THE NEW YORK MUNICIPAL GAZETTE.

No. 1.] -41 NEW YORK, THURSDAY, MARCH 11, 1841. — June 1 - 1846 [Vol. I.

PUBLISHED WEEKLY, ON THURSDAYS,
BY THE
ANTI-ASSESSMENT COMMITTEE,
Edited by E. Meriam.
Office, No. 8 Wall-street, (up stairs.)

In introducing this paper to the notice of the citizens of this metropolis, it is deemed necessary to make some few remarks as to the object of the publication. The city of New York has become the largest, the most populous, and most wealthy city on this continent. The increase of population and business has been rapid, and is still on the onward course. We look back to what it was but a few years since, and compare what it then was with what it is now, and are astonished, and almost ask ourselves what will it be, at this rate, a century hence. What has been, we already know, but what is to be, time alone can unfold. Cities, vastly more populous and more extensive, have been reared and flourished in the old world, and have long since gone to ruins, and not a vestige remains to mark the spot where once stood the mighty walls of princely palaces; the proud city, once the scene of grandeur and splendor, has become a scene of desolation and of ruin. The city of New York is in its infancy. Two hundred and thirty years ago, this whole island was in the entire possession of the red men of the forest, and although numerous and powerful, a change, a mighty change has passed over them; they are gone, and not one of that nation now lives upon the earth, and probably not a drop of their blood runs in the veins of any human being. The people who succeeded them have come and gone, and have been followed by still another, the subjects of a mighty power, who, after the space of little more than a century, have been compelled to yield to the present possessors. In 1696, the entire population of New York, including whites, Indians and negroes, did not exceed 6000 souls,—and now it contains one third of a million of people. The past, as well as the present history of the city, is interesting and valuable; and there are many things which relate to its past and present government and condition, which ought to be placed in a condensed and connected form before the public. The strife of political parties, and the extravagant anticipations of those engaged in real estate speculations, have produced a state of things in the city of New York greatly to be deplored. It will not now help the difficulty to blame and censure individuals; both political parties have been (I may say alike) in fault, and it would seem now, as to the welfare and good government of the city, that they should "unite in what they agree in, rather than fall out as to what they differ about." The mischiefs which exist can be remedied, and the property of the citizens protected from such a state of things in future.

The powers claimed by the Mayor and Common Council, and officers of the corporation now, as well as heretofore, are of an extraordinary character, and certainly require to be at once defined and restricted. It is not usual for municipal corporations in any country to exercise power and control over private property. This power is not possessed even by governments which are sovereign. The cottage of the humblest individual in our land should be as sacred and as much protected as that of the most powerful monarch on the earth; such is the principle on which our general and state government is founded, and such is the genius of our institutions.

The Corporation of the City of New York, a mere municipal corporation, claims to possess, and actually exercises, power over the property of the citizens, that no monarch in any civilized nation on earth would presume to claim, or dare attempt to exercise. This corporation, a mere creation of the statute, to claim to possess powers greater than the very body which created it! what absurdity. The exercise of this power is dangerous to civil liberty and destructive to the welfare and prosperity of the city. The partial, oppressive and excessive assessing of private property, under the pretext of making public improvements, has been carried to great extremes, and such has been the effect, that in very many instances estates have been by these means actually confiscated. There is no safety in titles to real estate, under such a state of things, and no security in investments made in real estate or in securities upon real estate. A state of things of a very extraordinary character now exists; state stocks and bank stocks afford very little security to capitalists; losses in these stocks have been immense, and those who have money from which they wish to derive a moderate and certain income, would now invest largely in real estate, but the power claimed and actually exercised over the real estate on this island by the corporation is so great as actually to make it almost valueless, and divest it of that permanent and certain security that it would otherwise possess. This state of things ought not to exist longer, but should be at once effectually remedied. It is the great doctrine of the common law, that municipal corporations have but few powers beyond those of managing their corporate property and franchises, and appointing and removing their officers.

It is proposed to publish this paper in twelve numbers of sixteen pages each, in the present size, convenient to be bound into a book. It is designed to give the Constitution of the United States, the constitution of this state, and the laws of the state relative to the city, which includes the city charter, also the ordinances of the corporation, and such general information in relation to the city and city government as may be thought to be useful to the citizens, as well as the officers of the corporation, and also to set forth in considerable detail, the assessment abuses, the mischiefs of which, when extensively known, and a remedy pointed out, will be remedied, and the past to some extent corrected. Many of the improvements, so called, have been asked for by speculators, as is said. There are two classes of persons called speculators; one of these classes deal in lots, and the other in contracts and fees. There are, however, another class of persons, who are very numerous, who neither asked for these mis-called improvements, nor approved of them, but whenever they had opportunity, opposed them; these persons are sufferers—great sufferers—many of these have been ruined. This latter class of persons will be presented in this paper, and such public documents placed before the people in relation to them as will produce a conviction in the minds of all our disinterested, as well as public-spirited citizens. There are but few citizens, and very few, who are opposed to improvements, but there are vast numbers, in fact nine tenths of this community, who are wholly opposed to the present system of making improvements, and to the enormous and most glaring abuses which have been practised in these proceedings. It is not necessary in this notice to say much—the contents of this paper will speak fully on this matter, and it will be our endeavor that it shall commend itself to the good opinion of the good men of both political parties. The articles which have been published in the newspapers of this city for a year past, and signed Anti-Assessment, were from the pen of the editor of this Gazette.

ASSESSMENTS AND TAXES.

In the month of May, 1829, the citizens of New York, at an election held in the different Wards, elected by ballot sixty-five delegates (five from each ward) to form a convention to amend the City Charter. These delegates met in convention in June, 1829. In the journal of their proceedings, as published with the notes of Chancellor Kent, are the following doings as to *Assessments and Taxes.* These deserve a careful reading.

IN CONVENTION, July 23d, 1829.

"Mr. John Duer offered the following additional section to come in between sections 9 and 10, as reported by the committee.

"Every law, ordinance or resolution, which shall be introduced in either Board, and also every report of a committee recommending any public improvement, or any appropriation of public monies, *shall be published without delay in all the newspapers employed by the corporation.*

"Mr. M. M. Noah offered the following amendment:

"And all reports of committees which shall recommend any specific improvement, involving the appropriation of public monies, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the Board, under the authority of the Common Council, in the daily newspapers.

"Mr. Whiting moved that the further consideration of the 9th section be, for the present, postponed.

"The chairman having put the question on the motion, it was determined in the negative.

"Mr. Duer then moved, that the consideration of the additional section offered by him, and also of the amendment thereto, offered by Mr. Noah, be postponed.

"The chairman having put the question on Mr. Duer's motion for postponement, the same was determined in the affirmative."

JULY 29, 1829.

"Mr. Noah made a motion, that the committee of the whole do re-consider the 6th section of the report of the committee of fourteen; and the chairman having put the question on Mr. Noah's motion, the same was determined in the affirmative.

"On motion of Mr. Noah, the committee of the whole then proceeded to consider the said 6th section offered by him in convention on the 23d instant.

"Mr. Hedley made a motion to amend the amendment of Mr. Noah, by adding after the word 'Board' in the third line thereof, the words '*in one or more of the daily newspapers,*' and to strike out in the last line the words '*in the daily newspapers.*' Whereupon Mr. Noah assented to the said amendment for striking out.

"Mr. Stephen Allen made a motion to amend the amendment offered by Mr. Noah, by adding after the word '*all*' in the first line, the words '*resolutions and.*

"And the chairman having put the question on Mr. Allen's amendment, the same was determined in the affirmative.

"Mr. Van Buren made a motion to amend the amendment of Mr. Noah, by adding at the end thereof the words '*in all the newspapers employed by the corporation.*'

"Whereupon Mr. Hedley withdrew his amendment.

"Mr. John Hone made a motion to amend the said amendment of Mr. Noah, by adding at the end thereof the words '*and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.*'

"The chairman having put the question on Mr. J. Hone's amendment, the same was determined in the affirmative.

"The chairman then read the 6th section as amended, in the following words:

"6. *The Boards shall meet in separate chambers,* and a majority of each *shall* be a quorum to do business. Each board *shall* appoint a president from its own bo-

dy, and *shall* also choose its clerk and other officers, determine the rules of its own proceedings, and be the udge of the qualifications of its own members. Each board *shall keep a journal of its proceedings*, and the doors of each *shall* be kept open, except when the public welfare shall require secrecy; *and all resolutions and reports of committees which* SHALL *recommend any specific improvement involving the appropriation of public monies, or taxing or assessing the citizens of said city,* SHALL *be published immediately after the adjournment of the board, under the authority of the Common Council, in all the newspapers employed by the corporation; and whenever a vote is taken in relation thereto the ayes and noes shall be called and published in the same manner.*"

SEPT. 28, 1829.

"Mr. Philip Hone offered the following resolution:

"Resolved, That the committee appointed under the third resolution of the proceedings of this day, be *instructed to prepare an address to the people, explaining the provisions of the act now to be adopted*, and urging their sanction to the same.

"Mr. President put the question, shall this resolution pass? and it was determined in the affirmative."

The 30th day of October, 1829, the President and fifty-seven members of the convention signed and published an address to the people, in pursuance of the foregoing resolution, *explaining the provisions of the proposed new Charter*, and recommending its acceptance by the people to whom it was submitted, at the then pending election. This address contains this paragraph in relation to assessments.

"Another guard to the City Treasury is provided, by recommending that all the bills or resolutions involving the appropriation of public moneys or imposing *assessments*, shall be immediately published in the newspapers; and whenever a vote shall be taken thereon, the ayes and noes shall be called, and the names of the members with their votes shall be published. This it is trusted will secure at once publicity and notice to all concerned, and the strong influence of personal responsibility on the vote of every individual member. All propositions involving *assessments*, or burdens upon individuals, will be brought to the knowledge of those interested, so as to give them a chance of being heard. Careful and deliberate legislation, strict accountability, judicious economy, and *perfect publicity*,—these are the remedies which the Convention have sought against, the evils and abuses to which all wealthy city governments are subject, of which *this* city has felt its share, and of which the public voice has at different times loudly complained."

The provisions of the charter were approved by the people as expressed by their vote by ballot; one alteration, however, was made, viz.: to limit the term of service of the aldermen to one year instead of two.

Thus, it will be seen, the mischief the convention intended to and made provisions to guard against was discovered and known, and the remedy they provided is the seventh section of the act. It is clearly to be seen by the amendments to Mr. Noah's resolution that he convention did not mean "one or more of the daily newspapers," nor the uncertain and undefined provision of "the daily papers," but all the newspapers employed by the corporation, under the authority of the common council, and immediately after the adjournment of the board. This is a plain matter, and so plain that it seems impossible to be misconstrued. It will be seen in the seventh section of the first act of the constitution of the United States, is a provision analogous to that of the seventh section, which has been always held to be imperative. This is an important question, and will be treated upon in our next number of this paper. I will, however, here quote some remarks of Judge Story of the Supreme Court of the United States, as to construction of the constitution and of statutes.

"The first and fundamental rule in the interpretation of all instruments is, to construe them according to the sense of the terms, and the intention of the parties. Mr. Justice Blackstone has remarked, that the intention of a law is to be gathered from the words, the context, the subject-matter, the effects and consequence, or the reason and spirit of the law. He goes on to justify the remark by stating, that words are generally to be understood in their usual and most known signification, not so much regarding the propriety of grammar, as their general and popular use; that if words happen to be dubious, their meaning may be established by the context, or by comparing them with other words and sentences in the same instrument; that illustrations may be further derived from the subject-matter, with reference to which the expressions are used; that the effect and consequence of a particular construction is to be examined, because, if a literal meaning would involve a manifest absurdity, it ought not to be adopted; and that the reason and spirit of the law, or the causes, which led to its enactment, are often the best exponents of the words, and limit of their application."

Where the words are plain and clear, and the sense distinct and perfect arising on them, there is generally no necessity to have recourse to other means of interpretation. It is only when there is some ambiguity or doubt arising from other sources, that interpretation has its proper office. There may be obscurity, as to the meaning, from the doubtful character of the words used, from other clauses in the same instrument, or from incongruity or repugnancy between the words, and the apparent intention derived from the whole structure of the instrument, or its avowed object; in all such cases interpretation becomes indispensable.

Rutherforth has divided interpretation into three kinds, literal, rational, and mixed. The first is, where we collect the intention of the party from his words only, as they lie before us. The second is, where his words do not express that intention perfectly, but exceed it, or fall short of it; and we are to collect from probable or rational conjectures only. The third is, where the words, though they do express the intention, when they are rightly understood, are themselves of doubtful meaning; and we are bound to have recourse to the like conjectures to find in what sense they are used. In literal interpretation the rule observed is, to follow that sense in respect both of the words, and of the construction of them, which is agreeable to common use, without attending to etymological fancies or grammatical refinements. In mixed interpretation, which supposes the words to admit of two or more senses, each of which is agreeable to common usage, we are obliged to collect the sense, partly from the words, and partly from conjecture of the intention. The rules then adopted are, to construe the words according to the subject matter, in such a sense as to produce a reasonable effect, and with reference to the circumstances of the particular transaction. Light may also be obtained in such cases from contemporary facts, or expositions; from antecedent mischiefs; from known habits, manners, and institutions; and from other sources almost innumerable, which may justly affect the judgment in drawing a fit conclusion in the particular case.

Interpretation also may be strict or large; though we do not always mean the same thing, when we speak of a strict or large interpretation. When common usage has given two senses to the same word, one of which is more confined, or includes fewer particulars than the other, the former is called its strict sense, and the latter, which is more comprehensive, or includes more particulars, is called a large sense. If we find such a word in a law, and we take it in its more confined sense, we are said to interpret it strictly. If we take it in its more comprehensive sense, we are said to interpret it largely. But whether we do the one or the other, we still keep to the letter of the law. But strict and large interpretations are frequently opposed to each other in a different sense. The words of a law may sometimes express the meaning of the legislator imperfectly. They may, in their common acceptation, either include more or less than his intention. And as, on the one hand, we call it a strict interpretation, where we contend that the letter is to be adhered to precisely; so, on the other hand, we call it a large interpretation, where we contend the words ought to be taken in such a sense, as common usage will not fully justify; or that the meaning of the legislator is something different from what his words in any usage would import. In this sense, a large interpretation is synonimous with what has before been called a rational interpretation. And a strict interpretation, in this sense, includes both literal and mixed interpretation; and may, as contra-distinguished from the former, be called a close, in opposition to a free or liberal interpretation.

"It is an established rule of construction, where a phrase will bear either of two meanings, to give it that which will allow some meaning to other parts of the instrument, and not that which will render all others useless.

"One of the best established rules of interpretation—one which common sense and reason forbid us to overlook, is, that when the object of the power is clearly defined by its terms, or avowed in the context, it ought to be construed so as to obtain the object and not defeat it. The circumstance that so construed, the power may be abused, is no answer. All powers may be abused; but are they then to be abridged by those who are to administer them, or denied to have any operation? if the people frame a constitution, the rulers are to obey it. Neither rulers nor any other functionaries, much less any private persons, have a right to cripple it, because it is according to their views inconvenient, or dangerous, unwise or impolitic; of narrow limits, or of wide influence.

"The common principle of interpretation would seem to instruct us, that the different parts of the same instrument ought to be so expounded, as to give meaning to every part that will bear it. Shall one part of the same sentence be excluded altogether from a share in the meaning; and shall more doubtful and indefinite terms be retained in their full extent, and clear and precise expressions be denied any signification? Nothing is more natural or common, than first to use a general phrase, and then to qualify it by a recital of particulars.

"Interpretation would here desert its proper office—that, which requires, that every part of the expression ought, if possible, to be allowed some meaning to be made to conspire to some common end.

"Now it is not too much to say, that in a constitution of governments, framed and adopted by the people, it is a most unjustifiable latitude of interpretation to attach to any clause, if it be sensible in the language, in which it is expressed, and in the place which it stands. If words are inserted, we are bound to presume that they have some definite object and intent; and to reason them out of the constitution upon arguments *ab inconvenienti*, (which to one mind may appear wholly unfounded, and to another wholly satisfactory,) is to make a new constitution, not to construe an old one. It is to do the very thing which is so often complained of, to make a constitution to suit our own notions and wishes, and not to construe that which the people have given to the country.

"Having thus disposed of the question, what is the true interpretation of the clause, as it stands in the text of the constitution, and ascertained that the power of taxation, though general, as to the subjects to which it may be applied, is yet restrictive, for the purposes for which it may be exercised; it next becomes matter of inquiry, what were the reasons for which this power was given, and what were the objections to which it was deemed liable."

The above quotations from Judge Story, of the Supreme Court of the United States, in commenting upon the Constitution of the United States, may be applied to the *seventh section* of the charter or constitution of the city. The charter of the city is a statute, and as such must be construed strictly.

ASSESSMENTS.

The assessment for the pretended opening of the Seventh Avenue, from 21st Street to 129th Street, is a most extraordinary proceeding. A petition was presented to the common council some five or more years ago, signed by thirty persons, few of whom were interested in the land to be affected by such proceeding. Upon this petition the common council proceeded to act. In February, 1839, the supreme court confirmed the report of the commissioners of estimate and assessment for the opening of this avenue. The amount of awards made to the owners of land required to be taken for the opening of this avenue, is stated at $23,141 41. Since the confirmation of this report there has been paid by the street commissioner of the city of New York, the large sum of $12,435 70, fees and expenses for making the estimate, &c., and in addition to this the very large sum of $1,115 is to be paid for collecting the assessment. This large sum of fees is made up of the following lesser sums, viz.: counsel fees and court charges $3,976 77; surveyors' fees $2,801; commissioners' fees $4,920; room hire $110; clerk hire $250; carriage hire $30; stationery, &c. $48. The sum paid the commissioners is, for each of the three commissioners $1,640, which at the rate of four dollars per day, the highest price allowed by law for every day actually employed, &c. is pay for *sixteen months*' services for each commissioner, and one dollar per day room hire for the same time. The other charges are equally extravagant. Three competent men could, in ten days time, make the estimate and assessment for opening the 7th Avenue from 21st to 129th Street. A great portion of the land through which it is laid out is held in large tracts. This avenue is not yet open, and several persons who have been assessed have taken proceedings to set the assessment aside.

Ninth Avenue, from 45th Street to the Bloomingdale Road.—The assessments for the pretended opening of this avenue are of a singular description. Two entire blocks belonging to the corporation of the city of New York, and situate on the east side of the avenue between 63d and 65th streets, are assessed twenty-five dollars each——; the land opposite, or the west side of the avenue, belonging to other owners, is assessed fifty dollars each block; two other blocks on the east side of the avenue, between 61st and 63d streets, are assessed *eight hundred and fifty dollars* each block, and two blocks on the west side of the avenue and opposite, are assessed fifty dollars each. The lands composing all of these blocks are of nearly equal value, and the location, &c. the same in every respect, each block extending to the centre of the avenue, and extending back to half the distance to the next avenue. The proceedings in relation to making the assessment for this portion of the avenue were ordered by the common council on the petition of eighteen persons, *none of whose names* are to be found on the list of awards or assessments. The assessment for the opening of this avenue has, some of it, been collected more than four years ago, and for others of it the land has been sold, some for a term of two thousand years. The avenue is not yet open. Proceedings have been taken to set aside the assessment.

SPLENDID ASSESSMENT.

A lot of ground belonging to the estate of a person deceased, situate on the corner of 28th street and 7th avenue, being 58 feet 10 inches front, and 96 feet 10 inches deep, was assessed for the pretended opening of 28th street, the sum of *one thousand and thirty-seven dollars and five cents;* and for the pretended opening of the seventh avenue *two hundred and nine dollars and ninety-eight cents*, making in all *twelve hundred and forty-seven dollars and three cents.* This assessment has been some time on interest, and both together now amount to about fourteen hundred dollars. This land is not worth one half this sum. What kind of an improvement shall this be called? The land sharks would not have it at the last great sale, although it was offered for the term of five thousand years to any person who would come forward and pay the assessment and the interest, and then for any length of time!

Judge Story, of the supreme court of the United States, in his commentary upon the constitution in speaking of that clause of it which provides that "*private property shall not be taken for public use without just compensation,*" remarks:

"This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded in natural equity, and is laid down by jurists as a principle of universal law. Indeed, in a free government, almost all other rights would become utterly worthless, if the government possessed an uncontrollable power over the private fortune of every citizen. One of the fundamental objects of every good government must be the due administration of justice; and how vain it would be to speak of such an administration, when all property is subject to the will or caprice of the legislature and the rulers."

TAXES.

"It has been remarked by Adam Smith, (says Judge Story) "that the private revenue of individuals arises ultimately from three different sources, rent, profit and wages; and that every public tax must be paid from some one, or all these sources of revenue."

The whole amount of taxes raised by the corporation of the city of New York, in the year 1830, was four hundred and fifty thousand dollars.

The annual tax raised by the corporation of the city of New York in the year 1792, was about six thousand dollars less than the amount paid and payable to corporation counsel last year.

Our worthy comptroller of the city of New York, in his annual report for 1839, makes this very judicious remark. "The common council are from this time forward, peculiarly required, by every consideration of prudence, to abate all unnecessary expenditures, however trivial."

Judge Story, in speaking of legislatures, makes these very pertinent remarks, which may with great truth be applied to the common council of New York:

"There is a strong propensity in public bodies to accumulate power in their own hands, to widen the extent of their own influence, and to absorb within their own circle the means and the motives of patronage. It has often been said that necessity is the plea of tyrants; but it is equally true that it is the plea of all public bodies invested with power where no check exists upon its exercise. Mr. Hume has remarked with great sagacity, that men are more honest in their private, than in their public capacity; and will go greater lengths to serve a party than where their own private interests alone are concerned. Honor is a great check upon mankind. But where a considerable body of men act together this check is in a great measure removed, since a man is sure to be approved of by his own party for what promotes the common interest. Public bodies, like private persons, are occasionally under the dominion of strong passions and excitements; impatient, irritable and impetuous. The habit of acting together produces a strong tendency to what, for the want of a better word, may be called a corporation spirit. Measures are often introduced in a hurry, and debated with little care, and examined with less caution. A legislative body is not apt to mistrust its own powers, and far less the temperate exercise of those powers. The representatives of the people will watch with jealousy every encroachment of the executive magistrate, for it trenches upon their own authority. But who shall watch the representatives themselves? Will they be as jealous of the exercise of power by themselves as by others?"

The comptroller, in his annual report to the common council in 1839, remarks:

"That it has heretofore been proposed to establish a general receiving office, for the collection of ordinary taxes and all other assessments. The plan has been favorably thought of. For efficiency and economy it would be a manifest improvement. The amount paid to the ward collectors alone, for collecting the tax of 1838, amounted to near $30,000. Whether it is expedient to make a change of this character, which involves an amendment of the city charter, is for the wisdom of the people and their representatives to decide."

COMMON COUNCIL.

The legislative power of the *corporation* is vested in a board of aldermen and board of assistants, who together shall form the common council of the city. The section vesting the legislative power of the city in the two boards was adopted by the convention in 1829; the legislature altered this, and vested only the legislative power of the *corporation* in the common council. The legislative power of the city belongs to the legislature of the state of New York, the city being a part of the state, and governed by the laws of the state.

MAYOR.

The mayor of the city of New York possesses great power. He has a right and it is his duty to veto any proceeding of the common council which he disapproves of, and return such proceedings to the board in which the proceeding originated, with his objections. The board to which it shall be returned, shall enter these objections at large on their journal, and cause the same to be published in *one* or more of the public newspapers of the city. "The board to which such act, ordinance or resolution, have been so returned, shall, after the expiration of not less than ten days thereafter, proceed to reconsider the same. If after such reconsideration, a majority of the members *elected* to the board shall agree to pass the same, it shall be sent together with the objections, to the other board, by which it shall likewise be reconsidered; and if approved by a majority of all the members elected to such board, it shall take effect as an act or law *of the corporation.* In all such cases the votes of both boards shall be determined by yeas and nays, and the names of the persons voting for and against the passage of the measure reconsidered, shall be entered on the journal of each board respectively." See sections 12 and 13 of the act of April 7, 1830. Is this statute directory?

The mayor holds the strings of the public purse of the city,—no money whatever can be drawn from the city treasury without his sanction.

The mayor is wholly independent of the common council; he is elected by the people, under and by virtue of the constitution of the state of New York as amended in 1833.

ANCIENT PROCEEDINGS AND LAWS

RELATIVE TO STREETS, &c.

The first Assembly convened in the Colony of New York was in the year 1633, and from that time to 1691 several Laws were enacted, but never printed, and were not confirmed by the King.—These Laws were recorded in the Office of the Colonial Secretary, and are now deposited in the Office of the Secretary of State at Albany. The first printed Journal of the Colonial Assembly, bears date April, 1691.—The first Law enacted by the Colonial Assembly in relation to streets in the City of New York, bears date Oct. 1, 1691. This act was confirmed by William 3d, May 11, 1697, and remained a Law of the province during the remainder of the time the Colony continued under the British Government, and was a Law of the State of New York until 1787, when it was repealed, and

another Law containing many of its provisions enacted in its stead.—Thus it will be seen that this Law was in force ninety-five years.—There are some peculiarities in this Law which I wish to call the reader's attention to, viz.: That no provision is made for assessing the awards made to the owners for Land taken for a public street, the amount, therefore, had to be paid from the public Treasury. This act was, during the time it remained in force, a complete protection to private property. The proviso attached to the Bill by the Governor and Council evinces great care and attention in the passing of Laws.

The following are the proceedings of the General Assembly of the Colony of New York, in passing the first Law in relation to Streets, &c.

General Assembly of the Colony of New York.
"Die Martis, 2 ho. P. M., Sept. 22d, 1691.
The Petition of the Mayor and Aldermen, &c. read.
Ordered, That a Bill be brought in accordingly.
Die Jovis, 2 ho. P. M., Sept. 24 1691.
A Bill for regulating the Buildings, Streets, Lanes, Wharfs, Docks and Alleys of the City of New York.
Read the first time and ordered a *second time*.
Ditto Bill read a second time, and ordered to be engrossed.
Die Veneris, 10 ho. A. M. Sept., 25th, 1691.
The Bill for regulating the Buildings, &c., read a third time, and passed, and ordered to be sent up to the Commander in Chief and Council for their assent.
Ordered that Alderman Merrett, Mr. Courtland, Mr. Beeckman, and Mr. Rensaleer do carry up the *two* Bills (ut supra) to the Commander in Chief and Council for their assent.
The Gentlemen returned from the Fort say, they delivered the *two* Bills (ut supra) and the Commander in Chief and Council say, it is very well—they will make all the speed imaginable.
Die Jovis, 10 ho. A. M., Oct. 1st. 1691.
Upon reading the Petition of the Mayor, Aldermen, and Commonalty of the City of New York, together with the *Proviso* transmitted to the House by the Commander in Chief and Council for consideration;
"Ordered that the proviso be annexed to said Bill, and sent up to the Commander in Chief and Council for their assent, and that the Commander in Chief may assess the value of the lots in controversy, as is desired in said Petition.—Ordered—That Alderman Merrett, Alderman Kipp, Mr. Van Schaick, and Mr. Whitehead, do carry up the said Bill and *Proviso*, and acquaint the Commander in Chief and Council that the House waits their commands when to attend the publication of acts passed this session."

Act of Assembly passed in the Province of New York.
An Act for regulating the Buildings, Streets, Lanes, Wharfs, Docks, and Allies, of the City of New York.

Whereas, the City of New York and Metropolis of this Province was chiefly erected by the inhabitants thereof for the propagating and encouraging of trade and commerce, and for the good benefit and welfare of their Majesty's subjects inhabiting within this province, and forasmuch as it is very necessary for traffic and commerce that the buildings, streets, lanes, wharfs, docks and *allies* of the said city be conveniently regulated with uniformity for the accommodation of habitations, shipping, trade and commerce, and that all impediments and obstructions that may retard so necessary a work may be removed: Be it therefore enacted by the Commander in Chief, and Council, and Representatives met in General Assembly, and by the authority of the same, That the Mayor, Aldermen, and Common Council of the said city shall and may at their will and pleasure elect, nominate, or appoint, one or more discreet and intelligent person or persons to be surveyors or supervisors of their buildings, streets, lanes, wharfs, docks and *allies*, and to see that the buildings, streets, lanes, wharfs, docks and allies, of the said city be conveniently regulated with uniformity, for the accommodation of habitations, shipping, trade, and commerce, according to such rules and order of building and laying out of the streets, lanes, wharfs, docks, and allies, as shall be established by the Mayor and Common Council of the said city, who are hereby authorized and empowered to make such rules and orders for the better regulation, uniformity, and gracefulness of such new buildings as shall be erected for habitations, and also of such streets, lanes, wharfs, docks and allies as shall be convenient for the good of the inhabitants; and it shall be lawful for the Mayor, Aldermen, and Common Council, or for the Mayor and Aldermen in their court, to administer an oath upon the Holy Evangelists unto the surveyors or supervisors of the true and impartial execution of their office in this behalf.

And, whereas, in laying out of the new lots for buildings some controversie may arise by a lot or lots of ground which if built upon would be very incommodious and prejudicial to one of the principal streets of this city, and hurtful to the trade and health of the inhabitants, Be it therefore enacted, &c., That the Mayor, Alnermen, and Common Council of the said city, for the time being, in Common Council assembled, shall and may and are hereby empowered and required to obstruct any building or buildings that may narrow the said street or any other streets within the said city, and the said Mayor, Aldermen, and Common Council shall and may, by virtue of the present act, continue the said street, commonly called the Broad street, according to its present dimensions; and if in the doing thereof, or in the laying out for the future any streets, lanes, wharfs, docks or *allies*, they do take any person's ground they are to give notice to the owners or parties interested in the ground so to be *taken* for the intent as aforesaid; and to the end that reasonable satisfaction may be given for all such ground as shall be taken and employed for the use aforesaid, the Commander in Chief and Council may assess the value of the lots in controversie; and for other ground the Mayor, Aldermen, and Common Council shall and may treat and agree with the owner and others interested therein; and if there shall be any person that shall refuse to treat in manner aforesaid, that in such case the Mayor and Aldermen in their court are hereby authorized, by virtue of this act, to issue out a warrant or warrants to the sheriff of the said *city*, who is hereby required to empannel and return a jury before the said court of Mayor and Aldermen, which jury, upon their oath, to be administered by the said court, are to inquire and assess such damages and recompense as they shall judge fit, to be awarded to the owners and others interested, according to their several and respective interests and estates in the same as shall be judg'd by the said Mayor, Aldermen, and Common Council shall be adjudged fit to be converted to the purposes aforesaid; and such verdict of the jury and judgment of the said court of Mayor and Aldermen thereupon, and the payment of the said sum or sums of money so awarded and adjudg'd to the owners or others having estates or interest or tender or refusal thereof, shall be binding to all intents and purposes against the said parties, their heirs, executors, administrators and assigns, and all others claiming any title or interest to the said ground, and shall be a full authority to the said Mayor, Aldermen, and Common Council to cause the said ground to be converted and used for the purposes aforesaid, anything contrary herein or in any other law to contrary hereof in any wise notwithstanding.

And forasmuch as the filth and soil of the said city lying in the public streets thereof doth often prove a common nuisance unto the inhabitants and traders to and from the said city, and very prejudicial to their health, for the removal thereof, be it further enacted, &c., That the numbers and places for all common sewers, drains, and vaults, and the order and manner of paving and pitching the streets, lanes, and *allies* of the said city, shall be designed and set out by the said Mayor, Aldermen, and Common Council of the said city, together with the said surveyor or supervisors, appointed in manner aforesaid, and when they assemble shall have power and authority to order and direct the making of vaults, drains, and sewers, or to cut into any drain or sewer already made, and for the altering, amending, enlarging, cleansing and scouring of vaults, sinks or common sewers; and for the better effecting thereof it shall and may be lawful to and for the said Mayor, Aldermen, and Common Council, together with the surveyors and supervisors, at their said meeting, to impose any reasonable tax upon all houses within the said city, in proportion to the benefit they shall receive thereby, for and toward the making, cutting, altering, enlarging, amending, cleansing, scouring all and singular the said vaults, drains, sewers, pavements and pitching aforesaid; and in default of payment of the said sum to be charged, it shall and may be lawful to and for the said Mayor, Aldermen, &c., by order or warrant under their hands and seals, to levy the said sum and sums of money so assessed, by distress and sale of the goods of the parties chargeable therewith, and refusing and neglecting to pay the same, rendering the overplus if any be.—Always provided and be it further enacted, &c., That nothing herein contained shall be construed to change, alter, shorten, lengthen, narrow or enlarge any of the streets, allies, and lanes within this city, as they are now laid out and remain at the publication thereof, nor to break through any person's grounds now in fence or enclosed, or to take away any person's house or habitations, any thing herein contained to the contrary hereof in any wise notwithstanding.

Passed, October 1st, 1691.
Confirmed, May 11th, 1697.

An Act for regulating the Buildings, Streets, Wharfs and Slips, in the City of New York.—Passed April 16th, 1787.

Whereas, for the encouragement of the trade and commerce of this state, it is necessary that the buildings, streets, wharfs and slips, in the city of New York, should be regulated with uniformity, for the accommodation of habitations, shipping and transportation; wherefore, to remove all impediments or obstructions that may retard so necessary a work,

§ 1. *Be it enacted by the people of the state of New York, represented in senate and assembly, and it is hereby enacted, by the authority of the same*, That it shall and may be lawful to and for the Mayor, Aldermen and commonalty of the city of New York, in Common Council convened, from time to time, to make such by-laws, ordinances, rules and orders, for the better regulating and arranging, with uniformity, such new buildings as shall, after the passing of this act, be erected for habitation or for the purposes of trade and commerce; and also for regulating and altering the streets, wharves and slips, in such manner as shall be most commodious for shipping and transportation; and also at their will and pleasure, from time to time, to nominate and appoint two or more discreet and intelligent persons to be the surveyors of the buildings, streets, wharfs and slips of the said city, whose office and duty it shall be to direct and see that all buildings, streets, wharfs and slips, to be laid out or altered in the said city, be regulated with uniformity, for the accommodation of habitations, shipping, trade and commerce, according to such bye-laws, ordinances, rules and orders, as, by the Common Council of the said city, shall be for that purpose, from time to time, ordained and established; which said Surveyors shall respectively, before they enter upon the duties of their said offices, take the following oath, before the Mayor or Recorder, viz.

I ———, *appointed a Surveyor of the city of* New York, *do swear, in the presence of Almighty God, that I will faithfully, truly and impartially, execute the office of one of the Surveyors of the said city.*

II. And *whereas* in the laying out of new lots of ground for buildings, controversies may arise, by reason that a lot or lots, if built upon to their full extent, would incommode and obstruct some street of the said city, and be hurtful to the trade and health of the inhabitants thereof; therefore, *be it further enacted by the authority aforesaid*, that it shall and may be lawful to and for the Mayor, Aldermen and Commonalty of the said city, in Common Council convened, to hinder and prevent any building or buildings, that may narrow or encroach upon any street within the said city: and if in the doing thereof, or in the laying out for the future, any streets, wharfs or slips, they shall require for such purposes, the ground of any person or persons, they shall give notice thereof to the owner, or parties interested in such ground, or his, her or their agent or legal representative: and to the end that reasonable satisfaction may be made for all such ground as shall be necessary for the uses aforesaid, the said Common Council shall and may treat with the owners, or persons interested therein, or his, her or their agent or legal representative; and if any such owner or owners shall refuse to treat in manner aforesaid, then, and in such case, it shall and may be lawful to and for the Mayor or Recorder, and any two or more Aldermen, by virtue of this act, by a precept under their hands and seals, to command the Sheriff of the said city and county of *New York*, to impannel and return, and he is hereby required to impannel and return a jury to appear before the Mayor's court of the said city, at any term thereof, not less than three weeks from the date of such precept, to inquire of and assess the damages and recompence due to the owner or owners of such ground, or his, her or their agent or legal representative; and at the same time to summon the owner or owners of such ground, by notice to be left at his, her or their most usual place of abode, to appear before such Mayor's court, on the day and at the place in such precept to be specified;

which jury being first duly sworn, faithfully and impartially to inquire into and assess the damages in question, and having viewed the premises, if necessary, shall inquire of and assess such damages and recompence, as they shall, under all the circumstances, judge fit to be awarded to the owner or owners of such ground, for their respective losses, according to their several interests and estates therein. And the verdict of such jury, and the judgment of the said Mayor's court thereupon, and the payment of the sum or sums of money so awarded and adjudged to the owner or owners thereof, or tender and refusal thereof, shall be conclusive and binding, to all intents and purposes, against the said owner and owners, his, her and their respective heirs, executors, administrators and assigns, claiming any estate or interest of, in or to the same ground; and it shall thereupon be lawful to and for the said Mayor, Aldermen and Commonalty of the city of *New York*, and their successors, to cause the same ground to be converted to and used for the purposes aforesaid.

IV. And *whereas* the dirt and soil lying in the streets, doth often prove a common nuisance, and very prejudicial to the health of the inhabitants of the same city; for remedy whereof, *be it further enacted by the authority aforesaid*, that it shall and may be lawful to and for the Mayor, Aldermen and Commonalty of the said city, in Common Council convened, by ordinances and bye-laws for that purpose to be made and ordained, from time to time, and in such manner as they shall judge to be most conducive to health and public convenience, to cause common sewers, drains and vaults to be made and constructed in any part of the said city, and to order and direct the pitching and paving the streets thereof, and the cutting into any drain or sewer already made, or to be made; and the altering, amending, cleansing and scouring of any street, vault, sink, or common sewer, within the same city. And for the better effecting thereof, it shall and may be lawful to and for the Mayor, Aldermen and Commonalty of the said city, in Common Council convened, to cause to be made, an estimate or estimates of the expense of conforming to such regulations as aforesaid, and a just and equitable assessment thereof, among the owners or occupants of all the houses and lots intended to be benefited thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire respectively. And in order that the same may be faithfully and impartially performed, the said Common Council shall, from time to time, appoint *five* sufficient and disinterested freeholders for every such purpose, who, before they enter upon the execution of their trust, shall be duly sworn, before the said Mayor or Recorder, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and a certificate in writing of such estimate and assessment being returned to the said Common Council, and ratified by them, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively; and such owners or occupants respectively, shall thereupon become, and be liable and chargeable, and they are hereby required, upon demand, to pay to such person as shall be authorised by the said Common Council to receive the same, the sum at which such house or lot shall be so assessed, to be employed and applied for and towards the making, altering, amending, pitching, paving, cleansing and scouring such streets, and making, constructing and repairing such vaults, drains and sewers as aforesaid; and in default of payment thereof, or any part thereof, it shall and may be lawful to and for the Mayor, Recorder, and Aldermen of the same city, or any five of them, of whom the Mayor or Recorder always to be one, by warrant under their hands and seals, to levy the said sum and sums of money so assessed, by distress and sale of the goods and chattels of the owner or occupant of such house or lot so assessed, and refusing or neglecting to pay the same; rendering the overplus, if any there be, after deducting the sum assessed, and the charges of distress and sale, to such owner or occupant respectively, or their legal representatives.

