TWO PER CENT. ADDITIONAL.

We last week ventured to assign what seemed to us conclu-ive reasons for raising the rate of interest. The same asons for raising the rate of interest. The same seems to have been entertained by the best ed part of the general public, and by the Bank Directors. he bank raised its rate during the week as much as two per at, and the most thoughtful observers of the difficult accomena of the money market have, we think, approved its having done so.

as to the first rise of one per cent, there could be little doubt. We last week assigned reasons, to which we have nothing to add, and which we need not repeat, for holding 7 per cent. to be considerably too low a rate. After the rise to 8 per cent., it appeared on Thursday that the bullion in the Bank was still lower than last week, and that the reserve of notes was much less. Under these circumstances the Bank Directors wisely and rightly raised the rate. They felt the nature of their responsibility. If they permit their reserve to be unduly lowered, confidence may be endangered, alarm may be generated, and scoper or later paris, wast be the result generated, and sooner or later panic must be the result. but if they err by needlessly raising the rate, the Bank only becomes a little too strong, and the mercantile public pays a slightly extra rate for insurance. Between the evil of panic and the evil of too much caution, there is in such cases no

mparison.

The rise in the Bank rate will evidently have the effect of attracting supplies of capital and bullion to this country. On former occasions a less rise has had a marvellous effect, and we may well expect that such will be the case now. The Bank of France, it is true, his raised its rate, but, as will be seen from the following table, our rate is still vastly higher than that paid everywhere on the Continent:—

| Some are continued to | Bank Rate. | | Market. |

If the rate in Germany is 4 per cent., and here it is 9 per cent., we shall be sure to get German money in plenty. The supremacy of England in this respect rests on a sure basis. We can afford to pay more than any other country for the means we require, because our trade is the largest and our accumulated wealth, as a whole,

immeasurably the greatest. The dashing mode in which an English merchant does business, and the punctilious mode in which a French merchant does it, show at once that the Englishman aims at and relies upon far ampler profits than the Frenchman. London is largest and most profitable sphere for the spare capital of the world, and here it will come if we only bid for it an adequate price.

There is a most legitimate reason for our wishing at this moment to borrow bullion from foreign countries. We are moment to borrow bullion from foreign countries. advancing bullion to India and other countries to pay for cotton. The cotton comes here first, and we export a considerable amount as raw material, and a much larger amount in a manufactured form, and we are for a long time out of our money, till the coin we advance to the ryot or grower turned to us by the long-dated and complex interchanges of trade. It is evident that the rise in the rate of discount, if sufficiently high, tends to attract bullion from foreign countries, and, what is even more important, that it enables us to retain here whatever bullion comes here from Australia and the other producing countries. Foreign nations will lend it to us, for it comes to that so long as we offer them high terms for it.

But there are two other subjects which it is necessary to notice. We showed last week that possibly, by the misconduct and by the competition of new lending houses and com-panies, the credit of the country—our mercantile confidence panies, the credit of the country-our merce might be endangered. The true cure for this is to keep a large amount of bullion at the Bank of England. Nothing large amount of bullion at the Bank of England. Norming strengthens general confidence like that. While the Bank is really opulent and comfortable, people say, "A may go and B may go, for they have involved themselves. But that wont hurt me." But when the Bank till gets low, people say, "Oh. this may hurt us all. The Bank is the ultimate source " of supply. It is of no use to have good bills if they cannot "be discounted. I am in danger, for the ultimate discounter "is in danger." If the Bank strengthens itself, it strengthens incalculably the diffused, the universal, the all-

important credit of the community.

The influence of a considerable rise in the Bank rate of discount on the capital of the country is also most important. Of course it cannot undo what is past. It cannot cancel old contracts, or, if it wished, annihilate old products. But it prevents new contracts, which might be bad, and new products which might be unremunerative. As will be seen from our reports of markets, the rise in the Bank rate has had a general and most important effect in lowering the prices of most articles. The rise in the rate preserves our capital from undue drains, while it brings us more bullion, and so strengthens the

basis of our credit.

Whether the value of money will go lower or higher is a difficult question or rather an impossible question to answer before hand. We hope that the present rate will attract capital from the Continent and sufficiently strengthen our reserve. But we cannot be sure whether such will be the case. The discount houses of course take care to protect themselves, and thus at least a full share of business is thrown upon the Bank of England. If a large amount of bills on a sudden were sent into the Bank, it would certainly raise its rate. But such contingencies no one can foresee. What we rate. But such contingencies no one can foresee. What we may lay down is, that the present value of money seems enough to attract capital from the the Continent, and, therefore, we may well hope that it will not need to be much if at all augmented.

WAR OR PEACE-BUT NOT BOTH.

The Conference as yet does not answer, and we last week explained our reasons for thinking that it would not answer. We did not, indeed, anticipate that the early stages of the discussion would be so futile as they have been,—that the German representatives would have pretended to be uninstructed as to an armistice, which Lord Palmerston said in Parliament would be the first subject of discussion,—that Austria, angry that Prussia should have the evil glory of Dybbol, would abet her in absurd and preposterous demands. But the fundamental cause of these evils was evident. The principal parties concerned—the Germans and the Danes—were not really anxious to discuss their differences, have no common premisses of discussion, cannot be brought by peaceful argument to a satisfactory agreement. The passions on both sides are too heated for real discussion; the Germans are excited by victory, the Danes are irritated at defeat; the Danes are stubborn and will yield nothing; the Germans are vainglorious and will ask everything. It is not likely that much will come of a discussion with amicable formalities between bitter enemies, of a long argument without an agreed basis, of a debate between Powers whose fixed wishes are irreconcileable, and whose warm hopes are utterly at variance.

The diplomacy of this country upon this subject has till now failed, and it has failed for want of attention to an important principle,—a neutral cannot control the policy of belligerents. When two nations are willing and eager for war with one another, it is useless and hopeless for a pacific bystander to attempt reconcilement. By our anxious efforts, we have incurred some enmity and distrust in Denmark, and have awakened bitter hostility in Germany. If you wish to regulate the war or to stop the war, you must be prepared to join in the war. To write letters, to make propositions, to suggest meetings and conferences, is but idle, when these propositions please no one, when these suggestions are ridiculed, when these meetings are of epen enemies. If you are ready, on such and such terms, to help either side with arms and money, you may stay the war or regulate the war; but with mere words you cannot close a conflict which has passed from the slow argument of careful diplomacy to the exciting arens of the sword.

The Emperor of the French has well understood this. He said at the outset that he was not prepared to go to war to secure the annexation of the Duchies to Denmark, and he has not attempted to rule a controversy in which he was not prepared to take a controlling and effectual part. In consequence, he has not been insulted; paltry German Powers have not sneered at his despatches; great Powers have not come to a Conference of his making without instructions, with no solid intentions, in a spirit of contumacious and contemptuous trifling. We have been degraded because we tried to regulate a war in which we declared we would not join: he has been respected because he had no such inconsistent desires; he claimed no influence where he would make no effort and exert no strength.

We must not again make a similar error. Let us make up our mind to a distinct policy. Either help Denmark or do not help her: if you do so, say what is your object, for what end you commence a war, on what point you will conclude a peace. There is great danger of the contrary, if not in the minds of responsible statesmen, at least in the minds of the general public. People say, "Send our fleet to the Baltic." What is it do in the Baltic? If it goes there to help Denmark, say so, declare distinct war against Austria and Prussia, and say for what reason you aid Denmark, and to what ends. But do not send out an admiral "with a watching brief." The rash absurdity of some angry sailor may precipitate a collision which statesmen did not propose, which with their whole strength they were labouring to avert. There is no healthy medium between peace and war. We can help Denmark effectually; an English fleet in the Baltic, a smaller one in the Adriatic, many guineas at Copenhagen will strengthen and aid her effectually. But such aid will be given at a great price. We shall stir up confusion, and perhaps rebellion through Europe; we shall precipitate a war between Italy and Austria; we may bring France to the Bahine. If such be our duty, let us not hesitate or shrink back; but let us be sure it is our duty,—let us define our ideas, and specify our obligations. No "little war" is possible for us now: it will begin at sea, but it may end on land:

it may begin in the North of Europe, but it will be at the South before long. Let us be sure of our objects, our intentions, and our means, before we begin an awful conflict, ensure a heavy sacrifice, and incur a tremendous responsibility.

LANCASHIRE AND AMERICA.

Those of our readers who have felt sufficient interest in the question to remember the general bearing of the articles which from time to time have appeared in this journal in reference to the cotton famine, will be aware that we have always dwelt strongly on the special value to the manufacturers of Lance shire of that peculiar class of cotton which hitherto the American States alone have been found able to supply. We have pointed out repeatedly that cotton is not cotton in the same sense in which sugar is sugar or tea is tea; that the Indian article, or the Egyptian article, however largely furnished to us, could only to a certain extent and in a certain fashion replace the American article; and that we were in great danger of deceiving ourselves, and comforting ourselves, prematurely, when we relied upon the increase in the number of bales imported, or expected, from Bombay, or Brazil, or the Levant, as a positive and complete relief from the evils of the cotton famine. Of the long-stapled cotton, such as we still obtain from Egypt, from Pernambueo, and from Maranham, and such as we used to obtain from the small sandy Islands lying off the coast of Georgia and the Carolinas, there has per been any lack, and of late there has been a considerable augmentation. Of the very short-stapled cotton, such as India always sent, and such as China, Japan, and Syria have begun to send, our supply has increased almost as rapidly and largely on the whole as we could have anticipated. Each of these classes of raw material are adapted for especial uses:—the long-stapled for muslins, fine and modified the second modern and modern long-stapled for muslins, fine and medium yarns, and the warp of cloth; the short-stapled for low yarns and for the weft of cloth. But of the moderately-stapled cotton,—such as only North America produces, which is adaptable for almost every purpose, which is immeasurably more valuable than Sensi for every case to which Surat is applicable, and which is suited for many uses to which Surat is not applicable, -we have been left almost destitute ever since the civil war broke out, and shall remain destitute until the war shall be terminated; this destitution is, and must continue to be, severely felt in Lancashire, however enormous may be the augmentation of our supply of the raw material from other quarters and of

But this is not all. We have—or at least many of our manufacturers have—been too sanguine as to the increased supply from various parts of the world, looking at the supply merely as a gross aggregate, without regard to quality. The amount expected from Egypt was over-estimated; so was that from Syria; so was that from India. But in reference to this last there is another consideration. It is true that the opportent increase of our importations thence has been as follows:—

| MIND OF | COM | THE POST OFFI | OND PROMO | 11100 | DODAY IND |
|---------|-------|---------------|--------------|-------|-----------|
| | | | | | Cwts. |
| Year | 1861 | | ************ | | 3,295,000 |
| - | 1862 | ************ | *********** | | 3,505,000 |
| | | | *********** | | 3,878,000 |
| | | | | | Cwts. |
| First | three | months of | 1861 | | 260,000 |
| | _ | | 1862 | | 387,000 |
| | | - | 1863 | | 459,000 |

But a large portion of this increase—no one can precisely say how large—is apparent only, and is indeed purely deceptive,—for this reason. Owing to the enormous prices obtainable, an immense quantity of rubbish has been shipped under the name of cotton, for which in ordinary years no one would have thought it worth while to incur the cost of freight, and which indeed would not have been saleable in Liverpool at any price. For example: we know of a recent case in which a manufacturer purchased some Surat at 13d per lb. Not only was it short in ultimate staple, but before this ultimate staple could be arrived at, it had lost 50 per cent. in the process—a costly process too—of cleaning:—So that the cleaned Indian cotton in reality cost the manufacturer 26d per lb—or very nearly the present price of middling Orleans. Now the Orleans would not only have been much more cheaply worked up in all the subsequent processes,—and would have been much more

It is obvious, therefore, that the importance to Lancashire of American cotton has diminished in a far less degree than and rehement partisans have been ready to persuade themselves, and vehement partisans have been anxious to persuade others. That, sooner or later, under one set of conditions or another, That, sooner or later, under one set of conditions or another, as the produce of free or of slave labour, at a price more or me shall once again receive cotton from Mobile, Charleston, and New Orleans, we have never been inclined to question.

We do not believe that fertile land in the hands of so energetic a people as the Americans will ever be suffered to remain untilled. We do not believe that in a country inhabited and governed by so peremptory and impatient a people as the Americans, four millions of working men, even though by nature they be black and lazy, will ever be suffered to squat in idleness, and become a standing nuisance and burden to all around them. We believe that if they remain slaves they will have to cultivate the land under compulsion and for a maintenance; and that if they become either absolutely or conditionally free they will have to cultivate the same land under the inducement of wages or some other inducement at least equally cogent. We are satisfied that cotton is and will continue the most paying crop which can be grown over a large area in the Gulf States, and that therefore it will, as sum as society shall be settled and re-organised in whatever form, again resume its position as the chief branch of industry in those districts. In a word, that as soon as belligerent obstacles are withdrawn, American cotton will find its way into Liverpool as before, and in ample quantities; although we may possibly enough have to give ninepence for what we formerly obtained for sixpence, and may have to be content with a million and a half of bales instead of two millions and a half,-neither of which contingencies are at all alarming

When we may venture to expect this desiderated and confidently-hoped-for supply is a question as to which the warning experience of the past must effectually deter us from venture green to hazard a conjecture. Some sanguine persons are of opinion that they discern symptoms which indicate the be-ginning of the end. We hope they may be right; but we do not feel able to indorse any conviction of the sort. It is true, on the one side, that the blockade of the Southern ports is becoming constantly more stringent, and the inconvenient pressure arising therefrom more and more severely felt. It is true that, as a rule, the Northerners, though always losing battles, are nearly always gaining ground. It is true that the Government and probably the people seem to have as little notion of abandaning their nurseas or of listening to any notion of abandoning their purpose, or of listening to any compromise as ever, and on the whole wear an aspect of wonderful prosperity and confidence, and that their language wonderful prosperity and confidence, and that their language is as boastful and their schemes as bold and comprehensive as was the case two years ago. All these considerations point to an indefinite prolongation of the war, or at least to an indefinite persistance in the conflict on the part of the North.—On the other hand, nearly all the grand plans and expeditions of the Federals appear to fail. The enormous amount of immigration from Europe has alone enabled them hitherto to keep such vast armies in the field, and even this cannot now affort them a sufficiency of recruits except at the unexampled bounty of 140l a man—a drain upon their funds merampled bounty of 140t a man—a drain upon their funds which can scarcely be long endured or met. Conscription which would seem to have been readily acquiesced in and to work efficiently and smoothly in the more scantily-peopled South, has been often threatened, but never yet actually enforced to any extent in the North. These are the antagonist facts on which political prophets have to found their inference. facts on which political prophets have to found their inference; -but that inference we are not rash enough to draw.

THE INFLUENCE OF INCREASED EDUCATION UPON THE STOCK MARKET.

