PREFACE TO THE TWENTY-THIRD EDITION.

THIS well-known and standard work of reference first appeared in 1841, and then consisted of 568 pages of smaller size and larger type than those of later editions. Mr. Joseph Haydn, the compiler, whose name is identified with the title of the book, in 1855 resigned the editorship owing to failing health, and was succeeded by Mr. Benjamin Vincent, who undertook the continuance of the work, and the superintendence of its SEVENTH EDITION while passing through the press. This led eventually to the reconstruction of the book, which has been gradually effected by revision and copious additions. The new features included Chronological Tables at the beginning of the volume, innumerable historical, literary, scientific, topographical facts inserted in the body of the work, and a Dated Biographical Index. To make room for these additions the size of the page has been enlarged, many articles have been condensed or printed in smaller type, and matter of inferior importance expunged.

Numerous excellent year-books record the events and supply statistics of the preceding year, and are, consequently, of the greatest utility, but HAYDN supplies a public want in that it furnishes a systematized record from an early date to the present time of historical, political, ecclesiastical, legal, social, commercial, scientific, literary, artistic, educational and other movements and occurrences—everything, in fact, which comes under the purview of the student, the public man, and the intelligent reader of the daily newspaper. HAYDN is, therefore, not only indispensable to the journalist, to every public and private library, but to *everyone* who desires, either in public or private life, to possess an intelligent acquaintance with

the facts and occurrences of the present day and of past events, which so many persons find most difficult to retain in the mind.

We have with much regret to record the death of Mr. Benjamin Vincent, 3rd May, 1899, whose painstaking and conscientious labours have so largely contributed to the reputation which HAYDN'S DICTIONARY OF DATES enjoys.

Our thanks are due to those friends who have pointed out errors and omissions, which, in a work of such scope and magnitude, are almost unavoidable, since much of the information contained in its pages necessarily depends on varying statements often difficult to verify.

The present edition has been enlarged, and contains 197 more pages than the previous issue.

The more important events that have occurred or come under notice during the printing of the Dictionary are included in its ADDENDA, at the end of the volume.

EDITOR.

PREFACE TO THE FIRST EDITION.

THE design of the Author has been to attempt the compression of the greatest body of general information that has ever appeared in a single volume, and to produce a Book of Reference whose extensive usefulness may render its possession material to every individual—in the same manner that a London *Directory* is indispensable, on business affairs, to a London merchant. . . .

The Compiler persuades himself that the DICTIONARY OF DATES will be received as a useful companion to all Biographical works, relating, as it does, to *things* as those do to *persons*, and affording information not included in the range or design of such publications.

LONDON, *May*, 1841.

JOSEPH HAYDN.

AARGAU.

AARGAU (Switzerland), till 1798 included in Berne, was made an independent canton in 1803, and settled as such in 1815. Population 188,000. Augustine Keller (d. 1883), Swiss educationalist, successfully agitated against Jesuit teaching in schools 1840-4; and the expulsion of the Jesuits was decreed in 1847. The capital is Aarau. Population 6,800. Heinrich Zschokke, novelist and historian (d. 1848), lived here.

ABACUS, the tile on the capital of a column. That on the Corinthian column is ascribed to Callimachus, about 540 B.C.—This name is also given to a frame traversed by stiff wires, on which beads are strung, used for calculating by the Greeks, Romans, and Chinese. M. Lalanne published an **ABACUS** at Paris in 1845, a form of which is used in English infant schools, 1902. In the United States it is called "The Adder."—The multiplication table has been called the Pythagorean abacus.

ABANCAY, a river in Peru, on the banks of which the Spanish marshal Almagro defeated and took prisoner Alvarado, a partisan of Pizarro, 12 July, 1537.

ABATTOIRS, slaughter-houses for cattle. In 1810 Napoleon decreed that five should be erected near Paris, which were opened on 15 Sept. 1818. One was erected at Edinburgh in 1851, and they form part of the London metropolitan cattle-market, opened on 13 June, 1855.

ABBASSIDES (ab'as-sidz). The name of the Arabian dynasty, descendants of Mahomet's uncle, Abbas-Ben-Abdul-Motaleb, born 556, died 652. Merwan II., the last of the Ommiades, was defeated and slain by Abul Abbas in 750, who became caliph. Thirty-seven Abbasside caliphs (including Haroun al Raschid, 786-809) reigned from 750 to 1258. They settled at Bagdad, built by Al-Mansour about 762. Their colour was black; that of the Fatimites being green, and that of the Ommiades white.

ABBAYE, a military prison near St. Germain des Prés, Paris, where 164 prisoners were murdered by infuriated republicans led by Maillard, 2 and 3 Sept. 1792.

ABBEVILLE, fortified port, N. France. Here Henry III. met Louis IX. of France and made peace, renouncing his right to Normandy and other provinces, 20 May, 1259. In 1841 flint implements found here associated with remains of the mammoth and rhinoceros gave rise to the controversy on the antiquity of man. Pop. 19,772.

ABDICATIONS.

ABBEYS, monasteries for men or women; see *Monachism* and *Convents*. The first abbey founded in England was at Bangor in 560; in France, at Poitiers, about 360; in Ireland in the fifth century; in Scotland in the sixth century. 110 alien priories were suppressed in England, 2 Henry V. 1414. *Salmon*. The gross disorders in these establishments occasioned their destruction in Britain. After visitations of inquiry, king Henry VIII. commenced the suppression of small monasteries to raise revenues for Wolsey's colleges at Oxford and Ipswich, 7 June, 1525; many small monasteries were suppressed in 1536; and all religious houses were suppressed throughout the realm by parliament, 1539-40:—186 large monasteries (revenue 104,919*l.* 13*s.* 3*d.*), 374 lesser monasteries (revenue 33,479*l.* 13*s.* 7*d.*), and 48 houses of the knights hospitaliers (revenue 2385*l.* 12*s.* 8*d.*; total, houses, 608; estimated revenue, 140,784*l.* 19*s.* 6*d.*) *Turner*. The Anglo-Norman record society for the publication of the early chartularies and charters of the Norman and English abbeys was founded by the duke of Norfolk and others, 9 June, 1893. Abbeys were suppressed in Austria (by Joseph II.) in 1780, in France in 1790, in Portugal in 1834, in Sardinia in 1855, in Mexico in 1861, in Spain in 1837 and 1868, and in Italy in July, 1866, and April, 1873.

ABBOT (from *Ab*, father), the head of an abbey. In England, mitred abbots were lords of parliament; twenty-seven abbots and two priors thus distinguished, 1329; the number reduced to twenty-five, 1396. *Coke*. The abbots of Reading, Glastonbury, and St. John's, Colchester, were executed as traitors for denying the king's supremacy, probably for not surrendering their abbeys, 1539; see *Glastonbury*.

ABBOT'S RIPTON, see *Railway Accidents*, 1876.

ABC CLUB, a name adopted by certain republican enthusiasts in Paris, professing to relieve the *abaisés*, or depressed. Their insurrection 5 June, 1832, was suppressed with bloodshed, 6 June. These events are described by Victor Hugo in "*Les Misérables*" (1862).

ABECEDARIANS, followers of Storch, an Anabaptist in the sixteenth century, derived their name from their rejection of all worldly knowledge, even of the alphabet.

ABDUCTION. Carrying off of women in the Middle Ages was regarded rather as gallantry than crime: since the Statute of Merton, 20 Hen. III., many Acts passed, since repealed. The Acts now in force are the Criminal Law Consolidation Act 1861, and the Criminal Law Amendment Act, 1885. It is felony to take away or detain against her will for improper purposes any woman of any age, or to allure or take from her parents or legal guardians a woman under the age of 21. The mere abduction of an unmarried girl under 16 is punishable by two years' imprisonment, and if taken away for the purpose of seduction under the age of 18 the same penalty is incurred. The consent of the girl is no defence. The abduction of a child under 14 is punishable by 14 years' imprisonment as the maximum penalty.

ABELARD, a celebrated teacher of theology and logic, in 1118 fell in love with Héloïse, the niece of Fulbert, a canon of Paris, became her tutor, and seduced her. After a compulsory marriage, he placed her in a convent. Having been cruelly mutilated at the instigation of her relatives, he entered the abbey of St. Denis. Compelled to depart thence, accused of heresy, he built and lectured at the Paraclete, which eventually he made a convent, with Héloïse for the abbess. He died 21 April, 1142, and was buried in the Paraclete, where also Héloïse was laid, 17 May, 1164. Their ashes were removed to the garden of the Muséum Français in

1800, and to Père la Chaise in 1817. Their epistles, &c., were published in 1616.

ABENCERRAGES, a Moorish tribe of Granada, opposed to the Zegrís. From 1480 to 1492 they constantly fought. They were exterminated by Boabdil (Abu Abdallah), the last king, who was dethroned by Ferdinand and Isabella in 1492; his dominions were annexed to Castile.

ABYSSINIA, the country of the Habese, N.E. Africa. Its ancient history is very uncertain. The kingdom of the Axumitæ (its chief town Axum) flourished in the 1st and 2nd centuries after Christ. Christianity was introduced about 329 by Frumentius, consecrated Bishop of Abyssinia by St. Athanasius. Between 470 and 480 monasteries were established. In 522 Caleb, king of Abyssinia, at the request of the emperor Justinian, conquered Yemen. The Ethiopians possessed at that time the richest part of Arabia, traded to India, and were in constant communication with Greece. In the 7th century the Mohammedans expelled them from Arabia, and by the conquest of Egypt cut them off from the civilised world. About 960, Judith, a Jewish princess, murdered a great part of the royal family, and reigned forty years. The young king escaped: and the royal house was restored in 1268 in the person of his descendant Icon Amalc. In the middle ages it was said to be ruled by Prester John, or Prete Janni. The Portuguese missions, commenced in the 15th century, after much struggling against opposition, were expelled about 1633. The encroachments of the Gallas and intestine disorders soon after broke up the empire into petty governments. From the visits of James Bruce, 1768-73; Henry Salt, 1809-10; Edward Rüppell, 1834-7; major Harris, 1841; Mansfield Parkyns, 1844-7, much information respecting Abyssinia has been gained. Several expeditions into Abyssinia have been organised by the French government. The brothers Antoine and Arnauld Abbadie visited the country 1837-45. Abyssinia was divided into four provinces. In 1847 Ras Ali was ruler of Amhara; Ras Ubie of Tigré and Samien; and Sahela Selassie of Shoa. Population between 3,000,000 and 4,000,000. ACADEMY, THE, now a weekly journal treating of literary, scientific, and artistic topics, was founded by Mr. John Murray, 9 Oct. 1869, as an organ of learning and advanced criticism. In 1896 it was acquired by Mr. J. M. Richards, who put it on more popular lines, and introduced special features, among these its "Suggested Academy of Letters" in 1897, followed by the "Academy Awards" for literary merit, exchanged in 1900 for liberal awards to amateurs for essays and other compositions. A feature of the *Academy* is its weekly art article by "C. L. H.," the Drama by K. E. Chambers, and Science Notes by C. W. Saleeby. Distinguished writers have contributed to its pages. Edited by Dr. Appleton, 1869-1879; C. E. Doble, 1879-1881; J. S. Cotton, 1881-1896; C. L. Hind, 1896-1903, rev. T. Shore, 1903.

ACADIA, see *Nova Scotia*.

ACANTHUS, the foliage forming the volutes of the Corinthian capital, ascribed to Callimachus, about 540 B.C.

ACAPULCO, Mexico. A Spanish galleon, from Acapulco, laden with gold and precious wares (estimated at above 1,000,000*l.* sterling), taken by commodore Anson, who had previously acquired booty in his voyage amounting to 600,000*l.*, June, 1743. He arrived at Spithead in the *Centurion*, having circumnavigated the globe, 15 June, 1744.

ACARNANIA, N. Greece. The people became prominent in the Peloponnesian war, having invited the help of the Athenians against the Ambracians, 432 B.C. The Acarnanians were subdued by the Lacedæmonians in 390; they took part

with Macedon against the Romans in 200, by whom they were defeated in 197, and subjugated in 145.

ACCADIANS, a name now given to the primitive inhabitants of Babylon. They are considered to have been the earliest civilisers of Eastern Asia, and the source of the philology and arts of the Assyrians and Phœnicians, and hence of Greece. Their libraries are said to have existed seventeen centuries B.C.

ACCENTS were first introduced in the Greek language by Aristophanes of Byzantium, a grammarian and critic who taught at Alexandria about 264 B.C. Accents were first used by the French in the reign of Louis XIII. (about 1610).

ACCESSION, THE, *i.e.*, that of the House of Hanover to the throne of Great Britain, in the person of George I., elector of Hanover, son of Sophia, daughter of Elizabeth, daughter of James I. He succeeded, 1 Aug. 1714, by virtue of the act of settlement passed in the reign of William III., 12 June, 1701, which limited the succession to his mother (as a Protestant) in the event of queen Anne dying without issue. Royal declaration bill modifying the terms of the oath, passed the lords, 5 Aug., dropped by the commons, 8 Aug., 1901. See *Roman Catholics and Parliament*.

ACCESSORIES TO CRIMES. The law respecting them consolidated and amended in 1861.

ACCIDENTS, see under *Coal, Fires, Railways, &c.* For compensation for accidents, see *Campbell's Acts and Passengers*. In 1869, it was computed that, in one year, about 192 persons are killed, and 1200 injured, in the streets of London; 231 were killed in 1875; 237 killed, 3185 injured, 1 Jan. 1878—31 Jan. 1879. 163 killed in 1879; 252 in 1881.

 The Fatal Accidents Inquiry Bill was read 2d time by the Commons . . . 25 April, 1895

ACCLIMATISATION OF ANIMALS. This has been prosecuted with great vigour since the establishment of the Zoological society of London in 1829, and of the Société d'Acclimation in Paris. Numbers of European animals have been naturalised in Australia; the camel has been conveyed to Brazil (1859); alpacas are bred at Paris; and ostriches in Italy (1859). On 6 Oct. 1860, the Bois de Boulogne, near Paris, was opened as a zoological garden, containing only acclimatised animals. An acclimatising garden was established at Melbourne, Australia, in Feb. 1861, and efforts made to naturalise English birds, fishes, &c. See *Fish and Climate*.

ACCOLADE.—The embrace (*ad collum*) or slight blow on the neck or cheek when a neophyte was received into an order of knighthood. The custom is of great antiquity. Later, as at present, the flat of a sword was laid on the neck of the kneeling candidate. See *Knights*.

ACCOLTELLATORI (gladiators), secret assassins, at Ravenna and other places in Italy, 1874.

ACCORDION, a small free-reed wind-instrument with keys, invented at Vienna by Damian about 1829, and soon after introduced into England.

ACCOUNTANT-GENERAL IN CHANCERY, &c., an office instituted in 1726, and abolished by an act passed 6 Aug. 1872. In 1841, the office of accountant-general of the court of exchequer was abolished, and the duties transferred to the accountant in chancery.

ACCOUNTANTS' INSTITUTE, established at a meeting, 30 July, 1870; the Accountants' Society in 1872. Five societies were incorporated as "The Chartered Institute of Accountants of England and Wales," in 1880.

ACCUSERS. By occult writers, such as Agrippa, accusers are the eighth order of devils, whose chief is called Asteroth, or Spy. In *Revelation*, ch. xii. 10, the devil is called "the accuser of the brethren."—*False accusers* were to be hanged, by 24 Henry VI. 1446; and burnt in the face with an F, by 37 Henry VIII. 1545. *Stow*.

ACEPHALI (Greek *a*, no; *cephalē*, head), a term applied to certain sects who resisted their bishops and met privately, about 450; and also in canon law applied to such bishops, clerks, monks, &c., as claim or enjoy independence of the jurisdiction of the ordinary or metropolitan.

ACETYLENE, a luminous hydrocarbon gas resembling coal gas, discovered by Berthelot. In 1862 Wohler discovered that carbide of calcium treated with water produced lime and acetylene. In 1895 acetylene was cheaply produced on a commercial scale; it has since come into use for general lighting. A committee on acetylene generators reported to parliament, 1902.

ACHÆMENIDÆ, a dynasty of Persian kings of which Cyrus the Great was the founder. It was overthrown by Alexander the Great.

ACHAIA (N. Peloponnesus), Greece, settled by the Achæi, reputed descendants of Achæus, the son of Xuthus. The kingdom was united with Sicyon or subject to the Ætolians until about 284 B.C. The Achæi originally inhabited the neighbourhood of Argos; but when the Heraclidæ drove them thence, they retired among the Ionians, expelled the natives, and seized their thirteen cities, viz. Pellene, Ægira, Ægium, Bura, Tritæa, Leontium, Rhyces, Ceryncea, Olenos, Helice, Patrae, Dyme, and Phare, forming the **ACHÆAN LEAGUE**.

ACHEEN, capital of a kingdom N.W. of Sumatra, was visited by the Portuguese about 1509. Factories were set up here by the Dutch, 1566; by the English, 1602; by the French, 1621. For the war with the Dutch, see *Sumatra*.

The *Nisero* of Sunderland, with sugar from Sourabaya, stranded on territory of the chief of Pangah, a Malay dependent of Tuku Inam Muda, the rajah of Tenom, subject to the sultan of Acheen, 16 Nov. 1883.

18 British and 6 foreign sailors made prisoners; the captain released to negotiate; efforts to obtain their release, by warlike attacks and proffered ransom, ineffectual; the Dutch storm Tenom, but prisoners carried off, 7 Jan. 1884.

H.M.S. *Pegasus* sent here. The rajah demands free trade, and desires subjection to Great Britain. Earl Granville recommends conciliation to the Dutch government, announced May, 1884. See under *Manston House*.

ACHONRY, SLIGO (N. Ireland), a bishopric founded by St. Finian, who erected the church of Achad, or Achonry, about 520, and conferred it on his disciple Nathy (Dathy, or David), the first bishop. The see, held with Killala since 1612, was united with Tuam in 1834.

ACHROMATIC TELESCOPES, in which colour is got rid of, were invented by John Dollond, and described in *Phil. Trans.* of the Royal Society, London, 1753—8.

ACIDS (now defined as salts of hydrogen) are generally soluble in water, redder organic blues, decompose carbonates, and destroy the properties of alkalies, forming alkaline salts. The number of acids was increased by the Arabs; Geber (8th century) knew nitric acid and sulphuric acid. Theories of the constitution of acids were put forth by Becher (1669), Lemery (1675), and Stahl (1723). After the discovery of oxygen by Priestley, 1 Aug. 1774, Lavoisier (1778) concluded that oxygen was a constituent of all acids; but about 1810 Davy, Gay-Lussac, and others, proved the existence of acids free from oxygen. In 1816 Dulong proposed the binary or hydrogen theory of acids, and in 1837 Liebig applied the theories of Davy and Dulong to explain the constitution of several organic acids. Oxygen acids were termed anhydrides by Gerhardt (died 1856). Many acids have been discovered through the advance of organic chemistry.

ACOLYTES, an inferior order of clergy in the Latin church, unknown to the Greek church for four hundred years after Christ.

ACOUSTICS (from *akouō*, Greek, I hear), the science of sound, so named by Sauveur in the 17th century. The formation of sound in the air by the vibrations of the atmosphere, strings, &c., was explained by Pythagoras about 500 B.C., and by Aristotle, 330 B.C. See *Telephone*, *Microphone*, *Megaphone*.

The speaking trumpet said to have been used by Alexander the Great, 335 B.C.
Galileo's discoveries, about A.D. 1600.

His theorem of the harmonic curve demonstrated by Dr. Brook Taylor, in 1714; further perfected by D'Alembert, Euler, Bernoulli, and La Grange, at various periods of the eighteenth century.

Hooke calculated the vibration of sounds by the striking of the teeth of brass wheels, 1681.

Sauveur determined the number of vibrations belonging to a given note, about 1700.

Velocity of sound said to be 1473 feet in a second, by Gassendi; 1172 feet by Cassini, Römer, and others; 968 feet by Newton; 1090 feet, at the temperature of 32° Fahrenheit, by Tyndall; the velocity increases with the rise of temperature.

Chladni (who raised acoustics to an independent science) published his important discoveries on the figures produced in layers of sand by harmonic chords, &c., in 1787, and since.

Cagniard-Latour invented the *Sivène* (which see), 1819.

Savart determined the range of the perception of the human ear to be from 7 to 24,000 vibrations a second, 1830.

Biot, Savart, Wheatstone, Lissajous, Helmholtz, Tyndall, Lord Rayleigh, and others in the 19th century have greatly increased our knowledge of acoustics.

Over-tones, harmonics, well investigated by Helmholtz; under-tones by Auerbach, 1878.

Tyndall's experiments off the South Foreland on fog-signals and gun-cotton, demonstrated that the transmission of sound is checked by the non-homogeneity of the air, independently of fog and rain, July, 1873.

The results of Tyndall's experiments showed that the parabolic-muzzle gun with gun-cotton, and that of sir Richard Collinson's gun-cotton rocket, are very effective fog-signals. Fine-grain gunpowder with howitzers is the best sound-producer; pebble powder the worst, 1874-7.

Sound produced by electricity, light, and from radiant heat, see *Telephone* and *Photophone*, 1851.

Mr. A. Stroh exhibits the attraction and repulsion (resembling magnetic) produced by sonorous vibrations in tubes to the Telegraph Engineers, 27 April, 1882.

ACRE, a land measure, formerly of uncertain quantity, and differing in various parts of the country, was reduced to a standard by Edward I., about 1305. In 1824 the standard acre was ordered by statute to contain 4840 square yards.

ACRE, Acca, anciently Ptolemais, in Syria, was taken by the Saracens in 638; by the crusaders under Baldwin I. in 1104; by Saladin in 1187; and again by Richard I. and other crusaders, 12 July, 1191, after a siege of 2 years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named *St. Jean d'Acre*. It was retaken by the Saracens in 1291, when 60,000 Christians perished, and the nuns, who had mangled their faces, were put to death. Acre was gallantly defended by Djezzar Pacha against Bonaparte, till relieved by sir Sidney Smith, who resisted twelve attempts by the French, between 16 March and 20 May, 1799, when Bonaparte retreated. Acre, as a Turkish pachalic, was seized 27 May, 1832, by Ibrahim Pacha, who had revolted. On 3 Nov. 1840, it was stormed by the allied fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000

prisoners, while the British had but 12 killed and 42 wounded; see *Syria* and *Turkey*.

ACROBAT, from the Greek *akron*, extremity, *baino*, I go, a person who does difficult feats in tumbling, vaulting, trapezing, rope walking, &c. Among the more noted performers during the 19th century were Farioso, Mme. Saqui, Diavolo, Risley, Leotard (the first to do the flying trapeze), Onri, Niblo (the originator of the double somersault from the trapeze), Lulu and C. Elliot, Chantrell, and Matthews families, De la Vanti, and J. W. Cragg and family, still performing. Blondin (Jean François Gravélet), a noted acrobat, crossed the Falls of Niagara in 1859 and 1860 (see *Niagara*) on the tight-rope, and performed similar feats at the Crystal Palace 1861-2; his last performance was at Belfast in 1896. He died 22 Feb. 1897.

ACROPOLIS, the ancient citadel of Athens, built on a rock. Near it stood the temple of Minerva, the Parthenon, which see. Other cities had similar fortresses.

ACROSTIC, a poem in which the first or last letters of each line, read downwards, form a word or sentence, is said to have been invented by Porphyrius Optalianus in the 4th century. Double acrostics became very popular in 1867.

ACS OR ACZ (Hungary). The Hungarians under Görgey were defeated here by the Austrians and Russians, on 2 and 10 July, 1849.

ACT OF SETTLEMENT, &c.; see *Accession*, *Succession*, *Supremacy*, and *Uniformity Acts*.

The *Act of Settlement* passed in 1662, which secured to various persons the possession of forfeited estates of Irish rebels, was repealed by acclamation by the Parliament summoned by James II. in May, 1689, and much confiscation of the property of Protestants ensued. The act was restored by William III., 1690.

ACTA DIURNA; see *Newspapers*.

ACTA SANCTORUM ("acts of the saints"), a work begun by the Jesuits. The first volume appeared in 1643; the publication was interrupted in 1794, when 54 volumes, bringing the work down to 15 October, had been published. The work was resumed by the Jesuits in 1837, and 6 more volumes had been published in 1867. The writers have been named *Bollandists*, from John Bolland, who published the first two volumes.

ACTINOMETER, an instrument to measure the heating power of the solar rays, invented by sir John F. Herschel, and described by him in 1825. Others have since been invented. See *Sun*.

ACTIUM, a promontory of Acarnania, W. Greece, near which was fought, 2 Sept. 31 B.C., the battle between the fleet of Octavius Cæsar, and that of Mare Antony and Cleopatra, which decided the fate of Antony; 300 of his galleys going over to Cæsar. This victory made Octavius master of the world and the Roman empire is commonly dated 1 Jan. 30 B.C. (the *Actian Era*). The conqueror built Nicopolis (the city of victory), and instituted the Actian games.

ACTON BURNEL, or Shrewsbury. At the parliament held here by Edward I., Oct. 1283, the "statute of merchants" against debtors was enacted.

ACTONIAN PRIZE, see under *Royal Institution*.

ACTRESSES appear to have been unknown to the ancients in the earliest times, men or eunuchs

performing the female parts. They appeared under the Roman empire. Mrs. Colman was the first English public actress; she performed the part of *Ianthe* in Davenant's "Siege of Rhodes," in 1656.

ACTS OF THE APOSTLES, supposed to have been written by Luke in continuation of his Gospel. It terminates A.D. 63.

ADMINISTRATIONS OF ENGLAND AND OF GREAT BRITAIN. Until the Restoration, 1660, there was not any cabinet approaching to the modern sense. The sovereign was aided by privy councillors, varying in number, the men and offices being frequently changed. The separation of the cabinet from the privy council became greater during the reign of William III. His ministers included both Whigs and Tories, and their dissensions led to much maladministration, civil, military, and naval, and consequent popular discontent; the king was therefore compelled to have a united ministry, at first wholly composed of Whigs. The change was gradually effected, 1694-6. The control of the chief, now termed the "*premier*," began in the reign of Anne. "The era of ministries may most properly be reckoned from the day of the meeting of the parliament after the general election of 1698." *Macau-*

lay.* For a fuller account of each administration, since 1700, see separate articles headed with the name of the PREMIER, given below in italics.

 and irresponsible management of the various de-
 partments of the state. The association was
 organised in London, 5 May, 1855. A meeting
 was held in Drury-lane theatre on 13 June, and
 Mr. Layard's motion on the subject in parliament
 was negatived 18 June following. The association
 was reorganised in 1856, Mr. Roebuck, M.P., be-
 coming chairman, but soon became unimportant;
 see *Civil Service*.

ADMIRAL. The title, derived from the Arabic,
 emir-al-bahr, "Lord of the sea," which occurs in the
Chanson de Roland, 11th century, does not appear
 to have been adopted in England until about 1300.
 Alfred, Athelstan, Edgar, Harold, and other kings,
 were commanders of their own fleets. The first
 French admiral is said to have been appointed 1284.
 The rank of *admiral of the English seas* was first
 given to William de Leybourne by Edward I. in
 1297. *Spelman; Rymer*. The first LORD HIGH
 ADMIRAL in England was created by Richard II. in
 1385; there had been previously high admirals of
districts—the north, west, and south. The duties
 have generally been executed by lords commis-
 sioners; see *Admiralty*. A similar dignity existed
 in Scotland from the reign of Robert III. In 1673,
 Charles II. bestowed it upon his natural son Charles
 Lennox, afterwards duke of Richmond, then an
 infant, who resigned the office to the crown in
 1703; after the union it was discontinued.—The
 dignity of lord high admiral of *Ireland* (of brief
 existence) was conferred upon James Butler by
 Henry VIII., in May, 1534. The *Admiral of the
 Fleet* is the highest rank in the Royal Navy,

corresponding to that of field-marshal in the army. We have now (Oct. 1903) on the active list 5 admirals of the fleet; senior admiral the hon. sir Henry Keppel, Aug. 1877; sir Fred. W. Richards, Nov. 1898; sir Norvell Salmon, Jan. 1899; Sir Jas. E. Erskine, Oct. 1902; sir Charles F. Hotham, Aug. 1903; the German emperor, *hon.*, Aug. 1889; the king of Portugal, *hon.*, Sept. 1903; 10 admirals, 22 vice-admirals, 41 rear-admirals, 217 captains. The prince of Wales, naval aide-de-camp to the king 21 June, 1887; was made rear-admiral Jan. 1901; vice-admiral 26 June, 1903. Admiral of the fleet, sir Provo Wallis, b. 12 April, 1791, d. 13 Feb. 1892, sir Lewis Tobias Jones, b. 24 Dec., 1797, d. 11 Oct., 1895. Vice-admiral sir Robt. O'Brien Fitzroy, K.C.B., b. 1839, d. 7 May, 1896; sir Alex. Milne, G.C.B., b. 11 Nov. 1806, d. 29 Dec. 1896; sir W. R. Mends, b. 1812, d. 26 June, 1897. Admiral sir W. Colomb, b. 1831, d. 13 Oct. 1899; see *Fog*; the duke of Edinburgh, 1876-1893; d. 30 July, 1900: see *Saxe-Coburg*; sir George Willes, d., aged 77, 18 Feb. 1901; sir George Wellesley, b. 1814, d. 6 April, 1901; sir J. E. Commerell, d., aged 72, 21 May, 1901; sir A. Hoskins, d., aged 73, 21 June, 1901; sir W. H. Stewart, G.C.B., d. 13 Nov. 1901; lord Hood of Avalon, d. 16 Nov., aged 77, 1901; sir G. Cator, d. 31 July, 1903; *r.-adm.* A. G. Bogle, d. 15 Aug. 1903; *r.-adm.* hon. Albert Denison S. Denison, aged 68, 2 Sept., 1903; sir Alexander Buller, d., aged 69, 3 Oct. 1903.

ADMIRALTY, COURT OF, a court for the trial of causes relating to maritime affairs, said to have been erected by Edward III., in 1357. It was enacted in the reign of Henry VIII., that criminal causes should be tried by witnesses and a jury, some of the judges at Westminster (or, as now, at the Old Bailey) assisting. The judgship of the admiralty was constituted in 1514, and was filled by two or more functionaries until the Revolution, when it was restricted to one. *Beatson*. The judge has usually been an eminent doctor of the civil law. In 1844 the criminal jurisdiction of this court was removed, and by 20 & 21 Viet. c. 77 (1857), the judge of the Probate court was to be also judge of the Admiralty court. The judge of the Admiralty court, Dr. Stephen Lushington (appointed in 1838), resigned 1 July, 1867, and was succeeded by sir Robert Phillimore, who retired March, 1883. The jurisdiction of this court was extended in 1861. The very ancient gilt anchor is set up in the Admiralty Court of the Royal Courts of Justice. The ancient silver or is laid on the Registrar's Table, Oct. 1885. By the acts 1873-5, appeal is now to the Supreme Court of Judicature. See *Supreme Court and Probate Court*.

ADMIRALTY OFFICE dates from 1512, when Henry VIII. appointed commissioners to inspect his ships of war. During the Commonwealth the admiralty affairs were managed by a committee of the parliament; and at the restoration in 1660, James, duke of York, became lord high admiral. In 1662 the admiralty was first put into commission, the great officers of state being the commissioners; see succeeding changes *below*. In 1688-9 the

admiralty was put into commission, and the board appears to have assembled at admiral Herbert's lodgings, in Channel-row, Westminster, he being at that time first lord. In 1830, 1832, and 1836 various changes were made in the civil departments, several offices being abolished or consolidated with others. In March, 1861, a royal commission recommended the abolition of the board of admiralty and the appointment of a minister of the navy department. The board was reconstituted 14 Jan. 1869, and 4 May, 1872. The collective action of the board was taken away, and concentrated in the person of the first lord.

The office removed from Somerset House to Whitehall, 1874-5.

New buildings erected by virtue of the Public Offices Site Act passed 24 July, 1882. The designs of Messrs. Leeming & Leeming, of Halifax, selected for approval by parliament, July, 1884.

ADMIRALTY, Whitehall. "At the south end of Duke-street, Westminster, was seated a large house made use of for the admiralty office, until the business was removed to Greenwich, and thence to Wallingford-house, against Whitehall." It was rebuilt by Ripley about 1726; the screen was erected, to conceal the ugliness of the building, by the brothers Adam, in 1776.—Lord Nelson lay in state in one of the apartments on 8 Jan. 1806; and on the next day was buried at St. Paul's.

Explosion in clerks' room (ascribed to gunpowder in an iron pot); Mr. Swainson much hurt; about 11 A.M. 23 April, 1885.

ADMIRALTY ISLANDS. A group of coral islands to the N.E. of New Guinea, about 2° S. lat. and 147° E. long., discovered by the Dutch 1616, area 878 sq. m., inhabited by a race of savages 800 in number. Together with New Britain annexed by Germany in 1885, and now form part of the Bismarck Archipelago.

ADMIRALTY AND WAR OFFICE ACT, to facilitate improvements in the organisation of these offices, by the retirement of clerks from certain of the civil departments by granting gratuities, was passed 10 Aug. 1878.

"**ADMONITION TO THE PARLIAMENT,**" condemning all religious ceremonies but those commanded by the New Testament, was published by certain Puritans in 1571. Its presumed authors, Field and Wilcox, were imprisoned. A second Admonition by Thomas Cartwright was answered by archbishop Whitgift.

ADORNO AND FREGOSO, two families, of which the doges were frequently members, disturbed Genoa from the 14th to the 16th centuries, the former favouring the emperor, the latter the French king. Their power was annihilated by Andrea Doria about 1528.

ADRIAN'S OR HADRIAN'S WALL (to prevent the irruptions of the Scots and Picts into the northern counties of England, then under the Roman government) extended from the Tyne to Solway frith, and was eighty miles long, twelve feet high, and eight feet in thickness, with watch-towers; built 121. It was repaired and strengthened by Severus, 207—210.

ADRIANOPLE, in Turkey, so named after its restorer the emperor Adrian (who died 10 July, 138). Near here Constantine defeated Licinius and gained the empire, 3 July, 323; also, near here the emperor Valens was defeated and slain by the Goths, 9 Aug. 378. Adrianople was taken by the Turks

under Amurath in 1361, and was their capital till the capture of Constantinople in 1453. It was taken by the Russians on 20 Aug. 1829; and restored 14 Sept. same year; after the capture of the Turkish army in the Shipka pass it was occupied by the Russians, without resistance, 20 Jan. 1878. Population 1885, 70,886; 1901, about 81,000. See *Turkey*.

ADRIATIC. The ceremony of the doge of Venice wedding the Adriatic sea (instituted about 1173), took place annually on Ascension-day. The doge dropped a ring into the sea from his bucentaur, or state barge, being attended by his nobility and foreign ambassadors. The ceremony was first omitted in 1797.

ADULLAM, a cave to which David fled from the persecution of Saul about 1062 B.C. (1 *Sam.* xxii. 1, 2.)

Mr. Horsman, Mr. R. Lowe, earl Grosvenor, lord Elcho, and other liberals who opposed the Franchise Bill in 1866 were termed "Adullamites." During a debate on this bill on 13 March, 1866, Mr. Bright said of Mr. Horsman, that he "had retired into what may be called his political cave of Adullam, to which he invited every one who was in debt, and every one who was discontented," &c. On 19 April, lord Elcho said, "No improper motive has driven us into this cave, where we are a most happy family, daily—I may say, hourly—increasing in number and strength, where we shall remain until we go forth to deliver Israel from oppression." Although their opposition led to the resignation of the Russell ministry, they declined to take office under lord Derby in July, 1866. They did not vote together uniformly in 1867, and (lord Elcho and Mr. Wylde excepted) voted with Mr. Gladstone, for the disestablishment of the Irish church, 1 May, 1868.

ADULTERATION. That of food was prohibited in England in 1267, and punishments for it enacted, 1581, 1604, 1836, 1851, &c. Much attention was drawn to it in 1822, through Mr. Accum's book, called "Death in the Pot," and in 1855 through Dr. Hassall's book, "Food and its Adulterations." By an act for preventing the adulteration of food, passed in 1860, parochial chemical analysts may be appointed. An act to prevent adulteration of seeds passed 16 Aug. 1869, amended 1878. Another to prevent adulteration of food and drugs passed 10 Aug. 1872. Penalties for adulterating liquors were imposed by the new licensing act passed same time. The report of a commission, issued in July, 1874, declared that the public "were cheated rather than poisoned." All the anti-adulteration acts were repealed by the Sale of Food and Drugs Act, passed 11 Aug. 1875; which was amended in 1879; reported very effectual Dec. 1884. Act regulating sale of margarine, 9 Aug., 1899. The report of the select committee appointed in 1894, with suggestions, was issued in July, 1896.

ADULTERY was punished with death by the law of Moses (1490 B.C.; *Lev.* xx. 10)—and by Lycurgus (884 B.C.). The early Saxons burnt the adulteress, and erected a gibbet over her ashes, whereon they hanged the adulterer. The ears and nose were cut off under Canute, 1031. Adultery was ordained to be punished capitally by the parliament, May 14, 1650: but there is no record of this law taking effect; and it was repealed at the restoration. In New England the punishment for adultery was made capital to both parties, and several suffered for it, 1662. *Hardie*. Till 1857 the legal redress against the male offender was by civil action for a money compensation; the female being liable to divorce. By 20 & 21 Vict. c. 85 (1857) the "action for criminal conversation" was abolished and the Court for Divorce and Matrimonial Causes

established with power to grant divorces for adultery and ill usage; see *Divorce*. An act was passed in 1869 permitting parties to suits for adultery to give evidence.

ADVENT (*adventus*, "the coming"). The season includes four Sundays, previous to Christmas, the first the nearest Sunday to St. Andrew's day (Nov. 30), before or after. ADVENTURERS, see **MERCHANTS**.

ADVERTISEMENTS IN NEWSPAPERS, as now published, were not general in England till the beginning of the eighteenth century. A penalty of 5*ol.* was inflicted on persons advertising a reward with "No questions to be asked" for the return of things stolen, and on the printer, 1754. The *advertisement duty*, (first enacted, 1712,) formerly charged according to the number of lines, was afterwards fixed, in England, at 3*s. 6d.*, and in Ireland at 2*s. 6d.* each advertisement. The duty (further reduced, in England to 1*s. 6d.*, and in Ireland to 1*s.* each, in 1833) was abolished in 1853.

ADVOCATUS DIABOLI (Devil's Advocate), in the Roman Catholic Church, the functionary appointed to state the objections against a deceased person proposed for canonization. The side for his defence is undertaken by the *Advocatus Dei* (God's Advocate).

ADVOCATE, THE KING'S (always a doctor of the civil law), was empowered to prosecute at his own instance certain crimes about 1597. The **LORD ADVOCATE** in Scotland is the same as the attorney-general in England, with judicial powers.—It was decided in the parliament of Paris, in 1685, that

the king's advocate of France might at the same time be a judge; and in Scotland sir William Oliphant (1612) and sir John Nesbit (1666) were lord advocates and lords of session at the same time. *Beatson*.—The powers were diminished in 1881, when John Blair Balfour was made Lord Advocate; the right hon. J. H. A. Macdonald, 1885-8; Mr. J. P. B. Robertson, 1888-Sept. 1891, succeeded by sir Charles John Pearson, 1891, by Mr. J. B. Balfour, 1892; sir Charles Pearson, Sept. 1895; rt. hon. Mackenzie about 1682; in 1709 it obtained the right to a copy of every new book published in Britain. Number of volumes over 350,000 MSS. over 3,000; see *Judge Advocate*.

ADVOVSONS, right of a presentation to a church living. First recorded instance in 448, when a bishop was permitted by the council of Orange to nominate a clerk to a church he had built outside his diocese. Advowsons were allowed in the 6th cent. (123 Novel of Justinian). Patronage has grown as part of the feudal system. The Decretals stated that if with the consent of the bishop any man built a church he acquired the right of patronage. In Thomas à Becket's time presentations were often made against the will of the bishop, and for money payments. Exchange of advowsons is now regulated by various Acts, notably 23 & 24 Vict. c. 124, 1860, 31 & 32 Vict. c. 114, and 33 & 34 Vict. c. 39, 1868-70. See *Benefice*.

ÆDILES. Roman city officers. 1. Two plebeian ædiles were appointed to look after buildings, weights and measures, the supply of provisions, &c., 494 B.C. 2. The *ædiles curules* were appointed 365 B.C. 3. Julius Cæsar appointed *ædiles cæreales* for watching over the supply of corn. The ædiles became a kind of police under the emperors.

ÆGATES ISLES, W. of Sicily: near these the Roman consul, C. Lutatius Catulus, gained a victory over the Carthaginian fleet under Hanno, 10 March, 241 B.C. Peace ensued, the Romans obtaining Sicily and a tribute of 3200 talents.

ÆGINA, a Greek island, a rival of Athens, was humbled by Themistocles, 485 B.C.; and taken and its works destroyed 455. Its inhabitants, expelled, 431, were restored by the Spartans, 404; they renewed war with Athens, 388, and made peace, 387. In 1811, from the temple of Pallas Athene, many statues, dating from 50 years before Phidias, were taken to Munich, one group represents a combat of Greeks and Trojans for the body of Achilles.

ÆGOSPOTAMI, (the Goat-rivers), in the Chersonesus, where Lysander, the Lacedæmonian, defeated the Athenian fleet, 405 B.C., and ended the Peloponnesian war.

A. E. I. O. U. (for "*Austriæ est imperare orbi universi*," (German, *alle Erde ist Oesterreichs unterthan*.) "*Austria is to rule all the world*"), was the motto of the weak and unfortunate emperor, Frederick III., 1440-1493.

ÆNIGMA. Samson's riddle (about 1141 B.C.; *Judges* xiv. 12) is the earliest on record. Gale attributes anigmatical speeches to the Egyptians. The ancient oracles frequently gave responses admitting of perfectly contrary interpretations. In Nero's time, the Romans had recourse to this method of concealing truth. The following epitaph on Fair Rosamond (mistress of our Henry II. about 1173) is a mediæval specimen:—"Hic jacet in tombâ Rosa mundi, non Rosa munda; Non redolet, sed olet, quæ redolere solet."

ÆOLIA, in Asia Minor, was colonised by a principal branch of the Hellenic race about 1124 B.C. The Æolians built several large cities; Mitylene, in Lesbos, was considered the capital.

ÆOLIAN HARP. Its invention is ascribed to Kircher, 1650, who wrote on it, but it was previously known. St. Dunstan is traditionally said to have been its inventor.

ÆOLOPILE, a hollow ball with an orifice in which a tube might be screwed, was used in the 17th century as a boiler for experimental steam-engines; a similar apparatus is described by Vitruvius, first century, A.D. Its invention attributed to Hero of Alexandria.

ÆQUI, an Italian race, subdued by the Romans and their lands annexed, 471-302 B.C.

ÆRATED WATERS. Solution of carbonic acid in water discovered by Priestley. Suggested as a prevention of scurvy. Paper presented to the Admiralty 1773. A bottle of soda-water from the *Royal George*, sunk in 1780, sold by auction Mar. 10, 1903. Apparatus for combining gases with water were patented by Thomson in 1807; F. C. Bakewell in 1832 and 1847; Tylor in 1840, and by others. **ÆRATED BREAD** is made by processes patented by Dr. Daughlish, 1856-7. Ærated Bread Company formed 28 Oct. 1862. A.B.C. ÆSTHETICISM, an art movement to carry the love of the beautiful into home-life, sprang up during the latter part of the 19th century. It was strongly supported by Mr. Ruskin, sir (d. 1896) Frederick Leighton, Mr. (knt. 1899) Alma-Tadema, Mr. Holman Hunt, Mr. (bart. 1894) P. Burne-Jones, Mr. Gabriel Dant, Rossetti and others associated with the Pre-Raphaelite movement (*which see*). The fantastic extravagances of some of the followers of the cult were cleverly hit off by Gilbert and Sullivan in "Patience," produced in 1881, and satirised in *Punch* about that period. The influence of Æstheticism has been felt in the improvement of decorative art in modern houses, and increased artistic refinement.

AGAPÆ (*agapæ*, Greek for love, charity), "feasts of charity," referred to *Jude 12*, and described by Tertullian, of which the first Christians of all ranks as one family partook, as Christ did with his disciples. Disorders creeping in, these feasts were forbidden to be celebrated in churches by the councils of Laodicea (366) and Carthage (390). They are still recognised by the Greek church, and are held in their original form weekly by the Glassites or Sandemanians, and in some degree by the Moravians, Wesleyans, and others.

AGAPEMONE (Greek, "the abode of love"), an establishment at Charlinch, near Bridgwater, Somersetshire, founded in 1845, where Henry James Prince,* and his deluded followers, formerly persons of property, lived in common, professing to devote themselves to innocent recreation and to maintain spiritual marriage. The Agapemone is described by Mr. Hepworth Dixon in his "Spiritual Wives," published in Jan. 1868. Meetings of the sect were held at Hamp, near Bridgwater, Dec., 1872. An "abode" at Spaxton (1849) and at Clapton, about 1895. The latter dissolved in 1902 through reprobation of the public. See *Impostors*.

AGE. Chronologers have divided the time between the creation and the birth of Christ into ages. Hesiod (735 B.C.) described the Golden, Silver, Brazen, Heroic, and Iron Ages; Ovid (43 B.C.—18 A.D.) omits in his enumeration the Heroic Age; see *Dark Ages*.

FIRST AGE (from the Creation to the Deluge)	B.C.
SECOND AGE (to the coming of Abraham into Canaan)	4004-2349
THIRD AGE (to the Exodus from Egypt)	2348-1922
FOURTH AGE (to the founding of Solomon's Temple)	1921-1491
FIFTH AGE (to the capture of Jerusalem)	1490-1014
SIXTH AGE (to the birth of Christ)	1014-588
SEVENTH AGE (to the present time)	588-4

* Prince was born in 1811, died Jan., 1899; educated for the medical profession and licensed to practise, 1832; gave it up for the church and entered St. David's college, Lampeter, and there commenced ultra-revivalist movements in 1836; and finally claimed to be an incarnation of the Deity, with corresponding authority over his followers. On 22 May, 1850, Thomas Robinson sought to recover the possession of his child from the care of its mother (from whom he had separated); the application was refused by the vice-chancellor, to "save the child from the pollution of the parent's teaching."—On 21 Aug. 1858, Miss Louisa Jane Nottidge died, having transferred her property to Mr. H. J. Prince. Her brother, Mr. Nottidge, by an action, recovered from Prince \$7281, as having been fraudulently obtained. Extraordinary disclosures were made during the trial, 25 July, 1860. In the autumn of 1860, the Rev. Mr. Price, after several vain attempts, succeeded in rescuing his wife from the Agapemone. They had both been early supporters of it.

ARCHÆOLOGICAL AGES. The various stages through which man has passed in the process of development and civilization are divided into the *Stone Age*—(a) Palæolithic, rough stone cutting tools and weapons; (b) Neolithic, polished stone implements—the *Bronze Age* (with an *Age of Copper* in place of, or in addition to, the Age of Bronze), and (c) the *Iron Age*, the two last characterised by tools and weapons of such materials. No sharply defined chronological division can be made between these Ages, the Stone Age of one area sometimes co-existing with that of the Bronze or Iron Age of another area of the same period.

AGE. In Greece and Rome twenty-five was full age for both sexes, but a greater age was requisite for the holding certain offices: e.g. thirty for tribunes; forty-three for consuls. In England the minority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, fixed at eighteen years; previously to completing which age, his father, Henry VIII., had assumed the reins of government, in 1509.—A male of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the Statute of Wills, 7 Will. IV. & 1 Vict. c. 26, 1837, no will made by any person under the age of twenty-one years shall be valid. A female at twelve may consent to a marriage, at fourteen she may choose a guardian, and at twenty-one she is of age.

AGINCOURT, OR AZINCOUR (N. France), a village where Henry V. of England, with about 9000 men, defeated about 60,000 French on St. Crispin's day, 25 Oct. 1415. Of the French, there were, according to some accounts, 10,000 killed, including the dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 1500 knights; and 14,000 prisoners, among whom were the dukes of Orleans and Bourbon, and 7000 barons, knights, and gentlemen. The English lost the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Henry V. soon after obtained the kingdom of France.

AGIO, the difference between the real and the nominal value of money.

AGITATORS (or Adjutators), officers appointed by the Parliamentary army in 1647, to take care of its interests: each troop or company had two. The general Cromwell was eventually obliged to repress their seditious power. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions and the forces on the ground, and thus restored discipline. *Hume*.—Daniel O'Connell, the *agitator of Ireland*, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, 5 July, 1828; the election being declared void, he was re-elected 30 July, 1829. After the passing of the Catholic emancipation bill, he agitated in vain for the repeal of the union, 1834 to 1843. He died 15 May, 1847.—Richard Cobden and John Bright were the chief *Anti-corn-law agitators*, 1841-45.—Mr. Bright became a *Reform agitator* in 1866.

AGNOSTICS, name given to philosophers who assert that we have no knowledge but what we acquire by means of our senses, about 1876. The word Agnostic was introduced by the late Professor Huxley in 1869. "An Agnostic Apology," by Mr. Leslie Stephen, published 1893.

AGNUS DEI (Lat. "Lamb of God"), the title of a prayer set to music in the Roman Catholic Mass. Also a figure of a lamb bearing a cross impressed on a gold, silver, or wax disc, consecrated by the popes since the 14th cent. The A. D. with the banner of the cross is used as a symbol of Jesus Christ in ecclesiastical art.

AGONISTICI (from *agōn*, Greek, *a conflict*), also termed *circitores*, a branch of the Donatists (*which see*) in the 4th century. They preached with boldness, and incurred severe persecution.

In 1658 Aurungzebe removed to Delhi.—The fortress of Agra, "the key of Hindostan," in the war with the Mahrattas surrendered to the British forces, under general Lake, 17 Oct. 1803, after one day's siege: 162 pieces of ordnance and 240,000. were captured.—In June, 1857, the city was abandoned to the mutineers by the Europeans, who took refuge in the fort, from which they were rescued by major Montgomery and colonel Greathed. Visit of the prince of Wales, 25 Jan., 1876.—Allahabad was made capital of the N.W. provinces of India, instead of Agra, in 1861. Pop. 1901, 183,300.

AGRARIAN LAW (*Agraria lex*), decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by the consul Spurius Cassius, 486 B.C., and occasioned his judicial murder when he went out of office in 485.—An agrarian law was passed by the tribune Licinius Stolo, 376; and for proposing further amendments Tiberius Gracchus in 133, and his brother Cornelius in 121, were murdered. Livius Drusus, a tribune, was murdered for the same cause, 91. Julius Cæsar propitiated the plebeians by passing an agrarian law in 59.—In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as Gracchus Babeuf, editor of the *Tribun du Peuple*, in 1794. In 1796 he conspired against the directory with the view of obtaining a division of property, was condemned, and killed himself, 27 May, 1797. *Agrarian league*, see *Germany*, 1895.

In Ang. 1855, a committee presented a report on the best mode of obtaining accurate Agricultural Statistics. There were, in 1831, 1,055,982 agricultural labourers in Great Britain, and in Ireland, 1,131,715.

Acreege of crops, and number of cattle, sheep, and pigs in Great Britain and Ireland, beginning with 1866, published in the annual "Statistical Abstract," since 1869. See p. 29.