V. *Provided always, and be it further enacted by the authority aforesaid*, That nothing in the last mentioned clause of this act contained, shall be construed to affect any contract or agreement that hath been or shall be made between any landlord and tenant, respecting the payment of any such charges or repairs, but they shall be answerable to each other in the same manner as if this act had never been made. *And further*, In case any money so from time to time to be assessed for the services aforesaid, shall be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, that then it shall and may be lawful to and for the person so paying the same, and he shall be, and hereby is empowered and authorised to sue for and recover the same, with interest and costs of suit, in any court having lawful cognizance thereof, as so much money paid for the use of the person for whom or for whose use the same shall have been paid; and the assessment aforesaid, with proof of payment, shall be conclusive evidence to such court, and judgment and execution shall be awarded accordingly.

VI. And *whereas* more effectually to accommodate the trade and preserve the health of the citizens, it is necessary, in certain parts of the city, to level adjoining lots, by raising some and reducing others, in order to draw away the stagnate water and filth, and render the streets dry, and the passage easy and convenient; and it frequently happens, that there are vacant lots, owned by persons who refuse to contribute to any expense with respect to their lots, or the streets on which they are bounded, however detrimental such refusal may prove to the proprietors of the adjacent lots, and the public good: For remedy whereof, *Be it further enacted by the authority aforesaid*, That when in any such case a general regulation shall be judged necessary, in any part of the city, and be ordered and directed by any ordinance or bye-law of the said Mayor, Aldermen and Commonalty of the said city, in Common Council convened, for raising, reducing, levelling or fencing in any such lot or lots as aforesaid, it shall and may be lawful to and for the said Common Council, to cause an estimate to be made of the whole expense of conforming to such regulation, with respect to each lot which the owner thereof shall refuse or neglect to put in the order thereby required; which estimate shall be made and certified under the hands and seals of *five* sufficient freeholders, to be appointed for that purpose, and sworn in manner aforesaid; and the same estimate being duly returned to, and approved by the said Common Council, they shall take order for advertising the same, in two or more of the public newspapers printed in the said city, for three weeks, thereby requiring the owners of such lots respectively, to pay the sum at which the said lots shall be so assessed, to the treasurer or chamberlain of the said city, to defray the expense of the intended work; and that if default shall be made in such payment, such lot will be sold at public auction, at a day and place therein to be specified, for the lowest term of years at which any person shall offer to take the same, in consideration of advancing the sum assessed on the same, for the expense aforesaid. And if, notwithstanding such notice and demand, the owner or owners should refuse or neglect to pay such assessment, with the charge of appraisement and advertisement, then it shall and may be lawful to and for the said Common Council, to cause the said lot to be sold at public auction, for a term of years, for the purposes and in the manner expressed in the said advertisement, and to give a declaration of such sale to the purchaser thereof, under the common seal of the said city; and such purchaser, his executors, administrators and assigns, shall, by virtue thereof, and of this act, lawfully hold and enjoy the same, for his and their own proper use, against the owner or owners thereof, and all claiming under him or them, until his term therein shall be fully complete and ended; being at liberty to remove all the buildings and materials which he, she or they shall erect or place thereon, but leaving the ground in sufficient fence, and with the street or streets fronting the same, in the order required by the said regulations; any law, usage or custom to the contrary thereof notwithstanding. *Provided always*, That if, after defraying the actual expense of conforming any lot, so to be sold for a term of years, to the regulations aforesaid, and deducting all reasonable charges attending the same, a surplus of the purchase money, bidden or given therefor, at such auction, shall remain in the hands of the Chamberlain or Treasurer of the said city, the same shall forthwith be rendered to the owner or owners of such lot or lots respectively, or his, her or their respective legal representatives.

VII. *And be it further enacted by the authority aforesaid*, That if, upon the completion of any such regulation as aforesaid, it shall appear to the Mayor, Aldermen and Commonalty of the said city, in Common Council convened, that a greater sum of money hath been *bonâ fide* expended in making such regulation, than the sum mentioned in the estimate so made as aforesaid, and actually collected, it shall and may be lawful to and for the said Common Council, to cause a further assessment to be made of the sum, which such *bonâ fide* expenditures shall exceed the sum so estimated and collected as aforesaid, upon and among the owners or occupants of all the houses and lots before assessed as aforesaid, and to cause the same to be collected in the same manner as herein before directed. *And further*, That in case the sum actually expended shall be less than the sum expressed in such estimate, and actually collected as aforesaid, the surplus shall be forthwith rendered to the respective persons from whom the same were so collected and received as aforesaid, or his, her or their respective legal representatives.

An Act authorising the Mayor, Aldermen and Commonalty of the city of New York, to fill in, and raise the Tract of Land in the said city, called the Meadows, and for continuing Roosevelt and Frankfort streets. —Passed 6th April, 1792.

WHEREAS Benjamin Hildreth, John De Peyster, John Franklin, Samuel Franklin, Comfort Sands, and Samuel Osgood, and others, in and by their certain petition to the Legislature, setting forth, that in the city of New York, in that part commonly called and known by the name of the Meadows, in the fifth ward of the said city, there are many vacant lots of land, which through the inattention of their owners, have become deep sink holes, the receptacles of water in the rainy seasons, and the source of many unwholesome and noxious stenches; and that the petitioners are informed, that the powers of the corporation of the said city are not competent so far as to grant any relief in the premises; and have therefore humbly prayed the Legislature, that an act to compel the owners of said lots to fill them up, and so remove the said nuisance; or that such other measures may be taken as to the Legislature shall seem expedient: **Wherefore,**

I. *Be it enacted by the People of the State of New York, represented in Senate and Assembly*, That it shall and may be lawful to and for the mayor, aldermen and commonalty of the said city, in common council convened, by an ordinance or ordinances, bye-law or bye-laws, for that purpose to be made and ordained, and in such manner as they shall deem to be most conducive to the health, convenience and safety of the citizens of the said city, and the interest and advantage of the proprietors of the respective houses and lots of ground to be affected thereby, to order the filling in with earth, and raising the lots of ground and streets in all the aforesaid tract of land called the Meadows, situate in the fifth ward of the said city, and bounded northerly by Chatham-street, southerly by the rear of the lots on the northerly side of Cherry-street, westerly by the rear of the lots on the easterly side of Queen-street, and easterly by Catharine-street, to such height as to convey into the East-river all the water which shall from time to time fall on the said tract of land, or run thereon from the adjoining lots and streets; and that the expense of conforming to such regulation, shall be borne and paid by the owners of the respective lots of ground to be affected thereby in the manner herein after mentioned.

II. *And be it further enacted*, That Richard Furman, Abraham Rhinelander, George Stanton, Joseph Stringham, and John Stagg, shall be and hereby are appointed commissioners to make an estimate of the whole expenses of conforming to such regulations as aforesaid, and to make a just and equitable assessment thereof, among the owners of all the houses and lots of ground intended to be benefited thereby, in proportion as nearly as may be, to the advantage which each shall be deemed to acquire respectively, making such allowance to such of the owners or proprietors of any of the said houses or lots of ground as shall have filled or raised their respective lots of ground, or the streets in front thereof, as they the said commissioners shall deem just and equitable. And the said commissioners shall, before they enter upon the execution of their trust, be duly sworn before the mayor or recorder of the said city, to make the said estimate or assessment, fairly and impartially according to the best of their skill and judgment, and a certificate in writing, of such estimate and assessment, under the hands and seals of the said commissioners, or any three or more of them, being returned to the common council of the said city, and ratified by them, shall be binding and conclusive upon the owners of such houses and lots of ground so to be assessed respectively, and the sum or sums of money at which each house and lot of ground shall be so assessed, shall become and be a charge upon such respective house and lot of ground, into whose soever hands and possession the same shall at any time thereafter come and descend. And the owners of such houses and lots of ground respectively, at the time of

such assessment, shall thereupon become and be liable and chargeable, and they are hereby required, upon demand, to pay such person or persons as shall be authorised by the common council of the said city, to receive the same, the sum at which each such house or lot of ground shall be so assessed, to be employed and applied for and towards filling and raising such respective lot of ground, and the street opposite thereto; and in default of payment thereof, or any part thereof, it shall and may be lawful to and for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder always to be one, by warrant under their hands and seals, to cause the said sum and sums of money, so assessed, to be levied by distres and sale of the goods and chattels of the owner of such house or lot of ground so assessed, and refusing or neglecting to pay the same, rendering the overplus money, if any there be after deducting the sum assessed, and the charges of distress and sale, to such owner or owners respectively, or their legal representatives. And in case no sufficient goods or chattels of the owner of any such house or lot of ground can be found within the city and county of New York, whereof the sum or sums of money so assessed thereon can be made and levied, or in case the owner of such house or lot of ground, so assessed, is unknown, or shall reside out of the said city of New York, the said common council shall take order for advertising such lot of ground and the buildings thereon, if any there be, in two or more public newspapers printed in the said city, for thirteen weeks, at least twice in every week, in and by such advertisement, describing the same lot of ground, and requiring the owners thereof respectively to pay the sum or sums of money at which such lot of ground shall be so assessed, to the treasurer or chamberlain of the said city, to defray the expense of the intended work; and that if default shall be made in such payment, such lot will be sold at public auction, at a day and place therein specified, in fee simple, to the highest bidder, to defray the expense aforesaid. And if, notwithstanding such notice, the owner or owners of any such lot of ground shall refuse or neglect to pay such assessment, with the charge of such advertisement, then it shall be lawful to and for the said common council to cause the said lot of ground, together with the buildings thereon, if any there be, to be sold at public auction in fee simple, for the purposes and in the manner expressed in the said advertisement, and to give a declaration of such sale to the purchaser thereof, under the common seal of the said city; and such purchaser, his heirs or assigns shall, by virtue thereof, and of this act, hold and enjoy the same, for his and their own proper use, against all former owner or owners thereof, and all claiming under him or them; any law, usage or custom to the contrary thereof notwithstanding. *Provided always.* That if after defraying the actual expense of conforming any lot of ground so to be sold, and the street in front thereof, to the regulations aforesaid, and deducting all reasonable charges attending the same, a surplus of the purchase money bidden or given therefor at such auction, shall remain in the hands of the chamberlain or treasurer of the said city, the same shall, on demand, be rendered to the owner or owners of such lot of ground respectively, or his, her or their legal representatives.

III. *And be it further enacted*, That if upon the completion of such regulation, it shall appear to the common council, that a greater sum of money hath been *bonâ fide* expended in making such regulation, than the sum mentioned in the estimate so made as aforesaid, and actually collected, it shall and may be lawful to and for the said common council to cause a further assessment to be made by the commissioners above named, or any three or more of them, of the sum which such *bonâ fide* expenditures shall exceed the sum so estimated and collected aforesaid, upon and among the owners of all the houses and lots of ground before assessed as aforesaid, and to cause the same to be collected in the same manner as herein before directed.—And further, That in case the sum actually expended shall be less than the sum expressed in such estimate, and actually collected as aforesaid, the surplus shall be forthwith rendered to the respective persons from whom the same was so collected and received as aforesaid, or his, her or their legal representatives.

IV. *And be it further enacted*, That it shall and may be lawful for the mayor, aldermen and commonalty of the city of New York, in common council convened, to lay out and continue Roosevelt-street, which now runs through part of the tract of land aforesaid, from Chatham-street to Cherry-street, on a straight line to the East-river, through the lots of ground on the southerly side of Cherry-street aforesaid, and of such breadths as the common council shall think proper, nor exceeding the present breadth thereof, on the southerly side of Cherry-street aforesaid. *Provided always*, That before the laying out and continuing the said street to the East-river as aforesaid, the said mayor, aldermen and commonalty, shall, for that purpose, first have and obtain the consent of the proprietor or proprietors, his, her or their legal representatives, of such houses and lot or lots of ground, through which the said street may pass, on the south side of Cherry-street as aforesaid.

V. *And be it further enacted*, That it shall be the duty of the commissioners in this act above named, upon a full and equitable consideration and estimate of all the circumstances attending the same, to determine what part or proportion of all and every the sums of money which shall be expended by the common council of the said city, for opening and continuing Roosevelt-street to the East-river, as aforesaid, ought to be borne and paid by the said common council, in consideration of the general convenience to the citizens o. the said city, occasioned by opening and continuing that street as aforesaid, and what part or proportion thereof, specifying the sum, ought to be borne and paid by individual citizens, in the tract of land called the Meadows, and in Roosevelt-street, continued as aforesaid, and in the vicinity thereof, whose estates have become advanced or increased in value by such improvements and that it shall also be the duty of the said commissioners, to make a just and equitable assessment of the last mentioned sum, among the owners of all the said houses and lots of ground, which shall appear to them to be benefited as aforesaid, in proportion as nearly as may be to the advantage which each shall be deemed to have acquired respectively, and that they the said commissioners, or any three or more of them, shall make a certificate in writing of such assessment, under their hands and seals, and return the same to the common council of the said city, which assessment shall be binding and conclusive upon the owners of such houses and lots of ground so to be assessed respectively, and the sum or sums of money, at which each such house and lot of ground shall be so assessed, shall be deemed a debt due from the owner or owners thereof, his, her or their representatives, to the mayor, aldermen and commonalty of the said city, and shall be payable to them within three months from the date of such assessment, and shall moreover become and be a charge or lien, and prior incumbrance upon such respective house and lot of ground, into whose hands or possession soever the same shall then be, or at any time thereafter may come or descend; and the respective owners of such houses and lot or lots of ground respectively, at the time of such assessment, shall thereupon become and be liable and chargeable, and they are hereby required, to pay to the treasurer or chamberlain of the said city for the time being, who is hereby authorised to receive the same, to the use of the said corporation, the sum at which each such house and lot or lots of ground shall be so assessed as aforesaid, and in default of payment, the same shall and may be recovered at the suit of the said treasurer or chamberlain, in any court of record within this state, with interest at six per cent, to accrue after the said three months from the date of such assessment, with costs of suit. And no such action or suit shall be abated or discontinued by the death of the treasurer or chamberlain of the said city, or by his resignation or removal from office; but shall and may be continued and prosecuted to effect, by his successor in office.

VI. *And be it further enacted*, That it shall and may be lawful to and for the mayor, aldermen and commonalty of the city of New-York, in common council convened, to cause Frankfort-street to be continued to Queen-street, in the manner and under the restriction herein before provided respecting the continuance of Roosevelt-street; and the said mayor, aldermen and commonalty, and the commissioners herein before named, shall have the like powers and authority, for the purpose of continuing Frankfort-street as aforesaid, and paying the expenses thereof, as are herein before given to them respectively for continuing Roosevelt-street.

PAVING AND REGULATING STREETS, &c.

And be it further enacted, That it shall be lawful for the said mayor, aldermen and commonalty, to cause common sewers, drains and vaults, to be made in any part of the said city, and to order and direct the pitching and paving the streets thereof, and the cutting into any drain or sewer, and the altering, amending, cleansing and scouring of any street, vault, sink or common sewer, within the said city; and the raising, reducing, levelling or fencing in, any vacant or adjoining lots in the said city; and to cause estimates of the expense of conforming to such regulations to be made, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefited thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire; and the said mayor, aldermen and commonalty shall appoint such skilful and competent disinterested persons as they shall or may think proper to make every such estimate and assessment, who before they enter upon the execution of their trust, shall severally take an oath before the mayor or recorder of the said city, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and the said persons, after having made such estimate and assessment, shall certify the same in writing to the said mayor, aldermen and commonalty, in common council convened, and being ratified by the said council, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively, and shall be a lien or charge on such lots as aforesaid; and such owners or occupants shall also respectively be liable upon demand, to pay the sum at which such houses or lots respectively shall be so assessed, to such person as the said common council shall appoint to receive the same; and in default of such payment or any part thereof, it shall be lawful for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder shall be one, by warrant under their hands and seals to levy the same by distress and sale of the goods and chattels of such owner or occupant refusing or neglecting to pay the same, rendering the overplus, (if any) after deducting the charges of such distress and sale to such owner or occupant, and the money, when paid or recovered, shall be applied towards making, altering, amending, pitching, paving, cleansing and scouring such streets, and making and repairing such vaults, drains and sewers as aforesaid, and raising, reducing, levelling or fencing in, such lots as aforesaid. *Provided however*, That nothing herein contained shall affect any agreement between any landlord and tenant, respecting the payment of any such charges, but they shall be answerable to each other in the same manner as if this act had never been made; and if the money so to be assessed, be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, it shall then be lawful for the person paying, to sue for, and recover the money so paid, with interest and costs, as so much money paid for the use of the person who ought to have paid the same; and the assessment aforesaid, with proof of payment, shall be conclusive evidence in such suit.

And be it further enacted, That if upon completing any such regulation, it shall appear to the said mayor, aldermen and commonalty, that a greater sum of money had been *bonâ fide* expended in making such regulation than the sum estimated and collected aforesaid, it shall then be lawful for the said mayor, aldermen and commonalty, to cause a further assessment equal to such excess, to be made and collected in manner aforesaid; and in case the sum actually expended shall be less than the sum expressed in such estimate, and collected as aforesaid, the surplus shall forthwith be returned to the persons from whom the same were collected, or their legal representatives.—[Passed April 9th, 1813. 2 R. L., p. 407, § 175 & 176.

An Act to amend an Act, entitled "An Act to reduce several laws relating particularly to the city of New York into one Act."—Passed April 20, 1839.

The People of the State of New-York, represented in Senate and Assembly, do enact as follows:

§ 1. Whenever, and as often as any lands, tenements, hereditaments or premises shall be required for any purpose specified in an act, entitled "An act to reduce several laws relating particularly to the city of New York into one act," passed April 9th, 1813, the application for the appointment of commissioners of estimate and assessment shall not be made to the supreme court elsewhere than in the city of New York, except in the city of Albany, in the months of April, June, July, August, September, October, November and December; and the application for the confirmation of the report of the commissioners of estimate and assessment, shall be made to the supreme court at the term thereof held in the city of New York, or at such special term to be held in the city of New York as the

supreme court may appoint for that purpose; and if, upon hearing such application, persons who appear by the said report to be interested, either by assessment for benefit or award for damages, to the amount of a majority in amount of the whole assessments and upwards, shall appear and object to further proceedings upon the said report, the court shall order the same to be discontinued, and the same shall thenceforth be discontinued.

§ 2. The commissioners of estimate and assessment shall be appointed as follows:—The mayor, aldermen and commonalty of the said city shall give notice, by advertisement to be published in at least four of the public newspapers printed in the said city, of their intention to make application to the said court for the appointment of such commissioners, which notice shall specify the time and place of such application, and the nature and extent of the intended improvement, and shall be so published for and during the space of twenty days previous to the said appointment; and they shall, in addition to the said advertisement, cause copies of the same in handbills to be posted up for the same space of time, in three conspicuous places adjacent to the property to be affected by the intended improvement. At the time thus specified, the mayor, aldermen and commonalty shall nominate three discreet and disinterested persons to the said court, of whom they shall designate one who shall be appointed. Any person who may be interested in the property which will be affected by the intended improvement,(which interest for this purpose shall be decided by his own affidavit stating the nature and extent of such interest) may present to the court the name of one or more persons, which names shall form a list, out of which, if a majority in interest of the persons so interested shall agree upon the name of one person, that person shall be appointed; but if a majority shall not agree upon one person, then the court shall appoint one person, out of the names in such list; after which the said court shall appoint a third person out of the names so presented by the common council and by the parties interested; all of which persons so nominated shall be subject to the right of challenge on the ground of interest, incapacity or disqualification, to be exercised by the said mayor, aldermen and commonalty, or by any person having an interest in the said matter; and if any of them shall be rejected for good cause or refuse to serve, then another shall be nominated in his stead by the same party.

§ 3. It shall be the duty of the said commissioners in all cases to report fully and separately to the said court the amount of loss and damage, and of benefit and advantage to each and every owner, lessee, party and person entitled unto, or interested in any lands, tenements, hereditaments or premises, so required for the purpose of any such operation or improvement.

§ 4. An abstract of the estimate and assessment of the said commissioners, containing the names of the owners of the lots assessed, the numbers of such lots as they appear on the map of the commissioners, together with such map; and the amount of the assessments whether for damage or benefit; and also all the affidavits, estimates and other documents which were used by the said commissioners in making their said report, shall be deposited in the street commissioner's office of the city and county of New York, for the inspection of whomsoever it may concern, for at least sixty days before the said commissioners make their report to the said court. They shall give notice of the time and place of making their said report, by advertisement, to be published in at least four of the public newspapers printed in the said city, for and during the space of at least sixty days, previous to the making of said report; and by copies of the said advertisement, in handbills, to be posted up for the same, in the manner herein before directed.—Similar notice, for at least twenty days, shall be given of any supplemental or amended report.

§ 5. Any person or persons whose rights may be affected by the said estimate and assessment, and who shall object to the same or any part thereof, may, within thirty days after the first publication of the said notice, state his, her or their objections to the same in writing to the said commissioners; which statements shall not be received by the said commissioners, unless verified by his, her or their affidavits, or the affidavits of other persons, or both; and it shall be the duty of the said commissioners, in all cases, to transmit to the said court, together with their said report, all the written statements and affidavits which may have been served upon them within the time aforesaid. And at the expiration of the said thirty days, it shall be the duty of the said commissioners to give at least ten days' notice in manner aforesaid, of a time and place, when and where any person or persons, who may consider themselves aggrieved by such estimate or assessment, shall be heard in opposition to the same; and the said commissioners shall have power to adjourn from time to time, within the space of ten judicial days, until all such person or persons are fully heard.

§ 6. Upon the application of any person or persons whose rights may be affected by the said estimate or assessment, verified by the oath or affirmation of such applicant or his agent, that any witness, residing or being in the city and county of New York, whose affidavit to verify or oppose any objection to the said estimate or assessment is material or necessary to such party, refuses voluntarily to appear before any officer authorized to take such affidavit, to testify or affirm to such matters as he may know, touching such objection, any one of the justices of the superior court of the city of New York may issure a subpœna, under his hand, requiring such witness to appear and testify to such matters as he may, touching the said estimate or assessment, at such time and place as the said justice may designate in such subpœna. And every person who, being served with such subpœna, shall, without reasonable cause, refuse or neglect to appear, or appearing shall refuse to answer, under oath or affirmation, touching the matters aforesaid, shall forfeit to the party injured one hundred dollars; and may also be committed to prison by the judge who issued such subpœna; there to remain, without bail, and without the liberties of the jail, until he shall submit to answer, under oath or affirmation as aforesaid. The testimony of such witness when given, shall be reduced to writing in the presence of, and be sworn or affirmed to before the judge.

LAWS OF THE STATE OF NEW YORK.

An Act in relation to the collection of Assessments and Taxes in the city and county of New York, and for other purposes.

The People of the State of New York represented in Senate and Assembly, do enact as follows:

§ 1. In all cases where commissioners or assessors shall describe the houses and lots assessed for any improvement, the assessment shall describe and particularize all such houses and lots by the known street number, as well as the ward number, and shall also state the names of the owner or owners and occupant or occupants, and it shall be the duty of the surveyor who shall make out the assessment list, to ascertain by an inquiry, to be made of the collector of taxes of the ward in which the property assessed is situate, and by inquiry of the person who collected the taxes of such ward the previous year, as to such ownership, and such collector shall afford the requisite information.

§ 2. It shall be the duty of all commissioners and assessors authorized to make any estimate and assessment for any improvement authorized by law, to be assessed upon the owners or occupants of houses and lots or improved or unimproved lands, affected thereby, to give notice to the owner or owners and occupant or occupants of all houses and lots and improved or unimproved lands, that they have completed the estimate and assessment; such notice shall be published daily in at least ten of the daily newspapers for ten days successively; it shall describe the limits embraced by such assessment, and shall contain a request for all persons whose interests may be affected thereby, and who may be opposed to the same, to present their objections in writing to the chairman of the commissioners or assessors, within ten days from the date of such notice; and if after examining such objections the commissioners or assessors shall not deem it proper to alter their assessment, or having altered it, there shall still be objections to the same, it shall be their duty to present such objections, with the assessment, to the power authorized to confirm the same; but nothing herein contained shall conflict with, or render invalid the act entitled "An act to reduce several laws relating to the city of New York into one act, passed April 20, 1839."

§ 3. In advertising houses and lots, improved or unimproved lands, to be sold for the non-payment of assessments, it shall be the duty of the Street Commissioner to advertise all the houses and lots or other lands lying contiguous to *each other* and belonging to the same owner, in one parcel, unless otherwise requested by such owner.

§ 4. It shall not be lawful for any commissioner or assessor to charge for any services in making estimates and assessments for any improvements authorized by law to be assessed upon the owners or occupants of houses and lots, or improved or unimproved lands, not actually rendered by him, nor for any parts of days as whole days, while the time occupied was less than six hours of such day.

§ 5. Certificates of sale shall be made and delivered to the purchasers without charge; and no charge shall be made in the sale for the second advertisement and lease, but the expense of the former shall be paid by the owner at the time of redeeming, or by the purchaser when he shall receive a lease. The expense of drawing and executing a lease shall be paid by the purchaser at the time of receiving the same, and shall not exceed fifty cents.

§ 6. The rate of interest allowed by law to the purchaser at the time of redemption on the amount of the purchase money, shall be reduced to fourteen per cent. per annum, but no interest shall be calculated upon a less portion of time than one quarter of a year; and in all cases where the property shall be redeemed during any fractional part of a year, the interest shall be calculated so as to include the quarter in which such redemption shall be made: the time to be computed from the day of sale.

§ 7. Commissioners or assessors, for making estimate and assessment for any improvements authorized by law to be assessed upon the owners or occupants of houses and lots or improved or unimproved lands, shall in no case assess any house and lot or improved or unimproved land more than one-half the value of such house and lot or improved or unimproved land, as valued by the assessors of the Ward in which the same shall be situate.

§ 8. It shall be the duty of the collectors of taxes of the city of New York to attend at the Comptroller's office, in the Hall of Records, every Saturday, during the months of January and February in each year, from the hour of ten o'clock in the morning to the hour of three o'clock in the afternoon, with the tax list of their respective Wards, for the purpose of affording taxpayers owning property in the different Wards, an opportunity of paying such taxes.

§ 9. No houses and lots, or improved or unimproved lands in the city and county of New York, shall be hereafter sold or leased at public auction, for the nonpayment of any assessment or tax which may be due thereon, unless notice of such sale shall have been published once in each week for three months, in at least ten of the daily newspapers printed and published in the city of New York, one of which shall contain a particular and detailed statement of the property to be sold for assessments, and such as is now published by the Street Commissioner in two of the daily newspapers in the city of New York, or the said detailed statement or description shall be printed in a pamphlet, in the discretion of the Street Commissioner, in which case the pamphlets shall be deposited in the Street Commissioner's office, in the city of New York, and with the collector of taxes of the different Wards of the said city, and shall be delivered to any person applying therefor; and the notice provided for in this section to be given of the sale of houses and lots and improved or unimproved lands, shall also state that the detailed statement of the assessments or tax and ownership of the property assessed or taxed is published in one of the daily newspapers, naming the same, or in a pamphlet, as the case may be, and where the same will be deposited, to be delivered to any person applying for the same.

§ 10. It shall not be necessary to give any further publicity of any intended sale of property for unpaid assessments and taxes than is contemplated by the last preceding section; and in giving the further notice required by section second of the act entitled, "An act for the more effectual collection of taxes and assessments in the city of New York, passed April 12, 1816, of the sale of property six months previous to the expiration of the time of redemption, it shall only be necessary to publish the same in one daily newspaper, printed in the city and county of New York, twice in each week for six weeks successively, and so much of the said section as is inconsistent with this section and the preceding sections, is hereby repealed.

§ 11. In all cases where pieces, parcels or lots shall have been sold for the assessment, and any person shall claim to redeem any portion or part of the same within the time limited for redemption, he shall be permitted to do so on paying the apportionment of the assessment for which the property was sold, together with the interest on the same, and an equitable proportion of the expenses. The apportionment shall be made by the Street Commissioner.

§ 12. Nothing contained in the 9th section of this act shall be construed to postpone the sale advertised to take place in June next.

Passed May 14, 1840.

We have here given the several acts of the Legislature in relation to paving streets, building sewers, filling low grounds, &c., from the earliest period of legislature in the colony of New-York, and after the colony became a state, down to the present time in chronological order. We have also given all the legislation in relation to opening streets up to the year 1732.

It will be seen by a careful reading of these laws, that for all lands taken for a street, no assessment could be made upon adjoining owners. The cost of the land was a city charge, and assessed by a jury.

It will also be seen by a careful reading of the various acts, that for building sewers, pitching and paving streets, &c., the estimate and assessment must be made before the work is undertaken, and the money collected and applied to the pitching and paving, &c., and that if too much has been collected, the surplus shall be returned, and if not enough has been assessed, that a *second assessment* shall be made to cover the deficiency.

Wm. S. Johnson, Esq., who was, by resolution of the common council passed in July, 1837, requested to revise the city ordinances, commenced the undertaking, and in the early part of his proceeding, made a communication to the common council from which I extract as follows: "The reviser is informed that it has not been the practice to make any preliminary estimate of the expense, but only to make the assessment *after the work has been done*, and the expense *thus* ascertained. Whether or not such a practice is in conformity to the law, the reviser submits to the wisdom of the common council." On this note the law committee of such boards remark thus:—"The committee would call the attention of the common council, particularly, &c., to notes, title 7, of assessments, &c.

The acts above quoted are to be found in the session laws of 1810, page 326; 1830, page 182; of 1813, R. S. 2d vol. page 407; of 1792, 2d green leaf, page 451; of 1787, 1st green leaf, page 441; and of 1791, S. & L. page 8.

THE AMENDED CHARTER.

An Act to amend the Charter of the City of New York.

Passed April 7, 1830.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The legislative power of the corporation of the city of New York, shall be vested in a board of aldermen and a board of assistants, who together shall form the common council of the city.

§ 2. Each ward of the city shall be entitled to elect one person, to be denominated the alderman of the ward; and the persons so chosen, together, shall form the board of aldermen: And each ward shall also be entitled to elect one person, to be denominated an assistant alderman; and the persons so chosen, together, shall form the board of assistants.

§ 3. The aldermen and assistant aldermen shall be chosen for one year; and no person shall be eligible to either office, who shall not, at the time of his election, be a resident of the ward for which he is chosen.

§ 4. The annual election for charter officers shall commence on the second Tuesday in April, and the officers elected shall be sworn into office on the second Tuesday in May thereafter: And all the provisions of law now in force in regard to the notification, duration, and conduct of elections for members of assembly, and in regard to the appointment, powers, and duties of the inspectors holding the same, shall apply to the annual election of charter officers.

§ 5. The first election for charter officers, after the passage of this law, shall take place on the second Tuesday in April, one thousand eight hundred and thirty-one; and all those persons who shall have been elected under the former laws regulating the election of charter officers, and shall be in office at the time of the passage of this law, shall continue in office until the officers elected under this law shall be entitled to be sworn into office.

§ 6. The board of aldermen shall have power to direct a special election to be held, to supply the place of any alderman whose seat shall become vacant by death, removal from the city, resignation or otherwise; and the board of assistants shall also have power to direct a special election, to supply any vacancy that may occur in the board of assistants: and in both cases, the person elected to supply the vacancy, shall hold his seat only for the residue of the term of office of his immediate predecessor.

§ 7. The boards shall meet in separate chambers, and a majority of each shall be a quorum to do business. Each board shall appoint a president from its own body, and shall also choose its clerk and other officers, determine the rules of its own proceedings, and be the judge of the qualifications of its own members. Each board shall keep a journal of its proceedings, and the doors of each shall be kept open, except when the public welfare shall require secrecy: And all resolutions and reports of committees, which shall recommend any specific improvement involving the appropriation of public moneys, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the board, under the authority of the common council, in all the newspapers employed by the corporation; and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.

§ 8. Each board shall have the authority to compel the attendance of absent members, to punish its members for disorderly behavior, and to expel a member, with the concurrence of two-thirds of the members elected to the board; and the member so expelled, shall, by such expulsion, forfeit all his rights and powers as an alderman or assistant alderman.

§ 9. The stated and occasional meetings of each board of the common council, shall be regulated by its own ordinances; and both boards may meet on the same or on different days, as they may severally judge expedient.

§ 10. Any law, ordinance, or resolution of the common council, may originate in either board; and when it shall have passed one board, may be rejected or amended by the other.

§ 11. No member of either board shall, during the period for which he was elected, be appointed to, or be competent to hold any office, of which the emoluments are paid from the city treasury, or by fees directed to be paid by any ordinance or act of the common council, or be directly or indirectly interested in any contract, the expenses or consideration whereof are to be paid under any ordinance of the common council; but this section shall not be construed to deprive any alderman or assistant of any emoluments or fees which he is entitled to by virtue of his office.

§ 12. Every act, ordinance, or resolution which shall have passed the two boards of the common council, before it shall take effect, shall be presented, duly certified, to the mayor of the city, for his approbation: if he approve, he shall sign it; if not, he shall return it, with his objections, to the board in which it originated, within ten days thereafter; or if such board be not then in session, at its next stated meeting. The board to which it shall be returned, shall enter the objections at large on their journal, and cause the same to be published in one or more of the public newspapers of the city.

§ 13. The board to which such act, ordinance, or resolution, shall have been so returned, shall, after the expiration of not less than ten days thereafter, proceed to reconsider the same. If, after such reconsideration, a majority of the members elected to the board shall agree to pass the same, it shall be sent, together with the objections, to the other board, by which it shall be likewise reconsidered; and if approved by a majority of all the members elected to such board, it shall take effect as an act or law of the corporation. In all such cases, the votes of both boards shall be determined by yeas and nays; and the names of the persons voting for and against the passage of the measure reconsidered, shall be entered on the journal of each board respectively.

§ 14. If the mayor shall not return any act, ordinance or resolution so presented to him, within the time above limited for that purpose, it shall take effect in the same manner as if he had signed it.

§ 15. Neither the mayor nor recorder of the city of New York shall be a member of the common council thereof, after the second Tuesday of May, one thousand eight hundred and thirty-one.

§ 16. Whenever there shall be a vacancy in the office of mayor, and whenever the mayor shall be absent from the city, or be prevented by sickness or any other cause from attending to the duties of his office, the president of the board of aldermen shall act as mayor, and shall possess all the rights and powers of the mayor, during the continuance of such vacancy, absence or disability.

§ 17. It shall be the duty of the mayor,

1. To communicate to the common council, at least once a year, and oftener if he shall deem it expedient, a general statement of the situation and condition of the city, in relation to its government, finances, and improvements.

2. To recommend to the adoption of the common council, all such measures connected with the police, security, health, cleanliness, and ornament of the city, and the improvement of its government and finances, as he shall deem expedient.

3. To be vigilant and active in causing the laws and ordinances of the government of the city to be duly executed and enforced.

4. To exercise a constant supervision and control over the conduct and acts of all subordinate officers, and to receive and examine into all such complaints as may be preferred against any of them for violation or neglect of duty, and generally to perform all such duties as may be prescribed to him by the charter and city ordinances, and the laws of this state and the United States.

§ 18. Annual and occasional appropriations shall be made by proper ordinances of the common council, for every branch and object of city expenditure; nor shall any money be drawn from the city treasury, except the same shall have been previously appropriated to the purpose for which it is drawn.

§ 19. The common council shall not have authority to borrow any sums of money whatever, on the credit of the corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorized by a special act of the legislature.

§ 20. It shall be the duty of the common council to publish, two months before the annual election of charter officers, in each year, a full and detailed statement of the receipts and expenditures of the corporation, during the year ending on the first day of the month in which such publication is made; and in every such statement, the different sources of city revenue and the amount received from each; the several appropriations made by the common council, the objects for which the same were made, and the amount of moneys expended under each; the moneys borrowed on the credit of the corporation, the authority under which each loan was made, and the terms on which the same was obtained, shall be clearly and particularly specified.

§ 21. The executive business of the corporation of New York shall hereafter be performed by distinct departments, which it shall be the duty of the common council to organize and appoint for that purpose.

§ 22. It shall be the duty of the common council to provide for the accountability of all officers and other persons, to whom the receipt or expenditure of the funds of the city shall be entrusted, by requiring from them sufficient security for the performance of their duties or trust, which security shall be annually renewed; but the security first taken, shall remain in force until new security shall be given.

§ 23. The clerk of the board of aldermen shall, by virtue of his office, be clerk of the common council, and shall perform all the duties heretofore performed by the clerk of the common council, except such as shall be assigned to the clerk of the board of assistant aldermen; and it shall be his duty to keep open for inspection, at all reasonable times, the records and minutes of the proceedings of the common council, except such as shall be specially ordered otherwise.

§ 24. The division of the common council into two boards shall not take effect until the officers to be elected under this law enter on the duties of their office. Each board shall hold its first meeting, for the purpose of organizing, on the second Tuesday of May in each year; at which time the mayor or clerk of the common council shall attend, by whom the oath of office shall be administered to the members elected. In the absence of the mayor and clerk, such oath may be administered by the recorder or first judge of the city, or by any of the justices of the superior court.

§ 25. None of the provisions of this act, except the eighteenth, nineteenth, twentieth, and twenty-second sections, shall be construed as applying to the common council as now constituted.

§ 26. Such parts of the charter of the city of New York, and of the several acts of the legislature amending the same, as are not inconsistent with the provisions of this law, shall not be construed as repealed, modified, or in any manner affected thereby; but shall continue and remain in full force.

Session Laws, 1830, *Ch.* 122.

To the Honorable the Senate and Assembly of the State of New York.

Your memorialists, citizens of the city of New York, most respectfully beg leave to represent to your honorable body the manifold evils and grievances which the inhabitants of this city experience in consequence of the great and arbitrary power now and heretofore exercised by the Corporation of the city of New York, its officers and servants, in imposing unnecessary, heavy, and grievous burdens upon the people, in the assessing of real estate, houses, and lands, for ruinous, unnecessary and uncalled and unasked for improvements.

Your memorialists represent that the ancient charter of the city of New York did not vest the Corporation with any power to assess the citizens of the city for what are now mis-called improvements. The first power given the corporation in this matter was by an Act of the Legislature of 1807, and subsequently other Acts were passed. These Acts were not asked for by the people, but were granted on the application of the officers of the corporation.

Your memorialists herewith present public documents published by authority of the Common Council, showing the great extent to which this power has been exercised, which fully sustain the charge that the powers granted have been wickedly abused.

Your memorialists further represent that one of the officers of the Corporation advertised for sale at public auction near seven thousand lots for the non-payment of assessments, that many of these lots belong to widows and orphans, and in many instances to persons who are absent from the city, and in other cases to persons who have been unfortunate in business, to unsettled estates, and to others who cannot at this time, owing to the prostration of trade, pay the assessments.

Your memorialists herewith present the list of property advertised for sale by the officers of the corporation by which it will be seen that 1145 of the lots are assessed; sums less than five dollars each 49, sums less than one dollar each; and in very many instances farming lands held in one tract, and belonging to one and the same owner, have been by the assessor or commissioner sub-divided into lots of 25 feet by 100, and assessed separately small sums, by which the expenses have been enormously increased.