Amone the many influences which from time to time affect the stock market in a greater or less degree, there is one very powerful and permanent one which almost escapes attention. This is the gradual but very rapid diffusion of intelligence among the wealthy. There are many even of those who live by watching the fluctuations of the taste for investments who will smile at the idea of "the schoolmaster" producing an effect on 'Change; but he does produce one, and one which is every day becoming more perceptible. He is enabling the class which invests to form an opinion—often wrong or exaggerated, but still a definite opinion—on the comparative value of investments; and the price of all securities is very materially affected by their new information. At the bottom of or investments; and the price of all securities is very materially affected by their new information. At the bottom of all the apparent, or, so to speak, surface movements of the stock market,—the rise produced by a speculative hope, or the fall involved in a speculative panie, the fluctuations which follow over-demand, or the immoveable "steadiness" which follow over-demand, or the immoveable "steadiness" sometimes recorded of stocks which nobody wants,—there lies a substratum of real business. To make any stock move off steadily and permanently, there must be, somewhere or other, a number of persons who have money and who appreciate that stock, and upon the changes in whose appreciation all dealings are really based. Time was, and not very long ago either, when the number of these stocks—stocks which ago either, when the number of these stocks—stocks which people with cash would buy at any price—was exceedingly limited; when the preference given, for reasons other than real security, to particular stocks gave them the advantage of something like what dealers call a "fancy price." The country gentry, for instance, would never look at an investment offering moderate interest unless it were in one shape or other a "Government stock." They might be taken in, and were taken in, by a promise of twenty par cent from some abourd taken in, by a promise of twenty per cent, from some absurd Company with no object, and a dishonest management; but if Company with no object, and a dishonest management; but if the question were only between three per cent. and five, they preferred the three with the guarantees of which they were acquainted. Ignorance is said to be rash, and so no doubt it is where it has nothing to lose, but Ignorance with money in its pouch is, according to Stock Exchange experience, rather remarkable for timidity. The Lord Chancellor who talked about the "sweet simplicity of three per cent.," exactly expressed the feeling of people who, having made money, would rather content themselves with low interest than run the lightest risk by joining adventures of which they knew posislightest risk by joining adventures of which they knew posi-tively nothing whatever. The feeling is just as strong now wherever it still remains. Venezuelan bonds for example have a very distinct value, but there are very few country clergymen who, if compelled to keep the stock, would not prefer 50l in Consols to 100l in Venezuelan bonds, though the latter might on the Stock Exchange be worth the full amount of the difference. The distrust, however, though still existing, has been very materially affected by the progress of education. Partly from the increased habit of travel, partly from extended political information, partly from that close rapport which steam and the telegraph are producing among the different countries of the world, partly from the new ramifications of commerce, and partly from the increasing influence of the Jews, who are in trade essentially cosmopolitan, the English world is beginning to understand the world which lives and dies and makes money beyond the boundaries of these islands. Consequently it is beginning to understand the investments current in that world, to assign them their comparative value, to buy them if they seem very cheap, to hold on to them if they seem in a bad season still very secure. It is of no use to tell a man who really knows the world that all foreign loans, or Indian loans, or colonial loans are "dangerous," for he knows their bases just as well as he knows the basis of Consols. Where he bases just as well as he knows the basis of Consols. Where he does not, he knows people who do, and can discern which of them is to be trusted and which not, quite as sharply as the majority of brokers. He has really comprehended France, or lived in Austria, or made a study of India, and talk about the risk attending "rentes," or "metalliques," or "rupee "paper," merely elicits a smile. Of course he very much prefers English official securities, because they are really the best—just as the note of hand of a millionaire is better than the note of hand of a man of 10,000/—and because, also, they and their dividends are obtainable with least trouble; but still the preference is only one of comparison. He will but still the preference is only one of comparison. He will not pay too much for it, for education has enlarged the range of his pecuniary confidence. Thirty years ago, for instance,

a hundred millions of Indian securities, we will venture to say, could not have been placed upon the market. The people with money to invest knew as a class nothing of India. The stock might be good or it might be bad, but in either case they would buy only as widows would now buy Venezuelan, i. e. very seldom, on very great temptation, and to very small amounts. Nowadays, people understand Indian Government paper pretty well. They know few details perhaps, but they India is, at worst, a foreign country governed by Englishmen, with a practical though partial guarantee from Great Britain —we advanced money to pay the interest due in England from 1857 to 1861—and with an intelligible and very favourable budget. They also understand that payment in silver is, if anything, instead of an annoying anomaly, a transaction slightly to their advantage. They comprehend that even if liable to revolution, India is no more liable than most other countries; and, finally, they see that all "Indians" who know the details of the matter, believe in their own Government stock, and rarely prefer any other; and, consequently, the public absorb about a hundred millions of "paper" and guaranteed railway stock, with a greediness which carries them all above par. That process does not perhaps, as some people have imagined, send down Consols much, for Consols are protected That process does not perhaps, as some people have in many ways not worth specifying here, but it certainly does prevent the rise which would have occurred had those hundred millions been reserved for investment in Consols alone, and the class which invests at five per cent. in the one is just the class which, failing this opportunity, would have invested at three per cent in the other. So, in a greater or less degree, with French rentes, and Russian stock, and Dutch stock—always exceptionally high, because Englishmen understand Holland—and Italian bonds, and, above all, our own colonial securities. There was a little Ceylon loan emitted the other day at 6 per cent. The English who had been in Ceylon knew quite well that, the island being without an independent Government, the security was really that of the Secretary for the Colonies, and were congratulating themselves on the prospect of a good investment to be had cheap; but when the allotments were published, it was found that the market knew nearly as much as they did, and had subscribed for the whole at—we write from memory—about 113. Everybody with money knows something of some other country besides his own, and the consequence is comparative confidence in all foreign securities. The Englishman may not be willing to give quite the full value—he never, for instance, understands the obstacles to any repudiation of French rentes—but he is willing to give a price, and that willingness modifies, of course, the value of all English stock. If, for instance, he would give 50 for French 5 per Cents .imaginary price-he would not, of course, give more than 834 for English Threes, that being the equivalent of his superior estimate of the latter. This increasing knowledge, moreover, extends to all manner of foreign investments. There is a really great sum always ready for investment in foreign rail-"Credits," and Mining Companies, and all manner of ways, and fairly sound speculations which, but for this novel range of information and consequent confidence, would be invested at home, to the immense inflation of home securities.

Again, the increase of knowledge, though marked in this direction, is not confined to geography or to politics. moneyed class is really better instructed as to home affairs, knows more of the resources of the country, of agriculture, of mineralogy, of the demands and needs and prejudices of society, than ever it did before. It is not afraid of new schemes simply because they are new. It understands very fairly where there is room for new banks, where there is a chance for new assurance offices, what kind of mine can pay, what route really wants steamers. Hundreds of rotten schemes rise and flourish and fall, but still if anybody nowadays started a company for making glass out of sait, five in the hundred of the people who read the prospectus would make remarks about crystals very fatal to ideas of subscrip-People, too, who don't know things can get at those who do know, which is nearly as good as knowing, can run up to London and see their brokers or their bankers, or the persons of all kinds in whom they put confidence, and who have early information. The consequence is a wonderfully increased confidence in themselves, which gives them boldness in speculation, and serves to turn away very large sums indeed from the old channels of investment. People wonder that, with the country growing richer and its

surplus income becoming larger every year, and three years of reduced taxation, Consols do not rise in proportion, and lorget that for every investment offered in 1850 there are now ten, and that the new generation knows very nearly what investments are worth. We do not say there is not plenty of the old tendency to blundering and rashness. There will always be a sufficiency of ignorant people with money, and one people with money, and silly people with money, and overacute people with money, to be tempted away by a current of speculation, and be ruined when the crash arrives. But, nevertheless, knowledge is increasing rapidly, and with it an accurate estimate of the value of all securities, and with that again, a decreasing belief in the exclusive merits of those investments which happen to be guaranteed by the British Government.

THE USE OF CAPITAL PUNISHMENT.

WE are glad that Sir George Grey assented to the appoint. ment of a commission to consider the question of crime in connection with capital punishment, -not because we have any belief that either Parliament or the most thoughtful opinion of the country will be in favour of its abolition, but because we believe that the question of its most effective use requires a very careful discussion and elucidation. No punishment can be better than the punishment of death for the highest and gravest of crimes. It is the severest punishment of which the conscience of an educated community will admit, and should therefore, of course, be reserved for those most heinous crimes which inspire the deepest horror. But for such a purpose no punishment could be more effective. It is of course the most deterrent of all punishments, at least to the popular imagination. It is the only final and perfect safeguard against the criminal. It is a thoroughly impressive punishment, which fixes itself in a picture of horror and shame on the imagination of evil-doers. It is a still more expressive punishment, which concentrates into a single act the abhorrence of society and satisfies the wish to extinguish finally the most desperate forms of moral evil. For all these reasons it should be preserved; but for all these reasons also it should be reserved as much as possible for extreme crimes which strike at the very existence of society, which imply the profoundest depths of criminal purpose, and which excite in all serious minds a real sense of horror and If we use this punishment for any crimes which do not fulfil these conditions,—if we needlessly promote its association with popular pity and the credit of a martyrdom courageously endured, we shall spoil it for its true use as a "capital" punishment, and run the risk of exciting the morbid vanity which looks to it as a sort of distinction. To use it needlessly where the moral sentiment of the ma would not be fitly expressed by it, is to blunt it for the cases where it would. It should clearly be reserved, if possible, for where it would. It should clearly be reserved, if possible, for the cases where it expresses the desire even of the least fas-tidious of the multitude to sever finally all the moral ties that bind man to the guilty person,—to cut the threads finally which associate human beings with such a criminal It should express society's highest degree of horror for the prisoner's past, and of despair for his future.

This, we say, is the natural and ideal use of capital punishment. It is fitted to express utter hopelessness and utter abhorrence. It is fitted for the cases where no safeguard against repetition can be too great. It is fitted for cases which we wish to connect in the imagination even of the most unscrupulous with those lowest depths of degradation, with that sense of social leprosy, which even they would wish to avoid. Of course, it does not follow that, in practice, this can be always done. We only assert that there is so wide an imaginative chasm between capital punishment and the highest secondary punishment, that it would be well to keep the chasm between the crimes for which they are awarded also wide and impressive. Now, the real difficulty about any alteration in the present law is, that perhaps it appears to do so with greater practical effect than would be possible on any other principle. It makes death the penalty of intentional homicide, and between intentionally destroying a fellow-creature's life and any other kind of crime, no doubt there is a very wide social gulf on the first view of the

subject. The conceptions attaching to the word "murder" are more vivid and distinct than could possibly be attached to any other specified crime, and there is a great danger in the mere appearance of classifying murders into various kinds, some of which should be punished with death, and some only with a secondary punishment. If once the notion of "extenuating circumstances" be admitted into our law as legally entitling the convict to a less severe punishment than death, there is no doubt a danger that as a deterrent against murder even the extreme punishment might suffer. It is very likely that if once "murder with extenuating circumstances" were recognised as a distinct crime, involving a distinct punishment from ordinary murder, murderers might constantly persuade themselves that their murder would be regarded as one involving extenuating circumstances, and thus the horror which gathers round the mere imagination of murder might be diminished. This is, no doubt, a weighty consideration against admitting any more refined classification of crimes of murder.

On the other hand, if we look more to that character of punishment in which it is expressive of the moral feeling of the community,—one of the most important of all attributes of punishment,—there can be no doubt that a subdivision of the punishments for murder, in proportion to the force of the temptations extenuating it, or the degree of premeditation and cruelty aggravating it, would be very desirable. Hall's murder of his wife for an infidelity aggravated by ridicule, taunts, and words covering him with public shame, is altogether a different crime from the repeated murders committed by Catherine Wilson for the sake of gain. No one can say that Hall's murder was much more evil than the murder by General Sickles, a few years ago, of the seducer of his wife; and General Sickles was made a hero of in Washington for his act. We should be very sorry to see such a state of public feeling prevailing in England; but still it is unquestionably true that, if the state of the law allowed Hall to be released, there would be none of that abhorrence felt for his society which would be felt even for a common burglar or thief, and infinitely less than for Manning or for Courvoisier. Now, it is undoubtedly a great evil that the punishment of death should be spoiled as an instrument for expressing the greatest abhorrence of society, by its association with a crime which does not create even so much abhorrence, certainly not nearly so much disgust, as many crimes now punished with a comparatively light punishment. If we could admit a different penalty for murder of the graver kind, and for murder "with extenuating circumstances," this very great evil of demoralising, so to say, the extreme punishment of the law, might be avoided.

There is, however, a further difficulty in the case of no small moment,—the difficulty, we mean, of defining what an "extenuating circumstance" should be. Nor are we at all sure that this difficulty could be got over, unless it were left to the Judge and Jury to decide, which would scarcely be a settlement of the difficulty, and would run the risk of introducing a very great inequality into the law. Perhaps an extenuating circumstance might be defined as any violent and legitimate cause for passionate resentment in the murderer's mind towards his victim, either excited or reawakened within so short a time of the murder as not to leave ample time for cool reflection. In other words, "murder, with ex-"tenuating circumstances," would then be, in degree of guilt, intermediate between manslaughter and murder without extenuating circumstances. There would be the intention to kill, which is supposed not to exist in the case of manslaughter, but the passion which awakened that intention would, as in the case of the manslaughter, be violent, more or less sudden, and founded on some natural, not to say legitimate resentment. We do not see why this intermediate link between manslaughter and murder should not be satisfactory, if once it could be shown not to be dangerous to the public interest to classify murders at all, All these are very grave questions, and we think the public have every reason to rejoice that they are to be submitted to the consideration of a commission. That capital punishment will be wholly rejected, either by the commission or by Parliament, we do not for a moment believe. For extreme crimes we need an extreme punishment, and in countries which abjure torture,—which adhere to what we may call natural punishments,—there can be no climax half so impressive or expressive as the infliction of death.

THE POSSIBILITIES OF TAXATION IN THE UNITED STATES,

ENGLISH politicians are beginning to understand Mr Chase's ideas on finance, and to view them consequently with less os the contemptuous surprise which they at first excited. Consciously or ignorantly, from a deep-laid plan or mere good luck, he is drilling an untaxed people to bear a searching taxation, drilling in a very cruel but probably a very efficient way. Unable or unwilling to impose the necessary burdens all at once, he has gradually raised the internal revenue until it already exceeds the receipt from Customs, and for the rest has taxed the people through the hard, wasteful, and demoralising but effective machinery of an inconvertible paper currency. If that currency is ever redeemed, he will still have spent twice as much as he need, but then he will have raised the money the nation required, and it is by no means proved that he could have raised it in any other way, and he will have raised it without destroying the national credit. Supposing the Government honest, and the war to cease next year, the result of his operations on the return of peace will be simply a needlessly heavy debt, not, unless that debt is swollen to improbable figures, national ruin and disaster. It is assumed in England very widely that the postulate is not true, that the currency will not be redeemed, American politicians being neither honest enough to impose crushing burdens on themselves, nor rich enough to pay the needful sums without very severe suffering. The first of these doubts we are not about to discuss just now, merely remarking that Mr Chase's course in exchanging currency for State debt, and selling that debt in minute morsels, seems to indicate honest purpose, but on the

second we have a word to say.

