Following is a list of nursery stock, with prices for spring delivery. These quotations are f. o. b. St. Paul, or at nursery, except where otherwise stated.

STRAWBERRIES

To my friends and customers who know my strawberry plants, it is unnecessary to say anything, but to those who have not tried my plants, I will say that they are sturdy, well rooted, pure bred, year-old plants. They have been mulched all winter to insure abundant vitality to withstand transplanting. My thirty years' experience as a berry grower has convinced me that plants propagated for transplanting should excel in root vitality.

Each order is dug and packed separately and shipped the same day. I do not dig large quantities of plants and then fill orders from a stock room.

Plants are tied twenty-five in a bundle.

Formerly I have propagated twenty-five or more varieties of strawberry plants, but have eliminated many of these and now offer only the best to grow in Minnesota and surrounding States.

All the varieties which I grow, with the exception of Easypicker, are perfect flowered and any one variety will produce fruit when planted alone, which is not the case with pistillate or imperfect flowering varieties.

Every garden should have a strawberry bed large enough to supply the family with ripe strawberries, from the middle of June until October, besides enough for canning purposes. Do not fail to get some of my plants this year.

Everbearing

PROGRESSIVE—Staminate: Very productive. Fruit medium size and of excellent quality. Produces fruit from about a week earlier than any June variety until late fall. After trying out many varieties of everbearing strawberries I have come to the conclusion that Progressive is the safest and most profitable variety to grow in our northern climate. 50c per dozen, \$1.00 for 25, \$1.50 for 50, \$2.50 per 100. Postage paid. \$15.00 per 1,000 f. o. b. St. Paul.

June Bearing Varieties

PREMIER—Staminate: I am pleased to offer a new strawberry that I can recommend to be an improvement over all other early varieties. This variety was introduced by R. M. Kellogg, and has proven to be just what we were looking for in an early fruiting variety. Plants grow large and are wonderfully productive. The berries are large and of a beautiful glossy red color. I have never found so many good qualities in an early berry. I have talked with several growers who have tried out this variety and they are all enthusiastic about it. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50.

MINNEHAHA, formerly known as Minnesota No. 935—Staminate: While this is one of the newer productions, it has been tried out enough to be placed among the best varieties. Fruit is very large, season of ripening late. Plants very hardy. I consider this our best late variety. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.25, \$8.00 per 1,000.

EASYPICKER—Pistillate: A new production of the Minnesota State Fruit Breeding Farm. Very vigorous, good plant maker, wonderfully productive, berries above medium in size with good shipping qualities. As the name implies they are easily picked. This new berry promises to be a leader

among the better varieties. I have only a limited supply to offer. 50c per dozen, \$1.00 per 25, \$1.75 per 50, \$2.50 per 100.

✓ **COOPER**—Staminate: This new strawberry was introduced by Henry Emlong & Sons, Michigan, and has become very popular wherever grown. In size, productiveness, long season in fruit, and last but not least quality in fruit, makes Cooper a valuable variety. Season begins with the mid-season and continues to fruit until most late sorts are gone. Plants healthy and vigorous. 50c per dozen, \$1.00 per 25, \$1.50 per 50, \$2.00 per 100, \$12.00 per 1,000.

✓ **SENATOR DUNLAP**—Staminate: The Senator Dunlap is too well known to require a description. It is still a very popular strawberry. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.25, \$7.00 per 1,000.

○ **NOKOMIS**—Staminate: A new production of the State Fruit Breeding Farm which promises to become popular as a late home garden strawberry. Very productive, fruit large and good in quality. 50c per dozen, \$1.00 per 25, \$1.50 per 50, \$2.00 per 100, \$12.00 per 1,000.

ASPARAGUS

WASHINGTON—This new rust resisting asparagus was originated by the United States Department of Agriculture and is revolutionizing the asparagus industry. This variety is very rust resisting and is wonderfully productive. The stalks are very large, of the best quality. Strong, one-year-old plants \$2.50 per 100, \$15.00 per 1,000.

PALMETO—A well-known standard variety. Strong yearling roots. \$1.50 per 100, \$8.00 per 1,000.