It was reckoned by the Agricultural Committee, that the cultivation of wastelands would yield above 20,000,000*l.* a year. It was calculated in 1854 that there were in England 32,160,000 acres in cultivation, of the annual value of 37,412,000*l.* Since that time, much land has been brought into cultivation; see *Wheat*.

AGRICULTURAL SOCIETIES.—The earliest mentioned in the British Isles was the Society of Improvers of Agriculture in Scotland, instituted in 1723. A Dublin Agricultural Society (1740) gave a stimulus to agriculture in Ireland; its origin is attributed to Mr. Prior of Rathdowney, Queen's County, in 1731. The Bath and West of England Society established, 1777; and the Highland Society of Scotland, 1784. County Agricultural Societies are now numerous.

AGRICULTURAL CHEMISTRY.—Sir Humphry Davy delivered lectures on this subject (afterwards published), at the instance of the Board of Agriculture, in 1812; but it excited little attention till the publication of Liebig's work in 1840, which made a powerful impression. Liebig's "Letters on Agriculture" appeared in 1859. Boussingault's "Economie Rurale" appeared in 1844; his "Agronomie" in 1860-8. He died May, 1887. Great progress made by the experiments of Lawes, Gilbert, Pasteur, and others.

The important experiments of sir John Bennet Lawes and Dr. J. H. Gilbert (knt., Aug. 1893; died 23 Dec., 1901) began at Rothamsted, Herts, in 1843. The jubilee was observed at a meeting of the Royal Agricultural society, 1 March, 1893, the prince of Wales in

the chair, when it was determined to set up a granite memorial on the spot where the experiments were carried on. Sir John, by the gift of 100,000*l.*, endowed their continuance after his death. The memorial was set up, Mr. Herbert Gardner, M.P., present, 29 July, 1893. Sir John Lawes died, aged 83, 31 Aug., 1900.

AGRICULTURAL GANGS.—In the spring of 1867, most painful exposures were made of the prevalence of much cruelty and immorality in the gang system (in which boys and girls are employed) in several of the eastern and midland counties; and in consequence an act was passed 20 Aug. for regulating these gangs, licensing gang-masters, &c.

A Union of Agricultural Labourers, managed chiefly by Joseph Arch, formerly a labourer, afterwards a Methodist preacher (M.P. 1885) (his autobiography, edited by the countess of Warwick, published 1898), was inaugurated at Leamington, Warwickshire, 29 March, 1872. The movement spread, being countenanced by Anberon Herbert, M.P., and others. The Union met in London, Arch re-elected president, 16, 17 May, 1877; at Bedford, 16 Sept. 1881.

Lock-out of agricultural labourers belonging to the Union (lasted 18 weeks, costing the Union much money), began at Alderton, Suffolk, March, 1872.

Dispute between Lincolnshire farmers and labourers settled, 18–20 May; Suffolk and Norfolk farmers refuse compromise, about 25 May: the Union ceased to support the locked-out labourers, leaving them to emigration, or to seek employment, 27 July, 1872.

The agitation subsided: the labourers were employed, autumn, 1875; agricultural return for Great Britain, 1873; reported steady increase in prosperity, 1875.

AGRIGENTUM (now *Girgenti*), a city of Sicily, built about 582 B.C. It was governed by tyrants from 566 to 470; among these were—Phalaris (see *Brazen Bull*); Alcamanes; Theron who, with his step-father Gelon, defeated the Carthaginians at Himera, 480: and Thrasydæus, his son, expelled in 470; when a republic was established. It was taken by the Carthaginians in 405 B.C., and held, except during short intervals, till gained by the Romans in 262 B.C. From A.D. 825 till 1086 it was held by the Saracens.

AHMEDNUGGUR (W. India), once capital of a state founded by Ahmed Shah, about 1493. After having fallen into the hands of the Moguls and the Maharrattas, 1797, it was taken from the latter by Arthur Wellesley, 12 Aug. 1803, and restored to the British dominions, June, 1817, made a municipality 1855.

AID TO THE SICK AND WOUNDED, NATIONAL SOCIETY FOR. On 4 Aug. 1870, soon after the breaking out of the Franco-German war, a meeting was held in London, which established this society under the rules of the Geneva Convention, *which see*.

The Queen, patron; the prince of Wales, president; col. Loyd-Lindsay, chairman of committees; active supporters, duke of Manchester, earl of Shaftesbury, lords Overstone and Bury, sir Harry Verney, general sir John Burgoyne, surgeon-general Longmore, and captain (aft. sir) Douglas Galton. The operations were chiefly directed by capt. Henry Brackenbury, at the seat of war, and by Mr. John Furley and general sir Vincent Eyre.

A fruitless meeting to promote the incorporation of the society. It was then reported that 296,298l. had been received; together with stores valued at 45,000l. 1 Aug. 1871

Col. Loyd Lindsay conveyed to Versailles and Paris from the society 40,000l., equally divided between the Germans and French (gratefully acknowledged) about 11 Oct. 1870

The crown-prince of Prussia wrote to colonel Loyd Lindsay:—"In this, as on other occasions of distress, the help of the English public has been poured out with a liberal and an impartial hand. The gifts which have been offered in a truly Christian spirit have excited a feeling of heartfelt gratitude among those on whose behalf I speak."

2 Nov. 1870

The society afforded much help in the Servian war, July—Sept. 1876, the Russo-Turkish war, 1877-8, and the Boer war, 1899-1902.

The Princess of Wales' branch of the society closed with a surplus of 6,477l. June, 1886.

AIR or ATMOSPHERE. Anaximenes of Miletus (530 B.C.) declared air to be a self-existent deity, and the first cause of everything created. Posidonius (about 79 B.C.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lb. to the square inch, was discovered by Galileo, 1564, and demonstrated by Torricelli (who invented the barometer) about A.D. 1643, and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others, the **AIR-GUN** of Guter of Nuremberg about 1656; the **AIR-PUMP**, invented by Otto von Guericke of Magdeburg about 1650; improved by Robert Boyle in 1657, by Robert Hooke about 1659; * and the **AIR-PIPE**, invented by Mr. Sutton, a brewer of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light and sound by Hooke, Newton, and Delham. The extension of our atmosphere above the surface of the earth, has been long considered as about 45 miles.—Its *composition*, † about 77 parts of nitrogen, 21 of oxygen, and 2 of other matters (such as carbonic acid, watery vapour, a trace of ammonia, &c.) was ascertained by Priestley (who discovered oxygen gas in 1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737. The researches of Dr. Schönbein, a German chemist of Basel, between 1840 and 1859, led to his description of two states of the oxygen in the air, which he

calls *ozone* and *antiozone*. In Aug., 1894, at Oxford, Lord Rayleigh and Professor Ramsay reported to the British Association their discovery of a new gas in air, afterwards termed Argon, *which see*. Dr. Stenhouse's *Air-filters* (in which powdered charcoal is used) were first set up at the Mansion-house, London, in 1854. In 1858, Dr. R. Angus Smith made known a chemical method of ascertaining the amount of organic matter in the air, and published his "Air and Rain" in 1872. See *Oxygen, Nitrogen, Ozone, Atmospheric Railway, Balloons, and Pneumatic Despatch*.

The *Aero-steam Engine*, the invention of George Warsaw, a mechanic of Nottingham, who, by employing compressed air united with steam, is said to have effected the saving of 47 per cent. of fuel. The plan was reported to the British Association, at Exeter, in Aug. 1869, and was said to act successfully in a tug steamer (for China) in the Thames, 26 March, 1870. Mr. Edward Field, in his new motive power, introduced a small volume of steam into a large volume of heated air, and effected an economy of 12½ to 20 per cent. of steam. The system was exhibited in London, July, 1891.

Col. Beaumont's *air-engine* for propelling railway carriages, tried at Woolwich, reported successful (a little steam is used), 6 Oct. 1880. His system largely employed in various ways by the Paris Compressed Air company, described to the British Association at Newcastle-upon-Tyne, Sept. 1889.

Victor Popp applies compressed air as a motive power to clocks, 1881.

An *air-telegraph*, in which the waves of air in a tube are employed instead of electricity, invented by sig. Guattari, was exhibited in London in 1870. It obtained a gold medal in Naples.

Isaac Wilkinson patented a method of compressing air by a column of water in 1757, and William Mann patented stage pumping by compressed air in 1829. The force of compressed air was employed in boring the Cenis tunnel (see under *Alps*), and in making the Black-wall tunnel, 1891-7.

Tram-cars driven by compressed air on the Mekarski system in N. London, for a time, June, 1883; resumed, after improvements made, for a time, 1885; again for a time, Feb. 1888.

Prof. Dewar gave six well-illustrated lectures on "Air, gaseous and liquid," at the Royal Institution, London, 28 Dec. 1893-9 Jan. 1894. (Some of the air of the room was liquefied in the presence of the audience, and remained so for some time, when enclosed in a vacuum jacket); again, 1 April, 1898.

Prof. Dewar demonstrated by some very remarkable experiments the intimate connection between phosphorescence and photographic action of the electric light on bodies cooled to the temperature of boiling liquid air at the Royal Institution, 18 Jan. 1895.

Liquid air for refrigeration and other purposes largely produced by machinery, invented by Herr Linde; reported, 21 Oct. 1895.

Prof. Dewar's new apparatus for the production of liquid air, exhibited at the Royal Institution, 2 Dec. 1895. Experiments with hydrogen, reported 27 March, 1896.

M. Paul Giffard, inventor of compressed air and other apparatus, died, abt. 3 April, 1897.

The *Aerograph*, an air brush, an application of compressed air, invented by Mr. C. L. Burdick (1893); used by artists.

Dr. Linde's machine for the liquefaction of air, shown at the Society of Arts, 14 March, 1895.

Argon, a new constituent of air, neon and metargon, discovered by prof. Ramsay and Lord Rayleigh, Jan. 1895.

"Lord Rayleigh and professor Ramsay had discovered four other aerial elements, helium, neon, krypton and xenon, which were identified as constituents of the atmosphere by prof. Ramsay and M. H. Travers, 1895-1900."

Prof. Dewar exhibited air in the solid state and a jet of liquid air rising to about 6 ft., with beautiful effects, before the prince and princess of Wales, 6 June, 1922.

AIR-GUN. A pressure of 500 atmospheres has about half the elastic force of fired gunpowder.

* Sprengel's excellent air-pump, in which water or mercury is employed, was invented in 1863, see *Vacuum*.

† Air, as well as its gaseous components, has been compressed into the liquid state by means of great pressure and intense cold, 1877-8, by Raoul Pictet of Geneva, and Cailletet of Paris, Dec. 1877, Jan. 1878. At the Royal Institution, 5 June, 1895, professor James Dewar exhibited liquid air obtained at the temperature of -192° Cent. In March, 1893, he produced solid air in the form of ice. Several physical properties of liquid air were exhibited, and solid air was produced at the Friday meeting, 19 Jan. 1894.

ALBERT MEMORIALS. (See *England, Queen*.) The Prince Consort died on 14 Dec. 1861, deeply lamented by the whole civilised world. His remains were transferred to the mausoleum of Frogmore, 18 Dec. 1862. The sarcophagus is composed of the largest known block of granite without flaw. A meeting to organise a method of receiving contributions for a great national memorial was held at the Mansion-house, 14 Jan. 1862; and a large sum was quickly subscribed. 36,000*l.* had been received on 1 March; 50,200*l.* on 11 June, 1862; and parliament voted 50,000*l.*, in addition to the 60,000*l.* received by voluntary contributions, 23 April, 1863.

The nature of the memorial was referred to the queen

herself. In a letter to the lord mayor, dated 19 Feb. 1862, sir Charles Grey says, on behalf of her majesty, "It would be more in accordance with her own feelings, and she believes with those of the country in general, that the monument should be directly personal to its object. After giving the subject her maturest consideration, her majesty has come to the conclusion, that nothing would be more appropriate, provided it is on a scale of sufficient grandeur, than an obelisk to be erected in Hyde-park on the site of the Great Exhibition of 1851, or on some spot immediately contiguous to it. Nor would any proposal that could be made be more gratifying to the queen herself personally, for she can never forget that the prince himself had highly approved of the idea of a memorial of this character being raised on the same spot in remembrance of the Great Exhibition." In a second letter the queen expressed her intention of personally contributing towards erecting the memorial, that "it might be recorded in future ages as raised by the queen and people of a grateful country to the memory of its benefactor." Shortly after a committee was appointed to fulfil her majesty's desire. As a suitable block of granite could not be obtained, the proposal for an obelisk was given up.

The queen approved of the design of Mr. Gilbert G. Scott for an Eleanor Cross, with a spire 150 feet high, accompanied by statues, &c., 22 April, 1863; work begun, 13 May, 1864.

The sculptors employed were M'Dowell, Foley, Theed, John Bell, and Armistead; material, Sicilian marble. (Jan. 1865.)

The memorial, complete, except the statue, by Foley (delayed through illness), was given up to her majesty privately, 1 July, 1872. The gilt statue by Foley uncovered 9 March, 1876. Having been much damaged by weather, it was restored 1902.

ALBIGENSES, a name given to various persons who opposed the doctrines and corruptions of the church of Rome, living at Albi, in Languedoc, and at Toulouse in the 12th century. They were persecuted as alleged Manichæans, 1163, and a crusade (proclaimed by pope Innocent III.) against them commenced in 1207. Simon de Montfort commanded 500,000 men, and at Beziers, 1209, he and the pope's legate put friends and foes to the sword, saying, "God will find his own!" * At Minerva he burnt 150 of the Albigenses alive; and at La Yaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering other women. He defeated Raymond, count of Toulouse, but was himself killed in 1218. Louis VIII. and IX., kings of France, patronised the crusade;

count Raymond was subdued, and abdicated in 1229; and the heretics were given up to the Inquisition. They had little in common with the *Waldenses*, which see.

Here a battle was fought between the French, commanded by marshal Soult, and the British and Anglo-Spanish army, under marshal, afterwards lord Beresford, 16 May, 1811. The allies obtained a brilliant victory. The French loss exceeded 8000 men previously to their retreat; but the allies lost a large number. The chief brunt of the action fell on the British; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had mounted a hill, fell, out of the 57th regiment alone; the other regiments were scarcely better off, not one-third being left standing; "1500 unwounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill." *Napier*.

ALCANTARA, a town on the Tagus, W. Spain. A fine bridge was built here by Trajan 105. The duke of Alva acquired Portugal for Spain by defeating the Portuguese army here, 24 June, 1580. The Spanish military order of knighthood of Alcantara was established in 1156. The sovereign of Spain has been grand master since 1495. Population, 4,000.

ALCAZAR-QUIVER, near Fez, N. W. Africa, where the Moors totally defeated the Portuguese, whose gallant king Sébastian was slain, 4 Aug. 1578. The Portuguese disbelieved his death, and long expected his return; this led to the appearance of five impostors.

ALCHEMY, the forerunner of chemistry; its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an alkahest or universal menstruum, and the elixir of life.* The alchemists assert that their founder was Hermes *Trismegistus* (thrice greatest), an ancient Egyptian king.—Pliny says the emperor Caligula was the first who prepared natural arsenic, in order to make gold of it, but left it off, because the charge exceeded the profit.

Zosimus wrote on the subject about 410.

The Arabians cultivated alchemy, and were followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, Raymond Lullius, Basil Valentine (born 1394), Paracelsus (died 1541), and others.

In 1404 the craft of multiplying gold and silver was made felony by 5 Hen. IV. c. 4, which act was repealed in 1689.

* M. Martin Ziegler, about 1868, patented a method of producing a "vital fluid" by combining nitrogen and carbon in a porous cell containing ammonia, immersed in a vessel filled with molasses. The current was to flow through silk threads attached to the vessel.

* Now contradicted.

A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1475. *Rymer's Fœdera*.

Dr. Price, of Guildford, in 1782 published an account of his experiments and brought specimens of gold to the king, affirming that they were made by means of a red and white powder. Being a fellow of the Royal Society, he was required, under pain of expulsion, to repeat his experiments before Messrs. Kirwan and Wolfe (some say Higgins); but after much equivocation and delay he took poison and died, Aug. 1783.

ALCOHOL. Pure spirit of wine or hydrated alcohol is said to have been obtained by the distillation of fermented liquors by Abucasis in the 12th century; and the dehydration of this liquor to have been partially effected by Raymond Lullius in the 13th century by carbonate of potassium. In 1820, Faraday and Hennell obtained traces of alcohol by passing olefiant gas (bi-carburetted hydrogen) through sulphuric acid; and in 1862 this process was examined and confirmed by Berthelot. Alcohol has been artificially formed from its elements (carbon, hydrogen and oxygen) by chemists; it was solidified by Prof. Dewar at the Royal Institution, 1886; see *Distillation, Spirits, Brandy, Gin, Rum*. About 250 medical men, including the president of the Royal College of Physicians, and many hospital officials, issued a cautionary declaration concerning the use of alcohol in medicine, Dec. 1871. See *Temperance*.

ALCOLEA (Andalusia, S. Spain). Near the bridge a sharp engagement took place between the royalists under general Pavia y Lacy, marquis de Novaliches, and the insurgents under marshal Serrano, 27 Sept. 1868. The former was defeated.

AL-CORAN OR AL-KORAN, see *Koran, Mahometanism, &c.*

ALDERMAN. The Saxon *ealdorman* was next to the king, and frequently a viceroy; but after the settlement of the Danes the title was gradually displaced by that of *earl*. Aldermen in corporations are next in dignity to the mayor. A curious list of aldermen and their wards is assigned to the year 1290. *Loffie*. Aldermen chosen for life, instead of annually, 17 Rich. II. 1394. Aldermen made justices of the peace, 15 Geo. II., 1741. The council of a borough consists of mayor, aldermen, and councillors, Acts, 1835.

The 26 London (City) aldermen are elected by the wards. In 1877 the court of aldermen exercised their ancient right of veto against Sir John Bennett (thrice chosen alderman for the ward of Cheap), and chose Mr. Edgar Breffitt, 23 Oct. 1877.

Aldermen elected by the councillors form part of the County Councils established by the Local Government Act, 1888, and of the London municipal boroughs, created by the London Government Act, 1899.

ALDERNEY (English Channel), with Jersey, &c., was acquired by William the Conqueror, 1066. The "Race" is celebrated for two fatal occurrences; William of Normandy, son of Henry I. of England, and many young nobles (140 youths of the principal families of France and Britain), were overtaken by a storm, and all lost, 25 Nov. 1120. The British man-of-war *Victory*, of 100 guns and 1160 men, was wrecked here, 5 Oct. 1744; the admiral, sir John Balchen, and all his crew perished. Through this strait the French escaped after their defeat at La Hogue by admirals Russell and Rooke, 19 May, 1692. The construction of a breakwater, in order to make Alderney a naval station, was begun in 1852, and after having cost 1,337,100*l.*, was suspended by parliament in 1871. In 1874 the harbour and lands were transferred from the control

of the board of trade to that of the admiralty and the war department. See *Wrecks* 30 March, 1899.

ALDERSHOT CAMP, on a moor near Farnham, about 35 miles from London. In April, 1854, the War office, having obtained a grant of 100,000*l.*, purchased 4000 acres of land for a permanent camp for 20,000 men.

Additional land purchased in 1856. Barracks since erected for 4000 infantry, 1500 cavalry, and several batteries of artillery. Great improvements in military cookery introduced (see *Cookery*) under the superintendence of captain John Grant, 1857.

The queen reviews the troops, 16 July, 1891; 27 June, 1892; 17 March, 1893; 12 June, 1894; 13 July, 1895. Duke of Connaught appointed commander at the camps 9 Oct. 1893; succeeded by sir Redvers H. Buller 9 Oct. 1898; sir A. G. M. Moore, *temporary*, 15 Dec. 1899; sir Redvers Buller resumes command, 1 Oct. (for a speech on 10 Oct. to the Queen's Westminster Volunteers, placed on half-pay, 23 Oct. 1901); sir H. J. T. Hildyard, *temporary*, 25 Oct. 1901; sir J. D. P. French appointed, 15 Sept. 1902.

ALDINE PRESS, that of Aldo Manuzio (Aldus Manutius), at Venice, where were printed many of the first editions of the Greek, Latin, and Italian classics, commencing in 1494 with Musæus.

ALDWYCH, the name given to one of the two streets, now (1903) in the course of construction, which will join the Strand with Holborn. The name is derived from the old Danish settlement of Aldwych that once covered the site, and left the trace of its former existence in the name of Wych-street now demolished.

ALE, BEER, and Wine. Ale is said to have been known as a beverage at least in 404 B.C. Herodotus ascribes the first discovery of the art of brewing barley-wine to Isis, the wife of Osiris, and a beverage of this kind is mentioned by Xenophon, 401 B.C. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. *Tacitus*. Ale-houses are mentioned in the laws of Ina, king of

Wessex. Booths were set up in England, 728, when laws were passed for their regulation. None but freemen were allowed to keep ale-houses in London, 13 Edw. I. 1285. They were further subjected to regulation by 5 & 6 Edw. VI. c. 25 (1551). By 1 James I. c. 9 (1603), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excise duty on ale and beer was imposed by the parliament in 1643, and continued by Charles II. (1660); repealed, 1 Will. IV. c. 51 (1830); see *Beer, Porter, Wine, Victuallers*. Michael Thomas Bass, the eminent brewer of Burton, died 28 April, 1884, aged 84.

Mr. John Bickerdyke's book on "The Curiosities of Ale and Beer" was published in 1886.

ALEMANNI, or **ALL MEN** (*i.e.* men of all nations), hence *Allemand*, German. A body of Suevi, who took this name, were attacked by Caracalla, 211. After several repulses, they invaded the empire under Aurelian, who subdued them in three battles, 271. They were again vanquished by Julian, 356, 357; by Jovinus, 368. They were defeated and subjugated by Clovis at Tolbiac (or Zulpich), 496. The Suabians are their descendants.

ALEPPO, North Syria, a large town named Beroea by Seleucus Nicator, about 299 B.C. The pachalia of Aleppo is one of the five governments of Syria. It was taken by the Saracens, A.D. 638, who restored its ancient name Haleb or Chaleb; by Saladin, 1193; and sacked by Timour, Nov. 1400. Its depopulation by the plague has been frequent; 60,000 persons were computed to have perished by it in 1797; many in 1827. The cholera raged here in 1832. Aleppo suffered severely from the terrible earthquakes in 1822 and 1830; and has often been the scene of fanatical massacres. On 16 Oct. 1850, the Mahometans attacked the Christians, burning everything. Three churches were destroyed, five others plundered, and thousands of persons slain. The total loss of property amounted to about a million sterling; no interference was attempted by the pacha. Population in 1885, 110,000; 1901, *abt.* 127,149.

ALESSANDRIA, a city of Piedmont, built in 1168 under the name of Cæsar by the Milanese and Cremonese, to defend the Tanaro against the emperor, and afterwards named after pope Alexander III. It has been frequently besieged and taken. The French took it in 1796, but were driven out by Suwarrow, 21 July, 1799. They recovered it after the battle of Marengo, 14 June, 1800, and held it till 1814, when the strong fortifications erected by Napoleon were destroyed. These have been restored since June, 1856.

ALEXANDRIAN CODEX, a MS. of the Septuagint translation of the Bible in Greek, said to have been transcribed by a lady named Thecla, in the 6th century, and to have belonged to the patriarch of Alexandria in 1098. It was presented to Charles I. of England in 1628 by Cyrillus Leucaris, patriarch of Constantinople, and was placed in the British Museum in 1753. It was printed in facsimile, 1786-1821.

ALEXANDRIAN ERA, see *Eras*.

ALEXANDRIAN SCHOOLS OF PHILOSOPHY. The first school arose B.C. 323, soon after the foundation of Alexandria. It flourished under the patronage of the Ptolemies till about 30 B.C. It included Euclid (300), Archimedes (287-212), Apollonius (250), Hipparchus (150), and Hero (150). The second school dates from 30 B.C., and lasted till about 640. Its most eminent members were Ptolemy, the author of the Ptolemaic system (150), Diophantus the arithmetician (200), and Pappus the geometer (350).

ALEXANDRINES, verses of twelve syllables, first written by Alexander of Paris, about 1164, and since called after him. The last line of the Spenserian stanza is an Alexandrine. In Pope's *Essay on Criticism*, this verse is thus happily exemplified:—

"A needless Alexandrine ends the song,
That, like a wounded snake, drags its slow length
along."

The longest English poem wholly in Alexandrine verse is Drayton's *Polyolbion*, published 1612-22.

ALEXINATZ, a town in Servia. Severe fighting took place here between the Turks and Servians,

Aug.-Sept. 1876. The town, head-quarters of the Servians, was captured 31 Oct. This led to an armistice and peace. See *Turkey*.

ALFORD (N. Scotland), **BATTLE OF**. General Baillie, with a large body of covenanters, was defeated by the marquis of Montrose, 2 July, 1645.

ALGEBRA: Diophantus, of Alexandria, wrote a work upon Algebra consisting of 13 books, 6 of which are extant, 4th century. It was cultivated in the 9th century by the Arabs, who derived their knowledge from the Hindus and brought it into Spain; and in Italy by Leonardo Bonaccio of Pisa, in 1220. In 1494 Luca Paciolo published the first printed book on Algebra in Europe. Some of the algebraic signs were introduced either by Christoph Rudolph (1522-26) or Michael Stifelius of Nuremberg, 1544, and others by Francis Vieta, in 1590, when algebra came into general use. Jerome Cardan published his "Ars Magna," containing his rule, 1545. Thos. Harriot's important discoveries appeared in his "Artis Analytica Praxis," 1631. Descartes applied algebra to geometry about 1637. The binomial theorem of Newton, the basis of the doctrine of fluxions, and the new analysis, 1668. Subsequently Euler, Lagrange, Fourier, Peacock, De Morgan, Sylvester, and Cayley.

ALGESIRAS, or **OLD GIBRALTAR** (S. Spain). Here the Moors entered Spain in 711, and held it till taken by Alfonso XI. Mareh, 1344.—Two engagements took place here between the English fleet under sir James Saumarez and the United French and Spanish fleets, 6 and 12 July, 1801. In the first the enemy was victorious; but the British honour was redeemed in the latter conflict, the *San Antonio*, 74 guns, being captured. Two Spanish ships fired on each other by mistake, and took fire; of 2000 men on board, 250 were saved by the English. *Alison*.

ALI, SECT OF (Shiites, or Fatimites). Ali, born about 598, married Mahomet's daughter Fatima, about

619; became vizier, 614; and caliph, 656. Ali was called by the prophet, "the lion of God, always victorious;" and the Persians follow the interpretation of the Koran according to Ali, while other Mahometans adhere to that of Abubeker and Omar. Ali was assassinated 23 Jan. 661.*

ALIENS or FOREIGNERS were banished in 1155, being thought too numerous. In 1343 they were excluded from enjoying ecclesiastical benefices. By 2 Rich. II. st. 1, 1378, they were much relieved. When they were to be tried criminally, the juries were to be half foreigners, if they so desired, 1430. They were restrained from exercising any trade of handicraft by retail, 1483, a prohibition which was relaxed in 1663.

ALIZARINE, a crystalline body, the colouring principle of madder discovered in it by Robiquet and Colin in 1831. Schunck showed that all the finest madder colours contained only alizarine combined with alkalies and fatty acids. Graebe and Liebermann obtained anthracene from alizarine in 1868, and alizarine from anthracene in 1869. The crystalline body anthracene was discovered in coal oils by Dumas and Laurent in 1832. See *Madder*.

* The first four successors of Mahomet—Abubeker, Omar, Othman, and Ali, his chief agents in establishing his religion and extirpating unbelievers, and whom on that account he styled the "cutting swords of God"—all died violent deaths; and his family was wholly extirpated within thirty years after his own decease.

ALKALIES (from *kali*, the Arabic name for the plant from which an alkaline substance was first procured) are ammonia, potash, soda, and lithia. Black discovered the nature of the difference between caustic and mild alkalies in 1736.

The fixed alkalies, potash and soda, decomposed, and the metals potassium and sodium formed, by Humphry Davy at the Royal Institution, London, 1807.

Dr. Ure invented an alkalmeter, 1816.

The manufacture of alkalies, very extensive in Lancashire and Cheshire, is based on the decomposition of common salt (chloride of sodium), by a process invented by a Frenchman named Nicolas Le Blanc, about 1792; his statue set up in Paris, summer, 1885.

Mr. Losh obtained crystals of soda from brine about 1814. Various modifications of these processes are now in use.

"Alkali works" are defined as works for the manufacture of alkali, sulphates of soda, sulphate of potash, and in which muriatic gas is evolved.

Mr. Wm. Gossage's process for condensing muriatic acid gas patented in 1836.

The "ammonia process" of making soda, invented by Dyer and Hemming, in 1838; patents respecting it taken out by Solvay, 1863, 1867, 1872; Gossage, 1854; Schlossing, 1854, 1858; Young, 1871, 1872; Weldon, 1872, 1873; and by others.

Mr. Walter Weldon received the French Lavoisier medal for his most important improvements in the alkali manufacture, July, 1877. He died of overwork, 2c Sept. 1885, aged 53.

In consequence of the injury to vegetation produced by the alkali works in Lancashire and Cheshire, the Alkali Works act "for the more effectual condensation [of 95 per cent.] of muriatic acid gas" (or hydrochloric acid) was passed, 28 July, 1863. It came into operation 1 Jan. 1864, proved successful; was re-enacted, 1868; and amended, 1874, 1881, and 1892. Mr. James Greenwood's electrolytic process for the direct production of caustic soda and chlorine from common salt reported successful, Jan. 1892. See *Bleaching Chemical Works and Union*.

Manufacture of ammonia-soda by the Solvay process by sir J. Brunner and Dr. L. Mond at Northwich, 1873. Patents taken out for making chlorine in conjunction with soda. These alkali works now the largest in the world, 1903.

ALLAHABAD (N. W. Hindostan), the "holy city" of the Indian Mahometans, situated at the junction of the rivers Jumna and Ganges. The main station of the Grand Trunk road and East Indian railway. Here is the pillar of Asoka, 240 B.C. The province of Allahabad was successively subject to the sovereigns of Delhi and Oude, but in 1801 was partially and in 1803 wholly incorporated with the British possessions. By treaty here, Bengal, &c., was ceded to the English in 1765.—During the Indian mutiny several sepoy regiments rose and massacred their officers, 4 June, 1857; colonel Neil marched promptly from Benares and suppressed the insurrection. In Nov. 1861, lord Canning made this city the capital of the N. W. provinces. Visit of the Prince of Wales, 7 March, 1874. University instituted, 1887. A fair is held Dec.-Jan., visited by about 300,000 persons. Population, 1891, 175,246, 1901, 172,032.

ALLEGORY abounds in the Bible and in Homer; see Jacob's blessing upon his sons, *Genesis* xlix. (1689 n.c.), *Psalms* lxxx., and all the prophets. Spenser's *Fæerie Queene* (1590) and Bunyan's *Pilgrim's Progress* (1678) are allegories throughout. *The Spectator* (1711), by Addison, Steele, and others, abounds in allegories. The allegorical interpretation

of the scriptures is said to have begun with Origen in the 3rd century; but see *Gal.* iv. 24.

ALLIA (more correctly *Alia*), Italy, a small river flowing into the Tiber, where Brennus and the Gauls defeated the Romans, 16 July, 390 B.C. The Gauls sacked Rome and committed so much injury that the day was thereafter held to be unlucky (*nefastus*), and no public business was permitted to be done thereon.

(about 830) for the commemoration of all those saints and martyrs in whose honour no particular day is assigned. The reformers of the English church, 1549, struck out of their calendar a great number of anniversaries, leaving only those which were connected with popular tradition.

ALMA, a river in the Crimea, near which was fought a great battle on 20 Sept. 1854. (See *Russo-Turkish War and Crimea*.) The English, French, and Turkish army (about 57,000 men) moved out of their first encampment in the Crimea on 19 Sept., and bivouacked for the night on the

left bank of the Bulganae. The Russians (commanded by prince Menschikoff), mustering 40,000 infantry, had 180 field-pieces on the heights, and on the morning of 20 Sept. were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces, under lord Raglan, consisted of 26,000 men; the French of 24,000, under marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river Alma was crossed, while prince Napoleon took possession of the village under the fire of the Russian batteries, and at 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 5000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed. Total loss of the allies about 3400.

ALMACK'S ASSEMBLY-ROOMS, King-street, St. James's, London, at first very exclusive, were erected by a Scotchman named Almaek or M'Call, and opened 12 Feb. 1765. They have long been termed Willis's rooms from the name of later proprietors; they were offered for sale in April and July, 1890.

ALMANACS (from the Arabic *al manah*, to count; or better, the Coptic *al*, computation, and *men*, memory). The Egyptians computed time by instruments; and the Alexandrians had almanacs, and log calendars are ancient. In the British Museum and universities are specimens of early almanacs. Michael Nostradamus, the astrologer, wrote an almanac in the style of Merlin, 1556. *Dufresnoy*. Professor Augustus De Morgan's valuable "*Book of Almanacs*," with an index of reference, by which the almanac may be found for every year,* was published in March, 1851.* Among the earlier and more remarkable almanacs were—

Mr. A. Hall's Almanac, designed April, 1899, calls New Year's Day Jan. 1, the remaining 364 days being divided into 13 months of 28 days each, thus causing any day of any month to fall on the same day of the week. The extra month he proposes to call "Christmber."

* *Murphy's Almanack* for 1838 predicted correctly a frost on 7 Jan.; thaw and frost 14th; severe frost 21st, and then thaw. A great sale of the almanac ensued. Afterwards the predictions failed.

The Stationers' company claimed the exclusive right of publishing almanacs in virtue of letters patent from James I., granting the privilege to them and the two Universities; but the monopoly was broken up by a decision of the Court of Common Pleas in 1775. A bill to renew the privilege was lost in 1779.

The *Stamp Duty* on English almanacs first imposed in 1710, was abolished in August, 1834; since when almanacs have become innumerable, being issued by tradesmen with their goods.

Of Moore's (under the management of Henry Andrews, the able computer of the *Nautical Ephemeris*) at one time upwards of 430,000 copies were annually sold. He died in 1820.

Of *Foreign Almanacs*, the principal are the "Almanach de France," first published in 1699, the "Almanach de Gotha," 1764, in 150 pages; in 1895, 1,367, and the "Livres d'Or des Souverains," by H. R. Hiort-Lorenzen, published in Paris, July, 1895.

ALMANZA (S. E. Spain). Here on 25 April (o. s. 14), 1707, the English, Dutch, and Portuguese forces under the earl of Galway, were totally defeated by the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II.). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

ALMEIDA (Portugal), a frontier town, captured by Massena, 27 Aug. 1810. The French entered Spain, leaving a garrison at Almeida, blockaded by the English, 6 April, 1811. Almeida was retaken by Wellington (11 May), and Massena retired from Portugal.

ALMENARA, a village N. E. Spain, where on 28 July, 1710, an English and German army defeated the Spanish army supporting Philip V., the grandson of Louis XIV. of France. Stanhope, the English general, killed the Spanish general, Amézaga, in single conflict; an act almost unexampled in modern warfare.

ALMOHADES, Mahometan partisans, followers of Mohammed ben Abdalla, surnamed El-Mehedi, in Africa, about 1120. They subdued Morocco, 1145; entered Spain and took Seville, Cordova, and Granada, 1146-56; and founded a dynasty and ruled Spain till 1232, and Africa till 1278.

ALMONER, an office anciently allotted to a dignified clergyman who gave the first dish from the royal table to the poor, or an alms in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France was the highest ecclesiastical dignity in that kingdom before the revolution, 1789. Hereditary grand almoner of England, the marquis of Exeter, 1895. The king's almoner (Right Rev. lord Alwyne Compton, dean of Worcester, 1882, consecrated bishop of Ely, 1886) or the sub-almoner distributes the king's gifts on *Maundy Thursday* (which see).

ALMORAVIDES, Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohads in 1147.

ALMSHOUSES for aged and infirm persons have been erected by many public companies and benevolent individuals, particularly since the abolition of religious houses at the Reformation in the 16th century. ALNEY, an island in the Severn, near Gloucester. Here a combat is asserted to have taken place between Edmund Ironside and Canute the Great, in sight of their armies, 1016. The latter was wounded, and proposed a division of the kingdom, the south part falling to Edmund. Edmund was murdered at Oxford shortly after, it is said by Ædric Streon; and Canute obtained possession of the whole kingdom.

ALNWHICK (Saxon *Ealnwic*), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesci. It has long belonged to the Percies. Malcolm, king of Scotland, besieged Alnwick, and he and his sons were killed 13 Nov. 1093. It was taken by David I. in 1136, and attempted in July, 1174, by William the Lion, who was defeated and taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparring expense.

ALPACA (or Pao), a species of the S. American quadruped, the Lama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory (covering 11 acres), with a town, park, almshouses, &c., for the workpeople, was erected at Salthair, near Shipley, Yorkshire, by Mr. (afterwards sir) Titus Salt in 1852. A statue of him at Bradford was unveiled 1 Aug. 1874. He died 29 Dec. 1876. Salthair visited by the prince and princess of Wales 22 June, 1882.

The Royal Yorkshire Jubilee Exhibition at Salthair opened by the Princess Beatrice . . . 6 May, 1887

ALPHABET, so called from the first two Greek letters *alpha, beta* (Hebrew *aleph beth*). The statements that Cadmus brought the Phœnician letters from Egypt into Greece are legendary. M. de Rougé about 1850 demonstrated the true origin of the alphabet. Dr. Isaac Taylor's learned work, "The Alphabet," was published May, 1883; he died, aged 72, 18 Oct. 1901.

Nearly 200 alphabets are known, of which about 50 are in use, mostly developed from the Phœnician alphabet itself, said to have been derived from the Egyptian hieroglyphic picture writing; the Roman alphabet was based upon the Greek. The alphabets of the different nations contain the following number of letters:—

English	26	Arabic	28
French	25	Persian	32
Italian	22	Turkish	29
Spanish	27	Sanscrit	44
German	26	Chinese radical characters	214
Slavonic	12	ters	
Russian	35	Chinese alphabet said to be invented by	
Latin	22	bishop Eligius Cœsi	
Greek	24	of Canton (1836)	33
Hebrew	22		

ALPHONSINE TABLES, astronomical tables, composed by Spanish and Arab astronomers, and collected in 1253 under the direction of Alfonso X. of Castile, surnamed the Wise, who is said to have expended upwards of 400,000 crowns in completing the work; he himself wrote the preface. The Spanish government ordered the work of Alphonso to be reprinted from the best MSS.; the publication began in 1863.

ALPS, European mountains. Those between France and Italy were passed by Hannibal, 218 B.C.; by the Romans, 154 B.C.; and by Napoleon I. May, 1800. Roads over Mont Cenis and the Simplon, connecting France and Italy, were constructed, by order of Napoleon, between 1801-6; see *Simplon*. The "Alpine Club," which consists of British travellers in the Alps, was founded in 1858, and published its first work, "Peaks, Passes, and Glaciers," 1859; and a journal since. Mr. John Ball, F.R.S., long the able first president, and author of excellent "Guides," died 21 Oct. 1889. See *Jungfrau, Matterhorn*. An International Alpine Congress opened at Salzburg 14 Aug. 1882.

Alpine Clubs.—Austrian founded, 1862; Swiss, 1863; Italian, 1863; German, 1869, united with the Austrian 1874, and numbers some 40,000 members. The Appalachian Mountain Club of Boston is the principal mountaineering Club in the United States.

Mont Cenis or Col de Fréjus Tunnel.—A tunnel, $\frac{7}{8}$ miles long through Mont Cenis, connecting Savoy and Piedmont, was proposed by M. Medail, and, after long lying dormant, was discussed and plans drawn up in 1848. The execution was prevented by the war of 1849.

The work of excavation was begun by king Victor Emmanuel, 31 Aug. 1857.

The boring was at first effected by ordinary piercing machinery; steam power was employed in 1860; and latterly compressed air.

Engineers—Grattoni, Grandis, and Sommeiller; the boring was completed, 25 Dec. 1870.

The total cost was about 2,600,000*l*. As the Italians had executed the work within the given time, the French government bore the chief expense.

The first experimental trip was made in 40 minutes, 13 Sept., and the tunnel was solemnly inaugurated by the passage of 22 carriages in 20 minutes, 17 Sept. 1871; regular trains pass through, 16 Oct. 1871.

A railway for locomotives over Mont Cenis was constructed upon Mr. Fell's plan in 1867 (see *Railways*), and opened for traffic, 15 June, 1868.

The overland mail first travels through the tunnel to Brindisi, saving 24 hours, 5 Jan. 1872.

St. Gothard Tunnel (part of a railway system to connect the North Sea and the Mediterranean), about 9½ miles; compressed air employed in boring; begun June, 1872; completed 29 Feb. 1880; through failure in vaulting, May, 1880, opening deferred.

The first complete train, carrying one hundred passengers, passed through the St. Gothard Tunnel in 50 minutes, 1 Nov. 1881; partially opened 1 Jan. 1882; completely opened June, 1882.

Simplon tunnel, convention for its construction by the Italian and Swiss governments, signed 25 Nov. 1859.

275 fatal Alpine accidents, 1801-1900; 136 in 1903.

New Rhœtian Railway, begun 1898, opened 27 June, 1903. Scheme of railway to top of Mt. Blanc proposed by M. Vallot, Sept. 1903.

ALRESFORD, battle of, or Cheriton, *which see*.

ALSACE, **ELSSASS**, formerly part of the kingdom of Austrasia, afterwards the French departments of the Upper and Lower Rhine. It was incorporated with the German empire in the 10th century. A portion was restored to France, 1648, and the whole, including Strasburg, in 1697. Alsace was re-conquered by the Germans, Aug.-Sept. 1870; and annexed to their empire, May, 1871; by law, 9 June, 1871. The Alsatians were permitted to

choose their nationality, before 30 Sept. 1872. Many emigrated into France, with much regret.—ALSACE-LORRAINE was constituted a province of the German empire, having been ceded by France by the treaty of peace concluded 10 May, 1871, see *Belfort*. The province sends 15 members to the German parliament. Administrators, prince Bismarck, 1871; field-marshal Manteuffel, 1 Oct. 1879; prince Hohenlohe, July, 1885; prince Hohenlohe-Langenburg, Oct. 1894. Population of Alsace-Lorraine, 1885, 1,564,355; 1890, 1,603,107; 1900, 1,717,451. See *Germany*, 1887, and *Strasbourg*. The emperor William II. visited the province 20 Aug. *et seq.* 1889, and 19 Oct. 1895. The stringent passport regulations greatly relaxed 1 Oct. 1891; the "dictatorship paragraph" repealed 11 May, 1902.

ALSATIA, a name given to the precinct of Whitefriars, London, is described in Scott's "Fortunes of Nigel." Its privilege of sanctuary was abolished in 1697.

ALSEN (Denmark), besieged by the Prussians, and heroically defended, 26 June; taken, 29 June, 1864.

ALTAR. One was built by Noah, 2348 B.C.; 3154 *Hales*; 2481 *Clinton* (*Gen.* viii. 20); others by Abraham, 1921 (*Gen.* xii. 8). Directions for making an altar are given, *Exod.* xx. 24, 1491 B.C. The erection of altars in Greece is mythically assigned to Cecrops. The term "altar" was early applied to the table used in the celebration of the Lord's Supper in Christian churches (*Heb.* xiii. 10). Since the time of Elizabeth there has been much controversy on the subject, and the Puritans in the civil war destroyed many of the ancient stone altars, substituting wooden tables. In Jan. 1845 it was decided in the Arches Court that *stone altars* were not to be erected in English churches.

ALTENKIRCHEN (Prussia). The French, who had defeated the Austrians here, 4 June, 1796, were themselves defeated, and their general, Marceau, killed, 19 Sept. following.

ALTER EGO (*another or second I*), a term applied to Spanish viceroys when exercising regal power; used at Naples when the crown prince was appointed vicar-general during an insurrection in July, 1820.

ALTONA (Holstein, N. Germany), acquired by the Danes, 1660, and made a city, 1664. It was occupied first by the German federal troops, 24 Dec. 1863, and then by the Prussians (the federal diet protesting), 12 Feb. 1864.

ALT-RANSTADT (Prussia), where the treaty of peace dictated by Charles XII. of Sweden, to Frederick Augustus of Poland, was signed, 24 Sept. 1706, o.s. Frederick, deposed in 1704, regained the throne of Poland after the defeat of Charles XII., in 1709.

ALUM, a salt, is said to have been first discovered at Roccha, in Syria, about 1300; it was found in Tuscany about 1470; its manufacture was brought to perfection in England by sir T. Chaloner, who established large alum works near Whitby in 1608; it was discovered in Ireland in 1757; and in Anglesey in 1790. Alum is used as a mordant in dyeing, to harden tallow, and in the paper manufacture.

Messrs. Peter Spence & Sons produced a colossal crystal of alum weighing over eight tons. April, 1886

ALUMBAGH, a palace with other buildings near Lucknow, Oude, India, taken during the mutiny from the rebels, 23 Sept. 1857, and heroically

defended by the British under sir James Outram. He defeated an attack of 30,000 sepoy on 12 Jan. 1858, and of 20,000 on 21 Feb., and was relieved by sir Colin Campbell in March.

ALUMINIUM, a metal, the base of the earth alumina, which is combined with silica in clay, and which was shown to be a distinct earth by Marggraf in 1754, having been previously confounded with lime. It is very light (sp. g. 2.25), malleable, and sonorous; when pure does not rust, and is not acted on by sulphur or any acid except hydrochloric. Oerstedt in 1826 obtained the chloride of aluminium; and in 1827 the metal itself was got from it by F. Wöhler, but was long a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste.-Claire Deville, who in 1856 succeeded in procuring considerable quantities of this metal by the aid of the metal sodium. A cheaper method was devised by Mr. Webster, of Hollywood, near Birmingham, in 1881. Since 1890 by electrolytic methods, as that of Messrs. Cowles of Milton, near Stoke-on-Trent, and of Lockport, in New York, the chemical process has been practically superseded. In March, 1856, it was 3*l.* the ounce; in June, 1857, 11*s.* or 12*s.*, and it gradually became much cheaper, at the present time, 1903, it is 1*s.* 3*d.* per lb. The eagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, "De l'Aluminium," was published in 1859. An aluminium manufactory was established at Newcastle in 1860, by Messrs. Bell. They obtain the metal from a French mineral, bauxite. Their aluminium bronze, an alloy of copper and aluminium, invented by Dr. John Percy, F.R.S., was made into watch cases, &c., by Messrs. Reid of Newcastle, in 1862. Aluminium bronze, which can be manufactured with a textile strength equal to steel, renders it a useful material for field guns; its endurance and resistance to friction, combined with its lightness, adapt it specially for the bearings of shafts and other kinds of machinery. Its cost of production is, however, high. Combined with tin aluminium is used for optical instruments, and alloyed with silver forms a metal named *Tiers Argent*, from which forks and spoons are manufactured. "Aluminium gold," used for imitation gold jewelry, is an alloy of aluminium with copper. Aluminium entered largely into the construction of the deck of Shamrock III.

A steam launch wholly made of aluminium (alloy), 6 metres long, 1½ metres wide, was constructed at Zurich by Messrs. Escher, Wyss & Co., Sept. 1892. An aluminium yacht, *Vendeesse*, launched on the Seine, 6 Dec. 1893.

The *Jules Davoust*, 33 feet long, weighs 18 cwt., also exhibited on the Seine, Dec. 1893.

An aluminium torpedo-boat, built by Messrs. Yarrow for the French government, successfully tried at Greenwich, 29 Sept. 1894.

The British aluminium company (registered 1894) establish works at Foyers, and utilize the Falls; reported June, 1896; reservoir works completed, Jan. 1898.

AMADIS OF GAUL, a Spanish or Portuguese romance, stated to have been composed about 1370 by Vasco de Lobeira. It was enlarged by De Montalvo, about 1465; and first printed (in Spanish) 1519; in French, 1540-56. Translation by Southey, 1803.

AMALEKITES (descendants of Amalek, grandson of Esau, brother of Jacob) attacked the Israelites, 1491 B.C., when perpetual war was denounced against them. They were subdued by Saul

about 1079, by David, 1058 and 1056; and by the Simeonites about 715 B.C.

AMALFI, a city on the gulf of Salerno, Naples, in the 8th century became the seat of a republic, and flourished by its commerce till 1075, when it was taken by Roger Guiscard, and eventually incorporated with Naples. The Pisans, in their sack of the town in 1135, are said to have found a copy of the Pandects of Justinian, and thus to have induced the revival of the study of Roman law in Western Europe; the story is now doubted. Flavio Gioia, a native of Amalfi, is the reputed discoverer of the mariner's compass, about 1302.

AMATI, a family of celebrated violin makers of Cremona, 16th and 17th centuries. Andrea (1540-1600) founded the business, which was carried on by his sons Geronimo and Antonio and his grandson Niccolo. The last-named was the master of both Guarneri and Stradivario, whose violins are so highly prized.

AMATONGALAND, between Zululand and the Portuguese possessions, South Africa. The territory annexed to the British possession of Zululand, 30 Nov. 1897.

AMAZON, West India mail steam ship, left Southampton on her first voyage, Friday, 2 Jan. 1852, and on Sunday morning, Jan. 4, was destroyed by fire at sea, about 110 miles W.S.W. of Scilly (ascribed to the spontaneous ignition of combustible matter placed near the engine-room). Out of 161 persons on board, 102 persons must have perished by fire or drowning. 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galliot. Eliot Wurburton, a distinguished writer in general literature, was among those lost.

AMAZON (S. America). The longest river in the world. Navigable for large steam vessels 2,500 miles from the sea. Was discovered by Pinzon in 1500, and explored by Francisco Orellana in 1540. Coming from Peru, he sailed down the Amazon to the Atlantic, and observing companies of women in arms on its bank, he called the country Amazonia, and gave the name of Amazon to the river, previously called Marañon. Steam navigation commenced 1850. There is now, 1903, a regular service of ocean-going steamers up the Amazon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are mythically said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambuscades by their enemies. Their widows formed a female state, and decreed that matrimony was a shameful servitude. *Quintus Curtius*. They were said to have been conquered by Theseus. The Amazons were constantly employed in wars; and that they might bend the bow with more force, their right breasts were burned off, whence their name from the Greek, *a*, no, *mazos*, breast. Others derive the name from *maza*, the moon, which they are supposed to have worshipped. About 330 B.C. their queen, Thalestris, visited Alexander the Great, whilst he was pursuing his conquests in Asia, with three hundred females in her train. *Herodotus*. For modern amazons, see *Dahomey*.

AMBASSADORS. Accredited agents, and representatives from one court to another, are referred to in early ages. In most countries they have

great privileges; and in England, they and their servants are secured against arrest. England has eight *ambassadors* (at Berlin, Constantinople, Madrid, Paris, Rome, St. Petersburg, Vienna, Washington), twenty-six ministers, and about thirty chief consuls, resident at foreign courts, exclusive of inferior agents; the ambassadors and other chief agents from abroad at the court of London in 1865 were 47; in 1868, 43; in 1872, 42; in 1878, 39; in 1889, 43; in 1902, 39.

The Russian ambassador being imprisoned for debt by a lace-merchant, 27 July, 1708, led to the passing the statute of 7 Anne, for the protection of ambassadors, 1708.

