AMERICA'S NATIONAL GAME

By A. G. SPALDING

PRICE, \$2.00 NET

A book of 600 pages, profusely illustrated with over 100 full page engravings, and having sixteen forceful cartoons by Homer C. Davenport, the famous American artist

The above work should have a place in every public library in this country, as also in the libraries of public schools and private houses.

The author of "America's National Game" is conceded, always, everywhere, and by everybody, to have the best equipment of any living writer to treat the subject that forms the text of this remarkable volume, viz., the story of the origin, development and evolution of Base Ball, the National Game of our country.

Almost from the very inception of the game until the present time—as player, manager and magnate—Mr. Spalding has been closely identified with its interests. Not infrequently he has been called upon in times of emergency to prevent threatened disaster. But for him the National Game would have been syndicated and controlled by elements whose interests were purely selfish and personal.

The book is a veritable repository of information concerning players, clubs and personalities connected with the game in its early days, and is written in a most interesting style, interspersed with enlivening anecdotes and accounts of events that have not heretofore been published.

The response on the part of the press and the public to Mr. Spalding's efforts to perpetuate the early history of the National Game has been very encouraging and he is in receipt of hundreds of letters and notices, a few of which are here given.

ROBERT ADAMSON, New York, writing from the office of Mayor Gaynor, says:—"Seeing the Giants play is my principal recreation and I am interested in reading everything I can find about the game. I especially enjoy what you [Mr. Spalding] have written, because you stand as the highest living authority on the game."

BARNEY DREYFUSS, owner of the Pittsburg National League club:—"It does honor to author as well as the game. I have enjoyed reading it very much."

WALTER CAMP, well known foot ball expert and athlete, says:—"It is indeed a remarkable work and one that I have read with a great deal of interest."

JOHN B. DAY, formerly President of the New York Nationals:—"Your wonderful work will outlast all of us."

W. IRVING SNYDER, formerly of the house of Peck & Snyder:—"I have read the book from cover to cover with great interest."

ANDREW PECK, formerly of the celebrated firm of Peck & Snyder:—"All base ball fans should read and see how the game was conducted in early years."

MELVILLE E. STONE, New York, General Manager Associated Press:—"I find it full of valuable information and very interesting. I prize it very highly."

GEORGE BARNARD, Chicago:—"Words fail to express my appreciation of the book. It carries me back to the early days of base ball and makes me feel like a young man again."

CHARLES W. MURPHY, President Chicago National League club:—"The book is a very valuable work and will become a part of every base ball library in the country."

JOHN F. MORRILL, Boston, Mass., old time base ball star:—"I did not think it possible for one to become so interested in a book on base ball. I do not find anything in it which I can criticise."

RALPH D. PAINE, popular magazine writer and a leading authority on college sport:—"I have been reading the book with a great deal of interest. 'It fills a long felt want,' and you are a national benefactor for writing it."

GEN. FRED FUNSTON, hero of the Philippine war:—"I read the book with a great deal of pleasure and was much interested in seeing the account of base ball among the Asiatic whalers, which I had written for Harper's Round Table so many years ago."

DEWOLF HOPPER, celebrated operatic artist and comedian:—"Apart from the splendid history of the evolution of the game, it perpetuates the memories of the many men who so gloriously sustained it. It should be read by every lover of the sport."

HUGH NICOL, Director of Athletics, Purdue University, Lafayette, Ind.:—"No one that has read this book has appreciated it more than I. Ever since I have been big enough, I have been in professional base ball, and you can imagine how interesting the book is to me."

MRS. BRITTON, owner of the St. Louis Nationals, through her treasurer, H. D. Seekamp, writes:—"Mrs. Britton has been very much interested in the volume and has read with pleasure a number of chapters, gaining valuable information as to the history of the game."

REV. CHARLES H. PARKHURST, D.D., New York:—"Although I am not very much of a 'sport,' I nevertheless believe in sports, and just at the present time in base ball particularly. Perhaps if all the Giants had an opportunity to read the volume before the recent game (with the Athletics) they might not have been so grievously outdone."

BRUCE CARTWRIGHT, son of Alexander J. Cartwright, founder of the Knickerbocker Base Ball Club, the first organization of ball players in existence, writing from his home at Honolulu, Hawaiian Islands, says:—"I have read the book with great interest and it is my opinion that no better history of base ball could have been written."

GEORGE W. FROST, San Diego, Calif.:—"You and 'Jim' White, George Wright, Barnes, McVey, O'Rourke, etc., were little gods to us back there in Boston in those days of '74 and '75, and I recall how indignant we were when you 'threw us down' for the Chicago contract. The book is splendid. I treasure it greatly."

A. J. REACH, Philadelphia, old time professional expert:—"It certainly is an interesting revelation of the national game from the time, years before it was so dignified, up to the present. Those who have played the game, or taken an interest in it in the past, those at present engaged in it, together with all who are to engage in it, have a rare treat in store."

DR. LUTHER H. GULICK, Russell Sage Foundation:—"Mr. Spalding has been the largest factor in guiding the development of the game and thus deserves to rank with other great men of the country who have contributed to its success. It would have added to the interest of the book if Mr. Spalding could have given us more of his own personal experiences, hopes and ambitions in connection with the game."

Pittsburg Press:—"Historical incidents abound and the book is an excellent authority on the famous sport."

Philadelphia Telegraph:—"In this book Mr. Spalding has written the most complete and authoritative story of base ball yet published."

New York Herald:—"If there is anyone in the country competent to write a book on base ball it is A. G. Spalding, who has been interested in the game from its early beginnings."

I. E. SANBORN, *Chicago Tribune*:—"America's National Game' has been added to the *Tribune's* sporting reference library, as an invaluable contribution to the literature of the national pastime."

O. C. REICHARD, *Chicago Daily News*:—"It is cleverly written and presents information and dates of great value to the newspaper man of to-day!"

GEORGE C. RICE, *Chicago Journal*:—"I have read the book through, and take pleasure in stating that it is a complete history of the game from the beginning until the present time."

SHERMAN R. DUFFY, Sporting Editor *Chicago Journal*:—"It is a most interesting work and one for which there was need. It is the most valuable addition to base ball literature that has yet been put out."

JOSEPH H. VILA, *New York Sun*:—"I have read it carefully and with much interest. It is the best piece of base ball literature I have ever seen, and I congratulate you on the work."

TIM MURNANE, Sporting Editor *Boston Globe*:—"You have given to the world a book of inestimable value, a classic in American history; a book that should be highly prized in every home library in the country."

FRANCIS C. RICHTER, Editor *Sporting Life*, Philadelphia:—"From a purely literary standpoint, your work is to me amazing. Frankly, I would not change a line, for the reason that the story is told in a way to grip the reader and hold his interest continually."

Los Angeles Times (editorial):—"Spalding's book has been out six months and ninety thousand copies have been sold. We understand there will be other editions. America has taken base ball seriously for at last two generations, and it is time enough that the fad was given an adequate text book."

CASPAR WHITNEY, Editor *Outdoor America*, and one of the leading authorities in the world on sport:—"You have made an invaluable contribution to the literature of the game, and one none else could have made. Moreover, you've done some very interesting writing, which is a distinct novelty in such books—too often dull and uninteresting."

New York World:—"Albert G. Spalding, who really grew up with the sport, has written 'America's National Game,' which he describes as not a history, but the simple story of the game as he has come to know it. His book, therefore, is full of living interest. It is a volume generously illustrated and abounds in personal memories of base ball in the making."

New York Sun:—"There is a mass of interesting information regarding base ball, as might be expected, in Mr. Spalding's 'America's National Game.' It is safe to say that before Spalding there was no base ball. The book is no record of games and players, but it is historical in a broader sense, and the author is able to give his personal decisive testimony about many disputed points."

Evening Telegram, New York:—"In clear, concise, entertaining, narrative style, Albert G. Spalding has contributed in many respects the most interesting work pertaining to base ball, the national game, which has been written."

"There is so much in it of interest that the temptation not to put it down until it is completed is strong within the mind of every person who begins to read it. As a historical record it is one of those volumes which will go further to straighten some disputed points than all of the arguments which could be advanced in good natured disputes which might last for months."

HOW TO PLACE YOURSELF

With the bases empty the regular position at third is about ten feet inside of the bag along the base line between second and third. This position covers practically all of the territory toward second not taken care of by the shortstop and yet enables one to cut off drives over or just inside of third.

Every player of note has practically the same position while waiting for the batsman. Stand with the feet in line with a line drawn between second and third, but facing slightly toward third. The body should be pitched slightly forward and the weight borne mainly on the toes. This will give a quick start, and if the weight is evenly distributed on both feet it is easy to cover ground to the right, left or in front. Some players have a habit of keeping one foot in advance of the other. This is a gain in getting forward or to one side, but a handicap in the other. If you must play this way always be sure it is the left foot you keep forward. That will give you a better start toward home and third and the shortstop can cover to your left.

While waiting for the batsman the body should be stooped and the hands can be rested on the knees. Some third basemen swing their hands, but this is bad form as it gives the arms useless work without giving any advantage in return. When the ball is pitched get a start for the plate so as to be in motion when it is hit.

