BULBS

AND FLOWERING ROOTS

FOR FALL PLANTING

36 Cortlandt Street, NEW YORK.

THORBURN'S SPECIAL COLLECTIONS OF CHOICE BULBS

THESE ASSORTMENTS ARE MADE UP OF THE FINEST STANDARD SORTS,
AND MAY BE RELIED UPON TO GIVE SATISFACTION.

No. 1. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

Price, \$2.50.

12 White Roman Hyacinths,	6 Trumpet Narcissus Princeps,
6 Fine Named Dutch Hyacinths,	6 Double Narcissus Van Sion,
6 Fine Mixed Dutch Hyacinths,	6 Poet's Narcissus,
12 Fine Mixed Single Tulips,	12 Mixed Spanish Iris,
12 Fine Mixed Double Tulips,	6 Campernelle Jonquils,
30 Mixed Crocus,	6 Scilla Sibirica,
6 Polyanthus Narcissus,	6 Freesia refracta.

No. 2. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

Price, \$4.75.

Consists of the same varieties as Collection **No. 1**, but with double the number of each sort

No. 3. COLLECTION OF CHOICE BULBS FOR HOUSE CULTURE

Price, \$9.

Consists of the same varieties as Collection **No. 1**, but with four times the number of each sort.

No. 4. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

Price, \$2.

6 Mixed Double Red Hyacinths,	1 Crown Imperial,
6 Mixed Single Blue Hyacinths,	12 Spanish Iris,
6 Mixed Single White Hyacinths,	6 Double White Narcissus,
24 Mixed Early Tulips,	6 Butter and Eggs Narcissus,
50 Mixed Crocus,	6 Scilla campanulata,
12 Mixed Double Anemones,	3 Bulbocodium vernum.

No. 5. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

Price, \$3.75.

Consists of the same varieties as Collection **No. 4**, but with double the number of each sort.

No. 6. COLLECTION OF HARDY BULBS FOR OUTDOOR CULTURE

Price, \$7.

Consists of the same varieties as Collection **No. 4**, but with four times the number of each sort.

CATALOGUE OF

BULBS AND FLOWERING ROOTS FOR FALL PLANTING

AUGUST 21, 1899.

THE growing of bulbs for winter and spring-flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Scillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

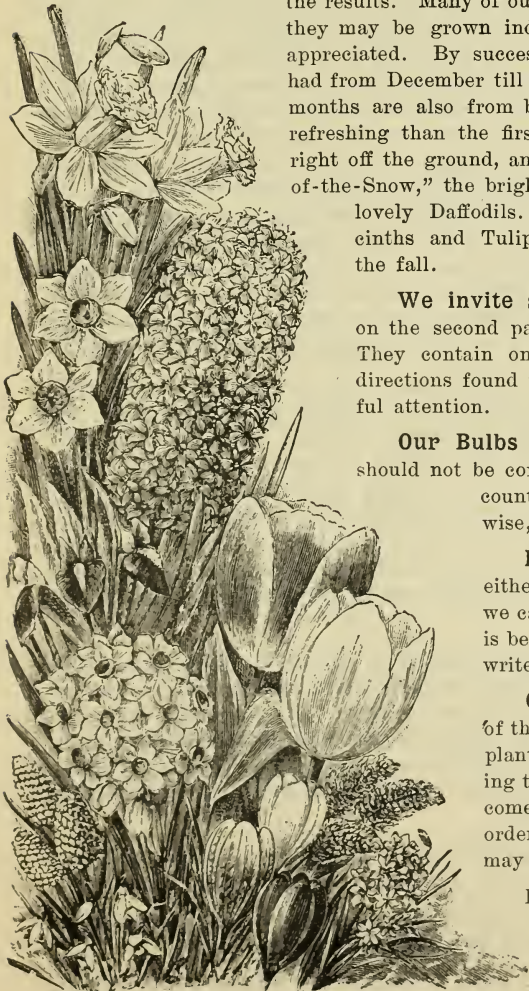

Our Bulbs are all selected, and from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

NAME and ADDRESS. We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We therefore beg our correspondents to write on each order their name and full address.

ORDERS should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to October, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

J. M. THORBURN & CO.
36 CORTLANDT STREET, NEW YORK.

HYACINTHS.

Hyacinths are ready for delivery in September.

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower

Group of Hyacinths.

from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

OUTSIDE CULTURE.—October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy some sand should be mixed with it; and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they

will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it. On the inside of the back cover of this Catalogue we give suggestions for a few designs suitable for Hyacinth beds. They are all designs in which we have seen splendid effects produced.

CULTURE IN POTS. For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulbs should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

CULTURE IN GLASSES. Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gas light. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selection to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland.

