ANCIENT MEDICAL METHODS

The Manner of Doctors' Consultations In the Fourteenth Century.

Coming to Mondeville's exposition of the method of holding a discussion, we find his description almost a story of what might take place today. "First," he says, "we should inquire into the nature of the disease, examining carefully and feeling, because the diagnosis is made by touching with the hand and like number of pieces of paper. The observing with the eye. All the consultants engage in turn in the examination. Then, if the case demands it, they make a new examination all together, pointing out to one another the symptoms of then put on a piece of copper, then a disease and the special or remarkable features either in the patient or the disease. Then one of them, the highest in rank, says to the patient, 'Sir, we perceive very clearly what is the matter with you, and you ought to have full confidence in us and be glad that there are so many of us here and such doctorsenough for a king-and to believe that | outside. the youngest of us is competent to prescribe and carry on your treatment and bring it to a good result.' Then he instances of his attack. 'Sir. do not be displeased or take it ill, but when did hands and the persons on each end of which are recorded as indications furnished by the patient.

When all the questions called for sultants retire to another room, where they will be alone, for in all consultations the masters dispute with one another in order the better to discuss the truth, and sometimes they come to a proceeding to suppose there were discord and strife among them. This is sometimes the case. "-" Fourteenth Century Science Monthly.

NO MORE THORNS.

The Perfection to Which Fruits and Flow ers Are Developing.

The limit of improvement is not found in producing fruits of great size, beauty and sweetness. There are other desirable qualities that the horticulturist is anxious to obtain, and toward this end he is devoting his energies. One of the most noticeable trends of the science of fruit culture is toward the elimination of undesirable organs. The thorns of some of the citrus fruit trees and the prickles of such small berry bushes as the gooseberry, blackberry and raspberry are protuberances that have outlived their usefulness and are highly unpleasant. They not only puncture the ripening fruits, but they often make harvesting exceedingly inconvenient. Gardeners have long wished to do away with these thorns and prickles, but it is only comparatively recently that systematic efforts have been made

The thorns are conspicuous organs of our cultivated plants that have ceased to be of any value, for their original rnose of protecting the plants from

'Well? Go on.'

without putting the cover on it, and my 5-year-old boy got at it."

'Couldn't run it, could he?" they asked.

"Of course not, but I'd let him help me put the paper in and take it out unoperation of the machine, and as the click of it pleased him and there was no one there to stop him he hammered away at it for about two hours.'

"But what has that to do with your story?'

"That was the story," answered the literary light. "When I saw what he

SLEIGHBELLS.

As Commonly Used as Ever-Some Changes In Customs

The sleighbells used in this country are made here, most of them in Connecticut, and many sleighbells of American manufacture are exported to Germany and to Russia. Sleighbells are as commonly used as ever whenever there is snow enough to make good sleighing. They may not be heard so much as formerly here in the city. where the snow is cleared away from many streets and wheels cut up what is left, but up the state and elsewhere the sleighbells jingle in winter just as merrily as ever.

There have been some changes in sleighbell customs. Shaft bells and bells fixed on the saddle of the harness have to some extent taken the place of

the old time string of bells on straps, but the strings of bells are still the more commonly used. Probably a third of the bell outfits sold nowadays are of better time to get the story of his re- are in about the same proportions. The bells attached to shafts and harness are open mouthed and provided with with all three in a set alike; oftener giously everything she spent, the exact they are made in three sizes, forming a amount, the article and the date. She chime. The three bells carried over the mental frame, which is supported by the saddle.

The sleighbells of the old, familiar kind, round, with balls inside, are attached to straps, as they have always been, to body straps encircling the horse's body, and to neck straps.

Sleighbells are made of bell metal, and they were never made with such ing qualities, nor were they ever so musleighbells are produced at a very small cost, and whole strings of bells are sold at prices that seem marvelously low. Shaft bells of the commoner kinds are cheaper yet, and that accounts in some measure for the increased sales of shaft bells.

There is left all around, between it and with the mold outside and the core infrom the mold, the sand of which the core is composed, having been dried out by the heat of the molten metal, can easily be shaken out of the bell through its narrow mouth, but the ball which has been placed in the sand before the bell was cast is bigger than the mouth

THE MONOTONE.

Hark! How the great, old ocean day and night Breaks on you giant rock as on a throne That towers in silent night In one long, plaintive, awful monotone!

Unanswering ever towers the giant rock Amid the centuries that come and go, As if 'twould only mock

The eternal voice that wailed and wailed be low

'Tis thus, O God, the deep sea of my soul Breaks ever on the foot of thy great throne its dread but only goal,

In one long, plaintive, awful monotone! Unanswered yet, but, hoping, still it calls: Will not the throne take pity on the woe? How terrible if its walls Are always silent to the wail below!

HER ACCOUNT DOCTORED.

This Girl Kept an Expense Book and Lo a Husband.

There is a North Side girl who has a laudable ambition to know just where her money goes. She has tried two or three times to keep mental track of her expenditures, but this always proved saddle of the harness and two-thirds unsatisfactory. At last she decided that she must keep an exact and minute account of everything she spent. She got herself a small book with rulings and margins and a pliable cover and set to work in earnest. She put down relinever allowed the slightest matter to go saddle of the harness are set in an orna- till there was a chance of her forgetting it. When she made any purchases down town, she went over the list carefully in the car on her way home and put the amounts on the outside of a package. In this way she succeeded in keeping a very satisfactory record of her expenditures.

There was only one drawback. She was forever leaving the book around. care with a view to their sound produc- Of course there are a great many people who are only too glad to read such sical, as now The commoner kinds of things. The servant would see it. The man who came to tune the piano might easily have done it if he liked, and she did not know whether he had or not. A neighbor had once picked it up on the lawn in front of the house and brought it in, but what was worse than all the rest was the fact that a couple of girl

The question has often been asked, friends perused it one day. There were and as often answered, How does the some things which she had talked a ball get inside of the sleighbell? The good deal about that she got for downquestion is here again answered. Of right bargains. In fact, after this catascourse the ball itself is first cast. It is trophe everything on her record seemed then placed inside the ball of sand that to be shamefully cheap. However, she is to form the core of the mold in which was unwilling to give up the bookkeepthe sleighbell is to be cast. The mold ing, and if she didn't carry a notebook is of the form and size of the outside of around with her she would certainly the sleighbell. In this way she could always tell that every item really cost one-tenth of side. When the sleighbell is taken what appeared on the book. After this she didn't care who saw it.

There is a lot at the side of her father's house and a rustic seat. One day she left the book on this seat. In the evening the young man who had about concluded to ask her hand in marriage came along. He noticed the book, picked it up and looked through it carelessly. He was amazed. She had always claimed to be such a prudent girl, and he had tion. believed she was. Still there he saw: Candy...... \$3 (0 Soda water..... \$2 0)

WESTMINSTER ABBEY.

Something About This World Famous Old English Church.

The architecture of Westminster abbey dates tack to a remote period, but long before any part of the present "glorious pile" was in existence a Saxon church stood upon the same spot. Many years before the conquest the Saxon church was connected with a monastic body of the Benedictine order, which gave the name Western monastery, or Westminster, to its place of abode, to distinguish it from St. Paul's, in London, which was known as East Minster.

Considered architecturally, the first church here of which we have any authentic history was erected by Edward the Confessor and consecrated on Holy Innocents' day, 1065. The greater part of the abbey was built by Henry III in the style known as early English. The west front, with its grandly beautiful windows, belongs to the fifteenth century, as does also the completion of the nave and the aisles. The extreme length of Westminster abbey is 511 feet, the width across the transepts is 203 feet and the width across the aisles 79 feet; the height of the roof is 102 feet.

The fortunes of the abbey have followed and are closely interwoven with those of the nation, and many, therefore, are its historical associations. There the sovereigns of England have been crowned ever since the conquest. The coronation stone, brought from Scotland by Edward I, may still be seen under the coronation chair used by Richard II. This chair has ever since been occupied by English rulers during the coronation ceremonies.

Within the walls of the abbey the funerals of many crowned heads have taken place, and sovereigns and members of royal families have graves and tombs beneath its roof. Oliver Cromwell never wore a crown, but his remains were deposited for a time in a vault beneath Henry VII's chapel with pomp never surpassed by that of royalty. The south transept is known to the world as the "poets' corner," because there, sleeping their last sleep, are Chaucer, Spenser, Ben Jonson, Cowley, Dryden, Beaumont, Addison and Tennyson and near by are monuments to Shakespeare, Milton, Isaac Watts, Goldsmith and Johnson.

0

In the north transept are buried many renowned statesmen. There lie Pitt, Wilberforce, Fox, Peel, Canning and Palmerston Many eminent divines, men of letters, generals, admirals and other persons known to fame are buried beneath the marble pavement or have monuments by its pillars or on its historic walls. -- Philadelphia Times.

IS GALLANTRY LANGUISHING?

Observations on the Decline of Street Can Manners In the South.

