FOREWORD

During Fiscal Year 1991, the Federal Transit Administration (FTA) continued a program of grant assistance to the providers of local mass transportation that was begun with the passage of the Urban Mass Transportation Act of 1964. Grants totaling \$3.3 billion were awarded during Fiscal Year 1991, raising the grand total of assistance provided since the program's inception to \$59 billion.

FTA's mission is to provide assistance to State and local governments in planning and providing public mass transit in urban, suburban, and rural areas. During Fiscal 1991, FTA continued and strengthened its efforts to help the transit industry meet the challenges of a rapidly changing mass transit marketplace. In an era of fiscal restraint, the emphasis has been on improved program management with better service to grantees, a reduction in bureaucratic red tape, priority consideration of the most innovative and creative grant proposals, and the foregoing of productive public-private sector partnerships in mass transit.

FTA enjoyed significant success in efforts to increase the agency's productivity, to help grantees make transit projects more cost-effective, and to facilitate greater cooperation between public agencies and private sector interests.

Among the FTA's major accomplishments in FY 1991 was the issuance of a final rule implementing the transportation provisions of the Americans with Disabilities Act of 1990. This far reaching new civil rights regulation is intended to eliminate discrimination against persons with disabilities in public transportation. The new ADA requirements will be integrated into the FTA's existing grant program.

The theme that runs through all of these policies and programs is the belief that a transit system is only successful if it takes people from where they are, to where they want to go, when they want to go there, at a place they can afford, and in safety.

INTRODUCTION

The Fiscal Year 1991 "Statistical Summaries" presents selected data on the distribution and use of various Formula and Discretionary program funds. These programs discussed are the principal source of Federal financial aid to urban and non-urban areas for mass transportation. The data is compiled from the capital, operating and the planning assistance grants awarded in Fiscal Year 1991 to transit authorities, States, metropolitan planning agencies and other units of local governments. This data is represented in the various tables, charts, and graphs which are identified in the table of contents. In all instances, Section 9B is included in Section 9 (formula). Please note that the figures shown on the charts and graphs are lettered and numbered the same as the related tables. Historical data is contained in Tables 15 through 48.

FTA obligated a total of \$3.3 billion in Fiscal Year 1991. Of this amount about 73% was programmed for capital purposes; 25% for operating expenditures; and the remaining 2% for planning assistance. Excluding Stark-Harris grants, the largest urbanized areas with populations over 1 million received 73% of the total grant funds obligated. Please note that the data contained in this report applies only to those FTA programs which are briefly described below:

Programs Financed by the Mass Transit Account of the Highway Trust Fund:

Section 3 - Discretionary program that provides funds for capital projects.

Section 8 - Program that funds planning projects.

Section 16- Program allocated to the States for capital projects to meet special needs of elderly persons and persons with disabilities.

Section 9B*-Provides funds for capital assistance.

Programs Financed by General Funds:

Section 9 - Formula Program that funds capital and operating assistance in urbanized areas.

Section 18- Formula program that funds capital and operating assistance in non-urbanized areas (rural). The Rural Technical Assistance Program (RTAP) also provides funding for training, technical assistance, research and support services.

Interstate

Transfer - Substitution of transit capital and planning projects for Interstate Highway System projects.

Program Financed by the Highway Account of the Highway Trust Fund

FAUS - Urban System Highway funds that are used for capital and planning transit-related projects.

Special Appropriation

Section 75 (Stark-Harris) - Funds provided for the construction of the Washington Metropolitan Area Transit Authority rail system.

* Established in Fiscal Year 1988

OTHER FTA PROGRAMS

While the major portion of FTA funding is for transit capital and operating assistance, financial support is also provided for transit demonstrations, training, safety, technological development and research. Some of these programs are:

SECTION 6 RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROJECTS. The Section 6 program is a major program of FTA. Under Section 6, FTA conducts research, development, and demonstration projects to improve mass transportation service, and to contribute toward meeting total urban transportation needs. Funds are provided to research and demonstrate innovative concepts for transit mobility with a strong emphasis on privatization and competitive service. The Section 6 program also supports FTA's programs to provide transit safety and security.

