Below is a list of custom features ("gadgets") you may enable for your account. Most of them require JavaScript to be enabled in your browser, are not part of the MediaWiki software, and are usually developed and maintained by users on Wikipedia. The numbers of users who have enabled each gadget can be seen on the Gadget usage statistics.

Be advised that **you take full responsibility for any action performed** using these features. For more information: see policies and guidelines.

Spinster left a message on your talk page in "DiMCoN".
Voor als je je verveelt (ha ha): de DiMCoN portal van het RCE (Digitale Museale Collectie Nederland...

Kippelboy thanked you for your comment in Biblioteca Museu Víctor Balaguer painters on User talk:KRLS.
Hi Spinster! I am Iñaki LL, a Wikipedian in residence at the San Telmo Museoa, Donostia-San Sebastián. We are holding the Peace Treaties in Art 30 x 30 Challenge in collaboration with Donostia-San Sebastián European Capital of Culture 2016 with a view to fostering a culture of peace and based on its Peace Treaty exhibitions at different city locations.

Your remarkable participation in the recent, similar Europeana contest grabbed my attention, and would really love to have all your good wikipedic and artistic know-how poured into this inspirational challenge :p The contest will reach its climax in an edit-a-thon we will be holding on July 9! Take a look, hopefully see you virtually or on the spot, all contributions welcome! Dank u Iñaki LL (talk) 09:38, 24 June 2016 (UTC)

Nobel prize winning economist Paul Krugman points out that Finnish economy has been in a long recession since 2008; the euro straitjacket n to lift its economy from the long recession. As Krugman notes, if Finland had its own currency, it could adopt its own monetary policies such as the Finnish economy. If Finland let its own currency float, adjustment mechanisms would work: more competitive exchange rates would enable cheaper prices, as it could in the 1990s. In fact, Sweden has its own currency, and its economic performance has been much better than Fi

Kartographer (1)
<maplink> and auto-counters

<maplink> creates a link that shows a full screen map when clicked. The link text can be set with the text attribute. Without this attribute, the coordinates will be shown (example: 12°18′0″N 45°36′0″E). If a map uses GeoJSON, the marker-symbol is set to the magic -number or -letter value. In this case each number will be replaced with an incremental counter 1, 2, 3..., and letter with a...z values.

If GeoJSON has more than one counter, the value of the first one will be shown as the link text. Optionally, editors may add a suffix to have multiple counters on the page at the same time. This way -number-museum will have different counter from -number-bar.

It would make sense to use a distinct color for each counting group. All data added via <maplink> will also be shown in all maps inserted with <mapframe>, unless the group attribute is used.

```json
[{num
  | name=Exploratorium | url=http://www.exploratorium.edu/
  | lat=37.8013 | long=-122.3988
  | content=A great museum
}]
```

could be expanded into

```json
<maplink zoom=9 latitude=37.8013 longitude=-122.3988 alt="A great museum">
{
  "type": "Feature",
  "geometry": { "type":"Point", "coordinates": [-122.3988, 37.8013] },
  "properties": {
    "title": "Exploratorium",
    "marker-color": "228b22",
  }
```

Girl with a Pearl Earring

From Wikipedia, the free encyclopedia

For other uses, see Girl with a Pearl Earring (disambiguation).

Girl with a Pearl Earring (Dutch: Meisje met de parel) is an oil painting by 17th-century Dutch painter Johannes Vermeer. It is a tronie of a girl with a headscarf and a pearl earring. The painting was originally owned by the poses in The Hague since 1902.

Description

The painting is a tronie, the Dutch 17th-century description of a 'head' that was not meant to be a portrait. It depicts a European girl wearing an exotic dress, an oriental turban, and an improbably large pearl earring. In 2014, Dutch astrophysicist Vincent Icke raised doubts about the material of the earring and argued that it looks more like polished tin than pearl on the grounds of the specular reflection, the pear shape and the large size of the earring.

Johannes, Jan or Johan Vermeer was a Dutch painter who specialized in domestic interior scenes of middle-class life. Vermeer was a moderately successful provincial genre painter in his lifetime. He evidently was not wealthy, leaving his wife
