COAST AND GEODETIC SURVEY

LEO OTIS COLBERT, Director

GAZETTEER

OF THE

PHILIPPINE ISLANDS

Washington, D. C. 1945

203340

Introduction

This gazetteer, containing 47,355 original entries and cross references, lists alphabetically all names in the Philippine Islands found on the following sources:

1. Coast and Geodetic Survey nautical charts, as listed in the 1941 Chart Catalog.
2. Philippine Islands Coast Pilot, Volumes I and II, 1939.
3. Hydrographic Office Light List No. 31, 1942.
4. Philippine Islands Light List No. 3, 1939.
5. Coast and Geodetic Survey, Manila, Topographic Maps Nos. 3-17 and No. 50, varying dates from 1931 to 1941.
6. Army Map Service, 32 sheets on scale of 1:500,000, 1944 edition.
7. Army Map Service, quadrangle maps of 1:25,000 and similar scales, received up to September, 1944; in part those received during October and November, 1944.
8. Army Map Service, Gazetteer to 1:500,000 scale maps, second edition, July, 1944 (contains about 12,500 Philippine names).
9. Census of the Philippines, 1939, Special Bulletin No. 2, List of Political Subdivisions, 1940 (contains 19,350 names).
10. Census of the Philippines, 1939, Volume V (Atlas), containing maps Nos. 1-25 and alphabetical lists of islands and lakes.
11. Coast and Geodetic Survey, Aeronautical Charts Nos. 2 and 3, 1941.
12. Army Air Force, various maps.
13. U. S. Geographic Board Sixth Report, 1932.
14. Rand McNally Commercial Atlas and Marketing Guide, 1943.

No attempt was made to determine the most correct name of any feature, but all variant names are included. Only one source is given for any one entry, although the name or its variant may be found on several sources.

Alphabetization is by the specific or proper name with generic terms following. Where the same specific name is applied to several features, alphabetization is by the generic terms. Where the same specific name and generic term are applied to more than one feature, the sequence of listing is by latitude from south to north.

Abbreviations forming a part of specific names are alphabetized as if they were spelled out in full. This rule applies to S for San, Sto for Santo, N for North, S for South, etc.

CROSS REFERENCES

The many variant names require frequent cross references. In general, a cross reference has been used only where there is a difference in the first three letters of a name, but this practice has been modified depending on the proximity of the original and the variant names. Nearby variants may have no cross references, but variants separated considerably from the original entry always have them.

Variant names are indented and printed in italics, with their sources given in the final column. To find a name which does not appear in its known form, several general rules may be helpful.

Similarly sounding letters and combinations of letters are often interchanged, as

(*a*) C and K, K and QU, both initially and in the middle of a name.
(*b*) AUA and AWA, AO and AU or AW, especially in terminations.
(*c*) E and I, O and U, Y and I.
(*d*) B and P, C and G, G and H, N and NG, and occasionally soft C and S.
(*e*) H and J for the same sound indiscriminately.
(*f*) In the Philippine Census Special Bulletin No. 2 the letter Ñ is alphabetized separately following the letter N. In this list N and Ñ are alphabetized as one letter.

NAMES OMITTED

This gazetteer contains only names from current sources. Obsolete names and names of historical significance only have been omitted. Among these are the following: Village names in brackets on the large-scale Army Map Service quadrangles indicated as from sources prior to 1920; names in the Sixth Report of the U. S. Geographic Board not found on any available maps nor in the Census List; variant names rejected in U. S. Geographic Board decisions and not found on available maps; and the older forms of many important names.

The following two factors are worth noting:

(*a*) The Sixth Report of the U. S. Geographic Board (1932) contains about 3,000 approved Philippine names, and the charts and maps of the Coast and Geodetic Survey generally agree with the Board's decisions. In 1939 the Committee on Geographic Names in Manila adopted the rule that the spelling of political subdivision names contained in the Philippine Census of 1939 should be official. For more than half of the decisions in the Sixth Report the Census uses variant names that were rejected by the Board; the consequent result is a wide variation in the names of many towns and villages.

(*b*) Census Special Bulletin No. 2 contains approximately 5,000 names of villages which could not be found on any available maps. All such names have been listed, but their exact positions could not be given.

CURRENT RULES OF THE U. S. BOARD ON GEOGRAPHICAL NAMES

Names on the second or 1944 edition of the Army Map Service 1:500,000 scale maps were selected by the U. S. Board on Geographical Names, which also compiled the Army Map Service Gazetteer based on these maps. The Board adopted the following directions for the treatment of geographic names in the Philippine Islands:

I. *Area to Which These Directions Apply:*
These directions shall apply to geographical names in the Philippines. A detailed statement of the treaty definition of limits of the Philippine Archipelago is contained in the United States Coast Pilot, Philippine Islands, Part II, (Washington, D. C., 1940).

