Thesis

“Many Wikipedia users are not able to learn from a significant portion of the content we have because of the way it is presented.”

- Trevor Parscal, September 2015

Thesis

“Many Wikipedia users are not able to learn from a significant portion of the content we have because of the way it is presented.”

- Trevor Parscal, September 2015

- Who are we failing?
- How are we failing them?
- Where are they turning instead?

Thesis

“Many Wikipedia users are not able to learn from a significant portion of the content we have because of the way it is presented.”

- Trevor Parscal, September 2015

- Who are we failing?
 - **Choose an audience**
- How are we failing them?
 - **Identify their needs**
- Where are they turning instead?
 - **Understand their behaviors**

Audience: U.S. college students

- Heavy Internet users
- Heavy Wikipedia users
- Access to multiple Internet-enabled devices
- Need information on a wide variety of topics
- Use our content in many different contexts
- Adopt new technologies, new resources early & often
- (relatively) easy to reach

Research site: University of Washington

- **Access**

- WMF a “corporate affiliate” of UW Human Centered Design & Engineering

- **Size**

- 30,000 undergraduate, 10,000 graduate students

- **Diversity**

- 28% Asian, 15% international, 13% Underrepresented minorities

Focus: Free Online Information Resources

- Used for school work
- Accessible via the Internet (website, app, DLC)
- Free to use
- Not provided by or through home university
- Not a search engine

Method: Survey

Developed with and deployed by UW students

- Resources students used — Wikipedia and ‘competitors’
- Features/aspects of those resources they found most valuable
- Ran for two weeks, 214 responses recorded

Wikipedia

What they use it for

- Quick facts
- Deep exploration of a topic
- Jumping off point for further research

What they like about it

- Easy to find related information
- Access to sources
- Good quality
- Comprehensive

YouTube

What they use it for

- Tutorials
- Reviewing course material
- Subject overviews

What they like about it

- Entertaining
- Easy to understand
- Taught by real people
- Visual

Stack Overflow

What they use it for

- Solve specific technical problems
- Learning best practices

What they like about it

- Expert-driven
- Lots of examples
- Quick

Khan Academy & Coursera

What they use it for

- Reviewing basic course concepts
- Learning subjects on their own

What they like about it

- Visual
- Good, clear explanations
- Easy to find relevant content
- Self-paced
- Comprehensive

Summary

- Wikipedia supports multiple learning activities: quick facts, topic survey, deep research
- Students find audio/video explanations easy to understand
- Online courses help students review class material at their own pace
- Q&A sites give students quick solutions for specific problems

Outline

- Background
- Demographics
- Top sites
- **Types of sites**
- Student preferences
- Next steps

Types of sites students use to learn

Longform

- Encyclopedias, dictionaries, gov't websites, news sites, tutorials

Social media and social Q&A

- Facebook, Twitter, StackOverflow, Yahoo Answers, Reddit

Multimedia

- YouTube, Pinterest, podcasts

Online courses

- Khan Academy, Coursera, Udemy, EdX, Codecademy

Specialized search/answer engines

- Google Scholar, Pubmed, Wolfram Alpha

Types of sites students use to learn

Longform	48%
Social	17%
Multimedia	14%
Courses	14%
Search	6%

How frequently do you consume information from free online resource in the following ways?

How frequently do you typically use each of the following methods to locate new free online resources?

How important are the following factors related to quality of information to you when deciding whether to use a free online resource?

Mobile trends

- 90% of students use a smartphone to access the Internet
- Relatively few (7%) sites are used **primarily** on mobile
 - Wikipedia accounts for about 33% of these

How important are the following factors related to availability on mobile devices to you when deciding whether to use a free online resource?

Outline

- Background
- Demographics
- Top sites
- Types of sites
- Student preferences
- **Next steps**

Improve our content to support learning better

- Create better topic overviews
 - en.wikipedia.org/wiki/Outline_of_ancient_Rome
 - en.wikipedia.org/wiki/Book:Thermodynamics
- Optimize lede sections for topic exploration
 - meta.wikimedia.org/wiki/Research:Newsletter/2016/July
- Expose content from sibling projects better
 - en.wikipedia.org/wiki/Athens
- Embed more multimedia
 - youtu.be/wlD_ImYQAQgQ

Support multimedia contribution and curation

- Make it easier to create videos, audio, interactive visualizations
- Make it easier to find relevant multimedia content
- Make it easier to organize related multimedia content

Build new platforms to support content remixing

- Card stacks
 - www.vox.com/cards
- Online courses
 - www.edx.org
- Interactive stories
 - www.nytimes.com/projects/2012/snow-fall