It cannot be concealed that there is a growing tendency, even in the south, where masculine gallantry has held out longest, on the part of men to let women in the street cars shift for themselves. It has not come to that point yet, but the movement is growing in that direc-

It is a fact that men are rapidly failing in the courtesy which was once uni-fields of labor, and this fact vastly changes the social relations between the sexes. Women are claiming all sorts of equality with men, moral, political and physical, and are declaring more and more their independence. The effect on the next generation will be very marked and peculiar. The men and women of the present are affected to an overpowering extent by the influence of A sailmaker's mate in the navy who old ideas and training, and that is the wanted to get out of the service to go reason they talk about street car maninto business with some money he had ners and social ethics in their relations fallen heir to made a success of the to the sexes, but in the year 1930, or monomania dodge. It is the business of the period of one generation from the a man-of-war sailmaker's mate to sew present time, people will no longer conup members of the crew who die at sea cern themselves about such matters. The greater the number of women at work in proportion to the men the more mate appeared on deck one day with a stringent the competition, and it can easily be seen that, according to the figures shown, the day might come when there would be no street car manners, but every individual would look out for himself or herself, as the case may be. But even should chivalry he extinguished from human manners there will always remain the Christian grace of charity, so in the time to come ablebodied young men and women who have seats in the cars will rise to give their places to old men and women and to others who may be sick or disabled.

animals has no force today in the gardens and fields. They should have been exterminated long ago. Through the careful selection of plants that happen to be thornless, stocks are obtained for a new race of thornless plants. Others are noted for the few thorns that grow on them, and by judicious selection of seeds and grafts from these the same work is continued. Already gardeners have cultivated raspberry and blackberry canes that are entirely thornless, and by grafting improved varieties on these the desired end will soon be reached. The wild orange trees have many more thorns on them than the budded stock, and the wild Florida lemons are thickly studded with thorns, while the grafted La France have none.-George Ethelbert Walsh in Lippincott's.

Mozart's Method.

Mozart's method of composition was such as could only have been pursued by a child of genius. He would rise early, eat a hearty breakfast and then stroll for several hours in a forest near his home, where, inspired by nature's beauties, heavenly melodies came trooping through his brain Repairing to his cottage, he would summon his wife, a very witty woman, and bid her tell him stories. He would then mount his high stool and proceed to commit these inspirations to paper, his wife telling him jokes and funny stories while he wrote. These he enjoyed immensely, frequently interrupting her with hearty bursts of laughter and sometimes even falling from the stool and rolling on the floor. But amid all this hilarity and uproar the flow of music which was to move the work went steadily on His productions were wrought without the least thought or study, but came almost unbidden "direct from heaven." Like Shakespeare, he was purely the creature of inspiration, a genius of the highest order. -C. C. Hieatt in Housekeeper.

The Cooking of Game Birds.

Most game birds and animals, because of a life of ceaseless activity, do not take on fat, and such should be larded or cooked with slices of bacon or salt pork placed on them. Do not serve birds with heads on and undrawn, as is quite generally practiced, the latter point being a relic of savagery, the former an offense to sensitive nerves. It is pleasanter to enjoy a bit of choice flesh without being so forcibly reminded that we are eating dead birds. This is not the only instance where realism is inartistic. -- Woman's Home Companion.

newspapers, but that's the kind that would live and pay forever," said my new commercial journalist .-- J. Lincoln Steffens in Scribner's.

A Bee Was Kept.

A girl from town is staying with some country cousins who live at a farm. On the night of her arrival she finds, to her mortification, that she is ignorant of all sorts of things connected with farm life which to her country cousins are matters of everyday knowledge. She fancies they seem amused at her ignorance.

At breakfast the following morning she sees on the table a dish of fine honey, whereupon she thinks she has found an opportunity of retrieving her humiliating experience of the night before and of showing her country cousins that she knows something of country life after all. So, looking at the dish of honey, she says carelessly: "Ah, I see you keep a bee."-Pearson's Weekly.

Doesn't Know It All.

Striking Effect of Climate.

Occasionally an eloquent testimonial to the virtues of a "health resort" fails sent out by the hotel keepers or others interested in the prosperity of the place. A railway president who had gone to one of the summer resorts of the northwest to spend a few weeks was sitting on the veranda of a hotel enjoying the lake scenery and his cigar when he was accosted by a resident "boomer" with the remark:

"You'll find the air here full of ozone, sir. You'll sleep like a log. Before you have been here a week you will gain ten pounds or I miss my guess, and I'm generally right."

"I don't doubt it," replied the railway magnate. "I gained eight pounds the very first day.'

"That beats the record," said the 'boomer,' slightly dazed, but recovering himself promptly, "though I've known instances almost equal to it." "Yes," rejoined the other, "eight pounds. I weighed myself on a nickel in the slot machine at the railway station when I landed here, and the indicator pointed to 157. An hour later I stepped on the same kind of machine at the hotel, and the figure was 165 Gain of eight pounds in 60 minutes, sir, and I hadn't eaten a bite. Hadn't done anything but breathe this wonder ful air. Never saw anything like it. Marvelous climate, sir-simply marvel ous. And all it cost me was 10 cents. -Youth's Companion.

Early American Bishops.

Before the war for American independence the American Episcopalians. who were connected with the English church, were never suffered to have a bishop among them, but remained under the jurisdiction of the bishop of London. The rite of confirmation was unknown, and every candidate for ordination was obliged to travel to England. Out of 52 candidates who came from America for ordination in 1767 10 died on the voyage. At length, after the United States had been declared independent, Dr. Seabury was ordained bishop of Connecticut by the primus and bishops of Scotland, the prelates of the English church having refused to consecrate him.-London News.

In some parts of South Africa much damage is done by baboons, which go

the desire to see the you to remain in England, there are parts where you can ride on your wheel with great satisfaction and at great expense. Nothing could be more beautiful than the midlands, lovelier than the counties that surround London, but westward go no farther than Bristol or Truro, northward than Chester, avoiding Manchester-that is, unless you

mean to go still farther north into Scotland, which at times will repay your enterprise. The southwest is largely to be avoided. Cornwall and Devon have the worst roads in civilized Europe-in fact, the roads and inns explain that the country is not and never has been tivilized. In the inns you are often treated as an intruder, and sometimes cheated in a fashion that would bring a blush to the cheek of a Swiss landlord. for the emptiness of the larder the bill makes up in lavishness. There is hardly anything to eat save cream, but for that and salt bacon and ancient eggs you are asked to pay as much as for a good dinner at the Cafe Royal. The inn-

keepers are mainly boors. As for the roads, they go straight to the top of all the hills, as uncompromisingly as the roads of Bohemia, then drop down the other side and are unridable in both directions. When not climbing precipitately, they lie buried at the bottom of a ditch. They-are chadeless and uninteresting, rarely approaching the seaccast or passing near anything that is worth looking at, and yet we know Englishmen who are profoundly impressed with the belief that they are the best in England, and there fore in the world. The roads, inns and innkeepers of Scotland are in every way better, but the fact that the average Britch spends his holiday on the conti nent when he can proves not only that he wants to get there, but also that he is driven from his own country by the shortsightedness of the people who keep its inns and look after its roads. - Mr and Mrs. Pennell in Fortnightly Review

GROWS RICH BY LOAFING.

He Gave Nature a Chance, and She Doe the Producing.

If any one doubts seriously that nature does not oftentimes encourage laziness in her children, he should make a little journey into the oilfields of Bradford, Pa. There is a man down there whom nature in her most gracious mood simply has compelled to be lazy. All he does day in and day out the year round is to sit upon the bank of one of her little creeks and watch nature slave for him. If he were to raise his finger, he might undo all the skillful plotting that has been done by her in his behalf. Long ago this favored child-he's an

Irishman by birth and his name is Michael Grath-discovered the folly of toiling for his living. Before the disrovery he owned a little tract of land that was as sterile and barren as a strip of the Jersey coast. He tilled and plowed until he was wrinkled and bent, and all he got was barely enough to keep body and soul together. But one day he found that that barren little strip of land was oozing with oil. He said nothing about it, but he redoubled his efforts, and after awhile he had enough money saved to put down a well. He struck oil the day the riggers threatened to quit unless they received their pay. The well was not a gusher. It was

what is known in the oil regions as a "small producer" and yielded on an average 12 barrels a day.

While Grath was looking about for some method to pipe his oil the rains came and swelled the tiny creek which passed through his farm until its course was changed and it flowed by his well. That was all the Irishman needed. At practically no expense beyond the cost of cutting a little timber from his land he rigged up a water wheel, and soon nature was merrily pumping her treasares into a neighboring tank owned by one of the big pipe lines, and Grath was charging her work up to the company at so much a barrel.

When she had slaved long enough for Grath to save some money, he put down another well, which, like the first, proved to be a small producer. The supply from this well was pumped by the same wheel into the same neighboring tank, and the only increase in the Irishman's labor was to charge double the sum for the work nature was doing. It matters little to him what the

price of oil may be. The cost of production worries him not at all. Even with it down to 50 cents a barrel he is sure of an income of \$12 per day, and that is enough to meet all his needs. When there is dollar oil, the Irishman waxes rich fast, and his slave does the work for him at the same rates. For years he Calif. has watched her, and never once has she gone on strike or asked for shorter hours. -- New York Press.

Mrs. Lincoln's Grave.

FIGHTS AMONG TARS.

SAILORS OF THE NAVY EVER READY WITH THEIR FISTS.

The Unavoidable Causes of Friction-Simple Things Start the Quarrels, and Then They Must Be Settled-Bruised Combatants "Fell Down a Ladder."