Your memorialists further represent, that the practice of commissioners and assessors to describe property by an arbitrary map number instead of the known street number by which the owners of property are misled in knowing that assessments have been imposed; this will be seen by the documents herewith. It very often happens that property is assessed as that of unknown owners, and many times in a wrong name; and in consequence of this practice property is often sold, and the first information the owner has of the assessment is obtained from the purchaser of the property at a sale for unpaid assessments, when he comes to take possession. By the Act of 1816, Commissioners were authorised to extend their assessments for improving streets, &c. as far as they judge the property benefited, but no provision was made by that act to give a notice to the distant owners of the property thus affected, by which means such owners are deprived of the opportunity of making objections to the assessments in sufficient time to be available. Another serious objection to the present system in making assessments for public improvements, is to the extravagant charges made by commissioners, assessors, surveyors, and corporation counsel: it will be seen by the public documents herewith, that for one street less than three thousand feet in length, this class of charges amounted to near $12,000. When property is sold at public auction for unpaid assessments, the Corporation sell the property for a term of years, which in many cases is equivalent to selling the fee simple absolute. Very many of the lots so sold are purchased by corporation officers, who, from being employed by the corporation to make the surveys, collect the assessments, &c. &c., acquire information of the absence, &c. of the owners, and by that means possess themselves of the estate.

Your memorialists could go further into detail of the mischiefs against which they seek to be relieved, but they deem it unnecessary.

Your memorialists, therefore, in consideration of the premises, respectfully ask your honorable body to pass a law to remedy the evils complained of, and also, to suspend the sales of property for unpaid assessments until the termination of the next session of the Legislature, and to make such further and other enactments in relation thereto as the Legislature in their wisdom shall deem needful and right.

And your memorialists in duty bound, &c.

WILLS OF PERSONAL ESTATE.

Below is an opinion written by Judge Savage, late Chief Justice of this State, since he left the Bench. It is upon a very important question, and deserves to be generally read. It is the ablest opinion ever given upon that question which is a new one, so far as the Revised Statutes are concerned. Judge Savage is justly accounted one of the ablest Chief Justices that has ever presided in our Supreme Court, and his written opinion will be regarded by all who know him, as conclusive on this question. In a future number will be given the written opinion of the same able and learned Jurist upon invalidity of trusts of real estate, to receive the rents and profits of land, and them pay over, &c. These opinions may seem out of place in a Municipal Journal; but as they are valuable, the people will be benefited by perusing them.

In the matter of the Last Will and Testament of S. S.

In 1837, S. S. made his Last Will and Testament, as follows:—

He appoints A. B. his executor and trustee, and directs his trustee to sell, dispose of and convey all his estate, real and personal, at such time and in such manner as the trustee may think proper, and to invest the proceeds in the funded debt of the United States, or other stock or good security, as he may deem advisable.

That he shall set apart $15,000 in trust for certain specific purposes—and divide the residue into three equal parts, and hold the same separately in trust for certain purposes to be mentioned.

The testator left five children—three daughters and two sons. His daughters are C. the wife of D.; E. wife of F., and G. wife of A. B. The sons are I. and K. The principal division of the estate is into five parts. The sum of $15,000 into two parts, one of $15,000 the other of $10,000,

The residue is divided into three parts—the income of one-third is to be applied by the trustee to the use of E. for life—remainder at her death equally to her lawful issue. One other third to be applied to the use of K. for life—remainder to his lawful issue. If he should die without lawful issue, then remainder to his sisters E. and G., for their lives, each one half, and remainder over to their lawful issue respectively. The income of the other third of the residue is to be applied to the use of G. for life, and then the principal to her lawful issue.

The sum of $15,000 is thus disposed of—the income of $5,000 is to be paid to C. for life, provided she survives her husband; and the income of $10,000 is to be paid to I. for life. After their deaths respectively, the sums of which they will have received the income, are to be divided into three parts, and the income to be applied to E. G. and K. severally for life; and at the death of each the principal is to be distributed equally, among their respective lawful issue. Should K. die without issue his third of the $15,000 is left undevised, but his third of the residue of the estate is given to his sisters E. and G. for life, with remainder over of one half to their respective issue, severally.

The question is, whether these devises are in conformity with the "Revised Statutes?"

It is to be observed here that this will does not create any trust in real estate; nor in the rents and profits of lands. The executor and trustee is authorised to sell all the estate of the testator, and to invest the proceeds; the trustee, however, takes no estate in the realty—his authority to sell is a mere power; and until the power shall be executed, the estate vests in the heirs at law. There is no attempt in this case to render real estate inalienable. The real estate is all to be converted into personal, and as such is devised in trust.

The provisions of the revised statutes applicable to this case are found in part 2. ch. 4, tit. 4, 2 R.S. 773 sec. 1.

§ 1. The absolute ownership of personal property shall not be suspended by any limitation or condition whatever for a longer period, than during the continuance and until the termination of not more than two

lives in being at the date of the instrument containing such limitation or condition; or if such instrument be a will, for not more than two lives in being at the death of the testator.

§ 2. In all other respects, limitations of future or contingent interests in personal property shall be subject to the rules prescribed in the first chapter of this art., in relation to future estates in lands.

The principal, if not the only difference, therefore, between the law relating to future estates in lands, and trusts of personal property, is this:—In respect to future estates in lands, the two lives, during whose continuance the power of alienation may be suspended, must be in being at the creation of the estate.—Part 2, ch. 1, tit. 2, art 1, § 15. But in respect to personal property, if the instrument containing the limitation be a will, the power of alienation, or as the statute expresses it, the absolute ownership may be suspended for the continuance of two lives, in being at the death of the testator; in all other respects they are subject to the same rules. As all the persons upon the continuance of whose lives, the power of alienation is suspended by the will of S. S. appear to have been in being when the will was executed, there is in this case no difference between the rules by which it is to be determined, and those applicable to future estates in lands.

I will proceed therefore to test the different devises in his will by those rules.

The first devise to C., or rather to the trustee to pay pay over to her during her life the interest of $5,000 upon the contingency of her surviving husband; after her death the principal is to be divided into three parts, and the interest paid upon the three several parts to E. G. & K. severally, during their several lives; and upon their respective deaths, such third of the principal is devised absolutely to their lawful issue severally.

Assuming for the present, that there is no objection to the trust, simply as a trust, there seems to be no objection to the validity of this devise.

The absolute ownership of the property devised, or any part of it, is not suspended for a longer period than until the termination of two lives in being at the death of the testator—as well as at the creation of the estates. One-third of the $5,000 is suspended during the lives of C. and E.; another third during the lives of C. and G., and the other third during the lives of C. and K. The interest of C. is contingent, depending on the fact of her surviving her husband—and the interests of E. G. and K. contingent, depending on their severally surviving C. But the fact of contingency is no objection. "Future estates are either vested or contingent," part 2, R. S. 723, § 13. "Successive estates for life shall not be limited unless to persons in being *at the creation thereof*," § 17. As regards personal property devised by will, this is to be read, instead *of* persons in being at the creation thereof, it should be persons in being *at the death of the testator*. But in this case it makes no difference the persons who take successively are all named in the will, and were therefore in being at the creation of the estate.

I do not perceive that this devise violates any rule prescribed in relation to future estates in lands.

2. The devise to I. is not distinguishable from that to C., except that it is not contingent but absolute; the income is payable to him at all events.

3. As to the residue of his estate, after taking out the $15,000 for C. and I., it is to be divided into three parts, and the income of one third to be *applied to the use* of E. G. and K. respectively for their lives, and after their deaths respectively, the principal of which they have severally received the income is to be divided absolutely between the lawful issue of each. So that the absolute ownership of this part of the estate is suspended for one life only. In the case of K., however, it is directed that, if he should die without lawful issue, then his share of the residue of the estate (but not his interest in the $15,000) shall be divided equally between E. and G. for their several lives, with remainder over to their lawful issue respectively. The absolute ownership is not suspended in any contemplated event, for more than two lives.

For the purpose of comparing the devises in this will with the rules regulating future estates in lands, I have assumed, that the trusts were valid as trusts—it is proper however to consider that question.

Previous to the revised statutes, there was no difference between trusts of real and personal estates, so far as respects the period for which they might lawfully be continued—the limit in both cases was that they should not amount to a perpetuity—and a limitation to any number of lives in being at the creation of the trust, was within the line of a perpetuity. In the celebrated case of Theilluson vs. Woodford, 4 Vesey, jr. 227, the personal property conveyed to the trustees was estimated at 600,000*l*., and both real and personal was rendered inalienable and directed to accumulate during the lives of nine persons. The courts in England said that it was immaterial how many lives were inserted, for it was for the life of the survivor, and so for one life only. It was often remarked by the judges that "the candles were all lighted and burning at the same time." Such was the law here before the operation of the revised statutes; and such is the law still, unless such trusts are limited by those statutes.

In revising the statutes, the Legislature treated of real and personal estates separately. Part 2, ch. 2, tit. 2, treats, "Of the nature and qualities of estates in real property, and the alienation thereof." And the second article of this title treats "Of uses and trusts." The first section of this article, which is § 45, declares that "Uses and trusts, except as authorised and modified in this article, are abolished"—and as a consequence of that enactment, it is added, "And every estate and interest in lands shall be deemed a legal right, &c." Every subsequent section of this article which speaks of the estate which may be held in trust, speaks of the estate in lands, or the possession of lands—and the word "assignment" in the 47th section, was probably inserted to embrace terms for years. The 55th section which enumerates the express trusts authorised by law, speaks only of trusts relating to lands, viz:—to sell or mortgage or lease lands, and to receive the rents and profits of lands for the purposes specified.—If it should be adjudged that by the 45th section, all trusts were abolished as well of personal as of real estate, it would follow that as no trust of personal property has been expressly authorised, all such trusts are void. I, however, cannot so construe the statute. The Legislature were regulating real estate, and limiting the period beyond which such estate should not be rendered inalienable. This appears from the language of the statute itself, as well as from the notes of the revisors.

Had the legislature omitted to limit the inalienability of personal estate it must have been left to the limit of the common law. They were not guilty of such omission, but made the enactment which I have first quoted above. The fact that they have done so is an additional argument in favor of the position assumed by me, to wit—that in the article of uses and trusts it was not intended to embrace personal estates.

By the common law the absolute ownership of personal property might be suspended during the continuance of any number of lives in being at the date of the instrument directing such suspension; but by the first section of tit. 4 of ch. 4 of part 2, the suspension of the absolute ownership is limited to two such lives, instead of an indefinite number; and by the second section in all other respects, the limitations of future or contingent interest in personal property are subject to the rules prescribed in relation to future estates in lands.

It is well understood that limitations of future or contingent interests in personal as well as real property are effected generally by means of trusts. The Legislature do not say that trusts may be created of personal property, for the same purposes as trusts in relation to lands, for trusts of personal property had not been abolished, but merely, that in all respects except the suspension of absolute ownership, the same rules shall apply to limitations of personal property, as to future estates in lands.

The legislature speak of limitations and conditions by means of which the absolute ownership of personal property might be suspended, as pertaining to instruments recognised by the laws; and they specify wills as one species of those instruments. The rules regulating future estates in lands, and not the rules regulating trusts authorised by the 55th section, must furnish the rules by which trusts or limitations of personal property are to be governed. Trusts of real and personal estate may, however, be subject to the same rules to a certain extent; that is, in so far as they are both subject to the rules in relation to future estates in lands It will be seen that the trusts authorised by the 3d and 4th subdivisions of the 55th section are "subject to the rules prescribed in the first article of this title. On looking into that article it will be found, that the rules referred to are in the 36th section by which the disposition of the rents and profits of lands accruing subsequent to the execution of the instrument creating such a disposition shall be governed by the rules in relation to future estates in lands. In so far, therefore, as the rules in relation to future estates in lands apply to either description of trust, they are both governed by the same rules. But those rules which are common to both will be found to have no relation to the nature of the trusts, but only their termination, or the manner of their enjoyment during their existence. Rules respecting future estates will be found in art. 1, of ch. 1, of part 2: and those rules govern trusts of real and personal property. For instance both trusts of real and personal estates are void in their creation—which shall suspend the absolute ownership for a longer period than is prescribed.

A variety of rules and regulations are found from § 10 to § 36 of that article, which regulate future estates in lands, and also trusts of real and personal property, so far as they are applicable; but there will be found nothing in any of those rules affecting the question, whether a trust to receive the interest of money, and pay it over to any person, is a valid trust or not.

The conclusion to which I have arrived on that point is drawn from premises which may be put in the shape of a syllogism, as follows:

All trusts to receive the interest of money, or the rents and profits of lands, or pay them over to any person, were lawful before the operation of the revised statutes.

Trusts to receive and pay over the interest of money are not abolished or modified except by the rules in relation to future estates in lands, and in respect to the period of their continuance for two lives only.

Therefore trusts to receive and pay over the interest of money are still valid trusts, subject to such rules and limitations as are found in the statutes.

But trusts to receive the rents and profits of lands were abolished except as modified—that modification limits such trusts to certain specified objects—therefore such trusts for any other objects are void.

Trusts of personal property, however, in relation to the objects or purposes for which they might be created at the common law, having been left untouched by the statutes, remain now, as they were before the statutes were passed. Those statutes have limited the continuance of trusts of personal property to the continuance of two lives—they have made various regulations as to the interests under them being vested or contingent: but the objects for which such trust may be created, are the same now as they ever have been at the common law.

I am therefore of opinion, that the trusts of the will of S. S. to receive the interest of money and pay it over are valid trusts: and as the absolute ownership is not suspended longer than for two lives in being at the death of the testator, the whole will is, in my opinion, legal and valid.

I am aware that it may be argued that trusts of personal property are liable to most of the objections to trusts of real estates—they facilitate fraud and increase the business of the court of chancery. But the answer to these and similar objections is, that such considerations should have weight with those whose business it is to make laws; but they should not control the opinions of those whose business it is to expound the laws. (Signed,) JOHN SAVAGE.

CITY COMPTROLLER'S REPORT OF 1840.

The preface to this report is a most extraordinary piece of composition, and I am surprised that it should have emanated from the pen of a gentleman of the ability of our city Comptroller. It is in every respect so much unlike *him*. It is the most unsound production that I have ever seen from *his* pen, and altogether unlike all other doctrines set forth or admitted by him in his annual reports of 1839 and 1840. In the next number we shall give this *preface* entire, and comment freely upon it.

The residue of the report (excepting so much as relates to the Water Commissioners, which is of a political character) is a very satisfactory document, as compared with former reports, that is, *it* is more full and more in detail, and is made up with ability. It is the duty of the Common Council to present a detailed statement of city expenditures for the information of the electors. The Comptroller's report as now published, is for the information of the Common Council and officers of the corporation.

We make some extracts from the report, and will hereafter give the whole report in the various numbers of this paper.

It will be seen that there is no necessity whatever for

the Corporation to press the collection of ruinous assessments. The present provision of that statute, as stated in the present number of this paper, as to funding the amount of awards for street openings, widening, and extending, will relieve the Corporation from all embarrassments in these proceedings; and the adaption of a general law to relieve the contractor, will ease off this difficulty, and benefit all interested, without injury to any one. It will be seen that the Corporation have already issued bonds for a portion of awards for street openings, etc.

Leaving politics aside, the present Comptroller has discharged the duties of his office with ability.

COUNSEL FEES.

The Comptroller's Report of 1840, shows that there have been paid to corporation counsel and ex-counsel during the year 1840, seventeen thousand five hundred and twenty-four dollars and seventy-three cents. The items of these charges are to be found in the Report, pages 49, 50, 52, 58, 63, 65, 86, 89 and 92; in addition to these are the counsel fees in Cherry street, 12, 29 and 30, the streets amounting to about five thousand dollars more or less, which is in dispute Of the first named sum, eight thousand, eight hundred, and seventy-six dollars and eighty cents, belong properly to account of 1839. In the Comptroller's report of 1839, the amount of counsel fees stated at thirty-seven thousand, four hundred and eighty-one dollars, and sixty-six cents, exclusive of the above amount of $8,876 80, all the above sums together for two years make the great sum of sixty-eight thousand eight hundred and eighty-three dollars and nineteen cents. The items of 1839 are to be found in the Comptroller's report of that year, pages 35, 42, 54, 76, and 102. Truly, the corporation counsel have the salary of the President and his two secretaries, without the laborious duties of his office.

EXTRACTS FROM COMPTROLLER'S REPORT.

The Assessment Bonds of the Corporation, to the amount of four hundred thousand dollars, payable at the pleasure of the Corporation, on or before June 1st, and July 1st, 1840, have been issued to cover advances which the Corporation has made in the payment of awards to individuals for damages sustained in opening and widening certain streets. They were negotiated at par, bearing interest at six per cent. per annum, and will be met and paid, from time to time, as often as the liens held by the Corporation for their redemption are realized. A specific detail of these liens will be found immediately following. The Bonds were issued under the authority of the Amended Charter empowering the Corporation to borrow in anticipation of the revenue, as well as of the State Law cited in the Ordinance upon this subject, passed August 8th, 1840.

Of the secure character of such liens, the history of this City in this matter for the last thirty years, gives abundant proof. During that period the City has advanced the sum of six millions two hundred and seventy thousand three hundred and seventeen dollars and eight cents, on this account, and the particulars of which will be found in the Appendix to this Report, all of which have been repaid, with the exception of $412,024 24, which are the outstanding liens above referred to. A small portion of them has become the absolute property of the City. The gores in Beaver street are of this description, but upon these there will probably be a depreciation of about $12,000 00; all the rest consist of items actually due the Corporation, and will be realized by public sale.

The adoption of a general law to allow the Corporation to make loans in anticipation of uncollected assessments, in order to enable them to pay Contractors upon the completion of contracts, it is believed, would not embarrass the City finances, but would result in obtaining the acceptance of all such contracts at greatly reduced prices.

FROM DEPARTMENTS.

There has been a falling off in the amount of revenue realized this year from the sale of the street sweepings, &c. The demand has not been active. The Department has been compelled, in order to prevent its too great accumulation at the depots, to offer an extended credit to its customers. At the close of navigation this year, more than twenty thousand loads remained undisposed of; last year the amount did not exceed two hundred loads. The laying of water pipes has deteriorated the value of street sweepings nearly twenty-five per cent., besides adding a heavy expense for carting off the sand left to secure the pavements.

While it must be admitted that the City has enjoyed an extraordinary degree of health since the present expensive mode of cleaning streets has been adopted, and that to maintain an exemption from disease, the expenditure must be of secondary importance, yet the magnitude of the cost, and the apparent impossibility of any considerable reduction under the present system, should invite attention to discover some other less expensive mode; and it is suggested that the experiment of leasing the streets to individual contractors should be tried, the covenants to be so framed that the streets should be swept as often and as thoroughly as at present, and to the satisfaction of the Superintendent of Streets, before the payment of any money. An offer has been received, at this Office, from a responsible source, to undertake the work at twenty thousand dollars less, per annum, than it has cost the City at any time within five years.

WHARVES, &c.

The value of the Wharf and Slip Property belonging to the Corporation, as based upon its actual cost, is estimated at $1,748,000 00. The cost of repairs, cleaning, with salaries of officers for the year 1840, amounted to $28,890 41, while the whole amount of revenue from the lease of Wharves and Ferries was $88,592 33. The nett income for 1840 was $59,701 92, or about 3 1-16 per cent. upon their actual cost.

The propriety of increasing the rates of Wharfage has several times been entertained by the Common Council, without any practical result. The inadequacy of the income to the amount of capital invested, is obvious from this exhibit, and should induce a new effort to improve this branch of the City revenue.

The amount of rents in arrear is large. More than one half of the arrears of Dock Rent had accumulated previous to 1839, a portion of which can never be realized. The arrears on the other account are mostly secure to the Corporation. The Water Lot Rent is a lien on very valuable property. The difficulty of collecting this kind of rent promptly, arises principally from the facts that the original grants are now owned by numerous assignees in severalty, who do not agree among themselves as to the proper apportionments of the rent. A declatory law of the State, permitting and legalizing proper apportionments to be made from time to time, as the grants are divided, would be very desirable to the holders, and facilitate the department in collecting these rents.

With the year 1842, a new item will enter into the computations of the Revenue necessary to be raised to meet the current annual disbursements of the City Government; an item that may bear heavily upon the community, unless a large reduction in the present rate of expenditures be effected. At that time the Croton Water will have been introduced, and be ready for the use of the inhabitants of the City, and, although a portion of the Works will not have been entirely completed, yet the debt will have reached, at least, the sum of Twelve Millions of Dollars, the interest on which, at five per cent., will be *Six Hundred Thousand Dollars* per annum. The annual cost of Repairs, and the expense of managing the Water Department, will probably reach $50,000 more.

The correctness of the estimate, given in the last annual report of the Comptroller, as to the ultimate amount of debt upon the Water account, and the period at which the Works will be completed, is confirmed by the experience of the past year; a new application to the State Legislature for a further issue of the Stock will therefore be required. And although the amount needed will still be large, yet the ample resources of the Corporation pledged for its redemption, their comparative freedom from all other debts or prospective habilities, the immense amount of taxable property held by the inhabitants of the city, the prompt faith with which it has always met its obligations, the intrinsic circumstances attending the creation of the debt, releasing it from the objections urged against the validity of other public securities, and the possession of a legal mode by the City creditor, of enforcing his just claim, now extensively known and appreciated, furnish a reasonable assurance that the remainder of the Water Stock can be readily and advantageously negotiated.

CITY STOCKS.

In another respect the City stocks must have an advantage over State stocks of much greater *practical* consequence. While there *can be* no constitutional or legal mode of enforcing a contract against a State, there *is* such a mode of enforcing one against a Municipality; the creditor to the City may reduce his claim, upon default, to judgment, when it becomes an immediately available lien upon all the Corporation property, and he may, if he chooses, realize it by judicial process, as in the case of an individual. Regarding the large amount of fixed property which the City possesses, and must always possess, this fact affords to those who may hold its securities, the strongest possible guarantee of easy, prompt, and certain payment. Perhaps these are the controlling reasons why our securities have now a higher value compared with those of this State, than heretofore, notwithstanding the advantage which the State has endeavored to give its own Stock by making it a basis for the issue of bank notes, and declaring any investment to be made in it by the banks of this State, should not be construed as an extension of their lines of discount.

By the several laws of the Corporation, all the funds arising from the ordinary revenues of the City, from the negotiation of its Stocks, and from the management of its Assessment, commonly called "Trust Accounts," are paid to the City Chamberlain, forming a Fund, separated from the Sinking Fund only. From these sources he is accustomed to pay all warrants drawn upon him, whether for the ordinary current expenses of the City Government, or for the payment of its debts, for the prosecution of its public works, or the payment of claims due on its "Trust Accounts."

The receipts detailed below form, therefore, an aggregation of several funds, and exhibit not only the ordinary revenues applicable to the support of the City government, but the sums loaned to it both for permanent and temporary use, and also the amounts collected by assessment imposed by the Supreme Court, in which it has no interest, except as trustee for their disbursement. The following is a summary of all these sources, and the amount derived from each during the year 1840, with the Treasury balance at the commencement of the year.

The revenues generally have exceeded the estimate made at the commencement of the year, and will continue to improve. There is a large amount of arrears due from these sources, which are either secured or in process of being collected. Of these claims, which are the absolute property of the City, and constitute assets against its debts, the following, with the exception of about $30,000, are considered reliable. The delinquencies in the assessment accounts enumerated below, are liens upon real estate which can be realized by public sale.

The receipts into the general Treasury, from the ordinary revenues of the city, from the negotiation of its stocks, and from the management of its "trust accounts," including the cash on hand at the commencement of the year, amounted to $5,004,610 12.

The taxable property of the City and County of N. York as assessed in 1840, is valued at $252,252,515, or more than five thirteenths of the whole taxable property in the State. The rate of tax levied was 5 4-10 mills on each dollar of valuation, being less than the average rate of taxation imposed in the other counties of the State.

The laws permitting claimants to audit their own accounts, by affidavit, where no tariff of compensation is fixed, do not always secure the services required at the lowest rate. Those laws, also, which confer upon the employing officer a discretion in the sum to be allowed for the services performed, not exceeding a given amount, are found, in practice, to serve only as authority for fixing the maximum as the unvarying compensation. Were other Ordinances so changed as to throw all the patronage of the City open to competition, it is believed that a large retrenchment would thereby be effected.

The salaries paid to the higher officers of the City Government may be materially reduced, without injustice to the incumbents.

It is not then alone to the postponement of new undertakings that the public must look for essential relief, but to the dispensing, immediately and entirely, with every unnecessary expense, however trivial. No community has a larger ability to meet, or more readily pays, the necessary demands of its government than the people of this City; but there is also no people whose permanent interest requires a more rigid economy in the administration of their municipal affairs.

It is in view of the *uncertain* amount of revenue to be derived from the Croton Aqueduct, and the *certain* necessity of increased taxation, to make up the deficiency, that the undersigned has deemed it his duty

thus to direct the attention of the City Legislature, by a more than ordinary notice, to timely means of avoiding a result that must otherwise prove severely burdensome."

CHAPEL STREET ASSESSMENT.

Document No. 9.

BOARD OF ASSISTANT ALDERMEN,

July 23d, 1838.

Report of the Committee on Assessments upon the Assessment for Regrading, &c., Chapel street. Presented by Mr. Tiemann. Laid on the table and printed. *John Newhouse*, Clerk.

The Committee on Assessments, to whom was referred the assessment for regrading and paving Chapel street, together with the various petitions and remonstrances concerning the same, Respectfully Report,

That the Committee have devoted much time and labor in examining the subject submitted to them—that they have had before them several persons who have fully set forth all the facts and circumstances connected with this subject, and have fully established the fact that the laying of the new sewer was entirely unnecessary, and consequently an expenditure without any possible good to the parties interested, who are now called upon to pay large sums of money without receiving the least equivalent therefor; and farther, the parties aver, that the old paving was in good order and condition, and consequently the expense of repaving is to them an expenditure for which they are benefited only in a trifling degree; under these circumstances your Committee are fully of opinion that the parties should be indemnified by the Common Council, and offer for adoption the following resolution:

Resolved, That the expense of repaving Chapel street be paid by the Common Council, and the Comptroller draw a warrant for the amount thereof.

Respectfully submitted,

DANIEL F. TIEMAN,
C. C. CROLIUS, Jr.,
FREEMAN CAMPBELL, } Committee on Assessments.

Document, No. 8.—Board of Assistant Aldermen.—November 26th, 1838.

Report of the Committee on Assessments, upon their former report upon the petition of sundry persons asking to be relieved from the assessment for re-paving, &c., Chapel-street. Presented by Mr. Tiemann. Laid on the table and ordered printed.

J. NEWHOUSE, *Clerk.*

The committee on assessments, to whom was referred the petition of sundry owners of property on Chapel street, praying that the expense of the last grading and re-paving of said street be paid out of the city treasury, have had the subject some time under consideration, and have given the matter all the attention that so important a subject should at all times demand from your committee, by examining a great number of persons, the street in question, &c., beg leave *respectfully to report*: That they have endeavored to give the subject submitted to them that careful consideration which its importance demands—important because it involves a principle laid down by some of the departments as a guide for assessing property when re-paved, but not found in the laws of the state relating to the city, nor in the corporation ordinances,—that when a street is newly graded and re-paved, the property must pay for it, without reference to whether they have paid for it since 1824 or not, at which time an ordinance passed the common council, by which they ordain that they will keep all pavement in order, that should be paid for by the owners after that time.

Your committee would respectfully offer the following, as some of the reasons for the conclusions they have come to. That since 1820 the owners of property on Chapel street have paid for re-paving, widening, filling up and building two sewers, assessments amounting to the enormous sum of $231,032 46, independent of the present assessment of $33,613 46, for the present grading and re-paving.

The commissioners that were appointed by the supreme court, to award and assess benefits and damages, by the widening of Chapel street, did not assess or charge upon the city any portion or part of the value or buildings destroyed by the widening of the street, as they had by law a right to do. The buildings were estimated at the sum of $102,800, the one-third of which could have been charged the city, being $34,266 66. (*Laws of the State in relation to the city of New York*, pages 731, 732, 746 and 957.)

The last improvement in widening Chapel street, was intended as a public avenue, to relieve Broadway, in part, and will no doubt be extended at both ends eventually, so as to make, as was originally contemplated, one of our main avenues leading out of the city. Any persons going through Broadway and the Bowery, will not dispute but that more wide and main avenues are needed at this time, and it is very evident that Chapel street must ere long form one of them. Therefore the assessment for widening should not be confined to the immediate vicinity of an improvement of so vast and beneficial a nature to the whole of that section of our city, but the city should, in all such cases, pay a part of the expense incurred.

A portion of the street has been paved and paid for by the owners since 1824. The street has been all repaved, and paid for by the owners since 1820, except so much as has been added to the street by the late widening, and that the owners should pay for. A large portion of this assessment is for re-paving the cross streets which have not been altered in the grade, and a part not altered two inches higher or lower.

Chapel street and its vicinity was heavily taxed for filling, grading and paving of Canal street, which is not included in the above sum of $231,000.

Mr. *Shepherd*, the superintendent to the building of the new sewer in Chapel street, appeared before your committee and stated that the old sewer was as good at the time it was taken up as any new one could be made. It was larger than the new one now is, being six feet square, and the new one but four feet six inches in diameter,—consequently was an unnecessary expense of $16,571, and paid, and cannot carry off near as much water as the old sewer.

If it was ever right for the corporation to pay for any re-pavement, it appears in the opinion of your committee to be that of Chapel street, even if the late improvement of widening had not taken place,—for the ordinance says nothing about grading; so that whether a street is raised or lowered, does not alter the intention of the law. The only question in relation to this street appears to be—has the street been paved and paid for by by the owners? They have paved and re-paved, and always paid.

For the reasons thus set forth, your committee recommend for adoption the following resolution:

Resolved, That the comptroller be directed to draw his warrant for $30,413 34, being the amount for repaving, after deducting so much as has been added to the street by widening and grading.

All of which is respectfully submitted by,

DANIEL F. TIEMANN,
C. CROLIUS, Jr. } *Committee on Assessments.*

Document No. 183.

JOURNAL OF DOCUMENTS—BOARD OF ASSISTANTS.

BOARD OF ASSISTANT ALDERMEN,

April 23d, 1840.

Report of the Street Committee, on the petition of owners of property on Centre-street, and adjoining streets, for damage done to property by altering the grade. Adopted. *John Newhouse*, Clerk.

Report of the Street Committee, to whom was referred the petition of owners of property on Centre-street, and the adjoining streets, to be re-imbursed for damage done to their property by an alteration of the grade.

Respectfully Report, That the petitioners set forth: That some of them having erected and elevated buildings conformably to the grade previously adopted, have suffered damage by said alteration.

They ask that the subject may be referred to arbitrators to estimate and allow damages.

The committee are of opinion that there is propriety and justice in referring this matter to disinterested individuals, to estimate and assess the damages and benefits occasioned by the change of grade—and they have obtained the opinion of the counsel hereunto annexed, as to the proper course to pursue, and in accordance with said opinion they submit the following resolution:

Resolved, That the assessors appointed in the ordinance for regulating and paving Centre-street, and the adjoining streets, estimate and assess the damages sustained by reason of such regulation as a part of the expenses thereof.

WM. WELLS HOLLY,
A. V. WILLIAMS, } Street Committee.

COUNSEL'S OPINION.

The Committee of Streets of the Board of Assistants.

Gentlemen,—In answer to inquiries made by you in relation to the new regulation or grading of Centre-street, I would remark that, after the proceedings for opening and widening Centre-street were finished, the common council in July last, deemed it expedient to alter a part of the grade of said street, and by resolutions ordered that the regulation of Centre-street and the streets connected with it and affected by it, be changed in conformity to the regulation shown by the blue lines drawn on the profile in the street commissioner's office. The common council, at the same time, resolved that such regulation be referred to the commissioners to estimate and to assess the damages and benefit that might accrue from such change of regulation, and directed the counsel of the board to take proper measures for that purpose.

They also ordered the street commissioners to present the proper ordinances to carry such regulation into effect.

The subscriber supposed at the time he received a copy of said resolution, that it was the intention of the common council that an application should be made to the supreme court for the appointment of commissioners to estimate such damages and benefit; but no such proceeding is provided for by law; the court has no such authority; and such application would have been fruitless. The law vests in the common council, the power of ordering and directing the grading of streets, and provides for the appointment by them of commissioners to estimate the *expenses* of such grading, and assess the same upon the property benefitted. Under this law all the alteration of the grades of streets, and all the new grades, and all estimates and assessments therefor, have been made, except when it has been done by commissioners for opening or widening streets in connection with their proceedings.

This mode of proceeding by ordinance of the corporation under the law referred to, is the proper one in the case of the alteration of the grade of Centre-street, and the only difficulty arises from the question whether the law allows the commissioners appointed by the ordinance to assess and award the damages, if any are incurred by such regulation.

Hitherto no damages have been allowed in proceedings of this kind, either because the commissioners have not felt warranted by law in allowing them, or because it has always happened that such regulations were beneficial to all. In the present case the common council evidently supposed that some damages would be sustained, and endeavored to *provide* for their payment in the same resolutions, by which they ordered and adopted the new regulation, and it would seem to be but justice not to carry into effect one resolution without the other.

The question then is, which is the true construction of the act referred to. It provides that the common council shall cause estimates of the expenses of conforming to such regulation to be made by skilful and disinterested persons, and a just and equitable assessment thereof made among the owners or occupants of houses and lots benefited thereby. No mention is specifically made in the *law* of damages to be allowed, and the authority to allow them must be inferred from the terms and general intent of the law, if it exists at all. In the first place, the law gives the power absolutely to the corporation to make such new regulation, and to assess the expenses upon the persons benefited.

Without the power of allowing damages in cases where damages are really sustained, the law is unjust in its operation, benefitting one man's property at the expense of another, without compensation to that other, a construction not to be adopted for any law.

If there was any other proceeding applicable to cases of grading where damages are sustained, or if this law were limited in terms to cases where all houses and lots would be benefited, the case would be different, but the law is general and absolute, and necessarily requiresthis construction to be equitable and just.

What are the expenses of conforming to such regulations that are to be estimated? The true answer seems to me to be, all just claims arising from it—the value of property injured or destroyed by it, as well as the materials and labor required for making it; the cost of the work—the compensation for damage necessarily done in making the work, and without doing which it could not be accomplished. Unless this be the proper explanation of the expense of conforming to such regulations, the law would authorise the doing of an injury without affording any remedy.

This construction is further strengthened by the terms of the law requiring estimates of such expense to be made and assessed, inasmuch as if the mere cost of doing the work only is to be ascertained, the contract price, or the actual expenditure, would render estimates unnecessary. The question is certainly not free from doubt and difficulty, but absolute injustice, of making these regulations without paying for damages actually sustained by them, seems to me to render that construction proper and necessary, which fulfils the general intent of the law, and does justice to all.

With these views of the proper construction of this law, I would advise that the commissioners appointed by the ordinance for the new grade or regulation of Centre street, estimate and assess the dumages necessarily caused by such new regulation, as a part of the expenses thereof. GEO. F. TALMAN.

April, 1838.

ASSESSMENTS LEADING TO THE UNCERTAINTY OF TITLES OF REAL ESTATE.

The loose and irregular mode of making and recording assessments, and giving notice of sales for assessments, is productive of great mischief and much trouble.

It is well known that heretofore lots have been described by surveyors, commissioners, and assessors, by arbitrary map numbers, and by as many different numbers to a lot as there are different assessments. This must be remedied. The law of the last session remedies the evil as to assessments made subsequent to June 5th, 1840; but there are a vast number of lots on which assessments are due, that are described in the old loose way; this must be remedied by a special law, and it must also be provided that a book shall be kept open for inspection, where all these incumbrances shall be regularly and properly recorded, that persons who purchase or loan money on real estate, may be able at once to ascertain the extent and magnitude of assessment leins, which in very many instances amount to more than the value of the land. As a full and complete illustration of my argument, we will state a few cases which have come under our own personal observation, which are most convincing and decisive. The first of these is the case of Mr. Delhoyo. A Spanish gentleman, some two years ago, purchased a house and lot, No. 2, Anthony-street, near Hudson-street, for which he paid six thousand dollars cash. The property was sold on a master's sale on a foreclosure, by one of the insolvent insurance companies. The property belonged to the estate of a person deceased. This property had been assessed for the widening of Chapel-street, the sum of between three and four hundred dollars, and described as the property of estate of Thomas Flender, who owned the three adjoining lots. The real owner was never called upon for the assessment; the property was however advertised for sale as the property of estate of Thomas Flender, and described as being situate between Chapel and Hudson-streets, and by an arbitrary map number—was sold for a long term of years, and Mr. Delhoyo knew nothing of the incumbrance until after the time of redemption had expired; he had, however, time to obtain an injunction, and then compromised the matter by paying five hundred dollars, which he had to lose.

ANOTHER.

A gentleman purchased a house and lot in Eighth-street, for which he paid several thousand dollars. About a month ago he was called upon by a person who had purchased the premises at the sale for unpaid assessments, for an assessment of about eight dollars, for paving Wooster-street, which is some distance from it. The property was sold for the term of eight years, and was assessed in another name from that of the owner; the owner was never called upon for the assessment, and was wholly ignorant of it. He obtained an injunction.

AND STILL ANOTHER.

Mr. Stuart Mollan, an old and highly respectable merchant of New York, residing in Broadway, next door to the corner of Twelfth street, occupying a large house with his stable on the rear of his lot, was assessed for building a sewer in Thirteenth street. He paid the assessment when called on. A few days since he learnt that his stable had been assessed seperately from his house for the sewer in Thirteenth street, and put down as the property of a Mr. McIllwaine, who had no interest in it. It was assessed a very small sum—was advertised and sold for the assessment for the term of eight years, as the property of Mr. McIllwaine, and described by an arbitraty map number, and he was wholly ignorant of the whole affair. A few days since, when the purchaser, who is a corporation contractor, or belongs to the family of one, claimed possession. This matter is now pending.

AND YET ANOTHER.

Mr. James Gillispie, a highly respectable gentleman residing in Dey street, owns a house on the corner of Broadway and Twelfth street, has been served in the same manner by the same persons as Mr. Mollan, and under the same circumstances.

AND MORE STILL.

Mr. Richard Mortimer, one of our highly respectable citizens, owning property on Twelfth street, has fared the same as to his property, as Mr. Mollan and Mr. Gillispie.

AND YET MORE.

Two lots of ground on Sixth street, near Avenue C, was assessed some thirty dollars for widening Avenue C. The owner had no knowledge of the assessment. He sold the lots, and now after two or more years, he finds a man building upon these lots on the strength of a lease from the corporation for thirty-five years, for the nonpayment of the assessment.

With the exception of Mr. Delhoyo's house and lot, the other five assessments did not amount to fifty dollars, but some seventy or eighty dollars costs have been added to the amount, and the parties obliged to resort to the courts for relief.

Shall these things be permitted? Certainly not. Hundreds and hundreds of cases of these same descriptions have occurred, and are cotinually occurring, and this mischief must be promptly remedied.

The legislature are called upon to remedy these abuses, and to put a stop to this abominable system of ruinous assessments. Some say that we are "shutting the stable door after the horse has gone." Not so. This system is still in its full tide of continuance, and will continue until the most effective and decided measures are taken to prevent it. The annexed petition to the legislature signed by many of our most respectable and influential citizens irrespective of party politics, will, we trust, bring the desired relief. There are other abuses of great magnitude and of a very alarming character, which require prompt attention. The Mayor and Common Council will, without doubt, lend their aid to correct these abuses, by uniting in endeavoring to obtain from the Legislature a general law. Mayor Purdy has been opposed to assessments generally, and latterly so many of the abuses have come to his knowledge, that a convincement must have produced a perfect conviction in his mind of the absolute necessity of Legislative enactments to remedy the evils complained of.