In fielding a ball there are several things to remember. Always get your glove right on the ground for a ball which is hugging the latter. Failure to do this will lead to hard driven balls being forced under your glove. Always use both hands in fielding whenever possible. One-hand catches and stops may appeal to the spectators, but they are likely to prove costly to a team. When you get your hands on a ball grip it tightly or a

McC 82114.

twist may pull it out of your glove. In fielding grounders keep your knees well together and your body low so as to block the ball in case it misses your hands. Many an out can be made by following this rule even after you have had the misfortune to make a fumble.

In making a catch set yourself in such a way that you will be in a position to throw to first whenever that is possible. In order to get the ball away clean and hard you should be able to take a step directly toward the point at which you are throwing, and if you can get in a position to do this without first shifting your feet after catching the ball you save precious time.

To the third baseman falls some of the hardest chances in gathering in flies and good work in this line goes far toward making his reputation. Watch out for flies just back of third. This is one of the easiest places on the diamond to dump a ball and a well placed hit there is likely to result in a two-bagger. In order to get these, practice catching flies over your shoulder while running with the ball. There is a knack in it which can only be learned by practice and most players get too little of this kind of work. There is always plenty of work during practice on grounders, but rarely do the batters pop up flies around third during practice time. Make your team mates bat some out for you and try fielding them starting from your regular position at third.

Flies outside of the foul line afford many chances for spectacular plays, and at the same time offer opportunities to pull your team out of tight places. Always try hard for these kind of chances, even when the bases are vacant. Loafing may eventually change the result of the game.

With men on base watch out for a steal after the catch and whenever possible get the ball in such a position as to be set for a throw. With a man on third and but one run needed to tie or win it is sometimes best to drop a long foul fly when you know that it would be impossible to catch the runner going home.

PLAYING FOR BATTERS

Up to this we have been dealing with the position under ordinary conditions mainly. Now we come to the variations and inside work and here is where the brain work begins to tell. Most any one can become a good mechanical fielder, provided he will practice sufficiently, but few master the finer points. A careful study of the game, the batsman and your own pitcher are required for this.

The first thing to note is whether the batsman is right or left handed. This will make all the difference in the world as to where he is most likely to place a hit. With a batter who stands to the left of the plate and a fast pitcher the third baseman is the least likely to have hits to handle. With a slow pitcher the batter is likely to pull the ball around toward third. With a batter on the right side of the plate and a fast pitcher the third baseman is likely to have his hands full. With a slow pitcher and a fast batter the first baseman is the one most in danger.

Different curves and different styles of pitching also produce different fielding conditions. Fast pitching with the ball straight over the plate produces chances which are easy to handle unless the ball has too much speed. A straight pitched ball is generally hit without skew or twist and as a rule there is little doubt as to whether it is to be classed as a hit or an error when missed.

Watch out for bad bouncers on curves and breaks. The ball almost always has a certain amount of rotary motion and this causes sharp breaks and bad bounds. It is this which makes clean fielding difficult. No rule can be laid down for fielding such hits and much judgment and experience is necessary in handling them properly. Even the greatest players are some-

times fooled so there is no reason to get discouraged if one or two get past you. Always try to study out for yourself the reason for such breaks and whether they are caused by pitching, peculiar batting or irregularities of the diamond. No two diamonds are exactly the same so far as fielding is concerned and the quicker you find out the ground around your position the better off you will be. By studying out causes for your failures you will lay up a store of knowledge which will prevent many mishaps in the future.

In placing yourself for a batter you should know something about the man you are playing for. It is safe to play well in for a fast man who is good at placing the ball. For a heavy hitter play well back on the base lines. This is especially true with an exceptionally heavy batter who is slow on his feet. With such a one it pays to get back to the edge of the base line. In case the base line is skinned and the grass begins back of it never field on the grass as the ball will invariably take a bound when it hits the edge of the turf. In fielding plays of this kind it is of importance to get yourself set for the throw as well as the catch. For weak hitters or when it is necessary to prevent a run from scoring with a man on third, field well in toward the plate so as to prevent the batter bunting the runner home.

In conclusion, and most important of all, always play the ball and never let the latter play you. The moment you get unfixed in your ideas and become wobbly you are almost sure to make a break.

HOW TO HANDLE BUNTS

Now we come to the most important signal problem a third baseman has to face—bunting. The first baseman and pitcher also have to take care of bunts, but upon the third baseman falls most of the work in this line. This work is increasing in importance right along as the batting becomes more scientific and more restrictions are placed on the pitcher.

Formerly bunting was restricted mainly to sacrificing with a man on base. Now the third baseman has to look for it almost any time with a fast man at bat.

The first thing to do is to know your batter. With the bases unoccupied a heavy hitter is not likely to try for a bunt, especially if slow. A light hitting, speedy batter, on the other hand, is always dangerous in this respect. Therefore it is safe to field in closer for the latter than the former. Try to judge what your man intends to do from his actions. If he takes the bat short when that is not his regular style of handling it be ready for a slow hit or bunt. Watch the way he places his feet, as some batters forecast the direction in which they are going to pull the ball by the way they stand. Some batters have a habit of looking around in the direction they are trying to place a hit, and this is a good sign to follow. If up against a trick batter, however, he may try to throw you off by doing something to indicate a hit in one direction and sending it in the other, and this is a case where only your good judgment can be of any avail.

With a man on first and no outs a bunt is always to be looked for, no matter whether a batter is fast or slow. The same is

true with a man on second only in less degree. With one out and a man on first or second, a bunt must also be expected, though conditions of the game will cut a figure here. With one out, a man on second, a fast man at bat and but one run needed to tie or win, a bunt is always to be looked for and quick work is called for in this case as there is a chance to catch the runner going to third. With a man on third a good man at bunting will sometimes try to bunt the runner home, a trick used by McGraw, and under these conditions the third baseman should field well in toward home.

Bunts require more judgment in their handling than any other kind of hits. Frequently they must be picked up with the ungloved hand and thrown without a chance for the fielder to set himself. The fielder must know the men on the bases and their speed to make the correct play even after he has the ball. With a slow runner on first and a fast one at bat as a rule the try should be made at second, giving a chance for a double. With a man on second it takes fast fielding and a quick turn to catch him going to third, but the play is worth trying for especially if the game is so close that a run is likely to prove decisive.

In order to handle bunts properly the third baseman must have the situation figured out before the pitcher delivers the ball to the plate. Then if something crops up which makes the play planned impossible quick thinking on the spur of the moment will sometimes save the day. Don't rely on this latter, however, but plan your plays before they come up and then you can devote all of your time to fielding the ball and at the same time be sure you will know what to do with it after it is secured.

Special instruction in regard to form in fielding bunts is of but little value. The play comes in so many different forms and so fast that it is a case of adaptability rather than any special style. When a bunt is looked for field well inside of third and closer to the foul line than under ordinary conditions. A fast start is an essential and practice will do much

toward giving you this. Have one of your team mates bunt for you and you will soon increase your speed and gain confidence in handling the ball. Care must be taken in coming in fast, however, that you are not moving so fast as to be unable to pick up the ball. Practice throwing the ball to first under handed as that is the quickest way to get the ball over on short throws.

Always have a good understanding with the pitcher and catcher in regard to fielding bunts. This will avoid collisions and prevent getting mixed up. In case there is an infield captain, he is supposed to call the player who is to take the ball. Even if you think you have the best chance to get the ball follow his advice. He is in a better position to judge the play than you are.

FIELDING FOR BASE RUNNERS

In guarding third base it is necessary to know something of blocking. Blocking is forbidden by the rules, but the umpire seldom pays any attention to it provided the case is not a flagrant one, and nearly every third baseman does it to help him make an out. Never block a player unless it is to assist you in putting the ball on him and never intentionally injure a player in doing it at any time. Miss an out before taking chances of injuring a fellow player.

When a base runner slides for third it is often possible to block him momentarily while you put the ball on him, when the side step would be to miss the out. In other cases it is possible to shove the runner to one side or the other enough and cause him to slide past the bag. Always watch the base runner who is sliding closely as frequently he will slide over or past the bag and you can get him before he can return.

Keep your eyes open for an attempt to spike you. This is "dirty" ball of the worst kind and it is more likely to be found among non-professional players than among those who follow the game for a living. A professional who uses his spikes in trying to injure a player soon gets a bad reputation and is shunned by others. Some amateurs think the trick a smart one. Protect yourself from a runner who is sliding feet first by stepping to one side or the other and in case he goes out of his way to reach you your duty is to protect yourself as best you can without regard to the runner.

A trick you must look out for is being pulled or thrown off your feet either by a base runner catching you with his arm or striking your leg with some part of his body. Always get a firm footing to avoid being thrown and if you should be knocked over put the ball on the runner as you fall on him.

In a run up or when a man is coming into third standing up watch out for an attempt to jostle the ball out of your grasp.