We very much doubt whether English financiers, even those who have slightly studied the subject, have formed a sufficiently favourable opinion of the tax-paying powers of the American people. We are so accustomed in Europe, and more especially in England, to a prosperous middle class, and a comparatively poor population, that we hardly realise to ourselves the financial position of a country in which the whole population is well to do. We raise large sums from the masses, it is true, by indirect taxation; but when pushed beyond that resource, we habitually think of our imposts as falling on a very few thousands of people. We do not perceive, certainly do not appreciate, the possibilities of revenue contained in a population four-fifths of which would in England be within the income tax limit. Suppose, for example, that in this country the income tax fell upon everybody, and everybody had a hundred a year. Such a change would add at least five millions of families with 100l a year to the paying list. The tax then would fall, speaking roughly, on 750,000,000l a year instead of 280,000,000l, that is, instead of producing a million and a quarter for every penny, it would produce some three times that sum, and a shilling

tax would yield us more than forty millions a year. Semething very like that is the permanent condition of the United States, and, if the people are but willing, it is difficult to fix any probable limit to their tax-paying power. The history of the war seems to show that the American middle class, though much poorer than our own in property—having enjoyed less than a century of accumulation—is much nearer our own position in respect to aggregate income than any one previously expected. It includes no body of men so rich as, for example, the members of the two Houses of Parliament, but it includes very considerable numbers who are extremely well off, much better off, for instance, than any similar class in any Continental State. In addition to these, the Union possesses millions of families who, though not rich, are rich enough to make taxation worth while, a state of affairs quite without precedent in political finance. Suppose, for the sake of illustration, that Americans are willing to pay for their nationality, or their grandeur, or their imperial dominion, or their safety, as much as an English banker's clerk pays for nearly similar objects, and let us see what they would raise. The clerk being in point of means just above the artisan, pays all the indirect taxes as he does, and all the direct taxes levied on men of income, or, on a rough calculation, about three shillings in the pound. Taking the tax-paying income of the country roughly at 280,000,000/l a year, less than the truth, and the non-paying income as about the same, we pay 80,000,000/l in taxes, imperial and local, out of 560,000,000/l, giving about that average. Now without entering into confused local details, it

is pretty certain that an unskilled labouring man in the States who will work hard can earn as a minimum average a dollar a day, and considering the high proportion of skilled labourers, and the quantity of land which belongs to the labouring class, and the great temptation to industry at such wages, be beneath the truth when we take an average of a dollar and a half, or 97l a year. In other words, the wages incom the Union, taking its population at five and a half millions of families, is not less than twice our property income, and there remains the middle class income equal in all probability to our own. Three shillings in the pound, our own average upon the whole, gives a revenue of 120,000,000l, or a sum entirely beyond the probable wants of the country, both for Federal and State taxation. This estimate is of course conjectural, but we really believe it to be as regards the wage income quite within the truth, and it will, as emigration increases and property accumulates from industry, be greatly below the reality. There is, therefore, some justification for those boasts of American capacity to bear taxation which seem to us so wild.

It may be argued that it will be impossible to get at that income, but willingness to pay being conceded, the difficulty of collection is not quite so certain. If the people once choose to pay, a house tax can with the masses be made a very effective substitute for an income tax, for the real obstacle—the small value of each payment as compared with the cost of collection, does not exist. Our rate-paying machinery in towns goes down very low, and in America no man need our rate-paying class. Even an income tax itself, if there is no resistance, is not beyond collection where you can divide the masses into classes of payers, and ask, therefore, no pro-cess of self-assessment. Of course, willingness to pay is a very large postulate indeed; but the French and Belgian peasant proprietors do pay direct taxes-one of them an exceedingly and in our own towns it is astonishing how little resistance is ever made to the rates which fall on very poor people indeed. We have no means of ascertaining the degree of American willingness, but the people hold degree of American willingness, but the people hold the debt, and we strongly suspect will feel about the taxes much as our poorer ratepayers do, that they are a great burden, and a great annoyance, and a "great shame," but as inevitable as destiny. Moreover, we have confined our remarks purposely to the aggregate taxation, leaving out of view altogether the proportion which may be extracted from a race so rich by indirect and unresisted taxes. Nobody knows what a people whose average wages are 30s a week could or would pay, without fighting, for liquor, or sugar, or tobacco, or tea, or lucifer matches, or what they would endure without wrath in the way of stamps—a resource we our-selves are only beginning to comprehend. The probability is, that being raised to the point at which men begin to be interested in politics, they would bear very high charges indeed, and expend their irritation in protests against the way in which the revenue was employed. At all events, it seems to us clear that in calculating the probabilities, we all underrate the American tax-paying power

CONFEDERATE FINANCES.

OUR readers will not be surprised to learn that the crude and financially unsound scheme for "the redemption of the Confederate Cotton Loan" by means of blockade-running, which we noticed in our publication of the 2nd of April last, has been definitively abandoned by its concoctors.

Agriculture.

AGRICULTURAL EDUCATION.

AT first eight, it might be thought that agricultural education, the training a lad whose business is intended to be that of a farmer, may as well be left to his parents or guardians as the education of boys meant to become tradesmen, manufacturers, seamen, or the like. But experience has shown that there are many obstacles to the education of a young farmer. Speaking of the ordinary classes of farmers, their sons do not usually find much intellectual activity at home. They are much secluded. The operations of the farm are carried on in connection and constant communication with labourers of no great intelligence—at least, of no varied intelligence. Routine, of necessity, bears much sway on all farms. Con-

at home. They are much secluded. The operations of the farm are carried on in connection and constant communication with labourers of no great intelligence—at least, of no varied intelligence. Routine, of necessity, bears much sway on all farms. Constant out-door employment from an early hour in the morning—inducing good appetites and full meals—does not tend to promote an inclination for reading and that mental activity which reading ever produces. Yet perhaps there are few avocations

which afford greater scope for intelligent mental, as well as bodily activity, than the farmer's. Scientific knowledge may daily and hourly be applied to the practical operations of the farm, or in observing and recording the effect and influence of soil, climate, or animal life. As the rule, however, the great body of English farmers are men of moderate education, and somewhat limited intelligence. They are, however, advancing, and the note which such august bodies as the Council of the Royal Agricultural Society are now taking of the education of agriculturates indicates and perhaps is the result of a movement amongst the farming classes. The Society has appointed a Committee to consider and report upon the subject of agricultural education, and a lecture on the same subject was recently delivered by Mr Holland, M.P., at a meeting of the Council and the members, which resulted in a very instructive discussion.

Mr Holland said that, though agricultural practice was mainly determined by soil, climate, and other local circumstances, we hardly know how to handle the subject of agricultural education, "in consequence of our not having any system of education connected with the agricultural interest." And he cited numerous educational authorities to show that schools for farmers, small tradeemen, artisans, and others of that class, indeed middle-class schools in general, are very deficient. He also indorsed Mr Morton's statement that the occupier of a large farm in the present day must, in addition to capital, have a liberal and scientific education. Efforts, therefore, should be made to improve our middle-class schools, and to induce farmers to afford their sons better education than they have as yet generally done, both as schoolboys and after they have left school.

Sir Edward Kerrison recommended that the Royal Agricultural Society should offer prizes for papers on agricultural subjects from different schools, and perhaps scholarships. But such means could scarcely have any wide operation on the agricultural classes. We think it would be better to aid the formation of good schools, where the general knowledge, useful alike to the future farmer and tradesman, may be taught until the boys reach the age of fifteen years. Then the most intelligent, and those whose parents could afford it, might usefully go to the Agricultural College at Cirencester, where scientific and practical husbandry are now so ably taught. If the College at Cirencester had attained the success it deserves, other establishments for the more advanced education of agriculturists would arise. At present the Cirencester College is not worked to its full power. If in ordinary schools boys who are to be made farmers were better prepared than is the case at present, the advantages to be obtained at Cirencester would be more generally appreciated by the farming body.

Sir Edward Kerrison mentioned a school in Suffolk, for which 14,000l had been raised by contibutions of the gentry, and which is to be opened in October next. It was designed for the education of boys of other classes as well as the agricultural, and the scheme of education was so good that it was thought "the higher class chiefly would avail themselves of it, instead of those for whom it was more particularly intended." The objection to this was that a better dietary, and still more advanced education would be required, "until the expense ran up beyond the ability of the humbler classes to pay." To meet that difficulty, it had been determined that the per annum for each boy. That sum was to include the whole cost at the Suffolk school.

The Rev. Mr Brereton, who has the charge of a somewhat similar school in Devonshire, which has been established four or five years, said that last year it was a question whether his school could keep within the estimate. Although it commenced with two or three boys only, there are now fixty scholars. The terms were 201 a year for each boy under thirteen years of age, and 231 a year for a boy above that age. The terms, however, had been raised this year to 231 for the younger boys, which would make an average of 241 for each boy at the school. Last year the receipts were 511 less than the expenditure, but during the past quarter there had been a surplus, and he calculated upon such an excess of receipts over expenditure as would give a surplus on the year of 1451,—equal to 31 per cent. on the capital expended in establishing the school. The head master had a salary of 1201, with a house to bive in, and two under-masters were paid 401 a year each, with their board for forty weeks, estimated at 201 a year for each. The boys' board cost 8s a week per head. The head master was also to be entitled to all the profits derived from the school after payment of a dividend of 31 per cent. per annum on the capital. Boys who learnt Latin paid something extra. There was a disposition on the part of classes higher than those intended to be benefited to use the school, but efforts were made to check that, in order to keep down the expenses. A good proportion of the boys educated at this school had gone into farming. At first it had been proposed to connect practical farming with the school, but local circumstances had obliged Mr Brereton to keep the farm distinct. The farm, however, was carried on contiguous to the school, in the hope that some pupils would be glad to receive a special farming education. As yet, he had not quite decided whether it was desirable or not to combine the farm with the school, but one or two instances of the benefit of letting instruction in practical farming keep pace with school education had occur

education, with mathematics to a certain extent and French, are included in the regular charge of the school. The success in French had not been remarkable. Five guineas extra were charged for Latin, and there were twelve boys who paid for it.

Dr Voelcker "was convinced that the practical education which was given on the farm to the small tenant-tarmers' sons was much better acquired at home than upon a farm attached to the school." The expense of a farm fell heavily on a school, and prevented the school from being self-supporting. In the school or lecture-room pupils could be kept under control, but that could not be done on the farm. He said "it was impossible to instruct three or four pupils together in one business. Wherever there were a number of lads brought together, they would be sure to do anything but what they ought to do." This, if correct, would seem to cut at the foundation of all combined instruction, whether in-doors or on the farm, and we believe it to be altogether erroneous. Of course, it may be possible that a master who can control his pupils during achool lessons or lectures may be incompetent to exercise an equally effective control over them when receiving practical instruction on the farm, but that is a matter of detail for which the managers of a school will have to provide. Mr Wren Hoskyns doubted whether they were right in speaking of farmers as a class, for how could they classify under one head a body of men extending from the occupier of 30 or 50 acres of land up to the men who farmed 2,000 or 3,000 acres? The farmers treated as a class comprised persons of widely differing status, to whom very different modes of treatment must be applied. In fact, the wealthier portions of the agricultural class would provide in their own way for the education and training of their sons, and it would be presumption to interfere with them. The question was therefore reduced to the education of farmers from each other, and the nature of their out-door employments, as disinclining them to exercise their mental faculties after the work of the day. He thought the Committee of the Royal Agricultural Society should consider how they might bring the better practices of agriculture to the knowledge of the poorer farmers by means of cheap public

Mr Wells said that the preponderance of opinion expressed had been rather against special instruction in husbandry, but he should "be glad to see the special education of agriculturists promoted, and he thought that without attaching farms to schools or colleges, such a special education might to a certain extent be imparted." If a radimentary knowledge of the steam engine and the elements of chemistry were taught in such schools as had been spoken of, it would prove very advantageous.

Mr Holland, in replying, thought the holders of farms from 300 to 500 acres might be taken to constitute the class of farmers who are unable to avail themselves of the institutions already in existence for the class immediately above them.

We shall return to this subject when the report of the Committee of the Royal Agricultural Society is forthcoming.

Joreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

An Imperial decree authorising ss an "anonymous"—that is, a joint stock—company the "Société Generale pour favoriser le developpement du Commerce et de l'Industrie en France," is promalgated in the Moniteur this morning, and its statutes are sanctioned. In addition to the usual stipulations in such matters, the decree smats that the nomination of the Managing Director must be sanctioned by the Minister of Finance; and that, besides, "at the end of each month, an account of the situation, drawn up by the Board of Directors, and certified by the Director, shall be published in one of the journals which are designated to make legal publications at Paris, and copies shall be communicated to the Minister of Finance and the Minister of Commerce. The said account," it is further enacted, "shall set forth, in addition to the profits of the Company, the movement of its operations, and the amount of bills in circulation endorsed and guaranteed by the establishment." In accepting such conditions as these, the founders of the Société Generale give a striking proof of their anxiety to serve the public. Information on the proceedings and situation such an important establishment will manifestly be of the greatest importance to persons engaged in business. So much has been said at different times in the Economist about this new Société Generale, that it is only necessary to remind your readers that, whilst transacting pretty much the same sort of business as the Credit Mobilier, it will, as its name implies, "favour the development of commerce and industry," by launching, protecting, and assisting new companies of real public utility, and by encouraging useful enterprises of private persons. It will, in fact, do for France what the famous General Society of Belgium has done with immense advantage to that country, for many years past. The new institution has a wide field of operations before it, and it has already, I understand, made arrangements for taking in hand forthwith several important affaires. The gentlemen at the hea

mercial world, and they represent different branches of commercial enterprise:—M. Pinard, of the Comptoir d'Escompte, the discounting business; M. Talabot, of the Mediterranean Railway, railways; M. Schneider, of Creuzot, iron-works and engine-building; Mr Blount, the English banker, banking; M. Denière, President of the Tribunal of Commerce of Paris, and M. Davillier, President of the Paris Chamber of Commerce, Parisian trade, and so on. In addition, the new establishment is to have, as you are aware, the co-operation of the General Credit Company of London, headed by Mr Laing; and many of the leading bankers of France, Switzerland, Germany, and Italy are also to act with it.

The Credit Mobilier has not made a public amouncement of

The Credit Mobilier has not made a public amnouncement of the amount subscribed for the Mexican loan, but it has notified that subscribers may receive their titres on and after the 16th. It appears that after all the subscription was not so successful in this country as had been expected.

this country as had been expected.

The Government you were informed presented a bill to the Corps Legislatif for reducing the standard of the lower denominations of silver coin—that is those of 2f, 1f, 50c, and 20c—from 900 of pure silver per 1000 to 835—its object being to prevent the export of them. The objection having been made that it was not prudent to disturb the value of the franc, which is the basis of the French monetary system, the Minister of Finance consented to confine this bill to the lowest coins—those of 50c and 20c; and in that shape it has passed the Corps Legislatif. The existing 50c and 20c are to be withdrawn from circulation, and are to cease to have legal currency at a date to be hereafter fixed. Authorisation is given to coin 30,000,000f of such pieces of the new standard, and in addition to issue a further quantity equal to that withdrawn. As there has long been an insufficiency of small silver coin, whereby great inconvenience was occasioned, the new bill will be useful.

In consequence of the modification in the registration dues, of the abolition of the drawback on sugar, and of changes in the expenses, the Budget of 1865 has been modified, and now stands as follows:—

| Ordinary Ditto from special resources Extraordinary | francs. 1,750,022,583 229,493,085 118,852,000 |
|---|--|
| Rucovers. | 2,099,267,618 |
| Ordinary Special Extraordinary | 1,752,036,062 229,498,035 119,350,011 |
| | 2 100 879 108 |

Deducting the expenses from the receipts there remains a surplus of 1,611,490%. In English money the expenses are 63,970,704l, the receipts 84,035,164l, the surplus 64,459l.

63,970,704l, the receipts 84,035,164l, the surplus 64,459l.