The regulation against fighting is perhaps the deadest of all naval regulations. It is impossible of enforcement. If it were enforced to the letter, pretty keepers smile, thanks to baking pownearly all hands among the men for- der. Soda, an alkali very injurious to ward would be in the "brig" from one the stomach, should never be used withyear's end to the other. Fighting is out an acid to render it a neutral salt, practically a necessary evil among men as cream of tartar, muriatic acid or

blink at it. They know the bad, con. or alkaline. taminating results of bitterness between a pair of bluejackets under the forecastle. They have learned that it is better cream of tartar in their proper proporthe thing should be fought out and done with than that dozens of men should be drawn into a quarrel that festers and grows unless the head of it is broken by a decisive battle between the two men who have been snarling at each other. People who have made ocean voyages often dwell upon the weariness which has overcome them at the sight of their fellow voyagers' countenances toward the end of a passage. This is a feeling which is aggravated a thousandfold amid the uncomfortable surroundings of a war vessel's forecastle, the hundreds of occupants of which are obliged to be constantly together for from one to three years. Each man becomes thoroughly aware of all his mates' little characteristics, and after awhile, whether these characteristics are good or bad, they jar upon him, if only on account of their monotony. Thus friction is generated, and it is for this reason that the crew of a man-of-war just returned to the United States after a three years' cruise in foreign waters is generally such a sour looking lot, even as concerns the officers aft, who become quite as sick of each other as do the men forward.

Hardly a day passes that there is not at least one scrap on board most menof-war, with the promise of a heavier battle to follow. A bluejacket seats himself on another's ditty box, and, on being roughly ordered by the box's owner to vacate, he refuses and consigns the owner to a much less moist place than Davy Jones' locker. The men come together, two or three blows are exchanged, and then, as by common consent, each man draws away, both feeling that the "jimmy legs" (i. e., the master at arms) is not far distant and neither caring for a trick in the 'brig." Having thus become involved in the minor fistic argument of the deck, the two bluejackets are looked to by the entire ship's company to bring their affair to a satisfactory conclusion. The mere exchange of growls between the two men doesn't go. "Pipe down there, ye men-of-war chaws, and settle the thing right," is the general remark hurled at them by all bands when they meet in mere contests of cuss words, and the sailor who is considered to be the aggrieved man is watched carefully to see if he makes any preliminary moves toward arranging a regular fight. He almost always does.

Nearly all the regular fights between bluejackets aboard ship are pulled Record down below in one of the firerooms or in an empty bunker. The empty bunker Near the little town of Lincoln City, is preferred on account of its greater Spencer county, Ind., is the grave of isolation. When a fight is to come off between two bluejackets below, all hands know all about it, often including the master at arms himself, but came a state They had not been long very few of the men, unless they are intimates of the combatants, expect invitations to the fray. There is not room in a bunker for more than half a dozen friends of each man, and even with this ument to be erected over the grave of number the space is rather contracted. Mrs. Lincoln. On the monument is this With a second each and a referee agreed upon by both, the men, stripped naked to the waist, go at it. The fights are not of the rough and tumble order. The men fight according to regular prize ring rules, and their shipmates purchased and the land plotted into are present to see that the rules are complied with. As many as 50 rounds are sometimes fought. Ordinarily one of the men goes under by the time the tenth round is called. If the men are unequally matched and one of them is getting palpably the worst of it, all hands in the bunker agree that the thing should stop, and it does stop. If the contestants are about of a sort, the fight is carried on to the end, until a knockout blow is planted by one of them or both are too weak to go on. At the conclusion of the fight the onlookers quietly depart from the bunker and ascend to the deck by different engine room ladders, so as not to attract the attention of the officer of the deck. Both men generally get pretty thoroughly mauled and bruised up in these bunker fights, and when the battle is over they jump into their uniforms and repair to the sick bay to get themselves patched up with arnica, court plaster, etc. The surgeon knows at a glance what ails them, but for the sake of form he asks them what the trouble is. They have both fallen down a ladder. Both at the same time? No, sir; they fell down different ladders. "That's curious!" murmurs the surgeon, with a smile and a faraway look in his eyes, scribbling an account of their injuries in his record, and then he orders the apothecary to dress their wounds.-Washington Star.

BAKING POWDER SECRETS.

of the Things Which Every Good Housekeeper Should Know.

"Our grandmothers did without baking powder and were not sensible of any difficulty in preparing quick dough," writes Ella Morris Kretschmar in The Woman's Home Companion. "But one wonders if results were not oftentimes crude because of the nice care necessary in using soda. In fact, there are certain legends respecting greenish yellow or spotted biscuit at who wear their country's uniform for sour milk, and the proportion must be a livelihood. Officers of experience exact or the mixture will be either acid

> "Pure baking powders are simply a mixture of bicarbonate of soda and tions, with perhaps twice their combined weight of rice flour, cornstarch or plain flour to insure their keeping If really pure, they cannot be called injurious, the danger lying in the use of powders having impure ingredients, of which quantities are doubtless sold daily. So sensible have housekeepers become of these adulterations that many are going back to the use of soda and cream of tartar, the use of which, as indicated, requires both intelligence and care. If one is dependent upon the average cook a standard baking powder is the safest reliance.

"In the making of quick doughs (by use either of baking powder or soda and cream of tartar) there are two points not given in any cookbook, so far as the writer knows, which add greatly to perfection in results. To make such dough proceed as follows:

"Into one quart of flour (measured before sifting) put a level teaspoonful of salt and 2 heaping teaspoonfuls of baking powder, or a level teaspoonful of soda and 2 rounding ones of cream of tartar, mix thoroughly with the hands and then sift twice. Next add a heaping tablespoonful of butter or butter and lard mixed, rub up lightly with the hands and again pu through the sieve, pressing the last heavier part through with the fingers or hand. Now toss the mixture lightly about as when first putting in the baking powder, and it will be found that the shortening is distributed with perfect evenness through the flour. Have ready a scant pint of sweet milk in a mixing bowl and into this put half of the flour. Beat hard for a few minutes, when the mixture will be as smooth as satin. Add rapidly the rest of the flour, roll out quickly, cut (if for biscuit) and bake at once in a rather hot oven.

Some flours require more wetting than others, but the rule for guidance is 'a dough as soft as can be handled." A little flour more or less will not spoil the general result if other directions are carefully followed."

CONSUMPTIVES' HEADS.

A Medical Man Says That as a Rule They Are Flat Sided.

Consumptives have flat sided heads. This interesting discovery has been made by Dr. Mark I. Knapp of New York. His paper on the subject, read before the New York County Medical association, is printed in The Medical

Heirs Afraid of a Bomb. By way of illustrating the nervous-

ness which the recent explosions have revived here, a queer adventure which has just befallen the heirs of a house owner may be mentioned. They had met at the dwelling of their departed uncle for the purpose of drawing up an inventory of his effects in company with a lawyer and had nearly completed their task when one of them pulled out of a cupboard a metal box, which was laid on the table and which the man of business was about to open, when one of his nieces cried out in horror: "Don't touch it! Look, that is a fuse." Sure enough, there was a little something popping out of the cover. "It is a exclaimed the panic stricken bomb!" heirs in chorus, and then they proceeded to remark that their deceased relative had been a moody, silent and reserved sort of individual, and thence they inferred that he might possibly have been an anarchist. Two of the nephews had had put on their hats and were on the point of rushing off to the office of the nearest police commissary, when the lawyer, who had been quietly inspecting the box, calmly suggested that it might simply contain some preserved fruit. This theory somewhat reassured the men, but the ladies would have their way. The commissary was sent for, and the mysterious box was soon on its way to the municipal laboratory. It was found to contain a pineapple, the stalk of which had been mis taken for a fuse. So the good old uncle who had been so ungratefully maligner had not been an anarchist after all.

THE BLUES.

When a cheerful, brave, light-hearted woman is suddenly plunged into that perfection of misery, the BLUES, it is . sad picture.

It is usually this way:-

She has been feeling "out of sorts" for some time; head has ached, and

back also; has slept poorly, been quite nervous, and nearly fainted once or twice; head dizzy, and heart has beat very fast; then that bear- !

ing-down feeling. Her doctor says, "cheer up, you have dyspepsia; you'll be all right soon."

But she doesn't get "all right." She grows worse day by day, till all at once she realizes that a distressing female complaint is established.

Her doctor has made a mistake.

She has lost faith in him; hope vanishes; then comes the brooding, morbid, melancholy, everlasting BLUES.

Lydia E. Pinkham's Vegetable Compound instantly asserts its curative powers in all those peculiar ailments of women, and the story recited above is the true experience of hundreds of women, whose letters of gratitude are to be found on file in Mrs. Pinkham's library. Try and see for yourself.

AN OPEN LETTER To MOTHERS.

 $\$2000^{00}$

Schilling's Best baking powder and tea are because they are money-back.

What is the missing word?-not SAFE, although Schilling's Best baking powder and tea ere safe.

Get Schilling's Best baking powder or tea at your grocers'; take out the ticket (brown ticket in every package of baking powder; yellow ticket in the tes); send a ticket with each word to address below before December 31st.

Until October 15th two words allowed for every ticket; after that only one word for every ticket.

If only one person finds the word, that person gets \$2000.00; if several find k, \$2000.00 will be equally divided among them.

Every one sending a brown or yellow ticket will receive a set of cardboard grouping babies at the end of the contest. Those sending three or more in one nvelope will receive an 1898 pocket calendar-no advertising on it. These morphing babies and pocket calendars will be different from the ones offered in the inst contest.

Better cut these rules out.

Adden: MONEY-BACK, SAN FRANCISCO.

Long Wait.