POPULATION OF THE CITY OF NEW YORK.

FLOATING DEBTS OF THE CITY.

There has been for the last ten years a floating debt, and every year increasing, which must now amount to a very large sum of money. At the last session of the legislature an application was made to fund thirteen hundred thousand dollars. The legislature passed an act to fund four hundred thousand dollars. Authority should at once be given by the legislature to the corporation, to fund all the floating debt, and a prohibition provided also against the corporation issuing another bond, unless authorized by some special act of the legislature. The comptrollers report of 1840 is a very lengthy document, and much time is required to examine it properly, and compare it with the former reports; this will be done in the subsequent numbers of this paper. The private minutes of the finance committee are the best criterion of city indebtedness. The comptroller reports only actual payments. The city has a great undertaking in hand, and will be obliged to borrow a large sum of money, it is important therefore, that the credit of the corporation should be preserved unimpaired. Justice to individuals who are holders of the present stock, also require this, as it would be doing a great wrong to impair the value of the public securities, which are held by those who have, in many cases, paid a premium for this stock. Wherever the city expenditures have been extravagant and unnecessary, they should be known and remedied. The increase of taxes have been very great, and are still to all appearance increasing. An application is now before the legislature to authorise a tax for a large amount, and it is hoped that in the act which authorises its imposition, a restrictive and special provision may be inserted, requiring that the money shall be specially appropriated for the purposes for which it is to be raised, and not "for any purpose the mayor, aldermen, and commonalty may in any manner sustain," as is provided in the tax act of the last session.

Governor Morton of Massachusetts recommended retrenchment as a substitute for taxation. This should be good authority with our present common council.

We have two descriptions of taxes in the city of New York, viz.: direct and indirect taxes. The indirect taxes are the assessments which are most odious, and of a very alarming character. In other cities, these kind of assessments are unknown. All the expenses of paving streets, building common sewers, and sinking wells, are a city charge. These assessments affect every body—they decrease the value of real estate, render titles unsafe, and are dangerous to civil liberty.—The abuses have been so great, so long continued, so pertinaciously persisted in, that the people have become exasperated, forbearance has ceased to be a virtue, and operates as an encouragement to the abuses and mischiefs.

Regulating the Ninth Avenue, from 45th street to the Bloomingdale Road.—Some months since a petition was presented in the board of assistant aldermen, to have this portion of the avenue regulated. The petition is signed by eighteen persons. We have a list of their names and also a map of all the property on that portion of the avenue which would be subject to assessment, and find that but two of the petitioners appear to be owners of any of the property which would be assessed for the work.

2d Avenue Sewer.—This sewer and its branches cost about seventy thousand dollars,—it was ordered by the common council on the petition of eleven persons; the names of only one of the petitioners appear upon the assessment list for the expense of this sewer, and the assessment of that one amounts to less than eight dollars. Both of the above petitions are on files in the offices of the clerk of the common council, and clerk of the board of assistants.

We give below the Bill reported by the select committee of the Senate, at the last session of the legislature. It will be seen, by a careful reading of this bill, that it would have remedied very many of the assessment-abuses now complained of. The sections which would have remedied those abuses were struck out by the person who drew the bill, at the request of the corporation of the city of New York. The reason for consenting to strike out, was the lateness of the session, and the consequent danger of losing the whole bill if it was opposed in either house, and also a willingness to agree upon a bill as being more desirable in all cases where it can be done. It will be recollected that the expense charged for selling lots for unpaid assessments, was sixteen dollars and eighty cents for each lot sold, which included the interest on the cost. The cost of advertising was $5, certificates $3, lease $1, making $12; twenty per cent. interest on this amount for two years made $4 80, which altogether is $16 80. If the owner redeemed at the end of two years the price of the lease was returned, but not the interest on the lease. It will also be recollected that the old rate of interest was twenty per cent. per annum; the law of 1840 reduced it to fourteen per cent. per annum.

It was very desirable to remedy that abuse of extorting such extravagant fees on the sale of every separate lot, and this much was effected by the Act of May 14, 1840, which is set forth in the present number of this paper.

The mode of describing lots by arbitrary map numbers, instead of the known street number, on assessments made after the act took effect, is done away with, and the street and ward numbers are now required to be stated; but this difficulty of vague and uncertain description of lots assessed previous to the passing of that act, by arbitrary map numbers, is yet to be remedied. It will be borne in mind by those who are familiar with assessments, that in the comptroller's report of 1839, appendix K, is a list of twenty-three streets, avenues, and public places, the assessments of which were confirmed by the supreme court in that year.—None of these assessments are included in the last sale; and besides these there are assessments for street paving, curb and gutter, sidewalks, filling low grounds, building sewers, building bulkheads, wells and pumps, &c., &c., almost without number, for which the assessments are yet to be collected, and in the assessments of which the old plan of arbitrary map numbers has been adopted. This can be remedied by requiring all lots advertised for sale to be described by the known street and ward numbers, and by requiring the purchaser to give six months' notice before he applies for a lease to the owner to redeem, as is done by the purchasers at tax sales made by the comptroller of the state. See vol. 1. R. S. p. 400, sec. 84. We will recur to this subject again.

An Act in relation to the collection of assessments and taxes in the City and County of New York, and for other purposes.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

Sec. 1. In all cases where commissioners or assessors shall hereafter be appointed to make an estimate and assessment of the expense of conforming to any order, regulation, resolution or ordinance, in laying out, opening, widening, extending, altering, straightening, or in any manner improving any avenue, street, park, place, lane or alley; or of building, constructing, altering, amending or repairing any sewer, culvert or drain; or of making, sinking or digging of any well; or for boring for water; or for regrading, grading, repaving or paving any avenue, street, park, place, lane or alley; or for the levelling, excavating, reducing, regulating or filling of any lot or lots in the city and county of New York, and all commissioners and assessors who have been heretofore appointed, and who have not yet made their report, or where their reports have been made and not confirmed, it shall be their duty to ascertain, by due proof to be made to such commissioners or assessors in writing, that the board of aldermen and board of assistant aldermen composing the common council of the city of New York, have in all respects complied with the requirements of section seven of chapter one hundred and twenty-two, of laws of this state, passed April 7, 1830; and such proof in writing shall be appended to the assessment roll of said commissioners or assessors.

Sec. 2. In all cases where commissioners or assessors shall describe the houses and lots assessed for any improvement set forth in the first section of this act they shall describe and particularize all such houses and lots by the known street number, and shall also state the names of the owner or owners, and occupant or occupants, and it shall be their duty to ascertain by an inquiry to be made of the collector of taxes of the ward in which the property assessed is situate, and by inquiry of the person who collected the taxes of such ward the previous year, as to such ownership; and such collector, on being notified in writing by the chairman of such commissioners or assessors, shall attend before them for examination.

Sec. 3. It shall be the duty of all commissioners and assessors authorised to make any estimate and assessment for any improvement recited in the first section of this act, to give notice to the owner or owners, and occupant or occupants, of all houses and lots, and improved or unimproved land affected thereby, that they have completed the estimate and assessment, and will meet at the street commissioner's office in the city of New York, to hear the objections of all persons interested, to the said estimate and assessment, who may appear and make objections thereto.

Sec. 4. Such notice may be served personally, or by leaving the same at the dwelling-house of the owner and occupant, with any person of suitable age and discretion belonging to the family of such owner and occupant, or by leaving the same at the place of business of such owner and occupant, with the person having charge of the business of such owner and occupant.

Sec. 5. The notice provided for in the two last preceding sections, shall state the amount of the assessment or assessments, the street where the property is situate, and the day and hour on which the commissioners or assessors will meet to hear objections to the estimate and assessment, and state the place of meeting, and shall be signed by the chairman of such commissioners or assessors.

Sec. 6 It shall be the duty of the commissioners or assessors, to employ a suitable person at a reasonable compensation, to make service of the notices provided for by this act; and such person shall make oath or affirmation to the due service of each of said notices, in a general return to be made to the said commissioners or assessors, who are hereby authorised to administer such oath or affirmation, and to endorse the same upon the said general return of due service, which shall be appended to the assessment list.

Sec. 7. It shall be the duty of the commissioners or assessors to take down in writing the objections which any person interested in opposing the assessment may make thereto, at the time when such commissioners or assessors shall meet to hear objections, and shall carefully read the same over to such objector, who, if he approve the same as correct, shall sign his name thereto, and such objections shall be attached to the assessment list.

Sec. 8. Whenever houses and lots, or improved or unimproved lands, shall be assessed for any improvements specified in the first section of this act, it shall be the duty of the commissioners or assessors to assess all property belonging to one and the same owner or owners, which adjoins and is held in one parcel or tract, in one sum, unless required by such owner or owners to assess the same separately, which requirement shall be in writing, and be signed by the person or persons making it, and shall be appended to the assessment roll.

Sec. 9. Whenever any houses and lots, or improved or unimproved lands, shall be hereafter offered for sale or lease at public auction, for the non-payment of any taxes or assessments in the city and county of New York, so much only of the property of the same owner or owners, shall be sold or leased as will be sufficient to satisfy such tax or assessment, and the interest and charges, and no more.

Sec. 10. It shall not be lawful for any public officer, or any person in the employ of the corporation of the city of New York, to purchase or lease any houses, lots, improved or unimproved lands at public auction, which shall or may be offered for sale or lease at public auction in the city of New York, for the non-payment of taxes or assessments; and all purchases made by any public officer or person in the employ of the corporation of the city of New York, either directly or indirectly, shall be absolutely void.

Sec. 11. It shall not be lawful for any commissioner or assessor to charge for any services in making estimates and assessments for any improvements recited in the first section of this act, not actually rendered by him, nor any parts of days, as whole days, where the time occupied was less than six hours of such day.

Sec. 12. The expense of advertising houses and lots, and improved and unimproved lands, for sale or lease in the city and county of New York, for unpaid taxes and assessments, and of giving a certificate to the purchaser or lessee therefor, and of making a lease and executing the same, shall be the same as is now charged for the similar services, by the comptroller of the state of New York, in selling lands for unpaid taxes, and no more, nor shall any other or greater rate of interest be charged on the amount of such assessment of taxes than is charged by the comptroller of the state of New York on unpaid taxes when land is sold therefor, and redeemed by the owner or others.

Sec. 13. Whenever any houses and lots, or unimproved lands, shall have been sold, or leased. at public auction in the city of New York for the non-payment of taxes or assessments, the grantee, lessee or purchaser of such houses and lots, or improved or unimproved lands, shall, four months before the term of time for the redemption of any of such houses and lots, and improved or unimproved lands shall expire, give notice both to the owner and the occupant of such houses and lots, and improved or unimproved lands, of the sale and lease, and the amount of the tax or assessment, and of the interest and expenses thereon; such notice shall be served personally or by leaving the same at the dwelling house of the owner and the occupant with any person of competent age and discretion belonging to his or her family, or by leaving the same at the place of business of such owner and occupant, with some person having charge thereof.

Sec. 14. It shall not be lawful for any public officer to execute or deliver to any purchaser or lessee a lease for a term of years of any houses, lots, improved or unimproved lands, until such officer is satisfied by due proof in writing, verified by oath or affirmation, that the requirements of the thirteenth section of this act has been complied with by such lessee or purchaser, and such proof shall be filed in the street commissioner's office in the city of New York.

Sec. 15. Commissioners or assessors for making estimate and assessment for any improvement recited in the first section of this act, shall in no case assess any house, lot, improved or unimproved lands more than one half the actual and real value of such house, lot, improved or unimproved lands, at the time of making such assessment.

Sec. 16. It shall not be lawful for any public officer of the United States, or of the corporation of the city of New York, to serve as commissioners or assessors for the making of any estimate or assessment for improvements, set forth in the first section of this act.

Sec. 17. It shall be the duty of the collectors of taxes of the city of New York to attend at the street commissioner's office, in the hall of records, every Saturday during the months of January and February in each year, from the hour of ten o'clock in the morning to the hour of three o'clock in the afternoon, with the tax lists of their respective wards, for the purpose of affording tax payers owning property in different wards an opportunity of paying such taxes.

Sec. 18. No houses and lots, or improved or unimproved lands in the city and county of New York, shall be hereafter sold or leased at public auction for the non-payment of any assessment or tax which may be due thereon, unless notice of such sale shall have been published in all the daily newspapers printed and published in the city of New York, once a week for six months, and it shall also be the duty of the officer giving such notice, and selling or leasing such houses and lots, and improved or unimproved lands, at public auction, to cause to be printed in a pamphlet a particular and detailed statement of the property assessed, and such as is now published by the street commissioner in two of the daily newspapers in the city of New York, which pamphlets shall be deposited in the street commissioner's office in the city of New York, and with the collector of taxes of the different wards

of the city of New York, and shall be delivered to any person applying therefor; and the notice provided for in this section to be given of the sale of houses and lots, and improved or unimproved lands, shall also state that the detailed statement of the assessment, or tax and ownership of the property assessed or taxed, is published in a pamphlet, and where the same are, or will be deposited, to be delivered to any person applying for the same.

Sec. 19. The act entitled "An act relative to the duties and powers of commissioners of estimate and assessment on opening streets and avenues," passed April 5th, 1816, is hereby repealed.

PROPOSED LAW AS TO PAVING STREETS, AND SINKING WELLS, AND OPENING STREETS.

§ 1. Whenever and as often as the owner or owners of any houses or lots fronting on any street or avenue by petition apply to the board of commissioners for liberty to pave or regulate such street or avenue at the cost and charge of such owner or owners exclusively, it shall be the duty of said board of commissioners to grant a permit for the same, to be so paved or regulated; and the same shall be done under the directions of a city surveyor in the employ of the said board of commissioners, within the time named in the permit granted by the said board of commissioners.

§ 2. Whenever and as often as the owners and occupants of houses fronting on any street or avenue shall be desirous that such street or avenue shall be regulated and paved, and shall petition the board of commissioners of the city of New York to that effect, it shall be the duty of the board of commissioners to cause an estimate of the expense of regulating and paving such street or avenue to be made by a surveyor in their employ; and if it shall be found, on completing such estimate, that the petitioners are owners to the extent of two-thirds the houses fronting on such street or avenue, the said board of commissioners may in their discretion order an assessment of the expense of regulating and paving such street or avenue, to be made upon the owners of all houses fronting on such street or avenue intended to be benefited thereby, by one of the city surveyors in their employ, which assessment, when confirmed by the said board of commissioners, shall be collected by one of the city collectors, and the money thus collected shall be appropriated to the regulating and paving such street or avenue. And in all cases where avenues shall be regulated or paved, one half of the expense of such regulating and paving shall be assessed upon the city treasury.

§ 3. Whenever and as often as the owners or occupants of houses and lots fronting on any street or avenue, shall be desirous of sinking a well in any such street or avenue, and placing a pump therein, for their own convenience or use, and at their own cost and charge, and shall petition and desire the board of commissioners of the city of New York to allow the same to be done, it shall be their duty to give the said petitioners a written permit to that effect, in which shall be stated the place at which the well is to be sunk, and the number of days allowed for completing the same.

§ 4. Whenever and as often as the owners and occupants of houses fronting on any street or avenue, or both, shall apply by petition to the board of commissioners for a well to be sunk, and a pump to be placed therein, it shall be the duty of the said commissioners to cause an estimate of the expense of such well and pump to be made by one of the city surveyors in their employ; and the surveyor making the estimate shall ascertain how many houses fronting on said street or avenue, or both, are within five hundred feet on the line of such street or avenue of the place where such well is designed to be sunk, and assess the same equally among such owners and occupants, and report the same to the said board of commissioners; and if, on the coming in of the said report, it is found that the petitioners are interested to the extent of two thirds the number of houses within the said distance, then and in such case the said board of commissioners may, in their discretion, confirm such estimate and assessment, and cause the amount of such assessment to be collected by one of the city collectors; and the money when collected shall be appropriated to the purposes aforesaid; and if the assessment shall amount to more than the work the surplus shall be paid into the city treasury to the credit of contingencies; and in case the work costs more than the amount assessed and collected, the residue of the expense shall be paid out of the city treasury, and charged to contingencies; but in no case shall any portion of the expense of such well and pump be assessed upon the owner of any house who is not a petitioner, who has a well sunk upon his own premises within said district, or upon any other owner or occupant not a petitioner, whose house is situate within five hundred feet of any other well or pump on the line of said street or avenue, or both.

§ 5. Whenever and as often as the owners to the extent of three fourths the land fronting on any street or avenue on that part of the island laid out by the commissioners under and by virtue of the Act of April 3d, 1807, shall, by petition, apply to the board of commissioners of the city of New York, to have such street or avenue opened or regulated, it shall be the duty of said board of commissioners to cause an estimate of the expense of opening and regulating such street or avenue to be made by a surveyor in their employ, and upon the coming in of his report, if it shall appear to the satisfaction of the said board of commissioners that public necessity or convenience requires such street or avenue to be opened and regulated, and that the estimated expense is not so great as to make it objectionable, then, and in that case, it shall be their duty to cause personal notice to be given to the petitioners to appear before the said board of commissioners; and if it shall appear that the said petitioners are not owners to the extent of three fourths of the land fronting on such street or avenue desired to be opened and regulated, the said petition shall be dismissed, and the expense of making such estimate shall be paid by such petitioners, and shall be a valid and effectual lien and incumbrance upon the land of such petitioners.

(*To be concluded in our next number.*)

That portion of the Law of 1839 which applies to giving notice of application to the Supreme Court for the Confirmation of Assessments, and also requiring the taxation of costs and expenses, and under which all the streets, avenues, and public places, for the opening of which the assessments have been confirmed since the passage of the act, have been made without complying with its provisions, and for which reason we contend the confirmation should be set aside and declared void. Session Laws, 1839, p. 182.

§ 7. The said mayor, aldermen and commonalty shall be authorised at any time previous to the confirmation of the report by the said court, to discontinue all farther proceedings relative to the said improvement, without the necessity of an application to said court for leave to do so.

§ 8. Whenever an estimate and assessment for loss and damage, and for benefit and advantage, shall be made by the said commissioners relative to the same person or persons, no interest shall be demanded from such person or persons, upon the amount assessed for benefit and advantage, except on the excess of the amount he is to pay over and above the amount he is to receive for or in consequence of any intervening time between the period fixed for the receipt of the amount of benefit and advantage, and the payment of the amount of lot and damage.

§ 9. All motions (except as hereinbefore provided) made under and by virtue of the act hereby amended, before the said court or any court to which an appeal may have been made, shall be upon giving previous notice of the time, place and object of such motion, to be published for at least fourteen days in four of the public newspapers, and by copies of said notice in handbills, to be posted up for the same space of time in the manner hereinbefore directed.

§ 10. No real estate or other property shall be sold or advertised for sale, for the non-payment of any assessment or tax laid upon real estate, unless notice in writing shall have been left at the residence of the owner or owners, if residing in the city of New York, or if upon diligent inquiry, such owner or owners cannot be found, then at the residence of the tenant or tenants upon the said premises, at least twenty days previous to such advertisement; and if such owner or owners do not reside in said city, or upon diligent inquiry cannot be found and the premises are without a tenant or tenants, then such notice in writing shall be put up for the same space of time, in some conspicuous place on the premises so assessed or taxed.

§ 11. The one hundred and seventy-ninth, and one hundred and eightieth sections of the act hereby amended, are repealed.

§ 12. No cost or charges to the said commissioners, their attorney, counsel or others, shall be paid or allowed for any services performed under this act, or the act, hereby amended, unless the same shall be taxed by the said court, who are required to make rules to apply to the said bills of costs, the existing laws in relation to the taxation of costs, and the nature and proof of the services rendered and disbursements charged, as far as the same can be made applicable; and no unnecessary cost or charges shall be allowed. Public notice of the time and place of the taxation of costs shall be given, for the same time and in the same manner as notices are required to be given by the above ninth section; and a copy of the bill of costs, containing items and particular services performed, shall be deposited in the office of the street commissioner at the time of the first publication of such notice.

§ 13. So much of the act aforesaid, or of any other act as is inconsistent with the provisions of this act, is hereby repealed.

§ 14. This act shall take effect on its passage; but no part thereof except the ninth and twelfth sections shall affect in any respect any proceedings under the act hereby amended, which may have been commenced previous to the passage of this act.

State of New York, Secretary's Office.

This act having been approved and signed by the Governor, on the 20th day of April, 1839, I do hereby certify, that the same became a law on that day.

JOHN C. SPENCER, Secretary of State.

By section 3 (R. S. City, p. 512.) The aldermen and assistants are elected for one year.

By section 4. The officers elected on the 2d Tuesday of April shall be sworn into office on the 2d Tuesday of May thereafter.

By section 5. The members of the Common Council then in office, shall continue in office until the officers elected shall be ENTITLED to be sworn into office.

By section 24. "Each Board *shall* hold its first meeting for the purpose of organizing on the 2d Tuesday of May, in each year.

By article 4, section 15. Const. St. N. York. "All officers heretofore elective by the people, shall continue to be elected, &c." And by section 16. "Where the elevation of any office is not prescribed by this Constitution, it may be declared by law; and if not so declared, such office shall be held during the pleasure of the authority making the *appointment*."

By article 2, section 1. U. States Const. "The executive power shall be vested in a president of the United States. He shall hold his office during the term of four years."

By article 12 of the amendment. "And if no house of Representatives shall choose a president whenever the right of choice devolves upon them, before the 4th day of March next following, then the Vice President shall act as President."

By section 6. As above, the persons elected as aldermen and assistant aldermen on the 2d Tuesday of May, 1831, were *entitled* to be sworn into office on the first hour, or first moment of the 2d Tuesday of May, of that year; and so of every succeeding year.

The aldermen and assistant aldermen cannot hold over under the Constitution, article 4 section 16; and by section 3 of the City Charter, they are elected for one year; and by section 4 of the same, they are required to be sworn into office on the 2d Tuesday of May; and section 24, the Boards are required to meet on that day for the purpose of organizing.

In 1836, the board of aldermen met for the purpose of organizing on the 10th day of May, which was the 2d Tuesday of May of that year — but were unable, from the fact that the two parties were eight and eight, equally balanced, to elect a president until

the 1st of July, during the whole of which time the city of New York was without a Common Council; and no legal act could be done by either Board during that time.

The same difficulties have occurred in Congress. The House of Representatives have at various times been unable to elect a Speaker on the first day — in such case the Senate did not proceed to business; and the President in such cases has always withheld his annual message until both Houses were organized. Such was the case in 1840.

Congress are required by the Constitution to meet on the first Monday of December in each year, &c., —— and less than a quorum may adjourn.

In 1837, President Jackson attended at the Capitol until midnight on the 3d of March, for the purpose of signing bills passed by Congress. He left the Capitol as soon as the clock struck twelve.

In 1840, the venerable ex-president Adams, then, and now a member of the House of Representatives, left the hall of that house at 12 o'clock at midnight of the 2d March, it being Saturday night, saying that the 25th Congress of the United States was at an end.

In 1841, President Van Buren attended at the Capitol to sign bills until midnight, and left at 12 o'clock. The year 1841 will go out at 12 o'clock at night of the 31st December next, and the present month of March will go out on the fifth Wednesday at midnight.

EXPENSE OF WIDENING ART STREET.

The expense of widening this street is upwards of eighty-eight thousand dollars. The length of the street is five hundred and thirty-one feet.

COLUMBIA COLLEGE.

The lands of this college have been assessed between five and six thousand dollars, for the pretended opening of streets out of town. The assessments have been paid, and have exhausted their ready funds which were needed for other purposes, and the college has in consequence been obliged to apply to the State for relief. The streets for which these assessments have been made have not been opened, and will not be for *many, many* years to come.

In 1837, a deputation of merchants from the city of New York proceeded to Washington, and requested the President to convene Congress to take measures in relation to the currency. The President replied, "We have no Congress which can be convened at this time;" and he waited until several of the states had elected a sufficiency of members to form a quorum, and then convened Congress by proclamation in September of that year.

France is often without a Chamber of Deputies, Great Britain without a Parliament, Spain without a Cortez, the United States without a Congress, and the city of New York without a Common Council——; and it has happened with Great Britain that they were without a King and Parliament at the same time.

ASSESSMENT ABUSES.

Several influential citizens are preparing affidavits of the abuses in assessment proceedings, to forward to the legislature.

CORPORATION NOTICES.

We have looked through the Journal of Commerce of Monday, and the Evening Star of 25th February, and the Evening Post of the 6th inst., and find but one advertisement of the corporation officers; this one is that of Col. Ewing, the street commissioner, in relation to the discontinuance of proceedings in the opening one hundred and twenty-eight street, published in the Evening Post.

ANCIENT CHARTER OF THE CITY OF NEW YORK.

We shall publish in some of the subsequent numbers the ancient Charter proceedings.

CITY GOVERNMENT.

Hon. ELIJAH F. PURDY, *Acting Mayor*,
Residence, No. 81 Ludlow-st, cor. Broome-st.
Office, No. 5 City Hall.

Board of Aldermen.

CONSTITUTION OF THE UNITED STATES.

We, the people of the United States, in order to form a more perfect union, establish justice, ensure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution of the United States of America.

ARTICLE I.

Sec. 1. All Legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Sec. 2. The House of Representatives shall be composed of members chosen every second year by the people of the several states, and the electors in each state shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state in which he shall be chosen.

Representatives and direct taxes shall be apportioned among the several states which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each state shall have at least one representative; and until such enumeration shall be made, the State of *New Hampshire* shall be entitled to choose three, *Massachusetts* eight, *Rhode Island* and *Providence Plantations* one, *Connecticut* five, *New York* six, *New Jersey* four, *Pennsylvania* eight, *Delaware* one, *Maryland* six, *Virginia* ten, *North Carolina* five, *South Carolina* five, and *Georgia* three.

When vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies.

The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Sec. 3. The Senate of the United States shall be composed of two Senators from each State chosen by the Legislature thereof for six years, and each Senator shall have one vote.

Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one third may be chosen every second year; and if vacancies happen by resignation or otherwise during the recess of the legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of the state for which he shall be chosen.

The Vice President of the United States shall be president of the Senate, but shall have no vote unless they be equally divided.

The Senate shall choose their other officers, and also a president pro tempore in the absence of the Vice President, or when he shall exercise the office of President of the United States.

The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside. And no person shall be convicted without the concurrence of two thirds of the members present.

Judgment in cases of impeachment shall not extend farther than to removal from office and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Sec. 4. The times, places and manner of holding elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Sec. 5. Each House shall be the judge of the elections and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as such House may provide.

Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two thirds, may expel a member.

Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the ayes and nays of the members of either House on any question shall, at the desire of one fifth of those present, be entered on the journal.

Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Sec. 6. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House, they shall not be questioned in any other place.

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Sec. 7. All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose, or concur with amendments, as on other bills.

Every bill which shall have passed the House of Representatives and the Senate, shall, before it become a law, be presented to the President of the United States. If he approve, he shall sign it; but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If, after such reconsideration, two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two thirds of that House, it shall become a law. But in all such cases, the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journals of each House respectively. If any bill shall not be returned by the President within ten days [Sundays excepted] after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return, in which case it shall not be a law.

Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect, shall be approved by him, or being disapproved by him, shall be re-passed by two thirds of the Senate and House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Sec. 8. The Congress shall have power to lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

To borrow money on the credit of the United States;

To regulate commerce with foreign nations, and among the several States, and with the Indian tribes;

To establish a uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States;

To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures;

To provide for the punishment of counterfeiting the securities and current coin of the United States;

To establish post-offices and post-roads;

To promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries;

To constitute tribunals inferior to the supreme court;

To define and punish piracies and felonies committed on the high seas, and offences against the laws of nations;

To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water;

To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years;

To provide and maintain a navy;

To make rules for the government and regulation of the land and naval forces;

To provide for calling forth the militia to execute the laws of the Union, suppress insurrections and repel invasions;

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the states respectively the appointment of the officers and the authority of training the militia according to the discipline prescribed by Congress;

To exercise exclusive legislation, in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of the government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings;—and,

To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this constitution in the government of the United States, or in any department or officer thereof.

Sec. 9. The migration or importation of such persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight; but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

No bill of attainder or ex-post-facto law shall be passed.

No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

No tax or duty shall be laid on articles exported from any state.

No preference shall be given by any regulation of commerce or revenue to the ports of one state over those of another; nor shall vessels bound to, or from one state, be obliged to enter, clear, or pay duties in another.

No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receips and expenditures of all public moneys shall be published from time to time.

No title of nobility shall be granted by the United States; and no person holding any office of profit or trust under them, shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever, from any king, prince, or foreign state.

Sec. 10. No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make any thing but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex-post-facto law, or law impairing the obligation of contracts, or grant any title of nobility.

No State shall, without the consent of the Congress, lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws; and the nett produce of all duties and imposts laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

No State shall, without the consent of Congress, lay any duty on tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another state, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Sec. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected as follows:

Each state shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the state may be entitled in the Congress; but no Senator or Representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.

The electors shall meet in their respective states, and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same state with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each; which list they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed; and if there be more than one who have such majority and have an equal number of votes, then the House of Representatives shall immediately choose by ballot, one of them for President; and if no person have a majority, then from the five highest on the list the said House shall, in like manner, choose the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote. A quorum for this purpose shall consist of a member or members from two thirds of the States, and a majority of all the States shall be necessary to a choice. In every case after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.*

The Congress may determine the time of choosing the electors, and the day on which they shall give their votes; which day shall be the same throughout the United States.

No person, except a natural born citizen or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States.

In case of removal of the President from office, or of his death, resignation or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President; and the Congress may by law provide for the case of removal, death, resignation, or inability both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

Before he enter on the execution of his office, he shall take the following oath or affirmation:—

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States and will to the best of my ability preserve, protect and defend the Constitution of the United States."

Sec. 2. The President shall be commander-in-chief of the army and navy of the United States, and of the militia of the several States, when called into the actual service of the United States. He may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States, except in cases of impeachment.

He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the supreme court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

The President shall have power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

Sec. 3. He shall from time to time give to the Congress information of the state of the union, and recommend to their consideration such measures as he shall judge necessary and expedient. He may, on extraordinary occasions, convene both Houses, or either of them, and, in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

Sec. 4. The President, Vice-President and all civil officers of the United States shall be removed from office on impeachment for, and conviction of, treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

Sec. 1. The judicial power of the United States shall be vested in one Supreme Court and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation which shall not be diminished during their continuance in office.

Sec. 2. The judicial power shall extend to all cases in law and equity arising under this constitution, the laws of the United States, and the treaties made, or which shall be made under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more states — between a state and citizen of another state — between citizens of different states — between citizens of the same state claiming lands under grants of different states — and between a state, or the citizen thereof, and foreign states, citizens or subjects.

In all cases affecting ambassadors, other public ministers and consuls, and those in which a state shall be a party, the supreme court shall have original jurisdiction. In all the other cases before mentioned, the supreme court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations, as the Congress shall make.

The trial of all crimes, except in cases of impeachment, shall be by jury; and such trial shall be held in the state where the said crimes shall have been committed; but when not committed within any state, the trial shall be at such place or places as the Congress may direct.

Sec. 3. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

ARTICLE IV.

Sec. 1. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Sec. 2. The citizens of each state shall be entitled to all privileges and immunities of citizens in the several states.

A person charged in any state with treason, felony, or other crime, who shall flee from justice and be found in another state, shall, on demand of the executive authority of the state from which he fled, be delivered up, to be removed to the state having jurisdiction of the crime.

No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

Sec. 3. New states may be admitted by the Congress into this Union; but no new state shall be formed or erected within the jurisdiction of any other state; nor any state be formed by the junction of two or more states, or parts of states, without the consent of the Legislatures of the states concerned, as well as of the Congress.

The Congress shall have power to dispose of, and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular state.

Sec. 4. The United States shall guaranty to every state in this Union a republican form of government, and shall protect each of them against invasion; and on application of the legislature, or of the executive, (when the legislature cannot be convened,) against domestic violence.

ARTICLE V.

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the legislatures of two thirds of the several states, shall call a convention for proposing amendments, which in either case shall be valid to all intents and purposes, as part of this Constitution, when ratified by the legislatures of three fourths of the several states, or by conventions in three fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight, shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

All debts contracted, and engagements entered into, before the adoption of this Constitution, shall be as valid against the United States under this Constitution as under the confederation.

This Constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every state shall be bound thereby, any thing to the contrary notwithstanding.

The Senators and Representatives before mentioned, and the members of the several state legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the conventions of nine states

* Annulled. See Amendment, Art. 12.

shall be sufficient for the establishment of this Constitution between the states so ratifying the same.

Done in Convention by the unanimous consent of the States present, the seventeenth day of September, in the year of our Lord one thousand seven hundred and eighty seven, and of the Independence of the United States of America, the twelfth. In witness whereof we have hereunto subscribed our names.

Attest: WILLIAM JACKSON, Sec.

AMENDMENTS.

ARTICLE I.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble and to petition the government for a redress of grievances.

ARTICLE II.

A well-regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

No soldier shall in time of peace be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated; and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment of indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia when in actual service in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself; nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law; and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor; and to have the assistance of counsel for his defence.

ARTICLE VII.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved; and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people.

ARTICLE XI.

The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another state, or by citizens or subjects of any foreign state.

ARTICLE XII.

The electors shall meet in their respective states, and vote by ballot for President and Vice President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice President, and of the number of votes for each; which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate; the President of the Senate shall, in presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted: the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then, from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But, in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members of two thirds of the states, and a majority of all the states shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them before the fourth day of March next following, then the Vice President shall act as President, as in the case of the death or other constitutional disability of the President.

The person having the greatest number of votes as Vice President, shall be the Vice President, if such number be a majority of the whole number of electors appointed; and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice President; a quorum for the purpose shall consist of two thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice.

But no person constitutionally ineligible to the office of President, shall be eligible to that of Vice-President of the United States.

THE CONSTITUTION OF THE STATE OF NEW YORK.

We, the people of the state of New York, acknowledging with gratitude the grace and beneficence of God, in permitting us to make choice of our form of government, do establish this constitution.

Article First.

Sec. 1. The legislative power of this state shall be vested in a senate and an assembly.

Sec. 2. The senate shall consist of thirty-two members. The senators shall be chosen for four years, and shall be freeholders The assembly shall consist of one hundred and twenty-eight members, who shall be annually elected.

Sec. 3. A majority of each house shall constitute a quorum to do business. Each house shall determine the rules of its own proceedings, and be the judge of the qualifications of its own members. Each house shall choose its own officers; and the senate shall choose a temporary president, when the lieutenant-governor shall not attend as president, or shall act as governor.

Sec. 4. Each house shall keep a journal of its proceedings, and publish the same, except such parts as may require secrecy. The doors of each house shall be kept open, except when the public welfare shall require secrecy. Neither house shall, without the consent of the other, adjourn for more than two days.

Sec. 5. The state shall be divided into eight districts, to be called senate districts, each of which shall choose four senators.

The first district shall consist of the counties of Suffolk, Queens, Kings, Richmond, and New York.

The second district shall consist of the counties of Westchester, Putnam, Dutchess, Rockland, Orange, Ulster, and Sullivan.

The third district shall consist of the counties of Greene, Columbia, Albany, Rensselaer, Schoharie, and Schenectady.

The fourth district shall consist of the counties of Saratoga, Montgomery, Hamilton, Washington, Warren, Clinton, Essex, Franklin, and St. Lawrence.

The fifth district shall consist of the counties of Herkimer, Oneida, Madison, Oswego, Lewis, and Jefferson.

The sixth district shall consist of the counties of Delaware, Otsego, Chenango, Broome, Cortland, Tompkins, and Tioga.

The seventh district shall consist of the counties of Onondaga, Cayuga, Seneca, and Ontario.

The eighth district shall consist of the counties of Steuben, Livingston, Monroe, Genesee, Niagara, Erie, Allegany, Cattaraugus, and Chautauque.

And as soon as the senate shall meet, after the first election to be held in pursuance of this constitution, they shall cause the senators to be divided by lot, into four classes, of eight in each, so that every district shall have one senator of each class; the classes to be numbered, one, two, three, and four. And the seats of the first class shall be vacated at the end of the first year; of the second class, at the end of the second year; of the third class, at the end of the third year; of the fourth class, at the end of the fourth year; in order that one senator be annually elected in each senate district.

Sec. 6. An enumeration of the inhabitants of the state shall be taken, under the direction of the legislature, in the year one thousand eight hundred and twenty-five, and at the end of every ten years thereafter; and the said districts shall be so altered by the legislature, at the first session after the return of every enumeration, that each senate district shall contain, as nearly as may be, an equal number of inhabitants, excluding aliens, paupers, and persons of color not taxed; and shall remain unaltered, until the return of another enumeration, and shall at all times consist of contiguous territory; and no county shall be divided in the formation of a senate district.

Sec. 7. The members of the assembly shall be chosen by counties, and shall be apportioned among the several counties of the state, as nearly as may be, according to the numbers of their respective inhabitants, excluding aliens, paupers, and persons of color not taxed. An apportionment of members of assembly, shall be made by the legislature, at its first session after the return of every enumeration; and when made, shall remain unaltered until another enumeration shall have been taken. But an apportionment of members of the assembly shall be made by the present legislature, according to the last enumeration taken under the authority of the United States, as nearly as may be. Every county heretofore established, and separately organized, shall always be entitled to one member of the assembly; and no new county shall hereafter be erected, unless its population shall entitle it to a member.

Sec. 8. Any bill may originate in either house of the legislature; and all bills passed by one house, may be amended by the other.

Sec. 9. The members of the legislature shall receive for their services a compensation to be ascertained by law, and paid out of the public treasury; but no increase of the compensation shall take effect, during the year in which it shall have been made. And no law shall be passed, increasing the compensation of the members of the legislature, beyond the sum of three dollars a day.

Sec. 10. No member of the legislature shall receive any civil appointment from the governor and senate, or from the legislature, during the term for which he shall have been elected.

Sec. 11. No person, being a member of Congress, or holding any judicial or military office under the United States, shall hold a seat in the legislature. And if any person shall, while a member of the legislature, be elected to Congress, or appointed to any office, civil or military, under the government of the United States, his acceptance thereof shall vacate his seat.

Sec. 12. Every bill which shall have passed the senate and assembly, shall, before it become a law, be presented to the governor: if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it shall have originated; who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration, two thirds of the members present shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered; and if approved by two thirds of the members present, it shall become a law. But in all such cases, the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for, and against, the bill, shall be entered on the journal of each house respectively. If any bill shall not be returned by the governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the legislature shall by their adjournment, prevent its return; in which case it shall not be a law.

Sec. 13. All officers holding their offices during good behavior, may be removed by joint resolution of the two houses of the legislature, if two thirds of all the members elected to the assembly, and a majority of all the members elected to the senate, concur therein.

Sec. 14. The political year shall begin on the first day of January; and the legislature shall every year, assemble on the first Tuesday of January, unless a different day shall be appointed by law.

Sec. 15. The next election for governor, lieutenant-governor, senators, and members of assembly, shall commence on the first Monday of November, one thousand eight hundred and twenty-two; and all subsequent elections shall be held at such time, in the month of October or November, as the legislature shall by law provide.