Messrs Arles Dufour and Co., of Lyons, in their circular of the 30th ult., have the following on the silk trade:—"The hope which was expressed in our circular of the end of March is realised. Thanks to the more pacific turn of political affairs, and the receipt by mannfacturers of some orders for the winter season—orders which found them generally with small supplies—our transactions during all the month have been very active. The tightness of the money market, although calculated to cause serious anxiety at the approach of the crops, has only partially embarrassed the favourable movement, which has produced an improvement in our quotations of 2 to 5 per cent, principally in the fine qualities of silks, of which the stock becomes more and more reduced, and will be exhausted before the arrival of new silks in our markets. Accounts of the crops thus far present but little interest. In Spain, where the 'educations' will, in a few days, enter on the critical period, they have thus far given rise to few complaints. In all Italy the return of cold has delayed the eclosions which are beginning in France. Everywhere there is great abnodance of grain, and consequently it is sold at a very low price."

A fact of importance to the sugar trade is mentioned in the last despatches from the French West Indian colonies:—The crop of sugar this year will, it is estimated, present a deficit of 30,000 casks in Guadaloupe, and 15,000 in Martinique.

The gentlemen interested in the lead trade at Marseilles have sent a petition to the Emperor, earnestly praying for the abolition of the import duty on lead from Spain; and they are supported by the shipping interest. The principal argument is that it is unjust they should have to pay a heavy tax on Spanish lead, when Belgian and English lead is admitted free.

The Bourse has been much agitated during the past week by the unfavourable political news, and by the fear that a monetary cricis is coming at London, and that it will be followed by one here. To-day being Ascension, is a holiday, and the Bourse is closed. The following are the quotations:—

The annual meeting of the shareholders of the South of Austria, Lombard, and Central Italy Railway was held on Saturday. Baron James de Rothschild, the chairman of the Company, presided. The report, of which I will give an analysis in my next, announced that the dividend for 1863 is 40f—a larger sum than might have have been expected, seeing the depression of traffic last year. With respect to the Italian State railways, which the South Austrian and Lombard Company is anxious to get, Baron de Rothschild briefly related the negotiations he has carried on with the Italian Government for the purchase of them, and which are not yet concluded. He said that the Italian Government would soon be come to. The railways, he added, cannot fail to attain considerable additional value in the hands of the Lombard Company. The question was asked whether the Baron was carrying on the negotiations for the Company, or on his own account, with the intention of reselling the lines to it. Baron de Rothschild declared that, though the affair had cost him much time and trouble, the lines would be purchased exclusively for the Company, and that no peculiar advantage would accrue to himself or any one from the transaction. This announcement was greeted with loud applause.

The shareholders of the Lyons and Mediterranean Railway held their annual meeting a few days back, M. Dumon, President, in the chair. The report presented gave an elaborate account of the operations of the Company in 1863, from which it appears that the receipts, after deducting working and other expenses and all outgoings, were sufficient to permit 1,500,000f to be carried to the extraordinary reserve, 7,000,000f to be employed in the remaking of the line, and 75f per share to be distributed as dividend. The addition to the reserve fund makes it 6,000,000f altogether, and the 7,000,000f for works on the line make the total disbursed for that purpose to the end of 1863 between 14,000,000f and 15,000,000f. Here, then, is a sum of from 20,000,000f to 21,000,000f which might have been employed to swell the annual dividends, but which has been more prudently set apart to the permanent interests of the railway. In addition to it, the Company has completed its statutory reserve of 10,000,000f. The report drew the special attention of the meeting to the situation of the Company after the present year, when the new lines and embranchments will have to share in the revenue of the great trunk lines. The Directors declared that in their opinion it is of the highest importance that the Company should abstain, if possible, from having recourse to the guarantee of the Government for the secondary lines; and they entered into calculations to prove that it will be able in 1865, and in the following years up to 1868, to distribute 60f per share as dividend, to pay the charges on the old network, and to set apart various sums as a special reserve. In 1868, the Great Central and Bornbonnais lines, which are not very profitable, will have to share in the general revenue; and by that time the Directors suppose there will be a reserve of 25,000,000f, which, with the increased revenue from the natural development of traffic, will enable a "reasonable dividend" to be maintained.

The meeting of the shareholders of the Southern Railway

The meeting of the shareholders of the Southern Railway, of which mention was made last week, was presided over by M. Emile Pereire. The report gave an account of the progress of the works on the lines comprising the old and the new networks, and announced that the important line from Bayonne to Irun, which effects a junction between the Southern and the Spanish lines, was opened a few days ago. The expenses incurred in the construction of the old network in 1863 were 9,317,264f, and on the new 44,112,728f. The gross receipts of the working of the former were 31,819,439f, which were less by 1,084,738f than those of 1862. The decline was owing to a falling-off in the quantity of merchandise conveyed. After deducting the expenses, in which savings to the amount of 803,948f, compared to 1862, were effected, there remained 18,393,001f. The gross receipts of the network were 3,714,212f, and after deducting the expenses there was a balance

of 1,129,4781, which was 459,325f more than that of the preceding year. The working of the Canal Lateral to the Garonne, which belongs to the Company, produced 439,594f less than the expenses. This loss was occasioned by the canal having had to be closed for a longer period than usual for repairs. The receipts of the new network are to be employed in the execution of works; those of the old, after deducting the charges for interest on bonds and other outgoings, permitted a dividend of 45f to be declared, and a balance of 143,221f to be carried over to 1864. Of this dividend, 30f have already been paid. The report drew attention to a curious fact—the heavy burdens which the Government, in one shape or another, imposes on railways. For police, surveillance, telegraphs, Post Office vans, and reductions of prices to soldiers, the Southern Company calculates that it had to disburse in 1863, on its old network, not less than 5,555,960f, which were equal to an interest of 8½ per cent. on the subvention granted by the Government.

In a meeting of the shareholders of the Libourne to Bergerae Railway, which is in course of construction, the expenses of buying land, works, &c., in 1863, were stated at 4,168,751f 94c.

The Company of the Coal-pits and Railway of Carmaux distributes a dividend of 18f per share for 1863. It is the same as in preceding years.

The Directors of the Charentes railways, in a report presented to a recent meeting of shareholders, detailed the contracts they have entered into for the construction of certain parts of the line, also for rails, locomotives, and other materiel, &c.; and they announced that they will have to raise more funds by an issue of bonds.

An official return shows that the quantity of alcohols made and imported, including the stock on hand, was from the beginning of the season on 1st of October to the end of March, 1,102,906 hectolitres, and the quantity consumed 836,062, leaving on hand 266,844.

Customs returns for the first three months of the present year, compared with the corresponding periods of 1863 and 1862, have appeared. The value of imported articles taken out of bond for consumption was this year 514,843,000f; last year, 526,593,000f; and of 1862, 524,184,000f. The value of the exports of French productions, natural and manufactured, was in the first quarter of the present year 692,506,000f; of last year, 594,490,000f; of 1862, 507,265,000f; In imports in the present year, compared with last, there is an increase more or less considerable in sugar, coffee, tobacco, jute, hemp, flax, cotton, coal, copper, lead, tin, indigo, spirits, cotton yarn, silk, cotton and most other tissues: a decline in wool, silk, tallow and grease, oleaginous seeds, cocca, pig iron, iron, steel, beer, woollen and flax and hemp tissues, woollen and flax and hemp yarn, prepared skins, articles in skin or leather, mercery, toys, artificial flowers, farniture, ready-made clothes, glass and crystal, wines, spirits, chemical productions, rosin, wool, seeds for sowing, grain and flour, &c.; and there is a decline in silk, flax, tobacco, machinery, cutlery, arms, refined and beetroot sugar.

As regards the precious metals, subjoined are the indications relative to the total amounts of imports and exports, and to the countries from and to which they are made:—

| | GOLD IMP | ORTH | D. | | |

Turning the preceding totals into English money, we find the following results for the three first months of 1864:—

| The import of gold was | 4,811,804 3,045,603 |
|--------------------------|------------------------|
| Excess of imports | 1,766,201 |
| The export of silver was | 4,171,212 3,171,969 |
| Excess of exports | 999,243 |

Deducting the excess of exports of silver from the excess of imports of gold, it will appear that in the first three months of the present year the stock of precious metals increased by 766,958!.

As to the amount sent to the East, it was 1,088,700! in gold and 43,256! in silver to Egypt; 2,252,736! in silver to British India—tral, 3,384,609! total, 3.384,692/.

Subjoined is the market report:-

Subjoined is the market report:—
FLOUR.—At Paris, operations are difficult. Yesterday, choice was 54f the sack of 157 kilogs; first marks, 52f to 53f; good, 51f; other sorts, 49f to 50f. Some flour of the North, to be delivered in July, of very good quality, was 52f to 53f. Six marks, for current month, commenced 52f 75c, but were eventually fixed at 52f 50c; June, 53f 50c; July and August, 55f; last four months, 55f 50c to 56f. Type of Paris, the 101 kilogs was 32f; June, 32f 75c; July and August, 34f to 34f 25c.

Wheat.—Nothing whatever was done at Paris yesterday, but prices had a downward tendency.

Corrow.—The sales at Havre, in the week ending Friday, were 33,563 bales and piculs, and the arrivals 5,245 bales. There was an important rise in prices, in United States sorts of 14f to 20f; Surat, 5f to 10f; Tinnevelly and Jacmel, 10f; Madras, 5f; China, 6f. Low New Orleans was consequently 352f the 50 kilogs; good ordinary Broach, 275f; good ordinary Tinnevelly, 265f; Madras, 223f; Jacmel, 342f. The stock was estimated at 38,410 bales. This week, the market has been less active; and yesterday, Madras, for delivery, was 24ff 50c; China, disposable, was 21ff 50c and 220f, and for delivery 220f to 224f; Tinnevelly, 269f and 240f; Bengal, 205f.

COFFEE.—The demand was regular at Havre in the week ending Friday: 1,300 casks Hayti, Port au Prince, Jacmel and Jeremie, 81f 50c the 50 kilogs in bond for old, 83f 50c to 85f for new; 116 Cayes, 83f; 100 Gonaives, 92f; 670 Cape, disposable and in the port, 87f 50c to 88f; 80g Rio, not washed, 82f to 86f; 550 ditto, washed, 90f to 95f; 2,500 La Guayra, 92f; 31 Cazengo, 91f 50c, in bond; 271 bales Mocha, 138f to 148f 50c, duty paid. By auction, some lots of different sorts of damaged were sold; also a quantity of sound Cazengo, at 94f. The arrivals were about 8,000 sacks. This week, Hayti, 81f to 86f; Jacmel, 78f and 83f; Cape, 88f; St Marc, 92f and 84f; ditto indifferent quality, 78f; La Guayra grages, 100f; Mocha, 140f. At Nantes, last week, At Bordeaux, last week, the s

kept secret; 4 bales kid, La Plata, 12f 50c the dozen. By auction, some lots of different sorts of damaged were sold; sums lots of sound were also offered, but withdrawn. The arrivals exceeded 7,000. This week, Buenos Ayres salted ox, 61f; Pernambuco drysalted, 71f.

WOOL.—At Havre, in the week ending Friday, about 600 bales Buenos Ayres and Monte Video, unwashed, were sold at 1f 75c to 2f 55c the kilog. The arrivals exceeded 1,500 bales. This week, Buenos Ayres, unwashed, 1f 15c to 2f 42½c; Monte Video, unwashed, 220f to 225f the 100 kilogs; and Buenos Ayres, unwashed lamb, 112f 50c.

TAILOW.—Calm prevailed at Havre in the week ending Friday: 100 half pipes of La Plata, for delivery, at 51f 50c the 50 kilogs; 25 casks New York, a la marque, 51f 50c; and 15 ditto, old, 49f 50c. By auction, 53 casks New York, indifferent quality, were offered, but only 5 were sold, at 47f. The arrivals were 331 casks. This week, La Plata, for delivery, 51f 50c, and disposable, 51f 25c; New York, 51f.

Springs.—At Paris, yesterday, 3-6 first quality, disposable, were 74f 50c the hectolitre. At Bordeaux, the day before yesterday, 36-Languedoc of 86 deg., was 86f.

Languedoc of 86 deg., was 86f.

| A STATE OF THE PARTY OF THE PAR | 2 | | | - | |

27,986 tons; and Western, 27,264 tons; making a rock of tons.

The account of the post office savings banks for 1863 has been laid before Parliament. The deposits received in the year amounted to 2,649,919l; the withdrawals were 1,026,207l, withdrawals including interest as well as the original deposit. The principal and interest due to depositors at the end of 1862 was 1,698,302l, and at the end of 1863 8,876,828l, or very nearly double the amount at the beginning of the year. The charges of management and expenses for the year 1863 amounted to 25,403l, to which must be added the allowance to post-masters and others for conducting the savings banks business during the year, the rate of remuneration not being finally settled.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending April 2, 1864, compared with the previous month:—

nts of specie held by the Scotch and Irish banks during the month

The preceding accounts, compared with those of last week,

| An INCREASE of Circulation of | Æ861,190 |
|---|-----------|
| An INCREASE of Public Deposits of | 763,167 |
| A DECREASE of Other Deposits of | 341.188 |
| An INCREASE of Government Securities of | 50,000 |
| An INCREASE of Other Securities of | 1,058,793 |
| A DECREASE of Bullion of | 113,582 |
| An INCREASE of Rest of | 12,036 |
| A DECREASE of Reserve of | 641,547 |
| | |

The decrease in the private deposits, 341,133l, and the increase in securities to 1,058,792l, which have led to the diminution of 641,547l in the reserve, constitute a sufficiently unfavourable Bank return to account for the change announced in the rate of discount. The decrease in the coin and bullion is not very important, amounting only to 113,532l.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1854:—

| At corresponding dates with the present week | 1854. | 1861. | 1862. | 1868. | 1864. |
|---|------------|------------|------------|------------|------------|

In the corresponding week of 1854, news amounting the bombardment of the fortifications of Odessa had been received.

In 1861, the House of Commons had agreed to the repeal of the paper duty. Disputes had again become prevalent in the building trade, on the question of payment by the hour. Additional failures had been reported amongst firms engaged in the Levant trade. Large withdrawals of gold were being made from the Bank for New York. In America, Maryland had risen against the North, and large bodies of Federal troops were being concentrated around Washington, where an attack by the Virginian levies was expected. The preparations for war continued active on both sides.

In 1862, King Victor Emanuel had entered the city of Naples. The Prussian elections were taking place. Rather more activity had manifested itself in the money market. The outline of Mr Laing's financial statement had been received by telegram from India, where its publication had caused a rise in the Government securities.

In 1863, money was easy in the London market. Stocks and securities generally were firm. The rate of discount at the Bank of France had been reduced from 4 to 3½ per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1854, a deficiency of 4,060,929l; in 1861, a deficiency of 7,070,737l; in 1862, a deficiency of 3,766,208l; and in 1863, a deficiency of 4,348,120l. In 1864, the deficiency is 8,622,257l.

DISCOUNT AND MONEY MARKET.—The Bank Directors have this week announced two successive alterations in the rate of discount. On Monday, it was advanced to 8 per cent.; and in the course of yesterday, the further rise to 9 per cent. was determined upon; and we have elsewhere indicated what we believe to be the probable future at the present moment.

The Bank of France have to-day advanced their minimum.

The Bank of France have to-day advanced their minimum rate to 7 per cent.; and the Bank of Berlin a few days back notified a rise of ½ per cent., from 4½ to 5. In the continental markets generally money is abundant from the steppage of trade caused by the war. This event has given us an increase in the carrying trade, and in some other branches, leading to an extension of our engagements and consequent requirement of capital at a time when, from similar causes in America, great additional impetus has been already communicated to the enterprise of this country.

