believed to be a mighty sorcerer, who creates himself, and, according to this, possesses sacred wisdom (Lord of Decrees).

Shamash, Lord of the Sun, was the local god of Larsa and Sippar. In the morning the doors of heaven are opened, and from between two mountains he drives in his carriage, guided by Bunene, the charioteer. He is the great judge, the counselor of the gods, and as Lord of the Sunlight he is a friendly power that frightens the wicked.

Ishtar, the Lady of Heaven, is identified with the star Venus. She is unmarried, and her position among the gods represents the position of women in the times of the matriarchate, when the mother was the head of her family, without regarding the various fathers of her children as husbands. Thus, her cult was of great sensu-

the mighty sorcerer, who knows all his father knows. He is the creator, the god of light, the conqueror of the great dragon of darkness, *Tiamat*. The fate of mankind is settled by him in the chamber of destiny, and his name is *Pel beli*, Lord of Lords. Even the Assyrian kings worshiped him in Babylon. He was the national Babylonian god, as *Ashur* was the national god of Assyria.

Ashur is the only god that is particularly Assyrian. Perhaps he was originally the Lord of the town Ashur, but his origin is not sufficiently clear. In Assyria he is the Lord of Lords, the father of the gods, whose banner is at the head of the troops, for the wars of the kings are his wars; it is the glory of his name that frightens the enemy, and to him a part of the booty is dedicated.

With this one exception, the Assyrian pantheon is wholly the same as that of Babylonia. Besides the gods already mentioned, there are worshiped in both countries *Ninib*, the warrior, a sun-god, whose wife *Gula* "vivifies death;"

Nergal (local god of Kutu), a god of war, a terrible lion, symbolizing the burning summer sun, also the lord of the deceased, the king of Hades; *Nabu* (*Nebo*), the great god of Borsippa, the patron of the scholars, to whom mankind is indebted for the art of writing, the gracious lord, the messenger and son of *Maruduk*; *Gibil*, Lord of Fire, and *Nusku*, the messenger of the gods.

Those are the "ilani rabuti," the great gods; but there is a large number of gods of less prominent position: The seven spirits of heaven (the *Igigi*), and the seven spirits of earth (*Anunnaki*); *Duzu* (*Tammuz*), the god of the sun in spring-time, whose place is at the door of heaven; *Namtor*, the god of pestilence; and all the other gods whose names are preserved to us.

(4) **Temples—Priests—Offerings—Feasts.** A town of any importance possessed a number of temples, and among these one *ziggurat* or "tower-temple." The *ziggurat* consists of several terraces, made of bricks, on the top of which a small chapel was erected, open in front, with an altar before it. The chapel contained the image of the god; sometimes the walls of the terraces were made of enameled bricks in different colors (black, white, purple, blue, red, silver and gold). The top was reached by steps or by a sloping way. On the lower floors were rooms dedicated to various other gods. So in Esagila, the famous tower-temple of Babylon, were smaller temples for *Maruduk's* wife, *Nabu*, *Ea*, *Anu* and *Bel*.

God Ea.

The temples contained imitations of the supposed real dwellings of the gods (house of the great mountain of earth, house of the fundament of heaven and earth, house of heaven, etc.). The great ocean that surrounds the world was represented in a temple of Lagash by a basin; the "chamber of destiny" was imitated in Esagila.

Of course, the oldest temples were of a modest construction, but the kings were always engaged in repairing and embellishing the houses of their gods; and in the times of Nebukadrezar the Great, the chief-temple of Babylon was a complex of temples, surrounded by a huge wall, with large courtyards and a great *ziggurat* of seven stories.

The priests were persons of great influence, not only by their position in the temples, but also by their knowledge. People wanted them for the writing of contracts, for medicaments, exorcisms, and forecasts. In many instances we find women as priests, even royal princesses. Their revenues consisted in parts of the offerings and in the profits from the possessions of the temple. The kings endowed the temples with fields, slaves, necessities of the service (oil, incense, meal, and animals), and in many instances priests lent silver or corn; especially in the older times they are usually the bankers.

All sorts of perfect animals could be offered to the gods; the kings offer at special occasions, and often a temple receives from them the neces-

saries for a daily offering. The gods were supposed to eat and drink the essences of the things offered to them, and therefore at least twice daily they were supplied with a meal. Every under-

Babylonian Idols.

taking, a campaign, hunting party, building of a house, etc., was opened by an offering, and, when finished, thank-offerings were given. Human sacrifices were not usual, though not unknown, but of the offering of children there is not any example or trace. In the cult of *Ishtar* the sacred prostitution was of importance. The priests introduced the offerer to the god, leading him by the hand, and after introducing him, the gifts were poured out or burned on the altar.

Every day was dedicated to some particular god, at least in later times, as is stated in long lists (hemerologies). The seventh, fourteenth, twenty-first, twenty-eighth, and also the nineteenth of a month were "Sabbaths," days of rest for the king, but not for the whole people.

Our knowledge of the feasts is still very limited. Best known is the feast "Zagmuku," the feast of the New-year, which began in the Spring. In Babylon it was celebrated with great splendor. Conformably to human custom, the gods went to visit *Maruduk*, Lord of Lords, in his "chamber of destiny." From the near Borsippa *Nabu* came on his holy ship, and *Maruduk* himself went to receive him. The gods of other places were also brought to Babylon, and whilst they were bowing to him *Maruduk* determined the events of the coming year.

Another feast was celebrated in honor of *Duzu* or *Tammuz*, the young Sun-god, that was killed and had gone to Hades. The women planted little gardens, which soon were burned by the heat of the summer-sun, as a symbol of the death of the god of fertility, and they recited mourning-songs.

Every god had his annual feast, but about the particulars of them we still know very little.

(5) **Mythology.** The Assyrians and Babylonians believed the earth to be a huge mountain, surrounded by the sea. The heaven was a cupola supported by the wall of the horizon. At the east and west sides were doors for the sun, that rises from the "chamber of destiny" in the east wall, and that sets in the "midst of heaven" in the west wall. This world was created by *Maruduk*. Before the creation of heaven and earth there existed *Tiamat*, the great dragon, living in the ocean. Then the gods were born and war arose between *Tiamat* and the gods, among whom *Maruduk*, son of *Ea*, was the great warrior. Armed with seven winds, thunder and lightning, he went to meet *Tiamat*,

and as a terrible wind blew her up, so that she was unable to shut the mouth, *Maruduk* then threw his net over her and cut her into two parts. One part was extended by him as heaven, the other part became the earth. Then the poles were fixed, the bodies of heaven placed, and mankind was created. This myth dates from the times of *Maruduk's* (Babylon's) supremacy.

Another myth is "*Ishtar's* descent into Hades." After the death of *Desu* (*Tammuz*), the god of the sun, in spring-time, *Ishtar*, his beloved, mourned for him. She decided to go into Hades, the world of death, that lies deep below the earth, in order to take the "water of life" with which she may revive her lover. She passes through the seven gates of Hades, and at every gate the guard takes a part of her dress, until finally she arrives naked. During the absence of *Ishtar* all vegetation and generation ceases on earth. The queen of Hades strikes *Ishtar* with diseases. Now *Ea* creates a helper, which is sent to her assistance. The queen of Hades is overpowered, the source of the water of life is opened, and *Ishtar*, after being cured, returns, and every year *Duzu* revives in the spring.

Historical elements are found in the great epics of *Gilgamesh*, the Babylonian *Hercules*, whose deeds are glorified in twelve songs. In very old times the town of Uruk was besieged by an enemy and saved by *Gilgamesh*, who became king. As he was growing mightier every day, the goddess *Aruru* created *Eabani* in order to resist him, but by means of a woman dedicated to *Ishtar*, they became friends. They made a campaign against the Elamitic king Chumbaba. After conquering his city they returned to Uruk, where a great feast was arranged. Now the goddess *Ishtar* asked *Gilgamesh* to be her consort, but he refused and reproached her with the fickleness of her love. Full of wrath, she made complaint to her father *Anu*, who created a great bull, that, however, was killed by *Eabani*. After a new war against Nippur, *Eabani* died, while *Gilgamesh* suffered from leprosy. In order to be cured he went to see his deceased forefather, *Tsit Napishtim*, living on the isle of the blessed, at the mouth of the rivers. A long and difficult travel it was. Finally he came to the seashore, where he found the ferryman. They rowed forty-five days and reached the isle. Here *Tsit Napishtim* told him the story of his deluge, his escape, and glorification on the isle of the blessed; then he cured him at the fountain of life and gave him a plant that would protect him from illness. *Gilgamesh* returned to Uruk, but on the way home the plant was stolen by a serpent. In Uruk he complained of not finding *Eabani* on the isle of the blessed, but the god *Nergal* called the ghost of *Eabani*, which told him of the mystery of the land of the dead, where he was living.

Every individual was protected by a particular god and goddess. He needed this protection, especially against the evil spirits, an almost innumerable army of demons, that brought illness and diseases to men.

At the head of these demons were placed the terrible seven *Anunnaki*, that fought against *Sin*, and that were only defeated after a heavy struggle with the mightiest of the gods. They lived in the wall of the horizon, like wild horses. The demon "south-wind" was the first, a terrible panther the third, the others were also animals and winds; they were not masculine and not feminine, without wife and children. They went around in the streets to cause trouble; they entered the houses, even through the smallest opening; they

crept into a man's body to make him ill; they hid themselves among the cattle when driven home; they caused hatred and jealousy, and did all the evil they could.

Against them man makes a fortress of his house. He daily invokes the help of the great gods, and defends his house by their images. At the top of the roof, in the fireplace, in the door, and even at a certain distance from the door the figures are placed as sentinels. In the morning and evening he offers to them nourishment and sweet drink, and asks them to keep off all that might be wrong. In case of illness, they are placed near the bed, two at the head and two at the foot.

Man is exposed to the influence of the demons when the gods are insulted. Either the protecting gods are indifferent and do not defend the man, or the gods themselves send the evil spirits as punishments for the sins.

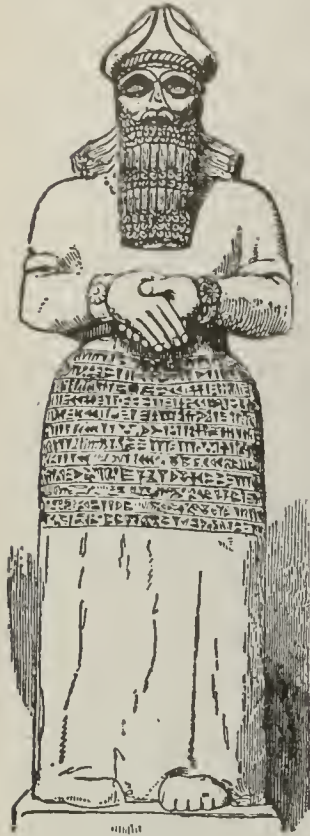

The wrath of a god may be provoked by ritual neglects, but also by moral mistakes. When the offerings are not given or vows remain unfulfilled, the gods are insulted, but they are also insulted by sins against morality and laws. Changing of the boundary-stones, making use of false weights, stealing or commanding to steal, causing quarrels, speaking right, but doing wrong, killing the neighbor, teaching improper things, bribing in lawsuit, transgressing the limits of righteousness, eating or drinking out of unclean objects, etc., are punished, and may be the cause of a curse. It is remarkable that, except the precepts of worshipping one god and the forbidding of idol-cult, all the ten commandments have their equivalents in Babylonian religious precepts. The condition of woman in Babylonia compared unfavorably with that in Egypt.

Not only do the gods send misfortune, but man also is able to do so. Some persons have the "evil eye," others know how to conjure the spirits. Though sorcery is forbidden by the gods, a number of witches bring misery by their practices. They make images of a person, and by cursing their figures, by hiding them, by burying them, by throwing them into the water, by burning them or crushing them in the street, they are sure of damaging the man himself, sooner or later.

In cases of illness and adversity the gods should be satisfied and the spirits expelled. This could be done by reciting long exorcisms and by symbolical acts. *Maruduk* is the great god, whose assistance purifies the sick. The symbolical acts consist in the burning of onions, meal, clothes, fruit; the conjuror asks that the sickness may be buried at the same time. The body of the sick man is wrapped in sacred cords, which are tied with a mysterious tie; the conjuror unties the magical knot and supplicates that the god may untie the band of sickness.

All uncommon events were believed to have significance. In the first place, dreams, unusual births, color of the hair, the moth in clothes, the scratching of dogs, and a thousand things more were deemed significant as to the future. Furthermore, the constellations, the eclipses of sun and moon, the rising of the planets were anxiously watched, for no doubt was entertained about the influence of these on the crops, the result of wars, etc. This belief in forecasts became the occasion of astronomical researches. Stars and gods were brought into relation by the priests. Each star represented a distinct number, and by means of those they made calculations about future events. So, religious life in Babylonia and Assyria was not easy. In all circumstances the

gods ought to be consulted. The king of Babylonia was not really invested with his dignity, unless he "seized the hands of *Maruduk*" at the first Zakmuku-feast of his reign. He therefore went to Esagila and led the image of *Maruduk* by the hand on his holy procession. No campaign

God Nebo.

was undertaken without consent of the gods; no house nor temple was built or repaired without numerous offerings; in the observatories on the top of the tower-temples the priests prepared reports that were sent to the king.

Sins were confessed in penitential hymns of deep religious feeling. Of course, the religious ideas of the scholars and priests gradually became more developed than popular opinions, and some priests really came very near monotheism. In the eighth century B. C. one of the Assyrian governors tried to make *Nabu* the god exclusively worshiped, but ended in failure, as the people could not appreciate his feelings. In another case a number of gods are regarded as manifestations of the one *Maruduk*; and the lists of gods

prove that systems of identification of gods were taught in the schools of the priests. But all this was mere scholarship, and not living religion. The gods were conceived as human beings, animals, or animals with human faces. Only a part of their being was thought to be united with their images. In the mythological literature much is spoken of them that seems to us disrespectful. The gods became anxious on account of the waters of the deluge; like frightened dogs they go to the heaven of *Anu*; like flies they come to the offering of the Babylonian Noah; and *Gilgamesh* addresses *Ishtar* very disrespectfully.

The Babylonians believe in a life after death, but not in what we call the resurrection and immortality of the soul. The deceased was buried and placed in a tomb, where he was provided with fruits, wine, oil, etc. His shade is supposed to rest here for a time and then is transported to Hades, the kingdom of *Nergal* and of *Allatu*, queen of death. In other cases the corpse was burned and the remains placed in a jar of clay. Hades is surrounded by seven walls, and by a river. The shades live there in darkness and misery, and no evidence is forthcoming as to any difference between the destinies of good and bad. B. D. E.

(See *Relig. of Bab. and Assyria*, by Morris Strom Jr.; *The Monuments and the Old Testament*, Ira M. Price; *New Light on Bib. and Holy Land*, Evetts.)

BABYLONIA (băb'y-lō'ni-à).

1. Name. The name is derived from its chief city, Babylon, termed also Chaldæa, from those who, at a later period, inhabited it. A province of Middle Asia, bordered on the north by Mesopotamia, on the east by the Tigris, on the south by the Persian Gulf, and on the west by the Arabian Desert.

On the north it begins at the point where the Euphrates and Tigris approach each other and extends to their common outlet in the Persian Gulf, pretty nearly comprising the country now designated Irak Arabi. The two words, Babylonia and Chaldæa, were, however, sometimes used in another signification: Babylonia, as containing in an extended sense Assyria also and Mesopotamia, nearly all the countries which Assyria in its widest meaning embraced; while Chaldæa indicated, in a narrower signification, the southwestern part of Babylonia, between the Euphrates and Babylon (Strabo xvi; Ptol.). In Hebrew, Babylonia bore the name of Shinar, or 'the land of Shinar,' while 'Babylon' (Ps. cxxxvii:1) and 'the land of the Chaldæans' (Jer. xxiv:5; Ezek. xii:13) seem to signify the empire of Babylon.

Babylon, or the Assyrian *Babilum*, does not mean *confusion*. The error arose through a pun made upon the name by the Semites. The Hebrew has a word, *balal*, which means 'to confuse,' and they derived Babylon from this because the confusion of tongues here took place.

2. Climate. The great valley has a climate which appears little fitted to produce men of energy and force, for the temperature over its entire surface is very high in the summer season. In the far south, along the Persian Gulf, and in the near-by regions the atmosphere is moist, and the heat is of the same character as that of Hindustan or Ceylon. Records do not exist to show the range of the thermometer, but the passing traveler states the simple fact that the temperature is higher than at Bagdad. In Bagdad the average maximum daily temperature indoors during June and July is set down as 107° Fahrenheit, and it often goes up to 120° or 122°. At present this high temperature is also reached in the north as far up at least as Mosul. It is now also rendered much more oppressive by hot winds, which arise suddenly and, filled with impalpable sand, drive about in eddying circles or sweep in vast clouds over a wide extent of country. This dust becomes at times so thick as to completely shut off near objects from the vision, as though by a fog. The gleaming particles of sand shine beneath the sweltering sun, the sand enters nostrils or mouth and seems to choke the very lungs. Death itself sometimes alone terminates the suffering experienced in these terrible visitations. It is, however, altogether probable that in the period of the ancient history neither the heat nor the sand was such a menace, for at that period the vast network of canals helped to create moisture. (Rogers, *His. of Bab. and Assyr.*, vol. 1, pp. 277, 278.)

3. Physical Features. The country in ancient times was very prolific, especially in corn and palms. Timber trees it did not produce. Many parts had springs of naphtha. As rain is infrequent, even in the winter months, the country owes its fruitfulness to the annual overflow of the Euphrates and the Tigris, whose waters are conveyed over the land by means of canals. Quintus Curtius (i:5) declares that the country between the Euphrates and the Tigris was covered with so rich a soil that the cattle were driven from their pastures lest they should be destroyed by satiety and fatness.

The alluvial plains of Babylonia, Chaldæa and Susiana, including all the river, lake and newer marine deposits at the head of the Persian Gulf, occupy an extent of about 32,400 square geographic miles.

4. Rivers. The rivers are the Euphrates and its tributaries, the Tigris (see TIGRIS) and its tributaries, the Kerah, the Karun and its tributaries, the Jerali and the Idiyan, constituting, altogether, a vast hydrographical basin of 189,200 geographic square miles, containing, within itself, a central deposit of 32,400 miles of alluvium, almost entirely brought down by the waters of the various rivers, and which have been accumulating from periods long antecedent to all historical records. All these rivers present the peculiarity of flowing, for a great part of their course, through supra-cretaceous formations of a very friable nature, easily disintegrated by the action of the elements, and still more so by that of running waters when swollen by floods and carrying down pebbles. Near Bushiyah, about ten miles beyond the southeast quarter of ancient Babylon, on a level plain, are found a number of sand-hills, which are constantly shifting their place and number, and yet always occupy the same general locality. They appear to owe their existence to the presence of springs, which moisten the sand and cause its accumulation, at the same time allowing the prevalent winds to alter the form and number of the hills, while their bases have a fixed point of attraction. They are objects of superstition to the Arabs, who often look upon them as the sepulchral pall of brethren who have fallen in battle. The efflorescences of nitrate of potassium and of chloride or hydro-chlorate of sodium are common on these plains; the one is most probably derived from the decomposition of vegetable matters, and consequently characteristic of alluvium of river or marshy origin; the other is indicative of depositions from seas or bays. The modern accumulations of soil in Babylonia from annual inundations is still very great. Several canals, such as the Isa, the Nahr Zimberani-Yah, the Muhawil, etc., convey water at certain seasons of the year from one river and part of the country to another. In general, the alluvium that is brought down by canals and rivulets and deposited at their mouths is a fine clay. The great extent of the plain of Babylonia is everywhere altered by artificial works; mounds rise upon the otherwise uniform level, walls and mud ramparts and dikes intersect each other, elevated masses and friable soil of pottery are succeeded by low plains inundated during great part of the year, and the antique beds of canals are visible in every direction.

5. The Euphrates. The Euphrates is still a majestic stream, but wanders through a dreary solitude. Its banks are hoary with reeds, and the gray osier willows are yet there on which the captives of Israel hung up their harps, and, while Jerusalem was not, refused to be comforted. At that time its now broken hills were palaces; its long undulating mounds, streets; its vast solitude was filled with the busy subjects of the proud mistress of the East. Now, 'wasted with misery,' her habitations are not to be found, and, for herself, 'the worm is spread over her.'

Strabo makes the Euphrates a stadium (646 feet) in breadth at Babylon; according to Renel it is about 491 English feet; D'Anville reduces it to 330; Rich, on the other hand, raises it to 450 feet; its breadth, however, varies in its passage through the ruins. Rich ascertained its depth to be two and one-half fathoms, and that the current runs gently at the medium rate of about two knots an hour. The Euphrates is far less rapid than the Tigris, and rises at an earlier period. When at its height—from the latter end of April to the latter end of June—it overflows

the surrounding country, fills, without the aid of human labor, the canals dug for its reception, and facilitates agriculture in a surprising degree. The ruins of Babylon are then so inundated as to render many parts of them inaccessible. The water of the Euphrates is esteemed more salubrious than that of the Tigris. The course of the river through the site of Babylon is from north to south. Bricks and other fragments of buildings are frequently found in it by fishermen who ply on its waters. (See EUPHRATES.)

6. Fertility and Riches. During the three great empires of the East no tract of the whole appears to have been so reputed for fertility and riches as the district of Babylonia, which arose in the main from the proper management of the mighty river which flowed through it. Herodotus mentions that, when reduced to the rank of a province, it yielded a revenue to the kings of Persia which comprised half their income. And the terms in which the Scriptures describe its natural as well as its acquired supremacy when it was the imperial city evidence the same facts. They call it 'Babylon, the glory of kingdoms; the beauty of the Chaldee excellency; the lady of kingdoms, given to pleasure; that dwelleth carelessly, and sayeth in her heart, *I am*, and there is none else beside me.' But now, in the expressive and inimitable language of the same holy book may it be said, 'She sits as a widow on the ground. There is no more a throne for thee, O daughter of the Chaldeans!' As for the abundance of the country, it has vanished as clean away as if 'the besom of desolation' had swept it from north to south; the whole land, from the outskirts of Bagdad to the farthest reach of sight, lying a melancholy waste. The Babylonians were famous for the manufacture of cloth and carpets; they also excelled in making perfumes, in carving in wood and in working in precious stones. They were a commercial as well as a manufacturing people, and carried on a very extensive trade alike by land and by sea. Babylon was indeed a commercial depot between the Eastern and the Western worlds (Ezek. xvii:4; Is. xliii:14).

7. Flora. It is commonly believed that wheat and barley are indigenous to the plains of the Euphrates, and that thence, after a period of cultivation, they spread westward over Syria and Egypt and on to Europe. If this be true, the land might well be expected to yield a good harvest of native cereals.

But the productivity of the land did not stop with the great cereals. The inhabitants had a wide range of vegetables for food, among which are pumpkins, kidney beans, onions, vetches, egg plants, cucumbers, "gombo," lentils, chick-peas and beans.

Above the vegetables and cereals of the land rose its trees, of which the variety was great, both of those that yielded fruit and of those that added merely to the beauty of the land; among these were the apple, fig, apricot, pistachio, vine, almond, walnut, cypress, tamarisk, plane tree and acacia. But valuable and beautiful though they all were, none was equal in utility, in song, or in story to the palm. From the most ancient of days down to the present all the Orient has rung with the praises of the palm. In Babylon it found a suitable place for its development. It was cultivated with extreme care. Even in early times the process of reproduction had been discovered, and was facilitated by shaking the flowers of the male palm over those of the female. From the products of this tree the peasantry were able almost

to support life. The fruit was eaten both fresh and dry, forming in the latter case almost a sweetmeat (Rogers, *Hist. of Bab. and Assy.*, vol. I, pp. 282, 283).

8. Fauna. The lion (*nîsu, labbu*) was a very common tenant of the reed beds between Arabia and Babylonia, and not only the panther (*nimru*), the jackal (*akhu, barbaru*), the fox (*selibu*), and the wild boar (*shakhu, dabu*), but especially the wild ox (*reh-amé*, Heb. 𐤒𐤍), frequently figure in the literature and the pictorial representations (*e. g.*, on the oldest cylinder seals). Many species of gazelles, antelopes and wild goats were found along the frontiers of the country. The horse (Heb. *sîsî*) was unknown to the earliest settlers. The Sumerians called it 'ass of the East' or 'the mountain' (*anshu kurra*), just as by circumlocution they called the lion *lig-magh*, 'big dog.' The strictly domestic animals were the cow (*alpu*), the sheep (*senu, lahru*, and other words), the goat (*inzu*), the ass (*imêru*, an incorrectly written form of *himêru*, Sumerian *anshu*), and the dog (*kalbu*). The elephant (*pîru*) of Mesopotamia, the camel (*gammalu*) and the wild ass (*burîmu*) of Arabia, were also known to the Babylonians. Such a word as *gammalu* shows by its very form (if it were a genuine Babylonian word it would be written *gamlu*) that it has been borrowed from Arabia (F. Hommel, *Hastings' Bib. Dict.*).

The rivers swarmed with fish. In their slow-flowing waters the barbel and carp grew to large size and were most highly esteemed. But the eel, murena, silurus and gurnard were also used for food and found in abundance.

By the waters and amid the great reeds which almost seemed to wall in the rivers were birds in extraordinary variety, among them pelicans, cranes, storks, herons, gulls, ducks, swans and geese. On land were found the ostrich, the bustard, partridge, thrush, blackbird, ortolan, turtle-dove and pigeon, together with birds of prey like eagles and hawks. At the present time a few snakes are found, of which only three varieties are known to be poisonous, but none of these are so dangerous as many found in adjoining lands.

Flocks pasture in meadows of coarse grasses; the Arabs' dusky encampments are met with here and there; but, except on the banks of the Euphrates, there are few remains of the date groves, the vineyards and the gardens which adorned the same land in the days of Artaxerxes, and still less of the population and labor which must have made a garden of such soil in the time of Nebuchadnezzar. The vegetation of these tracts is characterized by the usual saline plants, the river banks being fringed by shrubberies of tamarisk and acacia, and occasional groves of a poplar which has been mistaken for a willow: The weeping willow (*Salix Babylonica*) is not met with in Babylonia. The solitary tree, 'of a species altogether strange to this country' (Heeren, *Asiatic Nations*, vol. ii, p. 158), which Rich calls *lignum-vitæ*, and which has been supposed to be a last remnant or offspring of the sloping or hanging gardens that appeared to Quintus Curtius like a forest, is in reality a tamarisk.

9. Stones, Minerals, Bricks. Stone and minerals were almost unknown in the alluvial soil. The absence of these was, however, atoned for by the excellent building material that lay to hand in the clay, while the best possible mortar was obtained from the asphalt contained in the numerous naphtha wells. All the buildings in ancient Babylonia were accordingly constructed of brick. When sandstone, or still harder kinds of stone,

such as basalt or diorite, were used (*e. g.*, for statues), they were brought by ship—even in the earliest times—from the territories along the frontier (Mesopotamia, Elam, Arabia). The same is true of alabaster, marble, gold, silver, copper, tin, iron and lead (*Hastings' Bib. Dict.*)

In the excellence of materials used, and in the perfection of form, texture and solidity, and in the great size of their bricks, the Babylonians have probably never been excelled. The same material was used for the manufacture of books or tablets. These were made even more carefully, and were almost indestructible. For records the ancient world knew nothing their superior and perhaps nothing equal. The papyrus of ancient Egypt was so fragile and so easily destroyed by either fire or water that it bears no comparison with the brick, which resisted both almost equally well. The clay tablet has preserved through the centuries a vast literature, much of it uninjured, while untold portions of the literature of the more cultured Egyptians have hopelessly perished (Rogers, *Hist. of Bab. and Assy.*, p. 287).

10. Mounds. No monuments in Babylonia and Chaldæa appear to be more decisive of the antiquity and Assyrian origin of sites than the lofty artificial mound of which the present degenerate hordes of the tent and the spear narrate so many fabulous tales, but which almost everywhere present themselves where there are also other strong grounds of presumption of an Assyrian or Chaldæo-Babylonian origin. Thus, at Irkah, at Wasit, at Teredon, at the Birs Nimrud, the Mujahlibah, El Heimar, etc., these colossal piles are found dominating over the dreary waste, to the uniformity of which they offer a striking contrast, being visible at great distances, and, although thrown by the mirage into strange and contorted shapes, yet they always appear, when seen upon the verge of the horizon, as if possessing colossal dimensions, and produce an effect in point of grandeur which cannot easily be surpassed. Long before the period when man began to erect these feeble semblances of mountains, a various level of alluvium had been established in the spaces between the rivers, by which in one part the waters of the Euphrates find a higher level than the Tigris, into which they flow at the high season, while at another place the Tigris sends its waters to the Euphrates and restores the flood by which it had been previously enriched from the 'Great River.'

11. Ethnology and Language. From the account which is found in Gen. x:8, *Nimrod*, the son of Cush, appears to have founded the kingdom of Babylon, and to have been its first sovereign. In the earliest period the chief race was the Sumerians. This was the people who founded a number of the chief cities, invented the cuneiform system of writing, and, in general, may be said to have laid the foundations of culture and civilization in the land. A few inscriptions written in their language have come down to us. Besides these, we find as early as B. C. 5000 or 6000 distinct traces of a *Semitic* population, which came from the Northwest (Mesopotamia) and took possession of the civilized settlements founded by the Sumerians. The branch of Semites who first conquered and ruled in Babylonia received accession from other Semitic peoples out of Arabia during the early periods. To the Sumerian and Semitic stocks were added, as time went on, yet other peoples from Elam, Media and elsewhere, until the people of Babylonia were so completely mixed as to defy all analysis

into separate races. It is strange that on the other hand the people of Assyria should suffer comparatively little from mixture, and should be able to pride themselves upon pure Semitic blood.

"The Semitic Babylonians have the closest relationship with the other Semites (Hebrews, Arabs and Aramæans), and yet, in opposition to these, they form a special group, as the grammar and lexicon clearly prove. If the Syro-Arabian Semites may be properly designated *west* Semites, the ancient Egyptian speech, on the other hand, belongs to the *east* Semitic, or the Bab.-Assyrian branch of Semitic languages. The Egyptians must in the remotest antiquity have emigrated from Mesopotamia to Africa. Apart from considerations of grammar and the great number of Sumerian loan-words contained in their language (which is otherwise Semitic), this is proved by extensive coincidences between the Egyptian and Babylonian systems of writing, their religion and other branches of culture" (F. Hommel, *Hastings' Bib. Dict.*).

12. Kings. In Gen. xiv *Amraphel* is cursorily mentioned as king of Shinar. In the reign of Hezekiah (B. C. 719-690)—2 Kings xx:12—"Berodach-baladan, the son of Baladan," was 'king of Babylon,' and 'sent letters and a present unto Hezekiah, for he had heard that Hezekiah had been sick.' About a hundred years later Jeremiah and Habakkuk speak of the invasion of the Babylonians under the name of the Chaldæans, and now *Nebuchadnezzar* appears in the historical books (2 Kings xxiv:1 sq.; Jer. xxxvi:9, 27) as head of the all-subduing empire of Babylon. *Evil-merodach* (2 Kings xxv:27; Jer. lii:31), son of the preceding, is also mentioned as 'king of Babylon;' and with *Belshazzar* (Dan. v:1, 30), the Nabonidus of Berossus, the line of the Chaldæan kings was closed; he perished in the conquest of Babylon by the Medo-Persians (Dan. v:31), 'and Darius, the Median, took the kingdom.'

13. Chaldæans. The domination of the Chaldæans in Babylon has given historians some trouble to explain. The Chaldæans appear to have originally been a nomadic tribe in the mountains of Armenia, numbers of whom are thought to have settled in Babylon as subjects, where, having been civilized and grown powerful, they seized the supreme power and founded a Chaldæo-Babylonian empire.

Herodotus has noticed the Chaldæans as a tribe of priests (i:28); Diodorus (i:28) as a separate caste under Belus, an Egyptian priest, while the book of Daniel refers to them as astrologers, magicians and soothsayers, but there can be little doubt, as laid down by Gesenius on Isaiah xxiii:13, that it was the name of a distinct nation; if not, as Heeren (*Manual of Anc. Hist.* 28) has maintained, the name of the Northern nomades in general. In connection with Babylonia the Chaldæans are to be regarded as a conquering nation as well as a learned people; they introduced a correct method of reckoning time, and began their reign with Nabonassar (B. C. 747). The brilliant period of the Chaldæo-Babylonian empire extended to B. C. 538, when the great city, in accordance with the prophecy of Daniel, was sacked and destroyed.

Babylonia, during this period, was 'the land of the Chaldæans,' the same as that into which the children of Judah were carried away captive (Jer. xxiv:5), which contained Babylon (Jer. l:1; Ezek. xii:13), was the seat of the king of Babylon (Jer. xxv:12), and contained the house of the god of Nebuchadnezzar (Dan. i:1, 2).

The profane historians lend their testimony to the same effect. There is another scriptural reference to this proud period in the history of the Chaldees, when learned men filled the streets and the temples of Nineveh and Babel: 'Behold the land of the Chaldæans; this people was not, till the Assyrian founded it for them that dwell in the wilderness; they set up the towers thereof, they raised up the palaces thereof, and he brought it to ruin' (Is. xxiii:13).

14. History. (See BABYLON, *History*; ASSYRIA; CHALDEA; MEDIA.)

15. Writing, Literature and Art.

The Babylonian wedge-shaped characters, which formed the syllables of the words in the Babylonian tongue, were originally pictures.

(1) **Clay Tablets.** When clay tablets were introduced as writing material, and the stylus was used to form the characters, these pictures became much modified in form, and finally pure syllables, which had little resemblance to the original picture. The Babylonians were essentially calculators, and astronomy, mixed with astrology, occupied a large space in their libraries. This doubtless is what Isaiah refers to in xlvi:13. They kept an accurate account of the eclipses, equinoxes and other similar occurrences. Their year consisted of 12 months of 30 days each, and an intercalary month every six years. Every seventh day was a rest day, on which it was forbidden to do certain things. Each day was lucky or unlucky, and on these days certain things were forbidden. The largest astrological work of the Babylonians was made by Sargon, 3800 B. C. It was called the 'Illumination of Bel,' and consisted of seventy tablets. Their observations were made from towers, in quite a modern manner. They observed the spots in the sun and knew of comets. Geology and geography were represented among their sciences, as well as natural history. With the exception of the physical sciences, the greater part of our learning was known to the Babylonians. Much space was given to magic, and to judge by the quantity of this sort of literature, the Babylonians must have lived in constant terror of spirits and demons. As the Babylonian was a trader and a money-lender, there are almost innumerable tablets relating to sales, loans, marriage dowries, slaves, and all sorts of commercial transactions that can be imagined.

(2) **Izdubar Legends.** A small and interesting class of literature is the so-called *Izdubar Legends*. The 'Deluge tablet' is one of these, which gives an account of the flood. While much of their literature and of their inscriptions is now only fragmentary, it has served, through a new channel, to tell us of Babylon and Nineveh, of the land of Abraham, and to give us a new version of the flood. It has given us a more extended knowledge of Sennacherib, Tiglath-Pileser, Sargon, and Esar-haddon, and enlightened us on the language, learning and superstition of the fellow citizens of Abraham, and of a branch of the Semitic race akin to the Jewish nation, from which sprang the Christ. It carries us back through long centuries to a time when man was learning his first lessons and slowly growing up toward civilization.

(3) **Manual Training.** The Babylonian youth learned to read and write, which was no easy task. Many excelled in wood engraving and upon precious stones, and their work is a marvel even to-day. They were good builders, and their palaces were decorated with all kinds of beautiful stones, bronze statues, vases, jars of alabaster, and ivories, embellished with gold. What they could

not produce for themselves they imported from Egypt and Phœnicia. (See *Babylonian Life and History*, by E. A. Wallis Budge, M. A., 1891; *His. of Bab. and Assyr.*, Robt. Wm. Rogers; *New Light on the Bib. and Holy Land*, Evetts.)

16. *Babylonian Creation Story.*

We have as yet only fragments of the Babylonian story of the Creation. Two of these have been known for some time, but there is a late discovery of a third fragment, by Mr. T. G. Pinches, differing somewhat from the others, and adding some particulars, making it necessary to combine them anew.

The last one of the three discovered is, like one of the others, a part of an incantation—an introduction to a formula, to be repeated at the dedication of the great temple of Borsippa, to invoke the protection of Merodach and other beneficent gods, and to drive away the malevolent deities.

There is, however, one story of the creation often translated since it was first published by Mr. Smith, which appears to have been written purely for literary and mythological purposes. It is on seven tablets, and is therefore called the seven-tablet story. It is also called the Assyrian story, because the fragments were recovered from the library of King Assur-bani-pal (668 B. C.) of Assyria.

We find that it begins when nothing existed but the primeval ocean, the great abyss, under the name of Tiamat. But this abyss is soon personified under the form of the mother of all disorder and chaotic productions. At this time there were no gods, no heavens and no earth. Then, continues the Assyrian story, the primeval divine pairs were produced, Lakhma and Lakhama, and Ansar and Kisar, or the upper and lower heavens. These primeval deities had long existed, like Uranos and Gaia in Greek mythology, before the production of the three great gods—Anu, Bel and Ea—who correspond to the great Greek triad, Jupiter, Pluto and Neptune. This much is told by the fragment which remains of the first chapter.

The second chapter is entirely lost, except a few words, but the third chapter opens a long story.

It is an account of the contest between these later gods and Tiamat, the chaotic abyss, the serpent, for the possession of the world. This is developed in very dramatic form. Merodach, the son of Ea, was the champion of the gods, was besought by them, and armed by them, to accept the task. The result was the overthrow and slaughter of Tiamat, and the subjection of her followers. (This dragon mother of the chaotic brood is represented on a bas-relief in the British Museum as having claws, horns, tail and wings.) From her skin Merodach made the upper firmament, and fastened above it the upper waters, and built above the heavens the home of the great gods. This story occupies the second, third and fourth chapters.

In the fifth tablet the constellations of the stars are created, the poles, the planets and the moon. In the portion thus far recovered nothing is said of the sun, except in a broken line.

The sixth tablet is entirely lost, but there is a small fragment of the seventh tablet, which mentions the creation of cattle and beasts of the field and creeping things.

The Cuthan tablet is brief, being only part of an incantation. Here, not Merodach, but Nergal, the sun god of Cutha, is the creator. The first part is lost. Here we have a picture of the

crude creation of the primal gods, the progeny of Tiamat, monsters of the abyss, animals with bird bodies, or men with raven faces, with their seven kings, against whom the younger gods at first fought unsuccessfully, but the story is incomplete, and nothing is added to what was learned from the fuller account.

The new tablet discovered by Mr. Pinches, while it is an incantation and too brief, is peculiar in that it is in two languages, the old Sumero-Akkadian and the Semitic Babylonian. This indicates that some portion of the legend is much older than the time of Assur-bani-pal, who lived in the seventh century B. C. It begins, like the Assyrian account, with the beginning, before the abode of the gods had been made. It proceeds to enumerate the ancient cities and their temples, Neffer, Erech and Eridu not yet built, nor "the whole of the lands, the sea also." Then there was a stream in the sea, and in that day Eridu and Babylon were built with their temples. The gods were made and the spirits of the earth. The next important passage must be given entire:

"Merodach bound together a foundation before the waters, he made dust, and poured it out with the flood. The gods were to be caused to sit in a seat of joy of heart. He made mankind. Aruhu (Ishtar) made the seed of mankind with him. He made the beasts of the field and the living creatures of the desert. He made the Tigris and Euphrates, and set them in their place. Well proclaimed he their name. Grass, the marsh plant, the reed and the forest he made. He made the verdure of the plain, the lands, the marsh, the thicket also; oxen, the young of the steer, the cow and her calf, the sheep of the fold; meadows and forests also. The goat and gazelle he set therein. Lord Merodach on the seashore raised a bank."

The text here becomes fragmentary, but it continues with the account of the building of Neffer and Erech and their temples (*The Babylonian Creation Story*, by William Hayes Ward, D. D., *Hom. Rev.*).

BABYLONIANS (băb'y-lō'ni-anz). The inhabitants of Babylon.

They were among the colonists planted in Samaria by the Assyrians (Ezra iv:9). See BABYLON; BABYLONIA.

BABYLONISH CAPTIVITY (băb'y-lō'nish kăp-tiv'it-y). See CAPTIVITY.

BABYLONISH GARMENT (băb'y-lō'nish găr'ment), (Heb. אֲדָמַת שִׁינִי, *ad-deh'reth shin-awr'*, cloak of Shinar or Babylon).

The garment which Achan stole at the destruction of Jericho (Josh. vii:21) is described by Josephus as "a royal mantle all woven with gold." But no accurate description is possible. Babylon was famous for the products of the loom.

"Josephus (*Ant. v:1, 10*) gives rein to his imagination, and describes it as 'a royal garment woven entirely of gold,' or 'all woven with gold.' There is no doubt that a dress of this description would be 'goodly' in the extreme. The probability is that it was a garment of embroidered stuff, such as Babylon was famed for (cf. Pliny, viii:74, and Martial, *Ep. viii:28*); and the statement in the *Bereshith Rabba* (sec. 85, fol. 75, 2) that it was a robe of purple (an opinion which R. Chanina bar R. Isaac also shared; cf. Kimchi on Josh. vii:21) is just as likely to be correct as any other." (T. G. Pinches, *Hastings' Bib. Dict.*).

BACA (bā'ka), (Heb. בָּכָה, *baw-kaw'*, weeping), occurs the first in Ps. lxxxiv:6, 'Who passing

through the valley of Baca make 't a well; the rain also filleth the pools;' the second in 2 Sam. v:23, 24, and in 1 Chron. xiv:14, 15, 'And let it be, when thou hearest the sound of a going in the tops of the mulberry trees, that thou shalt bestir thyself.'

Neither the *mulberry* nor the *pear-tree*, considered to be the *baca* of the Scriptures, satisfies translators and commentators, because they do not possess any characteristics particularly suitable to the above passages. With regard to the *mulberry*, Rosenmüller justly observes that this interpretation is countenanced neither by the ancient translators nor by the occurrence of any similar term in the cognate languages. We should expect, however, some notice in Scripture of a tree which must have been common, and always esteemed for its fruit. Rosenmüller prefers *pear-trees* in the preceding passages, as being the oldest rendering of the words. But the correctness of this translation is not confirmed by any of the cognate dialects; nor is the *pear-tree* more appropriate than the *mulberry*.

The tree alluded to in Scripture, whatever it is, must be common in Palestine, must grow in the neighborhood of water, have its leaves easily moved, and have a name in some of the cognate languages similar to the Hebrew *Baca*. The only one with which we are acquainted answering to these conditions is that called *bak* by the Arabs, or, rather, *shajrat-al-bak*—that is, the *fly* or *gnat* tree.

As it seems to us sufficiently clear that the *bak*-tree is a kind of poplar, and as the Arabic 'bak' is very similar to the Hebrew 'Baca,' so it is probable that one of the kinds of poplar may be intended in the above passages of Scripture. And it must be noted that the poplar is as appropriate as any tree can be for the elucidation of the passages in which *baca* occurs. For the poplar is well known to delight in moist situations, and Bishop Horne, in his *Comm.* on Psalm lxxxiv, has inferred that in the valley of *Baca* the Israelites, on their way to Jerusalem, were refreshed by plenty of water. It is not less appropriate in the passages in 2 Samuel and 1 Chronicles, as no tree is more remarkable than the poplar for the ease with which its leaves are rustled by the slightest movement of the air; an effect which might be caused in a still night even by the movement of a body of men on the ground, when attacked in flank or when unprepared. That poplars are common in Palestine may be proved from Kitto's *Palestine*, p. 114: 'Of poplars we only know, with certainty, that the black poplar, the aspen, and the Lombardy poplar grow in Palestine. The aspen, whose long leaf-stalks cause the leaves to tremble with every breath of wind, unites with the willow and the oak to overshadow the water-courses of the Lower Lebanon, and with the oleander and the acacia to adorn the ravines of southern Palestine; we do not know that the Lombardy poplar has been noticed but by Lord Lindsay, who describes it as growing with the walnut-tree and weeping-willow under the deep torrents of the Upper Lebanon.'

BACA, THE VALLEY OF (bā'ka), (Ps. lxxxiv:6), or Valley of Weeping.

Some, with our translators, regard this as the name of a place, and by such it has been usually sought in the Bekaa (el-Bekaa), a valley or plain in which Baalbek is situated. But this spot is far from possessing the dreariness and drought on which the point of the Psalmist's allusion depends. It does not appear necessary to understand that there is any reference to an actual

valley so called. The Psalmist, in exile, or at least at a distance from Jerusalem, is speaking of the privileges and happiness of those who are permitted to make the usual pilgrimages to that city, in order to worship Jehovah in the Temple: 'They knew the ways that lead thither, yea, though they must pass through rough and dreary paths, even a vale of tears; yet such are their hope and joy of heart that all this is to them as a well-watered country, a land crowned with blessings of the early rain.' Dr. Robinson (*Add. to Calmet*) concludes that something like this is the sense of the passage. Few versions regard the word as a proper name. The Sept. has *εἰς τὴν κοιλάδα τοῦ κλαυθμῶνος*, into the valley of the place of weeping; the Vulgate, in *valle lacrymarum*, in the vale of tears or weeping.

BACCHIDES (bäk'ki-dēz), (Gr. Βακχίδης, *bak-khee'dace*, son of Bacchin), the general of the Syrian king Demetrius, and governor *beyond the river*, i. e., the Euphrates (1 Macc. vii:8).

The king sent him with an army against Juúea, to establish the notorious Alcimus by force in the dignity of high-priest, 161 B. C. He left with Alcimus a body of troops, that he might maintain himself against Judas Maccabæus. But, as Judas continued to make progress, Bacchides returned the next year with a chosen army, vanquished and slew Judas at Laisa (1 Macc. ix:18), held Jonathan afterwards at bay, and fortified Jerusalem (ix:49, 50); but after the death of Alcimus, in the next year, he again withdrew his forces. In the following year (158 B. C.), however, he returned to Judca, on the invitation of some of the discontented Jews; but concluded a peace with Jonathan on reasonable terms, and left him to govern the Jewish state (1 Macc. ix:70, *seq.*).

BACHRITE (bäk'ríte), (Heb. בַּכְרִי, *bak-ree'*, belonging to Becher), the family name of the descendants of Becher, son of Ephraim (Num. xxvi:35).

BACKBITE (bäk'bít), (Heb. לַגַּב, *raaw-gal'*, to use the feet, as a talebearer), to speak evil of one in his absence.

The Hebrew word for it properly signifies to go to and fro in order to gather and spread calumny (Prov. xxv:23). A "backbiter" is a hater of God and is excluded from fellowship with him (Rom. i:30; Ps. xv:3; see 2 Cor. xii:20).

BACKSLIDE (bäk'slid), (Heb. נָסָה, *soog*, to go back), is gradually, voluntarily and insensibly to turn from the knowledge, faith, love, profession and practice of the truth of God, which we once solemnly avowed or attained to (Jer. iii:6-14; Hos. iv:16. Comp. Jer. ii:19; Prov. xiv:14).

Backslidings are healed when they are freely forgiven, and the sinner is recovered from them to a course of holiness (Hos. xiv:4). A "backslider in heart" is one who with secret good will allows himself in a deliberate course of revolting from God (Prov. xiv:14). To be "bent to backsliding" is to be strongly set on revolting from God, and disposed to take all opportunities of doing it (Hos. xi:7; Comp. Acts xxi:21; 2 Thess. ii:3; 1 Tim. iv:1).

BAD (bäd). See BYSSUS.

BADGER (bäj'ēr), (Heb. טַחַשׁ, *takh'ash*). This is unquestionably a wrong interpretation of the word *tachash*, since the badger is not found in Southern Asia, and has not as yet been noticed out of Europe.

The word occurs in the plural form in Exod. xxv:5; xxvi:14; xxxv:7, 23; xxxvi:19; xxxix:

34; Num. iv:6, 8, 10, 11, 12, 14, 25; and Ezek. xvi:10; and in connection with *oroth*, skins, is used to denote the covering of the tabernacle. Negroland and Central and Eastern Africa contain a number of ruminating animals of the great antelope family; they are known to the natives under various names, such as pacasse, empacasse, thacasse, facasse, and tachaitze, all more or less varieties of the word tachash; they are of considerable size; often of slaty and purple-gray colors, and might be termed stag-goats and ox-goats. Of these one or more occur in the hunting scenes on Egyptian monuments, and therefore we may conclude that the skins were accessible in abundance, and may have been dressed with the hair on for coverings of baggage, and for boots, such as we see worn by the human figures in the same processions. Thus we have the greater number of the conditions of the question sufficiently realized to enable us to draw the inference that tachash refers to a ruminant of the Aigocerine or Damaline groups, most likely of an iron-gray or slaty-colored species.

BADGERS' SKINS (băj'ers' skîns), (Heb. טַחַשׁ, *takh'ash*, badger; עוֹר, *ore*, skin; Ex. xxv:5; Ezek. xvi:10).

The true badger is rare, if known, in Arabia. It is believed that the skins meant were those of such marine animals as the dolphin, dugong, and seal. Dr. Robinson writes: "The superior" (of the convent of Mount Sinai) "procured for me a pair of the sandals usually worn by the Bedouin of the peninsula, made of the thick skin of a fish which is caught in the Red Sea. * * * The skin is clumsy and coarse, and might answer very well for the external covering of the tabernacle which was constructed at Sinai, but would seem hardly a fitting material for the ornamental sandals belonging to the costly attire of high-born dames in Palestine described by the prophet Ezekiel." Tristram adds: "As the *tachash* (badger) probably included also the seal, the sandals of the Jewish women may have been of that material, and so also may have been the covering of the tabernacle."

BAG (băg), the translation of several Hebrew and Greek terms.

1. *Khaw-rect'* (Heb. כְּבִיטָה, *pocket*), mentioned in 2 Kings v:23 as the "bags" in which Naaman placed the talents for Gehazi. Gesenius thinks that they were called *pockets* from their long, conelike shape. In Is. iii:22 the word is rendered "crisping pins," but denotes the reticules carried by Hebrew ladies.

2. *Tser-ore'* (Heb. צֶרֶרֶת, properly a "bundle" (Gen. xlii:35; 1 Sam. xxv:29), appears to have been used in carrying money on a long journey (Prov. vii:20; Hag. i:6).

3. *Keece* (Heb. כֶּסֶף), a bag for carrying weights (Deut. xxv:13; Prov. xvi:11; Mic. vi:11), and also used as a purse (Prov. i:14; Is. xlvi:6).

4. *Kel-ec'* (Heb. כֶּלֶעַץ, rendered "bag" in 1 Sam. xvii:40, 49, is a word of general meaning. It is the "sack" in which Jacob's sons carried grain (Gen. xlii:25), but in 1 Sam. ix:7; xxi:5, it denotes a bag or wallet for carrying food (A. V. "vessel"). The "shepherd's bag" (1 Sam. xvii:40) carried by David was probably (see Zech. xi:15, 16) used to hold the lambs which were unable to walk, and also materials for healing such as were sick and binding up those that were hurt (Comp. Ezek. xxxiv:4, 16).

5. In the New Testament two Greek words are employed; (a) γλωσσόκομον *gloce-sok'om-on*, the "bag" which Judas carried, probably a small box or chest (John xii:6; xiii:29); (b) the βαλάντιον (*bal-an'tee-on*) or *wallet* (Luke x:4; xxii:35, 36, *purse*; xii:33, *bag*). All of these were used as receptacles for money. (*Mc.* and *Str. Cyc.*)

BAGOAS (bā-gō'as), (Gr. Βαγώας, *bah-goh'as*), the eunuch or chamberlain who had charge of the tent of Holofernes and introduced Judith (Judith xii:11, 13, 15; xiii:1, 3; xiv:14).

BAHARUMITE (ba-hā'rum-īte), (Heb. בְּהַרְיָמִי, *bakh-ar-oo-mee'*), a native of Bahurim, one of David's heroes, Azmaveth by name (1 Chron. xi:33).

BAHURIM (ba-hū'rim), (Heb. בְּהַרְיָם, *bakh-oo-reen'*, young men), a place not far from Jerusalem beyond the Mount of Olives, on the road to the Jordan, where Shimei cursed and threw stones at David (2 Sam. xvi:5, 6; 1 Kings ii:8; Joseph. *Antiq.* vii:9, 7). (See **BARHUMITE**.)

Here, too, Jonathan and Ahimaaz eluded their pursuers (2 Sam. xvii:18), and Phaltiel bade farewell to his wife, as he was returning to King David (2 Sam. iii:16). It was a town of Benjamin, probably built by the young men who escaped the destruction of their tribe, and was thought to have been also named Almon (Josh. xxi:18), but the requirements of Bahurim will not at all suit Almon, according to some writers. But J. F. Stenning, *Hastings' Bib. Dict.*, says: "The Targum preserves a tradition which identifies Bahurim with Almon (Josh. xxi:18), the modern Almit, about four miles northeast of Jerusalem and one mile beyond Anathoth (Anâta), near the southern boundary of Benjamin. This view, which is accepted by most moderns, agrees with the local details supplied by the narrative of David's flight." He further says Barhumite (2 Sam. xxiii:31) is clearly a mistake for Baharumite, a native of Bahurim, which is more correctly given by the Chronicler (1 Chron. xi:33). (See **BAHARUMITE**.)

BAJITH (bā'jith), (Heb. בַּיִת, *bah'yith*, house), probably a city in Moab, where there may have been a celebrated idol temple; by others it is rendered *temple house* (Is. xv:2).

BAKBAKKAR (bak-băk'kar), (Heb. בַּקְבָּקָר, *bak-bak-kar'*, searcher), one of the Levites inhabiting the villages of the Netophathites, after the return from Babylon (1 Chron. ix:15), B. C. about 536.

BAKBUK (băk'buk), (Heb. בַּקְבֹּוק, *bak-book'*, a bottle), the head of one of the families of the Nethinim that returned from Babylon with Zerubabel (Ezra ii:51; Neh. vii:53), B. C. about 536.

BAKBUKIAH (băk-bu-kī'ah), (Heb. בַּקְבֹּוקִיָּהוּ, *bak-book-yaw'*, emptying, i. e., wasting of Jehovah).

1. A Levite, "second among his brethren," who dwelt at Jerusalem on the return from Babylon (Neh. xi:17; xii:9).

2. Apparently another Levite (B. C. 445), a porter (Neh. xii:25).

BAKEMEATS (băk'mêts), (Heb. מַעֲשֵׂה אֱפֵסָה, *mah-ak-aw' mah-as-eh' aw-faw'*, food the work of the baker), baked provisions (Gen. xl:17).

The margin renders literally *meat of Pharaoh*, the work of a *baker* or *cook*. In Shakespeare the form *baked meats* occurs with a similar signification:

The funeral *baked meats*

Did coldly furnish forth the marriage tables.

—Swinton, *Bib. Word Bk.*

BALAAM (bā'laam or bā'la-am), (Heb. בִּלְעָם, *bil-awm'*, foreigner).

The name is supposed by some to mean *lord of the people*; but by others, *destruction of the people*—an allusion to his supposed supernatural powers. Balaam is called the Son of *Bosor*, which Gesenius attributes to an early corruption of the text, but Dr. Lightfoot considers it to be a Chaldaism, and infers from the apostle's use of it that he was then resident at Babylon. (Works, vol. vii, p. 80; *Sermon on the Way to Balaam*.) In the other passage of the New Testament (Rev. ii: 14, 15) the sect of the Nicolaitans is described as following the doctrine or teaching of Balaam; and it appears not improbable that this name is employed symbolically, as Νικόλαος, Nicolaus, is equivalent in meaning to Balaam.

(1) **First Mention.** The first mention of this remarkable person is in Numbers xxii:5, where we are informed that Balak 'sent messengers unto Balaam, the son of Beor, to Pethor, which is by the river of the land of the children of his people.' Twelve Hebrew MSS. examined by Dr. Kennicott, two of De Rossi's, the Samaritan text, with the Syriac and Vulgate versions, instead of 'children of his people,' read 'children of Ammon.' This is approved by Houbigant and Kennicott, but is inconsistent with Deut. xxiii:4, which informs us that Pethor was in Mesopotamia; for the Ammonites, as Rosenmüller observes, never extended so far as the Euphrates, which must be the river alluded to. If the received reading be correct, it intimates that Pethor was situated in Balaam's native country, and that he was not a mere sojourner in Mesopotamia, as the Jewish patriarchs were in Canaan. In Joshua xiii:22, Balaam is termed 'the Soothsayer,' a word which, with its cognates, is used almost without exception in an unfavorable sense. Balak's language, 'I wot he whom thou blessest is blessed' (Num. xxii:6), Origen considers as only designed to flatter Balaam and render him compliant with his wishes.

Of the numerous paradoxes which we find in 'this strange mixture of a man,' as Bishop Newton terms him, not the least striking is that with the practice of an art expressly forbidden to the Israelites ('there shall not be found among you one that useth divination, Deut. xviii:10), for all that do these things are an abomination to the Lord (verse 12), he united the knowledge and worship of Jehovah, and was in the habit of receiving intimations of his will: 'I will bring you word again as the Lord (Jehovah) shall speak unto me' (Num. xxii:8). The inquiry naturally arises, by what means did he become acquainted with the true religion? Dr. Hengstenberg suggests that he was led to renounce idolatry by the reports that reached him of the miracles attending the Exodus; and that having experienced the deceptive nature of the soothsaying art he hoped, by becoming a worshiper of the God of the Hebrews, to acquire fresh power over nature and a clearer insight into futurity. Yet the sacred narrative gives us no reason to suppose that he had any previous knowledge of the Israelites. In Num. xxii:11 he merely repeats Balak's message, 'Behold there is a people come out of Egypt,' etc., without intimating that he had heard of the miracles wrought on their behalf. The allusion in Num. xxiii:22 might be prompted by the Divine affectus which he then felt.

(2) **Some Knowledge of Truth.** And had he been actuated, in the first instance, by motives of personal aggrandizement, it seems hardly probable that he would have been favored with those Di-

vinc communications with which his language in Num. xxii:8 implies a familiarity. Since, in the case of Simon Magus, the offer to 'purchase the gift of God with money' (Acts viii:20) called forth an immediate and awful rebuke from the apostles, would not Balaam's attempt to obtain a similar gift with a direct view to personal emolument and fame have met with a similar repulse? Dr. H. supposes, indeed, that there was a mixture of a higher order of sentiments, a sense of the wants of his moral nature, which led him to seek Jehovah, and laid a foundation for intercourse with him. In the absence of more copious and precise information, may we not reasonably conjecture that Jacob's residence for twenty years in Mesopotamia contributed to maintain some just ideas of religion, though mingled with much superstition? To this source and the existing remains of Patriarchal religion Balaam was probably indebted for that truth which he unhappily 'held in unrighteousness' (Rom. i:18).

(3) **Vision or Reality.** On the narrative contained in Num. xxii:22-35 a difference of opinion has long existed, even among those who fully admit its authenticity. The advocates for a literal interpretation urge that in a historical work and a narrative bearing the same character it would be unnatural to regard any of the occurrences as taking place in vision, unless expressly so stated; that it would be difficult to determine where the vision begins and where it ends; that Jehovah's 'opening the mouth of the ass' (Num. xxii:28) must have been an external act; and, finally, that Peter's language is decidedly in favor of the literal sense.

'The dumb ass, speaking with a man's voice, reproved the madness of the prophet' (2 Peter ii:16). Those who conceive that the speaking of the ass and the appearance of the Angel occurred in vision to Balaam (among whom are Maimonides, Leibnitz and Hengstenberg) insist upon the fact that dreams and visions were the ordinary methods by which God made himself known to the prophets (Num. xii:6); they remark that Balaam, in the introduction to his third and fourth prophecies (xxiv:3, 4, 15), speaks of himself as 'the man who had his eyes shut,' and who, on falling down in prophetic ecstasy, had his eyes opened; that he expressed no surprise on hearing the ass speak; and that neither his servants nor the Moabish princes who accompanied him appear to have been cognizant of any supernatural appearance. Dr. Jortin supposes that the Angel of the Lord suffered himself to be seen by the beast, but not by the Prophet; that the beast was terrified and Balaam smote her, and then fell into a trance, and in that state conversed first with the beast and then with the Angel. The Angel presented these objects to his imagination as strongly as if they had been before his eyes, so that this was still a miraculous or preternatural operation. In dreaming, many singular incongruities occur without exciting our astonishment; it is therefore not wonderful if the prophet conversed with his beast in vision, without being startled at such a phenomenon (See Jortin's *Dissertation on Balaam*, pp. 190-194).

(4) **Prophecies.** The limits of this article will not allow of an examination of Balaam's magnificent prophecies, which, as Herder remarks (*Geist der Ebraischen Poesie*, ii:221), 'are distinguished for dignity, compression, vividness and fulness of imagery; there is scarcely anything equal to them in the later Prophets, and' (he adds, what few readers, probably, of Deut. xxxii, xxxiii, will be disposed to admit) 'nothing in the discourses of Moses.' When Balak had pointed out

the camp of the Israelites Balaam desired seven altars to be built, and a bullock and a ram to be offered on each altar (Num. xxiii *ad fin.*). Balak stood by the burnt offering, while Balaam withdrew to his enchantments. God bade him return and utter an oracular blessing on Israel, and not a curse. This he did a second and a third time, to the extreme mortification of Balak, who dismissed him in great anger, Balaam declaring that he could not "go beyond the commandment of the Lord, to do either good or bad of his own mind." He subsequently foretold what Israel should, in future times, do to the nations round about, and, after having advised Balak to engage Israel in idolatry and whoredom, that they might offend God and be forsaken by him, quitted his territories for his own land (Num. xxiv:14; Mic. vi:5; 2 Pet. ii:15; Jude 11; Rev. ii:14). This bad counsel was pursued; the young women of Moab inveigled the Hebrews to the feasts of Baal-Peor; persuaded them to idolatry and seduced them to impurity. God commanded Moses to avenge this insidious procedure, and he declared war against the Midianites, of whom he slew many, and killed five of their princes (Num. xxv:17, 18). Among those who fell on this occasion was Balaam (xxxii:2, 7, 8).

BALAC (bā'lak), (Rev. ii:14), another form of anglicizing Balak. See BALAK.

BALADAN (bāl'a-dān), (Heb. בַּלְדָּן, *bal-ad-awn'*, having power). See MERODACH-BALADAN.

BALAH (bā'lah), (Heb. בָּלָה, *baw-law'*, withered, old). A city of Simeon (Josh. xix:3). (See BAALAH).

BALAK (bā'lak), (Heb. בָּלָק, *baw-lawk'*, empty), son of Zippor, and king of the Moabites (Num. xxii:2, 4), who was so terrified at the approach of the victorious army of the Israelites, who in their passage through the desert had encamped near the confines of his territory, that he applied to Balaam, who was then reputed to possess great influence with the higher spirits, to curse them.

The result of this application is related under another head. (See BALAAM.) From Judg. xi:25, it is clear that Balak was so certain of the fulfilment of Balaam's blessing, 'blessed is he that blesseth thee, and cursed is he that curseth thee' (Num. xxiv:9), that he never afterwards made the least military attempt to oppose the Israelites (Comp. Mic. vi:5; Rev. ii:14).

BALAMO (bāl'a-mō), (Gr. Βελαμών, *bel-ah-mohn*, Judith viii:3, Apocrypha). See BAAL-HAMON.

BALANCES (bāl'ans-ez), (Heb. מִזְנֵי, *mo-zeh-nah'yeem*, i. e., two scales).

That these were known to the early Hebrews and in common use is evident from the frequent reference to them in the Old Testament (Lev. xix:36; Job vi:2; xxxi:6; Hos. xii:7, etc.). In the early periods of the world gold and silver were paid by weight, so that persons employed in traffic of any kind carried with them a pair of scales or balances and different weights (generally stones of different sizes) in a pouch or bag. Dishonest men would carry two sorts of weights, the lighter to sell with and the other to buy with. This explains the allusions (Mic. vi:11; Hos. xii:7).

In pictures on monuments is represented a balance in which the scales are simply a pair of weights. There are two bags of money which are to be equalized, one of which is a standard. The scribe stands by to register the result. The probability is that the Hebrews used the common balances of Egypt. (See WEIGHTS AND MEASURES.)

Figurative. (1) Men are weighed in the balances, when they are tried by the law, word or judgments of God, and their goodness or badness clearly discovered (Dan. v:27; Job xxxi:6; Ps. lxii:9). (2) The balances in the hand of him that sat on the black horse, appearing under the third seal, may denote the strict equity of Divine Providence; the famed equity of Severus and other persecutors then living, and such scarcity of provisions, temporal and spiritual, as obliged men to eat bread as by weight (Rev. vi:5; see also Lev. xxvi:26; Ezek. iv:16, 17). (3) The *balancings of the clouds*, is the manner in which they are poised and supported in the air and formed for their proper purpose (Job xxxvii:16). (4) To weigh with an unjust balance is *abomination* to the Lord (Prov. xi:1).

BALDNESS (bald'nēs), (Heb. from בָּלָה, *kaw-ray'akh*, bald, i. e., on the top or back of the head; גִּיבָה, *ghib-bay'akh*, bald on the forehead).

Baldness may be artificial or natural. Artificial baldness, caused by cutting or shaving off the hair of the head, a custom among all the ancient and Eastern nations, in token of mourning for the death of a near relative (Jer. xvi:6; Amos. viii:10; Micah i:16). Moses forbade it to the Israelites (Deut. xiv:1), probably for the very reason of its being a heathen custom, for a leading object of his policy was to remove the Jews as far as possible from the ways and customs of the surrounding nations. Natural baldness, though Moses did not consider it as a symptom of leprosy, and declared the man afflicted with it to be clean and sound (Lev. xiii:40, *sq.*), yet was always treated among the Israelites with contempt (*ibid.*), and a bald man was not unfrequently exposed to the ridicule of the mob (2 Kings ii:23; Is. iii:24; Comp. Suet. *Cæs.* 45; *Domit.* 18); perhaps from the suspicion of being under some leprous taint, as the Hebrew word *kaurazakh* originally implied an *ulcer*, or an *ulcered person*. The public prejudice thus entertained against a baldheaded man was perhaps the main reason why he was declared unfit for the priestly office (Lev. xxi:20; *Mishn. tit. Bechoroth*, vii:2).

BALL (bal), (Heb. בָּוֶר, *dure*, Is. xxii:18; rendered "round about," xxix:3, and is employed as a ring or circle; and "burn" in Ezek. xxiv:5. In the last reference it probably means "heap," as in the margin). The ball was used anciently in many sports, and was similarly constructed to those now in use.

BALM (bām), (Heb. טְסֵרֵי, *tser-ee'*, or טְסֹרֵי, *tsor-ee'*, to crack), a medicinal gum. (See BALSAM TREE).

BALSAM TREE (bal'sam trē), or **BALSAM**. The word *Balsamon* may come from *Baal-shemen*, lord of oil; or the most precious of perfumed oils.

The word is not in the Hebrew of the Song of Solomon, but we find the vineyards of Engedi (i:14), which are believed to have been gardens of the balsam tree. In Ezek. xxvii:17 we find the word *pannag*; which the Vulgate translates *Balsamum*, and which is so understood by the Chaldee and other interpreters. The usual Hebrew word is *Tzeri*, the *opobalsam*, which was found particularly in Gilad.

The balsam tree, though not a native of Judea, was cultivated in great perfection in the gardens near Jericho, on the banks of Jordan. Josephus, speaking of the vale of Jericho, says: "Now here is the most fruitful country of Judæa, which bears a vast number of palm trees, besides the balsam tree, whose sprouts they cut with sharp

stones, and at the incisions they gather the juice, which drops down like tears" (*De Bell. Jud.* lib. 1, chap. 7, sec. 6). The balsam produced by these

Balsam.

trees was of such consequence as to be noticed by all the writers who treated of Judæa, and it was so dear that it sold for double its weight in silver.

(1) **Balm of Gilead.** This balsam is mentioned in the Scriptures under the name of *balm of Gilead* (*Jer.* viii:22; xli:11; li:8). Since the conquest of Palestine by the Romans the balsam tree has entirely disappeared; not one is now to be found. The balsam, or balm, is an evergreen shrub, or tree, which grows to about fourteen feet high, spontaneously and without culture, in its native country Azab, and all along the coast to Babelmandel. The trunk is about eight or ten inches in diameter, the wood light and open, gummy, and outwardly of a reddish color, incapable of receiving a polish, and covered with a smooth bark, like that of a young cherry tree. It flattens at top, like trees that are exposed to snow blasts, or sea air, which gives it a stunted appearance. It is remarkable for a penury of leaves; the flowers are like those of the acacia, small and white, only that three hang upon those filaments or stalks where the acacia has but one. Two of these flowers fall off and leave a single fruit; the branches that bear these are the shoots of the present year; they are of a reddish color and rougher than the old wood. After the blossoms follow yellow, fine-scented seed, enclosed in a reddish-black pulpy nut, very sweet and containing a yellowish liquor like honey. They are bitter and a little tart upon the tongue, of the same shape and size of the fruit of the turpentine tree, thick in the middle and pointed at the ends.

(2) **Valuable Product.** There were three kinds of balsam extracted from this tree. The first was called *opobalsamum* and was most highly esteemed. It was that which flowed spontaneously, or by means of an incision from the trunk or branches of the tree in summer time. The second was *carpobalsamum*, made by pressing the fruit when in maturity. The third, and least esteemed of all, was *hylobalsamum*, made by a decoction of the buds and small young twigs.

The great value set upon this drug in the East is traced to the earliest ages. The Ishmaelites or Arabian carriers or merchants, trafficking with the Arabian commodities into Egypt, brought

with them balm as a part of their cargo (*Gen.* xxxvii:25; xliii:11).

According to Strabo, it is evident that balm was transplanted into Judæa from Saba, flourished and became an article of commerce in Gilead. "A company of Ishmaelites came from Gilead with their camels bearing spices, and balm, and myrrh, going to carry down to Egypt" (*Gen.* xxxvii:25).

BAMAH (bā'mah), (Heb. בָּמָה, *bar-maw'*, height), a high place where idols were worshiped.

The word appears in its Hebrew form only in *Ezek.* xx:29, while in the first part of the verse it is translated "high place." It is obviously a contemptuous derivation that the prophet means to suggest; but the precise point of it cannot be clearly ascertained. The word is resolved into its syllables, and these appear to be identified respectively with two words meaning 'come' and 'what'; thus: 'What (Mah) is the Ba-mah whereunto ye come (Ba)?' (*J. Skinner, Hastings' Bib. Dict.*)

BAMIAN (bā'mi-an) is a town half as large as Balkh, situated on a hill.

Before this hill runs a river, the stream of which flows into Gurjestan. Bamian has not any gardens or orchards, and it is the only town in this district situated on a hill. The cold part of Khorasan is about Bamian. This town is affirmed to have been the residence of Shem.—*Calmet.*

BAMOTH (bā'moth), (Heb. בְּמוֹתַי, *bar-mōth'*, heights), the forty-seventh station of the Israelites, perhaps the same as Bamoth-baal (*Num.* xxi:19, 20), in the country of the Moabites. (See **BAMOTH-BAAL**.)

BAMOTH-BAAL (bā'moth-bā'äl), Heb. בְּמוֹתַי בְּאֵל, *bar-mōth' bah'al*, heights of Baal), a place E. of Jordan, and lying upon the River Arnon (*Josh.* xiii:17). In the R. V. at *Num.* xxi:28, called "the high places of Arnon." "Bamoth-baal falls into place as the ridge S. of the stream of Wady Jideid, now called the 'Crucified One,' which presents a group of more than one hundred rude stone monuments" (*Harper, The Bible and Mod. Dis.*, p. 122, quoted in *Barnes' Bib. Dict.*).

BAND (bānd), the translation of several Hebrew and Greek words, especially of *σπεῖρα*, *spi'rah*, a cohort.

1. A chain or cord (*Luke* viii:29; *Acts* xvi:26).

2. A company of men, warriors, cattle, locusts; so called because chained together in society, or the resemblance thereof (*2 Kings* xxiv:2; *Acts* x:1; *Gen.* xxxii:10; *Prov.* xxx:27).

3. A band of Roman soldiers consisted of about 1,000 (*Acts* xxi:31, and xxvii:1).

Figurative. (1) The arguments, proofs and influences of Divine love are called *bands of a man*; because in a way suited to our rational nature, they draw, and engage us to follow and obey the Lord (*Hos.* xi:4). (2) Governments and laws are *bands* that restrain from sin and draw to duty (*Ps.* ii:3; *Jer.* v:5; *Zech.* xi:7-14). (3) Faith and love are called *bands*; they unite and fasten the saints to Christ and His people (*Col.* ii:19; *Eph.* iv:16). (4) Slavery, distress, fear, perplexity, are called *bands*; they restrain men's liberty and render them uneasy (*Lev.* xxvi:13; *Ezek.* xxxiv:27; *Is.* xxviii:22, and lii:2). (5) To have *no bands in death* is to die without great pain and without fear and terror of future misery (*Ps.* lxxiii:4). (6) Sinful lusts and customs are *bands*; they weaken our inward strength,

obstruct our holy obedience and powerfully draw and constrain us to work wickedness; nor is it easy to get rid of them (Is. lviii:6; Eccles. vii:26). (7) The *band of iron and brass*, securing the root of Nebuchadnezzar's visionary tree, was the fixed purpose and almighty providence of God, securing his kingdom to him after his madness (Dan. iv:15, 23).

BANI (bā'nī), (Heb. בָּנִי, *baw-nee'*, built).

1. A Gadite, one of David's mighty men (2 Sam. xxiii:36), B. C. about 1000.

2. A descendant of Pharez and father of Imri, one of whose descendants returned from Babylon (1 Chron. ix:4), B. C. long before 536.

3. A Levite, son of Shamer and father of Amzi, a descendant of Merari (1 Chron. vi:46), B. C. before 1300.

4. A head of a family or of descendants, to the number of six hundred and forty-two, who returned from Babylon with Zerubbabel (Ezra ii:10). He is elsewhere (Neh. vii:15) called Binnui. Perhaps the same mentioned in Neh. x:14.

5. A Levite, whose son, Rehum, repaired a portion of the wall of Jerusalem (Neh. iii:17). Apparently the same Bani was among those who were conspicuous in all the reforms on the return from Babylon (Neh. viii:7; ix:4, 5; x:13). He had another son named Uzzi, who was appointed overseer of the Levites at Jerusalem; his own father's name was Hashabiah (Neh. xi:22).

6. Another Bani is mentioned in Ezra x:29, 34, 38. (Mc. & Str. *Cyc.*)

BANISH (bān'ish). See BANISHMENT.

BANISHMENT (bān'ish-ment), (Heb. מִיִּשְׁתָּהּ, *mad-doo'akh*, means or cause of banishment, Lam. ii:14; Chald. שָׂרָה שָׂרָה, *shar-shaw'*, extirpating, rooting out, Ezra vii:26). This form of punishment did not exist among the Hebrews as among the Romans. (See PUNISHMENTS.)

BANNER (bān'nēr). See ENSIGN.

BANQUET (bān'kwēt), (Heb. מִשְׁתֵּה, *mish-teh'*, drinking, a shouting for joy).

The entertainments spoken of in Scripture, on however large a scale, and of however sumptuous a character, were all provided at the expense of one individual; the *επαυος* of the Greeks, *a meal at which every guest present contributed his proportion*, being apparently unknown to the Jews, or at least practised only by the humbler classes, as some suppose that an instance of it occurs in the feast given to our Lord, shortly before his Passion, by his friends in Bethany (Matt. xxvi:2; Mark xiv:1; Comp. with John xii:2).

(1) **Time.** Festive meetings of this kind were held only towards the close of the day, as it was not till business was over that the Jews freely indulged in the pleasures of the table, and although in the days of Christ these meals were, after the Roman fashion, called *suppers*, they corresponded exactly to the dinners of modern times, the hour fixed for them varying from five to six o'clock P. M., or sometimes later.