Two men, convicted of arresting the servant of an ambassador, were sentenced to be conducted to the house of the ambassador, with a label on their breasts, to ask his pardon, and then one of them to be imprisoned three months, and the other fined, 12 May, 1780.

The first minister from the United States of America to England, John Adams, presented to the king, 1 June, 1785; the first from Great Britain to America was Mr. Hammond, in 1791. Mr. Thos. F. Bayard, first U. S. ambassador to London, appointed 1893; died, aged 69, 28 Sept. 1898. Sir Julian Pauncefote (after lord, 1899), British minister, 1889, made ambassador, 1893; died, 24 May, 1902.

A Japanese minister received by the queen, 3 March, 1875.

The first accredited ambassador from China, Kus-ta-Jên, landed at Southampton, 21 Jan. 1877.

In the case of Sir H. Macartney, secretary to the Chinese legation *v.* the Vestry of Marylebone, the Queen's Bench decided that the plaintiff was free from parish rates and taxes, 24 Feb. 1860.

AMBER, a semi-mineral substance, probably fossil resin, derived from extinct conifera. From its property of becoming highly negatively electric by friction the term electricity is derived; *elektron* being the Greek word for amber. Its use for ornaments is of great antiquity, it is found among the prehistoric remains of the Swiss lake dwellers, and is alluded to in Homer. Theophrastus wrote upon it 300 B.C. Amber was much valued as a charm against witchcraft and disease. It is principally found in the northern parts of Europe. "The Tears of the Heliades: Amber as a Gem," by W. A. Buffum, published 1896.

AMBLEF, near Cologne, Germany. Here Charles Martel defeated Chilperic II., and Ragenfroi, mayor of the Neustrius, 716.

AMBOISE (Central France). A conspiracy of the Huguenots against Francis II., Catherine de Medicis, and the Guises, was suppressed at this place in Jan. 1560. On 19 March, 1563, the Pacification of Amboise was published, granting toleration to the Huguenots. The civil war was however soon renewed.

AMBOYNA, chief of the Molucca isles, discovered about 1512 by the Portuguese, but not wholly occupied by them till 1580. It was taken by the Dutch in 1605. The English factors at this settlement were cruelly tortured and put to death, 17 Feb. 1623-4, by the Dutch, on an accusation of a conspiracy to expel them from the island, where the two nations jointly shared in the pepper trade of Java. Cromwell compelled the Dutch to give a sum of money to the descendants of the sufferers. Amboyna was seized by the English, 16 Feb. 1796, but was restored by the treaty of Amiens, in 1802. It was again seized by the British, 17-19 Feb. 1810; and again restored at the peace of May, 1814. *Amboyna wood*, a beautiful coloured wood, yielded by *Pterosperrnum indicum*.

AMEN, an ancient Hebrew word meaning *true, faithful, certain*, is used in the Jewish and Christian assemblies, at the conclusion of prayer: see 1 Cor. xiv. 16 (A.D. 59). It is translated "*verily*" in the Gospels.

AMENDE HONORABLE, in France, in the 9th century, was a punishment inflicted on traitors and sacrilegious persons: the offender was delivered to the hangman: his shirt was stripped off, a rope put round his neck, and a taper in his hand; he was then led into court, and was obliged to beg pardon of God and the country. Death or banishment sometimes followed. These words also denote a recantation in open court, or in presence of the injured person.

AMERCEMENT, in Law, a fine assessed for an offence done, or pecuniary punishment at the *mercy* of the court: thus differing from a fine directed and fixed by a statute. By Magna Charta, 1215, a freeman cannot be amerced for a small fault, but in proportion to the offence he has committed; the mode was determined by 9 Hen. III., 1225.

AMERICA,* the great Western Continent, is about 9000 miles long, with an area of about 16,500,000 square miles. It is now believed to have been visited by the Norsemen or Vikings in the 10th and 11th centuries; but the modern discovery is due to the sagacity and courage of the Genoese navigator, Christopher Columbus.† "History of the New World called America," by Edw. J. Payne. Vol. 2. 1899. See *Chicago*.

Columbus sailed on his first expedition from Palos in Andalusia on Friday, with vessels supplied by the sovereigns of Spain. 3 Aug. 1492
He lands on the island of Guanahani, one of the Bahamas; takes possession of it in the name of Ferdinand and Isabella of Castile, and names it San Salvador Friday, 12 Oct. 1492
He discovers Cuba, 28 Oct.; and Hispaniola (now Hayti), where he builds a fort, La Navidad, 6 Dec. "

* The name is derived from Amerigo Vespucci, a Florentine merchant, who died in 1512. He accompanied Ojeda in his voyage on the eastern coast in 1498; and described the country in letters sent to his friends in Italy. He is charged with presumptuously inserting "Tierra de Amerigo" in his maps. Irving discusses the question in the Appendix to the Life of Columbus, but comes to no conclusion. Humboldt asserts that the name was given to the continent in the popular works of Waldseemüller, a German geographer, without the knowledge of Vespucci. To America we are indebted, among other things, for maize, the turkey, the potato, Peruvian bark, and tobacco. See *Florence*, 1898.

† Christopher Colombo was born about 1445 (or between 1435 and 1449); first went to sea about 1466; settled at Lisbon in 1470, where he married Felipa, the daughter of Perestrello, an Italian navigator, whereby he obtained much geographical knowledge. He is said to have laid the plans of his voyage of discovery before the republic of Genoa, in 1485, and other powers, and finally before the court of Spain, where at length the queen Isabella became his patron. After undergoing much ingratitude and cruel persecution from his own followers and the Spanish court, he died on 20 May, 1506, and was buried with much pomp at Valladolid. His remains were transferred, in 1513, to Seville; in 1536 to San Domingo; and in Jan. 1796 to the Havana, Cuba; to Seville, 19 Jan. 1809. The original inscription on his tomb is said to have been "A Castilla y a Leon Nuevo Mundo dió Colon." "To Castile and Leon Colon gave a New World." Humboldt says beautifully, that the success of Columbus was "a conquest of reflection." It was stated in Nov. 1890, that Columbus' log-book had been fished up from the sea.

The latter were defeated at Santa Rosa, 16 June, and San Salvador was taken, 26 Oct.; the president of San Salvador, Barrios, fled, and Carrera, the dictator of Guatemala, became predominant over the confederacy. He is defeated and killed in a prolonged battle at Chalchuapa, 2 April; peace with the states signed 16 April, 1885. The union of the states, under one principal president, was proposed at the Pan-American Congress, 1889-90. AMMONIA, the volatile alkali, mainly produced by the decomposition of organic substances. Its name is ascribed to its having been procured from heated camels' dung near the temple of Jupiter Ammon in Libya. The discovery of its being a compound of nitrogen and hydrogen is ascribed to Joseph Priestley in 1774. By the recent labours of chemists both the oxide of the hypothetical metal ammonium, and ammonium amalgam, have been formed; and specimens of each were shown at the Royal Institution in 1856 by Dr. A. W. Hofmann, who has done very much for the chemical history of ammonia.

The act also appointed inspectors of anatomy, regulated the schools, and required persons practising anatomy to obtain a licence. ANHALT, HOUSE OF, in Germany, deduces its origin from Berenthobaldus, who made war upon the Thuringians in the sixth century. In 1606, the principality was divided among the four sons of Joachim Ernest, by the eldest, John-George. Thus began the four branches — Anhalt-Dessau (descended from John-George); Zerbst, extinct, 1793; Plotsgau or Coethen, extinct, 1847; and Bernburg, extinct, 1863; (the last duke died without issue, 22 Aug. 1863.) The princes of Anhalt became dukes in 1809. ANILINE, an oily alkaline body, discovered in 1826 by Unverdorben among the products of distillation of indigo. From benzole (*which see*) Bechamp, in 1856, obtained it by successive treatment with concentrated nitric acid and reducing agents. The scientific relations of aniline have been carefully examined by several chemists, especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was not till 1856 that Mr. W. H. Perkin showed how a violet oxidation-product (mauve) could be applied in dyeing. Aniline is now manufactured on a large scale for the commercial production of "Mauve" and "Magenta" (rosaniline) (*which see*), and several other colouring matters, aniline blue, 1861; violet, 1863; "night" green, &c. The patent of Simpson, Maule, and Nicholson, for aniline colours, was annulled by the house of lords, 27 July, 1866. See *Alizarine*. Poisoning from the inhalation of aniline vapours, characterised by the bluish colour of the lips, cheeks and ears of the persons affected, is termed *Anilism*.

ANIMALCULES, Leeuwenhoek's remarkable microscopical discoveries were published in the Philosophical Transactions of the Royal Society, for 1677, in his "Arcana Naturæ," at Leyden, 1696. The great works of Ehrenberg of Berlin on the Infusorial Animalculæ, &c., were issued 1838-57. Pritchard's *Infusoria*, ed. 1861, and Mr. W. Savile Kent's *Manual of Infusoria*, 3 volumes, 1880-2, are valuable. The Rev. W. H. Dallinger, Dr. Drysdale and other distinguished scientists, by their microscopical observations of bacteria and other low forms of life, have greatly increased our knowledge.

ANIMAL MAGNETISM (to cure diseases by *sympathetic affection*) was introduced by father Hehl, a Jesuit, at Vienna, about 1774, and had its believers in France and England about 1788-89. Hehl for a short time associated with Mesmer, but they soon quarrelled.—Mr. Perkins (who died in 1799) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism;" but Drs. Falconer and Haygarth put an end to his pretensions by performing many wonders with a pair of wooden tractors. *Brande*. See *Mesmerism*. Animal magnetism disproved by commissions of F. U.

French Academy of Sciences, 1837-8; investigation closed as a "dead letter," 1840. Remarkable feats were performed by Miss Abbott, "the magnetic lady," at the Alhambra theatre, 14 Nov. *et seq.* 1891.

ANIMALS. Mr. Martin, M.P., as a senator, zealously laboured to repress cruelty, and in 1824 the *Royal Society for the Prevention of Cruelty to Animals* was instituted. Its new house in Jermyn-street, London, was founded 4 May, 1869. It opposed vivisection in 1860, in unison with a French society, and in Oct. 1873, offered premiums for improved trucks for conveying cattle. A jubilee congress of this and similar societies met in London 17 June, 1874. Convictions obtained by the society 1835 to June, 1876, 28,209. Convictions in England and Wales, 7,320, 1896; 8,033, 1901; 40,000, bequeathed by Mr. J. H. Long, Dec. 1902. Annual meetings are held. See *Vivisection*. Mr. Martin's act was passed 1822, and similar acts were passed in 1827, 1835, 1837, 1849, and 1854. Dogs were forbidden to be used for draught in 1839. See *Cattle*.

"*Fellowship of Animals' Friends*," organised about 15 July, 1879; earl of Shaftesbury, president. With similar object Mr. Ruskin founded St. George's Guild. The Dicky Birds Society in the northern counties numbered 8,000 members in 1883.

The Animals' Institute, Knightsbridge, distributed prizes for inventions for the relief of horses and other animals, 28 July, 1890.

A hospital for animals was opened at 75, Kinnerton-st., Wilton place, S.W., April, 1896. See *Brown institution*. Wild animals in captivity protection act passed, 6 Aug. 1900.

ANIMISM, the name given to the doctrine propounded by George E. Stahl about 1707, that the soul (*anima*) is the proper principle of life, "the vital principle" in opposition to materialism, *which see*. The term *animism* was given by Dr. Edward B. Tylor in 1869, to the belief in the existence of active spiritual beings common alike among civilized and uncivilized peoples. He lectured on animism (terming it a minimum definition of religion) at the Royal institution, March 1895.

ANJOU, a province, W. France, was taken by Henry II. of England from his brother Geoffrey, in 1156; their father Geoffrey Plantagenet, count of Anjou, having married the empress Matilda in 1127. It was taken from king John by Philip of France in 1205; was reconquered by Edward III.; relinquished by him at the peace of Brétigny in 1360, and given by Charles V. to his brother Louis with the title of duke. The university was formed in 1349.

The English were defeated: the duke of Clarence was slain by sir Allan Swinton, a Scotch knight, and 1500 men perished on the field; the earls of Somerset, Dorset, and Huntingdon were taken prisoners. Beaugé was the first battle that turned the tide of success against the English.

ANNAM or ANAM, an empire of Asia, to the east of India, nominally subject to China, formerly comprising Tonquin, Cochinchina, part of Cambodia, and various islands in the Chinese Sea; said to have been conquered by the Chinese, 234 B.C., and held by them till A.D. 263. In 1406 they reconquered it, but abandoned it in 1428. After much anarchy, bishop Adran, a French missionary, obtained the friendship of Louis XVI. for his pupil Gia-long, the son of the nominally reigning monarch, and with the aid of a few of his countrymen established Gia-long on the throne, who reigned till his death in 1821, when his son became king. In consequence of the persecution of the Christians, war broke out with the French, who defeated the army of Annam, 10,000 strong, about 22 April, 1859, when 500 were killed. On 3 June, 1862, peace was made; three provinces were ceded to the French, and toleration of the Christians granted. An insurrection in these provinces against the French, begun about 17 Dec. 1862, was suppressed in Feb. 1863. Ambassadors sent from Annam with the view of regaining the ceded provinces arrived at Paris in Sept. 1863, had no success. Cochinchina and other provinces were annexed to the French empire by proclamation, 25 June, 1867. Several native Christians were massacred by order of a bonze, July, 1868. Population about 3,000,000, capital Hué. Buddhism, ancestor worship, communal life, and education prevail.

By a treaty concluded 15 March, 1874, at Saigon, the independence of the king of Annam was recognized by France, the ports were opened to commerce, and toleration of the Christian religion was secured.

ANNO DOMINI, A.D., the year of Our Lord, of Grace, of the Incarnation, of the Circumcision, and of the Crucifixion (Trabatonis). The Christian era commenced 1 Jan. in the middle of the 4th year of the 19th Olympiad, the 753rd year of the building of Rome, and in 4714 of the Julian period. This era was invented by a monk, Dionysius Exiguus, about 532. It was introduced into Italy in the 6th century, and ordered to be used by bishops by the council of Chelsea, in 816, but was not generally employed for several centuries. Charles III. of Germany was the first who added "in the year of our Lord" to his reign, in 879. It was formerly held that Christ was born 4 u.c. Mr. W. T. Lynn considers that probably Christ was born towards the end of the year 5.

APPEAL or ASSIZE OF BATTLE. By the old law of England, a man charged with murder might fight with the appellant, thereby to make proof of his guilt or innocence. In 1817, a young maid, Mary Ashford, was believed to have been violated and murdered by Abraham Thornton, who, on trial, was acquitted. In an appeal, he claimed his right by wager of battle, which the court allowed; but the appellant (the brother of the maid) refused the challenge, and the accused was discharged, 16 April, 1818. This law was struck off the statute-book, by 59 Geo. III. c. 46 (1819).

In 1631 lord Rea impeached Mr. David Ramsey of treason and offered battle in proof; a commission was appointed, but the duel was prohibited by king James I.

APPEALS. In the time of Alfred (869-901), appeals lay from courts of justice to the king in council. *Courts of appeal at the Exchequer Chamber*,

in error from the judgments of the superior and criminal courts, were regulated by statutes in 1357, 1559, 1830 and 1848. *Appeals* from English tribunals to the pope were first introduced about 1151, were long vainly opposed, and were abolished by Henry VIII. 1534; restored by Mary, 1554; again abolished by Elizabeth, 1559. House of Lords sat as court of appeal in 1278. By 14 Edw. III., c. 5, 1340, a prelate, two earls, and two barons formed the court. Protest by House of Commons against appeal to the Lords, 1675, resisted by the peers; hearing of appeals resumed, 1677. The principle that this jurisdiction was a delegation by the crown of its final authority was reaffirmed 1876. See *Priory Council and Justices, Lords, Common Pleas*.

Court of appeal abolished by the Judicature Act, 1873; abolition suspended and a provisional court established 8 Nov. 1875
 The House of Lords was reconstructed as a court of final appeal by the Appellate Jurisdiction Act, passed 11 Aug.; the Act came into force 1 Nov. 1876; it enacts that every appeal shall be brought by petition to the House of Lords, that the matter may be reviewed before the Sovereign in Parliament. The court first sat 21 Nov. 1876
 The Act was amended by the Appellate Jurisdiction Act 1887, the Appeal Act (*formâ pauperis*) 1893, and the Statute Law Revision Act 1894
 The members usually attending (1903) are:—The Lord Chancellor, lord Hobhouse, lord Macnaghten, lord Shand, lord Davey, lord James of Hereford, lord Brampton, lord Ashbourne, and lord Robertson.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, fruiterer to Henry VIII., is said to have planted a great number of the orchards in Kent, and lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 78 varieties of apples in his day (1688). In 1903 there were some 2000 varieties cultivated in Great Britain. The scientific study and classification of apples is entitled Pomology.

APPORTIONMENT ACT (for rents, annuities, dividends, and other periodical payments) passed 1 Aug. 1870.

APPRAISERS. The valuation of goods for another was an early business in England; and so early as 1283, by the statute of merchants, or of Acton Burnel, "it was enacted that if they valued the goods of parties too high, the appraisers should take them at such price as they have limited." In 1845 their annual licence was raised from 10s. to 40s. A duly licensed auctioneer or house agent may act as appraiser.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. *Stow's Survey*. The apprentice tax enacted 43 Geo. III. 1802. The term of

seven years, not to expire till the apprentice was 24 years old, required by the statute of Elizabeth (1563), was abolished in 1814. An act for the protection of apprentices, &c., was passed in 1851. The apprentices of London have been at times very riotous; they rose into insurrection against foreigners on *Evil May-day* (which see) 1 May, 1517.

Exhibition of apprentices' work at the People's Palace opened by the prince of Wales 10 Dec. 1888.

APPROPRIATION ACT passed annually by a clause prohibits the treasury officials from applying public money to any service other than that to which it has been specially appropriated. The principle was adopted by the commonwealth, and was definitely established in 1665.

APPROPRIATION CLAUSE, of the Irish Tithes Bill of 1835, brought forward by lord John Russell, whereby any surplus revenue that might accrue by the working of the act was to be appropriated for the education of all classes of the people. The principle was adopted by the commons, but rejected by the lords in 1835 and 1836, and was abandoned.

APPROPRIATIONS (property taken from the church), began in the time of William I. The parochial clergy, then commonly Saxons, were impoverished by the bishops and higher clergy (generally Normans) to enrich the monasteries possessed by the conqueror's friends. Where the tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV. complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. Lay appropriations began after the dissolution of the monasteries, 1536.

APRICOT (*præcox*, early ripe), *Prunus Armeniaca*, from Asia Minor, said to have been first planted in England about 1540, by the gardener of Henry VIII.

APRIL, the fourth month of our year, the second of the ancient Romans.

APTERYX (wingless), a bird, a native of New Zealand, first brought to this country in 1813, and deposited in the collection of the earl of Derby. Fossil specimens of a gigantic species of this bird (named *Dinornis*) were discovered in New Zealand by Mr. Walter Mantell in 1843 and since, and much studied and many papers written on it by Professor Owen.

APULIA, a province in S.E. Italy. The people favoured Hannibal, and were severely punished by the Romans at his retreat, 207 B.C. Apulia was conquered by the Normans, whose leader Guiscard received the title of duke of Apulia from pope Nicholas II. in 1059. After many changes of masters, it was absorbed into the kingdom of Naples, in 1265. Strike riot, conflict with troops at Candela, 5 deaths, 8 Sept. 1902.

AQUACULTURE, see under *Fisheries*.

AQUARI, a sect said to have been founded by Tatian in the 2nd century, who forebore the use of wine even in the sacrament; during persecution they met secretly at night. For this they were censured by Cyprian (martyred, 258).

AQUARIUM or **AQUAVIVARIUM**, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as *scavengers*. In

1849, Mr. N. B. Ward succeeded in growing seaweeds in artificial sea-water; in 1850, Mr. R. Warington demonstrated the conditions necessary for the growth of animals and plants in jars of water; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up by Mr. D. Mitchell. In 1854, Mr. Gosse published "The Aquarium." Mr. W. Alford Lloyd, late of Portland-road, London, who by his enterprise in collecting specimens did much to increase the value and interest of aquaria, has been much employed in erecting aquaria. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860. He also constructed the aquarium at Hamburg and others. That at Brighton was inaugurated by prince Arthur, 30 March, and publicly opened by the mayor, 10 Aug. 1872. That at the Crystal Palace was opened, Jan. 1872.

THE ROYAL AQUARIUM AND SUMMER AND WINTER GARDEN SOCIETY was established 1874; the building at Westminster, planned by Mr. Wybrow Robertson and Mr. A. Bedborough, was opened by the duke of Edinburgh, 22 Jan. 1876.

A woman surnamed "*Zazel*" permitted herself to be safely shot from a cannon (by a spring or other mechanical contrivance); summer of 1877, *et seq.* Living whales shown here soon died; see *Whale*; Sept., 1877; June, 1878.

The Imperial theatre added, 1879.

Purchased by the Wesleyan Methodists with a portion of their 20th Century Fund. Celebration meeting held 2 Feb. 1903.

AQUATINT, see *Engraving*.

AQUEDUCT, an artificial watercourse. Appius Claudius Cæcus, while censor, advised and constructed the first Roman aqueduct, as well as the *Appian way*, about 312-308 B.C.* There are now some remarkable aqueducts in Europe: that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Versailles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England (1007 feet in length, and 126 feet high) was completed by T. Telford, and opened 26 Dec. 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830. An aqueduct to supply London with water from the Welsh lakes was proposed by Mr. J. F. Bateman in 1865.

AQUILA, S. Italy. Near here the Arragonese under the condottiere Braccio Forte-Braccio were defeated by the allied Papal, Neapolitan, and Milanese army under Jacob Caldora, 2 June, 1424. Braccio, a wounded prisoner, refused to take food, and died, 5 June.

AQUILEIA (Istria), made a Roman colony about 180 B.C. and fortified A.D. 168. Constantine II. was slain in a battle with Constans, fought at Aquileia towards the close of March, 340. Maximus defeated and slain by Theodosius, near Aquileia, 28 July, 388. Theodosius defeated Eugenius and Arbogastes, the Gaul, near Aquileia, and remained sole emperor, 6 Sept. 394. Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a synod

here in 381. In 452 Aquileia was almost totally destroyed by Attila the Hun, and near it in 489 Theodoric and the Ostrogoths totally defeated Odoacer, the king of Italy. Aquileia was an early patriarchal see.

AQUITAINE, the Roman province Aquitania (S.W. France), conquered by the Romans 28 B.C.; by the Visigoths, A.D. 418; taken from them by Clovis in 507. Henry II. of England obtained it with his wife Eleanor, 1152. It was erected into a principality for Edward the Black Prince in 1362; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1418. The province was lost in the reign of Henry VI.

ARABIA (W. Asia). The terms *Petræa* (stony), *Felix* (happy), and *Deserta* are said to have been applied to its divisions by Ptolemy, about A.D. 140. The Arabs claim descent from Ishmael, the eldest son of Abraham, born 1910 B.C. *Gen.* xvi. Arabia was unsuccessfully invaded by Gallus, the Roman governor of Egypt, 24 B.C. The Abyssinians conquered part of Arabia Felix, and retained it 76 years. In A.D. 622, the Arabians under the name of Saracens, followers of Mahomet (born at Mecca, 570), their general and prophet, commenced their course of conquest; see *Mohometanism*. Arabia was conquered by the Ottomans 1518-39. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. The Koran was written in Arabic (622-632). The Bible was printed in Arabic in 1671. See *Wahabees*.

ARABIAN NIGHTS' ENTERTAINMENTS (or 1001 Tales) were translated into French by Galland, and published in 1704; but their authenticity was not acknowledged till many years after. The best English translation from the Arabic is that of Mr. E. W. Lane, published in 1839, with valuable notes and beautiful illustrations. Sir Richard F. Burton's elaborate translation in 10 vols. was printed at Benares for subscribers 1855-7. Lady Burton's expurgated edition, edited by Mr. Justin H. McCarthy, with scholarly notes and appendices, was published in 1887 et seq.; she died 22 March, 1896. He died, aged 69, 20 Oct. 1890. "*The Thousand and One Days*" (inferior to the "Nights"): a translation from the Persian by Petis de la Croix, was published in 1710. Versions

are said to have existed in Turkish and other Eastern languages.

The people used two dialects, in the west Syriac, in the east Aramaic (improperly termed Chaldee), called Hebrew at the time of Christ.

ARANJUEZ (Central Spain), contains a fine royal palace, at which several important treaties were concluded. On 17 March, 1808, an insurrection broke out here against Charles IV. and his favourite, Godoy, the prince of the peace, who received that title for concluding the treaty of Basle. The former was compelled to abdicate in favour of his son, Ferdinand VII., 19 March.

ARARAT, a mountain in Armenia (about 17,112 feet above the sea-level), on which Noah's ark is supposed to have rested, B.C. 2348, now termed by the Persians, *Koh-i-Nuh* (Noah's mountain); by the Armenians, *Masis*; by the Turks, *Agri-Dagh*.

It was ascended by Dr. Parrot, 27 Sept. 1829; by Major Stuart, 1856, and by others since. Mr. James Bryce, who ascended it, 12 Sept. 1876, described the summit as a little plain of snow, silent and desolate, with a bright, green sky above; the view stern, green, and monotonous. Ascended by professor Mackoff and M. Popoff, Russians, Aug. 1888; by Mr. H. F. B. Lynch and capt. Lynch, 19 Sept. 1893.

ARAUCANIA, a province in S. America. Its inhabitants maintained almost unceasing war with the Spaniards from 1537 to 1773, when their independence was recognised. They are now nominally subject to Chili.

ARBELA. The third and decisive battle between Alexander the Great and Darius Codomanus decided the fate of Persia, 1 Oct. 331 B.C., on a plain in Assyria, between Arbela and Gaugamela. The army of Darius consisted of 1,000,000 foot and 40,000 horse; the Macedonian army amounted to only 40,000 foot and 7000 horse. *Arrian*. The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory, amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. *Plutarch*.

ARBITRATION. Submission to arbitration was authorised and made equivalent in force to the decision of a jury, by 9 & 10 Will. III. (1698).

Further enforced by 3 & 4 Will. IV. c. 42 (1833); see *Ouzel Galley*. The Common Law Procedure Act (1854) authorises the judges of superior courts to order compulsory arbitration; and, by an act passed in 1859, railway companies may settle disputes with each other by arbitration. The Arbitration (Masters and Workmen) Act was passed 6 Aug. 1872. See *Prud'hommes*.

ARCADIA, in the centre of the Peloponnesus, Greece, named after Arcas, a king. The Arcadians regarded their nation as the most ancient of Greece. The early history of Arcadia is fabulous.

ARCADIANS, an ultra-conservative French political club, composed of a section of the majority in the chambers, and opposed to liberal measures, even when emanating from the emperor (such as the new press law). It derived its name from Rue de l'Arcade, where its meetings were held: Feb. 1868.

ARCH. It appears in early Egyptian and Assyrian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, constructed under the early kings, about 588 n.c. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention.*—The TRIUMPHAL arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks in London were erected about 1828. The Marble Arch, which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851) was modelled from the arch of Constantine; see *Hyde Park*.

ARCHÆOPTERYX (ancient bird); the name given to the earliest known remains of a bird, found in the lithographic slate of Solenhofen, by Herman von Meyer and Dr. Häberlein in 1861. Its structure approximated more to that of a reptile than that of modern birds does. It was described by Owen in 1863.

ARCHANGEL (N. Russia), a city, is thus named from a monastery founded here, and dedicated to St. Michael in 1584. The passage to Archangel was discovered by the English navigator Richard Chancellor in 1553, and it was the only seaport of Russia till the formation of the docks at Cronstadt, and foundation of St. Petersburg in 1703. The dreadful fire here, by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1793. Increased commercial development under gov. Engellhardt; Alexandrovsk, a new ice-free port, opened by the grand duke Vladimir, 6 July, 1899. Population of the province, 1880, 328,819; 1897, 346,536.

ARCHBISHOP (Greek *archiepiscopos*), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople, who presided over the other metropolitans and bishops in the districts attached to those places. The word is first found in the Apology against the Arians by Athanasius, who died 373. Four archbishops of the Eastern church are styled *patriarchs*. *Riddle*.

Before the Saxons came to England, there were three archbishops: London, York, and Caerleon-upon-Usk; but soon after St. Augustin settled the metropolitan see at Canterbury, 602; see *Canterbury*.

York continued archiepiscopal; but London and Caerleon lost the dignity; see *St. David's*. The bishoprics in *Scotland* were under the jurisdiction of the archbishop of York until the erection of the archiepiscopal sees of St. Andrew's and Glasgow in 1470 and 1491; these last were discontinued at the Revolution; see *Glasgow* and *St. Andrew's*.

The bishop of Brechin was chosen *Primus*, 1886, the title being conferred on one of the bishops by election.

The rank of archbishop was early in *Iceland*; see *Ferns*. Four archbishops were constituted, Armagh, Cashel, Dublin, and Tuam; (until then the archbishop of Canterbury had jurisdiction over the Irish as well as English bishops, in like manner as the archbishop of York had jurisdiction over those of Scotland), 1151.

Of these four archbishoprics two were reduced to bishoprics (Cashel and Tuam) conformably with the

* The bridge of Chester, whose span is 200 feet, was commenced in 1829. The central arch of London Bridge is 152 feet; and the three east iron arches of Southwark Bridge, which rest on massive stone piers and abutments are, the two side ones 210 feet each, and the centre 240 feet; thus the centre arch exceeds the admired bridge of Sunderland by four feet in the span, and the long-famed Rialto at Venice, by 167 feet; see *Bridges*.

stat. 3 & 4 Will. IV. by which also the number of sees in Ireland was to be reduced from twenty-two to twelve (see *Bishops, Cashel, Tuam, Pallium, &c.*), 1833.

ARCH-CHAMBERLAIN. The elector of Brandenburg was appointed the hereditary arch-chamberlain of the German empire by the golden bull of Charles IV. in 1356, and in that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France (418-986), and when their territories were divided, the archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and Arles.

ARCHDEACON, a name early given to the first or eldest deacon, who attended on the bishop without any power; but since the council of Nice, his function has become a dignity above a priest. The appointment in these countries is referred to the eighth century. There are seventy-five archdeacons in England (1878). The archdeacon's court is the lowest in ecclesiastical polity; an appeal lies from it to the consistorial court, by 24 Henry VIII. (1532).

ARCHERY is ascribed to Apollo, who communicated it to the Cretans.

The victories of Crecy (1346), Poitiers (1356), and Agincourt (1415), were won chiefly by archers.
Four thousand archers of the king surrounded the houses of Parliament ready to shoot; pacified by the king, 21 Richard II. (*Stow.*) 1397
The citizens of London formed into companies of archers in the reign of Edward III.; and into a corporate body by the style of "The Fraternity of St. George," 29 Henry VIII. 1538
Roger Ascham's "*Toxophilus, the School of Shooting*," published 1571
Scorton Annual Arrow Meetings—a silver arrow shot for; articles agreed to 14 May, 1673
Royal company of archers, instituted by the marquis of Athol, as the king's body guard for Scotland 1676
The *long bow* was six feet long, and the arrow three feet: the usual range from 300 to 500 yards.
Robin Hood is said to have shot from 600 to 800 yards. The cross-bow was fixed to a stock, and discharged with a trigger.
See *Artillery Company, Toxophilites, &c.*

ARCHES, COURT OF, the most ancient consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow (*Sancta Maria de Arcubus*), London, where it was formerly held, and whose top is raised on stone pillars built archwise. *Cowell*. Appeals from this court lie to the judicial committee of the privy council, by statute, 1832. The Dean and Official Principal, Dr. Stephen Lushington, (appointed in 1828) resigned 1 July, 1867; succeeded by sir Robert J. Phillimore, who resigned, 1875. Lord Penzance succeeded him; resigned, 1899; died 9 Dec. 1899; succeeded by sir Arthur Charles.

ARCHONS. When royalty was abolished at Athens, in memory of king Codrus, killed in battle, 1044 or 1068 B.C., the executive government was vested in elective magistrates called archons, whose office continued for life. Medon, eldest son of Codrus, was the first archon. The office was limited to ten years, 752 B.C., and to one year 683 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshal Alvinzi, fought 14-17 Nov. 1796. The Austrians lost 18,000 men in killed, wounded, and prisoners, four flags and eighteen guns. The French lost about 15,000, and became masters of Italy. In one contest Bonaparte, in most imminent danger, was rescued by the impetuosity of his troops.

ARISTOTELIAN PHILOSOPHY: the most comprehensive ever devised by man. Aristotle was born at Stageira (hence termed the Stageirite), 384 B.C.; was a pupil of Plato from 364 to 347; became preceptor of Alexander, son of Philip of Macedon, in 342; and died in 322. He divided the

circle of knowledge into metaphysics and logic, physics (including part of the science of mind), and ethics. His philosophy was too much exalted by the schoolmen during the middle ages, and too much depreciated after the Reformation. His works on natural science contain a vast collection of facts and an extraordinary mixture of sound and chimerical opinions. To him is attributed the assertion that nature abhors a vacuum, an opinion now maintained by eminent modern philosophers.

ARMAGNACS, a political party in France, followers of the duke of Orleans, murdered by the Burgundians, 23 Nov. 1407, derived their name from his father-in-law, the count of Armagnac. About 3500 of this party were massacred at Paris in June, 1418, by their opponents, the followers of the duke of Burgundy.

ARMED NEUTRALITY, the confederacy against England, formed by Russia, Sweden, and Denmark, 1780; ended, 1781; renewed, and a treaty ratified in order to cause their flags to be respected by the belligerent powers, 16 Dec. 1800. The principle that neutral flags protect neutral bottoms being contrary to the maritime system of England, the British cabinet remonstrated, war ensued, and Nelson and Parker destroyed the fleet of Denmark before Copenhagen, 2 April, 1801. This event and the murder of the emperor Paul of Russia led to the dissolution of the Armed Neutrality.

ARMENIA, Asia Minor, after forming part of the Assyrian, Median, and Persian empires, became subject to the Greek kings of Syria, after the defeat of Antiochus the Great, 190 B.C. The Romans established the kingdoms of Armenia Major and Minor, but their influence over them was frequently interrupted by the aggressions of the Parthians. In all their political troubles the Armenians have maintained the profession of Christianity, and their church is governed by patriarchs, not subject to Rome. Since 1715 an Armenian convent has existed at Venice, where books on all subjects are printed in the Armenian language.

ARMENIAN ERA, commenced on 9 July, 552; the ecclesiastical year on 11 Aug. To reduce this last to our time, add 551 years and 221 days; and in leap years subtract one day from 1 March to 10 Aug. The Armenians used the old Julian style and months in their correspondence with Europeans.

ARMILLARY SPHERE, an astronomical instrument composed of brass circles disposed in such a manner that the greater and lesser circles of the sphere may be seen in their natural position and motion. It is said to have been invented by Eratosthenes, about 255 B.C.; and was employed by Tycho Brahe and others.

ARMINIANS, or REMONSTRANTS, derive their former name from James Arminius (or Harmensen), a Protestant divine of Leyden, Holland (died 19 Oct. 1609); the latter name from his followers having presented a *Remonstrance* to the states-general in 1610. They separated from the Calvinists, objecting to their views respecting predestination, &c. Their doctrines were condemned in 1619, at the synod of Dort (*which see*); they were exiled till 1625. The Calvinists were sometimes styled *Gomarists*, from Gomar, the chief opponent to Arminius. James I. and Charles I. favoured the Arminian doctrine.

ARMORIAL BEARINGS became hereditary in families at the close of the 12th century. They were employed by the crusaders, 1100. The lines to denote colours in arms, by their direction or intersection, were invented by Columbiere in 1639. The armorial bearings of the English sovereigns are given under the article *England*. Armorial bearings were taxed in 1798, and again in 1808. The tax produced 64,515*l.* in the year ending 31 March, 1868; 1872, 64,228*l.*; 1876, 83,527*l.*; 1878, 83,104*l.*; 1879, 81,851*l.*; 1881, 79,014*l.*; 1882, 79,106*l.*; 1901-2, 74,703*l.* The tax is now 2*s.*; if not on carriages, it is 1*s.* annually (1903). Sir Bernard Burke's "General Armory," 1883, contains the arms of above 66,000 British families, &c. Sir Roper Leth-

bridge, in his "Golden Book of India," describes the early armorial bearings of the Indian princes, especially the Rajputs, 1893.

ARMORICA, now Brittany, N. France, was conquered by Julius Cæsar, 56 B.C. Many Gauls are said to have retired there and preserved the Celtic tongue, A.D. 584. A colony of West Britons settled in Armorica in the latter part of the 4th century, hence the modern name Brittany, *which see*.

ARMOUR. That of Goliath is described (about 1063 B.C.) 1 *Sam.* xvii. 5. Skins and padded hides were early used, and brass and iron armour, in plates or scales, followed. The body armour of the Britons was skins of wild beasts, exchanged, after the Roman conquest, for the well-tanned leathern cuirass. *Tacitus*. Hengist is said to have had scale armour, A.D. 449.

ARMS. The club was the first offensive weapon; then followed the mace, battle-axe, pike, spear, javelin, sword and dagger, bows and arrows. Pliny ascribes the invention of the sling to the Phœnicians; see *Cannon*, *Firearms*, *Swords*, *Bayonets*, and other articles on the various weapons throughout the volume.

ARMS BILLS, for the repression of crime and insurrection in Ireland, were passed 1807, 1810, 1823, 1829, and 15 Oct. 1831. The guns registered under the last act at the close of the first year scarcely amounted to 3000, and the number was equally small of all other kinds of arms. The new Arms bill, passed 22 Aug. 1843, has been since renewed, but was not rigidly enforced till 1867. Another Arms bill brought into the Commons, "An act to amend the law relating to the carrying and possession of arms, and for the preservation of public peace in Ireland," to last till 1 June, 1886; Royal Assent, 21 March, 1881. Act renewed till 31 Dec. 1887, 4 June, 1886. See *Ireland*.

ARMY. Ninus and Semiramis had armies amounting to nearly two millions of fighting men. *Diodorus*. The first guards and regular troops as a standing army were formed by Saul, 1093 B.C. 1 *Sam.* xiii. 2. The army of Xerxes invading Greece is said to have been 1,700,000 foot and 80,000 horse:

480 B.C. One of the first standing armies of which we have any account, is that of Philip of Macedon. The army which Darius opposed to Alexander the Great (332 B.C.) is set down as between 750,000 and a million. The first standing army which existed as such, in modern times, was maintained in France by Charles VII. in 1445. The chief European nations have had in their service the following armies: Spain, 150,000 men; Great Britain, 310,000; Prussia, 350,000; Turkey, 450,000; Austria, 500,000; Russia, 560,000; and France, 1,000,000. Estimated number in Europe in 1863, 6,000,000 soldiers, 1,000,000 horses, 11,000 guns. The European powers are still increasing their armies. Estimated to consist of 12,000,000 men in Nov. 1888.

ARMY, BRITISH, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1633 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1685 the army consisted of 7000 foot and 1700 cavalry. The Militia then consisted of about 130,000 men, horse and foot. *Standing armies* were introduced by Charles I. in 1638; they were declared illegal in England, 31 Car. II. 1679; but one was then gradually forming, which was maintained by William III. 1689, when the Mutiny Act was passed. Grose's "History of the British Army" was published in 1801. See *Regiments, Recruiting, Militia, and Volunteers.*

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. He must not be in fetters, unless it be made necessary by apprehended violence. Before the question is answered, all legal exceptions or

objections are to be stated. If he fails, or refuses to plead, a jury is sworn to determine, if he is mute of malice or by visitation of God, whether he is able to plead and understand the course of his trial, whether he is insane. If the prisoner is found to be insane, so as to be unfit to plead, the court orders his detention during his Majesty's pleasure, otherwise the court directs entry of a plea of not guilty and the clerk proceeds to call and swear the jury. On a plea of guilty, the court proceeds to judgment. A previous conviction must not be mentioned on arraignment. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person standing mute was declared convicted by an act passed 1772; but in 1827, the court was directed to enter a plea of "not guilty" in such cases; see *Mute*.

ARRAS (N. E. France), the country of the ancient Atrebrates, the seat of a bishop since 390. Here a treaty was concluded between the king of France and duke of Burgundy, when the latter abandoned his alliance with England, 21 Sept. 1435. Another treaty was concluded by Maximilian of Austria with Louis XI. of France, whereby Burgundy and Artois were given to the dauphin as a marriage portion, 23 Dec. 1482. *Velly*. Arras was held by the Austrians from 1493 till 1640, when it was taken by Louis XIII.

ARRAY. On 23 Dec. 1324, Edward II. directed the bishop of Durham to make "arraier" his men of arms, horse and foot, and cause them to proceed to Portsmouth; thence to proceed to the war in Gascony. *Rymer's Federa*. Hallam says that this was the earliest commission of array that he could find, and that the latest was dated 1557. The attempt of Charles I. to revive commissions of array in 1642, founded on a statute of Henry IV., was strenuously opposed as illegal.

The heinous crimes committed by its means induced the legislature to enact regulations for its sale, 1851. In 1858 Dr. A. S. Taylor asserted that green paper-hangings and dresses prepared from arsenic are injurious to health. Much illness and many deaths in Manchester and Liverpool and district due to arsenic (Oct.-Nov.) found in certain kinds of beer, and finally traced back to glucose and invert sugar made from impure sulphuric acid, containing arsenic; enormous quantities of contaminated beer destroyed; see *Times*, 20 Dec. 1900; royal commission (Lord Kelvin and others) appointed, Feb. 1901; first report, preventive measures recommended, 24 July, 1901; meeting held to consider the outbreak of arsenical poisoning at Halifax (Dec. 1901), 11 April, 1902.

ARTEMISIUM, a promontory in Eubœa, near which indecisive conflicts took place between the Greek and Persian fleets for three days; 480 B.C. The former retired on hearing of the battle of Thermopylæ.

ARTESIAN WELLS (from *Artesia*, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water which has percolated from a higher level, and which rises to that level through the boring tube. The fountains in Trafalgar-square and government offices near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1841, after eight years of exertion, by M. Mulot at an expense of about 12,000*l.*; and the well at Passy, which it is said will supply sufficient water for nearly 500,000 persons, was begun in 1855, and completed in 1860 by M. Kind. Messrs. Amos and Easton completed an Artesian well for the Horticultural Society's garden in 1862, which yielded 880,000 gallons of water, at the temperature of 81° Fahr., in twenty-four hours. The well at Kissingen was completed in 1850. Artesian wells are now common. Many London breweries, clubs, printing offices have deep wells; these need lowering from time to time as their number increases. That at the Reform Club is 345 feet in depth. Artesian wells, some 4,000 feet in depth, are much used for irrigation purposes in W. Australia.

ARTHUR, king of Britain, said, mythically, to have lived A.D. 500-532.

The events of his life and the conflicts of the knights of his round table, as sung by the Welsh poets Taliesin, Llywarch Hên, and Aneurin, were incorporated into his Latin history by Geoffrey of Monmouth, about 1115, who died 1154; put into French verse by Geoffrey Gaisnar, and by Wace soon after; and set forth in an English poem called *Brut* by Layamon, about 1205. Walter Map by incorporating in his version the legend of the Holy Graal, introduced the religious element about 1171. Sir Thomas Malory's "*Morte d'Arthur*," printed by Wm. Caxton . . . 1485. Lord Lytton's "*King Arthur*," published . . . 1848. Tennyson's "*Idylls of the King*" . . . 1859-69.

ARTICHOKES are said to have been introduced from the East into Western Europe in the 15th cent. and to have reached England in the 16th.

ARTICLES OF RELIGION. On 8 June, 1536, after much disputing, the English clergy in convocation published "Articles decreed by the king's highness" Henry VIII., who published in 1539 the "Statute of Six Articles," decreeing the acknowledgment of transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession. Offenders were punishable as heretics. In 1551 forty-two were prepared, and published in 1553. These were modified by the convocation, and reduced to THIRTY-NINE in Jan. 1563; and they received the royal authority and the authority of parliament in 1571. The *Lambeth Articles*, of a more Calvinistic character, proposed by archbishop Whitgift, were withdrawn in consequence of the displeasure of queen Elizabeth, 1595. One hundred and four Articles were drawn up for Ireland by archbishop Usher in 1614; but in 1635 the Irish church adopted the English articles. See *Perth Articles*. The 39

Articles were ordered to be removed from the studies at Oxford in Nov. 1871.

ARTICLES OF WAR were decreed in the time of Richard I. and John. Those made by Richard II. in 1385 appear in "Grose's Military Antiquities." The articles of war now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

ARTIFICERS AND MANUFACTURERS. Their affairs were severely regulated by the statutes of labourers, 1349, 1350, 1360, 1549, and especially of 1562. They were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A fine of 100*l.*, and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1736) and other statutes. The law was modified in 1824; see *Artisans, Workmen, &c.*

ARTILLERY, a term including properly all missiles, now restricted to *cannon*. A small piece was contrived by Schwartz, a German cordelier, soon after the invention of gunpowder, in 1330. Artillery was used, it is said, by the Moors of Algesiras, in Spain, in 1343; and according to some historians, at the battle of Crecy, in 1346, when Edward III. had four pieces of cannon. We had artillery at the siege of Calais, 1347. The Venetians employed artillery against the Genoese at sea, 1377. *Voltaire*. Said to have been cast, with mortars for bomb-shells, by Flemish artists, in Sussex, 1543. *Rymer's Fiedera*. Made of brass 1635; improvements by Browne, 1728; see *Cannon, Bombs, Cartridges* (under *Cannon*), *Mortars, Howitzers, Petards, Rockets, Fire-arms*. "Artillery: its Progress and Present Position," by E. W. Lloyd and A. G. Haacoek, published, Aug. 1894. The *Royal Artillery-regiment* was established in the reign of Anne. See *Archery*.

It was thoroughly repaired by a late duke at a vast expense, but repairs still going on, 1902.

ASHDOD, or **AZOTUS**, seat of the worship of the Phœnician god, Dagon, which fell down before the ark of the Lord, captured by the Philistines from the Israelites, about 1141 B.C. (1 *Sam. v.*) Ashdod was taken by the Egyptians after 29 years' siege, the longest recorded, B.C. 630. *Herodotus*.

ASHDOWN, or **ASSENDUNE**, now thought to be Aston, Berks, where Ethelred and his brother Alfred defeated the Danes in 871. At Ashdown, near Saffron-Walden, Essex, Canute despatched Edmund Ironside with great slaughter, 1016.

Tradition says that the day after the battle in 871 Alfred caused his army to carve the figure of a white horse, the standard of Hengist, in the vale. Mr. Thomas Hughes ("Tom Brown"), in his book "The Scouring of the White Horse" (1859), describes the work and festival on 17 and 18 Sept. 1857, a ceremony performed at intervals from time immemorial. Records are found of the "scouring" in 1755, 27 May, 1776, 15 May, 1780, 1785, 1803, 1812 or 1813, 1825, 19, 20 Sept., Sept. 1843.

ASH-WEDNESDAY, the first day of Lent, which in early times began on the Sunday now called the first in Lent. It is said that pope Felix III., in 487, first added the four days preceding the old Lent Sunday, to raise the number of fasting days to forty; that Gregory the Great (pope, 590) introduced the sprinkling of ashes on the first of the four additional days, and hence the names of *Dies Cinerum*, or Ash-Wednesday. At the Reformation this practice was abolished, "as being a mere shadow, or vain show." Ash-Wednesday, 1893, 15 Feb.; 1894, 7 Feb.; 1895, 27 Feb.; 1896, 19 Feb.; 1897, 3 Mar.; 1898, 23 Feb.; 1899, 15 Feb.; 1900, 28 Feb.; 1901, 20 Feb.; 1902, 12 Feb.; 1903, 25 Feb.; 1904, 17 Feb.; 1905, 8 March.

ASIA, the largest division of the globe; part of it was so called by the Greeks. The area of Asia and its islands is estimated at 17,255,800 square miles. Asia was the first quarter of the world peopled: here the law of God was first promulgated; here many of the greatest monarchies of the earth had their rise; and hence most of the arts and sciences have been derived. Its early history is derived from the Bible and from Herodotus, who relates the wars of Croesus, Cyrus, and others. The Central Asian Railway from the Caspian to Samarcand constructed by general Annenkoff for Russia, which now possesses very great influence over the country, opened 1888; branch line to Bokhara completed. M. Sven Hedin successfully explores over 12,000 mi. in Central Asia, 1894-1900. See *Population, Jews, China, India, Persia, Turkey, and the other countries*.

It established the "Oriental Translation Fund," in 1828, which had published 83 volumes of Eastern literature in 1865. The Fund ceased to exist in 1878. The Austrian loss exceeded 20,000 men, and the French 30,000.

Marshal Lannes, mortally wounded 22 May, died 31 May. The bridge of the Danube was destroyed, and Napoleon's retreat endangered; but the success of the Austrians was fruitless to them.

ASPHALT, a solid bituminous substance, probably derived from decayed vegetable matter. It was used as a building material in ancient Babylon. Its application for this purpose was revived by Eirinius, a Greek physician, who discovered beds of it near Neufchatel in 1712. Asphalt stone was found at Seyssel near Geneva in 1802; and after several failures, count Sassenay brought it into use for pavement about 1832. The artificial asphalt obtained from gas-works began to be used as pavement about 1838. Claridge's patent asphalt was laid down in Trafalgar-square, Jan. 1864. Various kinds of asphalt pavement have been since laid on in London.

ASSAY OF GOLD AND SILVER, originated with the bishop of Salisbury, a royal treasurer in the reign of Henry I. *Du Cange*. But certainly some species of assay was practised as early as the Roman conquest. Assay early established in Eng-

land was regulated by statutes, 1238, 1700, and 1705. Assay masters appointed at Newcastle, 1701; Sheffield and Birmingham, 1773. The laws respecting assay were amended in 1854 and 1855. The alloy of gold is silver and copper, that of silver is copper. Standard gold is 2 carats of alloy to 22 of fine gold. Standard silver is 18 dwts. of copper to 11 ozs. 2 dwts. of fine silver; see *Goldsmiths' Company and Pys*.

The assessed taxes yielded in 1815 (the last year of the war), exclusively of the land-tax, 6,524,766*l.*, their highest amount. These imposts have varied in their nature and amount, according to the exigencies of the state. They were considerably advanced in 1797 and 1801, *et seq.*, but reduced in 1816, and in subsequent years. An act for the repeal of certain assessed taxes was passed 16 & 17 Viet. c. 90, 20 Aug. 1853, explained and amended by 17 & 18 Viet. c. 1, 17 Feb. 1854.—Acts for the better securing and accounting for the Assessed and Income Taxes, 10 Aug. 1854; see *Taxes*, and *Income Tax*. ASSURANCE, see *Insurance*.

ASSYRIA, originally Assur, an Asiatic country between Mesopotamia and Media, was the seat of the earliest recorded monarchy. Till recently its history was mainly derived from Greek historians, Ctesias, Herodotus, and Diodorus Siculus, Herosus, a Græco-Chaldean priest, and the Holy Scriptures. The discovery by Mr. (aft. sir) Austin Layard of the Ninevite antiquities, now in the British Museum, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, sir H. Rawlinson, and other scholars, have thrown much light upon Assyrian history. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates. The results of recent investigations are given in the rev. G. Rawlinson's "Five Great Monarchies of the Ancient World," and in prof. A. Sayce's "Assyria, its Princes, Priests, and People," 1885. Mr. W. Boscawen's article "Assyria" in "Chambers' Encyclopædia," 1888, has been used for much of the following summary.