II. *Recommended Sources for Geographic Names in the Philippines:*
The spelling of geographic names in the Philippines should be derived from the following sources in order of listing:

A. The latest editions of the published Nautical Charts of the United States Coast and Geodetic Survey contain names of physical features and populated places appearing almost entirely along the coasts; but these Nautical Charts should be given preference above all other sources for the names appearing on them. These charts do not entirely cover the west coast of Palawan. For this area, the British Admiralty Charts should be used.

B. Names of populated places not appearing on latest editions of USC&GS published Nautical Charts should be taken from the Census of the Philippines, Alphabetical List Political Subdivisions, Special Publication Number 2, Manila, 1940. USBGN, AMS.
Names from Special Publication Number 2 and the published Nautical Charts should take precedence over the names of political subdivisions approved by the United States Geographic Board and published in its Sixth Report, 1933, since the Philippine Committee on Geographical Names has since that date gone on record as favoring Philippine Census names rather than those which it had previously recommended.

C. For the spelling of names of physical features and populated places not appearing on (A) and (B) the published USC&GS Topographic Maps should be consulted. All these maps are on a scale of 1:200,000 except the one for Mindanao which has been published on a scale of 1:600,000. The USC&GS Topographic Maps are available for all areas except Palawan and the Sulu Archipelago.

D. USC&GS Field Survey Sheets (topographic and hydographic) follow the published USC&GS Topographic Maps in order of preference for the spelling of both physical features and populated areas.

E. Fifth in sequence of preference are original topographic surveys prepared by the Office of Department Engineers, Philippine Department, Manila, various dates and scales. The last reference suggested includes other maps from official, semi-official and commercial sources, road maps, postal department maps.

III. *Treatment of Generic Terms:*
Generic terms in Philippine names are in English almost without exception; this practice should continue to be followed. All names used should be spelled exactly as they appear in the above-mentioned sources. This means that in Spanish names the tilde and the acute accent must be retained. In names of the several native languages there occur the tilde, various accent marks, and occasionally the apostrophe and hyphens. All these must be used as a consequence of the acceptance of the sources named in the preceding paragraphs as official.

IV. *Errors and Additional Names:*
Names taken from sources described in paragraphs (D), (E) and (F) above, names found to be in error in any recommended source, and new names should be reported to the USBGN with supporting data, so that the Board can render decisions.

DETAILS OF LISTING

Names are village or settlement names unless followed by some qualifying generic term. Generally the generic terms are English, but where not, they are followed by an abbreviated equivalent English term.

The following abbreviations have been used:

(C).....city
(CD).....city district
Cr.....creek
E.....east or este
Est.....estero
Ft.....fort
Gr.....group (of islands)
I., (i).....island
IS., (is).....islands
(M).....municipality
(MD).....municipal district
Mt.....mount or mountain
Mts., mts.....mountains
N.....north or norte
No.....number
O.....oeste
(P).....province
Pass.....passage
Pt.....point
R.....river
S.....south or sur
S.....San (only before another name)
St.....Saint
Sta.....Santa
Sto.....Santo or Santissimo
(SP).....subprovince
Str.....strait, stream (after comma)
str.....stream
vg.....village
1°.....primero
2°.....segundo
3°.....tercero

The second column shows the island, island group, or sea to which the feature belongs. For features shown as on a smaller island, reference must be made to the latter under its own name to find the general location.

Latitude and longitude of definite small features are given to the nearest tenth of a minute. The positions are the centers of island, bays, lakes, etc; the extremities of points, capes, etc; and the mouths of streams or their confluences with other streams. The positions of villages found only in the 1940 Census List of Political Subdivisions are approximate, since they could be located only by the municipality or municipal district in which they belong. Such names are followed by the symbol CB2 in the last or source column.

In the last column a number or symbol indicates the source of the name or the variant name, as follows:

4211 .....A 4-place number designates a Coast & Geodetic Survey nautical chart (see chart diagrams).
CPI, CPII ..Coast Pilot, Volumes I and II.
HOLL.....Hydrographic Office Light List.
PILL.....Philippine Islands Light List.
T-7.....Coast & Geodetic Survey Topographic Maps, Nos. 3-17 inclusive and No. 50 (see map diagram).
AMS .....Army Map Service 1:500,000 scale maps (see map diagram); and many of the new large-scale quadrangles.
AMSG .....Army Map Service, Gazetteer to 1:500,000 scale maps, second edition, July, 1944.

CB2 .....Census Special Bulletin No. 2, List of Political Subdivisions.
CI.....Volume I, Philippine Census of 1939.
CV.....Volume V, Philippine Census of 1939; lists of islands and lakes.
C-3 .....Volume V, Philippine Census of 1939, maps Nos. 1-25 inclusive.
AC2, AC3 ...Coast & Geodetic Survey, Aeronautical Charts 2 and 3.
AAFC .....Army Air Force Aeronautical Charts.
GB.....U. S. Geographic Board Sixth Report.
RM.....Rand McNally Commercial Atlas and Marketing Guide.

Requests for copies of this publication should be directed to the United State Board on Geographical Names, Department of the Interior, Washington, D. C. Users are requested to communicate any omissions, corrections, or recommendations to the Board.