(2) **Occasions.** On occasions of ceremony the company were invited a considerable time previous to the celebration of the feast, and on the day and at the hour appointed, an express by one or more servants, according to the number and distance of the expected guests, was dispatched to announce that the preparations were completed and that their presence was looked for immediately (Matt. xxii:8; Luke xiv:17). (Grotius, *in loc.*; also Morier's *Journey*, p. 73). This custom obtains in the East at the present day, and the

second invitation, which is always verbal, is delivered by the messenger in his master's name, and frequently in the very language of Scripture: 'Behold I have prepared my dinner; my oxen and fatlings are killed, and all things are ready' (Matt. xxii:4).

(3) **Etiquette.** At the small entrance door a servant was stationed to receive the tablets or cards of those who were expected, and as curiosity usually collected a crowd of troublesome spectators, anxious to press forward into the scene of gaiety, the gate was opened only so far as was necessary for the admission of a single person at a time, who, on presenting his invitation ticket, was conducted through a long and narrow passage into the receiving-room, and then, after the whole company were assembled, the master of the house shut the door with his own hands—a signal to the servant to allow himself to be prevailed on neither by noise nor by importunities, however loud and long continued, to admit the bystanders. To this custom there is a manifest reference in Luke xiii:24 and Matt. xxv:10.

One of the first marks of courtesy shown to the guests after saluting the host was the refreshment of water and fragrant oil or perfumes, and hence we find our Lord complaining of Simon's omission of these customary civilities (Luke vii:44; see also Mark vii:4). (See ANOINTING.) But a far higher, though necessarily less frequent attention paid to their friends by the great, was the custom of furnishing each of the company with a magnificent habit of a light and showy color, and richly embroidered, to be worn during the festivity (Eccles. ix:8; Rev. iii:4, 5).

To persist in appearing in one's own habiliments implied a contempt both for the master of the house and his entertainment, which could not fail to provoke resentment—and our Lord therefore spoke in accordance with a well-known custom of his country when, in the parable of the marriage of the king's son, he describes the stern displeasure of the king on discovering one of the guests without a wedding garment, and his instant command to thrust him out (Matt. xxii:11, 13).

(4) **Master of the Feast.** At private banquets the master of the house, of course, presided and did the honors of the occasion; but in large and mixed companies it was anciently customary to elect a governor of the feast (John ii:9; see also Eccles. xxxii:1), who should not merely perform the office of chairman, ἀρχιτελικλιος, *master of the feast*, in preserving order and decorum, but take upon himself the general management of the festivities.

The guests were scrupulously arranged according to their respective ranks. This was done either by the host or governor, who, in the case of a family, placed them according to seniority (Gen. xliii:33), and in the case of others, assigned the most honorable a place near his own person; or it was done by the party themselves, on their successive arrivals, and after surveying the company, taking up the position which it appeared fittest for each according to their respective claims to occupy. It might be expected that among the Orientals, by whom the laws of etiquette in these matters are strictly observed, many absurd and ludicrous contests for precedence must take place, from the arrogance of some and the determined perseverance of others to wedge themselves into the seat they deem themselves entitled to. Morier, who is well acquainted with the manners of the Persians, informs us that it is easy to observe by the countenances of those present when any

one has taken a higher place than he ought. Dr. Clarke states that at a wedding feast he attended in the house of a rich merchant at St. Jean d'Acre, two persons who had seated themselves at the top were noticed by the master of ceremonies and obliged to move lower down. (See also Joseph. *Antiq.* xv:2). The knowledge of these peculiarities serves to illustrate several passages of Scripture (Prov. xxv:6, 7; Matt. xxiii:6, and especially Luke xiv:7, where we find Jesus making the unseemly ambition of the Pharisees the subject of severe and merited animadversion).

(5) **Reclining.** According to Lightfoot (*Exercit. on John* xiii:23), the tables of the Jews were either wholly uncovered, or two-thirds were spread with a cloth, while the remaining third was left bare for the dishes and vegetables. In the days of our Lord the prevailing form was the triclinium, the mode of reclining at which is described elsewhere. (See ACCUBATION; EATING). This effeminate practice was not introduced until near the close of the Old Testament history, for amongst all its writers prior to the age of Amos *yashab, to sit*, is the word invariably used to describe the posture at table (1 Sam. xvi, margin, and Ps. cxxviii:3, implying that the ancient Israelites sat round a low table, cross-legged, like the Orientals of the present day), whereas *ἀνακλίνω*, to recline is the word employed in the Gospel. And whenever the word 'sit' occurs in the New Testament, it ought to be translated 'lie,' according to the universal practice of that age.

(6) **Method of Eating.** The convenience of spoons, knives and forks being unknown in the East, or, where known, being a modern innovation, the hand is the only instrument used in conveying food to the mouth, and the common practice, their food being chiefly prepared in a liquid form, is to dip their thin, wafer-like bread in the dish, and, folding it between their thumb and two fingers, enclose a portion of the contents. It is not uncommon to see several hands plunged into one dish at the same time. But where the party is numerous the two persons near or opposite are commonly joined in one dish; and accordingly, at the last Passover, Judas, being close to his master, was pointed out as the traitor by being designated as the person 'dipping his hand with Jesus in the dish.' The apostle John, whose advantageous situation enabled him to hear the minutest parts of the conversation, has recorded the fact of our Lord, in reply to the question, 'Who is it?' answering it by 'giving a sop to Judas when he had dipped' (John xiii:26).

In earlier ages a double or a more liberal portion, or a choice piece of cookery, was the form in which a landlord showed his respect for the individual he delighted to honor (Gen. xliii:34; 1 Sam. i:4; ix:23; Prov. xxxi:15; see Voller's *Grec. Antiq.* ii:387; Forbes' *Orient. Mem.* iii:187).

In the course of the entertainment servants are frequently employed in sprinkling the head and person of the guest with odoriferous perfumes, which (probably to counteract the effects of too copious perspiration) they use in great profusion, and the fragrance of which, though generally too strong for Europeans, is deemed an agreeable refreshment (see Ps. xlv:8; xxiii:5; cxxxiii:2).

(7) **Diversion.** The guests were entertained with exhibitions of music, singers and dancers, riddles, jesting and merriment (Is. xxviii:1; Wisd. ii:7; 2 Sam. xix:35; Is. v:12; xxv:6; Judg. xiv:12).

(8) **Cookery.** According to the favorite cookery of the Orientals, their animal food is for the most part cut into small pieces, stewed, or prepared in a liquid state, such as seems to have been

the 'broth' presented by Gideon to the angel (Judg. vi:19). The made-up dishes are 'savory meat,' being highly seasoned, and bring to remembrance the marrow and fatness which were esteemed as the most choice morsels in ancient times. As to drink, when particular attention was intended to be shown to a guest, his cup was filled with wine till it ran over (Ps. xxiii:5), and it is said that the ancient Persians began their feasts with wine, whence it was called 'a banquet of wine' (Esther v:6).

The hands, for occasionally both were required, besmeared with grease during the process of eating, were anciently cleaned by rubbing them with the soft part of the bread, the crumbs of which, being allowed to fall, became the portion of dogs (Matt. xv:27; Luke xvi:21). But the most common way now at the conclusion of a feast is for a servant to go round to each guest with water to wash, a service which is performed by the menial pouring a stream over their hands, which is received into a strainer at the bottom of the basin. This humble office Elisha performed to his master (2 Kings iii:11).

Our Lord recommended his wealthy hearers to practice giving entertainments rather than spend their fortunes, as they did, on luxurious living (Luke xiv:12); and as such invitations to the poor are of necessity given by public proclamation, and female messengers are employed to publish them (Hasselquist saw ten or twelve thus perambulating a town in Egypt), it is probably to the same venerable practice that Solomon alludes in Prov. ix:3.

(9) **Seventeenth Century Signification.** In the seventeenth century and earlier, banquet frequently signified, not the general feast, but the wine that came after; not eating and drinking, but drinking only.

'Bring in the banquet quickly; wine enough
Cleopatra's health to drink.'

Shaks. *Ant. and Cleop.* I. ii. 11.

'We'll dine in the great room, but let the music
And banquet be prepared here.'

Massinger, *Unnat. Comb.* iii. 1.

Figurative. To those who believe in the symbolical character of Solomon's Song there is a figurative meaning to *banquet*. Christ's word, covenant, church, and intimate fellowship with Him, are called the *banqueting-house*, or *house of wine*; thereby the saints are refreshed, satisfied, strengthened, exhilarated, encouraged and comforted against all their fears and griefs (Cant. ii:4).

BAPTISM (băp'tiz'm), the application of water as a rite of cleansing, purification, or initiation; a Christian sacrament.

The word "baptism" is the English form of the Greek βαπτισμός, *bap-tis-mos*'. The verb from which this noun is derived—βαπτίζω, *bap-tid'zo*—is held by some scholars to mean "to dip, immerse." But this meaning is held by others to be not the most exact or common, but rather a meaning that is secondary or derived. By the latter it is claimed that all that the term necessarily implies is that the element employed in baptism is in close contact with the person or object baptized. The importance of this branch of the discussion has often been greatly overestimated as settling the proper mode of the rite.

A conviction of the holiness of God excites in man the notion that he cannot possibly come into any amicable relation with Him before he is cleansed of sin, which separates him from God.

This sentiment found a very widely extended symbolic expression in the lustrations which formed an essential part of the ceremonial creeds of the ancient nations.

In the Septuagint the simple verb βάπτειν is frequent in the sense of 'dip' (Exod. xii:22; Lev. iv:6, 17; ix:9; xiv:6, 16, 51), or 'immerse' (Job ix:31). The intensive βαπτίζειν occurs four times: twice literally, of Naaman dipping in the Jordan (2 Kings v:14), and of Judith bathing (Judith xii:7); once metaphorically, ἡ ἀνομία με βαπτίζειν (Is. xxi:4), and once of ceremonial washing after pollution, βαπτίζομενος ἀπὸ νεκροῦ (Sirach xxxi; xxxiv:25).

The usual verb for ceremonial washing is λούεσθαι (Lev. xiv:8, 9; xv:5-10, 13, 16-22; xvi:4, 24-28), the middle voice being used because the unclean person performed this cleansing for himself. The active is used of Moses washing Aaron and his sons before they exercised their ministry (Exod. xxix:4; xl:12; Lev. viii:6), and of the Lord washing Jerusalem (Ezek. xvi:4). But βαπτίζειν is never used in the Septuagint of any initiatory rite. (A. Plummer, *Hastings' Bib. Dict.*)

In the language of the prophets, cleansing with water is used as an emblem of the purification of the heart, which in the Messianic age is to glorify the soul in her innermost recesses, and embrace the whole of the theocratic nation (Ezek. xxxvi:25, sq.; Zech. xiii:1). Such declarations gave rise to or nourished the expectation that the advent of the Messiah would manifest itself by a preparatory lustration, by which Elijah or some other great prophet would pave the way for him. This supposition lies evidently at the bottom of the questions which the Jews put to John the Baptist (John i:25; Comp. Matt. and Luke iii:7), whether he was the Messiah, or Elijah, or some other prophet. Thus we can completely clear up the historical derivation of the rite, as used by John and Christ, from the general and natural symbol of baptism, from the Jewish custom in particular, and from the expectation of a Messianic consecration. Danz, Ziegler and others have, nevertheless, supposed it to be derived from the Jewish ceremonial of baptizing *proselytes*; and Wetstein has traced that rite up to a date earlier than Christianity. But this opinion is not at all tenable: for, as an act which strictly gives *validity* to the admission of a proselyte, and is no mere *accompaniment* to his admission, baptism certainly is not alluded to in the New Testament; while as to the passages quoted in proof from the classical (profane) writers of that period they are all open to the most fundamental objections. Nor is the utter silence of Josephus and Philo on the subject, notwithstanding their various opportunities of touching on it, a less weighty argument against this view. It is true that mention is made in the Talmud of that regulation as already existing in the first century A. D.; but such statements belong only to the traditions of the Gemara and require careful investigation before they can serve as proper authority.

1. Jewish Rite. This Jewish rite was probably originally only a purifying ceremony; and it was raised to the character of an initiating and indispensable rite co-ordinate with that of sacrifice and circumcision, only *after* the destruction of the Temple, when sacrifices had ceased, and the circumcision of proselytes had, by reason and public edicts, become more and more impracticable.

2. Baptism of John. It was the principal object of John the Baptist to combat the prevailing opinion that the performance of external ceremonies was sufficient to secure participation in the kingdom of God and his promises; he required

repentance, therefore (βάπτισμα μετανοίας), *baptism of repentance*, as a preparation for the approaching kingdom of the Messiah. That he may possibly have baptized *heathens* also seems to follow from his censuring the Pharisees for confiding in their descent from Abraham, while they had no share in his spirit; yet it should not be overlooked that this remark was drawn from him by the course of the argument (Matt. iii:8, 9; Luke iii:7, 8).

We must, on the whole, assume that John considered the existing Judaism as a stepping-stone by which the Gentiles were to arrive at the kingdom of God in its Messianic form.

The general point of view from which John contemplated the Messiah and his kingdom was that of the Old Testament, though closely bordering on Christianity. He regards, it is true, an alteration in the mind and spirit as an indispensable condition for partaking in the kingdom of the Messiah; still he looked for its establishment by means of conflict and external force, with which the Messiah was to be endowed, and he expected in him a judge and avenger, who was to set up outward and visible distinctions. It is, therefore, by no means a matter of indifference whether baptism be administered in the name of that Christ who floated before the mind of John, or of the suffering and glorified One, such as the apostles knew him, and whether it was considered a preparation for a political or a consecration into a spiritual theocracy. John was so far from this latter view, so far from contemplating a purely spiritual development of the kingdom of God, that he even began subsequently to entertain doubts concerning Christ (Matt. xi:2). Tertullian distinguishes the essential characteristics of the two baptisms in their spirit and nature. To that of John he ascribes the *negative character of repentance*, and to the Christian the *positive impartation of new life*. (*De Bapt.* x:11); a distinction which arises out of the relation of *law* and *gospel*, and is given in the words of the Baptist himself—that *he* baptizes with water and unto repentance, while the greater One who was to come after him would baptize with the Holy Ghost (Matt. iii:11; Luke iii:16; John i:26). John's baptism had not the character of an immediate, but merely of a preparatory consecration for the glorified theocracy (John i:31). The apostles, therefore, found it necessary to re-baptize the disciples of John, who had still adhered to the notions of their master on that head (Acts xix). To this apostolic judgment Tertullian appeals, and in his opinion coincided the most eminent teachers of the ancient church, both of the East and the West.

3. Baptism of Jesus by John. (Matt. iii:13, sq.; Mark i:9, sq.; Luke iii:21, sq.; comp. John i:10, sq.; the latter passage refers to a time *after* the baptism, and describes, ver. 32, the incidental facts attending it). The baptism of Jesus, as the first act of his public career, is one of the most important events recorded in evangelical history; great difficulty is also involved in reconciling the various accounts given by the evangelists of that transaction, and the several points connected with it. To question the fact itself, not even the *negative criticism* of Dr. Strauss has dared. This is, however, all that has been conceded by that criticism, viz.: the mere and bare fact 'that Christ was baptized by John,' while all the circumstances of the event are placed in the region of mythology or fiction.

(1) **Critical Questions.** Critical inquiry suggests the following questions:

1. In what relation did Jesus stand to John before the baptism?

2. What object did Jesus intend to obtain by that baptism?

3. In what sense are we to take the miraculous incidents attending that act?

With regard to the first point, we might be apt to infer, from Luke and Matthew, that there had been an acquaintance between Christ and John even prior to the baptism; and that hence John declines (Matt. iii:14) to baptize Jesus, arguing that he needed to be baptized by him. This, however, seems to be at variance with John i:31, 33. Lücke (*Comment.* i. p. 416, sq., 3d edit.) takes the words 'I knew him not' in their strict and exclusive sense. John, he says, could not have spoken in this manner if he had at all known Jesus; and had he known him, he could not, as a prophet, have failed to discover, even at an earlier period, the but too-evident 'glory' of the Messiah. In fact, the narrative of the first three Gospels presupposes the same, since, as the herald of the Messiah, he could give that refusal (Matt. iii:14) to the Messiah alone.

(2) **Object of Christ.** With regard to the second point at issue, as to the *object of Christ in undergoing baptism*, we find, in the first instance, that he ranked this action among those of his Messianic calling. This object is still more defined by John the Baptist (John i:31), which Lücke interprets in the following words: 'Only by entering into that community, which was to be introductory to the Messianic, by attaching himself to the Baptist like any other man, was it possible for Christ to reveal himself to the Baptist and through him to others.' Christ, with his never-failing reliance on God, never for a moment could doubt of his own mission, or of the right period when his character was to be made manifest by God (Paulus, *Exeget. Handbuch*, i; Hase, *Leben Jesu*, sec. 54); but John needed to receive that assurance in order to be the herald of the Messiah who was actually come. For all others whom John baptized, either before or after Christ, this act was a mere preparatory consecration to the kingdom of the Messiah; while for Jesus it was a direct and immediate consecration, by means of which he manifested the commencement of his career as the founder of the new theocracy, which began at the very moment of his baptism, the initiatory character of which constituted its general principle and tendency.

(3) **Miraculous Incidents.** With respect to the *miraculous incidents which accompanied the baptism of Jesus*, if we take for our starting point the narration of the three Gospels, that the Holy Spirit really and visibly descended in the form of a dove, and proclaimed Jesus, in an audible voice, to be the Son of God, there can be no difficulty in bringing it to harmonize with the statement in the Gospel of John. This literal sense of the text has, indeed, for a long time been the prevailing interpretation, though many doubts respecting it had very early forced themselves on the minds of sober inquirers, traces of which are to be found in Origen (*Contr. Cels.* i:48), and which Strauss (p. 376) has more elaborately renewed. To the natural explanations belong that of Paulus (*Exeg. Handb.*) that the dove was a real one, which had by chance flown near the spot at that moment; that of Meyer, that it was the figure of a meteor which was just then visible in the sky, and that of Kuinoel (*ad Matt.* iii), who considers the dove as a figure for lightning, and the voice for that of thunder, which the eye-witnesses, in their ecstatic feelings, considered as a divine voice, such as the Jews called a *Bath-kol*

(Meyer). Such interpretations are not only irreconcilable with the evangelical text, but even presuppose a violation of the common order of nature, in favor of adherence to which these interpretations are advanced.

A more close investigation of the subject, however induces us to take as a starting-point the account of the apostle St. John. It is John the Baptist himself who speaks. He was an eye-witness, nay, to judge from Matthew and John, the only one present with Jesus, and is consequently the only source—with or without Christ—of information. Indeed, if there were more people present, as we are almost inclined to infer from Luke, they cannot have perceived the miracles attending the baptism of Jesus, or John and Christ would no doubt have appealed to their testimony in verification of them.

In thus taking the statement in St. John for the authentic basis of the whole history, a few slight hints in it may afford us the means of solving the difficulties attending the *literal* conception of the text. John the Baptist knows nothing of an external and audible voice, and when he assures us (i:33) that he had in the Spirit received the promise that the Messiah would be made manifest by the Spirit descending upon him and *remaining*—be it upon or *in* him—there; this very *remaining* assuredly precludes any material appearance in the shape of a bird. The internal probability of the text, therefore, speaks in favor of a spiritual vision in the mind of the Baptist; this view is still more strengthened by the fact that Luke supposes there were many more present, who, notwithstanding, perceived nothing at all of the miraculous incidents. The reason that the Spirit in the vision assumed the figure of a dove we would rather seek in the peculiar flight and movement of that bird than in its form and shape.

This interpretation, moreover, has the advantage of exhibiting the philosophic connection of the incidents, since the Baptist appears more conspicuously as the immediate end of the Divine dispensation. Christ had thus the intention of being introduced by him into the Messianic sphere of operation, while the Baptist recognizes this to be his own peculiar calling; the signs by which he was to know the Messiah had been intimated to him, and now that they had come to pass the prophecy and his mission were fulfilled. None of the evangelists give any authority for the common tradition that the descent of the Spirit upon Christ was sensibly witnessed by the multitude.

4. **Christian Baptism.** Jesus, having undergone baptism as the founder of the new kingdom, ordained it as a legal act by which individuals were to obtain the rights of citizens therein. Though He caused many to be baptized by His disciples (John iv:1, 2), yet *all* were not baptized who were converted to Him; neither was it even necessary after they had obtained participation in Him by his personal choice and forgiving of sin. But when He could no longer personally and immediately choose and receive members of His kingdom, when at the same time all had been accomplished which the founder thought necessary for its completion, He gave power to the spiritual community to receive, in His stead, members by *baptism* (Matt. xxviii:19; Mark xvi:16).

(1) **Regeneration and Baptism.** Baptism essentially denotes the regeneration of him who receives it, his participation both in the divine life of Christ and the promises rested on it, as well as his reception as a member of the Christian community.

Each of these momentous points implies all the rest, and the germ of all is contained in the words of Christ (Matt. xxviii:19; Comp. Neander, *History of the Planting*, etc., ii): The details are variously digested by the apostles according to their peculiar modes of thinking. John dwells—in like manner as he does on the holy communion—almost exclusively on the internal nature of baptism, the immediate mystical union of the Spirit with Christ; baptism is with him equivalent to 'being born again' (John iii:5, 7). Paul gives more explicitly and completely the other points also. He understands by it not only the union of the individual with the Head, by the giving one's self up to the Redeemer and the receiving of His life (Gal. iii:27), but also the union with the other members (*ib.* 28; 1 Cor. xii:13; Ephes. iv:5; v:26). He expresses a spiritual purport by saying that it intimates on the part of those who have received it their being joined with Christ in his death and raised with him in his resurrection.

As regards the relation between the external and the internal, the normal condition of baptism required that the ceremony should be combined with regeneration in him who received it, while he who administered it should have a perfect knowledge of the state of the baptized, and should aim at strengthening and promoting the new life in him. There is no doubt that when Christ himself gave the assurance that He had received some one into His community, whether with or without baptism, such a declaration of His choice was met by the individual with a disposition already prepared to begin the new life. But the church is not in a state of perfection, and being deficient both in knowledge and will, she cannot fix the moment of regeneration in order to combine with it the act of baptism. She nevertheless places both in a necessary mutual relation, and considers baptism only then complete when regeneration takes place; the church therefore either delays baptism until after regeneration, or administers it beforehand, confiding in the assurance that the agency of the church will also produce in him regeneration, provided always that the individual has the *will* for it.

In the apostolic times the church was in a less mixed state; a comparatively large number, perhaps an actual majority, of the whole body of the baptized might at that time have passed for *converts*, as the inward and outward conditions of baptism were then not so far removed from each other as they afterwards became. The necessity of examining the comparative merits of both conditions separately grew with the growing imperfection of the community. The apostles did not yet feel it; they considered both only in the light of their necessary union with each other as Paul, for instance, says (Tit. iii:5; Comp. Mark xvi. 16) of the external symbol, what belongs only to the union of both. To ascribe the promises to baptism without that inward union would be making it an *opus operatum* and its efficacy a magic power, but, on the other hand, since the institution of Christ comprises also the external signs, it cannot be complete without them, and he who would abolish these external signs would deprive the church of an essential tie of fellowship. The Catholic church rather favors the former doctrine, and a few mystical sects, the Quakers, etc., the latter.

(2) Recipients of Baptism. The command to baptize was coupled with that of preaching the gospel to all nations (Matt. xxviii:19).

To be admitted to baptism in the apostolic age there needed no further development of Christian

knowledge than a professed belief that Jesus was the promised Messiah. On this principle the apostles acted (Acts ii:37; viii:12, 37, 38; xvi:15, 33). To be baptized in the name of *the Messiah* meant to receive baptism in the belief that the power and dignity contained in the idea of a Messiah was realized in Jesus. The profession of faith (1 Pet. iii:21) probably was such as to convey this idea, and next also the formula of baptism in the name of Christ, or, according to Matt. xxviii:19, of the Father, Son and Holy Ghost, when the whole body was immersed in water. Christ did not intend by these words to institute a fixed formula of baptism, but merely meant to indicate thereby the substance of the essential relations of baptism, since in his lifetime people could not yet be baptized in the name of the Holy Ghost. As the church, however, knew of no better compendary text for the article of faith, she declared herself early for that formula, which was already in general use at the time of Justin Martyr.

The early practice in regard to baptism corresponds with the general character of the gospel that it should embrace the world and be freely offered to all men.

5. Baptism for the Dead. Paul (1 Cor. xv:29) uses this phrase. Few passages have undergone more numerous and arbitrary emendations than this text. We shall examine, first:

(1) A Particular Application of Baptism. *Those interpretations which take it to be some particular application of baptism.*

From the wording of the sentence the most simple impression certainly is that Paul speaks of a baptism which a living man receives in the place of a dead one. This interpretation is particularly adopted by those expounders with whom grammatical construction is of paramount importance, and the first thing to be considered.

Many expounders have written in support of this opinion. But all we can infer from their statements is that baptism by substitution had taken place among the Marcionites, and perhaps also among the Corinthians and other smaller sects towards the end of the fourth century, a period when the confused views of the church as to the relations of the external to the spiritual might easily have favored that erroneous custom; but that it existed between that period and the time when Paul wrote the above passage is wholly unsubstantiated.

The idea, then, that such a superstitious custom existed in the Corinthian community is devoid of all historical evidence. In the words of Paul we discover no opinion of his own concerning the justice or injustice of the rite; it is merely brought in as an *argumentum ex concessio* (argument from concession) in favor of the object which he pursues through the whole chapter (Comp. 1 Cor. ii:5). However much may be objected against this interpretation, it is by far more reasonable than the explanations given by other critics. The Corinthian community was certainly of a mixed character, consisting of individuals of various views, ways of thinking, and different stages of education; so that there might still have existed a small number among them capable of such absurdities. We are not sufficiently acquainted with all the particulars of the case to maintain the contrary, while the simple grammatical sense of the passage is decidedly in favor of the proposed interpretation.

(2) Baptism Over Graves. (1) Origen, Luther, Chemnitz, and Joh. Gernard interpret the words as relating to baptism over the graves of the mem-

bers of the community, a favorite *res. dezvovous* of the early Christians. Luther says that, in order to strengthen their faith in the resurrection, the Christians baptized over the tombs of the dead. But the custom alluded to dates from a much later period.

(2) Epiphanius mentions also a view, according to which νεκροί is not to be translated by *dead*, but *mortally ill* persons, whose baptism was expedited by sprinkling water upon them on their death bed, instead of immersing them in the usual way; the rite is known under the name of *baptismus clinicus, lectualis*. But few of the modern theologians advocate this view.

(3) The interpretations which suppose that the church speaks of general church baptism. To these belongs the oldest opinion we know of, given in Tertullian, who renders the Greek word for in the sense of *on account of*, and *the dead* by *dead bodies*, they themselves, the baptized, as dead persons.

6. Immersion Not Essential To Baptism.

The vast majority of the Christian church does not hold that immersion is the only valid baptism. The Greek word βαπτίζω it is conceded is sometimes used both by sacred and profane writers to denote immersion. But the best lexicographers agree that this is not the only meaning of the word. βαπτός, the verbal adjective of βάπτω, is the word from which βαπτίζω is derived. It means *to wet thoroughly*, and not necessarily to immerse. Among the lexicographers, ancient and modern, who give a wider meaning than immerse to the word may be mentioned Stephanus, Scapula, Passor, Suidas, Hedericus, Conlon, Parkhurst, Ainsworth, Schleusner, Wahl, and Robinson. The great majority of the commentators teach that the mode of baptism is not a thing essential.

The Rev. Richard Watson sums up very forcibly the arguments against immersion as the sole mode of baptism. He says: "As the word βαπτίζω is used to express the various ablutions among the Jews, such as sprinkling, pouring, etc. (Heb. ix: 10), for the custom of washing before meals, and the washing of household furniture, pots, etc., it is evident from hence that it does not express the manner of doing a thing, whether by immersion or effusion, but only the thing done; that is, washing, or the application of water in some form or other. It nowhere signifies *to dip*, but in denoting a mode of, and in order to, washing or cleansing; and the mode or use is only the ceremonial part of a positive institute; just as in the Lord's Supper, the time of day, the number and posture of the communicants, the quantity and quality of bread and wine, are circumstances not accounted essential by any part of Christians. If in baptism there is an expressive emblem of the descending influence of the Spirit, pouring must be the mode of administration; for that is the scriptural term most commonly and properly used for the communication of Divine influences (Matt. iii: 11; Mark i: 8, 10; Luke iii: 16-22; John i: 33; Acts i: 5; ii: 38, 39; viii: 12, 17; xi: 15, 16). The term *sprinkling*, also, is made use of in reference to the act of purification (Isa. lii: 15; Ezek. xxxvi: 25; Heb. ix: 13, 14); and therefore cannot be inapplicable to baptismal purification. But it is observed that John baptized *'in Jordan.'* To this it is replied, To infer always a plunging of the whole body in water from this particle would in many instances be false and absurd. The same Greek preposition, ἐν, is used when it is said they should be *'baptized with fire,'* but few will assert that they should be plunged into it. The apostle, speaking of Christ, says, he came not, ἐν, *'by water only,'* but, ἐν, *'by water and blood.'* There the same word, ἐν, is translated *by* :

and with justice and propriety, for we know no good sense in which we could say he came *in* water. It has been remarked that ἐν is more than a hundred times in the New Testament rendered *at*; and in a hundred and fifty others it is translated *with*. If it be rendered so here, John baptized at Jordan, or with the water of Jordan, there is no proof that he plunged his disciples in it."

SAMUEL FALLOWS.

7. Infant Baptism. The great majority of those who call themselves Christians, throughout the world, have been baptized in infancy, so that there is a general denial by Christendom that immersion is essential to the sacrament of baptism.

(1) **Early Custom.** The word *baptizo* is not always applied "to acts involving the process of immersion." Reputable authorities in church history agree that infant baptism was practiced as early as the second century. Origen (185-253 A. D.) speaks of it as the general practice of the church and as having been taught by the apostles, "for this cause it was that the church received a tradition from the apostles to give baptism even to infants."

Tertullian put an exaggerated value upon the rite of baptism and advised that it should be postponed till later life, holding that "baptism was accompanied with the remission of past sins, and that sins committed after baptism were peculiarly dangerous." His polemic indicates that in his time (160-240 A. D.) infant baptism was common.

Justin Martyr, in his *Apology* (138 A. D.) speaks of 'many persons of both sexes, who had been made disciples to Christ from their infancy.' And in *Trypho* he says: "We are circumcised by baptism, with Christ's circumcision."

A rational view of the relation of young children to the Saviour, who said: "Suffer little children to come unto me and forbid them not," (Mark x:14), seems to imply that as the old dispensation used the designating rite of circumcision to indicate that the Jewish infant was recognized by the national church as belonging to its constituency, so the new dispensation has a formal ceremony by which the church claims little children as its own. If any choose to quote the injunction of Christ, "Believe and be baptized," as carrying an implication against the right to baptize such as are not yet capable of personal belief, it is sufficient to reply that this command is most certainly for adults, but that it has no exclusive meaning as against infants. Moreover, there are impressive and mandatory words from the Saviour which imply that young children are recognized by Him as belonging to a very lofty and exemplary sense to the Kingdom of God: "Except ye (adults) be converted and become as little children ye shall not enter into the kingdom of heaven" (Matt. xviii:3).

(2) **Reasons.** Infant baptism, therefore, as a Christian rite, rests upon the following conceptions:

It is a sign given by the church that it recognizes children as belonging to God. They are claimed and taken into its consecrating arms, to be brought within its sphere of nurture and instruction.

(a) The baptismal vows taken by parents at the font, in the solemn office of this sacrament, are a reinforcement of parental obligation to bring up their children as if they were God's, and should never be allowed to believe that they were naturally aliens from the household of faith.

(b) As much may be said of a baptized infant as of an adult baptized, for in each case this sacrament witnesses, as far as an outward cere-

monial may do so, that this person is now Christ's and virtually a member of His kingdom. If the child dies, baptized or unbaptized, he is saved, so all rational, modern theologies agree. If he lives and is rightly guided and taught, the saved life, the life of a Christian, is the normal and rational (*but not inevitable*) result of the antecedent influences. If a baptized infant may grow up into recreancy and stray into irreligion, so may the adult, after baptism, voluntarily accepted, "become a castaway" and deny the faith.

(c) All this may be consistently believed without making any assumptions that carry the extreme views of "baptismal regeneration." The wide and gracious purpose of the Redeemer is sufficient to cover the salvation of unerring infants, whether or not a few drops of consecrated water have touched their brows. But it is expedient and helpful, and tends to sweeten and sanctify the family order, if, without any claim of regenerating grace for the water itself, the little children of the household are "christened" for a fellowship in the great family of God, named for the Redeemer in heaven and on earth.

W. E. H.

(3) **Further Defense.** Von P. Lobstein, in *Zeitschrift für Theologie und Kirche*, 1896, defends infant baptism on the broad ground of Divine revelation and Christian nurture. He finds infant baptism supported (1) as an expression of the undeserved, anticipating love of God. This love has no more comprehensible and touching form than in the baptism of babes and sucklings. (2) It is an expression of the glorious liberty (or independence, '*Unabhaengigkeit*') of the love of God. Man has no more claim to the undeserved mercy of God than the veriest babe. (3) It is an expression of the unchangeable faithfulness of the love of God. Baptism stands for the ever-present, ever-uninterrupted grace of God. (See *Review of Lobstein*, by Prof. H. M. Scott, Chicago Theolog. Sem., in the *Am. Jour. of Theol.*, Jan., 1897, p. 253, sq.).

8. *Believers' Baptism.*

(1) **Reasons For.** Those who hold to believers' baptism maintain that all authority for Christian baptism comes from the commission Christ gave to his disciples just before his ascension. That commission, they maintain, plainly limits baptism to such as can be taught and believe; that there is no case in the practice of the Apostolic church which contradicts the above limitation, and that infant baptism is not found in the Bible, nor any other book, until near the close of the second century. They hold that it was the logical sequence of two errors which had then crept into the church, viz.: (a) That infants are totally depraved; (b) that baptism *per se* is regenerative; therefore, infants should be baptized to remove their depravity.

As both these errors are now in general disavowed by Christendom, there is no necessity for infant baptism, and hence there should be none. They further maintain that all attempts to infer infant baptism from infant circumcision, under the Mosaic covenant, are fanciful, and as plainly teach infant communion as infant baptism; that baptism is an act of faith, and only such as can express faith thereby should be baptized; that it is the answer of a good conscience, and cannot be administered to one who has no conscience whatever.

They affirm that the church is builded upon the spiritual foundation of "the Apostles and Prophets, Jesus Christ himself being the chief cornerstone." The members thus builded are "living

stones," and are builded together for a "spiritual house," in which "spiritual sacrifices" are offered, acceptable to God by Jesus Christ. This excludes mere flesh and blood.

They deny that a person can become a proxy for another, and hold that such things as godfathers and godmothers are inventions of an apostate church.

(2) **Mode.** The act of baptism they believe to be immersion. They maintain that all scholars admit immersion to be the plain English equivalent of "*baptizo*;" that "*sprinkle*" and "*pour*" are not equivalents as the lexicons all testify; that there are three words in the Greek language, equivalents, respectively, of the English, "*pour*," "*sprinkle*" and "*immerse*," and when speaking of baptism as a literal Christian rite the Bible invariably uses the equivalent of "*immerse*" to the exclusion of the other two; that the Greek church using the Greek language, and in many respects nearer the Apostolic church than the Roman Catholic, has always been an immersing church; that there is no mention of affusion for baptism in the Bible nor any other book for the first two centuries; that it was introduced in the case of sickness or weakness, and was not regarded as regular; that after its introduction it met with long-continued opposition, and only in recent centuries has the Roman Catholic church accorded it an equal place with immersion; that the circumstances surrounding the practice of baptism in the New Testament point unmistakably to immersion as the universal practice; that the figurative references to it by the New Testament writers can all be understood on the supposition that they meant immersion and cannot be understood on any other supposition; that there is no place where baptism is spoken of in the New Testament that we may not substitute immersion without destroying the sense; that in a large majority of the cases where the word "baptism" is mentioned, to substitute "*pour*" or "*sprinkle*" would make the passage ridiculous and without meaning; that the great historians, such as Mosheim, Neander, Wall, Eidersheimer, Weiss, Ewald, Geikie, DePressense, Schaff, Conybeare, Howson, Stanley and many others unite in testifying that immersion was the primitive practice; that the great reformers, such as Martin Luther, John Calvin and John Wesley, admit that immersion was the original practice.

They maintain also that the meaning of baptism is to be found in a visible representation of the death, burial and resurrection of our Lord—that this visible representation is found in immersion, but is not found in either sprinkling or pouring.

Z. T. S.

Figurative. 1. There is a twofold metaphorical baptism: (a) The *baptism of the Holy Ghost, and of fire*, which denotes not only the miraculous collation of the influences of the blessed Spirit, whereby the New Testament church was solemnly consecrated to the service of God; but chiefly his gracious influences, which, like fire, purify, soften and inflame our heart with love to Jesus and wash away our sin and enable us to join ourselves to him and his people (Matt. iii:11; 1 Cor xii:13). (b) The sufferings of Christ and his people are called *baptism*; they are means of purging away iniquity, and thereby Christ and his people solemnly dedicate themselves to the service of God, and avouch him to be their only Lord (Matt. xx:22; Luke xii:50).

2. There appears a strong resemblance between the baptism of Israel into Moses and the baptism of the church of God into Christ. Baptism in the name of Christ confessedly sets before us completely the doctrine of Christ, and

by it we are introduced into the church of Christ. In like manner the pillar of cloud and passage through the sea exhibited a grand display of the whole doctrine of Moses, and by this baptism the whole church of Israel was initiated. As *faith* is inseparable from baptism in the name of Christ, so by *faith* Israel passed through the Red Sea, which the Egyptians essaying to do were drowned. The same truths set before us in baptism were set before Israel when they passed through the Red Sea. They were all baptized, young and old, male and female, infants and adults. The youngest child among them partook of the beneficial effects of the cloud and the glorious salvation through the sea; the parents, in bringing them along with them, trusted them into the bed of the Red Sea, believing what the Lord had said to them by Moses, hoping for the same salvation for them that they expected for themselves. And guilty sinners who look for deliverance in Christ bring their children under the cloud in the ordinance of baptism, knowing that the same Almighty power which carries them through every danger and death can also carry their children. (See 1 Cor. x:1, 2.)

3. St. Peter makes the saving of a few persons through water at the flood a figure of the Christian rite (1 Pet. iii:20, 21), where the water which purged the earth of its wicked inhabitants by floating the Ark saved its inmates. Luther almost inverts this when he remarks that 'baptism is a greater deluge than that described by Moses, since more are baptized than were drowned by the Deluge.'

4. But patristic writers find baptism typified in a variety of things, some of which are remote enough, *e. g.*, not only in the passage of the Jordan (Josh. iii:17), and the cleansing of Naaman (2 Kings v:14), but in the river of Paradise, the well revealed to Hagar, the water from the rock, the water poured upon Elijah's offering, etc. Tertullian asserts that the primeval water 'brought forth abundantly the moving creature that hath life' (Gen. i:20), in order that there should be no difficulty in believing that baptismal waters can give life (*De Bapt.* iii). In a like spirit prophecies respecting Christian baptism were found with great freedom, not only in Zechariah's fountain * * * 'for sin and for uncleanness' (Zech. xiii:1), in Isaiah's promise that sins red as scarlet shall be white as snow (Is. i:18), and in Ezekiel's 'I will sprinkle clean water upon you, and ye shall be clean. * * * A new heart also will I give you, and a new spirit will I put within you' (Ezek. xxxvi:25, 26), but even in the hart panting after the water brooks (Ps. xlii:1), and in the waters breaking out in the desert (Is. xxxv:6). (A. Plummer, *Hastings' Bib. Dict.*)

BAPTISMAL REGENERATION (băp-tîz'mal rē-jěn'ēr-ā-shŭn). See REGENERATION, BAPTISMAL.

BAPTISM OF BLOOD (băp'tîz'm öv blŭd).

Tertullian gave this name to martyrdom before baptism, and to the death of martyrs in general. By him and other fathers after him it was thought to have a peculiar efficacy to purify from sins, from which mistaken notion it was urgently recommended to believers. Gregory of Nazianzen speaks of a baptism of martyrdom and blood with which Christ himself was baptized. This baptism goes beyond the others in proportion as it is free from sin. (See Matt. x:39; Luke xii:50.) But the blood of Christ alone cleanseth us from all sin (1 John i:7; Rev. i:5, vii:14).

BAPTISM OF FIRE (băp'tîz'm öv fir).

The words of John the Baptist (Matt. iii:11). "He that cometh after me shall baptize you with

the Holy Ghost and with fire," have given occasion to various interpretations. Some of the fathers (*e. g.* John Damascenus) hold it to mean the everlasting fire of hell. Others of the fathers (as Chrysostom, *Hom.* II, in Matt.) declare that by *fire* in this passage the Baptist means the Holy Spirit, who as *fire*, should destroy the pollutions of sin in the regeneration conferred by holy baptism.

Others again, as Hilary and Ambrose, as well as Origen, believe it to mean a purifying fire through which the faithful shall pass before entering paradise, thus giving rise to the Roman Catholic doctrine of purgatory. Others think that it means the fire of tribulations and sorrows; others the abundance of graces; others, the fire of penitence and self-mortification, etc.

The Hermenians and Seleucians understood the passage literally and maintained that material fire was necessary in the administration of baptism. The word fire is frequently used in Scripture to represent both purifying and destroying agencies, and expositors differ as to whether to apply it to the sanctifying power of the Holy Spirit, or to the destruction of the wicked. Scripture also affirms in Is. i:25; iv:3, 4; Ezek. xx:38; Mal. iii:2, 17, 18, that the true Israel will be separated even by severe measures, both from the ungodly and from their own remaining sins. (See Is. i:25; iv:3, 4; Ezek. xx:38; Mal. iii:2, 17, 18.) Valentinus re-baptized those who had received baptism out of his sect, and drew them through the fire, and it is said by Clemens Alexandrinus that Heraclion applied a red-hot iron to the ears of the baptized, as if to impress on them some mark (Mc. and Str. *Cyc.*).

Meyer (*Com.*, in loc.) says that all explanations "which take *fire* as not referring to the punishments of Gehenna are refuted by John's own decisive explanation in Matt. iii:12."

BAPTISM OF JESUS. See BAPTISM, 3.

BAPTISM OF THE HOLY GHOST, that overwhelming abundance of the gifts and graces of the Holy Spirit which our Saviour, after his ascension, poured forth upon his disciples.

The basis of this beautiful metaphor is found in the literal signification of baptism, which is to cover one completely with any kind of element, particularly water. So the apostles and primitive believers are said to have been not only in a degree subjected to the influence of the Holy Spirit, but filled with it, immersed in it, as in a new element of existence, life, perception, feeling and action. A measure of the same Divine influence they had received before, but this was a far more copious and ample communication of it, to qualify them for their public labors, as well as to elevate their personal character and to promote their spiritual enjoyment. Nor does this rich donation of spiritual blessings appear to have been restricted to miraculous gifts on the one hand, or to the primitive believers on the other. For it is represented: (1) As the prerogative of Christ's personal dignity (Matt. iii:11; Mark i:8; Luke iii:16; John i:15-17, 32, 33). (2) As the grand distinction of his glorious reign (John vii:37-39; xvi:7). (3) As the special promise of the new covenant (Luke xxiv:49; Acts i:4-8; ii:1-4, 16-21, 33, 38, 39; Heb. viii:6-12). (4) As the privilege and seal of every believer (Ephes. i:13, 14; iv:30; v:18; Gal. iv:6; v:16, 25). (5) As the proper object of expectation and prayer (Is. xxxii:15-17; xlv:3-5; Luke xi:5-13; Phil. i:19). (6) As comprehending gifts and graces, varied in kind and degree to supply the necessities of the church, according to the will and wisdom of the Spirit himself (1 Cor. xii:1-13, 31; xiv:1; Ephes. v:9; iv:30; Rom. viii:9, 13, 14; xiv:17; xv:13).

BAPTIST (băp'tist), one that baptizeth. John the son of Zacharias is so called, because he first administered baptism as an ordinance of God (Matt. iii:1).

BAPTISTS (băp'tists).

(1) **Antecedents and Principles.** Protests against infant baptism as without Scriptural warrant and as perverse of the nature and purpose of an ordinance of Christ were common but by no means universal among mediæval evangelical parties. Petrobrusians and Henricians (1104-48), Arnold of Brescia probably (1139-55), and many Waldenses and Bohemian Brethren (thirteenth, fourteenth and fifteenth centuries) opposed infant baptism and insisted upon believers' baptism. Insistence on regenerate membership, on the imitation of Christ in his humility and self-denial, and on the practical carrying out of the teachings of the sermon on the mount; the rejection of oaths, magistracy, warfare, capital punishment, as contrary to the spirit of the gospel; and maintenance of freedom of the will and faith working by love, almost invariably accompanied rejection of infant baptism in the mediæval time.

These principles became far more aggressive and influential in connection with the Protestant Revolution of the sixteenth century. From 1521 onward in Germany and from 1524 onward in Switzerland, radical reformers revolted from the partial and compromising measures of such politico-ecclesiastical reformers as Luther and Zwingli, and insisted on unconditional return to apostolic Christianity. Chief stress was laid upon believers' baptism as alone fulfilling the purposes of the ordinance and as requisite for regenerate membership. Ideas of social reform accompanied this radical religious propaganda. In a few years the movement had spread throughout southern, eastern, western and central Europe, and many thousands had been won to its support. Protestants and Catholics vied with each other in remorseless efforts at extermination. The Moravian Anabaptists adopted a communistic mode of organization and their membership at one time is said to have reached seventy thousand. In the Netherlands the party reorganized by Menno Simons about 1536, was for some years the chief representative of evangelical Christianity. Many Anabaptists were driven by relentless persecution to take refuge in millenarian expectations and were precipitated into the vortex of fanaticism (Münster Kingdom). While immersion was recognized by Protestants and Anabaptists alike as the apostolic form of baptism, little stress was laid upon it by either party. A few cases of immersion among Anabaptists are recorded, but sprinkling or pouring seems to have been the prevailing practice. Liberty of conscience was earnestly advocated by leading Anabaptists, at a time when nearly all Protestants and Catholics regarded it as entirely inadmissible.

Anabaptists from the continent appeared in England in small groups from time to time from 1534 onward. They were cruelly persecuted and had little opportunity to form permanent churches or to exert any considerable influence on the native population. It is possible that in some cases they came into relations with surviving Lollard communities and influenced these to reject infant baptism. That some English accepted their views in the times of Edward VI and Elizabeth we have reason to believe. It is probable that the large Dutch population found in the west of England in Elizabeth's reign contained many Anabaptists, and, in the opinion of leading Congregational scholars and others, exerted a de-

cisive influence on Robert Brown, the father of English Congregationalism.

In 1606 a Separatist congregation that had been formed at Gainsborough, England, under the leadership of John Smyth, a Cambridge graduate, were driven by the persecuting measures of James I to Amsterdam, where a church of English dissenters had for years sojourned. Smyth and his followers (among whom were Thomas Helwys and John Morton), became convinced that the Separatist congregations were inconsistent in withdrawing from the fellowship of the Church of England as an apostate church, and yet accepting as valid the baptism and the ordination received in that body, and in insisting on regenerate membership, and yet baptizing unconscious infants. Accordingly, they repudiated their baptism, ordination and ordinances, introduced a new believer's baptism (or what they considered such, for it is probable that immersion was not employed at this time) and reorganized on what they considered a New Testament basis (1609). From the Mennonites and Remonstrants they imbibed Arminian forms of doctrine.

Smyth and a majority of the church soon became dissatisfied with their introduction of a new baptism and sought admission into the Mennonite fellowship. Helwys, Morton and others adhered to the principle on which they had acted and returned to England in 1611 to propagate their views there. These also cultivated the fellowship of the Mennonites and like the latter became strongly Socinian in their views. About 1626 there were five small congregations in different parts of England. From 1614 to 1620 they published several able pleas for liberty of conscience. It is probable that they had increased to some extent by 1640. It is not certain that any member of this party (afterwards to be known as General Baptists) practiced immersion up to 1640.

In 1616 Henry Jacob, who had been pastor of an exiled congregation of English dissenters at Middleburg, Zeeland, returned to London and organized a church at Southwark. Out of this church, through successive withdrawals and redivisions, there arose, from 1633 to 1644, seven antipedobaptist congregations that were afterwards known as Particular (Calvinistic) Baptist churches. Part of these became convinced (about 1640) that baptism "ought to be by dipping the body into the water." They were also disinclined to introduce the apostolic form independently. So far as they knew, "none" had "then so practiced in England to professed believers." Being informed of an immersionist body in Holland, they sent over one of their brethren to receive the ordinance. He returned baptized, and large numbers were immersed early in 1641 or 1642. These Baptists published a confession of faith in 1644, which embodies the views of the great mass of modern Baptists.

The principles of Baptists may be summarized as follows: Supreme authority of Scripture (this excludes from doctrine and practice whatever is without Scriptural warrant); regenerate membership; democratic government, with recognition of the headship of Christ and the universal priesthood of believers; believers' baptism (immersion alone being regarded as true baptism); absolute liberty of conscience; separation of church and state.

(2) **Historical Outline.** The first in America to advocate Baptist principles, so far as we are informed, was Roger Williams. Born about 1600, educated at Cambridge (B. A. 1627), he became an ardent non-conformist and at great personal

sacrifice emigrated to New England to escape the persecuting measures of Archbishop Laud. He was immediately invited to supply the pulpit of the Boston church, but he declined because it was "an unseparated church," and he "durst not officiate to" it. He incurred the ill will of the Massachusetts authorities at this time by denying the right of the magistrate to punish any sort of "breach of the first table," such as idolatry, Sabbath-breaking, blasphemy, etc. During his pastorate at Plymouth he spent much time among the Indians, mastering their language and seeking to promote their moral and spiritual welfare. As pastor of the Salem church (1634-35) he became involved in local controversies and in controversies with the Massachusetts authorities. Apart from his opposition to the Massachusetts churches as "unseparated" he objected to the charter, which involved recognition of the right of kings "to take and give away the lands of other people;" denounced the administration of oaths to the unregenerate as involving blasphemy, and the freemen's oath of allegiance in general as involving usurpation of Divine prerogatives on the part of the government, and at last disfellowshipped the other churches for refusing to discipline their representatives in the court for unrighteous conduct and his own church for refusing to join him in this action. As advocating opinions dangerous to the common welfare he was banished in 1635. He made his way amid winter's hardships and perils to Narragansett Bay, where he was joined by a number of Massachusetts sympathizers and founded a colony on the basis of soul-liberty, which, with the coöperation of John Clarke and others, was developed into Rhode Island. His defense of the principle of liberty of conscience in "The Bloody Tenet of Persecution" and "The Bloody Tenet Yet More Bloody," was the most elaborate and complete that had ever been made and was epoch-making. This principle was defended with equal ability by John Clarke in his "*Ill News from New England*."

By 1639 Williams had become convinced that infant baptism was unwarranted by Scripture and a perversion of a Christian ordinance, and with eleven others introduced believers' baptism, and formed at Providence the first American Baptist church. Coddington, who was on Rhode Island at the time, accused Williams as at one time insisting on immersion and as Williams remained with the Baptists only a short time, it is natural to apply his remark to the time of the introduction of believers' baptism. This church, after Williams' withdrawal, continued for years in an exceedingly weak state. The General Baptist type of teaching, with insistence on the laying on of hands as an ordinance of Christ, came to prevail by 1652, and the opponents of this view withdrew to form a new congregation.

The second American Baptist church was that formed at Newport, about 1641, under the leadership of John Clarke. Clarke arrived at Boston in November, 1637, when persecuting measures were being inaugurated against Mrs. Anne Hutchinson and her followers on account of their antinomian teachings. How far he sympathized with Mrs. Hutchinson's views at this time we have no means of knowing. But he cast his lot with the persecuted party and led them in seeking a new home in unsettled territory. Through the kindly offices of Roger Williams they secured from the natives a title to Aquidneck Island. Here they founded a government in which the headship of Christ was recognized and which was purely democratic in form. This colony united with Williams' Providence colony in pro-

curing a charter in which civil and religious liberty was fully provided for. Clarke deserves quite as much credit as Williams for this feature of Rhode Island polity, and his services in England on behalf of the colony were quite as distinguished. For some time Clarke, who was physician and theologian as well as statesman, ministered to the entire community in religious things. About 1641, or earlier, Clarke and a number of his fellow-colonists became "professed Anabaptists," and began to hold their meetings apart. In what form and under what circumstances they introduced believers' baptism we are not informed, but about 1644 Mark Lucar, who was among the English separatists that were immersed in 1641 (1642) became a member of the Newport church. If immersion was not practiced from the beginning, it was no doubt introduced on Lucar's arrival. The Newport church was full of missionary zeal. Members of this body sought to form a Baptist church at Seekonk, Massachusetts, in 1649, but were thwarted by the authorities. In 1651 Clarke and two of his brethren suffered severe treatment at the hands of the Massachusetts authorities for conducting religious services at Lynn. Clarke narrates these sufferings and denounces Massachusetts intolerance in "*Ill News from New England*" (1652).

As already indicated, the Massachusetts government pursued a policy of extermination toward Baptists and no permanent organization of Baptist life was allowed until late in the century. Henry Dunster, the first president of Harvard College (1640-55), was obliged, under circumstances of great hardship, to relinquish his position because of his persistence in opposing the baptism of infants. In 1663 John Myles, a Welsh Baptist pastor, emigrated to Massachusetts with his church, secured a grant of land near the Rhode Island frontier, and established a settlement and church, which they named Swansca. Here they enjoyed a considerable measure of freedom. The First Baptist Church of Boston was organized in 1665, and for years suffered grievously at the hands of the authorities. In 1682 a small band of Baptists, several of whom had been members of the Boston church, formed an organization at Kittery, Maine. Driven from Maine soon afterward they settled in South Carolina, and formed the Charleston church about 1684. In the Quaker colonies—New Jersey and Pennsylvania—Baptists appeared about 1682, and by 1707 at least six churches had been organized. They were largely Welsh, but included a considerable number from New England. The Philadelphia Association was formed in 1707, and became a chief means of extending and conserving Baptist influence. As late as 1729 there were in New England only three Calvinistic Baptist churches, while there were two Sabbatarian and thirteen General Baptist churches. The latter had for some time held annual association meetings. The Charleston church had also come under Arminian influence, and had been almost wrecked by internal strife. It is not probable that the entire Baptist membership in America much exceeded 500 at the beginning of the Great Awakening (1733).

With few exceptions the Baptists of 1740 were not aggressive or enterprising. They held aloof from the Great Awakening, led by Edwards, Whitefield, the Tennents, etc., refusing in some cases to open their churches for evangelistic services. And yet no denomination profited more largely by the revival. The Philadelphia Association from 1750 onward exerted a stimulating and molding influence on the feeble Baptist churches in Virginia, North Carolina and South Carolina,

and secured the organization of many new churches and the formation of associations for the conservation and advancement of Baptist life.

In New England many Separate or "New Light" Congregational churches were formed by reason of the opposition of ministers and churches to the revival, and many of these "New Light" churches came to feel that their demand for regenerate membership logically involved the abandonment of infant baptism and accepted the Baptist position. In some cases whole congregations, with their pastors, became Baptists. In other cases churches were divided. The older Baptist churches gave little encouragement to the "New Light" Baptists, and for a long time would have no fellowship with them. But a new vital force had come to the Baptist cause, and in a few years the evangelistic Baptists were greatly in the majority in New England and throughout the South.

The excessive enthusiasm of the Separate Baptists was everywhere tempered by the conservative missionary influence that emanated from the Philadelphia Association. Highly educated men went forth in every direction from the Philadelphia body. Hezekiah Smith as evangelist, financial agent for the college, pastor and army chaplain, disseminated the Philadelphia influence throughout New England and elsewhere. The influence of this body, exerted persistently and through many channels, broke down the middle wall of partition between Baptists of the old and new types, and at last secured everywhere associational organization and conservative but aggressive denominational life.

In Virginia Separate Baptists led in the glorious struggle for civil and religious liberty (1775-99), and secured the coöperation of the Regulars. The two parties united in 1785. The Virginia Baptists were largely instrumental in securing religious liberty for all, and at last in compassing the disestablishment of the Episcopal church and the confiscation of its glebe lands, etc. To them also was due in part the ample provision for liberty of conscience in the United States Constitution. In New England, Separate Baptists, like Backus, coöperated with Baptists of the Philadelphia type, like Manning, Smith, Davis and Stillman, in an equally heroic but less successful struggle for absolute religious liberty and equality. The services of American Baptists in the cause of civil and religious liberty are acknowledged by scholars of other denominations.

By 1812 American Baptists numbered about 172,972, of whom 32,272 were in New England, 26,155 in the Middle States and the rest in the South. Rhode Island College (Brown University) was still the only Baptist institution of higher learning. Most of the numerical increase had been secured through the labors of illiterate evangelists, and the Baptist population in the South and West, apart from a few churches in Virginia, the Charleston Association, some churches in the neighborhood of Savannah, and the Georgia Association, was strongly prejudiced against an educated ministry and against missionary work of any kind conducted by boards and supported by contributions from the churches.

Since the beginning of the century Baptists in Boston and vicinity, New York, Philadelphia, Charleston and a few other places had taken a practical interest in the missionary work of Carey and his associates in India. The conversion to Baptist views of Adoniram Judson and Luther Rice, who had gone to India to open up a mission for the American Board of Commissioners for

Foreign Missions, in 1812, thrust upon the denomination the obligation to enter upon organized, independent work in the foreign field. Local mission societies were formed in many of the more intelligent communities, largely through the efforts of Rice, who had returned for the purpose of providing a basis of support for a Baptist mission, and in 1814 representatives of such societies met in Philadelphia and formed the Triennial Convention. This meeting brought together the leading Baptist ministers from all parts of the country. Within a few years there grew up in connection with this national organization for foreign missions, home-mission, publication and educational societies.

The more intelligent portions of the denomination were greatly stimulated by the foreign mission movement. State conventions were formed in nearly all the states (1821 onward) for the promotion of missionary and evangelical work. Denominational colleges and theological seminaries sprang up with wonderful rapidity. Baptist newspapers arose and multiplied. Sunday school work was carried forward with vigor. The introduction of so many innovations alarmed the ignorant and unprogressive elements of the denomination, and a large proportion of the Baptists of the South and Southwest zealously antagonized the missionary movement, with all its accessories. Yet the party of progress triumphed.

(3) Relation to Other Christian Denominations. At the beginning of their modern history as a denomination, Baptists stood practically alone in their advocacy of uncompromising adherence to Scripture precept and example in respect to doctrines and ordinances; in insisting upon absolute liberty of conscience and denying the right of the civil power to interfere in matters of religious belief or worship; and in contending for churches made up exclusively of those baptized on a personal profession of saving faith. It is highly gratifying to Baptists that some of the principles that were originally distinctive have become the common possession of evangelical Christendom. Most evangelical denominations now profess to make the Scriptures the norm of faith and practice, yet, on grounds that seem to Baptists inadequate, they refuse to follow the leadings of the best evangelical scholarship of the age as regards the subjects and mode of apostolic baptism.

Baptists have always been divided on the set of doctrines that distinguish Arminianism from Calvinism. Every shade of view on these questions could, no doubt, be found at present in Baptist churches; but the great majority of Baptists hold to what may be called moderate Calvinism.

Baptists have been among the staunchest defenders of congregational church government; but they have latterly made the fullest use of co-operative methods in missionary work, etc. Associations, state conventions, missionary societies, etc., are important features of Baptist polity.

The attitude of Baptists towards Christian union is often misconceived and adversely judged by their brethren of other denominations. The fact is that they most earnestly desire to enter into the closest allowable fellowship with all true Christians, and would make any amount of personal sacrifice to this end; but they consider that loyalty to Christ makes it incumbent upon them to protest against erroneous doctrine and practice to the extent of refusing to enter into church fellowship with those that, in their opinion, are walking disorderly. They maintain that efforts for Christian union, to be permanently efficacious,

must be along the line of a better understanding of the Word of God and more complete loyalty thereto, rather than along the line of compromise. They are ready at any time, through accredited representatives, to confer with representatives of other evangelical denominations as to the meaning of Scripture in relation to doctrine and practice, and they profess to be willing to abandon at once any position that is made to appear out of harmony with apostolic precept and example.

That the leading scholars of nearly all denominations, including Anglican, Lutheran, and Reformed, are so nearly in agreement regarding the main features of apostolic church order, such as the nature of church organization, the character and functions of church officers, the number and nature of the ordinances; and that the consensus of scholarship is so nearly in accord with the Baptist position, encourages Baptists to believe that the development of Christian doctrine and practice will be in the direction of greater uniformity, and that the church of the future will more and more closely approximate the Baptist position.

Meanwhile, Baptists themselves are being influenced by the non-Baptist Christian life and thought of the time, and are coming to appreciate more and more all that is true and Christ-like in the teachings and lives of other types of Christians, to magnify the elements of agreement and to minimize the elements of disagreement. They are ready to cooperate with their brethren of other denominations in all forms of philanthropy, and to a considerable extent in evangelistic and other forms of Christian work.

(4) Bar to Organic Union. It may be said, in closing, that the insuperable bar to anything like organic union, or even federation, with most other evangelical bodies of Christians is the practice by the latter of infant baptism, regarded by Baptists as not only without Scriptural warrant, but as a perversion of a Christian ordinance, and the refusal of the latter to conform to the mode of baptism that the scholarship of the time declares to be apostolic. Baptists do not consider these points mere matters of ritual, but rather they regard believers' baptism as an important ordinance of Christ and a valuable means of securing regenerate church membership, which also seems to them to be a fundamental requirement of the gospel. That members of different denominations should thoroughly understand each other's position and history is indispensable to correct judgment and intelligent charity.

(5) Divisions. The Regular Baptists of the United States are divided into three great sections—the Northern, the Southern and the Colored. These divisions affect only the home and foreign mission work of the denomination. The Southern Baptists organized separately in 1845 on account of the anti-slavery agitation. They have their missionary and Sunday-school organizations. The Northern Baptists unite in the work of the American Baptist Missionary Union and the American Baptist Home Mission Society. The American Baptist Publication Society seeks to serve all parts of the denomination. The Baptist Young People's Union takes in North and South alike. So does the American Baptist Education Society. The denomination has six great theological schools (Newton, Rochester, Hamilton, Crozer, Chicago and Louisville), colleges and universities too numerous to name, including Brown University, the University of Chicago, Vassar College, Colgate, Rochester, Colby, Wake Forest, Denison, Franklin, Richmond, Furman, Mercer, Howard, Georgetown, Kalamazoo, Bethel, Des

Moines, Central, Southwestern, Baylor and William Jewell. It has periodicals multitudinous. It has produced a literature, religious and general, that in quantity and quality compares favorably with that of the other leading denominations.

A. H. N.

BAPTIST YOUNG PEOPLE'S UNION OF AMERICA.

(1) Organization and Aim. The Baptist Young People's Union of America was organized at a large and representative convention held in the Second Baptist Church, Chicago, Ill., July 7-8, 1891. In common with other bodies of Christians, our Baptist churches had felt the quickening influence of what had come to be known as the Young People's Movement. It was felt that the forces of our Baptist young people should be unified and directed toward the attainment of the common interests and ends of our denominational life. Out of the discussions which ensued, the Baptist Young People's Union of America was born, its object being clearly defined in the following article from its constitution:

"The object of this organization shall be the unification of Baptist young people; their increased spirituality; their stimulation in Christian service; their edification in Scripture knowledge; their instruction in Baptist doctrine and history; and their enlistment in all missionary activity through existing denominational organizations."

While it is thus distinctively denominational, as its name implies, yet within these lines it is broadly inclusive. It seeks to effect a fraternal union of all Baptist young people's societies in America. It does not insist upon uniformity of name or constitution. It undertakes no legislative function over local societies. It simply seeks to bring all these societies into helpful fellowship and active cooperation, and to relate them properly to our great denominational societies.

(2) Educational Work. The feature of this new movement which from the outset differentiated it most clearly from the Young People's Movement in general was the educational feature. There was a strong conviction that the enthusiasm which had been quickened needed to be supplemented and guided by instruction in Christian truth. It was felt, moreover, that our young people should be trained to an intelligent and self-respecting denominational loyalty, and to active enlistment in the support of the missionary activities of our body. This, in turn, involved indoctrination in distinctive principles and information concerning missionary operations.

The educational plans of the Union have taken form in what are popularly known as the Christian Culture Courses. These courses are three in number, each extending through four years. *The Bible Readers' Course* provides for the reading of the entire Scriptures, the first year being devoted to the historical, the second to the prophetic, the third to the epistolary and the fourth to the poetical, books. The Daily Readings are accompanied by introductions to the several books and by brief analytical notes. *The Sacred Literature Course* aims to give a broader survey. Lessons in this course are prepared by eminent Biblical scholars, which treat in successive years: "Preparations for the Messiah;" "The Life and Times of Christ;" "The Dawn of Christianity;" and "The Development of History and Doctrine." These lessons extend through twenty-five weeks each year. *The Conquest Missionary Course* is designed to present a progressive view of Baptist Missions, under several heads: "Convictions and Beginnings;" "Organizations and Methods;"

"Fields and Operations;" and "Leaders and Triumphs."

The study period of these courses extends through twenty-five weeks, beginning October 1st and ending April 1st, and is supplemented by an examination in May. The number of examination papers received in 1900 was 15,162. To those who regard the Young People's Movement as expending itself in the excitement of great conventions these figures are submitted as indicating a substantial residuum. The beneficial effects of such courses of study admit of no question. They cannot fail to result in a more intelligent type of Christian character, and in a larger effectiveness for Christian service.

Similar courses of study, though simpler in form, are provided for the Junior department.

The material for these courses is published for the Senior department in *The Baptist Union*, and for the Junior department in *The Junior Baptist Union*.

An advanced Christian Culture Course has been inaugurated, and two volumes, *The Monuments and the Old Testament*, by Prof. Ira M. Price, Ph. D., and *Two Thousand Years of Missions Before Carey*, by Lemuel Call Barnes, D. D., have been published.

(3) **Its Field.** The field which the organization attempts to cover is a large one—the United States and Canada. A network of state and provincial organizations, including a host of local societies, covers this broad territory. The Baptist Young People's Union of the South, while maintaining a separate set of officers, is in closest affiliation with the International body, and indeed forms an integral part of it. The history of the organization has abundantly justified its being, and vindicated the wisdom and foresight of its founders. Its existence and work are perfectly compatible with catholicity of spirit. It does not interfere with the larger fellowship, while it emphasizes the primary obligation of loyalty to one's own. In July of each year, the Union holds its own International Conventions, which are the most largely attended gatherings of the Baptist denomination in the world.

(4) **Its Organ.** At the beginning of the movement, it was necessary to publish a paper which should be accepted as the official organ of the movement. This was needed, (1) to set forth the principles and methods of the organization, and thus secure co-operation; (2) to chronicle the growth and development of the movement, and to furnish a medium for the interchange of ideas and working plans; and (3) to publish the educational material included in the Christian Culture Courses. Prior to the genesis of the Baptist Young People's Union of America, there had been published a few issues of the paper entitled *The Loyalist*, which advocated the establishment of a separate denominational society, and prepared for the formation of the Union. The first issue of *The Loyalist* bears date October 16, 1890. On December 13, 1890, the title was changed to *Young People at Work*, and was published under the auspices of the American Baptist Publication Society. This name was retained until September 12, 1891, when it was changed to *The Young People's Union*.

There was a growing conviction on the part of the officers of the Union that in order to carry on their work with efficiency they should have immediate control of the paper, and that it should be published from headquarters. It was therefore purchased from the American Baptist Publication Society at a cost of \$13,800, and since November 21, 1891, has been published

weekly by the B. Y. P. U. A. On January 6, 1894, the name was changed to the title which it bears at present, *The Baptist Union*. Through all the history of the movement, the paper has been at once the impelling and guiding force and the means of financial support. It is indispensable to all who would fully avail themselves of the educational work of the Union; and is equally necessary to all who would keep informed as to the aims and methods and progress of the work. It seeks to keep our young people in close and sympathetic relation with all the interests and work of our denomination. It promotes fellowship. It quickens the sense of common life. It gives the "elbow-touch of comradeship." Apart from the Courses, it offers large returns in the form of stories, aids to Christian living, descriptive sketches, editorials, thoughts for the quiet hour, and methods of work. It is a case of good measure pressed down, and shaken together and running over.

As the organ of the Baptist Young People's Union of America, it is charged with a heavy burden. It is expected not only to pay its way, but also to provide for all the varied and extensive work of the Union. This work is expensive as well as extensive. The paper is not a private enterprise; it is the property of the Baptist Young People's Union of America. No personal profit would accrue to any individual connected with the paper, or with the management of the general work, from any increase of revenue, and all profits would go into the general work for its extension and betterment. It is proving itself to be a powerful agent in all denominational enterprises.

E. E. C.

BAR (bär), (Heb. בָּר, *bar*), a Hebrew word meaning *son*, but used only poetically in that language (Ps. ii:12; Prov. xxxi:2). In Syriac, however, Bar answered to the more common Hebrew word for *son*, i. e., *ben*; and hence in later times, in the New Testament, it takes the same place in the formation of proper names which *Ben* had formerly occupied in the Old Testament, as Bar-Jona, Bar-Jesus, etc. (See **BEN**.)

BARABBAS (bär-äb'bas), (probably Heb. בָּר אֲבָבָא, *bar ab-baw'*, son of Abba, a common name in the Talmud), a person who had forfeited his life for sedition and murder (Mark xv:7; Luke xxiii:25).

As a rebel, he was subject to the punishment laid down by the Roman law for such political offenses; while, as a murderer, he could not escape death even by the civil code of the Jews. But the latter were so bent on the death of Jesus, that, of the two, they preferred pardoning this double criminal (Matt. xxvii:16-26; Mark xv:7-15; Luke xxiii:18-25; John xviii:40). Origen says that in many copies Barabbas was also called *Jesus*. The Armenian Version has the same reading: 'Whom will ye that I shall deliver unto you, Jesus Barabbas, or Jesus that is called Christ?' Griesbach, in his *Comment*, considers this as an interpolation; while Fritzsche has adopted it in his text. We can certainly conceive that a name afterwards so sacred may have been thrown out of the text by some bigoted transcriber.

BARACHEL (bär'a-kel), (Heb. בָּרַכְיָאֵל, *bar-rak-ale'*, whom God has blessed), father of Elihu (Job xxxii:2, 6), B. C. 1550.

BARACHIAS (bär'a-kí'as), (Gr. Βαράχιας, *bar-akh-ee'as*), father of the Zechariah (Zacharias) mentioned in Matt. xxiii:35. (See **ZECHARIAH**.)

BARAH (bā'rah). See BETH-BARAH.

BARAK (bā'rak), (Heb. בָּרַק, *bar-rak*'), lighting flash), son of Abinoam of Kedesh-Naphtali, a Galilean city of refuge in the tribe of Naphtali (Judg. iv:6; Comp. Josh. xix:37; xxi:32). Hence he belonged to the district which had suffered most at the hands of the Canaanites: perhaps he had been actually their prisoner.

When Jabin, king of Canaan, had for twenty years grievously oppressed the Israelites, the prophetess Deborah sent for Barak, the son of Abinoam, a man of Issachar, who lived in Kadesh-Naphtali, and, from God, directed him to levy an army of 10,000 men of Naphtali and Zebulun, the tribes which had been principally enslaved, and march them to Mount Tabor, where the Lord would deliver Sisera, and the mighty host of Jabin, into his hand. He refused to attempt this unless she would go along with him; she consented; but told him that his cowardice should be punished by the Lord's giving the chief honor of the victory, the death of the general, into the hand of a woman. They had scarcely levied their troops, and marched from Kadesh to Tabor, when Sisera was at their heels, with a prodigious army. It seems scarcely one of Barak's 10,000 had either sword or spear; but the Canaanites were struck with a panic, when they saw the Hebrews come down from the hill to attack them; the slaughter was so universal that few escaped (B. C. 1120). Barak and Deborah composed a song to commemorate their victory, and to praise God on account of it; and to celebrate the Hebrew princes, and Jael the wife of Heber, the Kenite, for their instrumentality therein; and to condemn the tribes of Asher, Dan, and Reuben for their inactivity (Judg. iv and v).

Barak appears in the list of the faithful worthies of the Old Testament (Heb. xi:32).

BARBARIAN (bār-bā'rī-an), (Gr. Βάρβαρος, *bar-bar-os*, foreign, strange, rude).

This term is used in the New Testament, as in classical writers, to denote other nations of the earth in distinction from the Greeks, without any idea of *barbarism* in the modern sense of the term. 'I am debtor both to the Greeks and Barbarians'—ΕΛΛΗΝΙ ΤΕ ΚΑΙ ΒΑΡΒΑΡΟΙΣ (Rom. i:14); 'To the Grekes and to them which are no Grekes'—Tyndale, 1534, and Geneva, 1557; 'To the Grekes and to the Ungrekes'—Cranmer, 1539. In Coloss. iii:11, 'Greek nor Jew—Barbarian, Scythian'—*Barbaros* seems to refer to those nations of the Roman empire who did not speak Greek, and *Skuthace*, *Scythian* to nations not under the Roman dominion (Dr. Robinson). In 1 Cor. xiv:11, the term is applied to a difference of language: 'If I know not the meaning of the voice, I shall be unto him that speaketh a barbarian ('as of another language,' *Geneva Vers.*), and he that speaketh shall be a barbarian ('as of another language,' *Geneva Vers.*) unto me.' Thus Ovid, '*Barbarus hic ego sum, quia non intelligor ulli*,' *Trist.* v:10, 37. In Acts xxviii, the inhabitants of Malta are called *barbaroi*, because they were originally a Carthaginian colony, and chiefly spoke of Punic language. In the Septuagint, *barbaros*, is used by the Hebrew *loáz*, 'A people of strange language' (Ps. cxiv:1).

Strabo (xiv:2) suggests that the word *Barbaros* was originally an imitative sound, designed to express a harsh dissonant language, or sometimes the indistinct articulation of the Greek by foreigners.

BARBER (bār'bēr), (Heb. בַּרְבַּר, *gal-larwb'*) occurs but once in the Scriptures (Ezek. v:1).

Shaving the head is a very common custom in Eastern countries. In India many of the religious sects are distinguished by the manner in which the head is shaved. Some leave a tuft of hair on the crown of the head, others a tuft above each ear. In Syria, old men frequently have the whole head shaved and allow the beard to grow. Young men shave the cheeks and the chin, and cut the hair of the head short. The upper lip is never shaved except in S. India, where it is done as a sign of mourning. Absence of the mustache is looked upon, in Syria, as a sign of the want of virility. The barber plies his trade in any convenient place—by the roadside, or in the courtyard of a khan. (V. Carslaw, *Hastings' Bib. Dict.*)

BAREFOOT (bār'fōot), (Heb. יָרֵךְ, *yaw-khufe'*, unshod, Jer. ii:25). To go *barefoot* was an indication of great distress (Is. xx:2-4; 2 Sam. xv:30). In any great calamity or sorrow it was the custom to strip oneself of ornaments and even of shoes. Persons were also accustomed to remove their shoes when coming to places accounted holy (Exod. iii:5). (See DRESS.)

BARHUMITE (bar-hū'mite), (Heb. בְּרִימִי, *bar-khoo-mee'*, belonging to young men), a transposed form of the Gentile name Baharunite, one of David's worthies (2 Sam. xxiii:31), B. C. 1058. (See BAHURIM.)

BARIAH (ba-rī'ah), (Heb. בָּרִיָּה, *bar-ree'akh*, fugitive), son of Shemaiah, descendant of the royal family of Judah (1 Chron. iii:22), B. C. about 410.

BAR-JESUS (bār'jē'zus), (Gr. βαρισοῦς, *bar-ee-ay-soocé'*, son of Joshua).