SELECT NAMED HYACINTHS.

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (*), and those of them that do well in water by two asterisks (**).

The sorts printed in **boldface type** are most largely used for bedding.

If ordered by mail, please add 15 cents per dozen for postage.

MIXED HYACINTHS IN SEPARATE COLORS.

Suitable either for Forcing or Bedding.

Our Mixed Hyacinths should not be confounded with the small-size, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

If ordered by mail, add 15 cents per dozen for postage.

ROMAN HYACINTHS.

Extensively used by florists for forcing for cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

If by mail, add 10 cents per dozen for postage.

ITALIAN HYACINTHS.

These are, like the Roman Hyacinths, also grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

MINIATURE HYACINTHS.

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans, as shown in the illustration on page 2. We offer them in separate colors, and also mixed, as follows:

Pure White, Rosy Red Light Blue,
 Cream White, Dark Blue, Yellow.
 Dark Red, Mixed, All Colors.

Price 60 cts. per dozen, \$4 per 100.

TULIPS.

 Tulips are Ready for Delivery in September.

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot-culture and forcing for winter cut-flowers, they are also invaluable.

CULTURE. The cultural directions given for Hyacinths on page 2 are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot-culture, a compost of two parts loam to one part of light manure, with some sand intermixed, is suitable. From 3 to 5 bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for Hyacinths. Most of the varieties named below are equally well adapted for pot-culture or the open border.

SINGLE EARLY TULIPS.

 Six of a kind at dozen rates, 25 at 100 rates.

SINGLE LATE-FLOWERING TULIPS.

These are all tall-growing May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes.

	Per doz.	100
Bizarres. Crimson, violet-purple, etc., on yellow ground (25 named varieties.)	8c.	\$0 60 \$4 00

SINGLE LATE-FLOWERING TULIPS—continued.

		Per doz.	100
Bybloems. Purple, violet and maroon, on white ground (25 named varieties)	each	8c.	\$0 60 \$4 00
“ Rosy on white (25 named varieties)	each	8c.	60 4 00
Breeders. Assorted; separate colors.	each	8c.	75 5 00
Mixed Bizarres, Bybloems and Breeders, see under head of “Mixed Tulips,” page 10.			
Bouton d’Or. The only late pure deep yellow; very beautiful; fine for cutting.	each	5c.	40 2 50
Gesneriana. Dazzling scarlet, black center; very effective in beds; also fine for cutting.	3 for 10c.	30	1 50
Golden Crown. Deep yellow edged red; fine for cutting.	3 for 10c.	25	1 25
Golden Eagle or Yellow Gesneriana. Deep yellow, with narrow orange-red fringe.	each	5c.	35 2 00
Isabella. Rose and white; very fine.	each	8c.	60 3 50
Picotee (Maiden’s Blush). Pure white, faintly edged pink. Flowers long, narrowing to the center and reflexing at the top.	each	10c.	90 6 00

DOUBLE TULIPS.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cents per dozen for postage.

	Height, inches		Per doz.	100
Agnes. Very brilliant red; early; quite dwarf.5	each	5c.	\$0 35 \$2 00

“ Scarlet. Extra fine forcer	6	3 for 10c.	30	1 50
“ Violet.	6	3 for 10c.	30	1 50

DARWIN TULIPS.

These belong to the class of single late-flowering Tulips (page 8), being in fact modern forms of *Gesneriana*. They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and surpass all others in brilliancy and variety of coloring. They are also most effective for bedding. Besides the mixture, we offer the following named sorts:

	Each	Per doz.		Each	Per doz.
King of the Reds. Red, fine.....	\$0 08	\$0 60	Besronia delle Fore. Lilac-	\$0 08	\$0 60
Joost van den Vondel. Brown-	08	60	violet.....	08	60

Wilhelmina. Brown-red.....	08	60	Pitzepios. Lilac-rose.....	08	60
General Boulanger. Dark red....	08	60	Soas. Rose and lilac	08	60

PARROT TULIPS.

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. *Very late in flowering.*

If ordered by mail, add 6 cents per dozen for postage.

	Each	Per doz.	100

MIXED TULIPS.

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds, they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

Bed of Tulips.

TULIP BEDS.

It is to be regretted that the gorgeous displays presented by the Tulip beds of our public parks should so seldom be seen on our private lawns. Tulips are so hardy and of such easy culture that failure to obtain satisfactory results is possible only by selecting unsuitable sorts. In order to obviate this difficulty, we give the following groups of sorts that bloom at the same time and are of equal height. Any of these groups will form an effective combination. After the Tulips have flowered, the beds can be used for bedding plants, such as Geraniums, etc., to full advantage. Rich soil is necessary.