Try tricks occasionally to catch a base runner off third. To do this you must have signals to exchange with the catcher and pitcher. A catcher with a quick snap can frequently nail a runner, but the signals must be exchanged before the ball is pitched or a misplay is more likely than one that will prove successful. The catcher will see that the proper signal is given to the pitcher so that the batsman will not hit the ball and you must hustle back to first without waiting to see whether the batsman is successful in making connections or not. Work your man before signaling for the play and try to get him to take a dangerous lead. If he is too daring before the ball is pitched hustle back to the bag after signaling the pitcher and try to catch him this way. If caught off the bag the runner will sometimes make a dash for the plate and try to save himself by a slide. If you are prepared for this he should be an easy out, but if not a wild throw will cause trouble.

TEAM WORK EXPLAINED

Even though perfect in individual play no third baseman can ever hope to be successful without team work. Team work is the point which wins games and upon the third baseman falls a large share of team work. That is one of the reasons why no great team has ever existed without a great third baseman. It also explains why some third basemen of but ordinary mechanical ability are regarded as among the leading players at third.

The secret of team play as well as nearly everything else in base ball lies in hard study. No exact lines can be laid down as to team play which will leave nothing to be learned. Rules for the mechanical plays are easy enough and anyone who takes the pains can soon learn them. Practice will make these second nature and enable you to work them correctly, even when working at top speed. This is the first point to master. After that you must depend largely upon your own ability to think clearly and quickly.

The first thing that the third baseman runs against in team work is in fielding both grounders and flies. The men he works with are the shortstop, pitcher and catcher. Frequently the fraction of a second's hesitation will prove fatal in handling a bunt. As a rule the third baseman should handle bunts toward third. He is in the best position to field and throw. With a slow fielding pitcher, and especially with a left handed pitcher, it is of the utmost importance for the third baseman to go after almost any ball not dropped directly in front of the plate or toward first. Call your ball when you go after it so as to leave no chance for a mistake and pay no attention to anything else until you get it.

In getting flies it is well to let the catcher have the chance if he has as good an opportunity to reach the ball as you have, owing to his larger glove. The trouble with fielding flies is

that many opportunities are afforded for spectacular plays and fielders can not be prevented from "starring" to the detriment of the team. The only way to avoid collisions is by obeying the call of the captain no matter what you think of your own chances.

A big point in team work is in knowing the capabilities of the men you are working with. Some first basemen are weak on high or wide throws while others can not stop low ones. Hurried throws can not always be directed correctly, but a little care will prevent throws to a baseman's bad point on ordinary chances.

Throws to the bases must be governed by the conditions at the time. On a force out at second throw at the body of the baseman. If he is taking care of his part of the work he will hold his hands in such a position as to guide your throw. Where a slide is looked for in an endeavor to avoid being tagged the throw must be low and far enough out on the side from which the slide is expected to give the baseman a chance to tag the runner before the runner's feet or hands can get to the bag. When it is necessary to throw past a runner look out for some sign from the man you are to throw to telling you which side to throw to. Unless you do this you are likely to hit the runner and make a bad break.

The most frequent opportunities the third baseman has for a double play is on an attempted bunt with a man on first. Another opportunity comes at times with a man on second. Fast fielding on a infield tap will get the runner at first and a quick return to third will catch the runner from second trying to gain that base. If the runner at second gets too far off second on an infield tap try for him or make a bluff to scare him back and then make your throw to first. In throwing to second for a double play get the ball waist high and to the outside of the bag so that the player fielding at that point can whip it to first without delay. In taking a throw yourself always guide the aim of the man throwing, by holding your hands where you want the throw.

Backing up is an essential feature of team work. On hits which the shortstop takes the third baseman should back up behind him whenever possible. If the pitcher fields over toward third on bunts back him up also. On throws the third baseman is mainly called upon to back up the second baseman and catcher. On all throws from right field back up behind second, third or home as the throw may be directed. In case of a wild throw past first back up on the return throw to first and in case of a wild throw to the plate cover the latter or back up the pitcher if he does so. The catcher, pitcher, left fielder and shortstop will on the other hand back up the particular one depending upon the direction of the throw. In case you field for a grounder and miss it, it is always well to remember the old trick of throwing yourself flat on the ground in order to give the shortstop a chance to throw in case he gets the ball, and you can not get out of his way otherwise.

SOME FACTS ABOUT THIRD BASE

BY ARTHUR DEVLIN.

One strange thing in connection with third basemen in the major leagues, and it seems to be a rule which applies in the minor leagues, too, is the fact that third basemen, as a rule, are always third basemen. It is seldom that any one hears of a third baseman who was once a pitcher, or an outfielder, or an infielder in some other position. It is customary for players to drift from one position to another, as relates to the other fielding points on the diamond, but there does not seem to be much of that sort of thing in regard to the third baseman.

I asked a veteran manager once why such was the case. He replied: "My boy, I am not saying anything to praise you or the other third basemen who are prominent throughout the major league world, but it is a fact that third basemen are born, not made. It is one position on the diamond in which players who are moderately successful, seem to fit by intuition, although I shall not say that some of them can profit a great deal by practice and attention to the details of the game."

As a matter of curiosity I have asked other third basemen if they ever cared particularly to play other positions on the field. Most of them replied that they would like to do so, if they could play them as well as certain players who had built up reputations for expertness, but if my memory serves me right many of them said that they never felt quite at home when they were shifted away from the sharpest left field angle, which is formed by the proximity of the foul line to the territory which the third basemen is usually expected to cover.

Ball players, who begin to play third, and continue to do so, are quick to learn that hits come with greater speed to that

position than to almost any other, except liners that go directly to the pitchers. This, of course, is due to the fact that left field batting is more or less prevalent and that grounders met with the full swing of the bat are twisted around toward third with the speed of a bullet.

There is little time to gauge such hits. Frequently there is no time. The ball barely is off the bat before it is in the hands of the baseman, if he is fortunate enough to stop it. In any event it is obvious that it is necessary to have a quick eye to field the position, and that is something which is not to be obtained by practice, but which must be possessed when the player makes a beginning at the place.

To hold your own fairly well at third base it is also necessary to be possessed of a free pair of hands. By that I mean the ability to grasp the ball firmly, or at least break it down, without finding it essential to take it in a certain way. No third baseman can depend upon having his position so assured to stop the ball that he is ready to make the play to first base the moment that he touches the bounding sphere.

He may be off his balance, for one thing, as the ball comes to him. Whether he is or not, it is vital to his team that he stop it, and then recover himself quickly to pick it up and throw it to first. Possibly he will be able to stop it with the flat of his hand. Just as likely he will only be able to impede its force by touching it with his fingers, or it may strike him on the wrist, or, as often happens, on the forearm, but wherever it comes, and wherever it drops, if he fails to hold it securely it is essential that he get possession of it as soon as possible in order to retire the batter at first.

Time is a valuable factor with a third baseman. Fully fifty per cent. of the throws which he makes across the field are long and at bad angles. If he is slow of recovery after fielding a ball, which it is impossible to stop cleanly, his chances of catching a batter, who is also a fast runner, are appreciably diminished. Almost all of his plays must be made in a hurry, and half the time he has no chance to "set himself" for the throw, and must

deliver the ball to the first baseman with a continuance of the motion which he makes in securing it.

It has generally been agreed that a player at third, who is expert in making one-hand plays, has a double advantage over one who is not. By that I do not mean that it is justifiable to try one-hand plays in order to add a little of the spectacular to the game, but I do not think that it will be denied that a player who can reach out to his right or to his left with a reasonable certainty of receiving the ball, and handling it cleanly, is the more valuable to a team by reason of the greater ground which he is able to cover.

One of the best third basemen who ever lived, Jerry Denny, was famous for his one-hand plays, and it was said of him by many a manager that they would prefer to see Denny try to make a play with one hand then to bank with conviction in the chances of some other players making the same stop with both.

Managers have told me that as a rule they would prefer to have third basemen with height and a wide reach. The height is essential in pulling down liners which are batted to left field with much force. The wide reach, of course, means that the player is more certain on his right, where the grounders go fastest as they pass near the base. A wide reach is a valuable asset to any infielder, whether he plays third base, second, first or shortstop.

Since the art of sacrifice hitting has been so much elaborated in recent years the duties of the third basemen have increased greatly. Formerly the basemen could play well back and be in a better position to stop hard hits. Nowadays, when it is a question whether the batter means to sacrifice or to hit the ball out, the third basemen is kept fairly close to the line, and must be on the alert to try for the ball, no matter where it is batted.

Fielding bunt hits is an art in which the third basemen can improve by practice. Spectators frequently criticise a third baseman for trying to pick up a bunt hit with one hand, and yet, as a rule, it is the only proper way in which to play for the ball.

This is almost invariably true where the batter is very fast on his feet, and is known to be specially good in running to first base.

It is evident that if the third baseman runs forward, with the intention of picking up a bunt with both hands, he will not be in such good position to throw to first as he will if he is able to get the ball with one hand, and then, as he assumes an erect position, throw to first without trying to brace himself for a line snap across the diamond. When the ball is picked up with both hands there is always a fraction of a second lost in shifting it firmly to the throwing hand. If the ball is picked up alone with the throwing hand, it falls into a natural position to throw by intuition.