A man described in Acts xiii:6 as 'magian, prophet of lies, Jew,' whom Paul and Barnabas, traveling in Cyprus, found in the train of the proconsul Sergius Paulus, as one of the *amici* or *comites* who always accompanied a Roman governor. In Josh. *Antiq.* xx: vii: 2 we find a similar case: Simon, 'a Jew, by birth a Cypriot, and pretending to be a magian' (observe the striking, though not exact, similarity of the triplet), was one of the 'friends' of Felix, the procurator of Judæa, and was used by him to seduce Drusilla from her husband, Azizus, king of Emesa. Such men, probably Babylonian Jews, 'skilled in the lore and uncanny arts and strange powers of the Median priests' (Comp. Matt. ii:7-16), not simply sorcerers and fortune tellers, but 'men of science,' as they would now be called (being then beyond their age in acquaintance with the powers and processes of nature), and not mere isolated self-constituted pretenders, but representatives of an Oriental system and religion—appear to have been numerous at that period, and to have exerted considerable influence on the Roman world. It was with a system, therefore, rather than with a man, that the representatives of the system ('the way') of Christ, also struggling for influence in the Roman empire, came here into conflict. (J. Massie, *Hastings' Bib. Dict.*) (See ELYMAS.)

BAR-JONA (bār'jō-nā), (Gr. Βαρ-ιωβας, *bar-ee-oh-nas'*, son of Jonas), the patronymic appellation of the Apostle Peter (Matt. xvi:17; comp. John i:42). (See BAR and PETER.)

BARKENIM (bār-kē'nim). See THORNS.

BARKOS (bār'kos), (Heb. בַּרְקוֹס, *bar-kose'*, painter), the head of one of the families of Nethinim (Ezra ii:35; Neh. vii:55), B. C. 536.

BARLEY (bär'lý), (Heb. שֵׁרָבָה, *seh-o-raw'*; שֵׁרָבָה, *seh-ore'*; Gr. κριθῖνος, *kree'thee-nos*, long hair).

(1) **Where Cultivated.** This grain is mentioned in Scripture as cultivated and used in Egypt (Exod. ix:31), and in Palestine (Lev. xxvii:16; Deut. viii:8; 2 Chron. ii:10; Ruth ii:17; 2 Sam. xiv:30; Is. xxviii:25; Jer. xli:8; Joel i:11). Barley was given to cattle, especially horses (1 Kings iv:28), and was indeed the only corn grain given to them, as oats and rye were unknown to the Hebrews, and are not now grown in Palestine, although Volney affirms (ii:117) that small quantities are raised in some parts of Syria as food for horses. Hence barley is mentioned in the Mishnah (*Pesach*, fol. 3) as the food of horses and asses. This is still the chief use of barley in Western Asia. Bread made of barley was, however, used by the poorer classes (Judg. vii:13; 2 Kings iv:42; John vi:9, 13; Comp. Ezek. iv:9). In Palestine barley was for the most part sown at the time of the autumnal rains—October, November, and again in early spring, or rather as soon as the *depth* of winter had passed. This later sowing has not hitherto been much noticed by writers on this part of Biblical illustration, but is confirmed by various travelers who observed the sowing of barley at this time of the year.

(2) **When Ready.** The barley of the first crop was ready by the time of the Passover, in the month of Abib, March-April (Ruth i:22; 2 Sam. xxi:9; Judith viii:2); and if not ripe at the expiration of a (Hebrew) year from the last celebration, the year was intercalated to preserve that connection between the feast and the barley harvest which the law required (Exod. xxiii:15, 16; Deut. xvi:16). Accordingly, travelers concur in showing that the barley harvest in Palestine is in March and April—advancing into May in the northern and mountainous parts of the land, but April is the month in which the barley-harvest is chiefly gathered in, although it begins earlier in some parts and later in others. At Jerusalem, Niebuhr found barley ripe at the end of March, when the later (autumnal) crop had only been lately sown.

(3) **Mode of Culture.** The passage in Is. xxxii:20 has been supposed by many to refer to rice, as a mode of culture by submersion of the land after sowing, similar to that of rice, is indicated. The celebrated passage, 'Cast thy bread upon the waters,' etc. (Eccles. xi:1), has been by some supposed to refer also to such a mode of culture. In Exod. ix:31 we are told that the plague of hail, some time *before* the Passover, destroyed the barley, which was then in the green ear, but not the wheat or the rye, which were only in the blade. This is minutely corroborated by the fact that the barley sown after the inundation is reaped, some after ninety days, some in the fourth month (Wilkinson's *Thebes*, p. 395), and that it there ripens a month earlier than the wheat (Sonnini, p. 395).

BARN (bärn).

1. *Aw-sarw'* (Heb. מִגְרָן, Prov. iii:10; rendered "storehouse" in Deut. xxviii:8), a place for the storing of grain.

2. *Meg-oo-raw'* (Heb. מִגְרָן, Hag. ii:19) and *mam-meg-oo-raw'* (Heb. מִגְרָן, Joel i:17), a granary.

3. *Go'ren* (Heb. גֹּרֵן, Job xxxix:12; "barn floor" in 2 Kings vi:27) signifies rather a *thrashing-floor*, as elsewhere translated.

4. The passage in Luke xii:18 indicates granaries above ground.

Figurative. (1) The blessing or filling one's *barns*, or his enlarging them, imports great plenty and prosperity (Deut. xxviii:8; Luke xii:18). (2) Breaking them down imports great scarcity and want (Joel i:17).

BARNABAS (bär'na-bas), (Syro-Chald. בַּר נְבִיאָה, *bar-neb-bah'*; Gr. Βαρνάβας, *bar-nab'as*).

(1) **Name and Family.** His name was originally 'Ιωσήφ, *ee-oh-sace'*, *Joses*, or 'Ιωσήφ, *ee-oh-safe'*, *Joseph* (Acts iv:36); but he received from the Apostles the surname of Barnabas, which signifies *the Son of Prophecy*. Luke interprets it *Son of Exhortation*, R. V.; but in A. V., *of Consolation*.

It can hardly be doubted that this name was given to Joses to denote his eminence as a Christian teacher. In Acts xiii:1 his name is placed first in the list of prophets and teachers belonging to the church at Antioch. Chrysostom, however, understands the surname in the same way as the A. V., *Son of Consolation*, and supposes that it was given to Barnabas on account of his mild and gentle disposition: 'This Barnabas was a mild and gentle person. His name means *Son of Consolation*, hence he became a friend of Paul; and that he was very kind and easy of access is proved by the instance before us, and by the case of John (Mark)' (*In Acts Apost. Hom. xxi*). He is described by Luke as 'a good man, full of the Holy Ghost and of faith' (Acts xi:24). He was a native of Cyprus, but the son of Jewish parents of the tribe of Levi. From Acts iv:36, 37 it appears that he was possessed of land, but whether in Judæa or Cyprus is not stated. He generously disposed of the whole for the benefit of the Christian community, and 'laid the money at the apostles' feet.' As this transaction occurred soon after the day of Pentecost, he must have been an early convert to the Christian faith.

(2) **Associated with Paul.** When Paul made his first appearance in Jerusalem after his conversion, Barnabas introduced him to the apostles and attested his sincerity (Acts ix:27). Though the conversion of Cornelius and his household, with its attendant circumstances, had given the Jewish Christians clearer views of the comprehensive character of the new dispensation, yet the accession of a large number of Gentiles to the church at Antioch was an event so extraordinary that the apostles and brethren at Jerusalem resolved on deputing one of their number to investigate it.

(3) **First Missionary Journey.** Their choice was fixed on Barnabas. After witnessing the flourishing condition of the church, and adding fresh converts by his personal exertions, he visited Tarsus to obtain the assistance of Saul, who returned with him to Antioch, where they labored for a whole year (Acts, xi:23-26). In anticipation of the famine predicted by Agabus, the Antiochian Christians made a contribution for their poorer brethren at Jerusalem, and sent it by the hands of Barnabas and Saul (Acts xi:28-30), who speedily returned, bringing with them John Mark, a nephew of the former. By Divine direction (Acts xiii:2) they were separated to the office of missionaries, and as such visited Cyprus and some of the principal cities in Asia Minor (Acts xiii:14). Soon after their return to Antioch the peace of the church was disturbed by certain zealots from Judæa, who insisted on the observance of the rite of circumcision by the Gentile converts. To settle the controversy Paul and Barnabas were deputed to consult the apostles and elders at Jerusalem (Acts xv:1, 2); they returned to communicate the result of their conference (verse 22), accompanied by Judas Barsabas and Silas, or Silvanus.

(4) **Second Missionary Journey.** On preparing for a second missionary tour, a dispute arose between them on account of John Mark, which ended in their taking different routes; Paul and Silas went through Syria and Cilicia, while Barnabas and his nephew revisited his native island (Acts xv:36-41).

At this point Barnabas disappears from Luke's narrative, which to its close is occupied solely with the labors and sufferings of Paul. From the Epistles of the latter a few hints (the only authentic sources of information) may be gleaned relative to his early friend and associate. From 1 Cor. ix:5, 6, it would appear that Barnabas was unmarried and supported himself, like Paul, by some manual occupation. In Gal. ii:1 we have an account of the reception given to Paul and Barnabas by the apostles at Jerusalem, probably on the occasion mentioned in Acts xv. In the same chapter (verse 13) we are informed that Barnabas so far yielded to the Judaizing zealots, at Antioch, as to separate himself for a time from communion with the Gentile converts. The date of this occurrence has been placed by some critics soon after the apostolic convention at Jerusalem (about A. D. 52); by others, on the return of Paul from his second missionary journey (A. D. 55). It has been inferred from 2 Cor. viii:18, 19, that Barnabas was not only reconciled to Paul after their separation (Acts xv:39), but also became again his coadjutor; that he was the 'brother whose praise was in the gospel through all the churches.'

In Colos. iv:10 and Philemon, verse 24, Paul mentions Mark as his fellow-laborer, and at a still later period (2 Tim. iv:11) he refers with strong approbation to his services, and requests Timothy to bring him to Rome, but of Barnabas (his relationship to Mark excepted) nothing is said. The most probable inference is that he was already dead, and that Mark had subsequently associated himself with Paul.

(5) **Personal Appearance.** From the incident narrated in Acts xiv:8-12 Chrysostom infers that the personal appearance of Barnabas was dignified and commanding. When the inhabitants of Lysra, on the cure of the impotent man, imagined that the gods were come down to them in the likeness of men, they called Barnabas, Zeus (their tutelary deity), and Paul, Hermes, because he was chief speaker.

(6) **Death.** The year when Barnabas died cannot be determined with certainty. If his nephew joined Paul after that event, it must have taken place not later than A. D. 63 or 64. 'Chrysostom,' it has been asserted, 'speaks of Barnabas as alive in A. D. 63.' The exact statement is this: In his *Eleventh Homily on the Epistle to the Colossians* he remarks, on chap. iv:10, 'touching whom ye received commandments, if he come unto you receive him'—*ἴσως παρὰ Βαρνάβα ἐντολὰς ἔλαβον*—*perhaps they received commands from Barnabas.*

(7) **Traditions.** There is a vague tradition that Barnabas was the first bishop of the church at Milan, but it is so ill supported as scarcely to deserve notice. It is enough to say that the celebrated Ambrose (born A. D. 340, died 397) makes no allusion to Barnabas when speaking of the bishops who preceded himself.

"It is interesting, however, to notice that the authorship of the Epistle to the Hebrews is attributed to Barnabas by Tertullian (see HEBREWS, EPISTLE TO), while there is still extant an Epistle of Barnabas, which, according to external evidence, is the work of this Barnabas, but on internal grounds this conclusion is now generally dis-

puted. (See the arguments briefly stated in Hefele, *Patrum Apostolicorum Opera*, p. ix ff., and more fully in the same writer's *Das Sendschreiben des Apostels Barnabas aufs neue untersucht, übersetzt und erklärt*, Tüb. 1840. Comp. also Lightfoot, *The Apostolic Fathers*.)"—G. Milligan, *Hastings' Bib. Dict.* (See BARNABAS, GOSPEL OF.)

BARNABAS, EPISTLE OF (bär'na-bas ē-pīs'1 ōv).

(1) **Title and History.** The title of this ancient composition is found in the Stichometries (or catalogues of the sacred books) of the ninth century; but from that period to the seventeenth century the work itself remained entirely unknown. Jacob Sirmond, a Jesuit, in copying the transcript of a Greek manuscript of Polycarp's *Epistle to the Philippians*, which belonged to Turrianus (a member of the same order), discovered another piece appended to it, which proved to be the Epistle (so called) of Barnabas. It was also found in two manuscripts of Polycarp, at Rome, which Cressolius collated. Sirmond sent a copy to the Benedictine, Hugo Menard, who had not long before found an ancient Latin translation of the Epistle of Barnabas in the Abbey of Corbey. About the same time Andreas Schottus (also a Jesuit) obtained a manuscript containing the Epistles of Polycarp and Barnabas; this was transcribed by Claudius Salmasius, and given, with a copy of the Corbey version, to Isaac Vossius. Vossius shortly after paid a visit to Archbishop Usher, who was then preparing for publication an ancient Latin version of the shorter Ignatian Epistles. It was agreed between them to annex to this work the Epistles of Barnabas. But it had hardly been sent to press when the great fire at Oxford occurred (1644), in which the manuscript was destroyed, with all the archbishop's notes, and only a few pages saved which were in the corrector's hands. These were afterwards inserted by Bishop Fell, in the Preface to his edition of Barnabas, Oxford, 1685.

(2) **Editions.** The first edition of Barnabas appeared at Paris, in 1645; it had been prepared by Menard, but, in consequence of his death, was edited by Luke d'Acherry. In the following year a new and much improved edition was published by Vossius, for which he collated three manuscripts; it was appended to his *editio princeps* of the Ignatian Epistles. In 1672 Cotelerius published his magnificent edition of the Apostolic Fathers. Besides the Greek text, and Corbey's version of Barnabas, it contained a new translation and valuable notes by the editor. The reprint, in 1724, contained additional notes by Davis and Le Clerc.

In 1685 two editions appeared: Bishop Fell's, already noticed, and one by Stephen le Moyne, at Leyden, in the first volume of his *Vania Sacra*, with copious notes. It is also contained in Russel's edition of the Apostolic Fathers, London, 1746, and in the first volume of Galland's *Bibliotheca veterum Patrum*, Ven., 1765. A convenient edition is that by Dr. C. J. Hefele, in his *Patrum Apostolicorum Opera*, Tübingen, 1839 and 1842. Four German translations have appeared, by Arnold (1696), Glüsing (Hamb. 1723), Grynæus (1772), and Möst (1774); it was translated into English by Archbishop Wake (*The genuine Epistles of the Apostolic Fathers, etc.*, Lond. 1693 and 1710); and a French translation by Le Gras is inserted in Desprez's Bible, Paris, 1717. On comparing the Corbey version with the Greek text, it appears that the latter wants four

chapters and a half at the beginning, and the former four chapters at the end; thus each supplies the deficiencies of the other. It is remarkable that all the Greek manuscripts hitherto found are similarly defective, which plainly shows that they are all derived from the same source, and form only one family of manuscripts.

The Epistle of Barnabas consists of twenty-one chapters. The first part (i:17) treats of the abrogation of the Mosaic dispensation, and of the types and prophecies relating to Christ; the last four chapters are composed entirely of practical directions and exhortations. The names and residence of the persons to whom it is addressed are not mentioned, on which account, probably, it was called by Origen a *Catholic Epistle* (Origen, *Contr. Cels.* lib. i. p. 49). But if by this title he meant an epistle addressed to the general body of Christians, the propriety of its application is doubtful, for we meet with several expressions which imply a personal knowledge of the parties. It has been disputed whether the persons addressed were Jewish or Gentile Christians. Dr. Hefele strenuously contends that they were of the former class. His chief argument appears to be that it would be unnecessary to insist so earnestly on the abolition of the Mosaic economy in writing to Gentile converts. But the Epistle of Paul to the Galatians is a proof to what danger Gentile Christians were exposed in the first ages from the attempts of Judaizing teachers; so that, in the absence of more exact information, the supposition that the persons addressed were of this class is at least not inconsistent with the train of thought in the Epistle. But more than this: throughout the Epistle we find a distinction maintained between the writer and his friends on the one hand, and the Jews on the other. Thus in chap. iii, 'God speaketh to *them* (the Jews) concerning these things, "Ye shall not fast as ye do this day," etc.; but to *us* he saith, "Is not this the fast that I have chosen?" etc.; and at the end of the same chapter, 'He hath shown these things to all of *us* that we should not run *as proselytes* to the Jewish law'—'*ante ostendit omnibus nobis ut non incurramus tanquam proselyti ad illorum legem.*' This would be singular language to address to persons who were Jews by birth, but perfectly suited to Gentile converts. In chap. xiii he says, 'Let us inquire whether the covenant be with *us* or with *them* (the Jews), and concludes with quoting the promise to Abraham (with a slight verbal difference), 'Behold I have made thee a father of the nations which *without circumcision* believe in the Lord,' a passage which is totally irrelevant to *Jewish* Christians. For other similar passages, see Jones *On the Canon*, part iii, chap. 30.

(4) **Controversy.** Whether this epistle was written by Barnabas, the companion of St. Paul, has been a subject of controversy almost ever since its publication in the seventeenth century. Its first editors, Usher and Menard, took the negative, and Vossius the affirmative side of the question. Of modern critics, Hug, Ullman, Neander, Winer and Hefele agree with the former, and Rosenmüller, Gieseler, Bleek, Heuke and Rordam with the latter. The external evidence for its genuineness, it may be allowed, is considerable; but besides some conflicting testimonies, criteria furnished by the epistle itself lead to the opposite conclusion. We shall present a view of both as succinctly as possible.

(a) *Clement.* The first writer who alludes to this epistle is Clement of Alexandria. (1) He quotes a sentence from the tenth chapter, and

adds: 'These things saith Barnabas' (*Strom.* ii:15, sec. 67, vol. ii, p. 165 ed. Klotz. Lips. 1831). (2) A sentence from chap. xxi, of which he says: 'Barnabas truly speaks mystically' (*Strom.* ii:18, sec. 84, vol. ii, p. 174). (3) Again, quoting chap. x: 'Barnabas says' (*Strom.* v:8, sec. 52, vol. iii, p. 38)). (4) After quoting two passages from chap. i and ii, he calls the author *the Apostle Barnabas* (*Strom.* ii:6, sec. 31, vol. ii, p. 142). (5) He cites a passage from chap. iv, with the words 'the Apostle Barnabas says' (*Strom.* ii:7, sec. 35, vol. ii:144). (6) He prefaces a passage from chap. xvi with: 'I need not say more, when I adduce as a witness the apostolic Barnabas, who was one of the Seventy, and a fellow-laborer with Paul' (*Strom.* ii:20, sec. 116, vol. ii, p. 192). (7) He makes two quotations from chap. vi, which he introduces with these words: 'But Barnabas also, who proclaimed the word with the apostle, in his ministry among the Gentiles' (*Strom.* verse 10, sec. 64, vol. iii, p. 46). The name of Barnabas occurs in another passage (*Strom.* vi:8, sec. 64, vol. iii:136), but probably by a lapse of memory, instead of Clemens Romanus, from whose first Epistle to the Corinthians a sentence is there quoted. There is also an evident allusion to the Epistle of Barnabas in *Pædag.* ii:10, sec. 83, vol. i, p. 245, and in some other passages, though the author's name is not mentioned.

(b) *Origen.* Origen quotes this epistle twice: (1) The sentence in chap. v respecting the apostles, which he says 'is written in the Catholic Epistle of Barnabas' (*Contr. Cels.* i:49). (2) A passage from chap. xviii: 'To the same purpose Barnabas speaks in his epistle, when he says that "there are two ways, one of light, the other of darkness,"' etc. (*De Princip.* iii:2).

On these testimonies it has been remarked, that both these Alexandrian fathers have quoted works unquestionably spurious without expressing a doubt of their genuineness; thus Clement refers to the Revelation of Peter, and Origen to the Shepherd of Hermas, which he believed to be inspired ('quæ scriptura valde mihi utilis videtur, et, ut puto, divinitus inspirata,' *In Ep. ad Rom. Comment.* lib. x); and though Clement speaks of the *apostolic* Barnabas, he evidently does not treat this Epistle with the same deference as the canonical writings, but freely points out its mistakes. Tertullian calls all the seventy disciples apostles, and in this inferior and secondary sense, as Dr. Lardner observes, Clement terms Barnabas an apostle.

(c) *Eusebius.* Eusebius, in the noted passage of his *Ecclesiastical History* (iii:25), quoted at length (in the original) by De Wette, and translated by Lardner, *Credibility*, part ii: chap. 72, says, 'The Epistle reputed to be written by Barnabas is to be ranked among the books which are *spurious*;' and elsewhere, 'He (Clement of Alexandria) makes use of testimonies out of those Scriptures that are contradicted, that called the Wisdom of Solomon, and of Jesus the Son of Sirach, and the Epistle to the Hebrews, and that of Barnabas and of Clement, and Jude (*Hist. Eccles.* vi:13). He also observes of Clement. 'In his book called Hypotyposes, he gives short explications of *all the canonical Scriptures*, not neglecting even the *controverted books*, I mean that of Jude and the other Catholic Epistles, the Epistle of Barnabas, and that called the Revelation of Peter.'

(d) *Jerome.* Jerome in his work on illustrious men, or *Catalogue of Ecclesiastical Writers*, thus speaks of Barnabas: 'Barnabas of Cyprus, called also Joseph, a Levite, was ordained, with Paul, an apostle of the Gentiles; he

wrote an Epistle for the edification of the church, which is read among the *Apocryphal Scriptures* (*Catal. Vir. illust. cap. vi.*); and in his *Commentary on Ezekiel xlii:19*, 'Many parts of the Scriptures, and especially the Epistle of Barnabas, which is reckoned among the *Apocryphal Scriptures*,' etc. In another place he quotes, as the words of Ignatius, the passage relative to the apostles, which is cited by Origen from the Epistle of Barnabas (Lardner's *Credibility*, pt. ii, chap. 114).

It is evident, as Valesius (with whom Lardner and Hefele agree) has remarked, that Eusebius uses the term *notha*, not in the strict sense of *spurious*, but as synonymous with those that are *disputed, controverted*, and applies it to writings which were received by some, but rejected by others. The term *apocryphal* also, used by Jerome, was applied both by Jews and Christians to works which (though the authors were known) were not considered canonical. The use of these terms, therefore, in reference to the Epistle before us, cannot be deemed as absolutely decisive against its genuineness.

(5) **Barnabas Not the Author.** The following considerations, however, omitting some of less weight which have been urged by different writers, will, it is believed, go far to prove that Barnabas was not the author of this Epistle:

(a) Though the exact date of the death of Barnabas cannot be ascertained, yet from the particulars already stated respecting his nephew, it is highly probable that that event took place before the martyrdom of Paul (A. D. 64). But a passage in the Epistle (chap. xvi) speaks of the temple at Jerusalem as already destroyed; it was consequently written after the year 70.

(b) Several passages have been adduced to show that the writer (as well as the persons addressed) belonged to the Gentile section of the church; but waiving this point, the whole tone of the Epistle is different from what the knowledge we possess of the character of Barnabas would lead us to expect, if it proceeded from his pen. From the hints given in the Acts he appears to have been a man of strong attachments, keenly alive to the ties of kindred and fatherland; we find that on both his missionary tours his native island and the Jewish synagogues claimed his first attention. But throughout the Epistle there is a total absence of sympathetic regard for the Jewish nation; all is cold and distant, if not contemptuous. 'It remains yet that I speak to you (the 16th chapter begins) concerning the temple; how those *miserable men*, being deceived, have put their trust in the house.' How unlike the friend and fellow-laborer of him who had 'great heaviness and continual sorrow in his heart for his brethren, his kindred according to the flesh' (Rom. ix:2).

(c) Barnabas was not only a Jew by birth, but a Levite; from this circumstance, combined with what is recorded in the Acts, of the active part he took in the settlement of the points at issue between the Jewish and the Gentile converts, we might reasonably expect to find, in a composition bearing his name, an accurate acquaintance with the Mosaic ritual—a clear conception of the nature of the Old Economy and its relation to the New Dispensation, and a freedom from that addiction to allegorical interpretation which marked the Christians of the Alexandrian school in the second and succeeding centuries. But the following specimens will suffice to show that exactly the contrary may be affirmed of the writer of this Epistle; that he makes unauthorized additions to various parts of the Jewish Cultus; that his views of the Old

Economy are confused and erroneous; and that he adopts a mode of interpretation countenanced by none of the inspired writers, and at utter variance with every principle of sound criticism, being to the last degree puerile and absurd. The inference is unavoidable that Barnabas, '*the Son of Prophecy*,' '*the Man full of the Holy Spirit and of faith*,' was not the author of this Epistle.

(1) He mentions in two passages the fact recorded in Exod. xxxii:19, of Moses breaking the two tables of stone, and infers that Jehovah's covenant was thereby annulled. The falsity of this statement need not be pointed out to the Biblical student. He says, 'They (the Jews) have forever lost that which Moses received. For thus saith the Scripture: And Moses . . . received the covenant from the Lord, even two tables of stone, etc. But, having turned themselves to idols, they lost it; as the Lord said unto Moses, Go down quickly, etc. And Moses cast the two tables out of his hands, and their covenant was broken, that the love of Jesus might be sealed in your hearts unto the hope of his faith' (chap. iv). The second passage, in chap. xiv, is very similar, and need not be quoted.

(2) On the rite of circumcision (Acts xv:1, 2) we find in this Epistle equal incorrectness. The writer denies that circumcision was a sign of the covenant. 'You will say the Jews were circumcised for a sign, and so are all the Syrians and Arabians, and all the idolatrous priests.' Herodotus (ii:37), indeed, asserts that the Syrians in Palestine received the practice of circumcision from the Egyptians; but Josephus, both in his *Antiquities* and *Treatise against Apion*, remarks that he must have alluded to the Jews, because they were the only nation in Palestine who were circumcised (*Antiq. viii:10, sec. 3; Contr. Apion. i:22*). 'How,' says Hug, 'could Barnabas, who traveled with Paul through the southern provinces of Asia Minor, make such an assertion respecting the heathen priests?'

(3) Referring to the goat (chap. vii.), either that mentioned in Num. xix or Lev. xvi, he says, 'All the priests, and they only, shall eat the unwashed entrails with vinegar.' Of this direction, in itself highly improbable, not a trace can be found in the Bible, or even in the Talmud.

(4) In the same chapter, he says of the scape-goat that all the congregation were commanded to spit upon it, and put scarlet wool about its head; and that the person appointed to convey the goat into the wilderness took away the scarlet wool and put it on a thorn-bush, whose young sprouts, when we find them in the field, we are wont to eat; so the fruit of that thorn only is sweet. On all these particulars the Scriptures are silent.

(5) In chap. viii. our author's fancy (as Mr. Jones remarks) seems to grow more fruitful and luxuriant. In referring to the red heifer (Num. xix.), he says that men in whom sins are come to perfection (*ἐν οἷς ἁμαρτίαι τελεταί*) were to bring the heifer and kill it; that three youths were to take up the ashes and put them in vessels; then to tie a piece of scarlet wool and hyssop upon a stick, and so sprinkle every one of the people. 'This heifer is Jesus Christ; the wicked men that were to offer it are those sinners who brought him to death; the young men signify those to whom the Lord gave authority to preach his Gospel, being at the beginning twelve, because there were twelve tribes of Israel.' But why (he asks) were there *three* young men appointed to sprinkle? To denote Abraham, Isaac, and Jacob. And why was wool put upon a stick? Because the kingdom of Jesus was founded upon the cross, etc.

(6) He interprets the distinction of clean and unclean animals in a spiritual sense. 'Is it not (^{Ἔρα οὐκ} see Dr. Hefele's valuable note, p. 85) the command of God that they should not eat these things?—(Yes.) But Moses spokē in spirit (^{ἐν πνεύματι}). He named the swine, in order to say, Thou shalt not join those men who are like swine, who, while they live in pleasure, forget their Lord,' etc. He adds—'Neither shalt thou eat of the hyena; that is, thou shalt not be an adulterer.' If these were the views entertained by Barnabas, how must he have been astonished at the want of spiritual discernment in the Apostle Peter, when he heard from his own lips the account of the symbolic vision at Joppa, and his reply to the command: 'Arise, Peter, slay and eat. But I said, Not so, Lord, for nothing common or unclean hath at any time entered into my mouth' (Acts xi:8)?

(7) In ch. ix he attempts to show that Abraham, in circumcising his servants, had an especial reference to Christ and his crucifixion:—'Learn, my children, that Abraham, who first circumcised in spirit, having a regard to the Son (*in Jesum*, Lat. Vers.), circumcised, applying the mystic sense of the three letters (^{λαβάν τριῶν γραμμάτων ὄργανα}—*den geheimen Sinn dreier Buchstaben anwendend*, Hefele). For the Scripture says that Abraham circumcised 318 men of his house. What then was the deeper insight (^{γνώσις}) imparted to him? Mark first the 18, and next the 300. The numeral letters of 18 are I (Iota) and H (Eta), I = 10, H = 8; here you have Jesus ^{Ἰησοῦν}; and because the cross in the T (Tau) must express the grace (of our redemption), he names 300; therefore he signified Jesus by two letters, and the cross by one.

It will be observed that the writer hastily assumes (from Gen. xiv:14) that Abraham circumcised only 318 persons, that being the number of 'the servants born in his own house,' whom he armed against the four kings; but he circumcised his household nearly twenty years later, including not only those born in his house (with the addition of Ishmael), but 'all that were bought with money' (Gen. xvii:23). The writer evidently was unacquainted with the Hebrew Scriptures, by his committing the blunder of supposing that Abraham was familiar with the Greek alphabet some centuries before it existed.

(6) **Integrity.** Our limits will not allow us to enter into the question of the integrity of the epistle in its present form, but this and several other topics are discussed very fully and with great ability in Dr. Hefele's *Treatise*, to which, and the other works mentioned below, the reader is referred.

A New and Full Method of Settling the Canonical Authority of the New Testament, by the Rev. Jeremiah Jones, Oxford, 1827, vol. ii, part iii, chap. 37-43; *Das Sendschreiben des Apostels Barnabas aufs Neue untersucht, übersetzt, und erkärt*, von Dr. Carl Joseph Hefele, Tübingen, 1840; *Patrum Apostolicorum Opera*, edidit C. J. Hefele, Tubingæ, 1839; Lardner's *Credibility of the Gospel History*, part ii, chap. i.; Neander, *Allgemeine Geschichte der Christlichen Religion und Kirche*, i. 653, 1100, or, *History of the Christian Religion and Church*, translated by the Rev. J. H. Rose, 1841, vol. ii, pp. 329-331; *Lives of the Most Eminent Fathers of the Church*, by William Cave, D. D., Oxford, 1840, vol. i, pp. 90-105. (See BARNABAS.) J. E. R.

BARNABAS, GOSPEL OF (bär'na-bas, gös'-pel òv). A spurious gospel, attributed to Barnabas, exists in Arabic, and has been translated into Italian, Spanish and English. It was probably

forged by some heretical Christians, and has since been interpolated by the Mohammedans, in order to support the pretensions of their prophet.

Dr. White has given copious extracts from it in his *Bampton Lectures*, 1784: *Sermon* viii. p. 358, and Notes, pp. 41-69 (see also Sale's *Koran*, *Prelim. Dissert.* sec. 4). It is placed among the Apocryphal books in the Stichometry prefixed by Cotelierius to his edition of the Apostolical Constitutions (Lardner's *Credibility*, part ii, chap. 147). It was condemned by Pope Gelasius I. (Tillemont, *Mémoires*, etc., i. p. 1055).

BARREL (bär'rèl), (Heb. ^{כַּד}, *kad*, jar, pitcher), probably an earthen vessel used for the keeping of flour (1 Kings xvii:12, 14, 16; xviii:33). In other places the word is rendered pitcher.

BARREN, BARRENESS (bär'ren, bär'ren-ness), (Heb. ^{אִשָּׁה עָרְוָה}, *aw-kawr'*, when spoken of persons).

Barrenness is, in the East, the hardest lot that can befall a woman, and was considered among the Israelites as the heaviest punishment with which the Lord could visit a female (Gen. xvi:2; xxx:1-23; 1 Sam. i:6, 29; Is. xlvi:9; xlix:21; Luke i:25; Niebuhr, p. 76; Volney, ii:359). In the Talmud (*Yeremoth*, vi:6) a man was *bound*, after ten years childless conjugal life, to marry another woman (with or without repudiation of the first), and even a third one, if the second proved also barren. Nor is it improbable that Moses himself contributed to strengthen the opinion of disgrace by the promise of the Lord of exemption from barrenness as a blessing (Exod. xxiii:26; Deut. vii:14). Instances of childless wives are found in Gen. xi:30; xxv:21; xxix:31; Judg. xiii:2, 3; Luke i:7, 36. Some cases of unlawful marriages, and more especially with a brother's wife, were visited with the punishment of barrenness (Lev. xx:20, 21). Michaelis, however (*Mosaisches Recht*. v. 290), takes the term in a figurative sense, implying that the children born in such an illicit marriage should not be ascribed to the real father, but to the former brother, thus depriving the second husband of the share of patrimonial inheritance which would otherwise have fallen to his lot if the first brother had died childless.

This general notion of the disgrace of barrenness in a woman may early have given rise in the patriarchal age to the custom among barren wives of introducing to their husbands their maid-servants, and of regarding the children born in that concubinage as their own, by which they thought to cover their own disgrace of barrenness (Gen. xvi:2; xxx:3). (See CHILDREN.)

The reproach attached to barrenness, especially among the Hebrews, was doubtless due to the constant expectation of the Messiah, and the hope cherished by every woman that she might be the mother of the promised Seed.

BARSABAS (bär'sa-bas), (Gr. Βαρσαβᾶς, *barsab-as'*, son of Sabas), a surname:

1. Of Joseph, a disciple who was nominated along with Matthias to succeed Judas Iscariot in the apostleship (Acts i:23). (See JOSEPH BARSABAS.)

2. Of Judas, who, with Silas, was sent to Antioch in company of Paul and Barnabas (Acts xv:22). (See JUDAS BARSABAS.)

BARTHOLOMEW (bar-thöl'o-mew), (Greek Βαρθολομαῖος, *bar-thol-om-ah'yos*, son of Tolmai).

(1) **Name and Family.** Bartholomew was one of the twelve apostles, and is generally supposed to have been the same individual who in John's gospel is called Nathaniel. The reason

of this opinion is that in the first three gospels Philip and Bartholomew are constantly named together, while Nathaniel is nowhere mentioned; on the contrary, in the fourth gospel the names of Philip and Nathaniel are similarly combined, but nothing is said of Bartholomew. Nathaniel therefore must be considered as his real name, while Bartholomew merely expresses his filial relation.

(2) **Personal History.** He was a native of Cana in Galilee (John xxi:2). He was introduced by Philip to Jesus, who, on seeing him approach, at once pronounced that eulogy on his character which has made his name almost synonymous with sincerity: 'Behold an Israelite indeed, in whom there is no guile!' (John i:47). He was one of the disciples to whom our Lord appeared after his resurrection, at the Sea of Tiberias (John xxi:2); he was also a witness of the Ascension, and returned with the other apostles to Jerusalem (Acts i:4, 12, 13).

(3) **Traditions.** Of his subsequent history we have little more than vague traditions. According to Eusebius (*Hist. Eccles.* v:10), when Pantænus went on a mission to the Indians (towards the close of the second century), he found among them the Gospel of Matthew, written in Hebrew, which had been left there by the apostle Bartholomew. Jerome (*De Vir. Illustr.* c. 36) gives a similar account, and adds that Pantænus brought the copy of Matthew's Gospel back to Alexandria with him. But the title of Indians is applied by ancient writers to so many different nations that it is difficult to determine the scene of Bartholomew's labors. Mosheim (with whom Neander agrees) is of opinion that it was a part of Arabia Felix, inhabited by Jews, to whom alone a Hebrew gospel could be of any service. Socrates (*Hist. Eccles.* i:19) says that it was the India bordering on Ethiopia, and Sophronius reports that Bartholomew preached the Gospel of Christ "to the so-called fortunate Indians." This apostle is said to have suffered crucifixion at Albanopolis in Armenia, or, according to Nicephorus, at Urbanopolis in Cilicia. A spurious gospel which bears his name is in the catalogue of apocryphal books condemned by Pope Gelasius. (See NATHANAEL.)

BARTIMÆUS (bär-ti-me'us), (Gr. *βαρτιμαίος*, *bar-tim'ah-yos*, son of Timæus), the blind beggar of Jericho whom Christ restored to sight (Mark x:46; Matt. xx:29-34; Luke xviii:35-43).

BARUCH (bā'ruk), (Heb. *בָּרוּךְ*, *barw-rook'*, blessed).

1. The faithful friend and amanuensis of the prophet Jeremiah (Jer. xxxii:12-16; xliii:3, 6; li:61); was of a noble family of the tribe of Judah, and generally considered to be the brother of the prophet Seraiah, both being represented as sons of Neriah; and to Baruch the prophet Jeremiah dictated all his oracles (B. C. about 604).

During the siege of Jerusalem, Baruch was selected as the depository of the deed of purchase which Jeremiah had made of the territory of Hanameel, to which deed he had been a witness. In the fourth year of the reign of Jehoiachim, king of Judah (B. C. 605), Baruch was directed to write all the prophecies delivered by Jeremiah up to that period, and to read them to the people, which he did from a window in the Temple upon two solemn occasions. He afterwards read them before the counselors of the king at a private interview, when Baruch being asked to give an account of the manner in which the prophecy had been composed, gave an exact description of the mode in which he had taken it down from the

prophet's dictation. Upon this they ordered him to leave the roll, advising that he and Jeremiah should conceal themselves. They then informed the king of what had taken place, upon which he had the roll read to him, but, after hearing a part of it, he cut it with a penknife, and, notwithstanding the remonstrances of his counselors, threw it into the fire of his winter parlor, where he was sitting. He then ordered Jeremiah and Baruch to be seized, but they could not be found. The Jews to this day commemorate the burning of this roll by an annual fast.

Another roll was now written by Baruch from the prophet's dictation, containing all that was in the former, with some additions, the most remarkable of which is the prophecy respecting the ruin of Jehoiachim and his house, as the punishment of his impious act. This roll is the prophecy of Jeremiah which we now possess. Baruch, being himself terrified at the threats contained in the prophetic roll, received the comforting assurance that he would himself be delivered from the calamities which should befall Judah and Jerusalem. In the fourth year of Zedekiah (B. C. 595), Baruch is supposed by some to have accompanied Seraiah to Babylon, when the latter attended Zedekiah with the prophecies contained in Jeremiah, chaps. l. and li., which he was commanded by Jeremiah to read on the banks of the Euphrates, and then to cast the prophetic roll into the river, with a stone attached to it, to signify the everlasting ruin of Babylon (Jer. li:61). At least Baruch, in the book which bears his name (see BARUCH, BOOK OF), is said to have read these prophecies at Babylon in the hearing of king Jehoiachim and the captive Jews, in the fifth year of the taking of Jerusalem by the Chaldæans (see next article), which must have been the same taking of it in which Jehoiachim was made prisoner. There is no account in Scripture of Baruch's return. The Rabbin, however, allege that he died in Babylon, in the twelfth year of the exile. Josephus asserts that he was well skilled in the Hebrew language, and that, after the taking of Jerusalem, Nebuzardan treated Baruch with consideration, from respect to Jeremiah, whose misfortunes he had shared, and whom he had accompanied to prison and exile (*Antiq.* x:11).

2. The son of Zabbai. He repaired (B. C. 445) that part of the walls of Jerusalem between the northeast angle of Zion and the house of Eliashib the high-priest (Neh. iii:20), and united in Nehemiah's covenant (x:6).

3. Son of Col-hozeh, a descendant of Perez, a son of Judah. His son Maaseiah dwelt in Jerusalem after the captivity (Neh. xi:5).

BARUCH, BOOK OF (Apocrypha), (bā'ruk, *bōok òv*), follows next after the book of Jeremiah in the Septuagint Version.

(1) It is the only one of the deuterocanonical books named in the catalogue of the celebrated fifty-ninth canon of the Council of Laodicea. If Baruch, the scribe of Jeremiah, be the author of this book, he must have removed from Egypt to Babylon immediately after the death of Jeremiah, inasmuch as the author of the book lived in Babylon in the fifth year after that event, unless we suppose, with Eichhorn, Arnold and others that the reference (Baruch i:1) is the fifth year from the captivity of Jehoiachim.

Jahn (*Introductio in Epitomen redacta*, sec. 217, etc.) considers this latter opinion at variance with Baruch i:1, where the destruction of Jerusalem is spoken of as having already taken place. De Wette (*Lehrbuch der Einleitung in das A.*

und N. T.) ingeniously conjectures that *ἔτει* (year) is a mistake or correction of some transcriber for *μῆτι* (month); and there is no question that the present reading, which mentions the year, and the *day* of the month, without naming the month itself, is quite unaccountable.

(2) If Baruch, the friend of Jeremiah, was the author of the present work, it must be a translation from the Hebrew or Chaldee, and it is by no means impossible that this is the case, as the work abounds in Hebraisms. These Hebraisms, however, in the opinion of Jahn (*Introduction*), might have originated with a Jew writing Greek, although he leans to the opinion that, from the use of the word *manna*, and the frequent Hebraisms, this work not only does not belong to the Greek age of the Jews, but was actually written in Hebrew. This is also the opinion of Calmet (*Preface to Baruch*), Huet (*Demonstratio Evangelica*), and others; while Grotius, Eichhorn and most of the German writers favor the idea of a Greek original. They conceive that the writer was some unknown person in the reign of Ptolemy Lagos, who, wishing to confirm in the true religion the Jews then residing in Egypt, attributed his own ideas to Baruch the scribe. There appears, however, no reason, on this latter hypothesis, why the author should speak of the return from Babylon. Grotius conceives that the book abounds not only in Jewish, but even in Christian interpolations. (See Eichhorn's *Einführung in die Apokryphen Schriften*.)

(3) Although Cyril of Jerusalem speaks of the book of Baruch as canonical, it is not expressly named in any of the ancient catalogues of the canon of Scripture, except, as already observed, that of the Council of Laodicea, and the remarkable circumstance of this being the only deuterocanonical book named in the canon of that council has given rise to various conjectures. Dean Prideaux, indeed, conceives that the words of the canon, 'Jeremiah, with Baruch, the Lamentations and the Epistle,' were intended to express no more than Jeremiah's Prophecies and Lamentations; that by the *Epistle* is meant only the epistle in the 29th chapter of Jeremiah, and that Baruch's name is added only because of the part he bore in collecting them together, and adding the last chapter (*Connexion*, vol. i. p. 50). But on examining the Alexandrian manuscript in the British Museum, it will be seen that the arrangement of these books exactly tallies with the words of the canon. Immediately after Jeremiah follows Baruch, with its title and subscription; then the Lamentations, with title and subscription, and, last of all, the Epistle, with the title, 'The Epistle of Jeremiah,' and the following subscription, 'Jeremiah, Lamentations and the Epistle.'

(4) Whiston (*Authentic Records*, vol. i. p. 1, etc.) strongly contends for the canonicity of this book, founding his opinion on Origen's mode of citing it, with the formula 'It is written,' as well as his testimony, recorded by Eusebius (*Hist. Eccles.* vi:25), that *The Epistle* (Baruch vi) was owned by the Jews, in addition to the fact that it is stated in the Apostolical Constitutions that the book of Baruch, together with the Lamentations, was publicly read in the synagogues on the tenth day of the month Gorpiceus.

(5) Among the fathers the book of Baruch is cited generally as part of the book of Jeremiah—by Irenæus, Cyprian, Clement of Alexandria, Eusebius, Ambrose, Augustine, Chrysostom, Basil, Epiphanius and others. Augustine, having cited under the name of Jeremiah the passage in our Bibles, Baruch iii:35-37, observes: 'Some ascribe this saying not to Jeremiah, but to Baruch, his

amanuensis, but it is now known under the name of Jeremiah (*City of God*, chap. xxxiii). The book of Baruch is also cited as part of Jeremiah in the Roman office for the Saturday in Whitsun week. This mode of citing it most probably accounts for the fact of its name being omitted in the ancient catalogues, including those of Hippo and Carthage. It was at length cited as a separate book by the Council of Florence, and afterwards, not without a struggle (see Father Paul's history), by the Council of Trent.

(6) It is at the same time observed by Calmet that its 'canonicity had been denied not only by the Protestants, but by several Catholics,' among whom he instances Driedo, Lyranus and Dionysius of Carthage. He considers that Jerome treats the book with harshness when (*Preface to Jeremiah*) that father observes: 'I have not thought it worth while to translate the book of Baruch, which is generally joined in the Septuagint version to Jeremiah, and which is not found among the Hebrews, nor the pseudepigraphal epistle of Jeremiah.' This is the epistle forming the sixth chapter of Baruch, the genuineness of which is questioned by several who acknowledge that of the former part of the book. Most modern writers of the Roman church, among whom are Du Pin (*Canon of Scripture*), Calmet (*Commentary*), and Allber (*Hermeneutica Generalis*), reckon this a genuine epistle of Jeremiah's. Jahn, however, after St. Jerome, maintains its spurious and pseudepigraphal character. This he conceives sufficiently attested by the difference of style, and its freedom from Hebraisms. He considers it to be an imitation of the epistle of Jeremiah (chap. xxix). This epistle, however, is confessedly more ancient than the second book of Maccabees, for it is there referred to (Macc. ii:2; Comp. with Baruch vi:4) as an ancient document. The position of this letter varies in manuscripts; it sometimes precedes and sometimes follows Lamentations.

(7) The subject of the book is (1) an exhortation to wisdom and a due observance of the law; (2) it then introduces Jerusalem as a widow, comforting her children with the hope of a return; (3) an answer follows in confirmation of this hope. A prologue is prefixed, stating that Baruch had read his book to Jeremiah and the people in Babylon by the river Sud (Euphrates), by which the people were brought to repentance, and sent the book with a letter and presents to Jerusalem.

W. W.

(8) *The Epistle of Jeremiah*, which, according to the authority of some Greek MSS., stands in the English version as the 6th chapter of Baruch, is the work of a later period. It consists of a rhetorical declamation against idols (Comp. Jer. x; xxix), in the form of a letter addressed by Jeremiah "to them which were to be led captive to Babylon." The letter is divided into clauses by the repetition of a common burden; *they are no gods; fear them not* (vv:16, 23, 29, 66); *how can a man think or say that they are gods?* (vv:40, 44, 56, 64). The condition of the text is closely analogous to that of Baruch, and the letter found the same partial reception in the church. The author shows an intimate acquaintance with idolatrous worship, and this circumstance, combined with the purity of the Hellenistic dialect, points to Egypt as the country in which the epistle was written. There is no positive evidence to fix its date, for the supposed reference in 2 Macc. ii:2 is more than uncertain, but it may be assigned with probability to the first century B. C.

(9) A Syriac first epistle of Baruch "to the nine and a half tribes" (Comp. 2 Esdr. xiii:40, Vers.

Arab.) is found in the London and Paris Polyglots. This is made up of commonplaces of warning, encouragement and exhortation. Fritzsche (*Einkl.*, sec. 8) [with whom Davidson agrees (*Introd. to the O. T.*, iii:424)] considers it to be the production of a Syrian monk. It is not found in any other language. Whiston (*A Collection of Authentic Records*, etc., London, 1727, i:1 ff., 25 ff.) endeavored to maintain the canonicity of this epistle as well as that of the Book of Baruch (Brooke Foss Westcott, *Smith's Bib. Dict.*)

(10) The epistle called the Apocalypse of Baruch was discovered by Ceriani. This book has survived only in the Syrian version, of which Ceriani had the good fortune to discover a sixth century MSS. in the Milan Library. Of this MSS. he published a Latin translation in 1866 (*Mon. Sacr.* I. ii:73-98), which Fritzsche reproduced with some changes in 1871 (*Libri Apocryphi V. T.* pp. 654-699). The Syriac text appeared in 1871 (*Mon. Sacr.* v. ii:113-180), and a photo-lithographical facsimile of the MS. in 1883. A fragment of this book has long been known to the world, viz., chs. lxxxviii-lxxxvii, which constitute Baruch's Epistle to the nine and a half tribes that had been carried away captive. This letter is to be found in the London and Paris Polyglots in Syriac, with a Latin rendering; in Syriac alone in Lagarde's *Libri V. T. Apocryphi Syriac*, 1861. The Latin translation is also found in Fabricius' *Cod. Pseudepigr. V. T.*, and the English in Whiston's *Authentic Records* (R. H. Charles, *Hastings' Bib. Dict.*)

BARZILLAI (bär-zil'la-i or läi), (Heb. בַּרְזִילַי, *bar-zil-lah'ee*, strong, iron).

1. A wealthy old Gileadite of Rogelim, who distinguished himself by his loyalty when David fled beyond the Jordan from his son Absalom. He sent in a liberal supply of provisions, beds and other conveniences for the use of the king's followers (2 Sam. xvii:27; xix:32). After the rebellion had been suppressed, Barzillai, on account of age, and probably also from natural and proper pride, declined David's offer to be a resident of the court, but proposed his son Chimham should go instead (2 Sam. xix:31-40). David, in his final charge to Solomon, enjoined it upon him to show kindness to Barzillai's family, and even to make them members of the royal household (1 Kings ii:7).

2. The Meholathite, father-in-law of Michal, Saul's daughter (2 Sam. xxi:8), B. C. 1021.

3. The husband of a daughter of Barzillai the Gileadite, whose descendants returned from Babylon, but in vain sought admittance to the priesthood (Ezra ii:61; Neh. vii:63, 64), B. C. 536.

BASHAN (bä'shan), (Heb. בַּשָּׁן, *basw-shawn'*, light soil, soft earth, fruitful).

(1) **Meaning.** The word probably denotes the peculiar fertility of the soil; in the ancient versions, instead of using it as a proper name, a word meaning *fruitful* or *fat* is adopted. Thus in Ps. xxii:12 for *Bashan*, we find in Septuagint *pcc'-oh-nes* (*fat*).

(2) **Territory.** The sacred writers include in Bashan that part of the country eastward of the Jordan which was given to half the tribe of Manasseh, situated to the north of Gilead. Bochart incorrectly places it between the rivers Jabbok and Arnon; and speaks of it as the allotment of the tribes of Reuben and Gad (Num. xxxii:33).

(3) **History.** The first notice of this country is in Gen. xiv:5. Cherdorlaomer and his confederates 'smote the Rephaims in Ashtaroth Karnaim.' Now Og, king of Bashan, dwelt in Ashtaroth, and 'was of the remnant of the Rephaim' ('giants,' Auth. Vers.), Joshua xii:4. When the Israelites invaded the Promised Land, Argob, a province of Bashan, contained 'sixty fenced cities, with walls and gates and brazen bars, besides unwalled towns a great many' (Deut. iii:4, 5; 1 Kings iv:13). These were all taken by the Israelites, and Og and his people utterly destroyed. Golan, one of the cities of refuge, was situated in this country (Deut. iv:43; Josh. xx:8; xxi:27; Joseph. *Antiq.* iv:7, sec. 4). Solomon appointed twelve officers to furnish the monthly supplies for the royal household, and allotted the region of Argob to the son of Geber (1 Kings iv:13). Towards the close of Jehu's reign, Hazael invaded the land of Israel, and smote the whole eastern territory, 'even Gilead and Bashan' (2 Kings x:33; Joseph. *Antiq.* ix:8, sec. 1); but after his death the cities he had taken were recovered by Jehoash (Joash) (2 Kings xiii:25), who defeated the Syrians in three battles, as Elisha had predicted (2 Kings xiii:19; Joseph. *Antiq.* ix:8, sec. 7). After the captivity the name *Batanæa* was applied to only a part of the ancient Bashan; the rest being called *Trachonitis*, *Auranitis*, and *Gaulanitis* (see Lightfoot's *Chorographical Notes* upon the places mentioned in St. Luke: Works, vol. x, p. 282). All these provinces were granted by Augustus to Herod the Great, and on his death *Batanæa* formed a part of Philip's tetrarchy (Joseph. *De Bell. Jud.* ii:6, sec. 3; *Antiq.* xviii:4, sec. 6). At his decease, A. D. 34, it was annexed, by Tiberius, to the province of Syria; but in A. D. 37 it was given by Caligula to Herod Agrippa, the son of Aristobulus, with the title of king (Acts xii:1; Joseph. *Antiq.* xviii:6, sec. 10). From the time of Agrippa's death, in A. D. 44, to A. D. 53, the government again reverted to the Romans, but it was then restored by Claudius to Agrippa II (Acts xxv:13).

(4) **Scripture Allusions.** The richness of the pasture land of Bashan, and the consequent superiority of its breed of cattle, are frequently alluded to in the Scriptures. We read in Deut. xxxii:14, of 'rams of the breed (Heb. *sons*) of Bashan.' (Ezek. xxxix:18) 'Rams, lambs, bulls, goats, all of them fatlings of Bashan.' The oaks of Bashan are mentioned in connection with the cedars of Lebanon (Is. ii:13; Zech. xi:2). In Ezekiel's description of the wealth and magnificence of Tyre it is said, 'Of the oaks of Bashan have they made their oars' (xxvii:6). The ancient commentators on Amos iv:1, 'the kine of Bashan,' Jerome, Theodoret, and Cyril, speak in the strongest terms of the exuberant fertility of Bashan (Bochart, *Hieroicoicon*, pars i, col. 306), and modern travelers corroborate their assertions (see Burekhardt's *Travels in Syria and the Holy Land*, pp. 286-288; Buckingham's *Travels in Palestine, Through the Countries of Bashan and Gilcad*. London, 1822, vol. ii, pp. 112-117).

J. E. R.

(5) **Tablet Allusions.** "In the Tel el-Amarna tablets the land of Bashan is called *Ziri-Basana*, 'the field of Bashan,' and the same name is found in an Egyptian text discovered at Abydos, which tells us that the prime minister of the first year of Meneptah's reign was a native of 'Zar-Basana,'" (Sayce, *Higher Crit. and Mon.*, p. 251).

BASHAN-HAVOTH-JAIR (bā'shan-hā'voth-jā'ir), (Heb. בָּשָׁן חַבּוֹת יַעֲרִי *baw-shawn' khav-vothe' yaw-er'*, the Bashan of the villages of Jair), a name given to Argob after its conquest (B. C. 1451) by Jair (Deut. iii:14). (See HAVOTH-JAIR.)

BASHEMATH (bāsh'e-māth), (Heb. בִּשְׁמִית *bos-math'*, fragrance; elsewhere, 1 Kings iv:15, more correctly, "Basmath").

1. Daughter of Ishmael (Gen. xxxvi:3, 4, 13), from whose son, Reuel, four tribes of the Edomites were descended (B. C. 1796). She is called Mahalath (Gen. xxviii:9).

2. A daughter of Solomon and wife of one of his officers (1 Kings iv:15). (See BASMATH.)

BASIN (bā's'n), the rendering in the A. V. of several words in the original; also spelled "bason."

1. *Ag-gawn'* (Heb. אֲגָוֵן *ag-gawn'*) literally, *pounded out*; a vessel for washing, a *laver*, *large bowl*, or *cup* (Exod. xxiv:6).

2. *Saf* (Heb. סַף *saf*), dishes or bowls for holding the blood of victims (Exod. xii:22; Jer. lii:19); the oil for the sacred candlestick (1 Kings vii:50); basins for domestic purposes (2 Sam. xvii:28); also a drinking cup (Zech. xii:2).

3. *Miz-rawk'* (Heb. מִזְרֹק *miz-rawk'*), a bowl from which anything was sprinkled. The sacrificial *bowls* in the Tabernacle were of "brass," bronze or copper (Exod. xxvii:3), and those in the Temple, of gold (2 Chron. iv:8).

4. *Kef-ore'* (Heb. כַּפֹּרֶת *kef-ore'*), a *covered dish*, goblet, or tankard, such as the gold and silver vessels of the sanctuary (1 Chron. xxviii:17; Ezra i:10; viii:27).

5. *Nip-tare'* (Gr. *πῆλη*), a *large vessel*, such as the basin from which our Lord washed the disciples' feet (John xiii:5). (See BOWL; CUP.)

BASKET (bās'kēt). There are several words in the Scriptures by which different kinds of baskets appear to be indicated.

1. *Dood* (Heb. דוּד *dood*, a pot), which occurs in 2 Kings x:7, where the heads of Ahab's sons are sent from Samaria to Jezreel in baskets; Jer. xxiv:2, as containing figs; and Ps. lxxxix:6 (rendered *pots*), also as containing figs; where, therefore, deliverance from the baskets means deliverance from the bondage of carrying burdens in baskets. In fact, very heavy burdens were thus carried in Egypt, as corn in very large baskets from the field to the threshing-floor, and from the threshing-floor to the granaries. They were carried between two men by a pole resting on their *shoulders*; which agrees with the previous clause of the cited text, 'I removed his shoulder from the burden.' This labor and form of the basket are often shown in the Egyptian sculptures.

2. *Teh'neh* (Heb. תֵּהֵנֶה *teh'neh*), which occurs in connection with agricultural objects, 'the *basket* and the store' (Deut. xxvi:2-4; xxviii:5-17), and would therefore appear to have been somewhat similar to the above; and, in fact, the Egyptian sculptures show different baskets applied to this use.

3. *Kel-oo'b'* (Heb. כֶּלֶבֶת *kel-oo'b'*). From the etymology, this appears to have been an interwoven basket, made of leaves or rushes. In Lev. v:27, however, it is used for a bird cage, which must have been of open work, and probably not unlike our own wicker bird cages. The name is also applied to fruit baskets (Amos viii:1, 2).

Egyptian examples of which are presented in Figs. 2 and 4 (which contain pomegranates) of the annexed cut.

Ancient Egyptian.

4. *Sal-sil-loth'* (Heb. סַלְסִלוֹת *salsilloth*), occurs only in Jer. vi:9, where it obviously denotes baskets in which grapes were deposited as they were gathered. The form of the basket used for this purpose is often shown on the Egyptian monuments, and is similar to that represented in fig. 4, cut 2.

5. In all the other places where the word basket occurs, we are doubtless to understand a basket made of rushes, similar both in form and material to those used by carpenters for carrying their tools. This is still the common kind of basket throughout Western Asia; and its use in ancient Egypt is shown by an actual specimen which was found in a tomb at Thebes, and which is now in the British Museum. It was, in fact, a carpenter's basket, and contained his tools (fig. 1).

The specimens of Egyptian baskets in the British Museum, represented in our cut, convey a favorable idea of the basket-work of ancient with colors (figs. 3, 5, cut 1; also the modern times. Some of these are worked ornamentally examples, figs. 2, 7, cut 2). And besides these the monuments exhibit a large variety of hand-baskets, of different shapes, and so extensively employed as to show the numerous applications of basket-work in the remote times to which these representations extend. They are mostly manufactured, the stronger and larger sorts of the fibres, and the finer of the leaves of the palm tree, and not infrequently of rushes, still more seldom of reeds.

Modern Oriental.

6. In the New Testament *baskets* are described under the three following terms: *κῆρυκος* (*kof'ee-nos*), *σπυρίς* (*sphoo-rece'*, hamper), *σαργάνη* (*sar-gan'-ay*). The last occurs only in 2 Cor. xi:33, in describing St. Paul's escape from Damascus.

With regard to the two former words, it may be remarked that the first is exclusively used in the description of the miracle of feeding the five thousand (Matt. xiv:20; xvi:9; Mark vi:43; Luke ix:17; John vi:13), and the second, in that of the four thousand (Matt. xv:37; Mark viii:8); the distinction is most definitely brought out in Mark viii:19, 20.

The *spuris* is also mentioned as the means of St. Paul's escape (Acts ix:25). The difference between these two kinds of baskets is not very apparent. Their construction appears to have been the same. (Smith, *Bib. Dict.*)

BASMATH (bās'math), (Heb. בַּסְמַת, *bas-math'*, fragrance), a daughter of Solomon, who became the wife of Ahimaaz, one of the king's purveyors (1 Kings iv:15), B. C. about 1000. (See **BASHEMATH**.)

BASTARD (bās'tērd). By this word the Auth. Vers. renders the Hebrew מַמְזֵר, *mam-zare'*, polluted, which occurs only in Deut. xxiii:2 and Zech. ix:6. But Michaelis, *Mos. Recht*, ii, sec. 139, reads the word with a different punctuation, so as to make it a compound of two words, *mamzer*, meaning *stain, defect of a stranger*, implying the stain that would be cast upon the nation by granting to such a stranger the citizen-right.

(1) **Offspring of Prostitutes.** Some understand by it the offspring of prostitutes, but they forget that prostitutes were expressly forbidden to be tolerated by the law of Moses (Lev. xix:29; Deut. xxiii:17). The most probable conjecture is that which applies the term to the offspring of heathen prostitutes in the neighborhood of Palestine; since no provision was made by Moses against their toleration (Potter, *Archæol.* i. 354), and who were a sort of priestesses to the Syrian goddess *Astarte* (Comp. Num. xxv:1, *sq.*; Gesenius, *Comment on Isaiah*, ii. 339; Hos. iv:14; 1 Kings xiv:24; xv:12; xxii:46, 47; 2 Kings xxiii:7; Herodot. i. 199).

(2) **Among the Jews.** That there existed such bastard offspring among the Jews is proved by the history of Jephthah (Judg. xi:1-7), who on this account was expelled, and deprived of his patrimony.

(3) **In General.** In general bastard is one born out of wedlock. Thus *bastards*, or *mothers' children*, in the family of God, are those who, in respect of external profession, have the church for their mother, but were never savingly adopted and begotten of God (Heb. xii:8).

BAT (bāt), (Heb. עֵיט, *at-al'afe'*, night bird), occurs in Lev. xi:19.

(1) **Designation.** In Hebrew the word implies flying in the dark; which, taken in connection with the sentence 'moreover the othclaph and every *creeping thing that flieth* is unclean unto you; they shall not be eaten,' is so clear, that there cannot be a mistake respecting the order of animals meant; though to modern zoology neither the species, the genus, nor even the family is thereby manifested; the injunction merely prohibits eating bats, and may likewise include some tribes of insects. At first sight, animals so diminutive, lean, and repugnant to the senses, must appear scarcely to have required the legislator's attention, but the fact evidently shows that there were at the time men or tribes who ate animals classed with bats, a practice still in vogue in the great Australasian islands, where the frugivorous Pteropi of the harpy or goblin family, by seamen denominated flying-dogs, and erroneously vampires, are caught and

eaten; but where the insectivorous true bats, such as the genera common in Europe, are rejected. Some of the species of harpies are of the bulk of a rat, with from three to four feet of expanse between the tips of the wings; they have a fierce dog-like head, and are nearly all marked with a space of rufous hair from the forehead over the neck and along part of the back.

(2) **Habits.** They reside in the most dense foliage of large trees, whence they fly out at night and do considerable damage to the plantations of fruit trees. It was to one or more species of this section of Cheiroptera that we think the Mosaic prohibition was chiefly directed; and it is likewise to them that may be referred the foundation of the ancient legends concerning harpies, which, however much they may be distorted, have a basis of truth. Indeed, when we consider their voice, the faculty they have of feeding with their thumbs, their formidable teeth, their habit of flying in the day during dark weather, and their willingness, though they are frugivorous, to devour not only insects, but also the blood and flesh of small animals, we may admit that originally they were more daring in the presence of man; that their true characters are but moderately amplified by poetical fancy; and that the Mosaic injunction was strikingly appropriate.

In the texts of Scripture, where allusion is made to caverns and dark places, true *Vesperilionidæ*, or insect-eating bats, similar to the European, are clearly designated.

BATANÆA (bāt'a-næ'a). See **BASHAN**.

BATH (bāth), (Heb. בַּת, *bath*), a measure for liquids, of equal capacity with the ephah for corn, about eight gallons.

It is supposed that there was a common and sacred bath; the latter containing a third more than the former, because in 1 Kings vii:26, Solomon's brazen sea is said to contain 3,000 baths, and in 2 Chron. iv:5, 2,000; but without supposing this distinction, the vessel might ordinarily hold 2,000, and at a stretch, when filled to the brim, 3,000; or its foot might contain the third thousand. It has also been ingeniously conjectured, that as the Babylonish cubit was less than the Jewish, their liquid measures were less also. The book of the Chronicles was written subsequent to the captivity, and so 2,000 old Jewish "baths" might be equal to 3,000 Chaldean. (See **WEIGHTS AND MEASURES**.)

BATHE, BATHING (bāth, bāth'ing), (Heb. רָוַחַת, *raw-khats'*).

(1) In contradistinction to the washing of particular parts of the body, hands, feet, etc., bathing is used in this article of the washing of the whole body, and that either by the application of water, by pouring or otherwise, to the body, or by the immersion of the body in water, which alone is bathing in the strict sense of the term. The Hebrew of the Old Testament does not distinguish between the processes, both of which are expressed by *rawkhats*, to wash the body, as opposed to the washing of clothes. The newborn infant among the Hebrews was bathed in water before being dressed (Ezek. xvi:4). (*Hastings' Bib. Dict.*)

(2) The Israelites, from early times, were accustomed not only to wash the hands and feet before eating, but also to bathe the body when about to visit a superior (Ruth iii:3), after mourning, which always implied defilement (2 Sam. xii:20), but especially before any re-

religious service (Gen. xxxv:2; Exod. xix:10; Josh. iii:5; 1 Sam. xvi:5), that they might appear clean before God. The high priest at his inauguration (Lev. xiii:6), and on the day of atonement before each act of propitiation (Lev. xvi:4, 24), was also to bathe. To cleanse the body snow water was used, or lye put into the water (Job ix:30), also bran, according to Mishna. Bathing in running water was specially favored (Lev. xv:13), or in rivers (2 Kings v:10; Exod. ii:5). Baths were placed in the courts of private houses (2 Sam. xi:2; Susannah 15; Me. and Str.; Barnes, *Bib. Cyc.*).

(3) The "pools," such as that of Siloam, and Hezekiah's (Neh. iii:15, 16; 2 Kings xx:20; Is. xxii:11; John ix:7), often sheltered by porticoes (John v:2), are the first indications we have of public bathing accommodation. Ever since the time of Jason (Prideaux, ii. 168) the Greek usages of the bath probably prevailed, and an allusion in Josephus (*the baths of the soldiers*, *B. J.* i. 17, sec. 7) seems to imply the use of the bath (hence, no doubt, a public one, as in Rome) by legionary soldiers. We read also of a castle luxuriously provided with a volume of water in its court, and of a Herodian palace with spacious pools adjoining, in which the guests continued swimming, etc., in very hot weather from noon till dark (Joseph. *Antiq.* xii:4, sec. 11; xv:3, sec. 3). The hot baths of Tiberias, or more strictly of Emmaus (Euseb. *Onomast.* Αἰμάθ, query Αἰμάθ? Bonfrerius) near it, and of Callirhoe, near the eastern shore of the Dead Sea, were much resorted to. (Reland, i:46; Joseph. *Antiq.* xviii:2; xvii:6, sec. 5, *B. J.* i:33, sec. 5; Amm. Mareell. xiv:8; Stanley, 373, 295.) The parallel customs of ancient Egypt, Greece, and Rome, are too well known to need special allusion. (Smith, *Bib. Dict.*)

Figurative. 1. By a bold and striking figure, "the sword of the Almighty bathed in heaven," Isaiah represents the vengeance of God on the mighty ones of earth (Is. xxxiv:6).

2. Heaven in Scripture is often emblematical of exalted political power (Is. xiv:12; Matt. xxiv:29; Rev. vi:13; viii:12).

BATH-GALLIM (bāth-gāllim), (Is. x:30). See GALLIM.

BATH KOL (bāth'kol), (Heb. בַּת קוֹל, *bath'kol*, daughter of the voice).

Under this name the *Talmud*, the later Targums, and the Rabbinical writers, make frequent mention of a kind of oracular voice, constituting the fourth grade of revelation, which, although it was an instrument of Divine communication throughout the early history of the Israelites, was the most prominent, because the sole, prophetic manifestation which existed during (and even after) the period of the second Temple. The *Midrashim* and the *Gemara*, cited in Reland's *Antiq. Sacr.* pt. ii., chap. ix, severally affirm that the Bath Kol is the voice which spoke to Abraham, Moses, David, Nebuchadnezzar, and others; and the Targums of Jonathan and of Jerusalem make the Bath Kol appear in Gen. xxxviii:26; Num. xxi:6, and in other places.

The Jewish authorities are not agreed as to what the Bath Kol was, nor as to the precise reason of its designation. It is disputed whether the persons hearing the Bath Kol heard the very voice from heaven, or only a daughter of it—an echo of it; whether as thunder is often mentioned as a sign of the Divine presence, and as the word *voice* appears to be used for thunder in Exod. ix:23; Jer. x:13; Ps. xxix:3, the Bath Kol may not

signify an articulate voice proceeding out of the thunder; or whether, according to the explanation of Maimonides, 'the Bath Kol is when a man has such a strong imagination that he believes he hears a voice from without himself.' As to the meaning of the name itself, passages are cited in Buxtorf's *Lex. Talm.* s. v. בַּת, and in Reland's *Antiq. Sacr.* l. c., which show that the daughter of the voice sometimes means the echo of a sound, and sometimes merely a primary sound itself.

It is certain that the *Peshito* has sometimes rendered the simple Greek *phonay*, by 'daughter of the voice,' as in Acts xii:22; 1 Tim. vi:20; Heb. iii:15.

BATH-RABBIM (bāth'rāb'bim), (Heb. בַּת־רַבִּים, *bath-rab'bim*, daughter of many), the name of one of the gates of the ancient city of Heshbon, near which were two pools to which Solomon compares the eyes of his "beloved" (Cant. vii:4).

BATH-SHEBA (bāth'shē'bā or bāth'she-bā), (Heb. בַּת־שֶׁבַע, *bath-sheh'bah*, daughter of the oath); also Bath-shua, daughter of Eliam, granddaughter of Ahitophel, and wife of Uriah.

She was seduced and became pregnant by King David during the absence of her husband, who was then engaged at the siege of Rabbah (2 Sam. xi:4, 5; Ps. li:2). The child thus born in adultery became ill and died (2 Sam. xii:15-18). After the lapse of the period of mourning for her husband, who was slain by the contrivance of David (xi:15), she was legally married to the king (xi:27), and bore him Solomon (xii:24; 1 Kings i:11; ii:13). In 1 Chron. iii:5 she is called Bath-shua instead of Bath-sheba; and her father, Ammiel, instead of Eliam (Comp. Matt. i:6). The other children of Bath-sheba are named in 2 Sam. v:14; 1 Chron. iii:5. She is afterwards noticed only in consequence of her good-natured intercession for Adonijah; which incidentally displays the respect with which she was treated by king Solomon, her son (1 Kings ii:19). (See DAVID; ADONIJAH.)

The Rabbins describe Bath-sheba as a woman of vast information and a highly cultivated mind, to whose education Solomon owed much of his wisdom and reputation, and even a great part of the practical philosophy embodied in his Proverbs (see Prov. iv:3; xxxi).

BATH-SHUA (bāth-shu'a), (Heb. בַּת־שׁוּעַ, *bath-shuh'ah*, daughter of prosperity). This name is translated "daughter of Shua" in Gen. xxxviii:12 and in 1 Chron. ii:3; but in 1 Chron. iii:5, it is used as the name of the mother of Solomon, and she is called the daughter of Ammiel (elsewhere *Eliam*). In Gen. xxxviii:2, 12, Bath-shua is really the name of Judah's wife (B. C. 1035), while Bath-sheba's original husband was a Hittite.

BATH-ZACHARIAS (bāth-zāk'a-rī'as), a place near Bethsura celebrated for a battle fought between Antiochus Eupator and Judas Maccabæus (1 Macc. vi:30). Epiphanius says the prophet Habakkuk was born in the territories of Bath-zacharias

BATTLE (bāt'tl), (Heb. מִלְחָמָה, *mil-khaw-maw'*, fighting).

Mode of Warfare. Though the Hebrews in their mode of conducting warlike operations varied somewhat in the course of ages, and are elsewhere shown to have been swayed by the practice of greater and more military nations, still, from the period when the institution of

royalty gave rise to an organized system, it was a maxim to spare the soldiers all unnecessary fatigue before an engagement, and to supply them liberally with food. (1) Their arms were enjoined to be in the best order, and when drawn up for battle they formed a line of solid squares of a hundred men, each square being ten deep, and with sufficient interval between to allow of facility in movements, and the slingers to pass through. (2) The archers may have occupied the two flanks, or formed in the rear, according to the intentions of the commander on the occasion; but the slingers were always stationed in the rear until they were ordered forward to impede an hostile approach, or to commence the engagement, somewhat in the manner of modern skirmishers. (3) Meantime, while the trumpets waited to sound the last signal, the king, or his representative, appeared in his sacred dress (the *hadre kodesh*, rendered in our version 'the beauties of holiness'), except when he wished to remain unknown, as at Megiddo (2 Chron. xxxv:22); and proceeded to make the final dispositions in the middle of his chosen braves, attended by priests, who, by their exhortations, animated the ranks within hearing. (4) It was now, we may suppose, when the enemy was at hand, that the slingers would be ordered to pass between the intervals of the line of solid squares, open their order and with shouts let fly their stone or leaden missiles, until by the gradual approach of the opposing fronts they would be hemmed in, and be recalled to the rear, or to cover a flank. Then would come the signal to charge, and the great shout of battle; the heavy infantry, receiving the order to attack, would, under cover of their shields and leveled spears, press direct upon the front of the enemy; the rear ranks might then, if so armed, cast their second darts, and the archers from the rear shoot high, so as to pitch the arrows over their own main line of spearmen into the dense masses beyond them. (5) If the enemy broke through the intervals, we may imagine that a line of charioteers in reserve, breaking from their position, might in part charge among the disordered ranks of the foe, drive them back, and facilitate the restoration of the oppressed masses, or wheeling round a flank, fall upon the enemy, or be encountered by a similar maneuver, and perhaps repulsed. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and in the middle of the showered missiles, would watch the enemy and remedy every disorder. (6) In this position it was that several of the sovereigns of Judah were slain (2 Chron. xviii:33, and xxxv:23), and that such an enormous waste of human life took place; for the shock of two hostile lines of masses, at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to retreat; because the hindermost ranks, not feeling personally the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being defeated. (7) The fate of the day was therefore no longer within the control of the chief, and nothing but obstinate valor was left to decide the victory. (8) Under such circumstances, defeat led to irretrievable confusion; and where either party possessed superiority in cavalry and chariots of war, it would be materially increased; but where the infantry alone had principally to pursue a broken enemy, that force, laden with shields, and preserving order, could overtake

very few who chose to abandon their defensive armor, unless they were hemmed in by the locality. (9) Sometimes a part of the army was posted in ambush, but this maneuver was most commonly practiced against the garrisons of cities (Josh. viii:12; Judg. xx:38). In the case of Abraham (Gen. xiv:16), when he led a small body of his own people suddenly collected, and fell upon the guard of the captives, released them, and recovered the booty, it was a surprise, not an ambush; nor is it necessary that he should have fallen in with the main army of the enemy. (10) At a later period, there is no doubt that the Hebrew armies, in imitation of the Romans, formed into more than one line of masses; but there is ample evidence that they always possessed more stubborn valor than discipline. (See WAR.)

BATTLE-AXE (bät'tl-äks'), (Jer. li:20). See AXE.

BATTLE-BOW (bät'tl-bō'), (Heb. קֶשֶׁת מִלְחָמָה, *ke'sheth mil-khaw-marw'*), the military bow, made of steel (Job xx:24), and so stiff that it could only be bent when the foot was placed on it. Hence, to tread the bow, means to bend it (Zech. ix:10; x:4).

BATTLEMENT (bät'tl-ment), (Heb. מַעֲרֵב, *mah-ak-eh'*, ledge), a breastwork, of wall or lattice, surrounding the flat roofs of Eastern houses, required as a protection against accidents (Deut. xxii:8). "Battlements" is the rendering (Jer. v:10) for נֶט-עֵשָׂו, *net-ee-shaw'*, tendril, the parapet of a city wall. (See HOUSE.)

BAVAI (bäv'a-i), (Heb. בָּוֵי, *bav-va'ee*, wishes), son of Henadad and ruler of the half of Keilah (B. C. 445). He repaired a portion of the wall of Zion, after the return from Babylon (Neh. iii:18).

BAY (Heb. לָשׁוֹן, *law-shone'*, tongue).