It is advisable to order as soon as possible after receipt of this Catalogue, as later on in the season we may be sold out of some varieties, owing to an unusual demand for them. In that case we shall substitute equally fine sorts of same color and time of bloom.

GROUPS OF TULIPS THAT WILL FORM EFFECTIVE COMBINATIONS.

ALLIUM.

Ready in October.

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

Neapolitanum. Large umbels of pure white flowers, borne on long stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration.....	Each	Doz.	100
	\$0 05	\$0 25	\$1 25
Moly luteum. Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses	2	for 5 cts...	20 1 00
Hermetii grandiflorum. Makes a splendid pot-plant for winter blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for forcing for cut-flowers.....	05	30	1 50

Types of Narcissi.

NARCISSUS.

Narcissi are Ready for Delivery in September.

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

SINGLE NARCISSUS, or DAFFODILS.

If ordered by mail, add 13 cents per dozen for postage.

LILIES.

For stateliness of habit, beauty of form, and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot-culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

Lilium Harrisii and *Lilium candidum* ready in August; all others not till November.

If ordered by mail, add 3 cents each for those marked (*); others from 1 to 2 cents each for postage.

Lilium Harrisii.

LILIUM HARRISII.

(BERMUDA EASTER LILY.)

Bulbs Ready Now.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decorations. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size.

CHINESE SACRED LILY.

(THE WATER-FAIRY FLOWER.)

Ready in September.

12 cts. each, \$1.25 per dozen.

If ordered by mail, add 30 cents per dozen for postage.

A variety of the Polyanthus Narcissus, imported from China. The Chinese have the following interesting fable connected with this flower:

“Once upon a time a father left his property to his two sons, with the understanding that it should be equally divided; but the elder son seized all the tillable land and left the younger nothing but an acre covered with rocks and water. The younger son, failing to obtain justice, sat at the water’s edge bemoaning his misfortune. A benevolent fairy appeared, and, giving him these Narcissus bulbs, told him to drop them into the water. Shortly afterward their flowers were developed, and the neighbors crowded to see the fairy’s gift. In the course of a few years the badly treated brother accumulated a fortune by the rapid increase and sale of his bulbs. Then the elder brother, envious of the prosperity of the younger, bought up great numbers of the bulbs—hoping to get a monopoly by getting all of them—at so heavy a price that he was obliged to mortgage his property to procure funds for the purpose. He planted all his good land with bulbs, but they soon began to die, as they cannot live long out of water. He was ruined, while his brother, who had bought the mortgage, foreclosed it, and became possessed of the whole estate in time to plant some of the dying bulbs in the watery acre.”

The bulbs should be placed from 3 to 6 in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulb so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulb entirely, and place in a sunny window in a cool room.

12 cts. each, \$1.25 per dozen.

Chinese Sacred Lily.

LILIES, continued—BEAUTIFUL JAPAN LILIES.

These do not generally arrive till November and December. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily grown Lilies.

Postage on these varies from 2 to 10 cents on each, according to size.

Lilium auratum.

Auratum (Golden-Banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

7 to 9 inches in circumference. 10 cts. each, \$1 per dozen, \$6.50 per 100.

9 to 11 inches in circumference. 15 cts. each, \$1.50 per dozen, \$10 per 100.

11 to 13 inches in circumference. 25 cts. each, \$2.50 per dozen, \$16 per 100.

Auratum macranthum, or **platyphyllum**. A splendid variety of the above, with much larger flowers; of perfect form and great substance; 5 to 8 feet. 40 cts. each, \$4 per doz.

Auratum rubro vittatum. Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 75 cts. each, \$8 per doz.

Auratum pictum. Flowers like those of the common Auratum, but with larger spots; very beautiful. Has larger dots of red than the common Auratum. 50 cts. each, \$5 per doz.

Auratum Wittei. Very large, pure white flowers, with raised spots of satiny white; a grand Lily; 4 to 6 feet. 75 cts. each, \$7.50 per doz.

LILY-OF-THE-VALLEY. (CONVALLARIA MAJALIS.)

Ready in November.

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

Convallaria majalis. White flowers; fine large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz.

“ “ Strong pips for forcing. 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

ARUMS.

Ready for shipment in September and October.

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in sub-tropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per doz.

Maculatum. A fine decorative plant; flowers white; green foliage, spotted black.....	10	1 00
Palæstinum sanctum. The new <i>Black Calla</i> from the Lebanon Mountains; a splendid pot and chamber plant, with fine, dark green foliage, large black spathe and black spadix	15	1 50

Arum Dracunculus.

AMARYLLIS.

Ready in October.

Extremely ornamental greenhouse plants, with large fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top dressing each year when starting, and manure water during the growing season.