"Grandpa, how old are you?" "I am 87 years old, my dear." "Then you were born 80 years before I was. What a long time you had alone waiting for me!"-Philadelphia Times.

That army chaplaincies continue to be very alluring to the clerical mind is indicated by the fact that nearly 300 ministers applied to the federal government for appointment to a single vacancy that recently occurred.

One of the conclusions of Dr. Knapp is that tuberculosis can neither be infections nor communicable. This is the opinion held by Dr. Shrady, editor of The Medical Record, and is the opinion not held by Dr. Wilson and his associates of the New York city board of health

However this deduction is regarded by medical men generally, Dr. Knapp does not intend to be understood as saying that the fact that a man has a flat sided head (called medically a planoparietal head) either already has or that he of necessity is doomed to have tuberculosis. That this assumption would be absurd Dr. Knapp shows by saying that centenarians and athletes are recruited from the ranks of the plano-parietals. Nor does he wish to be understood as meaning that tuberculosis modifies the contour of a head which previously had been of a different shape. Dr. Knapp says his statements are substantiated by a few hundred cases, of which 477 were collected from four New York hospitals. In all these cases only four exceptions to the rule were found.

The most important conclusion reached by Dr. Knapp is that the foundation of tuberculosis is laid in early life, and therefore the way to save the adult is to guard the child.

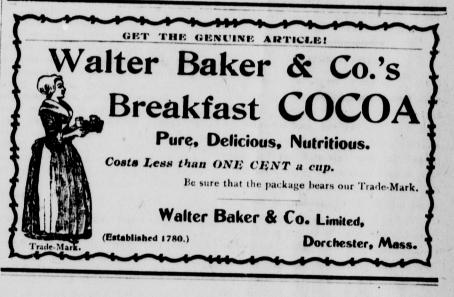

A Noble Work.

The Woman's Relief corps, in national convention at Buffalo, has accomplished a noble work. According to the report made by the national president, Mrs: Agnes Hitt of Indianapolis, "it has endowed and supports a national relief corps home for the wives and mothers of soldiers and dependent army nurses; it has led in the founding of homes in Michigan, Iowa, Wisconsin, California, Illinois, Indiana and Missouri; it founded and supports the memorial home in Pennsylvania; it secured legislation for the founding of a home in New York; it secured the legislation that provides government aid to the destitute army nurses; it established industrial. training for girls at the Ohio Orphan's home; it has built memorial halls and monuments, and it secured a united movement for patriotic teaching and a flag on every schoolhouse.

An Eccentric Author.

.

Those familiar with Paul de Kocs could guess the nature of the novelist' work by a glance at his dress. When writing a comparatively serious chapter, he always wore a frock coat of military cut and ornamented with frogs If engaged on lighter work, his costume consisted of a blue fannel dressing gown and an elaborately embroidered smoking cap

SATURDAY, NOVEMBER 20, 1897.

If Colonel Bonaparte goes to the Senate, how is he going to get along with his Maryland colleague, Mr. Wellington?-S. F. Chronicle.

How ? Why! easy enough. Follow the precedent set by those distinguished old Romans, Edmunds of Vermont, and Thurman of Ohio, retire to the cloak room and settle it over a little old Bourbon.

A recent statement of the Treasury of the silver money in the world is full legal tender. The total stock of silver money in the world, according to this statement, is now \$4,235,-900.000, of which \$3,611,700,000 is this little industrial town of ours. full legal tender.-Petaluma Argus.

Then it is not true that silver has been demonstized and one-half the money of the world destroyed

The political prophets are predicting the election of Charles J. Bonaparte as United States Senator from Maryland. Should theprediction prove true, there would be nothing terrible about it, as a Bonaparte is better than a Bourbon at anytime or in any place.

Besides, this Bonaparte is a genuine black Republican and one of the Blue Hen's own chickens.

GOV. BUDD NAMES THURSDAY, NOV. 25, AS THE OCCASION FOR PUBLIC THANKSGIVING.

Executive Department,

Sacramento, California, Nov. 16th. THANKSGIVING PROCLAMATION Thursday, November 25th A. D. is hereby appointed a day of public thanksgiving. On said day let the people of this State give thanks to the Almighty God for the manifest blessings enjoyed by us during the past year; and in recognition of said blessings let us mingle with our thanks such aims as our hearts may dictate and our purses allow. In witness whereof I have hereunto

set my hand and caused the great seal of the State to be hereunto affixed this 16th day of November, A. D. 1897. JAMES H. BUDD, Governor.

By the Governor: L. H. Brown,

THE ENTERPRISE. county vagrants at work on the rock SIR EDWIN ARNOLD'S ROMANCE. pile, but so far as we have been able to learn, the ordinance has remained a dead letter.

> We suggest in this connection that it would be well to resurrect this wholesome law and give it a good, fair, square trial.

> > AN EVENING SCHOOL.

The evening school has become one of the fixed and permanent institutions to be found in nearly every industrial community throughout our land.

It provides the means for gaining an education to these whose time during the hours of the day is occupied with mannal labor.

We understand an effort will be made to form a class for a night school at this place, and can see no reason why the effort should fail. Out of some two hundred young men employed here, there are surely enough to form such a class. To achieve the highest success the head must be trained as well as the hands. Knowledge is power, and no one can gain the

top of the ladder without it. Many of the most successful men of

the present day are graduates of the night school, and some of these have Department shows that 85 per cent not even had the advantage of a teacher. We should like very much to see a night school and free readingrcom established and maintained in

We are sure the benefit to our young workingmen from such institutions would be incalculable. We trust the effort to form the first class for a night school will meet with success.

HOW TO ESCAPE COLDS.

Not by Coddling, but by Becoming Able

to Endure Necessary Exposure. It is not always sufficient to point at his shrine. He learned the Japanese out a danger. It is often of even greater language in six months. It was said at importance to show how the danger this time that he was to be married in themselves, but if they did but know it and customs. they are really doing all they can to make themselves susceptible to colds by weakening their resisting powers.

A German professor once wrote a long treatise, with a learned title, on how to avoid catching cold. After tracing the history of colds from the earliest ages, studying their causes and symptoms and cataloguing the remedies which have been used by the most eminent physicians of all times he concluded with a short chapter on prevention. His plan was to inure the back of the neck to drafts by having some one direct a current of air upon it from a to think we must pin our faith on the bellows three times a day.

clumsy and he was a long time in reach- tirst of a series of "Peaceful Valley" ing it. The best and only way to escape papers which picture life in an ideal colds is to meet the causes that produce rural community. "But how many of them and not to run from them.

sponge bath or even a cold plunge, fol- does not refine them, her honesty does lowed by brisk rubbing with a not incite them to thoroughness, her

Married a Daughter of the Land He Loved and of Which He Wrote. The marriage of Sir Edwin Arnold, the English poet, editor and author, to a Japanese young lady, in London, while it may have occasioned considerable surprise among the staid old Englanders as a whole, did not cause much surprise among his more intimate friends, who predicted that the visits of Sir Edwin to the land of the Mikado would result in his bringing home a Japanese bride. The poet and his wife will make their residence in London. This is Sir Edwin Arnold's third matrimonial venture, and at least one more of them was of a romantic nature. The name of Sir Edwin Arnold is closely linked with that of Japan. He is completely infatuated with the land and has visited it many times. The country seemed to lend an inspiration to his genius, and some of his most graceful songs are those in which he lingers caressingly over the women of the island empire. In 1890 he secured a house on the outskirts of Tokio, built in the ideal Japanese style, and there he lived for many months. It was here that his most famous production, "The

SIR EDWIN ARNOLD.

may be averted. Most people properly recognize a cold as avoidable and think they are greatly to be commended for the prudence they exercise in protecting the prudence they exercise in protecting the prudence they there did the there is the the the the

Sir Edwin is not over popular in England. This is due mainly to the fact that he has expressed his love for Japan and, after that, the United States. It was this so-called desertion of his own country that very probably caused his loss of the poet laureateship.

PEOPLE OF THE COUNTRY.

THANKSGIVING.

On Thursday next, in compliance with the recommendation of those having authority, out of respect for the custom of our fathers, and actuated by a lively sense of gratitude to God, the people of this fair and favored land will observe the great American holiday known as Thanksgiving Day. In these last days of autumn, as the year of 1897 is drawing near its close, surely every one can find some cause for thankfulness. Whilst other lands have been visited by famine, hunger, distress and death, the people of our land have peen blessed with an abundance and to spare.

This Golden State by the western sea, has shared in the general progress and prosperity of our common country, and here at home in this thriving little town, every man has found employment, want has been unknown, new homes have been built, new industries established, and a happy and contented that distorts or pains it. Do not over community are in the enjoyment of load it with victuals or drink or work. peace and plenty.

GIVE THE ORDINANCE A TRIAL.

We reprint in this issue an article from the Petaluma Argus entitled, "Tramps and Charity," which fills the bill fully and fits the case exactly. More than a year ago we declared in follow a violation of every law of life favor of making the county jail a and health. --Medical Reporter. county work house for the class of offenders commonly known as vagrants, tramps and hobos. We insisted then, as we insist now. that the only effective remedy for the tramp evil lies in the enforcement of the primal judgment, "In the sweat of thy face shalt thou eat bread."

We then suggested that these roaming vagabonds when apprehended might be made to earn their board and lodging while the guests of the county of the public highways. An ordinance of Supervisors, as we understand the matter, directing the Sheirff to put

no matter what the outdoor temperature may be. Always have fresh air in the bedroom. There is nothing poisonous in "night air," popular belief to the contrary notwithstanding. In a word, don't be always afraid of

catching cold, don't coddle, but meet cold and wet and changes of temperature like a man, or rather like a horse. and you will then run a better chance of being as strong as a horse.