1. The cove of the Dead Sea, at the mouth of the Jordan (Josh. xv:5; xviii:19).

2. The color, according to A. V., of one of the spans of horses in the vision of Zechariah (vi:3, 7). It is the rendering of מִשְׁחָר, *aw-mohts'*, strong. Keil and Delitzsch translate "speckled powerful horses" (*Com.*, in loc.), (Barnes' *Bib. Dict.*).

BAY TREE (bä' trē'), (Ps. xxxvii:35).

"It may be questioned whether any particular tree is intended by the Psalmist; but, if so, it must have been an evergreen, and may possibly be the sweet bay (*Laurus nobilis*), which is a native of Palestine. It is not very common, but may be found in most of the wooded dells of northern and western Palestine."—*Tristram*. The leaves of the bay are much like those of the American mountain-laurel, but are fragrant when crushed, and often come to our market packed with figs (Schaff, *Bib. Dict.*). (See EZRACH.)

BAZLITH (bäz'lith), (Heb. בָּצִלְתִּי, *bats-leeth'* asking or nakedness), the head of a family whose children returned with the Nethinim under Zerubabel (Neh. vii:54), B. C. 536.

BAZLUTH (bäz'luth), (Heb. בָּצִלוּת, *bats-looth'*), another form of Bazlith (Ezr. ii:52). (See BAZLITH.)

BDELLIUM (děl'yüm), (Gen. ii:12).

After much discussion, it is still impossible to say whether bdellium is a mineral, an animal production (pearl), or a vegetable exudation. It is probably the latter. There is a gum produced in

the East Indies which has the same name and is thought by many to be the same substance. It resembles myrrh in color, and is of a bitter taste (Num. xi:7). (See BEDOLACH.)

BEACON (bē'k'n), (Heb. תִּירֵן, *to'ren*), a tree stripped of its branches and used like a flagstaff (Is. xxx:17, marg., "tree bereft of branches"), hence, a *signal, pole, mast* (Is. xxx:17; v:26; xi:12; xviii:3; lxii:10). (See ENSIGN.)

BEALIAH (bē'a-lī'ah), (Heb. בְּעֵלְיָהוּ, *beh-al-yaw'*, whose Lord is Jehovah). The word contains the names of both Baal and Jah, a Benjamite who went over to David (B. C. 1054), at Ziklag (1 Chron. xii:5).

BEALOTH (bē'a-lōth), (Heb. בְּעֵלוֹת, *beh-aw-lōth'*, probably citizens).

1. An unknown town in the south of Judah (Josh. xv:24).

2. Some think Aloth of 1 Kings iv:16 is Bealoth.

BEAM (bēm).

1. *Eh'reg* (Heb. אֶרֶג, a web), a weaver's beam (Judg. xvi:14).

2. *Gabe* (Heb. גַּב, cutting), a board (1 Kings vi:9).

3. *Maw-nore'* (Heb. מְנוֹרָה, yoke), a weaver's frame, or beam (1 Sam. xvii:7; 2 Sam. xxi:19; 1 Chron. xi:23; xx:5).

4. *Obe* (Heb. עֵבֶה), a term of architecture, a *threshold step* (1 Kings vii:6; Ezek. xli:25, A. V. "planks").

5. *Keh-rooth-oth'* (Heb. כְּרֹהֹת, hewed), beams (1 Kings vi:36; vii:2, 12).

6. *Tsay'law* (Heb. צֵלַע, a rib), joists of a building (1 Kings vii 3; "board" in vi:15, 16; "plank" in vi:15).

7. *Ko-raw'* (Heb. קִינֵיָהוּ, a crosspiece, *cross beam*, or *rafter* (2 Kings vi:2, 5; 2 Chron. iii:7; Cant. i:17).

8. *Kaw-fee'* (Heb. קַדְדִים, a crossbeam, *splinter, girder* (Hab ii:11).

9. *Kaw-raw'* (Heb. קַרְדֵּי, to fit beams, hence to *frame* (Neh. iii:3, 6; Ps. civ:3).

10. *Dok-os'* (Gr. δοκός), a *beam, a rafter, a stick* of wood for building purposes (Matt. vii:3, sq.; Luke vi:41, 42). In the passages referred to reference is made to a common proverb among the Jews, respecting those who with greater sins reproved the lesser faults of others, as also in the parallel proverb: "Strain (out) a gnat and swallow a camel" (Matt. xxiii:24). (See MOTE.)

BEANS (bēns), (Ezek. iv:9).

The Eastern plant ordinarily thus known (*Vicia faba*) is quite unlike the garden or field bean of the United States. It is of the same family, but is an erect annual with a stout stem, is one of the commonest field crops of Europe and the Orient, and bears in its pods large, coarse seeds, which are fed to animals and much eaten by the poorer classes. Kidney-beans are now sometimes cultivated in Palestine. (See POL.)

BEAR (bār) (Heb. דָּב, or דִּב, *dobe*, in Arabic *dub*, in Persian *dob*), is noticed in 1 Sam. xvii:34, 36, 37; 2 Sam. xvii:8; 2 Kings ii:24; Prov. xvii:12; xxviii:15; Is. xi:7; Lam. iii:10; Hos. xiii:8; Amos v:19, etc.

Although the moderns have denied the existence of bears in Syria and Africa, there cannot be a doubt of the fact, and of a species of the genus

Ursus being meant in the Hebrew texts above noted. David defended his flock from the attacks of a bear (1 Sam. xvii:34, 35, 36), and bears destroyed the children who mocked the prophet (2 Kings ii:24). The genus *Ursus* is

Syrian Bear.

the largest of all the plantigrade carnassials, and with the faculty of subsisting on fruit or honey unites a greater or less propensity, according to the species, to slaughter and animal food. To a sullen and ferocious disposition it joins immense strength, little vulnerability, considerable sagacity and the power of climbing trees. The brown bear, *Ursus arctos*, is the most sanguinary of the species of the Old Continent, and *Ursus Syriacus*, or the bear of Palestine, is one very nearly allied to it, differing only in its stature being proportionably lower and longer, the head and tail more prolonged, and the color a dull buff or light bay, often clouded, like the Pyrenæan variety, with darker brown. On the back there is a ridge of long semi-erect hairs running from the neck to the tail. It is yet found in the elevated woody parts of Lebanon.

BEARD (bērd), (Heb. זָרוּת, *zar-kawn'*, the beard, as indicating age).

The ancient nations in general agreed with the modern inhabitants of the East in attaching a great value to the possession of a beard. The total absence of it, or a sparse and stinted sprinkling of hair upon the chin, is thought by the Orientals to be as great a deformity to the features as the want of a nose would appear to us; while, on the contrary, a long and bushy beard, flowing down in luxuriant profusion to the breast, is considered not only a most graceful ornament to the person, but as contributing in no small degree to respectability and dignity of character.

(1) **Badge of Honor.** So much, indeed, is the possession of this venerable badge associated with notions of honor and importance that it is almost constantly introduced, in the way either of allusion or appeal, into the language of familiar and daily life. When a man's veracity is doubted, 'Look at this beard,' he will say, 'the very sight of it may satisfy you as to the truth and probity of its owner.' When censuring a bad or dishonest action, 'Shame on your beard' is the ordinary style of rebuke. When friends express their mutual good wishes, 'May God preserve your beard' is the strongest and most ardent form of benediction. When requesting a favor from any one, the most earnest terms of supplication are to beg 'by his beard, or the life of his beard,' that he will grant it; and no higher idea of the value of a thing can be given than by saying, 'It is worth more than one's beard.' In short, this hairy appendage of the chin is

most highly prized as the attribute of manly dignity, and hence the energy of Ezekiel's language when, describing the severity of the Divine judgments upon the Jews, he intimates that, although that people had been as dear to God and as fondly cherished by him as the beard was by them, the razor, *i. e.*, the agents of his angry providence, in righteous retribution for their long-continued sins, would destroy their existence as a nation (Ezek. v:1-5). With this knowledge of the extraordinary respect and value which have in all ages been attached to the beard in the East, we are prepared to expect that a corresponding care would be taken to preserve and improve its appearance, and, accordingly, to dress and anoint it with oil and perfume was, with the better classes at least, an indispensable part of their daily toilet (Ps. cxxxiii:2).

From the history of Mephibosheth it seems probable that the grandees in ancient Palestine 'trimmed their beards' with the same fastidious care and by the same elaborate process, while the allowing these to remain in a foul and disheveled state, or to cut them off, was one among the many features of sordid negligence in their personal appearance by which they gave outward indications of deep and overwhelming sorrow (2 Sam. xix:24; Ezra ix:3; Is. xv:2; Jer. xli:5; Comp. Herodot. ii:36; Suet. *Caligula*, chap. v).

No one was permitted to touch the beard except in the way of respectful and affectionate salutation, which was done by gently taking hold of its extremity with the right hand and kissing it. But this was allowed only to most intimate friends, such as wives or children. The act itself being an expression of kind and cordial familiarity, its performance by Joab shows in a flagrant light the base and unprincipled conduct of that ruthless veteran, when he took Amasa by the beard with his right hand to kiss him (rather *it*), and then, having assumed this attitude under the mask of the most friendly feelings, smote his unsuspecting victim under the fifth rib (2 Sam. xx:9).

(2) **Deprivation of, a Mark of Servility.** To be deprived of a beard was, and still is, in some places of the East, the badge of servility—a mark of infamy, that degraded a person from the ranks of men to those of slaves and women (Niebuhr, *Arabia*, ch. vii; Volney, ii, p. 118), while to shave it off voluntarily, even for a time, as the former writer mentions he knew was done by some in mere wantonness or a drunken fit, frequently subjects the offender to so great odium as to exclude him from society. Nay, so great is the disgrace entailed by the appearance of a smooth and naked chin that D'Arvieux describes the case of an individual who, having sustained a dangerous wound in his jaw, preferred hazarding his life rather than allow the surgeon to remove his beard.

We can easily conceive how deep and intolerable was the affront which the young and ill-advised king of the Ammonites put upon the ambassadors of David, when, among other acts of insolence, he shaved off one-half of their beards, and sent them home in that grotesque condition, exposed to the derision of their countrymen (2 Sam. x).

(3) **Among Egyptians.** The ancient Egyptians, although they shaved their beards, had the singular custom of tying a false beard upon the chin. This was probably by way of compromise between their love of cleanliness and their desire to preserve some trace of the distinguishing sign of manhood. It was made of plaited hair, and had a peculiar form according to the rank of the person by whom they were worn. Private in-

dividuals had a small beard, scarcely two inches long; that of a king was of considerable length and square at the bottom, and the figures of gods

Various Styles of Beards.

were distinguished by its turning up at the end (Wilkinson, *Anc. Egyptians*, iii:362).

From the above facts it is clear that the Israelites maintained their beard and the ideas connected with it, during their abode among the Egyptians. This is not unimportant as one of the indications which evince that, whatever they learned of good or evil in that country, they preserved the appearance and habits of a separate people. The Egyptians, as we have seen, shaved their beards off entirely, so the injunction in Lev. xix:27, against shaving 'the corners of the beard' must have been leveled against the practices of some other bearded nation. The prohibition is usually understood to apply against rounding the corners of the beard where it joins the hair, and the reason is supposed to have been to counteract a superstition of certain Arabian tribes, who, by shaving off or rounding away the beard where it joined the hair of the head, devoted themselves to a certain deity who held among them the place which Bacchus did among the Greeks (Herodot. iii:8; Comp. Jer. ix:26; xxv:23; xlix:32). The consequence seems to have been altogether to prevent the Jews from shaving off the edges of their beards. The effect of this prohibition in establishing a distinction of the Jews from other nations cannot be understood unless we contemplate the extravagant diversity in which the beard was and is treated by the nations of the East.

Figurative. As beards were thus esteemed by the Jews, God, by likening his people to the hairs of Ezekiel's head or beard, hints, that nowever dear they were to Him, He would destroy them in different forms (Ezek. v). When God threatens to shave the hair of His people's head and feet, and consume the beard, it imports his easy

cutting off in vast numbers their principal men and commons, and exposing them to the utmost ignominy for the purging of them from their sinful leprosy (Is. vii:20).

BEASTS (bests). The term is sometimes used by the translators for Heb. *בְּהֵמָה*, *be-hay-maw'*, dumb; at others for *בְּעִיר*, *beh-ere'*, live.

In general this word in the Bible, when used in contradistinction to *man* (Ps. xxxvi:6), denotes a brute creature generally; when in contradistinction to *creeping things* (Lev. xi:2-7; xxvii:20), it has reference to four-footed animals; and when to *wild mammalia*, as in Gen. i:25, it means domesticated cattle.

Tsiyim (Is. xiii:21) denotes wild beasts of the upland wilderness. *Ochim*, rendered 'doleful creatures' and 'marsh animals,' may, we think with more propriety, be considered as 'poisonous and offensive reptiles.'

Scirim, shaggy ones, is a general term for apes—not *satyrs*, a Pagan poetical creation unfit for Scriptural language; it includes *Saadim* as a species, and *Tannim*, monsters of the deep and of the wilderness—boas, serpents, crocodiles, dolphins, and sharks.

(1) **Zoölogy of Scripture.** The zoölogy of Scripture may, in a general sense, be said to embrace the whole range of animated nature; but after the first brief notice of the creation of animals recorded in Genesis, it is limited more particularly to the animals found in Egypt, Arabia, Palestine, Syria, and the countries eastward, in some cases, to beyond the Euphrates. It comprehends mammalia, birds, reptiles, fishes, and invertebrate animals; but in a work like the Bible, written for a far different purpose, we might naturally expect that only a small part of these would be found described, and that generical indications would more frequently occur than specific characteristics. As the intention of Scripture, in its allusions to animate or inanimate objects, was not scientific description, but the illustration of arguments and precepts by images drawn from objects familiar to those to whom it was addressed, it is not to be expected that zoölogy or botany should be treated systematically, or in terms such as modern science has adopted; yet, where we can now fully ascertain the true meaning of the text, the imagery drawn from natural history is always forcible, correct, and effective, even where it treats the subject under the conditions of the contemporary popular belief; for, had the inspired writers entered into explanations on matters of science not then commonly understood, the poetical force of the imagery, and consequently its intended effect, must necessarily have been greatly diminished; and, where system is appropriate, we find a classified general distribution of the creation, simple indeed, but sufficiently applicable to all the purposes for which it was introduced. It resembles other parts of the philosophy of the earliest nations, in which the physical distribution of matter, excepting so far as man is concerned, proceeds by triads. Botany is treated under the heads of grass, shrubs, and trees: in animated nature, beginning with the lowest organized in the watery elements, we have first *Sheretz*, 'the moving creature that hath life, animalcula, crustacea, insecta, etc.; second, *Tanninim*, fishes and amphibia, including the huge tenants of the waters, whether they also frequent the land or not, crocodiles, python serpents, and perhaps even those which are now considered as of a more ancient zoölogy than the present sys-

tem, the great Saurians of geology; and third, it appears, birds, '*Oph*, 'flying creatures' (Gen. i:20); and still advancing (cetaceans, pinnatipeds, whales and seals being excluded), we have quadrupeds, forming three other divisions or orders: First, cattle, *Behemah*, embracing the ruminant herbivora, generally gregarious and capable of domesticity; second, wild beasts, *Chayah*, carnivora, including all beasts of prey; and third, reptiles, *Remes*, minor quadrupeds, such as creep by means of many feet, or glide along the surface of the soil, serpents, annelides, etc.; finally, we have man, *Adam*, standing alone in intellectual supremacy.

(2) **Mosaic Classification.** The classification of Moses, as it may be drawn from Deuteronomy, appears to be confined to *Vertebrata* alone, or animals having a spine and ribs, although the fourth class might include others. Taking man as one, it forms five classes—1st, Man; 2d, Beasts; 3d, Birds; 4th, Reptiles; 5th, Fishes. It is the same as that in Leviticus xi, where beasts are further distinguished into those with solid hoofs, and those with cloven feet. But the passage specially refers to animals that might be lawfully eaten because they were clean, and to others prohibited because they were declared unclean, although some of them, according to the common belief of the time, might ruminant; for it may be repeated that the Scriptures were not intended to embrace anatomical disquisitions aiming at the advancement of human science, but to convey moral and religious truth, without disturbing the received opinions of the time on questions having little or no relation to their main object. In like manner, fishes and birds are divided into clean and unclean; and, taken altogether, the classification now described forms an excellent series of distinctions, which, even at the present day, and in countries far distant from the scene where it was ordained, still remains applicable, with few exceptions; and from its intrinsic propriety will remain in force, notwithstanding our present knowledge of the manners and opinions of the East and of Egypt has rendered many of the earlier comments upon it in a great measure useless.

Figurative. 1. Ministers are called *beasts* (Rev. iv:v:vi), but the word ought in all these passages to be rendered *living creatures*, as in Ezek. i.

2. Saints compare themselves to *beasts* because of their sinful vileness, ignorance, stupidity, unruliness, carnality (Prov. xxx:2; Ps. lxxiii:22).

3. Men in general are called *beasts* for their earthliness, ignorance, unteachableness, contention, hurtfulness to one another (Eccl. iii:18).

4. The most useful and mild animals, as oxen, cows, calves, sheep, lambs, doves, are emblems of the saints; whilst lions, bears, wolves, serpents, are made emblems of the outrageously wicked (Isa. xi:6, 7, 8).

5. The most powerful animals, as eagles, lions, bullocks, he-goats, rams, leviathan, etc., are made emblems of kings and others, who are powerful and wealthy. The subjects of the kings of Assyria, Chaldea and Egypt are parabolically represented as *beasts* lodged under the shadow of their protection, as animals under a tree (Ezek. xxxi:6; Dan. iv:14).

6. Wicked men are called *beasts* for their unreasonableness, earthly mindedness, neglect of eternal things, and rage against God and his people (1 Cor. xv:32; 2 Pet. ii:12).

7. *Beasts* of the earth sometimes denote ravenous beasts (Gen. xv:3).

8. The Chaldean, Persian, Grecian, Roman and anti-Christian empires are likened to *beasts*, because by methods cruel and unjust they have been erected and maintained (Dan. vii:11; viii:4; Rev. xii, xiii, xvii, xviii).

9. The scarlet-colored *beast* that carries the Antichrist is the bloody empire of Rome, parted among persecuting princes (Rev. xvii:3).

10. The *beasts* that devour Antichrist's slaughtered troops are not only those literally so called, but the Protestants who seize on their spoils (Rev. xix:17, 23).

11. The Hebrews' passage through the Red Sea and wilderness is likened to a *beast* going down into or along a valley; it was easy and safe under the protecting influence of God (Is. lxiii:14). (Brown, *Bib. Dict.*)

BEATITUDE (bē-ăt'ī-tūd).

The word 'beatitude' does not occur in the English Bible. In Biblical Theology it signifies either (1) the joys of heaven, or (2) one of the declarations of blessedness made by Christ as attached to certain virtues, or conditions, or persons. The name is commonly given to the first clauses of our Savior's Sermon on the Mount (Matt. v:3-11). They are as follows:

1. Blessed *are* the poor in spirit, for theirs is the kingdom of heaven.

2. Blessed *are* they that mourn, for they shall be comforted.

3. Blessed *are* the meek, for they shall inherit the earth.

4. Blessed *are* they which do hunger and thirst after righteousness, for they shall be filled.

5. Blessed *are* the merciful, for they shall obtain mercy.

6. Blessed *are* the pure in heart, for they shall see God.

7. Blessed *are* the peacemakers, for they shall be called the children of God.

8. Blessed *are* they which are persecuted for righteousness' sake, for theirs is the kingdom of heaven.

Blessed are ye, when *men* shall revile you, and persecute *you*, and shall say all manner of evil against you falsely, for my sake.

The eight beatitudes may be regarded as an analysis of perfect spiritual wellbeing; and nowhere in non-Christian literature shall we find so sublime a summary of the best elements in the felicity attainable by man. They correct all low and carnal views of human happiness.

"They do not describe eight different classes of people, but eight different elements of excellence, which may all be combined in one and the same man. Some of them, indeed, are almost certain to be so combined, *e. g.* being poor in spirit with meekness, and endurance of persecution with mourning. And perhaps it is not untrue to say with Ambrose that the four given by St. Luke virtually include the whole eight; but to make each of the four correspond to one of the four cardinal virtues is to force the meaning of one or the other." (A. Plummer, *Hastings' Bib. Dict.*)

BEBAI (bēb'a-i or bē'bāi), (Heb. בְּבַי, *bay-bah'ee*, fatherly).

1. The head of one of the families that returned from Babylon (B. C. 536) with Zerubbabel (Ezra ii:11; Neh. vii:16). Later twenty-eight more returned (B. C. 459) with Ezra (Ezra viii:11). Of this family four had taken foreign wives (Ezra x:28). They were among those who sealed the covenant (B. C. 410) with Nehemiah (Neh. v:15).

2. Father of Zechariah, leader of the twenty-eight men mentioned in 1. (Ezra viii:11).

3. One of the chiefs of the people, who entered into covenant with Nehemiah (Neh. x:15).

BECHER (bē'ker), (Heb. בְּכֶרֶךְ, *beh-ker*, firstborn, youth, according to Simonis, young camel).

1. Second son of Benjamin (Gen. xlvi:21; 1 Chron. vii:6); but wanting in 1 Chron. viii:1, as the text stands (B. C. 1700). He was one of the descendants of Rachel who came down to Egypt with Jacob and settled there. Among his descendants were Saul and Sheba; the last headed a formidable rebellion against David (2 Sam. xx).

2. Son of Ephraim (Num. xxvi:35), same as 1. It is likely that either Becher or his descendant and head of the house married an Ephraimitish heiress (1 Chron. vii:20, 21), and for this reason was reckoned in that tribe as Jair (1 Chron. ii:22), B. C. after 1874.

BECHORATH (be-kō'rath), (Heb. בְּכוֹרָה, *bek-orath'*, firstborn), a son of Aphiah, or Abiah (B. C. 1225); grandson of Becher (1 Sam. ix:1). He was an ancestor of Saul.

BED (bēd).

The manner of sleeping in warm Eastern climates is necessarily very different from that which is followed in our colder regions. The present usages appear to be the same as those of the ancient Jews, and sufficiently explain the passages of Scripture which bear on the subject.

(1) **Bedding.** Beds of feathers are altogether unknown, and the Orientals generally lie exceedingly hard. Poor people who have no certain home, or when on a journey, or employed at a

distance from their dwellings, sleep on mats, or wrapped in their outer garment, which, from its importance in this respect, was forbidden to be retained in pledge over night (D'Arvieux, iii:257; Gen. ix:21, 23; Exod. xxii:27; Deut. xxiv:13). Under peculiar circumstances a stone covered with

some folded cloth or piece of dress is often used for a pillow (Gen. xxviii:11). The more wealthy classes sleep on mattresses stuffed with wool or cotton, which are often no other than a quilt thickly padded, and are used either singly or one or more placed upon each other. A similar quilt of finer materials forms the coverlet in winter,

and in summer a thin blanket suffices, but sometimes the convenient outer garment is used for the latter purpose, and was so among the Jews, as we learn from 1 Sam. xix:13. The difference of use here is, that the poor *wrap themselves up* in it, and it forms their whole bed, whereas the rich employ it as a *covering* only. A pillow is placed upon the mattress, and over both, in good houses, is laid a sheet. The bolsters are more valuable than the mattresses, both in respect of their coverings and material; they are usually stuffed with cotton or other soft substance; but instead of these, skins of goats or sheep appear to have been formerly used by the poorer classes and in the hardier ages. These skins were probably sewed up in the natural shape, like water-skins, and stuffed with chaff or wool (1 Sam. xix:13).

It has been doubted whether the couches of the Jews for repose and for the use of the sick, called *mit-taw'* (Heb. מִיטָוֹ), a bed as *extended* (Gen. xlvii:31; 1 Sam. xix:13; 2 Sam. iv:7; 2 Kings i:4); *mish-kawb'* (Heb. מִשְׁכָּב), (Exod. xxi:18; 2 Sam. xiii:5; Cant. iii:1), or *eh'res* (Heb. עֲרֵשׁ), (Job vii:13; Cant. i:16), properly 'bedstead,' (Comp. Deut. iii:11), were actually bedsteads of different sorts, or simply the standing and fixed divans such as those on which the Western Asiatics commonly make their beds at night.

It has been usually thought that the choice must lie between these alternatives, because it has not been understood that in the East there is, in fact, a variety of arrangement in this matter, but we feel satisfied that the different Hebrew words answer to and describe similarly different arrangements, although we may be unable now to assign to the several *words* their distinctive applications to still subsisting *things*.

(2) **Divan.** The divan, or dais, is a slightly elevated platform at the upper end and often along the sides of the room. On this are laid the mattresses on which the Western Asiatics sit cross-legged in the daytime, with large cushions against the wall to support the back. At night the light bedding is usually laid out upon this divan, and thus beds for many persons are easily formed. The bedding is removed in the morning, and deposited in recesses in the room, made for the purpose. This is a sort of general sleeping-room for the males of the family and for guests, none but the master having access to the inner parts of the house, where alone there are proper and distinct bed-chambers. In these the bedding is either laid on the carpeted floor, or placed on a low frame or bedstead.

(3) **Bedstead.** The most common bedstead in Egypt and Arabia is of this shape, framed rudely

of palm sticks. It was used in ancient Egypt, and is figured in the mural paintings. In Palestine, Syria and Persia, where the palm tree is not common and where timber is more plentiful, a bed-frame of similar shape is made of boards. This kind of bedstead is also used upon the house-tops during the season in which people sleep there. It is more than likely that Og's bedstead was of this description (Deut. iii:11). In the times in which he lived the palm tree was more common in Palestine than at present, and the bedsteads in ordinary use were probably formed of palm sticks. They would, therefore, be incapable of sustaining

any undue weight without being disjointed and bent awry, and this would dictate the necessity of making that destined to sustain the vast bulk of Og, rather of rods of iron than of the mid-ribs of the palm-fronds. These bedsteads are also of a length seldom more than a few inches beyond the average human stature (commonly 6 feet 3 inches), and hence the propriety with which the length of Og's bedstead is stated, to convey an idea of his stature.

It is not necessary to suppose that the bedsteads were all of this sort. There are traces of a kind of portable couch (1 Sam. xix:15), which appears to have served as a sofa for sitting on in the daytime (1 Sam. xxviii:23; Ezek. xxiii:41; Amos vi:4), and there is now the less reason to doubt that the ancient Hebrews enjoyed this convenience, as we find such couches in use among the neighboring nations, and figured on their monuments.

Couch-bed with Head Rest.

A bed with a tester is mentioned in Judith xvi:23, which, in connection with other indications, and the frequent mention of rich tapestries hung upon and about a bed for luxuriousness and ornament, proves that such beds as are still used by royal and distinguished personages were not unknown under the Hebrew monarchy (Comp. Esth. i:6; Prov. vii:16 *seq.*; Ezek. xxiii:41).

(4) **Customs.** It is evident that the ancient Jews, like the modern inhabitants of their land, seldom or never changed their dress on going to bed. Most people only divest themselves of their outer garment, and loosen the ligatures of the waist, excepting during the hottest part of the summer, when they sleep almost entirely unclad.

BEDAD (bē'dād), (Heb. בְּדָד, *bed-ad'*, separation), the father of one of the kings of Edom (Gen. xxxvi:35; 1 Chron. i:46), B.C. 1500.

BEDAN (bē'dan), (Heb. בְּדָן, *bed-arwn'*).

In 1 Sam xii:11, we read that the Lord sent as deliverers of Israel Jerubbaal, *Bedan*, Jephthah, Samuel. Three of these we know to have been judges of Israel, but we nowhere find Bedan among the number. The Targum understands it of Samson, and so Jerome and the generality of interpreters, but this interpretation goes on the supposition that *bedarwn* should be rendered *in Dan*, *i. e.*, one in Dan, or of the tribe of Dan, as Samson was. In this sense, as Kimchi observes, it would have the same force as Ben-Dan, a son of Dan, a Danite. Such an intermixture of proper names and appellatives, however, is very doubtful, and it is to be noted that Bedan is mentioned before Jephthah, whereas Samson was after him. The Septuagint, Syriac and Arabic have *Barak*, which many think the preferable reading (Comp. Heb. xi:32). A man of the name of Bedan occurs, however, among the posterity of Manasseh (1 Chron. vii:17), and Junius, followed by some others, thinks that the judge Jair

is meant, and that he is here called Bedan to distinguish him from the more ancient Jair, the son of Manasseh. The order in which the judges are here named is not at variance with this view (Num. xxxii:41; Judg. x:3, 4); but surely, if Jair had been really intended, he might have been called by that name without any danger of his being, in this text (where he is called a deliverer of Israel, and placed among the judges), confounded with the more ancient Jair.

BEDCHAMBER (bĕd'chām'bēr), (Heb. הַמְצֻחָה, *khad-ar' ham-mee-toth'*, room of beds, 2 Kings xi:2; 2 Chron. xxii:11; הַבַּיִת מִשְׁכָּב, *khad-ar' mish-kawb'*, sleeping room, Exod. viii:3; 2 Sam. iv:7; 2 Kings vi:12). The "bedchamber" in the temple where Joash was hidden was probably a store chamber for keeping beds (2 Kings xi:2; 2 Chron. xxii:11). The position of the bedchamber in the most remote and secret parts of the palace seems marked in the passages Exod. viii:3; 2 Kings vi:12 (Mc. and Str. *Bib. Cyc.*).

BEDEIAH (be-dē'yà), (Heb. בְּדֵיָא, *bay-de-yaw'*, servant of Jehovah), one of the family of Bani who had married a strange wife (Ezra x:35), B. C. 458.

BEDOLACH (bĕd'o-lāk), (Heb. בְּדוֹלַח, *be-dolach'*).

This word occurs but twice in the Scriptures—in Gen. ii:12, as a product of the land of Havilah, and Num. xi:7, where the manna is likened to it. It has been much disputed among critics, both ancient and modern. In the Septuagint it is considered as a precious stone, and translated (Gen. ii:12) by ἀνθραξ, *a dark red stone, carbuncle*, and (Num. xi:7) by κρύσταλλος, *crystal*; while Aquila, Symmachus, Theodotion and the Vulgate render it *bdellium*, a transparent aromatic gum from a tree growing in Arabia. Of this opinion also is Josephus, *Antiq.* iii:1, 6, where he describes the manna as *similar to the aromatic bdellium* (Num. xi:7).

The Jewish Rabbins, however, followed by a host of their Arabian translators, and to whom Bochart (*Hieroz.* iii, p. 593, sq.) and Gesenius (*Thesaur.* i:181) accede, translate *bedolach* by *pearl*, and consider *Havilah* as the part of Arabia near Catipha and Bahrein on the Persian Gulf, where the pearls are found.

BEE (bē), (Heb. דְּבוּרָה, *deb-o-raw'*, orderly, occurs in Deut. i:44; Judg. xiv:8; Ps. cxviii:12; Is. vii:18). This insect was unclean by the law (Lev. xi:23). It belongs to the family *apidae*, order *hymenoptera*, species *apis mellifica*, commonly called the honey-bee, because this species has often yielded honey to man.

The bee is one of the most generally diffused creatures on the globe, being found in every region. Its instincts, its industry and the valuable product of its labors have obtained for it universal attention from the remotest times. No nation upon earth has had so many historians as this insect. The naturalist, agriculturist and politician have been led by a regard to science or interest to study its habits.

In proceeding to notice the principal passages of Scripture in which the bee is mentioned, we first pause at Deut. i:44, where Moses alludes to the irresistible vengeance with which bees pursue their enemies: 'The Amorites came out against you and chased you as bees do, and destroyed you in Seir unto Hormah.' The powerlessness of man under the united attacks of these insects is well attested. Even in this country the stings

of two exasperated hives have been known to kill a horse in a few minutes.

The reference to the bee contained in Judg. xiv:8 has attracted the notice of most readers. It is related in the 5th and 6th verses that Samson, aided by supernatural strength, rent a young lion, that warred against him, as he would have rent a kid, and that 'after a time,' as he returned to *take his wife*, he turned aside to see the carcass of the lion, 'and, behold, there was a swarm of bees and honey in the carcass of the lion.' It has been hastily concluded that this narrative favors the mistaken notion of the ancients, that bees might be engendered in the dead bodies of animals. The Syriac version translates 'the bony carcass.' The learned Bochart remarks that the Hebrew phrase, 'after a time,' sometimes signifies *a whole year*. The circumstance that 'honey' was found in the carcass, as well as bees, shows that sufficient time had elapsed since their possession of it for all the flesh to be removed. Nor is such an abode for bees—probably in the skull or thorax—more unsuitable than a hollow in a rock, or in a tree, or in the ground, in which we know they often reside.

The phrase in Ps. cxviii:12, 'They compassed me about like bees,' will be readily understood by those who know the manner in which bees attack the object of their fury.

The only remaining passage has been strangely misunderstood (Is. vii:18): 'The Lord shall hiss for the fly that is in the uttermost parts of the river of Egypt, and for the bee that is in the land of Assyria.' Here the fly and the bee are no doubt the personifications of those inveterate enemies of Israel, the Egyptians and Assyrians, whom the Lord threatened to excite against his disobedient people. But the *hissing* for them has been interpreted, even by modern writers of eminence, as involving 'an allusion to the practice of calling out the bees from their hives, by a hissing or whistling sound, to their labor in the fields, and summoning them to return when the heavens begin to lower, or the shadows of evening to fall' (Dr. Harris' *Natural History of the Bible*, London, 1825). No one has offered any proof of the existence of such a custom, and the idea will itself seem sufficiently strange to all who are acquainted with the habits of bees.

The true reference is, no doubt, to the custom of the people of the East, and even of many parts of Europe, of calling the attention of any one in the street, etc., by a significant *hiss*, or rather *hist*, as Bishop Lowth translates the word both here and in Is. v:26, but which is generally done in this country by a short significant *hem!* or other exclamation. (For figurative allusions and moral lessons see Ezek. iii:3; Ps. xix:10; Prov. xvi:24.)

BEEF (bēf). See **FOOD**.

BEELIADA (bē'e-lī'a-dà), (Heb. בְּעִלְיָדָא, *beh-el-yaw-daw'*, the lord knows, or known by Baal), one of David's sons, born in Jerusalem (1 Chron. xiv:7). In 2 Samuel the name is Eliada, *E* taking the place of *Bee* (B. C. 1045).

BEELZEBUB (be-ël'ze-būb), (Gr. Βεελζεβούλ, *beh-el-zeb-ool'*), a heathen deity, believed to be the prince of evil spirits (Matt. x:25; xii:24, 27; Mark iii:22; Luke xi:15, sq.). The name properly should be *Beelzebub* in all the N. T. passages.

There is no doubt that the reading *Beelzebub* is the one which has the support of almost every critical authority; and the *Beelzebub* of the *Peshito* (if indeed it is not a corruption, as Michaelis thinks), and of the Vulgate, and of some modern versions, has probably been accommodated to the name of the Philistine god *Baalzebub*.

By some Beelzebul is thought to mean בעל זבול, *the dung-god*, an expression intended to designate with loathing the prince of all moral impurity. It is supposed, at the same time, that the name Beelzebul, the Philistine god of flies, was changed to Beelzebul ("god of dung"), and employed in a jocular way as a name of the devil. Others prefer to derive the word from בעל זבול, *bah'al-ze-bool'*, the *lord of the dwelling* in which evil spirits dwell.

BEER (bē'er), (Heb. בַּעַר, *be-ayr'*, a well), a local proper name, denoting, whether by itself or in composition, the presence of a well of water. There were two places so called.

1. A place in the land of Moab, which was one of the encampments of the Israelites (Num. xxi:16), beyond the Arnon, and so called because of the "well" dug by the princes and nobles of the people. This is probably the *Beer-Elim* ("well of heroes") of Is. xv:8.

2. A town in the tribe of Judah. It is mentioned only once in Scripture (Judg. ix:21) as the place to which Jotham fled. It is supposed to be the modern Bireh, a large village situated on the ridge, running from east to west, which bounds the northern prospect, as beheld from Jerusalem and its vicinity, and may be seen from a great distance north and south. It is now a large village, with a population of 700 Moslems. The houses are low, and many of them half underground. Many large stones and various substructions evince the antiquity of the site; and there are remains of a fine old church of the time of the Crusades.

BEERA (be-ē'rā or bē'er-ā), (Heb. בַּעַר, *be-ay-rav'*, a well, or else expounder), son of Zophah, of the tribe of Asher (1 Chron. vii:37), B. C. 1570.

BEERAH (be-ē'rah), (Heb. בַּעַר, *be-ay-rav'*, a well, or expounder), prince of the Reubenites, carried away (B. C. 744) by Tiglath-pileser (1 Chron. v:6).

BEER-ELIM (bē'er-ē'lim), (Heb. בַּעַר אֵלִים, *be-ayr' ay-lem'*, well of heroes, Isaiah xv:8), *the well of the princes*, probably the same with that mentioned in Num. xxi:16, 18.

BEERI (be-ē'ri), (Heb. בַּעַר, *be-ay-ree'*, of a fountain, illustrious).

1. Father of Judith, wife of Esau (Gen. xxvi:34), B. C. 1963. Judith is the same as Aholibamah (Gen. xxxvi:2) in all probability. This would make Beeri and Anak the same person.

2. Father of the prophet Hosea (Hos. i:1), B. C. 800.

BEER-LAHAI-ROI (bē'er-la-hāi'roi), Heb. בַּעַר לַחַי רֹאֵי, *be-ayr' lakh-ah'ee ro-ee'*, the well of him that liveth and seeth me, or the well of the vision of life), a well between Kadesh and Shur, where the angel of God appeared to Hagar (Gen. xvi:14). Here Isaac dwelt before and after the death of his father (Gen. xxiv:62; xxv:11).

BEEROTH (be-ē'roth), (Heb. בַּעַרְוֹת, *be-ay-roth*, wells).

1. The plural of Beer, and by many taken for the same place. Dr. Robinson thinks that if they were different the Bireh mentioned in the preceding article represents Beeroth rather than Beer. Beeroth is mentioned as a city of the Gibeonites (Josh. ix:17). It was one of the four cities of the Hivites and was reckoned in the tribe of Benjamin (Josh. xviii:25; 2 Sam. iv:2; Ezra ii:25). Eusebius distinguishes it from Beer, and assigns it a

position coincident with that now occupied by Bireh, *i. e.*, seven miles (in fact, rather more) north of Jerusalem.

2. The wells of the tribe of Bene-jaakan, a halting-place in the desert for the Israelites (Deut. x:6). The name is Bene-jaakan in Num. xxxiii:32.

BEEROTHITE (be-ē'roth-ite), (Heb. בַּעַרְוִי, *be-ay-roth-ee'*, belonging to Beeroth). See BEEROTH.

BEERSHEBA (bē'er-shē'bà), (Heb. בַּעַר שֶׁבַע, *be-ayr-sheh'bah*, well of the oath), a place in the southernmost part of Canaan, celebrated for the sojourn of the patriarchs.

It took its name from the *well* which was dug there by Abraham, and the oath which confirmed his treaty with Abimelech (Gen. xxi:31). It seems to have been a favorite station of that patriarch, and here he planted one of those 'groves' which formed the temples of those remote times (Gen. xxi:33). A town of some consequence afterwards arose on the spot, and retained the same name. It was first assigned to the tribe of Judah (Josh. xv:28), and afterwards transferred to Simeon (Josh. xix:2), but was still popularly ascribed to Judah (2 Sam. xxiv:7). As it was the southernmost city of the land, its name is of frequent occurrence, being proverbially used in describing the extent of the country, in the phrase 'from Dan (in the north) to Beersheba' (in the south), and reversely, 'from Beersheba unto Dan' (Judg. xx:i; 2 Sam. xvii:11; 1 Chron. xxi:2; 2 Chron. xxx:5). When the land was divided into two kingdoms, the extent of that of Judah was in like manner described by the phrase 'from Beersheba to Mount Ephraim' (2 Chron. xix:4). It was at Beersheba that Samuel established his sons as judges for the southernmost districts (1 Sam. viii:2); it was from thence that Elijah wandered out into the southern desert (1 Kings xix:3); here was one of the chief seats of idolatrous worship in the time of Uzziah (Amos v:5; viii:14); and to this place, among others, the Jews returned after the Captivity (Neh. xi:27, 30). This is the last time its name occurs in the Old Testament. In the New Testament it is not once mentioned, and seems to have been forgotten till the fourteenth century.

In later years the site was visited by Dr. Robinson. Here, on the borders of Palestine, he found the Wady es-Leba, a wide watercourse or bed of a torrent, running W.S.W., upon whose northern side, close upon the bank, are two deep wells, still called Bir-es-Leba, the ancient Beersheba. These wells are fifty-five rods apart. They are circular, and stoned up very neatly with masonry, apparently very ancient. The largest of them is 12½ feet in diameter, and 44½ feet deep to the surface of the water, sixteen of which, at the bottom, are excavated in the solid rock. The other well is five feet in diameter by twelve feet deep. The water in both is pure and sweet, and in great abundance. Both wells are surrounded with drinking troughs of stone for camels and flocks, such as were doubtless used of old by the flocks which were fed on the adjacent hills. No ruins were at first visible; but, on examination, foundations of former dwellings were traced, dispersed loosely over the low hills, to the north of the wells, and in the hollows between. They seem to have been built chiefly of round stones, although some of the stones are squared and some hewn, suggesting the idea of a small straggling city. The site of the wells is nearly midway between the southern end of the Dead Sea and the Mediterranean at Raphæa,

or twenty-seven miles southeast from Gaza, and about the same distance south by west from Hebron.

BEESHTERAH (be-ěsh'te-rah), (Heb. בְּעֵשְׂתֵּרָה, *beh-esh-ter-aw'*, with Ashtoreth), a city, belonging to the half-tribe of Manasseh, beyond Jordan, which was given to the Levites (Josh. xxi:27). In the parallel list (1 Chron. vi:71) Ashtaroth is given; and Beeshterah is only a contracted form of *Beth-Ashtaroth*, the "temple of Ashtoreth."

BEEBLE (bē't'l). Lev. xi:21, 22. Beetles have not "legs above their feet to leap withal upon the earth," neither are they ever eaten by man. From the connection the word probably indicates an insect of the Locust family (which see). The Egyptians worshiped the beetle (*scarabæus*) as a symbol of fertility and immortality. (See CHARJOL).

BEEVES (bēvz), (Heb. בָּקָר, *baw'kawr'*; in Arabic, *al-bakar*), cattle, herds, applicable to all Ruminantia, the camels alone excepted; but more particularly to the Bovidæ and the genera of the larger antelopes.

Ox or beeve, *aluph*, the most important of all clean beasts (Ps. viii:7; cxliv:14; Jer. xi:19). Bull, *shor*; Chaldee, *taur*; Arabic, *al-taur*; Latin, *taurus*; Celtic, *tor*. Young bull, *phar*; Belgic, *veir* (Job xxi:10; 1 Sam. vi:7, 10; Ps. lxix:31). Heifer, *pharah*. Calf, *égel*; Arabic, *idgl*; but *theo*, although the hunched ox occurs on Egyptian monuments, we take to refer to an oryx, as well as *Beker-el-wash*, unless it be the Antelope defassa of Wilkinson, a species not yet scientifically described.

Ye shall offer at your own will a male without blemish, of the *beeves*, of the sheep, etc. (Lev. xxii:19). *Beeves* is the genuine plural of *beef*, and means the living animals. We find the same term in the form *beefs* in Shakespeare: "As flesh of mutton, *beefs* or goats."

BEFORE (bē-fōr'). In the Scripture this word is used both as a preposition and an adverb. It applies both to place and time, and intimates preference.

1. Place. In view, free to one's choice (Gen. xx:15). As in a posture of humiliation (Rev. iii:9). In sight or presence of (Gen. xliii:14). In advance of (Josh. viii:10).

2. Time. Previously; sooner than (Is. xliii:13; John x:8).

3. Preference. Rather than (2 Sam. vi:21; John i:15, 27).

4. In one solitary passage, owing to the position of Canaan, relative to Syria, it signifies "on the east," as behind implies the west (Is. ix:12).

To be "before" God is to enjoy his favor, and the smiles of his providence (Ps. xxxi:22).

BEG (bēg), the translation of Heb. בָּקַשׁ, *baw-kash'*, beseech (Ps. xxxvii:25); שָׁאַל, *shaw-al'* (Ps. cix:10; Prov. xx:4); Gr. ἐπαίτέω, *ep-ahee-teh'o*, to ask for (Luke xvi:3); προσκαίρω, *pros-ahee-teh'o* (Mark x:46; Luke xviii:35; John ix:8).

BEGGAR (bēg'gēr), (Heb. עֲבֹיֹן, *eb-yone'*, destitute, 1 Sam. ii:8; Gr. πτωχός, *pto-khos'*, Luke xvi:20, 22; Gal. iv:9; elsewhere poor). A beggar who regularly solicited alms publicly or promiscuously was unknown to the Mosaic legislation. (See ALMS.)

BEHEADING (bē-hēd'ing), (Heb. אַרְפָּה, *ar-aph'*, to cause to drop, break down). See PUNISHMENTS.

BEHEMOTH (bē-hē'mōth), (Heb. בְּהֵמוֹת, *be-hay-mohth'*, Job xl:15; in Coptic, according to Jablon-

ski, *Pehemont*), is regarded as the plural of *behemah*, but commentators are by no means agreed as to its true meaning.

A number of learned men, with Bochart and Calmet at their head, understand the word in the singular number as a specific name, denoting

Behemoth.

the hippopotamus, seeking by somewhat forced interpretations of the beautiful poetical allusions in Job xl:15-24, to prove the exactness of the description when compared with the species. In some respects, however, it is more applicable to the elephant, while in others it is equally so to both animals. Hence the term behemoth, taken intensively (for in some places it is admitted to designate cattle in general), may be assumed to be a poetical personification of the great Pachydermata, or even Herbivora, wherein the idea of hippopotamus is predominant. This view accounts for the ascription to it of characters not truly applicable to one species; for instance, the tail is likened to a cedar, which is only admissible in the case of the elephant; again, 'the mountains bring him forth food;' 'he trusteth that he can draw up Jordan,' a river which elephants alone could reach; 'his nose pierceth through snares,' certainly more indicative of that animal's proboscis with its extraordinary delicacy of scent and touch, ever cautiously applied, than of the obtuse perceptions of the river horse. Finally, the elephant is far more dangerous as an enemy than the hippopotamus, which numerous pictorial sculptures on the monuments of Egypt represent as fearlessly speared by a single hunter standing on his float of log and reeds. Yet although the elephant is scarcely less fond of water, the description referring to manners, such as lying under the shade of willows, among reeds, in fens, etc., is more directly characteristic of the hippopotamus. The book of Job appears, from many internal indications, to have been written in Asia, and is full of knowledge, although that knowledge is not expressed according to the precise technicalities of modern science; it offers pictures in magnificent outline, without condescending to minute and labored details. Considered in this light, the expression in Ps. l:10, 'For every beast of the forest is mine, and the cattle (behemoth) upon a thousand hills,' acquires a grandeur and force far surpassing those furnished by the mere idea of cattle of various kinds. If, then, we take this plural noun in the sense here briefly indicated, we may, in like man-

ner, consider the leviathan, its counterpart, a similarly generalized term, with the idea of crocodile most prominent; and as this name indicates a twisting animal, and, as appears from various texts, evidently includes the great pythons, cetacea, and sharks of the surrounding seas and deserts, it conveys a more sublime conception than if limited to the crocodile, an animal familiar to every Egyptian, and well known even in Palestine.

BEKAH (bē'kah), (Heb. בֶּכָה, *beh-kah*, cleft), half a shekel. See WEIGHTS AND MEASURES.

BEL (bēl), (Heb. בַּל, *bale*, contracted from בַּלְעַל, *be-el'*, the Aramaic form of בַּאֲלִים, *ba-al'*), is the name under which the national god of the Babylonians is cursorily mentioned in Is. xlvi:1; Jer. l:2; li:44.

The only passages in the Apocrypha which contain any further notice of this deity are Bar. vi:40, and the apocryphal addition to the book of Daniel, in the Septuagint, xiv:1, *sq.*, where we read of meat and drink being daily offered to him, according to a usage occurring in classical idolatry.

A particular account of the pyramidal temple of Bel, at Babylon, is given by Herodotus, i:181-183. It is there also stated that the sacrifices of this god consisted of adult cattle, *probata*, of their young, when suckling (which last class were the only victims offered up on the golden altar), and of incense.

The question whether the sun or the planet Jupiter was the power of nature adored under the name of Bel is discussed under the article BAAL (which see).

From an Engraving on a Babylonian Cylinder, Representing the Sun God and One of His Priests.

BEL and DRAGON (bēl and dräg'ün). See DANIEL, APOCRYPHAL ADDITIONS TO.

BELA (bē'là), (Heb. בִּלְעָה, *beh'lah*, swallowed, or destruction).

1. (See ZOAR; Gen. xiv:2, 8).
2. Son of Beor, who reigned over Edom (B. C. 1618), in the city Dinhabah, eight generations before Saul (Gen. xxxvi:32, 33; 1 Chron. i:43).
3. Son of Azaz, a Reubenite (1 Chron. v:8).
4. Eldest son of Benjamin (Gen. xlvi:21; Num. xxvi:38; 1 Chron. vii:6; viii:1), and head of the family of Belaites, of whom Ehud is the most remarkable (B. C. 1700).

BELAH (bē-là), a less correct mode of Anglicizing (Gen. xlvi:21) the name Bela, the son of Benjamin. (See BELA 4).

BELAITE (bē'la-ite), (Heb. בְּלַיִתִּים, with the art., *ha-bal-ee'*, Num. xxvi:38).

BELIAL (bē'li-al), (Heb. בְּלִיַּעַל, *bel-e-yah'al*, worthlessness, wickedness; Gr. Βελιαλ, *bel-ee'al*).

This should not be regarded as a proper name. It is generally associated with the words "man,"

"son," "daughter" or "children." Hence "son" or "man" of Belial simply means "a worthless person." In the New Testament the form of the word is *Beliar* (not *Belial*, as given in the common version). (See *Analytical Concordance*, Alex. Young.)

A man or son of Belial, therefore, is a wicked, worthless man; one resolved to endure no subjection; a rebel; a disobedient, uncontrollable fellow. The inhabitants of Gibeah, who abused the Levite's wife, have the name "men of Belial" given to them (Judg. xix:22). Hophni and Phineas, the high-priest Eli's sons, are likewise called "sons of Belial," because of their crimes and their unbecoming conduct in the temple of the Lord. In later writings, Belial is put for the power or lord of evil, *i. e.*, for Satan. Paul says (2 Cor. vi:15): "What concord hath Christ with Belial?" Whence it is inferred that in his time the Jews, by Belial, understood Satan, as the patron and epitome of licentiousness.

BELIEF (bē-lēf'), (Heb. אֱמוּנָה, *aw-man'*, to be firm; Gr. πίστις, *pis'tis*, trust), the mental assent to a statement, proposition, or existing condition of things.

Belief, *trust* and *faith* have a religious application. *Belief* is simply an act of the understanding; *trust* and *faith* are active moving principles of the mind. *Belief* does not extend beyond an assent of the mind to any given proposition; *trust* and *faith* impel to action. *Belief* is to *trust* and *faith* as cause to effect; there may be *belief* without either *trust* or *faith*; but there can be no *trust* or *faith* without *belief*; we *believe* that there is a God, who is the creator and preserver of all his creatures; we therefore *trust* in him for his protection of ourselves; we *believe* that Jesus Christ died for the sins of men; we have therefore *faith* in his redeeming grace to save us from our sins. *Belief* is common to all religions; *trust* is peculiar to the *believers* in Divine revelation; *faith* is employed by distinction for the Christian *faith*. *Belief* is purely speculative, and *trust* and *faith* are operative; the former operates on the mind: the latter on the outward conduct. *Trust* in God serves to dispel all anxious concern about the future. Theorists substitute *belief* for *faith*; enthusiasts mistake passion for *faith*. True *faith* must be grounded on a right *belief*, and accompanied with a right practice (Crabb, *Synonyms*).

BELIEVERS (bē-lēv'ērz), (Gr. πιστοί, *pis-toi'*; Lat. *fideles*).

A term applied to converts (Acts v:14; 1 Tim. iv:12); in the early church baptized laymen, in distinction from the clergy on the one hand, and catechumens, who were preparing for baptism. They had special privileges, titles and honors, denied the catechumens, being called "the illuminated," "the initiated," "the perfect," "the favorites of heaven." They only were allowed to partake of the Lord's Supper, join in all the prayers of the church, and listen to all discourses delivered in the church, the catechumens having been previously dismissed.

BELL (bēl), (Heb. בֶּזַיִת, *pah-am-one'*, something struck, Exod. xxviii:33, 34; xxxix:25, 26; מְצַלְצֵלִים, *mets-il-law'*, tinkling, Zech. xiv:20).

1. The first bells known in history are those small golden bells which were attached to the lower part of the blue robe (the robe of the ephod) which formed part of the dress of the high priest in his sacerdotal ministrations (Exod. xxviii:33, 34; Comp. Eelus. xlv:11). They were there placed alternately with the pomegranate-shaped knobs, one of these being between every

two of the bells. The number of these bells is not mentioned in Scripture, but tradition states that there were sixty-six (Clem. Alex. *Stromata*, p. 563). We need not seek any other reason for this rather singular use of bells than that which is assigned: 'His sound shall be heard when he goeth into the holy place before the Lord, and when he cometh out, that he die not' (Exod. xxviii:35), by which we may understand that the sound of the bells manifested that he was properly arrayed in the robes of ceremony which he was required to wear when he entered the presence-chamber of the Great King; and that as no minister can enter the presence of an earthly potentate abruptly and unannounced, so he (whom no human being *could* introduce) was to have his entrance harbingered by the sound of the bells he wore. This sound, heard outside, also notified to the people the time in which he was engaged in his sacred ministrations, and during which they remained in prayer (Luke i:9, 10).

2. 'Bells of the Horses' are mentioned in Zech. xiv:20, which were probably such as were attached to the bridles or foreheads, or to belts around the necks of horses trained for war, that they might thereby be accustomed to noise and tumult, and not by their alarm expose the riders to danger in actual warfare. Hence a person who had not been tried or trained up to anything was by the Greeks called ἀκωδώνιστος, 'one not used to the noise of a bell,' by a metaphor taken from horses. The mules employed in the funeral pomp of Alexander had at each jaw a golden bell. We incline to think, however, that the use of horse-bells with which the Jews were most familiar, and which the prophet had in view, was that which at present exists in the East, and in other countries where carriage by pack-horses and mules is common. The laden animals, being without riders, have bells hung from their necks, that they may be kept together in traversing by night the open plains and deserts by paths and roads unconfined by fences or boundaries; that they may be cheered by the sound of the bells, and that if any horse strays, its place may be known by the sound of its bell, while the general sound from the caravan enables the traveler, who has strayed or lingered, to find and regain his party, even in the night.

That the same motto, 'Holiness to the Lord,' which was upon the mitre of the high priest, should, in the happy days foretold by the prophet, be inscribed even upon the bells of the horses, manifestly signifies that all things, from the highest to the lowest, should in those days be sanctified to God.

It is remarkable that there is no appearance of bells of any kind in the Egyptian monuments.

BELLOWS (běl'lūs), (Heb. בִּלְלוּס, *map-poo'akh*, blower).

This word occurs only in Jer. vi:29, and is there employed with reference to the casting of metal. As fires in the East are always of wood or charcoal, a sufficient heat for ordinary purposes is soon raised by the help of fans, and the use of bellows is confined to the workers in metal. Such was the case anciently, and in the mural paintings of Egypt we observe no bellows but such as are used for the forge or furnace. They occur as early as the time of Moses, being represented in a tomb at Thebes which bears the name of Thothmes III. They consisted of a leathern bag, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them with one under

each foot and pressing them alternately, while he pulled up each exhausted skin with a string he held in his hand. In one instance it is observed from the painting that when the man left the bellows they were raised as if filled with air, and this would imply a knowledge of the valve.

BELLY (běl'ly), (Heb. usually בֶּלֶן, *bel'ten*, hollow; Gr. κοιλια, *koy-lee'ah*; also Heb. מַעֲיֵם, *may-eem*; Gr. γαστήρ, *gas-tare'*, especially the bowels).

Among the Hebrews and most ancient nations the belly was regarded as the seat of the carnal affections, as being, according to their notions, that which first partakes of sensual pleasures (Phil. iii:9; Rom. xvi:19).

Figurative. 1. The heart or soul, which is deep, hidden, and hard to be searched (Prov. xviii:8; xx:30 and xxvi:22).

2. Men's bellies *prepare deceit*, when their hearts devise how to speak or act it (Job xv:35).

3. *Embittering* of the belly signifies all the train of evils which may come upon a man (Jer. iv:19; ix:15; Comp. Num. xviii:27).

4. The *brazen belly and thighs* of Nebuchadnezzar's visionary image signified the firmly erected and bulky empire of the brass-armed Greeks, under Alexander, quickly filled with disorder, and after several contentions formed into the two powerful kingdoms of Egypt on the south and Syria on the north (Dan. ii:32 and xi).

5. The inhabitants of Crete are called *slow bellies*, for their gluttony, drunkenness, sloth and idleness (Tit. i:12).

6. Jonah calls the belly of the whale the *belly of hell*, because of his great darkness, perplexity and disquiet of mind therein (John ii:2).

BELMA or **BELMON** (běl'ma, běl'mon), a place near the valley of Esdraelon (Judith vii:3).

BELMAIM (běl'ma-īm), the waters of Bel, or Belus (Judith vii:3).

BELMEN (běl'měn), (Gr. βέλμεν, Judith iv:4), the same, probably, as Beel-maïm; and, perhaps, Abel-maïn (Abel-mehira, Syriac), of Naphtali (2 Chron. xvi:4). So that Belmen, Belma, Belmaïm, and Abel-mehola may be the same place (Judith vii:3).

BELMANCY (běl'ō-măn-sÿ). See DIVINATION.

BELSHAZZAR (běl-shăz'zar), (Heb. בַּלְשַׁצְרָר, *bale-shats-tsar'*), is the name given in the book of Daniel to the last king of the Chaldees, under whom Babylon was taken by the Medes and Persians.

Herodotus calls this king, and also his father, *Labynetus*, which is undoubtedly a corruption of *Nabonidus*, the name by which he was known to Berosus, in Joseph. *Contr. Apion.* i:20. Yet in Joseph. (*Antiq.* x. 11, 2) it is stated that Baltasar was called *Naboandel* by the Babylonians.

His father, Nabonidus, had entrusted the care of the army to Belshazzar, and the Bible informs us that he was slain on the night of the capture of Babylon. It makes no mention of Nabonidus. Now, it is evident that the father, Nabonidus, and the son, Belshazzar, became confused in the minds of the writers of the histories. It was natural that foreigners should consider Belshazzar to be king, because he was the master of the army.

Winer conjectures that in the name Belshazzar the element *shazzar* means 'the principle of fire.'

Nothing has been really known of this king until recent discoveries, except from the book of Daniel, the authenticity and credibility of which will be treated under the article DANIEL. That

which is told of Nabonidus by the Babylonian inscriptions does not agree with the Scriptural account.

According to these annals, there was a revolt among the troops of Nabonidus, and he fled, hence Sippara was easily taken. From which it will be seen that the conquest of Babylon was brought about by other things than mere force of arms.

Berosus says that, losing a pitched battle against Cyrus in the open plain, Nabonidus was shut up in the city Borsippa on the Euphrates, below Babylon, and soon forced to surrender his person. Cyrus received him kindly, sent him into Caramania, and settled him on an estate, where he ended his life peaceably. No hypothesis will reconcile this account with the other, since it is certain that Nabonidus is the *last* king in the one narrative, as Belshazzar in the other. There can be little doubt that the two personages were confounded because Belshazzar commanded the army. (See BELSHAZZAR AND THE MONUMENTS.)

BELSHAZZAR AND THE MONUMENTS.

It is interesting to see how through the discovery of one ancient record after another, a name which seemed at first but a shadow, slowly become clothed with flesh and made real. In the case of Belshazzar, whom the Book of Daniel describes as the last king of Babylonia, this process has been going on since 1854, when Rawlinson first announced the discovery of Belshazzar's name on a Babylonian monument; and very late discoveries serve to make his personality more real to us.

The "critics" claimed for a long time that the name was purely mythical, and the story of his death impossible. The situation was made still more difficult by the fact that all Greek historians agreed with Berosus that the last king of Babylon was Nabonidus, and that he was not in Babylon at the time of its capture by Cyrus, but in Borsippa a few miles away—that he was captured by the Persian king, was kindly treated and was made a satrap of Caramania.

Rawlinson's important discovery was an historical inscription of Nabonidus, in which the following passage occurs: "And as to Belshazzar, the exalted son, the offspring of my body, do thou (the moon god Sin) place the adoration of thy great deity in his heart; may he not give way to sin; may he be satisfied by life's abundance."

Thus it was fully demonstrated that Belshazzar was an historical and not a fictitious character, and that the writer of the Book of Daniel had access to trustworthy sources of information which were unknown to the Greek historians. The further conclusion seemed to be that the son had a certain right in the kingdom and was probably associated with his father in government as Nebuchadnezzar had been associated with his father, Nabopolassar. This being true, the promise made to Daniel that he should be "the third ruler in the kingdom" would be fully explained by the fact that Belshazzar was the second ruler.

The next discovery was that of two historical texts of Cyrus, which were found in 1880, but not correctly translated and fully published until some time afterward. In these two inscriptions Cyrus mentions several times the son of Nabonidus, and though he does not mention his name, he tells us that when he invaded the country and attacked Babylon, the king's son was at first in the field with the army in 649 B. C.; also that

this son held a period of mourning at Sippara on the occasion of his grandmother's death.

The war continued some ten years, and in the last year Nabonidus took the field and fought a disastrous battle with Cyrus, while we may suppose that the king's son was at the capital. On the capture of the town, the crown prince lost his life, although Babylon was taken "without fighting," while Nabonidus was taken prisoner.

These inscriptions of Cyrus are of great value for historical purposes, and they show that Nabonidus had a son who was not only crown prince, but was entrusted with important duties such as would belong to the second in command, but they do not mention the name of the son; we find, however, from the inscription of Nabonidus himself, that the son's name was Belshazzar. Additional facts concerning him are found in the contract tablets where his name frequently occurs, and hundreds and thousands of these tablets have recently been acquired by the British Museum and other institutions. Indeed, the Metropolitan Museum of New York has several hundred of them, many of which were brought to this country by myself; they are now being copied and published by Mr. Moldenke. Many more are in Philadelphia, having been recovered by the excavations which were conducted by the University of Pennsylvania, under the direction of Dr. John P. Peters, and are now being copied and published by Professor Hilprecht.

One of these documents in the British Museum, which has been translated by Professor Sayce, records the sale through his steward of Belshazzar's wool crop: "Twenty manehs of silver (\$900) is the price of wool, the property of Belshazzar, the son of the king, which, by the hands of Nebo-tsabit, the steward of the house of Belshazzar, the son of the king, and the secretaries of the son of the king, has been handed over to Nadin-Merodach, the son of Basa, the son of Nur-Sin, in the month of Adar. The silver, namely, twenty manehs, he shall give. The house of a certain Persian, and all the property of Nadin-Merodach in town and country shall be the security of Belshazzar, the son of the king, until Belshazzar shall receive in full the money. The debtor shall pay the whole sum of money as well as the interest upon it."

The names of six witnesses are appended, besides that of the priest who drew up the document, and it is dated on the 20th day of Adar, in the eleventh year of Nabonidus.

Another document is Belshazzar's own contract to carry his sacrifice to the temple of the great sun god at Sippar. This offering consisted of three oxen and twenty-four sheep, for the conveyance of which in a boat upstream, Belshazzar paid about one dollar of silver, with about three bushels of dates for the food of the boatman.

These apparently unimportant transactions give a sense of personality to one whose very existence was denied, and they show that the writer of the Book of Daniel had trustworthy knowledge of the history of Babylon. He knew that Belshazzar was the last ruler of Babylon and that he perished in the destruction of the city, and he did not confound Belshazzar with his father, Nabonidus.

Whatever we learn from the inscriptions is consistent with the Biblical account and explains it. We may even conjecture that as Cyrus captured Babylon on the sixteenth of the month Tammuz, a month sacred to the husband of the Babylonian Venus, it may have been the mid-month feast of Tammuz (See TAMMUZ) and

Ishtar, which was being celebrated by Belshazzar, and at which he profaned the holy vessels of the Jewish Temple.

William Hayes Ward, D. D., *Hom. Rev.*, Jan., 1894.

BELTESHAZZAR (běl'te-sház'zar), (Heb. בֵּלְטֶשְׁחַצְצָר, *bale-tesh-ats-tsar'*, Bel's prince or the lord's leader), the name given to Daniel at the court of Nebuchadnezzar in Babylon (Dan. i:7, etc.). (See DANIEL.)

BELUS, TEMPLE OF (bē'lus, tēm'ple öv). SEE BABEL.

BEN (běn), (Heb. בֵּן, *ben*, son), is often found as the first element of proper names; in which case the word which follows it is always to be considered dependent on it, in the relation of our genitive.

The word which follows *Ben* may either be of itself a proper name, or be an appellative or abstract, the principle of the connection being essentially the same in both cases. As for the first class, as the Syro-Arabian nations are all particularly addicted to genealogy, and as they possess no surnames, nor family names in our sense, they have no means of attaching a definite designation to a person, except by adding some accessory specification to his distinctive, or, as we would term it, *Christian*, name. This explains why so many persons both in the Old and New Testament are distinguished by the addition of the names of their father. The same usage is especially frequent among the Arabs, but they have improved its definiteness by adding the name of the person's child, in case he has one. In doing this they always observe this arrangement—the name of the child, the person's own name and the name of his father. Thus the designation of the patriarch Isaac would, in Arabic, run thus: Father of Jacob, Isaac, son of Abraham (Abû Ja'qûb Ishâq ben Ibrahîm.)

As for the latter class, there is an easy transition from this strict use of *son* to its employment in a figurative sense, to denote a peculiar dependence of derivation. The principle of such a connection not only explains such proper names as Ben Chesed (son of mercy), but applies to many striking metaphors in other classes of words, as sons of the bow, a son of seventeen years (the usual mode of denoting age), a hill, the son of oil (Is. v:2), and many others, in which our translation effaces the Oriental type of the expression. All proper names which begin with *Ben* belong to one or the other of these classes. Ben Aminadab, Ben Gaber, and Ben Chesed (1 Kings iv:10, 11) illustrate all the possibilities of combination noticed above. In these names *Ben* would, perhaps, be better not translated, as it is in our version, although the Vulgate has preserved it, as the Septuagint also appears to have once done in verse 8, to judge by the reading there.

These remarks apply also in part to *Bar*, the Aramaic synonym of *Ben*, as in the name Bar-Abbas. (See BAR.)

BENAIHAH (be-nā'aih,-jà), (Heb. בְּנֵי־יָהוּוָה, *ben-aw-yaw'*, built by Jehovah).

1. Son of Jehoida and commander of David's guard (the Cherethites and Pelethites; 2 Sam. viii:18; 1 Kings i:38; 1 Chron. xviii:17; 2 Sam. xx:23). His exploits were celebrated in Israel. He overcame two Moabitish champions ('lions of God'), slew an Egyptian giant with his own spear and went down into an exhausted cistern and destroyed a lion which had fallen into it when covered with snow (2 Sam. xxiii:21; 1 Chron. xi:22-25; xxvii:6). Benaiah (doubtless with the

guard he commanded) adhered to Solomon when Joab and others attempted to set up Adonijah, and when that attempt failed, he, as belonged to his office, was sent to put Joab to death, after which he was appointed commander-in-chief in his place (1 Kings i:36; ii:29), B. C. 1042. Some persons named Benaiah returned from the exile with Ezra (x:25, 30, 35, 43).

2. The Pirathonite, an Ephraimite, one of David's mighty men (2 Sam. xxiii:30; 1 Chron. xi:31), and captain of the eleventh course (1 Chron. xxvii:14), B. C. 1042.

3. A Levitic musician in the time of David (1 Chron. xv:18, 20; xvi:5), B. C. 1042.

4. A priest appointed to blow the trumpet before the ark when brought to Jerusalem in the time of David (1 Chron. xv:24; xvi:6), B. C. 1042.

5. A Levite (B. C. 896) of the sons of Asaph (2 Chron. xx:14).

6. A Levite, who was overseer (B. C. 725) of the offerings in the time of Hezekiah (2 Chron. xxxi:13).

7. A prince (B. C. 713) of the family of Simeon (1 Chron. iv:36).

8. Father of Pelatiah (Ezek. xi:1, 13), B. C. 571.

9. Four of the people who took "strange wives" (B. C. 458) in the time of Ezra (Ezra x:25, 30, 35 and 43).

BEN-AMMI (běn'äm'mī), (Heb. בֶּן-אֲמִי, *ben-am-mee'*, son of my kindred), a son of Lot by his daughter (Gen. xix:38) and the father of the Ammonites.

BENE-BERAK (běn'e-bē'rak), (Heb. בְּנֵי־בְרָק, *ben-ay'ber'ak*, sons of Berak, or lightning, Josh. xix:45), a city in the tribe of Dan; probably where the "sons of Berak" were established. The Vulgate makes two cities of it, Bane and Barak. It is near Jehud (*el-Yehudiyeh*), now the village of *Ibn Ibrak*, east of Jaffa.

BENEDICTION (běn'e-dīk'shūn). In Num. vi:24-26, the form of the priestly benediction is given.

The Lord bless thee and keep thee: the Lord make his face shine upon thee and be gracious unto thee; the Lord lift up his countenance upon thee and give thee peace. This blessing was pronounced with uplifted hands (Lev. ix:22). The people responded by saying, Amen (Comp. 2 Chron. xxx:27; also see 2 Sam. vi:18; 1 Kings viii:55).

The Saviour is spoken of as blessing little children (Mark x:16; Luke xxiv:50), besides the blessing on the occasion of the institution of the Eucharist (Matt. xxvi:26).

The apostolic benediction is the great Christian benediction (2 Cor. xiii:14): The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, *be* with you all. Amen.

BENE-JAAKAN (běn'e-jā'a-kän), (Heb. בְּנֵי־יָעָן, *ben-ay'yah-ak-awn'*, the sons of Jaakan, Num. xxxiii:31, and in Deut. x:6 Beeroth-bene-Jaakan is the wells of the sons of Jaakan). The name doubtless came from Jakan (1 Chron. i:42).

BENE-KEDEM (běn'e-kē'dem), (Heb. בְּנֵי־קֵדָם, *ben-ay'keh-dem'*, children of the east), a name given to people living east of Palestine (Gen. xxix:1; Job i:3; Judg. vi:3, 33; vii:12; viii:10; 1 Kings iv:30; Is. xi:14; Jer. xlix:28; Ezek. xxv:4, 10). From a consideration of these passages it seems that the peoples of the Arabian deserts are indicated, and chiefly the tribes of Ishmael and Keturah (Gesenius).

BENHADAD (běn'hā'dad), (Heb. בְּנֵי-חֲדָד, *ben-had-ad'*, son of Hadad), the name of three kings of Damascene-Syria. As to the latter part of this name, Hadad, there is little doubt that it is the name of the Syrian god, Adad.

1. The king of Syria, who was subsidized by Asa, king of Judah, to invade Israel and thereby compel Baasha (who had invaded Judah) to return to defend his own kingdom (1 Kings xv:18-20; 2 Chron. xvi:2-4), B. C. 907. (See ASA.) This Ben-hadad has, with some reason, been supposed to be Hadad the Edomite who rebelled against Solomon (1 Kings xi:21).

2. King of Syria, son of the preceding. His earlier history is much involved in that of Ahab, with whom he was constantly at war. (See AHAB.) He owed the signal defeat in which that war terminated to the vain notion which assimilated Jehovah to the local deities worshiped by the nations of Syria, deeming Him 'a God of the hills,' but impotent to defend his votaries in 'the plains' (1 Kings xx:1-30). Instead of pursuing his victory Ahab concluded a peace with the defeated Benhadad (B. C. 901-900), which was observed for about twelve years, when the Syrian king declared war against Jehoram, the son of Ahab, and invaded Israel; but all his plans and operations were frustrated, being made known to Jehoram by the prophet Elisha (2 Kings vi:8, *ad fin.*), B. C. 893. After some years, however, he renewed the war, and besieged Jehoram in his capital, Samaria, until the inhabitants were reduced to the last extremities and most revolting resources by famine. The siege was then unexpectedly raised, according to a prediction of Elisha, through a panic infused into the besiegers, who, concluding that a noise which they seemed to hear portended the advance upon them of a foreign host procured by Jehoram, thought only of saving themselves by flight. The next year Benhadad, learning that Elisha, through whom so many of his designs had been brought to nought, had arrived at Damascus, sent an officer of distinction named Hazael with presents to consult him as to his recovery from an illness under which he then suffered. The prophet answered that his disease was not mortal, but that he would nevertheless die. This was accomplished a few days after by this very Hazael, who smothered the sick monarch in his bed and mounted the throne in his stead, B. C. 894 (2 Kings viii:7-15). (See ELISHA; HAZAEL; JEHORAM.)

3. King of Syria, son of the Hazael just mentioned (B. C. 835). He was thrice defeated by Jehoash, king of Israel, who recovered from him all the territories beyond the Jordan which Hazael had rent from the dominion of Israel (2 Kings xiii:3, 24, 25).

BEN-HAIL (běn'hā'il), (Heb. בְּנֵי-חַיִל, *ben-khah-yil*, son of strength), a prince sent by Jehoshaphat to the cities of his dominions (B. C. 910) to instruct the people (2 Chron. xvii:7).

BENHANAN (běn'hā'nan), (Heb. בְּנֵי-חַנָּן, *ben-khaw-nawn'*, of one gracious), the third named of the sons of Shimon in the royal line of Judah (1 Chron. iv:20), B. C. 1612.

BENINU (běn'i-nū or be-nī'nu), (Heb. בְּנֵי-נוּ, *ben-ee-noo'*, our son), a Levite who sealed the covenant with Nehemiah (Neh. x:13), B. C. 445.

BENJAMIN (běn'ja-mīn), (Heb. בְּנֵי-יָמִן, *bin-yaw-mene'*).

1. The youngest son of Jacob by Rachel (Gen. xxxv:18), B. C. 1640. His mother died im-

mediately after he was born, and with her last breath named him *ben oni*, 'Son of my pain,' which the father changed into Benjamin, a word of nearly the same sound, but portending comfort and consolation, 'Son of my right hand,' probably alluding to the support and protection he promised himself from this, his last child, in his old age. This supposition is strengthened when we reflect on the reluctance with which he consented to part with him in very trying circumstances, yielding only to the pressure of famine and the most urgent necessity (Gen. xlii).

In Gen. lvi:21, *sq.*, the immediate descendants of Benjamin are given to the number of *ten*, whereas in Num. xxvi:38-40 only seven are enumerated, and some even under different names. This difference may probably be owing to the circumstance that some of the direct descendants of Benjamin had died either at an early period or at least childless.

2. Son of Bilhan (B. C. 1016) and head of a family of warriors (1 Chron. vii:10).

3. An Israelite, son of Harim, in the time of Ezra (B. C. 458), who married a foreign wife (Ezra x:32).

4. Gate of Benjamin (Jer. xx:2; xxxvii:13; xxxviii:7; Zech. xiv:10.) (See JERUSALEM.)

BENJAMIN, TRIBE OF. The tribe of Benjamin, though the least numerous of Israel, became nevertheless a considerable race in process of time. In the desert it counted 35,400 warriors, all above twenty years of age (Num. i:36; ii:22), and, at the entrance of Israel into Canaan, even as many as 45,600.