	Each	Per doz.

CROCUS.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close—say 2 inches apart—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years.

For flowering in pots, hedge-hogs, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

HYBRID NAMED CROCUS.

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

CYCLAMEN.

Most of them ready in September.

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

CROWN IMPERIALS.

(FRITILLARIA IMPERIALIS.)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be.

Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

FRITILLARIAS.

Ready in September.

Graceful, hardy, spring-flowering, bulbous plants, thriving in good, rich, well-drained soil. The name is from *fritillus*, a chess-board, in allusion to the chequered flowers of some of the species. Some are interesting from their peculiar coloring, and others are really beautiful. They are very effective in mixed flower borders, and they also make excellent pot-plants.

	Each	Per doz.
Biflora. Low-growing species; brown ground, prettily lined.....	\$0 08	\$0 75 \$4 00
Lanceolata. Tall flowers, mottled green and brown.....	08	75 4 00
Lilacea. Flowers white; easily grown.....	08	75 4 00

Meleagris (Guinea-fowl Flower). Mixed colors. Valuable for outdoor decoration.....	05	30 1 50
Fritillaria imperialis. See Crown Imperials, above.		

Fritillaria recurva.

IRIS. (FLEUR-DE-LIS.)

The justly popular *Freesias* are greatly prized for the end of November, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a

light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce very large blooms in comparison to their size.

Freesia refracta alba. Pure white, and sweet-scented; very largely forced. It is one of the prettiest bulbous plants known. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. There is a peculiar delicacy and beauty about this flower that is all its own; the fragrance is remarkable and very lasting.

Monster Size Bulbs. 30 cts. per doz., \$1.50 per 100, \$12 per 1,000.

First Size Bulbs. 20 cts. per doz., \$1 per 100, \$8 per 1,000.

Second Size Bulbs. 15 cts. per doz., 75 cts. per 100, \$6.50 per 1,000.

Freesia Leichtlinii.

Creamy white, shading to yellow; a pretty sort; distinct in color. 35 cts. per doz., \$2 per 100.

Freesia refracta alba.

GLADIOLUS.

Ready in November.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in

a warm room or greenhouse, except those prefixed with an asterisk (*), which are hardy, and may be planted out; it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published for 1875.

NEW DOUBLE LARGE-FLOWERING JAPAN IRIS. (IRIS KÄMPFERI.)

	Each Per doz.	
	\$0 20	\$2 00

Iris.

IXIAS.

Ready in October.

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

	Each	Per doz.	100

ERYTHRONIUMS.

Ready in September.

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubby borders. They may also be grown in pots in coldframes for house decoration when in flower.

Giganteum (Giant Dog's-Tooth Violets). Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown, and its elegant habit makes it a very attractive pot-plant for window decoration.....	Each	Per doz.	100
	\$0 05	\$0 40	\$2 50
Grandiflorum. Leaves unmottled, flowers bright yellow, with recurved petals.....	10	1 00	6 00
Hartwegii. Fine new variety; light yellow flowers, like those of <i>E. giganteum</i> , but each borne on a separate stalk; the easiest of all the sorts to grow.....	06	50	3 50
Hendersonii. Flowers pink, with very dark purple center; leaves beautifully mottled in dark brown; petals strongly recurved; very rare....	10	1 00	5 00
Johnsoni. Large, clear pink flowers, with orange center; foliage prettily variegated in dark brown; grown in pots in frames and brought into the house when in flower, they make very attractive decorative plants.....	12	1 25	8 00
Revolutum. Leaves mottled white and brown; flowers opening white, and passing to pink and purple.....	08	65	4 50
Dens-canis (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.....	05	30	1 50

(DOG'S-TOOTH VIOLETS.)

They succeed in almost any light soil, but

Erythronium.

LACHENALIAS.

Ready in September.

Very pretty, spring-flowering greenhouse bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, 4 to 6 bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

Lachenalias.

	Each	Per doz.
Luteola. Pale yellow flowers, flushed with green.....	\$0 25	\$2 50
Nelsoni. Golden yellow flowers in long racemes; very handsome.....	40	4 00

Tricolor. Foliage heavily spotted brown; flowers yellow, tipped with green and red; very pretty for massing.....	25	2 50

MONTBRETIAS.

Ready in November.

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

	Each	Per doz.	100
Bouquet Parfait. Large, bright vermilion flowers, with deep yellow center....	\$0 08	\$0 75	\$4 00
Crocsmiæflora. Large; bright orange, tinged scarlet.	05	35	2 00

	Each	Per doz.	100
Arabicum. White, with black center; valuable for forcing.....	\$0 05	\$0 40	\$2 50
Pyramidale. Showy spikes of white flowers.....	35	3 50	
Umbellatum (Star of Bethlehem). Outside green and white striped, inside satiny white; flowers in umbels; very showy...2 for 5 cts..		20	1 00

Montbretias.