Another objective of the Section 6 program is to provide technical assistance to improve mass transportation services, techniques, methods, management and planning; to provide technical assistance, including training, to Federal, State, and local governments, transit and planning agencies, private industry, and academia with respect to making such improvements; to insure the transfer to potential users of technical assistance results; and to administer Federally-funded programs related to such activities, including training programs.

SECTION 10. Section 10 authorizes grants to State and local public bodies (and operators of public transportation services) to provide funding assistance for training of personnel employed in managerial, technical, and professional positions in the transportation field. In FY 1987, the program was reoriented to focus the impact of such training more sharply and increase cost-effectiveness through greater use of "block" type grants. These grants, identified as Single Agency Grants, or SAGs, are awarded on the basis of a comprehensive agency-wide training plan developed by the recipient agency that outlines a series of training activities to be accomplished over a period of up to 12 months.

SECTION 11. Section 11 makes funds available to public and private Non-Profit institutions of higher learning to assist in carrying out research on urban area transportation problems, and to provide professional training in the field of urban and rural transportation analysis, management, and operations.

A principal activity funded by Section 11 is the University Research and Training Program, conducted as a national competition designed to support and encourage investigator-oriented research initiatives which assist all levels of public and private sector operators to meet the transportation needs of the community. Research projects funded under this program include such topics as: improving suburban mobility; application of business strategies in providing public transportation services; successful marketing techniques; economics of service diffusion; etc.

SECTION 15 REPORTING SYSTEM. Section 15 is FTA's reporting and information system for the transit industry. Section 15 of the FTA Act requires the Secretary of Transportation to establish a uniform system of accounts and records, plus a reporting system, for the collection and dissemination of public mass transportation financial and operating data by uniform categories. All applicants and direct beneficiaries of Federal assistance under Section 9 are subject to the reporting system and the uniform system of accounts and records. Certain Section 15 data are used by FTA in the allocation formula to apportion Section 9 funds to urbanized areas of 200,000 or more inhabitants.

Financial and operating data reports are submitted by Section 15 reporters on an annual basis and are due 120 days after the reporters' local fiscal year ends. An annual report containing summaries of one year of reported data is published by FTA. The annual report contains revenues, expenses, operating data, and calculated performance indicators for each transit agency reporting and aggregate national statistics. It also contains the data used in the computation of the Section 9 apportionment for urbanized areas with populations of 200,000 or more.

The Section 15 system and its annual report represent a valuable source of public mass transit data for transit industry planning, and investment decisions. It is also intended for use by governing boards, State and local governments, the research community, trade unions, and all other interested in improving the productivity of the Nation's transit systems.

SECTION 19 (NONDISCRIMINATION) PROGRAM. Section 19 of the FTA Act, as amended, prohibits discrimination on the basis of race, color, creed, national origin, sex, or age in any FTA-funded project, program, or activity. Section 19 empowers the Secretary of Transportation to take affirmative action to ensure compliance with its provisions.

SECTION 20 HUMAN RESOURCE PROGRAM. Section 20 provides financial assistance for projects across the country which address human resource needs in public transit and supplement recipient's ongoing civil rights programs. Many of the FTA activities in this area have assisted disadvantaged (including women-owned) business enterprises (DBEs) in becoming full partners in the transit marketplace, thus enhancing the overall level of national productivity. Other projects provide opportunities for upward mobility for minorities and women in transit; projects also assist in improving the ways in which FTA administers its civil rights programs.

UMTA SAFETY PROGRAM. The FTA Safety Program is designed to support State and local agencies in fulfilling their responsibility for the safety and security of mass transportation facilities and services. The program accomplishes its objectives

through the encouragement and sponsorship of safety and security planning, training, information, collection and analysis, system/safety assurance, generic research, and other cooperative government-industry activities.

DOMESTIC PREFERENCE/BUY AMERICA. Section 165 of the Surface Transportation Assistance Act of 1982, as amended, provides that Federal funds may not be used for mass transportation projects unless steel and manufactured products used in the projects are produced in the United States or unless one of four limited exceptions are met. This domestic preference provision is commonly referred to as "Buy America."

Glossary of Terms

Allocation--An administrative distribution of funds. This is done for funds which do not have statutory distribution formulas.

Apportionment--A law that refers to a statutorily prescribed division or assignment of funds. An apportionment is based on prescribed formulas in the law and consists of dividing authorized obligation authority for a specific program.