Nimrod or Belus reigns . . . B.C. [2554 *H.* 2235 C.] 2245
 "Asshur buildeth Nineveh" (*Gen. x. 11*) about . . . 2218
 Ninus, son of Belus, reigns in Assyria, and names his capital Nineveh . . . [2182 C.] 2069
 Babylon taken by Ninus, who, having subdued the Armenians, Persians, Bactrians, and all Asia Minor, establishes what is properly the Assyrian monarchy, of which Nineveh was the seat of empire. *Blair* . . . [2233 C.] 2059
 Ninyas, an infant, succeeds Ninus . . . 2017
 Semiramis, mother of Ninyas, usurps the government, enlarges and embellishes Babylon [2130 C.] 2007
 She invades Libya, Ethiopia, and India . . . *Langlet* 1975
 She is put to death by her son Ninyas . . . 1965
 Ninyas put to death, and Arins reigns . . . 1927
 Reign of Aralius . . . 1897
 Belochus, the last king of the race of Ninus . . . 1446
 He makes his daughter Atossa, surnamed Semiramis II., his associate on the throne . . . 1433

Atossa procures the death of her father, and marries Belatorus (or Belaperes) who reigns . . . 1421
 Sardanapalus, luxurious and effeminate when attacked by Arbaces Satrap of Media, suddenly becomes energetic and warlike, defends himself in Nineveh for two years, and when overcome burns himself in his palace, with his wives and treasures, thus ending the first Assyrian Empire. (Ctesias) . . . 876
 [This story and most of what is given above, is now considered mythical.] The following is based upon the records in the ancient Assyrian tablets and the Bible.
 Assyria, a province of Babylonia, becomes independent; first king, Bel-kakapi, under his successors the kingdom is greatly enlarged; Rimmon-nirari I. becomes powerful about . . . B.C. 1320
 His son, Shalmaneser I. founds Calah, and his grandson, Tiglath Adar I. captures Babylon . . . 1280
 His descendant, Tiglath-pileser I. a great conqueror and the real founder of the Assyrian empire . . . 1140
 His son, Assur-bel-Kala, a weak prince . . . 1110
 The empire falls into decay for nearly two centuries. The empire revives under Assur-dan II., and is fully restored by his successors, Rimmonnirari II. 911-889 and Assur-natsir-pal . . . 883-858
 His son, Shalmaneser II. makes large conquests in W. Asia . . . 858, *et seq.*
 At Karkar he defeats Benhadad, king of Damascus, Ahab, king of Israel, and Irkhulei, king of Hamath . . . 854
 The empire enlarged by his son, Samas-Rimmon II. . . B.C. 823-810
 The Assyrian eponym canon records a solar eclipse, and is thereby the basis of Assyrian chronology . . . 763
 Assur-nirari king; many revolts . . . 753, *et seq.*
 Pul, or Pul, usurps the throne and styles himself Tiglath Pileser. He consolidated the empire, reformed the government, quelled revolts and enlarged his dominions by the conquest of Babylonia, &c. . . 745-727
 His weak son, Shalmaneser IV. king, 727; died, or was murdered by Sargon the Tartan, who continues the war in Assyria, captures Samaria and replaces the inhabitants by colonists. 2 *Kings* xvii. . . 720
 At the battle of Raphia he checks the advances of Egypt, and captures the rich Hittite capital, Carchemish . . . 717
 Merodach-baladan III. raises a revolt against Sargon, who, after a severe campaign, captures Babylon, and is proclaimed king . . . 710
 Sargon is killed in his new palace . . . July, 705
 His son, Sennacherib, succeeds him.
 Babylonia revolts; Merodach-baladan returns, but is defeated at Kisu; Sennacherib conquers Phenicia, and having been offended by Hezekiah, he ravages Judæa, and besieges Jerusalem, which is saved by the sudden destruction of his army, *Isaiah* xxxvii. 36-38; he is killed by his sons . . . Dec. 681
 His son, Esar-haddon defeats his brothers, and becomes king at Nineveh, and reorganizes the empire . . . 680, *et seq.*
 He invades Judæa, makes Manasse prisoner.
 He invades Egypt and captures Memphis, and after a long campaign, subdues the country and becomes ruler of nearly all the ancient world . . . 675, *et seq.*
 Disturbed by a rising in Egypt and conspiracies at home, he makes his son, Assur-bani-pal, king at Nineveh, April, 669, and dies during a campaign, Oct. 667. Assur-bani-pal (Sardanapalus ?), weak but ambitious, continues the war in Egypt and captures Thebes, invades Phenicia and captures Tyre.
 He appoints his brother, Samas-sum-yukin, viceroy of Babylon, who heads a great revolt, which lasts five years; Babylon is taken and the rebel prince burns himself in his palace with many of his followers . . . 647
 Gradual fall of the empire; new revolts; Egypt becomes independent; Kandalanu, viceroy of Babylon, and his successor, father of Nebuchadnezzar, become independent; Assur-bani-pal succeeded by his son, Assur-ctil-iluyukinni . . . 640

Esar-haddon II. (the Sarakos of Ctesias), the last king; the N.E. provinces invaded by a vast confederation under the command of Kazaril (Cyaxares the Mede)

ASTROLOGY was cultivated by the Chaldeans, Egyptians, Hindus, Etruscans, Chinese, Greeks, and Romans. It was much in vogue in Italy and France in the 16th century. It is said that Bede, 673-735, was addicted to it; and Roger Bacon, 1214-1292. Lord Burleigh is said to have calculated the nativity of Elizabeth, and she, and other princes, were dupes of Dee, the astrologer. It is stated that Lilly was consulted by Charles I. respecting his projected escape from Carisbrook castle in 1647. *Ferguson*. Astrological almanacs are still published in London.

Michael Nostradamus, a French physician (1503-1566), cultivated astrology, published almanacs, and in 1555, "Centuries" and "Presages." His oracles, edited by Mr. Chas. A. Ward, appeared in 1892. He was consulted by Catherine de Medici, Henry II. and Charles IX. of France.

ASTROPHYSICS, the science of applying physics and chemistry and other terrestrial sciences to the heavenly bodies by means of spectrum analysis, photography, &c., developed by sir Wm. Huggins from the work of Kirchhoff and Bunsen, 1861 *et seq.*

ASTURIAS (Oviedo, since 1833), N.W. Spain, an ancient principality. Here Pelayo collected the Gothic fugitives, about 713, founded a new kingdom, and by his victories checked Moorish conquest. For his successors, see *Spain*. The heir-apparent of the monarchy has borne the title "prince of Asturias" since 1388, when it was assumed by Henry, son of John I. king of Leon, on his marriage with a descendant of Peter of Castile. In 1808, the junta of Asturias began the organised resistance to the French usurpation.

ASYLUMS, or **PRIVILEGED PLACES**, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. God commanded the Jews to build cities of refuge, 1451 B.C., *Numbers* xxv.—Cadmus is mythically said to have built one at Thebes, and Romulus one at Mount Palatine, 151 B.C.; see *Sanctuaries*; *Metropolitan District*.

ATALANTA (formerly *Juno*), training-ship, left Bermuda on a trial voyage, under capt. Stirling, 31 Jan. 1880. On board, 15 officers, and 255 petty officers, seamen, marines, and boys; never heard of again. Many merchant vessels were wrecked during a terrific gale, 12-16 Feb. 1880. See *Mission House Funds*.

ATAVISM (Latin *atavus*, "an ancestor"), the reappearance of an ancestral type in an animal or plant; see also *Heredity*. Dr. Darwin's "Variation under Domestication," pub. 1868. F. Galton's "Natural Inheritance," pub. 1889.

ATCHINOFF INCIDENT, see under *Russia*, 1889

ATELIERS NATIONAUX (National Workshops), were established by the French provisional government in Feb. 1848. They interfered greatly with private trade, as about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the fearful conflicts in June following; and the system was abolished in July.

ATHANASIAN CREED. Athanasius, of Alexandria, elected bishop, 326. He firmly opposed the doctrines of Arius (who denied Christ's divinity), was several times exiled; died in 373.

Lumby, in "History of the Creeds" (1874), asserts that this creed, beginning "*Quicumque vult*," was not composed by Athanasius; that it is made up of two distinct parts, and was originally written in Latin and put into its present shape between 813 and 850; not connected with Athanasius's name by any trustworthy authority before 809; set forth first in Gaul, about 870; gradually extended into Italy, Britain, &c.; accepted by the Greek church about 1200.

This creed asserts the procession of the Holy Ghost from the Father and the Son, see *Filioque*.

Dr. Waterland's Critical History of this creed, 1723. Much agitation against the general use of this creed has arisen in the Church of England among both clergy and laity, 1870-73.

Modifications approved by several bishops were negatived by the lower house in convocation (62-7) early in May, 1872. The vote was rejected by the bishops, and the agitation continued.

In a letter to the earl of Shaftesbury, 22 July, 1872, the archbishops of Canterbury and York expressed their hope of devising a way for rendering the reading of the creed during public worship not compulsory.

Great meeting of laity at St. James's Hall in defence of the creed, 31 Jan. 1873.

Omission of "damatory clauses" in the creed at services in Westminster abbey revives discussion as to its use, Jan. *et seq.* 1903.

ATHEISM (from the Greek *a*, without, *Theos*, God, see *Psalms* xiv. 1). It was professed by Epicurus, Lucretius, and other philosophers. Spinoza was the defender of a similar doctrine (1632-1677). Lucilio Vanini publicly taught atheism in France, and was condemned to be burnt at Toulouse in 1619. Mathias Knutzen, of Holstein, openly professed atheism, and had upwards of a thousand disciples in Germany about 1674; he travelled to make proselytes, and his followers were called *Conscienciaries*, because they held that there is no other deity than conscience. Atheism prevailed during the French republic, 1794 till 1801; see *Materialism*. Bill to prevent Atheists sitting in Parliament, read, 7 March, 1882; dropped. Mr. Bradlaugh's Oaths bill to relieve Atheists, passed, 24 Dec. 1888. See *Parliament*.

ATHENÆA were great festivals celebrated at Athens in honour of Minerva. One was called Panathenæa, the other Chalcea; they are mythically said to have been instituted by Erechtheus or Orpheus, 1397 or 1495 B.C.; and revived by Theseus,

who caused them to be observed by all the Athenians, the first every fifth year, 1234 *n.c.* *Plutarch.*

ATHENÆUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. That of Rome, of great beauty, was erected by the emperor Adrian, 133.—The **ATHENÆUM CLUB** of London was formed 16 Feb. 1824, for the association of persons of scientific and literary attainments, and artists, *scilicet* noblemen and gentlemen, patrons of learning, &c. by the earls of Liverpool and Aberdeen, the marquis of Lansdowne, Dr. T. Young, Moore, Davy, Scott, Mackintosh, Faraday, Croker, Chantrey, Lawrence, and seven future premiers. The clubhouse was erected in 1829-30 on the site of the late Carlton palace; it is of Grecian architecture, and the frieze is an exact copy of the Panathenæan procession which formed the frieze of the Parthenon.—The Liverpool Athenæum was opened 1 Jan. 1799.—At Manchester, Bristol, and many other places, buildings under this name, and for a like purpose, have been founded.—The *Athenæum*, a weekly literary and scientific journal in relation to literature, science, and the fine arts, originated by James Silk Buckingham, first appeared in 1828. John Francis, publisher, 1831-82, died 6 April, 1882. Rev. Henry Stebbing, first editor, died 22 Sept. 1883, aged 84. The *Athenæum* became the property of Mr. C. W. Dilke in 1830, and speedily became an influential critical journal; a review of the literature in thirteen countries, appeared, 2 July, 1898. Prof. Almeric Ramsey, an admirable reviewer, born, 31 Jan. 1825, died mid-April, 1899. See *Trials*, 1875.

ATHENRY (Galway). Near here the Irish were totally defeated, and a gallant young chief, Feidlim O'Connor, slain 10 Aug. 1316.

ATHENS, the capital of ancient Attica, and of modern Greece. The first sovereign mentioned is Ogyges, who reigned in Boeotia, and was master of Attica, then called Ionia. Tradition states that in his reign (about 1764 *B.C.*) a deluge laid waste the country, which so remained till the arrival of the Egyptian Cecrops and a colony, by whom the land was re-peopled, and twelve cities founded, 1556 *B.C.* The city, said to have been first called Cecropia, was afterwards named Athens in honour of Minerva (Athenê), her worship having been introduced by Erechtheus, 1383 *B.C.* Athens was ruled by seventeen successive kings (487 years), by thirteen perpetual archons (316 years), seven decennial archons (70 years), and lastly by annual archons (760 years). It attained great power, and no other city has had, in a short space of time, so great a number of illustrious citizens. The ancients called Athens *Astus*, the city, by eminence, and one of the eyes of Greece; see *Greece*. The early history is mythical and the dates conjectural.

Population of modern Athens, 1871, 48,107; 1879, 63,374; 1889, 114,355; 1896, 179,755 (with Piræus). The MS. text of the recovered work of Aristotle on the Constitution of Athens, was published by the British Museum Jan. 1891

ATHLETIC SPORTS were first organised by the Greeks. On the plain of Olympia at the great national festival held every fourth year in honour of Zeus, athletes trained to the highest degree of physical perfection contested in foot, horse and chariot races, wrestling, boxing and kindred sports, receiving for prizes garlands of wild olives, which also conferred various civic honours and privileges. Similar in their character were the Isthmian, Nemean and Pythian games. The consul, M. Fulvius, in 186 B.C., introduced athletic sports in Rome, but these speedily degenerated into gladiatorial contests. Among Old English sports were running, jumping, archery, quarterstaff, singlestick, and throwing the bar, in which pastime Henry VIII. (1509-47) was an adept. The Cotswold games were celebrated in the 16th and 17th centuries, as were also the Cumberland and Westmoreland sports. In more recent times amateur athletic sports may be said to have begun their revival at the great athletic meeting of the civil service sports in 1864, and the university sports from the meeting at Christchurch, Oxford, in 1861, when our king, when prince of Wales, was present. Numerous clubs, such as the London athletic club, the national cyclists' club, the Blackheath harriers, the amateur athletic association, the national football association, the Rugby union, the M.C.C. represent the interests of the various branches of athletic sports, which continue yearly to increase in popularity. See under *various headings*, as *Cricket*, *Football*, &c.

ATHLONE, Roscommon, Ireland, was burnt during the civil war in 1641. After the battle of the Boyne, colonel R. Grace held Athlone for James II. against a besieging army, but was killed when it was taken by assault by Ginckel, 30 June, 1691 ; see *Aughrin*.

ATMOLYSIS, a method of separating the constituent gases of a compound gas (such as atmospheric air) by causing it to pass through a vessel of porous material (such as graphite) ; first made known in Aug. 1863, by the discoverer, the late professor T. Graham, F.R.S., master of the mint.

ATMOSPHERE, see *Air*.

ATMOSPHERIC RAILWAYS. The idea of producing motion by atmospheric pressure was conceived by Papin, the French engineer, about 1680. Experiments were made on a line of rail, laid down across Wormwood Scrubs, London, between Shepherd's Bush and the Great Western

railroad, to test the efficacy of atmospheric tubes, the working of the air-pump, and speed of carriages upon this new principle on railroads in June, 1840, and then tried for a short time on a line between Croydon and London, 1845. Atmospheric pressure was also tried and abandoned, in 1848, on the South Devon line. An atmospheric railway was commenced between Dalkey and Killiney, in the vicinity of Dublin, in Sept. 1843; opened 29 March, 1844; discontinued in 1855. A similar railway was proposed to be laid down in the streets of London by Mr. T. W. Rammell, in 1857. Mr. Rammell's Pneumatic Railway was put in action successfully at the Crystal Palace on 27 Aug. 1864, and following days. An act for a pneumatic railway between the Waterloo railway station and Whitehall was passed in July, 1865. Atmospheric pressure was proposed for a submarine railway from Dover to Calais, in 1869; see *Pneumatic Despatch*.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The somewhat incoherent labours of his predecessors (such as Wenzel, in 1777) were reduced by John Dalton to four laws of combining proportion, which have received the name of "Atomic Theory." His "Chemical Philosophy," containing the exposition of his views, appeared in 1808. Dr. C. Daubeny's work on the Atomic Theory was published in 1850. In his standard of *Atomic weights* Dalton takes hydrogen as 1. Berzelius, who commenced his elaborate researches on the subject in 1848, adopts oxygen as 100. The former standard is used in this country, the latter on the continent. The theory is accepted by some, and rejected by other chemists. In 1855 Hinrichs propounded a new hypothetical science, *Atomematics*, in which *panlogen*, composed of panatoms, is regarded as the primary chemical principle. "A New View of the Origin of Dalton's Atomic Theory," by Sir H. E. Roscoe and Arthur Harden, published April, 1896.

ATOMS. Democritus (about 400 B.C.) held that the only existing things are innumerable indestructible atoms, varying in form, and combined in obedience to mechanical laws, and that the soul consists of free, smooth, round atoms like those of fire; and that nothing happens by chance. His philosophy was adopted by Epicurus (about 306 B.C.), whose doctrines are luminously expounded by Lucretius in his great poem, "*De Rerum Natura*" (On the Nature of Things), 57 B.C. The atomic philosophy, in a modified form, was recognised by Gassendi, who died 1655 A.D. Sir Wm. Thomson's discourse "On the Size of Atoms," at the Royal Institution, 2 Feb. 1883, is printed in the "Proceedings," vol. x. See *Times*, 13 June, 1883.

ATREBATES, a Belgic people, subdued by Cæsar, 57 B.C.; see *Artois*.

ATTAINDER, ACTS OF, whereby a person not only forfeited his land, but his blood was attainted, have been numerous. Two witnesses in cases of high treason are necessary where corruption of blood is incurred, unless the party accused shall confess, or stand mute, 7 & 8 Will. III. 1694-5. *Black stone*. The attainder of lord Wm. Russell, who was beheaded in Lincoln's-inn-fields, 21 July, 1683, was reversed under William, in 1689. The rolls and records of the acts of attainder passed in the reign of James II. were cancelled and publicly burnt, 2 Oct. 1695. Sir John Fenwick was the last person executed by act of attainder, 28 Jan. 1697. Amongst the last acts reversed was the attainder of the children of lord Edward Fitzgerald (who was implicated in the rebellion in Ireland of 1798),

1 July, 1819. In 1814 and 1833 the severity of attainders was mitigated. Several attainders reversed about 1827, and one in 1853 (the earl of Perth).

ATTICA, see *Athens*.

ATTILA, surnamed the "*Scourge of God*," and thus distinguished for his conquests and his crimes, having ravaged the eastern empire from 445 to 450, when he made peace with Theodosius. He invaded the western empire, 450, and was defeated by Aëtius at Châlons, 451; he then retired into Pannonia, where he died through the bursting of a blood vessel on his nuptials with Ildico, a beautiful virgin, 453.

ATTORNEY (from *tour*, turn), a person appointed to act for another. An attorney-at-law was a properly qualified law agent practising in the common law courts; persons conducting suits in the courts of chancery being termed solicitors. The number in Edward III.'s reign was under 400 for the whole kingdom. In the 32nd of Henry VI., 1454, a law reduced the practitioners in Norfolk, Norwich, and Suffolk, from eighty to fourteen, and restricted their increase. The number of attorneys practising in the United Kingdom was said to be 13,824 (1872). By the Judicature Act, 1873, which came in force, 1 Nov. 1875, all solicitors, attorneys and proctors are now called "solicitors of the supreme court."

ATTORNEY - GENERAL, the chief law officer of the crown, is appointed by letters patent. He acts for the crown in all proceedings at law and equity affecting the royal prerogative; and prosecutes for the crown in criminal and in revenue cases, and grants fiats for writs of error. His sanction is required before proceedings can be taken under the Public Health Act, Corrupt Practices Act. He may, in his discretion, prosecute for any misdemeanour, and can stay proceedings in any indictment without consent of prosecutor. In his absence his duties are performed by the "solicitor-general." The first attorney-general was William Bonneville, 1277.

ATTRACTION, described by Copernicus, about 1520, as an appetite or appetite which the Creator impressed upon all parts of matter; by Kepler as a corporeal affection tending to union, 1605. In 1687, sir I. Newton published his "Principia," containing his important researches on this subject. See *Gravitation*, *Magnetism*, and *Electricity*.

ATWOOD'S MACHINE, for proving the laws of accelerated motion by the falling of weights, invented by George Atwood; described 1784: he died 11 July, 1807.

AUBAINE, a right of the French kings, which existed from the beginning of the monarchy, whereby they claimed the property of every stranger who

died in their country, without having been naturalised, was abolished by the national assembly in 1790-91; re-established by Napoleon in 1804, and finally annulled 14 July, 1819.

AUBEROCHE, Guienne, S. France. The earl of Derby defeated the French, besieging this place, 19 Aug. 1344.

AUCKLAND, capital of North Island (New Zealand), was founded Sept. 1840. The population of the district, in 1857, was estimated at 15,000 Europeans, and 35,000 natives; 1901, 67,226 (city and suburbs). The seat of government was removed to Wellington on Cook's Strait, Dec. 1864. Visit of the duke of Cornwall and York (prince of Wales), 10 July, 1901.

AUCTION, a kind of sale known to the Romans, mentioned by Cicero, Livy, and Petronius Arbitr. The first in Britain was about 1700, by Elisha Yale, a governor of Fort George, now Madras, in the East Indies, who thus sold the goods he had brought home. Auction and sales' tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. c. 15 (1845), the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of 10*l.*" In 1858 there were 4358 licences granted, producing 43,580*l.*; 90,774*l.* in 1902. The abuses at auctions, termed "knock-outs," caused by combinations of brokers and others, excited much attention in Sept. 1866. An act regulating sales of land by auction was passed 15 July, 1867. Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland. See the very important *Sale of Goods Act*.

AUDIANI, followers of Audeus of Mesopotamia, who, having been expelled from the Syrian church on account of his severely reproving the vices of the clergy, about 338, formed a sect and became its bishop. He was banished to Seythia, where he is said to have made many converts. His followers celebrated Easter at the time of the Jewish passover, attributed the human figure to the Deity, and had other peculiar tenets.

AUDIOMETER (from *audio*, I hear), an instrument for the measurement of the faculty of hearing; invented by professor Hughes (died 22 Jan. 1900). It consists of a battery of two Leclanché's cells connected with a simple microphone and telephone; described to the Royal Society, 15 May, 1879.

AUDIPHONE, an instrument to assist the partially deaf, invented by Mr. R. G. Rhodes of Chicago, and modified by M. Colladon of Geneva, in 1880. It consists of a thin sheet of hard ebonite rubber or card-board. This should be placed against the teeth, through which and other bones the vibrations are conveyed to the auditory nerve.

AUDIT-OFFICE, Somerset House. Commissioners for auditing the public accounts were appointed in 1785, and many statutes regulating their duties have since been enacted.

AUDLEY'S REBELLION, see *Rebellions*, 1497.

AUERSTÄDT (Prussia). Here on 14 Oct. 1806, the French, under Davoust, signally defeated the Prussians, under Blucher, see *Jena*.

AUGHRIM, near Athlone, in Ireland, where on 12 July, 1691, a battle was fought between the Irish, headed by the French general St. Ruth, and the English under general Ginckel. The former were defeated and lost 7000 men; the latter lost only 600 killed and 960 wounded. St. Ruth was slain. This engagement proved decisively fatal to the interest of James II., and Ginckel was created earl of Athlone.

AUGMENTATION OF POOR LIVINGS' OFFICE, established in 1704. 5597 clerical livings, not exceeding 50*l.* per annum, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established.

AUGMENTATIONS COURT, established in 1535 by 27 Hen. VIII. c. 27, in relation to cap. 28 same session, which gave the king the property of all monasteries having 200*l.* a year. The court was abolished by Mary, 1553, and restored by Elizabeth, 1558.

AUGSBURG (Bavaria), originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diets of the empire have been held. In A.D. 952 a council confirmed the order for the celibacy of the priesthood. Augsburg has suffered much by war, having been frequently taken by siege,—in 788, 1703, 1704, and, last, by the French, 10 Oct. 1805, who restored it to Bavaria in March, 1806. Population, 1890, 75,523; 1900, 89,109.

AUGURY. Three augurs, at Rome, with vestals and several orders of the priesthood, were formally constituted by Numa, about 710 B.C. The number increased, and was fifteen at the time of Sylla, 81. The college of augurs was abolished by Theodosius about A.D. 390.

AUGUST, the sixth month of the Roman year (originally called *Sextilis*, or the sixth from March), by a decree of the senate received its present name in honour of Augustus Cæsar, in the year 8 B.C., because in this month he was created consul, had thrice triumphed in Rome, added Egypt to the Roman empire, and made an end of the civil wars. He added one day to the month, making it 31 days. The appearance of shooting stars on the 10th of Aug. was observed in the middle ages, when they were termed "St. Lawrence's tears." Their periodicity was noticed by Mr. Forster early in the present century. See under *France*, 10 August, 1792.

AUGUSTAN ERA began 14 Feb. 27 B.C., or 727 years after the foundation of Rome.

AUGUSTIN or **AUSTIN FRIARS**, a religious order, which ascribes its origin to St. Augustin, bishop of Hippo, who died 430. They first appeared about the 11th century, and the order was constituted by pope Alexander IV., 1256. The rule requires poverty, humility, and chastity. Martin

Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans. The order appeared in England soon after the conquest, and had 32 houses at the suppression, 1536. One of their churches, at Anstin Friars, London, erected 1354, and since the Reformation used by Dutch protestants, was partially destroyed by fire, 22 Nov. 1862. It was restored, and reopened, 1 Oct. 1865. A religious house of the order, dedicated to St. Monica, mother of Augustin, was founded in Hoxton-square, London, 1864. Letters and documents of the Dutch Church of London, 1462-1874, edited by J. H. Hessels; completed, 1897.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., being one of the two courts, the first called the Imperial Chamber civil and criminal, instituted at Worms, 1495, and afterwards held at Spiers and Wetzlar, and the other the Aulic council at Vienna, 1506. These courts having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURAY (N. W. France). Here, on 29 Sept. 1364, the English, under John Chandos, defeated the French and captured their leader Du Guesclin. Charles of Blois, made duke of Brittany by the king of France, was slain, and a peace was made in April, 1365.

AURICULAR CONFESSION. The confession of sin at the ear (Latin, *auris*) of the priest was an early practice. It is incorrectly stated to have been forbidden in the 4th century by Nectarius, archbishop of Constantinople. It was enjoined by the council of Lateran in 1215, and by the council of Trent in 1551. It was one of the six articles of faith enacted by our Henry VIII. in 1539, but was abolished in England at the Reformation. Its revival here has been attempted by the extreme or Ritualistic section of the high church party.

The rev. Alfred Poole, a curate of St. Barnabas, Knightsbridge, was suspended by his bishop from his office for practising auricular confession in June, 1858, and the suspension was confirmed in Jan. 1859. Much excitement was created by a similar attempt by the rev. Temple West at Boyne Hill, in Sept. 1858.

In May, 1873, 483 clergymen of the Church of England presented a petition to convocation for the education, selection, and licensing of duly qualified confessors, in accordance with the provisions of canon law. Strongly disapproved of by the bishops.

AURIFLAMMA or **ORIFLAMME**, the national banner mentioned in French history, belonging to the abbey of St. Denis, and suspended over the tomb of that saint. Louis le Gros was the first king who took this standard from the abbey to battle, 1124. *Hénault*. It appeared for the last time at Agincourt, 25 Oct. 1415. *Tillet*. Others say at Montlherly, 16 July, 1465.

AURORA, FRIGATE, sailed from Britain in 1771, to the East Indies, and was never again heard of.—**AURORA**, daily papal newspaper, appeared at Rome 1 June, 1880.

AURORÆ BOREALES AND **AUSTRALES** (Northern and Southern Polar Lights).

though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March, 1716, an aurora borealis extended from the west of Ireland to the confines of Russia. The whole horizon lat. 57° N. was overspread with continuous haze of a dismal red during a whole night, Nov. 1765.—Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. The aurora is now attributed to the passage of electric light through the rarefied air of the polar regions. In August and September, 1859 (and about 24 Oct. 1870), when brilliant auroræ were very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroræ were seen at Rome and Basel, and also in Australia. A magnificent aurora appeared in New York and other states, evening of 13 Feb. 1892. A Danish expedition under lieut. Le Com starts for N. Finland to study the aurora, Dec. 1900.

AUSTERLITZ, a town in Moravia, where a battle was fought between the French and the allied Austrian and Russian armies, 2 Dec. 1805. Three emperors commanded: Alexander of Russia, Francis of Austria, and Napoleon of France. The killed and wounded exceeded 30,000 on the side of the allies, who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Presburg, signed 26 Dec. 1805; see *Presburg*.

AUSTIN FRIARS, see *Augustin Friars*.

AUSTRALASIA, the fifth great division of the world. This name, originally given it by De Brosse, includes Australia, Van Diemen's Land (or Tasmania), New Guinea, New Zealand, New Britain, New Caledonia, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spaniards as early as 1526; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1606 explored a part of the coast of Papua or New Guinea. Torres, a Spaniard, passed through the straits which now bear his name, between that island and Australia, and gave the first correct report of the latter, 1606. The Dutch continued their discoveries. Grant in 1800, and Flinders again (1801-5) completed the survey. *M'Culloch*. Estimated population of the Australasian colonies in 1891, 3,932,000; 1897, 4,410,124; census 1901, 4,544,434. See *Australia, Gold, &c.*

* GOLD DISCOVERY.—Mr. Edward Hargreaves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Conobolas, some thirty miles west of Bathurst. On his return home, he examined the soil, and after one or two months' digging, found a quantity of gold, 12 Feb. 1851. He applied to the colonial government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places; and in the first week of July, 1851, an aboriginal inhabitant, formerly attached to the Wellington mission, and then in the service of Dr. Kerr, of Wallawa, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of quartz (from two to three hundred weight), found in the Murroo Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at 4000l. The "Victoria nugget," a magnificent mass of virgin gold, weighing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb. weight was also found. From the gold fields of Mount Alexander and Ballarat, in the district of Victoria, up to Oct. 1852, there were found 2,532,422 ounces, or 105 tons 10 cwt. of gold; and the gold exported up to the same date represented 3,863,477l. sterling. In Nov. 1856, the "James Baines"

and "Lightning" brought gold from Melbourne valued at 1,200,000l. The "Welcome nugget" weighed 2001 ounces; value, 8376l. 10s. 10d.; found at Baker's Hill, Ballarat, 11 June, 1858. Between May, 1851, and May, 1861, gold to the value of 96,000,000 had been brought to England from New South Wales and Victoria. Mr. Hargreaves died about 2 Nov. 1891.

AUSTRASIA, (*Æsterreich* (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, 511, and ended by Carloman becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steamship, sailed from Southampton to New York 4 Sept. 1858, with 528 persons on board. On 13 Sept. in lat. 45° N., long 41° 30' W., it caught fire through the carelessness of some one in burning some tar to fumigate the steerage. Only 67 persons were saved—upwards of 60 by the *Maurice*, a French barque; the rest by a Norwegian barque. A heartrending account was given in the *Times*, 11 Oct. 1858, by Mr. Charles Brews, an English survivor.

AUSTRIA, (*Æsterreich* (Eastern Kingdom), anciently Noricum and part of Pannonia, was annexed to the Roman empire about 33; was overrun by the Huns, Avars, &c., during the 5th and 6th centuries, and taken from them by Charlemagne, 791-796. He divided the government of the country, establishing *margraves* of Eastern Bavaria and Austria. Louis the German, son of Louis le Débonnaire, about 817, subjugated Radbod, margrave of Austria; but in 883 the descendants of the latter raised a civil war in Bavaria against the emperor Charles the Fat, and eventually the margraves of Austria were declared immediate princes of the empire. In 1156 the margraviate was made an hereditary *duchy* by the emperor Frederic I.; and in 1453 it was raised to an *archduchy* by the emperor Frederic III. Rodolph, count of Hapsburg, elected emperor of Germany in 1273, acquired Austria in 1278; and from 1493 to 1804 his descendants were *emperors*. On 11 Aug. 1804, the emperor Francis II. renounced the title of emperor of Rome and king of Germany (popularly termed emperor of Germany), and became hereditary *emperor of Austria*. The condition of Austria is now greatly improving under the enlightened rule of the present emperor. The political constitution of the empire is based upon—1. The pragmatic sanction of Charles VI., 1734, which declares the indivisibility of the empire and rules the order of succession. 2. The pragmatic sanction of Francis II., 1 Aug. 1804, when he became emperor of Austria only. 3. The diploma of Francis Joseph, 20 Oct. 1860, whereby he imparted legislative power to the provincial states and the council of the empire (*Reichsrath*). 4. The law of 26 Feb. 1861, on the national representation. Self-government was granted to Hungary, 17 Feb. 1867. Each country has its parliament, and a controlling body termed the Delegations, consisting of 120 members, half elected by Austria and half by Hungary, was also established in 1867. The empire was ordered to be named henceforth the Austro-Hungarian monarchy, or Austria-Hungary, by decree, 14 Nov. 1868. On 19 Oct. 1889, the army was ordered to be styled "Imperial and Royal." Population of the empire* in Oct. 1857, 35,018,988; reduced

* The empire is now divided into two parts, separated by the river Leitha. The Cis-Leithan section comprises 14 provincial diets; Galicia, Bohemia, Silesia, Moravia, lower and upper Austria, Styria, the Tyrol and Vorarlberg, Salzburg, Carinthia, Cariola, Trieste, and Istria, Dalmatia, and the Bukovina. AUTOMATON FIGURES (or **ANDROIDES**), made to imitate living actions, are of early invention. Friar Bacon is said to have made a brazen head which spoke, A.D. 1264. Albertus Magnus spent thirty years in making another. A coach and two horses, with a footman and page, and a lady inside, were made by Camus for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1649. Vaucanson, in 1738, made an artificial duck, which performed many functions of a real one—eating, drinking, and quacking; and he also made a flute-player. The writing automaton, exhibited in 1769, was a pentagram worked by a confederate out of sight.

The automaton chess-player, of Maelzel, exhibited the same year, was also worked by a hidden person; so was the "invisible girl," 1800. See *Chess*. Maelzel made a trumpeter about 1809. Early in this century, an automaton was exhibited in London which pronounced several sentences with tolerable distinctness. The "anthropoglossus," an alleged talking-machine, exhibited at St. James's hall, London, July, 1864, was proved to be a gross imposition. The exhibition of the talking-machine of professor Faber of Vienna, in London, began 27 Aug. 1870, at the Palais Royal, Argyll-street, W. Psycho, an automaton card-player, invented by J. N. Maskelyne and John Algernon Clarke, exhibited in London, Jan. 1875. Another Zoë, which played cards, was exhibited by Mr. Maskelyne, 1877. An automaton hare was hunted at Hendon, near London, 9 Sept. 1876.

AVEBURY, or **ABURY** (Wiltshire). Here are the remains of the largest so-called Druidical work in this country. They have been surveyed by Aubrey, 1648; Dr. Stukeley, 1720; and sir R. C. Hoare, in 1812, and by others. Much information may be obtained from Stukeley's "Abury" (1743), Hoare's "Ancient Wiltshire" (1812-21), and the rev. A. C. Smith's work (1884). They are considered to have been set up during the "stone age," *i.e.*, when weapons and implements were mainly formed of that material. Sir John Lubbock, now lord Avebury, takes his title from this place, 22 Jan. 1900.

AVIGNON, a city, S. E. France, ceded by Philip III. to the pope in 1273. The papal seat was removed by Clement V. to Avignon, in 1309. In 1348 Clement VI. purchased the sovereignty from Jane, countess of Provence and queen of Naples. In 1408, the French, wearied of the schism, expelled Benedict XIII., and Avignon ceased to be the seat of the papacy. Here were held nine councils (1080-1457). Avignon was seized and restored several times by the French kings; the last time restored, 1773. It was claimed by the national assembly, 1791, and was confirmed to France by the congress of sovereigns in 1815. In Oct. 1791, horrible massacres took place here. See *Popes*, 1309-94.

AYDE, or AIDE, the tax paid by the vassal to the chief lord upon urgent occasions. In France and England an *aide* was due for knighting the king's eldest son. One was demanded by Philip the Fair, 1313. The *aide* due upon the birth of a prince, ordained by the statute of Westminster (Edward I.), 1285, was not to be levied until he was fifteen years of age, for the ease of the subject. The *aide* for the marriage of the king's eldest daughter could not be demanded in this country until her seventh year. In feudal tenures there was an *aide* for ransoming the chief lord; so when our Richard I. was kept a prisoner by the emperor of Germany, an *aide* of 20s., to redeem him, was enforced upon every knight's fee; see *Benevolence*.

AYLESBURY, Buckinghamshire, was reduced by the West Saxons in 571. Incorporated by charter in 1554; absorbed into the county 1889. The ancient parish church was restored by sir G. G. Scott, 1840-67. Visited by the queen 14 May, 1890. Population 1881, 7,795; 1891, 8,674; 1901, 9,244.

AZOFF, SEA OF, the Palus Mæotis of the ancients, communicates by the strait of Yenikalé (the Bosphorus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition, composed of British, French, and Turkish troops, commanded by sir G. Brown, arrived at Kertch, 24 May, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikalé, which also offered no resistance. On the same evening the allied fleet entered the Sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores was destroyed by the Russians to prevent their falling into the hands of the allies.

AZOIMIDE, a compound of hydrogen and nitrogen (azote), a very explosive gas, obtained from organic sources, such as benzoyl-glycollic acid and hippuric acid, by prof. Curtius in 1890. It forms salts by combination with metals; it is described in *Nature*, 10 Dec. 1891.

AZORES, or WESTERN ISLES (N. Atlantic), belonging to Portugal, the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by Vanderberg of Bruges, who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered and named Azores from the number of goshawks found on them. They were given by Alfonso V. to the duchess of Burgundy in 1466, and colonised by Flemings. They were subject to Spain 1580-1640. The isle Terceira, during the usurpation of dom Miguel, declared for donna Maria, 1829, and a government was established at the capital Angra, 1830-33. A volcano at St. George's destroyed the town of Ursulina, May, 1808; and in 1811 a volcano appeared near St. Michael's, in the sea, where the water was eighty fathoms deep; an island then formed gradually disappeared. A destructive earthquake lasting 12 days, happened in St. Michael's, 1591. The telegraphic cable from Lisbon to the Azores was inaugurated by the king and queen at Careavillos, 27 Aug. 1893.

AZTECS, the ruling tribe in Mexico at the time of the Spanish invasion (1519). In June, 1853, two pretended Azte children were exhibited in London. They were considered by professor Owen to be merely South American dwarfs. They were married in London, 1 April, 1867, and exhibited for some time after.

BAALBEC, HELIOPOLIS (both meaning "City of the Sun"), an ancient city of Syria, of which magnificent ruins remain, visited by Wood (in 1751), and others. Its origin is lost in antiquity. Here Septimius Severus built a temple to the sun, 200. The city was sacked by the Moslems, 748, and by Timour Beg, 1400. Visited by terrible earthquake, 1759. BABEL, TOWER of, built by Noah's posterity, 2247 B.C. (*Genesis*, ch. xi.) The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was deified after death. *Blair*. The Birs Nimroud, the site of a temple dedicated to Nebo and called the "Temple of the Seven Lights" (planets), examined by Rich, Layard, and others, is conjectured by some to be the remains of the tower of Babel.

* The city of Babylon was at one time the most magnificent in the world. The *Hanging Gardens* are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast arches raised on other arches; and on the top were flat stones closely cemented together with plaster of bitumen, and that covered with sheets of lead, upon which lay the mould of the garden, where there were large trees, shrubs, and flowers, with various sorts of vegetables. There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. *Strabo*; *Diodorus*. Pliny said that in his time it was but a desolate wilderness. Mr. Rich visited the ruins in 1811, and sir R. Ker Porter in 1818. The laborious researches of Mr. (after sir A. H.) Layard, sir H. Rawlinson, M. Botta, and others, and the interesting relics excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cuneiform or wedge-like character have been translated, principally by col. (after sir Henry) Rawlinson, and published in the *Journal of the Royal Asiatic Society*. In the spring of 1855 he returned to England, bringing with him many valuable relics, drawings, &c., which are now in the British Museum. He gave discourses on the subject at the Royal Institution, London, in 1851, 1855, and 1865. The rev. A. Sayce lectured on Babylonian literature at

See *Assyria*. According to the earliest existing history the country was divided between two races, the Sumir (Turanian), the probable inventors of cuneiform writing; and the Accad or Akkad (Semitic), which became predominant. See *Accadians*. "The fragmentary Canon of Kings," given by Berosus of the Græco-Chaldean priest 268 B.C., had been superseded by the newly-discovered Babylonian canon inscriptions on tablets carefully dated from 2200 to 647 B.C., an unequalled chronological series. Summaries are given by Mr. Boseawen in the articles "Assyria" and "Babylonia" in "Chambers' Encyclopædia," 1901.

BÂBI-ISM, a new sect in Persia, founded in 1843 by Mirza Ali Mahomed, an enthusiast, at Shiraz. He termed himself the "Bâb," or "gate," of knowledge, and, giving a new exposition of the Koran, claimed to be the incarnate Holy Spirit. The destruction of himself and the greater number of his followers was due to Hossein, one of his disciples, who combined political and warlike principles with spiritual dogmas. The sect was tolerated by the shah Mohammed, but nearly exterminated by his successor in 1848-9. The Bâb himself was executed 15 July, 1849. The head of the sect, Beheveh Allah, propounded a doctrine, termed "Bâb el Huk," gate of truth. The persecuted sect has been favoured by Turkey, and been settled latterly at Bagdad. Mr. Edwd. G. Brown's "Narrative" respecting Bâbi-ism, was published in 1892. See *Persia*, 1 May, 1896.

BAIL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1275) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated in later reigns. It is now accepted in all cases, except felony; and where a magistrate refuses bail, it may be granted by a judge. Acts respecting bail passed 1826, 1852, and 1898.

Battle of Balaklava.—About 12,000 Russians, commanded by general Liprandi, attacked and took some redoubts in the vicinity, which had been entrusted to about 250 Turks. They next assaulted the English, by whom they were compelled to retire, mainly through the charge of the heavy cavalry, led by brigadier Scarlett, under the orders of lord Lucan. After this, from an unfortunate misconception of lord Raglan's order, lord Lucan ordered lord Cardigan, with the light cavalry, to charge the Russian army, which had reformed on its own ground with its artillery in front. The order was most gallantly obeyed, and great havoc was made on the enemy; but of 670 British horsemen, only 198 returned. (Termed by Tennyson "The Charge of the Six Hundred.") The infantry engaged were termed a "thin red line" 25 Oct. 1854

BALKANS, the ancient *Hæmus*, a range of mountains extending from the Adriatic to the Euxine. The passage, deemed impracticable, was completed by the Russians under Diebitsch, during the Russian and Turkish war, 26 July, 1829. An armistice was the consequence; and a treaty of peace was signed at Adrianople, 14 Sept. following. The Balkans were crossed by the Russians under Gourko, 13 July, 1877; see *Russo-Turkish War II*. By the treaty of Berlin, 13 July, 1878, the Balkans became the frontiers of the Sultan's European dominions.

The Balkan States are Servia, Bulgaria, and Roumelia (*which see*, also *Macedonia*, 1902-3).

BALLADS may be traced in the British history to the Anglo-Saxons. *Turner*. Adhelme, who died 709, is mentioned as the first who introduced ballads into England. Minstrels were protected by a charter of Edward IV.; but by a statute of Elizabeth they were made punishable among rogues and vagabonds, and sturdy beggars. *Viner*. Fletcher, of Saltoun (died 1716) in a letter to Montrose expressed his opinion that making ballads was more important than law-making. The sea-ballads of Dibdin were very popular in the French war; he died 20 Jan. 1833. Patriotic songs during South African war, 1899-1902. Mr. Rudyard Kipling's "Pay, pay, pay" very popular. BALLETS began through the meretricious taste of the Italian courts. Bergonzio di Botti gave one of great magnificence at Tortona, 1489, in honour of the marriage of the duke of Milan. One performed at the interview between our Henry VIII. and Francis I. of France in the Field of the Cloth of Gold, at Ardres, 1520. BALLOONS.* A just idea of the principle of the construction of balloons was formed by Albert of Saxony, an Augustine monk in the 14th century, and adopted by a Portuguese Jesuit, Francesco Mendoza, who died at Lyons in 1626. The idea is also attributed to Bartolomeo de Guzman, who died in 1724. The principles of *aéronautics* include:—1, the power of a balloon to rise in the air; 2, the velocity of its ascent; and 3, the stability of its suspension at any given height. In 1872 Helmholtz thought balloons might be steered, if moving slowly. Fatal accidents to the voyagers have been estimated

at 2 or 3 per cent. The *Aéronautical Society* of Great Britain, founded with the object of fostering and developing *aéronautics* and *aérolgy*, by the duke of Argyll, Mr. James Glaisher, sir Charles Bright, and others, 12 Jan. 1866.

BANGORIAN CONTROVERSY was occasioned by Dr. Benjamin Hoadley, bishop of Bangor, preaching a sermon before George I., 31 March, 1717, upon the text, "*My kingdom is not of this world*" (*John*, xviii. 36), in which he demonstrated the spiritual nature of the church and kingdom of Christ. He thereby drew upon himself the indignation of almost all the clergy, who published hundreds of pamphlets.

BANISHMENT, an ancient punishment. By 39 Eliz. c. 4 (1597) dangerous rogues were to be banished out of the realm, and to be liable to death if they returned; see *Transportation*.

BANK. The name is derived from *banco*, a bench, erected in the market-place for the exchange of money. The first was established in Italy, 808, by the Lombard Jews, of whom some settled in Lombard-street, London, where many bankers still reside. The Mint in the Tower of London was anciently the depository for merchants' cash, until Charles I. seized the money as a loan, and in 1640 the traders lodged their money with the goldsmiths in Lombard-street. See *Bank of England*; *Bankers' Books*; *Drafts*; *Savings Banks*.

BANK OF IRELAND. On 9 Dec. 1721, the Irish house of commons rejected a bill for establishing a national bank. Important failures in Irish banks occurred in 1727, 1733, and 1758: this led gradually to the establishment of the Bank of Ireland at St. Mary's abbey, Dublin, 1 June, 1783. The business was removed to the late parliament house, in College-green, in May, 1808. Branch banks of this establishment have been formed in most of the provincial towns in Ireland, all since 1828. Irish Banking Act passed, 21 July, 1845.

BANKERS' BOOKS EVIDENCE ACT, 39 & 40 Vict. c. 48, passed 11 Aug. 1876; repealed by a fresh act 23 May, 1879.

BANKS, JOINT STOCK. Since the act of 1826, a number of these banks have been established.† In *Ireland* similar banks have been in-

* **CITY OF GLASGOW BANK** (with unlimited liability); founded 1839, identified with Glasgow; held Free Church Sustentation Fund; stopped for a few days during crisis, Nov. 1857. In 1876 paid dividend 12 per cent. (cool, stock, 266.); 1272 shareholders, very many in humble circumstances. The bank stopped 2 Oct. Investigation showed great fraud and false accounts. Estimated loss, 6,785,000, causing much calamity and ruin to many. The directors, J. Stewart, Lewis Potter, R. Salmund, Wm. Taylor, H. Inglis, and J. I. Wright, and the manager, R. S. Stronach, were committed for trial, 20 Oct. Stronach and Potter were convicted of falsifying and fabricating balance sheets (18 months' imprisonment); the others of uttering the same (6 months' imprisonment), 1 Feb. 1879.

The liquidators reported that about 1819 contributors had paid about 4,500,000. (138. ad. in the pound) 1 Dec. 1879; 2008 in the pound paid to depositors, 2 March, 1880. Mr. James N. Fleming was arrested 25 Jan. for embezzlement, and sentenced to 8 months' imprisonment, 3 July, 1882.

Close of the liquidation; 13,644,856d. paid, announced Nov. 1882.

The receipts by subscription, &c., for the relief of the sufferers amounted to 380,000.; interest 47,000., making a total of 427,000.

† **THE ROYAL BRITISH BANK** was established in 1849, by Mr. John McGregor, M.P., and others, under sir R. Peel's joint-stock banking act, 7 & 8 Vict. c. 113 (1844), as an attempt to introduce the Scotch banking system of cash credits into England. On 3 Sept. 1856, it stopped payment, occasioning much distress and ruin to many small tradesmen and others. In consequence of strong evidence of the existence of fraud in the management of the bank, elicited during the examination before the court of bankruptcy, the government instructed the attorney-general to file *ex officio* informations against the manager, Mr. H. Innes Cameron, and several of the directors. They were convicted 27 Feb. 1858, after 13 days' trial, and sentenced to various degrees of imprison-

ment, the first being the Hibernian bank. By the new Companies Act, passed 15 Aug. 1879, unlimited companies may register as limited. The joint-stock banks agreed to support the Bank of England, and to issue monthly balance sheets, May, June, 1891.

* According to a return to parliament made at the close of Feb. 1826, there had become bankrupt in the four months preceding, 59 banking-houses, comprising 144 partners; and 20 other banking establishments had been declared insolvent. BANNER CROSS MURDER. See *Trials* 1879.

BANNERET, KNIGHT, a dignity between baron and knight, anciently conferred by the king under the royal standard on the field of battle. Its origin is of uncertain time: Edmondson dates it 736; but it was probably created by Edward I. John Chandos is said to have been made a banneret by the Black Prince and the king of Castile at Najara, 3 April, 1367. The dignity was conferred on John Smith, who rescued the royal standard at Edgehill fight, 23 Oct. 1642. It fell into disuse, but was revived by George III. for sir William Erskine, in 1764, and for admiral Pye and captains Knight, Bickerton, and Vernon, in 1773.

BANNERS were common to all nations. The Jewish tribes had standards or banners—*Num. ii.* (1490 B.C.). See *Cross, Auriflamma, Standards, &c.* The magical banner of the Danes (said to have been a black raven on a red ground) was taken by Alfred when he defeated Hubba, 878.

BANNOCKBURN (Stirlingshire), the site of two battles: (1) between Robert Bruce of Scotland and Edward II. of England, 24 June, 1314. The army of Bruce consisted of 30,000; that of Edward of 100,000 men, of whom 52,000 were archers. The English crossed a rivulet to the attack, and Bruce having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete: the English king narrowly escaped, and 50,000 were killed or taken prisoners. (2) At Sauchieburn, near here, James III. was defeated and slain on 11 June, 1488, by his rebellious nobles.

BANNS, in the feudal law, were a solemn proclamation of any kind: hence arose the present custom of asking banns, or giving notice before marriage; said to have been introduced into the English church about 1200. The proper time of publishing banns in the church was the subject of much discussion in 1867.

BANQUETING-HOUSE, Whitehall, London, built by Inigo Jones, about 1619. Occupied by the museum of the United Service Institution, 1895.

BANTAM (Java). Here a British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683. Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814.

BANTINGISM, see *Corruptence*.