RHUBARB OR PIE PLANT

MAMMOTH VICTORIA—This variety is larger and of better quality than any of the old varieties. Divided roots, 20c each; \$1.25 per 10. For larger quantities I will quote prices on application.

CURRENTS

The following varieties have all proven excellent in my fruiting field. They are far superior to the old varieties, which I have discarded.

✓ **PRINCE ALBERT, PERFECTION, POMONA, WILDER, DIPLOMA, CHERRY CURRANT, BLACK CHAMPION CURRANT, AND WHITE GRAPE CURRANT**—30c each; \$3.00 per dozen; \$20.00 per 100.

✓ **LONDON MARKET, RED CROSS**—25c each, \$2.50 per dozen, \$12.00 per 100.

RED RASPBERRIES

On account of the raspberry diseases which are spreading fast one cannot be too careful in buying plants which are free from diseases. In addition to my nursery being inspected in the regular way my raspberries are double inspected as you can see by the special inspection certificate on back cover.

✓ **LATHAM, formerly known as Minnesota No. 4**—This berry has become so well known that it is not necessary to describe it here. 10 plants \$1.00, 25 plants \$1.50, 100 plants \$6.00; \$40.00 per 1,000.

✓ **REDPATH**—I introduced this new raspberry for the first time in 1920. At that time I was satisfied of its superior qualities, and after three more years of fruiting, I am convinced it is the best raspberry at the present time. This

is the berry you have been looking for. Fruit a bright red, firm and very large, a heavy yielder and perfectly hardy. This variety does not seem susceptible to the diseases common to the red raspberry. If you want the best, do not fail to order some of these plants. 10 plants \$1.00, 25 plants \$2.25, 50 plants \$4.00; \$6.00 per 100, \$45.00 per 1,000.

BLACK RASPBERRIES

BLACK PEARL—I have found this variety the best for our severe climatic conditions, after trying out several varieties. Fruits abundantly, and the berries are large and perfect shaped. 10 plants \$1.50, 25 plants \$3.00, 100 plants \$10.00

GOOSEBERRIES

THE CARRIE—This variety has become so well known that I do not need to mention its many good qualities, but I will say that it is nearly thornless, is practically disease resisting, and a heavy bearer. 30c each, \$3.00 per dozen. \$20.00 per 100.

GRAPES

BETA—This grape has become very popular, as it is early, very productive and does not require covering in the winter, as it is as hardy as the wild grape of Minnesota.

HUNGARIAN—This is a hardy grape that produces a larger fruit than the Beta, but is a slower growing vine and probably not so productive.

JANESVILLE—A hardy grape somewhat later than the Beta. A good producer.

CONCORD—This variety is very well known.

WHITE NIAGARA—A large variety of the white grape. Any of the above varieties 40c each, \$3.00 per 10, \$20.00 per 100.

APPLE AND CRAB APPLE TREES, STANDARD VARIETIES

WEALTHY, DUCHESS, PEERLESS, PERKINS, N. W. GREENING, PATTEN'S GREENING, VIRGINIA CRAB, TRANSCENDANT CRAB, WHITNEY CRAB, FLORENCE CRAB. 5 to 7 ft. trees; three year old. 75c each, \$8.00 per dozen, \$60.00 per 100.

APPLES, NEW VARIETIES

HARALSON—This new variety which was originated at the Minnesota State Fruit Breeding Farm a few years ago fills a long felt want among apple growers of Minnesota. The fruit is about the same size and color as Wealthy but later in season of ripening; a real winter keeper. Unlike the Wealthy the fruit hangs to the tree until picked. The tree is very symmetrical and perfectly hardy in Minnesota. Price, 3 to 4 foot, unbranched, \$1.25; 4 to 5 foot, unbranched \$1.50

ERICKSON—This new apple was originated at Aitkin, Minn., a few years ago and is proving to be a real success as an early apple. The fruit, which ripens about the same time as the Duchess, is very large and a deep red in color. The quality and flavor can not be surpassed in an apple of this season. The tree is as "hardy as an oak" and has the type of growth of the Hibernial. We have always wanted a big, red, early apple, with good quality. Now we have it in the Erickson. Price, 3 to 4 foot, unbranched 75c; 4 to 5 foot, unbranched, \$1.00.