Of course you must strengthen your armor where it is weak, but if you recognize in yourself a weak place, a "cold spot," don't cover it up with more clothes, but toughen it and toughen your entire body until it is one homogeneous resistant whole.

Take Care of Yourself.

Think deliberately of the house you live in—your body. Make up your mind firmly not to abuse it. Eat nothing that will hurt it. Wear nothing Give yourself regular and abundant sleep. Keep your body warmly clad. Do not take cold; guard yourself against it. If you feel the first symptoms, give yourself heroic treatment. Get into a fine glow of heat by exercise. This is the only body you will have in this world. Study deeply and diligently the structure of it, the laws that govern it, the pains and penalty that will surely

Asked Too Much.

Yes, we had to let that nursegirl go. She was recommended as being thoroughly up to date, but she seemed to us to be more than that. The first thing she did was to demand pneumatic tires for the baby carriage, and we promptly got them. However, we felt that it was time to draw the line when she insisted that we must hire a man to keep them pumped up. -- Chicago Post.

Laying Bricks.

A bricklayer can lay about 1,500 or by being required to break rock eight 1,600 bricks in a day of 10 hours where hours daily for use in the improvement the joints are left rough, about 1,000 per day when both faces have to be was subsequently passed by our Board worked fair and not more than 500 a with picked bricks of a uniform color. -Exchange.

'scratchy'' towel, every morning. Let free-handedness does not inspire them the clothing be adapted to the season, to generosity-they become narrow and though always as light as possible, but sordid in the midst of grandeur and keep the neck uncovered-no turned up liberality. They imagine there can be coat collar, no muffler, no boa. Never nothing in life but work or play, toll, let the temperature in the house rise or rest, and they feel a contempt for above 70 degrees in the winter. Air those who play and rest. They have every room systematically every day, never learned to mingle work and play, toil and rest in due proportion, and they cease to find any pleasure in life unless they abandon work altogether, Like the tired woman who wrote her own epitaph, they fancy heaven a place where they can 'do nothing forever and ever.

"This view of life makes loafers in the village as it makes them in the When a different spirit has cities. found room to grow, a new order of living prevails. Life becomes some-thing more than a slow girding of the mill, more than a burden, to be endured only because it cannot be at will laid down; it becomes a luxury as well as a necessity. Individuals combine, not for their own advantage, but to multiply benefactions, and as strength increases by its right use, the attainment of one worthy and ambitious advantage is only the suggestion and achievement of another."

Two Hours Was Enough.

That some men require only a few hours' sleep out of the twenty-four is certain, but Alexander von Humboldt must have been a marvel in this respect, as he was in others. He told Max Muller that, as a young man, two hours' sleep was all he wanted, "but as I grow older I need four. When I was your age," he said to Muller, "I simply lay down on the sofa, turned down my lamp, and after two hours' sleep I was as fresh as ever. It is a mistake to think that we want seven or eight hours of sleep." Humboldt died at the ripe old age of 81.

Too Many Pounds.

Young Wife (tenderly)-What's the matter, my dear? Don't you like pound cake?

Husband (hesitatingly)-Y-e-s, love; but 1 don't care for ten-pound cake .-New York Weekly.

New York Sunday Fishermen. It is estimated that more than 75,000 fishermen go out of New York every Sunday, and that they spend on an average of \$2 each on the sport.

Tough Luck. "We all have burdens to bear." "But some of us have a double load; I have to walk the floor with twing every night."-Judge.

the moonlight waters of the Bay, past Hunter's Point, through the shipping property of Mrs. Keneally at Menlo ing in to see how his guest was getting in the harbor, past the city water front | Park. and home again at midnight. Everybody was satisfied with the evening's entertainment, and a substantial sum vacant on December 1st. The motion nearest telephone office, he telephoned was added to the church organ fund.

A BOLD ATTEMPT AT ROBBERY AND MURDER.

On Wednesday morning, about 2 o'clock, two unknown men, one tall, the other short, thickset and bearded, Evoy. Brown moved that Mr. Potter of Colma, paid our town a visit on both wearing long coats or ulsters, made an attempt to rob the Grand

hotel, Dick Connelly in the right leg, Miss Cecelia O'Reilly, who has been and C. B. Andrews in the abdomen, 6th. visiting Mrs. W. J. Martin, returned and the escape for the time being of both robbers, with officers in close pursuit.

The Grand Hotel is a two-story building with the sleeping rooms all on the second floor. On Tuesday a side door on the ground floor was left unlocked as usual to admit lodgers who might be out late; and through county's efficient and popular District this door the robbers doubtless found an easy entrance. About 2 o'clock in the morning Mr. Patrick Ferriter, the proprietor of the house, was aroused cause of the dog's uneasiness. Hearing some one moving about, Ferriter City, paid his first visit to our little The short robber answered, "We are a couple of clam diggers and want a quart of whisky." Ferriter told the

THE SCHOOL ENTERTAINMENT.

While this school district was really entitled to but two teachers under the last school census, nevertheless, by reason of the fact that it was absolutely impossible for two teachers to do justice to the number of pupils in actual attendance, it was decided by the school trustees to employ the third teacher, even should such a course necessitate shortening the school term. In view of this state of affairs and a prospective shortage in the school fund for this district, the teachers have very graciously and generously proposed to give an entertainment to day. In 1895 the number of open achelp out the proceeds to go into the counts in the postoffice savings bank

We make this statement that every one may clearly understand that when they pay 25 cents for a ticket, which ing a rare and most pleasant evening's entertainment, they will at the same time, be helping by just so much to piece out our district school fund.

This school entertainment should be made an event in the history of our ly reached the door, the tall robber pointed a revolver at Ferriter's head open at 7 and the evening's exercises town. It will be held at Hansbrough commence at 7:30 o'clock.

LOST MINE IN ARIZONA

Rich Property, Guarded by Crumbling Breastworks.

The story of the discovery of an old, forgotten mine in an unfrequented locality in the foothills of the Pinal mountains, embellished with romantic details such as usually accompany legends of lost mines, created a lively interest about the public resorts in Globe.

L. S. Goble, R. Quarrels and H. S. McClelland, on August 17, while prospecting in the foothills eight or nine miles south of Globe and three and a half miles to the left of the toll road, discovered an old shaft, and near by on the hill above the ruins of breastworks which had evidently been erected for defense against Indians. The evidences of great age observable in the decayed shaft, almost filled with debris, and the crumbling breastworks, excited the

party's curiosity, and they stopped to investigate. The old shaft was found to have been sunk on a well-defined ledge, from which they took promising specimens of ore which tested well in copper and gold.

Owing to the unsafe condition of the old shaft, after having removed two or three feet of the debris, they abandoned it, and having made their locations, they started a new incline shaft below the old works. From the surface down they had a twelve to fourteen inch streak of sulphuret ore running from 15 to 56 per cent. in copper per ton. The incline is now down fifteen feet and the ore has widened to

three feet. A well-preserved skeleton, with a bullet hole through the skull, or bearing other evidence of foul play, is a desirable, if not an essential exhibit of ev-

ery such discovery, and as this was lacking, Mr. Goble industriously set about to supply the deficiency, although in justice to our informant, he treasure more than to make so grewsome a find, which prompted him to explore a mound of stones lodged in a crevice in the rocks near the breastworks. After removing about three feet of rock and leaves Goble struck his "Amounts standing to the credit of pick into what proved to be the eyesocket of a human skull, which caused him to momentarily shrink with horror, but summoning up courage he proceeded with the work, and soon uncovered a complete skeleton of a man. Near the right hand lay a dagger eaten with rust, a large chunk of quartz seamed with coarse gold, and a handsome specimen of onyx. What was the fate of the human being whose bones had been thus rudely disturbed? Had he been murdered by the implacable foe of the white man, the blood-thirsty Apache, or had he peacefully laid down life's burden and been tenderly committed to the grave by friendly hands? There is none to answer, and the mystery must remain unsolved.-Globe, A.

The shorter of the two robbers, who was apprehended, was arrested on Wednesday morning, at about 5 o'clock, near the Seven Mile House, between Ocean View and Colma. He is an ex-convict and gives the name of Raymond.

There will be the usual annual turkey shoot and raffle at the San Bruno House, at San Bruno, on tomorrow (Sunday) and a chance to secure a fat will commence at 10 a. m. and are free to all.

The school children and teachers' entertainment this evening, at Hansbrongh Hall, is one in which every town and school district should take jail by Officer Desirello. an especial pride and interest by attending themselves and inducing as many others to go as possible.

Supervisor Tilton is putting the finishing touches on San Bruno road adjourned meeting on Monday. for this season; putting in small culverts and side ditches, etc., to drain the road. After a drive over the road from this place to Blanken's Six Mile House, on Monday, we are free to say the road is in fine condition, better than we have ever seen it at any time within the past five years.

On Monday a gentleman named W. P. Merriam, who was a visitor here. while passing through the various departments and seeing the works at the Western Meat Company's packinghouse, stepped into an open elevator shaft. No bones were broken, but Mr. Merriam sustained numerous bruises and injuries serious enough to require the services of Dr. Holcomb.