Sec. 16. The governor, lieutenant-governor, senators, and members of assembly, first elected under this constitution, shall enter on the duties of their respective offices, on the first day of January, one thousand eight hundred and twenty-three; and the governor, lieutenant-governor, senators, and members of assembly, now in office, shall continue to hold the same, until the first day of January, one thousand eight hundred and twenty-three, and no longer.

Article Second.

Sec. 1. *Every male citizen, of the age of twenty-one years, who shall have been an inhabitant of this state one year preceding any election, and for the last six months a resident of the town or county where he may offer his vote; and shall have, within the year next preceding the election, paid a tax to the state or county, assessed upon his real or personal property; or shall by law be exempted from taxation; or being armed and equipped according to law, shall have performed within that year military duty in the militia of this state; or who shall be exempted from performing militia duty in consequence of being a fireman in any city, town or village in this state: and also, every male citizen of the age of twenty-one years, who shall have been, for three years next preceding such election, an inhabitant of this state; and for the last year, a resident in the town or county, where he may offer his vote; and shall have been, within the last year, assessed to labor upon the public highways, and shall have performed the labor, or paid an equivalent therefor, according to law, shall be entitled to vote in the town or ward where he actually resides, and not elsewhere, for all officers that now are, or hereafter may be, elective by the people:** but no man of color, unless he shall have been for three years a citizen of this state, and for one year next preceding any election, shall be seised and possessed of a freehold estate of the value of two hundred and fifty dollars, over and above all debts and incumbrances charged thereon; and shall have been actually rated, and paid a tax thereon, shall be entitled to vote at any such election. And no person of color shall be subject to direct taxation unless he shall be seised, and possessed, of such real estate as aforesaid.

Sec. 2. Laws may be passed, excluding from the right of suffrage, persons who have been, or may be, convicted of infamous crimes.

Sec. 3. Laws shall be made for ascertaining by proper proofs, the citizens who shall be entitled to the right of suffrage, hereby established.

Sec. 4. All elections by the citizens shall be by ballot, except for such town officers as may by law be directed to be otherwise chosen.

Article Third.

Sec. 1. The executive power shall be vested in a governor. He shall hold his office for two years; and a lieutenant-governor shall be chosen at the same time, and for the same term.

Sec. 2. No person, except a native citizen of the United States, shall be eligible to the office of governor; nor shall any person be eligible to that office, who shall not be a freeholder, and shall not have attained the age of thirty years, and have been five years a resident within this state; unless he shall have been absent during that time on public business of the United States, or of this state.

Sec. 3. The governor and lieutenant-governor shall be elected at the times and places of choosing members of the legislature. The persons respectively having the highest number of votes for governor and lieutenant-governor, shall be elected; but in case two or more shall have an equal and the highest number of votes for governor, or for lieutenant-governor, the two houses of the legislature shall, by joint ballot, choose one of the said persons so having an equal and the highest number of votes, for governor, or lieutenant-governor.

Sec. 4. The governor shall be general and commander-in-chief of all the militia, and admiral of the navy of the state. He shall have power to convene the legislature (or the senate only) on extraordinary occasions. He shall communicate by message to the legislature at every session, the condition of the state; and recommend such matters to them as he shall judge expedient. He shall transact all necessary business with the officers of government, civil and military. He shall expedite all such measures as may be resolved upon by the legislature, and shall take care that the laws are faithfully executed. He shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished, during the term for which he shall have been elected.

Sec. 5. The governor shall have power to grant reprieves and pardons after conviction, for all offences, except treason and cases of impeachment. Upon convictions for treason, he shall have power to suspend the execution of the sentence, until the case shall be reported to the legislature at its next meeting; when the legislature shall either pardon, or direct the execution of the criminal, or grant a farther reprieve.

Sec. 6. In case of the impeachment of the governor, or his removal from office, death, resignation, or absence from the state, the powers and duties of the office shall devolve upon the lieutenant-governor for the residue of the term, or until the governor absent or impeached, shall return, or be acquitted. But when the governor shall, with the consent of the legislature, be out of the state in time of war, at the head of a military force thereof, he shall still continue commander-in-chief of all the military force of the state.

Sec. 7. The lieutenant-governor shall be president of the senate, but shall have only a casting vote therein. If during a vacancy of the office of governor, the lieutenant-governor shall be impeached, displaced, resign, die, or be absent from the state, the president of the senate shall act as governor, until the vacancy shall be filled, or the disability shall cease.

Article Fourth.

Sec. 1. Militia officers shall be chosen, or appointed as follows:—Captains, subalterns, and non-commissioned officers, shall be chosen by the written votes of the members of their respective companies. Field officers of regiments and separate battalions, by the written votes of the commissioned officers of the respective regiments and separate battalions. Brigadier-generals, by the field officers of their respective brigades. Major-generals, brigadier-generals, and commanding officers of regiments or separate battalions, shall appoint the staff officers of their respective divisions, brigades, regiments, or separate battalions.

Sec. 2. The governor shall nominate, and with the consent of the senate, appoint all major-generals, brigade-inspectors, and chiefs of the staff departments, except the adjutant-general and commissary-general. The adjutant-general shall be appointed by the governor.

Sec. 3. The legislature shall, by law, direct the time and manner of electing militia officers, and of certifying their elections to the governor.

Sec. 4. The commissioned officers of the militia shall be commissioned by the governor; and no commissioned officer shall be removed from office, unless by the senate on the recommendation of the governor, stating the grounds on which such removal is recommended, or by the decision of a court-martial, pursuant to law. The present officers of the militia shall hold their commission, subject to removal as before provided.

Sec. 5. In case the mode of election and appointment of militia officers, hereby directed, shall not be found conducive to the improvement of the militia, the legislature may abolish the same, and provide by law for their appointment and removal, if two thirds of the members present in each house shall concur therein.

Sec. 6. The secretary of state, comptroller, treasurer, attorney-general, surveyor-general, and commissary-general, shall be appointed as follows:—The senate and assembly shall each openly nominate one person for the said offices respectively; after which, they shall meet together, and if they shall agree in their nominations, the person so nominated shall be appointed to the office for which he shall be nominated. If they shall disagree, the appointment shall be made by the joint ballot of the senators and members of assembly. The treasurer shall be chosen annually. The secretary of state, comptroller, attorney-general, surveyor-general, and commissary-general, shall hold their offices for three years, unless sooner removed by concurrent resolution of the senate and assembly.

Sec. 7. The governor shall nominate, by message, in writing, and with the consent of the senate, shall appoint, all judicial officers, except justices of the peace, *who shall be appointed in manner following, that is to say: The board of supervisors in every county in this state shall, at such times as the legislature may direct, meet together; and they, or a majority of them so assembled, shall nominate so many persons as shall be equal to the number of justices of the peace to be appointed in the several towns in the respective counties. And the judges of the respective county courts, or a majority of them, shall also meet and nominate a like number of persons; and it shall be the duty of the said board of supervisors, and judges of county courts, to compare such nominations, at such time and place as the legislature may direct. And if on such comparison, the said boards of supervisors and judges of county courts, shall agree in their nominations, in all, or in part, they shall file a certificate of the nominations in which they shall agree, in the office of the clerk of the county, and the person or persons named in such certificates, shall be justices of the peace: And in case of disagreement in whole, or in part, it shall be the farther duty of the said boards of supervisors, and judges respectively, to transmit their said nominations, so far as they disagree in the same, to the governor, who shall select from the said nominations, and appoint so many justices of the peace, as shall be requisite to fill the vacancies.**

Every person appointed a justice of the peace, shall hold his office for four years, unless removed by the county court, for causes particularly assigned by the judges of the said court. And no justice of the peace shall be removed, until he shall have notice of the charges made against him, and an opportunity of being heard in his defence.

Sec. 8. Sheriffs and clerks of counties, including the register and clerk of the city and county of New York, shall be chosen by the electors of the respective counties, once in every three years, and as often as vacancies shall happen. Sheriffs shall hold no other office, and be ineligible for the next three years after the termination of their offices. They may be required by law, to renew their security, from time to time; and in default of giving such new security, their offices shall be deemed vacant. But the county shall never be made responsible for the acts of the sheriff: and the governor may remove any such sheriff, clerk, or register, at any time within the three years for which he shall be elected, giving to such sheriff, clerk, or register, a copy of the charge against him, and an opportunity of being heard in his defence, before any removal shall be made.

* Amended in 1826, and the part in *italic* abolished. See amendment No. 2.

** This section was amended in 1826, and the part in *italic* was rescinded. See amendment No 1.

Sec. 9. The clerks of courts, except those clerks whose appointment is provided for in the preceding section, shall be appointed by the courts of which they respectively are clerks; and district-attorneys, by the county courts. Clerks of courts and district-attorneys, shall hold their offices for three years, unless sooner removed by the courts appointing them.

Sec. 10. The mayors of all the cities in this state shall be appointed annually, by the common councils of the respective cities.*

Sec. 11. So many coroners as the legislature may direct, not exceeding four in each county, shall be elected in the same manner as sheriffs, and shall hold their offices for the same term, and be removable in like manner.

Sec. 12. The governor shall nominate, and with the consent of the senate, appoint masters and examiners in chancery; who shall hold their offices for three years, unless sooner removed by the senate, on the recommendation of the governor. The registers and assistant registers, shall be appointed by the chancellor, and hold their offices during his pleasure.

Sec. 13. The clerk of the court of oyer and terminer, and general sessions of the peace, in and for the city and county of New York, shall be appointed by the court of general sessions of the peace in said city, and hold his office during the pleasure of the said court: and such clerks and other officers of courts, whose appointment is not herein provided for, shall be appointed by the several courts, or by the governor, with the consent of the senate, as may be directed by law.

Sec. 14. The special justices, and the assistant justices, and their clerks, in the city of New York, shall be appointed by the common council of the said city; and shall hold their offices for the same term, that the justices of the peace, in the other counties of this state, hold their offices, and shall be removable in like manner.

Sec. 15. All officers heretofore elective by the people, shall continue to be elected; and all other officers, whose appointment is not provided for by this constitution, and all officers, whose offices may be hereafter created by law, shall be elected by the people, or appointed, as may by law be directed.

Sec. 16. Where the duration of any office is not prescribed by this constitution, it may be declared by law; and if not so declared, such office shall be held during the pleasure of the authority making the appointment.

Article Fifth.

Sec. 1. The court for the trial of impeachments, and the correction of errors, shall consist of the president of the senate, the senators, the chancellor, and the justices of the supreme court, or the major part of them; but when an impeachment shall be prosecuted against the chancellor, or any justice of the supreme court, the person so impeached, shall be suspended from exercising his office, until his acquittal; and when an appeal from a decree in chancery shall be heard, the chancellor shall inform the court of the reasons for his decree, but shall have no voice in the final sentence; and when a writ of error shall be brought, on a judgment of the supreme court, the justices of that court shall assign the reasons for their judgment, but shall not have a voice for its affirmance or reversal.

Sec. 2. The assembly shall have the power of impeaching all civil officers of this state for mal and corrupt conduct in office, and for high crimes and misdemeanors: but a majority of all the members elected shall concur in an impeachment. Before the trial of an impeachment, the members of the court shall take an oath or affirmation, truly and impartially to try and determine the charge in question, according to evidence; and no person shall be convicted, without the concurrence of two thirds of the members present. Judgment, in cases of impeachment, shall not extend farther than the removal from office, and disqualification to hold, and enjoy, any office of honor, trust or profit, under this state; but the party convicted, shall be liable to indictment, and punishment, according to law.

Sec. 3. The chancellor and justices of the supreme court, shall hold their offices during good behavior, or until they shall attain the age of sixty years.

Sec. 4. The supreme court shall consist of a chief justice, and two justices, any of whom may hold the court.

Sec. 5. The state shall be divided, by law, into a convenient number of circuits, not less than four, nor exceeding eight, subject to alteration, by the legislature, from time to time, as the public good may require; for each of which, a circuit judge shall be appointed, in the same manner, and hold his office by the same tenure, as the justice of the supreme court; and who shall possess the powers of a justice of the supreme court at chambers, and in the trial of issues joined in the supreme court; and in courts of oyer and terminer and gaol delivery. And such equity powers may be vested in the said circuit judges, or in the county courts, or in such other subordinate courts as the legislature may by law direct, subject to the appellate jurisdiction of the chancellor.

Sec. 6. Judges of the county courts, and recorders of cities, shall hold their offices for five years, but may be removed by the senate, on the recommendation of the governor, for causes to be stated in such recommendation.

Sec. 7. Neither the chancellor, nor justices of the supreme court, nor any circuit judge, shall hold any other office or public trust. All votes for any elective office, given by the legislature or the people, for the chancellor, or a justice of the supreme court, or circuit judge, during his continuance in his judicial office, shall be void.

Article Sixth.

Sec. 1. Members of the legislature, and all officers, executive and judicial, except such inferior officers as may by law be exempted shall, before they enter on the duties of their respective offices, take and subscribe the following oath or affirmation:

I do solemnly swear, (or affirm, as the case may be,) that I will support the constitution of the United States and the constitution of the state of New York; and that I will faithfully discharge the duties of the office of ——— according to the best of my ability.

And no other oath, declaration, or test, shall be required as a qualification for any office or public trust.

Article Seventh.

Sec. 1. No member of this state shall be disfranchised, or deprived of any of the rights or privileges, secured to any citizen thereof, unless by the law of the land, or the judgment of his peers.

Sec. 2. The trial by jury, in all cases in which it has been heretofore used, shall remain inviolate for ever; and no new court shall be instituted, but such as shall proceed according to the course of the common law; except such courts of equity, as the legislature is herein authorized to establish.

Sec. 3. The free exercise and enjoyment of religious profession and worship, without discrimination or preference, shall for ever be allowed in this state, to all mankind; but the liberty of conscience hereby secured, shall not be so construed as to excuse acts of licentiousness, or justify practices inconsistent with the peace or safety of this state.

Sec. 4. *And whereas*, the ministers of the gospel are, by their profession, dedicated to the service of God, and the cure of souls, and ought not to be diverted from the great duties of their functions; therefore, no minister of the gospel, or priest of any denomination whatsoever, shall at any time hereafter, under any pretence or description whatever, be eligible to, or capable of holding, any civil or military office or place within this state.

Sec. 5. The militia of this state, shall, at all times hereafter, be armed and disciplined, and in readiness for service; but all such inhabitants of this state, of any religious denomination whatever, as from scruples of conscience, may be averse to bearing arms, shall be excused therefrom, by paying to the state an equivalent in money; and the legislature shall provide by law, for the collection of such equivalent, to be estimated according to the expense, in time and money, of an ordinary, able bodied militia-man.

Sec. 6. The privilege of the writ of habeas corpus, shall not be suspended, unless when in cases of rebellion, or invasion, the public safety may require its suspension.

Sec. 7. No person shall be held to answer for a capital or otherwise infamous crime, (except in cases of impeachment; and in cases of the militia, when in actual service, and the land and naval forces in time of war, or which this state may keep, with the consent of congress, in time of peace; and in cases of petit larceny, under the regulation of the legislature;) unless on presentment, or indictment of a grand jury; and in every trial on impeachment or indictment, the party accused shall be allowed counsel as in civil actions. No person shall be subject, for the same offence, to be twice put in jeopardy of life or limb; nor shall he be compelled, in any criminal case, to be a witness against himself; nor be deprived of life, liberty or property, without due process of law: nor shall private property be taken for public use, without just compensation.

Sec. 8. Every citizen may freely speak, write and publish his sentiments, on all subjects, being responsible for the abuse of that right; and no law shall be passed, to restrain, or abridge the liberty of speech, or of the press. In all prosecutions or indictments for libels, the truth may be given in evidence, to the jury; and if it shall appear to the jury, that the matter charged as libellous, is true, and was published with good motives, and for justifiable ends, the party shall be acquitted; and the jury shall have the right to determine the law and the fact.

Sec. 9. The assent of two thirds of the members elected to each branch of the legislature, shall be requisite to every bill appropriating the public moneys or property for local or private purposes, or creating, continuing, altering, or renewing, any body politic or corporate.

Sec. 10. The proceeds of all lands belonging to this state, except such parts thereof as may be reserved or appropriated to public use, or ceded to the United States, which shall hereafter be sold or disposed of, together with the fund denominated the common school fund, shall be and remain a perpetual fund; the interest of which shall be inviolably appropriated and applied to the support of common schools throughout this state. Rates of toll, not less than those agreed to, by the canal commissioners, and set forth in their report to the legislature of the twelfth of March, one thousand eight hundred and twenty-one, shall be imposed on, and collected from all parts of the navigable communications between the great western and northern lakes, and the Atlantic ocean, which now are, or hereafter shall be made and completed: and the said tolls, together with the duties on the manufacture of all salt, as established by the act of the fifteenth of April, one thousand eight hundred and seventeen*; and the duties on goods sold at auction, excepting therefrom, the sum of thirty-three thousand five hundred dollars, otherwise appropriated by the said act; and the amount of the revenue, established by the act of the legislature of the thirtieth of March, one thousand eight hundred and twenty, in lieu of the tax upon steam-boat passengers; shall be and remain inviolably appropriated and applied to the completion of such navigable communications, and to the payment of the interest, and reimbursement of the capital, of the money already borrowed, or which hereafter shall be borrowed, to make and complete the same. And neither the rates of toll on the said navigable communications; nor the duties on the manufacture of salt aforesaid; nor the duties on goods sold at auction, as established by the act of the fifteenth of April, one thousand eight hundred and seventeen; nor the amount of the revenue, established by the act of March the thirtieth, one thousand eight hundred and twenty, in lieu of the tax upon steamboat passengers; shall be reduced or diverted, at any time before the full and complete payment of the principal and interest of the money borrowed, or to be borrowed, as aforesaid. And the legislature shall never sell, or dispose of the salt springs belonging to this state, nor the lands contiguous thereto, which may be necessary, or convenient, for their use, nor the said navigable communications, or any part or section thereof; but the same shall be and remain the property of this state.†

Sec. 11. No lottery shall hereafter be authorized in this state; and the legislature shall pass laws to prevent the sale of all lottery tickets within this state, except in lotteries already provided for by law.

Sec. 12. No purchase or contract for the sale of lands in this state, made since the fourteenth day of October, one thousand seven hundred and seventy five, or which may hereafter be made, of, or with the Indians, in this state, shall be valid, unless made under the authority, and with the consent of the legislature.

Sec. 13. Such parts of the common law, and of the acts of the legislature of the colony of New York, as together did form the law of the said colony, on the nineteenth day of April, one thousand seven hundred and seventy-five, and the resolutions of the congress of the said colony, and of the convention of the state of New York, in force on the twentieth day of April, one thousand seven hundred and seventy-seven, which have not since expired, or been repealed, or altered; and such acts of the legislature of this state, as are now in force, shall be and continue the law of this state, subject

* Amended as to the city of New York. See amendment No. 4.

* Amended as to duties on salt. See amendment No. 3.

† A farther Amendment to this section is now pending.

to such alterations as the legislature shall make concerning the same. But all such parts of the common law, and such of the said acts, or parts thereof, as are repugnant to this constitution, are hereby abrogated.

Sec. 14. All grants of land within this state, made by the king of Great Britain, or persons acting under his authority, after the fourteenth day of October, one thousand seven hundred and seventy-five, shall be null and void: but nothing contained in this constitution shall affect any grants of land within this state, made by the authority of the said king or his predecessors, or shall annul any charters to bodies politic and corporate, by him or them made, before that day; or shall affect any such grants or charters since made by this state, or by persons acting under its authority; or shall impair the obligation of any debts contracted by the state, or individuals, or bodies corporate, or any other rights of property, or any suits, actions, rights of action, or other proceedings in courts of justice.

Article Eighth.

Sec. 1. Any amendment or amendments to this constitution, may be proposed in the senate or assembly, and if the same shall be agreed to by a majority of the members elected to each of the two houses, such proposed amendment or amendments, shall be entered on their journals, with the yeas and nays taken thereon, and referred to the legislature then next to be chosen; and shall be published for three months previous to the time of making such choice; and, if in the legislature next chosen as aforesaid, such proposed amendment, or amendments, shall be agreed to by two thirds of all the members elected to each house, then it shall be the duty of the legislature to submit such proposed amendment, or amendments, to the people, in such manner, and at such time, as the legislature shall prescribe: and if the people shall approve and ratify such amendment, or amendments, by a majority of the electors qualified to vote for members of the legislature, voting thereon, such amendment, or amendments, shall become part of the constitution.

Article Ninth.

Sec. 1. This constitution shall be in force, from the last day of December, in the year one thousand eight hundred and twenty-two. But all those parts of the same, which relate to the right of suffrage; the division of the state into senate districts; the number of members of the assembly to be elected, in pursuance of this constitution; the apportionment of members of assembly; the elections hereby directed to commence on the first Monday of November, in the year one thousand eight hundred and twenty-two; the continuance of the members of the present legislature in office, until the first day of January, in the year one thousand eight hundred and twenty-three; and the prohibition against authorizing lotteries; the prohibition against appropriating the public moneys, or property, for local or private purposes, or creating, continuing, altering or renewing any body politic or corporate, without the assent of two thirds of the members elected to each branch of the legislature; shall be in force, and take effect, from the last day of February next. The members of the present legislature shall, on the first Monday of March next, take and subscribe an oath or affirmation, to support this constitution, so far as the same shall then be in force. Sheriffs, clerks of counties, and coroner's, shall be elected at the election hereby directed to commence on the first Monday of November, in the year one thousand eight hundred and twenty-two; but they shall not enter on the duties of their offices, before the first day of January then next following. The commissions of all persons holding civil offices on the last day of December, one thousand eight hundred and twenty-two, shall expire on that day; but the officers then in commission, may respectively continue to hold their said offices until new appointments, or elections, shall take place under this constitution.

Sec. II. The existing laws relative to the manner of notifying, holding and conducting elections, making returns, and canvassing votes, shall be in force, and observed in respect to the elections hereby directed to commence on the first Monday of November, in the year one thousand eight hundred and twenty-two; so far as the same are applicable. And the present legislature shall pass such other and further laws, as may be requisite for the execution of the provisions of this constitution, in respect to elections.

Done in convention, at the capitol in the city of Albany, the tenth day of November, in the year one thousand eight hundred and twenty-one, and of the independence of the United States of America, the forty-sixth. In witness whereof, we have hereunto subscribed our names.

[The foregoing constitution was ratified by the people, at an election held in the several towns and wards of this state, on the fifteenth, sixteenth, and seventeenth days of January, one thousand eight hundred and twenty-two.]

* Pursuant to a resolution of the convention, the constitution was signed by all the members except those whose names are designated by an asterisk. † Mr. Jansen died during the sitting of the convention.

AMENDMENTS.

[The following amendments to the constitution were proposed by the legislature in 1825, were referred to the legislature of 1826, agreed to by two thirds of the members elected to each house of that legislature, submitted to the people, and approved and ratified at an election held on the sixth, seventh, and eight days of November, 1826.]

Amendment No. 1.—That the people of this state in their several towns, shall at their annual election, and in such manner as the legislature shall direct, elect by ballot their justices of the peace, and the justices so elected in any town shall immediately thereafter meet together, and in presence of the supervisor and town clerk of the said town, be divided by lot into four classes, of one in each class, and be numbered one, two, three, and four; and the office of number one shall expire at the end of the first year, of number two at the end of the second year, of number three at the end of the third year, and of number four at the end of the fourth year, in order that one justice may thereafter be annually elected; and that so much of the seventh section of the fourth article of the constitution of this state as is inconsistent with this amendment, be abrogated.

Amendment No. 2.—That so much of the first section of the second article of the constitution as prescribes the qualifications of voters, other than persons of color, be and the same is hereby abolished, and that the following be substituted in the place thereof:

Every male citizen of the age of twenty-one years, who shall have been an inhabitant of this state, one year next preceding any election, and for the last six months a resident of the county where he may offer his vote, shall be entitled to vote in the town or ward where he actually resides, and not elsewhere, for all officers that now are, or hereafter may be elective by the people.

[The following amendments were proposed in 1832, agreed by two thirds of the members elected to each house in 1833, submitted to the people, and approved and ratified at the election in November, 1833.]

Amendment No. 3.—That the duties on the manufacture of salt, as established by the act of the fifteenth of April, one thousand eight hundred and seventeen, and by the tenth section of the seventh article of the constitution of this state, may, at any time hereafter, be reduced by an act of the legislature of this state; but shall not, while the same is appropriated and pledged by the said section, be reduced below the sum of six cents upon each and every bushel; and the said duties shall remain inviolably appropriated and applied as is provided by the said tenth section:

And that so much of the said tenth section of the seventh article of the constitution of this state as is inconsistent with this amendment, be abrogated.

Amendment No. 4.—At the end of the tenth section of the fourth article of the said constitution, add the following words: "Except in the city of New York, in which city the mayor shall be chosen annually by the electors thereof qualified to vote for the other charter officers of the said city, and at the time of the election of such officers.

ANCIENT DUTCH CHARTER.

1657.

To the Right Honorable the Director General and Council, in N. Netherlands:

Noble and Respectful Lords—

Whereas, it has pleased your Honors, to favor the city of Amsterdam, in N. Netherlands, with the priviledge of a small and great citizenship, so is it that we, burgomasters and schepens of this city, for the welfare of the community, acknowledging this favour with thankfulness, solicit your Honours' explanation what persons are to enjoy the small, and who are qualified for the great citizenship; and we request that it may please your Honours to favour the sheriffe, burgomasters and schepens, who are now acting in this city, or who were before among its magistrates, or who shall

at the next election to be chosen, with their descendants, with the priviledge of the great citizensſhip.

Expecting, on this petition,
Your Honours' favourable disposition,
We remain,
(Lower stood)
Your Honours' obedient,
The Burgomasters and Schepens of the city of Amsterdam, in N. Netherland, (Lower stood.)
By order of them, and signed,
JACOB KIPP, Secretary.

Done, 31st January, in the meeting at the City Hall, in Amsterdam, in N. Netherland.

In council at Fort Amsterdam, the 2d February, 1657, which was read in the following words:

February 2d, 1657—Friday.

Whereas, agreeably to the privileges of this city, annually some of the magistrates whose time is expired, leave their seats, to be replaced with others by the Director General and Council in New Netherland, elected as magistrates for the ensuing year, the Hon. Alland Antony, as old Burgomaster, Paulus Limdertson Van de Grift, Burgomaster, William Beeckman, Presedent, Schepen Johannes de Peyster, Govert Lockerman, Adrian Blommet, and Hendrick Jansen Vandervin, Schepens—which is communicated to the community to treat them with due respect. Done in Council, in Fort Amsterdam, N. Netherland, on the day as above.

The Director General and Council in New Netherland, to all who shall see or hear this read—Greeting:

Be it known, That they, in consideration of the several faithfull and voluntary services, on expeditions as otherwise and submission to burthens of the citizens in this city, and in the hope and confidence which the Director General and Council are fostering, that they will continue in the same loyal conduct, on the humble petition of the burgomasters and schepens, resolved to priviledge the citizens and good inhabitants of this city with the distinguished favours of great and small citizenship, (*groot den slein burgevrecht*) so as appears by the act of this priviledge, granted for this purpose to the burgomasters and schepens, in amplification of former ones, as it is explained in said act: And whereas, in all beginnings, any thing or person must be the first, so that afterwards a distinction may take place, so too, it must take place in establishing the great and small citizenship. On which the burgomasters and schepens requested, in their petition to the Director General and Council, a further explanation who actually should be placed among and considered as great or small citizens. As the necessity of this distinction is grounded in reason, so is it that the Director General and Council in New Netherland qualify, now, and favour all such of the Inhabitants with the great citizenship.

First—All those who have been members of the Supreme Government, or who are in it actually, with their descendants in the male line.

Secondly—All who have been, or are yet, burgomasters and schepens in this city, with their descendants in the male line.

Thirdly—The ministers of the gospel, who have been, or are yet, in function, with their descendants in the male line.

Fourthly—All the officers of the militia, from the staff to the ensigns, included, with their descendants in the male line, well understood, that the aforesaid persons shall not be understood to have lost for themselves or their descendants, by their absence from this city, or not keeping fire or light, this priviledge of their great citizenship, in conformity to the laudable customs of the city Amsterdam in Europe.

Further—All other persons who desire and are inclined to be ranked among the great citizens, and to enjoy their priviledges and benifices, may, in conformity of this act, become that priviledge, by addressing themselves to the burgomasters and schepens, provided they pay for it the sum of fifty guilders of Netherland coinage, or its equivalent (£8. 6. 8.)

With the small citizenship are favoured and qualified:

First—All such as resided within this city during a year and six weeks, and kept their fire and light.

Secondly—All born within this city.

Thirdly—All who have married daughters of citizens who have been born in this city; all who might marry these in future, and will, that aforesaid citizenship shall not be lost by absence from this city, or by not keeping fire and light as before.

Further—All others who have opened store in this city, under what name it might be, or who follow this Business within this city or its jurisdiction: Provided, that all such persons shall have previously addressed the burgomasters for this priviledge, and paid for it twenty guilders, Netherland coin, or its equivalent—£3. ℳ8.

All tradesmen may follow and exercise their craft, if they have previously solicited and obtained their citizenship; all pensioned ministers of the company, all passengers and strangers, who intend to settle in the country—provided they effect this within six weeks.—

The money to be obtained from this source, the obtaining of citizenship, shall be received by the burgomasters, to be administered by them, and chiefly employed in the fortification of this city.

All which, that it may be carried into practice in better order, so is it that the burgomasters are commanded and authorised to prepare, as soon as it possibly can be effected, correct lists of all such, who, agreeably to the tenor of this act, have been qualified and favoured with the great and small citizenship, so, too, who in future might obtain this priviledge, and to keep correct registers of it, so that they can whenever it is required, deliver of these faithful copies at the secretary's office of the Director General and Council.

Done, declared, resumed, and resolved, in the meeting of the Director General and Council in N. Netherland, in Fort Amsterdam, in New Netherland.

P. STUYVESANT,
NICASURS DE SELLE,
PETER JONNEMAN.

Colonel Nicolls took the Fort, City, and Colony, from the Dutch.

ARTICLES OF CAPITULATION IN 1664.

These Articles following were consented to by the persons here under subscribed, at the Governour's bowery,

August 27th, Old Stile, 1664.

I. "We consent, that the States General, or the West India Company, shall freely enjoy all Farms and houses, (except such as are in the forts) and that within six months, they shall have free liberty to transport all such arms and ammunition, as now does belong to them, or else they shall be paid for them.

II. "All public houses shall continue for the use which they are for.

III. "All people shall still continue free denizens, and shall enjoy their lands, houses, goods, wheresoever they are within this country, and dispose of them as they please.

IV. "If any inhabitant have a mind to remove himself, he shall have a year and six weeks from this day to remove himself, wife, children, servants, goods, and to dispose of his lands here.

V. "If any officer of state, or public minister of state have a mind to go for England, they shall be transported freight free, in his majesty's frigates, when these frigates shall return thither.

VI. "It is consented to, that any people may freely come from the Netherlands, and plant in this colony, and that Dutch vessels may freely come hither, and any of the Dutch may freely return home, or send any sort of merchandise home, in vessels of their own country.

VII. "All ships from the Netherlands or any other place, and goods therein shall be received here, and sent hence after the manner which formerly they were before our coming hither, for six months next ensuing.

VIII. "The Dutch here shall enjoy the liberty of their consciences in Divine worship and church discipline.

IX. "No Dutchman here, or Dutch ship here, shall upon any occasion, be pressed to serve in war against any nation whatsoever.

X. "That the townsmen of the Manhattans, shall not have any soldiers quartered upon them, without being satisfied and paid for them by their officers, and at this present, if the fort be not capable of lodging all the soldiers, then the burgomasters by their officers shall appoint some houses capable to receive them.

XI. "The Dutch here shall enjoy their own customs concerning their inheritances.

XII. "All public writings and records, which concern the inheritances of any people, or the reglement of the church or poor or orphans, shall be carefully kept by those in whose hands they now are, and such writings as particularly concern the States General may at any time be sent to them.

XIII. "No judgment that has passed on any judicature here shall be called in question, but if any conceive that he hath not had justice done him, if he apply himself to the States General, the other party shall be bound to answer for the supposed injury.

XIV. "If any Dutch living here shall at any time desire to travel or traffick into England, or any place or plantation in obedience to his Majesty of England, or with the Indians, he shall have (upon his request to the Governour) a certificate that he is a denizen of this place and liberty to do so.

XV. "If it do appear that there is a public engagement of debt by the town of Manhattoes, and a way agreed upon for the satisfying that engagement, it is agreed, that the same way proposed shall go on, and that the engagement shall be satisfied.

XVI. "All inferior civil officers and magistrates shall continue as now they are, (if they please) till the customary time of new elections, and then new ones to be chosen by themselves, provided such new chosen magistrates shall take the oath of alegence to his Majesty of England, before they enter upon their office.

XVII. "All differences of contracts and bargains made before this day, by any in this country, shall be determined according to the manner of the Dutch.

XVIII. "If it do appear that the West India Company of Amsterdam do really owe any sums of money to any persons here, it is agreed that recognition and other duties payable by ships going for the Netherlands be continued for six months longer.

XIX. "The officers military, and soldiers, shall march out with their arms, drums beating, and collours flying, and lighted matches; if any of them will plant, they shall have fifty acres of Land set out for them; if any of them will serve as servants they shall continue with all safety, and become free denizens afterwards.

XX. "If at any time hereafter, the King of Great Brittain and the States of the Netherlands do agree, that this place and country be redelivered into the hands of the said States, whensoever his Majesty will send his commands to redeliver it, It shall immediately be done.

XXI. "That the Town of Manhattan shall choose deputies, and those deputies shall have full voices in all public affairs as much as any other deputies.

XXII. "Those who have any property in any houses in the Fort of Aurania, shall (if they please, slight the fortifications there, and then enjoy all their houses as all people do where there is no Fort.

XXIII. "If there be any soldiers that will go into Holland, and if the Company of West India in Amsterdam, or any private persons here, will transport them into Holland, then they shall have a safe passport from Colonel Richard Nicolls, deputy governour under his royal highness, and the other commissioners, to defend the ships that shall transport such soldiers, and all the goods in them, from any surprizal or acts of hostility, to be done by any of his Majesty's ships or subjects. That the copyes of the King's grant to his royal highness, and the copy of his royal highness commission to Colonel Richard Nicolls, testified by two commissioners more, and Mr. Winthrop, to be true copyes, shall be delivered to the honourable Mr. Stuyvesant, the present governour, on Monday next by eight of the clock in the morning, at the Old Milin, and these articles conscented to, and signed by Colonel Richard Nicolls, deputy governour to his royal highness, and that within two hours after the fort and town called New Amsterdam, upon the isle of Manhattoes, shall be delivered into the hands of the said Colonel Richard Nicolls, by the service of such as shall be by him thereunto deputed, by his hand and seal.

"John de Decker, Nich. Verlatt, Sam. Megapolensis, Cornelius Steewyock, Oloffe Stevens Van Kortlant, James Courseau, Robert Carr, Geo. Carteret, and John Winthrop, Sam. Willys, Thomas Clarke Pynchon.

"I do consent to this article,
"RICHARD NICHOLLS."

An Act of the Governor and *Councell* for the sentenceing and confiscating ye Lands, Houses and Estates of the subjects belonging to the States of Holland, which shall be found within these his Hoyal Highnesse his Teritories.

Whereas the States of the United Belgicke Provinces, have begun and continued a *Warre* against his majesty our *dread* Soveraigne, his realmes and Dominions, as well in Europe as upon his majesties foreigne Plantations, to the great effusion of Christian Blood and the destruction of com*erce*. In which case it is not onely customary but consonant to the Lawes of nations to make seizure of and confiscate ye estates of the subjects of these provinces or estates against whom *warre* is declared. Now forasmuch as divers

persons of the Dutch Nation residing under the dominions, and being the subjects of the said States of the United Belgicke Provinces, and not under any oath or obligation of Allegience to his majesty, have and doe enjoy within this Government to their use and behoofe severall houses and lands, the full discovery thereof cannot at present bee found out in any respect of the severall private conveyances, Letters of Attorney, Deputation, Procuration and the like. However the Governour, by and with the advice of His Councell, have thought fitt to enter upon the records (without making any publication thereof for reasons and considerations satisfactory to themselves) and bee it entred upon the records, that from and after the date hereof, all the Lands and Houses lyeing and being within the teritories of his Royall Highnesse James Duke of Yorke, &c., which did formerly belong, or in any ways now may appertain to any of the subjects of the said States, or any of the inhabitans under their dominions, (who are under no oath or obligation of allegiance to His Majestie,) are and stand sentenct and confiscated to his majesties use. To the end that the Rents, Profits and Emoluments arising from the confiscation of the said lands and houses, together with the rents, profitts, and emoluments received and remaining in any other hands by procuration or otherwise, may render some support to the charge of this Government.

And its further ordered and decreed that the entry of this resolution of the Governour and councell upon the Booke of Records, shall stand firme and valid to all intents and purposes. Notwithstanding the fformality of the publication is omitted.

And the execution of this decree and order shall and may bee lawfully put in practise at all or any time from and after the date hereof as fully and effectually as if the same had beene publicaly declared and manifested.

Given under my hand this 10th of October, 1665, in James Fort, R. NICOLLS.

Entred and Registred in the Office of Records the day and ye e above written, by order of ye Governour and Councell. MATTHIAS NICOLLS, Sec.

Vol. i. Acts made by the Governour and his Councell.

BY THE GOVERNOR.

WHEREAS, there hath beene a change of Governm't in these parts, and other Oathes imposed upon the Inhabitants; These are in his Ma'ties name to require all such persons as doe intend to continue under his Ma'ties obeidence within this his Royall Highnesse Government, that they appeare at such times and places as the Magistrates within the Respective Townes and places were they Live, shall appoint, to take the usuall Oathes of Allegiance and ffidelity. To which end, all Magistrates and Officers whome it may concerne, are required to give orders therein, and attend the taking the Said Oathes, and that the same be recorded accordingly.

Given under my hand, in New Yorke, this 13th day of March, 1674.

E. ANDROS, S.

To the Mayor and Aldermen of the Citty of New Yorke, and to other Justices of the Peace and Magistrates within this Government, to cause this order to be forthwith published, and put in execution.

BY THE GOVERNOR.

WHEREAS, it hath pleased his Ma'ty and his Royall Highnesse to send me with Authority to receive this place and Governm't from the Dutch, and to continue in the Command thereof, under his R. Highness, who hath not only taken care for our future safety and defence, but also given me his Commands for securing ye Rights and Propertyes of ye Inhabitants, and that I should endeavour by all fitting means the good and wellfare of this Province and dependences under his Government; That I may not be wanting in any thing that may conduce thereunto, and for the saveing of the trouble and charge hether, for the satisfyeing themselfes in such doubts as might arise concerning their Rights and Propertyes upon this change of Governm't, and wholly to settle ye mindes of all in gen'll, I have thought fitt to publish and declare, that all former Grants, Priviledges or Concessions heretofore graunted, and all Estates Legally possest by any under his Royall Highnesse before the Late Dutch Government, (as also all Legall Judiciall Proceedings during that Governm't to my arrivall in these Parts,) are hereby confirmed; And the Possessors by virtue thereof to remaine in quiet possession of their Rights; It is hereby further declared, That the knowne booke of Lawes formerly establisht and in force under his Royall Highnesse Governm't, is now againe confirmed by his R. Highnesse, the which are to be observed and practized, together with ye manner and time of holding Courts therein mencioned as heretofore. And all Magistrates and Civill Officers belonging thereunto to be chosen and establisht accordingly.