Another aid to playing third base is in the matter of learning to throw properly. It will not do to depend entirely upon overhand throws. It takes too long to get the arm up and the shoulder drawn back for a swift shot to first. One-third of the stops which are made by the third baseman, leave the ball in such a position in the hands that it is far better to get it over to first with an underhand throw—and the underhand throw is just as easy to make as the overhand throw if a player will practice it persistently.

Young players tell me that it is awkward and not natural for them to throw underhand. That is more a matter of superstition than actual fact. It is true that underhand throwing is, if anything, more natural than overhand throwing, and players who try to see whether they cannot throw underhand find out after they have tried a bit that after all it is nothing but an amplification of the old-fashioned jerk, and there is not a boy but will recall that when he first began to throw a stone, or an apple, or something of that kind, he found it came almost as second nature to him to jerk the missile, while he possibly acquired the art of overhand throwing by watching his big brother or some older companion. It is well to remember that when raising one's self from a stooping position it is simply out of the question to make an overhand throw, while the ball can be

snapped with an underhand throw with the body half bent to the ground.

In touching runners who are trying to make third either on a steal or a long hit with but little time it is not out of place to call the attention of beginners to the fact that almost all runners who come to third slide in behind the base. It is more common of this base than it is of second. Therefore the third baseman should always be in a position to reach for his man behind, and not trust to luck to see him sliding in at his feet, or directly in front of him. This being the case, the third baseman should be sufficiently quick to "duck down," and touch the runner with the same motion as which he received the ball. It will save him many a close call if he learns how properly to touch the runners out.

POINTS WORTH LEARNING

BY ARTHUR DEVLIN.

Every boy who essays to play third base must begin with the idea firmly fixed in his mind that it is imperative for him to be a hustler. It is impossible to loiter and be successful at this position on the base ball field. Between ground hits and line drives, and the work of backing up the base when runners come full tilt from second, trying to reach third in safety or possibly trying to turn it full speed for home before they can be shut off by other infielders, the third baseman is a busy individual.

Almost the whole method of playing third has changed within the last ten years. There was a time when the third baseman stood back on the line and did his best literally to knock down the hard hits which were usually driven in his direction by the right hand batters. That was considered to be quite great enough task by itself, and no manager deemed it possible to get much else out of a third baseman. Now and then a fielder would be found who could cut across the diamond and stop some of those sharp drives which are made between third and short, and which are usually too deep for a shortstop to reach in time to retire the runner and in those days too fast for the average third baseman. Many of the third basemen who are playing now think nothing of stopping half a dozen such smashes in a week.

It is true that the style of batting, which changed with the introduction of the bunt hit into common practice, changed the style of third base, and it is also true that the new style of batting put more work on the third baseman than he had under the old order of things.

It so changed the hazards, which are a part of the third baseman's lot, that it was impossible for him to be a deep infielder. It made him as much a fielder of short hits as the pitcher. For a time there were some of the third basemen who took the

ground that it was the lot of the pitcher to take care of all the short hits that were batted close to home plate, but as the newer third basemen made their reputations and began to show what they could do in handling bunts, it became imperative that all third basemen should be skillful in handling batted balls of that kind if they wished to retain their positions in the larger leagues.

In the leading base ball organizations of the United States there are now many batters who are able to place the ball. They may not place it so definitely that a foot one way or the other will mark its limitations, but they will place it close to the base lines, and by a skillful manner of handling their bats will be able to drop the ball to the ground so that it shall roll slowly or fast. These batters must be watched with the greatest of care by a third basemen. They furnish the real test whether a third baseman is good or simply just average.

It is also a fact that there are younger players now developing who are able to use almost the same skill with the bat and the games in the primary and secondary leagues are conducted under conditions which correspond in many ways to those of the larger leagues. For that reason the boys and the youths of the country who play base ball, and who follow the fortunes of third base, find that at the very beginning of their undertaking they are compelled to play third base after the modern style.

There is only one thing which may be said in regard to the batter who can bunt as well as hit the ball out. "Keep your eye on him." He is a dangerous customer. With the ability to shift suddenly at the plate so that he shall poke the ball with the easiest motion imaginable toward third, just inside the line, and just where it is almost out of the question to get it in time to throw him out at first base, the third baseman must try to out-guess him. That is probably the only manner in which he will catch him at first.

When a batter of this type is at the plate it is not advisable to play too far back in the field. Hug the base line rather closely and try to be on your toes, so that if he does bunt, you will be able to take a quick step forward for the ball. There are some

batters on whom it is almost necessary to start with the first motion of the pitcher in delivering the ball, because they are so clever that they will have succeeded in pushing the ball as they wish to push it, and will be more than half way to first base when the fielder has been smart enough to get up to the ball.

Almost all bunters are fast, so it is always well to keep a keen watch out for the tricks of the bunter. If a third baseman to a certain extent can conceal what his course will be in trying to field the ball, it will be much to his personal advantage, for the batter will be unable to fool him by divining whether he intends to run in or stick to the base line as the ball nears the plate.

Young players who are now learning the rudiments of the game, must not forget that speed enters far more freely into base ball than it did ten years ago. If there is one feature more than another in which there has been improvement in the national sport, it is in the matter of quickness on the part of players.

The old style of batters, with their long, free, hard swing at the ball, were much slower in getting "on to the ball" than are the batters of the present day. It is true that they did plenty of execution when they did hit the ball, and that was largely the reason why the third baseman was compelled to play back. Grounders would come rolling over the turf with almost enough force to break a man's bones, and there were few third basemen who were not at some time of the season pretty badly battered because they had faced hot liners and hot grounders. The hard work of the third baseman was one of the principal reasons for the improvement in the fielder's glove.

The third baseman of the present day still gets many of these hard hits to handle, but he is more baffled by the deliberately placed slower hits, which are extremely difficult to handle because of the lead which a fast batter obtains on his way to first base.

To settle upon any fixed position on the infield is foolish on the part of the baseman. The conditions may vary not only with every batter who walks to the plate, but with the same batter

during one trial to hit the ball. If a batter tries twice to make a sacrifice, and fails to do so, if he is not an expert bunter, on the next effort he may be likely to hit the ball out. Yet the third baseman who foolishly gives up every idea that he will try for a bunt may be completely deceived. Now and then the cleverest kind of a play is made by the batter doing the very thing for which the third baseman is not prepared, and there are some batters who will take another chance on bunting the moment that they see the third baseman likely to abandon the idea that they are going to attempt a sacrifice.

All things considered, a third baseman who is quite tall has an advantage over a third baseman who is short. It is surprising how many line hits will go screaming over a third baseman's head to the outfield. The shorter man, it is quite evident, will miss more of these than the player who is tall.

When a line drive does go by the third baseman it is usually a hit which does much damage. It is more likely to be a two-base hit than it is a single, and it is quite as likely to be a three-bagger, or a home run, because the ball is most generally driven by the batter very close to the line, and none but the swiftest and most expert left fielders are able to get up in time to choke the runner down.

Another feature in favor of the tall third baseman is his ability to stop throws which come across from first. Very frequently the first baseman will be compelled to send the ball across the diamond without hesitation. He has no time to aim, or even to take a good look at what he is going to do, but hurls the ball with all of his force and trusts to luck. If it happens to go high, and too high for the man who is to receive it, there is little prospect of its being stopped short of the stand, and that is all to the advantage of the runner.

Of course I do not try to maintain that the short man cannot be a successful third baseman, for there are plenty of short men who have done well in the position, but my idea is to encourage the tall boy to play third base if he shows an inclination to devote his time to that department of the sport. Tall third

basemen and tall first basemen always will be welcomed in professional base ball, more particularly if they display skill in other directions which are of value on the field.

The third baseman of the present day should learn to throw from almost any position and with almost any motion. There are times in fielding bunts that it is out of the question to make an overhand throw. The time lost in straightening up to start the ball from over the shoulder would practically give first base to the batter. The only way in which to catch him is with a quick underhand toss.

Nor must the third baseman wait to straighten himself before making the toss. He must be able to throw when half bent over and, if he can do so, has one-third more chance to catch the batter than if he is unable to throw except from a certain attitude.

FEATURES OF THIRD BASE PLAY

BY BOBBY BYRNE.

Yes, it's the "hot corner" all right, but at that I don't consider the position more difficult than shortstop. The two are about on a par. Both call for long throws across the diamond, both call for speed and accuracy and both call for quick thinking.

If third base has a slight shade on the shortstop for difficulty, it is caused by the bunts the third baseman must handle and those bunts, after all, are the keynote of the third baseman's ability. If he can get away with them, he may fall down in several other points and yet be rated a crack-a-jack. It is very sensational work when the third baseman can sprint in toward the plate, scoop up a neatly laid down bunt with one hand and with the same motion while on the run heave accurately to the waiting first sacker. Very showy is such work and never fails to bring applause from the gallery. But, after all, while proficiency in such things comes from much practice and a good deal of luck, give me the third baseman with plenty of nerve, who is not afraid to stand up and run in, if necessary, when the ball comes at him like a streak of lightning.