Appropriations Act--A law passed by the Congress and signed by the President, which makes funds available for expenditures with specific limitations as to amount, purpose, and duration. In most cases, it permits money previously authorized to be obligated and payments to be made.

Authorization Act--Basic substantive legislation or that which empowers an agency to implement a particular program and also establishes an upper limit on the amount of funds which can be appropriated for that program.

Budget Authority--Empowerment by the Congress that allows Federal agencies to incur obligations to spend or lend money. This empowerment is generally in the form of appropriations from General Revenues to the Treasury. However, for the Discretionary program category, it is in the form of "contract authority" derived from the Trust Fund Resource.

Contract Authority--A form of budget authority that permits obligations to be made in advance of appropriations. The Discretionary Grants program is funded from contract authority, subject to an obligation limitation.

Fiscal Year (FY)--Since FY 1977, the yearly Federal accounting period beginning October 1 and ending September 30 of the subsequent calendar year. (Prior to FY 1977, the Federal fiscal year started on July 1 and ended the following June 30.) Fiscal years are denoted by the calendar year in which they end; e.g., FY 1989 began October 1, 1988, and ended September 30, 1989.

Obligation Limitation--An amount specified in an Appropriation Act that limits the amount of Federal assistance that may be obligated during a specified time period, usually one fiscal year. A limitation on obligations is used to reduce the amount of contract authority available for obligation in the Discretionary Grants (trust fund) program.

Obligations--Commitments made by Federal agencies to pay out money, as distinct from the actual payments, which are "outlays." Generally, obligations are incurred after the enactment of budget authority. The obligations are for the Federal share of the estimated full cost of each project at the time it is approved, regardless of when the actual payments are made or the expected time of project completion.

States--As defined in Chapter 1 of Title 23, the 50 States comprising the United States, plus the District of Columbia, and the Commonwealth of Puerto Rico. However, for the purposes of some programs (e.g., Sections 18, 16 and RTAP) the term may also include Territories (Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands)

Urbanized Area--Comprises an incorporated place and adjacent densely settled surrounding area that together have a minimum population of 50,000.

Trust Fund--Accounts established by law to hold receipts which are collected by the Government and earmarked for specific purposes and programs. These receipts are not available for the general purposes of the Government. The Mass Transit Account of the Highway Trust Fund is comprised of receipts from certain highway user taxes (e.g., excise taxes on motor fuels) and reserved for use for transit capital projects and related purposes.

** After Sequestration and Drug Assessment

- 1) Breakdown of Loan Authority, Unrestricted Authority and Contract Authority are provided on next table.
- 2) The Interstate Transfer Substitution program appropriations in FY 1977 through FY 1991 included transit and highway funds. This column includes only the transit funds. The total appropriations for these years are as follows: FY 1977-\$575 M.; FY 1978-\$789 M.; FY 1979-\$700 M.; FY 1980-\$700 M.; FY 1981-\$865 M.
- 3) RTAP appropriations by fiscal year are: 1987-\$5,000,000; 1988-\$4,750,000; 1989-\$5,000,000; 1990-\$4,985,000; 1991-\$5,000,000; 1992-\$5,000,000
- 4) FY 1992 Section 3 includes 3,992,000 for bus testing.
- 5) Sections 26A/B amount total is 39,427,000

PLEASE NOTE THAT STATE PROGRAMS ARE NOT INCLUDED. THE NEW AND RENOVATION OF RAIL CAR AMOUNTS ARE INCLUDED IN RAIL MOD. THE 850,000 SHOWN UNDER NEW SYSTEMS IS ALSO IDENTIFIED UNDER NEW RAIL CARS.

STARK-HARRIS ACT

Public Law 96-184, the National Capital Transportation Amendments Act of 1979, also known as the "Stark-Harris Act", provides authorization for up to \$1.7 billion of 80 percent Federal matching funds for the construction of the Washington Metrorail system.

Federal funds under this Act were first appropriated in Fiscal Year 1983. Through the end of FY 1991, the Congress has appropriated \$1,655.7 billion for Metrorail construction. The funds remaining under the Stark-Harris Act are sufficient to complete construction of 89.5 miles of the Metrorail system as provided under the terms of a Full Funding Grant Agreement executed with the Washington Metropolitan Area Transit Authority (WMATA) in July of 1986.

