PREFATORY NOTE

The rapid growth of the collection of books and pamphlets on Education in the libraries of Columbia University and the large number of students, graduate and undergraduate, making constant use of them, have made almost necessary the printing of a catalogue, or finding-list, of the collection. The present edition of this catalogue is tentative in the sense that it will show what the Columbia University libraries possess on education and wherein the collection needs additions in order to be as complete as possible. At the same time, it is believed that the catalogue, even in its tentative form, will be a useful bibliography of education for students of education elsewhere, as well as for those at Columbia University.

Where sets of State, municipal, and institutional reports are shown by the catalogue to be incomplete, the University libraries will welcome additions by gift.

Titles marked *C* are to be found in the University Library, and those marked *T* are in the Bryson Library at Teachers College. College and university catalogues and reports are in the University Library; catalogues and reports of elementary and secondary schools and of normal schools are in the Bryson Library. Where possible, the large number of books purchased while the catalogue has been passing through the press have been inserted in proof.

The collection of *Columbiana* is purposely omitted, it being large enough to justify a special catalogue. The same is true of the large and important collection of text-books of all subjects of elementary and secondary instruction, in the Bryson Library.

The catalogue contains over 13,500 titles. In making up the list from the card-catalogues of two libraries there have been necessarily some conflicts of classification, but reference to the full author-index will enable any book to be found readily.

Suggestions as to the correction or completion of the catalogue will be gratefully received.

The officers and students of Columbia University and all users of this catalogue are indebted to the patient labor and scholarly zeal of Mr. Charles Alexander Nelson, head reference librarian in the University Library, under whose personal supervision the whole work has been done, and to Miss Elizabeth G. Baldwin, librarian of Teachers College, for the carefully prepared author-index.

NICHOLAS MURRAY BUTLER,
Professor of Philosophy and Education.