BANTRY BAY (S. Ireland), where a French fleet bringing succour to the adherents of James II., attacked the English under admiral Herbert, 1 May, 1689: the latter retired to form in line and were not pursued. A French squadron of seven sail of the line and two frigates, armed *en flûte*, and seventeen transports, anchored here for a few days, without effect, Dec. 1796. **MUTINY** of the Bantry Bay squadron under admiral Mitchell was in Dec. 1801. In Jan. 1802, twenty-two of the mutineers were tried on board the *Gladiator*, at Portsmouth, when seventeen were condemned to death, of whom eleven were executed; the others were sentenced to receive each 200 lashes. The executions took place on board the *Majestic*, *Centaur*, *Formidable*, *Téméraire*, and *L'Achille*, 8 to 18 Jan. 1802. Mock battle here, 30 June, 1885.

BAPHOMET, the name of an imaginary idol or symbol having two heads, male and female, surrounded with a crescent moon and serpents, which the knights templars were accused of employing in their mysterious rites. The word is said to be a corrupted form of Mahomet.

BAPTISM, the ordinance of admission into the church, practised by all Christian sects except Quakers. John the Baptist baptized Christ, 30. (*Matt.* iii.) Infant baptism is mentioned by Irenæus about 97. In the reign of Constantine, 319 baptisteries were built and baptism was performed by dipping the person all over. In the west sprinkling was adopted. Much controversy has arisen since 1831 (particularly in 1849 and 1850), in the church of England, respecting baptismal regeneration, which the Archies' Court of Canterbury decided to be a doctrine of the church of England. See *Trials*, 1849, and *note*. Demanding fees for baptisms was made unlawful by an act passed 18 July, 1872.

BAPTISTS (see *Anabaptists*). A sect distinguished by their opinions respecting (1) the proper *subjects*, and (2) the proper *mode* of baptism: the former they affirm to be those who are able to make a profession of faith; the latter to be total immersion. There are seven sections of Baptists—Arminian, Calvinistic (or Particular), &c. The first Baptist church formed in London was about 1608. They published their confession of faith in 1643; revised in 1689. Rhode Island, America, was settled by Baptists in 1635.

BARBERS lived in Greece in the 5th century, and at Rome in the 3rd century B.C. In England, formerly, the business of a surgeon was united to the barber's, and he was denominated a **BARBER-SURGEON**. A London company was formed in 1308, and incorporated, 1462. This union was partially dissolved in 1540, and wholly so in 1745. The city has suffered much by war. The siege by the French in 1694 was relieved by the approach of the English fleet, commanded by admiral Russell; but the city was taken by the earl of Peterborough in 1706. It was bombarded and taken by the duke of Berwick and the French in 1714, and was taken by Napoleon in 1808, and retained till 1814. It obtained its appellation from a nickname given to one of its members, a leather-seller, named "Praise-God Barbon." The majority evinced much sense and spirit, proposing to reform abuses, improve the administration of the law, &c. The parliament was suddenly dissolved, 13 Dec. 1653, and Cromwell made lord protector.

BARODA. See *India*, 1874-5, 1892, 1896.

BAROMETERS. Torricelli, a Florentine, knowing that water did not rise in a pump through what was supposed to be nature's abhorrence of a vacuum, imitated the action of a pump with mercury, and made the first barometer, about 1643. Pascal's experiments (1646) enhanced the value of the discovery by applying it to the measurement of heights. Wheel barometers were contrived in 1668; pendent barometers in 1695; marine in 1700; and many improvements have been made since. In the *aneroid* barometer (from *a*, no, and *neros*, watery) no liquid is employed; the atmospheric pressure being exerted on a metallic spring. Its invention (attributed to Conté, in 1798, but due to Vidi, who died in April, 1866), excited much attention in 1848-9. Barometers were placed at N.E. coast stations in 1860, by the duke of Northumberland and others.

Mr. James B. Jordau's very delicate glycerine barometer, in which one inch is expanded to nearly eleven inches, was described to the Royal Society 22 Jan., 1880, and was set up during the year at Kew and other places. The publication of two-hourly variations of one at the office begun in the *Times* 25 Oct. 1880.

A new very delicate barometer, invented by Mr. C. O. Bartrum and made by Mr. J. J. Hicks, of Hatton Garden, London, announced Aug. 1894.

Col. H. Watkin's mountain aneroid and others described *Times*, 17 Dec., 1898.

BARON, formerly the only title in our peerage, now the lowest. Its original name in England, *Vavasour*, was changed by the Saxons into *Thane*, and by the Normans into *Baron*. The council of the realm was composed of the greater barons, the lesser barons were merely tenants of the crown. Many barons had undoubtedly assisted in, or been summoned to parliament (in 1205); but the first precept found is of no higher date than the 49 Hen. III. 1265. The first raised to this dignity by patent was John de Beauchamp, created baron of Kidderminster, by Richard II., 1387. The barons took arms against king John, and compelled him to grant the great charter of our liberties, and the charter of our forests, at Runnymede, near Windsor, June, 1215. Charles II. granted a coronet to barons on his restoration, 1660.

BARON AND FEMME, OR **FEMME**, terms of Norman-French origin, used in English law signifying husband and wife.

BARONETS, the first in rank among the gentry, and the only knighthood that is hereditary, were instituted by James I., 1611. The rebellion in Ulster gave rise to this order, it having been required of a baronet, on his creation, to pay into the exchequer as much as would maintain "thirty soldiers three years at eightpence a day in the province of Ulster in Ireland." It was further required that a baronet should be a gentleman born, and have a clear estate of 1000*l.* per annum. The first baronet was sir Nicholas Bacon (his descendant, sir H. B. Bacon, is styled *Primus Baronetorum Angliæ*), 22 May, 1611. The baronets of Ireland were created in 1619; the first being sir Francis Blundell.—Baronets of Nova Scotia were created, 1625; sir Robert Gordon the first baronet.—All baronets created since the Irish union in 1801 are of the United Kingdom. Hon. Society of Baronetage formed, 26 Jan., first annual meeting, 22 July, 1898, presents memorial to the government against unauthorised assumption of the title of baronet, June, 1903.—"Complete Baronetage," by C. E. Cokayne, publication commenced 1900.

BARONS' WAR, arose in consequence of the faithlessness of Henry III. and the oppression of his favourites in 1258. The barons, headed by Simon de Montfort, earl of Leicester, and Gilbert de Clare, earl of Gloucester, met at Oxford in 1262, and enacted statutes to which the king objected. In 1263 their disputes were in vain referred to the decision of Louis IX. of France. War broke out, and on 14 May, 1264, the king's party was totally defeated at Lewes; and De Montfort became the virtual ruler of the kingdom. The war was renewed; and at the battle of Evesham, 4 Aug. 1265, De Montfort was slain, and the barons were defeated; but they did not render their final submission till 1268. A history of this war was published by Mr. W. H. Blaauw, in 1844; 2nd ed., 1871.

BARRACKS (from "*Baraque—Hutte que font les soldats en campagne pour se mettre à couvert*") were not numerous in this country until about

1789. A superintendent-general was appointed in 1793, and barracks built in the garrison towns and central points of the empire.—A report on the state of barracks, in 1858, led to their improvement under Mr. Sidney (afterwards lord) Herbert; see *Aldershot*. Mr. E. Stanhope's scheme for increase and improvement of barracks, camps, &c. (to cost about 4,100,000*l.*) submitted to the commons, 27 Feb.; the Barracks Act passed, 25 July, 1890.

BARRAGE. See under *Nile*.

BARRATRY is a general term for the stirring up suits and quarrels among the people. *Maintenance* is an officious intermeddling in a quarrel or suit; by assisting either party with money or otherwise. It is punishable by old statutes (of Richard II., and others), with fine and imprisonment. *Champerty* is an illegal bargain with either plaintiff or defendant to share in the profits of the matter in dispute.

Mr. Bradlaugh's action against Mr. Newdigate for maintenance in the case of *Clarke v. Bradlaugh* (see *Parliament*, 1881) was dismissed, 20 Sept. 1881.

BARREL-ORGANS, see *Organs*.

BARRICADES, mounds formed of trees and earth, for military defence. During the wars of the League in France, in 1588, the people made *barricades* by means of chains, casks, &c., and compelled the royal troops to retire. During the war of the Fronde, a barricade was erected in Paris on 27 Aug. 1648. Barricades composed of overturned vehicles, &c., were erected in Paris in the insurrections of 27-30 July, 1830, and 23-26 June, 1848, when sanguinary conflicts took place; and also 2 Dec. 1851.

BARRIER TREATIES. The first, between England and the Netherlands, was signed at the Hague, 29 Oct. 1709, for mutual support; annulled 1712; another treaty was concluded at Utrecht, 29 Jan. 1713. The third, by which the Low Countries were ceded to the emperor Charles VI., was signed by the British, Imperial, and Dutch ministers, 15 Nov. 1715.

BARRISTERS are said to have been first appointed by Edward I., about 1291, but there is earlier mention of professional advocates. They are of various ranks, as king's or queen's counsel, sergeants, &c., *which see*. Students for the bar must keep a certain number of terms at the inns of court, previously to being called; and by the regulations of 1853 must pass a public examination. See *Women*, 1900.

A committee of the bar, formed about 1885 to protect the rights of barristers in relation to the Inns of Court, merged into the general council. At a meeting of the bar in Lincoln's Inn hall, called by the general council, a compromise was arranged. The Inns of Court agreed to give an annual contribution of 600*l.* to the bar, 19 June, 1895.

BARROSA, OR **BAROSSA** (S. Spain). The British army, commanded by major-general sir Thomas Graham, afterwards lord Lynedoch, totally defeated the French under marshal Victor, 5 March, 1811, the French leaving nearly 3000 dead, six pieces of cannon, and an eagle, the first that the British had taken; the loss of the British was 1169 men killed and wounded.

BARROW ISLAND (Arctic Sea), discovered by Captain Penny in 1850-51, and named by him in honour of John Barrow, Esq., son of sir John.

BARROW-IN-FURNESS (Lancashire), in 1847, was a village with a population of about 330,

which, in 1867, had increased to above 17,000, and in 1874 to 35,000, in consequence of the large manufacture of iron from the ore (hæmatite) found there. On 19 Sept. 1867, new docks were opened in the presence of the dukes of Devonshire and Buccleuch (proprietors of the land), Mr. Gladstone, and others. Barrow was made a municipal borough in 1867. Sir James Ramsden, an eminent promoter of the prosperity of the town and its first mayor, died, aged 74, 19 Oct. 1896. Population in 1881, 47,259; 1891, 51,712; 1901, 57,584.

BARROW'S STRAITS (N. Arctic Sea), explored by Edwd. Parry, as far as Melville island, lat. 74° 26' N., and long. 113° 47' W. The strait, named after sir John Barrow, was entered on 2 Aug., 1819. The thermometer was 55° below zero of Fahrenheit.

BARROWISTS, a name given to the *Brownists*, which see.

BARROWS, circular or oblong mounds, found in Britain and other countries, were ancient sepulchres. Sir Richard Hoare caused several barrows near Stonehenge to be opened; in them were found Celtic ornaments, such as beads, buckles, and brooches, in amber, wood, and gold; Nov. 1808. 230 barrows were opened and discoveries made, chiefly in Yorkshire, 1866 *et seq.*, under the superintendence of the rev. canon Wm. Greenwell, who published his elaborate work, "British Barrows," in December, 1877.

Barrows at Aldbourne, North Wilts, were opened by canon Greenwell and rev. Walter Money, Sept.-Oct. 1878.

Canon Greenwell gave urns and other results of his explorations to the British museum in 1879.

BARS in music appear in Agricola's "Musica Instrumentalis," 1529; and in Morley's "Practical Music," 1597, for score music. Henry Lawes used them in his "Ayres and Dialogues," 1653.

The MASSACRE OF ST. BARTHOLOMEW commenced at Paris on the night of the festival 24 Aug. 1572

According to Sully, 70,000 Huguenots, or French Protestants, including women and children, were murdered throughout the kingdom by secret orders from Charles IX., at the instigation of his mother, the queen dowager, Catherine de Medicis.

La Popelinière calculates the victims at 20,000; Adriani, De Serres, and De Thou say 30,000; Davila states them at 40,000, and Pérefixe makes the number 100,000. Above 500 persons of rank, and 10,000 of inferior condition, perished in Paris alone, besides those slaughtered in the provinces. Pope Gregory XIII. ordered a *Te Deum* to be performed, with other rejoicings.

BARTHOLOMEW, ST., a West Indian island, held by Sweden. It was colonised by the French in 1648; and has been several times taken and restored by the British. It was ceded to Sweden by France in 1785; captured by the English and restored, 1801; ceded to France, 1877.

Treaties of peace between France, Spain, and Prussia were concluded here in 1795. It was made a free imperial city 1392, but joined the Swiss confederation 1501. Pop. 1901, 111,009. BASQUE PROVINCES, N. W. Spain (Biscay, Guipuscoa, and Alava). The Basques are

considered by some to be descendants of the ancient Iberi, were termed Vascones by the Romans, whom they successfully resisted. They were subdued with great difficulty by the Goths about 580, and were united to Castile in the 13th and 14th centuries. The origin of the Basque language, like its ethnology, is very obscure; it is polysynthetic, and no connection between it and any other language has yet been determined.

BASQUE ROADS (W. France). Fourteen French ships of the line, riding at anchor here, were attacked by lords Gambier and Cochrane (the latter commanding the fireships), and all were destroyed, 11—29 April, 1809. BASS'S STRAIT, **AUSTRALIA**. Mr. Bass, surgeon of the *Reliance*, in an open boat from Port Jackson, in 1796, penetrated as far as Western Port, and affirmed that a strait existed between New South Wales and Van Diemen's Land. Lieutenant Flinders circumnavigated Van Diemen's Land, and named the strait after Mr. Bass, 1798-9.

BASTARD, a child not born in lawful wedlock. An attempt in England, in 1236, to legitimate bastard children by the subsequent marriage of the parents, failed. Women concealing their children's birth deemed guilty of murder, 21 James I., 1624. In Scotland bastard children could not dispose of their movable estates by will until 1836. On 14-15 July, 1789, the Bastille was pulled down by the populace; the governor and other officers were conducted to the Place de Grève; their hands and heads were cut off, and the heads carried on pikes through the streets. incomplete, and received the name of the "Short-lived" administration. The members of it were: the earl of Bath, *first lord of the treasury*; lord Carlisle, *lord privy seal*; lord Winchelsea, *first lord of the admiralty*; and lord Granville, one of the secretaries of state, with the seals of the other in his pocket, "to be given to whom he might choose." Mr. Pelham and his colleagues returned to power.

BATH, ORDER OF THE, said to be of early origin, but formally constituted 11 Oct., 1399, by Henry IV., two days previous to his coronation in the Tower, when he conferred the order upon forty-six esquires, who had watched the night before, and bathed. After the coronation of Charles II. the order was neglected until 18 May, 1725, when it was revived by George I., who fixed the number of knights at 37.

BATHOMETER (Greek, *bathus*, deep), an apparatus invented by Dr. C. William Siemens to measure the depth of water without submerging a sounding-line, 1861-76.

Its action depends on the diminution of the effect of gravitation on the surface of the water as compared with its effect on the earth, owing to the mass of water (of less density) which replaces earth (of greater density): which is duly registered.

BATHS were early used in Asia and Greece, and introduced by Agrippa into Rome, where many were constructed by Augustus and his successors. The thermæ of the Romans and gymnasia of the Greeks (of which baths formed merely an appendage) were sumptuous. The marble group of Laocœon was found in 1506 in the baths of Titus, erected about 80, and the Farnese Hercules in those of Caracalla, erected 211.

It was dedicated to St. Martin, and given to Benedictine monks, who were to pray for the souls of the slain. The original name of the plain was *Hetheland*; see *Hastings*. After the battle of Hastings, a list was taken of William's chiefs, amounting to 629, and called the "BATTLE-ROLL;" and among these chiefs the lands and titles of the followers of the defeated Harold were distributed. "The Roll of Battle Abbey," edited by the duchess of Cleveland, was published, with notes, &c., in 1889. BATTLES. Palamedes of Argos is mythically said to have been the first who ranged an army in a regular line of battle, placed sentinels round a camp, and excited the soldier's vigilance by giving him a watchword, and to have been treacherously slain by the Greeks before Troy. The following are the most memorable battles, arranged in chronological order; further details of the greater part are given in separate articles; *n.* signifies *naval*.

BAYEUX TAPESTRY, mythically said to have been wrought by Matilda, queen of William I., or to have been made under the direction of his brother Odo, bishop of Bayeux. It is 19 inches wide, 214 feet long, and is divided into compartments showing the events from the visit of Harold to the Norman court to his death at Hastings; it is now preserved in the public library of Bayeux near Caen. A copy, drawn by C. Stothard, and coloured after the original, was published by the Society of Antiquaries in 1821-3. Reproduced by autotype process by F. R. Powke, with notes, 1875; new edition 1889.

BAYONET, the short dagger fixed at the end of fire-arms, said to have been invented at Bayonne, in France, about 1647, 1670, or 1690. It was used at Killiecrankie in 1689, and at Marsaglia by the French, in 1693, “with great success, against the enemy unprepared for the encounter with so formidable a novelty.” The ring-bayonet was adopted by the British, 24 Sept. 1693.

New pattern of bayonets adopted in 1876; asserted to be defective in the Soudan campaign 1884-5. Strict examination ordered 1885. See under *Arms*.

BAYONNE (S. France), an ancient city. It was held by the English from 1295 till it was taken by Charles VII. The queens of Spain and France met the cruel duke of Alva here, June, 1556, it is supposed to arrange the massacre of St. Bartholomew. Charles IV. of Spain abdicated here in favour of “his friend and ally” the emperor Napoleon, 4 May, and his sons, Ferdinand prince of Asturias, don Carlos, and don Antonio renounced their rights to the Spanish throne, 6 May, 1808. In the neighbourhood of Bayonne was much desperate fighting between the French and British armies, 9-13 Dec. 1813. Bayonne was invested by the British, 14 Jan. 1814; on 14 April, the French

* The abdication of Charles-Louis was mainly caused by his attachment to an intriguing woman, known throughout Europe by the assumed name of Lola Montes, who, in the end, was expelled the kingdom for her interference in state affairs, and afterwards led a wandering life. She delivered lectures in London, in 1859; thence proceeded to the United States; and died at New York, 17 Jan. 1861.

made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and lieutenant-general John Hope was wounded and taken prisoner.—A Franco-Spanish industrial and fine arts exhibition was opened at Bayonne in July, 1864.

BAYREUTH (N. Germany), a margraviate, held formerly by a branch of the Brandenburg family, was with that of Anspach abdicated by the reigning prince in favour of the king of Prussia, 1790. The archives were brought (in 1783) from Plassenburg to the city of Bayreuth, which was incorporated with Bavaria by Napoleon in 1806. BAZAAR, or covered market, a word of Arabic origin. The magnificent bazaar of Ispahan was excelled by that of Tauris, which has held 30,000 men in order of battle. In London the Soho-square bazaar was opened by Mr. Trotter in 1816 to relieve the relatives of persons killed in the war, offered for sale 1879, closed shortly afterwards. The Queen's bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000*l.*, 27 May, 1829. It was rebuilt, and converted into the Princess's Theatre, opened 30 Sept. 1841. The St. James's bazaar (built by Mr. Crookford) in 1832. BAZEILLES, a village in the Ardennes, N.E. France. During the dreadful battle of Sedan, 1 Sept. 1870, Bazailles was burnt by the Bavarians, and atrocious outrages were said to have been committed. Of nearly 2000 inhabitants it was asserted scarcely fifty remained alive, and these indignantly denied having given provocation. Much controversy ensued, and in July, 1871, gen. Von der Tann asserted correctly that the number of deaths had been grossly exaggerated, that there had been much provocation, and denied the alleged cruelties.

BAZOCHE-DES-HAUTES, near Orleans, central France. Here a part of the army of the Loire, under gen. D'Aurelle de Paladines, was defeated after a severe action, by the Germans under the grand-duke of Mecklenburg, 2 Dec. 1870. See *Orleans*.

BEACONS, see *Lighthouses, Jubilee*, 1887.

BEACONSFIELD ADMINISTRATION, see *Disraeli and People's Tribute*.

BEADS were early used in the east for reckoning prayers. St. Augustin mentions them 366. About 1090, Peter the Hermit is said to have made a series of 55 beads. To Dominic de Guzman is ascribed the invention of the Rosary (a series of 15 large and 150 small beads), in honour of the Blessed Virgin, about 1202. Beads soon after were in general use. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited. Beads have been found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. 1309. *Stow*. Beams and scales, with weights and measures, were ordered to be examined by the justices at quarter sessions, 35 Geo. III. 1794; see *Weights and Measures*.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The finer kinds of beans were brought here with other vegetables, in Henry VIII.'s reign.

BEAR-BAITING, an ancient popular English sport, prohibited by parliament in 1835.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews, who were forbidden to mar their beards, 1490 B.C. *Lev.* xix. 27. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards till the time of Alexander, who ordered the Macedonians to be shaved, lest the beard should give a handle to their enemies, 330 B.C. Beards were worn by the Romans, 390 B.C. The emperor Julian wrote a diatribe (entitled "*Misopogon*") against wearing beards, A.D. 362.—In England, they were not fashionable after the conquest, 1066, until the 13th century, and were discontinued at the Restoration. Peter the Great enjoined the Russians, even of rank, to shave, but was obliged to keep officers on foot to cut off the beard by force. Since 1851 the custom of wearing the beard gradually increased in Great Britain.

BEARER COMPANY, introduced in the British army 1873 for the removal of the wounded from the battle-field and to render first aid. On active service half a company is attached to each army corps.

* A bearded woman was taken by the Russians at the battle of Pultowa, and presented to the Czar, Peter I., 1724: her beard measured 1½ yard. A woman is said to have been seen at Paris with a bushy beard, and her whole body covered with hair. *Diét. de Trévoux*. The great Margaret, governess of the Netherlands, had a very long stiff beard. In Bavaria, in the time of Wolinus, a virgin had a long black beard. *Mlle. Bois de Chêne*, born at Geneva (it was said) in 1834, was exhibited in London, in 1852-3, when, consequently, eighteen years of age: she had a profuse heat of hair, a strong black beard, large whiskers, and thick hair on her arms and down from her neck on her back, and masculine features.

and Gascons, and became a hereditary viscounty in 819, under Centule I., son of Loup, duke of Gascony. From his family it passed to the houses—of Gabaret, 1134; of Moncade, 1170; of Foix, 1290; and of Bourbon, 1550. Its annexation to France was decreed by Henry IV., 1594; affirmed by Louis XIII., 1620.

By the munificence of the Drapers' Company, the Royal Family, the duke of Westminster, and many others, the fund in June, 1886, amounted to 75,000. The trustees proposed the erection of a "People's Palace," to include a public library and reading rooms, technical schools, summer and winter gardens, a concert hall, swimming baths and gymnasia. BECKET'S MURDER.* Thomas Becket, archbishop of Canterbury, was murdered at the altar, 29 Dec. 1170. The king was absolved of guilty knowledge of the crime in 1172, and did penance at the tomb in 1174. The bones of Becket were enshrined in gold and jewels in 1220. They were ordered to be burned in the reign of Henry VIII. 24 April, 1538. A stone coffin, supposed by some persons to contain Becket's bones (?), discovered in a crypt at Canterbury cathedral, Jan. 1838. The Merchant Adventurers were at one time termed "the Brotherhood of St. Thomas à Becket." A Roman catholic church at Canterbury, dedicated to him, was opened by cardinal Manning, 13 April, 1875.

BED. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. An air-cushion is said to have been used by Helio-gabalus, 218-222; *air-beds* were in use in the 16th century. Feather-beds were in use in England in the reign of Henry VIII. The bedsteads of the Egyptians and later Greeks, like modern couches, became common among the Roman upper classes.

The ancient great bed at Ware, Herts, capable of holding twelve persons, is of the 16th cent. Referred to in Shakespeare's *Twelfth Night*.

A bedstead of gold was presented to the queen on 2 Nov. 1859, by the Maharajah of Cashmere.

Air-beds and water-beds have been made since the manufacture of india-rubber cloth by Clark in 1813; and by Macintosh in 1823.

Dr. Arnott's hydrostatic bed invented in 1830.

BED OF JUSTICE, a French court presided over by the king, whose seat was termed a "bed."

* Thomas Becket was born in 1119. His father Gilbert was a London trader, and his mother is stated to have been a convert from Mahometanism. He was educated at Oxford, and made archdeacon by Theobald, archbishop of Canterbury, who introduced him to the king, Henry II. He became chancellor in 1155, but on being elected archbishop of Canterbury in 1162, he resigned the chancellorship, to the great offence of the king. He opposed strenuously the constitutions of Clarendon in 1164, and fled the country; and in 1166, excommunicated all the clergy who agreed to abide by them. He and the king met at Fretville, in Touraine, on 22 July, 1170, and were formally reconciled. On his return he re-commenced his struggle with the king, which led to his tragical death, after which he was canonized.

It controlled the ordinances of the parliament. The last was held by Louis XVI. at Versailles, 19 Nov. 1787, to raise a loan.

BEEF-EATERS, see *Battle-axe*.

"**BEEF STEAKS**, the Sublime Society of," was established in 1735 by Rich, an actor at Covent Garden Theatre, in the painting-room of which the members dined upon beef-steaks. The society became fashionable, and long included among its members the prince of Wales, royal dukes, and other eminent persons, who submitted to its somewhat ludicrous regulations. It became extinct in 1867, its last place of meeting being a room in the Lyceum theatre. Its history was published by Brother Arnold in 1871.

BEEHIVE HOUSES, are primitive dwellings of an unknown antiquity found in Scotland and Ireland. They are constructed with undressed stones and without mortar, conical in shape, with a hole at the top of the roof.

BEER. The manufacture of beer and intoxicating liquors of kindred nature is of very high antiquity. A kind of beer was brewed from barley by the Egyptians as early as 3000 B.C. Herodotus ascribes its invention to the goddess Isis, and Xenophon refers to the use of beer in Armenia. Pliny mentions an intoxicating liquor made of corn and water in common use among the peoples of Western Europe, including the Gauls. Mead and cider were chiefly drunk in Britain prior to the Roman invasion. In the 8th cent. ale booths were subject to legal regulations. Beer is manufactured in a primitive manner from millet by native tribes in Africa, and from maize by the

Indians of South America. There are numerous varieties of beer (including ale) consumed in Britain, known as "pale ale," "bitter beer," "mild ale," &c., the most celebrated of the mild ales being those manufactured at Burton-on-Trent. Porter and stout, dark-coloured varieties of beer, are produced chiefly in London and Dublin. "Lager beer," a German beer, which in recent years has come into use in this country, is also manufactured in England and in America. The annual consumption of beer in gallons per head in the various countries of Europe and in the United States and Canada is shown as under:—Belgium, 36'00; United Kingdom, 26'27; Germany, 20'00; United States, 14'14; Denmark, 11'65; Holland, 8'46; Austria-Hungary, 7'10; Norway, 6'36; Switzerland, 5'37; France, 5'21; Sweden, 4'20; Canada, 3'17; Russia, 0'84; Italy, 0'18. — *Chambers*. Condensed beer patented by P. E. Lockwood, 1875. Condensed wort patented by Hermann Mertens, of Margate, in 1853. Beer and ale exported from the United Kingdom: 1876, 484,919 barrels; 1880, 412,192; 1884, 437,241; 1888, 447,940; 1890, 503,221; 1900, 510,843. Excise duty on beer (1893) 6s. 3d. per barrel; addition of 6d. June, 1894; raised to 1s. April, 1900. Beer, for purposes of taxation, is defined by the inland revenue acts of 1880 and 1885. Adulteration, or addition of anything except finings for clarification, or even the mixing of small beer with strong beer, incurs a fine of 50s. and forfeiture of the beer. In the case of a beer-seller conviction of adulteration is registered and may be endorsed on his licence; see *Ale, Brewers, Porter, Victuallers, Arsenic*.

BEES. Mount Hybla, on account of its odorous flowers, thyme, and abundance of honey, has been poetically called the "empire of bees." Hy-mettus, in Attica, was also famous for its bees and honey. The economy of bees was admired in the earliest ages; and Eumelus, of Corinth, wrote a poem on bees, 741 B.C. Bees were introduced into Boston, New England, in 1670, and have since spread over the continent. Mandeville's satirical "Fable of the Bees" appeared in 1723. Huber published his observations on bees in 1792. The Apian Society had an establishment at Muswell Hill, near London (1860-2). The Ligurian variety of the honey-bee was successfully introduced into England in 1860.

A British Beekeepers' Association founded 16 May (sir John Lubbock became first president); first exhibition, in Crystal Palace, 8 Sept. 1874; at other places since. *Spelling bees*, of American origin, introduced into London in autumn of 1875; first at Holloway. Geographical, musical, and other bees began early in 1876. Mr. F. R. Cheshire's "Bees and Beekeeping" published in 1886-8. Maeterlinck. "Life of the Bee," trans. by A. Sutro. May, 1901.

BEES, ST. Cumberland. A monastery was founded here by St. Bega, 650; a grammar school by abp. Grindal, 1583; a clerical training college by bp. Law, 1817.

BEET-ROOT is extensively grown in England. *Beta vulgaris*, red beet, is used for the table as a salad. Margraff first produced sugar from the white beet-root in 1747. M. Achard produced excellent sugar from it in 1799; and the chemists of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. More than half the sugar consumed in France is now manufactured in that country from beet. It is also largely manufactured in other countries, especially in Germany. A refinery of sugar from beet-root

has been erected at the Thames bank, Chelsea. The cultivation of beet-root in England and Ireland much advocated, 1871, and again, in 1884, when great improvements were proposed, especially at Lavenham, Suffolk, by Messrs. Bolton, of Westminster.

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. In 1388, 1539, 1535, 1547-50 severe laws were passed against them. By 14 Eliz., c. 5, 1572, sturdy beggars were ordered to be "grievously whipped and burnt through the right ear;" punished capitally for the third offence: acts consolidated 1731. By the Vagrant Act (1824), 5 Geo. IV. c. 83, all public beggars are liable to a month's imprisonment. About 30,000 tramps in England and Wales. *Judicial Statistics*, 1805. See *Poor Laws, Mendicancy Society, and Vagrants*. The "BEGGAR'S OPERA," by John Gay, a satire against the government of sir Robert Walpole, was produced at the Lincoln's-inn-fields theatre, 29 Jan. 1727-8, and had a run of 63 nights; see *Gueux*.

BEGUINES, a congregation of nuns first established at Liège, and afterwards at Nivelles, in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive. Some of these nuns imagined that they could become sinless. The council of Vienne condemned this error, and abolished a branch of the order in 1311. They still exist in Germany and Belgium, acting as nurses to the sick and wounded, &c.

BEHEADING, the *Decollatio* of the Romans, introduced into England from Normandy (as a less ignominious mode of putting high criminals to death), by William the Conqueror, 1076, when Waltheof, earl of Huntingdon, Northampton, and Northumberland, was first so executed. Since then this mode of execution became frequent, particularly in the reigns of Henry VIII., Mary, and Elizabeth, when even women of the noblest blood thus perished; the aged countess of Salisbury, 27 May, 1541; lady Jane Grey, 12 Feb. 1554.

BEHISTUN, in Persia. At this place is a rock containing important inscriptions of Darius Hystaspes about 518 B.C., in three languages, in cuneiform (or wedge-shaped) characters, which were deciphered and translated by sir H. Rawlinson in 1844-6, and published in the *Journal of the Royal Asiatic Society*.

BEHRING'S STRAIT, discovered by captain Vitus Behring, a Danish navigator in the service of Russia. He thus proved that the continents of Asia and America are distant from each other about thirty-nine miles, 1728. He died at Behring's island in 1741. In 1778 captain James Cook surveyed the coasts of both continents. See *United States*, 1889-91.

The czar Alexander I., in 1821, declared the Behring seas closed to foreign fishing; this was at once repudiated by Mr. J. Quincy Adams, secretary of the United States. Alaska was purchased in 1867 from Russia, by the States, who afterwards assumed the Russian claim upon the seas, and seized the British Columbia's sealing vessels. The seizure of the *Black Diamond* sloop by the U.S. revenue cutter *Rush*, 3 July, was declared legal by Mr. Secretary Blaine, U.S., 1 Aug. 1889; while the British government claimed, as heretofore, the right of fishing in waters beyond the territorial limits. The governments agreed to refer the question to arbitration, Feb. 1890. President Harrison proclaimed the Behring sea closed to unlicensed seal fishing, 25 March. A Blue Book was published, 15 Aug., containing the correspondence between the two governments from 1 Sept. 1886, to

2 Aug. 1890. The marquis of Salisbury demanded that, pending arbitration, British sealing vessels should not be molested, adding that if so, they should be protected, 2 Aug. 1890.

BELGRADE, capital of Servia, a city on the right bank of the Danube. It was taken from the Greek emperor by Solomon, king of Hungary, in 1072; gallantly defended by John Huniades against the Turks, under Mahomet II., July to Sept. 1456, when the latter was defeated, with the loss of 40,000 men. Belgrade was taken by sultan Solymán, Aug. 1521, and retaken by the Imperialists in 1688, from whom it was again taken by the Turks, 1690. It was besieged in May, 1716, by prince Eugene. In that year the Turkish army, 200,000 strong, approached to relieve it, and on 5 Aug. a sanguinary battle was fought at Peterwardein, in which the Turks lost 20,000 men. Eugene defeated the Turks here, 16 Aug. 1717, and Belgrade surrendered 18 Aug. In 1739 it was ceded to the Turks, after its fine fortifications had been demolished. It was retaken in 1789, and restored at the peace of Reichenbach, in 1790. The Servian insurgents had possession of it, 1806-13. In 1815 it was placed under prince Milosch, subject to Turkey. The fortifications were restored in 1820. On 19 June, 1862, the Turkish pasha was dismissed for firing on the town during a riot. The university was established by private munificence, 1863. The fortress was surrendered by the Turks to the Servians, 18 April, 1867. The independence of Servia proclaimed here, 22 Aug. 1878. Fatal rioting 5 April, 1903. Revolt by officers of the army, king Alexander I. and queen Draga murdered in their palace between 12 and 2 a.m., 10 June, 1903. Ministers, guards and officers loyal to the king, with the two brothers of the queen, also killed. Prince Peter Karageorgevich made king. He swore fealty to the constitution at Belgrade 25 June. The leading assassins promoted in rank July, 1903. Population in 1890, 54,458; 1901, 72,000. See *Servia*.

BELLOWS. Anacharsis, the Seythian, is said to have been the inventor of them, about 569 B.C.; and to him is ascribed the invention of tinder, the potter's wheel, anchors for ships, &c. priest, at the proper hours, to sound the bells of his church. Bells were used in churches by order of pope John IX., about 900, as a defence, by ringing them, against thunder and lightning. Bells are mythically said to have been cast by Turketul, abbot of England, about 941. The celebrated "Song of the Bell," by Schiller (died 1805), has been frequently translated. The following list is that given by Mr. E. Beckett-Denison (afterwards Lord Grimthorpe) in his discourse on bells at the Royal Institution, 6 March, 1857. The lecture of the Rev. H. R. Haweis, at the same place, 7 Feb., 1879, was well illustrated. See *Imperial Institute*.

It is rather different in shape from its predecessor, "Big Ben," and about 2 tons lighter. Its diameter is 9 ft. 6 in.; and the height 7 ft. 10 in. It was struck for the first time, 18 Nov. 1858. The clapper weighs 6 cwt.—half that of the former bell. The note of the bell is 1*c* natural; the quarter-bells being G, B, E, F. On 1 Oct. 1859, this bell was also found to be cracked.

§ The clapper of St. Paul's bell weighs 180 lbs.; the diameter of the bell is 10 feet (Mr. Walesey says 6 ft. 9½ in.), and its thickness 10 in. The hour strikes upon this bell, the quarters upon two smaller ones; see *Clocks*.

¶ Height, 8 feet 10 in.; diameter, 9 feet 6½ in.; note 1*c*; materials tin and copper; cost about 3000*l*.; cast by Mr. Taylor, at Loughborough; raised to its place 31 May, dedicated 3 June, 1882.

Fabian Stedman, about 1650, invented a system known as "Stedman's principle." Benjamin Anable soon after invented "Grandsire Triples." 720 changes can be rung in an hour upon 12 bells; 479,001,600 changes rung upon them, require 75 years, 10 months, and 10 days.

Neil Gwynne left the ringers of the bells of St. Martin's-in-the-fields money for a weekly entertainment, 1687, and many others have done the same.

A central council of Church Bell Ringers, representing many societies, was established at the Inns of Court hotel, London, 10 April, 1890.

CARILLONS, a collection of bells, arranged in two or three chromatic scales, played by pedals or keyboards, or by machinery. The first set is said to have been made at Alost in Flanders, in 1487, and that country and Holland are renowned for carillons. Matthias vanden Gheyn was an eminent maker (1721-85). Excellent carillon machines are now made by Messrs. Gillett, Bland & Co., Croydon. One at Manchester was started 1 Jan. 1879. It plays 35 tunes on 20 bells.

BENARES, in India, a holy city of the Hindoos, abounding in temples. It was ceded by the nabob of Oude, Asoph-ud-Dowlah, to the English in 1775. An insurrection took place here, which had nearly proved fatal to the British interests in Hindostan, 1781. The rajah, Cheyt Sing, was deposed in consequence of it, in 1783. Mr. Cherry, capt. Conway, and others, were assassinated at Benares, by vizier Aly, 14 Jan. 1799. In June, 1857, col. Neil succeeded in suppressing attempts of the native infantry to join the mutiny; see

New water-works: foundation laid by prince Albert Victor, Jan. 1890; opposed by the Brahmims as interfering with the sacred waters and temples; serious riots, with destruction of property, suppressed by the military, 16, 17 April, 1891; peace restored by a compromise.

BENBURB, near Armagh (N. Ireland). Here O'Neill totally defeated the English under Monroe, 5 June, 1646. Moore says that it was "the only great victory since the days of Brian Boru, achieved by an Irish chieftain in the cause of Ireland."

BENCOOLEN (Sumatra). The English East India company made a settlement here which preserved to them the pepper trade after the Dutch had dispossessed them of Bantam, 1682. *Anderson*. York fort was erected by the East India company, 1690. In 1693 a dreadful mortality raged here, occasioned by the town being built on a pestilent morass; among others the governor and council perished. The French, under count D'Estaing, destroyed the English settlement, 1760. Bencoolen was reduced to a residency under the government of Bengal, in 1801, and was ceded to the Dutch, in 1824, in exchange for their possessions in Malacca; see *India*.

BENDER, Bessarabia, European Russia. Near it was the asylum of Charles XII. of Sweden, after his defeat at Pultowa by the czar Peter the Great, 8 July, 1709. The peace of Bender was concluded in 1711. Bender was taken by storm, by the Russians, 28 Sept. 1770; was taken by Potemkin in 1789, and again in 1809. It was restored at the peace of Jassy, but retained at the peace of 1812.

BENEDICTINES, an order of monks founded by St. Benedict (lived 480-543), who introduced the monastic life into Western Europe, in 529, when he founded the monastery on Monte Casino in Campania, and eleven others afterwards. His *Regula Monachorum* (rule of the monks) soon became the common rule of western monachism. No religious order has been so remarkable for extent, wealth, and men of note and learning, as the Benedictine. Among its branches the chief were the Cluniacs, founded in 912; the Cistercians, founded in 1098, and reformed by St. Bernard, abbot of Clairvaux, in 1116; and the Carthusians, from the Chartreux (hence Charter-house), founded by Bruno about 1080. The Benedictine order was introduced into England by Augustin, in 596; and William I. built an abbey for it on the plain where the battle of Hastings was fought, 1066; see *Battle-Abbey*. William de Warrenne, earl of Warrenne, built a convent at Lewes, in Sussex, in 1077. Of this order it is reckoned that there have been 40 popes, 200 cardinals, 50 patriarchs, 116 archbishops, 4600 bishops, 4 emperors, 12 empresses, 46 kings, 41 queens, and 3600 saints. Their founder was canonised. *Baronius*. The Benedictines have taken little part in politics, but have produced many valuable literary works. The congregation of St. Maur published the celebrated "L'Art de Vérifier les Dates," in 1750, and edited many ancient authors.

The Benedictines with other orders were expelled from France by decree 29 March, 1830
The 14th century of the birth of St. Benedict was kept at Monte Casino and other places April, ..

BENEFICE (literally a good deed or favour), or FIEF. Clerical benefices originated in the 12th century, when the priesthood began to imitate the feudal lay system of holding lands for performing certain duties: till then the priests were supported by alms and oblations at mass. Vicarages, rectories,

perpetual curacies, and chaplaincies, are termed benefices, in contradistinction to dignities, such as bishoprics, &c. A rector is entitled to all the tithes; a vicar, to a small part or to none.—All benefices that should become vacant in the space of six months, were given by pope Clement VII. to his nephew, in 1534. *Notitia Monastica*. Union of Benefices (Metropolis) Act was passed in 1860; amended, 6 Aug. 1900. An act for the augmentation of poor benefices by the sale of some or those in the presentation of the lord chancellor, was passed in 1863, and an act respecting the sequestration of benefices and their union passed, 1871. See *Patronage*.

BENEVENTUM (now Benevento), an ancient city in South Italy, said to have been founded by Diomedes the Greek, after the fall of Troy. Pyrrhus of Macedon, during his invasion of Italy, was totally defeated near Beneventum, 275 B.C. Near it was erected the triumphal arch of Trajan, A.D. 114. Benevento was formed into a duchy by the Lombards, 571. At a battle fought here, 26 Feb. 1266, Manfred, king of Sicily, was defeated and slain by Charles of Anjou, who thus became virtually master of Italy. The castle was built 1323; the town was nearly destroyed by an earthquake, 1688, when the archbishop, afterwards pope Benedict XIII., was dug out of the ruins alive, and contributed to its subsequent rebuilding, 1703. It was seized by the king of Naples, but restored to the pope on the suppression of the Jesuits, 1773. Talleyrand de Périgord, Bonaparte's arch-chancellor, was made prince of Benevento, 1806. Benevento was taken by the French, 1798, and restored to the pope in 1815.

BENEVOLENCES (Aids, Free Gifts, actually Forced Loans) appear to have been claimed by our Anglo-Saxon sovereigns. Special ones were levied by Edward IV., 1473, by Richard III., 1485 (although a statute forbidding them was enacted in 1484), by Henry VII., 1492; and by James I., in 1613, on occasion of the marriage of the princess Elizabeth with Frederick, the elector palatine, afterwards king of Bohemia. In 1615 Oliver St. John, M.P., was fined 5000*l.*, and chief justice Coke disgraced, for severely censuring such modes of raising money. Benevolences were declared illegal by the bill of rights, Feb. 1689.

Mansfield in coal tar (1848), the latter of whom unfortunately died in consequence of being severely burnt while experimenting on it (26 Feb. 1855). Benzole has become useful in the arts. † The division of the Bible into *chapters* has been ascribed to archbishop Lanfranc in the 11th, and to archbishop Langton in the 13th century; but T. Hartwell Horne considers the real author to have been cardinal Hugo de Sancto Caro, about the middle of the 13th century. The division into sections was commenced by Rabbi Nathan (author of a Concordance), about 1445, and completed by Athras, a Jew, in 1661. The present division into *verses* was introduced by the celebrated printer, Robert Stephens, in his Greek Testament (1551) and in his Latin Bible (1556-7).

‡ Fragments of portions of this book, on leather, asserted to have been written about the 8th century B.C., obtained from Arabs in Jerusalem by M. Shapira, were exhibited in the British Museum, Aug. 1883, and after a critical examination by Dr. Ginsburg and others, declared to be forged. M. Shapira, probably insane, committed suicide at Rotterdam, 9 March, 1884. The most ancient copy of the Hebrew Scriptures existed at Toledo, called the Codex of Hillel; it was of very early date, probably of the 4th century after Christ; some say about 60 years before Christ. The copy of Ben Asher, of Jerusalem, was made about 1100.

The reputed oldest copy of the Old and New Testament in Greek, is that in the Vatican, which was written in the 4th or 5th century. Mai's edition appeared in 1857. The next in age is the *Alexandrian Codex* (referred to the 5th century) in the British Museum, presented by the Greek patriarch to Charles I. in 1628. It has been printed in England, edited by Woide and Baber, 1786—1821.—*Codex Ephraemi*, or *Codex Regius*, ascribed to the 5th century, in the Royal Library, Paris; published by Tischendorf in 1843.

The *Codex Sinaiticus*, probably written in the 4th century, was discovered by M. Constantine Tischendorf, at St. Katherine's monastery in 1844 and 1859, and presented to the czar of Russia, at whose cost a splendid edition was published in 1862.

The Hebrew Psalter was printed at Bologna in 1477. The complete Hebrew Bible was first printed by Socino in Italy in 1488, and the Greek Testament (edited by Erasmus) at Rotterdam, in 1516. Aldus's edition was printed in 1518; Stephens' in 1546; and the *textus receptus* (or received text) by the Elzevirs in 1624.

TRANSLATIONS.

The Old Testament, in Greek, termed the Septuagint (*which see*), generally considered to have been made by order of Ptolemy Philadelphus, king of Egypt, about 286 or 285 B.C.; of this many fabulous accounts are given.

Origen, after spending twenty-eight years in collating MSS., commenced his *polyglot* Bible at Caesarea in A.D. 231; it contained the Greek versions of Aquila, Symmachus, and Theodotion, all made in or about the 2nd century after Christ.

The following are ancient versions:—*Syriac*, 1st or 2nd century; the old *Latin* version, early in the 2nd century, revised by Jerome, in 384; who, however, completed a new version in 405, now called the *VULGATE* (*which see*); the first edition was printed (without date) about 1456; the first dated 1462;—*Coptic*, 2nd or 3rd century; *Ethiopic*; *Armenian*, 4th or 5th century; *Slavonic*, 6th century; and the *Meso-Gothic*, by Ulfilas, the apostle of the Goths, about 360, a manuscript copy

of which, called the Codex Argenteus, is at Upsal. The Psalms were translated into *Saxon* by bishop Aldhelm, about 706; Cædmon's metrical paraphrase of a portion of the Bible, about 680; and the Gospels by bishop Egbert, about 721: parts of the Bible by Bede, in the 8th century.

BILLIARDS (Old French *billard*, "a stick with a curved end"). The French ascribe the invention to Henrique Devigne, an artist, about 1571; the game was mentioned by Spenser about 1591, and by Shakspeare, 1607. It was described by Cotton in his "Compleat Gamester," 1674. Slate billiard tables were introduced in England in 1827; other changes since. From 1885 to 1898 J. Roberts, junr., held undisputed claim to the title of champion, when in the last-named year he was challenged by C. Dawson, the match taking place under the new rules regulating the "spot stroke" and "push stroke." the width of the pockets, and the distance of the billiard spot from the top cushion. The new rules, framed by the Billiard Association, came into force 1 Oct. 1898. A match of 18,000 up was played Mar.—April, 1899, between Roberts and Dawson, the former winning by 1,814 points.

BILLINGSGATE, the fish-market in London, is said to have derived its name from Belinus Magnus, a British prince, the father of King Lud, 400 B.C., but Stow thinks from a former owner. It was the old port of London, and the customs were paid here under Ethelred II., A.D. 979. *Stow*. Billingsgate was made a free market, 1699. *Chamberlain*. Fish by land-carriage, as well as sea-borne, now arrives daily here. In 1849, the market was extended and improved, and a new one was erected in 1852, Mr. Bunning, architect. Another new one, erected by Horace Jones, founded 27 Oct. 1874; completed Sept. 1876; lit by electric light, 25 Nov. 1878. Billingsgate market was declared to be insufficient for the fish supply of the metropolis in the report of the commission appointed by the city corporation, presented to the common council, 11 Aug. 1881.

BILLS OF EXCHANGE were invented by the Jews as a means of removing their property from nations where they were persecuted, 1160. *Anderson*. Bills are said to have been used in England, 1307. The only legal mode of sending money from England, 4 Richard I. 1381. Regulated, 1698; first stamped, 1782; duly advanced, 1797; again, June 1801; and since. It was made capital to counterfeit bills of exchange in 1734. In 1825, the year of disastrous speculations in bubbles, it was computed that there were 400 millions of pounds sterling represented by bills of exchange and promissory notes. The present amount is not supposed to exceed 50 millions. The many statutes regarding bills of exchange were consolidated by act 9 Geo. IV. 1828. An act regulating bills of exchange passed 3 Vict. July, 1839. Great alterations were made in the law on the subject by 17 & 18 Vict. c. 83 (1854), and 18 & 19 Vict. c. 67 (1855). Days of grace were abolished in the case of bills of exchange payable on sight in Aug. 1871. Forgery of bills to obtain discount was detected by the bank of England, 28 Febr., after 102,217l. had been paid. The culprits (Americans) were tried and condemned to penal servitude for life, 26 Aug. 1873. See *Trials*, Aug. 1873.

A Bills of Exchange Act, declaring the law relating to acceptance, passed 16 April, 1878; new Act passed 18 Aug. 1882.

BILLS OF MORTALITY FOR LONDON. These bills were first compiled by order of Cromwell, about 1538, 30 Hen. VIII., but in a more formal and recognised manner in 1603, after the great plague of that year. No complete series of them has been preserved. They have been superseded by the weekly returns of the registrar-general, since 1837. See *Public Health*. The following show the numbers for London at decennial periods:—

It was recommended for Germany in 1879, and was discussed at the *Monetary Conference* at Paris, April, 1881. The unrestricted coinage of silver was suspended in the countries termed the Latin Union in 1873.

The book of *Genesis* contains the biography of the patriarchs; and the Gospels that of Christ. Plutarch wrote the Lives of Illustrious Men; Cornelius Nepos, Lives of Military Commanders; and Suetonius, Lives of the Twelve Cæsars (all three in the first century after Christ); Diogenes Laërtius, Lives of the Philosophers (about 205).—Boswell's Life of Johnson (published in 1790) is the most remarkable English biography. Mr. John Wilson Croker's edition appeared in 1831. A magnificent edition, edited by Rev. Alex. Napier,

published by Messrs. Bell, Feb. 1884. An excellent edition by Dr. George Birkbeck Hill (Clarendon Press), published June, 1887.

BIRTHS. The births of children were taxed in England, viz.: birth of a duke, 30*l.*; of a common person, 2*s.*, 7 Will. III. 1695. Taxed again, 1783. The instances of four children at a birth are numerous; but it is recorded that a woman of Königsberg (3 Sept. 1784), and the wife of Nelson, a tailor, of Oxford-market, London (Oct. 1800), had five children at a birth. The queen usually presents a small sum of money to a poor woman giving

birth to three or more living children at one time. See *Bills of Mortality and Registers*.

BISHOP (Greek *episcopos*, overseer), a name given by the Athenians to those who had the inspection of the city. The Jews and Romans had also like officers. St. Peter, styled the first bishop of Rome, was martyred 65. The presbyter was the same as a bishop. *Jerome*. The episcopate became an object of contention about 144. The title of pope was anciently assumed by all bishops, and was exclusively claimed by Gregory VII. (1073-85).

BISHOPS IN ENGLAND* were coeval with the introduction of Christianity. The see of London is mythically said to have been founded by Lucius, king of Britain, 179. Restitutus, bishop of London, is said to have been present at the council of Arles, 314. The early dates given below are doubtful.