It has been decided, we are reliably informed, to organize or reorganize the athletic club. A meeting place has been selected next to McNabb's barber-shop, where those who desire to do so, whether members of the old club or not, can enroll their names. It is also in contemplation in this connection to open a reading-room at the same place.

The moonlight excurison of last Sat-

came out of his trance and said: "Is that what you called me all the

TELLS A LONG STORY.

A Granite Monument at Antietam Re calls a Family History.

Major Kingsbury had a daughter as well as the son who fell at Antietam. The daughter married Simon Bolivar Buckner of Kentucky some time before the war. When General Buckner decided to go with the Confederacy, the danger of confiscation of his wife's interest in the Chicago estate confronted him. A family council resulted in the transfer of Mrs. Buckner's property to her brother. Colonel Kingsbury fell in battle without leaving a will to protect his sister's inheritance. When the war closed, the return of Mrs. Buckner's interest in her father's estate was asked for in behalf of her children. Mrs. Kingsbury declined to concede it. She claimed all that had been left in her husband's name for her son and herself. Litigation followed and dragged along for years. Major Kingsbury's 40 acres were in the heart of Chicago when the fire occurred.

In the years immediately following the war Washington had few women more talked about than the beautiful widows, Mrs. Becky Jones and Mrs. Kingsbury, the nieces of an ex-president of the United States. Mrs. Kingsbury became the wife of Gallatin Lawrence, son of one of the wealthiest manufacturers in Rhode Island Galla. Lawrence and Captain von der Hass of the Belgian legation because of the captain's attentions to the beautiful Mrs. Lawrence. The Belgian sailed for Euwent to Egypt. Mrs. Lawrence went there too. Gallatin Lawrence returned

HEROES OF BUENA VISTA.

Their Sadly Neglected Burial Ground Near Saltillo, Mexico.

The hardy young Americans who left their comfortable homes in the United States more than half a century ago and came to Mexico with General Taylor to fight against the people of this country probably did not think that should they fall in battle their bones would be left to crumble to dust in an unmarked spot in this distant land. But today the dead heroes of the Buena Vista battlefield lie under but a few feet of earth in a neglected place just outside this city. At the time of their hasty burial their devoted comrades evidently sought to make the spot somewhat sacred by constructing an adobe wall around it. This wall is fast succumbing to the ravages of time, and in places it is completely gone. I visited the burial ground of the dead heroes today. A tram car took me as far as the pretty San Francisco plaza, and from there I walked through a dirty, narrow street until I came to an arroyo, on the other side of which the faint marks indicating the cemetery may be seen. Had I not received careful directions I should have passed the place unnoticed. On the side toward the

city the wall is entirely gone for the most part, and a much traveled wagon road passes through the place and over the sacred dead. The place which had once been inclosed by the adobe wall embraces probably two acres, but investigation shows that many were buried west of the wall and up close to the arroyo.

Some time ago the report was published in the press of the United States that the bones of the buried soldiers were protruding from the ground, and that the place presented a sickening spectacle. This report was not strictly true, but it is undoubtedly a fact that parts of many of the skeletons have come to the surface. The ground is strewn with fragments of bones, and it is evident that they come from the men who were buried there. None of these bones is large, as the heavy traffic through the place has broken them up into small pieces. If any skulls came to the surface, they were no doubt quickly taken by the Mexican children who were about and made innocent playthings of. Had they ever appeared they certainly would not have remained intact on the surface long. In the arroyo, beat the time of the dance. Some other through which floods of water pass at times and wash one side of the burial transmission of mossages to neighbor. ground, there are also many pieces of ing villages. COAL AND IRON.

The Important Relationship of These Two Valuable Minerals.

Statistics show that, whereas Great Britain in 1840 produced 75 per cent of the world's supply of coal, at the present time it produces only 34 per cent. Atlantic liners no longer carry coal from Great Britain for the return journey. They now take in American coal, and no less than 1,500,000 tons of American coal were thus consumed in 1895. The condition of the iron manufacturing industries has always exercised a most important influence on the production of coal, so that a large demand for iron draws with it a large demand for mineral fuel. During the last 25 years the world's production of pig iron has increased from 12,000,000 to 26,000,000 tons, but the share taken by Great Britain has fallen from 48.8 per cent to 29 per cent, while that of the United States has increased from 14.1 per cent to 26.2 per cent, that of Germany from 11.4 per cent to 21.4 per cent, and that of Russia from 3 per cent to 4.7 per cent. Indeed, iron is now being imported from the United States into this country, and, incredible as it may seem, the railway station at Middlesbrough, the center of the iron trade, is built of iron brought from Belgium. Surely, then, the author of "Our Coal Resources at the Close of the Nineteenth Century" is hardly right in thinking that British coal and iron still hold their own. He argues that other countries of Europe are exhausting their coal supplies just as Great Britain is, yet the figures he gives show that Germany has in reserve, within a depth of 3,000 feet, 109,000,000,000 tons of coal as compared with our (England's) 81,683,000,000 tons within a depth of 4,000 feet. And this estimate does not include brown coal, of which Germany raises 25,000,000 tons annually .- Na-

CHEMICAL FIRE ENGINES.

They Have Done Much to Reduce the Loss From Water at Fires.

Mr. Charles T. Hill writes of "The Fire Patrol" in St. Nicholas, the final paper in his series on the New York fire department Mr. Hill says:

The "chemical engine," used considerably in the fire departments of several cities, has aided materially in lowering the loss by water at small fires. The preparation carried in the tanks of these engines has a double advantage-not only does it extinguish a large body of fire with the use of a small amount of water, but the liquid itself evaporates quickly, leaving very little "drip" in the apartments or floors underneath the fire.

The tanks of these engines are charged with a solution of bicarbonate of soda (baking soda) and water, with a small cylinder of sulphuric acid suspended at the top When the tank is inverted, this acid is emptied into the soda and water, and the mixture at once generates carbonic acid gas at a great pressure. Charging the liquid with this gas gives it the necessary pressure to drive it a considerable distance. The hose is coiled around a reel on top of the engine, and always connected with the tanks, so when the firemen arrive at a fire all they have to do is to run off as much hose as they need, dash up stairs with the line, give the order to "dump" one of the tanks (there are

oyster off the fire with the tongs and crowd of persons, all anxiously looking began on that.

'Darned if I could see how a man that enjoyed eating as much as he did could ever bother about anything, but he did, all the same, that was plain, or he wouldn't have been there.

"'I don't suppose,' he says, 'that you ever suffer from insomnia, and if you did it wouldn't make any difference, because you want to be wide awake nights in your business, eh?' And he seemed to think this was a pretty slick little sort of a joke. Then I told him how I came to go into the business; that when I was a young man I had been a great sufferer from insomnia myself; that in those days there were not nearly so many night occupations to choose from as now, and that my choice was limited; that I had not followed burglary from inclination, but that I et, from which he quickly produced a was compelled to do something for a living, and burglary was the only night to sell these almanacs. They are the how I came to take it up as a business.

"'You don't mean it,' he says. 'Put on the blower and start up the fire a these handsome little volumes ought little. If I'd ha' known you were coming I'd had another basket.'

Well, we finished 'em up, and I says' to him: 'What do you think; think object to buy the lot.' you can sleep now?' And he said he thought he could. And he let me out the front door and went to bed, I sup pose. I know I went home myself feel ing comfortable. I hadn't made a cent, but it's a good thing to take a rest now and then, and I always did like roast oysters. "-New York Sun.

The Spanish Main.

The Spanish main is the circular bank of islands forming the northern and eastern boundaries of the Caribbean sea, beginning at Mosquito and including Jamaica, Santo Domingo, the Leeward islands and the Windward islands, with the coast of Venezuela, in South America. The word "main" has no affinity with the English word as in mainland, but comes from the Spanish word manea, shackles, given in reference to the imaginary resemblance of the broken chain of islands to that (in early days) familiar article.-Boston Transcript.

ALL THE OX UTILIZED.

Every Particle Put to Use-Only Its Dying Breath Lost.

In an article on the "Wonders of the World's Waste," William George Jordan, in The Ladies' Home Journal, details how science at the present day utilizes the ox. "Not many years ago," he says, "when an ox was slaughtered 40 per cent of the animal was wasted. At the present time 'nothing is lost but its dying breath.' As but one-third of the weight of the animal consists of products that can be eaten, the question of utilizing the waste is a serious one. The blood is used in refining sugar and in sizing paper or manufactured into doorknobs and buttons. The hide goes to the tanner; horns and hoofs are trans-Lore. formed into combs and buttons; thigh bones, worth \$80 per ton, are cut into handles for clothesbrushes; fore leg bones sell for \$30 per ton for collar buttons, parasol handles and jewelry; the water in which bones are boiled is reduced to glue; the dust from sawing the bones is food for cattle and poultry; the smallest bones are made into boneblack. Each foot yields a quarter of a pint of neatsfoot oil; the tail goes to the 'soup," while the brush of hair at the end of the tail is sold to the mattress maker. The choicer parts of the fat make the basis of butterine; the intestines are used for sausage casings or bought by gold beaters. The undigested food in the stomach, which formerly cost the packers of Chicago \$30,000 a year to remove and destroy, is now made into paper. These are but a few of the products of abattoirs. All scraps unfit for any other use find welcome in the glue pot, or they do missionary work for farmers by acting as fertilizers. "

Made Bread of Bones.

According to Herault, during the siege of Paris by Henry IV a famine raged and bread sold at a crown a pound. When this was consumed, the people, maddened with hunger, exhumed the dried bones from the charael house of the Holy Innocents and

Sheridan In Battle.