NERINE.

Ready in October and November.

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

Nerine Japonica.

	Each	Per doz.
Crispa. Very handsome scarlet flowers	\$1 00	
Flexuosa. Bright crimson-scarlet, tinged with orange	1 00	
Fothergillii. Bright, glittering scarlet, in a many-flowered umbel.....	1 00	
Fothergillii major. A magnificent plant for house or conservatory. The flowers are of the intense shining scarlet, and by artificial light the crystalline cells of the petals sparkle like jewels. It flowers very freely ..	1 50	
Japonica (Japan Spider Lily). Purplish red; very beautiful	15	1 25
Sarniensis (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best known sort	20	2 00
Undulata. Rosy purple, wavy flowers; very handsome...	75	

OXALIS.

Ready in September.

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in sandy soil, 7 or 8 bulbs in a 4 or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Each	Per doz.	100
Arborea alba. White.....	\$0 05	\$0 45	\$3 00
Buttercup. A splendid winter-blooming plant for pot culture. The flowers are pure bright yellow, and produced in great abundance. It is very easily cultivated, and, being a strong grower, only one or two bulbs should be planted in a 5 or 6-inch pot	05	40	2 50

Mixed.	2 for 5 cts...	20	1 00

Buttercup Oxalis.

PAEONIES.

Ready in October.

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plants, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn, or flower-border, or shrubbery decoration. They are all hardy. See next page for varieties,

Victor . Beautiful clear pink.....	20	2 00

RANUNCULUS.

Ready in September.

The main soil for these should be loam or clay, with a good dressing of rotten manure and leaf-mould; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cents per dozen for postage.

Ranunculus.

RICHARDIAS, or CALLAS.

Ready in September and October.

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

White Calla, or Lily-of-the-Nile (<i>Calla Æthiopica</i>). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants...\$0 20	Each	Per doz.	100	\$2 00	\$15 00

Black Calla. See <i>Arum sanctum</i> , page 18.					

White Calla.

SCILLAS.

Ready in September.

No garden can be complete without these beautiful flowers. *S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years.

If ordered by mail add 5 cents per dozen for postage, except those marked with a star (*), which are 2 cents each.

Sibirica. The effect in early spring of this intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus, can hardly be over-estimated; are most valuable for permanent edging. 2 for 5 cts., 20 cts. per doz., \$1 per 100.

SNOWDROPS. (GALANTHUS NIVALIS.)

Ready in September.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in the spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

If ordered by mail, add 3 cents per dozen, or 25 cents per 100, for postage.

Double-flowering Snowdrops	25	1 75	13 00
Giant Snowdrop of Asla Minor (<i>Galanthus Elwesii</i>)	15	1 00	8 00

SPIRAEA or ASTILBE.

Ready in November.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

Japonica (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 10 cts. each, \$1 per doz., \$6 per 100.

Japonica fol. aurea reticulata. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

Japonica compacta multiflora. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.25 per doz., \$7 per 100.

Aruncus. Pure white; grows 4 feet high. 20 cts. each, \$2 per doz., \$14 per 100.

Astilboides floribunda. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$7 per 100.

Palmata. Crimson; strong clumps. 15 cts. each, \$1.50 per doz., \$10 per 100.

Lemoinei, "Snow Plume." A new variety, with fresh, dark-green foliage and large, graceful, snow-white plumes; a grand forcer. 30 cts. each, \$3 per doz., \$22 per 100.

Spiraea Astilboides floribunda.

TUBEROSES.

Ready in December.

“ candida . Pure white; free flowering.....	05	40	2 50
Zygadenus Fremonti . Fragrant yellow flowers; hardy, and easily grown.....	08	75	5 50

Hardy Flower Seeds.

For Autumn Sowing.

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.

Double *Delphinium hybridum*.

Grass Seeds for Autumn Sowing.

MIXTURES FOR GOLF LINKS.

We have always on hand all the valuable natural grasses of Europe and America, and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the Links may be, for poor land or rich, high and dry, or low and wet.

Golf Links Mixture. For the grounds in general. Per bushel of 20 lbs., \$2.50.

Putting-Green Mixture. A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve the more it is tramped on. Per quart, 30 cts.; peck, \$1.50; bushel of 24 lbs., \$5.

N. B.—Our Pamphlet on the Seeding and Preservation of Golf Links will be mailed to parties interested on application.

LAWN GRASS MIXTURES.