By this statute, of the four archbishoprics of Armagh, Dublin, Tuam, and Cashel, the last two were to be abolished on the decease of the then archbishops, which has since occurred; and it was enacted that eight of the then eighteen bishoprics should, as they became void, be henceforth united to other sees, which was accomplished in 1850; so that the Irish church at present consists of two archbishops and ten bishops.]

BISHOPS IN SCOTLAND were probably nominated in the fourth century.

The Reformers, styling themselves "the Congregation of the Lord," having taken up arms and defeated the queen-mother, Mary of Guise, called a parliament, which set up a new form of church polity on the Genevese model, in which bishops were replaced by "superintendents" 1563
Episcopacy restored by the regent Morton (see *Tulchan Bishops*) 1572-3
Three prelates for Scottish sees consecrated at Lambeth (John Spottiswood, Gavin Hamilton, and Andrew Lamb) for Glasgow, Galloway, and Brechin 21 Oct. 1610
Episcopacy abolished, the bishops in a body deposed, and four excommunicated, by a parliament, elected by the people (covenanters), which met at Glasgow Dec. 1638
Episcopacy restored; an archbishop (James Sharp) and three bishops consecrated by Sheldon, bishop of London 15 Dec. 1661
The Scottish convention expelled the bishops; abolished episcopacy; declared the throne vacant; drew up a claim of right; and proclaimed William and Mary 11 April, 1689
Episcopacy formally abolished, and the bishops' revenues sequestered 19 Sept. "
The Episcopal church was thus reduced to the condition of a Nonconformist body, at first barely tolerated. It opened its first congress, 19 May, 1874
Bishop Rose connected the established episcopal church of Scotland with that form of it which is now merely tolerated, he having been bishop of Edinburgh from 1687 till 1720, when, on his death, Dr. Fullarton became the first post-revolution bishop of that see. Fife (now St. Andrews, so called in 1844) now unites the bishopric of Dunkeld (re-instituted in 1727) and that of Dunblane (re-instituted in 1731). Ross (of uncertain date) was united to Moray (re-instituted in 1727) in 1838. Argyll and the Isles never existed independently until 1847, having been conjoined to Moray and Ross, or to Ross alone, previously to that year. Galloway has been added to the see of Glasgow.

Romanist Bishoprics revived by Pope Leo XIII. 4 March, 1878
Scotch Protestant bishops protest 13 April, "

BISHOPS, AMERICAN. The first was Samuel Seabury, consecrated bishop of Connecticut by four nonjuring prelates, at Aberdeen, in Scotland, 14 Nov. 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, 4 Feb. 1787, and the bishop of Virginia in 1790. Several American bishops formed part of the Pan-Anglican synod, at Lambeth, 24-27 Sept. 1867. The first R. C. bishop of the United States was Dr. Carroll, of Maryland, in 1780.

BISHOPS, COLONIAL, &c.* By 15 & 16 Vict. c. 52 (1852), and 16 & 17 Vict. c. 49 (1853),

* Between 1847-59, Miss (now baroness) Burdett Coutts gave 60,000*l.* to endow colonial bishoprics. In 1866 she petitioned parliament, on account of some of the bishops professing independence of the church of England. Since then, colonial bishops have been appointed without intervention of the civil power. Much discussion

* An order in council, Oct. 1838, directed the sees of Bangor and St. Asaph to be united on the next vacancy in either, and Manchester, a new see, to be created thereupon; this order, as regarded the union of the sees, was rescinded 1846.
† The sees of Bristol and Gloucester were united, 1836, separated. 1884. See *Bristol* 1884, *et seq.*

BISHOPS, SUFFRAGAN, to assist metropolitans, existed in the early church. Twenty-six, appointed by Henry VIII. 1534, were abolished by Mary, 1553, and restored by Elizabeth, 1558. The last appointed is said to have been Sterne, bishop of Colchester, 1606. The appointment of suffragan bishops was revived in 1869, and archdeacon Henry Mackenzie, suffragan bishop of Nottingham (diocese of Lincoln), was consecrated 2 Feb. 1870, and archdeacon Edward Parry, suffragan bishop of Dover (diocese of Canterbury), 23 March, 1870. Others have been appointed since; there were 9 in 1889; 16 in 1892; 24 suffragans in 1903. See *Suffragan*.

BISLEY COMMON, Surrey, see *Volunteers*, 1889.

BISMUTH was recognised as a distinct metal by Agricola, in 1529. It is very fusible and brittle, and of a yellowish white colour.

* Transferred to the American Church, Jan. 1902.

BITHYNIA, an ancient province in Asia Minor, is said to have been invaded by Thracian tribes, some named Bithyni, who gave it the name of Bithynia. It was subject successively to the Assyrians, Lydians, Persians, and Macedonians. Most of the cities were rebuilt by Grecian colonists.

A book doubtfully said to have been kept in monasteries, wherein details of the enormities practised in religious houses were entered for the inspection of visitors, under Hen. VIII. 1535. The title *Black Book* was given to a list of Habitual Criminals, 1869-76; published by lieutenant-col. Du Cane of Brixton, March, 1877.

BLACKBURN, Lancashire, so called in Domesday-book. The manufacture of a cloth called Blackburn cheque, carried on in 1650, was superseded by Blackburn greys. In 1767, James Hargreaves, of this town, invented the spinning-jenny, for which he was eventually expelled from the county. About 1810 or 1812, the townspeople availed themselves of his discoveries, and engaged largely in the cotton manufacture, now their staple trade. Blackburn murder, see *Trials*, July, 1876. BLACKFRIARS BRIDGE, London. The first stone of the late bridge was laid 31 Oct. 1760, and it was completed by Mylne, in 1770. It was frequently repaired, 1834-50, and began to sink. In 1864 it was pulled down, and a temporary bridge erected. The foundation of a new five-arched bridge, designed by Mr. Joseph Cubitt, was laid by lord mayor Hale, 20 July, 1865, and the bridge was opened by the queen 6 Nov. 1869. The first railway train (London, Chatham, and Dover) entered the city of London over the *new railway bridge*, Blackfriars, 6 Oct. 1864. Another railway bridge opened 7 Jan. 1884.

The ancient cavern, on the ascent to Blackheath, popularly termed "the retreat of Cade," and of banditti in the time of Cromwell, was re-discovered in 1780. Several daring highway robberies were committed near the heath, and the youthful culprits punished, in 1877. Murder of Mrs. Arabella C. Tyler at Kidbrook-park-road, 14 Aug. 1898. See *Trials*.

BLACK LETTER, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469: Pliny's Natural History was then printed in the new characters.

BLACK LIST, name given to printed lists of insolvents, bankrupts, and other matters affecting the credit of firms and individuals, published in London, weekly or bi-weekly, drawn from public registers. The legality of issuing information of this kind has been questioned, but, in the case of the *Scottish Mercantile Society's Record* in 1848, the house of lords found "such publication" was not slanderous. Private lists of a searching kind

issued to subscribers were first started by Mr. Thos. Perry of Cornhill, Stubbs' being the best known of the kind. Similar systems widely used in America and elsewhere. *Chambers*.

Since the licensing act of 1902, confirmed drunkards who have been before the magistrates several times, are placed on the "*Black List*," and their names and photographs are sent round to publicans, who are forbidden to supply them with intoxicating liquors.

BLACK ROD has a gold lion at the top, and is carried by the usher of the order of the knights of the garter (instituted 1349), instead of the mace. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords and acts as their messenger to the commons. Gen. sir M. Biddulph, G.C.B.

BLACK SEA, THE EUXINE (*Pontus Euxinus* of the ancients), a large internal sea between the S. W. provinces of Russia and Asia Minor, connected with the sea of Azoff by the straits of Yenikalé, and with the sea of Marmora by the channel of Constantinople.

This sea was much frequented by the Greeks and Italians, till closed to all nations by the Turks after the fall of Constantinople in 1453. The Russians obtained admission by the treaty of Kainardji 10 July, 1774
It was partially opened to British and other traders, (since which time the Russians gradually obtained the preponderance) 1779
Entered by the British and French fleets, at the requisition of the Porte, after the destruction of the Turkish fleet at Sinope by the Russians, 30 Nov. 1853 3 Jan. 1854

A dreadful storm in this sea raged, and caused great loss of life and shipping, and valuable stores for the allied armies. See *Russo-Turkish War*.

12 to 16 Nov. 1854
The Black Sea was opened to the commerce of all nations by the treaty of 1856.

The article of the treaty of Paris, 30 March, 1856, by which the sea was opened to the commerce of all nations, and interdicted to any ships of war; and the erection of military maritime arsenals forbidden, was repudiated by a Russian circular, dated 31 (19) Oct. 1870

After some correspondence, the meeting of a conference on the subject, in London, was agreed to by all the powers concerned in the treaty

The conference met in London 17 Jan. 1871, and a treaty was signed by which the neutralization of the sea was abrogated; but it was agreed by a special protocol, that no nation shall liberate itself from the obligations of a treaty without the consent of the others who signed it 13 March, 1871

BLACK WATCH, armed companies of the loyal clans (Campbells, Monros, &c.) employed to watch the highlands from about 1725 to 1739, when they were formed into the celebrated 42nd regiment, enrolled as "The Royal Highland Black Watch." Their removal for foreign service probably facilitated the outbreak in 1745. They wore dark tartans, and hence were called *Black Watch*. They distinguished themselves in the Ashantee war, Jan. Feb. 1874, in Egypt, 1882-5, in S. Africa 1899-1902.

BLANKETEERS. A number of operatives who, on 10 March, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. See *Derby*. Eventually the ringleaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKET SCANDAL, see under *South African War*.

BLANKETS are said to have been first made at Bristol by Thos. Blanket, in the 14th century. This is doubtful.

BLASPHEMY was punished with death by the law of Moses (*Lev. xxiv.*) 1491 B.C.; and by the code of Justinian, A. D. 529. It is punished by the civil and canon law of England, regulated by 60 Geo. III. c. 8 (1819). Daniel Isaac Eaton was tried and convicted in London of blasphemy, 6 March, 1812. Robert Taylor, a protestant clergyman, was tried twice for the same crime. He was sentenced to two years' imprisonment, and largely fined, July, 1831. In Dec. 1840, two publishers of blasphemous writings were convicted.

BLASTING GELATINE (a mixture of nitro-glycerine and gun-cotton), a violent explosive prepared by Alfred Nobel, and modified by professor Abel, 1879. See *Nobel Bequest*.

BLAZONRY. Bearing coats-of-arms was introduced and became hereditary in France and England about 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. *Dugdale*. See *Heraldry*.

BLEACHING was known in Egypt, Syria, India, and Gaul. *Pliny*. An improved chemical system was adopted by the Dutch, who introduced it into England and Scotland in 1768. There were large bleach-fields in Lancashire, Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dunbarton. The application of the gas chlorine to bleaching is due to Berthollet's discovery, about 1785. Its combination with lime (as chloride of lime) was devised by Mr. Tennant, of Glasgow, who took out a patent for the process in 1798, and by his firm it is still extensively manufactured. In 1822 Dr. Ure published an elaborate series of experiments on this substance. A new and more rapid process invented by Mr. Jacob Baynes Thompson, tried at Bolton, and reported successful, April, 1884. Improvements made by Mr. William Mather, 1885. The manufacture of bleaching powder was cheapened by Mond's process, in which the wasted chlorine is utilized, by Messrs. Brunner, Mond & Co., reported, Oct. 1892. In 1860 bleaching and dyeing works were placed under the regulations of the Factories Act.

BLLENHEIM (or Plintheim) a village in Bavaria on the left bank of the Danube, near the town of Hochstett, the site of a battle fought 2 Aug. (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria. The latter were defeated with the loss of about 12,000 killed, and 13,000 prisoners (including Tallard). Bavaria became the prize of the conquerors. The British parliament gave Marlborough the honour of Woodstock and hundred of Wotton, and erected for him the house of Blenheim.*

BLIND. The first public school for the blind was established by Valentine Haüy, at Paris in 1784. The first in England was at Liverpool, in 1791; in Scotland, at Edinburgh, in 1792; and the

* On 5 Feb. 1861, a fire broke out at this place, which destroyed the "Titian Gallery" and the pictures; the latter, a present from Victor Amadeus, king of Sardinia, to John, the great duke of Marlborough. Pictures, library, and other valuables sold 1885-6.

first in London in 1799. Printing in raised or embossed characters for the use of the blind was begun at Paris by Haiüy in 1786. The whole Bible was printed at Glasgow in raised Roman characters about 1848. Louis Braille, born near Paris, Jan. 1809, died 1852, became blind from an accident at the age of three. He adapted from M. Barbier's system his own simple and beautiful one of dots, for reading and writing, now bearing his name, which he published in 1829 and fully developed in 1834. The Braille musical notation is also much used. A sixpenny magazine for the blind, edited by the late rev. W. Taylor, F.R.S., so eminent for his forty years' exertions on behalf of these sufferers, was published in 1855-6. He aided the establishment of a college for the blind of the upper classes at Worcester, in 1866. There is hardly any department of human knowledge in which blind persons have not obtained distinction.* Laura Bridgman, born in 1829, became dumb and blind two years after. She was so well taught by Dr. Howe, of Boston, U.S., as to become an able instructor of blind and dumb persons; she died 24 May, 1889. By the census of 1851, there were in Great Britain, 21,487 blind persons; 11,273 males, 10,214 females; about one in 975 blind. The number of the blind in Great Britain has proportionally decreased since 1851, according to the census, 22,800 in 1881. In 1881 about one in 1138 blind. Royal Normal College and Academy of Music for the Blind, established 1873, at Norwood, Surrey, mainly by the exertions of Mr. Francis Joseph Campbell, an American, himself blind, and an able teacher, aided by the marquis, aft. duke, of Westminster, purchased for 22,000*l.* by the London school board for the education of the blind, Jan. 1896. Mr. Campbell ascended Mont Blanc in 1880. There were 29 Societies for the blind in London in 1889.

Royal Commission on the condition of the blind; extended to the deaf and dumb, Jan. 1886.

According to the census of 1881, the number of blind in the United Kingdom was about 32,101, England and Wales 22,832, Scotland 3,158, Ireland 6,111, England and Wales, 1891, 23,467. The royal commission to enquire into their condition was appointed 28 July, 1885, and on the 20th Jan. 1886, additional members were appointed, and its inquiries were extended to the deaf, dumb, and imbecile in the United Kingdom, Paris, Germany, Switzerland, and Italy. The commission, after 116 sittings, and many visitations and examinations of witnesses, issued their first report July, 1889. The number of the deaf under instruction in the United Kingdom was in 1851 1,300, in 1888 3,138. The commission met with great uncertainty in regard to idiots and imbeciles.

* James Holman, the "blind traveller" (born 1786, died 1857), visited almost every place of note in the world. His travels were published in 1825. In April, 1838, a blind clergyman, rev. J. Sparrow, was elected chaplain to the Mercers' Company, London, and read the service, &c., from embossed books.

Viscount Craunborne (blind) was the author of many interesting historical essays. He died in June, 1865. On 13 July, 1865, Henry Fawcett, the blind professor of political economy at Cambridge, was elected M.P. for Brighton; for *Hackney*, 1874 and 1880; and was appointed postmaster-general, April, 1880, died 6 Nov. 1884. Miss Alice King, blind at 7 years of age, learnt 7 languages by ear, novelist, beneficent to the poor, died aged 55, early May, 1894.

M. Dussand's new writing system for the blind reported Aug. 1902

BLINDING by consuming the eyeballs with lime or scalding vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. A whole army of Bulgarians was deprived of sight by the emperor Basil, 104. Several of the eastern emperors had their eyes torn from their heads.

BLISTERS, used by Hippocrates (460-357 B.C.), made, it is said, of cantharides (*which see*).

BLIZZARD, an old term applied in the Midland counties to the snow-blast, also signifying anything blazing, blinding, or stifling. Of late years violent snow-storms have been termed blizzard in the United States of North America, as well as in Britain. See *Storms*, 11-13 Jan.; and 11-13 March, 1888, and since.

BLOCKADE is the closing an enemy's ports to all commerce; a practice introduced by the Dutch about 1584. The principle recognized by the European powers is that every blockade, in order to be binding, must be effective. Cadiz blockaded 1797-9; the Elbe was blockaded by Great Britain, 1803; the Baltic, by Denmark, 1848-49 and 1864; the gulf of Finland by the Allies, 1854; and the ports of the Southern States of North America by president Lincoln, April 19, 1861. See *Orders in Council*, and *Berlin*. Part of the east coast of Africa was blockaded by England and Germany on account of the slave trade, 2 Dec. 1888—1 Oct. 1889; see *Zanzibar*.

BLACK BOOKS, see *Printing*.

BLOCKS employed in the rigging of ships were much improved in their construction by Walter Taylor, about 1781. In 1801, Mark I. Brunel invented a mode of making blocks by machinery, which was put into operation in 1808, and in 1815 was said to have saved the country 20,000*l.* a year.

BLOEMFONTEIN CONFERENCE, see *Orange Free State*, 1899.

BLOIS, France, the Roman Blesum. The count Guy II. sold it with his domains to Louis duke of Orleans in 1391, and eventually it accrued to the crown. The states-general were held here 1576 and 1588, on account of the religious wars; and here Henry duke of Guise was assassinated by order of the king, Henry III., 23 Dec. 1588. The empress Maria Louisa retired here in 1814.

BLOOD. The circulation of the blood through the lungs was known to Michael Servetus, a Spanish physician, in 1553. Cæsalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, or Father Paolo (real name Peter Sarpi), discovered the valves which serve for the circulation; but the honour of the positive discovery of the circulation belongs to William Harvey, between 1619 and 1628. *Freind*. A memorial window in the church at Folkestone, his birthplace, was uncovered 9 April, 1874, and a statue at the same place, 6 Aug. 1881.

EATING BLOOD was prohibited to Noah, *Gen.* ix., to the Jews, *Lev.* xvii., &c., and to the Gentile converts by the apostles at an assembly at Jerusalem, A.D. 52, *Acts* xv.

BLOOD-DRINKING was anciently tried to give vigour to the system. Louis XI. in his last illness, drank the warm blood of infants, in the vain hope of restoring his decayed strength, 1483. *Hénault*.

In the 15th century an opinion prevailed that the declining vigour of the aged might be repaired by TRANSFUSING into their veins the blood of young persons. It was countenanced in France by the physicians about 1668, and prevailed for many years, till the most fatal effects having ensued, it was suppressed by an edict. "An English physician (Louver, or Lower) practised in this way; he died in 1691." *Freind*. It was attempted again in France in 1797, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. Tried at Philadelphia, U.S., April, 1877; in London, unsuccessful, 10 May, 1877.

BLOOD'S CONSPIRACY. Blood, a discarded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, intending to hang him, and had got him to Tyburn, when he was rescued by his friends, 6 Dec. 1670. Blood afterwards, in the disguise of a clergyman, attempted to steal the regal crown from the Jewel-office in the Tower, 9 May, 1671; yet, notwithstanding these and other offences, he was not only pardoned, but had a pension of 500*l.* per annum settled on him by Charles II. 1671. He died 24 Aug. 1680.

"BLOODY ASSIZES," held by Jeffreys in the west of England, in Aug. 1685, after the defeat of the duke of Monmouth in the battle of Sedgmoor. Upwards of 300 persons were executed after short trials; very many were whipped, imprisoned, and fined; and nearly 1000 were sent as slaves to the American plantations.

The *hot-air blast*, a most important improvement, causing great economy of fuel, was invented by Mr. James B. Neilson, of Glasgow, and patented in 1828. He died 18 Jan. 1865.

BLOW-PIPE. An Egyptian using one is among the paintings on the tombs at Thebes. It was employed in mineralogy, by Antony Von Swab, a Swede, about 1733, and improved by Wollaston and others. In 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newman's improved blow-pipes, in 1816, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. Works on the blow-pipe by Plattner and Muspratt, 1854; G. Plympton, 1874, and W. A. Ross, 1880-8.

BLUE was the favourite colour of the Scotch covenanters in the 17th century. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "Edinburgh Review," first published in 1802. The Prussian blue dye was discovered by Diesbach, at Berlin, in 1710. Fine

BOG OF ALLEN, the name given to an extensive series of bogs in Ireland, on the E. side of the Shannon.

BOGOTÀ, SANTA FÉ DE, capital of New Grenada (*which see*), founded 1538.

BOGS, probably the remains of forests, covered with peat and loose soil. An act for the drainage of Irish bogs, passed March, 1830. The bog-land of Ireland has been estimated at 3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1849, Mr. Rees Reece took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London. Fuel for railway engines and other purposes was made from peat (April, 1873); and a peat, coal, and charcoal company established.

A considerable trade is carried on in Dublin in bog-oak jewelry and ornaments, originated on the occasion of the visit of Geo. IV. to Ireland, 1821.

Much destruction has been caused by the motion of bogs. Leland (about 1546) speaks of Chat Moss doing so.

A MS. copy of the four Evangelists, the book on which our kings from Henry I. to Edward VI. took their coronation oath, was bound in oaken boards, nearly an inch thick

Velvet was the covering in the 14th century; and silk soon after. Vellum was introduced early in the 15th century; it was stamped and ornamented about 1100

Leather came into use about the same time.

The rolling machine, invented by Mr. Wm. Burr, was substituted for the beating-hammer, and gas stoves began to take the place of the charcoal fires used to heat the gilder's finishing tools, about 1830

Cloth binding superseded the common boards generally about 1831

Caoutchouc or india-rubber backs to account-books and large volumes were introduced in 1841

The use of thin metal plates instead of paste-board introduced 1886

BOOK-KEEPING. The system by double-entry, called originally Italian book-keeping, was taken from the course of algebra published by Burgo, in the 15th century, at Venice. John Gough, a printer, published a treatise "on the keeping of the famous reconyng . . . Debitor and Creditor," London, 1543. This is our earliest work on book-keeping. James Peele published his *Book-keeping* in 1569. John Mellis published "A Briefe Instruction and Manner how to Keepe Bookes of Accounts," in 1588. Improved systems were published by Benjamin Booth in 1789 and by Edw. Thos. Jones in 1821 and 1831.

BOOKSELLERS, at first migratory like hawkers, became known as *stationarii*, from their practice of having booths or stalls at the corners of streets and in markets. They were long subject to vexatious restrictions, from which they were freed in 1758.

The earliest bookseller's catalogue is said to be that published by Andrew Maunsell, of Lofthury, dedicated to queen Elizabeth, 1505.

"Booksellers' Provident Institution" founded 1837; "Retreat," Abbot's Langley, Herts, 1843.

The *Bookseller*, a monthly newspaper of British and foreign literature, published in 1838; with it was incorporated *Beut's Literary Advertiser*, established in 1802.

BOOKSELLERS' ASSOCIATION. For upwards of 100 years publishers associated to bring out works of reference and books of a popular character. This-kind of partnership was usually

agreed at a trade dinner of the associated booksellers. This custom developed into the trade dinners given annually by leading publishers, at which prices and issues of important works were settled. Messrs. Longman & Co.'s last dinner was in 1872, John Murray's in 1887, Messrs. Bentley & Son, 1897. On 29 Dec. 1828, the chief publishers in London formed themselves into an association and fixed the amount of discount to be allowed, and restricted the retail booksellers from selling copies of works under the full publishing price. A dispute arose which was referred to lord chief justice Campbell, at Stratheden house, 14 April. 1852. His lordship gave judgment against the association, which led to its dissolution, 19 May following. The London Booksellers' society was formed; the inaugural dinner took place 2 Oct. 1890. BOOTHIA FELIX, a large peninsula, N.W. point of America, discovered by sir John Ross in 1830, and named after sir Felix Booth, who had presented him with 20,000*l.* to fit out his polar expedition. Sir Felix died at Brighton in Feb. 1850.

BOOTHISM, see *Salvation Army*.

BOOTS, said to have been the invention of the Carians, were mentioned by Homer, 907 B.C., and frequently by the Roman historians. A variety of forms may be seen in Fairholt's "Costume in England." An instrument of torture termed "*the boot*" was used in Scotland upon the covenanters about 1666.

A new system of boot-making introduced by Mr. M. L. Lion and Mr. F. Cutlan, reversing the ordinary method, July, 1837.

BORAX (Boron), known to the ancients, used in soldering, brazing, and casting gold and other metals, was called *chrysocholla*. Borax is produced naturally in the mountains of Thibet, and was brought to Europe from India about 1713. Homberg in 1702 discovered in borax *boracic acid*, which latter in 1808 was decomposed by Gay-Lussac, Thénard, and H. Davy, into oxygen and the previously unknown element, *boron*. Borax has lately been found in Saxony. It is now largely manufactured from the boracic acid found in certain lagoons in Tuscany. Very largely used as an anti-septic and in preservation of perishable foods, 1903.

BORDEAUX (W. France), the Roman Burdigalla, in Aquitania, was taken by the Goths, 412; by Clovis, 508. It was gained by Henry II. on his marriage with Eleanor of Aquitaine, 1151. Edward the Black Prince brought John, king of France, captive to this city after the battle of Poitiers, 19 Sept. 1356, and here held his court eleven years: his son, our Richard II., was born at Bordeaux, 1366. After several changes Bordeaux finally surrendered to Charles VII. of France, 14 Oct. 1453. The fine equestrian statue of Louis XV. was erected in 1743. Bordeaux was entered by the victorious British army after the battle of Orthez, fought 27 Feb. 1814.—13 vessels were burnt and others injured in the port through the ignition and

explosion of petroleum spirit, 28 Sept. 1869. The French delegate government and the representatives of foreign powers removed here from Tours, 11 Dec. 1870. M. Gambetta remained for a time with the army of the Loire. By the "pacte de Bordeaux," between the different parties of the national assembly, M. Thiers became chief of the executive power, 17 Feb. 1871. The French Association for the Advancement of Science held its first meeting here, 5 Sept. 1872; M. Quatrefages, president. Great fire in the pine forests, 10 persons perish, about 28 Aug. 1891. The Bordeaux wines, Medoc, Claret, etc. largely exported; see *Vines*, 1881-91, and *Wine*. BOROUGH or **BURGH**, anciently a fortified town (*burgh*), now means an incorporated city or town. They are all (except city of London) governed under the Municipal Corporations Act, 1882. County boroughs were incorporated under the Local Government Act, 1888. Parliamentary boroughs are the electoral divisions which send members to parliament, since the election of burgesses in the reign of Henry III. (1265). They do not of necessity coincide with the Municipal boroughs which give them their name. Charters were granted to towns by Henry I. 1132; which were remodelled by Charles II. in 1682-4, but restored in 1688. 22 new English boroughs were created in 1553. Burgesses were first admitted into the Scottish parliament by Robert Bruce, 1326; and into the Irish, 1365; see *Constituency*.

The "Boscobel Tracts" were first published in 1660. In 1861 Mr. F. Manning published "Views," illustrating these tracts. W. H. Ainsworth's "Boscobel," a story with authentic details, published 1872.

BOSNIA, in European Turkey, formerly part of Pannonia, was governed by chiefs till a brother-in-law of Louis king of Hungary was made king, 1376. He was defeated by the Turks in 1389, and became their vassal. Bosnia was incorporated with Turkey in 1463. Many efforts have been made by the Bosnians to recover their independence. A rebellion, begun in 1849, was quelled by Omar Pasha in 1851. The Bosnians joined the insurgents in Herzegovina, Sept. 1875; revolt was subdued, Aug. 1877. See *Turkey*.

BOTANY. Aristotle is considered the founder of the science (about 347 B.C.). *Historia Plantarum* of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the 15th century. Fuchsius, Bock, Bauhin, Cæsalpinus, and others, wrote between 1535 and 1600. The system and arrangement of the great Linnæus (see *Linnæan system*) was made known about 1735; and Jussieu's system, founded on Tournefort's, and called "the natural system," in 1758. At Linnæus's death, 1778, the species of plants actually described amounted in number to 11,800. The number of species now recorded cannot fall short of 100,000. J. C. Loudon's "Encyclopædia of Plants," a most comprehensive work, first appeared in 1829. De Candolle's "Prodrômus Systematis Naturalis Regni Vegetabilis" (of which Vol. I. appeared in 1818), was continued by his son Alphonse, who died aged 86, April, 1893. An International Botanical congress was opened in London, 23 May, 1866, professor A. De Candolle president; another at Amsterdam, 13 April, 1877. Robert Brown, who accompanied Flinders in his survey of New Holland in 1803, died 10 June, 1858, aged 85, was long acknowledged to be the chief of the botanists of his day.

BOTANY BAY, Australia, discovered by Captain Cook, 28 April, 1770, received its name from the great variety of plants growing on the shore. It was fixed on for a colony of convicts from Great Britain, which was however established at Sydney, near Port Jackson. The first governor, captain Arthur Phillip, who sailed from England in May, 1787, arrived at the settlement in Jan. 1788. The colony was eventually established at Port Jackson, about thirteen miles to the north of the bay; see *New South Wales*, and *Transportation*.

BOTHIE SYSTEM, a system which prevails in the eastern and north-eastern districts of Scotland of building the outhouses (barns, stables, byres, &c.) of a farmstead in the form of barracks, in which the unmarried male servants reside.

BOTHWELL BRIDGE, Lanarkshire. The Scotch covenanters, who took up arms against the intolerant government of Charles II., and defeated the celebrated Claverhouse at Drumlog, 1 June, 1679, were totally routed by the earl of Monmouth at Bothwell Bridge, 22 June, 1679, and many prisoners were tortured and executed.

BOTTLE-CONJURER. In accordance with a wager, a person having advertised that he would

jump into a quart bottle at the Haymarket theatre, on 16 Jan. 1749, the house was densely crowded and besieged by thousands anxious to gain admittance. The pickpockets had a rich harvest, and the duped crowd nearly pulled down the edifice.

BOTTLES in ancient times were made of leather. The art of making glass bottles and drinking-glasses was known to the Romans at least before 79; for these articles and other vessels have been found in the ruins of Pompeii. Bottles were made in England about 1558. A bottle which contained two hogsheads was blown, we are told, at Leith, in Scotland, in Jan. 1747-8; see *Glass*.

Boulogne was besieged by Henry VII. 2 Oct. 1492, for a few days; taken by Henry VIII. on 14 Sept. 1544, but restored for a sum of money, 1550. Its trade is growing; in 1902 the exports and imports amounted to over 19,000,000l. The fishing fleet (many steamers) earn over 500,000l. annually. Population 1901, 49,083.

BOURBON, HOUSE OF (from which came the royal houses of France, Spain, and Naples), derives its origin from the Archbishops, lords of Bourbon in Berry.

Robert, count of Clermont, son of Louis IX. of France, married the heiress Beatrice in 1272; died 1317; and their son Louis I. created duke of Bourbon and peer of France by Charles IV. 1327
The last of the descendants of their elder son Peter I., Susanna, married Charles, duke of Montpensier, constable of Bourbon, who, offended by his sovereign Francis I., entered into the service of the emperor Charles V., and was killed at the siege of Rome 6 May, 1527

From James, the younger son of Louis I., descended Antony, duke of Vendôme, who married (1543) Jeanne d'Albret, daughter of Henry, king of Navarre. Their son, Henry IV., born at Pau, 14 Dec. 1553, became king of France 31 July, 1589
The crown of Spain was settled on a younger branch of this family, 1700, and guaranteed by the peace of Utrecht (*Rapin*). 1713

Bourbon FAMILY COMPACT (a defensive alliance between France, Spain, and the Two Sicilies concluded by M. de Choiseul) 1761

The Bourbons expelled France, 1791; restored 1814; again expelled on the return of Bonaparte from Elba, and again restored after the battle of Waterloo, 1815. The elder branch was expelled once more, in the person of Charles X. and his family, in 1830, in consequence of the revolution of the memorable days of July in that year.

Orleans branch ascended the throne in the person of the late Louis Philippe, as "king of the French," 9 Aug. 1830; deposed, 24 Feb. 1848; and his family also was expelled.

The Bourbon family fled from Naples (6 Sept. 1860), and Francis II. lost his kingdom; expelled from Spain, Sept. 1868; restored by Alfonso XII. 31 Dec. 1874; see *France, Spain, Naples, Orleans, Parma, Condé, and Legitimists*.

BOURBON, ISLE OF (in the Indian ocean), discovered by the Portuguese about 1542. The French are said to have first settled here in 1649. It surrendered to the British, under admiral Rowley, 8 July, 1810, and was restored to France in 1815. An awful hurricane in Feb. 1829, did much mischief. Bourbon was named "l'Île de la Réunion" in 1843; population, 1892, 171,731.

She maintained that Christianity does not consist in faith and practice, but in inward feeling and supernatural impulse. A disciple named Court left her a good estate. She died in 1680, and her works, 21 volumes 8vo, were published 1686.

BOYNE, a river in Ireland, near which William III. defeated his father-in-law, James II., 1 July, 1690. The latter lost 1500 (out of 30,000) men; the Protestant army lost about a third of that number (out of 36,000). James fled to Dublin, thence to Waterford, and escaped to France. The duke of Schomberg was killed by mistake by his own soldiers as he was crossing the river, and here also was killed the rev. George Walker, who defended Londonderry, in 1689. Near Drogheda is a splendid obelisk, 150 feet in height, erected in 1736 by the Protestants of the empire in commemoration of this victory.

BRABANT, part of Holland and Belgium, an ancient duchy, part of Charlemagne's empire, fell to his son Charles, 806. It became a separate duchy (called at first Lower Lorraine) in 959. It descended to Philip II. of Burgundy, 1429, and in regular succession to the emperor Charles V. In the 17th century it was held by Holland and Austria, as Dutch Brabant and the Walloon provinces, and underwent many changes through the wars of Europe. The Austrian division was taken by the French in 1746 and 1794. It was united to the Netherlands in 1814, but South Brabant was given to Belgium, 1830. The heir of the throne of Belgium is styled duke of Brabant; see *Belgium*.

BRACELETS are of great antiquity, and have been worn by almost every nation, savage or civilised. Bracelets were in use in Egypt at a very early period. Frequent mention is made in the Bible of this custom. Greek and Roman women wore this ornament, and a kind of bracelet (*armille*) was conferred on the Roman soldier as a reward for bravery. Bracelets constituted the chief ornament of the ancient German tribes, and are frequently found in ancient graves.

His *Railway Companion* appeared in 1840; (*F. Madan, Athenæum*) . . . Dec. 24, 1887

BRAHMINS, Hindoo priests, the highest of the four castes. Pythagoras is thought to have learned from them his doctrine of the *Metempsychosis*; and it is affirmed that some of the Greek philosophers went to India on purpose to converse with them. BRANDENBURG, a city in Prussia, founded by the Slavonians, who gave it the name of *Bamber*, which signified *Guard of the Forest*, according to some; others explain the name as Burg, or city, of the *Brenns*. Henry I., surnamed the Fowler, after defeating the Slavonians, fortified "Brandnibor," 926, as a rampart against the Huns, and bestowed the government on Sigefroi, count of Ringelheim, with the title of margrave, or protector of the marches or frontiers. The emperor Sigismund gave perpetual investiture to Frederick IV. of Nuremberg, of the house of Hohenzollern, ancestor of the royal family of Prussia, made elector in 1417. For a list of the margraves since 1134, see *Prussia*. Population, 1890, 37,823; 1900, 49,263.

BRANDY (German *Branntwein*, burnt wine). the spirit distilled from wine. Alcohol appears to have been known to Raymond Lully in the 13th century, and to have been manufactured in France early in the 14th. It was at first used medicinally, and miraculous cures were ascribed to its influence. In 1852, 3,959,452; in 1866, 5,621,930; in 1870, 7,942,965; in 1874, 3,378,057; in 1876, 7,913,092; in 1877, 2,962,607; in 1879, 5,024,668; in 1883, 2,202,344; in 1888, 2,655,004; in 1889, 2,858,774; in 1890, 3,100,450; in 1893, 2,739,455; in 1896, 2,749,624; in 1900, 2,596,265; 1901, 2,434,970 gallons of foreign spirits were imported into the United Kingdom. BRASS. That mentioned in the Bible was most probably bronze. When Lucius Mummius burnt Corinth to the ground, 146 B.C., he found immense riches, and during the conflagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as *Corinthian Brass*. This is well doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper. *Du Fresnoy*. Some of the English sepulchral engraved *brasses* are said to be as old as 1277; a white brass produced by Mr. P. M. Parsons, about 1875.

Verdict: "Wilful murder by administration of tartar emetic; but not sufficient evidence to fix the guilt upon any person," 11 Aug. 1876.

BRAY, Berks. Fuller says that its vicar, Symon Symonds, was twice a papist and twice a Protestant—in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth (1533-1558). Upon being called a turn-coat, he said he kept to his principle, that of "living and dying the vicar of Bray." The story is doubted. The modern song refers to the political changes of the 17th and 18th centuries. BRAY, the "Irish Brighton," a beautiful seaside town 13 miles S.E. of Dublin, with esplanade a mile long. Pop. 6,888.

Dr. Bray, who was one of the founders of the Society for Propagating the Gospel, and who had acted energetically as commissary in Maryland for the bishop of London, about 1666, died 15 Feb. 1730, bequeathing part of his books to Sion College and part to found a parochial library, under certain conditions, complied with at Maidstone; and also money for other religious purposes. The associates assist schools and libraries in the colonies, and parochial libraries at home.

BRAZEN BULL, said to have been contrived by Perillus, at Athens, for Phalaris, tyrant of Agrigentum, 570 B.C. It had an opening in the side to admit the victims, and a fire was kindled underneath to roast them to death. Phalaris ordered the artist to make the first experiment. Pindar (522-422 B.C.) speaks of the cruelties of Phalaris, but later writers give him a different character.

BRAZIL, an empire in South America, was discovered by Vincent Pinzon, 26 Jan. 1500. Pedro Alvarez de Cabral, a Portuguese, driven upon its coasts by a tempest, April following, called it the land of the Holy Cross; but it was subsequently named Brazil, on account of its red wood. The French having seized on Portugal in 1807, the royal family and nobles embarked for Brazil, and landed 7 March, 1808. The dominant religion is Roman Catholic; but others are tolerated. Constitution of 25 March, 1824; modified 12 Aug. 1834 and 12 May, 1840. Population in 1888, 14,902,335; estimated; 1891, 17,000,000. See *Portugal*.

The emperor was deposed and a Federal republic, styled THE UNITED STATES OF BRAZIL, proclaimed 15, 16 Nov. 1889 (see *below*); a new constitution was promulgated, 22 June, 1890 and 24 Feb. 1891. BREAD. Ching-Noung, the successor of Fohi, is reputed to have been the first who taught men (the Chinese) the art of husbandry, and the method of making bread from wheat, and wine from rice, 1998 B.C. *Univ. Hist.* Baking of bread was known in the patriarchal ages: see *Exodus* xii. 15. It became a profession at Rome, 170 B.C. After the conquest of Macedon, 148 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained a monopoly. During the siege of Paris by Henry IV., owing to famine, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1594. *Henavdt.* In the time of James I., barley bread was used by the poor; and now in Iceland, cod-fish, beaten to powder, is made into bread; potato-bread is used in Ireland. The London Bakers' Company was incorporated in 1307. Bread-street was once the London market for bread. Until 1302, the London bakers were not allowed to sell any in their own shops. *Stow.* Bread was made with yeast by the English bakers in 1634. In 1856 and 1857 Dr. Dauglish patented a mode of making "aerated bread," in which carbonic acid gas is combined with water and mixed with the flour, and which is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1862 a company was formed to encourage Stevens' bread-making machinery. An act for regulating bakehouses was passed in July, 1863. A strike of the journeymen bakers of the metropolis, 23 Sept., was settled by concessions, 9 Oct. 1872. A *Bread Reform League* formed; meeting at the Mansion house, London, 17 Dec. 1880. The Bread Union, limited, established in London, Sept. 1889; failure, Oct. 1890. Delegated meeting of working bakers in London, demanding increased pay and shorter time of labour, 5 Sept.; strike averted by concessions, Nov. 1889.

ASSIZE OF BREAD. The first statute for the regulation of the sale of bread was 3 John, 1203. The chief justiciary, and a baker commissioned by the king, had the inspection of the assize. *Matthew Paris.* The assize was further regulated by statute in 51 Hen. III. 1266, and 8 Anne, 1710. Bread Act, Ireland, placing its sale on the same footing as in England, 1 Vict. 1838. Bread was directed to be sold by weight in London in 1822; the statute "Assessa Panis" was repealed in 1824; and the sale of bread throughout the country was regulated in 1836.

In France the old laws were superseded, and a law enabling the municipalities to fix the price of bread (still unrepealed) was passed, July, 1791.

BREAKWATERS. The first stone of the Plymouth breakwater was lowered 12 August, 1812. It stretches 5280 feet across the sound, is 360 feet in breadth at the bottom and more than 30 at the top, and consumed 3,660,000 tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half sterling. The architects were Mr. John Rennie and his son sir John. The first stone of the lighthouse on its western extremity was laid 1 Feb. 1841. Breakwaters have been constructed at Holyhead, Portland, Dover, Middlesborough, &c. A great barrier, about two-thirds of a mile long, erected to defend the hematite iron mines near the Daddon estuary, was completed by Messrs. Lucas & Aird, sir John Coode being the engineer, Oct. 1890. A breakwater in connection with extension of Admiralty pier is in progress (1903), much damaged by gale of 10 Sept. 1903.

BREAST-PLATE. One was worn by the Jewish high priest, 1491 B.C. (*Exod.* xxxix.) Goliath "was armed with a coat of mail," 1063 B.C. (*1 Sam.* xvii.) Breast-plates dwindled to the diminutive gorgets. Ancient breast-plates are mentioned as made of gold and silver.

The battle of Brechin or Huntly-hill was fought between the earls of Huntly and Crawford, the latter defeated, 18 May, 1452. The see of Brechin was founded by David I. in 1150. One of its bishops, Alexander Campbell, was made prelate when but a boy, 1556. The bishopric, discontinued soon after the revolution in 1688, was revived in 1731.

BREDA, Holland, was taken from the Spaniards by prince Maurice, of Nassau, in 1590; retaken by the Spaniards, under Spinola, June, 1625; and by the Dutch, Oct. 1637. The "*Compromise of Breda*" was a proposal to Philip II., deprecating his harsh measures in the Netherlands, presented and refused in 1566. Our Charles II. resided here at the time of the restoration, and here he issued his *declaration* of a free general pardon, and promised religious toleration, 14 April, 1660; see *Restoration*. Breda was taken by the French in 1793. The French garrison was expelled by the burghesses in 1813. Population, 1890, 22,536.

The breviary is ascribed to pope Gelasius I. about 492. It was first called the *custos*, and afterwards the breviary; came into use among the ecclesiastical orders about 1080; and was reformed by the councils of Trent and Cologne, and by Pius V., Urban VIII., and other popes. The quality of type in which the breviary was first printed is said to have given the name to the printing type called *brevier*.

The Sforza Horn, "Book of Hours," a collection of illuminated MSS. of the 15th and 16th centuries, formerly the property of the emperor Charles V. and his successors, was eventually acquired by Mr. Malcolm, of Pottalock, who gave it in 1893 to the British Museum, which already possessed the breviaries of Isabella the Catholic, and her daughter Joan. BRIDGE, a fashionable card game, which at the present time (1903) is played extensively. The excessive gambling associated with the game and the heavy losses incurred by players in "society" circles, especially among ladies, has given rise to considerable scandal.

BRIDGES were first of wood. There are ancient stone bridges in China. Abydos is famous for the bridge of boats which Xerxes built across the Hellespont, 480 B.C. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built in A.D. 105. *Brotherhoods for building bridges* existed in S. France about 1180. The Devil's bridge in the Canton of Uri was built on two high rocks; and many stories have been invented to account for it. At Schaffhausen an extraordinary bridge was built over the Rhine, 400 feet wide: there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it; a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. The bridge was destroyed by the French in 1799. See *Hammersmith*, *London*, *Watertoo*, *Blackfriars*, *Southwark*, *Forth*, *Tay*, *Tower*, *Westminster*, and other bridges, in separate articles. The chief Thames bridges were freed from toll 24 May, 1879, and 26 June, 1880.

BRITAIN (called by the Romans Britannia,* from its Celtic name Prydain (*Camden*). The earliest records of the history of this island are the manuscripts and poetry of the Cambrians. The Celts, the ancestors of the Britons and modern Welsh, were the first inhabitants of Britain. It is referred to as the Cassiterides or tin-islands by Herodotus, 450 B.C.; as Albion and Ierne (England and Ireland) by Aristotle, 350 B.C., and Polybius, 260 B.C. Britain, including England, Scotland, and Wales, was anciently called Albion, the name of Britain being applied to all the islands collec-

tively—Albion to only one. (*Pliny*). See *Albion, England, Scotland, and Wales*. Early history and dates doubtful.

BRITISH COLUMBIA (N. America). In June, 1858, news came to California that in April gold had been found in abundance on the mainland of North America, a little to the north and east of Vancouver's Island. A great influx of gold-diggers (in a few weeks above 50,000) from all parts was the consequence; and Mr. Douglas, governor of Vancouver's Island, evinced much ability in preserving order. The territory with adjacent islands was made a British colony with the above title, and placed under Mr. Douglas. The colony was nominated and the government settled by 21 & 22 Vict. c. 99 (Aug. 1858), and a bishop nominated in 1859. Visited by the marquis of Lorne and princess Louise, 20 Sept. 1882.—For a dispute in July, 1859, see *United States*. Vancouver's Island was incorporated with the colony in 1866, and Victoria was made the capital, 24 May, 1868. Recent lieut.-governors: Frederick Seymour, 1864; Anthony Musgrave, 1869; J. W. BRITTON, an ancient treatise on English law written in French by or in the name of king Edward I. about 1291. Coke attributed the work to John le Breton, bishop of Hereford, who died in 1275. An edition of "Britton," with a translation in English by Mr. F. Nicholls, was published in 1865.

BROAD ARROW. All attempts to ascertain the origin of this mark have been fruitless. It is stated that timber trees fit for shipping in the forest of Dean in 1639 were marked with the crown and broad arrow. It is said to have been the device of viscount Sydney, earl of Romney, master-general of the ordnance, 1693-1702. *Brewer*.

"BROAD BOTTOM" ADMINISTRATION. The Pelham administration (*which see*) was so called because formed by a coalition of parties, Nov. 1744.

BROAD CHURCH SCHOOL, in the Church of England, had its origin in a reaction from the Tractarian movement (see *Tractarianism* and *Puseyism*), influenced by German rationalism and the growth of the scientific and critical spirit. It became prominent in 1836 through the lectures of Dr. Hampden, and still more through the "Theological Essays" of the late F. C. Maurice in 1853, and found fuller expression in "Essays and Reviews," issued in 1860, written by Dr. Temple (late Archbishop of Canterbury), Dr. Rowland Williams, Professor Jowett, Baden Powell, Mark Pattison, H. B. Wilson, and C. H. Goodwin. These essays, with the exception of that on the "Education of the World" by Dr. Temple, were of a destructive critical nature, dealing with the subjects of the inspiration of the Scriptures, miracles, the Pentateuch, creeds and kindred subjects, and aroused a storm of hostile criticism from the bishops and "orthodox" members of the Church. The publication (1862 *et seq.*) of Dr. Colenso's work on the Pentateuch gave rise to still further controversy (see *Church of England*, May 20, 1863, *et seq.*). Although not numerically a strong party, the influence of broad-churchism has made itself felt among all sections of the Church,

and includes among its past and present adherents such names as Dr. Arnold, dean Stanley, canon Kingsley, Aug. William and Julius C. Hare, Stopford Brooke, bishop Westcott, canon Driver, bishop Moorhouse, H. R. Haweis, canon Cheyne, dean Robinson, canon Henson, and other able and distinguished men. The attitude of the Broad Church school may be thus briefly stated. It pays little attention to either dogma or ceremony; it seeks to extend the liberty of belief within the Church to its greatest possible extent; it attaches great importance to the social Christian virtues and purity of life, adopting the precepts rather than the dogmas of religion. The "Churchmen's Union" (*which see*), an association of clergy holding "broad" views, but not necessarily members of the Broad Church school, was formed at the Bradford Church Congress, 1898.

BROCADE, a silken stuff, variegated with gold or silver, and enriched with flowers and figures, originally made by the Chinese; the manufacture was established at Lyons in 1757.

BROCCOLI, said to have been brought to England from Italy in the 16th century.

BROKERS, both of money and merchandise, were known early in England. See *Appraisers*. They are licensed, and their dealings regulated by law in 1695-6, 1816, and 1826. The dealings of *stockbrokers* were regulated in 1719, 1733, and 1736, and subsequently; see *Pawnbroker*, and *Barnard's Act*. Brokers in the city of London placed under the supervision of the lord mayor and aldermen, in 1707, were relieved from it by an act passed 9 Aug. 1870.

BROMINE (from the Greek *brōmos*, a stink), a poisonous volatile liquid element discovered in salt water by M. Balard in 1826. It is found in combination with metals and mineral waters.

BRONTOMETER, thunderstorm measurer, an apparatus invented by M. M. Richard, of Paris, and commended by Mr. J. Symons, in *Nature*, July, 1890.

BRONZE was known to the ancients, some of whose bronze statues, vessels, &c., are in the British Museum. The bronze equestrian statue of Louis XIV., 1699, in the Place Vendôme at Paris (demolished 10 Aug. 1792), the most colossal ever made; it contained 60,000 lbs. Bronze is composed of copper and tin, with sometimes a little zinc and lead. The present *bronze coinage*, penny, half-penny, and farthing (composed of 95 parts of copper, 4 tin, 1 zinc), came into circulation Dec. 1860.

BROOKLYN, a city on Long Island, in the state of New York, first settled in 1636, organised by the Dutch governor of New Amsterdam, and named Breukelen, after a place in Holland. BRUNSWICK, HOUSE OF. The duchy of Brunswick, in Lower Saxony, was conquered by Charlemagne, and governed afterwards by counts and dukes. Albert-Azzo II. marquis of Italy and lord of Este, died in 1097, and left by his wife Cunegonde (the heiress of Guelph duke of Carinthia in Bavaria), a son, Guelph, who was invited into Germany by Imitza, his mother-in-law, and invested with all the possessions of his wife's step-father, Guelph of Bavaria; see *Bavaria*. His descendant, Henry the Lion, married Maud, daughter of Henry II. of England, and was the founder of the Brunswick family. His dominions were very extensive; but having refused to assist the emperor Frederick Barbarossa in a war against pope Alexander III., through the emperor's resentment he was proscribed at the diet at Wurtzburg, in 1180. The duchy of Bavaria was given to Otho of Wittelsbach, ancestor of the family of Bavaria; the duchy of Saxony to Bernard Ascanius, founder of the house of Anhalt; and his other territories to different persons. On this, he retired to England; but at the intercession of our Henry II. Brunswick and Lüneburg were restored to him. The house of Brunswick in 1409 divided into several branches. BUCCANEERS, cruel piratical adventurers, French, English, and Dutch, who commenced their depredations on the Spaniards of America soon after the latter had taken possession of that continent and the West Indies. Their numbers were much increased by a twelve years' truce between the Spaniards and Dutch in 1609, when many of the discharged sailors joined the buccaneers. The first levy of

ship-money in England in 1635 was to defray the expense of chastising these pirates. The principal commanders of the first buccaneers were Montbar, Lolonois, Basco, and Morgan. Van Horn, of Ostend, captured Vera Cruz, 1603; Morgan took Panamá, 1670; Gramont seized Campeachy, 1685; and Pointis took Carthagena, 1697; all gained enormous booty. BUDDHISM, the chief religion in Asia beyond the Ganges, and in China, Japan, and Ceylon, originated with Gautama Siddhartha, the Sakya Muni, generally termed Buddha, or "the enlightened," a prince of Kapalivastu in Central India, said to have been born 623, and to have died 543 B.C.