Given under my hand, in New Yorke, this 9th day of November, in the six and twentieth yeare of his Ma'ties Raigne. Annoq Domini, One Thousand six hundred seventy and foure.

This is a true copy.

Signed, MATTHIAS NICOLLS, Sec.

Wee having the same againe under consideration, for reasons to ourselves best known, have thought fit, and do by these presents add unto the above menconed persons, Mr. Peter Stoutenburgh, Mr. Peter Jacobson Marius, and Mr. Jeronimus Ebbing: And doe hereby desire and authorize the said Persons or any five or more of them, forthwith to view, apprize and value all the vacant Land conveinient or fitt to build on, as alsoe all ruinated, decayed and untenantable houses within this city; And to make return to us as per former order: whereof they are desired not to fayle.

Dated this 18th o February, 1675-6.

Adrian Westerhouse making application for satisfaction For his ground that was taken away to make the New Street, the said Adrian did consent and agree to Convey his Right and title therein to the Citty And in Consideration thereof its ordered that he be free of all Public taxes For the use of the said Citty During the terme of Six Yeares from the date hereof, ei's alsoe freed from the payment of what is already taxed.

New Yorke, the 17th day of October, A. D. 1675.

EDMUND ANDROS, Esq., *Seigneur*, of Sausmarez, Lieut. Governor Generall under his Royall Highnesse James, Duke of Yorke and Albany &c. of all his Territoryes in America, To all to whom these presents shall come sendeth greeting.

By vertue of his Majesties Letters Patents, unto his Royall Highnesse and the Authority derived unto mee, I do hereby appoint and authorize you, Mr. William Dervall, to bee Mayor, Mr. Gabriel Minvielle, Mr. Nickolas De Meyer, Mr. Thomas Gibbs, Mr. Thomas Lewis, and Mr. Stephanus van Courtlandt, to be Aldermen, Mr. John Sharpe to be Sheriffe of this Citty, giving and graunting unto you the said Mayor and Aldermen or any four of you, whereof the Mayor or Deputy Mayor to be always one (unless in case of necessity by their absence, sicknesse or otherwise, when the Eldest Alderman is to preside) And upon equality to have the Casting and decisive voyce, with full power and authority to keepe Courts, Administer Justice as a Court of Cessions; And Rule and Governe all the Inhabitants of this Citty, Corporacon or libertyes thereof, and Strangers within thee same according to the Generall Laws of this Government, Priviledge and Practice of this place; And also to appoint such under officers as you shall judge necessary for the orderly execucon of Justice.—Hereby requiring all Persons, whom it may concerne to give that due Obedience unto you, as Majestrates constituted by his Majesties Authority as above, as they and every of them will answer the contrary at their utmost Perills. And for your so doing this shall, this shall bee to you, and every of you, and every of you a surficient warrant and discharge in that behalfe. This Commission to be of force untill the thirteenth day of October next, which will be in the year one thousand six hundred seventy-six, being the usual time and day of election Given under my hand and Sealed with the Seale of the Province of New Yorke, this seventeenth day of October, in the Twenty-Seventh year of his Majesties Reigne Annoe Domini 1675. E. ANDROS.

Citty of New Yorke. } By the Deputy Mayor and Aldermen. Whereas his honor the Governor, by his Proclamacon bearing date the 13th day of March, 1674, Sett forth that wereas there hath been a change of Government, and other oathes imposed upon the Inhabitants, hee in his Majesties name required all such persons as intended to live under his Majesties obedience within his Royall Hignesses Government, that they should appear at such time and places as the Magestrates within their respective Townes and places wherein they live should appoint, to take the usuall Oathes of Allegence and fidelity; And thereby commanded all Officers and Magestrates to give order therein, and to attend the taking the said Oathes, as by the said proclamacon may appear. And whereas the Mayor and Aldermen in persuance thereof

did appoint Mund y, the 15th of March, 1674, for the taking the said Oathes, and adjourned from time to time for the doeing thereof. Nevertheless we being informed and finding severall persons within this Citty either by sickness or otherwise have not as yet taken the said Oathes of Allegiance and fidelity, as by the said proclamacon was directed. Therefore that none that doe intend to continue and remain in this Citty may for the future upon any pretence whatever pleade ignorance. Wee in further pursuance of his honor's proclamacon, doe hereby give notice to all persons, that not as yet taken the said Oathes, that they appeare at the City Hall on Wednesday, the 24th of November next, by nine of the clock in the morning, at ye third ringing of the Bell, for to take the said Oathes, where the Deputy Mayor and Aldermen have appointed an Especial Sessions for that purpose, and will be ready there at that time for the receiving and giving the said Oathes to all such persons as shall come to take the same. And that all persons that shall, shall neglect to come or refuse to take the same, take notice thereof at perrills; Given under our hands this 30th day of October, 1675.

—

BY THE MAYOR AND ALDERMEN.

ARRIVAL OF GOV. DONGAN FROM ENGLAND.

August ye 27th, 1683, being Munday.

Coll. Thomas Dongan, Governor of this Province, who arrived here ye 25th Instant, was this day pleased to appoint ye Magistrates to meet him at ye Citty hall about ten of ye clock, where he read and published his Commission to be his Royall Highness Lieutenant & Governor &c., & his Commission for vice Admirall, & shewed his Instructions wherein he was ordered to give & Confirm to this Citty all their Rights & privileges & more if necessary, & that for ye ffuture all writs & warrants should Issue out in his Royall Highness name, & declared, that his Royall Highness had Commissionated Mr. John Spragg Secretary of ye Province, for all Which ye Magistrates returned thanks to his Royall Highness and his Honour, & waiting on him to ye Forte, they Invited his Honour to dine with them att ye Citty Hall ye next day, and severall of ye old Magistrates & and ancient Inhabitants to accompany him, Where his Honour received a large & plentifull Intertainment; and they had great satisfaction in his Honours Company.

PETITION OF THE MAYOR, ETC., FOR A CHARTER FOR THE CITY OF NEW YORK.

Petition presented to ye Governor in ye name of ye Mayor, Aldermen, and Commonalty of ye Citty for a Charter.

To the Right Honorable Col. Thomas Dongan, Esq. Lieutenant & Governor & vice admirall and his Royall Highness James Duke of Yorke & Albany, &c., of New Yorke and dependencyes in America.

The humble petition of ye Mayor Aldermen and Commonalty of ye Citty of New York.—Sheweth

That this Citty hath had & enjoyed severall antient Customes privileges and Ammunityes which were confirmed and granted to them by Coll. Richard Nicholls, late Governor of this Province by authority and his Royall Highnesse, Anno 1665, who Incorporated ye Inhabitants thereof—New Harlem and others Inhabiting on ye Island manhattan, whereon this Citty standeth as one body Pollitique and Corporate under ye Government of a Mayor Aldermen & Sheriffe, in which manner it hath continned in practice ever since, and hath had and Injoyed ye Customs libertyes and priviledges following, viz.:

1st. That all ye Inhabitants on ye Island Manhatans was under ye Government of ye Citty of New Yorke.

2nd. That ye Government of said Citty was by seven Magistrates & a schout formerly called Burgormaster and Schepen, now one Mayor, six Aldermen & one Sheriffe.

3d. These Magistrates had power to appoint all Inferior Officers, as Constables & Overseers under Sheriffs, Cryers, & Marshalls throughout ye whole Island, and also did make such pecular orders as they judged convenient ffor ye well Governing ye Inhabitants of said Corporation, & held once in 14 dayes or ofiener on special desire or occasion, a court of Judicature at ye Citty Hall were they did heare and determine all causes and matters whatsoever brought before them, by Jury or in equity as ye cause required. The Mayor or Chief Magistrate had power to determine all matters that came before him under 40*s* without appeale or any other processe than a verball hearing of.

4th. The Sheriffe served all writts & summons, & attachments within ye Lymitts of ye Corporation, & acted as Water-bayliffe on ye Water.

5th. They had their own Clerk and kept ye Records of ye Citty distinctly.

6th. This City was ye staple port of ye whole province, where all merchandize was shipped and unloaden.

7th. None were to be esteemed Freemen of the Citty but such as admitted (to sell) by (retayle) ye Magestrates uforesaid, and none before such admission to sell by retayle or exercise any bandycraft trade or occupation, and every merchant or shop keeper was to pay for ye public use of ye Citty 3*l* 12*s*, every handy Crafiman 1*l* 4*s* on being made free.

8th. No Freemen of ye Citty was to be arrested or have their goods attached unless it was made appear that they were departing or conveying away their estates to defraud their Creditors.

9th. No person was admitted to trade up Hudson River except he was a Freeman and had been arrival Inhabitant in this Citty offor ye space of 3 years, and if any ffreeman should be absent out of ye Citty ye space of 12 month, and not keep ffire and candle & pay seat and cott, should loose his freedome.

10th. All ye Inhabitants up Hudson River were forbid to trade over sea.

14th. No Flower was to be bolted or Packed or Biskett made for exportation but in ye Citty of New Yorke, being for ye Incouragement of trade and keeping up ye reputation of New Yorke fflower, which is in great request in ye West India and ye (Inhabitants) only support and maintenance of ye Inhabitants of this Citty, and if not confirmed to them, will ruin and depopulate ye same.

12th. That ye said Citty had a Common seale to serve ffor ye dealing of all and singular their affairs matters and business touching ye said Corporation.

All which said ancient customs priviledges and lybertys ye said Mayor and Aldermen in behalf of themselves and ye Citizens of ye said City do humbly present & make known to yr Honour, humbly beseeching yr honor in their behalf to Interceed & procure that ye same be Confirmed to them by charter ffrom his Royall Highnesse with these additions following:

1. That ye said Corporation be divided into six Wards.

2. That ye ffreemen in each Ward do once every year ellect their own officers to say Aldermen, Common Councilmen, Constable, Overseers of ye poor, Scavengers, Questmen or other officers usefull and necessary ffor ye said Corporation & Wards.

3 That there be a Mayor & a Recorder, who with ye said six Aldermen & Common Councilmen shall represent ye whole body of ye said Citty & Corporation & shall have power to make pecular Laws and ordinances ffor ye good Government and support thereof.

4. That a Mayor be appointed every year by ye Governour & Councill, & to be one of ye Aldermen chosen as aforesaid.

5. That all Magistrates so chosen shall not be admitted to ye execution of their offices until swoine before ye Governor and Council.

6. That ye Recorder be appointed by ye Governor and Council, who shall be judge of ye city and corporation and be ayding and assisting ye Mayor, Aldermen and Common Council in all matters yt relate to ye well being thereof.

7. That a Sheriffe be annually appointed by the Governor and Council.

8. That ye Coroner and Towne Clark be appointed by the Governor and Councill.

9. That ye Mayor, Recorder, Aldermen and Common Councill do appoint a Treasurer for collecting and paying all public debts and Revenues.

This and whatsoever else your Honor and his Royall Highnesse shall think fitt, necessary and convenient ffor ye good rule, order and welfare of this citty or Corporation, your Petitioners humbly pray may be granted and confirmed to them, in as full and ample manner and fform as his majesty hath been graciously pleased to grant to other Corporations within his Realme of England, ffor ye.

Of which they again humbly begg your honor to become their supplyant, whose kindness and service therein shall be most thankfully acknowledged.

New York, 9bre, ye 9th, 1683. And as in duty bound, your petitioners shall ever pray, &c.

EXPLANATIONS ASKED OF THE MAYOR, &c. AS TO CERTAIN PARTS OF THE FOREGOING PETITION BY THE GOVERNOR AND COUNCIL.

Some objections made by ye Governor and Councill to ye petition presented in the name of the Mayor, Aldermen and Commonalty with desire to be explained.

Att a Councill held in New Yorke ye 10.h 9bre, 1686.

Present

The Governor,
Mr. Frederick Phillips,
Mr. Lewis Sancton.

A Petition from ye Deputy Mayor, Aldermen and Commonalty of ye citty of New Yorke being read, was concluded as follows:

In answer to the first article it is thought reasonable that the Towne of Harlem shall have liberty to determine all matters yt come before them under 40s., att their own Towne Court. To ye third article it is answered, that there being these words, these Magistrates had power to appoint all Inferior Officers, and Constables, Overseers, under Sheriffs, Cryers and Marshals. it is desired that it may be explained what is meant by Marshall in ye second article; it is also desired yt it may be explained what is meant by peculiar Laws, and how far they will extend, as likewise what is meant by Court of Judicature, and how ffar ye s'd Court is to extend, and yt ye Court of Judicature under forty shillings being allowed it is thought convenient to distinguish betwixt ye s'd Courts, and make two articles of this one, being ye third article to ye fourth article, it is thought yt ye water Bailiffs belongs to ye admiralty, and ye seventh article Jews are to be accepted who are left to ye discretion of ye Governor.

By order in Councill,
JOHN SPRAGG, Sec'ry.

EXPLANATIONS TO THE FOREGOING, GIVEN BY THE MAYOR, &c.

An Explanation of several heads contained in ye petition lately presented to his honor ye Govenor, by ye Mayor, Aldermen and Commonalty of ye citty of New Yorke, pursuant to ye desire of the Governor and Councill, Humbly presented to his honor's further consideration.

The Towne of Harlem is a village belonging to this Citty and Corporation ffor ye more easy administration and dispatch of Justice. Officers have been annually appointed by ye Mayor and Aldermen to hold Courts and determine matters not exceeding 40s., both at Harlem and the Bowery, and shall do ye like for ye *future*, and is intended to be one of ye six Wards.

3. Marshall is an under officer assistant to ye Sheriffe in serving writs, summoning Jurys, looking after prisoners and attending ye Court, and that Officer and the Cryer has hetherto been one person.

Pecular Laws, and Laws and Ordanancees by the Mayor, Aldermen and Common Councill, ffor ye well and good government of this Citty and Corporation, and to extend as ffarr as the limit thereof.

Court of Judicature is a Court to hear ane determine all causes and matters whatsoever brought before them, both Civill and Criminall, not extending to life, limb or member, and had jurisdiction over all the harbours and Bayes, Coves, Crecks and Inletts belonging to ye same.

The whole Island being one Corporation, ye inhabitants are all members of one body and conceive no need of distinction. The Mayor, Aldermen and Common Councill having ye care and charge to make all things as easy and convenient ffor ye Inhabitants as possible, and will have the same regards thereto as formerly.

A Watter Bailliffe is an officer belonging to a Corporation, and ye Sheriffe of this Citty hath usually exercised the office by serving arrests and attachments in ye harbours, Bayes, Coves, Creeks and Inletts belonging to this Corporation, by Warrant ffrom ye Mayor, Sheriffe or other his superiors to him directed as Sheriffe or Watter Baylliffe, as well in Civill as Criminall matters.

What belongeth to the Governor or prerogative, think not fitt to meddle with or any way restrane.

New Yorke, 9bre. 19th, 1683.

NEW MAGISTRATES COMMISSIONED BY THE GOVERNOR.

Citty of New Yorke,
Saturday ye 24th of 9bre, 1683.

The old Magistrates, Mr. Cor's. Steenwick, Mr. N. Bayard, Mr. Jo. Joinns, Mr. Wm. Pinhorn, Mr. Guline Verplanke, Mr. Robertson and Mr. Wm. Cox being sent for, all waited on ye Governor at ye ffort except Mr. Cox, where ye old Magistrates were discharged, and a Commission given to Mr. Cornelius Steenwick to be Mayor and the other person above named to be Aldermen ffor the Citty of New Yorke untill ye useuall time of New Elections, being the 14th of 8bre, and Mr. Jo. Inder was likewise appointed Sheriffe of ye s'd Citty, and were all sworne accordingly.

The old magistrates conducted ye new ones to ye Citty Hall, where there Commission was read in ye Court Chamber, and they resigned to ym ye Bench, who took their places as nominated in ye Commission. Mr. Wm. Cox, who was absent when ye Mayor and ye next of ye old Aldermen were sworne, had ye oath of an Alderman administered by ye Secretary, ye then Mayor and Aldermen ordered their Commissions to be published att ye door of the Citty Hall, which was accordingly performed by ye Towne Clerke.

Such under officers as you shall judge necessary ffor whom this may concerne to give due obedience unto you as they and every of them will answer ye contrary att their perills, and ffor so doing this shall be to you and every of you a sufficient Warrant and discharge, this Commission be of force untill ye 14th day of 8ber, next ensueing in ye year 1684, or till further order. Given under my hand and sealed with ye seal of ye province att ffort James ye 24th day of 9ber, 1683.

THO. DONGAN.

TOWN CLERK COMMISSIONED BY THE GOVERNOR.

Commission of John West to be Clerke of ye City of New Yorke, Coll. Thomas Dongan, Lieutenant and Governor, and Vice Admirall, &c., of New Yorke and dependencyes in America.

By virtue of ye Authority derived unto me from his Royall Highness, I do hereby constitute and appoint you, Mr. John West, Clerke of the City of New Yorke, authorizing you to take into your custody all Records, Books and Papers of Publicke Concerne belonging thereto, and to act in ye said employ as a clerke, may and ought to do according to law and practice, and that during my pleasure only. Given under my hand and seal att Forte James, ye 24th day of 9bre, 1683.

Tho. Dongan.

Passed ye office, John Spragg, Secty.

PETITION OF THE MAYOR AND ALDERMEN TO THE GOVERNOR AND COUNCIL FOR FURTHER PRIVILEGES AND GRANTS.

To the Right Honourable Thomas Dongan, Lieutenant and Governor under his Royal Highness James Duke of Yorke and Albany of New Yorke, and dependencye in America.

The humble petition of ye Mayor and Aldermen of ye City of New Yorke Showeth,

That whereas ye necessary public works belonging to this city are much out of repair and decayed, and ye revenue yt was to supporte and maintaine ye same ffor ye present lost and distroyed, and whereas ye 9th Instant a Petition was presented to your honor by your petitioners, in ye name of ye Mayor and Aldermen and Commonalty of this city, sitting ffurth ye priviledges, usuage, custome, and practice of ye said city, and what they conceived further necessary for ye Weal good Government and support thereof, which they prayed your honour would procure to be confirmed to them by charter to them ffrom his Royal Highness. Your petitioners do hereby likewise humbly pray and desire yt with this alteration only yt ye city may have ye choice of their Towne Clerke for ye ffuture, and yt since it cannot be so soone effected as ye urgent affairs of this citty doth require, your honour will be pleased to order and declare yt ye fforme and method therein prescribed, may be put in practice until such time as his Royal Highness pleasure shall be further known therein, and yt your honour will be ffurther pleased to confirme to this citty all ye (benefitt of granting lycences, to all ye) vacant lands within this island to low water marke, the benefitt of granting lycences to all yt keep public houses, ye benefitt of ye (ferry,) docke, warfe and bridge, markett and markett house, with ye ferry now between ye said citty and Long Island, or yt hereafter shall be appointed between ye said citty and Corporation, or any other place which may helpe to enable them to deffray their public charge and expence and their publicke works;

And your petitioners shall ever pray, &c.

Cornelius Stenwick,
N. Bayard,
Jo. Inions,
Wm. Pinhorne,
Guleine Verplanke,
John Robertson,
Wm. Cox,

Dated at ye Citty Hall ye 27th day of 9bre, 1683.

ANSWER OF THE GOVERNOR AND COUNCIL TO THE FOREGOING PETITION.

Answer of ye Governor and Councell to ye petition of ye Mayor and Aldermen, dated ye 6th 9bre, 1683.

At a Councell held in New Yorke ye 6th day of December, 1683.

The Governor,
Capt. Anthony Brockholls,
Mr. Fred. Phillips,
Mr. Steph. Courtlandt,
M. Lucas Sancton.

The petition of ye Mayor and Aldermen being read, the Governor in Councell gave answer thereto in ye following Resolutions and Proposals:

That he much wondered yt having lately granted almost every particular of a large and considerable petition lately offered by ye preceeding Mayor and Aldermen, he should so suddenly receive another petition from ye present Magistrates to request either what was before granted or anything contrary to their former petition, however is willing to oblige them as ffarr as can be Reasonably done, as may be seen by ye following particulars. Their ffirst request Concerning ye Charter is already granted, with a Recorder, according to fformer desire.

The Ferrys Granted, with a proviso, that two boates ffor passengers be kept on each side of ye River, and one boate for cattle on each side of the River also.

The Towne Clerke is Reffered to his Royal Highness his nomination. The vacant Lands to low Water marke within this Island, are already disposed of.

The whole Island is ordered to be surveyed, and when yt is done, some land in ye woods not yet disposed off, shall be appointed for the use of ye citty.

The Dock and Warfe is allowed to ye citty provided it be well kept and cleared, if not it shall be ffforfeited, but no duty is to be paid upon ye Bridge. No fferry in any other place allowed but what is already. The Lycences always belong to ye Governor, the benefitt of ye Markett and Markett houses is Granted, Provided there be nothing sold, but upon Wednesday and Saturday, beginning betwixt Nine and Ten of ye Clock in ye fforenoon. And all brought into ye markett place, nothing being allowed to be sold in any vessel, boat, or canoe whatsoever; only Butchers meat is to be sold every day in ye week, Sunday excepted, but to be sold in ye markett and no were else.

That it is convenient a clerk of ye markett be appointed, and that by ye Governor, who shall see after ye weight and measures and due Regulations of ye markett. That there be Twenty carmen and no more allowed and their wages regulated, and ye number of sworne porters stated, with their wages likewise. The Mayor is also to look after ye weights and value of bread, and ye value and measures of all liquors sold and retayled, and to put a price upon all other things sold, according as ye season shall require, and all Bakers shall be obliged to sell and keep good household bread ffor any who will demand it.

That ye said household Bread be baked as ye meale comes ffrom ye mill. That ye citty will appoint one or more if necessary to look after ye chimneys for ye preventing of ffire, and yt all houses keep one or more leather bucketts.

By order of Councell, Jo. Spragg, Secy.

ORDER MADE BY THE GOVERNOR AND COUNCIL AS TO THE TEMPORARY GOVERNMENT OF THE CITY.

The Governor to put in practice ye fforme prescribed in ye petition of 9bre ffor the Government of this citty.

By the Governor.

In answer to a petition presented by ye Mayor and Aldermen bearing date the 27th November Past, Ordered that ye fforme and method prescribed in a petition presented by ye fformer Mayor and Aldermen, bearing date ye 9th 9bre past, ffor ye Weal and Government of ye said citty, be put in practice untill such time as his Royal Highness pleasure be furthere knowne thereon. Given under my hand att Forte James ye 10th day of Xbre, 1683.

Tho. Dongan.

Passed ye Office, John Spragg, Secry.

RECORDER APPOINTED BY THE GOVERNOR AND COUNCIL, AND HIS COMMISSION.

A Recorder appointed, and oath of fidelity administered by ye Mayor.

Citty of New Yorke.

The Court of Record of the citty afores'd, holden att ye Citty Hall within ye s'd citty on *Tuesday*, ye 15th day of January, 1684,

Before

Mr. Cornelius Stenwick, Mayor,
Mr. Nicholas Bayard,
Mr. Jo. Inians,
Mr. Wm. Pinhorne,
Mr. Guleine Verplanck,
Mr. Wm. Cox, Aldermen.

Before ye opening of ye Court, Mr. Secretary Spragg and Mr. Suncton come to ye Citty Hall and presented Mr. James Graham to ye (Governor held) Mayor and Aldermen, and acquainted them that his Honour ye Governor had been pleased to commissionate him Recorder of this citty, whose commission was accordingly Read, as followeth:

The Recorder's Commission.

By the Governor—

Whereas the Mayor and Aldermen of ye Citty of New Yorke, by petition, in ye name of themselves and the Commonalty of ye s'd citty, desired a confirmation of their Ancient Rights and Priviledges with several alterations and additions within specified, and countaining, as is usuall and practicable in other cittys and corporations, and having thought ffitt and necessary that a Recorder be appointed to be assistant to the Mayor and Aldermen in ye Rule and Government of ye s'd citty, and administration of justice in their

Court of Record—I do hereby, in virtue of ye authority derived unto me, constitute, authorize, and appointe you, Mr. James Graham, to be Recorder of ye s'd citty, giving unto you ffull power and authority to execute and performe what to ye office of a Recorder within a citty and corporation doth of Right belong and appertaine both ffor ye weale and governm't of said citty administration of Justice in ye s'd Court of Record during pleasure.

Given under my hand and seale, att Forte James, in New Yorke, ye 4th day of December, 1683.

THOMAS DONGAN.

Passed ye office. Jno. Spragg, Sec't'y.

THE FIRST RECORDER OF THE CITY OF NEW YORK SWORN INTO OFFICE, AND TOOK HIS SEAT.

Wednesday, ye 16th January, ye Court being adjourned to meet in ye afternoon, the Mayor, Recorder, and Aldermen, Sheriffe, and Clerke, were sent ffor to ye Forte, before ye Governor and Councell, were ye oath of fidelity to His Royal Highness, as in ye old Law book, was administered to them, and ye Record'r sworne in his office, ffrom whence they went to ye Citty Hall and held Court according to adjournment.

The Recorder took his place on ye Bench on ye right hand of ye Mayor.

Citty of New Yorke.

Proceedings att a Common Councill held att the Citty Hall for the sayd Citty, on Monday the 2d day of February, 1684—

Present—Mayor, Recorder, N. Bayard, Mr. Jno. Lawrence, Mr. Andrew Bowne, and Mr. Cerfleek, and Mr. Wm. Merritt, Mr. Abm. Corbett, Mr. Debruque, Mr. Sam'l Wilson, Mr. Kipp, Common Councell.

Resolved, unanimously, That the Governour be Treated with to confirme to this citty all the vacant land in and about this citty and island, to low water mark. The Ferry and all the severall Pattents to the Inhabitants, the Citty Hall and Land thereto belonging, Markett house and Markett Place, Dock, Bridge, and Streets, and w'th all Royaltyes and Priviledges thereunto belonging.

1686.

PROCEEDINGS OF THE MAYOR, ETC., IN RELATION TO GOV. DONGAN'S CHARTER.

Att a Common Councell held for the Citty of New Yorke, the 24th day of Aprile, Anno Domini 1686—

Upon reading the Charter, It is agreed, by the Common Councell, that they will pay his honour 200*l.* upon signing the same, and give him security for 100*l.* more in six months. That the fee for Lycences to retaile Drinke exceed not 5*l.*, the Fine for retailing 19*s*, and the fee for freedom 5*l.* That the Mayor take care to raise the said 200*l.*, paying therefore such interest as to him shall seem fitt. And do likewise to care to secure the said 200*l.* to the person of whom he shall take up the same, and the said 100*l.* to the Governour.

Resolved, That next Common Council to be held in this Citty Effectual Care shall be taken for the Reimbursement of the said 300*l.*, and other the charges concerning the said Charter.

REPORT OF THE MAYOR THAT HE HAD RAISED THE MONEY AND PAID FOR THE CHARTER.

Att Common Councell held att the Citty Hall for the Citty of New Yorke, the Eleventh Day of May, 1686,

The Mayor Reports that he hath paid 300*l.* for the Pattent and 24*l.* to the Sec'ry, and hath taken 4 sums up at ten per cent. interest, to be paid in a yeare, w'ch is allowed off, and Resolved, that care be taken pursuant to the above ord'r, to raise money for sattisfying thereof, and what other charges shall be expended thereon.

Resolved and ordered, That Mr. Mayor, Mr. Alderman Depeyster, Mr. Demyeo, and Mr. Dekey be appointed as a Committee to consider what waeys proper for raising the money paid for the Pattent, and if they shall thinke fitt that same be raised by sale of Lands, That then they be hereby impowered to sell and dispose of so much land as will amount to the sums for the moste benefite and advantage off which to make repoñe.

AN ANCIENT ANTI-ASSESSMENT MAN.

A Common Councell held in the City of New Yorke the 10th of September, 1686—

Mr. Smith refused to produce any title to the Land in the Dock, but said, if the citty thought fitt to meddle with it he would endeavour to maintain a Right. The rest of the Inhabitants have time given till Monday, in the afternoon, to consider and make their proposalls concerning the Ground in the Dock.

IN CHANCERY.

Before the Hon. MURRAY HOFFMAM, Assistant Vice Chancellor of the 1st Circuit.

Jacob Westervelt & an'or,

vs.

The Mayor, Aldermen, and Commonalty of the City of New York.

The Bill on this case was filed against the Corporation to restrain them from selling certain lots of the complainants', situate on both sides of thirty-first Street, westwardly of the ninth Avenue, for assessments for opening 31st Street from the ninth Avenue to the East River, for regulating and grading the same street from the ninth Avenue to Hudson River, and regulating ninth Avenue.

The grantor of the complainants had ceded the land opposite the premises in question, in 31st Street, in consideration, as they alleged, of paying no assessments for opening that street.

Among the other objections to the proceedings of the Corporation were the following:

I. That the Common Council, as organized under the act of 1830, have no power to open or to regulate Streets and Avenues; or to confirm assessments for grading, &c., and that their proceedings are void for want of jurisdiction.

II. That if they had jurisdiction in the premises, their acts and proceedings are void for irregularity in several particulars, among which were the following:

1st. That the resolutions and ordinances relating to these proceedings were not passed in either Board, by calling the ayes and noes as required by Section 7th, of the act of 1830.

2d. That in the regulating 31st Street and 9th Avenue, no estimate of the expense was ever made, and no assessment until after the work was done—contrary to the provisions of the 175th and 176th Sections of the act of 1813, by which only a supplementary assessment is authorized after the completion of the work.

3d. That the persons who acted in making the assessment, to wit, the Street Commissioner, his Deputy, and first Clerk, were not disinterested and proper persons, and were not properly appointed under a general ordinance authorizing them to act in all cases of regulating streets.

4th. That the assessment List for regulating the 9th Avenue, was not signed by the assessors, contrary to the requisition of the statute that they should certify it in writing.

5th. That no application was ever made or authorized by the Corporation, for the appointment of Commissioners of estimate and assessment for the opening of 31st Street, the application having been made by the Mayor or Counsel, under a general resolution to open all the Streets and Avenues up to and including 42d Street in 1836, but without the usual additional direction to the Corporation Counsel to take all necessary steps for that purpose.

6th. That the ordinances were never regularly passed, having been loosely enclosed in a wrapper by the Street Commissioner, and only the endorsement on the wrapper read in either Board, and only the wrapper signed either by the Clerk or the Mayor.

7th. That the neglect to publish the reports and resolutions, as required by the 7th Section of the act of 1830, was a withholding the only notice required by law in case of regulating Streets, and the only useful notice in regard to opening Streets; so that the confirmation either by the Common Council or Supreme Court was *ex parte* and not binding on the complainants.

8th. That the act of 1813 is unconstitutional in not providing any just compensation to the owners of property taken for public use.

Various minor questions arose, but the foregoing were those of most general interest. The case was argued on Bill, Answer and Replication.

It will be seen that the questions raised were of the most momentous importance, since their determination against the Corporation will be decisive of their jurisdiction in all the proceedings for opening and regulating streets and building sewers since the act of 1830.

This being the first case in which these questions have been brought up, on final hearing, before any of our courts—from the important interests involved, and the great consideration which will be attached to the decision of the Judge so eminent for his profound knowledge of Chancery Law, and so peculiarly qualified by his intimate acquaintance with the powers of the Corporation—the greatest interest has been excited by the discussion.

The argument was opened on the part of the complainants, on Tuesday, by Lewis H. Sandford, Esq., who occupied nearly six hours in a clear, logical, and forcible argument. Each point was closely and powerfully discussed by him, with that discrimination and vigor of reasoning which a powerful mind, long trained to close habits of legal discussion, might be expected to display on a question of so much importance. The early laws and charters were examined, and the English and American cases bearing in any way upon the numerous points were collected and discussed, and the legal and historical bearing connected with the powers of the Corporation, was chiefly exhausted. It would be impossible within our limits to give such an analysis of Mr. Sandford's argument as

to do it justice, or afford any adequate idea of its force and completeness.

On Wednesday, Mr. Cowdry, of counsel for Corporation replied. He omitted nothing which his acknowledged learning and perfect familiarity with the powers, duties, and proceedings of the Corporation enabled him to render available, in defending their several acts in the particulars complained of. He replied to the points raised in order, examined and controverted the positions assumed by the counsel for the complainants and the authorities cited, and with great ability and learning sustained, by every possible authority and argument, the course of proceeding hitherto adopted by the Corporation.

Mr. Holland of counsel for the complainants, made the concluding argument on Wednesday P. M. and Thursday.

Mr. H. commenced with a luminous and powerful exhibition of the extent and character of these powers of the corporation. He then proceeded to examine the various legal questions involved; presenting them in many new and striking views, and enforcing his argument with great ability, profound historical and legal research, and commanding eloquence.

We present below an outline of Mr. Holland's opening remarks, as taken from his minutes, on the general character of the power exercised by the Corporation in the opening and regulating of streets.

After discussing the question of the jurisdiction of the court, Mr. Holland said that he requested attention to the extraordinary nature of the power conferred upon the corporation in these cases, and the equally extraordinary manner in which it is to be exercised, and hoped thereby to strengthen the position for which he contended, that nothing should be granted by way of implication or intendment or liberal construction in favor of so extraordinary a jurisdiction.

The power claimed by the corporation in these matters, is *in derogation of common right.* It is taking private property for public use; the highest exercise of supreme power known or recognized in civilized communities—the *right of eminent domain.*

A principal object of society is the security of private property; and its appropriation by the public, without the owner's consent, going to impair one of the dearest rights of the citizen, can never be justified but by *absolute necessity.*

To this point he cited nearly all the standard writers on the laws of nations and the principles of natural justice.

So sacred is this right of private property, that it is carefully guarded by a particular provision in the Constitution of the United States and of this state, requiring just compensation to be made.

In the present instance, this highest prerogative of power is not directly exercised by the supreme authority in the state, but had been delegated to an inferior tribunal to be exercised at its discretion. The constitutionality of such a delegation of power had been seriously questioned, but he admitted it had been sustained in this state by our highest courts. It is at least verging upon the extreme of constitutional power.

Again, the mode of exercising this high prerogative in the present instances was equally extraordinary, and he believed unparalleled in any other country where either the common law or civil law is recognized.

Lands may be taken, buildings torn down, streets opened and regulated, and assessments laid, not only without any application on the part of any citizen, either adjacent to or remote from the proposed improvement, but (until the act of 1830) against the remonstrance of every person in interest, upon the mere will and determination of the corporation.

No notice need be given, in case of regulating, until the collector calls for the assessments; and in case of street openings, only 14 days' notice, before a confirmation, which transfers the fee to the corporation and makes the assessment a lien.

A jury, even, is not summoned to assess the damages,—a precaution required in England,—in all our neighboring states, and in this state, until comparatively a recent period. And this, too, in the face of the provision of the constitution, for a trial by jury in all matters involving even a small amount, and the provision requiring all newly constituted courts to proceed according to the rules of the common law; as well as in practical contravention of the acknowledged principle, that every person shall have an opportunity to be heard and a right to contest by regular proofs and due pleadings, every question of right affecting his person or estate.

But here, instead of twelve independent jurors from the body of the people, sworn in court, and proceeding upon legal evidence—the assessment of damages and awards, involving even millions of property, is confided to two or three persons, selected in one case, by the coporation itself, and in the other, appointed *ex parte* on their application.

And these powers so appointed have no regular place of meeting or hearing proofs; take no regular legal testimony as used in courts, but proceed *ex parte* when and where they please, in private or public, upon their own inspection or judgment, or on hearsay and the representation of any body, whether interested or not; and their decisions are held to have the force of the verdict of a jury, and when confirmed, are conclusive on all parties.

In case of regulating and building sewers, no opportunity is provided by law to object to their proceedings. In opening streets, objections must be made within ten days; and then objections are hampered by technical difficulties and rules nearly rendering the privilege useless. Affidavits of disinterested persons must be used, and none will be received by the supreme court which have not been presented to the commissioners. To prevent confirmation by the supreme court, the affidavits must show facts sufficient to set aside a verdict as against evidence; opinions have no weight, and though the commissioners may be guided by *hearsay*, their judgment cannot be controlled by the sworn judgment of a hundred citizens well acquainted with the facts.

Such are the devices of the law to prevent the possibility of arresting these extraordinary proceedings.

It was granted that our courts have adjudged these assessments without a jury not to be violations of the constitution; but it was contended that in this respect the law in question verges on the extreme of legality, and requires to be most strictly kept within the letter of the statute.

Even highways in the country, where land is of comparatively little value, cannot be cut through improved lands without an assessment of the damages by a jury at the option of the owner; and cannot be laid through a garden or orchard of four years' standing, without an express act of the legislature; so much more carefully are the rights of the citizen protected elsewhere, than under the jurisdiction of this corporation.

Again, the power in question is extraordinary in selecting from the whole body of the political community a few individuals to bear all the expense.

In the country, the expense of a road is borne by the whole town; in all neighboring states, either by the whole city or town or county, or by voluntary subscriptions or cessions.

In this city, for street openings laid out in 1807, the whole expense is thrown upon the owners of land on each side within half the distance to the next street.

Mr. H. said he doubted the constitutional power of the Legislature to select from one political body, a certain number of individuals within defined limits, and compel them to pay for an improvement obviously beneficial to the whole. It was like passing a law to tax a single man for the public expense. At any rate, it was an obnoxious feature in this law, and seemed to show the necessity of confining its operations strictly to the letter, in matters of form as well as substance.

Again, there is virtually no notice for any practical purpose in either of these classes of proceedings. In respect to street Regulations, the law of 1813 provides for no actual notice.

The 14 days' notice in the Street openings is, indeed, *legal* notice—but of no practical value. The proceedings are often one or two years in progress, and finally, a short notice of confirmation in 14 days, is published in some corner of a newspaper, after which, but ten days are allowed to make objections. To absentees *femmes couvertes* and minors, this is no actual notice.

Every owner of real estate must watch every ten days for these notices, and on discovering one, must go to the clerk's office and examine a manuscript sometimes of several hundred folios, to ascertain whether his property is assessed. Amid the hurry of a city life, this is utterly impracticable. Yet this is the only notice, except the publication of corporation proceedings, required by the act of 1830, which the corporation openly disregard in all cases.

Now every man has a right to be heard when his property is demanded from him, and a law providing no notice of such a proceeding, or no useful notice, ought not to be enlarged in its operation by a liberal construction in derogation of common right.

Again the proceedings are obnoxious to remark for their expensiveness. It is the most expensive mode of taxation known to modern times. The whole apparatus of official agents, the surveyors, appraisers, inspectors, commissioners, collectors, court and counsel, to say nothing of advertisements, certificates and leases, involves an expense almost unparalleled in any other instance.

It is said by Arthur Young, that in 1792 the expense of collecting 1,330,000*l.* of stamp duties in Great Britain, was but one half of one per cent.

By document No. 45, of the Board of Aldermen, 1838-9, the whole amount of awards and damages for opening the 7th Avenue, is stated to be $28,142, and the costs of making the assessment and counsel and court fees, are $13,550!