PLUMS

We have felt the need of a better plum for the Northwest, and have been watching, with interest, the development of the new varieties originated at the Minnesota State Fruit Breeding Farm. These plums are far superior to the older varieties which we have been growing, and I feel perfectly safe in recommending them. They are very fast growing and usually come into bearing the second year after setting. I have selected and propagated the following varieties which have shown exceptional qualities. For description of the varieties see supplement, or write. Do not pay exorbitant prices for these new plums.

✓ **TONKA** (Minn. No. 21), ✓ **UNDERWOOD** (Minn. No. 91), ✓ **RED WING** (Minn. No. 12), ✓ **MONITOR** (Minn. No. 70), ✓ **MOUND** (Minn. No. 50), ✓ **GOLDEN ROD** (Minn. No. 120), ✓ **ELLIOTT** (Minn. No. 8), ✓ **WINONA** (Minn. No. 30), ✓ **WACONIA** (Minn. No. 10), ✓ **LA CRESCENT** (Minn. No. 109), ✓ **HENNEPIN** (No. 132), ✓ **ANOKA** (Minn. No. 118)—My price is \$1.00 each; \$95.00 per 100.

HYBRID CHERRY-PLUMS

While cherries are a very desirable fruit, they have proven unsatisfactory to raise in Minnesota, as there are only a few varieties that do well, and the birds usually take the fruit before it is ripe enough to pick. The State Fruit Breeding Farm has originated the two following hardy varieties of fruit which have the flavor and good qualities of the cherry, and the birds do not eat them. They yield abundantly and the fruit is delicious, and is especially good for canning. For description see supplement.

✓ **ZUMBRA**—75c each.
 ✓ **ST. ANTHONY**—75c each.

VINES

BOSTON IVY—35c each.
HARDY GRAPES—See Grapes.

HEDGE PLANTS

BUCKTHORN—25c each, \$20.00 per 100.
BARBERRY THUNBERGII—12 to 15 inches, 20c each, \$15.00 per 100.
ARBOR VITAE—See Evergreens.
RED CEDAR—See Evergreens.

ORNAMENTAL SHRUBS

DOUBLE FLOWERING CRAB—\$1.00 each.
DOUBLE FLOWERING PLUM—\$1.00 each.
PURPLE LEAF PLUM, NEWPORT (Minn. No. 116)—Described in Supplement; each \$1.00.
MANITEAU—Described in supplement; each \$1.50.
SNOWBERRY—50c each, 3 for \$1.00.
LILAC, PURPLE—Each 35c.
LILAC, WHITE—50c each.

- SPIREA**, (Anthony Waterer) well bushed 12 inch plants, 75c each.
SPIREA V. H. (Bridal Wreath)—Large clumps, \$1.00 each; medium size, 75c each; small plants, 50c each.
TARTARIAN PINK HONEYSUCKLE—50c each.
SNOWBALL—50c each.
MOCK ORANGE—50c each.
HYDRANGEA, P. G.—(Blooms in late summer). Large plants 75c each; medium sized plants, 50c each.
HYDRANGEA, HILLS OF SNOW—(Blooms in early summer) 75c each.
HIGH BUSH CRANBERRY—50c each.

EVERGREENS

In comparing my price with those of other nurserymen, remember that height alone can not by any means establish values. An Evergreen tree grown close and crowded in the row may be the same height as one of my Evergreens, but will not be as heavy, compact, symmetrical or have as good roots.

Constant transplanting and root pruning give my Evergreens masses of fine, fibrous feeding roots which has been the main reason for the success that my customers have had in making Evergreens, bought from me, grow.

The soil that I grow Evergreens in is just the right texture for balling the roots. When I ball and burlap an Evergreen the roots are never disturbed but the soil goes with the tree. There will be an extra charge of 50c each for ball and burlap, but this is not necessary unless they are very large or they are to be shipped a long distance.