In July, 594 B.C., disgusted with the behaviour of the Brahmins, he retired from the world for a time, and on coming forth, preached a new religion so successfully that it predominated in India till the 10th century, A.D.*

Buddhism inculcates strict morality; it forbids killing, stealing, adultery, lying, and drunkenness, and every shade of these vices, and declares charity or love to be the source of all virtues. Some writers assert that Buddhism includes belief in the transmigration of souls, and the absorption of good souls into God himself, from whom they have emanated; others reckon annihilation or eternal sleep (the Nirvāna) amongst Buddhist tenets.

A form of Buddhism, termed the religion of Fō, exists in China, besides the system of Confucius and Lao-tse. It is said to have been introduced in the reign of Ming-ti, A.D. 68-81.

"Le Bouddha et ses Religions," by M. J. B. St. Hilaire, was published in 1860. Mr. T. Rhys Davids' "Buddhism," in 1878.

BUFFOONS were originally mountebanks in the Roman theatres. Their shows were discouraged by Domitian, and abolished by Trajan, 98; see *Jesters*.

BUFFS, this famous regiment took its name from the distinguishing colour of its uniform—coats faced with buff, and waistcoats, breeches and stockings of the same hue. The "Old Buffs"

were raised in 1689 (it is stated by some that they were raised by Charles II., and were called the "Holland regiment"). At one period they were known as the "Buff Howards," from Howard, their colonel (1737-1749). The "Old Buffs" formed the 3rd regiment of foot. The "Young Buffs," the old 31st foot, were raised 1702, and are now known as the Kent (East) regiment. Their uniform is scarlet with buff facings. The "Rothshire Buffs," the old 78th regiment, form the 2nd battalion of the Seaforth Highlanders (the duke of Albany's). *Brewer.*

BUILDING. In early times men dwelt in caves; wood and clay were the first building materials. Building with stone was early among the Tyrians. In Ireland a castle was built of stone at Tuam by the king of Connaught, in 1161; and it was "so new and uncommon as to be called the *Wonderful Castle.*" Building with brick was introduced by the Romans into their provinces. Alfred encouraged it in England in 886. It was adopted by the earl of Arundel, about 1598, London being then almost wholly built of wood; see *Architecture.*

Building acts were passed by Elizabeth in 1562, 1580, and 1592; and by Charles II. in 1667. Recent acts are very numerous. The Building Act for the Metropolis, 7 & 8 Vict. c. 84 (1844), was amended in 1855, 1860, 1866, 1871, 1878, and 1882.

Building societies, formed to enable a person to purchase a house by paying money periodically to a society for a certain number of years, instead of paying rent to a landlord, began about 1836, when an act was passed for their regulation. Their nature and objects having been considerably changed, a new act was passed 30 July, 1874, another, 1894. Building Societies in United Kingdom: 1877, 715; 1882, 1,606; 1887, 2,197; 1900, 2,239; 1891, England and Wales: 2,262; Scotland, 61; Ireland, 50; 1895, England and Wales: 2,181; Scotland, 136; Ireland, 56; 1898, England and Wales: 2,219; 1899, 2,124; 1900, 2,031; Scotland, 144; 1899, 136; 1900, 139; Ireland, 62; 1899, 65; 1900, 69.

This body, professing to have a capital of 7,000,000*l.*, by means of prospectuses, false accounts and balance-sheets, attracted thousands of shareholders and depositors. Estates were purchased, speculations undertaken, dividends were paid out of fictitious profits, and large sums were absorbed by managing directors. The bank and companies failed Oct. 1892; official liquidators were appointed. BULL, or EDICT OF THE POPE. The bulla is properly the seal, either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul; and on the other the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Pius V. published a bull against Elizabeth, 25 April, 1570; in 1571 bulls were forbidden to be promulgated in England. The bull *Unigenitus* (beginning with this word) against the Jansenists was issued by Clement XI., 1713; confirmed by Benedict XIII., 1725. The Golden Bull of the emperor Charles IV., so-called from its golden seal, was made the fundamental law of the German empire, at the diet of Nuremberg, 1356; see *Brazen Bull*. Pius IX. published an encyclical letter censuring modern errors, 8 Dec. 1864; see under *Rome*; see *Stocks*.

BULL-BAITING or BULL-FIGHTING, was an amusement at Stamford in the reign of John, 1209; and at Tutbury, 1374. In the *Sports of England*, we read of the "Easter fierce hunts, when foaming boars fought for their heads, and lusty bulls and huge bears were baited with dogs"; and near the *Clink*, London, was the Paris, or Bear Garden, so celebrated in the time of Elizabeth for the exhibition of bear-baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of Mr. William Windham, who made a speech in favour of the custom, 24 May, 1802. It was made illegal in 1835; see *Cruelty to Animals*. Bull-fights were introduced into Spain about 1260; abolished there, "except for pious and patriotic purposes," in 1784. Bull-fights are very common in Spain. A bull-fight at Lisbon, attended by 10,000 spectators, on Sunday, 14 June, 1840; one took place at Havre, 5 July, 1868. Somewhat theatrical fights with Spanish bulls, at the Agricultural Hall, London, were stopped 28 March, 1870, for cruelty. At a bull-fight at Marseilles about 17 persons were killed, and 230 injured, by the fall of wooden stands, Sunday, 14 Aug., 1881. A bull-fight at Nimes (since prohibited), 12 June, 1884.

A bull-fight at the Hippodrome, Paris, for sufferers by immoderations in S. France, very successful, no casualties, Spanish ambassador present, 16 Jan. 1887

BULLETS of stone were in use 1514. Iron ones are mentioned in the *Fadera*, 1550. Lead bullets were made before the close of the 16th century. The conoidal cup rifle-bullet was invented by capt. Minié, about 1833. Other and greatly improved bullets have been since devised for use with modern rifles, such as the Martini-Henry, the Enfield-Martini, the Mauser, the Mannlicher, and the Lee-Metford. The *dum-dum* bullet, so named from its having been invented and manufactured at the arsenal of that name near Calcutta, flattens out on striking an object. A bullet, a modification of the Lee-Metford bullet, having similar properties as the dum-dum, was issued to the army in 1899, but was not used, it being considered that it came, like the dum-dum, under the category of "explosive bullets," condemned by the Geneva Convention.

A *bullet-proof* coat or cuirass invented by Mr. Dowe at Vienna; successfully tested at Mannheim; reported efficient but heavy 13 March, 1894; tested at the Alhambra, London, in the presence of the duke of Cambridge, and other officers; report as to practical value indecisive, 23 May, 1894. The Prussian war office, after various trials, declare the cuirass to be worthless 3 Sept. 1894
 Mr. Maxim's bullet-proof cuirass; indecisive trials at Eritz, 2 June, and at the Aquarium 9 June, 1895

 Capt. Boynton's bullet-proof shield tried at Sheffield, 15 Sept. "

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1810, principally guided by Mr. Horner and Mr. (afterwards Sir R.) Peel, established the conclusion that paper money is always liable to be over-issued, and consequently depreciated, unless it be at all times immediately convertible into gold. This principle has been adopted in British monetary arrangements; see *Bank of England*.

BULL-RUN BATTLES, see *Manassas*.

BULWER - CLAYTON TREATY, concluded 19 April, ratified 4 July, 1850, by which Sir Henry Lytton Bulwer for the British, and Mr. Clayton for the American government, declared that neither should obtain exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty, and the connection of Great Britain with the Mosquito territory (*which see*), which were settled in 1857.

Its abrogation was proposed by the Americans in 1880, on account of De Lesseps' plan for a canal in Central America. The treaty was finally superseded by the Hay-Pauncefote Isthmian canal treaty, signed by Mr. Hay and Lord Pauncefote at Washington, 18 Nov.; ratified 16 Dec. 1901.

Fox, the Quaker (1690), general Fleetwood, son-in-law of Cromwell (1692), and Daniel De Foe (1731). *Cunningham*. BUNKER HILL, more properly Breed's hill (near Boston, U.S.). Here the British (nearly 3000), after severe loss, compelled the revolted Americans (about 5000) to retreat, after a desperate conflict, 17 June, 1775. Ralph Farnham, who was present at the battle, died on 28 Dec. 1860, aged 104½ years. He was introduced to the prince of Wales when in America. Centenary of the battle celebrated June, 1875.

BURFORD CLUB, the appellation given (according to Mr. Laver, the barrister, a conspirator, see *Laver*) by the Pretender and his agents to a pretended Jacobite club, of which lord Orrery was chairman, and lord Strafford, sir Henry Goring, earl Cowper, Mr. Hutcheson, the bishop of Rochester, sir Constantine Phipps, general Webb, lord Bingley, lord Craven, Mr. Dawkins, lord Scarsdale, lord Bathurst, Mr. Shippen, and lord Gower, were members. This story was set aside by the solemn declarations of lord Cowper and lord Strafford. The list of this club was published in the *Weekly Journal*, printed in Whitefriars; but when Read, the printer, was ordered to appear at the bar of the house, he absconded. March, 1722. *Salmon*.

BURGESSES, from the French *Bourgeois*, a distinction coeval in England with corporations. They were called to parliament in England, 1265; in Scotland in 1326; and in Ireland about 1365. Burgesses to be resident in the places they represented in parliament, 1 Hen. V. (1413); see *Borough*.

BURGHERS AND ANTI-BURGHERS. In 1732 Ebenezer Erskine and others seceded from the church of Scotland. Differing in regard to the interpretation of the burgess oath, they divided into two sections with the foregoing names in 1747. In 1820 they were reunited as the United Associate Synod of the Secession church, which, on 13 May, 1847, joined the Relief church, together forming the United Presbyterian church.

BURGUNDY, a large province in France, derives its name from the Burgundians, a Gothic tribe who overran Gaul in 275, and were driven cut by the emperor Probus: they returned in 287, and were defeated by Maximin. In 413 they established a KINGDOM, comprising the present Burgundy, large parts of Switzerland, with Alsace, Savoy, Provence, &c. Gondiac, their leader, the first king. It was conquered by the Franks, 534.—The second kingdom, consisting of a part of the first, began with Gontran, son of Clotaire I. of France, in 561. The kingdoms of Arles, Provence, and Transjura Burgundy, were formed out of the old kingdom.—**DUCHY**. In 877 Charles the Bald made his brother-in-law Richard the first duke of Burgundy. In 938, Hugh the Great, count of Paris, founder of the house of Capet, obtained the duchy. His descendant, Henry, on becoming king of France, conferred it on his brother Robert, in whose family it remained till the death of Philippe de Rouvre, without issue, in 1361. In 1363, king John of France made his fourth son, Philip, duke; see *Austria and Germany*.

BURKING, a new species of murder, committed in Britain, thus named from Burke, the first known criminal by whom it was perpetrated. His victims were killed by pressure or other modes of suffocation, and the bodies, which exhibited no marks of violence, were sold to the surgeons for dissection. He was executed at Edinburgh, 28 Jan. 1829. A monster named Bishop was apprehended in Nov. 1831, and executed in London 5 Dec. with Williams, one of his accomplices, for the murder of a poor friendless Italian boy, named Carlo Ferrari. They confessed to this and other similar murders.

BURLINGHAME TREATY, promoted by Mr. Anson Burlinghame and a Chinese embassy, and signed at Washington 4 July, 1868. It authorised mutual immigration. California prospered through Chinese labour; but depression in 1879-80 led to a demand for its expulsion and abrogation of the treaty.

BURMAH, or BURMESE EMPIRE, founded in the middle of the 18th century by Alompra, the first sovereign of the last dynasty. Our first dispute with this formidable power in 1795 was amicably adjusted by general Erskine. Hostilities were commenced by the British in 1824, and they took Rangoon on May 11. The fort and pagoda of Syriam were taken in 1825. After a short armistice, hostilities were renewed, 1 Dec. same year, and pursued until the successive victories

of the British led to the cession of Aracan, and to the signature of peace, 24 Feb. 1826. For the events of this war, and of the war in 1851, see *India*. Pegu was annexed to our Indian empire, 20 Dec. 1852. The war ended 20 June, 1853. Its supporters assert that the cabalistic book "Sohar," or "Splendour," a mystic commentary on the Pentateuch, was first committed to writing by Simon Ben Jochai, A.D. 72-110. The true date of the books containing the cabbala is now considered to range from 9th to the 14th centuries, and their origin to be the mingling of talmudism with the Greek philosophy termed Neo-Platonism. Some of their dogmas are akin to Christian tenets, such as the trinity, the incarnation, &c. The cabbala exercised much influence upon the mental development of the Jews, and even captivated the greatest thinkers of the 16th and 17th centuries.

CALAIS (N. W. France), fortified by Baldwin IV., count of Flanders, 997; taken by Edward III. after a year's siege, 4 Aug. 1347. It was retaken by the duke of Guise, in the reign of Mary, 7 Jan. 1558, and its loss so deeply touched the queen's heart, as to cause some to say it occasioned her death, which occurred soon afterwards, 17 Nov. same year. "When I am dead," said the queen, "Calais will be found written on my heart." It was taken by the Spaniards, April, 1596, restored, 1598. About 12 persons drowned in a house by bursting of a reservoir, 30 Jan. 1882. The new harbour and docks were opened by president Carnot, 3 June, 1889; see *Tunnels*.

CALCULATING MACHINES. To avoid errors in computing and printing logarithms and tables of figures, machines to calculate and print

have been devised. Pascal, when nineteen years of age, invented one about 1650. The construction of Mr. C. Babbage's differential machine was commenced at the expense of government in 1823, and continued till 1833, when the work was suspended after an expenditure of 17,000*l*. The portion completed was placed in the library of King's College, London; it is now at South Kensington. Professor Clifford, in his lecture at the Royal Institution, 24 May, 1872, stated that Babbage expended 20,000*l*. upon his machines, and that the analytical machine was nearly finished, and would eventually be much used. "Babbage's Calculating Engines: a Collection of Papers relating to them," was published by his son, Gen. Babbage, in 1889. C. Babbage died 1871, aged 78. In 1857, Messrs. E. and G. Schuetz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Schuetz brought their machine to England in 1854. It was bought for 1000*l*. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857, Messrs. Schuetz were engaged to make one for the British government, which was completed. Mr. Wiberg's machine, exhibited at Paris, Feb. 1863, was much commended. Tables constructed by means of Schuetz's machine, and edited by Dr. W. Farr, were published by the government in 1864. The arithmometer, patented by M. Thomas (de Colmar) in 1822 (?), exhibited at the International exhibitions, 1851 and 1862, is said to be in use in assurance offices. Geo. B. Grant described a simpler machine in the "American Journal of Science," Oct. 1874. Other machines have been constructed since.

The "calculating boy," George P. Bidder, born 14 June, 1806; noted in 1815 *et seq.*; president of the institution of civil engineers, 1860-61; died 20 Sept. 1878

An "arithmometer," for adding up figures and printing, was invented by Mr. Burroughs in the United States, and introduced into this country by Mr. H. E. Winter in 1893

CALEDONIA, the Roman name for part of Scotland, north of the wall of Antoninus, so termed by Tacitus, who died 99. Venerable Bede says that it retained this name until 258, when it was invaded by a tribe from Ireland, and called *Scotia*. The ancient inhabitants appear to have been the Caledonians and Picts, tribes of the Celts, who passed over from the opposite coast of Gaul. About the beginning of the 4th century of the Christian era they were invaded (as stated by some authorities) by the Scythys or Scythins (since called Scots), who, having driven the Picts into the north, settled in the Lowlands, and gave their name to the whole country; see *Scotland*.

CALEDONIAN CANAL, from the North Sea to the Atlantic Ocean. The act for its construction received the royal assent 27 July, 1803; and the works were commenced same year. The nautical intercourse between the western ports of Great Britain and those also of Ireland to the North Sea and Baltic, is shortened in some instances 800, and in others 1,000 miles. CALENDAR, see *Jewish Era* and *Calendar*. The Roman calendar was introduced by Romulus, who divided the year into ten months, comprising 304 days, 738 B.C. This year was of fifty days' less duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not correspond with any fixed season. Numa Pompilius, 713 B.C., added two months; and Julius Caesar, 46 B.C., to make it more correct, fixed the solar year at 365 days 6 hours, every fourth year being bissextile or leap-year; see *Leap-year*. This calendar was defective, as the solar year consists of 365 days, 5 hours, 49 minutes, and not of 365 days 6 hours. The pontiffs erroneously inserted on intercalary day each *third* instead of each *fourth* year, so that they had inserted 12 instead of nine 29 Febs, up to B.C. 8; Augustus Caesar ordained that there should be no leap-year for 12 years, until this was rectified. The difference in the 16th century amounted to 10 entire days, the vernal equinox falling on 11th instead of 21st March. To obviate this error, pope Gregory XIII. ordained, in 1582, that *that* year should consist of 355 days only (5 Oct. became 15 Oct.); and to prevent further irregularity, it was determined that a year ending a century should not be bissextile, with the exception of that ending each fourth century; thus 1700, 1800 and 1900 have not been bissextile, but the year 2000 will be a leap-year. In this manner three days are retrenched in 400 years, because the lapse of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided. See *New Style* and *French Revolutionary Calendar*. The Greek and Russian calendars retain the old style, 1895.

CALENDER, a machine used in glazing various kinds of cloth was introduced into England by the Huguenots, who were driven by persecution from France, Holland, and the Netherlands to these countries, about 1685. *Anderson*.

CALENDS were the first days of the Roman months. The *Nones* of March, May, July, and Oct., fell on the 7th; and their *Ides* on the 15th. The other months had the *Nones* on the 5th and the *Ides* on the 13th. As the Greeks had no *Calends*, "on the Greek Calends," ad *Græcas Calendas*, meant *never*.

CALICO, cotton cloth, named from Calicut, a city of India, visited by the Portuguese in 1498. Calico was first brought to England by the East India Company in 1631. Calico-printing and the Dutch loom engine were first used in 1676, when a

Frenchman established a factory at Richmond, near London. *Anderson*. Calicoes were prohibited to be printed or worn in 1700; and again in 1721 a penalty of 5*l.* was laid on the wearer, and 20*l.* on the seller of calico. In 1831, by the exertions of Mr. Charles Poulett Thompson, afterwards lord Sydenham, and others, the consolidated duty of 3*1*/₄*l.* on the square yard of printed calico was taken off. Since 1834, the manufacture has been greatly increased by the applications of science. Printing cylinders are made by electric deposition, dyes are artificially made from coal tar products, by the discoveries of Liebig, Hofmann, Perkin, and others; see *Cotton and Dyeing*.

CALIPPIC PERIOD, invented by Calippus, about 330 B.C., to correct the Metonic cycle, consists of four cycles, or of seventy-six years, at the expiration of which he incorrectly imagined the new and full moons return to the same day of the solar year. This period began about the end of June, third year of 112th Olympiad, year of Rome 424, and 330 B. C.

CALIXTINS, 1. A sect derived from the Husesites, about 1420 demanded the cup (Greek, *Kalix*, in the Lord's supper. They were also called Utraquists as partaking of both elements. The number produced by subtracting 3102 from any given year of the Cali Yuga era will be the Christian year in which the given year begins.

He retired to Basle, and settled in Geneva, where he died, 27 May, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. In France (see *Huguenots*) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the *Edict of Nantes* in 1598 (*which see*). Calvinistic doctrines appear in the articles of the Church of England and in the confession of the Church of Scotland, and are held by many protestant sects. They include pre-

destination, particular redemption, total depravity, irresistible grace, and the certain perseverance of the saints.

CAMBRIDGE UNIVERSITY.

The early history is traditional till the 12th century. Siegbert, king of the East Angles, is mythically said to have set up a school about 630. Scholars are said to have collected here and to have been favoured by Henry I., 1110. Henry III. granted the first charter in 1231, about which time the students began to live together in hostels which afterwards became colleges named after saints. It is said that there were 27 hostels in 1280. The university was incorporated in 1571, and sent two members to parliament in 1603. University tests act passed, 16 June, 1870. CAMERON'S ACT, DR., see *Debt*, 1880.

CAMERONIANS, a name frequently given to the Reformed Presbyterian church of Scotland, the descendants of the covenanters of the 17th century, the established church, 1638-50.* Charles II. signed the League and Covenant in 1650, in hopes of recovering his kingdoms, but renounced it in 1661, and revived episcopacy. A revolt ensued in 1666, when many covenanters were slain in battle (in the Pentland hills, &c.), and many refusing to take the oaths required, and declining to accept the king's *indulgence*, died on the scaffold, after undergoing cruel tortures. The name *Cameronian* is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. On 22 June in that year he and others issued at Sanquhar a declaration for religious liberty. The Bi-centenary was kept in 1880. In 1689 they raised a body of

* They were frequently called *hill-men* or *mountain men*, and *society people* (from the places and modes of worship to which they were frequently reduced), and McMillanites, from John McMillan, their first minister, after their secession from the church of Scotland on account of its subservience to the English government, and its declining from its original rigid principles. They assumed the name of the "Reformed Presbyterian Church," on May 5, 1876, and soon after united with the Bre Church of Scotland.

soldiers to support William III., who enrolled them under the command of lord Angus, as the 26th regiment, since so famous, now designated the Cameronians (the Scottish Rifles). In 1712 they renewed their public covenants, and are described in one of their tracts as "the suffering anti-popish, and anti-prelatical, anti-erastian, true presbyterian church of Scotland." They have now between thirty and forty congregations in Scotland.—The *Cameron Highlanders* ("the Queen's Own") formerly the 79th foot, raised in 1793 by Allan Cameron, were not connected with the Cameronian movement.

CAMISARDS (from *chemise*, Latin *camisa*, a shirt, which they frequently wore over their dress in night attacks), a name given to the French Protestants in the neighbourhood of the Cevennes (mountain chains in S. France), who after enduring much severe persecution in consequence of the revocation of the edict of Nantes, 22 Oct. 1685, took up arms in July, 1702, to rescue some imprisoned brethren. They revenged the cruelties of their enemies, and maintained an obstinate resistance against the royalist armies commanded by marshal Montrevel, and other distinguished generals, till 1705, when the insurrection was suppressed by marshal Villars. After futile conciliatory efforts, several of the heroic leaders suffered death rather

than surrender. Cavalier, an able general, unable to carry out a treaty made with Villars, seceded in 1704, entered the British service, and died governor of Jersey, 1740.

Many Camorristi seized in the markets at Naples, 30 Aug. and 1 Sept. *et seq.*, 1877. 179 of these tried at Bari, mid-April, May, 1891. The Camorristi are said to be the highest grade of the society named "Mala Vita."

CAMP (Lat. *castra*, English camp is derived from Lat. *campus*, a plain), the name given to the place and the aggregate body of tents or huts in the field. Encampments are mentioned about 1490 B.C. (Numbers ii.). The Lacedæmonians among the Greeks were the first who cultivated the art of forming military camps, the form of which was circular. The Romans, whose camps were square and entrenched, attained to a high degree of skill in this science. Polybius, who accompanied Scipio the younger in many campaigns, gives a very full description of the Roman camp. As described by this historian the camp of a consular army accommodated 16,800 foot and 1,800 horse soldiers, and was elaborately constructed. Vestiges of Roman camps exist at the present day in various parts of England and Scotland. The introduction of gunpowder greatly modified the construction and area of camps. Artillery of the most improved type, and strong detached forts, constitute the chief defensive feature of entrenched camps. The vast size of European armies of the present day necessitate the accommodation of troops in cantonments or bivouacs, but in expeditions in hot climates, with flying columns, tents are used. If occupied for one or two nights only camps are called "flying camps," if for a longer period "standing camps." Camps of exercise of large extent are established at Aldershot (*q.v.*), Colchester, Shorncliffe, the Curragh, Kildare (*q.v.*). A camp was formed in Hyde-park in 1745 and 1814, and at the Alexandra Palace and Hampton Court for the Indian and Colonial troops, 1901-1902 (see *Coronation*).

In accordance with the second act, the family of a gentleman killed through the breaking of a rail,

obtained a verdict for 13,000*l.* from the Great Northern railway company. On appeal the sum was reduced.

CAMPBELLITES, or Rowites, a name given to the followers of the rev. John McLeod Campbell, minister of Row, Dumbartonshire, who, on 24 May, 1831, was deposed by the general assembly of the church of Scotland for teaching the universality of the atonement, and other doctrines contrary to the church's standard. Dr. Campbell established a congregation in Glasgow in 1833. The "Disciples of Christ," *which see*, are also sometimes termed Campbellites.

CANADA (N. America), was discovered by John and Sebastian Cabot, 24 June, 1497. In 1524, a French expedition under Verazani formed a settlement named New France, and in 1535 Jacques Cartier (a Breton mariner), ascended the St. Lawrence as far as the site of Montreal; see *Montreal* and *Quebec*. Canada has been termed "the Dominion," since its incorporation with the other North American colonies, 1 July, 1867. CANDLEMAS DAY, 2 Feb. is kept in the church in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, *Luke ii. 32*, "a Light to lighten the Gentiles," &c.), this festival was called Candlemas, as well as the Purification. Its origin is ascribed by Bede to pope Gelasius in the 5th century, by others to the Roman emperor Justinian, 541. Some antiquarians trace a connection between the Christian festival with the great feast of expiation and purification called *Februa*, held 15 Feb. in ancient Rome. The practice of lighting the churches was forbidden by order of council, 2 Edw. VI. 1548; but is still continued in the church of Rome. Candlemas is a Scotch quarter-day.

CANDLES. The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fattened were used for light among the lower classes in England, about 1300. Wax candles were little used, and dipped candles were usually burnt. The Wax Chandlers' company was incorporated 1483. Mould candles are said to be the invention of the sieur Le Brez, of Paris. Spermaeeti candles are of modern manufacture. The Chinese make candles from wax obtained from the candleberry-tree (*myrica cerifera*). The duty upon candles made in England, imposed in 1709, amounted to about 500,000*l.* annually when it was repealed in 1831. Improvements in the manufacture of stearine candles, due to the researches on oils and fats by Chevreul, 1811-23. He died 9 April, 1880, aged 102. The plaited wick introduced by Cambacères 1825, improved by Wilson 1844, did away with snuffing. At Price's manufactory at Lambeth, the principles involved in many

patents are carried into execution; including those of Gwynne (1840), Jones and Price (1842), and Wilson in 1844, for candles which require no snuffing. When tallow was high in price palm and cocoa-nut oils were for a time extensively used. The discovery of paraffin by Dr. James Young, 1847-50, introduced a material which has practically superseded all others. Price's patent candle company, established 1847, incorporated by act of parliament 1848 and 1857, have the largest candle-making works in the world. In 1870 the manufacture of candles from a mineral substance named *ozokerit* began. *Crickliffe* in vogue, 1903.

CANDLESTICKS (or *lamp-stands*) with seven branches were regarded as emblematical of the priest's office, and were engraven on their seals, cups, and tombs. Bezaleel made "a candlestick of pure gold" for the tabernacle, B.C. 1491 (*Exod.* xxxvii. 17). Candlesticks were used in Britain in the days of king Edgar, 959 ("silver candelabra and gilt candelabra well and honourably made").

CANDY or **KANDY** (Ceylon), was taken by a British detachment, 20 Feb. 1803, who capitulated 23 June following, on account of its unhealthiness, and many were treacherously massacred at Colombo, 26 June. The war was renewed in Oct. 1814; the king was made prisoner by general Brownrigg, 19 Feb. 1815; and the sovereignty was vested in Great Britain, 2 March, 1815. Candy has many objects of interest; among these are the governor's house, one of the finest structures in Ceylon, and the Buddhist temple, "the palace of the tooth," containing, it is said, a tooth of Gautama the Buddha, the most sacred spot in the Buddhist world.

CANICULAR PERIOD, see *Dog-star*.

CANNÆ (Apulia). Here, on 2 Aug. 216 B.C., Hannibal with 50,000 Africans, Gauls, and Spaniards, defeated Æmilius Paulus and Terentius Varro, with 88,000 Romans, and their allies. This great army was nearly annihilated, the far greater part being slain on the field, including the consul Æmilius Paulus, his chief officers, above 80 senators, with many other persons of high rank. Hannibal is said to have lost about 6,000 men. The other consul, Varro, who had escaped with some cavalry, conducted himself with so much discretion and firmness after the battle, that the senate, instead of blaming him for the defeat, thanked him for not despairing of the Roman Commonwealth.

CANNES, a fashionable watering place and seaport of France, in the department of Alpes-Maritimes, situated on a bay of the Mediterranean (22 miles N.W. of Nice). Founded by the Romans between *Via Aurelia* and the sea. Held as a fief by the convent of the Lérins during the middle ages. In 1580 it was devastated by the great plague, and during the religious wars it was sacked by the duke of Savoy. Napoleon landed at Cannes on his return from Elba, 1815. Its rise as a watering place is due to lord Brougham, who in 1834 selected Cannes as a health resort. The duke of Albany died at the Villa Nevada, 28 March, 1884, and the late queen Victoria visited Cannes in 1887 to inspect the Albert Memorial church of St. George of England, built in memory of the prince. During the winter it is frequented by visitors of all nationalities. Population, 19,385.

CANNIBAL, an Indian term, thought to be a form of *Caribal*; as Columbus, in 1493, found the Caribs of the West Indies gross cannibals. *Anthropophagi* (man-eaters) are mentioned by

Homer and Herodotus; and the practice still exists in some of the South Sea Islands and other savage countries. For *Mignonette* case, see *Wrecks*, 1884. Superstitious cannibalism practised in Hayti, 1884.

* George Canning was born 11 April, 1770; became foreign secretary in the Portland administration, 1807; fought a duel with ld. Castlereagh and resigned, 1800; president of the India board in 1820; disapproved of the queen's trial and resigned in 1821; appointed governor-general of India in 1822, soon after foreign secretary till 1827, when he became premier. The range of a 32-lb. gun, charged with 5lb. of powder, was a little more than 5 miles. The accuracy of the Armstrong gun is said at equal distances to be fifty-seven times more than that of our common artillery, which it greatly exceeded also in destructive effects. CAPITOL, said to have been so called from a human head (*caput*) found when digging the foundations of the fortress of Rome, on Mons Tarpeius. Here a temple was built to Jupiter Capitolinus. The foundation was laid by Tarquinius Priscus, 616 B.C.; the building was continued by Servius Tullius; completed by Tarquinius Superbus, but not dedicated till 507 B.C. by the consul Horatius. It was destroyed by lightning 6 July, 183; burnt during the civil wars, 83; rebuilt by Sylla, and dedicated again by Lutatius Catulus, 69; again burnt A.D. 69, 80; rebuilt 70, 82; sacked by Genseric, June, 455. The Roman consuls made large donations to this temple, and the emperor Augustus bestowed on it 2000 pounds weight of gold, of which metal the roof was composed: its thresholds were of brass, and its interior was decorated with shields of solid silver. The *Capitoline games*, instituted 387 B.C. to commemorate the deliverance from the Gauls, were revived by Domitian, A.D. 86. The Campidoglio contains palaces of the senators, erected on the site of the Capitol by Michael Angelo soon after 1546. The corner-stone of the *capitol* at Washington, U.S.A., was laid 18 Sept. 1793.

The English capitulations, 1675, contain most favoured nation clauses, and were maintained till April, 1870, when Nubar Pasha, Egyptian minister of foreign affairs, persuaded the great powers to substitute mixed international courts and a uniform code. The capitulations were finally abolished July, 1872.

CAPUA, capital of Campania, took the part of Hannibal when his army wintered here after the battle of Cannæ, 216 B.C., and it is said became enervated. In 211, when the Romans retook the city, they scourged and beheaded all the surviving senators; the others had poisoned themselves after a banquet previous to the surrender of the city. Only two persons escaped; one woman who had prayed for the success of the Romans, and another who succoured some prisoners. During the middle ages Capua was successively subjugated by the Greeks, Saracens, Normans, and Germans. It was restored to Naples in 1424, and captured by Cæsar Borgia, 24 July, 1501; was taken by Garibaldi 2 Nov. 1860.

The capuchin confessors of the queen Henrietta introduced here 1630, were imprisoned by the parliament, 1642.

CAR. The invention is mythically ascribed to Erichthonius of Athens. Covered cars (*currus arcuati*) were used by the Romans. The *lectica* (a soft cushioned car), next invented, gave place to the *carpentum*, a two-wheeled car, with an arched covering, hung with costly cloth. Still later were the *carruca*, in which the officers of state rode. Triumphant cars, introduced by Tarquin the Elder, were formed like a throne. See *Carriages* and *Motor Car*.

It is largely manufactured for surgical purposes, and has been advantageously used at Carlisle and Exeter in the deodorisation of sewage (1860-1); and as a disinfectant during the prevalence of cholera in London in 1866. It was successfully used for embalming by professor Seely in 1868. Professor F. Crace Calvert, a great manufacturer of this acid, died 1873.

CARBONARI (charcoal-burners), a powerful secret society in Italy, which derived its origin, according to some, from the Waldenses, and which became prominent early in the present century. It aimed at the expulsion of foreigners from Italy, and the establishment of civil and religious liberty. In March, 1820, it is said that 650,000 joined the society, and an insurrection soon after broke out in Naples, general Pèpè taking the command. The king Ferdinand made political concessions, but the influence of the allied sovereigns at Laybach led Ferdinand to annul them and suppress the liberal party, Jan. 1821, when the Carbonari were denounced as traitors.

CARBONIC ACID GAS, a gaseous compound of carbon and oxygen, found in the air, and a product of combustion, respiration, and fermentation. The Grotto del Cane yields 200,000 lbs. per annum. No animal can breathe this gas. The briskness of champagne, beer, &c., is due to its presence. It was liquefied by atmospheric pressure by Faraday in 1823. On exposing the liquid to the air it becomes solid, resembling snow, through vapourisation. See under *Cannon*, 1889-90.

CARDINALS, princes in the church of Rome, the council of the pope, and the conclave or "sacred college," at first were the principal priests or incumbents of the parishes in Rome, and said to have been called *cardinales* in 853. They began to assume the exclusive power of electing the popes about 1179. They first wore the red hat to remind them that they ought to shed their blood for religion, if required, and were declared princes of the church by Innocent IV., 1243 or 1245. Paul II. gave the scarlet habit, 1464; and Urban VIII. the title of Eminence in 1623 or 1630. In 1586 Sixtus V. fixed their number at 70; but there are generally vacancies. In 1860 there were 69 cardinals. In 1873, 5 of the order of bishops; 34 priests; 6 deacons; 45 in all. CARTESIAN DOCTRINES, promulgated by René Descartes, the French philosopher, in 1637. His metaphysical principle is, "I think, therefore I am;" his physical principle, "Nothing exists but substance." He accounts for all physical phenomena on his theory of vortices, motions excited by God, the source of all motion. He was born 1596, and died at Stockholm, the guest of queen Christina, in 1650.

CARTHAGE (N. coast of Africa near Tunis), founded by Dido or Elissa, according to the legend adopted by Virgil in the *Æneid*, some time in the 9th century B.C.; 878, 853, 826 are mentioned. She fled from her brother Pygmalion, king of Tyre, who had killed her husband, and took refuge in Africa. Towns subject to Carthage were gradually founded along the coast, and colonies in Spain and Sicily. Carthage disputed the empire of the world with Rome, which occasioned the Punic wars. The Carthaginians bore the character of a faithless

people, hence the term *Punic faith*. Cato the censor ended his speeches in the senate with *Delenda est Carthago!* "Carthage must be destroyed!" Many councils were held here, A.D. 200-535.

CARTHAGENA, or **NEW CARTHAGE** (S.E. Spain), built by Hasdrubal, the Carthaginian general, 242 B.C.; taken by surprise by Publius Scipio Africanus, 210 or 209. The modern Carthage was taken by a British force under sir John Leake, June, 1706; retaken by the duke of Berwick, Nov. It was the last place held by the Intransigent and Internationalists of Spain; was besieged by general Martin Campos, about 22 Aug. 1873. Bombardment begun 26 Nov., taken by general Lopez Dominguez, 12 Jan. 1874. See *Spain*.—**CARTHAGENA**, in Columbia, South America, was taken by sir Francis Drake in 1585; pillaged by the French buccaneers in 1697; bombarded by admiral Vernon in March, 1741; and unsuccessfully besieged, April, 1741. Population, 1884, 75,980; 1897, 86,245.

CARTHUSIANS, a religious order (springing from the Benedictines) founded by Bruno of Cologne, who retired with six companions about 1084, to Chartreuse (*which see*), in the mountains of Dauphiné. Their austere rules were formed by Basil VII., their general. In France in 1880 the majority of the order refused to "seek authorisation" to remain in their monasteries, were expelled, and sought refuge in England and other countries. They appeared in England about 1180, and a monastery was founded by sir William Manny, 1371, on the site of the present Charter-house, London; see *Charter-house*. The Carthusian powder of father Simon, at Chartreuse, was first compounded about 1715.

CARTOONS, large chalk drawings preparatory to oil painting. Those of **RAPHAEL** (twenty-five in number) were designed (for tapestries) in the chambers of the Vatican under Julius II. and Leo X. about 1510 to 1516. The seven preserved were purchased in Flanders by Rubens for Charles I. of England, for Hampton-court palace in 1629. They were removed to South Kensington 28 April, 1865.—The tapestries executed at Arras from these designs are at Rome. They were twice carried away by invaders, in 1526 and 1798, and were restored in 1815.—The Cartoons for the British houses of parliament were exhibited in July, 1843.

In 1152 bishop Donat O'Danergan was invested with the pall; see *Pallium*. Cashel was valued in the king's books, 29 Henry VIII. at 66l. 13s. 4d. Irish money. By the Church Temporalities Act, 1833, it ceased to be archiepiscopal, and was joined to Waterford and Lismore.

The true Cashmere shawls, first brought to England in 1666, are well imitated at Bradford and Huddersfield.

Shawls of Thibetan wool, for the omrahs, cost 150 rupees each, about 1650. Population, 1881, 1,534,972; 1891, 2,543,000; 1901, 2,906,000.

It was the capital of Jerome Bonaparte, king of Westphalia, 1807-13, and Wilhelmshöhe, a neighbouring castle, became the residence of Napoleon III. after his surrender to the king of Prussia, 2 Sept. 1870, arriving at 9.35 P.M. 5 Sept. In the laws of Menu (see *Menu*), the Hindus are divided into the Brahmans, or sacerdotal class; the Kshatrya or Chuttree, military class; the Vaisya, or commercial class; and the Sudras, or sooders, servile class. "Hindu Castes and Sects," by J. N. Bhattacharya, published 1896.

Several hundreds, built by permission of Stephen, between 1135 and 1154, were demolished by Henry II., 1154. Many were dismantled in the civil wars. Richborough, Studfall, and Burgh are existing specimens of Roman castles.

CAT. The generally received opinion that our domestic cat is derived from the European wild cat is doubted by Mr. T. Bell (1827). Rüppell (died 1794) found a wild cat in Nubia, whose conformation agreed with that of the Egyptian cat mummies. See *Mummies*. Cats fetched high prices in the middle ages, and were protected by law in Wales, about 948. Great cat shows are annually held at the Crystal Palace; the 35th, 1903. A cat interrupted the debates in the commons, 9 July, 1874. CATACOMBS. The early depositories of the dead. The first Christians at Rome met for worship in the catacombs; and here are said to have been the tombs of the apostles Peter and Paul. Belzoni in 1815-18 explored many Egyptian catacombs, built 3000 years ago. He brought to England the sarcophagus of Psammetichus, formed of oriental alabaster, exquisitely sculptured. In the Parisian catacombs (formerly stone quarries), human

remains from the cemetery of the Innocents were deposited in 1785; and many of the victims of the revolution in 1792-4, are interred in them.—On 31 May, 1578, some labourers digging on the Via Salara, two miles from Rome, discovered the celebrated catacombs, of which an account with engravings was published by Antonio Bosio, in his "Roma Sotteranea" (1632), and by Aringhi (1659), and others. John Evelyn saw them in 1645. Elaborate accounts have been published recently by De Rossi; an abstract of whose researches will be found in the "Roma Sotteranea" of the Rev. J. S. Northcote and W. R. Brownlow, 1869 and 1879.

It formed part of the Spanish marches and the territory of the count of Barcelona (*which see*). The natives were able seamen: being frequently unruly, their peculiar privileges were abolished in 1714. See *Barcelona*.

CATALYTIC FORCE. The discovery in 1819 by Thenard of the decomposition of peroxide of hydrogen by platinum, and by Döbereiner in 1823 of its property to ignite a mixture of hydrogen and oxygen, formed the groundwork of the doctrine of catalytic force, also termed "action of contact or presence," put forth by Berzelius and Mitscherlich. Their view has not been adopted by Liebig and other chemists.

Catania was almost totally overthrown by an eruption of Etna in 1669, and in 1693 was nearly swallowed up by an earthquake: in a moment more than 18,000 of its inhabitants were buried in the ruins. An earthquake did great damage, 22 Feb. 1817. In Aug. 1862, the town was held by Garibaldi and his volunteers, in opposition to the Italian government. He was captured on 29 Aug. Population in 1890, 109,687; 1901, 149,694.

CATECHISMS are said to have been compiled in the 8th or 9th century. Luther's were published 1520 and 1529. The catechism of the church of England in the first book of Edward VI., 7 March, 1549, contained merely the baptismal vow, the creed, the ten commandments, and the Lord's prayer, with explanations; but James I. ordered the bishops to add an explication of the sacraments, 1612. The catechism of the council of Trent was published in 1566; those of the Assembly of Divines at Westminster (one termed the *shorter catechism*), 1647 and 1648; Evangelical Free Church catechism, published, 5 Jan. 1899.

CATILINE'S CONSPIRACY. Lucius Sergius Catiline, a dissolute Roman noble, having been refused the consulship (65 B.C.), conspired to kill the senate, plunder the treasury, and set Rome on fire. This conspiracy was timely discovered and frustrated. A second plot (in 63), was detected by the consul Cicero, whom he had resolved to murder. Catiline's daring appearance in the senate-house, after his guilt was known, drew forth Cicero's celebrated invective, "Quousque tandem, Catilina!" on 8 Nov. On seeing five of his accomplices arrested, Catiline fled to Gaul, where his partisans were assembling an army. Cicero punished the conspirators at home, and Petreius routed their forces; Catiline being killed in the engagement, Jan. 62 B.C.

CAUCUS. An American term applied to a private meeting of the leading politicians of a party to agree upon the plans to be pursued during an election or session of congress. This institution is now a very powerful antagonist to public opinion. The word is said to be derived from "ship"-caulkers' meetings. A "caucus club" is mentioned by John Adams, in 1763. *Bartlett*. Similar meetings are occasionally held in London by conservatives and liberals; one was held by Mr. Gladstone respecting the ballot bill, 6 July, 1871. Jealousy respecting the system was aroused in 1878.

The Birmingham Liberal association began in 1868 a powerful caucus, systematized by Mr. Schnadhorst, very efficient 1873 *et seq.*; a similar conservative association since formed; a network of similar societies exist throughout the kingdom
 Autumn 1885

The London Liberal and Radical council, actually a caucus, active in November, 1885 to 1887, presented to Mr. Schnadhorst by the Liberals, 9 March, 1887; he retired from politics, Nov. 1894, died 2 Jan. 1900

CAUDINE FORKS, according to Livy, the *Furculæ Caudinæ* (in Samnium, S. Italy), were two narrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 321 B.C. (after a fruitless contest, according to Cicero). The Roman senate broke the favourable treaty. C. Pontius, taken prisoner in the third Samnite war, was executed at Rome, 290.

CAUSTIC, IN PAINTING, a method of burning colours into wood or ivory, invented by Gausias of Sicily. He painted his mistress Glycère sitting on the ground making garlands with flowers; the picture was hence named *Stephanoplocon*. It was bought by Lucullus for two talents, 335 B.C. *Pliny*.

CAUTIONARY TOWNS (Holland), (the Briel, Flushing, Rammekins, and Walcheren), were given to queen Elizabeth in 1585 as security for their repaying her for assistance in their struggle with Spain. They were restored to the Dutch republic by James I. in 1616.

CAVALIER. The appellation given to the supporters of the king during the civil war, from a number of gentlemen forming themselves into a body-guard for the king in 1641. They were opposed to the Roundheads, or parliamentarians.

CAVALRY. Used by the Canaanites in war, 1450 B.C. (*Josh.* xi. 4). Attached to each Roman legion was a body of 300 horse, in ten turmae; the commander always a veteran.—The Persians had 10,000 horse at Marathon, 490 B.C.; and 10,000 Persian horse were slain at the battle of Issus, 333 B.C. *Plutarch*. In the wars with Napoleon I. the British cavalry reached to 31,000 men. Our cavalry force, in 1840, was 10,733. In 1867, cavalry of the line, 10,023; in depôts, 838; in India, 5421; total, 17,599; in 1880, total 17,245; 1903-4, 554 officers, 1337 non-commissioned, 14,271 rank and file; in India, total 5,635; voted household cavalry 60,000, line 419,000. *Cavalry Manœuvres* on the Berkshire Downs, eight regiments, director, sir Evelyn Wood; general in command, sir Baker Russell, Sept. 1890. The manœuvres are now annually repeated near Aldershot, Aug.-Sept. see *Horse Guards*, &c. "Achievements of Cavalry," by gen. sir Evelyn Wood, published 1897.

CAVENDISH COLLEGE, Cambridge (founded in 1871 to give cheap university education to youths younger than those admitted at other colleges, and leaving earlier for business), was inaugurated by the duke of Devonshire, 26 Oct. 1876. New buildings opened by the marquis of Hartington, 16 Nov. 1889; closed since 1891.

CAVENDISH EXPERIMENT. In 1798 the hon. Henry Cavendish described his experiment for determining the mean density of the earth, by comparing the force of terrestrial attraction with that of the attraction of leaden spheres of known magnitude and density, by means of the torsion balance. *Brande*. The Cavendish Society, for the publication of chemical works, which ceased

with Gmelin's Chemistry (1848-72), was established 1846.

CAVES are frequently mentioned in the Bible as dwellings, refuges, and burying-places. Mr. W. B. Dawkins' "Cave-hunting; Researches on the Evidence of Caves respecting the Early Inhabitants of Europe," was published 1874. Oreston cave, Devon, discovered 1816; Kirkdale, Yorkshire, 1821; Kent's Hole, Torquay, *which see*, 1825; Brixham cave, 1858; Wookey Hole, Somerset, 1859; and many others, have been well explored, including the caves in the valley of the Lesse in Belgium, of the Pyrenees and Perigord in France, and the Kesserloch, Thäingen, Switzerland. The remains of extinct mammalia found in these caves furnish proof of the antiquity of man.

CAWNPORE, a town in India, on the Doab, a peninsula between the Ganges and Jumna. During the mutiny in June, 1857, it was garrisoned by native troops under sir Hugh Wheeler. These broke out into revolt. An adopted son of the old Peishwa Bajee Rao, Nana Sahib, who had long lived on friendly terms with the British, came apparently to their assistance, but joined the rebels. He took the place after three weeks' siege, 26 June; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, 16 July, at Futtehpore, and retook Cawnpore, 17 July. Sir Colin Campbell defeated the rebels here on 6 Dec. following. A column was erected here, in memory of the sufferers, by their relatives of the 32nd regiment. In Dec. 1860, Nana was said to be living at Thibet; and in Dec. 1861 was incorrectly said to have been captured at Kurrahee; see *India*, 1857. Population, 1901, 197,170.

Many French political prisoners were sent here in 1848.

In 1850 a grove of venerable cedars, about 40 feet high, remained on Lebanon. The cedar of Goa (*Cupressus lusitanica*) was brought to Europe by the Portuguese about 1683; see *Cypress*.

CELERY is said to have been introduced into England by the French marshal, Tallard, during his captivity in England, after his defeat at Blenheim by Marlborough, 2 Aug. 1704.

CELESTIAL GLOBE, see *Globes*.

CELIBACY (from *caelebs*, unmarried) was preached by St. Anthony in Egypt about 305. His early converts lived in caves, &c., till monasteries were founded. The doctrine was rejected in the council of Nice, 325. Celibacy was enjoined on bishops only in 692. The decree was opposed in England, 958-978. The Romish clergy generally were enjoined a vow of celibacy by pope Gregory VII. in 1073-85, and its observance was established by the council of Placentia, held in 1095. Marriage was restored to the English clergy in 1547. The marriage of the clergy was proposed, but negatived at the council of Trent (1563); also at a conference of the old catholics at Bonn, June, 1876. Sir Battle Frere termed the Zulu army "a celibate man-slaying machine," 1878.

CELL THEORY (propounded by Schwann in 1839) supposes that the ultimate particles of all animal and vegetable tissues are small cells. Some of the lowest forms of animal and vegetable life are composed of merely a single cell, as the great majority of the Protozoa and Protophyta. Prof. Virchow proved in his Croonian lecture in London that all new cells proceed from old ones, 16 March, 1839, see *Protoplasm*.

In the United Kingdom the census is now taken at decennial periods since 1801; 1811, 1821, 1831, 1841, 1851, 1861 (7 April), 1871 (3 April), 1881 (3 April), 1891 (5 April), 1901 (31 March). CHAMBERLAIN, early a high court officer in France, Germany, and England. The office of chamberlain of the exchequer ceased in 1834.

JOINT-HEREDITARY LORD GREAT CHAMBERLAINS OF ENGLAND.—The sixth great officer of state, whose duties, among others, relate to coronations and public solemnities. The office was long held by the De Veres, earls of Oxford, granted by Henry I. in 1101. On the death of John De Vere, the sixteenth earl, Mary, his sole daughter, marrying lord Willoughby De Eresby, the right was established in that nobleman's family by a judgment of the house of peers, 2 Charles I. 1625. On the death of his descendant, unmarried, in July, 1779, the house of lords and twelve judges concurred that the office devolved to lady Willoughby De Eresby, and her sister the lady Georgina Charlotta Bertie, as heirs to their brother Robert, duke of Ancaster, deceased; and that they had powers to appoint a deputy to act for them, not under the degree of a knight, who, if his majesty approved of him, might officiate accordingly. *Beatson*. This dignity was for some time held jointly by the lord Willoughby De Eresby and the marquis of Cholmondeley, descendants of John de Vere, earl of Oxford. Lord Willoughby De Eresby died without issue 27 Aug. 1870, and lord Aveland, his sister's son, was appointed to act. The marquis of Cholmondeley died 16 Dec. 1884, and was succeeded by his grandson, George H. H., the present marquis, 1884; re-appointed, 2 Sept. 1901; again by the king, 21 June, 1902. Lady Willoughby De Eresby died 26 July, 1879, was succeeded by her sons, the earl of Ancaster and lord Carrington (earl, 1895).

LORD CHAMBERLAIN OF THE HOUSEHOLD.—An ancient office. The title is from the French *Chambellan*, in Latin *Commerarius*. Sir William Stanley, knight, afterwards beheaded, was lord chamberlain, 1 Henry VII. 1485. A vice-chamberlain acts in the absence of the chief; the offices are co-existent. *Beatson*. The earl of Lathom, 1835; lord Carrington, 1892; earl of Lathom, 1895 (died aged 61, 19 Nov. 1893); the earl of Hopetoun, Dec. 1898; the earl of Clarendon, Sept. 1900.