If I have had any particular success at the position, I attribute it to the determination to play close—closer than anyone else. In this way, no bunts get away from me. That's the secret of good work—be right on top of bunts and the batsman will rarely get away with one on you. Of course this requires nerve. The batsman—particularly the heady batsman—will see that the third baseman is "laying" for him and he will switch his plan to a red-hot drive that will come near "taking your block off." The fact is, however, that the thought of getting your head broken or sustaining other severe injuries is the worst feature of the whole business. Rarely if ever does the third baseman get injured and, should the fates decree that he does get a smart rap on some tender spot, take it when it comes and look pleasant.

It's all in the game and the few such happenings will not overbalance the times without number when you will distinguish yourself by plays you could not have made had you played as though you were afraid of getting hurt.

It goes without saying that the third baseman must have a good arm. He must be able to use the underhand as well as the overhand throw and must practice for speed in getting the ball away and for accuracy in getting it to its destination. It is seldom that he can straighten up for a throw to first base.

He should have a perfect understanding with both the pitcher and the shortstop. The understanding with the pitcher is not merely on which shall cover bunts with a runner on second, for instance, but on simplifying a bit of the fielding question, particularly when the batter gives evidence of a propensity to bunt. Suppose you see a batsman with his mind made up to bunt and you know that he usually bunts toward third base. When the pitcher is working with me, I sing out to him to "let him hit it" or something to that effect, apparently giving the batsman the tip that I am willing to take the chance.

The pitcher, however, knows what I mean. He knows that I wish him to give the batter—we are talking about right hand batters now—a ball on the outside, which will make him slice the bunt off toward first base. A right-hand batsman will hit a ball "on the inside" toward third, but he can't pull a ball "on the outside" toward third to save his life. Thus between us, the pitcher and I "cross" the batsman and he either makes a feeble attempt and goes out, or he fails to hit the ball at all.

The third baseman has to use his brains—in what position can he do without them? He must know when to play in for a bunt and when to relinquish the attempt to get a bunt to the pitcher or to the shortstop and get back to his bag. He must also never neglect to cover his position when fielding a bunt the moment he lets the ball go. It is absolutely necessary to have a perfect understanding with the shortstop about covering third when drawn in for a bunt, but he must remember that it is his station and that when the shortstop fails to cover he is responsible, whether the shortstop is really guilty of negligence or not.

To Those Who Play Base Ball

Every modification we have ever adopted in the construction of our Official League Ball has been decided upon after exhaustive experiments, always with the sole purpose of improving the qualities of the ball. The last improvement was in the core itself. The result is that the 1913 Spalding Official League Ball is the best type of ball we have ever turned out. It is more durable, more uniform in resistance, and holds its spherical shape better than any type of base ball made heretofore by anybody. I consider the 1913 Spalding Official League Ball nearer perfection than any base ball ever made. I personally investigated this improvement when it was first proposed in 1908. I then had an exhaustive series of experiments and tests made to determine whether the core could be improved. I was present at these experiments and found that unquestionably the 1913 type of ball was a great improvement from the standpoint of the ball player as well as the durability of the ball itself. I therefore authorize the following statement:

THE SPALDING 1913 OFFICIAL NATIONAL LEAGUE BALL the same as used since August 1, 1910, without change in size of cork or construction, is the best base ball that has ever been manufactured and sold by anybody.

A. G. Spalding

THE Spalding "Cork Center" has not only improved the ball, but it has also improved the game. Base ball played with the Spalding "Cork Center" Ball is as far in advance of the game played with an ordinary rubber center ball as the game played with the Spalding "Official National League" Ball of 1909 and before was in advance of the original game with the home made ball composed of a slice from a rubber shoe, some yarn from dad's woolen sock, and a cover made of leather bought from the village cobbler and deftly wrapped and sewed on by a patient mother after her day's work was done.

Base ball to-day is no hazardous amusement, it is a scientific pastime, a sport of almost geometric exactitude. It commands the best that is in men of national prominence, and gives in return the plaudits of millions who testify by their presence and enthusiasm to the wonderful hold which this most remarkable game has upon the feelings of the great American public.

Anything which results in making the game more interesting to the spectators is good for the game itself, providing it does not interfere with the development of the sport as an athletic pastime. With the Spalding "Cork Center" Ball the game is just as interesting in the last inning as in the first, the ball holds its life right through the game and being a more even playing ball than the old rubber center style it makes the game a surer test of the relative skill of the opposing teams.

Spalding "Official National League" Ball

Patent Cork Center

Patented August 31, 1909

Adopted by the National League in 1878, is the only ball used in Championship games since that time and has now been adopted for twenty years more, making a total adoption of fifty-four years.

This ball has the Spalding "Patent" Cork Center, the same as used since August 1, 1910, without change in size of cork or construction

Each ball wrapped in tinfoil, packed in a separate box, and sealed in accordance with the latest League regulations. Warranted to last a full game when used under ordinary conditions.

No. 1 { Each, . . . \$1.25
Per Dozen, \$15.00

The Spalding "Official National League" Ball has been the Official Ball of the Game since 1878

Spalding "Players" Autograph Bats

No. 100. We have obtained permission from prominent National and American League players to include in our line duplicates of bats they are actually using and which we supply them with, and these "Players" Autograph Bats, bearing signature of player in each case, represent their playing bats in every detail. Finest air dried second growth straight grained white ash, cut from upland timber, possessing greater resiliency, density, strength and driving qualities than that of any other wood. The special oil finish on these bats hardens with age and increases the resiliency and driving power of the bat. Each, \$1.00

Samuel B. Crawford AUTOGRAPH MODEL. Largest and heaviest bat (except Meyers special model) used by any professional ball player. Weights from 51 to 55 ounces. Length 35 in.

Blaine Zimmerman AUTOGRAPH MODEL. One of the best all around models ever produced. Medium small handle and well distributed striking surface. Equally suitable for the full swing and for the choke style of batting. Weights from 48 to 45 ounces. Length 34 inches.

Harry Adams AUTOGRAPH MODEL. Well balanced, comparatively light weight, with sufficient wood to give splendid driving power. Weights from 36 to 40 ounces. Length 34 1/2 in.

Frank W. Schulte AUTOGRAPH MODEL. Very small handle, and balanced so that with a full swing, terrific driving power results. Weights from 37 to 41 ounces. Length 35 inches.

Samuel B. Crawford AUTOGRAPH MODEL. Splendid model, comparatively small handle, well balanced. Weights from 40 to 44 oz. Length 35 in.

Frank A. Clarke AUTOGRAPH MODEL. Extra large heavy bat with thick handle. Weights from 44 to 48 ounces. Length 35 inches.

Earl Clark AUTOGRAPH MODEL. Different model from that formerly used by Clarke, improved in balance, model and length. Weights from 39 to 43 ounces. Length 34 1/2 inches.

Agnes O. Anderson AUTOGRAPH MODEL. Short bat, large handle, well rounded end. Weights from 40 to 44 ounces. Length 32 1/2 in.

Willy J. Huggins AUTOGRAPH MODEL. Short bat, small handle, but body quite thick. Weights from 36 to 42 ounces. Length 32 inches.

Wm. E. Wright AUTOGRAPH MODEL. The smallest, shortest and lightest bat used by any professional player. Specially adapted to small or light men. Weights from 35 to 39 ounces. Length 31 inches.

In stock in all Spalding stores in models listed on this page. Give name of player when ordering.

Can also supply on special orders Donlin, Oakes, Keeler and Evers Models. Spalding bats improve with age if properly cared for. Bats made specially to order should not be used for at least thirty (30) days after they are finished, to give ample time for the oiled finish to thoroughly harden. Players always should have two or more bats in reserve.

SPALDING SPECIAL MODEL BATS

For over thirty years we have been turning out special model bats to suit the leading players of the prominent professional leagues, and our records will show hundreds of different bats made in accordance with the ideas of individual players, many of whom have been league record makers. "Chief" Meyers writes:

I have found your bats to be the very best bats obtainable anywhere and in every respect satisfactory. It is a pleasure to give you permission to use my name on your Autograph Bats, applying same to my personal model, which permission is hereby granted.

(Signed) *JT Meyers* New York "Giants."

We can supply, on special orders, Special Model Bats, same as made for the following most famous batsmen on the National League and American League teams:

- | | |
|--|--|
| BAKER, Philadelphia, American League Model B | MEYERS, New York, National League Model M |
| CALLAHAN, Chicago, American League Model C | OLDRING, Philadelphia, American League Model O |
| DEVORE, New York, National League Model D | PASKERT, Philadelphia, National League Model P |
| FLETCHER, New York, National League Model F | SPEAKER, Boston, American League Model S |
| HERZOG, New York, National League Model H | THOMAS, Philadelphia, American League Model T |
| LUDERUS, Philadelphia, National League Model L | WHEAT, Brooklyn, National League Model W |

The originals from which we have turned Spalding Special Model Bats for players named we hold at our bat factory, making duplicates on special order only. These Spalding Special Model Bats do not bear the players' autographs.

Spalding Special Model Bats, Not Carried in Stock Made to Order Only Professional Oil Finish. Each, \$1.00
WE REQUIRE AT LEAST TWO WEEKS' TIME FOR THE EXECUTION OF SPECIAL BAT ORDERS.