An active demand for money has existed throughout the day, and the following rates are for the reasons already given merely nominal, much depending on the eargerness or the necessity of the borrower:—

| 30 to 60 days | 9 10 per cent. |
|---------------------|-----------------------|
| 3 months | 9 per cent. upwards. |
| 6 months Bank bills | Si 10 per cunt. |
| - Trade ditto | 10 per cent. upwards. |

The rates on deposits at the discount houses and at the int stock banks are as follows, the only change being that ioint steek banks are as follows, the only mange they give 6 per cent, at seven days' notice and 7 per cent, on deposits at 14 days' notice, an alteration of 1 per cent, in ch case. The rate at call is only 5 per cent.

The value of money in the Stock Exchange has been greatly affected by the outside alterations. Yesterday extreme rates were paid. To-day there has been greater quiet, nd the quotation is 8 to 9 per cent. from day to day, on good

The following are the rates of discount in the chief conti-

| | 54 6 | - Dille. | |

Bullion.-63,000l have been taken to the Bank to-day.

The biddings for the 300,000l Government bills on India were received on Wednesday at the Bank of England. The total applications within the limits only amounted to 850,0001. 133,700l were allotted on Calcutta, 120,000l on Bombay, and 46,300l on Madras. The minimum prices were unaltered: 1s 112d on Calcutta and Madras, and 1s 112d on Bombsy. Tenders on Calcutta and Madras, at 1s 114d, receive about 21 per cent.; on Bombay, at 2s 0gd, about 66 per cent.; above these prices, applicants will receive in full.

ENGLISH FUNDS .-- The depression in the prices of Governent stocks is consequent on the greatly increased value of money, which not only promotes many realisations, but also deters investors from purchasing so long as chances appear of a further decline. The settlement of the monthly account has also contributed to the heaviness of the markets. There was also so a great disposition to borrow upon Consols that the rate equalled and even, for a time, exceeded the Bank minimum of 9 per cent. Politics and the manifestly unsatisfactory position of affairs abroad have added to the adverse influences operating upon prices, which close heavy. Consols for money, $90\frac{1}{2}$ to $90\frac{6}{3}$; and for the account, ex div., $89\frac{6}{3}$ to $89\frac{7}{4}$. New 3 per Cents. and Reduced, 88 to $88\frac{1}{3}$. India 5 per Cents., $104\frac{1}{2}$ to 105.

Exchequer bills are of course lower, 15s to 5s discount, and India bonds have participated in the movement, closing 20s

to 10s discount. FOREIGN STOCES.—Dear money and the unfavourable appearance of foreign politics, which induces sales here for foreign as well as for home account, have occasioned a general decline. Speculation, which had become very active in Mexican, in Greek and Passive stocks, and in Turkish Consolides, has received a severe check. In these latter, the movements of troops and the consequent expense to the State has had to do with the decline. In the non-dividend paying stocks, such as Spanish Passives and Greek, every increase of the rate of discount adds a certain annual rate of loss; while, at the same time the horses of the explainting the same time the horses of the same time. count adds a certain annual rate of loss; while, at the same time, the chances of the combinations by which they were to be turned into dividend-paying securities is diminished. Hence the advance in the value of money has told with greater force on these markets, and many realisations have been pressed in face of the uncertainty with which even the immediate future is regarded. Mexican scrip has improved on purchases for foreign account; and the Confederate loan remains in demand. mains in demand.

mains in demand.

The closing prices of stocks dealt in to-day are subjoined:—4½ per Cent. Brazil, 1863, 85 to 86; 7 per Cent. Egyptian, 100 to 101; Greek, 21¾ to 22; Coupons, 10¾ to 11¼; Mexican, 42¼ to 42½; 4½ per Cent. Peru, 1862, 84 to 86; Portuguese 3 per Cents., 47½ to 48; 5 per Cent. Bussian, 1822, 36 to 88; ditto, 1862, 84½ to 85½ ex div.; 5 per Cent. Sardinian, 83 to 85; Spanish Passive, 33½ to 33½; Coupon Certificates, 11 to 11½; 6 per Cent. Turkish, 1858, 68 to 69; ditto, 1862, 70 to 71; ditto, 4 per Cent. guaranteed, 99 to 101; Venezuela 6 per Cent., 54 to 55; Italian 5 per Cent., 66¾ to 67½.

French 3 per Cent. rentes, which declined to 66.30 on the

announced rise to 7 per cent. in the rate of discount, have re-covered, and are quoted at the close 66.45 for the next account,

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

RAILWAYS AND OTHER SHARES.—English railway stocks have necessarily declined under the circumstances that have more or less affected all the markets. Nevertheless, the reduction in price has not been so considerable as in other securities, and the tone of the markets show more strength than in thou where speculation has flourished to a greater extent. Great Eastern shows a decline of 1 per cent. Great Northern a similar fall, and the "A" stock of 1 per cent. Great Western is 1½ per cent. lower. Lancashire and Yorkshire quotes 1½ per cent., and London, Brighton, and South Coast 2 per cent. lower. London, Chatham, and Dover is noted at 3 per cent. lower. London, Chatham, and Dover is noted at 3 per cent. decline from the prices of last Friday. In London and North-Western and London and Great Western the adverse movement is 12 per cent. and 1 per cent. respectively. Metropolitan 31 per cent., and Midland 12 per cent. lower. South-Easte is quoted at a fall of 1 per cent. from last week's quotation. Colonial and Indian securities are heavy, and the few deings in foreign shares have also been at reduced prices.

In the markets devoted to the extensive operations carried on in miscellaneous and new shares a state of semi-panio h at times prevailed. A few advertisements of new projects appeared on Monday and Tuesday, but no subsequent notices have been issued. The speculation existing in the shares in new companies, founded in many cases rather because the disposition of the public was favourable to their introdu than for any reason that called for their establishment, appears now likely to come to a close. As regards those who, having taken early advantage of the openings that existed, have made good use of the time nine clapsed to establish the business for which they were created, it is probable that a prosperous course may lie before them if their operations should be conducted with due discretion. With record to the later combinations discretion. With regard to the later combinations, many may now be crippled, and perhaps forced into the Vice-Chancellor's Court, simply on account of the accidental hindrance which the tightness of monographs are to the account of the accidental hindrance which the tightness of money will present to the accumulation of the capital required for their business. So far as the vast majority are concerned, those brought out with a view to, or supported by fictitious premiums, defaulting shareholders, and the impossibility of finding the necessary resources, are like enough to impede the very next steps they may desire to take Many of these speculations have been commenced upon bor-rowed money, which will be promptly recalled now that danger appears to loom in the future. It is clear that many of the lenders, who, tempted by the continuous advance in price of shares, and by the liberal rates of 20, 30, and 40 per cant. referred to as having been paid for accommodation last at will, now that the premiums are subsiding, very an release the capital they have imprisoned in registered release the capital they have imprisoned in re-As also the registry involves some additional calls upon sh

whose premium has evaporated, and upon which a fifth only is in most instances paid up, it is likely that their anxiety will be all the stronger to disposess themselves at once of property they are not desirous of owning, and of the liability it carries. By this means, sooner or later, will the market be cleared, and the field of operations left free to legitimate enterprise. Prices all closed flat, and sales of new allotments have affected to a great extent the shares in sound and established Companies.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

Exchanges.—Rates, influenced by the advanced value of money here, were much higher.

Bullion. - Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our last circular have been small,

during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our last circular have been small, but we are daily looking for considerable sums now on the way from New York and Melbourne; and although the present very high rate for money will materially tend to diminish the continental demand, we think that nearly all the gold now on the market will be taken to satisfy existing orders. The Persia has brought 124,500/ from New York, the Dover Castle 67,500/ from Melbourne; and the Magdalena 12,200/ from the Brazils: whilst the Seine has taken 66,700/ to the West Indies, and the Syria 16,700/ to Alexandria. About 16,000/ in sovereigns have been withdrawn from, and 64,000/ purchased by, the Bank.

Silver.—Our market is very quiet, and, owing to the dearness of money, the tone is decidedly weaker. We do not at present hear of any demand for the East; and the fine bar silver & Shannon has not yet been sold. The Doré silver has, however, been placed at 61\(\frac{3}{2} \)d per us standard; and we quote the nearest price of fine bars as from 61d to 61\(\frac{1}{2} \)d per os standard. The Seine has taken 11,800/ to the West Indies, and the Syria 20,000/ to Calentta.

Mexican Dollars.—The dellars ax French steamer Tampico, together with those brought by the Seine, have been sold at 62\(\frac{1}{2} \)d per oz, and have been taken for China by the Syria, which vessel has on board about 116,000/. Those brought by the Shannon are not yet sold; and, owing to the scarcity of orders, a further fall in the price of this coin is not improbable.

Exchange on India for Banks' drafts at 60 days' sight is lower than last week, being on Rowley 1122

owing to the scarcity of orders, a further that in the price of this continuous is not improbable.

Exchange on India for Banks' drafts at 60 days' sight is lower than last week, being on Bombay Is 114d, and on Calcutta Is 114d. Bills at ahorter dates are subject to arrangement.

India Government loan notes are somewhat lower in price this week. The 54 per Cents. 93 to 95.

Quotations for Bullion.—Gold.—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 104d per oz std, last price; ditto, fine, 77s 104d per oz std, last price; datto, refinable, 77s 11d per oz std, last price; Spaniah doubloons, 76s to 77s per oz nominal; South American ditto, 74s to 74s 6d per oz, nominal; United States gold coin, 76s 3d per oz, last price. Silver.—Bar silver, 5s 1d to 5s 14d per oz std, nearest; bar silver, containing 5 grs gold, 5s 13d per oz std, last price; Mexican dollars, 5s 23d per oz, last price; Spanish dollars (Carolus), 5s 1d per oz, last price; five-franc pieces, 4s 11d to 4s 114d per oz, last price.

PUBLIC COMPANIES.—The second ordinary general meeting of the Scinde, Punjaub, and Delhi Bank Corporation was held

of the Scinde, Punjaub, and Delhi Bank Corporation was held on the 3rd inst. The report was adopted, and a dividend at

the rate of 5 per cent. per annum declared.

An extraordinary general meeting of the English and Irish Bank (Limited) was held on Tuesday. The terms of amalgamation with the European Bank (Limited) were confirmed.

At the first ordinary general meeting of the Indian Tea Company of Cachar (Limited), the report of the Directors was unanimously adopted. A dividend of 5 per cent. for the half-year was declared, with an additional 2 per cent. per annum for the previous half-year, making altogether 10 per cent. for the year. At a subsequent special meeting, the Directors were authorised to issue the remaining 2,000 shares, to be first offered to the existing shareholders

The annual meeting of the British American Land Company was held on Monday. The report of the Directors was adopted.

At the second ordinary meeting of the Bank of Hindustan, China, and Japan, the dividend declared was at the rate of

5 per cent. per annum.
The meeting of the New Zealand Banking Corporation was held on the 2nd inst. The dividend declared was at the rate of 7 per cent. per annum. It was decided to reduce the nominal value of the shares to 10l per share, and to increase their number in proportion. The remaining 2,000 shares are

to be issued at a premium of 25 per cent.

At the meeting of the Atlantic Royal Mail Steam Packet Company, the report of the Directors was adopted. It was stated that the contract with the Government is open till the 1st June. On that day the Company will have to send an answer to the Government. The Directors hope to preserve the contract.

The Ramsgate Bank has united with the South-Eastern Banking Company.

A general meeting of the shareholders in the London Bank of Scotland was held on the 4th inst. It was proposed to issue 10,000 new shares of 100*l* each, at a premium to be named by the Directors.

At the meeting of the shareholders of the London and Provincial Marine Insurance Company, the resolution to issue the Company's reserved shares at 1l per share prem. was confirmed.

The report issued by the Directors of the North British Australasian Company, in anticipation of the meeting of the 17th inst., proposes the increase of the capital of the Company to 220,00*l*, by the issue of 32,565*l* fi per cent. guaranteed stock.

At the meeting of the Sovereign Life Assurance, the new premiums were stated at 6,481l 5s 8d, assuring 193,815l. The shareholders of the Iberian Irrigation Company held

their general meeting on the 5th inst. The Society is to be established in Spain, and the ordinary general meetings are to

be held on the first Thursday in May.

The expected concession of the Allied French Society has been obtained by the General Credit Company, and it has been resolved to increase their capital by the issue of 195,000 new shares, to be issued in the following order, at a premium of 11 5s:-20,000 to the French Company; 25,000 to the founders and directors; 80,000 to the shareholders. Directors, however, propose to modify this distribution by an increase of 1,333 shares in the amount to be given to shareholders, giving a right of two new to every holder of their old shares.

The Scottish and Universal Finance Bank (Limited), capital 1,000,000l, in 20,000 shares of 50l each: first in 10,000 shares,—adopt as their model the Credit Mobilier of Paris, and consider it wonderful that Scotland, with her large commerce and well-established credit, has no similar institution. The Directors have succeeded in purchasing the well-known business of Messrs D. Nathan and Co., of Cornhill, tution. London, as bullion and exchange brokers, upon satisfactory conditions, which will form the nucleus of a London busines in which Scotch capital can be safely and advantageously employed.

The Ashton Vale Company (Limited),—capital 150,000l in 6,000 shares of 5l each,—is formed to purchase and work certain valuable coal and iron ores, and to establish the manufacture of wrought and finished iron in the neighbourhood of Bristol. The present possessors require no payment in cash, but are quite ready to be satisfied with debentures secured on the undertaking only. The extent and value of the coal field in the neighbourhood of Bristol and the Aston side of the city is well ascertained.

The share list of the Bonelli's Electric Telegraph Company closes to-day, the 7th inst., for London, and for the country on the 14th inst. The shares are 1\frac{1}{4} to 2 prem. At an extraordinary general meeting of the shareholders of

the Warrant Banking Company (Limited), held at the London Tavern, Mr. A. D. De Pass in the chair, two resolutions were Tavern, Mr. A. D. De Pass in the chair, two resolutions were passed unanimously confirming the decision of a previous meeting, held on the 13th April, whereby the name of the company is changed to that of the "Warrant Finance Company (Limited)." The chairman stated that the Board of Trade certificate will probably be procured by Monday, the 9th instant, in which case the company will at once commence operations, as much business has already been offered to it.

The National Financial, and not the International Company as stated last week, invite subscriptions for shares in the

Albert Insurance Company.

The shares of the Scottish and Universal Finance Bank have

ben done at 14 to 2 premium.

The Share list of the Land Credit Company of Ireland will be closed for London on the 9th, and for the country on the 11th inst.

The Italian Credit Association,—capital 3,000,000/in 60,000 shares of 501 each (with power to increase); first issue 30,000 shares, of which 10,000 have already been subscribed—is intended to promate and encourage the monetary, financial, and industrial undertakings of Italy, a country which

financial, and industrial undertakings of Italy, a country which is starting into life and activity, and of which scarcely any one can doubt the prospects or the permanence.

We have received the following letter with respect to the British and American Exchange Banking Corporation:—

To Mr Slaughtem, Secretary to the Stock Exchange.