The Stark-Harris Act also authorizes the Department of Transportation, through annual appropriations, to pay two-thirds of the annual interest due on outstanding WMATA bonds and to pay two-thirds of the principal due when the bonds are retired. Below are listed the bond interest payments for each fiscal year:

<u>Fiscal Year</u>	<u>Amount (In Millions)</u>
1979	\$ 38.1
1980	65.8
1981	65.9
1982	51.6
1983	51.7
1984	51.7
1985	46.2
1986	51.7
1987	51.7
1988	49.1
1989	51.7
1990	59.7
1991	<u>55.5</u>
Total	\$690.4

SECTION 3 DISCRETIONARY CAPITAL GRANT PROGRAM

The Urban discretionary grant program is one of the few large discretionary grant programs in the Federal Government. Administered under the provisions of Section 3 of the Federal Transit Act, as amended, the program was, in fact, authorized in 1964. Discretionary capital assistance grants are made to states and local public agencies at 75% of the total cost of the purchase of transit system equipment, including rolling stock, as well as the planning, engineering, land acquisition, construction, and modernization of transit system facilities, including the construction of new fixed guideway systems. Funds for the Section 3 discretionary program are provided solely from the Federal motor fuel tax, one cent of which is dedicated to mass transit activities. Under the Secretary's Section 3 Overmatch Initiative announced in FY 1989, those areas that provide more than the required 25 percent local matching share will receive increased consideration for project approval.

Three categories comprise the Section 3 program: 1) Bus and Bus Related; 2) Rail Modernization; and 3) New Systems. Under the terms of legislation passed in 1987, 40% of Section 3 funds must go for rail modernization, another 40% for new system construction, and 10% for bus and bus-related activities. The remaining 10% is technically undesignated as to category, but in practice has been allocated among the three categories by Congress during the appropriations process. Funds are restricted to activities associated with each category. For example, bus and bus related category must be used for the acquisition of bus rolling stock and ancillary equipment, and the construction of bus facilities (i.e. maintenance facilities, garages, storage areas, bus terminals, and the like). Likewise, rail modernization funds can only be applied to aging rail systems, principally in the "eight old rail cities" (defined as Boston, New York, Northeast New Jersey, Philadelphia, Pittsburgh, Chicago, Cleveland and San Francisco). These funds typically fund infrastructure improvements (track and right of way rehabilitation, station modernization, rolling stock renewal, safety-related improvements, signal and power modernization, etc). New Systems funds provide resources for the construction of new rail systems (e.g. Atlanta, Miami, Baltimore, San Jose, etc.). Eligible projects are subjected to a rigorous planning process (alternative analysis) to determine potential performance and ranking vis-a-vis other competing projects. New Systems funds are invariably earmarked by Congress.

Prior to the passage of major legislation in 1982, the Section 3 program was FTA's basic and principal capital assistance program. Since then, the Section 3 program has changed direction, assuming a supplementary role, with the Section 9 formula program becoming the main source of Federal funding for routine, year-to-year capital needs. Section 3 is thus used principally to assist in the funding of high priority projects, often of a one-time nature, that exceed the level of available Section 9 formula funds, as well as other local resources.

## Section 9

Section 9 is a formula grant program for urbanized areas, providing capital, operating, and planning assistance for mass transportation. This program was initiated by the Surface Transportation Act of 1982 and became FTA's major transit assistance program in FY 1984. (For FY 1983, a transition year, a special one-year-only version of Section 9, called 9A, was in operation). Under Section 9, FTA provides funding for capital and planning at 80 percent and for operating up to 50 percent. Funds are apportioned to urbanized areas utilizing a formula based on population, population density and other factors associated with transit service and ridership. Section 9 is funded from General Revenues. However, beginning in FY 1988, Section 9 has been supplemented with small sums of capital-only funds that are apportioned together with Section 9, but drawn from the one-cent motor fuel tax that is also the source of funds for the Section 3 program. These special capital funds are designated as Section 9B, although in practice they do not constitute a separate FTA grant program.

For urbanized areas over 200,000 in population, funds flow directly to the designated recipient. For areas under 200,000 the funds go to the Governor of each State for distribution. In FY 1991, a total of \$1.8 billion was obligated. Of this amount, \$1 billion was used for capital investments and the remaining \$779 million was used for operating purposes.