(1) **Portion and Position.** The portion allotted to this tribe was in proportion to its small number, and was encompassed by the districts of Ephraim, Dan and Judah, in central Palestine. In Josh. xviii:11-20, the northern and southern boundaries are minutely described; from verses 12 to 16 is sketched the northern boundary line, and from 16 to 20 the southern. Within the boundaries described in these eight verses lay a district rather small, but highly cultivated and naturally fertile (Joseph. *Antiq.* v:1, 22; Reland, p. 637), containing thirty-six towns (with the villages appertaining to them), which are named in Josh. xviii:21-28, and the principal of which were Jericho, Bethagla, Bethel, Gibeon, Ramah and Jebus or Jerusalem. This latter place subsequently became the capital of the whole Jewish empire, but was, after the division of the land, still in possession of the Jebusites. The Benjamites had indeed been charged to dispossess them and occupy that important town, but (Judg. i:21) the Benjamites are reproached with having neglected to drive them from thence, that is, from the *upper*, well-fortified part of the place *Zion*, since the *lower* and less fortified part had already been taken by Judah (Judg. i:8), who in this matter had almost a common interest with *Benjamin*. *Zion* was finally taken from the Jebusites by David (2 Sam. v:6, *sq.*)

(2) **Civil War.** In the time of the judges, the tribe of Benjamin became involved in a civil war with the other eleven tribes, for having refused to give up to justice the miscreants of Gibeon who had publicly violated and caused the death of a concubine of a man of Ephraim, who had passed with her through Gibeon. This war terminated in the almost utter extinction of the tribe, leaving no hope for its regeneration from the circumstance that not only had nearly all the women of that tribe been previously slain by their foes, but the eleven other tribes had en-

gaged themselves by a solemn oath not to marry their daughters to any man belonging to Benjamin. When the thirst of revenge, however, had abated, they found means to evade the letter of the oath, and to revive the tribe again by an alliance with them (Judg. xix:20, 21).

(3) **Numbers.** This revival was so rapid that in the time of David it already numbered 59,434 able warriors (1 Chron. vii:6-12); in that of Asa, 280,000 (2 Chron. xiv:8); and in that of Jehoshaphat, 200,000 (2 Chron. xvii:17).

(4) **Subsequent History.** This tribe had also the honor of giving the first king to the Jews, Saul being a Benjamite (1 Sam. ix:1, 2). After the death of Saul, the Benjamites, as might have been expected, declared themselves for his son Ishbosheth (2 Sam. ii:8, sq.); until, after the assassination of that prince, David became king of all Israel. David having at last expelled the Jebusites from Zion, and made it his own residence, the close alliance that seems previously to have existed between the tribes of Benjamin and Judah (Judg. i:8) was cemented by the circumstance that, while Jerusalem actually belonged to the district of Benjamin, that of Judah was immediately contiguous to it. Thus it happened that, at the division of the kingdom after the death of Solomon, Benjamin espoused the cause of Judah, and formed, together with it, a kingdom by themselves. Indeed, the two tribes stood always in such a close connection as often to be included under the single term Judah (1 Kings xi:13; xii:20). After the exile, also, these two tribes constituted the flower of the new Jewish colony in Palestine (Comp. Ezra ix:1; x:9).

(5) **Difficulties.** There are some grave difficulties in the account of the outrage at Gibeah and the almost entire destruction of Benjamin, in consequence of its support of the perpetrators (Judg. xix-xxi) previously referred to. These difficulties are chiefly to be found in the account of the war with Benjamin (Judg. xxi). Israel is spoken of as a 'congregation,' and represented as acting together as one man, unlike everything else we know of the period. The size of the army raised (400,000) is quite incredible, and the incidents of the campaign no less so. Benjamin, with 26,700, destroys in two days 40,000 Israelites, but does not lose a single man. On the third day the whole tribe of Benjamin is destroyed, with the exception of 600 men. The date given for this is vague; it is said to have been in the days of Phinehas, the grandson of Aaron. A satisfactory solution has so far not been presented by the critics (Hastings' *Bib. Dict.*).

BENJAMITE (běn'ja-mīte), the designation of the descendants of Benjamin (1 Sam. ix:21; xxii:7; 1 Kings ii:8; Judg. iii:15; xix:16; 2 Sam. xx:1).

BENO (bē'no), (Heb. בְּנוֹ, *beh-no'*, his son), a Merarite Levite (1 Chron. xxiv:26, 27), B. C. 1014. We should perhaps render, 'of Jaaziah his son, even the sons of Merari by Jaaziah his son' (*Oxf. Heb. Lex. s. v.*; Hastings' *Bib. Dict.*)

BENONI (běn-ō'nī), (Heb. בְּנוֹיִי, *ben-o-nee'*, son of my sorrow). See BENJAMIN.

BENZOHETH (běn'zō'heth), (Heb. בְּנוֹיִת, *ben-zo-khayth'*, son of Zoheth, or else corpulent, strong), a name appearing among the descendants of Judah, in a passage that appears to be a fragment, where the name of a son of Zoheth, just mentioned, had originally followed (1 Chron. iv:20), B. C. 1856.

BEON (bē'on), (Heb. בְּעוֹן, *beh-ohn'*, lord or house of On), otherwise Bean, a city of Reuben, beyond

Jordan (Num. xxxii:3). It is more properly called Beth-baal-meon (Josh. xiii:17), more briefly Baal-meon (Num. xxxii:38), and Beth-meon (Jer. xlviii:23).

BEOR (bē'or), (Heb. בְּעוֹר, *beh-ore'*, a torch).

1. Father of Bela (B. C. 1618), an early king of Edom (Gen. xxxvi:32; 1 Chron. i:43).

2. Father of Balaam (Num. xxii:5; xxiv:3, 15; xxxi:8; Josh. xiii:22; xxiv:9; Mic. vi:5), B. C. 1618. He is called Bosor in the N. T. (2 Pet. ii:15).

BERA (bē'rà), (Heb. בְּרַעַ, *ber-rah'*, gift), a king of Sodom in the time of Abraham, who was tributary to Chedorlaomer, king of Elam, and with four other kings rebelled against him (Gen. xiv:2, 17, 21).

BERACHAH (běr'a-kah), (Heb. בְּרַכָּה, *ber-aw-kaw'*, a blessing).

1. One of the thirty Benjamite warriors who came to David at Ziklag (1 Chron. xii:3), B. C. 1054.

2. A valley where Jehoshaphat assembled the people to bless Jehovah for the overthrow of the Moabites, Ammonites and Mehunim (2 Chron. xx:26). The name *Bereikāt* still survives in the name of some ruins between Bethlehem and Hebron, which agrees with the locality of the battle (2 Chron. xx; Rob. iii:275; Ritter, *Jordan*, 635).

BERACHIAH (běr'a-kī'ah), (Heb. בְּרַכְיָהוּ, *ber-aw-kek-yaw' hoo*, Jah is blessing), a Gershonite Levite and father of Asaph the singer (1 Chron. vi:39), B. C. 1043. (See BERECHIAH 6).

BERAIAH (běr'a-ī'ah), (Heb. בְּרַאִיָּה, *ber-aw-yaw'*, Jah is maker), one of the chiefs of Benjamin and son of Shimhi (1 Chron. viii:21), B. C. 1340.

BEREA (be-rē'à), (Gr. βέροια, *ber'oy-ah'*, Acts xvii:10, 13; xx:4), a city of Macedonia on the river Astræus, not far from Pella, towards the southwest, and near Mount Bermius.

It was afterward called Irenopolis, and is now known by the name of Boor. Paul and Silas withdrew to this place from Thessalonica, and the Jewish residents are described as more ingenuous and of a better disposition (not 'more noble,' as in the Authorized Version) 'than those of Thessalonica' in that they diligently searched the Scriptures to ascertain the truth of the doctrines taught by the Apostles. It is now called Verria or Kata-Verria, with a population of about 6,000, though sometimes incorrectly given 20,000.

BERECHIAH (běr'e-kī'ah), (Heb. בְּרַכְיָהוּ, *ber-aw-kek-yaw' hoo*, blessed by Jehovah).

1. Son of Zerubbabel, of the royal family of Judah (1 Chron. iii:20), B. C. 520.

2. See BERECHIAH.

3. Father of Zechariah, the prophet (Zech. i:1, 7), B. C. 500.

4. A chief man of Ephraim (B. C. 750) in the time of Ahaz (2 Chron. xxviii:12).

5. A doorkeeper for the ark (1 Chron. xv:23).

6. A Levite descendant of Elkanah (1 Chron. ix:16), B. C. 445.

7. Father of Meshullam (B. C. 520); the latter assisted in rebuilding the walls of Jerusalem (Neh. iii:4, 30; vi:18).

BERED (bē'réd), (Heb. בְּרַד, *baw' red*, hail).

1. A city in Judah, near Kadesh (Gen. xvi:14). The Chaldee calls it *Agara*; the Syriac, *Gedar*; the Arabic, *Jader*; it was the same, perhaps, as Arad, or Arada (Num. xxxiv:4), in the south of Judah (Calmet). Grove suggests *El-Khulasah*, 12 miles south of Beer-sheba; Conder proposes *Bereid*.

2. Son or descendant of Ephraim (1 Chron. vii:20). Perhaps the name is the same as Becher (Num. xxvi:35), B. C. 1856.

BERENICE (bĕr'e-nĕce), (Gr. *Βερνίκη*, *ber-nee'-kay*), eldest daughter of Herod Agrippa I, and sister of the younger Agrippa (Acts xxv:13, 23; xxvi:30).

She was married to her uncle Herod, king of Chalcis, and after his death, in order to avoid the merited suspicion of incest with her brother Agrippa, she became the wife of Polemon, king of Cilicia. This connection being soon dissolved, she returned to her brother, and afterwards became the mistress of Vespasian and Titus (Joseph. *Antiq.* xix:5, 1; xx:7, 2, 3; Tacit. *Hist.* ii:81; Suet. *Tit.* 7).

BERI (bĕ'rĭ), (Heb. *בְּרִי*, *bay-ree'*, fountain, well), a man of Asher, son of Zophah (1 Chron. vii:36), B. C. 1016.

BERIAH (be-rĭ'ah), (Heb. *בְּרִיעָה*, *ber-ee'aw*, in evil, or a son of evil).

1. Son of Asher (Gen. xlvi:17; Num. xxvi:44, 45), and founder of the family of Beriites (Num. xxvi:44), B. C. 1856.

2. Son of Ephraim (B. C. 1670), who named his son thus on account of the misfortune that had come upon the family (1 Chron. vii:30, 31). For explanation of the name, a *gift*, see Gesenius *Thes.* s. v

3. A Benjamite (B. C. 1400), who, with his brother Shema, expelled the inhabitants of Gath and populated Ajalon (1 Chron. viii:13, 16).

4. A Levite (B. C. 1015) mentioned in 1 Chron. xxiii:10, 11.

BERIITE (be-rĭ'itĕ). See BERIAH.

BERITES (bĕ'rĭtes), (Heb. *בְּרִיעָיִם*, *hab-ber-ee-ee'*, people of the wells), a people visited by Joab along with Abel and Beth-naachah in the north of Palestine (2 Sam. xx:14). Ewald renders the Hebrew, *the young men* (*Gesch.* iii:249, *note*). Thomson, *Land and Book* (i:425) conjectures that it may specially designate the Beroth of upper Galilee where Josephus says (*Ant.* v:1, 18) the Canaanitish kings encamped against Joshua (Comp. Josh. xi:5), and which he identifies with *Biria*, a short distance north of Safed.

BERITH (bĕ'rĭth), (Heb. *בְּרִית*, *ber-eeth'*, covenant, Judg. ix:46). See BAAL-BERITH.

BERNICE (ber-nĭ'se). See BERENICE.

BERODACH - BALADAN (be-rō'dak - bāl'ad-dān), (Heb. *בְּרוֹדַח בַּלְאֲדָן*, *ber-o-dak bal-ad-aw'n'*, 2 Kings xx:12). See MERODACH-BALADAN.

BERŒA (bĕ-rœ'á). See BERA.

BEROSH (bĕ'rosh), (Heb. *בְּרוֹשׁ*, *ber-osh'*), occurs in several passages of Scripture, as in 2 Sam. vi:5; 1 Kings v:8; vi:15 and 36; ix:11; 2 Chron. ii:8; iii:5; Ps. civ:17; Is. xiv:8; xxxvii:24; xli:19; lv:13; lx:13; Ezek. xxvii:5; xxxi:8; Hos. xiv:8; Nah. ii:3; Zech. xi:2; and Beroth, which is said to be only the Aramæan pronunciation of the same word, in Cant. i:17, 'the bearers of our house are cedar, and the rafters of fir' (Beroth).

So in most of the other passages Eres and Berosh, translated Cedar and Fir in the Authorized Version, are mentioned together, as 1 Kings v. 8, 'And Hiram sent to Solomon, saying, I will do all thy desire concerning timber of cedar and concerning timber of fir;' Is. xiv:8, 'Yes, the fir-trees rejoice at thee and the cedars of Lebanon.' (See CEDAR; FIR.)

BEROTHAH (be-rō'thah), (Heb. *בְּרוֹתָהָ*, *bay-ro-thaw'*, cypress), one of the boundary towns of

Israel, between Hethalon and Emesa or Hamath and Damascus (Ezek. xlvii:16). It is probably the same as Berothai, and from the mention of it here it would seem not to be a maritime place; therefore not *Beirût*, according to Robinson (see Rosenm. *Bib. Geog.* I, ii, p. 292). However, Harper (*Bible and Mod. Dis.*, p. 245) identifies Berothai with Beirût. Keil (*Com.* in *loc.*) says: "Hamath is not the city of Hamath on the Orontes, . . . but the kingdom of Hamath, the southern boundary of which formed the northern boundary of Canaan, though it cannot be given with exactness."

BEROTHAI (bĕr'o-thāi). (2 Sam. viii:8), a city conquered by David; supposed by some to be Berytus, or Beirût, in Phœnicia. But it is probably the same as the preceding Berothah (Calmet). (See BEROTHAH.)

BEROTHITE (bĕ'roth-ite), epithet of Joab's armor bearer (1 Chron. xi:39). Perhaps the same as 2 Sam. xxiii:27. See BEEROTH.

BERYL (bĕr-ĭl), (Ex. xxviii:20).

By the Hebrew word "tarshish" modern yellow topaz is supposed to be meant. This designation seems to indicate the place from which it was brought. Beryl, in the New Testament, Rev. xvi:20, is probably a different stone, and very likely the mineral now so called, which is found in Palestine, but was less abundant and more precious in ancient times than in modern. It is usually of a light green color and considerably opaque. (See SHOHAM.)

BESAI (bĕ'sāi), (Heb. *בְּסַי*, *bes-ah'ee*, conqueror), "Children" of Besai returned among the Nethinim, under Ezra (B. C. 536), from Babylon (Ezra ii:49; Neh. vii:52).

BESHA (bĕsh'a), (Heb. *בְּשָׂה*, *bah'sha*), occurs in the singular form in Job xxxi:40, 'Let thistles grow instead of wheat, and *cockle* (besha) instead of barley;' and in the plural form in Is. v:2, 'He (Jehovah) planted it with the choicest vine, and also made a wine-press therein; and he looked that it should bring forth grapes, and it brought forth *wild grapes*' (*beushim*). (See COCKLE.) So also in verse 4 of the same chapter. It is probable that the same plant is referred to in these two passages; but difficulties have here, as elsewhere, been experienced in ascertaining the precise plant intended. All, however, are agreed that some useless, if not noxious, herb must be understood in both cases.

BESODEIAH (bĕs'o-dĕ'iah, -yá), (Heb. *בְּסוּדֵיָהּ*, *bes-o-deh-yaw'*, intimate of Jehovah), father of Meshullam and one of those who helped repair the walls of Jerusalem (Neh. iii:6), B. C. 446.

BESOM (bĕ'züm), (Heb. *בְּסוּמָאִי*, *mat-at-ay'*, a broom or sweeper), a metaphor of destruction, a desolating broom, a *besom of destruction* (Is. xiv:23).

BESOR (bĕ'sôr), (Heb. *בְּסוֹר*, *bes-ore'*, cold), a brook mentioned in 1 Sam. xxx:9. Sanutus derives its course from the interior Carmel, near Hebron, and states that it enters the Mediterranean Sea near Gaza (*Liber Secretorum*, p. 252).

BESTEAD (be-stĕd'), (Ang. Sax. *stede*, a place, stead, as in homestead). It is found only in Is. viii:21. It means placed, situated, especially in difficulty. Amer. R. V. has 'sore distressed,' Cheyne 'hard-prest.'

BETAH (bĕ'tah), (Heb. *בְּתַח*, *beh'takh*, confidence), a city of Syria-Zobah; taken by David from Hadadezer (2 Sam. viii:8). In the parallel

passage (1 Chron. xviii:8) it is called Tibhath or Tibchath, which Ewald pronounces correct (*Gesch.* ii:195). Site unknown.

BETEN (bē'ten), (Heb. בֵּתֵן, *beh'ten*, belly or womb), a city of the tribe of Asher (Josh. xix:25). Eusebius says it was eight Roman miles east of Ācre and was called Bebeten or Bethbeten. The place intended appears to be the present village *El B'aneh*, which would be suitable for the position of Beten. The site however is doubtful.

BETH (bēth), (Heb. בֵּית, *bah'yith*, house), is often found as the first element of proper names of places in the Bible.

It is only necessary to observe that, in all such compounds, as Bethel, etc., the latter part of the word must be considered, according to our Occidental languages, to depend on the former in the relation of the *genitive*; so that Bethel can only mean 'house of God.' The notion of *house* is, of course, capable of a wide application, and is used to mean temple, habitation, place, according to the sense of the word with which it is combined.

BETHABARA (bēth'āb'a-rā), (Gr. βηθαβαρα, *bay-thab-ar-ah'*), or Bethbarah. This name means *place of the ford, i. e., of or over the Jordan*; and is mentioned in John i:28, as the place where John baptized. Some have identified it with *Beth-barah*, an ancient ford of the river (Judg. vii:24). The best manuscripts and recent editions, however, have *Bethany*; the reading βηθαβαρα, *Bethabara*, appears to have arisen from the conjecture of Origen, who in his day found no such place on the Jordan as Bethany, but knew a town called Bethabara, where John was said to have baptized, and therefore took the unwarrantable liberty of changing the reading. (See BETH-BARAH).

BETH-ANATH (bēth'ā'nath), (Heb. בֵּית-עֲנַת, *bayth-an-awth'*, house of response), a city of Naphtali (Josh. xix:38; Judg. i:33).

BETHANOTH (bēth'ā'noth), (Heb. בֵּית-עֲנוֹת, *bayth'an-oth*, house of echo), a town named with others in the mountainous region of Judah (Josh. xv:59). It has been identified with the present village *Beit-Anun*.

BETHANY (bēth'a-ny), (Gr. Βηθανια, *bay-than-ee'ah*, place of dates).

1. The place near the Jordan where John baptized, the exact situation of which is unknown. Some copies here read Bethabara (which see).

2. Bethany, a town or village about fifteen furlongs east-southeast from Jerusalem, on the eastern slope of the Mount of Olives (John xi:18), so called, probably, from the number of palm trees that grew around. It was the residence of Lazarus and his sisters, Mary and Martha, and Jesus often went out from Jerusalem to lodge there (Matt. xxi:17; xxvi:6; Mark xi:1, 11, 12; xiv:3; Luke xix:29; xxiv:50; John xi:1, 18; xii:1). The place still subsists in a shallow wady on the eastern slope of the Mount of Olives. Dr. Robinson reached Bethany in three-quarters of an hour from the Damascus gate of Jerusalem, which gives a distance corresponding to the fifteen furlongs (stadia) of the evangelist. It is a poor village of about twenty families. The only marks of antiquity are some hewn stones from more ancient buildings, found in the walls of some of the houses. The monks, indeed, show the house of Mary and Martha, and Simon the leper, and also the sepulchre of Lazarus, all of which are constantly mentioned in the narratives of pilgrims and travelers. The sepulchre is a deep vault, like a cellar, excavated in the limestone rock in the middle of the village, to

which there is a descent by twenty-six steps. Dr. Robinson (ii:101) alleges that there is not the slightest probability of its ever having been the tomb of Lazarus. The form is not that of the ancient sepulchres, nor does its situation accord with the narrative of the New Testament, which implies that the tomb was not in the town (John xi:31, 38). The present Arab name of the village is el-Azirezeh, from el-Azir, the Arabic form of Lazarus.

BETHARABAH (bēth'ār'ābāh), (Heb. בֵּית-בְּרָחָה, *bayth har-ar-aw-baw'*, house of the desert), a town on the north end of the Dead Sea, and one of six cities belonging to Judah, on the north border of the tribe (Josh. xv:6, 61). It was afterward included in the list of the towns of Benjamin (Josh. xviii:22). It is called Arabah in Josh. xviii:18. In the last cited passage the district only is mentioned. The place has not been discovered.

BETH-ARAM (bēth-ā'ram), (Heb. בֵּית-הָרָם, *bayth har-rawm'*, mountain house, or town of the height), a town of Gad, opposite Jericho, and three miles east of Jordan (Josh. xiii:27). Perhaps same as Beth-haran (Num. xxxii:36). Merrill locates it at *er-Rama*, on the Shittim plain. Named Julius, or Livias, by Herod, after the wife of Augustus. It is the present *er Rameh*.

BETH-ARBEL (bēth'ār'bel), (Heb. בֵּית-אַרְבֵּל, *bayth ar-bale'*, house of courts), a place mentioned only in Hos. x:14; and as it seems to be there implied that it was an impregnable fortress, the probability is strengthened of its being the same as the Arbela of Josephus. This was a village in Galilee, near which were certain fortified caverns. They are first mentioned in connection with the march of Bacchides into Judaea, at which time they were occupied by many fugitives, and the Syrian general encamped there long enough to subdue them (*Antiq.* xii:11, 1; 1 Macc. ix:2).

BETH-AVEN (bēth'ā'ven), (Heb. בֵּית אֲוֵן, *bayth aw'ven*, house of nothingness, i. e., idolatry), a nickname for the town of Bethel, applied to it after it became the seat of the worship of the golden calves (see BETHEL). There was, however, a town of this name not far from Bethel eastward (Josh. vii:2; 1 Sam. xiii:5), the existence of which, perhaps, occasioned the transfer of the name to Bethel. The Talmudists confound it with Bethel. There was also a desert of the same name (Josh. xviii:12).

BETH-AZMAVETH (bēth'āz'ma-vēth), (Heb. בֵּית אֲזַמְוֶת, *bayth az-marw'veth*, house of Azmaveth), a town of Benjamin. Forty-two of its inhabitants returned with Zerubbabel from Babylon (Neh. vii:28; "Azmaveth," Neh. xii:29; Ezra ii:24).

BETH-BAAL-MEON (bēth'bā'al-mē'on), (Heb. בֵּית בַּעַל מְעֹן, *bayth bah'al me-own'*, house of Baal-meon), one of the places assigned to Reuben in the plains east of Jordan (Josh. xiii:17), known formerly as Baal-meon (Num. xxxii:38), or Beon (xxxii:3), to which Beth was probably added. It is identified with the present ruins of Myun, or *Ma'in*, nine miles southwest of Heshbon.

BETH-BARAH (bēth-bā'rah), (Heb. בֵּית בָּרָה, *bayth baw-raw'*, house of crossing), a chief ford of Jordan. Possibly the place of Jacob's crossing (Gen. xxxii:22), and near the scene of Gideon's victory (Judg. vi:24), and where Jephthah slew the Ephraimites (Judg. xii:4). It was probably the same as BETHABARA (which see).

BETH-BASI (běth'bā'sī), (Gr. *Baθ βασι*, *bay-ith-bay-see'*), a city of Judah, which the two Maccabees, Simon and Jonathan, fortified (1 Macc. ix:62-64).

BETH-BIREI (běth'bīr'e-i), (Heb. *בֵּית בִּרְעִי*, *bayth bir-ee'*, house of a creative one), a city of Judah (1 Chron. iv:31), in the extreme south. It appears to have had the name *Beth-lebaath* and *Lebaath* (Josh. xix:6; xv:32); probably *Bireh*.

BETH-CAR (běth'kār), (Heb. *בֵּית כָּר*, *bayth kar'*, house of lambs), a city of Dan (1 Sam. vii:11), west of Mizpeh. Conder locates it at *'Ain Kā-rim*.

BETH-DAGON (běth'dā'gon), (Heb. *בֵּית דָּגוֹן*, *bayth-daw-gohn'*, house of Dagon, temple of Dagon).

1. A city of Asher (Josh. xix:27; compare 1 Sam. v:2-5).

2. A city of Judah (Josh. xv:41), so called, probably, because here was a temple of Dagon, before the Israelites took it.

BETH - DIBLATHAIM (běth'dīb'la-thā'im), (Heb. *בֵּית דִּבְלַתַּיִם*, *bayth dib-law-thah'yim*, house of Diblathaim), a city of Moab (Jer. xlviii:22), probably the place called Almon Diblathaim (Num. xxxiii:46).

BETH-EDEN (běth'e'den), (Heb. *בֵּית עֵדֵן*, *bayth eh'den*, house of pleasantness), the seat of a native king threatened with destruction (Amos i:5).

BETHEKED (běth'e'ked), (Heb. *בֵּית עֵקֶד*, *bayth-ee'ked*, house of the binding of sheep, 2 Kings x:12, 14), which some construe in a general sense—a *shearing house*, or, the *house of shepherds binding sheep*; but the LXX take it for a place between Jezreel and Samaria.

BETHEL (běth'ěl), (Heb. *בֵּית אֵל*, *bayth-ale'*, house of God).

1. Originally Luz, an ancient town which Eusebius places twelve Roman miles north of Jerusalem, on the right hand of the road to Shechem. Jacob rested here one night on his way to Padan-Aram, and commemorated the vision with which he was favored by erecting and pouring oil upon the stone which had served him for a pillow, and giving to the place the name of Bethel (*place or house of God*), which eventually superseded the more ancient designation of Luz (Gen. xxviii:11-19). Under that name it is mentioned proleptically with reference to the earlier *time* of Abraham (Gen. xii:8; xiii:3).

It has been supposed that, like many other sanctuaries, such as Jerusalem, Jericho, Shechem, Hebron, etc., Bethel was originally a Canaanite holy place, and that after it had passed into the hands of the Israelites it was adopted into Israelite traditions, and assigned a patriarchal consecration. On the other hand, there is no clear evidence that Bethel was a Canaanite sanctuary; all that the Old Testament knows about its earlier history is that its ancient name was Luz; so we are justified in concluding that its sanctity was of purely Israelite origin. At the same time, it possessed a sanctity independent of the dedication which Jacob is said to have given it. It was a haunt of angels, a place where a ladder was always fixed between earth and heaven; and when Jacob passed the night there he saw it. It was not so much that Jehovah found Jacob, as that Jacob was unconsciously guided to find

Jehovah there. (G. A. Cooke, Hastings' *Bib. Dict.*)

After his prosperous return, Bethel became a favorite station with Jacob; here he built an altar, buried Deborah, received the name of Israel (for the second time), and promises of blessing; and here also he accomplished the vow which he had made on his going forth (Gen. xxxv:1-15; Comp. xxxii:28, and xxviii:20-22). It seems not to have been a town in those early times; but at the conquest of the land, Bethel is mentioned as the royal city of the Canaanites (Josh. xii:16). It became a boundary town of Benjamin towards Ephraim (Josh. xviii:22), and was actually conquered by the latter tribe from the Canaanites (Judg. i:22-26). At this place, already consecrated in the time of the patriarchs, the ark of the covenant was, apparently for a long while, deposited (see *ARK*), and probably the tabernacle also (Judg. xx:26; Comp. 1 Sam. x:3). It was also one of the places at which Samuel held in rotation his court of justice (1 Sam. vii:16). After the separation of the kingdoms Bethel was included in that of Israel, which seems to show, that although originally in the formal distribution assigned to Benjamin, it had been actually possessed by Ephraim in right of conquest from the Canaanites—which might have been held by that somewhat unscrupulous tribe to determine the right of possession to a place of importance close on their own frontier. Jeroboam made it the southern seat (Dan being the northern) of the worship of the golden calves; and it seems to have been the chief seat of that worship (1 Kings xii:28-33; xiii:1). This appropriation, however, completely desecrated Bethel in the estimation of the orthodox Jews; and the prophets name it with abhorrence and contempt—even applying to it the name of Bethaven (*house of idols*) instead of Bethel (house of God) (Amos i:5; Hos. iv:15; v:8; x:5, 8). The town was taken from Jeroboam by Abijah, king of Judah (2 Chron. xiii:19); but it again reverted to Israel (2 Kings x:28). After the Israelites were carried away captive by the Assyrians, all traces of this illegal worship were extirpated by Josiah, king of Judah, who thus fulfilled a prophecy made to Jeroboam 350 years before (2 Kings xiii:1, 2; xxiii:15-18). The place was still in existence after the Captivity, and was in the possession of the Benjamites (Ezra ii:28; Neh. vii:32). In the time of the Maccabees Bethel was fortified by Bacchides for the king of Syria. It is not named in the New Testament; but it still existed, and was taken by Vespasian. (Robinson, *Biblioth. Sac.*, 1843, p. 456 ff.)

2. A town in the south of Judah (1 Sam. xxx:27). Perhaps the same city is designated (Josh. xii:16). The place appears to have borne the names Chesil, Bethul and Bethnel (Comp. Josh. xv:30; xix:4; 1 Chron. iv:29, 30; v:29, 30).

BETHELITE (běth'ěl-ite), a designation of Hiel (1 Kings xvi:34); a native of Bethel in Benjamin.

BETHEL, MOUNT OF (běth'el, mount ֹב), the southern range of mountains belonging to Bethel (Josh. xvi:1, 2). Bethel is here distinguished from Luz, because the reference is not to the town of Bethel, but to the mountains, from which the boundary extended to Luz.

BETHEMEK (běth-ē'mek), (Heb. *בֵּית הַעֵמֶק*, *bayth harw-ay'mek*, house of the valley), a city of the tribe of Asher near its southeast border (Josh. xix:27), not identified.

BETHER (bē'ther), (Heb. בֵּתֵר, *beh'ther*, depth, separation), the Mountains of Bether are only mentioned in Cant. ii:17; viii:14; and no place called Bether occurs elsewhere.

The word means, properly, *dissection*. The mountains of Bether may therefore be *mountains of disjunction, of separation*, etc., that is, mountains cut up, divided by ravines, etc. In the Authorized Version the same words that are rendered 'mountains of Bether' in Cant. ii:17, are rendered 'mountains of spices' (viii:14).

"Bethel is celebrated for the resistance of the Jews to Hadrian under Bar-Cochba in A. D. 135 (see authorities quoted by Robinson, *Bib. Res.*, vol. iii, and the account in Neubauer's *Géog. Talm. s.v.*). The site was recognized by Canon Williams at *Bittir*, southwest of Jerusalem—a village on a cliff in a strong position, with a ruin near it called 'Ruin of the Jews,' from a tradition of a great Jewish massacre at this place." (C. R. Conder, *Hastings' Bib. Dict.*)

BETHESDA (be-thěz'dà), (Gr. Βηθεσδα, *bay-thes-dah'*, house or place of mercy), a pool at the Sheep-gate of Jerusalem, built round with porches for the accommodation of the sick who sought benefit from the healing virtues of the water, and upon one of whom Christ performed the healing miracle recorded by St. John (v:2-9).

That which is now, and has long been pointed out as the Pool of Bethesda, is a dry basin or reservoir outside the northern wall of the inclosure around the Temple Mount, of which wall its southern side may be said to form a part. The east end of it is close to the present gate of St. Stephen. The pool measures 360 feet in length, 130 feet in breadth, and 75 feet in depth to the bottom, besides the rubbish which has accumulated in it for ages. Although it has been dry for about two centuries, it was once evidently used as a reservoir, for the sides internally have been cased over with small stones, and these again covered with plaster; but the workmanship of these additions is coarse, and bears no special marks of antiquity. The west end is built up like the rest, except at the southwest corner, where two lofty arched vaults extended westward, side by side, under the houses that now cover this part. (Barclay, *City of the Great King*, p. 516 ff.; King, *The Temple Hill*.)

Dr. Robinson was able to trace the continuation of the work in this direction under one of these vaults for 100 feet, and it seemed to extend much farther. This gives the whole a length of 160 feet, equal to one-half of the whole extent of the sacred inclosure under which it lies; and how much more is unknown. It would seem as if the deep reservoir formerly extended farther westward in this part; and that these vaults were built up, in and over it, in order to support the structures above. Dr. Robinson considers it probable that this excavation was anciently carried quite through the ridge of Bezetha, along the northern side of Antonia to its northwest corner, thus forming the deep trench which separated the fortress from the adjacent hill (*Bib. Researches*, i. 433, 434). The mere appearance of the place, and its position immediately under the wall of the sacred inclosure, strongly support this conjecture, so that we are still left to seek the Pool of Bethesda, if indeed any trace of it now remains. Dr. Robinson himself, without having any definite conviction on the subject, asks whether the Pool of Bethesda may not in fact be the 'Fountain of the Virgin.' The question was suggested to his mind by the exceedingly abrupt and irregular plan of that foun-

tain. He remarks: 'We are told that an angel went down at a certain season into the pool and troubled the water;' and then whosoever first stepped in was made whole (John v:2-7). There seems to have been no special medicinal virtue in the water itself, and only he who first stepped in after the troubling was healed. Does not this troubling of the water look like the irregular plan of this fountain? And as the Sheep-gate seems to have been situated not far from the Temple (Neh. iii:1, 32), and the wall of the ancient Temple probably ran along this valley; may not that gate have been somewhere in this part, and the Fountain of the Virgin correspond to Bethesda, the same as the 'King's Pool' of Nehemiah, and the 'Solomon's Pool' of Josephus? (*Bib. Researches*, i. 508). For an account of the Fountain to which these inquiries relate, we must refer to the article on the Fountain, with which that of the Virgin is closely connected (R. A. Conder agrees with Dr. Robinson, *Hastings' Bib. Dict.* See Barclay, *City of the Great King*, p. 516, ff.; King, *The Temple Hill*). (See SILOAM, POOL OF.)

BETH-EZEL (běth-ē'zel), (Heb. בֵּית הָאֵזֶל, *bayth-haw-ay'tsel*, house of firm root), a place mentioned (Mic. i:11). It was, according to Ephrem Syrus, not far from Samaria. Perhaps identical with Azal or Ezel (Zech. xiv:5). Exact site unknown.

BETH-GADER (běth'gā'der), (Heb. בֵּית גָּדֵר, *bayth-gaw-dare'*, house of the well), a city of Judah (1 Chron. ii:51). Perhaps the same as Geder (Josh. xii:13). (See GEDER.)

BETH-GAMUL (běth'gā'mul), (Heb. בֵּית גַּמּוּל, *bayth-gaw-mool'*, camel house), a city of the Moabites, in Reuben (Jer. xlviii:23). It is now the ruin *Umm el-Jemâl*, towards the east of the plateau, south of Medeba—a site where a Nabathæan inscription was found by Warren, which may date about the second century A. D.

BETH-GILGAL (běth-gil'gāl), (Heb. בֵּית הַגִּלְגָּל, *bayth-hag-ghil-gawl'*, house of Gilgal, Neh. xii:29). Same as Gilgal, near Bethel.

BETH-HACCEREM (běth'hāk'çe-rēm), (Heb. בֵּית הַחֲצֵרֵם, *bayth-hak-keh'rem*, place of the vineyard), a city of Benjamin, situated on an eminence between Jerusalem and Tekoa (Neh. iii:14; Jer. vi:1), about three and a half miles southeast of Bethlehem.

BETH-HAGGAN (běth'häg'gan), (Heb. בֵּית הַגָּן, *bayth-hag-gawn'*, house of the garden), a place by way of which King Ahaziah fled (2 Kings ix:27, A. V., "garden house").

BETH-HANAN (běth'hān'an). See ELON-BETH-HANAN.

BETH-HARAN (běth'hā'ran), (Heb. בֵּית הָרָן, *bayth-haw-rawn'*, high or strong place, Num. xxxii:36; Josh. xiii:27), a city of Gad beyond the Jordan, afterwards called Livias, or Julias. It is opposite Jericho on the southeast. Probably the same as Beth-Aram.

BETH-HOGLA and HOGLAH (běth'hög'là), (Heb. בֵּית הַחֲגֹלָה, *bayth-khog-law'*, place of magpies), a town of Benjamin, on the confines of Judah (Josh. xv:6; xviii:19, 21). The name and site are identified with 'Ain Hajlah, four miles southeast of Jericho.

BETH-HORON (běth'hō'ron), (Heb. בֵּית הַחֹרֹן, *bayth-kho-ron'*, house of caverns or holes). Two places of this name are distinguished in Scripture

as the Upper and Nether Beth-horon (Josh. xvi: 3, 5; xviii:13; 1 Chron. vii:24).

The Nether Beth-horon lay in the northwest corner of Benjamin; and between the two places was a pass called both the ascent and descent of Beth-horon, leading from the region of Gibeon (el-Jib) down to the western plain (Josh. xviii:13, 14; x:10, 11; 1 Macc. iii:16, 24). Down this pass the five kings of the Amorites were driven by Joshua (Josh. x:11). The upper and lower towns were both fortified by Solomon (1 Kings ix:17; 2 Chron. viii:5).

Dr. Robinson gathers that in ancient times, as at the present day, the great road of communication and of heavy transport between Jerusalem and the seacoast was by the pass of Beth-horon (*Bib. Researches*, iii:61).

From the time of Jerome the place appears to have been unnoticed till 1801, when Dr. E. D. Clarke recognized it in the present Beit-Ur (*Travels*, vol. i, pt. ii, p. 628), after which it appears to have remained unvisited till 1838, when the Rev. J. Paxton, and, a few days after, Dr. Robinson, arrived at the place. The Lower Beit-Ur is upon the top of a low ridge, which is separated by a wady, or narrow valley, from the foot of the mountain upon which the Upper Beit-Ur stands. Both are now inhabited villages. The lower is very small, but foundations of large stones indicate an ancient site—doubtless that of the Nether Beth-horon. The Upper Beit-Ur is likewise small, but also exhibits traces of ancient walls and foundations. In the steep ascent to it the rock is in some parts cut away and the path formed into steps, indicating an ancient road. On the first offset or step of the ascent are foundations of huge stones, the remains, perhaps, of a castle, that once guarded the pass.

BETH-JESHIMOTH (běth'jěsh'i-mōth or -jes'i-mōth), (Heb. בֵּית הַיְשִׁימוֹת, *bayth hah-yesh-ee-mōth'*, place of desolations), a city of Reuben, between the mountains of Abarim and the Jordan (Num. xxxiii:49), about ten miles southeast of Jericho (Josh. xii:3; xiii:20), afterwards possessed by the Moabites (Ezck. xxv:9).

BETH-LE-APHRAH (běth'le-ăph'rah), (Heb. בֵּית לֵאֲפֵרָה, *bayth-le-af-raw'*, house of dust; so in R. V., Mic. i:10; "house of Apharah" in the A. V.). Probably identical with the modern *Beit-Offa*, six miles southeast of Ashdod (Robinson's *Researches*, ii:369 note; Van de Velde, *map*).

J. A. Selbie, *Hastings' Bib. Dict.*, says the site is quite unknown.

BETH-LEBAOTH (běth'lěb'a-ōth), (Heb. בֵּית לֵבָאוֹת, *bayth-leb-aw-ōth'*, house of lionesses), a city of Simeon (Josh. xix:6), called Lebaoth (chap. xv:32). Not identified.

BETHLEHEM (běth'lě-hem or běth'le-hem), (Heb. בֵּית לֶחֶם, *bayth-leh'khem*, house or place of bread, i. e. Bread-town, or house of flesh, Sept. Βηθλεέμ, *Bethlehem*).

1. A city of Judah (Judg. xvii:7), six miles southward from Jerusalem, on the road to Hebron. It was generally called Bethlehem-Judah to distinguish it from another Bethlehem in Zebulun (Josh. xix:15; Judg. xii:10). It is also called Ephrathah (the fruitful), and its inhabitants Ephrathites (Gen. xlviii:7; Mic. v:2). Bethlehem is chiefly celebrated as the birthplace of David and of Christ and as the scene of the Book of Ruth. It was fortified by Rehoboam (2 Chron. xi:6); but it does not appear to have been a place of much importance, for Micah, extolling the

moral pre-eminence of Bethlehem, says: 'Thou, Bethlehem Ephrathah, *though thou be little among the thousands of Judah,*' etc. (Mic. v:2). Matthew quotes this as—'and thou, Bethlehem of Judah, *art not the least of the cities of Judah,*' etc. (Matt. ii:6) which has the appearance of a discrepancy. But it is answered that a city may be *little* without being the *least*, or that the evangelist may have quoted from memory, and hence the slight difference in expression, while the sense remains the same.

There never has been any dispute or doubt about the site of Bethlehem, which has always been an inhabited place, and, from its sacred associations, has been visited by an unbroken series of pilgrims and travelers. It is now a large village, beautifully situated on the brow of a high hill, which commands an extensive view of the surrounding mountainous country, and rises in parterres of vineyards, almond-groves and fig plantations, watered by gentle rivulets that murmur through the terraces; and is diversified by towers and wine-presses. It is a straggling village, with one broad and principal street. The houses have not domed roofs like those of Jerusalem and Rumla; they are built for the most part of clay and bricks, and every house is provided with an apiary, the beehives of which are constructed of a series of earthen pots, ranged on the house-tops.

Travelers differ as to the site of the well by the gate of Bethlehem, from which David longed so much to drink. But certain it is, that by the gate of the city there is a well with a covered piazza. The Latins, Greeks and Armenians have each a convent there, and there still exists a fine church supposed to have been built by Helena, A. D. 326. The monks pretend to show to visitors the stable where Christ was born, and the manger where he was laid. The spot where Christ's birth took place is marked by a silver star. Like the show of Holy places at Calvary, the whole appears to be miserable profanation, and wretched deceit. The stable is a grotto or cave cut out of a rock, a cave into which one must descend. And there is no evidence that such stables were ever in use in the East. The fields where the angels appeared to the shepherds are pointed out to the east of the town, about half a mile distant (Matt. ii:1; Luke ii:2-12).

The city was sacred to Christians from the earliest times, and the first care of the Crusaders was to secure the safety of its Christian population in A. D. 1099, before Jerusalem was taken. It was subsequently made a bishopric. One of the most remarkable Christian texts is that on the font in the Basilica, which is said, with true modesty, to have been presented by 'those whose names are known to the Lord.' The glass frescoes are of high interest, and were presented by Michael Comnenos in the twelfth century, A. D. The crests of knights who visited the church in the Middle Ages are drawn upon the shafts of the Basilica pillars. (C. R. Conder, *Hastings' Bib. Dict.*)

2. A town in the portion of Zebulun named in Josh. xix:15; Judg. xii:10. It has been identified with Beit Lahm, six miles west of Nazareth, by Dr. Robinson.

BETHLEHEMITE (běth'le-hem-ite), an inhabitant of Bethlehem. Among the Bethlehemiters were Jesse (1 Sam. xvi:1, 18; xvii:58), Elhanan (2 Sam. xxi:19) and Elhanan, son of Dodo (2 Sam. xxi:19).

BETHLEHEM-JUDAH (běth'le-hem-jū'dah). See BETHLEHEM 1.

BETHMAACHAH (běth'mā'a-kah), (Heb. בֵּית מַעֲכָה, *bayth mah-ak-aw'*, house of the maachah), a place named (2 Sam. xx:14) in connection with Abel. Perhaps it is identical with Maachah, or Aram-Maachah, a small Syrian kingdom in the north of Palestine.

BETH-MARCABOTH (běth'mär'kà-bōth), (Heb. בֵּית הַמַּרְקָבוֹת, *bayth-ham-mar-kaw-both'*, place of chariots), a city of Simeon (Josh. xix:5; 1 Chron. iv:31) in the extreme south of Judah. Perhaps it was one of the stopping-places used in the chariot trade between Egypt and Jerusalem (1 Kings x:19, 29; 2 Chron. viii:6; i:17); exact site is unknown.

BETHMEON (běth'mē'on), (Heb. בֵּית מְעוֹן, *bayth me-own*, place of habitation, Jer. xlvi:23). See BETH-BAAL-MEON, for which Bethmeon is a contracted form.

BETHMERHAK (běth'mēr'hāk), (Heb. בֵּית הַמְרָחָק, *bayth ham-mer-khak'*, house of removal), the proper name probably of a locality, or only a house, beside the brook Kedron, between Jerusalem and the Mount of Olives (2 Sam. xv:17). The A. V. renders it "a place that was far off;" the margin, "the Far House."

BETHMILLO (běth'mil'lo), (Heb. בֵּית מְלוּא, *bayth mil'low*, wall house).

1. A fortress near Shechem (Judg. ix:20). Probably the same as the citadel of Judg. ix:46-49.

2. A castle of Jerusalem where King Jehoash was slain (2 Kings xii:20).

BETH-NIMRAH (běth'nīm'rāh), (Heb. בֵּית נִמְרָה, *bayth nim'rah*, house of sweet water), a town in the tribe of Gad (Num. xxxii:3, 36; Josh. xiii:27), which Eusebius (who calls it Bethnabris, Βηθναβρίς) places five Roman miles north of Livias. This leaves no doubt of it being the same ruined city called Nimrin, south of Szalt, which Burckhardt mentions (*Syria*, p. 355) as situated near the point where the Wady Shoeb joins the Jordan, now called Tell-er-Rameh. Dr. Robinson understood that there was here a fountain corresponding to 'the waters of Nimra' (Is. xv:6; Jer. xlvi:34).

BETH-PALET (běth'pā'let), (Heb. בֵּית פָּלֵט, *bayth peh'let*, house of flight), a city in the most southern part of Judah (Josh. xv:27; Neh. xi:26), also Beth-Phelet. Exact site unknown.

BETH-PAZZEZ (běth'pāz'zez), (Heb. בֵּית פַּצֵּז, *bayth pats-tsates*, house of dispersion), a city of Issachar (Josh. xix:21).

BETH-PEOR (běth'pē'or), (Heb. בֵּית פְּעוֹר, *bayth pe-ore'*, house of Peor), a city of Moab, given to Reuben, and famous for the worship of BAAL-PEOR (Deut. iii:29; iv:46; xxxiv:6; Josh. xiii:20). It was situated on the east of Jordan, opposite (ἀπέναντι) Jericho, and six miles above Livias or Beth-haran (Euseb. *Onomasticon*). It was in the possession of the tribe of Reuben (Josh. xiii:20). In the Pentateuch the name occurs in a formula by which one of the last halting-places of the children of Israel is designated—"the ravine over against Beth-peor" (Deut. iii:29; iv:46). In this ravine Moses was probably buried (Deut. xxxiv:6).

BETHPHAGE (běth'pha-jē), (Gr. Βηθφαγή, *bayth-fag-ay'*, house of unripe figs; Comp. Cant. ii:13), a small village, which our Lord, coming from Jericho, appears to have entered before reaching Bethany (Matt. xxi:1; Luke xix:29); it probably, therefore, lay near the latter place, a little below it to the east. No trace of it now exists.

BETH-PHELET (běth'phē'let), (Neh. xi:26). See BETH-PALET.

BETHRAPHA (běth'rā'phā), (Heb. בֵּית רָפָא, *bayth raw-faw'*, house of Rapha, or of the giant), the name of the son of Eshton (B.C. 618), in the genealogy of Judah (1 Chron. iv:12). The name has not been identified as belonging to any place.

BETH-REHOB (běth'rē'hob). See REHOB.

BETHSAIDA (běth'sā'i-dā), (Gr. Βηθσαιδα, *bayth sahee-dah'*, fishing-town), a town (πόλις, John i:44; Mark viii:22) in Galilee (John xii:21), on the western side of the sea of Tiberias, towards the middle, and not far from Capernaum (Mark vi:45; viii:22).

Supposed Site of Bethsaida.

It was the native place of Peter, Andrew, and Philip, and the frequent residence of Jesus. This gives some notion of the neighborhood in which it lay; but the precise site is utterly unknown, and the very name has long eluded the search of travelers. The last historical notice of it is by Jerome, but he affords no more information than may be derived from the intimations in the New Testament. It is true that Pococke (ii:p. 99) finds Bethsaida at Irbid; Seetzen at Khan Minyeh (Zach's *Monath. Corresp.* xviii: 348); Nau at Mejdal (*Voyage*, p. 578; Quaresmius, tom. ii. 866), apparently between Khan Minyeh and Mejdal; and others at Tabighah—all different points on the western shore of the lake. But Dr. Robinson expresses his deliberate persuasion that these identifications can have no better foundation than the impression of the moment. (Robinson's *Researches*, iii, 304; King, *Temple Hill*).

Christ fed the 5,000 'near to a city called Bethsaida' (Luke ix:10); but it is evident from the parallel passages (Matt. xiv:13; Mark vi:32-45), that this event took place not in Galilee, but on the eastern side of the lake. This was held to be one of the greatest difficulties in sacred geography (Cellar. *Notit. Orb.* ii. 536), till the ingenious Reland afforded materials for a satisfactory solution of it, by distinguishing *two* Bethsidas; one on the western, and the other on the northeastern border of the lake (*Palastina*, p. 653). The former was undoubtedly 'the city of Andrew and Peter;' and, although Reland did not himself think that the other Bethsaida is mentioned in the New Testament, it has been shown by later writers that it is in perfect agreement with the sacred text to conclude that it was the Bethsaida near which Christ fed the five thousand, and also, probably, where the blind man was restored to sight. This, and not the western Bethsaida (as our English writers persist in stating), was the Bethsaida of Gaulonitis, afterwards called Julias, which Pliny (*Hist. Nat.* xv.) places on the eastern

side of the lake and of the Jordan, and which Josephus describes as situated in lower Gaulonitis, just above the entrance of the Jordan into the lake (*De Bell. Jud.* ii. 9, 1; iii. 10, 7). It was originally only a village, called Bethsaida, but was rebuilt and enlarged by Philip the Tetrarch not long after the birth of Christ, and received the name of Julias in honor of Julia, the daughter of Augustus (Luke iii:1; Joseph. *Antiq.* xviii:2, 1). Philip seems to have made it his occasional residence, and here he died and was buried in a costly tomb (*Antiq.* xviii:4, 6).

Thomson is opposed to the idea of two Bethsaidas. He thinks it highly probable that the whole city on both banks of the river was ordinarily attached to Galilee. He believes that there was but *one* Bethsaida at the head of the lake and that it was at the mouth of the Jordan (*The Land and the Book*, vol. ii, pp. 31, 32).

BETH-SHAN (běth'shan), (Heb. בֵּית שָׁן, *bayth shawn'*, house of rest, or Rest Town; Sept. *Bethsan*), a city belonging to the half-tribe of Manasseh, west of the Jordan, and situated in a valley of that river, where it is bounded westward by a low chain of the Gilboa mountains.

It is on the road from Jerusalem to Damascus and is about two miles from the Jordan, eighteen from the southern end of Lake Gennesareth and twenty-three from Nazareth. It also bore the name of Scythopolis, perhaps because Scythians had settled there in the time of Josiah (B. C. 631), in their passage through Palestine towards Egypt (Herod. i:205; Comp. Pliny, *Hist. Nat.* v. 16, 20; Georg. Syncellus, p. 214). As Succoth lay somewhere in the vicinity, east of the Jordan, some would derive Scythopolis from Succothopolis (Reland, p. 992, *sq.*; Gesenius in Burckhardt, p. 1053, German edit.). It is also not improbably supposed to be the same as Beth-Sitta (Judg. vii:22).

Although Beth-shan was assigned to Manasseh (Josh. xvii:11), it was not conquered by that tribe (Judg. i:17). The body of Saul was fastened to the wall of Bethshan by the Philistines (1 Sam. xxxi:10); Alexander Jannæus had an interview here with Cleopatra (Joseph. *Antiq.* xiii:13, 3); Pompey marched through it on his way from Damascus to Jerusalem (xiv:3, 4), and in the Jewish war 13,000 Jews were slain by the Scythopolitans (*De Bell. Jud.* ii:18, 3). In the Middle Ages the place had become desolate, although it still went by the name of *Metropolis Palæstina tertia* (Will. Tyr. pp. 749, 1034; Vitriacus, p. 1119). We find bishops of Scythopolis at the councils of Chalcedon, Jerusalem (A. D. 536), and others. During the Crusades it was an archbishopric, which was afterwards transferred to Nazareth (Raumer's *Palæstina*, pp. 147-149, Van de Velde). Written also Bethshean.

BETHSHEAN (běth'shē'an), (Heb. בֵּית שֵׁן, *bayth shawn'*, house of security), (see Josh. xvii:11, 16; Judg. i:27; and elsewhere). See BETH-SHAN.

BETH-SHEMESH (běth'shē'mesh), (Heb. בֵּית שֶׁמֶשׁ, *bayth sheh'mesh*, house of the sun, i. e., Sun Town).

1. A sacerdotal city (Josh. xxi:16; 1 Sam. vi:15; 1 Chron. vi:59) in the tribe of Judah, on the (southeast) border of Dan (Josh. xv:10), and the land of the Philistines (1 Sam. vi:12), probably in a lowland plain, and placed by Eusebius ten Roman miles from Eleutheropolis, in the direction of the road to Nicopolis. It belonged at an early date to the Philistines, and they had again obtained possession of it in the time of Ahaz (1 Kings iv:9; 2 Chron. xxviii:18). It was to this

place that the ark was taken by the milch kine from the land of the Philistines, and it was here that, according to the present text, 'fifty thousand and threescore and ten men' were miraculously slain for irreverently exploring the sacred shrine (1 Sam. vi:19). The Ir-Shemesh of Joshua (xix:41) is supposed to be the same as this Beth-Shemesh.

2. There was another Beth-Shemesh in Naphthali (Judg. i:33).

3. Another in Issachar (Josh. xix:22).

4. And the Egyptian Beth-Shemesh is named in Jer. xlili:13; although usually called On.

BETHSHEMITE (běth'shē'mīte), properly "Bethslimshite," an inhabitant of Bethshemesh (1 Sam. vi:14, 18), B. C. 1140.

BETH-SHITTAH (běth'shīt'tah), (Heb. בֵּית שִׁטָּה, *bayth shit-taw*, house of the acacia; Judg. vii:22).

BETHSURA (běth-sū'rā). See BETH-ZUR.

BETH-TAPPUAH (běth'tāp'pū-ah), (Heb. בֵּית תַּפּוּחַ, *bayth tap-poo'akh*, house of apples), a city of Judah (Josh. xv:53), which Eusebius says is the last city of Palestine, on the way to Egypt, fourteen miles from Raphia. It has been identified with *Teffuh*, five miles west of Hebron (Rob. ii:71).

BETHUEL (be-thū'el), (Heb. בֵּיתוּאֵל, *beth-oo-ale'*, dweller in God or abode of God).

1. Son of Abraham's brother Nahor, and father of Laban and of Rebecca, whom Isaac married (Gen. xxii:22, 23). His name only occurs incidentally (Gen. xxiv:15, 24, 47, 50) in the account of the transactions which led to that marriage, in which Laban takes the leading part (B. C. 2023). In Gen. xxv:20 and xxviii:5 he is called "Bethuel the Syrian." (Blunt, *Coincidences*, I, sec. iv.)

2. A city of Simeon (1 Chron. iv:30). David sent thither a part of the recaptured spoil of Ziklag (1 Sam. xxx:27). It is probably the Chesil of Josh. xv:30. Not identified. It may be the little village of Beit Aûla, 6½ miles northwest of Hebron.

BETHUL (bē'thul), (Heb. בֵּיתוּל, *beth-ool'*, contraction for *Bethuel*), the form under which the name appears (Josh. xix:4). It is probably the Bethel of Josh. xii:16.

BETHULIA (běth'u-li'á), (Heb. בֵּיתוּלְיָה, *beth-ul-yah*), a place mentioned only in the Apocryphal book of Judith (iv:5; vii:1,3), and which appears to have lain near the plain of Esdraelon on the south, not far from Dothaim, and to have guarded one of the passes towards Jerusalem. Modern ecclesiastical tradition identifies Bethulia with Safed, near the lake of Gennesareth. The site of Bethulia is still undetermined.

BETH-ZUR (běth'zûr), (Heb. בֵּית צוּר, *bayth tsoor'*, house of rocks), a town in the tribe of Judah (Josh. xv:58), twenty Roman miles from Jerusalem, on the road to Hebron (*Onomast.* s. v. 'Beth-zur'), and consequently two miles from the latter city.

It was fortified by Rehoboam (2 Chron. xi:7). The inhabitants assisted in building the walls of Jerusalem (Neh. iii:16). Lysias was defeated in the neighborhood by Judas Maccabæus, who fortified the place as a stronghold against Idumæa (1 Macc. iv:29, 61; 2 Macc. xi:5; Comp. 1 Macc. vi:7, 26). It was besieged and taken by Antiochus Eupator (1 Macc. vi:31, 50), and fortified by Bacchides (ix:52), whose garrison defended themselves against Jonathan Maccabæus (x:14); but it was taken and fortified by his brother Simon (xi:65, 66; xiv:7, 33). Josephus calls Beth-zur the strongest fortress in Judæa

(*Antiq.* xiii:5, 6). It has been identified under the name Beit-sūr (Wolcott and Robinson, i:216, *note* iii:277). This is another illustration of the wonderful preservation of Bible names (Wilson, *Land of the Bible*, i, 386).

BETONIM (bēt'o-nīm), (Heb. בֵּטְנִים, *bet-o-neem'*, pistachio nuts), a city of Gad, towards the north of this tribe, bordering on Manasseh (Josh. xiii:26). The Hebrew word differently pointed occurs (Gen. xliii:11), "nuts," A. V.

BETROTHING (bē-trōth'ing). See MARRIAGE.

BETULIA (be-tū'li-a), anointed stones. See STONES.

BEULAH (beū'lah or be-ū'lah), (Heb. בְּעוּלָה, *beh-oo-law'*, married), a name given to the Jewish church, importing its marriage with God, as their husband and sovereign Lord (Is. lxii:4).

BEZAI (bē'zāi), (Heb. בְּצַי, *bay-tzah'ee*, victory, or conqueror). The descendants of Bezai to the number of 323 who returned from Babylon B. C. 536 under Zerubbabel (Ezra ii:17; Neh. vii:23). The name also occurs among those who sealed the covenant with Nehemiah (Neh. x:18).

BEZALEEL (be-zāl'e-el), (Heb. בְּצַלְאֵל, *bets-al-ale'*, in the shadow, i. e., protection, of God).

1. A famous artificer, son of Uri (Exod. xxxi:1-6; xxxv:30), to whom Jehovah entrusted the construction of the ark in the wilderness. He had charge chiefly of the metal works, wood and stone and a general supervision of the construction (Exod. xxxviii:22; xxvii).

2. A son of Pahath-moab (B. C. 458) and one of those with foreign wives (Ezra x:30).

BEZEK (bē'zek), (Heb. בְּזֵק, *beh'zek*, lightning or brightness).

1. A city over which Adoni-bezek was king (Judg. i:4, *sq.*).

2. The place where Saul mustered his army to march to the relief of Jabesh-Gilead (1 Sam. xi:8). It has been held that Bezek was not a city but a tract of country, for which there seems to be good grounds. At any rate it was not far from Jerusalem. But Conder identifies the site with the ruin Ibzik, thirteen miles northeast of Shechem.

BEZER (bē'zer), (Heb. בְּצֵר, *beh'tser*, ore, gold or silver; Sept. Βοσόρ).

1. A city beyond the Jordan, in the tribe of Reuben, and one of the six cities of refuge (Deut. iv:43; Josh. xx:8; xxi:36; 1 Chron. vi:78). The site is unknown.

2. (Heb. as above), son of Zophah, a head of the house of Asher (1 Chron. vii:37).

BEZETH (bē-zeth), (Gr. Βηζέθ, *bay-zeth'*), a place at which Bacchides encamped after leaving Jerusalem (1 Macc. vii:19.) By Josephus (*Ant.* xii:10, sec. 2) the name is given as "the village Beth-zetho," or Berzetho, the northern suburb of Jerusalem. (See JERUSALEM).

BEZETHA (be-zē'tha). See BEZETH; JERUSALEM.

BIBLE (bīb'l), (Gr. βιβλία, *bib-lee'ah*, *libelli*, the small books), a name supposed to have been first applied in the fifth century to denote the collective volume of the sacred writings.

1. **Name.** The word occurs in the Prologue to Ecclesiasticus, 'the Law, the Prophets and the rest of the books,' and 2 Tim. iv:13, 'and the books.' Before the adoption of this name the more usual terms in the Christian Church by which the sacred books were denominated were the *Scripture* or *writing*, the *Scriptures*, the sacred writings and the *sacred letters*. These names

are thus frequently applied to the sacred books of the Old Testament by Josephus and Philo, as well as by the writers of the New Testament (2 Pet. i:20; Matt. xxii:29; Rom. i:2; 2 Tim. iii:15).

2. **Divisions.** The Bible is divided into the *Old and New Testaments*. The name Old Testament is applied to the books of Moses by St. Paul (2 Cor. iii:14), inasmuch as the former covenant comprised the whole scheme of the Mosaic revelation, and the history of this is contained in them. This phrase, 'book of the covenant,' taken probably from Exod. xxiv:7; 1 Macc. i:57, was transferred in the course of time by a metonymy to signify the writings themselves. The word *diathaykay*, which we now translate *testament*, signifies either a testament or a covenant, but the translators of the old Latin version have by a Grecism always rendered it, even when it was used as a translation of the Hebrew *Berith* (covenant), by the word *Testamentum*. The names given to the Old Testament were the *Scriptures* (Matt. xxi:42), *Scripture* (2 Pet. i:20), the *Holy Scriptures* (Rom. i:2), the *sacred letters* (2 Tim. iii:15), the *holy books* (*Sanhed.* xci:2), the *law* (John xii:34), the *law, the prophets and the psalms* (Luke xxiv:44), the *law and the prophets* (Matt. v:17), the *law, the prophets and the other books* (Prol. *Eccles.*), the *books of the old covenant* (Neh. viii:8), the *book of the covenant* (1 Macc. i:57; 2 Kings xxiii:2).

The other books (not in the canon) were called apocryphal, ecclesiastical and deutero-canonical. The term New Testament has been in common use since the third century, and is employed by Eusebius in the same sense in which it is now commonly applied (*Hist. Eccles.* iii:23). Tertullian employs the same phrase, and also that of 'the Divine Instrument' in the same signification. (See SCRIPTURE, HOLY.)

W. W.

3. **Sixty-six Books.** Although properly considered as a unit, the Bible is a collection of sixty-six books which were originally written in three languages—the Hebrew, Chaldee, and Greek, these being the most extensively used of all the tongues of antiquity.

These works were prepared in various localities, in different ages, and by men who varied as much in mental attainment as in worldly position. They treat of the beginnings of earth and of primitive man; they recite the history of individuals and of nations; they furnish an extensive code of laws, civil, physical and moral; they include a wonderful collection of psalms or hymns; they contain letters written for the comfort and instruction of believers; they treat of God's dealings with men; they portray His sublime patience and wisdom, and the physical embodiment of Divine love in the person of the Christ; they inculcate the whole duty of man toward his fellow creatures and his God; they describe his responsibilities and privileges, with the penalties and rewards which follow different lines of conduct.

So complete a volume is its own witness that it came from the same mind which planned the earth with its wonderful resources, and adaptation to the needs of humanity. The Bible furnishes moral and spiritual food, while the earth gives home and sustenance to the children of men. They both respond quickly to the inquiry of the uncultured mind, and they both contain problems which the greatest minds of earth have failed to solve. The Bible has lived through centuries of criticism while other monuments of letters have gone into oblivion. The literary treasures of Greece and Rome have followed those of earlier

times into the halls of forgetfulness, but the circulation of this wonderful book is greater today than ever before. Thousands of volumes have been written in the effort to destroy its usefulness, but it still guides the living and comforts the dying, and thus it will continue to do until faith is swallowed up in victory.

4. *Authority of the Bible.*

Man is ever amenable to a higher power. From the first moment of his existence until the last vestige of his body has mingled with the dust, he is governed by physical law; and every act of disobedience involves penalty; in like manner also he is amenable to the moral code, and here, too, sin is followed by sorrow.

(1) **Foundation of Jurisprudence.** All law and order, all society, must rest upon authority; and that which opposes it is not reason, but egotism combined with that ignorance which has a tendency to deny whatever it fails to comprehend. Human systems are outgrown, human authority is superseded, old laws are repealed, and new obligations are imposed. Creeds and theories may be improved, but the eternal principles of truth and righteousness are unchanged. After thousands of years of struggle along the lines of reform, the world has failed to find any system of ethics which can compare with that which was taught in the Sermon on the Mount—it has failed to find any source of comfort like that which God's promises bring to the aching heart.

All equitable codes of jurisprudence are founded upon Biblical teaching, for as Blackstone well says: "An enactment is not a law when it conflicts with the law of God."

(2) **Its Claims.** This book claims to contain precepts and commands which constitute the moral authority for humanity, and this claim comes not only from prophets and apostles, but also from the lips of Him "who spake as never man spake."

There is no doubtful authority contained in the words: "*Thus saith the Lord.*" There is no hesitation in the command: "*Search the Scriptures, for in them ye think ye have eternal life.*" It is said of the Divine Master that "he taught as one having authority," and his statement, "*I say unto you,*" carries with it an emphasis which is irresistible. It is true that the prophets, the apostles and the Christ not only assert and command, they also argue and entreat, showing a constant purpose to use all means for the winning of men to the ways of righteousness, but by so doing they no more compromise their Divine mission than by their frequent appeals to hope and love.

The Biblical claim to authority is reinforced by qualities which compel its recognition. In all the various books there is a single dominating line of thought binding the many parts into a perfect whole. The Christ is the great central figure of both prophecy and history, and the bringing of mankind to him is the one increasing purpose which runs through the ages—the one purpose which is manifest from the object lessons which were given in the wilderness to the crowning of the bride, the Lamb's wife, amidst the glories of Apocalyptic vision.

Another guarantee of its claim is the purity of its teaching. Wickedness is condemned and holiness exalted, sin and sorrow are depicted, but into the very darkness is thrown the light of the Sun of Righteousness as a cleansing and redeeming power.

(3) **Divine Element.** The harmony of purpose, and the forceful teaching of uprightness, can

be accounted for only by the presence of the Divine element, and this is the basis of infallible authority. Whenever we meet the Divine, we come to the tribunal from whence there is no appeal. When God speaks man can only obey. The *truth* of a statement depends upon its own nature, but its *authority* depends upon its origin. That which comes from God therefore is, and forever will be, absolute, supreme and final in its authority.

5. *Books of the Old Testament and Their Sources.*

The Hebrew Scriptures are called the Old Testament because they pertain to the old covenant.

(1) **The Old Covenant.** The Greek word *Diatheke* signifies both testament and covenant, but the term old covenant, as used by Paul in 2 Cor. iii:14, R. V., alludes not only to the books, but also to those early institutions described in the Pentateuch and spoken of in the writings of the prophets, and which, in process of time, were by a metonymy transferred to the books themselves. In like manner, also, the writings pertaining to the new covenant came to be called the New Testament.

These books have formed a center of criticism and discussion for more than two thousand years, and in the course of the ages, the interest seems to increase rather than diminish, our own generation being more active in this investigation than any which has preceded it.

(2) **History.** One reason why the Old Testament is so absorbing an object of literary study, is because it has a history back of it. It appealed to men in such a way that it was translated into Greek nearly three hundred years before Christ. In Hebrew, Greek, and Aramaic, it was widely circulated, so that in all parts of the known world it bore its part in the great work of preparation for the introduction of Christianity. The men of the Great Synagogue and the Tannite scribes did their work upon it. Christ and his disciples made it the basis of their teachings. It became the Bible of the Church as well as the synagogue, and to this Christ alluded when he said: "Search the Scriptures, for in them ye think ye have eternal life; and they are they which testify of me" (John v:39).

In the later centuries it has been translated into hundreds of languages, and has attracted the attention of those who study literary masterpieces. Hence, it has a wonderful interest aside from its religious value. But over and above these claims it is surely a marvelous storage battery of spiritual power, and constituted the authority to which Christ and the apostles constantly appealed. We cannot wonder, therefore, that the scholars of the world have in the aggregate devoted thousands of years of skilled literary work to the solution of the problems which it presents.

(3) **Early Form.** The first five books are still in the form with which the translator of Ecclesiasticus was familiar—still in the form in which Philo, and Josephus after him, knew them. These early workers knew them as a whole and not in the sources from whence some have supposed them to be derived. These books have been endorsed and preserved by three distinct and antagonistic classes of people, the Jews, the Samaritans and the Christians. It was these books, as distinguished from their sources, which molded Jewish thought during the Greek and Roman periods. It was the form in which we now have them and not in the form of sundry

earlier documents, that Jesus and his disciples used them.

(4) **Authorship.** In the preparation of the Pentateuch, Moses may have used the records of the early patriarchs; he may have embodied genealogies which had been carefully preserved—nay, the books themselves may have been partly written by an amanuensis, but if they were prepared by his authority or under his dictation, they were really his productions, and as such they were recognized by both his contemporaries and his successors.

It is from "the books of Moses" and "the law of Moses" that constant quotations are made by later Biblical writers, twenty-seven of the succeeding books having many such references. It is also as the writings of Moses that these works are frequently quoted and endorsed by the Christ. He makes no reference to the possible sources from whence they may have been to a greater or less extent derived, and during all the ages of the Christian era these books, as a whole, have been establishing their claim upon mankind. Whether some restoration of the sources from which certain parts of them may have been drawn, can ever establish a similar claim, is a matter for future ages to decide.

(5) **Polychrome Bible.** Another instance of Biblical study in the same direction is found in the treatment of the Book of Isaiah. In the "Polychrome Bible" Dr. Cheyne has analyzed the book into hundreds of fragments, which he regards as the product of several successive centuries, and which he has arranged in an order entirely different from that to which we have been accustomed. In times past the book of Isaiah has been regarded as having many distinctly marked discourses, each of them being a literary unit, but in Dr. Cheyne's work scarcely one of these units remain, many of them having been taken apart and assigned to authors belonging to different centuries. But the book of Isaiah to which we are accustomed is that which is quoted by the author of Ecclesiasticus, the book which the translators of the Septuagint knew about three hundred years before Christ, and the one with which Josephus and other early writers were familiar. It is the one which Jesus of Nazareth used, and from which he read in the synagogue. It is the book containing prophecies of the Christ, of which he himself said: "This day is this Scripture fulfilled in your ears" (Luke iv:21). It is the book from which the first preachers of Christianity proved to their Jewish converts that Jesus was the Messiah of whom the prophets spake, and it is one which in all the later ages has commanded the attention of lovers of good literature because of its sublime prophecies, and the eloquent poetry of its diction. It is this book which has appealed to the human mind for thousands of years as being well worth studying, not in beautiful fragments but as one grand whole.

It is worth while to attempt to find any possible sources for the sake of the light which such an investigation might throw upon the work; but it would be intellectual suicide to substitute the study of the *sources*, for the study of the *book*. But very few, even of the men who support the new tradition, regard the results thus far reached as being final; the most of them will agree that the source-restorations of the newer school which they now accept are still open to much revision. And this is another reason for a study of the Old Testament as distinguished from its possible sources.

(6) **Sources.** The completed Old Testament contains more than merely the extracts which the final authors have made from their sources. It gives us their judgment, either expressed or implied, in regard to the relations between the sources and their proper interpretation.

From the point of view of inspiration, we must hold that whatever Divine authority these books may have, comes largely through the men from whose hands the completed works came. Some writers have claimed that inspiration belongs exclusively to the original documents, but a single illustration will expose the fallacy of that idea. In the fourth chapter of the Book of Ezra we find a copy of the letter written by Bishlam, Ta-beel and others to the Persian king—a letter in which the Jews who were building the temple were slandered. The letter is one of the original sources of the Book of Ezra, but it is here copied simply on account of its falsity, and to show that it is contrary to the mind of God. To assume, then, that other sources contain all the inspiration which has been given, is entirely contrary to the evidence in the case. The "holy men who spake as they were moved by the Holy Ghost" were as often the secondary, as the primary authors of the books.

From a literary point of view Old Testament writers have sometimes been accused of being "uncritical," but they have at all events constructed books which have attracted more attention than any other literary product, and that, too, for a period covering more than twenty-two centuries. It may be well to inquire how many men, who call themselves "critical," can construct even one book which will command attention from scholars for more than two thousand years? These early authors have done work which is still so thoroughly alive that this fact alone is conclusive proof of its value. They certainly had fountains of information which we have not—they had the whole of certain works of which we have only the parts which they considered worthy of use. We, therefore, owe it to ourselves to study these books as a whole. (See *Old Testament Books Versus Their Sources*, by Willis J. Beecher: *Bibliotheca Sacra*. April, 1899, pp. 209, sq.) (See SCRIPTURE, HOLY.)

6. *Human Element in the Bible.*

The later versions of the Bible have been conceded to be superior to the earlier, because of the better scholarship of its translators.

(1) **Translations.** We feel this human element in the translation work, and our Bible may well be called a Divine-human book. All translators have for themselves done the very best work they could—all that honest, prayerful application could do in so difficult and responsible an undertaking. And the Bible is better for this painstaking human element. No later translation has been made from the original documents than those from the hands of the Biblical writers themselves. They have been made first from copies, then from copies of copies, and so on, the originals having been lost.

Scholars find that though there are thousands of minute variations in the hundreds of manuscripts which they have collated, there are no changes that affect the Divine doctrine of religion.

(2) **Human Agencies.** Nevertheless the copying of the Bible is a human element. There is a blending of the human element, also touching the text as it came from the hands of the original writers, a blending of life, between the source of Divine revelation and the intelligent and responsi-

ble human beings who penned the revelations coming through them. In these revelations we look to the man who was used to record them, not the pen that wrote, nor the fingers that held the pen, not the tongues of the men that spoke, but the soul force—the whole man—as a free personality inspired in this superhuman work, the man chosen by God to communicate the Divine unto the human. Oehler in his *Old Testament Theology*, pp. 479, 480, says:

"Whatever the prophet learned, experienced or observed, all that he feared or hoped, all concerning which he needed counsel or information, nay, even the external events which concerned him personally, all offered so many points of connection by which the Divine Word might reach him, and that word clothed itself in forms which had a relation to the idiosyncrasy and experience of the prophet, and was reported by him according to his individual rhetorical or literary powers."

(3) Personal Peculiarities. Prophets, apostles and evangelists all possessed individual peculiarities, stronger, perhaps, because of the greater personality of men thus gifted.

We discover in them different degrees of education, varying degrees of learning, strong characteristics that lead them to the frequent use of phrases, particularly their own favorite expressions. Habits of thought are theirs, such as are readily noted, as in St. Luke's, in which education and special gifts seemed the analysis or diagnosing diseases and proclaimed him a physician. Commentators do not fail to note that the Book of Chronicles denote the art of priestly expression, and the fact that Amos was a herdsman and a gatherer of sycamore fruit is told by his own peculiar speech. Thus we see that inspiration did not remove the human element from the men thus chosen for their responsible work. Inspiration did not give to them a precise identity of expression or memory, as seen in the recording of events and discourses in the time of our Lord, as at times one writer omits what another mentions, and in some places each writer has his own particular version. (See Matt. viii:25; Mark iv:38; Luke viii:24). Thus we see inspiration did not give them an equal degree of knowledge. St. Augustine says, referring to the different expressions attributed to the disciples as they waken Jesus in the storm (see Matt. viii:23-25; Luke viii:22-24): "The sense of the disciples waking the Lord and seeking to be saved is one and the same; nor is it worth while to inquire which of these three was said to Christ. For, whether they said any one of these three, or other words which no one of the evangelists has mentioned, but of similar import as to the truth of the sense, what matters it?" (Quoted in Alford's *Gr. Test*).

Each wrote according to his degree of inspiration, as he was impressed with different aspects of the same truths.

(4) The Prophets. It is true that in some instances the prophets have been most earnest students and have also been devout believers that in answer to prayer their inspirations would be increased. In Dan. ix:2 it is said: "I, Daniel, understood by books," and elsewhere it is written that the prophets as a class "inquired and searched diligently" to find out the manner and time of the Messiah's coming (1 Peter i:10).

It was in direct answer to prayer that the interpretation of Nebuchadnezzar's dream was made known to Daniel (Dan. ii:18, 19).

Oehler, in his *Old Test. Theol.*, p. 479, says: "In far the greater number of cases we must evidently conceive of the state in which the prophet receives a revelation, as merely one of profound

self-introversion and collectedness of mind in a state of perfect wakefulness. This prophetic state is most nearly related to communion with God in prayer.

(5) Local and Historical Allusions. All the different books of the Bible have local and historical touches. Scholars can easily define to which epoch they refer. The "Orientalisms," the "Hebraisms in Greek," plainly point to the origination of certain books.