SPALDING "ALL STAR" MODEL BATS

No. 100S. We have made up six what might be called "composite" models, combining the features of several in one bat, and we offer in these "All Star" Bats a line which possesses the most desirable features for amateurs or professionals. Timber same as in the Spalding "Players' Autograph" Bats. . . Each, **\$1.00**
Furnished in six models of various lengths and weights. Mention Model Number when Ordering.

SPALDING BROWN OIL-TEMPERED BATS

No. 100D. Same quality as our "Players' Autograph" and "All Star" Models. Furnished in a most popular assortment. Special preparation used on this grade is similar to that which many professional players use. . . . Each, **\$1.00**

SPALDING PROFESSIONAL OIL FINISH BATS

No. 100P. This line is the result of exhaustive experiments and tests conducted in our bat factory. Timber same as "Players' Autograph" and "All Star." Ea. **\$1.00**
Furnished in twelve models of various lengths and weights. Mention Model Number when Ordering.

SPALDING GOLD MEDAL NATURAL FINISH BATS

No. 100G. Timber is same as we use in the "Players' Autograph," the "All-Star," and the "Professional Oil Finish" bats. Each, **\$1.00**
Furnished in twelve models of various lengths and weights. Mention Model Number when Ordering.

Spalding bats improve with age if properly cared for. Bats made specially to order should not be used for at least thirty (30) days after they are finished, to give ample time for the oiled finish to thoroughly harden. Players should make it a rule to have two or more bats in reserve at all times.

SPALDING TRADE-MARK BATS

- | | |

Spalding "World Series" Open Vision Special Welded Frame Mask

PATENTS APPLIED FOR

No. **10-0W**. Heavily padded; special welded frame. Has the best features of mask manufacture that have come to us during the many years since we put out the first really practical base ball catchers' mask. Weight is as light as consistent with absolute safety; padding conforms to the face with comfort. Each, **\$5.00**

Spalding Open Vision Specially Soldered Frame Masks

PATENTS APPLIED FOR

No. **8-0**. Heavily padded, soldered and reinforced frame of special steel wire, heavy black finish. Reinforced with hard solder at joining points. This feature of maximum strength, together with our patented open vision, has the endorsement of the greatest catchers in the National and American Leagues. Each, **\$5.00**

No. **9-0**. Lightly padded, but otherwise similar in construction to our No. 8-0. Some catchers prefer the light padding that we use in our No. 9-0 style to the heavy padding with extra forehead pad, as in the No. 8-0. . . Each, **\$5.00**

Spalding "Special Soldered" Mask

No. **6-0**. Each crossing of the wires heavily soldered. Extra heavy wire frame, black finished; improved padding on sides, special forehead pad and molded leather chin-piece; elastic head-band and detachable cloth sun-shade. . . Each, **\$4.00**

Spalding Open Vision Umpires' Mask

No. **5-0**. Open vision frame. Has neck protecting attachment and a special ear protection; nicely padded. Safest and most convenient. . . . Each, **\$5.00**

Spalding "Sun Protecting" Mask

No. **4-0**. Patent molded leather sun-shade, protecting eyes without obstructing view. Heavy steel wire, black finish. Padded leather chin-strap, improved design; hair-filled pads, including forehead pad, special elastic head-band. Each, **\$4.00**

Spalding "Neck Protecting" Mask

No. **3-0**. Neck protecting arrangement affords positive protection. Finest heavy steel wire, black finish; hair-filled pads, special elastic head-strap. Each, **\$3.50**

Spalding "Semi-Pro" League Mask

No. **O-P**. Black annealed steel wire. Continuous side pads, leather covered, hair-filled; forehead pad; leather chin-strap; elastic head-band. Each, **\$2.50**

Spalding "Regulation League" Masks

No. **2-0**. Black annealed steel wire. Hair-filled padding of improved design, including forehead pad, molded leather chin-strap; elastic head-band. Ea., **\$2.00**

No. **O-X**. Men's. Heavy annealed steel wire, finished in black. Improved leather covered pads, including forehead pad, molded leather chin-strap. Ea., **\$1.50**

No. **0XB**. Best youths' mask. Black finish, soft annealed steel wire, similar quality throughout to No. OX. . . . Each, **\$1.50**

No. **A**. Men's. Black enameled steel wire, leather covered pads, forehead pad and molded chin-strap. . . . Each, **\$1.00**

No. **B**. Youths'. Black enameled steel wire, similar in quality throughout to No. A, but smaller in size. . . . Each, **\$1.00**

No. **C**. Black enameled; pads covered with leather, wide elastic head-strap, leather strap-and-buckle. . . . Each, **50c.**

No. **D**. Black enameled; smaller than No. C; substantial for boys. Each, **25c.**

ABOVE UNIFORMS CONSIST OF SHIRT, PANTS, CAP, BELT AND STOCKINGS.

SPALDING BASE BALL SHOES

Lightest Base Ball Shoes ever made.

No. FW. "Featherweight." Kangaroo uppers, white oak leather soles; hand sewed, strictly bench made. Has special edge and vamp protector (Patent applied for), which takes the place of ordinary pitchers' toe plates. Leather laces. Per pair, \$7.50

Sizes and Weights of Spalding "Featherweight" No. FW Base Ball Shoes

Size of Shoes	5	6	7	8	9
Weight, per pair.	18 oz.	18½ oz.	19 oz.	20 oz.	21 oz.

Owing to the lightness and fineness of this shoe, it is suitable only for the fastest players, but as a light weight durable shoe for general use we recommend No. 30-S.

No. 30-S. "Sprinting." Kangaroo leather uppers, white oak leather soles. Built on our famous running shoe last. Strongly made, light in weight. Hand sewed and strictly bench made. Leather laces. Per pair, \$7.00

No. 0. "Club Special." Selected satin calfskin. High point carefully tempered carbon steel plates hand riveted to heels and soles. Per pair, \$5.00

No. 0S. Same as No. 0, but with sprinting style flexible soles. 5.00

No. 35. "Amateur Special." Leather, machine sewed. High point tempered carbon steel plates hand riveted to heels and soles. Pair, \$3.50 ★ \$39.00 Doz.

No. 37. "Junior." Leather, regular base ball shoe last. Plates hand riveted to heels and soles. Excellent for money, but *not guaranteed*. Pair, \$2.50 ★ \$27.00 Doz.

Juvenile Base Ball Shoes

No. 38. Made on special boys' size lasts. Good quality material throughout and steel plates. Furnished in boys' sizes, 12 to 5, inclusive, only. Per pair, \$2.00

Prices printed in *italics* opposite items marked with ★ quoted on orders for one-half dozen or more. Quantity prices NOT allowed on items NOT marked with ★.

SPECIAL NOTICE. Keep the uppers and soles soft by applying Spalding Waterproof Oil. It will greatly add to wear of shoes. Can 25 Cents.

QUALITY

Spalding Roll Collar Sweaters

The Nos. AA, A and B Sweaters, listed below, are made of special quality worsted, exceedingly soft and pleasant to wear. For straight athletic wear there is no garment more useful than these regular roll collar sweaters which we have been making in our factories for over twenty-five years. Full fashioned to body and arms and put together by hand, not simply stitched up on a machine, as are the majority of garments sold as regular made goods. All made with 9-inch roll collars. Sizes: 28 to 44 inches.

No. AA

than in No. AA. Carried in stock in Gray or White only. See list below of colors supplied on special orders. Roll collar.

Each, \$6.00 ★ \$66.00 Doz.

No. AA. The proper style for use after heavy exercise, inducing copious perspiration, for reducing weight or getting into condition for athletic contests. Particularly suitable also for Foot Ball and Skating. Heaviest sweater made. Carried in stock in White or Gray only. See list below of colors supplied on special orders.

Each, \$8.00

★ \$84.00 Doz.

No. A. "Intercollegiate." Special weight worsted, lighter

No. B. Heavy weight, but lighter worsted than in No. A. Carried in stock in Gray or White only. See list below of colors supplied on special orders. Roll collar. . . Each, \$5.00 ★ \$54.00 Doz.

SHAKER SWEATER

No. 3. Good quality all wool sweater, Shaker knit, well made throughout. Sizes: 30 to 44 inches. Standard weight, slightly lighter than No. B. Carried in stock in Gray or White only. See list below of colors supplied on special orders. Roll collar. Each, \$4.00 ★ \$45.00 Doz.

We allow four inches for stretch in all our sweaters, and sizes are marked accordingly. It is suggested, however, that for very heavy men a size about two inches larger than coat measurement be ordered to insure a comfortable fit.

PLAIN COLORS—Sweaters on this page are supplied in any of the colors designated, at regular prices. Other colors to order only in any quality, 50c. each garment extra.

SPECIAL ORDERS—In addition to stock colors mentioned, we also supply any of the sweaters listed on this page, without extra charge, on special orders only, not carried in stock, in any of the following colors: BLACK, CARDINAL, SEAL BROWN, MAROON, NAVY, DARK GREEN, SCARLET, COLUMBIA BLUE

N. B.—We designate three shades which are sometimes called RED. They are Scarlet, Cardinal, Maroon. Where RED is specified on order, we supply Cardinal.