As a group, the urbanized areas with populations over 1 million were the largest recipients. They received \$1.3 billion or 74% percent of Section 9 funding. Comparatively, the overall obligational level for FY 1991 was \$89.1 million more than the previous year. This is attributable to an increase in the availability of funds plus the faster rate at which funds were obligated. Obligations for capital assistance rose by \$75 million which represents 84% of the total increase.

SECTION 16 PROGRAM  
FEDERAL TRANSIT ADMINISTRATION

Section 16 of the Federal Transit Act, authorizes capital assistance grants for private nonprofit organizations specifically for the purpose of assisting them in providing transportation services for elderly persons and persons with disabilities when existing mass transportation services are unavailable, insufficient, or inappropriate. This special program of assistance was begun in FY 1975.

Section 16 funds are allocated among the states by an administrative formula which is based on the population of elderly and handicapped persons in each State according to the most recent U.S. Census figures. The Section 16 program provides funding on an 80 percent Federal, 20 percent local matching basis. The program is administered through the States and it is at the State level that specific funding decisions are made.

This program has enabled thousands of elderly persons and persons with disabilities persons to achieve greater mobility and independence. During the period FY 1975 through FY 1991, State agencies have obligated more than \$449 million for the purchase of specialized vehicles and equipment.

## SECTION 18

The Section 18 program provides funding for public transportation in nonurbanized areas. Since Fiscal Year 1979 when the program was authorized, Congress has appropriated \$65-75 million annually for Section 18. In addition, between \$10 million and \$20 million a year has been transferred annually to Section 18 from Section 9 under a statutory provision allowing the Governor of any State to transfer funds to Section 18 from the Governor's apportionment of Section 9 funds for cities under 200,000. FTA apportions Section 18 funds to the States according to a formula based on each State's population in rural and small urban areas (under 50,000 population). The States administer the program in accordance with State Management Plans. Eligible recipients include public bodies and private non-profit organizations. Participation by private for-profit enterprises under contract to an eligible recipient is encouraged. Section 18 financial assistance may be used for capital, operating, and administrative expenses. The State may use up to fifteen percent of its apportionment for program administration, planning, and technical assistance. Coordination with other Federally assisted transportation services, such as those funded by the Department of Health and Human Services, is also encouraged.

### RURAL TRANSIT ASSISTANCE PROGRAM

Since Fiscal Year 1987, Congress has appropriated approximately \$5 million a year for the Rural Transit Assistance Program (RTAP) to provide training, technical assistance, research, and related support service, for providers of rural public transportation. FTA allocates 85% of the funds to the States to be used to develop State programs for rural training and technical assistance. The allocation formula provides \$50,000 to each State, and \$10,000 to each insular area, and distributes the remainder according to the rural population-based Section 18 formula. The remaining 15% of the annual appropriation is used to support a National program, which is administered through a contract to a consortium led by the American Public Works Association (APWA) and directed by a Program Review board consisting of local rural providers and State program administrators.

Federal-Aid Urban Systems (FAUS)

The Federal Aid Urban System (FAUS) program provides for the diversion of Highway Trust Funds to finance mass transit, capital and planning assistance projects. The FAUS projects are federally funded at 75%. From its inception in 1974 through FY 1991, a total of \$333.1 million has been used for transit related projects. See below for breakdown of FY 1991 FAUS grants. As in previous years, the bulk of the funds continue to go for highway projects administered by the Federal Highway Administration.

From FY 1984 thru FY 1991 all FAUS transit grant funds were used for buses and bus related expenditures except where noted. The total of grants approved for those fiscal years is:

FY 1984	\$4,514,175	
FY 1985	239,250	
FY 1986	4,215,790	
FY 1987	6,385,208	
FY 1988	6,027,500	
FY 1989	534,670	
FY 1990	3,816,750	
FY 1991	<u>5,773,152</u>	(\$850K for Light Rail Vehicles)
	\$31,506,495	

Table 17 lists FAUS obligations from FY 1974 through FY 1991. The level of obligations fluctuated from year to year but there was an unparalleled drop in FY 1983. In FY 1983 the total obligations were \$6 million, \$46 million less than FY 1982, the year in which the obligations reached the highest point at \$52.6 million. In the years following, the obligations stayed in the \$4 or \$6 million range except for Fiscal Years 1985 and 1989 when the total grants approved were less than \$1 million.

