*Note.*—The orthography of the names of numerals inclosed by parentheses is different from that of the other parts of the vocabulary. D denotes Dog-rib words obtained by myself. L is Dog-rib recorded by Captain Lefroy. C denotes Chepewyan words extracted from a list furnished by Mr. M'Pherson, who has adopted the French orthography in part.

The fragment of a vocabulary of the Chepewyan dialect, which follows, was formed entirely from the diction of Mrs. M'Pherson, to whom the language has been familiar from her infancy. It was written in the following manner: Having at hand a pretty full vocabulary of the Cree, drawn up at Carlton House in 1820, in which the words were arranged in alphabetical order, I propounded the Cree expressions to her in succession, assisting her with a French translation when she had any doubt of their meaning. The Chepewyan equivalent was pronounced by her again and again, until my ear caught the sound, and I was able to repeat it after her. I then wrote it down, and read it to her from the manuscript. Such words as I was unable to pronounce to her satisfaction, and they were not few, were left out. The nasal sounds resembling the French final *n* were the most difficult, and they are of frequent occurrence in the language. The Chepewyan tongue also abounds in the burring sound of the letter *r* combined with an aspirate, which I know not how to express in English; and such words have consequently been left out of the vocabulary. The ordinary aspirate, similar to the *och* of the Scottish or Irish, is denoted in the vocabulary by *kh*. The vocabulary, short as it is, took

some weeks to produce. It was interrupted by a change in our arrangements in traveling, canoes having been substituted for boats, which made it less convenient for me to receive lessons in Chepewyan. This difficulty would not, however, have prevented the prosecution of the task, especially as Mrs. M'Pherson with much kindness expressed her willingness to proceed until we had gone through the whole Cree vocabulary, of which about nine-tenths remained; but knowing that the language was becoming a written one, under the active superintendence of the Roman Catholic missionaries at Isle à la Crosse, I gave up my intention of endeavoring to ascertain its structure, and contented myself with the following specimen.