SPECIAL NOTICE—Solid color sweaters with one color body and another color (not striped) collar and cuffs furnished in any of the colors noted, on special order, at no extra charge.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

The prices printed in italics opposite items marked with ★ will be quoted only on orders for one-half dozen or more. Quantity prices NOT allowed on items NOT marked with ★

Spalding' Gold Medal Rackets

Patented January 3, 1905; June 12, 1906.

THE success we have met with in putting out this racket accompanied by the broadest guarantee ever given on an article of this kind is the best evidence as to the truth of our assertions regarding the great care which we exercise in watching every detail of its manufacture. The racket is sold upon its own reputation and the Spalding Guarantee is your assurance of satisfaction.

The difference between Styles A and B is in the additional strings reinforcing the central portion of the latter. Handles $5\frac{1}{4}$ and $5\frac{3}{8}$ inches in circumference. Stringing of clearest and absolutely best quality lambs' gut. Tag attached to each racket, giving particulars of special inspection. Each racket enclosed in special quality mackintosh cover.

We use a dogwood insertion in shoulders, after proving to our satisfaction, by experience, that it is far superior to cane or other material for the purpose.

GUARANTEE We guarantee Lawn Tennis Rackets for a period of 30 days from date of purchase by the user. The Guarantee Tag attached to each Spalding Lawn Tennis Racket reads as follows: If this Racket proves defective in workmanship or material within 30 days from date of purchase, please return, transportation charges prepaid, to any Spalding Store, and the defect will be rectified. Imperfectly strung Rackets will be restrung, and in the event of a broken frame due to workmanship or defective material, the Racket will be replaced. Notice.—This Guarantee does not apply to Rackets weighing less than 13 ounces.

We urge that at the conclusion of play this Racket be rubbed dry, and when not in use be covered with a Waterproof Cover, placed in a Racket Press, and the gut occasionally gone over with Spalding Tennis Gut Preservative. **KEEP YOUR RACKET IN A DRY PLACE, otherwise the Guarantee is void.**

Mike Murphy "Rub-In" Athletic Liniment

THIS PREPARATION is the same as has been used by Mike Murphy, the famous athletic trainer, in conditioning the Yale, University of Pennsylvania and other college teams which have been under his charge. He is famous for the perfect condition in which he brings his athletes into a contest, and the ingredients and proper preparation of his "Rub-In" Liniment has been a closely guarded secret. He has finally turned the formula over to A. G. Spalding & Bros. with perfect confidence that the proper materials will always be used in preparing the liniment and that no considerations will induce us to cheapen it in any way.

Large bottles. Each, 50c.
Small bottles. Each, 25c.

Spalding Elastic Bandages

Spalding

Shoulder Bandage

Give circumference around arm and chest. Mention for which shoulder required.

- No. 101. Cotton thread. Each, \$3.50
- No. 101A. Silk thread. Each, \$5.00

Wrist Bandage

Give circumference around smallest part of wrist, and state if for light or strong pressure.

- No. 106. Cotton thread. Each, 50c.
- No. 106A. Silk thread. " 75c.

Spalding Ankle Bandage

Give circumference around ankle and over instep; state if light or strong pressure is desired.

- No. 105. Cotton thread. Each, \$1.00
- No. 105A. Silk thread. Each, \$2.00

Spalding Elastic Bandage

Composed of threads of rubber completely covered. The pressure can be applied wherever necessary. To fasten insert end under last fold.

- No. 30. Width 3 in., 5 yds. long (stretched). Each, 60c.
- No. 25. Width 2½ in., 5 yds. long (stretched). " 50c.

Spalding Knee Cap Bandage

Give circumference below knee, at knee and just above knee, and state if light or strong pressure is desired.

- No. 104. Cotton thread. Each, \$1.00
- No. 104A. Silk thread. Each, \$2.00

Elbow Bandage

Give circumference above and below elbow and state if for light or strong pressure.

Spalding's Worsted Jerseys

Following sizes carried in stock regularly in all qualities: 28 to 44 inch chest. Other sizes at an advanced price. We allow two inches for stretch in all our Jerseys, and sizes are marked accordingly. It is suggested, however, that for very heavy men a size about two inches larger than coat measurement be ordered to insure a comfortable fit.

STOCK COLORS
PLAIN COLORS—We carry in stock in all Spalding Stores our line of worsted jerseys (NOT Nos. 12XB, 6, or 6X) in following colors: NAVY BLUE GRAY BLACK MAROON

SPECIAL ORDERS
We also furnish, without extra charge, on special orders for one-half dozen or more, not carried in stock and NOT supplied in Nos. 12XB, 6, or 6X, the following colors. On orders for less than one-half dozen 10 per cent. will be added to regular price
WHITE DARK GREEN
CARDINAL IRISH GREEN
ORANGE PURPLE
SCARLET YELLOW
ROYAL BLUE SEAI BROWN
COLUMBIA BLUE OLD GOLD

Other colors than as noted above to order only in any quality (EXCEPT Nos. 14P, 12XB, 6, and 6X), 50c. each extra.

N. B.—We designate three shades which are sometimes called RED. They are Scarlet, Cardinal, and Maroon. Where RED is specified on order, Cardinal will be supplied.

No. 1P

No. 1PF

SPALDING INTERCOLLEGIATE JERSEY

This jersey we consider in a class by itself. No other manufacturer makes a garment of anywhere near the same grade. We recommend it to those who really want the best.

No. 1P. Regular roll collar. Full regular made; that is, fashioned or knit to exact shape on the machine and then put together by hand, altogether different from cutting them out of a piece of material and sewing them up on a machine, as are the majority of garments known as Jerseys. Special quality worsted. Solid colors as specified above. Each, \$4.00 ★ \$12.00 Doz.

No. 1PF. Straight low collar. Quality of worsted and manufacture same as No. 1P. Solid colors as specified above. Each, \$4.00 ★ \$12.00 Doz.

No. 10P. Regular roll collar. Special quality worsted, fashioned. Solid colors as specified above. Each, \$3.00 ★ \$30.00 Doz.

No. 10PF. Straight low collar. Quality of worsted and manufacture same as No. 10P. Solid colors as specified above. Each, \$3.00 ★ \$30.00 Doz.

No. 12P. Regular roll collar. Good quality worsted. Solid colors as specified above. Each, \$2.50 ★ \$27.00 Doz.

No. 14P. Regular roll collar. Worsted. Solid colors: Navy Blue, Black, Gray, and Maroon only. Each, \$2.00 ★ \$21.00 Doz.

No. 12XB. Boys' Jersey. Regular roll collar. Worsted. Furnished in sizes 26 to 34 inches chest measurement only. Solid colors: Navy Blue, Black, Gray, and Maroon only. No special orders. Each, \$2.00 ★ \$21.00 Doz.

Jerseys with Necklace—Nos. 1P, 1PF, 10P, 10PF or 12P Jerseys with necklace stripe of any color specified above, at an extra charge of \$1.00 per garment.

Woven Letters, Numerals or Designs

We weave into our best grade Jerseys, No. 1P, Letters, Numerals and Designs in special colors as desired. Prices quoted on application. Designs submitted. Prices Subject to Advance Without Notice.

Jerseys are being used more and more by Base Ball Players, especially for early Spring and late Fall games. On account of the special Spalding knit they are very durable, and at the same time they offer no restraint on the free movement of the player

Do You Know

?

What was the greatest number of victories in a major league playing season?

What pitchers have had no-hit games to their credit in the major leagues since 1880?

What player holds the record for circling the bases?

What major league club holds the record for greatest number of shut-out games in a season?

What players have batted .300 since 1876?

What major league players participated in every game of their club's schedule in 1912?

Who batted nearly .500 in 1887?

What was the greatest number of runs made in a major league game since 1876?

What pitcher in the National League struck out 21 batsmen in a nine-innings game?

What pitcher holds the record for the first no-hit-no-run game?

Answers to above and records of all the leagues, teams and players, with pictures of players and teams, will be found in **SPALDING'S OFFICIAL BASE BALL RECORD FOR 1913**. Sent by mail anywhere on receipt of **10 Cents** by A. G. Spalding & Bros. (see list of store addresses on inside front cover).

Who won the 100 yards championship in 1876?

How many events America won in the first international meeting—England vs. America?

What amateur won four National Championships in one day?

Who holds the half-mile indoor board floor record?

Who won the first American all-around championship?

Who comprise the All-America athletic team for 1912?

What the record is for running 100 yards?

Who is the all-around champion?

What the records are for best college athletic performances?

Where the next Olympic games will be held?

SPALDING'S OFFICIAL ATHLETIC ALMANAC FOR 1913 contains the answers to the above and thousands of other performances, including the records for Canada, Great Britain and Ireland, Sweden, France, Germany, Holland, Belgium, Hungary, Australia and South Africa. Profusely illustrated with pictures of hundreds of leading athletes. Sent by mail anywhere upon receipt of **25 Cents** by A. G. Spalding & Bros. (see list of store addresses on inside front cover).