The author of *Old Faiths in New Light*, p. 42, says "the literature of Greece is not more thoroughly Grecian, the literature of the age of Elizabeth is not more genuinely English, than the Old Testament is thoroughly and genuinely the literature of the peculiar people, bearing upon it the unmistakable stamp of the Semitic genius. The unhistorical interpretation of Scripture is as childish as an unastronomical view of the sky."

Eminent scholars claim that St. Paul's epistles have the peculiarity of dictated letters, and it is plainly to be noted that the later epistles of St. Paul have an increased spiritual view, but from earlier to later writings he was human and all the more genuinely Paul.

(6) Message Bearers. The New Testament writers quote at will from the Old Testament; sometimes from the Septuagint, sometimes from the Hebrew. They change the manner of wording, but the original meaning is never lost. The inspired writers only claim to be the message bearers, thus revealing to men the Divine presence in them of the Holy Spirit. St. Paul acknowledged his human dependence when he met the elders of the Ephesian church at Miletus, on his way to Judæa, as he said afflictions and bonds awaited him, but what particular trouble was to befall him at Jerusalem he did not know (Acts xx:22, 23).

All the more inspired was he for the moments of forgetfulness he had spoken of in 1 Cor. i:16.

It brings the Bible infinitely nearer to us, as we are convinced of the connecting link—the human element—in the Divine human book (*The Human Element in the Bible*, Rev D. W. C. Huntington, *Chron. Thought*, June, 1892). (See *SCRIPTURE, HOLY; INSPIRATION.*)

7. *The Bible and Scientific Research.*

The scientific man by no means ignores the Bible. He recognizes it as a factor not to be overlooked. No one can deny that the facts recorded in its pages have been a stimulus to research during many past centuries.

(1) Historical and Literary Grounds. Not only have the books of the New Testament been placed upon strictly historic and literary grounds, so their contents may be no longer regarded as mythical, but also the facts recorded in the Old Testament are taking their places among the materials which the historian of antiquity must digest and reckon with.

Egypt and the East are rapidly yielding up their secrets, archæology and linguistic lore are adding their convincing proofs, and all seems confirmatory of the genuineness and antiquity of the Bible narrative.

(2) Science and Faith. The scientific man no longer regards his own conclusions as final; he asks the question whether evolution is a final law? The question of questions is, whence comes the stream of life and the tendency to evolve or develop? Is it from above or from below? It is manifest to everyone who thinks at all that God must be reached in some other way than by the telescope or the microscope. The tendency of study and research seems hopeful and an assur-

ance is felt that scientific men have not dropped their belief in Christ, in the Bible and in God. The scientific man is increasingly conscious of the limitations of his powers and functions. Specialization is the order of the day.

Physical science is itself only a specialized branch of universal science. Men no longer hunt for the philosopher's stone, for the secret of the renewal of youth, or for a method of attaining perpetual motion. The investigator of nature has ceased to look for power, and is content with process. He does not peer into a gland with his microscope in the hope of finding *ego* there. Intent on the secret of the origin of life, he has given up the idea that the living proceeds from the non-living without the intervention of preceding life.

(3) **Illustrations.** The story of the flood is to him a matter of serious study. The student of comparative philology is prepared to detect in the simple story of Babel some strange intervention, which may account for the remarkable divergence of human language. The crossing of the Red Sea is now regarded as a fact, not fiction. The ancient Biblical law of heredity has emerged as a scientific discovery.

Parthenogenesis is a familiar topic to the naturalist, and perhaps supplies an illustration of one of the most mysterious facts of Christianity, whilst another mystery—that which concerns the Triune God—may at least be symbolized by the presence of several sense centers in one organism in what are usually regarded as among the most primitive kinds of animated life.

One is inclined to ask: Is evolution a law? Is it final? Or is it an *ad interim* speculation, helpful and suggestive, and calculated to lead up to something which may have more of finality about it? There is a tendency in Bible readers to disregard the processes of nature on the ground that the Scriptures claim all nature as under direct Divine administration; and there is a counter tendency of science to economize the Divine action to the uttermost, to push it back into the region of the prehistoric and mythical, whence it fades from view altogether. A careless student might imagine that by the discovery of the law called conservation of energy there was neither room nor need left for God in the universe. But those who first announced this law did not drift to an atheistic conclusion. The more one speculates on these things the more one sees that conservation of energy simply means conservation of physical energy, and only applies to one side of existence, the same being the case with the earlier discovery of the correlation of the physical forces and its offspring, the continuity of physical force.

The substitute for creative action is automatic action. But automatic action, which in its true sense is as old as the Greek Testament, by no means dispenses with a preceding intelligence and force.

All machinery, even the machinery of the universe, is the product of intelligence and of power.

(4) **Results.** We are thus led to a more full apprehension from a strictly scientific point of view of the mental and spiritual side of human nature.

We come to believe that every human being is on the border of two worlds; he belongs to both, and both belong to him. He is the true meeting-place between them.

Another desideratum is a free and full historical inquiry into the original nature and position of man. Whilst the tendency of geology is to reduce the time needed for man's first appearance to a comparatively modern period, the archæologist

is pushing up the age of literature and civilization until it is almost within sight of the era of primeval man.

It would be strange if, after all, the earliest evidences of the existence of man should point to a time when the traces of his mental powers were particularly conspicuous. And yet such a conclusion is within the bounds of possibility.

It is, to say the least, conceivable that the special force which caused the first real man to be—whether that force worked through slow gradations or in the twinkling of an eye—may have prepared him for his unique position as a master upon earth by making him inventive and adaptive, long-lived and strong, to a degree which we cannot now easily comprehend.

The materials in the hand of the anthropologist are not as yet sufficient for the solution of this problem, but it is an intensely interesting one, and must be kept steadily to the front in the present century.

Nor is it to be forgotten that we are in the midst of a geographical discussion as to the position of Paradise; whilst the last word has not been said on the original language of man, and on the dissemination of primitive written characters in their simplest forms, east and west.

The exploration of ancient cities is being rapidly reduced to a science, thanks in a large degree to the unwearied enthusiasm and patient skill of Prof. Flinders Petrie, Prof. Sayce, Prof. Hilprecht and others. They have shown that what geological strata are to the pre-human period, eighty layers of pottery are to the historical human eye, and to read their message rightly is as much a branch of science in its true, wide sense as is the interpretation of the fossil remains beneath our feet.

(5) **A Living Book.** As the scientific student sees a great deal more in nature than the casual observer, so does the student of archæology find increasingly that the Bible is a living book. Its vivid historical and local coloring makes it what no other collection of sacred books even professes to be.

There are also phenomena in the Bible, such as its way of putting things, its selection of topics and its systematic tracing of everything back to the First Cause, which are replete with interest and philosophy.

Its statements concerning natural phenomena need to be interpreted with extreme accuracy, both on their positive and negative side, whilst the scribes of marvels it records are to be read alongside of its theology and its central teaching, and not as a collection of isolated curiosities or fables. They are signs, and the thing signified by them takes us to the very heart of the Creator. (See De Quincey's *Essays on Miracles*.) If nature must be studied as a whole, so must the Bible.

It is a collection of books by writers who unwittingly contributed to a scheme the key to which is to be found in one historical Personage. To discuss the books without reference to the Personage is like anatomizing a body without reference to its head. We can hardly expect the scientific man in the ordinary sense of the term to study the Bible scientifically unless the theologian does so.

(6) **The First Cause.** The greatest desideratum of all is that theism should be approached with steady steps from two sides, the Biblical and the scientific. Every thoughtful person must understand that the instruments of science cannot discover God. Evidences of his handiwork appear in nature, but he has better means of revealing himself to man.

The forces and processes of the material universe do not affect His nature or touch His being. Space and time, which are very warp and woof of our existence, are not to Him what they are to us. It is to human nature—its most spiritual part—that we must turn if we desire to catch even a whisper of His real nature.

"Show me thyself," said a bishop of Antioch more than seventeen centuries ago, "show me thyself, and I will show thee God." Here, then, is a call to the man of science. If the existence of a planet can be inferred from the movements of other bodies, may not the existence of the Great Spirit be gathered from certain perturbations of the human spirit?

At times we stand abashed and silenced as we realize that there are vast regions of existence of which we know next to nothing. I do not speak of the stellar but of the spiritual heavens.

The Bible possesses a uniform system of psychology, of morals, and of metaphysics. Its writers are convinced that we live on the borders of two worlds whose laws are analogous—that the material world is a nursery for the spiritual. We should have a more careful inductive survey of the special phenomena of the universe as detected in human nature and revealed in certain phases of human consciousness, and especially in the will. May not scientific men look into this spiritual world? Do they not recognize psychology as science? May they not investigate on scientific principles its immaterial side, where three empires meet—the psychological, the ethical, and the spiritual? Both parties now recognize the impassable gulf in nature between body and soul, and both agree that these two are marvelously blended into one in human life. (See *Scientific Research and Biblical Study*, by the Rev. Canon R. B. Girdlestone, M. A.; *Jour. of the Transactions of the Victoria Institute*, vol. xxix, p. 25, sq.).

8. *The Bible and Modern Scholarship.*

Modern scholarship is active in every field of letters, and text-books of only five years ago are already considered antiquated. Whole systems of thought succeed each other with wonderful rapidity.

The researches of later science are demonstrating the unity of the physical universe in its widest extent, and also the identity of the laws which govern it; and the unity of the Divine method in the realm that we know is strong presumption of the same method in the region which lies beyond our knowledge. The Bible is not exempt from the universal spirit of investigation; the book is still under fire to even a greater extent than during the centuries that are gone, but it comes out triumphant from every fair inquiry, however searching it may be.

The Old Testament as we have it since before the time of Christ, and the New Testament since the first century after Christ, have remained practically unchanged. Here we have the work of men, whatever may have been their names, who, *if they are to be judged by their productions*, have a right to be called inspired. So much at least is beyond the reach of successful contradiction, but we must recognize also that these books have a history, and in order to understand the Christian Church, we must go back to the New Testament, and there we shall find that these writings partake largely of the thought of the Old Testament, and that they are in a sense the product of that book.

Here we are met with the school called Higher Criticism, and the distinguishing features for which it contends are the emphasis of the

doctrine of development, and the changing of the central point of ancient history from Moses to the prophets. The activity of the prophets, however, presupposes the Mosaic system, not only as an historical movement but as a legal foundation for the commonwealth of Israel.

The Bible contains a record of the continuous revelation of God and His dealings with mankind. It gives an illustration of the processes by which God is lifting man upward, and also the method by which the Father has adapted Himself to the partial comprehension of His children in bringing His revelation down within the limits of their understanding.

(1) *Archæology.* The age preceding that of the prophets is full of interest, and the research of the nineteenth century has brought it to a great extent within the range of our vision. The spade of the explorer and the enthusiasm of scholars who have devoted their lives to the deciphering of cuneiform texts, have given us an inside view of social life, not only in ancient Egypt, but also in the early days of the old Assyrian kings. It is not many years since it was claimed that the Assyrian rulers who are spoken of in the Old Testament were purely mythical. But the names have been found graven upon corner stones or they have been deciphered on pages of clay which have been recovered from buried libraries, and lo! we have nearly a complete list of Assyria's monarchs already verified.

The question has often been asked whether the story of the Deluge is true. But a wider knowledge of history, and a further search into the pages of clay have taught us that every people have their tradition of a great flood, showing that the survivors of that event handed down the story from one generation to another. The Assyrian account was found in the library of Asur-bani-pal, after the accumulation of centuries had been removed, but it was so covered with myth and fable that it might have passed for legend if it had been unsupported by other records.

Early tradition also gives to a greater or less extent the story of Creation and the disobedience of man, but it is only in the Bible that we find the simple history of these things. This book tells us of "the beginning," so far as a knowledge of this beginning pertains to the welfare of man, and so far as it is consistent with a progressive revelation.

The great facts which have been recorded in Hebrew and Christian history have been sustained by close investigation. These records have been shown to contain truth and not fiction.

(2) *Practical Application.* But truth is of little value unless it is practically applied, and hence the teachings of the Scriptures could never have won and held their place in human thought unless they had been to a greater or less extent embodied in the lives of those who believed them. Whatever may have been the names of these men there must have been such a character as Moses; there must have been an Abraham and a David, as also there were such men as the prophets.

The late Professor Dillman of Berlin testified as follows: "The books of Moses admit of no explanation except on the supposition of a preparatory pure type of religion, such as according to Genesis belonged to those fathers; and such a higher form of religion of necessity presupposed personal agents or standard bearers." (*History of the Hebrews*, vol. i, p. 240.)

These standard bearers were like sentinels along the line of humanity, from the beginning of human history down to the followers of the

Nazarene, and the witnesses both before and after the Christ are the embodiment of a Divine revelation, which discloses an unchanging purpose from the foundation of the world to win men to truth and righteousness.

In the Old Testament we find God making appeals to beings who are capable of moral and intellectual response. In it, as in that later revelation of Himself, Jesus of Nazareth, we find the mingling of the Divine with the human element—in this, as in the Christ, we have the self-witnessing revelation of which the crowning evidence is the response of the human heart.

Men believe in Christ because through him God speaks directly to them—because His life and His mission fill a place in the great hungry heart of humanity which no other could ever fill. In like manner they recognize God's voice in the teachings of the Book; they recognize His hand in the leadership of the world's moral forces and they surrender themselves to the loving influence of the Father.

Thus, the books of the Old Testament lead up to the full revelation of the Christ. They are Messianic in a large sense of that term, and those who have come to know the Master gladly obey His injunction to "Search the Scriptures . . . for these are they which testify of me." (See *The Bible in the Conditions Created by Modern Scholarship*, by Henry A. Stimson, *Bib. Sacr.*, April, 1900, p. 366 sq.)

9. *The Bible Not Outgrown.*

The general law controlling the productions of the human intellect is to the effect that they must soon be outgrown and superseded by something else. The uninspired literature of antiquity has all been lost except the clay pages which are found beneath the foundation stones of buried cities. The most of the classical works of Greece and Rome have been saved from complete oblivion only by the allusions of later writers. Pliny wrote twenty books of history, but not one of them can be obtained to-day. There were one hundred and thirty comedies written by Plautus; only twenty are left. The most of Menander's writings are lost. Euripides wrote a hundred dramas, and they are all gone but nineteen, Æschylus produced a hundred dramas and only seven are left. Varro wrote the biographies of seven hundred Romans, but not a fragment of this great undertaking remains. Thirty books of Tacitus are lost. Don Cassius wrote eighty books; only twenty remain, and Berossus' history is all lost.

The books of the Bible, however, have survived the wars of the ages and the storms of criticism. Marcion, who was expelled from the church for his wickedness, incidentally gives a catalogue of the books of the Bible, and that list, which was given in the second century, and that, too, by the hand of an enemy, is the same which we have to-day. Not only literary works, but scientific productions also are seen to be temporary. Indeed whole accepted systems of science are rapidly supplanted by new theories.

No system originating in the human intellect can secure the full approval of succeeding ages, and this rule applies especially to human religions. The religion of Buddha was an improvement upon that of the Brahmans, but the present condition of China shows that the theories of Buddha and Confucius have long since passed beyond their usefulness. The inability of China to make any moral progress is shown by the ruthless massacres which even to-day are staining the pages of her history. Such is her cruelty

and such her barbarism that the presence of all the great powers of the world is required within her borders.

Mohammedanism at least flung the banner of theism into the face of idol-worshippers, but it rejected the only Teacher who ever came into this world for the salvation of men, and it has long since ceased to have any influence for good; it has been outgrown and is rejected by the intelligent portion of humanity. It is still fostered in Turkey and the whole land shows the results. Her industries are discouraged, the property, liberty and life of her citizens are in constant danger. The red hands of massacre seem to be restrained only by fear of the civilized nations.

The history of Islamism, like that of Brahmanism, Buddhism and Confucianism, is that of rise, progress and decline. Their vitality is exhausted. Their votaries can make no further progress while under their influence, and if they would improve they must renounce the institutions of their fathers.

(1) **Progressive.** Biblical teaching, however, instead of holding the seeds of decay, has been progressive. Beginning with the object lessons of ceremonial law, every sacrifice pointed toward the "Lamb who was slain from the foundation of the world." Every prophet pointed to him, and when he came into the world and the predictions of the prophets were verified by history, he used "the law and the prophets" as the basis of his teachings. The principles which he advocated and urged upon the sons of men can never know decay. The religion of the Bible has confronted the old civilizations and outlived them all. It has met with the magicians of Egypt and the astrologers of Babylon; it has withstood the paganism of Rome and of northern Europe; it has come out triumphantly after the attacks of French, English and American infidelity.

Occultism cannot feaze it; "science, falsely so-called," cannot drown it. The book upon which it is founded lives to-day in three hundred languages, coming to four-fifths of the human race in their own tongue. Three hundred million copies of it are in existence, and still the many-tongued press is busy in responding to the constant demand.

It is itself calculated to awaken thought; it frankly challenges a full investigation of its claims. With nothing to fear and nothing to hide, it exhorts its own adherents to examine the foundations of their faith and to be able to give to every man a reason for their hope. Its great doctrines are of such a character that when the mind apprehends them the mental faculties are stimulated and provoked to inquiry.

(2) **Opposition.** The book has always met with opposition because it opposes the selfish instincts of humanity. It denounces vice in all its forms; it is a foe to crime and oppression—nay, it even denies to its adherents a life of ease and pleasure. It demands the denying of self for the good of others and commands its followers to "deal justly and love mercy" at whatever cost or sacrifice. It attacks the sins of governments as well as those of individuals and declares that "the nation and kingdom that will not serve thee shall perish—yea, those nations shall be utterly wasted."

(3) **Meets the Human Need.** The book has not been superseded. The stern denunciations of sin which were delivered at the foot of the quaking Mount are still in force. The Psalms of David are still the comfort of wounded hearts, and they still voice the triumphant peans of victory.

The teachings of the Christ will never be outgrown. Untold millions of aching hearts have been comforted by his words. In trial and tribulation, in sickness and in sorrow, in prison and torture, the loyal heart still turns to him, and never turns in vain.

If the nineteenth century has been more remarkable for intellectual activity than any other that the world has ever seen, the nineteenth century has also done more than any other to spread a knowledge of the Bible in all parts of the world.

Every human system has arisen because it was in harmony with the tendencies of the age, but the religion of the Bible has come into being in opposition to the natural tendencies of every age. It has carried the symbol of the cross into the places of darkness and cruelty and it shall bear the banners of victory when "there shall be no more death, neither sorrow nor crying, neither shall there be any more pain, for the former things are passed away." (See the *Divine Origin of the Religion of the Bible*, by the Hon. James Monroe, LL. D., *Bibliotheca Sacra*, April and October, 1896.)

10. Various Versions and Translations.

Although the revelation of God's truth was first given to the race in Hebrew and Greek, it was designed to be extended to people of every tongue and nation. This truth was very early felt and acted upon by devout men. Even in the Old Testament times, as appears from Nehemiah viii:8, the sacred Hebrew books were explained in Chaldee for the benefit of the Jews, who had lost the knowledge of their native tongue during their captivity in Babylon. The Greek version, called the Septuagint, was made before the Christian era. (See SEPTUAGINT.) A translation was made directly from the Hebrew into the Syriac. This version, called the Peshito, probably dates from the second century. At a very early period a Latin version was made from the Septuagint, and the Latin Vulgate of Jerome was made A. D. 385-405. This version was declared by the Council of Trent in 1563 to be of equal authority with the original Scriptures. The German Bible now in use, the translation of Martin Luther, was first published in 1522, but before his time fourteen editions of the entire Bible had been printed and circulated in Germany. A French version made by Le Fèvre was published at Antwerp in 1530. Other French versions have been made by Olivetan (a cousin of Calvin, who improved the translation), by Martin Ostervald, and by De Sacy. A Dutch version was ordered by the Synod of Dort, in 1619, which has been regarded as "the most accurate of all present modern versions."

(1) **Early English Translations.** The story of the English Bible is one of the most remarkable in all the history of the Book of books since the manuscripts left the hands of the inspired writers.

In a book entitled "Our English Bible and its Ancestors," the Rev. Mr. Walden says:

"The experience of the Bible in its endeavors to reach the people has its best and most heroic history in the case of the Anglo-Saxon mind and of the English tongue. The spirit of Anglican independence of the Roman rule has in this its most striking illustration, and the annals of the Reformation in England are bound up and identical with the annals of the English Bible. There would seem to have been a remarkable tendency in the early English Church, before Roman interference set in so strongly, to bring the Scrip-

tures to the common people. In the great British collections, the libraries of Oxford, of Cambridge, and of the British Museum, many vestiges of this tendency may be found in curious fragments of Anglo-Saxon and Anglo-Norman versions—rude and imperfect attempts to get portions of the Bible into the vernacular. The oldest of these, attributed to Cædmon, a monk, is the Bible history paraphrased in the alliterative verse of Anglo-Saxon poetry. The Venerable Bede, who always wrote in Latin, is yet associated with a version of St. John's Gospel in his native tongue. A Psalter is extant, said to be by a Saxon bishop of the seventh century. A few chapters of Exodus and the Psalms were translated by King Alfred, who is recorded to have said that he desired 'all the free-born youth of his kingdom should be able to read the English Scriptures.' There are three versions of the Gospels and some fragments of the Old Testament referred to the ninth and tenth centuries. Three or four more of the Gospels are assigned to the eleventh and twelfth centuries. Then, in the thirteenth century, a translation into Norman French of the whole Bible by an unknown hand, and various fragmentary versions of the Psalms and other portions of the Bible, seem to have appeared here and there; all in uncouth, grotesque, and unintelligible lettering to the modern eye, but hungrily read by the educated among the people of those passing centuries." But the knowledge of letters at that time belonged only to the clerical and educated classes. The common people had no share in the word of God in their vernacular. When Wycliffe began his great work of translating the Scriptures, he declared that he found nothing extant to help him. The facts in the following account of succeeding translations have been derived largely from Dr. Schaff's *Dictionary of the Bible*."

(2) **John Wycliffe's Translation.** John Wycliffe lived in the fourteenth century, in the dawn of English literature. He was contemporary with Chaucer the poet and Mandeville. The great seats of learning, Oxford and Cambridge, in his day became, in a measure, worthy the name universities. Oxford is said to have had thirty thousand students in the beginning of the fourteenth century. But printing was not yet discovered, and all books had to be multiplied by the slow process of writing them out by hand. The work of translation occupied Wycliffe many years.

The Rev. Dr. Krauth, in "Anglo-American Bible Revision," writes of him: "Called to the work of reformation in faith and life, he saw, with the divine instincts of his mission, that nothing but the true rule of faith and life could remove the evil and restore the good, and that the restoration would be permanent only in the degree to which every estate of the church should be enabled, by possession of the rule, to apply and guard its teachings. He appealed to the Word, and to sustain his appeal translated the Word. He appealed to the people, and put into their hands the book divinely given to shape their convictions. The translation of the Scriptures as a whole into English first came from his hands or under his supervision. It was finished in the last quarter of the fourteenth century. It was made from the Vulgate. Even had Wycliffe been a Greek and Hebrew scholar, it is doubtful whether he could have secured texts of the sacred originals from which to translate." His version appeared in 1380, and was eagerly read. The Archbishop of Canterbury threatened the "greater excommunication upon any one who should read

Wycliffe's version or any other, publicly or privately." Nearly half a century after his death the bones of Wycliffe were dug up and burned, by order of the Pope, and his ashes thrown into the Avon:

"The Avon to the Severn runs,
The Severn to the sea,
And Wycliffe's dust shall spread abroad,
Wide as the waters be."

(3) **William Tyndale's Translation.** The method of printing from movable type was discovered in the fifteenth century, and rendered efficient service in disseminating the translations of Scripture subsequently made. William Tyndale was born in 1484, and was burnt at the stake as a martyr to religious liberty, October 5, 1536. He determined "to cause the boy who driveth the plow to know more of the Scriptures" than had been known by those who pretended to be learned divines. Luther was his contemporary, and it is said that the two great translators met at Wittenberg. Tyndale's translation appeared at Worms in 1525, and was circulated in England in 1526.

(4) **Miles Coverdale (1488-1569)** is the next name upon the list. His translation of the entire Bible appeared October 4, 1535, prefaced by a fulsome dedication to the king, Henry VIII. In order to render the volume more attractive, it was illustrated with several wood cuts. It was avowedly not made from the original tongues, but from three Latin and two German translations. The Old Testament was based chiefly on the Swiss-German (Zurich) Bible, and the New Testament on Tyndale, although with many variations. This translation had but little influence upon the so-called Authorized Version.

(5) **The "Thomas Matthew" Bible** was a compilation, although not a mechanical one, under this assumed name, made by John Rodgers (1505-55), Tyndale's friend—who is famous as the first Marian martyr, burnt at Smithfield, February 4, 1555—from the above-mentioned translations of Tyndale and Coverdale. It was published in London, 1537, but probably printed by Jacob van Meteren in Antwerp. The publishers, Messrs. Grafton & Whitechurch, in some way interested Archbishop Cranmer in this edition who, through Crumwell, Earl of Essex, procured a royal license for it, and this Bible became the first authorized version.

(6) **Richard Tavener (1505-75)** issued a revised edition of the Matthew Bible in 1539, but it never was widely used. Its sale may have been stopped by the publication of the so-called Great Bible.

(7) **The "Great Bible,"** sometimes called Whitechurch's, after the name of one of the printers, or oftener "Cranmer's Bible," from the mistaken idea that he was the editor of it, was published in London, 1539. Its name came from its size; its pages are fully fifteen inches in length and over nine in breadth. Its text is Matthew's, revised by Coverdale. It was the first edition which printed in a different type the words not found in the original. It also derives interest from the fact that the Scripture sentences in the English Prayer-book in the Communion Service, in the Homilies, and the entire Psalter are taken from it.

In 1540 appeared the Cranmer Bible, so-called from the archbishop's prologue, but in fact only a new revised edition of the Great Bible of the previous year.

(8) **The Geneva Version (1560)** was made by the refugees from the Marian persecution, principally by William Whittingham (1524-89), whose wife was Calvin's sister. But the Genevan Bible

must not be confounded with the *New Testament* which appeared there in June, 1557, the fruit of the editorial labors of Whittingham. The Genevan Bible was begun the January following. The New Testament had for the first time the division of verses (following the Greek of Stephens, 1551), with the numbers prefixed. It had also characteristic marginal notes, and marked by *italics* the words supplied. ". . . It became at once the people's book in England and Scotland, and it held its place not only during the time of the Bishops' Bible, but even against the present Authorized Version for at least thirty years. It was the first Bible ever printed in Scotland (1576-79), and it was the cherished volume in all Covenanting and Puritan households." (Eadie, *The English Bible*, vol. ii, p. 15.)

(9) **The Bishops' Bible.** In the early part of Queen Elizabeth's reign the Great Bible was allowed to be read in the churches as the authorized version, but the Genevan edition was a formidable rival, greatly excelling it in popularity, and besides in accuracy. Thus it came about that a revision was demanded, and this Archbishop Parker (1504-75) was anxious to make. He began it about 1563-64, having distributed the work to fifteen scholars, eight of whom were bishops, and therefore the Bible was called "The Bishops' Bible," and the book was published in 1568. It was a revision of the Great Bible, which in turn was based on "Matthew's" recension of Tyndale. An effort was made to secure for the Bishops' Bible the royal sanction, but ineffectually. Convocation, however, passed a decree in 1571, "that every archbishop and bishop should have at his house a copy of the Holy Bible of the largest volume as lately printed in London, and that it should be placed in the hall or large dining-room, that it might be useful to their servants or to strangers." The order applied to each cathedral, and, "so far as could be conveniently done, to all the churches." The Bishops' Bible supplanted the Great Bible, but could not the Genevan, because that was widespread among the people. The most important fact in its history is that it was made the basis for the recension which resulted in the King James Version, which has been before the people as the authorized version for two and a half centuries.

(10) **The King James Version.** This version has so long held undisputed sway that most of its common readers can scarce think of any other as the true Bible. And all those who read editions issued from the presses of Great Britain are familiar with the dedication:

TO THE MOST HIGH AND MIGHTY PRINCE
JAMES,
By the Grace of God,
KING OF GREAT BRITAIN, FRANCE, AND
IRELAND,
DEFENDER OF THE FAITH, ETC.,
The Translators of the Bible wish Grace, Mercy,
and Peace, through JESUS CHRIST our
Lord.

This piece of fulsome adulation has very happily disappeared from most of the Bibles issued from the American press.

A recent article in the "North American Review" sketched the beginnings of this important movement:

"The authorized English version, so-called—although it was never properly authorized either by king, or parliament, or convocation, but simply by usage—had its birth in the Hampton Court

Conference, held in January, 1604. In that noble palace, built nearly a hundred years before by Cardinal Wolsey, on the banks of the Thames, and presented to Henry VIII, there assembled in the presence of King James, and at his invitation, Archbishop Whitgift of Canterbury, Bishop Bancroft of London, seven other bishops, and eight deans, on the part of the conservative conformists, and four leaders of the progressive Puritan party, with the learned Dr. John Reynolds of Oxford, to confer about the burning questions which agitated the then undivided Church of England. The king acted both as moderator and judge, and lost no chance to display his learning and wit during the debate. He rudely rejected every petition of the Puritans, using as his final argument: 'I will make them conform themselves, or else I will harry them out of the land, or else do worse.' By doing worse, he meant, 'just hang them, that is all.' This was his short method with dissenters.

"In one point, however, he yielded to the obnoxious Puritans, notwithstanding the protests of the bishops. This was the revision of the Bishops' Bible, which had, from Queen Elizabeth's time, been used in all the churches of England, while the Geneva Bible of 1560 was the favorite version of the common people in their families.

"Dr. Reynolds, the real mover of the enterprise, is described by Anthony Wood as a prodigious scholar, who 'had turned over all writers, profane, ecclesiastical, and divine, all the councils, fathers, and histories of the Church.' He was commissioned as one of the translators of the company which had in charge the prophetic books of the Old Testament; but he died in May, 1607, four years before the publication of the work.

"The king was not slow in making preparations. In July of the same year he commissioned fifty-four dignitaries and scholars, who had been selected by some unknown but, no doubt, competent authority, to carry out the revision, and directed Bancroft, who in the meantime had become archbishop of Canterbury, to make provision for the compensation of the translators by church preferment. He divided them into six classes, who were to meet at Westminster (London), Cambridge, and Oxford, two classes in each place."

Although the number of translators appointed was 54, only 47 were actually engaged in the work.

The following are the rules which were composed to govern them in their labors:

"(1) The ordinary Bible read in the Church, commonly called 'The Bishops' Bible,' to be followed, and as little altered as the truth of the original will permit.

"(2) The names of the prophets and the holy writers, with the other names of the text, to be retained as nigh as may be, accordingly as they were vulgarly used.

"(3) The old ecclesiastical words to be kept; viz.: the word *church* not to be translated *congregation*, etc.

"(4) When a word hath divers significations, that to be kept which hath been most commonly used by the most ancient fathers, being agreeable to the propriety of the place and the analogy of the faith.

"(5) The division of the chapters to be altered either not at all or as little as may be, if necessity so require.

"(6) No marginal notes at all to be affixed, but only for the explanation of the Hebrew or Greek words which cannot, without some circumlocution, so briefly and fitly be preserved in the text.

"(7) Such quotations of places to be originally set down as shall serve for the fit reference of one Scripture to another.

"(8) Every particular man of each company to take the same chapter or chapters; and having translated or amended them severally by himself where he thinketh good, all to meet together, confer what they have done, and agree for their parts what shall stand.

"(9) As any one company hath despatched any one book in this manner, they shall send to the rest to be considered of seriously and judiciously; for His Majesty is very careful in this point.

"(10) If any company, upon the review of the book so sent, doubt or differ upon any place, to send them word thereof, note the place, and withal send the reasons; to which if they consent not, the difference to be compounded at the general meeting, which is to be of the chief persons of each company at the end of the work.

"(11) When any place of special obscurity is doubted of, letters to be directed by authority to send to any learned man in the land for his judgment of such a place.

"(12) Letters to be sent from every bishop to the rest of his clergy, admonishing them of this translation in hand, and to move and charge as many as being skillful in the tongues, and having taken pains in that kind, to send his particular observations to the company either at Westminster, Cambridge, or Oxford.

"(13) The directors in each company to be the deans of Westminster and Chester for that place, and the king's professors of Hebrew and Greek in either university.

"(14) These translations to be used when they agree better with the text than the Bishops' Bible: Tyndale's, Matthew's (Rogers'), Coverdale's, Whitchurch's (Cranmer's), Geneva.

"(15) Besides the said directors before mentioned, three or four of the most ancient and grave divines in either of the universities, not employed in translating, to be assigned by the vice-chancellor, upon conference with the rest of the heads, to be overseers of the translations, as well Hebrew as Greek, for the better observation of the fourth rule above specified."

How closely these rules were followed it is impossible to say. A passing remark of Selden furnishes nearly all that can now be known of what may be termed the private history of our English Bible: "The translation in King James' time took an excellent way. That part of the Bible was given to him who was most excellent in such a tongue, and then they met together, and one read the translation, the rest holding in their hands some Bible, either of the learned tongues, or French, Spanish, Italian, etc. If they found any fault, they spoke; if not, he read on."—*Table Talk*. When the revision was completed, three copies of the whole Bible were sent (to London)—one from Cambridge, a second from Oxford, and a third from Westminster—where they were committed to six persons, two from each company, who reviewed the whole. This final revision lasted nine months. The work was at last given up to the printer, Robert Barker; the proofs were read by Dr. Thomas Bilson, bishop of Winchester, and Dr. Myles Smith (appointed bishop of Gloucester in 1612).

The first edition of the new revision bore the date of 1611. The printing of the Bishops' Bible was soon stopped, but the Genevan Bible continued to be used until about the middle of the seventeenth century, when King James' version gained general acceptance, and has so continued to be the Bible of the more than a hundred mil-

lions of English-speaking people. The beauty of its style has drawn praises from men of most diverse tastes. Mr. Huxley says: "It is written in the noblest and purest English, and abounds in exquisite beauties of mere literary form."

Dr. F. William Faber says: "It lives on the ear like a music that can never be forgotten, like the sound of church-bells, which the convert hardly knows how he can forego. Its felicities often seem to be almost things rather than mere words. It is part of the national mind and the anchor of national seriousness. The memory of the dead passes into it. The potent traditions of childhood are stereotyped in its verses. The power of all the griefs and trials of a man is hidden beneath its words. It is the representative of his best moments; and all that there has been about him of soft, and gentle, and pure, and penitent, and good speaks to him for ever out of his English Bible."

Rev. Dr. Krauth, one of the Revisers, writes: "The Bible of 1611 encountered prejudices and overcame them; it had rivals great in just claims and strong in possession, and it displaced them; it moved slowly that it might move surely; the Church of England lost many of her children, but they all took their mother's Bible with them, and, taking that, they were not wholly lost to her. It more and more melted indifference into cordial admiration, secured the enthusiastic approval of the cautious scholar, and won the artless love of the people. It has kindled into fervent praise men who were cold on every other theme. It glorified the tongue of the worshiper in glorifying God, and by the inspiration indwelling in it, and the inspiration it has imparted, has created English literature."

Rev. Mr. Walden beautifully says: "The English Bible, in its present form two hundred and sixty years old in this year of grace, given to the public when Shakespeare, and Bacon, and Raleigh, and Ben Jonson, and Drayton, and Beaumont, and Fletcher were living to read and admire, the richest formation of that great and plastic era of our language, the 'bright consummate flower' of saintly labor and scholarly genius, the wonder of literature, coming down with the works of Shakespeare, and, like them, preserving to us the wealth and force of the Saxon tongue—our mother English in its simplicity and perfect beauty—the picturesque structure of an age now long gone by, already gray with antiquity, in whose familiar forms of speech the voices of our forefathers and kindred linger, and the inspiration of the Almighty seems to speak as with the majesty of an original utterance,—the English Bible has impressed itself with an almost overpowering authority upon the Christian heart of to-day, and is looked upon, in many cases, as if it were the actual production of the ancient scribe, and its pages are read and pondered over as if they contained the ultimate and unalterable expression of Divine truth."

It is hard to realize, without stopping to reflect, how long the King James' Version has been dominant. Its revisers were at their work when Jamestown, which claims the honor of being the oldest English settlement in America, was founded. The completed work was published in full nearly ten years before the Pilgrims landed on Plymouth Rock, in Massachusetts. Nearly the whole of American history has been written while the English Bible has remained unchanged. Shakespeare, Milton, Bacon, Bunyan, Newton, have added imperishable treasures to English literature. Two centuries and a half of scholarship have been concentrated upon every phase of

the divine Word. The time for a revised version of the Scriptures, therefore, came in the fullness of time.

(11) **The Revised Version.** In the preface to the Revised Version the translators say:

The revision of the Authorized Version was undertaken in consequence of a resolution passed by both houses of the Convocation of the Province of Canterbury, as has been fully explained in the Preface to the Revised Version of the New Testament, which was first published in May, 1881. When the two companies were appointed for carrying out this work, the following general principles, among others, were laid down by the revision committee of convocation for their guidance:

'(1) To introduce as few alterations as possible into the text of the Authorized Version consistently with faithfulness.'

'(2) To limit, as far as possible, the expression of such alterations to the language of the Authorized and earlier English versions.'

'(4) That the text to be adopted be that for which the evidence is decidedly preponderating; and that when the text so adopted differs from that from which the Authorized Version was made, the alteration be indicated in the margin.'

'(7) To revise the headings of chapters and pages, paragraphs, italics, and punctuation.'

In order to show the manner in which the Old Testament company have endeavored to carry out their instructions, it will be convenient to treat the subjects mentioned in the foregoing rules in a somewhat different order.

It will be observed that in Rule 4 the word 'Text' is used in a different sense from that in Rule 1, and in the case of the Old Testament denotes the Hebrew or Aramaic original of the several books. In this respect the task of the revisers has been much simpler than that which the New Testament company had before them. The Received, or, as it is commonly called, the Massoretic Text of the Old Testament Scriptures has come down to us in manuscripts which are of no very great antiquity, and which all belong to the same family or recension. That other recensions were at one time in existence is probable from the variations in the Ancient Versions, the oldest of which, namely the Greek or Septuagint, was made, at least in part, some two centuries before the Christian era. But as the state of knowledge on the subject is not at present such as to justify any attempt at an entire reconstruction of the text on the authority of the Versions, the revisers have thought it most prudent to adopt the Massoretic Text as the basis of their work, and to depart from it, as the Authorized Translators had done, only in exceptional cases. With regard to the variations in the Massoretic Text itself, the revisers have endeavored to translate what appeared to them to be the best reading in the text, and where the alternative reading seemed sufficiently probable or important they have placed it in the margin. In some few instances of extreme difficulty a reading has been adopted on the authority of the Ancient Versions, and the departure from the Massoretic Text recorded in the margin. In other cases, where the versions appeared to supply a very probable though not so necessary a correction of the text, the text has been left and the variation indicated in the margin only.

In endeavoring to carry out as fully as possible the spirit of Rules 1 and 2, the revisers have borne in mind that it was their duty not to make a new translation, but to revise one already existing, which for more than two centuries and a

half had held the position of an English classic. They have therefore departed from it only in cases where they disagreed with the translators of 1611 as to the meaning or construction of a word or sentence; or where it was necessary for the sake of uniformity to render such parallel passages as were identical in Hebrew by the same English words, so that an English reader might know at once by comparison that a difference in the translation corresponded to a difference in the original; or where the language of the Authorized Version was liable to be misunderstood by reason of its being archaic or obscure; or finally, where the rendering of an earlier English version seemed preferable, or where by an apparently slight change it was possible to bring out more fully the meaning of a passage of which the translation was already substantially accurate.

The New Testament revision was completed in 1880, just 500 years after the first English translation of the whole Bible by Wycliffe. By 1887 the whole Bible was revised. About one hundred of the ablest scholars of all denominations on both continents assisted in the laborious work of translation.

BIBLICAL THEOLOGY.

1. Introductory. Biblical Theology is based on the assumption that, as far as their outward form is concerned, the religious conceptions found in the Christian Scriptures are subject to the laws that govern the formation and growth of ideas in other spheres. It consists in the study, arrangement, and presentation of the religious ideas of the Bible in their chronological and genetic relations with one another and with their historical setting.

(1) Basal Assumptions. This definition puts Biblical Theology in connection, on the one side, with the science of religion, which has for its material all the religions of the world, and on the other with a circle of so-called theological sciences centered in and growing out of the canonical books of the Bible. As far as its affiliation with the science of religion in general is concerned, Biblical Theology is prepared to recognize that its subject matter has elements common to all the religions of the world. It is prepared, further, to concede that the preliminary stages of that growth of thought which it deals with run parallel with the stages of growth passed through by other religions. Still further, that these parallels also prepare the way for the final stage of that development which it aims to examine. But it claims a unique character and an authoritativeness for the religion of which it traces the growth and examines the exact significance. It does not consider it a part of its own function to validate this claim; it presupposes that it has been proved valid outside of its own sphere. It rejects as unscientific the presumption that the religion of the Bible is "one of the great religions of the world, nothing less, but also nothing more." (Kuenen's *Religion of Israel*, vol. i., p. 5.)

(2) With What Classified. As far as its relation to other theological sciences, based like itself, on the canonical Scriptures is concerned, it is to be classified with those of them that deal with history. It is a history of revealed thought in the process of revelation. It is allied to exegesis, as far as sound exegesis precedes and conditions it. It is allied to history of doctrine in as far as this traces the growth of a systematization of revealed truth after its original formation. It is allied to systematic theology in that this department correlates the facts of Biblical the-

ology with philosophical postulates and scientific conclusions. Biblical theology is contented with the narrower but more essential task of ascertaining the exact circumstances under which, and the forms in which, revealed thought emerges and flows within the period of its first appearance.

(3) A Modern Science. Biblical Theology is a modern science. It had its origin in a series of efforts to lead theological discussion into the use of Scripture texts in their proper historical sense. Under the stress of controversy the words of Scripture had come to be used without due regard to their true perspective and setting. A passage in Genesis was often made to serve the same end as one in the gospel of St. John. Various protests were made during the middle of the eighteenth century against this sort of usage, and out of these protests issued, in 1789, Gabler's Essay on the true distinction between Biblical and Dogmatic Theology. The true reason for the existence of Biblical Theology was given in this essay, as well as the principle that should govern it. The programme outlined by Gabler was taken up and carried out with varying degrees of fidelity to the original idea by a line of successors; and during the century that has elapsed since the publication of this essay, Biblical Theology has won its way into recognition as a legitimate and exceedingly valuable, even indispensable, theological science.

According to the natural divisions of the canonical Scriptures, Biblical Theology is generally treated under two heads: Old Testament Theology and New Testament Theology.

2. Old Testament Theology. A final and thoroughly satisfactory historical exposition of the religious ideas of the Old Testament presupposes a final theory of the order in which the books of the Old Testament were produced. Such a theory Biblical Theology cannot construct in its own right; it must receive it from Biblical criticism. But so long as there is neither absolute nor even proximate uniformity on this point in the field of Biblical criticism, the only course left for Biblical Theology is to mass the content of the Old Testament, and give it as a whole, without endeavoring to trace any development within it.

In the Old Testament dispensation two types of thought are discernible, which may be designated as the Mosaic and the Prophetic.

(1) Mosaic System. The Mosaic type or system is characterized by the emphasis it lays (a) on a political and social system of organization as a foundation for the true religious life; (b) on the moral code, and (c) on the ritual of worship. Of these the political system may be set aside here as the remotest from the purposes of theology, although in the Mosaic law it was most intimately related to the religious life of the nation.

(a) The moral aspect of the Mosaic system was embodied in the so-called Book of the Covenant (Exod. chaps. xx-xxiv), whose nucleus is the Decalogue. The construction of the Decalogue shows that the ethical life was intended to be rooted in and blended with the religious. Of the ten commandments, the first three refer purely and simply to man's relation to God; the fourth regulates the life of man, partly with reference to his duty to God and partly for its own sake, and the remainder refer to earthly and human relations; but they all derive their sanction from, and are calculated to promote, spiritual life.

(b) The ritual system of the Mosaic law is intended to express certain underlying religious ideas. The most important of these are the unity

of God, his spirituality, his omnipotence and omnipresence, and his special love for Israel, his covenant people. The aim of the ritual is the sanctification of the worshiper as a member of the covenant people. In order to secure absolute holiness, the worshiper was required to offer sacrifice to *Jehovah*, designed to represent, secure or preserve his normal relation to him. The primitive form of sacrifice round which the Mosaic ritual grew up was the *burnt-offering*, consisting of a bullock, a lamb or a pair of pigeons, according to the means of the worshiper. It signified complete consecration and adoration. The victim was brought to the door of the place of worship; the worshiper laid his hands on its head; it was slain, and the bones being broken it was completely burned. The next in importance of the sacrifices was the *peace-offering*, consisting of an animal taken either from the herd or from the flock, without blemish, male or female. It was intended to express or secure reconciliation with *Jehovah*. To this end an elaborate ceremony was provided for its performance.

The *sin-offering*, consisting of a young bullock or a male or female kid, was designed to expiate sins committed in ignorance by individuals or by the people.

The *trespass-offering*, consisting of a ram, was designed to expiate offenses against the rights of men. As an adjunct to animal sacrifices, the *meal-offering* was appointed, consisting of unbaked flour, baked loaves or roasted or parched ears of grain.

(c) For the offering of sacrifice the Mosaic ritual provided one special place, because its corner-stone was the unity of God and the unity of God's people. It provided, further, a special body of men organized into a hierarchy. A high priest was appointed to be the head of the hierarchy and perform the highest sacred functions. A priesthood and a ministry of lower rank, the Levitical, were assigned duties according to their order. Further, the Mosaic ritual provided a cycle of festivities and Sabbaths, designed by their regular recurrence to fix the worshiper in habits of devotion, and impress, as deeply as such ordinances can, the necessity of holiness. And in addition, the series of distinctions of clean and unclean in the matter of habit, food, and conditions of bodily health are calculated to keep constantly alive the rigid demand of God for perfect obedience to his law and conformity to his revealed character. The need of putting away sin was, further, particularly significant in the supreme acts of expiation which took place on the Day of Atonement.

(2) **Prophetic Type.** (a) Prophecy, as a feature of the religious life of Israel, is as old as the people itself. It is clearly understood to be the communication of the will of God to his people through accredited men, to whom he vouchsafes revelations by His Spirit. A prophet has a distinct and irresistible call; he is under the guidance of *Jehovah* and filled with His Spirit. Two stages are discernible in the history of prophecy, the first preceding the eighth century B. C., and the second extending from the opening of the eighth century to the end of the Old Testament period. These are distinguished from one another by clear characteristics. In the earlier stage, there is an approach to the vaticinations of the heathen; matters of private nature are referred to the prophet. In the latter, prophecy assumes a loftier tone; it is concerned only with the affairs of the kingdom of God. In the earlier, the prophets do not disdain to use physical force in carrying out their designs. In the second, moral suasion alone is used.

In the earlier, the prophet is called a seer, *rhooh*; in the later, he is a prophet, *nabhi*. The transition is noted in 1 Sam. ix:9, and indicates a passage in the mode of revelation from the vision or dream to the subconscious or intuitive process.

(b) The prophets always assume the being, unity, and spirituality of God, declaring all idols "not-gods." At first the relation of *Jehovah* to other peoples than Israel is not prominently in their minds, but it is defined gradually as one of dominion and absolute authority. The prophets also emphasize the eternity of *Jehovah*, and ascribe to him unlimited power and knowledge, but the attribute of God which above all others impresses them is his holiness. This is conceived of as his uniqueness, and made sometimes synonymous with his real divinity, his purity of essence. It issues in his relations with creatures, in the subordinate attributes of justice, truth, or faithfulness. The last of these is revealed especially in his fulfillment of all promises and persistence to Covenants. The goodness or mercy of *Jehovah* is also emphasized in the prayers and psalms of the period. As related to the world, God is the creator; he directs, controls, and overrules all the affairs of nature, the peoples of the earth; and the actions of individual men and even the trivial and incidental matters of life, such as the casting of a lot, are determined by him.

Jehovah has revealed himself to his people (a) in symbols, which, without representing him, suggest his attributes and indicate his presence. Such are the cherubim, described by Ezekiel, and the seraphim of Isaiah's inaugural vision. (b) Through his messengers or angels, who announce his presence, declare his will, and do his bidding. (c) In theophanies. He has come among men in the form of the creature, without thereby permitting them to think that his true form has been seen. And (d) his spirit or power is manifested in wonders or works of special providence.

(c) Man, in the thought of prophets, is a being capable of knowing, loving, and obeying *Jehovah*, a being with whom God enters into Covenant. The place of the individual in the scheme of the prophets is that of a member of the Covenant people of God; his mere membership secures for him the blessings of the covenant. He is not by nature in the normal relation with *Jehovah*, because he sins, incurs guilt, and is thus liable to punishment. Sin consists in alienation from *Jehovah*, it is a rupture of relations, and places man in the position of an enemy. All men are guilty of sin. Out of the human race *Jehovah* has chosen Israel to be a holy people; yet even Israel is prone to sin, has turned away from God, and must be purged by punishment. From the punishment due to the whole race and to Israel, God will exempt a portion of the chosen people, which the prophets call the Remnant. He will preserve this Remnant and use it as a nucleus of a new people.

(d) The Remnant is to be organized and ruled by the royal line of David. One special, individual king, the Messiah, shall lead it to the accomplishment of its glorious work. This is the servant of *Jehovah*, the head and representative of the true Israel. He is to arise out of a lowly environment, to be born at Bethlehem, to live as a peaceful and unostentatious prince, and to share with his people in their distress, yet bring them out of it by his vicarious sufferings.

(e) After the accomplishment of the work of the Messiah should come the great day of *Jehovah*, in which the enemies of God and of his people should be judged and punished according to their merits.

(3) **A Third Type** of thought is sometimes distinguished in the Old Testament and designated the **Wisdom Theology**. This type is characterized by breadth and intellectuality. It has the appearance of being addressed to all people and times. The prevalence in it of the intellectual element, culminating, as it does, in the personification of the reason under the name of Wisdom (the Hokmah) has fixed the latter word as its proper designation.

3. New Testament Theology. The theology of the New Testament is based on that of the Old. The Messianic hope of the old prophets is the connecting link between these two great portions of the Bible. The New Testament opens with the realization of this hope in the person of Jesus, and continues and closes with the transformation of the whole religious thought of the Old Testament by the assumption of Jesus Christ into it as its central principle and molding force. Thus arises a complete Christian system. The first stage in the evolution is the preaching of the kingdom of God by Jesus; the second, the universalization of the Messianic idea by the apostle Paul; and the third, the spiritualization of it by John.

(1) **The Teaching of Jesus.** (a) The kingdom of God as preached by Jesus was an order of things in which men should recognize their true relations to God, and enter into alliance with Jesus Christ by faith, constituting a new spiritual social organization.

This organization is properly called the kingdom of God, because God is recognized in it as supreme; but though it is constantly called a kingdom, God is with equal consistency called the Father of those who enter into it, and his paternal care is portrayed, and especially manifested in his constant watchfulness over them and his love for them.

(b) The place of Jesus himself in the kingdom is that of the Revealer of the Father. He is the Messiah foreshadowed in the Old Testament. But the Messianic idea is altered, broadened, and universalized in the new dispensation. It includes, besides the conception, brought over from its history, of the headship of the Messiah over his people, also that of the redemptive function.

(c) In performing the function of Redeemer, Jesus teaches that he must die in obedience to law, giving his life "a ransom for many for the remission of sins" (Matt. xvi:21-23; xx:28; Mark x:45).

Sin is a serious, even fatal, alienation from God. Jesus says nothing about it that could in any way soften or lessen the hatred due to it from the healthy soul. On the contrary, by his interpretation of the old law, and by his strenuous efforts to rescue men from sin, he deepens the sense of abhorrence aroused by it. The sinful are the "lost." They are in a most miserable and perilous situation.

Yet, even though guilty and lost, the sinner is capable of salvation. In this view Jesus differed diametrically from the Pharisees, who looked upon sinful men as in a hopeless condition. He recognized a certain dignity in human nature, because of its relation to God both by creation and by the possibilities involved in it, if it should be redeemed.

(d) Man is an immortal being, because he is capable of sustaining a relation of love to God, such as that sustained by Abraham, Isaac, and Jacob. Man's immortality is associated with the resurrection of the body. But though this fact is distinctly involved in the teaching of Jesus, there is nowhere an effort to explain the difficulties

connected with it. To secure his birthright as an immortal being, and one possessed of capabilities of redemption from sin, man must enter into the kingdom of God by repentance and faith. Once a member he must live a life of humility, love, earnestness, and purity. He must secure a righteousness characterized by inwardness or depth and comprehensiveness or extent. The law of the kingdom is to be not more lax than the ethical laws already known, but more free, and at the same time more pervasive and effective.

(e) The kingdom of God thus constituted, with Jesus at its head, acknowledging the fatherhood of God as its source of life and the brotherhood of man as its law, is to have a course of natural development in the world; and the consummation of it is to be a judgment day, in which all men shall be judged according to their character.

(f) The process of growth outlined for the kingdom is analogous to all organic growth, and is portrayed in parables drawn from vegetable life. The judgment is to be ushered in by Jesus himself in a second appearance on earth, and it is to issue in the separation of the righteous from the unrighteous. The righteous shall enter into life; they shall inherit the kingdom; they shall shine as the sun; they shall rule over cities; they shall sit on thrones and share the joy of their Lord. The wicked shall be cast into outer darkness, or into fire, or into prison; it had been better for them had they not been born.

(2) **Teaching of St. Paul.** Of all those who accepted Jesus as the Christ in the Apostolic generation, none was more influential in molding the thought of the Church than the apostle Paul. His ancestry and early life, his education, the manner of his conversion, and his first experiences as a missionary conspired to impress him with certain aspects of the new faith which he embodied in his preaching and letters, alluding to the sum total of his teaching as "his gospel."

(a) The kernel of this system of thought was carried over by Paul from the pre-Christian stage of his life. It consisted in the view that true religion is a mode of righteousness or judicial standing before God, which, however, must work within its possessor a holy character, and must never be disconnected from this subjective side of it.

This righteousness, although ideal and primitive in man, was lost by the first transgression on the part of Adam. Sin thus entered into the world and prevailed in the human race, so that both Jews and Gentiles as descendants of the same common ancestor are under the power of sin. They can expect nothing but the natural consequences of this evil principle; that is to say, distress and alienation from God, and finally death.

The Old Testament brought sin to light through the Mosaic law, which was meant to be, not a means of salvation or righteousness, but a means of preparing the way for it. The Old Testament did, however, provide a way of righteousness through the promise given to Abraham. The promise was before the law, and called forth faith, and faith was accepted as a ground of justification. Thus righteousness was imputed to Abraham and others on the ground of faith.

But the promise which saved the believer in the Old Testament was realized in the new dispensation in Jesus Christ and his work. Christ thus occupies the central place in Paul's system of thought, and constitutes an object of affectionate devotion and allegiance.

(b) Of Christ, Paul teaches that he was son of David, the son of a woman, therefore a true man, and yet the Son of God. He existed before his

birth as man with God, sharing in the work of the creation of the world and entitled to equality with the Father. In the incarnation he took on himself human nature, suffered and died, and rose again from the dead, and thus sealed and completed his work.

(c) The most significant part of the work of Christ is his death. This death was vicarious and sacrificial, and its efficacy consists in perfect and satisfactory obedience to the Father in behalf of men and the consequent removal of sin. Since Christ died, then, those who believe are united to him, constituting a new humanity, of which he is the Head. As the first Adam was the head of the sinful race, Christ thus becomes the second Adam, the head of the redeemed race.

(d) God the Father stands in this scheme of thought as the Sovereign and Efficient Cause of all its parts. It is his free grace that has foreseen and foreordained the minutest particulars of the plan in such a way that all creature merit is excluded by it. The redeemed has no occasion of boasting, nor ground for claim in himself, but only occasion for gratitude to him, whose love has provided this way of righteousness. God has an absolute right to deal with his creatures as it may appear best to him, but the impossible supposition that God can or will choose to act in any other way than rightly toward his creatures does not enter into Paul's thought. Accordingly, God calls whom he has chosen out of his free grace to be made partakers in the new humanity of which Christ is the head. He further justifies these, pardoning their sins, and sends his spirit into their hearts to work out a new life of holiness in them.

(e) The new life is begun by the Holy Spirit, and continued into complete sanctification, the same Spirit enlightening, leading, moving, and actuating him in whom it has been begun throughout his whole course.

The new life, though wrought out in individuals, is given them as sharers in the redeemed humanity of which Christ is the head; hence it has its social aspects. This is recognized in the organized Church, with its principles of polity and discipline and its ordinances of worship, especially the two sacraments instituted by Christ, Baptism and the Lord's Supper.

As the starting point of religion and principal question in the Pauline system was the securing of righteousness or normal standing before God, so in the Johannine system it is the restoration of union or fellowship between man and God.

(3) **Teaching of St. John.** (a) The actual relation between man and God is that of alienation. This appears in the natural condition of the world. The world conceived of as the sum total of the social activity of the human race is in darkness, and prefers to remain in darkness, even though the light may shine in it. It hates God. It is to be judged and condemned unless it accepts God's offer of mercy. Viewed as a spirit of force constituted by human activity, it is an enemy to be overcome. It is subject to Satan and pervaded by the thought of Satan.

This condition of the world is sin. It is a condition of lawlessness; the law of God is disregarded in it. The root of sin lies in disbelief of God incited by the devil, and its consequences have the displeasure of God, the slavery of the higher to the lower nature of man, and death.

But the world is not allowed to remain and perish in this state of sin. God has loved it, and is aiming to restore it to fellowship with himself. In his own essence God is a Spirit. As to his

character, he is light and love; light symbolizing his purity and holiness, and love issuing for the welfare and fellowship of spiritual beings whom he has created in his own image.

(b) God's love, like that of the parent to the child, is original and not responsive. It leads him from eternity to give some members of the human race to the Son, so that their restoration to fellowship may be assured. He has, moreover, prepared the way, step by step, by a progressive revelation of his will and purpose, culminating in the manifestation of his son in the world. Old Testament prophecy and John the Baptist are agents in this preparation.

But the greatest sign of the love of God is the incarnation of his son, the eternal Logos. That the Logos was divine, and acted as the executive of God in the creation, does not admit of denial in the thought of John; but that he was made real flesh and blood may be doubted, and therefore John takes pains to denounce such doubt as fatal error.

(c) The death of the incarnate Logos is the sacrifice of the "Lamb that taketh away the sin of the world." It was a voluntary endurance of sufferings for others, and had an elevating and healing power, such as might be represented by the brazen serpent in the wilderness. It was, moreover, a propitiatory death, and redemption from sin is based upon it. The restored fellowship follows forgiveness of sin. It is constituted by faith. The Paraclete takes the words of Christ and teaches them to the believer, guiding, bearing witness, reminding and comforting believers, and rebuking and convicting the unbelieving world.

(d) The results of the new fellowships are obedience to God's commandments, victory over the world and the devil, and eternal life; the constitution of a new brotherhood among men, in which the brethren love one another and struggle with sin, overcoming it step by step.

(e) The enmity of the world to God does not cease with the manifestation of his Incarnate Son, but is rather intensified and stimulated. A fierce struggle must be expected between the world power and the organized followers of Jesus, which, however, is destined to end in the complete overthrow of the world and the triumph of the Church. When this end is achieved Christ will come in glory and reign in a renewed and purified world.

(4) **Epistle to the Hebrews.** The epistle to the Hebrews has often been taken as Pauline, giving in general the same system as is found in the writings of Paul. Without controverting these positions, it is necessary to say that it presents religion as a covenant, and Christianity as the new and real covenant of which the Old Testament ritual system was the type and prophecy. Christ is the mediator of this new covenant as its high priest and only victim. Hence he stands as the central figure in the system of the apostle. Both in respect to his priesthood and his sacrifice he is contrasted with his Old Testament types as the reality and finality. By faith in him men are led into perfection. The most important duty incumbent upon the believer is a consistent adherence to his profession of faith through the sorest distress and trial; thus, he will triumph and enter into the fellowship of his predecessors in faith who obtained a good report under the Old Testament dispensation. A. C. Z.

BICHRI (bik'ri), (Heb. בִּכְרִי, *bik-ree'*, youthful), a Benjamite, whose son Sheba incited a rebellion against David after the death of Absalom (2 Sam. xx:1, sq.), B. C. about 967.

BIDKAR (bĭd'kar), (Heb. בִּדְקָר, *bid-kar'*, son of stabbing, i. e., a stabber), a captain under Jehu and once his fellow officer (2 Kings ix:25). He completed the sentence against Ahab's son, Jehoram, by casting the body into the field of Naboth after Jehu had pierced it with an arrow (B. C. 882). (See JEHU.)

BIER (bēr). See BURIAL AND SEPULCHERS.

BIGTHA (bĭg'thā), (Heb. בִּגְתָה, *big-thaw'*, given by fortune), one of the seven chamberlains in the harem of Ahasuerus or Xerxes (Esth. i:10), B. C. 483.

BIGTHAN and **BIGTHANA** (bĭg'than and bĭg'tha-nā), (Heb. בִּגְתָן, *big-tharwn'*, perhaps fortune given), a eunuch in the court of King Ahasuerus, whose conspiracy against that monarch was frustrated through the disclosures of Mordecai (Esth. ii:21; vi:2) B. C. 479.

BIGVAI (bĭg'va-i), (Heb. בִּגְוַי, *big-vah'ee*, happy, or of the people).

1. Children of Bigvai to the number of 2,056 or 2,067, according to Nehemiah, returned to Jerusalem (B. C. 450) with Zerubbabel (Ezra ii:14; Neh. vii:19). At a later date seventy-two returned with Ezra (Ezra viii:14).

2. One of those who signed the covenant with Nehemiah (Neh. x:16), and was apparently a chief in the expedition under Zerubbabel (Ezra ii:2; Neh. vii:7), B. C. 410.

BIKATH-AVEN (bĭk'ath-ā'ven). See AVEN (I).

BILDAD (bĭl'dād), (Heb. בִּלְדָד, *bil-dad'*, the Shuhite), one of the friends of Job, and the second of his opponents in the disputation (Job. ii:11; viii:1; xviii:1; xxv:1).

The Shuah, of which the Septuagint makes Bildad the prince or patriarch (*Bildad the prince of the Shuhites*), was probably the district assigned to Shuah, the sixth son of Abraham by Keturah, and called by his name. This was doubtless in Arabia Petraea, if Shuah settled in the same quarter as his brothers, of which there can be little doubt, and to this region we are to refer the town and district to which he gave his name and in which Bildad was doubtless a person of consequence, if not the chief. (See SHUAH.)

BILEAM (bĭl'e-ām), (Heb. בִּלְעָם, *bil-awm'*, place of conquest), a city of Manasseh, on the east of the Jordan; given to the Levites of Kohath's family (1 Chron. vi:70). Elsewhere called *Ibleam* (Josh. xvii:11; Judg. i:27; 2 Kings ix:27). Probably the modern Bel'ame.

BILGAH (bĭl'gah), (Heb. בִּלְגָה, *bil-gaw'*, bursting forth, i. e., firstborn).

1. A priest who returned from the captivity with Zerubbabel (Neh. xii:5, 18). Perhaps the same as Bilgai, who signed the covenant with Nehemiah (Neh. x:8), B. C. 536.

2. A priest who had charge of the fifteenth course in the temple service, in the time of David (1 Chron. xxiv:14), B. C. 1043.

BILGAI (bĭl'ga-i), (Heb. בִּלְגַי, *bil-gah'ee*, bursting forth, Neh. x:8). Probably same as Bilgah (1).

BILHAH (bĭl'hah), (Heb. בִּלְהָה, *bil-haw'*, perhaps bashfulness).

1. The handmaid whom the childless Rachel bestowed upon her husband Jacob, that through her she might have children (B. C. 1917). Billah became the mother of Dan and Naphtali (Gen. xxx:1-8; xxxv:25; xlvi:25; 1 Chron. vii:13). As to her connection with Reuben see Gen. xxxv:22; xlix:14.

2. A Simeonite town (1 Chron. iv:29). It is also called Baalah and Balah.

BILHAN (bĭl'han), (Heb. בִּלְחָן, *bil-hawn'*, tender).

1. A Horite chief of Mount Seir, in Edom (Gen. xxxvi:27; 1 Chron. i:42), B. C. about 1963.

2. A Benjamite, son of Jediael (1 Chron. vii:10). From his connection with Ehud (1 Chron. vii:10; viii:3, 6) he was probably a Belaite (B. C. before 1658).

BILL (bĭl), (Heb. בִּלְיָהוּ, *say'fer*, writing), a term meaning anything that is written, e. g., a "bill of divorcement" (Deut. xxiv:1, 3; Is. l:1; Jer. iii:8; Matt. xix:7, Gr. βιβλίον, *bib-lee'on*).

BILSHAN (bĭl'shan), (Heb. בִּלְשָׁן, *bil-shawn'*, searcher), one who accompanied Zerubbabel from Babylon (Ezra ii:2; Neh. vii:7), B. C. 536.

BIMHAL (bĭm'hal), (Heb. בִּמְחָל, *bin-hawl'*, circumcised), a son of Japhlet, descendant of Asher (1 Chron. vii:33), B. C. 1658.

BIND (bĭnd), (Heb. בָּשַׁר, *karw-sar'*). In the command, "Thou shalt bind them for a sign upon thine hand," etc. (Deut. vi:8), the "words are figurative, and denote an undeviating observance of the divine commands; and their literal fulfillment could only be a praiseworthy custom or well-pleasing to God when resorted to as the means of keeping the commands of God constantly before the eye" (K. and D., *Com.* in loc.). (Barnes, *Bib. Cyc.*)

BINDING and **LOOSING** (bĭnd'ing and lōōs'ing), to *bind* and *loose* are found in the address of our Lord to Peter (Matt. xvi:19). "The words are the literal translation of the Heb. אָסַר, *aw-sar'*, to bind, in the sense of prohibiting; and הִתְיַטֵּת, *hit-teer'*, to loose, in the sense of permitting."

BINEA (bĭn'e-ā), (Heb. בִּנְעָה and בִּנְעָה, *bin-ah'* and *bin-aw'*, a gushing forth, fountain, or a wanderer), a Benjamite, son of Moza and father of Rapha, of the descendants of King Saul (1 Chron. viii:37; ix:43), B. C. about 850.

BINNUI (bĭn-nū'i or bĭn'nu-i), (Heb. בִּנְוִי, *bin-noo'ee*, a building, familyship).

1. A Levite in the time of Ezra; father of Noadiah (Ezra viii:33), B. C. 536.

2. A son of Pahath-moab, who had taken a foreign wife (Ezra x:30), B. C. 458.

3. Son of Bani, who also had taken a foreign wife (Ezra x:38), B. C. 458.

4. Neh. vii:15. This has been changed from Bani in the lists of Ezra.

5. A Levite, son of Henadad, who helped to repair the walls of Jerusalem under Nehemiah (Neh. iii:24; x:9, and perhaps the same as the one mentioned xii:8), B. C. 446.

BIRD-CAGES (bērd-kāj'ez), are named in Jer. v:27, Rev. xviii:2, and are perhaps implied in Job xli:5, where 'playing with a bird' is mentioned. This just suffices to show that the ancient Israelites kept birds in cages; but we have no further information on the subject.

BIRD-CATCHING (bērd käch'ing). See FOWL-ING.

BIRDS (bērdz), may be defined oviparous vertebrated animals, organized for flight. The common name צִפּוֹר, *tsip-por'*, is used of small birds generally, and of the sparrow in particular; עוֹף, *ofe*, translated 'fowl' (Gen. i:21), properly means flyer; עֵט, *ait*, a bird of prey; ΑΙΤΟΣ, *aetos*, an

eagle; in Gen. xv:11, Job xxviii:7, and Is. xviii:6, rendered 'fowls'; in Jer. xii:9, 'bird'; and in Is. xlvi:11, and Ezek. xxxix:4, 'ravenous birds.' בִּרְבִירִים, *barburim*, denotes fatted gallinacea; it occurs only in 1 Kings iv:23, and is there translated 'fowls,' though it may be questioned whether domestic fowls are mentioned in any part of the Hebrew Bible (see COCK). Gesenius applies the word to geese.

In the Mosaic law birds were distinguished as clean and unclean, the first being allowed for the table, because they fed on grain, seeds and vegetables, and the second forbidden, because they subsisted on flesh and carrion. The birds most anciently used in sacrifice were, it seems, turtle-doves and pigeons.

BIRDS' NESTS (bērdz nēsts).

The law in Deut. xxii:6, 7, directs that if one falls in with a bird's nest with eggs or young he shall allow the dam to escape and not take her as well as the nest. The reason Maimonides (*More Nevochim*) gives for this is: 'The eggs on which the dam is sitting, or the young ones which have need of her, are not, in general, permitted to be eaten, and when the dam is allowed to escape she is not distressed by seeing her young ones carried off. It thus frequently happens that all are untouched, because that which might be taken may not be lawfully eaten.'

BIRSHA (bēr'shā), (Heb. בִּרְשָׁא, *beer-shah'*, thick, strong), king of Gomorrah when Chedorlaomer invaded that country (Gen. xiv:2), B. C. 2080.

BIRTH (bērth).

In Eastern countries child-birth is usually attended with much less pain and difficulty than in our northern regions. Such consideration may probably account for the fact that the Hebrew women, after they had long been under the influence of the Egyptian climate, passed through the child-birth pangs with much more facility than the women of Egypt, whose habits of life were more luxurious and indolent (Exod. i:19). There were, however, already recognized Hebrew midwives, while the Israelites were in Egypt, and their office appears to have originated in the habit of calling in some matron of experience in such matters to assist in cases of difficulty.

BIRTHDAYS (bērth-dāz), (Heb. יוֹם הַלְּדוּת, *yome-hool-leh-deth'*, Gen. xl:20; Gr. τὰ γενέσια, Matt. xiv:6).

The observance of birthdays may be traced to a very ancient date, and the birthday of the first-born son seems in particular to have been celebrated with a degree of festivity proportioned to the joy which the event of his actual birth occasioned (Job. i:4, 13, 18). The birthdays of the Egyptian kings were celebrated with great pomp as early as the time of Joseph (Gen. xl:20). These days were in Egypt looked upon as holy; no business was done upon them, and all parties indulged in festivities suitable to the occasion. Every Egyptian attached much importance to the day, and even to the hour of his birth, and it is probable that, as in Persia (Herodot. i:133; Xenoph. *Cyrop.* i:3, 9), each individual kept his birthday with great rejoicings, welcoming his friends with all the amusements of society, and a more than usual profusion of delicacies of the table (Wilkinson, v, p. 290). In the Bible there is no instance of birthday celebration among the Jews themselves. The example of Herod the tetrarch (Matt. xiv:6), the celebration of whose birthday cost John the Baptist his life, can scarcely be regarded as such, the family to which he be-

longed being notorious for its adoption of heathen customs. In fact, the later Jews at least regarded birthday celebrations as parts of idolatrous worship (Lightfoot, *Hor. Hebr. ad Matt.* xiv:6), and this probably on account of the idolatrous rites with which they were observed in honor of those who were regarded as the patron gods of the day on which the party was born.

BIRTHRIGHT (bērth'rīt'), (Heb. בְּכֹרֶת, *bek-o-raw'*, belonging to the first-born). This term denotes the rights or privileges belonging to the first-born among the Hebrews. The particular advantages which these conferred were the following:

(1) **Right to the Priesthood.** The first-born became the priest in virtue of his priority of descent, provided no blemish or defect attached to him. Reuben was the first-born of the twelve patriarchs, and therefore the honor of the priesthood belonged to his tribe. God, however, transferred it from the tribe of Reuben to that of Levi (Num. iii:12, 13; viii:18). Hence the first-born of the other tribes were redeemed from serving God as priests, by a sum not exceeding five shekels. Being presented before the Lord in the temple, they were redeemed immediately after the thirtieth day from their birth (Num. xviii:15, 16; Luke ii:22). It is to be observed that only the first-born who were *fit for the priesthood* (i. e. such as had no defect, spot, or blemish) were thus presented to the priest.

(2) **Double Portion.** The first-born received a double portion of his father's property. There is some difficulty in determining precisely what is meant by a double portion. Some suppose that half the inheritance was received by the elder brother, and that the other half was equally divided among the remaining brethren. This is not probable. The Rabbins believe that the elder brother received twice as much as any of the rest, and there is no reason to doubt the correctness of this opinion. When the first-born died before his father's property was divided, and left children, the right of the father descended to the children, and not to the brother next of age.

(3) **Official Authority.** He succeeded to the official authority possessed by his father. If the latter was a king, the former was regarded as his legitimate successor, unless some unusual event or arrangement interfered.

After the law was given through Moses, the right of primogeniture could not be transferred from the first-born to a younger child at the father's option. In the patriarchal age, however, it was in the power of the parent thus to convey it from the eldest to another child (Deut. xxi:15-17; Gen. xxv:31, 32).

It is not difficult to perceive the reason why the first-born enjoyed greater privileges than the rest of the children. The peculiar honor attaching to them is easily accounted for. They are to be viewed as having reference to the Redeemer, the first-born of the Virgin. Hence in the epistle to the Romans, viii:29, it is written concerning the Son, 'that he might be the *first-born* among many brethren;' and in Coloss. i:18, 'who is the beginning, the *first-born* from the dead; that in all things he might have the pre-eminence' (see also Heb. i:4, 5, 6). As the first-born had a double portion, so the Lord Jesus, as Mediator, has an inheritance superior to his brethren; he is exalted to the right hand of the Majesty on high, where he reigns until all his enemies shall be subdued. The universe is his rightful dominion in his mediatorial character. Again, he alone is a

true priest; he fulfilled all the functions of the sacerdotal office, and the Levites, to whom, under the law, the priesthood was transferred from all the first-born of Israel, derived the efficacy of their ministrations from their connection with the great high priest (Jahn's *Biblical Archaeology*, sec. 165). (See FIRSTBORN.) S. D.

BIRZAVITH (bir'za-vith), (Heb. בִּרְזָוִית, *beer-zoth'*, holes, or olive wells), a name given in the genealogies of Asher (1 Chron. vii:31) as the son of Malchiel and great-grandson of Asher. It was probably the name of a place.

BISHLAM (bish'lam), (Heb. בִּשְׁלָם, *bish-lawm'*, in peace), one of the king of Persia's officers on this side the Euphrates, who wrote to King Artaxerxes, desiring him to forbid the Jews to rebuild the temple (Ezra iv:7), B. C. 522.

BISHOP (bish'up).

(1) **Superintendents.** The Apostles originally appointed men to superintend the spiritual, and occasionally even the secular, wants of the churches (Acts xiv:23; xi:30; see also 2 Tim. ii:2), who were ordinarily called *πρεσβύτεροι*, *pres-bu'ter-oi*, elders, from their age, sometimes *ἐπισκοποι*, *eh-pis'ko-poi*, overseers (bishops), from their office. They are also said to *preside* (1 Thess. v:12; 1 Tim. v:17), never to *rule*, which has far too despotic a sound. In the Epistle to the Hebrews (xiii:7, 17, 24) they are named *leading men* (Comp. Acts xv:22), and, figuratively, *ποιμένες*, *shepherds* (Ephes. iv:11).

But that they did not always teach is clear from 1 Tim. v:17; and the name elders proves that originally age, experience, and character were their most necessary qualifications. They were to be married men with families (1 Tim. iii:4), and with converted children (Tit. i:6). In the beginning there had been no time to train teachers, and teaching was regarded far more in the light of a gift than an office; yet St. Paul places 'ability to teach' among episcopal qualifications (1 Tim. iii:2; Titus i:9; the latter of which passages should be translated, 'that he may be able both to exhort men by sound teaching, and also to refute opposers'). That teachers had obtained in St. Paul's day a fixed official position, is manifest from Gal. vi:6, and 1 Cor. ix:14, where he claims for them a right to worldly maintenance; in fact, that the *shepherds* ordered to 'feed the flock,' and be its 'overseers', (1 Pet. v:2), were to feed them with knowledge and instruction, will never be disputed, except to support a hypothesis. The *leaders* also, in Heb. xiii:7, are described as 'speaking unto you the word of God.' Ecclesiastical history joins in proving that the two offices of teaching and superintending were, with few exceptions, combined in the same persons, as indeed, the nature of things dictated.