CENTRAL PARK MIXTURE. For lawns of any extent, we recommend this, our best mixture, to be sown from three to five bushels to the acre. (15 lbs. to bushel.) Per quart, 25 cts.; ½ peck, 65 cts.; peck, \$1; bushel, \$3.50. (We can also make special good mixtures at lower prices.)

THORBURN'S LAWN-RESTORING GRASS SEED. A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. To restore a lawn that is partially worn-out or burned, the best time is very early in spring, as soon as the frost is entirely out of the ground. The bare spots should be well scratched or raked up, and this seed sown liberally. Cover the seed very thinly with earth, and then roll or press down firmly with the back of the spade. Some **Lawn-Restoring Grass Seed** should be kept always on hand, and before each rain during the summer some of it should be sown on any parts that may appear thinner than the rest. Seed may be sown in fall, as late as from September 1 to October 1, according to the weather. Price, per quart-box, 30 cts.; per bushel of 24 lbs., \$5.

GRASS SEEDS.

☞ *These prices are subject to change.*

	Per lb.	100 lbs.
Agrostis canina (<i>Rhode Island Bent Grass</i>). True. Valuable grass for lawn; sow three or four bushels to the acre for lawns. (12 lbs. to bus.)	\$0 30	\$25 00
Agrostis stolonifera (<i>Fiorin</i> , or <i>Creeping Bent Grass</i>). Valuable in mixture, as it will thrive in moderately moist land; useful for croquet grounds. Same quantity as the preceding. (15 lbs. to bus.)	30	25 00
Agrostis vulgaris (<i>Red-top Grass</i>). A valuable permanent grass as a mixture in either meadows, pastures or lawns. Same quantity per acre as above. (14 lbs. to bus.)	15	10 00
FANCY HEAVY RED-TOP GRASS. Absolutely clean and free from chaff	25	20 00
Allopecurus pratensis (<i>Meadow Fox-tail Grass</i>). One of the very best grasses for permanent pasture. 25 lbs. to acre	30	25 00
Anthoxanthum odoratum (<i>True Perennial Sweet Vernal Grass</i>). Valuable for a mixture with pasture grasses; continues to throw up root foliage until late in the autumn. From 2 to 5 lbs. to the acre with other sorts	40	38 00
Anthoxanthum odoratum puelli (<i>Annual Sweet Vernal Grass</i>). Much smaller than the perennial. 20 to 25 lbs. to the acre	20	16 00
Avena elatior (<i>Tall Meadow Oat Grass</i>). Valuable for pastures. 50 lbs. to the acre	25	18 00
Avena flavescens (<i>Yellow Oat Grass</i>). Sown with other species is desirable for dry meadows and pastures. About 25 lbs. to the acre	1 00	85 00
Blue Grass, Canada , see <i>Poa compressa</i> ; English , see <i>Festuca pratensis</i> ; Kentucky , see <i>Poa pratensis</i> .		
Bromus inermis (<i>Awnless Brome Grass</i>). A valuable forage plant for light, dry soils. About 35 to 40 lbs. to the acre	25	18 00
Bromus Schraderi (<i>Rescue Grass</i>). Thrives in any soil, but does best in wet or moist lands. 30 lbs. to the acre	30	25 00
Cynosurus cristatus (<i>Crested Dog's-tail Grass</i>). Valuable grass for sheep pastures, on dry, hard soils and hills. 25 lbs. to the acre	40	35 00
Dactylis glomerata (<i>Orchard Grass</i>). Will endure considerable shade; blossoms about the same time as Red Clover, and is one of the very best pasture grasses. 3 bus. to acre. (14 lbs. to bus.)	20	16 00
Dog's-tail. See <i>Cynosurus cristatus</i> .		
Elymus arenaria (<i>Lime</i> , or <i>Beach Grass</i>). For sandy seashores, canal and railroad banks, etc	45	38 00
Festuca duriuscula (<i>Hard Fescue</i>). Of a very fine quality, and thrives well in dry situations. 30 lbs. to the acre	25	20 00
Festuca elatior (<i>Tall Fescue</i>). Best on moist, alluvial and strong clay soils. 40 lbs. to the acre	25	20 00
Festuca fluitans (<i>Floating Fescue</i>). A perennial, with long, creeping roots; often introduced on the margins of ponds and rivers, to afford nourishment for trout and wild ducks	35	30 00
Festuca ovina (<i>Sheep's Fescue</i>). For sheep pasture; occupies land which better grasses refuse. 35 lbs. to the acre	25	20 00
Festuca pratensis (<i>Meadow Fescue</i> , or <i>English Blue Grass</i>). Valuable for permanent grass land.	20	15 00
Festuca tenuifolia (<i>Slender Fescue</i>). Flourishes on dry and sterile soils. 30 lbs. to the acre	25	20 00
Holcus lanatus (<i>Meadow Soft Grass</i>). Inferior to many others, but of easy culture, and accommodates itself to all soils. 4 bus. to the acre. (7 lbs. to the bus.)	25	20 00
Hungarian Grass. See <i>Panicum Germanicum</i> .		

