Sources

- You may use Wikipedia articles in other languages, but check ALWAYS their references. Mention the Language version in „Rezumu" line, when translating articles.
- Better use their sources, use your own sources and create your own article.
- You may contact me for sources, material about Timor-Leste. I have a lot of things.
- You may use photos, published by Timorese government. Beware of changes in copyright in future. Maybe talk to politicians to safe this opportunity („Public money for public content") and „panorama freedom" in Timor-Leste!
- So far there are no rules, what is relevant or what is a accepted reference on tetWP. The community has to decide to make your own rules and elect your own admins.

Don't forget:

- Stay neutral!
  You will need everyone to create a **Encyclopedia Timorense**
- Find public persons for support, but aware dependencies