General Horace Porter, in his "Campaigning With Grant" in The Century, says of Sheridan at Appomattox: No one could look at Sheridan at such a moment without a sentiment of undisguised admiration. In this campaign, as in others, he had shown himself possessed of military traits of the highest order. Bold in conception, self reliant, demonstrating by his acts that "much danger makes great hearts most resolute," fertile in resources, combining the restlessness of a Hotspur with the patience of a Fabius, it is no wonder that he should have been looked upon as the wizard of the battlefield. Generous of his life, gifted with the ingenuity of a Hannibal, the dash of a Murat, the courage of a Ney, the magnetism of his presence roused his troops to deeds of individual heroism, and his unconquerable columns rushed to victory with all the confidence of Cæsar's Tenth legion. Wherever blows fell thickest of the defense opposing ranks went down before the fierceness of his onsets, never to rise again, and he would not pause till the folds of his banner waved above the strongholds he had wrested from the foe. Brave Sheridan! I can almost see him now, his silent clay again quickened into life; once more riding Rienzi through a fire of hell, leaping opposing earthworks at a single bound, and leaving nothing of those who barred his way except the fragments scattered in his path. As long as manly courage is talked of or heroic deeds are honored the hearts of a grateful people will beat responsive to the mention of the talismanic name of Sheridan.

There is a species of pine tree which grows in California and is known as the giant pine which is the largest of the pine genus, often rising to a height of 200 feet, with a trunk 20 to 30 feet in girth.

A NEW YORK MAN WHO MAKES HIS LIVING AT THIS CALLING.

Whims of Some of His Patrons Whose Timepieces He Looks After-Mystery of the Clock That Would Not Go on Friday. Twenty Clocks In One House.

Clock winding seems a simple enough task to be performed by owners for ists in the centers calls for a vast their respective timepieces, but there are amount of experience. That experience many people who find it sufficiently burdensome to make them delegate it to some one else. Hence has arisen the profession of clock winder, which as yet claims probably fewer members than any other calling in the city. For ing a long apprenticeship in some city some years jewelers have attended to the repairing of clocks which they sold cities are today poor places in which to and have even looked after the winding where this was especially desired, but they never tried to obtain this kind of business, and it was done merely as an accommodation to their customers. Now sists the young man. It is, but a more there is at least one man in New Yorkthere may be more, though not many -whose only occupation is the winding, regulating and occasional cleaning of clocks for numerous families. He makes daily rounds so as to cover his entire route, but he never visits the out, the risks are not so great, the experience is not apt to be so costly same house oftener than once a week. On that day his coming is expected, and he has free access to all the rooms, business must expect to measure his whether they are occupied at the time height on the ground a time or two. or not. Through the various halls and But it is not necessary that in his first apartments he goes, from the top of the knockdown he should be knocked out. bouse to the bottom, winding the clocks and giving a touch here and there to a regulator where he finds it necessary Of course he does not pay any attention away from the large cities does not to the little nickel alarm clocks, which run for only one day. His care, being

given weekly, is spent upon the eight increasing, despite the reiterated asserday clocks of more expensive design and workmanship. The clock winder whom The Tribune

reporter saw had several stories to tell er prices of lots, or lack of building about the pursuit of his occupation. "Some people are very particular about the striking of their clocks," he said. "They will ask me if I can't arrange to have all the timepieces in the house from the centers. And this means fewer strike together Now, as a general thing that is an impossibility, and I'll tell you why Some clocks are arranged to strike just half a minute before the hour, some for a quarter of a minute Strange as the change of current may before, some for a few seconds after the hour and so on. You see if I fixed them so that they would strike together they would not be exactly together in point of actual time, which is more important. In one house on my list the family owns 20 clocks. Of these I suppose 5 or 6perhaps more-strike in unison, and the others all within a minute. My orders in this house are to have all the clocks except one at precisely the correct time. This odd one is the timepiece

in the bedroom of the mistress of the house, and she wishes it kept three minutes fast. I think that is the only instance among my customers of any body who wants a clock perpetually fish, the carp are especially long lived. fast, and 1 am very certain there is no one who asks me to keep one slow.

When 1 undertake the care of the clocks in-a house, nobody else is allowed to touch them, and the servants in particular have orders never to move or interfere with them in any way. Sometimes this is done accidentally, and it to 150 years and even longer. We have is hard to find out how the clock has been injured. A few months ago I lost whale's age. THE COLOR ESCORT.

Wheat is unchanged; market contin- ONE OF THE MOST IMPRESSIVE OF ALL MILITARY OBSERVANCES.

> Ceremony In Honor of the Stars and Stripes That Touches the Patriotic Chord. The Respect For the Flag Which Is Shown by Men, Women and Children.

There is nothing that more conduces to make a good, true and loyal soldier than to inculcate in him love and respect for the flag he has sworn to upend, there are certain ceremonies in the army that are intended to impress the wearers of the uniform with the dignity of the flag. One of these ceremonies is called the "escort to the color," and it is the finest and most impressive of all military observances. Every regiment carries two flags-one national, the other the regimental, which carries the number and name of the regiment. quarters of the colonel or at his office, after the ascent has begun. where they are zealously cared for. It is when the regiment parades, and these flags are to be brought to the troops, that the escort to the color is carried

When the regiment has formed line on the parade, the colonel details a company to bring the colors and escort them to their place in the line. The company marches in column of platoons, headed by the band, which does not play as the march down the front of the line is made. The two color sergeants, old and faithful soldiers appointed to these desired places by reason of long service and military bearing, march between the two platoons. Upon arriving in front of the building where the flags are kept line is formed, the band standing on the right of the escort.

The first lieutenant, with drawn sword, followed by the two color sergeants, who are followed in turn by a sergeant armed with a rifle, enters the the color bearers appear, followed by the lieutenant and the sergeant, they halt at the entrance and form line, fac ing the escort. Arms are presented, and the field music (the trumpeters) sound a thrilling call named "To the color,' during the sound of which all stand motwo color sergeants taking places between the two platoons, and thus guard- ers how a complete turnout will look. ed, the march is taken up, the band playing a spirited air.

Around the shady main avenue of the post marches the escort, each soldier erect and appearing as if he felt that the flags were intrusted to him alone in stead of to the company of which he forms so small a part. How each man steps out to the strains of the march, probably Sousa's inspiring "Stars and have seen models made of the skin of Stripes Forever." Down past the officers' quarters, the porches of which are filled with the wives, daughters and models-quite artists in their way. sweethearts of the officers parading, goes the escort.

The respect for the flag is not confined to the wearers of the army blue, for as the escort passes each house these true and loyal women cease their

POLITENESS NOT WANTED.

In the Case of the Elevator Man It Should Be Discouraged.

In view of the fact that the various petty employees of large corporations are usually not overburdened with politeness or consideration for the public, the complaint recently made against a passenger elevator man seems remarkable. It was alleged that the man was "too polite for safety." The man who was the subject of the complaint did what hundreds of elevator men do. When the elevator gets to the ground floor, the conductor usually steps out of hold and defend. To bring about this the car to get a whiff of fresh air, to say a word to the hallman or possibly make inquiry about the ball game.

The hallman or starter shouts "Going up!" to the people coming into the hall, and the elevator man stands in front of the cage and politely asks his passengers to "step in," while he remains on the outside until the starter shouts "'L right!" Then he cuts his sentence short, steps into the cage, These flags are kept at the residential starts the elevator and slams the door

> Most persons "step in" when asked to do so, but occasionally a man with an eye to self preservation refuses to do so, and one of that class made the complaint. The man who insists on the elevator man being in the car before he will go in is usually looked upon by the man of many ups and downs as foolishly careful, but owners of buildings who are held responsible for the safety of their tenants while riding in the elevators are pleased to see them firm on that point. It may look well for a uniformed man to step aside and ask the passengers to precede him into the elevator cage, but many persons will agree with the man who made the complaint that it is a case of politeness which should be discouraged in the interest of safety.-New York Tribune.

Horse Model Makers.

"Making full sized models of horses is quite a distinct and well paid busibuilding and receives the flags. When ness, the models for the whole world almost being made in London," said the manager of a great firm of carriage builders in Long Acre.

"There is scarcely a considerable carriage builder or dealer anywhere who has not in his shop or warehouse one or more full sized models of horses (we tionless, with arms at the present. After and some other firms have respectively the sounding of the color has ended several such models always), which are arms are brought to the order, and then not only used as a mere attraction, but column of platoons is reformed, the are also, being movable, put into different sets of shafts, so as to show custom-

"Then, again, extra good models are made for exhibitions, shows and the like, and many of the best harness makers in all countries keep them in their shops for trying on purposes.

"I have given as much as 60 and 70 guineas for a good model, but of course the general run of these things costs far less, except for exhibition purposes. I a real horse, but the imitation variety is the rule. The men who make the some of them-are also the sellers, as a rule."--Pearson's Weekly.

Toymaking.