GRASS SEEDS, continued.

Lolium Italicum (<i>Italian Rye Grass</i>) Recommended for use in pasture mixtures. 50 lbs. to acre.	Per lb.	100 lbs.
Lolium perenne (<i>English Rye Grass</i>). The staple grass of Great Britain. 60 lbs. to the acre.	\$0 15	\$8 00
Orchard Grass. See <i>Dactylis glomerata</i> .		
Panicum Germanicum (<i>Hungarian Grass</i>). One of the most valuable annual soiling plants. 1½ bus. to the acre.	Price variable	
Phleum pratense (<i>Timothy</i>). A grass so well known needs no description. ½ bushel to the acre. (45 lbs. to the bus.)	Market price.	
Poa compressa (<i>Canada Blue Grass</i>). Thrives well on clay or hard trodden and poor soil.	18	12 00
Poa nemoralis (<i>Wood Meadow Grass</i>). Recommended strongly for pastures. 30 lbs. to the acre.	35	30 00
Poa pratensis (<i>Kentucky Blue Grass</i>). Valuable for the southern states, and also a most valuable grass for the lawn. Three to four bushels to the acre. (14 lbs. to bus.) Fancy cleaned seed.	15	11 00
Poa trivialis (<i>Rough-stalked Meadow Grass</i>). Favorite pasture grass for moist, rich soils. 20 lbs. to the acre.	30	25 00
Red Top. See <i>Agrostis vulgaris</i> .		
Rescue Grass. See <i>Bromus Schraderi</i> .		
Rye Grass. See <i>Lolium Italicum</i> and <i>Lolium perenne</i> .		
Rhode Island Bent Grass. See <i>Agrostis canina</i> .		
Sweet Vernal Grass. See <i>Anthoxanthum odoratum</i> .		
Timothy. See <i>Phleum pratense</i> .		

GRASS SEED MIXTURES.

FOR MEADOW AND PASTURE.

For every different kind and condition of soil there is a large number of grasses, either indigenous or introduced, which are especially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some mature so early, and others so late, that from the beginning of spring until winter sets in, there is no time when one species or another is not at its best. From these considerations the importance of sowing many varieties for pasture and meadow purposes will be apparent.

MEADOW OR PASTURE MIXTURES FOR ONE ACRE.

CRIMSON or SCARLET CLOVER.

(TRIFOLIUM INCARNATUM.)

An annual, with beautiful, long crimson flowers. Sown late in the summer, it furnishes an early green fodder the following season; largely sown in Virginia and North Carolina for improving poor soil by turning under when still green, thus adding much nitrogen to the ground through its decomposition. 15 to 20 lbs. to the acre. Per lb., 15 cts.; per 100 lbs., \$10.

Insecticides and Remedies for Plant Diseases.

COPPERDINE.

A combined fungicide and insecticide, used simply by adding water in proportion of 1 pound of the paste to 16 gallons of water. As a fungicide it prevents black rot, downy mildew and anthracnose of the grape, pear leaf-blight, apple scab, mildew, apple rot, black spot, strawberry blight. As an insecticide it kills codlin moths, curculio, pear insects, peach and apple borers, currant worms, cabbage worms, potato bugs and caterpillars. 1-lb. box, 25 cts., makes 16 gallons spray. 5-lb. box, \$1, makes 80 gallons spray.

FIR-TREE OIL.

For greenhouse and house plants. It destroys all plant insects without injuring the plant. It is the best insecticide for scale, aphids, red spider, mealy bug, thrip and worms. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. $\frac{1}{2}$ pt. 40 cts.; pt., 75 cts.; qt., \$1.25; $\frac{1}{2}$ gal., \$2.25; gal., \$4.

FIR-TREE OIL SOAP.

This is the same as the Fir-Tree Oil, but in soap form. It is useful for the same purposes. Mix at rate of 1 ounce to a gallon of water, and apply with bellows or syringe. $\frac{1}{2}$ -lb. tin, 25 cts.; 2-lb. tin, 75 cts.; 5-lb. tin, \$1.75.

DALMATIAN INSECT POWDER.

Effective against almost all kinds of insects. Per $\frac{1}{2}$ -lb. box, 30 cts.; per 1-lb. box, 50 cts.

GISHURST'S COMPOUND.

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Full directions for use on each box. Per 1-lb. box, 50 cts.

HAMMOND'S GRAPE DUST.

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb. keg, \$5.