- COLORADO BLUE SPRUCE**—1½ to 3 feet, twice transplanted, \$1.00 to \$3.00, according to size and color; 3 to 5 feet, three times transplanted, \$2.00 to \$7.00, according to color of foliage and individual specimen. I have a fine lot to select from.
BLACK HILL SPRUCE—A very fine lot to select from; 3 to 5 feet, \$1.50 to \$2.00 each, according to specimens.
WHITE SPRUCE—18 to 24 inches, \$1.00 to \$1.25 each.
RED CEDAR—1 to 2 feet, 50c to \$1.00 each.
PYRAMIDAL RED CEDAR—2 to 3 feet, \$3.00 to \$5.00 each.
ARBOR VITAE—12 to 18 inches, 50c; 2 to 3 feet, 75c each.
PYRAMIDAL ARBOR VITAE—\$3.00 to \$5.00 each.
WHITE PINE, NORWAY PINE, SCOTCH PINE—1 to 2 feet, 50c each, \$35.00 per 100.

SHADE TREES

- WHITE ELM**—10 to 15 feet, \$2.00 to \$5.00 each, according to individual specimens.
WHITE BIRCH—5 to 15 feet, \$1.00 to \$2.00 each.
MOUNTAIN ASH—\$1.00 to \$2.00, according to size.

Will quote prices on evergreens or shade trees in quantities on application.

HARDY PERENNIAL PLANTS

- PEONIES**—White, pink, divided roots, 30c each; red, 50c each.
IRIS—Blue, 20c each; \$1.25 for 10.
PERENNIAL PHLOX—25c each; \$2.00 for 10.

MY GUARANTEE AND TERMS

That all nursery stock herein quoted is grown under modern scientific methods.

That plants are securely and freshly put up in damp packing material.

That all nursery stock is true to name and correctly labeled.

That certificate of inspection accompanies each shipment of nursery stock.

In no case will I be liable for more than the original purchase price.

Prices quoted in this price list are f. o. b. St. Paul or at Nursery.

Deliveries will be made daily to the different express offices in St. Paul and to the St. Paul post office.

Cash with order when stock is to be shipped, or will accept one-fourth of purchase price in advance and ship goods C. O. D. for balance if preferable.

ORCHARD SPRAYING MACHINES

I handle a full line of the best makes of sprayers. As there are too many types to carry in stock I would advise an early selection that I may have plenty of time to order the sprayer you may select for your particular needs.

SPRAY MATERIAL

Arsenate of lead. On account of the scarcity of this material I have laid in a good supply but may run out before the season is over.. Price, 30c per pound.

Lime Sulphur in liquid form, in bulk. Price, 30c per gallon.

We do not furnish containers at this price.

KOVAR SPRING TOOTH MACHINERY

The Kovar line of spring tooth harrows and cultivators are the best to be had. If you are bothered with quack grass the Kovar spring tooth machinery is what you want. I handle a full line.

Certificates of Inspection

Inspection completed September 14, 1923.

MINNESOTA STATE DEPARTMENT OF AGRICULTURE
Office of State Entomologist

No. 1633

St. Paul, Minn., October 16, 1923.

CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with Sec. 1, Chapter 206, Session Laws of 1913, the nursery stock and premises of The Bailey Nursery of Newport, J. V. Bailey, proprietor, have been carefully examined by a duly authorized inspector and found apparently free from dangerously injurious insects and contagious plant diseases.

This certificate is good until November 1, 1924, unless revoked, and covers only stock actually on the premises when examined.

N. J. Holmberg, Commissioner.
A. G. Ruggles, State Entomologist.

MINNESOTA STATE DEPARTMENT OF AGRICULTURE
Office of Nursery Inspection

No. 7

University Farm, St. Paul, Minn., October 16, 1923.

SPECIAL CERTIFICATE OF NURSERY INSPECTION FOR RASPBERRIES
For Red Raspberries

This is to certify that the above nursery stock on the premises of The Bailey Nursery, Newport, Minnesota, J. V. Bailey, proprietor, has been carefully examined by a duly authorized inspector on June 18, 1923, and on September 14, 1923, and is apparently free from Mosaic, Leaf Curl and similar diseases.

This certificate is good for the fall shipments of 1923 and the spring shipments of 1924 unless revoked, and covers only stock actually on the premises when examined. Issued with regular certificate of inspection No. 1633.

N. J. Holmberg, Commissioner.
A. G. Ruggles, State Entomologist.