(2) **No Difference Between Elders and Bishops.** That during St. Paul's lifetime no difference between elders and bishops yet existed in the consciousness of the church, is manifest from the entire absence of distinctive names (Acts xx:17-28; 1 Pet. v:1, 2). The mention of bishops and deacons in Phil. i:1, and 1 Tim. iii, without any notice of elders, proves that at that time no difference of *order* subsisted between bishops and elders.

(3) **Ordination.** A formal ceremony, it is generally believed, was employed in appointing elders, although it does not appear that as yet any fixed name was appropriated to the idea of ordination. (The word *ordained* is inexcusably interpolated in the English version of Acts i:22. In Tit. i:5 the Greek word means *set*, or *set up*;

and in Acts xiv:23 it means *having elected*, properly by a show of hands; though, abusively, the term came to mean simply, *having chosen or nominated* (Acts x:41); yet in 2 Cor. viii:19, it seems to have its genuine democratic sense.) In 1 Cor. xvi:15, we find the house of Stephanas to have volunteered the task of 'ministering to the saints;' and that this was a ministry of 'the word,' is evident from the Apostle's urging the church 'to submit themselves to such.' It would appear then that a formal investiture into the office was not as yet regarded *essential*. Be this as it may, no one doubts that an ordination by laying on of hands soon became general or universal. Hands were first laid on not to bestow an office, but to solicit a spiritual gift (1 Tim. iv:14; 2 Tim. i:6; Acts xiii:3; xiv:26; xv:40). To the same effect Acts viii:17; xix:6;—passages which explain Heb. vi:2. On the other hand, the absolute silence of the Scriptures, even if it were not confirmed, as it is, by positive testimony, would prove that no idea of consecration, as distinct from ordination, at that time existed at all; and, consequently, although individual elders may have really discharged functions which would afterwards have been called episcopal, it was not by virtue of a second ordination, nor, therefore, of episcopal rank.

(4) **Apostles Bishops.** The Apostles themselves, it is held by some, were the real *bishops* of that day, and it is quite evident that they performed many episcopal functions. It may well be true, that the only reason why no bishops (in the modern sense) were then wanting was, because the Apostles were living; but it cannot be inferred that in any strict sense prelates are *co-ordinate in rank with the Apostles*, and can claim to exercise their powers. The later 'bishop' did not come forward as a successor to the Apostles, but was developed out of the presbyter; much less can it be proved, or alleged with plausibility, that the Apostles took any measures for securing substitutes for themselves (in the higher character of Apostles) after their decease. It has been with many a favorite notion that Timothy and Titus exhibit the episcopal type even during the life of Paul; but this is an obvious misconception. They were attached to the person of the Apostle, and not to any one church. In the last Epistle written by him (2 Tim. iv:9), he calls Timothy suddenly to Rome, in words which prove that the latter was not, at least as yet, bishop, either of Ephesus or of any other church. That Timothy was an *evangelist* is distinctly stated (2 Tim. iv:5), and that he had received spiritual gifts (i:6, etc.); there is then no difficulty in accounting for the authority vested in him (1 Tim. v:1, 19, 22), without imagining him to have been a bishop; which is in fact disproved even by the same Epistle (i:3). That Titus, moreover, had no local attachment to Crete is plain from Titus iii:13, to say nothing of the earlier Epistle, 2 Cor. *passim*. Nor is it true that the episcopal power developed itself out of wandering evangelists any more than out of the Apostles.

On the other hand it would seem that the bishop began to elevate himself above the presbyter while the Apostle John was yet alive, and in churches to which he is believed to have peculiarly devoted himself.

(5) **Angel.** The meaning of the title *angel*, in the opening chapters of the Apocalypse, has been mystically explained by some; but its true meaning is clear from the nomenclature of the Jewish synagogues. In them, we are told, the minister who ordinarily led the prayers of the

congregation, besides acting as their chief functionary in matters of business, was a functionary whose title was expressed by the Greek ἀγγελος.

This term has the ordinary sense of *opus ministerium*, making it almost certain that the 'angels of the churches' are nothing but a harsh Hebraism for 'ministers of the churches.' We therefore here see a single officer, in these rather large Christian communities, elevated into a peculiar prominence, which has been justly regarded as episcopal. Nor does it signify that the authorship of the Apocalypse is disputed, since its extreme antiquity is beyond a doubt; we find, therefore, the germ of episcopacy here planted, as it were, under the eyes of an Apostle (Neander).

Nevertheless, it was still but a germ. It is vain to ask, whether these angels received a second ordination and had been promoted from the rank of presbyters. That this has been the case is possible, but there is no proof of it; and while some will regard the question as deeply interesting, others will think it unimportant. A second question is, whether the angels were overseers of the congregation only, or of the presbyters too; and whether the church was formed of many local unions, such as we call parishes), or of one. Perhaps both questions unduly imply that a set of fixed rules was already in existence. No one who reads Paul's own account of the rebuke he uttered against Peter (Gal. ii) need doubt that in those days a zealous elder would assume authority over other elders, officially his equals, when he thought they were dishonoring the Gospel; and, *a fortiori*, he would act thus towards an official inferior, even if this had not previously been defined or understood as his duty. So again, the Christians of Ephesus or Miletus were probably too numerous ordinarily to meet in a single assembly, especially before they had large buildings erected for the purpose; and convenience must have led at a very early period to subordinate assemblies (such as would now be called 'chapels of ease' to the mother church); yet we have no ground for supposing that any sharp division of the Church into organic portions had yet commenced.

(6) General Agreement. Episcopalians, Presbyterians, and Congregationalists agree in one point, viz. that (because of its utility and general convenience) it is lawful for Christians to take a step for which they have no clear precedent in the Scripture, that of breaking up a church, when it becomes of unwieldy magnitude, into fixed divisions, whether parishes or congregations. The question then arises, whether the organic union is to be still retained at all. To this (1) Congregationalists reply in the negative, saying that the congregations in different parts of a great city no more need to be in organic union, than those of two different cities; (2) Presbyterians would keep up the union by means of a synod of the elders; (3) Episcopalians desire to unite the separate churches by retaining them under the supervision of a single head—the bishop. It seems impossible to refer to the practice of the Apostles as deciding in favor of *any one* of these methods; for the case had not yet arisen which could have led to the discussion. The city churches had not yet become so large as to make subdivision positively necessary; and, as a fact, it did not take place. To organize distant churches into a fixed and formal connection by synods of their bishops, was, of course, quite a later process; but such unions are by no means rejected, even by Congregationalists, as long as they are used for deliberation and advice, not as assemblies for ruling and commanding. The *spirit* of Episco-

pany depends far less on the episcopal form itself, than on the size and wealth of dioceses, and on the union of bishops into synods, whose decisions are to be authoritative on the whole church; to say nothing of territorial establishment and the support of the civil government. If, under any ecclesiastical form, either oppression or disorder should arise, it cannot be defended; but no form is a security against such evils. Our experience may in these later times possibly show us which of these systems is on the whole preferable; but the discussion must belong to ecclesiastical history, and would be quite out of place here.

F. W. N.

(7) Opinion of Harnack. Harnack thinks that while bishops and deacons had the care of public worship and the poor, elders rather formed a court attached to the church, and as such were occupied with government and discipline. The apparent identity of the offices would then be no more than an identity of persons. The weightiest members of the church would naturally hold both offices, and give the tone to both. This theory explains points like the difference of names and the marked separation between the two classes. It may contain more than a germ of the truth; but it cannot be accepted without important reservations. (a) It is not likely that duties were quite so definitely separated. If the elders began with discipline and general oversight, they would be likely soon to take up more spiritual duties, as the Seven did. Those who had gifts to minister the word and teaching, would rather be honored than hindered; so that many of them might easily be doing pastoral work (especially if they were bishops also) before the end of the apostolic age. In any case (b) bishops and elders are identical in the Pastoral Epistles, so that the distinction must by that time have been nearly lost. This, however, depends on their date. Harnack (*Chronologie*, 1897, p. 484) still places the relevant passages in the middle of the second century. (H. M. Gwatkin, *Hastings' Bib. Dict.*). (See EPISCOPACY.)

(8) Specific Duties and Support. Prof. E. H. Plumptre says: "Their duty was to feed the flock, teaching publicly (Tit. i:9), opposing errors, admonishing privately (1 Thess. v. 12). The work of visiting the sick appears in Jam. v:14, as assigned to the elders of the church. There, indeed, it is connected with the practice of anointing as a means of healing, but this office of Christian sympathy would not, we may believe, be confined to the exercise of the extraordinary *χαρίσματα λαμπάνων*, and it is probably to this, and to acts of a like kind, that we are to refer the passage in Acts xx:35, and the 'helps' mentioned in 1 Cor. xii:28. Among these acts of charity that of receiving strangers occupied a conspicuous place (1 Tim. iii:2; Tit. i:8). The bishop elder's house was to be the house of the Christian who arrived in a strange city and found himself without a friend. Of the part taken by them in the liturgical meetings of the church we have no distinct evidence. Reasoning from the language of 1 Cor. x, xii, and from the practices of the post-apostolic age, we may believe that they would preside at such meetings, that it would belong to them to bless and to give thanks when the church met to break bread. The mode in which these officers of the church were supported or remunerated varied probably in different cities. At Miletus St. Paul exhorts the elders of the church to follow his example and work for their own livelihood (Acts xx:34). In 1 Cor. ix:14, and Gal. vi:6, he asserts the right of the ministers of the church to be supported by it. In 1 Tim. v:17, he gives a special application of the principle in the assign-

ment of a double allowance to those who have been conspicuous for their activity." Smith, *Bib. Dict.*

BISHOPRIC (bish'ŭp-rĭk), (Gr. ἐπισκοπή, *ep-iskop-ay'*, oversight), the ministerial charge in the Church (Acts i:20; 1 Tim. iii:1). In later times it is used to designate (1) the office and function of a bishop, and (2) the district over which he has jurisdiction.

BIT (bĭt), (Heb. בֵּית, *meh'theg*) (Ps. xxxii:9), (Gr. χαλιβς, *khal-ee-nos'*, James iii:3), elsewhere rendered BRIDLE (which see).

BITHIAH (bĭ-thi'ah), (Heb. בִּיתְיָהוּ, *bith-yaw'*, daughter of Jah, worshiper), daughter of Pharaoh, and wife of Mered, a descendant of Judah (1 Chron. iv:18). She was probably a captive, but not a concubine. Her name indicates that she was a worshiper of Jehovah (B. C. 1658).

BITHRON (bĭth'ron), (Heb. בֵּית־רֹנָן, *bith-rone'*, (the) broken or divided place, 2 Sam. ii:29).

This name has the same meaning as Bether. It probably denotes a region of hills and valleys, and not any definite place.

BITTER, BITTERNESS (bĭt'tēr, bĭt'tēr-nēs). Bitterness (Ex. i:14; Jer. ix:15) is symbolical of affliction, misery and servitude.

It was for this reason that, in the celebration of the Passover, the servitude of the Israelites in Egypt was typically represented by *bitter herbs*.

1. On the day of bitterness in Amos viii:10, Comp. Tibullus, ii:4, 11—

'Nunc et amara dies, et noctis amarior umbra est.' In Habak. i:6 the Chaldeans are called 'that bitter and swift nation,' which Schultens illustrated by remarking that the root *Merer* in Arabic (answering to the Hebrew word for *bitter*) is usually applied to strength and courage.

2. The gall of bitterness (Acts viii:23) describes a state of extreme wickedness, highly offensive to God, and hurtful to others.

3. A root of bitterness (Heb. xii:15; Comp. Deut. xxix:18) expresses a wicked or scandalous person or any doctrine contrary to truth, or any dangerous sin leading to apostasy.

BITTER HERBS (bĭt'tēr ērbz), (Heb. מְרוֹרִים, *mer-o-rim'*, literally bitters). There has been much difference of opinion respecting the kind of herbs

Gates of Nicæa, the Capital of Bithynia.

BITHYNIA (bĭ-thĭn'i-à), (Gr. Βιθυνία, *bithynia*), a province of Asia Minor, on the Euxine Sea and the Propontis; bounded on the west by Mysia, on the south and east by Phrygia and Galatia, and on the east by Paphlagonia.

The Bithynians were a rude and uncivilized people, Thracians who had colonized this part of Asia, and occupied no towns, but lived in *villages* (κωμοπολείς, Strabo, p. 566). That Christian congregations were formed at an early period in Bithynia, is evident from the Apostle Peter having addressed the first of his Epistles to them (1 Pet. i:1). The Apostle Paul was at one time inclined to go into Bithynia with his assistants Silas and Timothy, 'but the Spirit suffered him not' (Acts xvi:7).

denoted by this word. On this subject the reader may consult Carpzov, *Apparat.* p. 404, sq.

It however seems very doubtful whether any particular herbs were intended by so general a term as *bitters*; it is far more probable that it denotes whatever bitter herbs, obtainable in the place where the Passover was eaten (Ex. xii:8; Num. ix:11), might be fitly used with meat. This seems to be established by the fact that the first directions respecting the Passover were given in Egypt, where also the first Passover was celebrated; and as the esculent vegetables of Egypt are very different from those of Palestine, it is obvious that the bitter herbs used in the first celebration could scarcely have been the same as those which were afterwards employed for the

same purpose in Canaan. According to the Mishna (*Pesachim*, ii:6), and the commentators thereon, there were five sorts of bitter herbs, any one or all of which might be used on this occasion. There is great difficulty in identifying these plants. (Bochart, *Hieroz.* i. 691).

BITTERN (bit'tĕrn). See KIPPOD.

BITUMEN (bĭ-tū'mĕn). See ASPHALTUM.

BIZJOTHJAH (biz-jōth'jah), (Heb. בִּזְיֹתְיָהוּ, *biz-yo-the-yaw'*, place of Jah's olives), a town in the south of Judah (Josh. xv:28). The place has not been identified.

BIZTHA (biz'thā), Heb. בִּזְתָּא, *biz-thaw'*, one of the seven chamberlains of the harem of Xerxes (Ahasuerus) who were ordered to bring Vashti forth for exhibition (Esth. i:10), B. C. about 521.

BLACK (blāk). Although the Orientals do not wear black in mourning, they, as did the ancient Jews, regard the color as a symbol of affliction, disaster and privation.

In fact, the custom of wearing black in mourning is a sort of visible expression of what is in the East a figure of speech. In Scripture blackness is used as symbolical of afflictions occasioned by drought and famine (Job xxx:30; Jer. xiv:2; Lam. iv:8; v:10). Whether this be founded on any notion that the hue of the complexion was deepened by privation, has not been ascertained; but it has been remarked by Chardin and others, that in the periodical mourning of the Persians for Hossein many of those who take part in the ceremonies appear with their bodies blackened, in order to express the extremity of thirst and heat which Hossein suffered, and which, as is alleged, was so great that *he turned black*, and the tongue swelled till it protruded from his mouth.

In Mal. iii:14 we read, 'What profit is it that we keep his ordinances, and that we have walked in blackness (Authorized Version 'mournfully') before the Lord of Hosts;' meaning that they had fasted in sackcloth and ashes. Black occurs as a symbol of fear in Joel ii:6—'All faces shall gather blackness,' or *darken* with apprehension and distress. This use of the word may be paralleled from Virgil, *Æn.* ix. 719, *Atrunque timorem*; and *Georg.* iv.468,

'Caligantem nigra formidine lucum.'

The same expression which Joel uses is employed by Nahum (ii:10) to denote the extremity of sin and sorrow.

BLAINS (blāns). The Hebrew word אֲבַחְיוֹתָב, *ab-ah-boo-yoth'*, which, in the only places where it occurs, is in our version rendered blains, strictly means eruptions.

The Septuagint renders it by φλυκτιδες, *phlook-tee' dez*, inflamed ulcers, which is also a general term for pustules or vesicles. (See DISEASES.)

BLASPHEMY (blās'fĕ-mÿ), (Gr. βλασφημία, *blas-fay-me'ah*), signifies the speaking evil of God; Heb. קָלַל שֵׁם יְהוָה, to curse the name of the Lord).

1. Meaning.

(1) The Greek word *blasphemia* is generic, denoting verbal abuse proceeding from an evil disposition. It is equivalent to *defamation*, or *slander*, involving an attempt to lessen the character of others, with the intention of doing them injury. All kinds of abusive language, whether called *imprecation*, *calumny*, or *reviling*, come under the term.

(2) The English word *blasphemy* is more restricted in its signification. It refers to God only. In like manner when *blasphemia* is directed against the Supreme Being, or when Jehovah is

the object of it, it is specific. In these circumstances it corresponds to the English *blasphemy*. The Greek *blasphemia* is employed in reference to the defamation of men or angels equally with the Deity; but it is proper to use the term *blasphemy* only when God is spoken against. Thus the Greek and English words are not coextensive in import.

(3) Our English translators have not adhered to the right use of the term. They employ it with the same latitude as the Greek; but it is generally easy to perceive, from the connection and subject of a passage, whether *blasphemy*, properly so called, be meant, or only defamation. It would certainly have been better to have employed *detraction* or *calumny* rather than *blasphemy* where man is the object; reserving the latter for that peculiarly awful slander which is directed against the ever-blessed God.

(4) *Blasphemy* signifies a false, irreverent, injurious use of God's names, attributes, words, and works. Whenever men *intentionally* and *directly* attack the perfections of Jehovah, and thus lessen the reverence which others entertain for him, they are *blasphemers*. If the abusive language proceed from ignorance or if it be dishonoring to the majesty of Heaven only in the consequences deduced from it by others, *blasphemy* has no existence. It is *wilful* calumny directed against the name or providence of God that alone constitutes the crime denoted by the term.

(5) Examples of the general acceptance of *blasphemia* in the New Testament are common, where the objects of it are men, angels, or the devil, as in Acts xiii:45; xviii:6; Jude 9. The restricted sense is found in such passages as Luke v:21; John x:36.

2. Punishment. By the Mosaic law *blasphemy* was punished with death (Lev. xxiv:10-16); and the laws of some countries still visit it with the same punishment. Fines, imprisonment, and various corporal inflictions are annexed to the crime by the laws of Great Britain. It is matter, however, of sincere satisfaction, that there are very few instances in which these enactments require to be enforced.

3. Blasphemy Against the Holy Ghost.

(1) Much has been written respecting the *blasphemy* against the Holy Ghost, usually, but improperly, denominated *the unpardonable sin* against the Holy Ghost. Some refer it to continued opposition to the Gospel, *i. e.*, obstinate impenitence or final unbelief. In this view it is unpardonable, not because the blood of Christ is unable to cleanse from such a sin, nor because there is anything in its own nature which separates it from all other sins and places it beyond forgiveness, but because, as long as man continues to disbelieve, he voluntarily shuts himself out from the forgiving mercy of God. By not receiving the Gospel, he refuses pardon. In the same manner, *every* sin might be styled the unpardonable, as long as an individual continues to indulge in it.

(2) But we object to this opinion, because it generalizes the nature of the sin in question. On the contrary, the Scripture account narrows it to a particular sin of a special kind, discountenancing the idea that it is of frequent occurrence and marked by no circumstances of unwonted aggravation. Besides, all the notices which we have refer it not so much to a state of mind, as to the outward manifestation of a singularly malignant disposition *by the utterance of the lips*.

(3) The occasion on which Christ introduced his mention of it (Matt. xii:31, etc.; Mark iii:28,

etc.), the subsequent context, and, above all, the words of Mark iii:30 ('because they said, He hath an unclean spirit'), indicate, with tolerable plainness, that the sin in question consisted in attributing the miracles wrought by Christ, or his apostles in His name, to the agency of Satan. It was by the power of the Holy Ghost, given to the Redeemer without measure, that he cast out devils; and whoever maligned the Saviour, by affirming that an unclean spirit actuated and enabled him to expel other spirits, maligned the Holy Ghost.

(4) There is no connection between the description given in the Epistle to the Hebrews, vi:4-6, and this unpardonable blasphemy. The passages in the Gospels which speak of the latter are not parallel with that in the Epistle to the Hebrews; there is a marked difference between the states of mind and their manifestations as described in both. The sins ought not to be identical; they are altogether dissimilar.

(5) It is difficult to discover the 'sin unto death,' noticed by the apostle John (John v:16), although it has been generally thought to coincide with the blasphemy against the Holy Spirit; but the language of John does not afford data for pronouncing them one and the same. The first three gospels alone describe the *blasphemy* which shall not be forgiven; from it the 'sin unto death' stands apart. S. D.

BLASTING (blást'ing), (Heb. שָׂרַף, *shed-ay-faw'*, singeing). This and Heb. יַרְאֵה, *yay-raw-kone'*, to be yellowish, mildew, refer to two diseases which attack the grain; the former to the withering or burning of the ears, caused by the East wind (Gen. xli:6, 23, 27), the other to the effect produced by a hot wind or sirocco, by which the green ears are turned yellow, so that they bear no grains (K. and D., *Com.*; Barnes' *Bib. Dict.*).

Thomson says, 'it rushes down every gorge, bending and breaking the trees, and tugging at each individual leaf. . . . the eyes inflame, the lips blister, and the moisture of the body evaporates . . . you become languid, nervous, irritable, and despairing' (*Land and Book* ii:262). (See MILDEW).

BLASTUS (blás'tus), (Gr. βλάστος, *blas'tos*, shoot, sprout), a man who was *cubicularius* to king Herod Agrippa, or who had the charge of his bed-chamber (Acts xii:20), A. D. 44.

Such persons had usually great influence with their masters, and hence the importance attached to Blastus's favoring the peace with Tyre and Sidon.

BLEMISH (blēm'ish), (Heb. מום, *moom*; Gr. μῶμος, *mo'mos*).

There were various kinds of blemishes, *i. e.*, imperfections or deformities, which excluded men from the priesthood, and animals from being offered in sacrifice. These blemishes are described in Lev. xxi:17-23; xxii:19-25; Deut. xv:21. We learn from the Mishna (*Zebachim*, xii:1; *Becoroth*, vii:1), that temporary blemishes excluded a man from the priesthood only as long as those blemishes continued. The rule concerning animals was extended to imperfections of the inward parts; thus, if an animal, free from outward blemish, was found, after being slain, internally defective, it was not offered in sacrifice.

Offending professors are spots and "blemishes;" are a reproach, dishonor, and plague to the church, and company that entertain them (2 Pet. ii:13; Jude 12).

BLESS (blēs), (Heb. שָׂרַף, *aw-shar'*, to declare happy; בָּרַךְ, *barw-rah'*, to declare blessed). Bless, in general, signifies to wish or do well to, or speak well of.

When God is said to "bless," it signifies, (1) To bestow plenty of temporal good things upon one, and make his outward affairs prosperous and successful, Gen. xxx:27. (2) To bestow both temporal and spiritual good things, Gen. xii:2. (3) To justify one, and make him happy in the full enjoyment of God, Rev. xiv:13. (4) To set apart things to a holy use, and render them answerable to that end (Gen. ii:3). (5) To give creatures a power of propagating their species, Gen. i:22. (6) To endow one with heroic courage, miraculous strength and other gifts and graces necessary to his calling (Judg. xiii:24). When Christ is said to bless, it signifies, (1) to give thanks to God, and pray for his blessing on nourishment, (Matt. xiv:19). (2) To recommend persons by prayer to the favor of God (Mark x:16). (3) In a way of thanksgiving to God, to set apart the elements of his holy supper to a sacred use (Matt. xxvi:26). (4) To save men from the guilt and power of their sin, and bring them to God, as their portion and friend (Acts iii:26).

When men are said to bless, it denotes (1) To extol and praise God for his infinite excellencies, (Ps. civ:1). (2) To give him thanks for his mercies and benefits (Ps. xvi:7; ciii:1, 2). (3) Solemnly to desire and foretell happiness to one (Gen. xlix; Deut. xxxiii). (4) Solemnly to pray for and declare God's readiness to do good to others (Num. vi:23, 24; 2 Sam. i:18). (5) Thankfully to value our great happiness in having God for our Saviour, portion and Lord (Is. lxxv:16; Jer. iv:2). (6) To salute persons, wishing them peace and prosperity (Gen. xlvii:7; Ps. cxxix:8). (7) To pray for, and speak well of others (Luke vi:28). (8) Fondly to imagine ourselves wise, happy, and in friendship with God, because of outward prosperity (Ps. xlix:18), or flatter ourselves that God will not punish our sin (Deut. xxix:19). (Brown, *Bib. Dict.*)

BLESSING (blēs'ing). Generally, blessing may mean any advantage conferred or wished for specially.

The terms 'blessing' and 'to bless' occur very often in the Scriptures and in applications too obvious to require explanation or comment.

1. The patriarchal blessings of sons form the exception, these being, in fact, prophecies rather than blessings, or blessings only in so far as they for the most part involved the invocation and the promise of good things to come upon the parties concerned.

The most remarkable instances are those of Isaac 'blessing Jacob and Esau' (Gen. xxvii); of Jacob 'blessing' his twelve sons (Gen. xlix); and of Moses 'blessing' the twelve tribes (Deut. xxxiii). On the first of these transactions Professor George Bush remarks: 'It cannot be doubted that from such a father as Isaac a common blessing was to be expected on all his children; but in this family there was a peculiar blessing pertaining to the first-born—a solemn, extraordinary, prophetic benediction, entailing the covenant blessing of Abraham, with all the promises, temporal and spiritual, belonging to it, and by which his posterity were to be distinguished as God's peculiar people.'

2. Favors, advantages, conferred by God, and bringing pleasure or happiness in their train (Gen. xxxix:5; Deut. xxviii:8; Prov. x:22, etc).

3. The invocation of God's favor upon a person (Gen. xxvii:12).

4. A present, a token of good will (Gen. xxxiii:11; Josh. xv:19; 2 Kings v:15).—Davis' *Bib. Dict.*

BLESSING, THE CUP OF (blēs'ing, kŭp ōv), a name applied to the wine in the Lord's Supper (1 Cor. x:16), probably because the same name was given to the cup of wine in the supper of the Passover (which see).

BLESSING, VALLEY OF (blēs'ing, vāl'li ōv), (Heb. בְּרַכָּה בְּאֵרֶיךָ, *ay-mek ber-aw-kaw'*), a translation of the name Valley of Berachah (benediction), which was borne by the valley in which Jehoshaphat celebrated the miraculous overthrow of the Moabites and Ammonites. It was from this circumstance it derived its name; and from the indications in the text, it must have been in the tribe of Judah, near the Dead Sea and Engedi, and in the neighborhood of Tekoa (2 Chron. xx:23-26).

BLINDING (blind'ing). See PUNISHMENTS.

BLINDNESS (blind'nēs), (Heb. עִוְוָה, *iv-vaw-ronē'*).

(1) The frequent occurrence of blindness in the East has always excited the astonishment of travelers. Volney says that, out of a hundred persons in Cairo, he has met twenty quite blind, ten wanting one eye, and twenty others having their eyes red, purulent, or blemished (*Travels in Egypt*, i 224). This is principally owing to the Egyptian ophthalmia, which is endemic in that country and on the coast of Syria. Small-pox is another great cause of blindness in the East (Volney, *l. c.*).

(2) In the New Testament, blind mendicants are frequently mentioned (Matt. ix:27; xii:22; xx:30; xxi:14; John v:3). The blindness of Bartimes (Acts xiii:11) was miraculously produced, and of its nature we know nothing. Examples of blindness from old age occur in Gen. xxvii:1; 1 Kings xiv:4; 1 Sam. iv:15. The Syrian army that came to apprehend Elisha was suddenly smitten with blindness in a miraculous manner (2 Kings vi:18); and so also was St. Paul (Acts ix:9). The Mosaic law has not neglected to inculcate humane feelings towards the blind (Lev. xix:14; Deut. xxvii:18). Blindness is sometimes threatened in the Old Testament as a punishment for disobedience (Deut. xxviii:28; Lev. xxvi:16; Zeph. i:17). W. A. N.

(3) Under the law, every man of Aaron's family who was "blind or lame" was peremptorily excluded from the priesthood, and no blind or lame animals were to be sacrificed (Lev. xxi:18; Mal. i:13, 14). The Mosaic law inculcated the exercise of humanity towards the blind (Lev. xix:14; Deut. xxvii:18).

Figurative. (1) The Scriptures denote those as blind who are ignorant, without any proper degree of rational knowledge, whether in heathen darkness or not (Matt. xv:15; Rom. ii:19); (2) Without spiritual knowledge (Rev. iii:17); (3) Judges are *blind*, when ignorance, bribes, or partial favor hinders them to discern what is just and equal in a cause (Exod. xxiii:8); (4) Teachers are *blind*, when ignorance, honor, or interest, hinders their discernment of divine truth, imminent danger, and seasonable duty (Is. lix:10 and xlii:19; Matt. xxiii:16); (5) People are *blind*, when weakness, self-conceit, hatred of brethren, or the like hinder them from discerning divine things (1 John ii:11).

BLOOD (blūd), (Heb. דָּוָן, *dawn*; Gr. αἷμα, *hah'-ee-mah*). There are two respects in which the ordinances of the Old and New Testaments concerning blood deserve notice here—the prohibi-

tion of its use as an article of food, and the appointment and significance of its use in the ritual of sacrifice; both of which appear to rest on a common ground.

(1) **As Food.** In Gen. ix:4, where the use of animal food is allowed, it is first absolutely forbidden to eat 'flesh with its soul, its blood;' which expression, were it otherwise obscure, is explained by the mode in which the same terms are employed in Deut. xii:23. In the Mosaic law the prohibition is repeated with frequency and emphasis; although it is generally introduced in connection with sacrifices, as in Lev. iii:7; vii:26 (in both which places blood is coupled in the prohibition with the *fat* of the victims); xvii:10-14; xix:26; Deut. xii:16-23; xv:23. In cases where the prohibition is introduced in connection with the lawful and unlawful articles of diet, the reason which is generally assigned in the text is, that 'the blood is the soul,' and it is ordered that it be poured on the ground like water. But where it is introduced in reference to the portions of the victims which were to be offered to the Lord, then the text, in addition to the former reason, insists that 'the blood expiates for the soul' (Lev. xvii:11, 12). This strict injunction not only applied to the Israelites, but even to the strangers residing among them. The penalty assigned to its transgression was the being 'cut off from the people;' by which the punishment of death appears to be intended (*cf.* Heb. x:28), although it is difficult to ascertain whether it was inflicted by the sword or by stoning. It is observed by Michaelis (*Mos. Recht.* iv:45) that the blood of *fishes* does not appear to be interdicted. The words in Lev. vii:26 only expressly mention that of birds and cattle. This accords, however, with the reasons assigned for the prohibition of blood, so far as fishes could not be offered to the Lord; although they formed a significant offering in heathen religions. To this is to be added that the Apostles and elders, assembled in council at Jerusalem, when desirous of settling the extent to which the ceremonial observances were binding upon the converts to Christianity, renewed the injunction to abstain from blood, and coupled it with things offered to idols (Acts xv:29).

In direct opposition to this emphatic prohibition of blood in the Mosaic law, the customs of uncivilized heathen sanctioned the cutting of slices from the living animals, and the eating of the flesh while quivering with life and dripping with blood. Even Saul's army committed this barbarity, as we read in 1 Sam. xiv:32; and the prophet also lays it to the charge of the Jews in Ezek. xxxiii:25. This practice, according to Bruce's testimony, exists at present among the Abyssinians. Moreover, pagan religions, and that of the Phœnicians among the rest, appointed the eating and drinking of blood, mixed with wine, as a rite of idolatrous worship, and especially in the ceremonial of swearing. To this the passage in Ps. xvi:4 appears to allude (*cf.* J. D. Michaelis, *Critisch. Colleg.* p. 108, where several testimonials on this subject are collected).

(2) **Ritual Significance.** The appointment and significance of the use of blood in the ritual of sacrifice belongs indeed to this head; but their further notice will be more appropriately presented in the article SACRIFICE (which see). J. N.

Figurative. To be "in one's own blood," signifies an unclean and destitute natural state; or a base and perishing condition (Ezek. xvi:6). To "drink blood," is to be satisfied with slaughter (Ezek. xxxix:18; Is. xlix:26; Num. xxiii:24).

To have "blood given one to drink," is to be slaughtered as a retribution for delighting in blood (Rev. xvi:6; Ezek. xvi:38). To "wash or dip one's feet in the blood of others; or have the tongue of dogs dipped in it," denotes the terrible vengeance that shall fall on the enemies of Christ and his people (Ps. lviii:10; lxviii:23). A "man of blood," or "bloody man," denotes one cruel and guilty of, or given to murder, (2 Sam. xvi:7). Frequently the Hebrew has *bloods* in the plural, to signify repeated or very horrid murder (Gen. iv:10; 2 Sam. iii:28; xvi:7; 2 Kings ix:26; Is. i:15; xxvi:21; xxxiii:15; Ezek. xvi:9; xviii:13; Hos. iv:2). "I will take away his blood out of his mouth, and his abomination from between his teeth," *i. e.*, the Philistines shall henceforth want power and inclination to murder and ravage in their wonted manner; nor shall continue in their idolatries; but be fearfully punished on account thereof (Zech. ix:7). (See AVENGER OF BLOOD; BLOOD-REVENGE.)

BLOOD AND WATER (blūd and wa'tēr), (John xix:34), are said to have issued from our Lord's side when the soldier pierced him on the cross.

The only natural explanation that can be offered of the fact is to suppose that some effusion had taken place in the cavity of the chest, and that the spear penetrated below the level of the fluid. Supposing this to have happened, and the wound to have been inflicted shortly after death, then, in addition to the water, blood would also have trickled down, or, at any rate, have made its appearance at the mouth of the wound, even though none of the large vessels had been wounded. It is not necessary to suppose that the pericardium was pierced; for, if effusion had taken place there, it might also have taken place in the cavities of the pleura; and, during health, neither the pericardium nor the pleura contains fluid, but are merely lubricated with moisture on their internal or opposing surfaces, so as to allow of free motion to the heart and lungs.

It must not be supposed that the fact of blood coming from the wound at all militates against the idea that our Lord was dead at the moment he was pierced. This argument is, indeed, made use of by Strauss (*l. c.*); but it can be refuted by the most ordinary experience. It is well known that, even many days after death, blood will trickle from deep incisions, especially where any of the large veins have been wounded. The popular opinion that blood will not flow from a corpse, must be taken in a relative, and not absolute sense. It certainly will not flow as it does from a living body; and, when the wound is small and superficial, sometimes not a drop will be seen.

The three other evangelists do not mention the circumstance. (See *Physical Cause of the Death of Christ*, by Wm. Stoms, M. D., London, 1847, pp. 309-420.) W. A. N.

BLOOD, ISSUE OF (blūd, ish'ū ōv), (Gr. ἀιμορροῦν, *hah-ce-mor-roh-eh'o*, to run with blood, Matt. ix:20).

The disease here alluded to is hæmorrhagia; but we are not obliged to suppose that it continued unceasingly for twelve years. It is a universal custom, in speaking of the duration of a chronic disease, to include the intervals of comparative health that may occur during its course; so that when a disease is merely stated to have lasted a certain time, we have still to learn whether it was of a strictly continuous type, or whether it intermitted. In the present case, as this point is left undecided, we are quite at liberty to suppose that the disease did intermit; and

can therefore understand why it did not prove fatal even in twelve years.

Bartholinus (*De Morb. Bibl.* p. 61) quotes a case in which hæmorrhage is said to have occurred for upwards of two years without cessation; but the details necessary to render such an extraordinary case credible are not given. (See DISEASES.)

BLOOD-REVENGE (blūd'-rê-věnj'), or revenge for bloodshed, was regarded among the Jews, as among all the ancient and Asiatic nations, not only as a right, but even as a duty, which devolved upon the nearest relative of the murdered person, who on this account was called גֹּאֵל, *go-ale'*, the reclamer of blood, or one who demands the restitution of blood, similar to the Latin *sanguinem repetere*.

(1) The Mosaic law (Num. xxxv:31) expressly forbids the acceptance of a ransom for the forfeited life of the murderer, although it might be saved by his seeking an asylum at the altar of the Tabernacle, in case the homicide was accidentally committed (Exod. xxi:13; 1 Kings i:50; ii:28). When, however, in process of time, after Judaism had been fully developed, no other sanctuary was tolerated but that of the Temple at Jerusalem, the chances of escape of such an homicide from the hands of the avenger, ere he reached the gates of the Temple, became less in proportion to the distance of the spot where the murder was committed from Jerusalem. Six *cities of refuge* were in consequence appointed for the momentary safety of the murderer, in various parts of the kingdom, the roads to which were kept in good order to facilitate his escape (Deut. xix:3). Thither the avenger durst not follow him, and there he lived in safety until a proper examination had taken place before the authorities of the place (Josh. xx:6, 9), in order to ascertain whether the murder was a wilful act or not. In the former case he was instantly delivered up to the *Goel*, against whom not even the altar could protect him (Exod. xxi:14; 1 Kings ii:29); in the latter case, though he was not actually delivered into the hands of the *Goel*, he was, notwithstanding, not allowed to quit the precincts of the town, but was obliged to remain there all his lifetime, or until the death of the high-priest (Num. xxxv:6; Deut. xix:3; Josh. xx:1-6), if he would not run the risk of falling into the hands of the avenger, and be slain by him with impunity (Num. xxxv:26; Deut. xix:6). That such a voluntary exile was considered more in the light of a punishment for manslaughter than a provision for the safe retreat of the homicide against the revengeful designs of the pursuer, is evident from Num. xxxv:32, where it is expressly forbidden to release him from his confinement on any condition whatever.

(2) That such institutions are altogether at variance with the spirit of Christianity may be judged from the fact that revenge, so far from being counted a right or duty, was condemned by Christ and his apostles as a vice and passion to be shunned (Acts vii:60; Matt. v:44; Luke vi:28; Rom. xii:14, *sq.* Comp. Rom. xiii., where the power of executing revenge is vested in the authorities alone).

BLOODY SWEAT (blūd'ÿ swět').

According to Luke xxii:44, our Lord's sweat was 'as great drops of blood falling to the ground.' Michaelis takes the passage to mean nothing more than that the drops were as *large* as falling drops of blood.

(1) The evangelist does not say that it became

blood, and the comparison may be used as an illustration of the terrible agony through which our Lord was passing.

An examination of twelve different translations besides the Greek text, fails to find any statement to the effect that the sweat *became blood*, or that blood issued from the pores.

In relation to this subject, Dr. Olshausen says: "Although, on the authority of medical statements we can believe that in the highest state of mental agony a blood exudation may take place, still we must acknowledge that in these words of Luke, only a *comparison* of the sweat with drops of blood is directly expressed. In relation to real drops of blood, the words 'as if' would be altogether out of place." Butler, "*Bible Work*," p. 514.)

Wakefield's version reads as follows: "And being in an agony of distress, he continued praying with unusual earnestness, and his sweat was *running down like great drops of blood to the ground*."

McKnight renders the verse thus: "And being in an agony of grief, he prayed the more fervently, and his sweat *fell like* clotted blood to the ground."

Rotherham translates as follows: "And coming to be in an agony, more intensely was he praying, and his perspiration became *as if* great drops of blood (were) descending to the ground."

Several ancient manuscripts besides the Vatican and the Alexandrian omit verses 43-44.

(2) W. W. Keen, M.D., LL.D., in able papers, contributed to *The Baptist Teacher*, October, 1890; *The Baptist Qr. Rev.*, April, 1892, and the *Bib. Sacra.*, July, 1897, discusses the subject very thoroughly. After citing a large number of cases where the phenomena connected with exudation of blood occurred from strong emotion, he contends that human emotion from any cause can be but slight when compared with that of him "upon whom was laid the iniquity of us all," and who presumably from adolescence till his death, and certainly during the three years of his active ministry, felt this burden most intensely. If bloody sweating occurs, as is certainly the case, as a result of the nervous phenomena of hysteria, how much more probable would it be from the intense nervous strain of Gethsemane. Moreover, though "foxes had holes and the birds of the air had nests, the Son of man had not where to lay his head," he was undoubtedly often subject to physical hardships, spent the night on mountains in prayer, was exposed to mob violence, and finally, combining both the acme of emotion and the acme of physical suffering, passed through the awful night in Gethsemane and the physical and mental agonies of the crucifixion. Under such circumstances, with such intensified emotion beyond the limit of human endurance, and with such physical suffering as culminated on the cross, it cannot be a wonder either that his sweat became bloody, or that his heart, even at so early an age as thirty-three, should rupture.

BLUE (blū). See COLORS.

BOANERGES (bō'a-nēr'jēz), (Gr. *Βοανεργές*, *bo-an-erg-es'*, explained as "sons of thunder," Mark iii:17), a surname given by Christ to James and John, probably on account of their fervid, impetuous spirit (Comp. Luke ix:54, and see Olshausen thereon).

BOAR (bōr), (Heb. *כַּחֲזִיר*, *khas-zer'*), (Gr. *χοῖρος*, *khoi'ros*). Occurs in Lev. xi:7; Deut. xiv:8; Ps. lxxx:13; Prov. xi:22; Is. lxxv:4; lxxvi:3, 17.

The Hebrew, Egyptian, Arabian, Phœnician and other neighboring nations abstained from hog's

flesh, and consequently, excepting in Egypt, and (at a later period) beyond the Sea of Galilee, no domesticated swine were reared. In Egypt, where swineherds were treated as the lowest of men, even to a denial of admission into the temples, and where to have been touched by a swine defiled the person nearly as much as it did a Hebrew, it is difficult to conjecture for what purpose these animals were kept so abundantly, as it appears by the monumental pictures they were; for the mere service of treading down seed in the deposited mud of the Nile when the inundation subsided, the only purpose alleged, cannot be admitted as a sufficient explanation of the fact. Although in Palestine, Syria, and Phœnicia hogs were rarely domesticated, wild boars are often mentioned in the Scriptures, and they were frequent in the time of the Crusades. The wild boar of the East, though commonly smaller than the old breeds of domestic swine, grows occasionally to a very large size. It is passive while unmolested, but vindictive and fierce when roused. The ears of the species are small, and rather rounded, the snout broad, the tusks very prominent, the tail tortuous, and the color dark ashy, the ridge of the back bearing a profusion of long bristles. It is doubtful whether this species is the same as that of Europe, for the farrow are not striped; most likely it is identical with the wild hog of India.

BOARD (bōrd). Four Hebrew words are thus translated:

1. In Exod. xxvii:8; Ezek. xxvii:5 and elsewhere, the word is *לִבְיָטִי*, *loo'akh*, a tablet.

2. In Exod. xxvi:15, sq., *כַּחֲזִירִים*, *keh'resh*, to *split off* like a board.

3. In 1 Kings vi:15, *סֵדֵי רָוַע*, *sed-ay-raw'*, a *row*, or *set up in order*.

4. In 1 Kings vi:15, *רֵבֵּעַ*, *tsay-law'*, is rendered a *rib*, or a *beam*.

BOAT (bōt). The following words in the original are translated boat:

1. *Ab-aw-raw'* (Heb. *אֲבוֹרָוֹ*), a *crossing place*, so *ferry boat* (2 Sam. xix:18).

2. *Ploy-ar'ee-on* (Gr. *πλοῖάριον*), a little *ship*, a fishing smack (John vi:22, 23).

3. *Skafay* (Gr. *σκάφη*), *dug out*, a boat acting as tender to a larger vessel (Acts xxvii:16, 30, 32).

BOAZ (bō'az), (Heb. *בֹּאֵז*, *bo'az*, perhaps alacrity).

1. A wealthy Bethlehemite and near kinsman of the first husband of Ruth, whom he eventually espoused under the obligations of the Levirate law, which he willingly incurred (B. C. 1360). The conduct of Boaz—his fine spirit, just feeling, piety, and amenity of manners—appears to great advantage in the book of Ruth, and forms an interesting portraiture of the condition and deportment of what was in his time the upper class of Israelites. By his marriage with Ruth he became the father of Obed, from whom came Jesse, the father of David. He was thus one of the direct ancestors of Christ, and as such his name occurs in Matt. i:5, but it is difficult to assign his date. (See RUTH; GENEALOGY.)

Late Jewish tradition, without any probability, identifies him with the judge, Ibzan.

2. The name given to one of the two brazen pillars which Solomon erected in the court of the temple (1 Kings vii:15, 21; 2 Chron. iii:17; Jer. lii:21). (See JACHIN, 2.)

BOCHERU (bö'k'e-ru), (Heb. *בֹּכֶרֹוּ*, *bo-ker-oo'*, firstborn, youth), one of the six sons of Azel, a de-

scendant of King Saul (1 Chron. viii:38), B. C. about 1037.

BOCHIM (bō'kim), (Heb. בוכים, *bo-keem'*, weepings), the name given to a place (probably near Shiloh, where the tabernacle then was) where an 'angel of the Lord' reproved the assembled Israelites for their disobedience in making leagues with the inhabitants of the land, and for their remissness in taking possession of their heritage. This caused the bitter weeping among the people for which the place took its name (Judg. ii:1).

BODY (bōd'ÿ), the rendering of several Hebrew words and the Gr. *σῶμα*, *so'mah*.

It generally refers to the animal frame as distinguished from the man himself. It differs from *sarx* (σάρξ), which has reference rather to the material or substance of the body. It is spoken of in the Scriptures as the temporary abode of the Spirit (2 Cor. v:1; 2 Pet. i:13, 14).

Figurative. (1) Our whole man, and Christ's whole manhood, are called a *body*, because the body is most obvious and visible (Rom. vi:12; Heb. x:5). The last is called *the body of his flesh*, to represent it in its state of humility, and to distinguish it from his mystical body, the church (Col. i:22). (2) Christ's *body* may sometimes denote himself, as fulfilling all righteousness for us (Rom. vii:4; Heb. x:10). (3) The church is called Christ's *body*: it consists of many members, or persons, united to him, and to one another by faith, love, and the ministry of the word and sacraments; and by him every true member is quickened, strengthened, and supported (Eph. iv:16; Col. ii:19; 1 Cor. xii:12, 13). (4) Our inward corruption is called a *body of sin and death*. It consists of numerous lusts closely connected; is of a base nature; and disposes men to seek after, and delight in carnal things. It is altogether sinful, the cause of sinful actions; and a chief ingredient of spiritual death (Rom. vi:6 and vii:24). (5) The *body of types* is what is prefigured by them (Col. ii:17). (6) The apostle speaks of a *natural body* in opposition to a *spiritual body* (1 Cor. xv:44). The body which is buried is *natural* (ψυχικόν), inasmuch as the power of the sensuous and perishable life (ψυχή) was its vital principle. The resurrection body will be *spiritual* (πνευματικόν) inasmuch as the *spirit* will be its life principle. It will therefore be a *spiritualized* body fitted to the new spiritual conditions of heaven.

BODY OF HEAVEN (bōd'ÿ ōv hēv'n), (Heb. עֲצֵם, *eh'tsem*, Exod. xxiv:10), from root signifying strong, the bone; hence, the body, the very thing or substance.

It is here used for "the heaven itself, the very heaven," in its clearness, in its unclouded blue appearance, with the unnumbered stars sparkling brightly therein (Exod. xxiv:10).

BOHAN (bō'hän), (Heb. בֹּחַן, *bo'han*, a thumb), a Reubenite in whose honor a stone was erected which afterwards served as a boundary-mark on the frontier between Judah and Benjamin (Jos. xv:6; xviii:17).

It does not appear from the text whether this stone was a sepulchral monument, or set up to commemorate some great exploit performed by this Bohan in the conquest of Canaan (B. C. 1714).

BOIL (boil), (Heb. שֶׁחַעַן, *shekh-eeen'*, burning, inflammation).

(1) A hard, painful tumor, an inflamed ulcer, which on suppuration discharges pus mixed with blood: a substance called the core is then re-

vealed, which is purulent, thick and tenacious, and can be drawn out in the form of a cylinder, more pus following. In the Scriptures the boil, *shechin*, seems to be used for three diseases: (1) An inflamed ulcer (Exod. ix:10, 11; Lev. xiii:18); (2) a carbuncle or the bubo of the plague (2 Kings xx:7; Is. xxxviii:21); (3) the black leprosy (Job ii:7). In Deut. xxviii:27, 35, the word is translated *botch*.

(2) Ordinary boils are common, in the warmer parts of the East, during the rainy season. They are unsightly, but are not dangerous. One type of boil, however, the carbuncle, arising from poisoned blood and eating away the flesh like an ulcer, may terminate the life. This was probably Hezekiah's disease. The application of a poultice of figs would do it good, but the rapid cure was due to God. (Davis, *Bib. Dict.*). (See DISEASES.)

BOLLED (bōld), (Heb. גִּבְעוּל, *gib-ale'*, the calyx of flowers), that which is "swollen," "podded" for seed (Exod. ix:31).

BOLSTER (bōl'stēr), (Heb. מְרִאֲשֵׁה, *mer-ah-ash-aw'*, at the head, 1 Sam. xix:13, 16; xxvi:7, 11, 16), elsewhere rendered PILLOW (which see).

BOLT (bōlt). See LOCK.

BOND (bōnd), the rendering of several words in the original. Among them are Heb. עֲשָׂוּר, *es-awr'*, אִשְׁוּר, *is-awr'*.

It denotes (1) A band or chain (Acts xxviii:20); (2) an obligation, or vow (Num. xxx:12); (3) oppression; captivity; affliction outward, or inward (Ps. cxvi:16; Phil. i:7); (4) the just laws of God or men, which restrain our sinful liberty, and unite us into a body in church or state (Jer. v:5).

BONDAGE (bōnd'āj), (Heb. עֲבָדוּת, *ab-dooth'*). See SLAVERY.

BONE (bōn). (1) The hard parts of animal bodies which support their frame (Job x:11).

(2) A dead body (1 Kings xiii:31; 2 Kings xiii:21).

(3) The whole man (Ps. xxxv:10).

Figurative. (1) A troubled soul is likened to *broken, burned, pierced, shaken, or rotten bones*; its distress is very painful, lasting, and difficult of cure (Ps. li:8; Lam. i:13; Ps. xlii:10; Jer. xxiii:9; Hab. iii:16); (2) to be *bone of one's bone, and flesh of his flesh*; or a *member of his flesh and bones*, is to have the same nature, and the nearest relation and affection (2 Sam. v:1; Gen. ii:23; Eph. v:30); (3) to *pluck the flesh off one's bones*, or to *break and chop* them, is most cruelly to oppress and murder (Mic. iii:2, 3); (4) iniquities are *in and on* men's bones, when their body is polluted by them, and lie under the guilt or fearful punishment of them (Job xx:11; Ezek. xxxii:27).

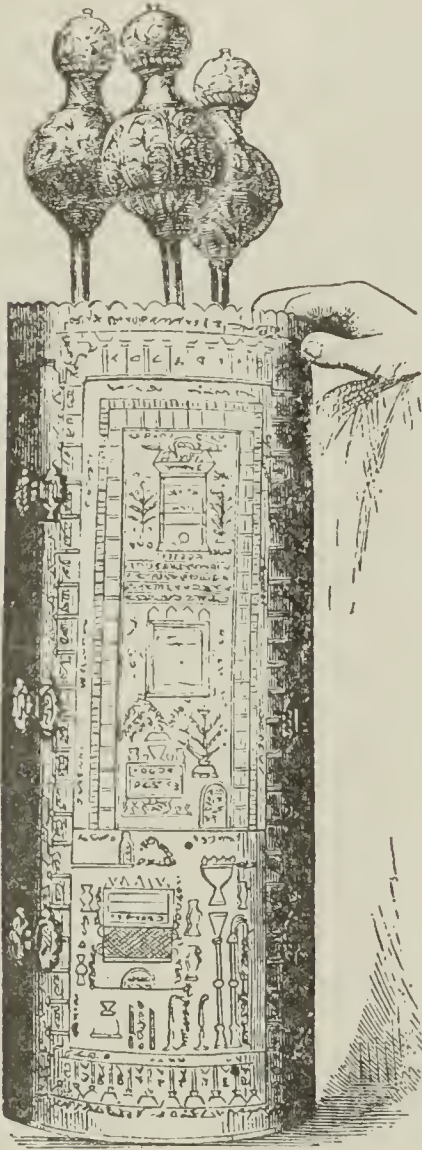

BONNET (bōn'nēt), (Heb. מִיגְבָּעוֹת, *mig-bar-oth'*, turbans, hilt-shaped; פְּהֵאֵיר, *peh-ayr'*, tires, ornaments).

Among the Jews, bonnets and miters were the same. They were made of a piece of linen, sixteen yards long, which covered their priests' heads, in form of a helmet; that of the common priests being roundish, and that of the high-priest pointed at the top (Lev. viii:13). Josephus (*Antiq.* vol. iii. chap. 7, sec. 2) describes the bonnet of the common priests as made of a great many rounds of linen, sewed into the form of a crown, and the whole covered with a fold of plain linen, to hide the seams; and the high-priest's as having

another above this; of a violet color, which was encompassed with a triple crown of gold, with three rows of the flower which the Greeks call *χάναος* or probably blue-bottle (*Antiq.* vol. iii. chap. 8) interrupted in the forepart with the golden plate, inscribed *Holiness to the Lord*. These bonnets and miters of the priests represented the pure and excellent royalty of our blessed High-Priest, Christ (Exod. xxviii:4).

BOOK (book), (Heb. סֵפֶר, *say'fer*, book, writing; Gr. βιβλος, *bib'los*), a written register of events or declaration of doctrines and laws (Gen. vi:; Esth. vi:1).

(1) The Books of Moses are called the *book of the law*; and a copy of Deuteronomy, if not the

Book of the Law (Closed).

whole of them, was laid up in some repository of the ark (Deut. xxxi:26). Anciently, men used to write upon tables of stone, lead, copper, wood, wax, bark, or leaves of trees. The ancient Egyptians wrote on linen, as appears from inscriptions on some bandages of their mummies; and so, it is likely, did the Hebrews. About B. C. 3670 they began to write on the inner films or skins of their paper reeds. Hesiod's works were written on tables of lead; the Roman laws on twelve tables of brass; Solon's on wood; and those of God on stone, probably marble. In very ancient times, the Persians and Ionians wrote on skins. When Attalus, king of Pergamos, formed his library, about B. C. 230, he either invented or improved

parliament. This, when written on, was either sewed together in long rolls, and written only on one side, in the manner of the copy of the law now used in the Jewish synagogues; or it was formed in the manner of our books. When the book was written on one of these rolls, it was wound on a stick, and turned off or on at the reader's pleasure;—hence the term *Volumc*. Some Indian books are extant, written on leaves of the Malabar palm tree. Books now, and for about five or six centuries backward, have been generally written on linen paper. The Jews had their copies

Book of the Law (Opened).

of the Scriptures carefully transcribed on rolls of parchment, and hence we read of a roll, or the roll of a book; or of the heavens rolled together as a scroll. It was probably a roll of the prophet Isaiah, which was put into our Lord's hands in the synagogue at Nazareth; and on such a roll Baruch wrote, at Jeremiah's dictation, the prophecy which the king of Judah burned (Jer. xxxvi; Luke iv:17).

(2) The Book of the Lord is either the Scriptures (Is. xxxiv:16) or his purpose, wherein everything is regulated and fixed (Ps. cxxxix:16; Rev. v:4; x:2) or his providential care and support of men's natural life (Exod. xxxii:32; Ps. lxix:28) or his omniscient observation, and fixed remembrance of things (Ps. lvi:8; Mal. iii:16).

(3) "Book of the Wars of the Lord" (Num. xxi:14) is thought by some to be an ancient document existing at the time of the writing of the Pentateuch, and quoted or alluded to by Moses. Another view is that it "is a collection of odes of the time of Moses himself, in celebration of the glorious acts of the Lord and of the Israelites" (K. and D., *Com.*). "Was this book a record of war songs sung over camp fires, just as the Bedouins do to-day? It seems most likely" (Harper, *Bible and Modern Discoveries*, p. 122).

(4) The Book of Life. In Phil. iv:3 Paul speaks of Clement and other of his fellow-laborers, 'whose names are written in the book of life.' On this Heinrichs (*Annotat. in Ep. Philipp.*) observes that as the future life is represented under the image of a *πολιτευμα* (*citizenship, community, political society*) just before (iii:20), it is in

agreement with this to suppose (as usual) a catalogue of the citizens' names, both natural and adopted (Luke x:20; Rev. xx:15; xxi:27), and from which the unworthy are erased (Rev. iii:5). Thus the names of the good are often represented as *registered in heaven* (Rev. iii:5). But this by no means implies a certainty of salvation (nor, as Doddridge remarks, does it appear that Paul in this passage had any particular revelation), but only that at that time the persons were *on the list*, from which (as in Rev. iii:5) the names of unworthy members might be erased. This explanation is sufficient and satisfactory for the other important passage in Rev. iii:5, where the glorified Christ promises to 'him that overcometh,' that he will not blot his name out of the book of life.

(5) **A Sealed Book** (Is. xxix:11; Rev. v:1-3) is a book whose contents are secret, and have for a very long time been so, and are not to be published till the seal is removed.

(6) **A Book or Roll Written Within and Without**, i. e., on the back side (Rev. v:1), may be a book containing a long series of events; it not being the custom of the ancients to write on the back side of the roll, unless when the inside would not contain the whole of the writing (Comp. Horace, *Ep.* i. 20, 3).

(7) **To Eat a Book** signifies to consider it carefully and digest it well in the mind (Jer. xv:16; Rev. x:9). A similar metaphor is used by Christ in John vi., where he repeatedly proposes himself as 'the Bread of Life' to be eaten by his people.

(8) **Man's Conscience** is like to a *book*; it records whatever he has done (Dan. vii:10).

(9) **Christ's Opening the Sealed Book** imports the predeclaration and exact fulfilment of the purposes of God relative to the New Testament church (Rev. v:9; viii:1). (See **ROLL; WRITING.**)

BOOKS, SACRED, OF THE EAST.

In relation to the comparison between the relative merit of the various "Sacred Books of the East" Sir Monier Monier-Williams, Professor of Sanskrit, Oxford Univ., Eng., says:

"(1) When I began investigating Hinduism and Buddhism, some well-meaning friends expressed their surprise that I should waste my time by grubbing in the dirty gutters of heathendom. After a little examination I found many gems there, and I began to be a believer in what is called 'the evolution and growth of religious thought.' 'These imperfect systems,' I said to myself, 'are clearly steps in the development of man's religious instincts and aspirations. Nay, it is probable that they were all intended to lead up to one true religion, and that Christianity is, after all, merely the climax, the complement, the fulfilment of them all.'

"Now, there is unquestionably a delightful fascination about such a theory, and, what is more, there are elements of truth in it. But I am glad of an opportunity of stating publicly that I am persuaded I was misled by its attractiveness, and that its main idea is quite erroneous. The charm and the danger of it, I think, lie in its apparent liberality, its breadth of view, and toleration.

"(2) Now, to express sympathy with this kind of liberality is sure to win applause among a certain class in these days of toleration and religious free trade. We must not forget, either, that our Bible tells us that God has not left Himself without witness, and that in every nation he that feareth God and worketh righteousness is accepted of Him.

"Yet I contend that this flabby, jelly-fish kind of tolerance is utterly incompatible with the nerve,

fiber and backbone that ought to characterize a manly Christian. A Christian's character ought to be exactly what the Bible intends it to be. Take that Sacred Book of ours. Handle reverently the whole volume; search it through and through, and mark well the spirit that pervades it. You will find no limpness, no flabbiness about its utterances. Vigor and manhood breathe in every page. It is downright and straightforward, bold, fearless, rigid and uncompromising.

"It tells us plainly to be either hot or cold. If God be God, serve Him. If Baal be God, serve Him. We cannot serve both. Only one name is given among men whereby we may be saved.

"(3) These non-Christian Bibles are developments in the wrong direction. They all begin with some ashes of true light and end in utter darkness. Pile them, if you will, on the left side of your study table, but place your own Holy Bible on the right side—all by itself, all alone, and with a wide gap between.

"(4) And now I crave permission to give at least two good reasons for venturing to contravene in so plainspoken a manner the favorite philosophy of the day. Listen to me, ye youthful students of the so-called Sacred Books of the East; search them through and through, and tell me, do they affirm of Vyasa, of Zoroaster, of Confucius, of Buddha, of Mohammed, what our Bible affirms of the founder of Christianity?—that *He, a sinless man, was made sin?* Not merely that He is the eradicator of sin, but that He, the sinless Son of Man, was himself made sin.

"Vyasa and the other founders of Hinduism enjoined severe penances, endless lustral washings, incessant purifications, painful pilgrimages, arduous ritual, and sacrificial observations, all with one idea of getting rid of sin. All their books say so. But do they say that the very men who exhausted every invention for the eradication of sin were themselves *sinless men made sin?*

"(5) As a layman I do not presume to interpret the apparently contradictory proposition put forth in our Bible that *a sinless man was made sin*. All that I now contend for is that it stands alone—that it is wholly unparalleled; that it is not to be matched by the shade of a shadow of a similar declaration in any other book claiming to be the exponent of any other religion in the world.

"Once again, ye youthful students of the so-called Sacred Books of the East; search them through and through, and see if they affirm of any one what our Bible affirms of the Founder of Christianity,—that He, a dead and buried man, was made life?—not merely that He is the giver of life, but that He is life?

"*'I am the life.'* 'When Christ, *who is our life*, shall appear.' 'He that hath the Son hath life,' Let me remind you, too, that 'the blood is the life,' and that our Sacred Book adds this matchless, this unparalleled, this astounding assertion: 'Except ye eat the flesh of the Son of Man and drink his blood, ye have no life in you.'

(6) "Again I say I am not presuming to interpret so marvelous, so stupendous a statement. All I contend for is that it is absolutely unique, and I defy you to produce the shade of a shadow of a similar declaration in any other sacred book in the world. And bear in mind that these two matchless, these two unparalleled declarations, are closely, intimately connected with the great central facts and doctrines of our religion—the incarnation, the crucifixion, the resurrection and the ascension of the Christ. Vyasa, Zoroaster, Confucius, Buddha, and Mohammed are all dead and buried; their flesh is dissolved; their bodies are extinct. Even their followers admit this.

"Christianity alone commemorates the passing into the heavens of its Divine Founder, not merely in the spirit, but 'in the body,' to be the eternal source of life and holiness to his people.

"(7) The two unparalleled declarations quoted by me from our Holy Bible make a gulf between it and the so-called Sacred Books of the East which sever the one from the other utterly, hopelessly, and forever. Not a mere rift, which may be easily closed up, and across which the Christian and the non-Christian may shake hands and interchange similar ideas in regard to essential truths, but a veritable gulf, which cannot be bridged over by any science of religious thought—yes, a bridgeless chasm which no theory of evolution can ever span.

"(8) Go forth, then, ye missionaries, in your Master's name; go forth into all the world, and after studying all its false religions and philosophies, fearlessly proclaim to suffering humanity the plain, the unchangeable, the eternal facts of the gospel.

"Dare to be downright with all the uncompromising courage of your own Bible, while with it your watchwords are love, joy, peace and reconciliation. Be fair, be charitable, be Christlike, but let there be no mistake. Let it be made absolutely clear that Christianity cannot, must not, be watered down to suit the palate of either Hindu, Parsec, Confucianist, Buddhist, or Mohammedan, and that whosoever wishes to pass from the false religion to the true can never hope to do so by the rickety planks of compromise, or by the help of faltering hands held out by half-hearted Christians.

"He must leap the gulf in faith, and the living Christ will spread his everlasting arms beneath and land him safely on the eternal rock." (*Trans. Vic. Inst.* vol. 20. p. 302.)

BOOTH (bōōth), (Heb. ^{בֵּית}_{סֹכֹת}, *sook-kaw'*, tabernacle or pavilion), a hut made of branches of trees, and thus distinguished from a tent properly so called.

Such were the booths in which Jacob sojourned for a while on his return to the borders of Canaan, whence the place obtained the name of Succoth (Gen xxxiii:17; and such were the temporary green sheds in which the Israelites were directed to celebrate the Feast of Tabernacles (Lev. xxiii:42, 43). As this observance was to commemorate the abode of the Israelites in the wilderness, it has been rather unwisely concluded by some that they there lived in such booths. But it is evident from the narrative, that, during their wanderings, they dwelt in *tents*; and, indeed, where, in that treeless region, could they have found branches with which to construct their booths? Such structures are only available in well-wooded regions; and it is obvious that the direction to celebrate the feast in booths, rather than in tents, was given because, when the Israelites became a settled people in Palestine, and ceased to have a general use of tents, it was easier for them to erect a temporary shed of green branches than to provide a tent for the occasion.

BOOTY (bōō'ty). See SPOIL.

BOOZ (bō'oz), (Gr. *Boós*, *booz*, Matt. i:5; Luke iii:32). See BOAZ.

BORDER (bōr'dēr).

1. Generally some form of the Heb. ^{גְּבוּל}, *gheb-ool'*, a boundary line.

2. *Mis-gheh' reth* (Heb. ^{מִסְגְּרֵת}, *inclosing*, Exod. xxv:25, 27; xxxvii:12, 14), the margins or panels placed round about the table of the shew bread

where the upper portion of the legs were fastened, also of a similar margin round the pedestals of the temple lavers (1 Kings vii:28-36; 2 Kings xvi:17).

3. *Kaw-nawf* (Heb. ^{קַנְפֵּי}, *edge*), the hem or fringe of a garment (Num. xv:38).

4. *Tore* (Heb. ^{תֵּירוֹר}, *a string*), a row or string of pearls or golden beads for the headdress (Cant. i:11).

BORITH (bō'rith), (Heb. ^{בֹּרִית}, *bo-rith'*), occurs in two passages of Scripture, first in Jer. ii:22, and then in Malachi iii:2.

From neither of these passages does it distinctly appear whether the substance referred to by the name of borith was obtained from the mineral or from the vegetable kingdom. But it is evident that it was possessed of cleansing properties.

BORN AGAIN (bōrn à-gěn) or **BORN OF GOD**. See REGENERATION.

BORROWING (bōr'rō-īng). On the general subject, as a matter of law or precept, see LOAN.

In Exod. xii:35 we are told that the Israelites, when on the point of their departure from Egypt, 'borrowed of the Egyptians jewels of silver, and jewels of gold, and raiment;' and it is added that 'the Lord gave the people favor in the sight of the Egyptians, so that they lent unto them such things as they required. And they spoiled the Egyptians.' This was in pursuance of a Divine command which had been given to them through Moses (Exod. iii:22; xi:2). This has suggested a difficulty, seeing that the Israelites had certainly no intention of returning to Egypt, or to restore the valuables which they thus obtained from their Egyptian 'neighbors.' It is admitted that the general acceptation of the word rendered *borrow* ^{שָׁאַל}, *shaal* is to *ask* or *beg*. Surely the Israelites had the moral right to "ask or beg" of the Egyptians a portion of their valuables after more than four hundred years of unrequited labor, but Sir J. W. Dawson has called attention to the fact that the Israelites were obliged to leave their own property in lieu of what they received from the Egyptians, as there was very little which they could take with them on such a long and weary march.

Lesser translates Exodus xii:35-36, as follows:

"And the children of Israel had done according to the word of Moses; and they had *asked* of the Egyptians, vessels of silver, and vessels of gold, and garments. And the Lord had given the people favor in the eyes of the Egyptians, *so that they gave unto them what they required.*" The Septuagint also renders the word "ask."

In all these passages the word which is rendered "borrow" is ^{שָׁאַל}, *shaw'al*—ask. (See Exodus iii:22, also xi:2 and xii:35.) If it had meant borrow in our sense the word should have been ^{לָוָה}, *lavah*, as in Prov. xxii:7; Is. xxiv:2; Ps. xxxvii:21, etc.

It would appear that after so many plagues had fallen upon the country, the Egyptians would have been glad to give the Israelites almost anything in order to get them away, and relieve them of the continual judgments which were being sent on their account.

BOSCATH (bōs'kath), (2 Kings xxii:1). See BOZKATH.

BOSOM (bōōz'um), (Heb. ^{חֶמֶק}, *khake*, to inclose).

It is usual with the western Asiatics to carry various sorts of things in the bosom of their dress, which forms a somewhat spacious depository, being wide above the girdle, which confines it so

tightly around the waist as to prevent anything from slipping through. (See BREAST.)

Figurative. (1) *To have one in our bosom* implies kindness, secrecy, intimacy (Gen. xvi:5; 2 Sam. xii:8). (2) Christ is *in the bosom of the Father*; that is, possesses the closest intimacy with, and most perfect knowledge of, the Father (John i:18). (3) Our Saviour is said *to carry his lambs in his bosom*, which touchingly represents his tender care and watchfulness over them. (4) *Abraham's bosom* is heaven, where the saints not only have the closest and kindest intimacy with that great patriarch, but with God in Christ, as a child in his father's bosom (Luke xvi:22). (5) As it seems the ancient used to carry money and what was very precious in their bosom, *a gift in the bosom* denotes one secretly given, and heartily accepted (Prov. xxi:14). (6) And wicked men are *rewarded into their bosom*, when their sins are heavily and sensibly punished (Ps. lxxix:12).

BOSOR (bō'sor), (Gr. Βοσorp, *bos-or'*).

1. The Aramaic form of Beor, father of Balaam (2 Pet. ii:15). (See BEOR.)

2. A town of Gilead, Gilead being doubtless used in a comprehensive sense (1 Macc. v:26, 36); perhaps Rezer, in the territory once belonging to Reuben (Josh. xx:8).

BOSORA (bōs'o-rà).

A town of Gilead (1 Macc. v:26-28), either Bosra in Hauran, or Bozrah in Edom.

BOSS (bōs), (Heb. גַּב, *gab*, the back or convex portion), the outstanding parts of a shield, and thus the thickest and strongest (Job xv:26). The word is sometimes rendered "back" (Ps. cxxix:3; Ezek. x:12), "bodies," i. e., *ramparts* (Job xiii:12), "nave," i. e., *rim* of a wheel (1 Kings vii:33)

BOSSES (bōs'ēs), the thickest and strongest parts; the prominent points of a buckler. (See ARMS, ARMOR.)

BOTCH (bōch), (Heb. שֶׁחַיָּה, *shekh-eev'*, inflammation).

The rendering in Deut. xxviii:27, 35, in A. V. of the Hebrew word elsewhere translated boil.

BOTNIM (bōt'nim), (Heb. בֹּטְנִים, *bowt-nim'*), occurs only in Gen. xliii:11.

Here the word rendered nuts is *botnim*. Among the various translations of this term Celsius enumerates walnuts, hazel-nuts, pine-nuts, peaches, dates, the fruit of the terebinth-tree, and even almonds; but there is little doubt that *pistachio-nuts* is the true rendering. (See NUTS.)

BOTTLE (bōt'tl), (Heb. כַּיִת, *khay'meth*, Gen. xxi:14; 1 Mos. vii:5; נֹדֶה, *node*, Judg. iv:19; Josh. ix:4, 13; נֶחֱבֵל, *neh'bel*, 1 Sam. i:24; x:3; 2 Sam. xvi:1; אֶבֶן, *obe*, Job xxxii:19; Gr. ἀσκός, *Matt. ix:17; Mark ii:22; Luke v:37*).

(1) Natural objects, it is obvious, would be the earliest things employed for holding and preserving liquids; and of natural objects those would be preferred which either presented themselves nearly or quite ready for use, or such as could speedily be wrought into the requisite shape. The skins of animals afford in themselves more conveniences for the purpose than any other natural product. Accordingly, in the fourth book of the *Iliad* (l:247) the attendants are represented as bearing wine for use in a *goatskin bottle*, ἄσκῳ ἐν ἀγέλω. In Herodotus also (ii:121) a passage occurs by which it appears that it was customary among the ancient Egyptians to use bottles made of skins, and from the language employed by him it may be inferred that a bottle was formed by sewing up the

skin and leaving the projection of the leg and foot to serve as a cock; hence it was termed ποδεών, *neck of a wineskin*. This aperture was closed with a plug or a string. In some instances every part was sewed up except the neck; the neck of the animal thus became the neck of the bottle. This alleged use of skin-bottles by the Egyptians is confirmed by the monuments.

(2) The Greeks and Romans also were accustomed to use bottles made of skins, chiefly for wine. Some interesting examples of those in use among the Romans are represented at Herculaneum and Pompeii.

Bottles of Skins.

(3) Skin bottles doubtless existed among the Hebrews even in patriarchal times; but the first clear notice of them does not occur till Joshua ix:4, where it is said that the Gibeonites, wishing to impose upon Joshua as if they had come from a long distance, took 'old sacks upon their asses, and wine bottles *old and rent and bound up*.' So in the 13th verse of the same chapter: 'These bottles of wine which we filled were new, and behold, they *be rent*; and these our garments and our shoes are become old by reason of the very long journey.' Age, then, had the effect of wearing and tearing the bottles in question, which must consequently have been made of skin. To the same effect is the passage in Job xxxii:19, 'My belly is as wine which hath no vent; it is ready to burst, like new bottles.'

(4) Our Saviour's language (Matt. ix:17; Luke v:37, 38; Mark ii:22) is thus clearly explained, 'Men do not put new wine into old bottles, else the bottles break and the wine runneth out and the bottles perish;' 'New wine must be put in new bottles and both are preserved.' To the conception of an English reader who knows of no bottles but such as are made of clay or glass, the idea of bottles breaking through age presents an insuperable difficulty, but skins may become 'old, rent and bound up;' they also prove, in time, hard and inelastic, and would in such a condition be very unfit to hold new wine, probably in a state of active fermentation. Even new skins might be unable to resist the internal pressure caused by fermentation.

(5) As the drinking of wine is illegal among the Moslems, who are now in possession of Western Asia, little is seen of the ancient use of skin bottles for wine, unless among the Christians of Georgia, Armenia and Lebanon, where they are still thus employed. In Georgia the wine is stowed in large ox-skins, and is moved or kept at hand for use in smaller skins of goats or kids. But skins are still most extensively used throughout Western Asia for water:

(6) It is an error to represent bottles as being made exclusively of dressed or undressed skins among the ancient Hebrews (Jones, *Biblical Cyclopædia*, in voc.). Among the Egyptians ornamental vases were of hard stone, alabaster, glass,

Water Carriers with Bottles.

ivory, bone, porcelain, bronze, silver or gold, and also, for the use of the people generally, of glazed pottery or common earthenware. As early as Thothmes III, assumed to be the Pharaoh of the Exodus (B. C. 1490), vases are known to have existed of a shape so elegant and of workmanship so superior, as to show that the art was not, even then, in its infancy.

Many of the bronze vases found at Thebes and in other parts of Egypt are of a quality which cannot fail to excite admiration, and which proves the skill possessed by the Egyptians in the art of working and compounding metals. Their shapes are most various—some neat, some plain, some grotesque; some in form not unlike our cream-jugs, others are devoid of taste as the wine bot-

1, 2. Gold 3. Cut Glass. 4. Earthenware. 5, 7. Porcelain.
6. Hard Stone. 8. Gold, with Plates and Bands.
9. Stone. 10. Alabaster, with Lid.

tles of our cellars or the flower pots of our conservatories. They had also bottles, small vases and pots used for holding ointment or for other purposes connected with the toilet, which were made of alabaster, glass, porcelain and hard stone. Many specimens of these are in the British Museum.

(7) The perishable nature of skin bottles led, at an early period, to the employment of instruments of a more durable kind, and it is to be presumed that the children of Israel would, during their sojourn in Egypt, learn, among other arts practiced by their masters, that of working in pottery-

ware. Thus, as early as the days of the Judges (iv:19; v:25), bottles or vases composed of some earthy material, and apparently of a superior make, were in use, for, what in the fourth chapter is termed 'a bottle,' is in the fifth designated 'a lordly dish.' Isaiah (xxx:14) expressly mentions 'the bottle of the potters' as the reading in the margin gives it, being a literal translation from the Hebrew, while the terms which the prophet employs show that he could not have intended anything made of skin—he shall *break it* as the *breaking* of the potter's vessel that is *broken* in pieces, so that there shall not be found in the bursting of it a *sherd* to take fire from the hearth, or to take water out of the pit.' In the 19th chapter, verse 1, Jeremiah is commanded: 'Go and get a potter's earthen bottle;' and (verse 10) 'break the bottle;' 'Even so, saith the Lord

Assyrian Glass Bottles (from the British Museum Collection).

of Hosts (verse 11), will I break this people and this city as one breaketh a potter's vessel, that cannot be made whole again.' (See also Jer. xiii:12-14.)