Sin,—We have observed with great concern and regret the recent extensive speculation in the shares of this Bank, and have heard it alleged that the Directors are concerned therein. We, therefore, take the semewhat unusual course of stating to you, for the information of the members of the house, that we have not in any way, directly or directly, assisted in producing the late extraordinary rise in the premium on the shares; and as we are well aware that it must be prejudicial to the interests of them did involves to allow the shares to serve an the medium of merely speculative operations, we have no hesitation in saying that, although the business is progressing in a satisfactory manner, there is nothing whatever in its present position to justify the resent rapid advance in the price of the shares.—We are, air, your obedient servants, (Signed) H. G. GORDON, H. LITTLEDALE, THOS. RESS.

JOHN PENDER, THOS. REES, ROBT. GILLESPIE, JOHN GILCHRIST, WM. RENNIE, SAMUEL STIFF,

Archirald Boyd, Wm. Rennie,
Directors of the British and American Exchange

Banking Corporation, Limited.

1 Bank Buildings, Lothbury, London, E.C., 6th May, 1864.

The announcement in our last week's impression in reference to the Scinde, Punjaub, and Delhi Bank Corpora-tion, was, to some extent, incomplete and erroneous. It should have been in effect that the Corporation, having its head office in King William street, London, is in full opera-tion, that additional branches will shortly be opened in India, and that the meeting of shareholders had been convened for the 3rd inct.

COMPARATIVE EXCHANGES. COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the abort exchange on London is 25.32½ per 1/1 sterling. On comparing these rates with the English Mint price of 3/1 17s 10½d per ounce for standard gold, it appears that gold is 1-10th per cent. dearer in London than in Paris.

The sourse of exchange at New York on London for bills at 60 days' sight is 183 to 186 per cent., and the premium on gold is 68 to 70 per cent. premium. At these rates there is a slight profit on the importation of gold from the United States. The quotations are still very irregular.

AMERICAN STOCKS.

The agreed quotations—is 6d to the dollar—are taken from Mr B. F.

The Commercial Times.

The Overland Mail.—Under a new arrangement made by the Peninsular and Oriental Company the route between Marseilles and Alexandria will after this month be worked by the same steamers as earry the mails to and from Southampton, instead of by a separate line of vessels as at present. The Syria, which left Southampton on Wednesday with the Calcutta and China mails, is the first vessel outwards under this new arrangement, and on her arrival at Alexandria, instead of bringing home the next mail as heretofore, she will take the overland portion of the homeward mail down to Marseilles, return to Alexandria with the outward overland mails, and then bring the heavy mails home to Southampton, so that she will be due here with the India, China, and Australian mails on the 18th of June. The vessels will, therefore, be six weeks away from Southampton instead of a month as at present.

In consequence of some alterations which have been made in the arrangements of the French Mail Packet Service in the Mediterranean, letters, &c., intended to be sent to Civits Vecchis and Naples, by French packet, despatched from London by the day mail of every Wednesday, or the night mail of every Saturday, will, in the ordinary course, be in time to be forwarded by the packets leaving Marseilles on the following Thursday and Monday.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was but moderate, yet the trade for both red and white qualities ruled far from active, at Monday's currency. In foreign wheat, millers limited their purchases to the supply of their immediate wants; nevertheless, prices ruled firm. Barley, oats, beans, peas, and flour, met a slow sale, but without leading to any variation in prices, compared with Monday. This week's imports amount to 6,020 quarters of wheat; 1,690 barley; 7830 oats; 100 sacks and 10.800 barrels of flour.

At Liverpool, this morning, there was a steady demand for wheat, and prices advanced 1d to 2d per cental. Flour was rather dearer; but in the value of maize, no alteration took place. Wheat, at Wakefield, was held for more money; but no improvement in the currency was established.

A large business has been again transacted in the Liverpool cotton market. The total sales have reached 99,000 bales, of which spinners have taken 56,000 bales, speculators, 28,000, and exporters, 15,000 bales. Quotations are generally \(\frac{1}{2}\)d to \(\frac{1}{2}\)d above those those current last Friday. Since yesterday, upon the Bank rate being advanced to 9 per cent., the demand has somewhat abated, and the business of to-day is on a limited scale. Sales, 5,000 bales.

The rapid rise in the value of money has been productive of considerable depression in the markets for colonist and foreign grocery produce. The public sales of tea have passed off heavily, and a large proportion has been sold "without reserve," at rather lower prices. In the value of raw augar, a decline of 6d to 1s per swt has taken place; and in the retined market, common brown lumps have fallen to 50s 6d per cwt. Coffee is also lower in price, last week's advance of 6d to 1s per cwt in plantation Ceylon produce having been lost. Cocoa, rice, and dry fruit have changed hands to a limited extent, at about last week's currency. currency.

Advices from China state that the demand for tea was by no eans active, but that the export to Great Britain from all ports and, since June 1, amounted to 106,625,000 lbs. The sugar trade Havana. during the week ending April 9, was in a healthy had, since June 1, amounted to 106,625,000 lbs. The sugar trade at Havana, during the week ending April 9, was in a healthy state, and considerable business had been done in all qualities, at enhanced rates. Ordinary yellow produce, Dutch numbers 10 12, sold at 28 s 6d to 29 s 1d; middling ditto, 13 to 14, 29s 9d 30s 4d; fine ditto, 15 to 16, 30s 11d to 31s 7d; florete, 17 to 19, 32s 2d to 33s 5d; and middling white, 34s 7d to 37s 1d per cwt, free on board. "The aggregate exports of sugar from Havana, Matanzas, Cardenas, Sagua la Grande, and Cienfuegos, from January 1 to March 30," observe Messrs Morales and Co., "show a deficit of 14,500 tons, or about 15 per cent., compared with last year." The accounts at hand from the British West India islands respecting the approaching crop of sugar are unsatisfactory, owing to the dry weather which has prevailed in the leading districts. In Manilla, the crop is stated to show a considerable failing off, compared with last year.

The following table is from Messrs Trueman and Rouse's circular:—

In the spirit market, the amount of business doing is very moderate. Both brandy and rum, however, support last week's quotations. The stock of brandy is 15,535 pure, against 12,257 puns last ye

The second series of public sales of colonial wool for the present year commenced yesterday. The total arrival, since last series, amounts to 103,763 bales, consisting of 15,281 bales from Sydney; 46,958 Victoria; 1,588 Tasmania; 16,470 Adelaide; 2,079 Swan River; 8,854 New Zealand; and 12,523 bales from the Cape of Good Hope. The attendance of buyers—both home and continental—was large, and the biddings, notwithstanding the advance in the Bank rate to 9 per cent., ruled active, at the full prices current at the close of last sales. To-day, both home and foreign buyers have purchased freely, at extreme rates. English wool, by private contract, is firm in price. by private contract, is firm in price.
At Liverpool, the wool trade continues very firm, and the recent

At hiverpoon, the wool trade continues very nrm, and the recent advance in the value of home-grown produce is well supported. The public sales of East India wool commenced on the 3rd inst., and they have gone off with considerable animation, at an advance in prices of 1½d to 2d per lb, the greatest rise being upon middling white and earding wool white and carding wool.

white and carding wool.

We learn from the Cape that the demand for wool for shipment to the North American States ruled active, and that 8½ to 9½d per 1b had been paid at Port Elizabeth for best greasy wool for that purpose. Freight for London at Cape Town was 1d to 1½d per 1b; at Algoa Bay, ½d to ½d per 1b. To the United States, the rate of freight was ½d per 1b for grease wool.

Hemp has further declined in value, the quotation for clean Russian qualities, on the spot, being 34l to 36l per ton. The public sales of jute have passed off heavily, at a reduction in prices of from 15s to 20s per ton.

The public sales of East India indigo are announced to commence on Tuesday next. The declarations amount to 9,345 chests, of which only 760 chests are in the B catalogue.

Respecting the silk trade at Shanghai, we learn that the settlements during the forteight ending March 26, amounted to 800 bales. The export from July 1 to date, was 36,250 bales.

As regards the leather trade during the past week, Messrs Powell and Co. write as follows:—A fair average demand for leather has prevailed, with generally adequate supplies; consequently scarcely any variation in prices has taken place. There is one important branch of the trade which is at present in an unsatisfactory condition,—that of the manufacture of South American hides. The import and sales of raw goods have again been confined to Australian hides and East India kips. A slight advance on heavy Australian hides is almost the only variation to notice in prices. The stocks generally are still small.

In reference to the state of the tobacco trade, last month, Messrs Grant, Hodgson, and Co., observe:—The principal sales have been of Western strips of last year's importation at concessions on previous rates. Good and fine of old import to the extent of upwards of 100 hhds were taken at full quotations. Sales of all sorts are estimated to 1617 helds wig. 593 hhds Western loaf. \$511 hhds.

vious rates. Good and fine of old import to the extent of upwards of 100 hhds were taken at full quotations. Sales of all sorts are estimated at 1,617 hhds, viz.:—523 hhds Western leaf, 851 hhds strips, 6 hhds Virginian leaf, 33 hhds and tierces of strips, and 204 hhds Maryland. Spinning qualities, both leaf and strips, have been inquired after, and holders disinclined to make sales unless at full rates. Imports, 537 hhds. Deliveries, 1,091 hhds, against 1,051 hhds in the corresponding month of last year. Stock, 16,983 hhds, against 18,443 hhds in 1863, 23,389 hhds in 1862, 18,988 hhds in 1861, 17,326 hhds in 1860, 11,942 hhds in 1869, and 8.571 hhds in 1858.

1859, and 8,571 hbds in 1858.

In the value of metals, several important changes have taken place. English tin has been reduced 4l, and copper is obtainable at 3l per ton below the fixed rates; but spelter has ruled firmer, at 2ll 10s per ton on the spot. Scotch pig iron has sold at 58s 3d and 59s cash, mixed numbers. Tin plates have fallen 1s per box. The stock of iron in yards at Glasgow is 317,200 tons, against which there are warrants in circulation for 309,000 tons. The stock of spelter in London, on the 1st inst., was 11,655 tons, against 11,900 on April 1, current year; and 3,948 tons on May 1, 1863. The following table is in reference to Banca tin in Holland:—

| olland:— | 1864. | | 1863, slabs. | | 1862. | |

Society for their annual sale ... 118058 ... 101325 ... 139884
Most oils have been dealt in to a limited extent; but in the
tallow trade, rather more firmness has prevailed, and P.Y.C. has
advanced from 40s 3d, at which price it stood at the commencement of the week, to 40s per cwt on the spot, the quotation

At New York, during the week ending April 23, the stock market had been in a state of great excitement, and a fall varying from 20 to 50 per cent. had taken place in the value of the leading securities. The sale of gold certificates had been discontinued, but gold was easier, at 77 per cent. prem. The Gold Bill, which had passed the Senate, and would probably become law, immediate

ately provides "that it shall be unlawful to make any contract for the purchase or sale or for the delivery of any gold coin or bullion, or of any foreign exchange, to be delivered at any time subsequent to the making of such contract, or for the payment of any sum, either fixed or contingent, in default of the delivery of any sum, either fixed or contingent, in default of the delivery of any gold coin or bullion, or of any foreign exchange, or upon any other terms than the immediate manual delivery of such gold coin, or bullion, or foreign exchange, and the immediate payment in full of the agreed price thereof, by the manual delivery of the United States notes, or national currency, and not otherwise, or to make any contract whatever for the sale, loan, or delivery of any gold coin, or bullion, or foreign exchange, of which the person making such contract shall not, at the time of making such contract, be the bona fide owner, in actual possession; that it shall be unlawful for any banker, broker, or other person to make any purchase or sale of any gold coin, or bullion, or of any foreign exchange, or any contract for such purchases or sale, at any other place than the ordinary place of business of either the seller or purchaser, owned or hired and occupied by him individually, or by a parnership of which he is a member; and that all contracts made in owned or hired and occupied by him individually, or by a parnership of which he is a member; and that all contracts made in violation of this Act shall be absolutely void." In the general state of trade, there was no activity, yet very little change had taken place in prices. The stock of bullion in the banks had further increased, the amount held on the 16th ult. being 4,337,540l, against 4,184,160l at the close of the preceding week. The export of specie from Jan. 1 to April 16 amounted to 2,356,190l, against 3,239,356l during the same period last year, 2,213,000l in 1862, 466,626l in 1861, and 1,041,680l in 1860. The imports of merchandise during the same period were valued at 14,198,590l, against 11,023,842l last year, and 10,071,780l in 1862. The value of money—owing to the panic in the stock market—was, in a great measure, nominal.

IMPORTS, EXPORTS, CONSUMPTION, &c.—1864.

Imports from Jan. 1 Exports from Jan. 1

on speculation, and 14,730 declared for export, leaving 56,490 cales to the trade.

To-day the market is dull, the sales about 5,000 bales, including 2,000 on speculation and for export. Prices are a shade lower than yesterday.

The quantity of East India cotton now affoat is 281,000 bales, against 230,000 bales last year.

MARKETS IN THE MANUFACTURING DISTRICTS.

Although money has become high in price in the discount market, a full average business has been transacted in goods, this week, in the manufacturing districts, and prices have been fairly supported. Iron has sold slowly, on rather lower terms. Coals have met a dull inquiry, at easy rates.

Manchester, May 5.—On Friday and Saturday of last week, this market became considerably excited, and both spinners and manufacturers were getting rapidly filled up with orders. The rise in discounts on Monday came just in time to prevent a very strong advance in quotations for all our staples. On Tuesday, higher prices were still asked for many articles, but others were morely firm at the same value as before. The business of the week has consisted more especially in buying what was required for the completion of old contracts, and little new business has been attempted. In the Eastern department, simost no business may be said to have been dune, and the additional monetary check today has placed such fabrics as are prepared only for distant

markets quite at a nominal valuation. A moderate demand, nevertheles, has continued from printers and the home trade.

Bradford.—On the whole, the position of the wool trade is unchanged, except that an increased caution prevails. Spinners, whenever they can, hold aloof from buying, but when they must have the wool, they have to pay full rates for it. Prices of yarms maintained with firmness, and the genappe spinners, who have had such a run upon them have again raised their quotations in order to keep off orders. Picces—Extensive operations in fancies have taken place. The home demand and the American trade are unchanged, and the business in the warehouses has been brisk. Little is doing for France. Manufacturers are extremely busy and adhere firmly to their quotations. Little is doing for France. Manufacturers are extremely and adhere firmly to their quotations.

and adhere firmly to their quotations.

Leeds.—The spring trade is now nearly over, but a little demand is still felt for the lighter toned fabrics suitable for summer wear. The shipping houses are moderately active, there being a steady demand for most foreign countries to which the woollen fabrics of West Yorkshire are usually seat. Wools are very firm, both the clothing and the combing kinds. The best qualities of the clip of English wool in Yorkshire fetch fully 2s 6d per lb. The flax trade, though rather quiet is steady.

clip of English wool in Yorkshire fetch fully 2s od per 10. The flax trade, though rather quiet, is steady.

Rochdale.—The manufacturers are full of work and running their machinery full time, and the general prospects of the trade are very satisfactory. Yorkshire goods are in increasing request, and fetch fully late prices. The wool market is steady.

Leichtelm.—The hosiery trade continues active. Most branches are well employed, and future prospects are encouraging. In the country districts business is yet quiet. The yarn market is very firm, and animora are well engaged.

country districts business is yet quiet. The yarn market is very firm, and spinners are well engaged.

Northedam.—There is about as much doing in the home lace trade this week as last, but very few orders came in from the Continent, the Dano-German war preventing buyers from operating freely. There is more doing in hosiery goods. More orders have been placed, both for home goods and for shipping.