HELLEBORE, POWDERED.

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 2-lb. box, 35 cts.; per 1-lb. box, 20 cts.; $\frac{1}{2}$ -lb. box, 12 cts.

NIKOTEEN.

A powerful insecticide, specially prepared for use in greenhouses and conservatories. Per pint bottle, \$1.50.

PARIS GREEN.

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; $\frac{1}{2}$ -lb. can, 20 cts.; $\frac{1}{4}$ -lb. can, 15 cts. This article is liable to fluctuate in price.

“Jadoo” Fibre and “Jadoo” Liquid.

JADOO FIBRE is a new growing substance for plants of all kinds. It was invented by Col. Thompson, of the Royal Army and Fellow of the Royal Horticultural Society of England, and it is highly recommended by gardening authorities there. It suits all kinds of plants, is only half as heavy as earth, and cleaner to handle; requires no soil to mix with it, and no manure. It increases the size and the brilliancy of flowers. Seeds germinate, and cuttings root in it, quicker than in earth. Owing to its spongy nature, it retains water much longer than earth. Plants transplanted in Jadoo Fibre do not flag, even if in full bloom.

JADOO LIQUID revives drooping plants, increases the size and profusion of bloom. It is both meat and drink to plants of all kinds. It can be used on plants that are grown in earth or in Jadoo Fibre.

Price of the Jadoo Fibre. 5-lb. box, 30 cts.; 10-lb. box, 50 cts.; 25-lb. box, \$1.10; per bag of 120 to 130 lbs., \$3.75; per ton, \$50.

Price of the Jadoo Liquid. Pint bottle, 25 cts.; 2-gallon can, \$1.50; 5-gallon can, \$3.75; 10-gallon can, \$7.50.

LITTLE'S ANTIPEST.

A sure destroyer of all insect pests. It is non-poisonous and harmless to vegetation. Mixed with water as follows it is effectual against—greenfly, 1 pt. to 10 gals. of water; mealy bug, 1 pt. to $1\frac{1}{2}$ gals.; red spider, 1 pt. to 2 gals.; ants, wireworms and slugs, 1 pt. to 1 gal. $\frac{1}{2}$ -gal. can, \$1.50; gal. can, \$2.50.

SLUG SHOT (HAMMOND'S).

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. Prepared ready for use. 5-lb. package, 30 cents; 10-lb. package, 50 cts.; 100 lbs., \$4.

SULPHUR, POWDERED.

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts; 100 lbs., \$4.

SULPHO-TOBACCO SOAP.

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per $\frac{1}{2}$ -lb. box, 25 cts.

TOBACCO DUST.

If dusted on *while the foliage is moist* it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects, and also acts as an excellent fertilizer. Per 1-lb. box 10 cts; 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; per 100 lbs., \$2.50.

TOBACCO STEMS.

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; per bale of about 200 lbs., \$2.75; per bale of about 400 pounds, \$4.50.

“ROSE LEAF” TOBACCO EXTRACT.

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Our “Rose Leaf” pamphlet gives full directions for applying. Pint can, 30 cts.; qt. 50 cts.; gal., \$1.25.

WHALE-OIL SOAP.

For washing trees and destroying all insects on the bark. Mixed at the rate of 1 lb. to 4 gallons of water, it will rid cabbage, rose bushes, peach trees, etc., of the aphides that so often infest them. Per 1-lb. box, 18 cts.; 5 lbs., 50 cts.; 10 lbs., 90 cts.; 100-lb. keg, \$7.

BORDEAUX MIXTURE, OR FUNGIROID.

For all fungous diseases, such as mildew and the various rots of the grape. Full directions on label. Dry, 1-lb. box, 20 cts.; 5 lbs. and over at 15 cts. per lb.; 50-lb. keg, \$6; liquid, 1 gallon, \$1.25.

Palm Tub.

PALM TUBS.

Made of white cedar, painted green, and bound with extra iron hoops. Drop handles of special pattern, serving as hooks for carry-poles. Strong iron legs and perforated removable bottom.

No.	Diameter	Length of stave	Each
0	27 in.	24 in.	\$6 50
1	25 in.	22 in.	5 50
2	23 in.	20 in.	4 75
3	21 in.	18 in.	4 00
4	18 in.	16 in.	3 50
5	16 in.	14 in.	3 00
6	14 in.	12 in.	2 50
7	13 in.	11 in.	2 25
8	12 in.	10 in.	1 85

Columbia Tub.

COLUMBIA FLOWER TUBS.

Made of the best cypress timber. Natural varnish finish on the wood:

	Each		Each
12-in. diam. by 11-in. high.....	\$1 00	21-in. diam. by 18½-in. high.....	\$2 50