A great many toys are now made in this country, including many mechantalk and stand quietly till the flag has ical devices. Many toys are still imfor bright and 6@9c for other grades; passed, when the interesting discussion ported. Such things as woolly sheep and water-white, extracted, 41/2@43/4c; light or the latest news is resumed. Past a dogs, now as highly prized by children group of enlisted men not required to as ever, come from Germany, as do the skin covered horses. They could be made here, but they can be produced cheaper abroad. As a rule, whatever can be made by machinery is made here, while toys made by hand are mostly imported. till Old Glory has passed. I have seen The minute a thing is brought within the reach of machinery American manufacturers can pay their higher prices for labor and still beat the world. commanded by his father. This march | With the low prices of labor in foreign countries handmade productions can be made cheaper in them. As a result of this there are toys of some kinds which in their completed state are partly American and partly foreign. Among "these are toy vehicles with horses attached. The vehicles and everything in the center of the paraded command the and about them may be the product of American machinery, while the horse standing between the shafts may be and his staff. Arms are then presented from Germany .- New York Sun.

one clock which I could not seem to put in proper order. I would take it away, clean it thoroughly and look to every smallest part of the mechanism. Apparently it made no difference. The clock positively refused to run right. Finally 1 gave it up, and that family had a mighty poor opinion of my abilities as a clock repairer.

'Some weeks after that I came across a clock in another house which acted in exactly the same way. I was puzzled for awhile. Finally I noticed that it always stopped on Fridays. That was queerer than ever, until by chance I hit upon the solution of the mystery. The servant, while dusting the room on that day, was in the habit of passing her cloth along the mantle under the clock. This would have made no difference with many timepieces, but this one had an open bottom, through which the tip of the pendulum projected. The dusting doth just touched this enough to stop it. The girl did not know what she had tury. done, and thus the family were mystified anew each week by finding that the clock would not go on Friday.

"I clean all my clocks regularly once in two years, and in that way keep them clock run until it stops, fairly clogged impossible ever to make it run as accurately as it did before.

'I am usually paid by the month to take entire charge of all the clocks in a house, it being understood that I make weekly visits. Sometimes, though, 1 am employed by the year. In the case of the house I was telling you of, where deal of my time in the course of 12 sses." months, and I don't fill my pockets as fast as some folks seem to think 1 ought," concluded the clock winder with a smile.-New York Tribune.

Architects in these times are opposed to any rooms in a house that are not living rooms. The prim and usually deserted parlor of former days has been banished, and that old fashioned icehouse known as the spare chamber sent due to the salt habit. to keep it company through modern heating and housekeeping improvements.

Disappointed.

Gertie-Marie is awfully angry at that young Tutter. Mertie-What for? Did she find out

he was flirting with her?

Gertie-No. She thought that he was flirfing, but learned that he was not .-Brooklyn Life.

70 years in the Tower, but there is no evidence that he attains anything like that age in the natural state. Forty years is recorded by naturalists as the extreme age. The camel may attain the age of 50. It eats little and drinks less. The horse is comparatively a short lived animal, but it is a well known fact that when he does little work and passes the greater part of his days in pasture he may attain to about 40 years of life. but when a horse is hard worked and fed, moreover, upon beans, oats and other ossifying foods his days are much

shorter. In the vegetable kingdom the yew attains great age. Those at Fountains abbey are about 1,200 years old. Two orange trees at Rome, planted respectively by St. Dominic and Thomas Aquinas, are said to be from 500 to 600 years old, and there are records of tropical trees that, counting by their rings, are supposed to have attained the age of 800 to 1,000 years. - Nineteenth Cen-

Mixed English.

American and English tourists who visited Ischl, in Austria, recently were confronted with the following notice on a signboard over the door of one of the in proper running order. Most people hostelries of the place, "To the gentlethink that it is just as well to let a mans Englanders and Americaners, here you become asses." Upon inquiry it up with dirt, but that isn't so. By that was learned that the purport of the sintime it may be so bad that it will be gular sign was that the proprietor of the place had donkeys to let which were used for excursions into the neighboring mountains. A much traveled cobbler. who professed to be able to master the chance at you I'd even up things. 1 English language, was responsible for the unique wording of the sign. He had Say, we're about even, ain't we?" translated the German sentence, "An die Herren Englander und Amerikaner. they have 20 clocks, they pay me \$100 annually for the work. It takes a good words meaning "here you can hire

Too Much Salt.

The New York Journal of Hygiene says that many people eat altogether too much salt. The result is that the Treat you all right next time."-Chiskin and kidneys are excessively taxed to get rid of the salt, and both are injured by it. Few people have healthy skins, and it is believed that many cases of derangement of the kidneys are

The archbishop of Canterbury receives £15,000 a year and the archbishops of York and London each receive £10. . 000.

"Hush Money."

"We'll call this hush money," said the druggist as he took a quarter from his patron and handed him the chloroform. -Yonkers Gazette.

When I want any iced coffee or any thing else, I'll let you know." "Ever try any of our stewed mush-

rooms?" "No, and I don't want to try any of your stewed mushrooms either.

"You needn't be afraid of them, sir. "You needn't be afraid of them, sir They're all right. We guarantee them, and prices for such are well sustained; and there ain't any better in the United the cold-storage eggs go lower. States.'

The Key of Sheridan's Success.

General Horace Porter, in his "Camfly to the breeze, the lances are lowered paigning With Grant," in The Century, says, after describing the battle of Five and now the moment is one to fill the Forks:

Sheridan had that day fought one of a thrill that is indescribable. The silk the most interesting tactical battles of and tasseled flags, caught by the rays the war, admirable in conception, brilof the sun, shine and glisten in front of liant in execution, strikingly dramatic the solid ranks of blue and gold uniin its incidents and productive of exforms massed across the deep green tremely important results. sward of the parade ground-a picture

I said to him, "It seems to me that you have exposed yourself today in a manner hardly justifiable on the part of a commander of such an important movement." His reply gave what seems to be the true key to his uniform suc-cess on the field, "I have never in my life taken a command into battle and had the slightest desire to come out alive unless I won."

Facing the Music.

The spirit of this simile is used by John Bunyan in the meditation "Of the Horse and Drum," in his "Book For Boys and Girls; or, Country Rhymes For Children," published in 1686. Of the genuine Christian he says, inter alia:

Let drummers beat the charge or what they will.

They'll nose them, face them, keep their place still.

-Notes and Queries.

A whistling moth is an Australian rarity. There is a glassy space on the wings crossed with ribs. When the moth wants to whistle, it strikes these ribs with its antennæ, which have a knob at the end. The sound is a love call from the male to the female.

The leaders of a flock of migrating wild geese become tired sooner than others and are frequently relieved by their fellows.

TO MANUFACTURERS

Who desire a location combining every feature conducive to prosperity, sufficiently near to San Francisco to enjoy all the privileges of a site in the metropolis, and yet sufficiently remote to escape the heavy taxation and other burdens incident to the city.

Where a ship canal enables vessels to discharge their cargoes on the various wharves already completed for their accommodation.

Where large ferry boats enter the large ferry slip now in use, and land passengers, freight and whole trains of cars.

Where an independent railroad system gives ample switching privileges to every industry.

Where a private water-works plant, with water mains extending throughout the entire manufacturing district, supplies an abundance of pure artesian water at rates far below city prices.

Where some of the largest industries in the State are today located and in full operation.

Where hundreds of thousands of dollars have already been spent in perfecting the locality for manufacturing purposes.

Where the South San Francisco Land and Improvement Company own THIRTY-FOUR HUNDRED acres of land and Seven Miles of Water Front on the San Francisco Bay, and on the main line of the Southern Pacific Railroad.

Where, in fact, rail, wharf and other privileges are unexcelled for manufacturing purposes by any other locality on the coast.

If you desire such a location come and see what we have in South San Francisco, San Mateo County.

For further information call or address.

SOUTH SAN FRANCISCO LAND & IMPROVEMENT CO.

202 SANSOME ST., SAN FRANCISCO, CAL

= TO HOME-SEEKERS

The South San Francisco Land and Improvement Company, comprising many San Francisco, Chicago and New York capitalists, created in San Mateo county a new town site known as South San Francisco. This town site is situated on the main line of the Southern Pacific Railroad, and also on the Southern Pacific Bay Shore Railroad, soon to be finished; it is also at the terminus of the San Francisco and San Mateo Electric Railway.

South San Francisco was platted as a town just prior to the great financial panic of 1893 and 1894; during all that period of financial wreck and ruin, when almost every new enterprise and many old-established institutions were actually swept out of existence, she has held her own and is to-day a prosperous community with a population of nearly eight hundred people.

Upwards of \$2,000,000 in cash have been expended in laying the foundation of this new town. Most of the streets have been graded, curbed and sewered, miles of concrete sidewalk laid, trees planted along the main highways, and a water-works plant completed, giving an abundant supply of pure artesian water for every purpose. But the foundation laid in what is known as the manufacturing district of this town site constitutes above all others the most positive guarantee for the future of South San Francisco

There is no stability nor permanency so absolute respecting real estate values, and the future growth of any community like that which is based upon industries giving employment to men. The facilities created by the founders of South San Francisco have already secured to her several large manufacturing enterprises, and will soon secure many more; this means not only an increase in population, but an enhancement in real estate values.

South San Francisco has passed the experimental stage, and is now an established town. Many of her lot owners who have properly improved their holdings are even to-day realizing from ten to twenty per cent net on their investments. How many communities as new as South San Francisco can make this boast?

An independent community in itself, with its own supporting elements, and at the same time close to the metropolis of California, and in the direction in which San Francisco must necessarily grow, already reached by some of the city's street car service, and certain to be on the line of any new railroad entering San Francisco, South San Francisco presents to-day opportunities for investment among the safest and best on the Pacific Coast.

Detail information cheerfully furnished. Address