Dunder.—Prices of the better descriptions of flax are without change, but inferior qualities being still very abundant are being forced off at low prices. Several arrivals from Riga have taken place during the week.

forced off at low prices. Several arrivals from Riga have taken place during the week. The demand for tows is not active, but occasional transactions take place at prices tending in favour of buyers. Jute is very quiet. The yarn market has been unfavour-ably influenced by the advance in the Bank rate. A large business continues to be doing in many kinds of linen.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, April 23.—Owing to the limited requirements of export buyers, and the fall in the price of gold, a heavy reduction has taken place in the value of flour since we last wrote. State is quoted at \$7 to \$7.80; Ohio, \$8.5 to \$9.25; Michigan, Indiana, Wisconsin, &c., \$7.90 to \$8.15; and Canada, \$7.60 to \$9.20 per barrel. In wheat, notwithstanding that the stock is small, a decline of 5 to 6 cents has occurred. White Michigan has realised \$1.90 to \$2; amber Jersey, \$1.80; and amber Michigan, \$1.86 per bushel. Corn is also lower, old Western mixed being quoted at \$1.30 to \$1.32; and new yellow, \$1.32 to \$1.33 per bushel.

Exports of Grank, &c., from April 1 to April 19.

1862.

EXPORT OF BREADSTUFFS from the United States to Great Britain and Izelah since September 1, 1863.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The arrivals of home-grown wheat up to our market, coastwise nd by land-carriage, have been on a moderate seale. amples, however, have mostly come to hand in good saleable condition. For most kinds, the demand has somewhat improved, and, in some instances, the quotations have advanced 1s per quarter. Foreign wheat—the imports of which have been by no seans extensive—has met a slow inquiry, at late rates. The supply of barley has fallen off; nevertheless, the trade has continued in a very inactive state. In prices, no actual decline has taken place. Malt has come freely to hand, and the sale for it has ruled heavy, at the late decline in value. The inquiry for oats has been somewhat restricted. Quotations, however, may be considered steady. We have no change to notice in the value of either beans or pens. For the most part, buyers are well in stock. There has been a moderate inquiry for both English and foreign flour, at late rates.

reign flour, at late rates.

Advices from most parts of the Continent state that wheat has been passing in Spring corn, at moderate quotations. In merica, both wheat and flour have fluctuated considerably in rice. The shipments to England have not increased. Large walls have some affect the Work.

America, both wheat and nour nave nucleared considering price. The shipments to England have not increased. Large supplies, however, continue on offer at New York.

In Scotland, the wheat trade has shown more firmness, and prices have had a hardening tendency. Barley and most other articles have changed hands to a fair extent, at full quotations.

The Irish markets have ruled steady for wheat, at extreme quotations. All other kinds of produce have moved off heavily, at about previous rates.

At Mark lane, to-day, the trade for English wheat 'was decidedly firm, and Monday's prices were tully supported. The demand, however, ruled far from active. In foreign wheat, only a moderate business was transacted, but at full quotations. Oats were firm, and rather dearer; but other articles met a slow sale, were firm, and rather dearer; but other articles met a slow sale,

Mr George Dornbusch reports the arrival of 19 cargoes of grain off coast, and a steady demand for wheat afloat, at 1s to 1s 6d per quarter more money. Other kinds of produce have moved off slowly, but at full prices.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY MORNING

MINGING LAME, FEIDAY MORNING

SUGAR.—There has not been any improvement in the demand this week, and quotations have further receded 1s, or in some cases even 2s, owing to the high value of money. The refiners still make very moderate purchases, and the market remains unsettled. Fine sugars participate in the above fall, and more than reduction of the duty upon these is gained by the trade. Of West India, 1,352 casks had sold in three days, including part of 873 casks 1,365 bags by auction. Barbadoes at 38s to 42s 6d; grainy Demerara and Berbice 42s to 47s 6d per cwt. The week's delivery did not exceed 4,090 tons, being 511 tons less than in 1863, and the decrease since the 1st January is 12,765 tons. Present stock, 63,850 tons, against 71,415 tons last year.

Manufitus.—By auction, 7,527 bags chiefly sold at 6d to 1s 6d decline:

Mawrities.—By auction, 7,527 bags chiefly sold at 6d to 1s 6d decline: grainy and crystallised, 42s to 46s 6d; soft brown, 36s to 37s 6d per cwt. Some business has been done in soft brown descriptions privately.

Madras.-500 bags native were brought in at 34s 6d to 36s 6d per

engal.—1,135 bags date kinds (part Gurpatta) were withdra above the value

above the value.

Manilla.—20,000 bags new clayed sold during the week at 38s 6d.

Subsequently, 5,500 bags, part for cash, at 37s to 37s 6d per ewt.

Foreign.—By auction, 55s casks, 80 barrels Porto Rico partly sold at lower prices: low to good, 40s to 43s. Four floating cargoes of Cuba muscovado have sold at 29s 6d to 30s 9d for the United

Cuba muscovade have sold at 29s 6d to 30s 9d for the United Kingdom.

Refined.—The market has been unsettled. Low to middling dry goods, 50s 6d to 51s per cwt. Stocks are getting low. Pieces and crushed remain dull, owing to the further reduction in fine raw sugars.

COFFEE.—Quotations of plantation Ceylon have fallen 1s to 1s 6d during the week, but the increased supplies brought to austion chiefly met with buyers, 1,523 casks 730 barrels and bags obtaining 78s 6d to 86s for mixed and low middling to good, and 90s 6d for fine. Native has declined to the same extent, 108 casks and barrels 4,644 bags selling at 68s 6d to 71s for good ordinary to good. 43 cases good Cochin sold at 87s 6d to 88s. 381 packages Mocha chiefly met with buyers at 90s to 95s for clean garbled. 627 bags of Singapore withdrawn at 62s per cwt. About 1,500 bags Rio have changed hands privately. The increase in the deliveries over last season is, for export, 1,263 tons; for home use, 228 tons; and the stock is 1,408 tons in excess.

Cocoa.—By auction, 230 bags St Lucia partly sold at 52s 6d. Privately, some Bahia has been sold at 44s, and Grenada at 54s to 56s per cwt.

The large public sules have progressed flatly, and at lower

Privately, some Bahia has been sold at 44s, and Grenada at 54s to 56s per cwt.

Tra.—The large public sales have progressed flatly, and at lower rates for some descriptions, including common black leaf congou, red leaf congou, and flowery pelco.

There were 66,050 packages in catalogues, and 34,800 passed from Tuesday to Thursday inclusive; 17,936 packages being sold, chiefly parcels printed without reserve.

Saco.—1,121 boxes partly sold, at slightly easier rates; good small, 23s 6d to 24s; medium, 22s to 22s 6d; bold, 25s 6d per cwt.

Spices.—Black pepper is dull, and 1,500 bags in the public sales were chiefly taken in at previous rates. A few lots of good heavy Malabar sold at 43d to 43d, and a small parcel of Trang, at 32d. 32 cases mace partly sold at former rates: low to good, is to 2s. 57 cases brown nutnegs sold steadily, at 1s 1d to 2s 1d for small to fair brown, with fine bold at 3s 4d. 232 bags piments sold on former terms, from 23d to 23d. 50 bags Singapore white pepper were bought in at 53d per lb. 500 pockets rough Bengal ginger were taken in at 36s. 63 barrels Jamaics sold at 64s to 87s. 159 cases Cochin partly found buyers at rather lower rates, from 65s to 90s per cwt for low to good.

Rice.—At auction, 1,000 bags low cargo Bengal were taken in at 86 6d; 1,743 bags low Rangoon at 8s 3d, and atterwards sold at 6d less, with short prompt. Two floating cargoes of Necrancie Arracan have sold at 10s 43d. On the spot, moderate transactions have occurred: Rangoon and Bassein, 8s to 9s 6d; Moonghy, 8s 9d to 9s 13d; white Bengal, 10s 6d to 13s per cwt.

, 108 60 TO 136 per cws.

LEPORTS and DELIVERIES of Rice to April 30, with Stocks on hand,
1864, 1863, 1862, 1861,
1807, 1808, 18090, 1809

SALTPERE.—A limited business has been done in Bengal, privately: refraction 8½ to 4½, 33s 9d to 34s 3d per cwt.

Delivered last week, \$20 tons. 1966 ... 4435

Devisalters Goods.—Gambier continues very firm, with sales at 23s 9d to 24s. Cutch dull, at 26s to 27s per cwt. Safflower is unaltered. Merals.—The stringency in the money market has unsettled business. English in has fallen 4s. Bars, 119s; refined, 113s. Tin plates have fallen 6d to 1s per box. Straits tin has declined to 106s per cwt. Spelter quiet. 200 tons sold at 211 10s per ton for delivery in May and June. Scotch pig iron is lower: mixed nos. 58s 6d to 59s per ton. Copper dull and tendency downward. Swedish iron has been active this week.

Jure.—The market continues unsettled, and 9,100 bales by auction, on Wednesday, about half sold, at a further reduction of 10s to 20s, in which the better qualities participated. Low to fine, 14/10s to 29/10s

per ton.

MANILLA HEMP sells slowly, at the reduced quotations of last week.

OILS.—There is a steady business doing in the lower qualities of clive. Sperm oil remains inactive. Cocca-nut dull: Ceylon, 38s to 38s 6d; Cochin, 41s to 41s 6d. The market for linseed has been dull, at 38s 9d. Rape is dull: foreign refined, 43f 10s; brown, 41f to 41f 10s.

Palm has been steady: fine, at 35f 10s to 36f per ton.

Spirits Turpertine sells slowly, at 83s per cwt for French drawn.

POSTSCRIPT. FRIDAY EVENING.

SDGAR.—The market is flat, and 6,109 bags Mauritius were chiefly withdrawn, there being no buyers unless at some further reduction. Week's business in West India 1,382 casks.

TEA.—8,936 packages sold in the sales to-day, and Canton gunpowders went at easier rates.

COCOA.—172 bags Grenada sold at 53s 6d to 69s 6d for good to very fine. 160 bags Bahia were bought in st 45s per cwt.

RICE.—7,319 bags Bengal were principally taken in, including 4,273 bags good to fine white of the new crop at 13s 6d to 14s 6d. 1,150 bags Necrancie Arracan sold at 9s to 9s 6d per cwt.

SAGO.—579 boxes good small pearl were taken in at 23s 6d per cwt.

SEICES.—1,709 bags pimento sold at 2½d to 2½d. 146 bags light Malabar pepper sold at 4d to 4½d per lb.

SALITETRE.—None imported.

SHELLAC partly sold at steady rates, including fine orange at 8l 2s 6d to 8l 5s per cwt.

LIMA WOOD.—1,050 tons offered by auction were chiefly taken in at 11l to 15l per ton. SUGAR .- The market is flat, and 6,109 bags Mauritius were chiefly

11/ to 15/ per ton.

DYESTUPES.—1,400 packages Gambier by auction were bought in:
common at 24s; cakes at 27s per cwt.
OIL.—312 casks palm by auction part sold up to 35s 3d. 1,118 casks
occon-nut partly sold: Cochin, 40s to 41s 6d per cwt.
TALLOW.—Y.C. advanced to 41s, and 44s 6d for the last three months.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues neglected. Dry goods nominally the same, but the unstoved have declined in consequence of the reduction on raw sugar, with which they come in competition. Dutch loaves are at present in less demand; crushed rather lower.

DRY FRUIT .- Some sales of low currants have been made at 23s 6d, but little only is to be got. The demand is less active than last week, and offers above 24s to 25s for any quality are hard to obtain. Raisins are lower, and demand inactive. Sultanas are very quiet, but prices

are lower, and demand inactive. Sultanas are very quiet, but prices lower than in any former spring.

SEEDS.—The trade for seeds has been brisk for the season of the year, occasioned by the late dry weather. Prospects, however, improve, and, except that consumption is good, quotations would not advance.

ENGLISH WOOL.—Stocks very light; prices very firm.

COLONIAL WOOL.—The colonial wool sales opened very firmly at March prices. Attendance both of home and foreign buyers good; competion brisk. Arvivals to date 103 765 bales.

Attendance both of home and Arrivals to date 103,763 bales.

COLONIAL WOOL.—The colonial wool sales opened very firmly at March prices. Attendance both of home and foreign buyers good; competion brisk. Arrivals to date 103,763 bales.

Flax quiet, although our stock is very small.

HEMP—On the spot, Russian is dull, but there is more inquiry for late delivery, with but little disposition to sell. The contractors for 900 tons Russian have not yet received their replies from Government to their offers made on the 3rd instant.

Corrow.—Sales of cotton from Friday, 29th April, to Thursday, 5th May, inclusive:—25 bales Broach, at 21d for fair, for cash; 860 bales Kurrachee, at 12½d to 13½d for middling, and 13½d to 14d for middling fair; 2,45 bales Tinnevelly, at 17½d for middling, 21d for fully fair, and 22d for good fair; 3,120 bales Western, at 19½d to 20¼d for middling fair, and 20d to 21d for fair; 600 bales Coconada, at 18d for middling, and 20d for fair; 270 bales Salem, at 194 for wery middling, 13d to 13½d for middling, 14d for middling fair, 16d for fully fair, and 17d for good fair; 4,130 bales China, at 18d to 19½ for fair; 3,020 bales Japan, at 19d to 19½d for fair, 19¾d to 20d for good fair, and 21d to 21½d for good—total, 15,880 bales. At public sale yesterday—offered: 300 bales Tinnevelly, 162 bales Madras, 298 bales Bengal, 174 bales Rangoon, and 70 bales West India—total, 1,004 bales. Sold: 20 bales Madras, at 16½d, all faults; 174 bales Rangoon, at 17d to 17½d; 49 bales Bengal, at 14d; and 64 bales West India, at 26½d to 29½d—total 307 bales. There has been a large business transacted during the past week, and in the early part the demand was very active, and prices advanced about ½d per lb. On Monday, the rise in the Bank rate to 8 per cent. checked business, and the advance was lost. Yesterday, there was a better tone until the further rise in the rate of discount to 9 per cent., when the market sgaih became dull, and closes quiet, but firm, at last week's quotations. Sales for arrival:—100 bales Tinnevelly, at 21d May delivery, for guaranteed fair; 2,100

Suk.—Dear money has made our market very quiet, but holders are very firm. The accounts of the European crop are rather contradictory. Tobacco.—Demand has continued moderately active for all descriptions. Prices for good, fine, and choice have been fully supported. Spinning qualities more difficult to buy at present quotations. METALS.—The rapid advance in the value of money, combined with the uncertainty attending the future of the Danish war and involvements, has killed the little inclination which previously existed for business, and the week has been bare of operations, without exception. Copper quotations are a little weaker for second-hand parcels. Tin was formally lowered in prices, on Monday last, by 41 per ton, but it had been so fully anticipated, that the value of tin is unchanged. Lead is less in demand. Spelter keeps firm in quotations, with very little changing hands. Tin plates are fairly maintained.

TALLOW.—Official market letter issued this evening:—

METROPOLITAN CATTLE MARKET.

Monday, May 2.—The total imports of foreign stock into London last week, smounted to 5,844 head. In the corresponding week of 1863 we received 4,518; in 1862, 2,140; in 1861, 2,095; in 1860 4,229; in 1859, 1,485; and in 1858, 1,344 head. In the corresponding week of 2,140; in 1861, 2,095; in 1860,

4,229; in 1859, 1,485; and in 1858, 1,344 head.