FY 1991 FAUS Grants

Burlington, VT	11	35ft buses -	1,584,000	
Vermont, State	1	standard and one small bus -	123,990	
Columbus, OH	18	standard buses -	2,977,500	
Anchorage, AK	3	vans -	237,662	
Portland, OR		Light Rail Vehicles -	850,000	

INTERSTATE TRANSFER TRANSIT PROGRAM SUMMARY

The Interstate Transfer program was established by the 1973 Federal-Aid Highway Act and amended by subsequent legislation. The law permitted State and local officials to withdraw planned Interstate routes, or segments which were within or which connect urbanized areas, and to substitute mass transit or non-interstate highway projects. Withdrawal requests were reviewed and approved jointly by FTA and the Federal Highway Administration (FHWA). Substitute transit projects are handled by FTA while highway projects are handled by FHWA.

Substitute funds may be used for a wide variety of highway and public mass transit projects. Interstate grants for transit projects can finance, for example, the construction and improvements of transit facilities, the purchase of rolling stock and other transportation equipment, etc. The federal participation of Interstate Transfer projects is 85 percent. The level of obligations for the Interstate Transfer-Transit program reached a peak of \$679 million in FY 1980. Since then, there has been a continuous downward trend in the annual amounts obligated for this program. In FY 1989 obligated funds declined to \$237.1 million, and in 1991 dropped to \$140.7 million. Please see below for breakdown. As the Interstate Highway System itself draws near its completion, substitute projects of either a highway or transit nature have largely been completed, and this is reflected in the lowering level of annual obligations.

<u>URBANIZED AREA</u>	<u>PURPOSE</u>	<u>AMOUNT</u>
Killingly	Maintenance Facility	297,789
Hartford	26 Small Buses	672,537
Boston	Rail Mod	2,425,730

## SECTION 8

FTA carries out the Federal mandate to support urban transportation planning under the authority of Section 8 of the Federal Transit Act, as amended. The Section 8 Planning Program provides financial assistance to State and local governments to aid in the preparation of plans and Transportation Improvement Programs (TIPS), which guide the use of Federal capital assistance resources. The plans and programs reflect a variety of state and local objectives as well as the administration's national policy priorities. Although a discretionary program by statute, distribution of the bulk of Section 8 funds to states and each of the 374 urbanized areas is done using a population-based administrative formula. FTA field staffs negotiate a Unified Planning Work Program (UPWP) with each Metropolitan Planning Organization (MPO) on the basis of the respective formula-determined marks.

Congress authorized and has appropriated approximately \$45 million annually since FY 1987 for planning purposes. Contracts and grants, at 80% Federal 20% local match, are made to States and MPO's, though a significant share of Section 8 funds are "passed through" by transit operators and local governments. Section 8 funds are utilized to plan, design, engineer, and evaluate urban mass transportation projects as well as for the development of comprehensive regional transportation plans and various other technical studies.

Section 8 funded activities may include:

- a. Studies relating to planning management, operations, cost-effectiveness, financing and impacts of transit projects;
- b. Preparation of engineering and architectural surveys, plans, specifications and environmental impacts;
- c. Evaluation of previously funded projects;
- d. Activities preliminary to the construction of or improved operation of public mass transportation systems, facilities, or equipment.

## SECTION 23

Section 23(a) of the Federal Transit Act authorizes the Secretary of Transportation to use up to one-half percent of the appropriations for Sections 9 and 18; Stark Harris (Washington Metro), and Title 23 (Interstate Transfer) and up to three-fourths percent of Section 3 to contract with any person to oversee the construction of any major project under such section of the Act. Project Management Oversight (PMO) provides for the monitoring of a major capital project's process to determine whether a project is on time, within budget, in conformance with design criteria, constructed to approved plans and specifications, and is efficiently and effectively implemented.

Section 23(h) also permits the use of such funds to include safety, procurement, management and financial compliance reviews and audits. Out of \$13,027,637 obligated for Section 23 activities in fiscal year 1991, \$10,466,948 was used for Project Management Oversight activities, \$850,000 for the Triennial Review Program, and \$600,000 was obligated for the Financial Management Oversight Review Program.