Mr. H. said he knew of no parallel to this except an instance mentioned in Sully's Memoirs, when, of 150,000,000 livres taken out of the pockets of the tax payers, but 30,000,000 livres were brought into the treasury.

Again, it is a tax laid exclusively on land and there-

fore unequal. Personal property does not contribute directly to build any sewers, or open or regulate any streets or avenues.

And to whom is the exercise of this extraordinary power committed? To seventeen Aldermen and seventeen Assistants.

Every small body is liable to sinister influences in a greater degree than a larger assembly; and this is peculiarly true in a great city.

In the number of its inhabitants, the amount of its wealth, and the variety and importance of its public interests, the city of New York exceeds many of the smaller states of the Union. Its annual expenses ranging from a million to a million and a half, and at this time enormously extended by extraordinary undertakings, the utmost vigilance is necessary to secure responsibility in its officers. The General Assembly of Connecticut consists of 229 members; even that of R. Island of 82. Here are great temptations to improvidence—large patronage—numerous offices—lucrative contracts—vast chances for speculation.

When the law requires votes to be taken by ayes and noes in the Common Council—when it requires them to publish their proceedings; when it requires a previous estimate before public works can be executed, and that assessments shall be certified in writing, will it not be contrary to all sound principle and dangerous to the last degree to allow a body thus constituted in the exercise of such powers to avoid all responsibility by neglecting these requisitions through a *liberal* construction of the statute? When the law says they *shall* pursue a certain course, is it not dangerous to construe its commands as *directory*, and wrong to indulge in any presumptions or implications to excuse a palpable violation of the letter and spirit of the law?

It is also to be noticed, that there is a great distinction between a corporation deriving all its powers from a written law, and a state legislature exercising the supreme power of the people, and only limited by a written constitution. Every presumption is against the former authority; and even the latter is not allowed to extend its powers by a liberal construction.

It is indeed claimed by some of the officers of the corporation, that its powers are beyond the control of the legislature. The city comptroller, an officer of reputed intelligence and of high character, in his recent report seems to intimate a higher authority for the powers of the corporation than any bestowed by the sovereign people of the State of New York. It is unnecessary to controvert these preposterous claims; our courts have held that all political incorporations may be altered even without a two thirds vote; but it is well to regard an official document from such a source as indicating the spirit of usurpation and encroachment inherent in this as in all powerful political bodies.

The encroachment, if any, is by no individual—no simple executive officer—no judge, whose discretion may mistake,—but by a power, the extent of which is felt before its approaches can be seen—which proceeds under the high sanction of extraordinary prerogatives most lavishly conferred, and which, in violating the law, adds a perfidious abuse of a great public trust, to that crime against society which is involved in all illegal oppression.

But there would be less danger to be apprehended from the exercise of these extraordinary powers by this extraordinary tribunal, in the unusual and dangerous methods before described, if the various charters and acts of the legislature under which they are assumed to be conferred, were condensed into one single connected statute—and were not to be sought for in hundreds of volumes and through a period of more than one hundred years.

Dongan's charter in 1686, and Cornbury's in 1708, are rehearsed in Montgomerie's of 1730; and these are all claimed to be of binding force, together with the subsequent enactments, neither few nor brief, which the colonial and state legislatures have from time to time adopted.

In the course of this argument, I shall be constrained to examine these dusty records in detail; and it will then appear how full of vagueness and contradictions they are, and how difficult it is to interpret and define the exact effect of separate acts—often inconsistent with each other, yet the only sources of the extraordinary jurisdiction asserted in these cases.

Again, in opposing this powerful political body in its alleged aggression upon private rights, the solitary citizen struggles to great disadvantage. No single case can present anything more than a few specimens of the exercise of unlawful power; a thousand different cases could only present the great aggregate. Complainants are silenced and overwhelmed in detail. Combined resistance is not practicable under our forms of justice, for the grievance of one man is not the grievance of his neighbor. So discouraging is the struggle that hundreds submit in despair. It is a thankless and wearisome undertaking to wade through the necessary records and statutes and charters which must be examined in questioning these powers. The community suffer long before any one will stand forth the champion of their common rights. Many are ruined, but private injuries here attract little attention. Some have been assessed into their graves; others have had the whole course of their lives harassed by vain endeavors to secure their estates from confiscation.

Under the exercise of this extraordinary power, Mr. H. said his clients were now suffering, and, as they claim, from its *illegal* exercise;—a power which, in its rightful exercise, assumes the highest prerogative of sovereignty in taking private property—a power in derogation of common right—exercised by a body open to improper influences—acting under vague and contradictory rules, covered in part by the dust of ages—by methods unknown to the common law, and verging toward the very bounds of unconstitutionality—without trial by jury, or due notice or regular evidence—an extraordinary jurisdiction, involving immense amounts—departing from general taxation to local—onerous in its expenses—and vested in a body having every inducement and every opportunity for encroachment, when the oppressed has every embarrassment in resisting.

Already we begin to perceive the dangers to which we are exposed. It is charged in this bill, and admitted in this answer, that the plain commands of the law have in many particulars been openly defied.

A Common Council, only invested with *legislative* powers, usurps the exercise of such as are undoubtedly *judicial*.

They proceed without petition or on improper petition; was it ever heard that they heeded remonstrances! They refuse to publish their proceedings—refuse to vote by ayes and noes, and evade the little responsibility imposed by law! They make a sweeping vote to open a hundred streets, on a certain principle, and leave the plan unexecuted!

Their law officer takes up the proceeding and multiplies the operation to an extent as yet unknown to any person but himself. They appoint their own subordinate officers, assessors, and by one ordinance despatch the appointment for numberless separate and important proceedings.

They proceed in enacting their ordinances without the decent forms of business observed in all legislative bodies, and pass important acts without one reading—enclosed in wrappers—as if they were afraid to look into the contents. They neglect to open streets for which they collect assessments.

Instead of a legal preparatory estimate, they make none, or take virtually the estimate of some speculating or favorite contractor, as it may be, and a clerk distributes the amount among the unfortunate sufferers.

They allow their own officers to assess their own fees and compensation, and pay them from the city funds.

They have come at last to adopt assessment lists "certified in writing," without any written certificate or signature.

They accept a donation of land for a street, and disregard or forget the condition of the cession.

They proceed in these steps till men can pay no longer; and 7,000 lots are offered for public sale in a single advertisement.

Thousands are first awakened to a sense of their proceedings, by the sound of the auctioneer's hammer disposing of their estates for 500, 1000, or 5000 years, for the *benefit* conferred by their gracious undertakings.

I speak not the words of empty declamation, I state facts, mostly sworn to in this bill of complaint and not denied in the answer. It is the complaint of no solitary malcontent murmuring without cause and dissatisfied without reason; but it is the reluctant appeal of persons who hold an honorable place in the estimation of the public, and who come here as a last resort, to ask protection from acts which they believe to be unauthorized by law, and which they feel to be ruinous.

Even one of our most venerable institutions of learning has been constrained to solicit legislative aid to prevent the sequestration of its real estate by the operation of this miscalled system of improvements.

We but ask that the law shall be made the rule of conduct for this mighty Corporation as well as for the humble village; that when the law commands, it shall be obeyed. If we then suffer we shall submit, as such is the will of our rightful sovereign, the people.

The legislature have pronounced their judgment by the act of 1839, making the objection of a majority of persons in interest, effectual. The power to injure in future has been taken away: we ask this Court to heal the wounds already inflicted.

Mr. H. then proceeded at length to discuss the jurisdiction of the Common Council in these matters; and to examine in detail the several alleged abuses as set forth in the bill.

Document No. 22.

BOARD OF ASSISTANT ALDERMEN.

February 25th, 1839.

Report of the Committees on Assessments and Laws, on the petition of sundry owners of property on Chapel street and its vicinity, for relief from the payment of assessments, for re-grading and re-paving said street, and building a sewer therein; and former reports of the Assessment Committee thereon. By Mr. Anderson, member of the Committee on Laws. Laid on the table, and three times the usual number ordered to be printed.

J. Newkouse, Clerk.

The Joint Committee on Assessments and Laws, to whom was referred the petition of owners on the line of Chapel street and its vicinity, that the Corporation should assume the payment of the several assessments for paving and grading said street, and for building the

new sewer therein, together with the Street Commissioner's report on the same subject, beg leave respectfully to report:

That in the year 1836, May 16th, an ordinance was passed for re-grading and re-paving Chapel street, and the intersecting streets, which was carried into effect, in that and in the early part of the year 1837. The re-grading consisted in making a slope from Reade to Canal street, elevating the grade in some parts about three feet.

In the same year, and at the same time, an ordinance was passed to construct a new sewer in Chapel street, which was afterwards built, and is the present sewer in said street.

The petitioners ask to be relieved from the payment of part of the assessments for these two improvements.

Previous to the passage of these ordinances, Chapel street had been widened from near Leonard, southwardly to Reade street, by taking such portion from each side as would make it of the uniform width of 90 feet, throughout its whole extent—thus affording a handsome, convenient public avenue. The wide part of the street was provided with an excellent substantial sewer, from where the widening commenced to Canal street, built at the expense of the owners of the vicinity, and which answered all its intended purposes. The grade and pavement of this part of the street was also of good character and fair condition.

The propriety of an assessment for re grading and re-paving that part of the street which had been widened, and for constructing a sewer therein, cannot be questioned. The relief, therefore, upon the present petition ought to be made to apply to the original wide part of the street only, and the intersecting st eets.

Your Committee have been attended by the parties interested, and their counsel, and cannot but think that it presents strong equitable grounds for relief, as well as some legal points of importance. It is apparent that a great part of the value of the widening, grading and paving this street, enures to the public. Property in that street has not yet attained such prices as very liberally to compensate the owners for the inconvenience and expense to which they have been subjected in the improvement, and it is doubtful whether it will attain that point, until the line be extended at each end, so as to make a broad continuous avenue from the upper to the lower part of the city. At present it is but a link in the chain; and though presenting a broad carriage way for the public, does not induce that throng of foot passengers, which renders property in its line most valuable. The public thus enjoying the main benefit of the improvement, have never contributed any part of its cost.

It appears to your Committee, that but few cases have ever happened in our city presenting a more legitimate claim to an allowance of one third of the value of the buildings than this; and yet by some misapprehension the charge has been totally omitted, and the whole sum assessed upon the owners. In the case of William street, recently discussed in this Board, this allowance was distinctly presented by both Committees, as a main point in the case; and the reasoning of the Special Committee, who examined the principle somewhat at large, that in consideration of the additional convenience to the public, such additional allowance should be made, was adopted by a very strong vote of this Board. It is true that such assessment is left to the judgment of the Commissioners, but that they erred most grievously in their judgment in this matter, and that the individual owners are now paying from their own pockets, what ought to have been paid by the public, is quite apparent from the present uses and condition of the street. It may be alleged, however, that the time has passed in which this allowance could have been made a legal obligation; but in dealings with a community, by its representatives, your Committee conceive that liberal equitable principles should be the governing rule of action—not technical points; and that, therefore, be this fact as it may, if the conscience of the community be bound, a misapprehension on the part of its agents should never be allowed to make an injury to any citizen. It appears, also, from the evidence presented to your Committee, that though the grading of the street was contracted to be completed in the month of ———, 1836, it was only partially effected at that time; and that during the whole of the succeeding winter the street was kept in a wet, unwholesome, and almost unpassable condition; that owners of property were consequently compelled to make deductions of rent. In some cases their houses were untenanted; and in many instances considerable expense was incurred in keeping the property from injury by the overflow of water. Besides all this, some individuals, worn out by the delays of the contractor, filled in the side walks at their own expense; thus doing the contractor's work, and paying the contractor for it in addition. Had the work been done according to contract, the accruing rents thus lost, might, in many cases, have equalled the assessments the owners are now called upon to pay. No allowance has ever been made for this damage, nor for the expense of filling in what the contractor ought to have filled in, under his contract. However great was the inconvenience, the owners were without remedy, except through the Corporation. Your Committee are not aware that the law would allow any suit by the owners against the contractor—nor should they have been exposed to the necessity of sueing him. His contract is with the Corporation, and not with the proprietors on the street; and thus they were compelled to stand by, suffering month after month by this gross negligence. The Corporation, in matters of this kind, is, your Committee are aware, an agent. But receiving from one and paying to another, is not all its duty. A careful endeavor to carry out the whole business in such manner as may best subserve the interest of the public, and of the individuals who pay for the improvement, is a part, and the highest part of its duty. The Corporation is not only an agent, but a trustee, and a guardian of all these interests; and, as such, should be prompt and faithful in the discharge of its duty. Herein your Committee think the Corporation has failed. A prompt exercise of its power might have saved these owners large sums of money, and more, possibly, (though your Committee have made no estimate of the amount,) than they are now called upon to pay.

It appears also that the owners on the wide part of the street, very generally remonstrated against altering its grade; but, as has been stated, were induced to soften their opposition, upon representations made to them by a member of the Corporation, and its officers, while acting officially on the matter; that, from the then peculiar state of the city, the expense would be little or nothing. These opinions, your Committee doubt not, were honest and sincere; and they would not press this fact as affording the shade of a legal point; but they do think it of some importance as an equitable consideration, when taken in connection with others of stronger character. The petitioners were thus certainly induced to act upon anticipations which were not realized, which anticipations were founded upon the opinions of those who were necessarily best conversant with the subject; and might have acted otherwise if no such opinions had been thrown out.

As to the sewer, your Committee have been unable to discover from the report of the Street Commissioners, who had personally examined the old sewer, or from any of the testimony, the necessity for constructing a new sewer. The measure, however, was examined at the time in the proper manner, and passed upon; and has thus (though this point is denied by the petitioners and their counsel,) become, as your Committee believe, a matter of regular assessment, if such assessment be lawful.

It seems to your Committee, however, to present a strong case for the equitable consideration of the Board.

The builders of the old sewer, and others who had examined its condition, appeared before your Committee, and your Committee have no hesitation in saying, that a more substantial piece of work has not been constructed at any time in our city, nor one better answering the purposes for which it was intended. It was of sufficient size for all purposes, having a bottom, sloping to the centre, with perpendicular sides to the springing of the arch. Consequently, lateral sewers could be let into the common sewer at a point no great distance above the bottom, thus allowing the construction of cellars almost as deep as the sewer itself. The work was altogether so good, and so well adapted to its purposes, that the superintendant of the new sewer was induced, as well by the advice of some of the inhabitants of the Ward, as by his own sense of the excellence of the old work, to arrest the progress of the new sewer, until the proper authorities could again make an examination, in the hope that the old work might be suffered to remain.

The present sewer is circular in its form, and rests on the bottom of the former, which was not taken up. It is consequently not as deep, by from 4 to 8 inches, as the old sewer; and its circular form does not present lateral drains, to be let in much below the centre. The inhabitants are thus prevented from making as deep cellars as they might have done had the old sewer been allowed to remain; and cellars, which were dry with the old sewer, have been occasionally flooded since the construction of the new. In one instance, a proprietor, after constructing a sewer from his premises, parallel to the public sewer, for some two hundred feet, in order to gain a proper declination, was compelled to cement the whole of his cellars, which had been formerly dry.

The petitioners also aver, that the new sewer is of bad workmanship—has already burst in many places, and must ere long require extensive repairs.

Now if these be facts, and the Corporation has the right, at its will and pleasure, to take up a substantial sewer, already built by the inhabitants, and to construct a new one, at their expense, how long will it be ere a third assessment shall be levied upon them to replace the present insufficient work?

The inhabitants, one and all, assert that they are not as well off with the new sewer as with the old one; and the anomaly is thus presented of an assessment for a *benefit*, when in truth a *damage* has been sustained.

The reports of the Assessment Committee have already presented to the Board the large sums in which this part of the street has already been taxed for improvements of various kinds. Your Committee will only observe that the fact deserves the kind consideration of the Board.

Your Committee have already observed that they were attended by the counsel of the petitioners. This gentleman presented to your Committee a written argument, which, at the instance of the Committee, was replied to by the counsel of the Corporation.

Your Committee have examined the arguments of counsel with care, and present the following as the points appearing to them to deserve most attention.

The counsel for the petitioners contends that the power of pitching and paving streets, and building and altering sewers, at the expense of the parties benefited, being a power conferred by statute, when once exercised, is exhausted; and 2dly—that by the true construction of the statute of 1813, sections 175 and 176, the assessment must first be made and the money collected, before the improvement be commenced.

Your Committee have examined the statute in connection with these opinions, and cannot say that they believe much weight ought to be attached to the first point, so far as the pitching and paving of streets is concerned; but as to the building of sewers, think the opinion carries with it much weight.

The law relating to the subject (vol. 2 R. S. p. 407, sec. 175.) reads thus:

"And be it further enacted, That it shall be lawful for the said Mayor, Aldermen, and Commonalty, to cause common sewers, drains, and vaults to be built in any part of the said city; and to order and direct the pitching and paving the streets thereof, and the cutting into any drain and sewer, and the altering, amending, cleansing, and scouring of any street, vault, sink, or common sewer, within the said city, at the expense of the parties benefited."

The powers thus to be exercised by the Corporation, at the expense of the persons benefited, are—1st, to cause common sewers, drains and vaults to be built. 2d, to pitch and pave streets. 3d, to cut into any drain or sewer. 4th, to alter, amend, cleanse, and scour any street, vault, sink, or common sewer; and a fifth power is added, not contained in the above extract, to raise, reduce, level, or fence any vacant lot.

The terms alter and amend, apply, in the statute, both to sewers and streets. Now, in the opinion of your Committee, these terms can fairly be made to apply to, and in fact be the precise things meant in repaving, and re-grading a street; but they doubt much whether they can be made to apply to the taking up, the destruction of a sewer already built, at the expense of the parties benefited, and replacing it with one of different form and construction—inasmuch as it is not an alteration or amendment, but a total destruction. If this be so, your Committee may well admit that the Corporation having once built a sewer at the expense of the inhabitants, the power to build again at their expense is exhausted, and that the power is thereafter limited to altering and amending only, at the expense of the persons benefited.

But your Committee think there is as much, if not greater force, in the second point urged by the counsel for the petitioners. That the assessment must be made and the money collected, before the improvement be commenced. By the 176th section, the next succeeding section to that in which the power to pitch and pave streets and build sewers, is contained, it is provided "that, if upon completing any such regulation," it shall appear that a greater sum of money had been, *bona fide*, expended in making such regulation than the sum es-

timated, and collected as aforesaid, it shall be lawful to make a new assessment for the balance, and if more had been collected than was necessary, the surplus should be refunded.

Now it is urged by the petitioners, and with great reason, as it appears by your Committee—that, had such assessment been made before the improvement commenced, as they contend to be the true meaning of the Act, this body would have hesitated in passing any ordinance imposing so great an amount upon them, when they had already been assessed so largely for other improvements; and that they themselves would have had such positive information in their possession as would have enabled them to meet the question with such measures on their part as would have defeated it altogether, or at least to so far modify the improvement as would have made it less onerous.

But a more controlling point, it appears to your Committee, is to be found in the Act of April 16, 1816 (L. rel. to City of N. Y., p. 746.) This Act recites in the preamble, that the opening and improving streets not unfrequently makes it necessary to elevate or depress streets already regulated; and that buildings already erected, according to the previous regulation, may be damaged by such new regulation; and that there is no mode by which such damage can be appraised. And then directs in its 1st section, that the Commissioners of Estimate and Assessment shall, in all cases, obtain from the Corporation of New York, a profile or plan, showing the intended regulation of such street, and of the adjacent streets, as to the elevation or depression thereof, after such improvement; and if, in their opinion, such intended regulation will injure any building or buildings, not required to be taken down, they are bound to assess the damage. This is the precise case of the wide part of Chapel street and the intersecting streets.

Now, the ordinance for widening Chapel street was passed December 31, 1833, and ordered to be carried into effect the 15th of May, 1836, by resolution adopted Jan. 28, 1835. The ordinance to re-grade the street was passed May 16th, 1836; and to rebuild the sewer the same time, 16th May, 1836. In the opinion of your Committee, the widening, re-grading, re-paving, rebuilding the sewer, and extending its length, are so far simultaneous operations, or at least have followed each other so immediately, that, in the judgment of law, they may be pronounced *but one whole improvement*, however broken up by separate and distinct ordinances of the Common Council. In fact, the whole series of reports in these various measures, will show that, in the mind of the Common Council, it was but *one*. All subsequent reports refer to previous reports, and constant allusions and references are made throughout to this fact.

If this be so, then upon the very first ordinance to widen the street, the Commissioners should have been furnished with a profile of the grade, as it was afterwards carried out, in order that the petitioners might have had their damages assessed by reason of such grade. This was not done—on the contrary, the profile of the street as it then stood, was put in the hands of the Commissioners, and thereby your Committee consider that the faith of the Corporation was pledged to that profile and to no other; and the attempt to assess for a new grade and pavement, because it was directed by a subsequent ordinance, may fairly be doubted to consist with the fair faith of the city. May it not be said that the petitioners were thus tricked out of their claim for damages, caused by the change of grade, by this splitting up of ordinances.

Your Committee having thus given, perhaps, too much at large, the leading features of the case, offer the following as a summary of their conclusions:—

1st. That the widening, grading and paving Chapel street, is essentially more a public benefit than a benefit to the individuals assessed.

2d. That, as such, the charge upon the City Treasury of one third the value of the buildings, ought, in justice and equity, to have been made.

3d. That though the time has elapsed when this could have been made a legal charge, it is never too late to do justice, and that the mistake in judgment of the Commissioners, when palpable, should not be allowed to work any injury to any citizen.

4th. That the neglect of the contractor to fill in the street within the time fixed by his contract, has caused large losses to the petitioners; and that the Corporation having failed to collect these damages from the contractor, is bound, in justice and equity, to indemnify the petitioners.

5th. That the petitioners were informed, by those who necessarily are the most competent authority on such subjects, that the improvement would cost them nothing, and acted differently under this information from what they would have done, had they anticipated this assessment.

6th. That the old sewer was in all respects sufficient, requiring only some few repairs, and that the new sewer does not answer the same purposes as effectually.

7th. That the Corporation having, in the year 1820, constructed, at the expense of the neighborhood, a good and sufficient sewer, it is a question whether its power was not thereafter limited to alterations and amendments only, at their expense, and that therefore the taking up the old sewer and constructing a new one in its place, has become a city charge.

8th. That it is a matter of doubt whether, under the 175th and 176th sections of the Act of 1813, an assessment should not have been made before the improvement was commenced, (as is always done in the opening and extension of streets,) in order that the Common Council might more accurately judge whether the improvement would be beneficial or not.

9th. That the widening of Chapel street, the regrading and re-paving of the same, and building a sewer therein, though done under different ordinances, *is but one whole improvement*, and that under the act of April 16, 1816, the owners of property affected by the re-grading of the wide part of Chapel street, should have been allowed the damages sustained by them in consequence of such re-grading.

Your Committee therefore recommend the following resolutions:—

Resolved, That the Comptroller draw warrants in favor of the owners of property on Chapel street, between Canal street and the centre of the block, between Franklin and Leonard streets; and also on the intersecting streets intermediate, for the sums paid by them for the building of the new sewer, and the recent regulating and paving of Chapel street, and streets intersecting the same.

Resolved, That the assessments upon property, as above, which have not been paid, be remitted, and that the Comptroller draw his warrant for the amount in favor of the contractor.

} Committee on Assessments and Laws.

OPINION OF ALEXANDER HAMILTON,

Of Discretion in Assessments and Taxation.

The biographer of the great patriot and statesman, Alexander Hamilton, on the subject of Assessments, thus remarks and quotes that great man, "He was governed by a consideration to which he attached great weight."

"The arbitrary system of Assessments."

"Do we imagine, (he had remarked in the Constitutionalist) that our Assessments operate equally? Nothing can be more contrary to the fact. Whenever a discretionary power is lodged in any set of men over the property of their neighbors, they will abuse it. Their passions, prejudices, partialities, dislikes, will have the principal lead in measuring the abilities of those over whom their power extends; and Assessors will ever be a set of petty tyrants,—too unskilful, if honest, to be possessed of so delicate a trust,—and too seldom honest to give them the excuse of want of skill. The genius of liberty reprobates everything arbitrary or discretionary in taxation. It exacts that every man, by a definite and general rule, should know what proportion of his property the state demands. Whatever liberty we may boast in theory, it cannot exist in fact, while Assessments continue. The admission of them among us, is a new proof how often human conduct reconciles the most glaring opposites; in the present case, the most vicious practice of despotic governments with the freest institutions and the greatest love of liberty."

It will be borne in mind, that Mr. Hamilton used these words in 1783, when Assessments were imposed for different and various purposes, but the principle is the same.

FIRST STEAM BOATS.

We give below a copy of the act passed by the Legislature of this State in 1787—fifty-four years ago What a change this short space of time has produced: The act is, under all circumstances, a great curiosity! This act is to be found in the 2d Vol. Laws State o New York, published in 1789, p. 116.

An ACT *for granting and securing to* John Fitch *the sole Right and Advantage of making and employing, for a limited Time, the Steam-Boat by him lately invented.*

Passed 19th March, 1787.

WHEREAS *John Fitch*, of *Bucks'* County, in the State of *Pennsylvania*, hath represented to the Legislature of this State, that he hath constructed an easy and expeditious Method of impelling Boats through the Water by the Force of Steam, praying that an Act may pass, granting to him, his Executors, Administrators, and Assigns the sole and exclusive Right of making, employing, and navigating all Boats impelled by the Force of Steam or Fire, within the Jurisdiction of this State, for a limited Time: Wherefore, in order to promote and encourage so useful an Improvement and Discovery, and as a Reward for his Ingenuity, Application, and Diligence;

I. *Be it Enacted by the People of the State of* New York, *represented in Senate and Assembly, and it is hereby Enacted by the Authority of the same*, That the said *John Fitch*, his Heirs, Executors, Administrators and Assigns, shall be, and they are hereby vested with the sole and exclusive Right and Privilege of constructing, making, using, employing and navigating a and every Species or Kind of Boat, or Water Craft, which may be urged or impelled through the Water by the Force of Fire or Steam, in all Creeks, Rivers, Bays and Waters whatsoever, within the Territory and Jurisdiction of this State, for and during the full End and Term of *fourteen* Years, from and after the present Session of the Legislature.

II. *And be it further Enacted by the Authority aforesaid*, That if any Person or Persons whomsoever, without being properly authorized by him the said *John Fitch*, his Heirs, Executors or Administrators, shall make, use, employ or navigate any Boat or Water Craft, which shall or may be urged, impelled, forced or driven through the Water by the Force, Power or Agency of Fire or Steam as aforesaid, within the Territory or Jurisdiction of this State, every Person or Persons so offending against the Tenor, true Intent and Meaning of this Act, for each and every such offence, shall forfeit and pay unto the said *John Fitch*, his Heirs, Executors or Administrators, or to such other Person or Persons, as he the said *John Fitch*, his Heirs or Assigns, shall authorize and empower for that Purpose, the Sum of *One Hundred Pounds*, to be recovered by Action of Debt, in any Court of Record within this State, wherein the same may be cognizable, with Costs of Suit; and shall also forfeit to him the said *John Fitch*, his Heirs or Assigns, all such Boats or Water Craft, together with the Steam Engine, and all the Appurtenances thereof, to be recovered in Manner aforesaid, with Costs of Suit.

III. *Provided always, and be it further Enacted by the Authority aforesaid*, That neither this Act, nor any Clause, Matter or Thing therein contained, shall be taken, deemed or construed to prohibit or prevent any Person or Persons from making, using, employing or navigating, within this State, any Kind of Boats or Water Craft, heretofore invented, or hereafter to be invented, on any other Principles, Construction or Model, which may be urged, impelled or driven along through the Water, by any other Power, Force, Agency or Means, except Fire or Steam.

ASSESSMENTS.—10th WARD.

We have understood that this ward has not been depredated upon by the municipal officers; that not a house has been injured, or a foot of land confiscated by a street opening, widening, or extending, in the 10th ward. The representatives of this ward deserve credit for keeping such a sharp look out for the interests of their constituents.

PRESIDENT HARRISON'S INAUGURAL.

We extract from the Inaugural Address of this worthy Chief Magistrate, some most excellent declarations. We shall occasionally make farther extracts. These bespeak a sound head and a good heart.

Before concluding, fellow citizens, I must say something to you on the subject of the parties existing in our country. To me it appears perfectly clear that the interest of that country requires that the violence of the spirit by which those parties are at this time governed, must be greatly mitigated, if not entirely extinguished, or consequences will ensue which are appalling to be thought of.

If parties in a Republic are necessary to secure a degree of vigilance sufficient to keep the public functionaries within the bounds of law and duty, at that point their usefulness ends. Beyond that, they become destructive of public virtue, the parents of a spirit antagonist to that of liberty, and eventually, its inevitable conqueror. We have examples of Republics, where the love of country and of liberty, at one time were the dominant passions of the whole mass of citizens.—And yet, with the continuance of the name and forms of free government, not a vestige of these qualities remaining in the bosom of any one of its citizens. It was the beautiful remark of a distinguished English writer, that "in the Roman Senate Octavius had a party, and Anthony a party, but the Commonwealth had none." Yet the Senate continued to meet in the Temple of Liberty, and to talk of the sacredness and beauty of the Commonwealth, and gaze at the statues of the elder Brutus and of the Curtii and Decii.

And the people assembled in the forum, not as in the days of Camillus and the Scipios, to cast their free votes for annual magistrates or pass upon the acts of the Senate, but to receive from the hands of the leaders of the respective parties their share of the spoils, and to shout for one or the other, as those collected in Gaul, or Egypt, and the Lesser Asia, would furnish the larger dividend. The spirit of liberty had fled, and, avoiding the abodes of civilized man, had sought protection in the wilds of Scythia or Scandinavia; and so, under the operation of the same causes and influences, it will fly from our capitol and our forums. A calamity so awful, not only to our country, but to the world, must be deprecated by every patriot; and every tendency to a state of things likely to produce it immediately checked. Such a tendency has existed—does exist. Always the friend of my countrymen, never their flatterer, it becomes my duty to say to them from this high place to which their partiality has exalted me, that there exists in the land a spirit hostile to their best interests—hostile to liberty itself. It is a spirit contracted in its views, selfish in its objects. It looks to the aggrandisement of a few, even to the destruction of the interests of the whole. The entire remedy is with the people. Something, however, may be effected by the means which they have placed in my hands.

It is union that we want, not of a party for the sake of that party, but a union of the whole country for the sake of the whole country.

CONTINUATION OF THE PROPOSED BILL TO BE OFFERED TO THE LEGISLATURE TO BE PASSED INTO A LAW.

Sec. It shall be the duty of commissioners authorized to make any estimate and assessment for any improvement recited in this act, to give notice to the owner or owners, and occupant or occupants, of all houses and lots, and improved or unimproved land affected thereby, that they have completed the estimate and assessment, and will meet at the commissioners' office in the city of New York, to hear the objections of all persons interested, to the said estimate and assessment, who may appear and make objections thereto.

Sec. Such notice may be served personally, or by leaving the same at the dwelling-house of the owner and occupant, with any person of suitable age and discretion belonging to the family of such owner and occupant, or by leaving the same at the place of business of such owner and occupant, with the person having charge of the business of such owner and occupant.

Sec. The notice provided for in the two last preceding sections, shall state the amount of the assessment or assessments, the street where the property is situate, and the day and hour on which the commissioners will meet to hear objections to the estimate and assessment, and state the place of meeting, and shall be signed by the chairman of such board of commissioners.

Sec. It shall be the duty of the commissioners to employ a suitable person at a reasonable compensation, to make service of the notices provided for by this act; and such person shall make oath or affirmation to the due service of each of said notices, in a general return to be made to the said commissioners, who are hereby authorized to administer such oath or affirmation, and to endorse the same upon the said general return of due service, which shall be appended to the assessment list.

Sec. It shall be the duty of the commissioners to take down in writing the objections which any person interested in opposing the assessment may make thereto, at the time when such commissioners shall meet to hear objections, and shall carefully read the same over to such objector, who, if he approve the same as correct, shall sign his name thereto, and such objections shall be attached to the assessment list.

Sec. Whenever houses and lots, or improved or unimproved lands, shall be assessed for any improvements specified in the first section of this act, it shall be the duty of the commissioners to assess all property belonging to one and the same owner or owners, which adjoins and is held in one parcel or tract, in one sum, unless required by such owner or owners to assess the same separately, which requirement shall be in writing, and be signed by the person or persons making it, and shall be appended to the assessment roll.

To be continued.

COMPTROLLER'S REPORT AGAIN.

We have not had time to examine this report and compare it with former reports. We believe, however, that the expenses of the city are continually increasing, and in looking throu h the report, we do not yet see that there is any diminution of expenses in any of the branches of the departments. The account is made up to the first day of January, near two months and a half before it is published. I do not think the Comptroller would like that a law should be passed by the Legislature prohibiting the issuing of any more bonds unless provision is first made for those which are now out. There is a large amount of street opening expenses, such as surveyors' fees, counsel fees, commissioners' fees, &c. &c., which belong to last year's account, which the anti-assessment citizens have kept in abeyance. These would have swelled the amount a great many thousand dollars! These are not yet paid.

We give below the section of the law passed in 1813, authorizing the issuing of bonds for awards for street openings. This operation, we believe, authorized if the street proceedings are legal, but the bond should bear on its face the authority under which it is issued. We, however, doubt the authority of the corporation altogether in the matter of doing that in the Board of Aldermen and Assistants, which was given to the Mayor, Recorder, and others to do. There would be just as much propriety in the Board of Assistants acting as supervisors of the city and county of New York as in this matter; there is no law for either. If the law authorizes a select class to do a certain act, and others join in it, the act is void. This question is, however, before the courts, and will probably soon be decided.

And be it further enacted. That all debts and expenses incurred by the said mayor, aldermen and commonalty, for or on account of the opening of any street, avenue, square or public place, or any particular part or section of any street or avenue laid out by the said commissioners of streets and roads in the city of New York, under and by virtue of the act, entitled "an act relative to improvements, touching the laying out of streets and roads in the city of New York, and for other purposes," passed April 3d, 1807, may be funded at such interest, in like manner and under the same limitations and restrictions, as is authorized by the act, entitled "an act to regulate the finances of the city of New York," passed June 8th, 1812. 2 vol. R. L. 1813, page 422, sec. 190.

FORMATION OF THE ISLAND OF NEW YORK.

Persons who have been in the habit of digging cellars in the lower part of the city, and those who have sunk wells, will no doubt recollect that the layers or stratas of sand dip toward the ocean, and appear to have been made by the washing up of successive layers of earth by the waters. We shall, in a future number, give an account of the Geological formation of the Island from the reports of the State Geologists.

AMENDMENT OF THE ASSESSMENT LAWS.

In 1839, the venerable Morgan Lewis, Ex-Governor of the state of New York and Ex-Judge of the Supreme Court, Murray Hoffman, now assistant Vice-Chancellor, and Alfred A. Smith, now Comptroller of the City of New York, and several others, petitioned the Legislature of the state for an alteration of the assessment laws of this city. The petition was presented in the Senate of this state by that distinguished citizen and able Senator, Grelian C. Verplanck, and was referred to a committee; it was, however, late in the session, and was not therefore acted upon. When Mr. Smith signed this petition, he stated a case of assessment abuse of his own knowledge, and of the sale of a lot of ground for building a fence around it by the Corporation, but the owner had never heard of the assessmeut or the fence either, until after his lot had been sold.

The worthy comptroller has given the public in his present report a statement of all the street openings, widening and extending, from 1811 to 1840; it is a very accurate exhibit, and he is entitled to credit for making it at this time.

We had prepared several articles for this day's paper, which the other lengthy documents will compel us to omit until the next number. Among these is the minority report of Assistant Alderman Bradhurst, in relation to the contemplated extravagant expenditure of public monys for extensive additional buildings on Blackwell's island.

Mr. Assistant Bradhurst is right in this matter; he is well informed upon this subject, having the advantage of the advice of his worthy father, John M. Bradhurst Esq., one of our most estimable citizens, who is one of the commissioners of the Alms House, and understands well the whole subject, aud being a thorough business man, and besides a prudent, safe and deliberate, careful, calculating man, he has looked into the whole matter; and his opinion is decidedly against this great expenditure. The city government should not extend their engagements at this time. The finances of the Corporation will not authorize it. It is well to wait until the Croton expenses shall be first provided for, before *any* new outlays are proceeded in.

We have given in the present number the Constitution of the United States and the Constitution of the State of New York; valuable public documents, which should be carefully treasured up, and often read by every citizen.

We have commenced in this number the publication of the City Charter proceedings, and shall continue them in Chronological order from 1657 to 1841.

We have never met with Governor Nicoll's Charter of 1665. The substance of it is recited in the petition of the mayor and aldermen to Governor Dongan in 1683, which is contained in the present number. We shall endeavor to obtain a copy of it from the secretary of state at Albany, and publish it.

ERRATUM.

In our last number, page 9, third column and third paragraph of the written opinion of Judge Savage, late Chief Justice of the Supreme Court of the State of New York, on the validity of Trusts created by last Will and Testament, to pay over the interest and income of personal estate under the provisions of the Revised Statutes, is a typographical error for the word "one of $15,000," read one of $5,000. It is an invaluable opinion, and therefore we are thus particular.

Office, No. 6½ Wall-street, (up stairs.)

THE CHARTER OF THE CITY OF N. YORK.

We have begun at the foundation. We have gone back to the first charter ever granted upon this island, when it was called the island of Manhattoes, and when this city was called by the name of Amsterdam in the New Netherlands. The first charter granted was in 1657; it is very brief, and contains very limited grants of power.

The next important proceeding is the capture of the city by the English in 1664. We give the articles of capitulation; and next, in chronological order, the order or sentence of confiscation of the property of the subjects of the United Belgicke Provinces in this city by Governor Richard Nicolls. This last document we have never found in print. It is recorded in a book kept in Fort James, in 1665, which is now in the surrogate's office of the city and county of New York, and marked No. 1. The Dutch charter we have copied from Kent's Notes on the Charter; and the articles of capitulation from Smith's History of New York; the subsequent proceeding of Governor Andros, and Governor Dongan, from the manuscript record of the Common Council, in Books No. 1 and 2; and the charter or patent of Governor Dongan we have copied from Kent's notes on the charter, which the Chancellor remarked that he had taken that in his book from a printed copy published in 1792. There is a manuscript copy on record in the office of the Secretary of State, in Book of Patents, vol. 1, pp. 278 to 309. From all we have been able to learn we believe that the charter of Dongan was sent to England for confirmation, and not returned. We shall continue the publication of the charter in chronological order up to 1830, manuscript as well as printed. These papers in continuous order in which they were made, will be interesting, and are not all of them anywhere else thus to be obtained in print. It is well for the citizen to know what is in the charter, and also for the members of the Common Council and officers of the Corporation to have the whole of the documents before them, that they may be able to see what powers they have, and thereby be able to keep within the powers granted them.

(*From the Evening Star of 11th inst.*)

IMPORTANT STREET ASSESSMENT CAUSE IN THE COURT OF CHANCERY.