The supply of foreign beasts here to-day was rather extensive; of sheep and calves only moderate. Sales progressed slowly, at about previous currencies. The arrivals of beasts fresh up from our own grazing districts, were seasonably good, and in prime condition. Nearly all breeds met a slow inquiry, at last Monday's quotations; the general top figure for beef being 4s 10d per 8 lbs, consequently the advance on Thursday was lost. The supply of sheep was on the increase, and most breeds came to hand in good saleable condition. On the whole, the nutton trade was firm at an improvement in the quotations. and most breeds came to hand in good saleable condition. On the whole, the mutton trade was firm, at an improvement in the quotations, compared with this day se'nnight, of 2d per 8 lbs. Downs, out of the wool, sold at 4s 10d to 5s per 8 lbs. Our quotations now refer solely to shorn sheep. Lambs were in moderate supply, and sluggish request, at from 6s 4d to 7s 4d per 8 lbs. About 700 came to hand from the the Isle of Wight. Calves moved off slowly, at late rates, viz., from 4s 4d to 5s 4d per 8 lbs. The supply was only moderate. In pigs very little was passing, at about stationery prices.

LIVERPOOL MARKETS.

WOOL.

WOOL.

(FROM OUR OWN CORRESPONDENC.)

Framax, May 6.—The public sales of East India, which opened on the Srd inst., are progressing satisfactorily at an advance of about 2d per lb en all good wools. They will close on Saturday and the quantity reaches about 10,000 bales. During next week the other descriptions of both English and foreign wool will be offered,

CORN.

(From con own Correspondent.)

From May 6.—Moderate attendance at market. Very little choice wheat on offer, and a slight advance over Tuesday's rates is made. Hour steady. Indian corn in good demand; mixed 29s. Egyptian hears scarce and dearer. Oats and oatmeal in moderate request, no change in value.

The Gagette.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 23rd of April, on 11,198 miles, to 605,700f, and for the corresponding week of last year, on 10,805 miles, to 558,425f, showing an increase of 393 miles, and of 47,275f in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 7,744 miles, to 481,761f, and for the corresponding week of 1863, on 7,565 miles, to 444,516f, showing an increase of 179 miles, and 37,245f in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 2 .- The railway and mining share markets were closed to-day.

Monday, May 2.—The railway and mining share markets were closed to-day.

TURSDAY, May 3.—The share market to-day showed a very considerable tendency towards fistness, which affected all the several descriptions, but especially English and colonial railways and banks. Of the English lines, Lancashire and Yorkshire relapsed 1; Metropolitan declined 1½; Caledonian, Edinburgh, and Glasgow, Great Western (Oxford), Brighton, Midland (Birmingham and Derby), and Great Northera (B stock), 1 each; ditto (A stock), 2; ditto (original), South-Western, North British, North Staffordshire, North Eastern (Leeds, York, and Stockton and Darlington), ½ each; ditto (Berwick), ½; Blackwall a further 1; Great Western (original), North-Western, and Midland (original), a further ½ each; Great Eastern and South-Eastern a further ½ each, and Manchester, Sheffield, and Lincolnshire a further ¼. In colonial, Bombay, Baroda, &c., improved ½; and Atlantic and St Lawrence Madras (¼² per cent.), Indus Steam Flotilla, and Grand Trunk of Canada (4th preference) declined 1 each; ditto (deferred), Eastern Bengal, East Indian (stock), Great Indian Peninsula (stock), Great Southern of India (stock), Madras (5 per cent.), Scinde, Delhi (stock), and Punjaub 4 each, and Bombay, Baroda, &c. (E shares) East Indian, (G and H extensions), and Great Indian Peninsula (shares), ½ each, and ditto (new), Great Western of Canada shares (of both descriptions), and Delhi (shares) ½ each. In foreign, Great Luxembourg and Western and North-Western of France receded ½ each, Antworp and Rotterdam, Namur and Liege (preference), and Lombardo-Venetian ½ each, and Belgian Eastern Junetion ½. In American, Virginia (6 per cent.) advanced 1, and Illinois Central shares (ordinary and paid-up) further declined 1½ respectively. In British mines, East Bassett advanced 2, Drakewalls ½, and North Downs ½; East Caradon relapsed 2½, and Wheal Buller declined 5, and Grenville ½. In foreign mines, United Mexican receded ¼, and East del Rey and Montes Aureos ½ each.

Rey and Montes Aureos & each.

WENNESDAT, May 4.—The share market to-day, without having been active, closed with a further tendency to depreciation, which in some of the descriptions was but slight, while in English railways, banks, and miscellaneous shares it was more considerable. Of the English railways, Chatham declined 1\(\frac{1}{2}\), and Metropolitan (new) 4, and ditto (original) further declined 2, Caledonian 1, Great Western and Midland \(\frac{1}{2}\) each. In colonial, Great Indian Peninsula (new) recovered \(\frac{1}{2}\); and ditto (stock). East Indian and Madras (5 per cent.) declined a further \(\frac{1}{2}\) each. In foreign, Dutch-Rhenish recoded \(\frac{1}{2}\), and ditto (stock). Gealined as further \(\frac{1}{2}\) each. In foreign, Dutch-Rhenish recoded \(\frac{1}{2}\), and Antwerp and Rotterdam a further \(\frac{1}{2}\). In American, no movement occurred in the final quotations. In British mines, Great Wheal Vor and Stray Park declined 1 each, and East Caradon and Grenville a further \(\frac{1}{2}\) each. In foreign mines, Yudanamutana receded \(\frac{1}{2}\), and East del Rey a further \(\frac{1}{2}\).

Thurspar, May 5.—The share market generally to-day again expected.

THURSDAY, May 5.—The share market generally to-day again experienced a considerable degree of heaviness, the banks being most affected. In English railways, Great Northern (A stock) improved \(\frac{1}{2}\), and ditto (original), South-Western, North British, North Staffordshire, North Eastern (Leeds), and ditto (York) severally declined \(\frac{1}{2}\) each, ditto (Berwick) and South-Eastern \(\frac{1}{2}\) each, Brighton I, Metropolitan (new) a further 1, North-Western a further \(\frac{1}{2}\), and Lancashire and Yorkshire and Midland a further \(\frac{1}{2}\) each. In colonial, Great Western of Canada, ditto (now), and Indian Branch declined \(\frac{1}{2}\) each. In American, no alteration occurred. In British mines, Herodsfoot advanced \(\frac{1}{2}\), and Chiverton declined \(\frac{1}{2}\), Stray Park further 2, Great Wheal Vor a further 1, East Caradon a further \(\frac{1}{2}\), and Grenville a further \(\frac{1}{2}\). In foreign mines, Stanta Barbara receded \(\frac{1}{2}\).

Fridax, May 6.—The railway market was extremely inactive to-day,

FRIDAY, May 6.—The railway market was extremely inactive to-day, yet prices were in most instances unaltered.

PROSPECTUS.

The sourcess attained by the Credit Mobilier of Purishas recently led to the establishment of somewhat similar institutions in London, their introduction meeting with marked success, as is evidenced by the large dividends paid to their shearcholders, and increased value of the shares, such increase being from 160 to 200 per cent, on the sameount paid.

The fact that Scotland, notwithstanding the magnitude and rapid increase of her counterer, has unjustitution of the kind contemplated, has suggested to the projectors of the present Company the formation of an institution founded on similar principles to the Credit Mobilier of Paris, but embracing a larger field for its operations.

Mobilier of Paris, but embracing a larger field for its operations.

The progress of Scotland has been greater during late years than that attained by any other country in the world; statisties of shipbubliding on the Clyde alone, during the year 1863, show that 171 vessels, with an aggregate tomage of 184,000 tons, www launched, while 3,148 sailing ships, with an aggregate tomage of 359,955 tons, entered the river in the same year; but this number has been exceeded by the steathers, which reached the large number of 10,656, having an aggregate tomage of not less than 1,053,952 tons.

One of the great advantages of this establishment will be that Scotch houses can negotiate their foreign hills through the medium of this establishment, this department being one of the most profitable in banking lussiness.

The Directors have successful in completing arrangement

partment being one of the most promotion in Damaing business.

The Directors have succeeded in completing arrangements for the purchase of the well-known, established, and profitable business of Messars D. Nathan and Co., of Combill, London, buillion and exchange business (who take a large responsibility in the Company), upon such takes a large responsibility in the Company), upon such large as well be satisfactory to the charcholders, the payment of the parchase money being under entirely in shares of the Company. Arrangements have also been made for the transfer, upon equally favourable terms, of the business of N. Mondestux as file, Palais Royal, Paris, buillion and exchange bankers, long known as the oldest and mess: extensive establishment of the kind in France, and now carried on by Victor Monteaux, their successor, who will retain a considerable share insurers in the Company.

their successor, who will retain a considerable share insterns in the Company.

The contracts for the transfers of the above lie at the office of the Solicitors for inspection.

These on rangements will constitute a nucleus, and enable the Directors at ones to commence operations, as they exist; upon a valuable connection of inacy years' standing, and embracing a very large number of foreign corre-pondents.

The objects proposed to be efficised by the Company are—

The objects proposed to be effected by the Company are—

1. To receive money at call or on deposit for fixed terms, and the ordinary business of bankers.

2. To grant temporary or persanent loans on approved public securities or private undertakings of undoubted merit and known solidity.

3. To make advances on merchandise and dock and other warrants on title-deeds of property in possession or reversion for any temporary purpose, on contracts for car-ying out or the finishing of works, or any other securities where their safety is unquestionable and the benefit to the Cunpany sufficiently advantageous.

4. The purchase and sale of the precious metals in all their forms. The Company will be enabled, by its facilities and connections, to import and export buillion, and to deal in foreign coins and bank notes on an extensive scale.

5. By meens of the Paris branch it is proposed to

5. By means of the Paris branch it is proposed to indertake the shipment of silver to the East via Mar-

oh can be done at a considerable saving of ex-

mee and time.

5. The business transacted by the issue of small bills at letters of credit for the convenience of travellers and nigrants is incredible. Bemittaness from America to eland alone amount to several millions sterling per name. By affording the same facilities to the English, terman, and French population of America, it is confinitly anticipated that most profitable lusiness can be not

done.

7. To negotiate approved foreign or inland bills, to transmit funds in specie and in bills or otherwise, to any foreign stats, and to arrange purchases or sake state, and to arrange purchases or sake to any British or foreign securities at home or abroad.

8. To cash coupons, and to realise we undertake the management of the dividends on loan or other securities.

Application for shares to be made to the Secretary, at the temporary affices of the Company, or the Brokers.

GENERAL CREDIT AND FINANCE COMPANY OF LONDON (Limited).

The concession being sowe granted of the Allied French Society with which this Company has a Treaty securing a participation in all important business and a Sabscription for this Company of 18,000 Sharer, now at upwards of 25 per Share premium, the time has arrived when a larger working Capital will be required.

The Directors have accordingly had to consider, whether to male a Call on the existing Shares, or to act on the provisions of the Articles of Association for creating fresh Capital.

creating fresh Capital.

The latter course presents obvious advantages. The sum amount of money paid up will double the capital of the Company, and proportionately increase its credit as power of participation in large financial operations, The favourable position of the Company also permits of an issue of new shares on terms which both afford a large reserve fund for the Company, so as to place it at sum in a very strong position, and enable it to apply the whole profits arising from a participation in the French Concession and other business, in dividends.

Accordingly, the Directors have decided to, call a

Preach Concession and other business, in dividends.

Accordingly, the Directors have decided to call a Special General Meeting of the Proprietors, of which notice is hereby given, to be held at the London Tavern on Thursday, the 19th day of May, at One o'clock p.m., to consider the following resolutions:—

1. That the capital of the Company be increased to £5,000,000, by the issue of 125,000 new shares of £70 each, with £4 paid, to be on precisely the same footing in all respects as the old shares, as to dividend from let January, 1864, and otherwise,

2. That such new shares be issued at £1 5s per share premium, to include interest on all payments subsequent to the 1st of January, and be offered in accordance with the Articles of Association, the Directors being empowered to d'spose of any shares which may not be taken within fifteen days at not less than £1 5s premium.

2. That the payment on such new shares be due as follows:—

2. That the payment on such new follows:

£2 5 0 an allotment.

\$2 5 0 on the 30th July.

N.B.—The distribution of the new shares provided by the Articles of Association is—
20,000 to the French Company.
25,000 to the founders and Directors.
80,000 to the shareholders.

But the Directors propose to apportion 83,333 to the shareholders, so as to give exactly two new shares for every three old shares.

The premium of £1 5s is payable on all slike, and gives the Company a profit of £156,250.—By order of the Board,

R. J., BUTLER, Secretary.

The public are respectfully cautioned that many persons advertise themselves as manufacturers of this favourite article who are not so.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the au of large towns, and by their process, which is patented, is cheaper than White Lead.

It is es ecially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the perce and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used inread of Red Lead, which is proved to be destructive to Iron exposed to Salt

ADULTERATIONS.—Some Paint Grinders have been selling Zine Paint adulterated with Sulphate of Berytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. These who have obtained the Patent White Zine Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their est work.

Each Cask of Pure White Zinc is stamped-

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET. public schools, and all recons occupied by children, there will now be no expose for using soonous paints, are remarked, that their children on returning from the country to newly-painted houses have suffered reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the pour."—JOHN BULL, September 14, 1860

THE ECONOMY OF LIFE:
SELF-HELP TO WISDOM, WEALTH, AND
WORTH.

WORTE.

"To stimulate indistry, energy, persavarance, and self-denial, is the object of Pamphilius in tensing the volume for the guidance of youth. With these virtues, there is no eminence to wide a men may not aspire, and from the examples that are brought before the reader, he will preceive that a truly caviable reputation is only to be acquired by independently of character, by homesty, consistency, and by spetiess integrity, both in public and in private life."—Tan Echnoxy or Legs.

Vel. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY
DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth are grant be study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The study notions of youth have ripessed into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakapeary or a Scott; a Goldamith or a Burns."—STREAMER TROUGHTS.

PATILE NT BOYS,
AND HOW BY PATIENCE THEY BECAME
GREAT MEN.
PATIENCE IS GENIUS
"The mind and will of man may be said to be almost infinite. It is true be cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSWERLERS, he MAY BOY KNOW, and nothing which he MAY BOY DO.
""By INDORFER AND PARTIES OF THE MAY BOY DO."

NAT NOT DO.

"By PRODUCE and PATERY thought," says Sir Issao
"By PRODUCE and PATERY thought," says Sir Issao
Newton, "the first deweing opens gradually—by little
and little—into a full clear light. If I have done
anything, it is due to nothing but reducert and PATERY
thought."
"Buffon is not far wrong in his assertion 'that the
remius of great men consists mainly in their patience,"

thought'
"Buffon is not far wrong in his assertion 'that the
genius of great men consists mainly in their patience.'"

Temporary offices—33 Pall Mall, 8.W.

Notwithstanding the vast dimunit for the comfor and exclusiveness afforded by Clubs, there has been no setual increases in their number. The result is, admission to any existing Club has become almost an impossibility, the names of more than twelve thousand gentismen being insertised on the bessia as candidates for membership, while the annual varancies to not seem as many hundreds. It is therefore proposed to found a many hundreds. It is therefore proposed to found a club (limited in 3,000 members), in the immediate vicinity of Pall Mall. Prospectures and forms of application for membership may be obtained of the Secretary, at the uffices of the Club, 33 Pall Mall, S.W.
