

SIERRA LEONE and LIBERIA are officially EBOLA-FREE

In GUINEA new cases were reported in the second half of March

*As of 30 March there is one more confirmed case in Guinea (ECHO)

SITUATION

- The **29 March 2016**, WHO declared the end of the Public Health Emergency of International Concern regarding the EVD outbreak in West Africa although, as expected, new clusters continue to occur.
- A new cluster of Ebola cases has been detected in the village of Koropara, near N'Zerekore in Forest **Guinea**. As of **30 March**, there are **five confirmed and three probable cases**. Out of these, seven have died.
- On **17 March** Human-to-human transmission, linked to the most recent cluster of two cases of EVD first reported from **Sierra Leone** on **14 January**, will be declared to have ended.
- 14 January** marks the end of the EVD transmission linked to the most recent cluster of cases in **Liberia**.
- To manage the **residual risks of Ebola reintroduction or re-emergence**, WHO has supported the implementation of enhanced surveillance systems