Figurative. (1) Metaphorically the word bottle is used, especially in poetry, for the clouds considered as pouring out and pouring down water (Job xxxviii:37). 'Who can stay the bottles of heaven?' (2) 'Put thou my tears in a bottle'—that is, 'treasure them up'—'have a regard to them as something precious' (Ps. lvi:8). (3) David was like a *bottle in the smoke*, when he was wasted with grief and trouble, and rendered almost useless (Ps. cxix:83). (4) The inhabitants of Jerusalem were *like bottles*, when God poured into them the wine of his wrath and burst and ruined them (Jer. xiii:12).

BOTTOM (böt'tüm), (Heb. מֵטֹלַל, *mets-ool-law'*, Zech. i:8), to be dark, shadowing. The primitive root מָלַל, *tsaw-lal'*, means to fall or settle; hence the idea of a valley.

The *bottom*, where Zechariah in his vision saw the *myrtle trees*, might denote the low and flat country of Babylon, or the distressed condition of the Jews there, during or after their captivity; and the afflicted lot of the saints in general (Zech. i:8).

BOTTOMLESS PIT (böt'tüm-lës pīt), (Rev. ix:1, 2, 11; xi:7; xvii:8; xx:1, 3). See ABYSS.

BOUGH (bou), (Heb. אֶמְרָא, *aw-meer'*, a branch, Is. xvii:6).

Figurative. (1) Christ is called the Branch, and the *Branch of Righteousness*. In His human nature He sprang forth of the root of Jesse; His human nature has no personality of its own, but consists as an engrafted branch in His Divine person; He flourishes and protects His people with His shadow; He brings forth the highest honor to God and greatest happiness to men; He is infinitely righteous in Himself and

in His acts; and is made of God to us righteousness (Jer. xxiii:5 and xxxiii:15; Zech. iii:8 and vi:12; Is. iv:2; xi:1 and liii:2). (2) When He is compared to a tree His *boughs* indicate His ordinances and His protecting and supporting power and grace (Ezek. xvii:23). (3) The saints are likened to *branches*; they are united to and derive their nourishing influence from Jesus, as their root; they refresh and protect the world with their shadow, and bring forth fruits of holiness (John xv:5). (4) In respect of spreading and beautiful appearance and influence the Jewish church and nation were *like boughs extending to the sea*; but they and their cities were cut down and destroyed by the Assyrians (Ps. lxxx:10, 11; Is. xxx:17, and xxvii:10, 11). (5) Kings and great men are likened to *branches*; they make a flourishing appearance, and have their favorites and subjects dwelling under *their boughs*, or laws; and depending on their protection and support (Ezek. xvii:3 and xxxi:3; Dan. xi:7 and iv:12). (6) Cities desolate of inhabitants and trade are likened to *forsaken boughs*, *uppermost branches*, turned dead, or *burned branches* (Is. xvii:9 and xxvii:10). (7) Joseph was a *fruitful bough*, or *flourishing son*, for his numerous and honorable offspring (Gen. xlix:22). (8) Children, or offspring, are called *branches*; being sprung from their ancestors they are an honor, help and pleasure to them (Job viii:16). (9) Sennacherib's *bough was lopped with terror*, when the Lord, by a terrible stroke, cut off his captains and numerous army as the leaves of a tree (Is. x:33). (10) Prosperity is likened to *branches*; it is glorious, useful and protecting (Dan. iv:14). (11) To *put the branch to the nose* is to smell branches carried in honor of idols; or to smell the censer of sacred incense; or by sin to furnish fuel for the devouring wrath of God (Ezek. viii:17).

BOUNDARIES (bound'ä-rîz). See LANDMARKS.

BOUNTIFULNESS (boun'tî-ful-nēs). Several words in the original are so translated: Heb. טוב, *tobe*, good, Prov. xxii:9); שוע, *sho'ah*, rich, Is. xxxii:5; גמול, *gam-mal'*, Ps. xliii:6; Gr. εὐλογία, *yoo-log-ee'ah*, good speech or blessing, 2 Cor. ix:5, 6. In general it denotes liberality in the bestowment of gifts, favors, kindness (1 Kings x:15; Is. xxxii:5; Ps. cxvi:7).

Egyptian Bows with Quivers.

BOW (bō), (Heb. קשת, *keh'sheth*, bow).

The bow is frequently mentioned symbolically in Scripture. In Ps. vii:12 it implies victory, signifying judgments laid up in store against of-

fenders. It is sometimes used to denote lying and falsehood (Ps. lxiv:4; cxx:4; Jer. ix:3), probably from the many circumstances which tend to render a bow inoperative, especially in unskillful hands. Hence also 'a deceitful bow' (Ps. lxxviii:57; Hos. vii:16); with which compare Virgil's 'Perfidus ensis frangitur' (*The treacherous sword is broken*).

The bow also signifies any kind of arms. The bow and spear are the most frequently mentioned because the ancients used these most (Ps. xlv:6; xlvi:9; Zech. x:4; Josh. xxiv:12).

In Habak. iii:9 'thy bow was made bare' means that it was drawn out of its case. The Orientals used to carry their bows in a case hung on their girdles.

In 2 Sam. i:18 the Authorized Version has 'Also he (David) bade them teach the children of Judah the use of the bow.' 'Here,' says Professor Robinson (*Addit. to Calmet*), 'the words "the use of" are not in the Hebrew, and convey a sense entirely false to the English reader. It should be "teach them the bow," i. e., *the song of the bow*, from the mention of this weapon in verse 22. (See ARMS, ARMOR.)

BOWELS (bou'ëls), (Heb. ימים, *me-yim'*), are often put by the Hebrew writers for the internal parts generally, the inner man, and so also for *heart*, as we use that term.

(1) Hence the bowels are made the seat of tenderness, mercy and compassion; and thus the Scriptural expressions of the bowels being moved, bowels of mercy, straitened in the bowels, etc.

(2) By a similar association of ideas the bowels are also sometimes made the seat of wisdom and understanding (Job xxxviii:36; Ps. li:6; Is. xvi:11). (3) Paul longed after the Philippians *in the bowels of Christ*; that is, in the most ardent love and tenderest pity, wrought by Christ's Spirit, and similar, though not equal, to Jesus' love to men (Phil. i:8). (4) "Trouble, pain," and *boiling of bowels* import terrible distress and grief (Job xxx:27; Jer. iv:19; Lam. i:20). (5) The curse coming *into one's bowels* like water, implies the execution of its fearful effects on the soul and the whole man (Ps. cix:18).

BOWING (bou'ing). See ATTITUDES.

BOWL (bōl), (Heb. גללה, *gal-lah'*, cruse). (See DISH.)

BOWMAN (bōu'man), (Heb. קשתן, *keh'sheth*, bow, and יור, *yaw-maw'*, shoot, Jer. iv:29). (See ARMS, ARMOR.)

BOWSHOT (bō'shōt), (Heb. קשת, *keh'sheth*, bow, and טו, *taw-khaw'*, to stretch, Gen. xxi:16). "In the distance as archers," i. e., as far as archers are wont to place their targets.

BOX (bōks), (Heb. פק, *pak*), so rendered 2 Kings ix:1, 3 properly denotes a "flask;" 1 Sam. x:1. Box would be better rendered "vial."

BOX-TREE (bōks-trē), (Is. xli:19).

A small evergreen tree, either the same with or closely resembling the shrubby box of our gardens. One species (*Buxus longifolia*) is found on Lebanon, and may once have been common in Palestine. It is believed that the Phœnicians imported the wood of other species from Chittim, and used it with ivory for inlaid work. The perfect proportions of this tree, its perennial beauty of foliage, and its utility illustrate the prosperity and grace which God will bestow on Zion (Is. lx:13). (See TEASHER.)

BOY (boi), (Heb. יָלֵד, *yeh'led*, a young *lad* or *child*, Joel iii:3; Zech. viii:5; נַח'ר, *nah'ar*, Gen. xxv:27), a term used of those who are from the age of infancy to adolescence.

BOZEZ (bō'zez), (Heb. בֹּזֵז, *bo-tsatez'*, height, shining), the name of one of the sharp rocks in the passage by which Jonathan entered the Philistines' garrison (1 Sam. xiv:4, 5).

BOZKATH (böz'kath), (Heb. בֹּזְכָת, *bawts-cath'*, height), a city of Judah in the lowlands (Josh. xv:39). In 2 Kings xxii:1 it is spelled Boscath in the A. V.

BOZRAH (böz'rah), (Heb. בֹּזְרָא, *bawts-rav'*).

1. An ancient city, known also to the Greeks and Romans by the name of Bostra. In most of the passages of the Old Testament where it is mentioned, it appears as a chief city of the Edomites (Is. xxxiv:6; lxiii:1; Amos i:12; Jer. xlix:13, 22). Since Bozrah lay not in the original territory of the Edomites, *i. e.*, southeast of Judah, but north of the territory of the Ammonites, in Auranitis, or Hauran, we must suppose that the Edomites had become masters of it by conquest, and that it was afterwards taken from them by the Moabites, who for a time retained it in their possession. Bozrah lay southward from Edrei, one of the capitals of Bashan, and, according to Eusebius, twenty-four Roman miles distant from it. The Romans reckoned Bozrah as belonging to Arabia Deserta (Amm. Marcell. xiv:27). Alexander Severus made it the seat of a Roman colony. In the acts of the Nicene, Ephesian and Chalcedonian councils mention is made of bishops of Bozrah, and at a later period it became an important seat of the Nestorians (Asseman, *Biblioth. Orient.* tom. iii. pt. 2, pp. 595, 730). Abulfeda makes it the capital of the Hauran, in which, according to Burekhardt, it is still one of the most important towns.

The same writer gives a very ample description of the various ruins, the extent and importance of which are alone sufficient to evince the ancient consequence of the place. They are of various kinds, Greek, Roman and Saracenic, with traces of the native works in the private dwellings.

These monuments of ancient grandeur serve but to heighten the impression which is created by the present desolation and decay. 'Bozrah,' says Lord Lindsay, 'is now for the most part a heap of ruins, a most dreary spectacle; here and there the direction of a street or alley is discernible, but that is all. The modern inhabitants—a mere handful—are almost lost in the maze of ruins. Olive trees grew here within a few years, they told us—all extinct now, like the vines for which the Bostra of the Romans was famous. And such, in the nineteenth century, and under Moslem rule, is the condition of a city which even in the seventh century, at the time of its capture by the Saracens, was called by Caled "the marketplace of Syria, Irak and the Hedjaz." "I have sworn by myself, saith the Lord of Hosts, that Bozrah shall become a desolation and reproach, a waste and a curse, and all the cities thereof shall be perpetual wastes!" (Jer. xlix:13). 'And it is so' (Kitto). W. Ewing, *Hastings' Bib. Dict.*, says: *El-Bāscireh* seven miles southwest of *Tufleah*, the ancient Tophel (Deut. i:1), on the main road, north from Petra, suits the geographical conditions, but the ruins are insignificant. Another possible identification is *Kusur Bashair*. These towers lie about fifteen miles southeast of Dibon (*Dhibān*), and more probably represent

Bezer 'in the wilderness,' the city of refuge (Deut. iv:43), and the Bezer of the Moabite Stone. (See, however, BEZER.)

2. In Jer. xlviii:24 Bozrah is named among the cities of Moab, but it does not hence follow, as Raumer and others contend, that we should regard them as different cities, for, in consequence of the continual wars, incursions and conquests which were common among the small kingdoms of that region, the possession of particular cities often passed into different hands. Thus Selah, *i. e.*, Petra, the capital of the Edomites, taken from them by Amaziah, king of Judah (2 Kings xiv:7), is also mentioned by Isaiah (xvi:1) among the Moabitish cities. However Porter identifies it with *Busrah*, which lies in the open plain about sixty miles south of Damascus. The vineyards are destroyed.

BRACELET (brās'lēt), (Heb. עֵטָאֵר, *ets-aw-daw'*).

(1) This name, in strict propriety, is as applicable to circlets worn on the upper part of the arm as to those worn on the wrist, but as it has been found convenient to distinguish the former as Armlets, the term bracelet must be restricted to the latter. These are, and always have been, much in use among Eastern females. Many of them are of the same shapes and patterns as the armlets, and are often of such considerable weight and bulk as to appear more like manacles than ornaments. Many are often worn one above another on the same arm, so as to occupy the greater part of the space between the wrist and the elbow.

(2) The materials vary according to the condition of the wearer, but it seems to be the rule that bracelets of the meanest materials are better than none. Among the higher classes they are of mother-of-pearl, of fine flexible gold, and of silver, the last being the most common. The poorer women use plated steel, horn, brass, copper, beads and other materials of a cheap description.

(3) Some notion of the size and value of the bracelets used both now and in ancient times may be formed from the fact that those which were presented by Eliezer to Rebecca weighed ten shekels (Gen. xxiv:22). The bracelets are sometimes flat, but more frequently round or semi-circular, except at the point where they open to admit the hand, where they are flattened. They are frequently hollow, giving the show of bulk (which is much desired) without the inconvenience. Bracelets of gold twisted rope-wise are those now most used in Western Asia, but we cannot determine to what extent this fashion may have existed in ancient times.

BRAMBLE (brām'b'l). See THORN.

BRANCH (brānch), (Heb. אֵמֶר, *a-meer'*, summit; בֶּדֶן, *bad*, branch).

(1) As trees, in Scripture, denote great men and princes, so branches, boughs, sprouts or plants denote their offspring. In conformity with this way of speaking, Christ, in respect of his human nature, is styled a rod from the stem of Jesse, and a branch out of his roots (Is. xi:1), that is, a prince arising from the family of David.

(2) This symbol was also in use among the ancient poets (Sophocles, *Electra*, iv:18; Homer, *Iliad*, ii:47, 170, 211, 252, 349; Pindar, *Olymp.*, ii:6, etc.). 'And so even in our English tongue (remarks Wemyss), the word *imp*, which is originally Saxon, and denotes a plant, is used to the same purpose, especially by Fox, the martyrolo-

gist, who calls King Edward VI an imp of great hope, and by Thomas Cromwell, Earl of Essex, in his dying speech, who has the same expression concerning the same prince.

(3) A branch is the symbol of kings descended from royal ancestors, as branches from the root (Ezek. xvii:3, 10; Dan. xi:7). As only a vigorous tree can send forth vigorous branches, a branch is used as a general symbol of prosperity (Job viii:16). Jehoiachin is called the *highest branch* of the cedar, as being a king. (Ezek. xvii:3).

(4) From these explanations it is easy to see how a *branch* becomes the symbol of the Messiah, when referring to the prosperity of his kingdom (Is. xi:1; iv:2; Jer. xxiii:5; Zech. iii:8; vi:12, and elsewhere).

(5) *Branch* is also used as the symbol of idolatrous worship (Ezek. viii:17), probably in allusion to the general custom of carrying branches as a sign of honor.

(6) An *abominable branch* (Is. xiv:19) means a withered branch or a useless *sucker* shooting from the root. A better rendering would be "an *offensive branch*;" i. e., a *useless* one.

BRASS (brās), (Heb. נְחֹשֶׁת, *nekh-o'sheth*; Gr. χαλκός, *khal-kos'*).

This word occurs in the Authorized Version. But brass is a factitious metal, not known to the early Hebrews, and wherever it occurs, *copper* is to be understood. That copper is meant is shown by the text: 'Out of whose hills thou mayest dig brass' (Deut. viii:9), it being of course impossible to dig a factitious metal, whether brass or bronze, out of mines. That compound of copper and zinc (68 of copper to 34 parts of zinc), which forms our brass does not appear to have been known to the ancients, but we have every evidence that they knew and used *bronze* arms, implements of that metal having been found in great abundance among ancient tombs and ruins. This, instead of pure copper, is probably sometimes, in the later Scriptures, meant by the word *nechash*. (See COPPER.)

Figurative. (1) *Brass* (to retain the word) is in Scripture the symbol of insensibility, baseness and presumption or obstinacy in sin (Is. xlviii:4; Jer. vi:28; Ezek. xxii:18). (2) Brass is also a symbol of strength (Ps. cvii:16; Is. xlviii:4; Mic. iv:13). (3) So in Jer. i:18 and xv:20, brazen walls signify a strong and lasting adversary or opponent. (4) The description of the Macedonian empire as a *kingdom of brass* (Dan. ii:39) will be better understood when we recollect that the arms of ancient times were mostly of bronze; hence the figure forcibly indicates the warlike character of that kingdom. (5) The *mountains of brass*, in Zech. vi:1, are understood by Vitranga to denote those firm and immutable decrees by which God governs the world, and it is difficult to affix any other meaning to the phrase (Comp. Ps. xxxvi:6). (6) The Grecian kingdom of Alexander the Great, according to the usual interpretation (see DANIEL) was a kingdom of brass, less splendid than the rich Medo-Persian monarchy, which preceded it, but more warlike (Dan. ii:34). (7) Sinners are likened to *brass, iron, tin and lead*, and said to have a *brow of brass*, to denote their unworthiness, baseness, hardness of heart and impudence in sin (Is. xlviii:4; Jer. vi:28; Ezek. xxii:18).

BRAYING IN A MORTAR (brā'ing in a môr'tēr), (Prov. xxvii:22). See PUNISHMENTS.

BRAZEN SEA (brā-z'n sē). A great laver of brass placed in the priest's court of Solomon's temple (1 Kings vii:23-26; 2 Chron. iv:2-6). It rested on twelve bullocks of brass. At the

destruction of the temple it was destroyed by the Chaldeans (2 Kings xxv:13; Jer. lii:17). (See LAVER).

BRAZEN SERPENT (brā'z'n sēr'pent). See SERPENT.

BREAD (brĕd), (Heb. לֶחֶם, *lekh'em*). The word "bread" was of far more extensive meaning among the Hebrews than with us.

There are passages in which it appears to be applied to all kinds of victuals (Luke xi:3); but it more generally denotes all kinds of baked and pastry articles of food. It is also used, however, in the more limited sense of bread made from wheat or barley, for rye is little cultivated in the East. Barley being used chiefly by the poor, and for feeding horses (see BARLEY), *bread*, in the more limited sense, chiefly denotes the various kinds of cake-like bread prepared from *wheaten* flour.

Corn, or wheat, is ground daily in the East (see MILL). After the wheaten flour is taken from the hand-mill it is made into a dough or paste in a small wooden trough. It is next leavened, after which it is made into thin cakes or flaps, round or oval, and then baked.

(1) **The Kneading.** The *kneading* troughs, in which the dough is prepared, have no resemblance to ours in size or shape. It is done in

Egyptians Kneading Dough with Their Hands.

small wooden bowls; and that those of the ancient Hebrews were of the same description as those now in use appears from their being able to carry them, together with the dough, wrapped up in their cloaks, upon their shoulders, without difficulty. The Bedouin Arabs, indeed, use for this purpose a leather, which can be drawn up into a bag by a running cord along the border, and in which they prepare and often carry their dough. This might equally, and in some respects better, answer the described conditions; but, being especially adapted to the use of a nomade and tent-dwelling people, it is more likely that the

Egyptians Kneading Dough with Their Feet.

Israelites, who were not such at the time of the Exode, then used the wooden bowls for their 'kneading-troughs' (Exod. viii:3; xii:34; Deut. xxviii:5, 7).

It is clear, from the history of the departure from Egypt, that the flour had first been made into a dough by water only, in which state it had been kept some little time before it was leavened; for when the Israelites were unexpectedly (as to the moment) compelled in all haste to withdraw, it was found that, although the dough had been prepared in the kneading-trough, it was still unleavened (Exod. xii:34; Comp. Hos. vii:4); and it was in commemoration of this circumstance that they and their descendants in all ages were enjoined to eat only unleavened bread at the feast of the Passover.

(2) **Public Ovens.** The dough thus prepared is not always baked at home. In towns there are public ovens and bakers by trade; and although the general rule in large and respectable families is to bake the bread at home, much bread is bought of the bakers by unsettled individuals and poor persons; and many small households send their dough to be baked at the public oven, the baker receiving for his trouble a portion of the baked bread, which he adds to his day's stock of bread for sale. Such public ovens and bakers by trade must have existed anciently in Palestine and in the East generally, as is evident from Hos. vii:4 and Jer. xxxvii:21.

(3) **Another Mode of Baking.** Another mode of baking bread is much used, especially in the villages. A pit is sunk in the middle of the floor of the principal room, about four or five feet deep by three in diameter, well lined with compost or cement. When sufficiently heated by a fire kindled at the bottom the bread is made by the thin pancake-like flaps of dough being, by a peculiar knack of hand in the women, stuck against the oven, to which they adhere for a few moments till they are sufficiently dressed. As this oven requires considerable fuel, it is seldom used except in those parts where that article is somewhat abundant and where the winter cold is severe enough to render the warmth of the oven desirable, not only for baking bread, but for warming the apartment.

(4) **Baking with Pebbles.** Another sort of oven, or rather mode of baking, is much in use among the pastoral tribes. A shallow hole, about six inches deep by three or four feet in diameter, is made in the ground; this is filled up with dry brushwood, upon which, when kindled, pebbles are thrown to concentrate and retain the heat. Meanwhile the dough is prepared, and when the oven is sufficiently heated the ashes and pebbles are removed and the spot well cleaned out. The dough is then deposited in the hollow, and is left there over night. The cakes thus baked are about two fingers thick, and are very palatable. There can be little doubt that this kind of oven and mode of baking bread were common among the Jews.

(5) **Baking Pans.** There is a baking utensil called in Arabic *tajeu*, which is the same word (*tay-gau'oo*) *frying-pan* by which the Septuagint renders the Hebrew *machabath*, in Lev. ii:5. This leaves little doubt that the ancient Hebrews had this *tajeu*. It is a sort of pan of earthenware or iron (usually the latter), flat or slightly convex, which is put over a slow fire, and on which the thin flaps of dough are laid and baked with considerable expedition, although only one cake can be baked in this way at a time. This is not a household mode of preparing bread, but is one of the simple and primitive processes employed by the wandering and semi-wandering tribes, shepherds, husbandmen and others, who have occasion to prepare a small quantity of daily bread in an easy, off-hand manner. Bread is also baked

in a manner which, although apparently very different, is but a modification of the principle of the *tajeu*, and is used chiefly in the houses of the peasantry. There is a cavity in the fire-hearth, in which, when required for baking, a fire is kindled and burnt down to hot embers. A plate of iron, or sometimes copper, is placed over the hole, and on this the bread is baked.

(6) **Baking in Ashes.** Another mode of baking is in use chiefly among the pastoral tribes, and by travelers in the open country, but is not unknown in the villages. A smooth, clear spot is chosen in the loose ground, a sandy soil—so common in the Eastern deserts and harder lands—being preferred. On this a fire is kindled, and, when the ground is sufficiently heated, the embers and ashes are raked aside, and the dough is laid on the heated spot, and then covered over with the glowing embers and ashes which had just been removed. The bread is several times turned, and in less than half an hour is sufficiently baked. Bread thus baked is called in Scripture *'uggah* (Gen. xviii:6; 1 Kings xvii:13; Ezek. iv:12), and the indication (1 Kings xix:6) is very clear, *'ug-gath retzafim* (*coal-cakes*), *i. e.*, cakes baked under the coals. According to Busbequius (*Itin.* p. 36), the name of *Hugath*, which he interprets *ash-cakes*, or *ash-bread*, was in his time still applied in Bulgaria to cakes prepared in this fashion, and as soon as a stranger arrived in the village; the women baked such bread in all haste in order to sell it to him. This is the kind of bread Sarah, on the arrival of three strangers, was required to bake 'quickly,' such ash-bread—though not for sale, but for the hospitable entertainment of the unknown travelers. The bread thus prepared is good and palatable, although the outer rind, or crust, is apt to smell and taste of the smoke and ashes. The necessity of turning these cakes gives a satisfactory explanation of Hos. vii:8, where Ephraim is compared to a cake not turned, *i. e.*, only baked on one side, while the other is raw and adhesive.

(7) **Different Kinds of Bread.** The second chapter of Leviticus gives a sort of list of the different kinds of bread and cakes in use among the ancient Israelites. This is done incidentally for the purpose of distinguishing the kinds which were and which were not suitable for offerings. Of such as were fit for offerings we find:

1. *Bread baked in ovens* (Lev. ii:4), but this is limited to two sorts, which appear to be (1) the bread baked inside the vessels of stone, metal or earthenware, as already mentioned; (2) the bread prepared by dropping with the hollow of the hand a thin layer of the almost liquid dough upon the outside of the same oven, and which, being baked dry the moment it touches the heated surface, forms a thin, wafer-like bread or biscuit. A cake of the former was offered as the first of the dough (Lev. viii:26), and is mentioned in 2 Sam. vi:19, with the addition of (2) 'bread'—*perforated bread*.

2. *Bread baked in a pan*—(1) that which, as before described, is baked in, or rather on, the *tajeu*. This also as an offering was to be unleavened and mixed with oil. (2) This, according to Lev. ii:6, could be broken into pieces and oil poured over it, forming a distinct kind of bread and offering.

3. *Bread baked upon the hearth*—that is to say, baked upon the hearthstone, or plate covering the firepit, which has already been mentioned. This also was to be mixed with oil (Lev. ii:7).

As these various kinds of baked breads were allowed as offerings, there is no question that they were the best modes of preparing bread

known to the Hebrews in the time of Moses, and as all the ingredients were such as Palestine abundantly produced, they were such offerings as even the poorest might without much difficulty procure.

(8) **Other Modes of Preparation.** Besides these there are two other modes of preparing bread indicated in the Scriptures, which cannot with equal certainty be identified by reference to modern usages. (1) One of these is the *nikuddim* of 1 Kings xiv:3, translated 'cracknels' in the Authorized Version, an almost obsolete word denoting a kind of crisp cake. It is indeed not improbable that they may have been a sort of biscuit or small and hard baked cakes. The existence of such biscuits is further implied in Josh. ix:5, 12, where the Gibeonites describe their bread as having become as *hard as biscuit* (not 'moldy,' as in the Authorized Version), by reason of the length of their journey. (2) The other was a kind of fancy bread, the making of which appears to have been a rare accomplishment, since Tamar was required to prepare it for Amnon in his pretended illness (2 Sam. xiii:6). As the name only indicates that it was some favorite kind of cake, of which there may have been different sorts, no conjecture with reference to it can be offered. See Hezel, *Real-Lexicon*, art. '*Brod*;' Burckhardt, *Notes on the Bedouins*; and the various travelers in Palestine, etc., particularly Shaw, Niebuhr, Monconys, Russell, Lane (*Modern Egyptians*), Perkins, Olin, etc.

Figurative. (1) *Bread of heaven* is the manna showered down from heaven on the Hebrews in the wilderness for their food (Ps. cv:40). (2) *Bread of adversity and tears* is such affliction and sorrow as overwhelm the spirit and render men careless of food (Is. xxx:20; Ps. lxxx:5). (3) *Bread of sorrow* is sustenance procured and enjoyed, with much labor and grief (Ps. cxxvii:2). (4) *Bread of affliction and water of affliction* denote coarse and scanty provision, such as jailers in the East cast to their prisoners, whom they are expected to treat with great cruelty (Deut. xvi:3; 1 Kings xxii:27). (5) *Bread of the governor*, the salary appointed for his sustenance (Neh. v:14). (6) *Bread of men*, common food (Ezek. xxiv:17). (7) *Bread of mourners*, coarse food, such as people used in time of mourning (Hos. ix:4). (8) *Bread of wickedness, of deceit, of violence, of idleness*, is that which is acquired by sin, by fraud, robbery, oppression, or is got in a way of sloth; or it is wickedness, deceit, violence and sloth delighted in by our soul (Prov. iv:17; xx:17; xxxi:27). (9) *Bread pleasant when eaten in secret* means illicit and other unlawful pleasures (Prov. ix:17). (10) *Bread, or bread and water* often denote all necessary outward things, and they are a staff and stay, are necessary for the support of mortals (Is. iii:1; xxxiii:17; Matt. vi:11).

BREAD OF THE PRESENCE (brěd ōv the přez'ens). See SHEW BREAD.

BREAST (brěst), (Heb. שֵׁן, *shad*, the female nipple; דָּד, *dad*, breast).

The females in the East are more anxiously desirous than those of northern climates of a full and swelling breast; in fact, they study *embonpoint* of appearance to a degree uncommon among ourselves; and what in the temperate regions of Europe might be called an elegant slenderness of shape, they consider as a meagre appearance of starvation. They indulge these notions to excess. It is necessary to premise this before we can enter thoroughly into the spirit of the lan-

guage in Cant. viii:8-10, which Mr. Taylor renders as follows:

BRIDE. Our sister is little, and she hath no breasts; *being as yet too young; immature;*
What shall we do for our sister, in the day when she shall be spoken for?

BRIDEGROOM. If she be a wall, we will build on her [*ranges*] turrets of silver;
If she be a doorway, we will frame around her panels of cedar.

BRIDE. I am a wall and my breasts like Kiosks,
Thereby I appeared in his eyes as one who offered peace [*repose; enjoyment*].

This instance of self-approbation is peculiarly in character for a female native of Egypt, in which country, Juvenal sneeringly says, it is nothing uncommon to see the breast of the nurse, or mother, larger than the infant she suckles. The same conformation of a long and pendent breast is marked in a group of women musicians found by Denon painted in the tombs on the mountain to the west of Thebes, on which he observes that the same is the shape of the bosom of the present race of Egyptian females. The ideas couched in these verses appear to be these: "Our sister is quite young," says the bride; "but," says the bridegroom, "she is upright as a wall; and if her breasts do not project beyond her person, as kiosks project beyond a wall, we will ornament her dress (head-dress?) in the most magnificent manner with turret-shaped diadems of silver." This gives occasion to the reflection of the bride, understood to be speaking to herself aside: "As my sister is compared to a wall, I also in my person am upright as a wall; but I have this further advantage, that my bosom is ample and full, as a kiosk projecting beyond a wall; and, though kiosks offer repose and indulgence, yet my bosom offers to my spouse infinitely more effectual enjoyment than they do." "This, it may be conjectured," says Calmet, "is the simple idea of the passage; the difference being that turrets are built on the top of a wall; kiosks project from the front of it. The name kiosk is not restricted to this construction, but includes most of what are commonly called summer houses or pavilions." (See BOSOM).

Figurative. (1) In Ezek. xxiii:3:8, *breasts, or teats of virginity*, pressed and bruised, implies that even in the early ages of Israel's existence the people were given to idolatry. The same figures are employed by the prophets in depicting the continued and obstinate idolatries both of Judah and Israel (Ezek. xxiii; Hos. ii:2), and in the thirty-fourth verse of this latter chapter the plucking off the breast seems to denote the desperate anguish which the people would feel in parting with their beloved sin (Hos. ii:2). (2) *To smite or taber on the breasts* imports great affliction and grief (Nah. ii:7; Luke xxiii:48). (3) The Persian empire, according to the usual interpretation (see DANIEL), is compared to a *breast and arms of silver* to denote the prudence, humanity and valor wherewith it was founded and the wealth thereof (Dan. ii:32).

BREASTPLATE (brěst-plāt), (Heb. שָׁרָיִת, *shoreshen*, covering on the breast), a piece of defensive armor. (See ARMS, ARMOR.)

BREASTPLATE OF THE HIGH PRIEST (brĕst-plāt ōv the hī prĕst), a splendid ornament covering the breast of the high priest. It was composed of richly embroidered cloth, in which were set, in four rows, twelve precious stones, on each of which was engraven the name of one of the twelve tribes of Israel (Exod. xxviii:15-29; xxxix:8-21). (See PRIEST, HEBREW PRIESTHOOD, 3).

Breastplate of the High Priest.

The breastplate was kept in position by the following simple device. At the right and left top corners, respectively, of the outer jeweled square, was fixed a gold ring, through which was passed a gold chain, or, rather, cord (for it had no links) 'of wreathen work.' These chains were then passed over, or through, or otherwise attached to a couple of gold ornaments (A.V. 'ouches')—probably rosettes of gold filigree—which had previously been fixed to the shoulder-pieces of the ephod in front. Similarly, at the right and left bottom corners of the inner square were fixed two gold rings, through each of which was passed a ribbon or 'lace of blue' (R.V.). Corresponding to these two rings on the breastplate were two of the same material, attached, like the rosettes above mentioned, to the shoulder-pieces of the ephod. Their precise position, however, is difficult to determine, owing to the want of clearness in the existing description of the ephod (Ex. xxviii:6-12). They may perhaps be best thought of as sewed to the shoulder-pieces of the ephod at points lower than the rosettes by the length of the chains and square, so that, in short, the rings of the ephod and those of the breastplate were in immediate contact and fastened together by the blue lace. The latter, in

this way, would be entirely hidden by the breastplate, which would account for the inferior material of the lower fastening compared with that of the upper. By this means the breastplate was securely held in its place, so that it should rest just 'above the cunningly woven band of the ephod' (verse 28). The main purpose of the breastplate, there can scarcely be any longer a doubt, was to provide a receptacle for the sacred lot, the mysterious URIM and THUMMIM (which see). (See PRIEST, HEBREW PRIESTHOOD.)

A. R. S. Kennedy, *Hastings' Bib. Dict.*

BREECHES (brĕch'ĕz), (Heb. מִיְכַנְנִימִים, *mik-nawce'yim*, two drawers), made of linen to hide the parts of shame, worn by the priests (Ex. xxviii:42; xxxix:28; Lev. vi:10; xvi:4; Ez. xliv:18; comp Joseph. *Ant.* iii:7, sec. 1; Philo, *De Monarch.* lib. ii. c:5, Opp. ii:225 ed. Mang. (See PRIEST, HEBREW PRIESTHOOD, 1.)

BRETHREN OF JESUS (brĕth'rĕn ōv jĕ'zūs). See BROTHER.

BRICK (brĭk), (Heb. לֶב-אֵי-נָוֹ', *leb-ay-naw'*, made of white clay).

(1) Bricks compacted with straw and dried in the sun are those which are chiefly mentioned in the Scriptures. Of such bricks the tower of Babel was doubtless composed (See BABEL, TOWER OF; BABYLON), and the making of such formed the chief labor of the Israelites when bondsmen in Egypt (Exod. i:13, 14). This last fact constitutes the principal subject of Scriptural interest connected with bricks; and leads us to regard with peculiar interest the mural paintings of that country, which have lately been brought to light, in which scenes of brick-making are depicted.

(2) 'The use of crude brick, baked in the sun, was universal in Upper and Lower Egypt, both for public and private buildings; and the brick-field gave abundant occupation to numerous laborers throughout the country.

'We find that, independent of native laborers, a great many foreigners were constantly engaged in the brick-fields at Thebes and other parts of Egypt. The Jews, of course, were not excluded from this drudgery; and, like the captives detained in the Thebaid, they were condemned to the same labor in Lower Egypt. They erected granaries, treasure-cities and other public buildings for the Egyptian monarch; the materials used in their construction were the work of their hands; and the constant employment of brick-makers may be accounted for by the extensive supply required and kept by the government for sale' (Wilkinson's *Ancient Egyptians*, ii, pp. 97, 98).

(3) Captive foreigners being thus found engaged in brick-making, Biblical illustrators, with their usual alacrity, jumped to the conclusion that these captive foreigners were Jews, and that the scenes represented were those of their actual operations in Egypt. Sir J. G. Wilkinson satisfactorily disposes of this inference by the following remark: 'To meet with Hebrews in the sculptures cannot reasonably be expected, since the remains in that part of Egypt where they lived have not been preserved; but it is curious to discover other foreign captives occupied in the same manner, and overlooked by similar "task-masters," and performing the very same labors as the Israelites described in the Bible; and no one can look at the paintings of Thebes, representing brick-makers, without a feeling of the highest interest.'

(4) The great quantity made at all times may be inferred from the number of buildings which still remain constructed of these materials; but it is

worthy of remark that *more bricks bearing the name of Thothmes III (who is supposed to have been the king at the time of the Exode) have been discovered than at any other period*, owing to the many prisoners of Asiatic nations employed by him, independent of his Hebrew captives.

(5) The process of manufacture does not materially differ from that which is still followed in the same country. The clay was brought in baskets from the Nile, thrown into a heap, thoroughly saturated with water, and worked up to a proper temper by the feet of the laborers. This labor in such a climate must have been very fatiguing and unwholesome, and it consequently appears to have been shunned by the native Egyptians. There is

standing in the fields, he would have shown himself an idiot as well as a tyrant; but the narrative shows us that the Israelites found the stems of the last year's harvest standing in the fields; for by the word 'stubble' (Exod. v:12) the historian clearly means the stalks that remained from the last year's harvest. Still the demand that they should complete their tale of bricks was one that could scarcely be fulfilled; and the conduct of Pharaoh on this occasion is a perfect specimen of Oriental despotism."

BRICK-KILN (brĭk'kĭl), a kiln for enclosing bricks while they are being burned (2 Sam. xii:31 and Nah. iii:14, where R. V. margin translates brickmould; Jer. xliii:9, in R. V., brickwork).

Foreign Captives Employed in Making Bricks at Thebes.

- 1, 2. Men returning after carrying the bricks. 3, 6. Task-masters. 4, 5. Men carrying bricks.
9, 13. Digging or mixing the clay or mud. 8, 14. Making bricks with wooden moulds, *d. h.*
15. Fetching water from tank, *k.* At *e* the bricks (*tobi*) are said to be made at Thebes.

an allusion to the severity of this labor in Nahum iii:14,15. The clay, when tempered, was cut by an instrument somewhat resembling the agricultural hoe, and molded in an oblong trough; the bricks were then dried in the sun, and some from their color appear to have been baked or burned, but no trace of this operation has yet been discovered in the monuments (Dr. W. C. Taylor's *Bible Illustrated*, p. 82).

(6) The writer just cited makes the following pertinent remarks on the order of the king that the Israelites should collect the straw with which to compact (not burn) their bricks: "It is evident that Pharaoh did not require a physical impossibility, because the Egyptian reapers only cut away the tops of the corn. (See AGRICULTURE.) We must remember that the tyrannical Pharaoh issued his orders prohibiting the supply of straw about two months before the time of harvest. If, therefore, the straw had not been usually left

BRIDE (brĭd). In patriarchal times the bride is commonly chosen, not by the bridegroom, but by his parents or friends, and they do not necessarily consult him.

Abraham sends a confidential servant to find a bride for Isaac (Gen. xxiv). Judah takes Tamar as a bride for his son Er (Gen. xxxviii:6). Isaac instructs Jacob as to his choice (xxviii:2). And, in the absence of the father, Hagar takes a wife for Ishmael (Gen. xxi:21). Where the bridegroom chooses, it is his father who makes the proposal, as in the cases of Shechem (Gen. xxxiv:4, 8) and Samson (Judg. xiv:2, 10). (A. Plummer, *Hastings' Bib. Dict.*)

Figurative. (1) The figure, under various and extended forms, is frequently used in the Old Testament to denote the union between Jehovah and the Jewish nation. (2) The saints and church are a *bride*; they are betrothed and espoused to Jesus Christ; they are adorned

with the wedding garment of his righteousness; and rejoice in him (Rev. xxii:17 and xxi:9).

BRIDECHAMBER (brīd'chām'bēr), (Gr. *νομφών*, *noom-fohn'*). See MARRIAGE.

BRIDEGROOM (brīd'grōom'), a betrothed or newly married man.

To this day in the East the bridegroom has, as a rule, little to do with the choice of the bride. Love matches are rare, and in many cases are impossible. In the Old Testament we see that where the son chose his own bride independently of his parents his relations with the latter were not happy (Gen. xxvi:34; xxvii:46). Jehoiada the priest chooses wives for the orphan king, Joash (2 Chron. xxiv:3, Comp. xxv:18). The interval between betrothal and marriage might be of any duration, for the espousal of children to one another has always been common in the East; but a year for maidens and a month for widows seems to have been customary. (A. Plummer, *Hastings' Bib. Dict.*) (See MARRIAGE.)

Figurative. (1) Christ is called a *Bridegroom*. In the councils of peace, and in the day of his power, he unites his people to himself, rejoices over them, and feasts them with his love; and he will quickly come to receive them home to his heavenly mansions (Matt. xxv:1-10). (2) The sun is likened to a *bridegroom*, because of his glorious and cheerful aspect, as he rises, and apparently walks along the sky (Ps. xix:5).

BRIDEMAID, BRIDEMAN (brīd'mād, brīd'mān). See MARRIAGE.

BRIDGE (brīj). It is somewhat remarkable that the word bridge does not occur in all Scripture, although there were without doubt bridges over the rivers of Palestine, especially in the country beyond the Jordan, in which the principal perennial streams are found.

There is mention of a military bridge (2 Macc. xii:13) which Judas Maccabaeus intended to make, in order to facilitate his operations against the town of Caspis, had he not been prevented. There may be an indirect mention in the canonical Scriptures in the proper name Geshur, a district in Bashan, northeast of the sea of Galilee. At this place a bridge still exists, called the bridge of the sons of Jacob (Gesen. *s. v.*). Absalom was the son of a daughter of the king of Geshur (2 Sam. iii:3; xiii:37; xiv:23, 32). The Chaldee paraphrase renders "gates," in Nahum ii:6, "bridges," where, however, dykes or weirs are to be understood, which being burst by inundation destroyed the walls of Nineveh (Diod. ii:27). (*Smith, Bib. Dict.*)

BRIDLE (brī'd'l), (Heb. *רֶהֶן*, *reh'sen*, a curb, halter, Job xxx:11; xli:13; Is. xxx:28; *מֶהֶתֶג*, *meh'theg*, strictly the bit, as rendered in Ps. xxxii:9; *מַחְסוֹם* *makh-sohm'*, a muzzle, only in Ps. xxxix:1; Gr. *χαλῶβς*, *khal-ee-nos'*, bit, James iii:2; Rev. xiv:20).

The word bridle is used for that portion of the harness by which the driver controls the horse, and consists of the headstall, bit and reins (Ps. xxxii:9). Instead of a bridle, a cord drawn through the nose was sometimes used for leading and commanding camels, mules, etc.

Figurative. (1) The restraints of God's powerful providence are called his *bridle and hook*. The *bridle in the jaws of the people, causing them to err*, is God's suffering the Assyrians to be directed by their foolish counsels, that they might not accomplish their intended purpose against Jerusalem (Is. xxxvii:29 and xxx:28). (2) The restraints of law, humanity and modesty are

called a *bridle*; and to *let it loose* is to act without regard to any of these (Job xxx:11). (3) *Blood coming to the horse-bridles* implies the terrible slaughter of the followers of Anti-Christ at the battle of Armageddon, or about that time (Rev. xiv:20).

BRIERS (brī'ērs). See THISTLES; THORN.

BRIGANDINE (brīg'ān-dīn), (Heb. *סִירְיוֹנִי*, *siryone'*, Jer. xlvi:4; li:3). Mr. Wedgwood (*Dict. of Eng. Etym.*) says it was a kind of scale armor. It is closely connected with the word translated "coat of mail."

BRIM (brīm).

1. The edge, brink or extremity of water (Josh. iii:15; Heb. *קַרְוֹת*, *karw-tseh'*).

2. The upper edge, rim or lip of a vessel (1 Kings vii:23, *sq.*; 2 Chron. iv:2, *sq.*; Heb. *סַרְוֹת*, *sarw-faw'*, lip; Gr. *ἀνω*, *an'o*, top, John ii:7).

BRIMSTONE (brīm'stōn), (Heb. *גֹּפְרִית*, *gof-reeth'*, properly resin; Gr. *θελόν*, *thi'on*, flashing). The Hebrew word is connected with *gopher* (Heb. *גֹּפֶר*), and probably meant the *gum* of that tree.

It was thence transferred to all inflammable substances, especially sulphur, a well-known mineral substance, exceedingly inflammable, and which when burning emits a suffocating smell. We are told that the cities of the plain were destroyed by a rain of fire and brimstone. There is nothing incredible in this, even if we suppose only natural agencies were employed. Like many other travelers, the writer has pieces of pure sulphur and of asphalt or mineral pitch, both found in that vicinity in abundance and highly inflammable. Volcanic action might easily have filled the air with inflammable substances, falling down in streams of liquid fire upon those devoted cities.

Figurative. This word is often figuratively employed to denote punishment or destruction. (Deut. xxix:23; Job xviii:15; Ps. xi:6; Is. xxx:33; Ezek. xxxviii:22; Luke xvii:29; Rev. ix:17, etc.).

Whether the word is used literally or not in the passages which describe the future sufferings of the wicked, we may be sure that it expresses a great reality of suffering and sorrow. (See CITIES OF THE PLAIN.)

BRINK (brīnk), otherwise rendered Brim. (See BRIM.)

BROIDERED (broid'ērd), (Heb. *רִיקְמָוִי*, *rik-maw'*, variegated work, Ezek. xvi:10, *sq.*; xxvi:16; xxvii:7, 16, etc.). In Exod. xxviii:4 we have the Heb. *תַּשְׁבָּטִים*, *tash-bates'*, checkered stuff. (See EMBROIDERY.)

BROKEN-FOOTED, BROKEN-HANDED. (brō'k'n-fōōt'ēd, brō'k'n-hānd'-ēd). (See PRIEST, HEBREW PRIESTHOOD.)

BROOK (brōök), (Heb. *נַחַל*, *nakh'al*; Sept. *χεμαίος*, *khi'mar-rhos*). The original word thus translated might better be rendered by *torrent*.

It is applied, (1) to small streams arising from a subterraneous spring, and flowing through a deep valley, such as the Arnon, Jabbok, Kidron, Sorek, etc.; and also the brook of the willows, mentioned in Is. xv:7; (2) to winter-torrents, arising from rains, and which are soon dried up in the warm season (Job vi:15, 19). Such is the noted river (brook) of Egypt, so often mentioned as at the southernmost border of Palestine (Num xxxiv:5; Josh xv:4, 47) and

in fact, such are most of the brooks and streams of Palestine, which are numerous in winter and early spring, but of which very few survive the beginning of the summer.

Figurative. Wisdom, or true religion, is likened to a *flowing brook*, because of the plentiful and necessary comfort which issues from them (Prov. xviii:4). (2) *Brooks of honey and butter*, denote great plenty of them; or brooks, the fine grass and mellifluous flowers on whose banks contributed to produce abundance of them; or great prosperity in general (Job xx:17). (3) To deal deceitfully as a brook, and to pass away as the streams thereof, is to disappoint our friend when he most needs and expects our help and comfort (Job vi:15).

BROTHER (brüth'ēr), (Heb. אָח, *awkh*; New Test. Ἀδελφός, *ad-el-fos'*, brother).

This term is so variously and extensively applied in Scripture that it becomes important carefully to distinguish the different acceptations in which it is used.

1. It denotes a brother in the natural sense, whether the offspring of the same father only (Matt. x:2; Luke iii:1, 19), or of the same father and mother (Luke vi:14, etc.).

2. A near relative or kinsman by blood, cousin (Gen. xiii:8; xiv:16; Matt. xii:46; John vii:3; Acts i:14; Gal. i:19).

3. One who is connected with another by any tie of intimacy or fellowship, hence:

4. One born in the same country, descended from the same stock, a fellow countryman (Matt. v:47; Acts iii:22; Heb. vii:5; Exod. ii:11; iv:18).

5. One of equal rank and dignity (Job xxx:29; Prov. xviii:9; Matt. xxiii:8).

6. Disciples, followers, etc. (Matt. xxv:40; Heb. ii:11, 12).

7. One of the same faith (Amos i:11; Acts ix:30; xi:29; 1 Cor. v:11); from which and other texts it appears that the first converts to the faith of Jesus were known to each other by the title of Brethren, till the name of Christians was given to them at Antioch (Acts xi:26).

8. An associate, colleague in office or dignity, etc. (Ezra iii:2; 1 Cor. i:1; 2 Cor. i:1, etc.).

9. One of the same nature, a fellow-man (Gen. xiii:8; xlvi:31; Matt. v:22, 23, 24; vii:5; Heb. ii:17; viii:11).

10. One beloved, *i. e.*, as a brother, in a direct address (Acts ii:29; vi:3; 1 Thess. v:1).

11. Brethren of Jesus. In Matt. xiii:55 James, Josés, Simon, and Judas are mentioned as the brothers of Jesus, and in the ensuing verse sisters are also ascribed to him.

(1) **Protestant View.** The Protestant spirit of opposition to the notion about the perpetual virginity of Mary has led many commentators to contend that this must be taken in the literal sense, and that these persons are to be regarded as children whom she bore to her husband Joseph after the birth of Christ. On the whole we incline to this opinion, seeing that such a supposition is more in agreement with the spirit and letter of the context than any other; and as the force of the allusion to the brothers and sisters of Jesus would be much weakened if more distant relatives are to be understood. Nevertheless there are some grounds for the other opinion, that these were not natural brothers and sisters, but near relations, probably consins, of Christ. In Matt. xxvii:56 a James and Josés are described as sons of Mary (certainly not the Virgin); and again a James and Judas are described as sons of Alphæus (Luke vi:15, 16), which Alphæus is probably the same as Cleophas, husband of Mary, sis-

ter of the Virgin (John xix:25). If, therefore, it were clear that this James, Josés and Judas are the same that are elsewhere described as the Lord's brothers, this point would be beyond dispute; but as it is, much doubt must always hang over it.

(2) **Opinions of Scholars.** Dr. Wm. Smith, *Bib. Dict.*, says: "On this question of 'the brethren of the Lord,' Dr. Lange maintains the cousin theory, but with a peculiar modification. He derives the cousinship not from the mothers (the two Marys being sisters), but from the fathers (Cleophas or Alphæus and Joseph being brothers). See his *Bibelwerk*, i, 201, and Dr. Schaff's *Translation*, p. 255. Professor Lightfoot thinks the words on the cross, 'Woman, behold thy son,' said of John the Evangelist, are decisive, as showing that the mother of Jesus had no sons of her own, and hence according to his view 'the brethren' must have been sons of Joseph by a former marriage (*St. Paul's Ep. to the Galat.*, pp. 241-275). Of these two explanations (the cousin theory being regarded as out of the question) Dr. Schaff (on *Lange*, pp. 256-260, where he has a full note) prefers the latter, partly as agreeing better with the apparent age of Joseph, the husband of Mary (who disappears so early from the history), and also with the age of the brothers who seem at times to have exercised a sort of eldership over Jesus (Comp. Mark. iii:31 and John vii:3 ff.). Undoubtedly the view adopted in the foregoing article, that Jesus had brothers who were the sons of Mary, is the one which an unforced exegesis requires; and, as to the fact of the Saviour's committing the mother in his last moments to the care of John, which this view is said to make irreconcilable with 'the claims of filial piety,' if Mary had sons of her own, it is not easy in point of principle to make out the material difference (affirmed by those who suppose a previous marriage of Joseph) between such claims of her own sons and those of stepsons. 'The perpetual virginity of Mary,' says the late Professor Edwards, 'is inferred from half a verse (Matt. i:25), which by natural implication teaches the direct contrary.'" This question is brought up again under JAMES (which see).

BROTHERHOOD (brüth'ēr-hööd, (Heb. אָחֵי, *ach'a-vah*, unity), the connected fellowship of brethren (Zech. xi:14; 1 Pet. ii:17).

BROTHERLY KINDNESS (brüth'ēr-lý kind'nës), (Gr. φιλαδέλφια, *fil-ad-el-fee'ah*, 2 Pet. i:7) is rendered "brotherly love" (Rom. xii:10; 1 Thess. iv:9; Heb. xiii:1), "love of the brethren" (1 Pet. i:22).

Brotherly kindness, or love, is what is most tender and affectionate; and chiefly denotes our esteeming, delighting in, sympathizing with, and helping and comforting the saints, on account of their relation and likeness to Christ (Rom. xii:10; 2 Pet. i:7). *The brotherly covenant* with the Jews, which the Edomites despised, was their original relation by descent from Isaac; their covenant of subjection, when conquered by David; and, perhaps, some later alliance (Amos i:9).

BROTHER'S WIFE (brüth'ēr's wif), (Heb. אֵשֶׁת אָחֵי, *yeb-ay'meth*, Deut. xxv:7; "sister-in-law," Ruth i:15). See MARRIAGE; LEVIRATE.

BROW (brou), (Heb. אֵצֶל, *may-tsakh*, clear, conspicuous), the forehead (Is. xlvi:4); Gr. ὄψους, *of-roos'*, brink, the edge of a hill (Luke iv:29).

BRUISE (brüz), **BRUISED** (brüzd), several Greek and Hebrew words are thus translated. They denote: (1) To crush (Is. xxviii:28). (2) To injure; oppress (Lam. iv:18). (3) To afflict; pun-

ish (Is. liii:5). (4) To distress; destroy (Dan. ii:40). The *bruise* of a body is a hurt received by crushing (Luke ix:39).

Figurative. (1) The *bruise* of a soul implies doubts, fears, anguish, and inward trouble, on account of the prevalence of sin. God's wrath, etc. (Matt. xii:20). (2) The *bruise* of a city or nation is their prevalent wickedness or the decayed and disjointed frame of their civil constitution (Is. i:6; Jer. vi:14, and xxx:12). (3) Christ was *bruised* for our sins (Is. liii:5, 10). He *bruises* Satan's head when he crushes his designs, spoils him of his power, triumphs over him on the cross, or in the conquest of his chosen; and when he enables his people to oppose, conquer, and tread his temptations under foot. (4) Satan *bruises* Christ's heel, in harassing his humble manhood, and afflicting his members on earth (Gen. iii:15; Rom. xvi:20). (5) Weak saints and their feeble graces are *bruised*, or *bruised reeds*, which Christ *will not break*; they are trodden down and afflicted by Satan, by false teachers, by the world, and their own lusts, and are in a painful and disjointed state, unable to oppose their spiritual enemies; but Jesus will protect, heal, comfort and deliver them (Is. xlii:3; Luke iv:18). (6) The king of Egypt is called a *bruised reed*, to mark the weak and broken state of his kingdom, and his utter inability to help such as depended on him (2 Kings xviii:21). (Brown, *Bib. Dict.*)

BRUIT (brüt), (Heb. שְׂמוּעָה, *shem-oo'aw*, passive participle of שָׁמַע, *shaw-mame'*, primitive root, to stun, to stupefy, Jer. x:22).

BRUTISH (brü'tish), (Heb. בָּרָר, *barw-ar'*, to consume by fire or eating), a term applied to one whose mental and moral perceptions are dulled by ignorance (Prov. xii:1); idolatry (Jer. x:8, 14, 21, etc.).

BUBASTIS (bū-bās'tis). See PI-BESETH.

BUCKET (bük'ët), (Heb. דֵּלֵעָה, *del-ee'*, or דֵּלֵעָה, *dol-ee'*, bucket, pail, a vessel to bear water in, or to draw it up from a well; they were anciently made of leather (Is. xl:15). God's "bucket" is in the clouds, which he bears, and out of which he pours the watery substance of rain, hail, snow (Num. xxiv:7).

Figurative. In Num. xxiv:7 it is stated: "He shall pour the water out of his buckets, and his seed shall be in many waters, and his king shall be higher than Agag, and his kingdom shall be exalted." The expression is used metaphorically of a numerous issue. The nation is personified as a man carrying two buckets overflowing with water.

BUCKLER (bük'lēr) stands in the Authorized Version as the representative of the following Hebrew words: (1) מָגֵן, *maw-gane'*, shield; (2) סֶחָרָה, *so-khay-raw'*, buckler, target; (3) תִּשְׁנָנָה, *tsin-naw*, shield (of a larger size).

The bucklers, or targets, made by Solomon, consisted of six hundred shekels of gold; whereas the MAGINNOTH, or shields, consisted of but three hundred (1 Kings x:16, 17; 2 Chron. ix:15, 16). Perhaps all the difference might be that the one was larger than the other. The buckler, or shield, was a piece of defensive armor, wielded by the left hand, in the manner of the Highlanders' targets, to ward off the blows of arrows, swords, or spears wherever they threatened to strike. The more common materials of the ancient shields was a round board overlaid with folds of leather;

but sometimes they were of gold, brass, etc. Conquerors sometimes hung up the bucklers they took from their principal enemies on towers, or in temples, as trophies of victory. David's tower had 1,000 shields hung up in it (Cant. iv:4). Solomon made two hundred larger, and three hundred lesser, bucklers of solid gold, and hung them up in the house of the forest of Lebanon, to be used, probably by his life guard in solemn processions. These Shishak carried off, and Rehoboam made others of brass to serve in their stead (1 Kings x:16, 17, and xiv:26, 27). (See ARMS, ARMOR.)

BUDDHISM AND CHRISTIANITY CONTRASTED.

It is strange that even educated persons are apt to fall into raptures over the doctrines of Buddhism, attracted by some bright gems which its admirers cull out of its moral code and display ostentatiously, while keeping out of sight all the dark spots of that code, and all those precepts which a Christian could not soil his lips by uttering. It has even been asserted that much of the teaching in the Sermon on the Mount is based on previously current moral precepts which Buddhism was the first to introduce to the world 500 years before Christ. But this is not all. The admirers of Buddha claim that he has justly been called "The Light of Asia," though they condescendingly admit that Christianity, as a later development, is better adapted to become the religion of the world.

Let us then inquire what claim Guatama Buddha has to this title. In the first place, those who give him this name forget that his doctrines spread over Eastern Asia only, and that Mohammed has as much right as Buddha to be called 'the Light of Asia.' But was Buddha, in any true sense, a light to any part of the world?

It is true that the main idea implied by Buddhism is intellectual—enlightenment.

But of what nature is the so-called 'Light of Knowledge' that radiated from Buddha? Was it the knowledge of his own depravity of heart, or of the origin of sin? No; the Buddha's light in this respect was profound darkness.

Was it, then, the knowledge of the goodness of an Omnipotent Creator? Was it a knowledge of the Fatherhood of God? No; he knew nothing of the existence of any being higher than himself.

All the light of knowledge which he claimed to have discovered came to this: That suffering arises from indulging desires; that suffering is inseparable from life; that all life is suffering; and that suffering is to be gotten rid of by the suppression of desires and by the extinction of personal existence.

You see here the first great contrast. When Buddha said to his converts, 'Come, follow me,' he told them to stamp out suffering by stamping out desires. When the Christ taught his disciples he bade them to expect suffering. He told them to glory in their sufferings—nay, to expect the perfection of their characters through suffering.

It is noteworthy that both Christianity and Buddhism teach that 'all creation travaileth in pain;' but mark the vital distinction in their teaching. The one taught men to aim at the glorification of the suffering body, the other at its utter annihilation. We Christians are members of Christ's body, but how could a Buddhist become a member of a body which became extinct when Buddha's whole personality became extinguished?

'But,' say the admirers of Buddha, 'at least you will admit that Buddha told men to get rid of sin, and to aim at sanctity of life.'

Nothing of the kind. Buddha had no idea of sin as an offense against God, no idea of true holiness. What he said was, 'Get rid of the demerit of evil actions and accumulate merit by good actions.' This storing up of merit like capital in a bank is one of those propensities of human nature from which Christianity alone has delivered men.

Buddhism says: Be righteous through yourselves, for the final getting rid of all suffering—of all life in yourselves.

Christianity says: Be righteous through the power of a *life-giving* principle, freely given to you and always abiding in you.

Buddha said to his followers: 'Trust no one but yourselves.'

Christ said, and says to us still: 'Take all from me; take this free gift; put on this spotless robe; eat this bread of life; drink of this living water.'

Still I seem to hear some one say, 'We grant all this, but you must allow that Buddhism conferred a great benefit upon India by setting its population free from the meshes of Brahmanical priestcraft.'

Yes, I admit this, and more than this. I admit that it promoted progress up to a certain point. It preached purity in thought, word and deed, though only for the accumulation of merit; it proclaimed the brotherhood of humanity and inculcated universal benevolence extending even to animals, and did good service for the time being in elevating the character of humanity.

But if, after making all these concessions, I am told that Christianity is a kind of development of Buddhism, I must ask you to bear with me while I point out certain other contrasts which ought to make it clear to every reasoning man how vast and impassable is the gulf separating the true religion from a system based upon a form of pessimistic philosophy.

Let us note that Christ was God-sent, whereas Buddha was self-sent. Then Christ had all the treasures of knowledge hidden in Himself, and He was, and is, the Way, the Truth, and the Life.

Buddha declared that enlightenment and wisdom was to be obtained by men through themselves after long and painful discipline in countless bodily existences.

Then, when we come to compare the death of each, the contrast reaches its climax. Christ was put violently to death by wicked men, and died in an agony of atoning death, suffering for the sins of the world at the age of thirty-three after a short ministry of three years. Buddha died peacefully among his friends, suffering from an attack of indigestion, brought on by eating too freely of pork, at the age of eighty.

Christ the Holy One saw no corruption, but rose again in His present glorified body, and is alive forevermore.

Buddha is dead and gone forever. Even according to his own declaration he now lives only in the doctrine which he left behind him. Then Buddha must be followed by countless succeeding Buddhas, whereas there is only one Christ, who can have no successor, for He is still alive and ever present with his people. 'Lo, I am with you alway, even unto the end of the world.'

There are many other contrasts. According to the Christian Bible we must regulate and sanctify the heart's desires and affections; according to the Buddhist, suppress and utterly destroy them.

Christianity teaches that in the highest form of life *love* is intensified. Buddhism teaches that in the highest state of existence all love is extinguished. Christianity teaches a man to earn his bread and support his family. Christ himself honored a wedding with His presence and took little children in his arms and blessed them. Buddhism, on the other hand, says: 'Avoid married life; shun it as if it were a burning pit of live coals; or, having entered upon it, abandon wife, children and home, and go about as celibate monks, engaging in nothing but meditation, and begging your bread from door to door.' No Christian trusts to his own good works as the sole meritorious cause of salvation, whereas Buddhism teaches that every man must trust to his own merits only. Fitly do the rags worn by the monks symbolize the miserable patchwork of its own self-righteousness. Not that Christianity ignores the necessity of good works (no other system insists so strongly upon lofty morality), but it is a thank-offering—the outcome and evidence of faith—never as the meritorious instrument of salvation.

Christianity regards personal life as a sacred possession, and teaches us that we are to thirst for the living God Himself, and for a conformity to His likeness, while Buddhism sets forth as the highest of all aims the utter extinction of personal identity—the utter annihilation of the Ego—of all existence in any form whatever, and proclaims as the only true creed the ultimate resolution of everything into nothing.

The Christian asks: 'What shall I do to inherit eternal life?'

The Buddhist asks: 'What shall I do to inherit eternal extinction of life?'

Whom shall we choose as our guide, our hope, our salvation—the 'Light of Asia' or 'the Light of the World?'—the dead Buddha or the ever-living Christ?

It seems mere mockery to put this question to rational men in the twentieth century. Which book shall we clasp to our hearts in the hour of death—the book which tells us of the extinct man Buddha, or the Bible that reveals to us the living Christ, the Redeemer of the world?

See Sir Monier Monier-Williams, K. C. I. E., D. C. L., LL. D., Ph. D., Boden Professor of Sanskrit in the University of Oxford. (*Trans. Vic. Inst.* vol 33, No. 89, p. 37.)

BUFFET (bŭf'fĕt), (Gr. *κολαφίζω*, *kol-af-id'zo*, to strike with the fist), rude maltreatment in general, whether in *derision* (Matt. xxvi:67; Mark xiv:65), *affliction* (1 Cor. iv:11), *opposition* (2 Cor. xii:7), or *punishment* (1 Pet. ii:20).

BUILD, BUILDING (bĭld, bĭld'ing), (Heb. *בָּנָה*, *ban-naw'*, to build; Gr. *οικοδομέω*, *oy-kod-om-eh'o*). (See ARCHITECTURE; HOUSE).

Figurative. (1) God's *building of all things*, is his wise and powerful creation of them, in proper connection and order (Heb. iii:4, and xi:10). (2) His *building up* a person, imports his giving him children, wealth, or prosperity (Job xxii:23). (3) His *building up* families, cities, and nations denotes his increasing their number, wealth, honor, power, and pleasure (1 Chron. xvii:10; Ps. lxxix:35; Jer. xviii:9). (4) His *building of David's throne* imports his upholding and prospering him and his seed in the kingly office over the Israelites; but chiefly his enlarging and perpetuating the glory of Christ and his church (Ps. lxxxix:4). (5) His *building the walls of Jerusalem*, or Zion, imports not only his giving prosperity to the Jewish nation and church, but his giving spiritual increase and prosperity to

the church in every age (Ps. li:18). (6) The church is *built in Christ*; her true members are spiritually united to him as their legal and mystical head, and cleave to him by faith and love; and are supported and strengthened by his Spirit and gracious influence (Col. ii:7; Eph. ii:21, 22). (7) She is *built on Christ*; his person and righteousness, and truth, as declared by his prophets and apostles, are her true foundation; and in connection with him her whole fabric consists (Eph. ii:20; 1 Cor. iii:11). (8) The saints *build up themselves in their most holy faith*; they more fully consider, more firmly believe, and more diligently practice Divine truths; and, receiving out of Christ's fullness, increase in faith, love, and every other grace (Jude 20). (9) Magistrates *build up* a state; they devise, establish, and execute good laws; and so promote the felicity and honor of the people (Ezek. xxvii:4). (10) Mothers *build up* families by bringing forth children to enlarge and perpetuate them (Ruth iv:11; Comp. 2 Sam. vii:27).

BUKKI (bük'ki), (Heb. בֻּקִי, *book-kee'*, waster).

1. Son of Abishua and father of Uzzi (B. C. 1618), in the line of Aaron (1 Chron. vi:5, 51; Ezra vii:4). It is not stated that Bukki ever filled the office of high priest. (See Selden's *Genealog. of our Lord, ch. x.*)

2. Son of Jogli, "prince" of the tribe of Dan, one of the ten men chosen by Moses to apportion the land of Canaan between the tribes (Num. xxxiv:22), B. C. 1618.

BUKKIAH (buk-ki'ah), (Heb. בֻּקִיָּהוּ, *book-kee-yaw'*, wasted by Jehovah), a Kohathite Levite, son of Heman, and a musician of the Temple. He had charge of the sixth course of the temple service (1 Chron. xxv:4, 13), B. C. 1014.

BUL (bül), (Heb. בּוּל, *bool*), the eighth ecclesiastical month of the Jewish year (1 Kings vi:38). It answers to October. (See TIME.)

BULL (bul), (Heb. שׁוֹר, *shore*), with other kindred terms has been already noticed in the article BEEVES.

We may add *tore*, which occurs only in Ezra vi:9, 17; vii:17; Dan. iv:25, 32, 33; iv:22, 29, 30; in all which passages it seems to refer to bullocks, laboring or yoke oxen, and cattle wild or tame, taken collectively; *abirim*, implying strength, and rendered 'bulls,' is found in Ps. xxii:12; 1:13; lxviii:30; Is. xxxiv:7, and Jer. xlvi:21; and *agloth*, *aglim*, are used when the animals are under three years of age. It is contended that the castration of no animal was practiced among the Hebrews. If that was the case other methods than those generally alluded to must have been adopted to break oxen to labor.

In Palestine the breed of cattle was most likely in ancient times, as it still is, inferior in size to the Egyptian; and provender must have been abundant indeed, if the number of beasts sacrificed at the great Jewish festivals, mentioned in Josephus, be correct, and could be sustained for a succession of years. The wild bulls of the district, mentioned in Ps. xxii:12, and in various other passages, appear, nevertheless, to refer to domestic species, probably left to propagate without much human superintendence. Baal is said to have been worshiped in the form of a bull, and Moloch to have had a calf's or steer's head. (See BEEVES; CALF.)

Figurative. (1) Persons impatient in trouble are like *wild bulls in a net*; they roar and cry, but by their struggling entangle themselves more and more (Is. li:20). (2) Wicked men,

chiefly rulers or warriors, are called *bulls* and *bulls of Bashan*, and *calves*, to denote their prosperity, strength, untractableness, and mischievous violence and fierceness (Jer. xxxi:18; Ps. xxii:12; lxviii:30).

BULLOCK (bul'lök). This is a frequent translation of the following Hebrew words: (1) עֵיזֵל, *ay'-ghel*, steer, young bullock; (2) פָּאָר, *par*, פָּרָה, *par*, steer; (3) שׁוֹרֵי, *shore*, usually rendered ox.

It denotes in general a young bull, though the Hebrew word is used once of an animal seven years old (Judg. vi:25). Bullocks were used as draught animals and were often sacrificed in burnt-offerings and peace-offerings, and sometimes in sin-offerings. (See BEEVES; CALF.)

BULRUSH (bul'rüşh) is used synonymously with two Hebrew words.

1. אֶגְמוֹן, *ag-mone'*, bulrush, rush (Is. lviii:5).

2. גֹּמֵה, *go-meh'*, papyrus, rush (Ex. ii:3; Is. xviii:2).

It is a tall slender plant growing in marshy places, and easily bowed by the wind. What our translation calls so, is perhaps no other than the paper reeds, of which the Egyptians and Ethiopians made baskets, and even boats (Ex. ii:3).

The bulrush grows in shallow water or mire (Job viii:11). It has an unbranching straight, triangular culm, terminating in a large head (umbel) of small and somewhat drooping stems, bearing the chaffy fruit on their extremities. The stalk is usually about ten feet high and two or three inches in diameter at the base. An area of papyrus surmounted by its beautiful tufted plumes is a fine sight.

From this plant paper was first made and derived its name. (See BOOK.)

Figurative. To *bow the head as a bulrush* is to make an outward appearance of grief for sin, hanging down the head, while there is no real sorrow in the heart, as in Is. lviii:5. "Is it such a fast that I have chosen? a day for a man to afflict his soul? *is it to bow down his head as a bulrush?*"

BULRUSHES, ARK OF (bul'rüşhës, ärk öv). See MOSES.

BUNAH (bū'nah), (Heb. בּוֹנֵה, *boo-naw'*, discretion), a son of Jerahmeel, of the family of Pharez in Judah (1 Chron. ii:25), B. C. 1658.

BUNCH (bunch). Several Hebrew words have been thus translated (Exod. xii:22; 2 Sam. xvi:1; Is. xxx:6).

BUNDLE (bün'd'l), (Heb. תְּסֵרֹרֶת, *tser-ore'*, parcel; Gr. δεσμή, *des-may'*; πλήθος, *play'thos*, fullness), anything bound together, as a "bundle of myrrh" (Cant. i:13), of "grain" (Matt. xiii:30), of "sticks" (Acts xxviii:3). It is also used of money in a purse (Gen. xlii:35).

Figurative. (1) The speech of Abigail to David (1 Sam. xxv:29) may be rendered, as in R. V., "The soul of my lord shall be bound in the *bundle of the living*." So to have one's soul bound up in the *bundle of life* with the Lord is to enjoy his kindest protection, and infallible preservation. (2) All creatures, chiefly the church and her chosen members, are called God's *bundles*; they are many in number, and closely connected; but the whole weight and care of them are borne by him (Amos ix:6). (3) Multiplied oppressions and superstitious impositions in worship, are called the *bundle of the yoke*; they are heavy to be borne (Is. lviii:6).

BUNNI (bŭn'nī), (Heb. בּוּנִי, *boon-nee'*, built).

1. A Levite in the time of Nehemiah (Neh. ix:4). Perhaps the same as Bunni of (x:15) B. C. 410.

2. (Heb. בּוּנִי, *boo-nee'*, built.) A Levite whose descendant, Shemaiah, was made an overseer of the temple after the captivity (Neh. xi:15), B. C. before 445. Lightfoot says this was the Jewish name of Nicodemus (John iii:1).

BURDEN (bŭr'd'n), (Heb. מַסָּעָה, *mas-saw'*, a lifting up).

1. A heavy load to be borne; used in a literal or a figurative sense (Ex. xxiii:5; Num. xi:11, etc.).

2. An utterance or prophecy, in almost every instance denouncing heavy judgment on a place or people (Is. xiv:28; xv:1; Ezek. xii:10; Hos. viii:10; Nah. i:1). (Noyes' *Trans. of Heb. Prophets*, 3d ed. ii:340. Davis, *Bib. Dict.*)

Figurative. (1) Labor, servitude, tribute, affliction, fear and care are a *burden*; they are hard to be borne, sinking to the spirits, and restrictive of liberty (Ps. lxxxix:6; Hos. viii:10; Matt. xx:12); as *burden of the king of princes*, the tribute imposed in Israel by the king of Assyria, who had princes for his subjects. (2) Men's imperfections and infirmities are '*burdens*,' which hurt and grieve themselves or others: but which others ought to bear with patience and meekness (Gal. vi:2).

BURIAL (bĕr'rĭ-al) and **SEPULCHERS** (sĕp'ŭl-kĕrs).

(1) **Cremation.** Two instances we meet with in sacred history of the practice of burning bodies to ashes; the one in the case of Saul and his sons, whose bodies were probably so much mangled as to preclude their receiving the royal honors of embalment (1 Sam. xxxi:12); the other, mentioned by Amos (vi:10), appears to refer to a season of prevailing pestilence, and the burning of those who died of plague was probably one of the sanitary measures adopted to prevent the spread of contagion.

(2) **Interment.** But throughout the whole of their national history the people of God observed the practice of burial. Amongst them, as amongst many other ancient nations, the rites of sepulture were considered as of indispensable importance. It was deemed not only an act of humanity; but a sacred duty of religion to pay the last honors to the departed; while, to be deprived of these, as was frequently the fate of enemies at the hands of ruthless conquerors (2 Sam. xxi:9-14; 2 Kings xi:11-16; Ps. lxxix:2; Eccles. vi:3), was considered the greatest calamity and disgrace which a person could suffer.

(3) **Preparations.** On the death of any member of a family, preparations were forthwith made for the burial, which, among the Jews, were in many respects similar to those which are common in the East at the present day, and were more or less expensive according to circumstances. After the solemn ceremony of the last kiss and closing of the eyes, the corpse, which was perfumed by the nearest relative, having been laid out and the head covered with a napkin, was subjected to entire ablution in warm water (Acts ix:37), a precaution probably adopted to guard against premature interment.

(4) **Embalming.** But, besides this first and indispensable attention, other cares of a more elaborate and costly description were amongst certain classes bestowed on the remains of deceased friends, the origin of which is to be traced to a fond and natural, though foolish anxiety to re-

tard or defy the process of decomposition, and all of which may be included under the general head of embalming. Nowhere was this operation performed with such religious care and in so scientific a manner as in ancient Egypt, which could boast of a class of professional men trained to the business; and such adepts had these 'physicians' become in the art of preserving dead bodies, that there are *mummies* still found, which must have existed for many thousand years, and are probably the remains of subjects of the early Pharaohs. The bodies of Jacob and Joseph underwent this eminently Egyptian preparation for burial, which on both occasions was doubtless executed in a style of the greatest magnificence (Gen. 1:1, 2, 26). Whether this expensive method of embalming was imitated by the earlier Hebrews, we have no distinct accounts; but we learn from their practice in later ages that they had some observance of the kind, only they substituted a simpler and more expeditious, though it must have been a less efficient process, which consisted in merely swathing the corpse round with numerous folds of linen, and sometimes a variety of stuffs, and anointing it with a mixture of aromatic substances, of which aloes and myrrh were the chief ingredients (John xix:39, 40).

A sparing use of spices on such occasions was reckoned a misplaced and discreditable economy; and few higher tokens of respect could be paid to the remains of a departed friend than a profuse application of costly perfumes. Nor can we be certain but they intended to use the great abundance of perfumes they provided, not in the common way of anointing the corpse, but, as was done in the case of princes and very eminent personages, of preparing 'a bed of spices,' in which, after burning them, they might deposit the body (2 Chron. xvi:14; Jer. xxxiv:5). For unpatriotic and wicked princes, however, the people made no such burnings, and hence the honor was denied to Jehoram (2 Chron. xxi:19).

(5) **Grave Clothes.** The corpse, after receiving the preliminary attentions, was enveloped in the grave clothes, which were sometimes nothing more than the ordinary dress, or folds of linen cloth wrapped round the body, and a napkin about the head; though in other cases a shroud was used, which had long before been prepared by the individual for the purpose, and was plain or ornamental according to taste or other circumstances. The body thus dressed was deposited in an upper chamber in solemn state, open to the view of all visitors (Acts ix:37).