The Chamberlain of London is an ancient office.

CHAMBERS' JOURNAL was first published at Edinburgh in Feb. 1832. Jubilee kept 4 Feb. 1882. Robt. Chambers died 17 Mar. 1871. William died 20 May, 1883. Chambers' Encyclopaedia, see under "*Encyclopaedia*."

CHAMBRE ARDENTE (fiery chamber), an extraordinary French tribunal so named from the punishment frequently awarded by it. Francis I. in 1535, and Henry II. in 1549, employed it for the extirpation of heresy, which led to the civil war with the Huguenots in 1560; and in 1679 Louis XIV. appointed one to investigate the poisoning cases which arose after the execution of the marchioness Brinvilliers.

CHAMBRE INTROUVABLE, a name given to the chamber of deputies, elected in France in 1815, on account of its ignorance, incapacity, and bigoted reactionary spirit.

CHAMPAGNE, an ancient province, N. E. France, once part of the kingdom of Burgundy, was governed by counts from the 10th century till it was united to Navarre, count Thibaut becoming king, in 1234. The countess Joanna married Philip IV. of France, in 1284; and in 1361 Champagne was annexed by their descendant king John. The effervescent wine termed *Champagne* became popular in the latter part of the 18th century.

CHAMP DE MARS, an open square in front of the Military school at Paris, with artificial embankments on each side, extending nearly to the river Seine. The ancient assemblies of the Frankish people, the germ of parliaments, held annually in March, received this name. In 747, Pepin changed the month to May. Here was held, 14 July, 1790 (the anniversary of the capture of the Bastille), the "federation," or solemnity of swearing fidelity to the "patriot king" and new constitution: great rejoicings followed. On 14 July, 1791, a second great meeting was held here, directed by the Jacobin clubs, to sign petitions on the "altar of the country," praying for the abdication of Louis XVI. A commemoration meeting took place, 14 July, 1792. Another constitution was sworn to be here, under the eye of Napoleon I., 1 May, 1815, at a ceremony called the *Champ de Mai*. The prince-president (afterwards Napoleon III.) had a grand review in the Champ de Mars, and distributed eagles to the army, 10 May, 1852. Here also was held the international exhibitions opened 1 April, 1867, and 1 May, 1878, see *Paris*.

CHAMPIONS OF CHRISTENDOM, see *Seven Champions of Christendom*.

CHAMPION OF THE KING OF ENGLAND (most honourable), an ancient office, since 1377 has been attached to the manor of Scrivelsby, held by the Marmion family. Their descendant, sir Henry Dymoke, the seventeenth of his family who held the office, died 28 April, 1865; succeeded by his brother John; he died, and his son Henry Lionel succeeded, who died Dec. 1875; succeeded by Francis Seaman Dymoke, who died 2 June, 1893; succeeded by his son, Mr. Francis Seaman Dymoke. An account of the champions, and the Marmion and Dymoke families, is given by the rev. Samuel Lodge, in his "Scrivelsby," 1893. At the coronation of the English kings the champion used to challenge any one that should deny their title. The Dymoke suit of armour presented to the king, 13 June, 1901.

CHAMPLAIN, see *Lake Champlain*.

CHANCELLOR OF ENGLAND, LORD HIGH, the first lay subject after the princes of the blood royal. Anciently the office was conferred upon some dignified ecclesiastic termed *Cancellarius*, or doorkeeper, who admitted suitors to the sovereign's presence. Arfastus or Herefast, chaplain to the king (William the Conqueror) and bishop of Elmham, was lord chancellor in 1067. *Hardy*. Thomas à Becket was made chancellor in 1154. The first person qualified by education, to decide causes upon his own judgment, was sir Thomas More, appointed in 1529, before which time the officer was rather a state functionary than a judge. Sir Christopher Hatton, appointed lord chancellor

in 1587, was very ignorant, on which account the first reference was made to a master in 1588. The great seal has been frequently put in commission; the lord chancellor's powers enlarged over legal officials by act passed in 1881; in 1813 the office of *Vice-Chancellor* was established; see *Keeper*, and *Vice-Chancellor*.—Salary, 6000*l.*; as speaker of house of lords, 4000*l.*

CHANCELLOR OF THE EXCHEQUER, see *Exchequer*.

CHANCELLOR OF SCOTLAND, LORD, The laws of Malcolm II. (1004) say:—"The chancellor sall at al tymes assist the king in giving him counsall mair secretly nor the rest of the nobility. . . . The chancellor sall be ludgit neir unto the kingis grace, for keeping of his bodie, and the seill, and that he may be readie, baith day and nicht, at the kingis command." *Sir James Balfour*. Evan was lord chancellor to Malcolm III., Canmore, 1057; and James, earl of Seafield, afterwards Findlater, was the last lord chancellor of Scotland, the office having been abolished in 1708; see *Keeper*.

CHANCELLOR'S AUGMENTATION ACT, passed 1863, enabled the lord chancellor to sell the advowson of certain livings in his gift for augmenting poor benefices.

CHANCELLORSVILLE, Virginia, U.S., a large brick hotel, once kept by a Mr. Chancellor, was the site of severe sanguinary conflicts between the American federal army of the Potomac under general Hooker, and the confederates under general Lee. On 28 April, 1863, the federal army crossed the Rappahannock; on 2 May, general "Stonewall" Jackson furiously attacked and routed the right wing, but was mortally wounded by his own party firing on him by mistake. Gen. Stuart took his command, and after a severe conflict on 3 and 4 May, with great loss to both parties, the federals were compelled to recross the Rappahannock. The struggle was compared to that at Hougomont during the battle of Waterloo. Jackson died 10 May.

CHANCERY, COURT OF, is mythically said to have originated with Alfred (871-901) or William I. (1066-1087). Its power was probably derived from the council of state, under which it acted, and of which it became gradually independent. Its acts were frequently complained of by the commons in the 14th and 15th centuries. Its professed object was to render justice complete, and to moderate the rigour of other courts that are bound to the strict letter of the law. It gives relief to or against infants, notwithstanding their minority; and to or against married women, notwithstanding their coverture; and all frauds, deceits, breaches of trust and confidence, for which there is no redress at common law, are relievable here. *Blackstone*; see *Chancellors of England*. The delays in chancery proceedings having long given dissatisfaction, the subject was brought before parliament in 1825, and frequently since; which led to the passing of important acts in 1852, 1853, 1855, 1858, and 1867, to amend the practice in the court of chancery. See *Accountant, County Courts, and Supreme Court, Berkeley*.

The *Chancery division* of the high court of justice now consists of the lord chancellor and six judges, an additional judge, sir G. Farwell, having been appointed, Oct. 1899. The chancery taxing office, the bankruptcy and other taxing department's, amalgamated with the central office, 11 Jan. 1902.

The construction of a channel bridge from Dover to Calais was proposed in Paris, 1889, by MM. Schneider and Hersent, and sir John Fowler and Mr. (afterwards sir Benjamin) Baker, and discussed in 1890.

M. Bunan Varrilla, of Paris, engineer, publishes his plans for a mode of communication between Dover and Calais, consisting of a pier or viaduct half a mile long, on each side connected by a tunnel, and estimated cost 10,000,000l. . . May, 1890

Sir E. J. Reed proposed the construction of a tubular railway, above the bed of the sea . . . 1890-1
In relation to a proposed Channel bridge, a new survey of the Straits of Dover was undertaken; a report on the scheme was published 26 Dec. . . 1890
Meeting held; no further development announced, 2 Dec. 1902

CHANTING is attributed to Ambrose, about 386. About 602, Gregory the Great added tones to the Ambrosian chant, and established singing schools. M. Geyvaet, of Brussels, in Oct. 1889, asserted that this statement is legendary and that it was Gregory III. (731-741) who made the change. Chanting was adopted by some dissenters about 1859.

John Marbeck's "Book of Common Praier noted" (1559) is the first adaptation of the ancient Latin music to the Reformed Church; Cliffor's "Common Tunes" for chanting, 1664.

see *Chanting*. Chantries were abolished in England in 1545.

CHAPEL. There are free chapels, chapels of ease, the chapel royal, &c. *Cowell*. The gentlemen pensioners (formerly poor knights of Windsor, who were instituted by the direction of Henry VIII in his testament, 1546-7) were called knights of the chapel; see *Poor Knights of Windsor*.—The Private Chapels Act passed 14 Aug. 1871. The place of conference among printers, and the conference itself, are by them called a *chapel*, it is said, because the first work printed in England by Caxton was executed in a ruined chapel in Westminster-abbey.

CHAPLAIN, a clergyman who performs divine service in a chapel, for a prince or nobleman. About seventy chaplains are attached to the chapel royal. The chief personages invested with the privilege of retaining chaplains are the following, with the number that was originally allotted to each rank, by 21 Hen. VIII. c. 13 (1529):—

CHAPTER. Anciently the bishop and clergy lived in the cathedral, the latter to assist the former in performing holy offices and governing the church, until the reign of Henry VIII. The chapter is now an assembly of the clergy of a collegiate church or cathedral. *Cowell*. The *chapter-house* of Westminster-abbey was built in 1250. By consent of the abbot, the commoners of England held their parliaments there from 1377 until 1547, when Edward VI. granted them the chapel of St. Stephen.

CHAR-ASIAB, the heights before Cabul; held by Afghan mutineers, were gallantly carried by general Baker, with the 72nd Highlanders and 5th Ghoorkas. 6 Oct. 1879. The enemy was totally defeated with severe loss. Capt. Young, Dr. Duncan, and lieut. Fergusson were killed, and about 70 of the British force killed and wounded. The British were falsely accused of cruelty after the victory.

CHARCOAL AIR-FILTERS were devised by Dr. John Stenhouse, F.R.S., in 1853. About the end of the last century Löwitz, a German chemist, discovered that charcoal (carbon) possessed the property of deodorising putrid substances, by absorbing and decomposing offensive gases. Air-filters, based on this property, have been successfully applied to public buildings, sewers, &c. Dr. Stenhouse also invented charcoal respirators. See *Fireman's Respirators*.

CHARING CROSS. At the village of Charing stood the last of the memorial crosses erected in memory of Eleanor, queen of Edward I., in conformity with her will. She died, 28 Nov. 1290. The cross remained till 1647, when it was destroyed as a monument of popish superstition. The present cross was erected for the South Eastern railway company in 1865 by Mr. E. M. Barry. The houses at Charing-cross were built about 1678; alterations began in 1829. The first stone of Charing-cross hospital was laid by the duke of Su-sex, 15 Sept. 1831. Hungerford-bridge (or Charing-cross bridge)

was opened 1 May, 1845; taken down July, 1862, and the materials employed in erecting Clifton suspension bridge, beginning March, 1863; see *Clifton*.—**CHARING-CROSS RAILWAY.** The first train passed over it, 2 Dec. 1863, and it was opened to the public on 11 Jan. 1864. The new railway bridge, built of iron with brick piers, was constructed by Mr. (aft. sir John) Hawkshaw. The foot-bridge was opened toll free 5 Oct. 1878. Pleistocene fossils found in excavations for Drummond's banking house: cave lion, mammoth, Irish deer, rhinoceros, &c. Autumn, 1882.

Charing-cross-road, from Tottenham-court-road to Charing-cross, was opened by the duke of Cambridge, 26 Feb. 1887.

CHARIOTS are frequently mentioned in the Bible, those of Joseph are mentioned *Gen. l. 9, v. c.* 1689. Chariot-racing was a Greek exercise. War-chariots were effectively used by the Gauls in Italy. Caesar relates that Cassivelaunus, after dismissing his other forces, retained no fewer than 4000 war-chariots about his person; see *Carriages*, &c.

CHARITABLE BEQUESTS, &c. Boards for their recovery were constituted in 1764 and 1800, and a board for Ireland (chiefly prelates of the established church), in 1825. The Roman Catholic Charitable Bequests Act passed in 1844, and an act for the better administration of Charitable Trusts in 1853, when commissioners were appointed, who have from time to time published voluminous reports. Amendment acts were passed 1855 and 1871. 1,200,000*l.* bequeathed 1892; 1,370,130*l.*, 1899; 2,016,600*l.*, 1900; 1,926,850*l.*, 1901; 4,443,200*l.*, 1902.

CHARIVARI (French for "clattering of pots and pans," &c., noise made to annoy obnoxious persons), the name assumed by the French illustrated satirical journal, first published 1 Dec. 1832, edited by Louis Desnoyers, Altaroche, and Albert Clerc. Among the artists were "Chan," a

name taken by the comte de Noë, who contributed from 1842 till his death, 6 Sept. 1879. See *Punch*, "the London Charivari."

CHARLEROI, in Belgium; fortified and named by the Spanish governor Rodrigo, 1666. Several great battles have been fought near this town, especially in 1690 and 1794; see *Fleurus*. Charleroi was besieged by the prince of Orange, 1672 and 1677; but he was soon obliged to retire. Near here, at Ligny, Napoleon attacked the Prussian line, making it fall back upon Wavres, 16 June, 1815.

CHARLES-ET-GEORGES, a French vessel, professedly conveying free African emigrants (but really slaves), seized by the Portuguese, in Conducia bay, 29 Nov. 1857, sent to Lisbon, and condemned as a slaver. The French government sent two ships of war to the Tagus, and the vessel was surrendered under protest; but the emperor of France gave up the free emigration scheme.

CHARLESTON (South Carolina), founded by people from old Charlestown, 1680. The English fleet here was repulsed with great loss, 28 June, 1776. It was besieged by the British troops at the latter end of March, 1780, and surrendered 13 May following with 6000 prisoners; it was evacuated, 14 Dec. 1782. Great commotion arose here in Nov. 1860, through the election of Mr. Lincoln for the presidency, he being opposed to slavery. On 12, 13 April, 1861, the war began by the confederates bombarding Fort Sumter; see *United States*. In Dec. 1861, the federals sank a number of vessels laden with stone in order to choke up the entrance to Charleston harbour. Unsuccessful attacks were made on Charleston by the federals between April, 1863, and 17 Feb. 1865, when the confederates were compelled to retire; and the federals replaced their standard on fort Sumter, 14 April, the day on which president Lincoln was assassinated.

About three-fourths of the city destroyed by an earthquake, 10 p.m. 31 Aug. 1886; 96 persons killed. Population, 1890, 54,955; 1900, 55,807.

CHARLESTOWN (Massachusetts) was burnt by the British forces under general Gage, 17 June, 1775. Charlestown taken by the British, 7 May, 1779.

"CHARTE CONSTITUTIONNELLE," the French political constitution acknowledged by Louis XVIII., 4-10 June, 1814. The infraction of this constitution led to the revolution of 1830. The amended "Charte" was promulgated by Louis Philippe, 14 Aug. 1830; and set aside by the revolution of 1848.

CHARTER-HOUSE (a corruption of *Chartreuse, which see*), London, formerly a Carthusian monastery, founded in 1371 by sir Walter de Manny, one of the knights of Edward III., now an extensive charitable establishment. The last prior, John Houghton, was executed as a traitor, for denying the king's supremacy, in May, 1535. After the dissolution of monasteries in 1539, the charter-house passed through various hands till 1 Nov. 1611, when it was sold by the earl of Suffolk to Thomas Sutton for 13,000*l.*, who obtained letters patent directing that it should be called "the hospital of king James, founded in the Charter-house," and that "there should be for ever 16 governors," &c. On the foundation are 80 poor brothers and 44 poor scholars. Sutton died, 12 Dec. 1611. The expenditure for 1853-4 was 22,396*l.*; the receipts, 28,908*l.*; receipts in 1885, 30,364*l.* This school was affected by the Public Schools Act, 1868. In Sept. 1872, the school was opened in new buildings,

at Godalming, Surrey. The old buildings, adapted for the Merchant Taylors' (day) school, were opened by the prince of Wales, 6 April, 1875. The buildings for the poor "brethren" were also modified, and in Nov. entirely new arrangements for them were proposed. Bill proposing removal of the "brethren" (55), who are to become annuitants with additions; and erection of buildings on the site of the old buildings and land (four acres), a total reversal of Sutton's will, introduced; opposed; withdrawn 7 May, 1886. The "Charter-house past and present," by Dr. Wm. Haig Brown, head master, published 1879.

CHARTER-PARTY, a covenant between merchants and masters of ships relating to the ship and cargo, said to have been first used in England about 1243.

CHARTERS, granted to corporate towns to protect their manufactures by Henry I. in 1132; modified by Charles II. in 1683; the ancient charters restored in 1698. Alterations were made by the Municipal Reform Act in 1835. See *Magna Charta* and *Boroughs*. Ancient Anglo-Saxon charters are printed in Kemble's "Codex Diplomaticus," 1829.

CHARTISTS, the name assumed by large bodies of the lower classes, shortly after the passing of the Reform Bill in 1832, from their demanding the people's *Charter*.* the six points of which were *Universal Suffrage*, *Vote by Ballot*, *Annual Parliaments*, *Payment of the Members*, *the abolition of the Property Qualification* (which was enacted, June, 1858), and *Equal Electoral Districts*. In 1838 the chartists assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags. A proclamation was issued against them, 12 Dec. Their petition (agreed to at Birmingham, 6 Aug. 1838) was presented to parliament by Mr. T. Attwood, 14 June, 1839. They committed great outrages at Birmingham, 15 July, 1839, and at Newport (*which see*), 4 Nov. 1839. They held for some time a sort of parliament called the "National Convention," the leading men being Feargus O'Connor, Henry Vincent, Mr. Stephens, &c. On 10 April, 1848, they proposed to hold a meeting of 200,000 men on Kennington-common, London, to march thence in procession to Westminster, and present a petition to parliament; but only about 20,000 came. The bank and other establishments were fortified by military, preventive measures adopted, and not less than 150,000 persons of all ranks (including Louis Napoleon, afterwards emperor) were voluntarily sworn to act as special constables. The chartists dispersed after slight encounters with the police, and the monster petition, in detached rolls, was sent in cabs to the house of commons. From this time the proceedings of the chartists became insignificant.

CHARTREUSE, LA GRANDE, chief of the monasteries of the Carthusian order, situated among the rugged mountains near Grenoble, in France, was founded by Bruno of Cologne, about 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery after the restoration of 1815. In Nov. 1880 they declined to accept indulgence from the decrees for expelling the religious orders from France. The monks of the Grande Chartreuse locked themselves in their fortress and awaited expulsion by force. This took place on the 29th April, 1903.

CHARTS AND MAPS. Anaximander of Miletus is said to have been the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. The first tolerably accurate map of England was drawn by George Lilly, who died in 1559. Gerard Mercator published an atlas of maps in 1595; see *Mercator*. The daily papers published in their columns maps illustrating the wars of 1870-1, 1876-7, &c.

CHASSEPOT RIFLE, a modified needle-gun, and a breech-loader (named after its inventor, Alphonse Chassepot), adopted by the French government in 1866. In April, 1867, 10,000 had been issued to the troops. In his report on the battle of Mentana (*which see*), 3 Nov. 1867, gen. De Failly said, "The chassepot has done wonders." It was generally considered successful in the war, 1870-1. "The range of the chassepot being 1800 paces, and that of the needle-gun only between 600 and 700, the Germans in all their charges had to traverse 1200 paces before their arms could be used to purpose." Many Germans were armed with the chassepot after the surrender of the French army at Sedan, 2 Sept. 1870.

CHÂTEAUDUN, an old city, N. C. France, the residence of the heroic Dunois, who died 1468. Here were massacred, 20 July, 1183, about 7000 Brabançons, fanatic mercenaries who had been hired to exterminate the Albigenes by the cardinal Henry, abbot of Clairvaux, in 1181. They had become the scourge of the country, and the "Capuchons" were organised for their destruction. Châteaudun was captured by the Germans after a severe conflict of about nine hours, 18 Oct. 1870. Barricades had been erected in the town, and the Garde Mobile fought bravely. The town was re-occupied by the French, 6 Nov.

CHATHAM (Kent), a principal station of the royal navy; the dockyard, commenced by queen Elizabeth, has been greatly extended. The *Chatham Chest*, for the relief of the wounded and decayed seamen, originally established here by the queen and admirals Drake and Hawkins, in 1588, was removed to Greenwich in 1803. On 10 June, 1667, the Dutch fleet, under admiral De Ruyter, sailed up to this town, and burnt several men-of-war; but the entrance into the Medway is now defended by Sheerness and other forts, and additional fortifications were made at Chatham. On 8-11 Feb. 1861, a violent outbreak of the convicts was suppressed by the military, and many rioters flogged. About 1000*l.* worth of property was destroyed, and many persons were seriously hurt.

* Wm. Lovett, its alleged author, died Aug. 1877.

New docks and a basin, said to be the largest and finest in the world, opened by Mr. Goschen, 21 June, 1871. Additional docks completed, 1883. CHAT MOSS (Lancashire), a peat bog, twelve miles square, in most places so soft as to be incapable of supporting a man or horse, over which George Stephenson, the railway engineer, carried the Liverpool and Manchester railway, after overcoming difficulties considered invincible. The road (literally a floating one) was completed by 1 Jan. 1830, when the first experimental train, drawn by the Rocket locomotive, passed over it. See *Bogs*.

CHATTANOOGA (Tennessee). Near here the federal generals, Sherman and Thomas, defeated the confederate general Bragg, after storming the entrenchments, 24-25 Nov. 1863. Bragg retreated into Georgia, and Longstreet into Virginia.

The duty on foreign cheese, producing annually about 50,000*l.*, was taken off in 1860.

The Cheddar system of cheese-making, named after a village in Somersetshire, has been largely adopted in the British colonies and the United States during the present century.

CHELSEA (Middlesex). A council held here 27 July, 816. *Nicolas*. A theological college here, founded by James I. in 1609, was converted by Charles II. in 1682 to an asylum for wounded and superannuated soldiers. The erection was carried on by James II., and completed by William III. in 1690. The projector was sir Stephen Fox, grandfather of the orator C. J. Fox; the architect was sir Christopher Wren; and the cost 150,000*l.* In 1850 there were 70,000 *out-* and 539 *in-pensioners*.—The physic garden of sir Hans Sloane, at Chelsea, was given to the Apothecaries' company, 1721.—The Chelsea waterworks were incorporated, 1722.—The first stone of the Military Asylum, Chelsea, was laid by Frederick duke of York, 19 June, 1801.—The bridge, constructed by Mr. T. CHEMICAL SOCIETIES. One formed in London in 1780 did not long continue. The present Chemical society of London was established in 1841 (jubilee celebrated at Burlington house, 24 Feb. 1891) [Mr. J. J. Tustin gave 1,000 guineas to the society's Research fund, Jan. 1897], banquet to past presidents, prof. Royal commission appointed to inquire into the management of chemical works, to ascertain the effect of gases and vapours given off, and the means of prevention: the commissioners were lord Aberdare, earl Percy; professors Abel, A. Williamson, Roscoe, and others, 18 July, 1876. In their report, issued Aug. 1878, they recommended increased inspection and more stringent regulations. See *Alkalis*.

CHEMISTRY was introduced into Spain by the Moors, about 1150. The Egyptians and Chinese claim an early acquaintance with chemistry. The first chemists were the Alchemists (see *Alchemy*); but chemistry was not a science till the 17th century; during which its study was promoted by Bacon, Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of *Pneumatic Chemistry*, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Bergman, Stahl, Black, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, ammonia, &c.; and thus commenced a new chemical era. He was ably seconded by Cavendish, Scheele, Lavoisier, Chaptal, and others. The 19th century opened with the brilliant discoveries of Davy, continued by Dalton, Faraday, Thomson, &c. *Organic Chemistry* has been very greatly advanced by Berzelius, Liebig, Dumas, Laurent, Hofmann, Cahours, Frankland, Williamson,* and others, since 1830; see *Pharmacy, Elec-*

* In 1828 Wöhler produced artificially *urea*, a body hitherto known only as a product of the animal organism. Since then, acetic acid, alcohol, grape sugar, various essential oils, similar to those of the pine-apple, pear, garlic, &c., have been formed by combinations of

tricity, Galvanism. For the analytical processes termed "*Spectrum analysis*," invented by Kirchhoff and Bunsen (1861), and "*Dialysis*" (1861), and "*Atmolysis*" (1863), invented by Mr. T. CHEQUE BANK, opened in Pall Mall East, 23 July, 1873. It issued cheques for sums from 1*l.* upwards to suit persons not having a banker. The plan was due to Mr. James Hertz. He died 23 Feb. 1880. The bank is now (1903) in liquidation, owing to extensive forgeries of its cheques.

CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V. in 1418, and lost in 1450. Under the direction of Louis XIV., some works were erected here by the great Vauban, which with some shipping, &c., were destroyed by the British, 6, 7 Aug. 1758. The works, resumed by Louis XVI., were interrupted by the revolution. The breakwater, commenced in 1783, resumed by Napoleon I. about 1803, and completed in 1813, forms a secure harbour, affording anchorage for nearly the whole navy of France, and protected by strong fortifications. On 4, 5 Aug. 1858, the railway and the Grand Napoleon docks were opened, the latter in the presence of the queen of England and court. - CHICKAMAUGA** ("the stream of death"), near Chattanooga, Tennessee, North America. Near here the confederates under general Bragg, aided by Longstreet, totally defeated the federals under Rosencrans, 19, 20 Sept. 1863. The loss was severe on both sides. The credit of the victory was attributed to Longstreet; its fruitlessness to Bragg.
- CHICHESTER** (Sussex), built by Cissa, about 540. The cathedral was completed about 1108, burnt with the city in 1114, and rebuilt by bishop Seffrid about 1187. The present cathedral was erected during the 13th century. The spire fell 20 Feb. 1861; the foundation of a new one was laid 2 May, 1865, completed June, 1866. The cathedral re-opened after repairs, 14 Nov. 1867. The bishopric originated thus: Wilfrid, archbishop of York, compelled to flee by Egfrid, king of Northumberland, preached the gospel in this country, and built a church in the Isle of Selsey, about 673. In 681 Selsey became a bishopric, and so continued until it was removed to Chichester, then called Cissan-Caester, from its builder, Cissa, by Stigand, about 1082. CHICORY, the wild endive, or *Cichorium Intybus* of Linnaeus, grows wild in calcareous soils. It was for many years so largely mixed with coffee in England that it became a matter of serious complaint, the loss of revenue being estimated at 100,000*l.* a year. An excise order was issued, interdicting the mixture of chicory with coffee, 3 Aug. 1852. The admixture, however, has since been permitted, provided the word "chicory" be plainly printed on each parcel sold. In 1860 a duty of 3*s.* per cwt. was put upon English-grown chicory until April, 1861; it is now 13*s.* 3*d.* per cwt. (1903).

* The emperor Taou-Kwang, who died 25 Feb., 1850, during the latter part of his reign, became liberal in his views, and favoured the introduction of European arts; but his son, the late emperor, a rash and narrow-minded prince, quickly departed from his father's wise policy, and adopted reactionary measures, particularly against English influence. An insurrection broke out in consequence, Aug. 1850, and quickly became of alarming importance. The insurgents at first proposed only to expel the Tartars; but in March, 1851, a pretender was announced among them, first by the name of Tien-teh (Celestial Virtue), but afterwards assuming other names. He is stated to have been a native of Quang-si, of obscure origin, but to have obtained some literary knowledge at Canton about 1835, and to have become acquainted at that time with the principles of Christianity from a Chinese Christian, named Leang-afa, and also from the missionary Roberts in 1844. He announced himself as the restorer of the worship of the true God, Shang-ti, and derived many of his dogmas from the Bible. He declared himself to be the monarch of all beneath the sky, the true lord of China (and thus of all the world), the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin in Nov. 1860. His followers were termed *Tuepings*, "princes of peace," a title utterly belied by their atrocious deeds. The rebellion was virtually terminated, 18 July, 1864, by the capture of Nankin, the suicide of the Tien-Wang, and the execution of the military leaders.

† It was boarded by the Chinese officers, 12 men out of the crew of 14 being carried off and the national ensign taken down. Sir J. Bowring, governor of Hong-Kong, being compelled to resort to hostilities, applied to India and Ceylon for troops. On 3 March, 1857, the house of commons, by a majority of 19, censured sir John for the "violent measures" he had pursued. The ministry (who took his part) dissolved the parliament; but obtained a large majority in the new one.

CHIVALRY arose out of the feudal system in the latter part of the 8th century (*chevalier*, or knight, being derived from the *caballarius*, the equipped feudal tenant on horseback). From the 12th to the 15th century it tended to refine manners. The knight swore to accomplish the duties of his profession, as the champion of God and the ladies, to speak the truth, to maintain the right, to protect the distressed, to practise courtesy, to fulfil obligations, and to vindicate in every perilous adventure his honour and character. Chivalry expired with the feudal system. See *Knighthood and Tournaments*. By letters patent of James I. the earl-marshal of England had "the like jurisdiction in the courts of chivalry, when the office of lord high constable was vacant, as this latter and the marshal did jointly exercise," 1623.

CHLORAL HYDRATE, a crystalline compound of the marsh gas series, discovered by Liebig in 1831, which, when taken dissolved in water, produces deep sleep, but not insensibility to pain. This property was discovered by Oscar Liebreich, and reported to the French Academy of Sciences, 16 Aug. 1869. Its use requires great caution, particularly if weakness of the heart is suspected. The lamented death of prof. John Tyndall was caused by an overdose of chloral given by mistake for sulphate of magnesia, 4 Dec. 1893.

CHLORALUM, or chloride of alumina, a compound of chlorine and alumina, an antiseptic disinfectant, invented by Dr. Gamage about 1870. It is safe and efficacious, and useful in medicine for gargles, washing wounds, &c.

CHLORINE (Greek *chloros*, pale green), a gas first obtained by Scheele in 1774, by treating manganese with muriatic (hydrochloric) acid. Sir H. Davy, in 1810, stated this gas to be an element, and named it chlorine. Combined with sodium it forms common salt (chloride of sodium), and combined with lime it forms the bleaching powder and disinfectant, chloride of lime ; see *Bleaching*. In 1823 Faraday condensed chlorine into a liquid.

The supposed dissociation of oxygen from chlorine by heat by V. and H. Meyer of Zurich, was announced Aug. 1879. Afterwards chlorine was proved to exist in two similar states at high temperatures.

CHLOROFORM (the ter-chloride of the hypothetical radical formyl) is a compound of carbon, hydrogen, and chlorine, and was made from alcohol, water, and bleaching powder. It was discovered by Soubeiran in 1831, and independently by Liebig in 1832 ; and its composition was determined by Dumas in 1834. Chloroform was first applied as an anæsthetic experimentally by Mr. Jacob Bell in London, in Feb., and Dr. Simpson of Edinburgh in Nov. 1847 ; its jubilee was celebrated by the society of Anæsthetists, 18 Nov. 1897 ; and was administered in England on 14 Dec. 1848, by Mr. James Robinson, surgeon-dentist. A committee of the Royal Medical and Chirurgical Society in July, 1864, after examining statistics, reported that the use of anæsthetics had in no degree increased the rate of mortality.

By the invitation of the Nizam through the *Lancet*, Dr. Lauder Brunton arrived at Hyderabad, 21 Oct., 1889 ; and there with other medical men investigated experimentally on the peculiar action of chloroform. They came to the conclusion that the danger of its use was not specially due to its effect upon the heart, but upon respiration, which could be easily obtained by proper caution. The Nizam remitted 1,000*l.* for the expenses of the commission. *Lancet* Jan. March, 1890
 Full report issued (estimated cost 10,000*l.*), Dec. 1891 ; book published . . . Aug. 1896

CHRIST'S HOSPITAL (the *Blue-Coat* school) was established in conformity with a grant made by Henry VIII. in 1547, by Edward VI. 1553, on the site of the Grey Friars' monastery. A mathematical ward was founded by Charles II. 1672. The *Times* ward was founded in 1841. Large portions of the edifice having fallen into decay, it was rebuilt: in 1822 a new infirmary was completed, and in 1825 (25 April) the duke of York laid the first stone of the magnificent new hall. On 24 Sept. 1854, the master, Dr. Jacob, in a sermon in the church of the hospital, censured the system of education and the general administration of the establishment, and many improvements have since been made. Andrew Noble (engaged by sir William Armstrong) invented an apparatus for determining the velocity of a projectile in a gun; a second of time is divided into millionths, and the electric spark is employed in recording the rate of the passage. The apparatus was exhibited at Newcastle-on-Tyne in Aug. 1869, and in London in April, 1870.

CHURCH OF NORTH AMERICA was established in Nov. 1784, when bishop Seabury, chosen by the churches in Connecticut, was consecrated in Scotland. The first convention was held at Philadelphia in 1785. On 4 Feb. 1787, bishops Provost and White were consecrated at Lambeth. The centenary was celebrated at Lambeth, 4 Feb. 1887. Two American bishops, Lyman and Potter, were present. In 1851 there were 37 bishops; in 1903 there were, in the United States, 58 dioceses, 82 bishops, 27 missionary bishops, and 4,776 priests and deacons, see *Pan-Anglican Synod.*

After much discussion, for several years, the church convention passed a stringent canon against ritualism, 27 Oct. 1847.

CHURCH OF SCOTLAND, see *Bishops in Scotland.* On the abolition of Episcopacy, in 1638, Presbyterianism became the established religion. Its formulary of faith, said to have been compiled by John Knox, in 1560, was approved by the parliament and ratified in 1567, finally settled by an act of the Scottish senate in 1606, and secured by the treaty of union with England in 1707; see *Discipline, Patronage, and Bishops.* The church is regulated by four courts—the general assembly, the synod, the presbytery, and kirk sessions; see *Presbyterians.* For important secessions, see *Burghers* (1732), and *Free Church* (1843).

The first general assembly of the church was held 20 Dec. 1560.

The general assembly constitutes the highest ecclesiastical court in the kingdom; it meets annually in Edinburgh in May, and sits about ten days. It consists of a grand commissioner, appointed by the sovereign, and delegates from presbyteries, royal boroughs, and universities, some being laymen. To this court all appeals from the inferior ecclesiastical courts lie, and its decision is final.

Patronage was abolished after 1 Jan. 1875, by act passed 7 Aug. 1874.

CHURCH PATRONAGE, see *Patronage*.

CHURCH-RATES. The maintaining the church in repair belongs to the parishioners, who have the sole power of taxing themselves for the expense when assembled in vestry. The enforcement of payment, which is continually disputed by dissenters and others, belonged to the ecclesiastical courts. Many attempts were made to abolish

church-rates before Mr. Gladstone's "Compulsory Church-rate Abolition" Bill, passed 31 July, 1868.

Church-rate Abolition for Scotland repealed in the Commons (204-143) 11 July, 1877

CIBORIUM, in early Christian times, was a protection to the altar-table, first a tabernacle, and afterwards a baldachin over the altar, and also a canopy used at solemn processions. Ciborium also means the vessel in which the eucharist is received.

CIDER (*Zider*, German), when first made in England, was called wine, about 1284. The earl of Manchester, when ambassador in France, is said to have passed off cider for wine. It was subjected to the excise in 1763, *et seq.* The duty was taken off in 1830. Many orchards were planted in Herefordshire by lord Scudamore, ambassador from Charles I. to France. John Philips published his poem "Cider" in 1706. The National association of Cidermakers founded, in London, Oct. 1894. "Cider," a monthly periodical, appeared in 1895. Great increase of manufacture of cider in France, through failures of the grape crops; reported 1896.

CILICIA, in Asia Minor, partook of the fortunes of that country. It became a Roman province about 64 B.C., and was conquered by the Turks, A.D. 1387.

CIMBRI, a Teutonic race from Jutland, invaded the Roman empire about 120 B.C. They defeated the Romans under Cneius Papirius Carbo, 113 B.C.; the consul Junius Silanus, 109; the consul Cassius Longinus (who was killed) near the lake of Geneva, 107; and the united armies of the consul Cn. Mallius and the proconsul Servilius Caepio near the Rhone, 105. Their allies, the Teutones, were defeated by Marius in two battles at Aquæ Sextiæ (Aix) in Gaul; 200,000 were killed, and 70,000 made prisoners, 102 B.C. The Cimbri were defeated by Marius and Catulus, at Campus Raudius, when about to enter Italy; 120,000 were killed, and 60,000 taken prisoners,

101 B.C. They were afterwards absorbed into the Teutones or Saxons.

CIMENTO (Italian, *experiment*). The "Accademia del Cimento," at Florence, held its first meeting for making scientific experiments, 18 June, 1657. It was patronised by Ferdinand, grand duke of Tuscany. The Royal Society of London was founded in 1660, and the Academy of Sciences at Paris in 1666. The *Nuovo Cimento*, a scientific periodical, published at Pisa, began in 1855.

CINCHONA, or **CHINCHONA**, see *Jesuits' Bark*.

CINCINNATI. A society established by officers of the American army soon after the peace of 1783, "to perpetuate friendship, and to raise a fund for relieving the widows and orphans of those who had fallen during the war." On the badge was a figure of Cincinnatus as symbolising Washington and other patriots who had left their rural affairs to fight for their country. The people dreaded military influence, and the society dissolved itself.

CINCINNATI, the chief city of the state of Ohio, North America, founded 1789. This flourishing city desolated by an inundation caused by the rising of the river Ohio, 13 Feb. 1883. Several lives were lost, and about 50,000 rendered homeless. Ample relief afforded. About 50 persons killed and 150 wounded in an attack on the gaol to execute murderers (especially Wm. Berner); new courthouse burnt, 28-30 March, 1884; one regiment refused to march. Ten persons killed by a tramway accident, 15 Oct. 1889. Population in 1880, 255,139; in 1890, 296,908; 1900, 405,000.

CINNAMON, a species of laurel, is mentioned among the perfumes of the sanctuary (*Exodus xxx. 23*) 1491 B.C. It was found in the American forests by don Ulloa, 1736, was cultivated in Jamaica and Dominica 1788, and is now grown in Ceylon.

CINQUE-CENTO (five hundred); *ter cento*, &c.; see note to article *Italy*.

CINQUE PORTS, on the south coast of England, were originally *five* (hence the name)—Dover, Hastings, Hythe, Romney, and Sandwich; Winchelsea and Rye were afterwards added. *Jeake*. Their jurisdiction was vested in barons, called wardens. These ports, instituted by Saxon monarchs, were constituted by William I. and succeeding kings, who required them to supply ships to defend the coast. Nearly all the harbours, except Dover, have been destroyed by the action of the sea. The latest lord-wardens: the duke of Wellington, 1828-52; the marquis of Dalhousie, 1852-60; lord Palmerston, 1861-65; earl Granville, appointed Dec. 1865, died 31 March, 1891; W. H. Smith, May, died 6 Oct.; the marquis of Dufferin and Ava, about 4 Nov. 1891; resigned; the marquis of Salisbury, Oct. 1895; died 22 Aug. 1903. Their peculiar jurisdiction was abolished in 1855.

CINTRA (Portugal). Here was signed an agreement on 22 Aug. 1808, between the French and English the day after the battle of Vimieira. As it contained the basis of the convention signed on 30 Aug. following, it has been termed the convention of Cintra. By it Junot and his army were permitted to evacuate Portugal free, in British ships. The convention was publicly condemned, and a court of inquiry was held at Chelsea, which

exonerated the British commanders. Both Wellington and Napoleon justified sir Hew Dalrymple.

CIPHER, a secret manner of writing. Julius Caesar and Augustus when writing secret despatches are said to have employed the second or third letter instead of the first, and the same sequence with regard to the others. This cipher was in use till the reign of Sixtus IV. (1471-84), when the secret was divulged by Leon Battista Alberti, and a new sort of cipher sprang up. The father of Venetian cipher was Zuan Soro, who flourished about 1516. *Rawdon Brown*. Cipher telegrams, see *Transvaal*, 29 April, 1896.—See *Cryptograph*.

CIRCASSIA (Asia, on N. side of the Caucasus). The Circassians, said to be descended from the Albanians, were unsubdued, even by Timour. In the 16th century they acknowledged the authority of the czar Ivan II. of Russia, and about 1745, the princes of Kabarda took oaths of fealty. Many Circassians became Mahometans in the 18th century.

CIRCENSIAN GAMES were combats in the Roman circus (at first in honour of Consus, the god of councils, but afterwards of Jupiter, Neptune, Juno, and Minerva), said to have been instituted by Evander, and established at Rome, 732 B.C. by Romulus. Tarquin named them *Circensian*; their celebration continued from 4 to 12 Sept.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 1 to 3 and 72 decimals; and Lagny (1719) as 1 to 3 and 122 decimals.

CIRCLES OF GERMANY (formed by Maximilian I. about 1500, to distinguish the members of the diet of the empire) were, in 1512, Franconia, Bavaria, Upper Rhine, Suabia, Westphalia, and Lower Saxony; in 1512, Austria, Burgundy, Lower Rhine, the Palatinate, Upper Saxony and Brandenburg were added. In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, in 1806 (*which see*).

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 1176. They were afterwards divided into four, with five justices to each division, 1180. *Rapin*. They have been frequently altered. England and Wales were formerly divided into eight—each travelled in spring and summer for the trial of civil and criminal cases, the larger towns are visited in winter for trials of criminals only; this is called "going the circuit." The circuits were settled by order in council, 5 Feb. 1876. There are monthly

sessions for the city of London and county of Middlesex.

The circuit system was much modified by the council of judges, with the object of retaining more judges in London, and economising their labour, 10 June, 1884.

The system was again changed, three circuits being adopted in place of four with a few exceptions; (civil and criminal Feb., July; criminal Oct.) Dec. 1887.

CIRCULAR IRONCLADS. The design is attributed to the Russian admiral Popoff; died March, 1808; one of these, named after himself, was launched at the port of Nicolaieff, 7 Oct. 1875. The admiral stated that he derived the idea from the works and views of Mr. E. J. Reed, late constructor of the British navy, who has expressed his approbation of the admiral's works.

CIRCULATING LIBRARY. Stationers lent books on hire in the middle ages. The public circulating library in England, opened by Samuel Fancourt, a dissenting minister of Salisbury, about 1740, failed; but similar institutions at Bath and in London succeeded, and others were established throughout the kingdom. There was a circulating library at Crane-court, London, in 1748, of which a catalogue in two vols. was published.—No books can be taken from the British Museum except for judicial purposes, but the libraries of the Royal Society and the principal scientific societies, except that of the Royal Institution, London, are circulating.—The London Library (circulating) which was founded 24 June, 1840, is of great value to literary men.—Of the subscription libraries that founded by Chas. E. Mudie, in New Oxford-street, is remarkable for the large quantity and good quality of the books: several hundreds, sometimes thousands, of copies of a new work being in circulation. It began in 1842, and grew into celebrity in Dec. 1848, when the first two volumes of Macaulay's History of England were published, for which there was an unprecedented demand, supplied by this library. The hall was opened in Dec. 1860. Mr. C. E. Mudie died 28 Oct. 1890, aged 72. Other libraries are:—The Grosvenor Gallery Library; W. H. Smith (exchanges made at railway stations); Mitchell's Royal Library; Law Lending Library; Day's Library, and Cawthorn and Hutt's Library. The "Tabard," with numerous exchange depôts, 1903.

CIRCULATION OF THE BLOOD, see *Blood*.

CIRCUMCISION (instituted 1897 B.C.) was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christ), originally the octave of Christmas, is mentioned about 487. It was introduced from the Roman missal into the first English prayer-book in 1549.

CIRCUMNAVIGATORS. Among the most daring human enterprises at the period when it was first attempted, was the circumnavigation of the earth in 1519-22.

Magellan or Magalhaens, a native of Portugal, in the service of Spain, sailed from San Lucar, 20 Sept. 1519; with three ships passed the Straits named after him, 28 Nov. 1520; he was killed in a conflict on the Philippine Isles, 17 April, 1521; Juan Sebastian del Cano in the *Vittoria*, the only remaining ship of five, reached San Lucar 6 Sept. 1522

CIRCUS (Greek, Hippodrome). There were eight (some say ten) buildings of this kind at Rome; the largest the *Circus Maximus*, was built by the elder Tarquin, 605 B.C. It was an oval figure: length three stadia and a half, or more than three English furlongs; breadth 960 Roman feet. It was enlarged by Julius Cæsar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Cæsar introduced into it large canals of water, which could be quickly covered with vessels, and represent a sea fight. *Pliny*; see *Amphitheatres, Factions and Hippodrome*.

CISALPINE REPUBLIC, including the territories of Milan, Mantua, Modena, Bergamo, Ferrara, Bologna, Ravenna, &c. (N. Italy), formed by the French in May, 1797, from the *Cispadane* and *Transpadane* republics, acknowledged by the emperor of Germany by the treaty of Campo Formio (*which see*), 17 Oct. following. It received a new constitution in Sept. 1798; was remodelled, and named the Italian republic, with Napoleon Bonaparte president, 1802; and merged into the kingdom of Italy in March, 1805; see *Italy*.

CISPADANE REPUBLIC, with the Transpadane republic, merged into the Cisalpine republic, Oct. 1797.

CISTERCIANS (the order of Citeaux), a powerful order of monks founded about 1098 by Robert, a Benedictine, abbot of Molesme, named from Citeaux, in France, the site of the first convent, near the end of the 11th century. The monks observed silence, abstained from flesh, lay on straw, and wore neither shoes nor shirts. They were reformed by St. Bernard; see *Bernardines*. The Feuillants, and the nuns of Port Royal, the Recollets (reformed Cistercians), and the monks of La Trappe, emanated from this order. Their earliest establishment in England (1128) was Waverley Abbey, Farnham.

CITATE. The Russian general Gortschakoff, intending to storm Kalafat, threw up redoubts at Citate, close to the Danube, which were stormed by the Turks under Omer Pacha, 6 Jan. 1854. The fighting continued on the 7th, 8th and 9th, when the Russians were compelled to retire to their

former position at Krajowa, having lost 1500 killed and 2000 wounded. The loss of the Turks was estimated at 338 killed and 700 wounded.

CITIZEN. It was not lawful to scourge a citizen of Rome. *Livy*. In England a citizen is a person who is free of a city, or who doth carry on a trade therein. *Camden*. Various privileges have been conferred on citizens as freemen in several reigns.—The wives of citizens of London (not being aldermen's wives, nor gentlewomen by descent) were obliged to wear miniver caps, being white woollen knit three-cornered, with the peaks projecting three or four inches beyond their foreheads; aldermen's wives made them of velvet, 1 Eliz. 1558. *Stow*.—On 10 Oct. 1792, the convention decreed that "citoyen" and "citoyenne" should be the only titles in France.

CITY. (Latin *civitas*, French *cité*, Italian *città*.) Originally signified a state. Cities were incorporated in Spain, France, and England in the 11th and 12th centuries. A city has been usually, but not always, the seat of a bishop. Truro and St. Albans were made cities in 1877, Newcastle in 1882, and Liverpool in 1883, having become bishoprics. Birmingham was made a city, Jan. 1889.

The chief of each clan wears two eagle's feathers in his bonnet, in addition to the badge. *Chambers*. A history of the clans by Wm. Buchanan was published in 1775.

CLAN-NA-GAEL (brotherhood of Gaels), an Irish secret oath-bound society, originating out of the Fenian brotherhood in 1870, it became the heart of the Irish National League in the United States, of which it was the extreme violent part. Its action much restrained by the influence of Messrs. Parnell, Sexton, and other members of the Irish Parliamentary party who originated a "new departure." It obtained the support of the Irish peasantry by promising to obtain them their farms without rent. The ultimate object of the Clan-na-Gael is said to be the establishment of Ireland as a perfectly independent state; it is termed a dynamite party ("Parnellism and Crime," series III., June, 1887).

For murder of Dr. Cronin, &c., see *United States*, 1889. The Clan-na-Gael at Chicago declare against any form of violence reported Feb. 1890.

CLAPHAM SECT, a name given to the evangelical party in the Church of England, first by the rev. Sydney Smith, in the latter part of the 18th century. The rev. Henry Venn was vicar of Clapham, and several of its eminent members lived there. The sect included Wm. Wilberforce, Zachary Macaulay (father of the historian), and the Rev. W. Romaine.

Memoirs of some appear in sir James Stephen's "Ecclesiastical Biography," 1849.

CLARE AND CLARENCE (Suffolk). Richard de Clare, earl of Gloucester, is said to have seated here a monastery of the order of Friars Eremites, the first of this kind of mendicants who came to

England, 1248. *Tanner*. Lionel, third son of Edward III., becoming possessed of the honour of Clare, by marriage, was created duke of *Clarence*. The title has ever since belonged to a branch of the royal family.

DUKES OF CLARENCE.

1362. Lionel, born 1338, died, 1369; see *York*.
 1411. Thomas (second son of Henry IV.), born 1389; killed at *Baugé*, 1421.
 1461. George (brother of Edward IV.), murdered, 1478.
 1789. William (third son of George III.), afterwards king William IV.
 1890. Albert Victor Christian Edward, eldest son of the prince of Wales, see *under Wales*, created duke of Clarence and Avondale and earl of Athlone, about 23 May; died 14 Jan., 1892. See *England*, 1892.

CLARE was the first place in Ireland since 1689 that elected a Roman Catholic M.P.; see *Roman Catholics*. At the election, held at Ennis, the county town, Mr. Daniel O'Connell was returned, 5 July, 1828. He did not sit till after the passing of the Catholic Emancipation Act, in 1829, being re-elected 30 July, 1829.

CLARE, NUNS OF ST., a sisterhood, called *Minoreesses*, founded in Italy by St. Clare and St. Francis d'Assisi, about 1212. They were also called *Urbanists*; their rule having been modified by pope Urban IV., who died 1264. This order settled in France about 1260, and in England, in the *Minories* without Aldgate, London, about 1293, by Blanche, queen of Navarre, wife of Edmund, earl of Lancaster, brother of Edward I. At the suppression, the site was granted to the bishopric of Bath and Wells, 1539. *Tanner*.

CLAREMONT (Surrey), the residence of the princess Charlotte (daughter of the prince-regent, afterwards George IV., married to prince Leopold of Saxe-Coburg, 2 May, 1816): here she died in childbirth, 6 Nov. 1817. The house was built by sir John Vanbrugh, and was the seat successively of the earl of Clare, of lord Clive, lord Galloway, and the earl of Tyrconnel. It was purchased of Mr. Ellis by government for 65,000*l.* for the prince and princess of Saxe-Coburg; and the former, the late king of Belgium, assigned it to prince Albert in 1840. The exiled royal family of France resided at Claremont, 4 March, 1848; and the king, Louis Philippe, died there, 29 Aug. 1850. Bought by Queen Victoria, March, 1882. The duchess of Albany lived here for a time, returned 27 April, 1903.

CLARENCEUX, the second king-at-arms, said to have been nominated by Thomas, son of Henry IV., created duke of Clarence, 1411. His duty was to arrange the funerals of baronets, knights, esquires, and gentlemen, on the south side of the Trent, from whence he is also called *sur-roy* or *south-roy*.

CLARENDON, CONSTITUTIONS OF, were enacted at a council held 25 Jan. 1164, at Clarendon, in Wiltshire, to retrench the power of the clergy. They led to Becket's quarrel with Henry II., were annulled by the pope, and abandoned by the king, April, 1174. The following is approximative:

- I. All suits concerning advowsons to be determined in civil courts.
- II. The clergy accused of any crime to be tried by civil judges.
- III. No person of any rank whatever to be permitted to leave the realm without the royal licence.
