Por que DIREITOS DO AUTOR?

garantir que os artistas e suas famílias tenham sustento econômico a partir da arte produzida.

PATRIMONIAL x MORAL

quem detém a obra pode não ser o autor - daí vem o sustento econômico

ter SEMPRE seu nome ligado à obra produzida

International law [[editar código-fonte](#)]

Berne Convention [[editar código-fonte](#)]

Almost all countries in the world are party to the Berne Convention for the Protection of Literary and Artistic Works. One consequence of the Berne Convention rules is that we should always care about the laws of the country of origin of the work.

Most important is article 7, which sets the term of duration of the protections granted by the Convention. The Convention sets a *minimal* term of 50 years after the life of the authors (subject to some exceptions). However, each country is free to set longer terms.

In any case, the term shall be governed by the legislation of the country where protection is claimed; however, unless the legislation of that country otherwise provides, the term shall not exceed the term fixed in the country of origin of the work.

Even though many countries have accepted the rule of the shorter term based on Article 7 of the Convention, please note that the United States Copyright Act **has not** honored such a rule. For example, [17 U.S.C. 104A\(a\)\(1\)\(B\)](#) may restore copyright on a work published outside the USA for the remaining American copyright term even if its copyright may expire sooner in its source country. This may affect works that were still copyrighted on 1 January 1996 in their source countries. This means, that a work now in the public domain in a Commons user's home country might still be legally copyrighted in the United States. For further details, visit the [Non-US copyrights guideline](#) at the English Wikipedia for a list of dates regarding American copyright restoration of non-U.S. copyrights.

European copyright law [[editar código-fonte](#)]

The [European Union](#) has issued directives harmonizing copyright rules in the European Union (see [Copyright law of the European Union](#)). Note, however, that directives, unlike European regulations, do not apply uniformly. They have to be transposed into national law by each country's legislature, and they often offer significant leeway in doing so. This is, for instance, the case for the legal exemptions of copyright (equivalent of "fair use"), which are allowed to differ within certain limits.

The important [Directive on Copyright in the Digital Single Market](#) has been adopted and came into force on 7 June 2019. It is intended to ensure "a well-functioning marketplace for copyright" ^[2] It extends existing [European Union copyright law](#) and is a component of the FI's