A New Spalding Base Ball Annual

Devoted exclusively to the College game. Has pictures, records and schedules, averages and reviews of season, names of captains in all leading colleges and records of previous years.

SPALDING'S OFFICIAL COLLEGE BASE BALL ANNUAL

Special articles on college base ball and on early college games. All America teams, Reviews, records, scores of Yale - Harvard - Princeton, etc., games, with captains. Pictures of leading clubs.

Mailed anywhere upon receipt of **10c.** by A. G. Spalding & Bros.

(See list of addresses on inside front cover of this book.)

EVERY BOY

who aims to become a good ball player should read the Spalding Athletic Library Base Ball Series

(Group I), a list of which is given in the front part of this book. Every department of the game is thoroughly covered by a competent authority, and they form the best books of instruction on the game ever published.

CAUTION TO THE BASE BALL BOYS OF 1913

Because of your youth and inexperience, advantage is frequently taken of you base ball boys, by the so-called "Just as Good" dealer, who tries to palm off on you some of his "Just as Good" Base Ball goods, made especially for him by the "Just as Good" manufacturer, when you call for the Spalding goods. You are cautioned not to be deceived by this "Just as Good" combination, for when you get onto the field you will find these "Just as Good" Balls, Bats, Mitts, etc., will not stand the wear and punishment of the genuine Spalding articles. Remember that Spalding Goods are standard the world over, and are used by all the leading clubs and players. These "Just as Good" manufacturers endeavor to copy the Spalding styles, adopt the Spalding descriptive matter and Spalding list prices, and then try to see how very cheap and showy they can make the article, so the "Just as Good" dealer can work off these imitations on the unsuspecting boy.

Don't be deceived by the attractive 25 to 40 per cent. discount that may be offered you, for remember that their printed prices are arranged for the special purpose of misleading you and to enable the "Just as Good" dealer to offer you this special discount bait. This "discount" pill that the "Just as Good" dealer asks you to swallow is sugar coated and covered up by various catchy devices, that are well calculated to deceive the inexperienced boy, who will better understand these tricks of the trade as he grows older. Remember that all Spalding Athletic Goods are sold at the established printed prices, and no dealer is permitted to sell them at a greater or less price. Special discounts on Spalding Goods are unknown. Everybody is treated alike. This policy persistently adhered to makes it possible to maintain from year to year the high quality of Spalding Athletic Goods, which depend for their sale on Spalding Quality, backed by the broad Spalding Guarantee, and not on any deceiving device like this overworked and fraudulent "Discount" scheme adopted by all of the "Just as Good" dealers.

Occasionally one of these "Just as Good" dealers will procure some of the Spalding well known red boxes, place them in a showy place on his shelves, and when Spalding Goods are called for, will take from these Spalding boxes one of the "Just as Good" things, and try to palm it off on the boy as a genuine Spalding article. When you go into a store and ask for a Spalding article, see to it that the Spalding Trade-Mark is on that article, and if the dealer tries to palm off on you something "Just as Good," politely bow yourself out and go to another store, where the genuine Spalding article can be procured.

In purchasing a genuine Spalding Athletic article, you are protected by the broad Spalding Guarantee, which reads as follows:

We Guarantee to each purchaser of an article bearing the Spalding Trade-Mark that such article will give satisfaction and a reasonable amount of service, when used for the purpose for which it was intended and under ordinary conditions and fair treatment.

We Agree to repair or replace, free of charge, any such article which proves defective in material or workmanship when subjected to fair treatment: PROVIDED, such defective article is returned to us, transportation prepaid, within thirty days after purchase (except where otherwise stipulated on special guarantee tag attached to certain articles), and accompanied by a letter from the user, giving his name and address, and explaining the claim.

A. G. SPALDING & BROS.

Beware of the "Just as Good" manufacturer, who makes "pretty" Athletic Goods (as if they were for use as an ornament) at the expense of "quality," in order to deceive the dealer; and beware of the substitute-dealer who completes the fraud by offering the "Just as Good" article when Spalding Goods are asked for.

Standard Policy

A Standard Quality must be inseparably linked to a Standard Policy.

Without a definite and Standard Mercantile Policy, it is impossible for a Manufacturer to long maintain a Standard Quality.

To market his goods through the jobber, a manufacturer must provide a profit for the jobber as well as for the retail dealer. To meet these conditions of Dual Profits, the manufacturer is obliged to set a proportionately high list price on his goods to the consumer.

To enable the glib salesman, when booking his orders, to figure out attractive profits to both the jobber and retailer, these high list prices are absolutely essential; but their real purpose will have been served when the manufacturer has secured his order from the jobber, and the jobber has secured his order from the retailer.

However, these deceptive high list prices are not fair to the consumer, who does not, and, in reality, is not ever expected to pay these fancy list prices.

When the season opens for the sale of such goods, with their misleading but alluring high list prices, the retailer begins to realize his responsibilities, and grapples with the situation as best he can, by offering "special discounts," which vary with local trade conditions.

Under this system of merchandising, the profits to both the manufacturer and the jobber are assured; but as there is no stability maintained in the prices to the consumer, the keen competition amongst the local dealers invariably leads to a demoralized cutting of prices by which the profits of the retailer are practically eliminated.

This demoralization always reacts on the manufacturer. The jobber insists on lower, and still lower, prices. The manufacturer, in his turn, meets this demand for the lowering of prices by the only way open to him, viz.: the cheapening and degrading of the quality of his product.

The foregoing conditions became so intolerable that 14 years ago, in 1899, A. G. Spalding & Bros. determined to rectify this demoralization in the Athletic Goods Trade, and inaugurated what has since become known as "The Spalding Policy."

The "Spalding Policy" eliminates the jobber entirely, so far as Spalding Goods are concerned, and the retail dealer secures the supply of Spalding Athletic Goods direct from the manufacturer by which the retail dealer is assured a fair, legitimate and certain profit on all Spalding Athletic Goods, and the consumer is assured a Standard Quality and is protected from imposition.

The "Spalding Policy" is decidedly for the interest and protection of the users of Athletic Goods, and acts in two ways:

First.—The user is assured of genuine Official Standard Athletic Goods and the same prices to everybody.

Second.—As manufacturers, we can proceed with confidence in purchasing at the proper time, the very best raw materials required in the manufacture of our various goods, well ahead of their respective seasons, and this enables us to provide the necessary quantity and absolutely maintain the Spalding Standard of Quality.

All retail dealers handling Spalding Athletic Goods are requested to supply consumers at our regular printed catalogue prices—neither more nor less—the same prices that similar goods are sold for in our New York, Chicago and other stores.

All Spalding dealers, as well as users of Spalding Athletic Goods, are treated exactly alike, and no special rebates or discriminations are allowed to anyone.

This briefly, is the "Spalding Policy," which has already been in successful operation for the past 14 years, and will be indefinitely continued.

In other words, "The Spalding Policy" is a "square deal" for everybody.

A. G. SPALDING & BROS.

By *A. G. Spalding*

PRESIDENT.

Standard Quality

An article that is universally given the appellation "Standard" is thereby conceded to be the criterion, to which are compared all other things of a similar nature. For instance, the Gold Dollar of the United States is the Standard unit of currency, because it must legally contain a specific proportion of pure gold, and the fact of its being Genuine is **guaranteed** by the Government Stamp thereon. As a protection to the users of this currency against counterfeiting and other tricks, considerable money is expended in maintaining a Secret Service Bureau of Experts. Under the law, citizen manufacturers must depend to a great extent upon Trade-Marks and similar devices to protect themselves against counterfeit products—without the aid of "Government Detectives" or "Public Opinion" to assist them.

Consequently the "Consumer's Protection" against misrepresentation and "inferior quality" rests entirely upon the integrity and responsibility of the "Manufacturer."

A. G. Spalding & Bros. have, by their rigorous attention to "Quality," for thirty-seven years, caused their Trade-Mark to become known throughout the world as a Guarantee of Quality as dependable in their field as the U. S. Currency is in its field.

The necessity of upholding the Guarantee of the Spalding Trade-Mark and maintaining the Standard Quality of their Athletic Goods, is, therefore, as obvious as is the necessity of the Government in maintaining a Standard Currency.

Thus each consumer is not only insuring himself but also protecting other consumers when he assists a Reliable Manufacturer in upholding his Trade-Mark and all that it stands for. Therefore, we urge all users of our Athletic Goods to assist us in maintaining the Spalding Standard of Excellence, by insisting that our Trade-Mark be plainly stamped on all athletic goods which they buy, because without this precaution our best efforts towards maintaining Standard Quality and preventing fraudulent substitution will be ineffectual.

Manufacturers of Standard Articles invariably suffer the reputation of being high-priced, and this sentiment is fostered and emphasized by makers of "inferior goods," with whom low prices are the main consideration.

A manufacturer of recognized Standard Goods, with a reputation to uphold and a guarantee to protect must necessarily have higher prices than a manufacturer of cheap goods, whose idea of and basis of a claim for Standard Quality depends principally upon the eloquence of the salesman.

We know from experience that there is no quicksand more unstable than poverty in quality—and we avoid this quicksand by Standard Quality.