On Tuesday morning came up for argument before the Hon. Murray Hoffman, Assistant Vice Chancellor, one of the numerous assessment causes now pending. Lewis H. Sanford, one of the counsel for the complainants, opened with an able argument of six hours, in which he went into the whole question very fully.—When he had closed the court adjourned. On Wednesday morning, Peter A. Cowdrey, Esq., counsel for the corporation, commenced in reply, and continued his argument until 2 o'clock. He was followed by W. M. Holland, Esq., one of the counsel for the complainants. Mr. Holland spoke until the hour of adjournment, and resumed his argument again this morning, and continued speaking until our paper went to press.

The question of the legality of these assessments is now in a fair way of being tested. This is the first full argument which has been had upon any of those questions; and the corporation counsel remarked to the court that both parties now have the opportunity of a full and deliberate argument. The court listened to the arguments with great patience and attention; authorities were cited in great numbers by the complainants' counsel.

In Chancery—Jacob Westervelt et al., *vs.* the Mayor, Aldermen, and Commonalty of the City of New York. Complainants' points:

First—The assessment upon the complainants' lands for opening 31st street, from the 10th Avenue to the East River, is illegal and void, and should be set aside, because,

I. Thirty-first street, from the 9th avenue to the *East River*, having, previous to these proceedings, been ceded and conveyed by the owners thereof to the corporation, and accepted by the latter, and used and treated by them and others as an open and public street, the corporation had no authority or jurisdiction to institute or conduct proceedings under the statute for opening that part of such street by commissioners.

And all such proceedings, and all assessments under the same upon lots fronting on that part of 31st street, are null and void.

II. There was no resolution or action of the corporation authorizing either the opening in question or the application for the appointment of commissioners of estimate and assessment, or any of the proceedings complained of. The general resolution for opening the streets not previously opened, up to and including 42d street, not only excludes 31st street, west of 9th avenue, but does not authorize a separate proceeding for opening any single street.

It was passed for the express purpose of preventing any such separate proceeding.

And it does not direct or authorize any application to the supreme court for the appointment of commissioners.

III. The above resolution, under which the opening in question is justified by the corporation, is null and void, and inoperative, because it was acted upon and adopted by the common council and approved by the Mayor, under the organization prescribed by the act of 1830, amending the charter of the city. The opening of streets is a *judicial power* of the corporation, and cannot be exercised by the common council and the Mayor under that statute.

If they can exercise it at all, it must be done in the manner prescribed by the act of 1813, by which the power is conferred.

1. That this power is a *judicial* not a *legislative* power.

2. The power granted to the corporation of the city to decide upon the opening of the streets, &c., laid out by the commissioners under the act of 1807, can be exercised only in the manner, and *by the integral parts of the corporate body* expressed in the grant.

3. This power is conferred upon the corporation by *the act of* 1813; and was to be exercised by the *Mayor, Recorder, Aldermen, and Assistant Aldermen, convened in* common council.

4. The act of 1830, amending the city charter, does not affect the power in question. It cannot be exercised in the manner prescribed for the *legislative powers* in that act.

IV. The resolution in question, if within the act of 1830, is also null and void, because it directed "a specific improvement involving the assessing of the citizens of the city," and the vote thereon was not taken by ayes and noes, in either Board of the Common Council. By the seventh section of that statute, the vote on such resolution could not be taken in any other manner.

V. There was no publication of the resolution, the reports of committees, or of the ayes and noes on the votes in relation thereto, as is expressly required by the seventh section of the act of 1830.

VI. The assessment is unconstitutional and void, because it is an indirect mode of taking private property for public use without compensation.

Second.—The respective assessments charged upon the complainant's lands, for the excavating and regulating 9th avenue from 29th to 33d streets, and the grading and regulating of 31st street from the 9th avenue to the Hudson river, are illegal and void, and should be set aside by this court.

I. The ayes and noes were not called on taking the vote upon these improvements, either upon the alleged resolutions, or the ordinances on the confirmation of the assessments, or in any of such votes.

II. The ordinances in question were never read in either board, or signed or certified by any officer of either board, or by the Mayor. They never were adopted in any manner.

III. There was no publication of any one of the resolutions, ordinances, reports of committees, or ayes or noes on taking the votes, upon either of these improvements.

IV. There was no estimate of the expense of these improvements ever made, nor any assessment till after the completion of the works in question. And as there is no authority for making such assessments except before doing the work, and conjointly with such estimates, the assessments in question are for that cause also illegal and void.

V. The assessors being officers of the corporation were not "competent disinterested persons," and therefore not authorized to make any assessment.

VI. No assessment was in fact ever made or "certified in writing" to the Mayor, &c., in either case. The pretended assessment not being in any manner certified or authenticated as required by law.

VII. The confirmation of these assessments is a judicial act or power of the corporation which must be done by the Mayor, &c. in Common Council convened, and cannot be done by the Mayor, Aldermen and Assistants, acting separately as distinct bodies. And as the assessments are alleged to have been confirmed in that manner, the confirmation thereof is a nullity.

VIII. The confirmation alleged, if not void for the reason last stated, is null because the resolutions therefor were not signed or certified by any corporate officer, were not taken or adopted by ayes and noes in either Board, and neither the votes, reports, or resolutions in relation thereto were published.

IX. The assessment for regulating, &c. the 9th Avenue is also illegal, because the lands in question, on which it is imposed, are not situated thereon, but are on 31st street, near the 10th avenue, and not within the range of such assessment. The same lands being grievously assessed for the 31st street regulating before mentioned.

ASSESSMENT DIFFICULTIES.

Some short time since, Alderman Graham offered the following resolution in the Board of Aldermen which was after some discussion adopted.

"Alderman Graham offered the following preamble and resolution:—

"Whereas, grave and important questions have arisen as to the legality and regularity of the proceedings of the Corporation, in opening, grading and paving streets, constructing sewers, and making other improvements, some of which have been presented to various courts of law and equity, and others have been brought before the Common Council on petition: And whereas, it is due to the interests of the city and rights of parties aggrieved, that the complaints referred to should be maturely considered by the Common Council: And whereas, such complaints involve difficult and complicated questions of law: Therefore—

"Resolved, That it be referred to the Counsel of the Corporation, in conjunction with two eminent legal gentlemen, to be designated by the Common Council, to examine the said questions in reference to all the proceedings in opening, grading, and paving streets, constructing sewers, and making other improvements, which have been, or may, before the 10th of March next, be brought before the courts or the Common Council, and report their opinion thereon on or before the 1st day of April next; and further, to report whether a re-assessment can legally be ordered or applied for in cases where the same shall be deemed just, and whether any and what amendment of the law is necessary for that purpose."

"Alderman Benson opposed the project of Alderman Graham, and the latter defended his preamble and resolution, which were modified, after a very prosy debate, and referred to a special committee, consisting of Aldermen Graham, Woodhull and Rich."

It would no doubt be satisfactory to the persons who have suffered by the almost numberless abuses which have been practised, in the imposition and confirmation of ruinous assessments, to have the whole subject referred to a commission composed of the three venerable-ex-chief justices of the Supreme Court of this State, viz.: James Kent, Ambrose Spencer, and John Savage. A commission composed of these three gentlemen, would be satisfactory to everybody interested What a combination of talent, of experience and wisdom, a Bench composed of these three ex-judges would make! The citizen, in standing in the presence of such a Court, would feel a reverence for the dignity of human nature, and would view the opinions of such a commission with the most profound respect, and yield to it unqualified submission. These venerable men

are rich in knowledge, full of wisdom, of experience, and of stern and undaunted integrity. They may be said to be an ornament to the human race.

Professor Good, in speaking of the human understanding, quotes Lord Bacon and Adam Locke, thus—

"All our knowledge," *says Lord Bacon*, "is derived from experience."

"Whence," *enquires Mr. Locke*, "comes the mind by that vast store which the busy and boundless fancy of man has painted on, with an almost endless variety? Whence has it the materials of reason and knowledge? I answer, in a word, from *experience*. In this all our knowledge is founded; from this the whole emanates and issues."

The venerable ex-president, John Quincy Adams, in speaking of the New York University and of academic honors, remarked that it was no additional credit to Sir Humphrey Davy to be made a member of the Academy of Sciences in France, but it was a credit to the society to have such a member, and it would be a credit to our city to have a commission composed of these three citizens—it would be a credit to our country and to the present age.

Appointing Commissioners of Estimate and Assessment.

In a conversation we had a few days ago with that worthy citizen, Ex-Alderman Morss, he remarked, that many years ago, when the Chancellor sat upon the bench as one of the Judges of the Supreme Court, that Mr. Jones, the counsel of the Corporation of the City of New York, applied to the court to have three persons appointed commissioners for opening or obtaining a public street, and the counsel at the same time handed in to the court the names of three gentlemen to be appointed commissioners;—Judge Kent said, on this occasion, "well, well, Mr. Jones, this wont do, the court must have something to say about the appointment of commissioners. We will not appoint the persons you have named, but the court will select three suitable persons." The court accordingly named the commissioners.

Opening Streets Formerly.

When John-street was wanted to be extended to Pearl-street, in 1793, an application was made to the legislature for an act to authorize it. The legislature of the state was then sitting in the city, and before they would pass the bill, appointed a committee of seven of their members to view the premises. This fact we have from the lips of a distinguished citizen, the worthy Ex-collector of the Port of New York, Jonathan Thompson, Esq., now president of the Manhattan Company. It would be well if we had such cautious and prudent legislation now-a-days.

WASHINGTON CITY.

BOARD OF COMMON COUNCIL.

Washington, March 8, 1841.

All present except Messrs. Johnson, Bassete, Maddox, Houston, and Clark.

The following communication was received from the Mayor:

Mayor's Office, March 8, 1841.

To the Board of Aldermen and
Board of Common Council:

Gentlemen—On considering the bill which has passed the two Boards entitled "An act establishing fish docks, and repealing all laws relating thereto heretofore passed," and which has been laid before me for my signature, it appeared to me questionable whether the provision which grants to A. B. McLean (under severe penalties for its infraction) the exclusive privilege of using his wharf as a fish-dock for the space of four years, and of charging certain rates therefor, although the privilege is granted for and in consideration of a prospective bonus to the Corporation, does not constitute a monopoly not within the competency of the Corporation to grant. Although thus doubting the right of the Corporation to pass such a law, I hesitated to place my judgment in opposition to that of the two Boards, and I submitted the question of the legality of the grant to the counsel of the Corporation for his opinion thereon. I find by his reply, herewith enclosed, that he coincides with and confirms my own impression, that the act exceeds the just authority of the Corporation, and I find myself constrained therefore, most reluctantly, to withhold my signature from the bill, and to return it to the Board in which it originated, begging leave respectively to refer you to the opinion of the Attorney of the Corporation on the subject, and the reasons on which that opinion is founded.

Very respectfully, your obedient servant,

W. W. SEATON.

Sir—I have carefully examined and considered the act submitted to me by you entitled "An act establishing fish-docks, and repealing all laws relating thereto heretofore passed," and I am fully satisfied that the Corporation has no power to pass it.

The power of the Corporation over this subject can be found only in the general powers of police regulation, including that of guarding against and removing nuisances. And although in the exercise of this power it may unavoidably, to a certain extent, become necessary to grant to individuals the exclusive right, for limited periods, to exercise certain trades, or pursue certain occupations, yet it never could have been contemplated by Congress that this exclusive right should extend beyond the shortest practicable period, and then should be placed so as to invite competition, and to give an opportunity to others in their turn to exercise it.

The Corporation exercises the same right over slaughter houses, brick-kilns, &c. as they do over the subject of fish-wharves. They come under the same general power. So of all trades or occupations which affect the public health, or are or may become nuisances.

Congress could not have intended, in regard to all these trades, &c., to invest the corporation with power to grant the exclusive right to an individual to exercise them. Indeed, it may well be doubted if Congress itself has such power.

If this right—this exclusive right—can be granted for four years, why may it not for ten, and if for ten, why not for a hundred years? Yet the bare suggestion would startle every one, and the illegality of such a grant would be too obvious for any argument.

These views strike me as so conclusive, that I scarcely think it necessary to extend them.

I am, sir, with great respect, your obedient servant,

JOS. H. BRADLEY,
Attorney for the Corporation.

W. W. Seaton, Esq., Mayor, &c.

The communication having been read, the question was put, 'Shall the bill pass, notwithstanding the objections of the Mayor?" and decided in the affirmative as follows:—

Yeas—Messrs. Easby, Wilson, Stewart, Orme, Bacon, Bryan, Harkness, McDonnald, Byington, Van Reswick, and Hanly—11.

Nays—Messrs. Fulmer and Crandell—2.

So the bill was passed by a majority of more than two-thirds.

PRESIDENT OF THE BOARD OF ALDERMEN.

This officer, is by virtue of his office of President, in the absence, &c. of the Mayor, the acting Mayor, and Mayor in fact of the city,—and as such is required to sign his approval of all ordinances and proceedings of the Common Council presented to him, or if he disapprove, to return the same with his objections to the Board, in which the same originated, &c., within ten days.

The Mayor is, by the amended charter, vested with a power to veto any act of the Common Council which he does not approve of; under the old charter the Mayor was a member of the Common Council, and possessed no veto power. The acting Mayor possesses all the power, of the Mayor elected by the people.

The 15th sec. of the amended charter provides that, neither the Mayor or Recorder shall be a member of the Common Council after the 2d Tuesday of May, 1831.

The Vice-President of the United States is, by virtue of his office, President of the Senate; and so with the Lieutenant-Governor of the state of New York, he is, by virtue of his office of Lieutenant-Governor, President of the Senate of this state.

The President of the United States Senate vacates his seat before the adjournment of Congress and the Senate appoints a President *pro tem.*; so with the Lieutenant-Governor of this state. In case that the Vice-President is called to act as President, he would not take his seat in the Senate as President of that body, and so with the Lieutenant-Governor.

It is wholly inconsistent with the spirit of our institutions that one person should hold two offices, and pass upon the same subject-matter twice at the same time. This is far from being democratic.

It is said, we understand, by learned counsel, that if the president of the Board of Aldermen should not take his seat and preside at the meeting of the Board, that his seat would become vacant and consequently both offices would be affected. With great respect, we beg leave to differ in opinion. The seat of a member cannot become vacant by any such act or cause, any more than the Mayor's absence vacates his seat. The president *pro tem.* of the Board of Aldermen is not by virtue of his office, acting Mayor of the city, under any circumstances, and a president *pro tem.* would only sit in the absence of the president.

The practice of the worthy acting Mayor to preside as president of the Board under the amended charter, is certainly not parliamentary or even authorized by the charter. The acts of the Common Council under such proceedings, we believe, are void.

Comptroller's Report.

The Comptroller advances some doctrine in his report in relation to city stocks, which is not quite orthodox, as we believe. He says that the Croton Water stock was authorized by the people in their primary assemblies; so it was, to the extent of near six millions, but not to the extent of the present amount of stock, and we contend that any further increase of stock should be also submitted to the people at the next election. If the state cannot emit bills of credit, can they authorize others to do what they cannot do themselves? We are in favor of completing the Croton Water Works, because they have been begun, and as public stocks do not generally possess that confidence that these descriptions of paper have heretofore done, let those issued by the city be made as good as it has ability, and let there be no objection to it on the score of proper authority.

There is no property holder for the payment of this stock but the property belonging to the corporation of the city of New York, and so far as this will go to make the stock safe, it is so. The property belonging to the coporation cannot be alienated by the Mayor, Common Council, or officers of the corporation, nor by all of them combined.

THE COMMERCE OF THE CITY OF NEW YORK IN 1691.

The following is a copy of a petition presented to the Colonial Legislature in 1691, by the principal merchants of this city at that time. What a wonderful change has been produced in one hundred and fifty years.

To the Honorable their majesties Commander-in-chief and their majesties Council of The Province of New York. The petition of the merchants of the City of New York whose names are subscribed.

That by the navigation and traffic of New York, (allmost) the whole revenue for the support and maintainance of their majesties government of this province, doth arise and grow, and alltogether depend upon the same.

That by the importation of European goods from Boston and other places, the money, Bullion, Furs, and other returns, are drawn away from hence; whereby the merchants are disabled to send for goods directly from *England*, and by that means our number of shipping being decreased, our seamen diminished, and our trade discouraged; our provisions and other produces of the country, will lie upon our hands for want of exportation, and our neighbours will be able in a short time, not only to set their own price upon whatever goods they bring to us, but also upon such goods of our own production as they transport from us.

That the exportation of wheat to any of the neighboring colonies is a great detriment to this city and province, and the impoverishing and destruction of numbers of people, viz: Boatmen, Millers, Bakers, &c., who otherwise get a livelihood, and maintain their families out of the same. That the exportation of whale *oyl* taken and made in this province, otherwise than from this city, is manifestly hurtful to trade, and a general inconvenience to this city and province, our neighbors thereby reaping all the proffit and gain of the labor, hazard, and industry of the people of this government.

They therefore pray that the premis may be taken into consideration.

ANCIENT CHARTER PROCEEDINGS

Continued from No. 2, p. 27.

CHARTER OF GOVERNOR DONGAN TO THE CITY OF NEW YORK.

1. Thomas Dongan, lieutenant-governor and vice-admiral of New York, and its dependencies, under his majesty Ja es (the second) by the grace of God, of England, Scotland, France, and Ireland, king, defender of the faith, supreme lord and proprietor of the colony and province of New York, and its dependencies in America, &c. To all to whom this shall come, *sendeth greeting: Whereas*, the city of New York is an ancient city within the said province, and the citizens of the said city have anciently been a body politic and corporate; and the citizens of the said city have held, used, and enjoyed, as well within the same, as elsewhere, in the said province, divers and sundry rights, liberties, privileges, franchises, free-customs, pre-eminences, advantages, jurisdictions, emoluments, and immunities, as well by prescription as by charter, letters patent, grants, and confirmations, not only of divers governors and commanders-in-chief, in the said province, but also of several governors, directors, generals, and commanders-in-chief, of the Nether Dutch nation, whilst the same was, or has been under their power and subjection. *And whereas* divers lands, tenements, and hereditaments, jurisdictions, liberties, immunities, and privileges, have heretofore been given and granted, or mentioned to be given and granted, to the citizens and inhabitants of the said city, sometimes by the name of Schout, Burgomasters, and Schephens of the city of New Amsterdam; and sometimes by the name of The Mayor, Aldermen, and Commonalty of the city of New York; sometimes by the name of The Mayor, Aldermen, and Sheriff, of the city of New York; sometimes by the name of The Mayor and Aldermen of the city of New York; and by divers other names as by their several letters patents, charters, grants, writings, records, and minuments, amongst other things, may more fully appear. *And whereas* the citizens and inhabitants of the said city have erected, built and appropriated, at their own proper costs and charges, several public buildings, accommodations and conveniences for the said city, *That is to say*, the City Hall, or Stat-House, with the ground thereunto belonging, two Market-Houses, the bridge into the dock, the wharves, or docks, with their appurtenances; and the new burial place without the gate of the city; and have established and settled one ferry from the said city of New York to Long Island, for the accommodation and conveniency of passengers, the said citizens, and travellers.

And whereas several the inhabitants of the said city, and of Manhattan's Island, do hold from and under his most sacred majesty respectively, as well by several and respective letters patents, grants, charters, and conveyances, made and granted by the late lieutenants, governors, or commanders-in-chief, of the said province, as otherwise, several and respective messuages, lands, tenements, and hereditaments, upon Manhattan's Island, and in the city of New York, aforesaid, and as well as the said Mayor, Aldermen, and Commonalty, of the said city, and their successors, as also, the inhabitants of the said Manhattan's Island, and the city of New York, aforesaid, and their heirs, and assigns respectively, may hold, exercise, and enjoy, not only such and the same liberties, privileges, and franchises, rights, royalties, free customs, jurisdictions, and immunities, as they have anciently had, used, held, and enjoyed; but also such public buildings, accommodations, conveniencies, messuages, tenements, lands, and hereditaments, in the said city of New York, and upon Manhattan's Island aforesaid, which, as aforesaid, have been by the citizens and inhabitants erected and built, or which have, as aforesaid, been held, enjoyed, granted, and conveyed unto them, or any of them, respectively.

2. *Know ye, therefore*, That I, the said Thomas Dongan, by virtue of the commission and authority unto me given, and power in me residing, at the humble petition of the now Mayor, Aldermen, and Commonalty of the said city of New York, and for divers other good causes and considerations, me thereunto moving, have given, granted, ratified, and confirmed, and by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs, successors, and assigns, do give, grant, ratify, and confirm unto the said Mayor, Aldermen and Commonalty of the said city, all and every such and the same liberties, privileges, franchises, rights, royalties, free customs, jurisdictions, and immunities, which they by the name of the Mayor, Aldermen, and Commonalty, or otherwise, have anciently held, used, or enjoyed, *Provided always*, That none of the said liberties, privileges, franchises, rights, free customs, jurisdictions, or immunities be inconsistent with, or repugnant to, the laws of his majesty's kingdom of England, or any other the laws of the general Assembly of this province; and the aforesaid public buildings, accommodations, and conveniences in the said city, *That is to say*, The aforesaid City-Hall, or Stat-House, with the ground thereunto belonging, two Market-houses, the bridge into the dock, the wharves or dock, the said new burial place, and the aforementioned ferry, with their and every of their rights, members and appurtenances, together with all the profits, benefits and advantages which shall or may accrue and arise at all times hereafter, for dockage, or wharfage, within the said dock, with all and singular the rents, issues, profits, gains, and advantages which shall or may arise, grow, or accrue by the said City-Hall, or Stat-House, and ground thereunto belonging, market-houses, bridge, dock, burying place, ferry, and other the abovementioned premises, or any of them; and also, all and every the steets, lanes, highways and alleys within the said city of New York, and Manhattan's Island aforesaid, for the public use and service of the said Mayor, Aldermen and Commonalty of the said city, and of the inhabitants of Manhattan's Island aforesaid, and travellers there; together with full power, license and authority to the said Mayor, Aldermen, and Commonalty, and their successors for ever, to establish, appoint, order and direct the establishing, making, laying out, ordering, amending and repairing of all streets, lanes, alleys, highways, water-courses, ferry and bridges, in and throughout the said city of New York and Manhattan's Island aforesaid, necessary, needful and convenient for the inhabitants of the said city, and Manhattan's Island aforesaid, and for all travellers and passengers there: *Provided always*, That this said license so as above granted, for the establishing, making, laying out of streets, lanes, alleys, highways, ferries and bridges, be not extended or be construed to extend, to the taking away of any person or person's right or property, without his, her, or their consent, or by some known law of said Province. And for the considerations aforesaid, I do likewise give, grant, ratify, and confirm unto all and every the respective inhabitants of the said city of New York and of Manhattan's Island aforesaid, and their several and respective heirs, and assigns, all and every these veral and respective messuages, tenements, lands, and hereditaments, situate, lying and being in the said city, and Manhattan's Island, aforesaid, to them severally and respectively granted, conveyed and confirmed, by any the late Governors, Lieutenants, or Commanders-in-chief, of the said Province, or by any of the former Mayors, or Deputy Mayors and Aldermen of the said city of New York, by deed, grant, conveyance, or otherwise howsoever: *To hold* to their several and respective heirs and assigns for ever.

3. And I do by these presents, give and grant unto the said Mayor, Aldermen and Commonalty of the said city of New York, all the waste, vacant, unpatented and unappropriated lands, lying, and being within the said city of New York, and on Manhattan's Island aforesaid, extending and reaching to the low water mark, in, by and through all parts of the said city of New York, and Manhattan's Island aforesaid, together with all rivers, rivulets, coves, creeks, ponds, waters and water-courses, in the said city and island, or either of them, not heretofore given or granted, by any of the former Governors, Lieutenants, or Commanders-in-chief, under their or some of their hands and seals, or seal of the Province, or by any of the former Mayors or Deputy Mayors and Aldermen of the said city of New York, to some respective person or persons, late inhabitants of the said city of New York, or Manhattan's Island, or of other parts of the said province.

And I do by these presents, give, grant, and confirm unto the said Mayor, Aldermen and Commonalty o the said city of New York, and their successors for ever, the royalties of fishing, fowling, hunting, hawking, minerals and other royalties and privileges, belonging or appertaining to the city of New York, and Manhattan's Island aforesaid, (gold and silver mines only excepted,) to have, hold and enjoy all and singular the premises, to the said Mayor, Aldermen and Commonalty of the said city of New York, and their successors for ever, rendering and paying therefor unto his most sacred majesty, his heirs, successors, or assigns, or to such officer or officers, as shall be appointed to receive the same, yearly for ever hereafter, the annual quit-rent or acknowledgement of one Beaver skin, or the value thereof in current money of this province, in the said city of New York, on the five and twentieth day of March, yearly for ever.

4. And, moreover, I will, and by these presents do grant, appoint, and declare, that the said city of New-York, and the compass, precincts and limits thereof, and the jurisdiction of the same, shall from henceforth extend and reach itself, and may and shall be able to reach forth and extend itself, as well in length and in breadth as in circuit, to the farthest extent of, and in, and through all the said Island Manhattan's, and in and upon all the rivers, rivulets, coves, creeks, waters and water-courses, belonging to the same island, as far as low water mark. And I do also, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, firmly enjoin and command, that the aforesaid Mayor, Aldermen and Commonalty of the city aforesaid, and their successors, shall and may freely and quietly have, hold, use, and enjoy, the aforesaid liberties, authorities, jurisdictions, franchises, rights, royalties, privileges, exemptions, lands, tenements, hereditaments, and premises aforesaid, in manner and form aforesaid, according to the tenor and effect of the aforesaid grants, patents, customs, and letters patents of grant and confirmation, without the let, hindrance or impediment of me, or any of my successors, governors, lieutenants, or other officers whatsoever.

5. And also, I do, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, grant to the Mayor, Aldermen, and Commonalty of the said city of New York, and their successors, by these presents, that for the better government of the said city, liberties, and precincts thereof, there shall be forever hereafter within the said city, a Mayor and Recorder, Town Clerk, and six Aldermen, and six Assistants, to be appointed, nominated, elected, chosen and sworn, as hereinafter is particularly and respectively mentioned, who shall be forever hereafter called, *The Mayor, Aldermen, and Commonalty* of the City of New York; and that there shall be forever, one Chamberlain, or Treasurer, one Sheriff, one Coroner, one Clerk of the Market, one High Constable, seven sub-constables, and one marshal or serjeant at mace, to be appointed, chosen, and sworn in manner hereinafter mentioned.

6. And I do, by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs, successors, and assigns, declare, constitute, grant, and appoint, that the Mayor, Recorder, Aldermen, and Assistants, of the said city of New York, for the time being, and they which hereafter shall be the Mayor, Recorder, and Aldermen, and Assistants, of the said city of New York, for the time being, and their successors, forever hereafter, be, and shall be, by force of these presents, one body corporate and politic, in deed, fact, and name, by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York; and them by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, one body corporate and politic, in deed, fact, and name, I do really and fully create, ordain, make, constitute, and confirm by these presents; and that, by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, they may have perpetual succession; and that they, and their successors, forever, by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, be, and shall be, forever hereafter, persons able, and in law capable, to have, get, receive, and possess lands, tenements, rents, liberties, jurisdictions, franchises, and hereditaments to them and their successors, in fee-simple, or for term of life, lives, or years, or otherwise; and also goods and chattels; and also, other things, of what nature, kind, or quality soever; and also to give, grant, let, set, and assign, the same lands, tenements, hereditaments, goods and chattels; and to do and execute all other things about the same, by the name aforesaid. And, also, that they be, and forever shall be hereafter, persons able in law, capable to plead, and be impleaded, answer, and be answered unto, defend, and be defended, in all or any of the courts of his said majesty, and other places whatsoever, and before any judges, justices, and other person or persons whatsoever, in all and all manner of actions, suits, complaints, demands, pleas, causes and matters, whatsoever, of what nature, kind, or quality soever, in the same, and in the like manner and form as other people of the said province, being persons able, and in law capable, may plead, and be impleaded, answer, and be answered unto, defend, and be defende

by any lawful ways and means whatsoever; and that the said Mayor, Aldermen, and Commonalty of the said city of New York, and their successors, shall and may forever hereafter, have one common seal to serve for the sealing of all and singular their affairs and businesses touching or concerning the said corporation. And it shall and may be lawful to and for the said Mayor, Aldermen, and Commonalty of the said city of New York, and their successors, as they shall see cause, to break, change, alter, and new-make, their said common seal, when, and as often as to them it shall seem convenient.

7. *And further, know ye*, That I have assigned, named, ordained, and constituted, and, by these presents, do assign, name, ordain, and constitute, Nicholas Bayard, now Mayor, of the said city of New York, to be present Mayor of the said city; and that the said Nicholas Bayard, shall remain and continue in the office of Mayor there, until another fit person shall be appointed and sworn in the said office, according to the usage and custom of the said city; and as in and by these presents is hereafter mentioned and directed. And I have assigned, named, ordained, and constituted, and, by these presents, do assign, name, ordain, and constitute, create and declare James Graham, Esq. to be the present Recorder of the said city; to do and execute all things, which unto the said office of Recorder of the said city doth, or may in any wise appertain or belong. And I have assigned, named, ordained, and constituted, and by these presents, do assign, name, ordain, constitute, create, and declare John West, Esq, Town Clerk of the said city; to do and execute all things which unto the office of Town Clerk may in any wise appertain or belong. And I have named, assigned, constituted, and made, and by these presents, do assign, name, constitute, and make, Andrew Bown, John Robinson, William Beekman, John Delaval, Abraham De Peyster, and Johannes Kip, citizens and inhabitants of the said city of New York, to be the present Aldermen of the said city. And also, I have made, assigned, named, and constituted, and by these presents, do assign, name, constitute and make, Nicholas De Myer, Johannes Van Brugh, John De Brown, Teunis De Key, Abraham Corbit, and Wolford Webber, citizens and inhabitants of the said city, to be the present Assistants of the said city. And, also, I have assigned, chosen, named, and constituted, and by these presents, do assign, choose, name, and constitute, Peter De Lanoy, citizen and inhabitant of the said city, to be the present Chamberlain or Treasurer of the city aforesaid. And I have assigned, named, constituted, and appointed, and by these presents, do assign, name, constitute and appoint John Knight, Esq. one other of the said citizens there, to be present Sheriff of the said city, and have assigned, named, constituted, and appointed, and by these presents do assign, name, constitute, and appoint Jarvis Marshal, one other of the said citizens there, to be the present Marshal of the said city. And I do, by these presents, grant to the said Mayor, Aldermen, and Commonalty of the said city of New York, and their successors, That the Mayor, Recorder, Aldermen, and Assistants of the said city for the time being, or the Mayor, Recorder, and any three or more of the Aldermen, and any three or more of the Assistants, for the time being, be and shall be called The Common Council of the said city, and that they, or the greater part of them, shall or may have full power and authority, by virtue of these presents, from time to time, to call and hold common council, within the common council house, or City Hall of the said city: and there, as occasion shall be, to make laws, orders, ordinances, and constitutions, in writing; and to add, alter, diminish or reform them, from time to time, as to them shall seem necessary and convenient, (not repugnant to the prerogative of his most sacred majesty aforesaid, his heirs and successors, or to any of the laws of the Kingdom of England, or other the laws of the General Assembly of the Province of New York,) for the good rule, oversight, correction, and government of the said city and liberties of the same, and of all the officers thereof, and for the several tradesmen, victuallers, artificers, and of all other the people and inhabitants of the said city, liberties, and precincts, aforesaid, and for the better preservation of government, and disposal of all the lands, tenements, and hereditaments, goods and chattels of the said corporation; which laws, orders, ordinances, and constitutions, shall be binding to all the inhabitants of the said city, liberties, and precincts aforesaid; and which laws, orders, ordinances, and constitutions, so by them made, as aforesaid, shall be and remain in force for the space of three months, and no longer, unless they shall be allowed of, and confirmed by, the governor, and council for the time being. And I do further, on the behalf of his sacred majesty aforesaid, his heirs and successors, appoint and grant, that the said common council of the said city, for the time being, as often as they make, ordain, and establish such laws, orders, ordinances, and constitutions, as aforesaid, shall or may make, ordain, limit, provide, set, impose, and tax, reasonable fines and amerciaments against and upon all persons offending against such laws, orders, ordinances, and constitutions, as aforesaid, or any of them, to be made, ordained, and established as aforesaid, and the same fines, and amerciaments shall and may require, demand, levy, take, and receive by warrants under the common seal, to and for the use and behoof of the Mayor, Aldermen, and Commonalty of the said city, and their successors, either by distress and sale of the goods and chattels of the offender therein, if such goods and chattels may be found within the said city, liberties, and precincts thereof, rendering to such offender and offenders, the overplus, or by any other lawful ways or means whatsoever.

8. And I do, by these presents, appoint and ordain the assigning, naming, and appointment of the Mayor and Sheriff of the said city, that it shall be as followeth, (viz.) upon the feast day of Saint Michael the Arch-angel, yearly, the Lieutenant Governor or Commander-in-Chief, for the time being, by and with the advice of his council, shall nominate and appoint such person as he shall think fit to be Mayor of the said city, for the year next ensuing; and one other person of sufficient ability and estate, and of good capacity in understanding, to be Sheriff of the said city of New York, for the year next ensuing; and that such person as shall be named, assigned, and appointed Mayor, and such person as shall be named, assigned, and appointed Sheriff of the said city, as aforesaid, shall, on the fourteenth day of October then next following, take their several and respective corporal oaths, before the governor and council, for the time being, for the due execution of their respective offices as aforesaid; and that the said Mayor and Sheriff, so to be nominated, assigned, and appointed, as aforesaid, shall remain and continue in their said respective offices, until another fit person shall be nominated, appointed, and sworn, in the place of Mayor; and one other person shall be nominated and appointed in the place of Sheriff of the said city, in manner aforesaid. *And further*, That according to the now usage and custom of the said city, the Recorder, Town Clerk, and Clerk of the Market of the said city, shall be persons of good capacity and understanding, and such persons as his most sacred majesty aforesaid, his heirs and successors, shall, in the said respective offices of Recorder, Town Clerk, and Clerk of the Market, appoint and commissionate; and for defect of such appointments, and commissionating, by his most sacred majesty aforesaid, his heirs and successors, to be such persons as the Lieutenant Governor and Commander-in-chief of the said province for the time being, shall appoint and commissionate; which persons so commissionated to the said offices of Recorder, Town Clerk, and Clerk of the Market, shall have, hold, and enjoy, the said offices, according to the tenor and effect of their said commissions, and not otherwise. *And further*, That the Recorder, Town Clerk, Clerk of the Market, Aldermen, Assistants, Chamberlain, High Constable, Petty Constables, and all other officers of the said city, before they, or any of them, shall be admitted to enter upon and execute their respective offices, shall be sworn faithfully to execute the same, before the Mayor, or any three or more of the Aldermen for the time being. *And I do*, by these presents, for and on the behalf of his most sacred majesty, his heirs and successors, grant and give power and authority to the Mayor and Recorder of the said city, for the time being, to administer the same respective oaths to them accordingly. *And further*, I do by these presents, grant, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, that the Mayor and Recorder of the said city for the time being, and three or more of the Aldermen of the said city, not exceeding five, shall be justices and keepers of the peace of his most sacred majesty, his heirs and successors, and justices to hear and determine matters and causes within the said city and liberties, and precincts thereof; and that they or any three or more of them, whereof the Mayor and Recorder, or one of them, for the time being, to be there, shall and may forever hereafter, have power and authority, by virtue of these presents, to hear and determine all and all manner of petty larcenies, riots, routs, oppressions, extortions, and other trespasses and offences whatsoever, within the said city of New York, and the liberties and precincts aforesaid, from time to time, arising and happening, and which arise or happen, and any ways belonging to the offices of justices of the peace, and the correction and punishment of the offences aforesaid, and every of them, according to the laws of England, and the laws of the said Province; and to do and execute all other things in the said city, liberties, and precincts aforesaid, so fully and in ample manner, as to the commissioners assigned, and to be assigned for the keeping of the peace in the said county of New York, doth or may belong.

9. And, moreover, I do by these presents, for and on behalf of his most sacred majesty aforesaid, his heirs and successors, appoint, that the Aldermen, Assistants, High Constable, and Petty Constables, within the said city, be yearly chosen on the feast day of St. Michael the Arch-angel, forever, (viz.) one Alderman, one Assistant, and one Constable, for each respective ward, and one Constable for each division in the out-ward, in such public place in the said respective wards, as the Aldermen for the time being, for each ward, shall direct and appoint; and that the Aldermen, Assistants, and Petty Constables, be chosen by majority of voices of the inhabitants of each ward; and that the High Constable be appointed by the Mayor of the said city for the time being; and that the Chamberlain shall be yearly chosen, on the said feast day, in the said City Hall of the said city, by the Mayor and Aldermen and Assistants, or by the Mayor, or three or more of the Aldermen, and three or more of the Assistants of the said city for the time being. *And I do*, by these presents, constitute and appoint the said John West, to be the present Town Clerk, Clerk of the Peace, and Clerk of the Court of Pleas, to be holden before the Mayor, Recorder and Aldermen, within the said city, and the liberties and precincts thereof. *And further*, I do by these presents, for and on behalf of his most sacred majesty aforesaid, his heirs and successors, require and strictly charge and command, that the Sheriff, Town Clerk, Clerk of the Peace, High Constable, Petty Constables, and all other subordinate officers in the said city, for the time being, and every of them respectively, jointly and severally, as cause shall require, shall attend upon the said Mayor, Recorder, and Aldermen, of the said city, for the time being, and every or any of them, according to the duty of their respective places, in and about the executing of such the commands, precepts, warrants, and processes, of them and every of them, as belongeth and appertaineth to be done or executed; and that the aforesaid Mayor, Recorder and Aldermen, and every of them, as justices of the peace, for the time being, by their or any of their warrants, all and every person and persons for high treason or petty treason, or for suspicion thereof, or for other felonies whatsoever, and all malefactors and disturbers of the peace, and other offenders for other misdemeanors, who shall be apprehended within the said city, or liberties thereof, shall and may send and commit, or cause to be sent and committed, to the common gaol of the said city, there to remain and be kept in safe custody, by the keeper of the said gaol, or his deputy, for the time being, until such offender and offenders shall be lawfully delivered thence. *And I do*, by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, charge and require the keeper and keepers of the said gaol, for the time being, and his and their deputy and deputies, to receive, take, and in safe custody to keep, all and singular such person and persons so apprehended, or to be apprehended, sent, and committed, to the said gaol, by warrant of the said justices, or any of them as aforesaid, until he and they so sent, and committed to the said goal, shall from thence be delivered by due course of law.

10. *And further*, I do grant and confirm for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, that the said mayor of the said city for the time being, and no other (according to the usage and custom practised in the said city of New York, in the times of my predecessors, the several Lieutenants, Governors, and Commanders-in-Chief, of this Province,) shall have power and authority to give and grant licenses annually, under the public seal of the said city, to all tavern keepers, innkeepers, ordinary keepers, victuallers, and all public sellers of wine, strong waters, cyder, beer, or any other sort of liquors, by retail, within the city aforesaid, Manhattan's Island, or their liberties and precincts thereof; and it shall and may be lawful to and for the said Mayor of the said city, for the time being, to ask, demand, and receive, for such license, by him to be given and granted, as

aforesaid, such sum or sums of money, as he and the person to whom such license shall be given or granted, shall agree for, not exceeding the sum of thirty shillings for each license. All which money, as by the said Mayor shall be so received, shall be used and applied to the public use of the said Mayor, Aldermen, and Commonalty, of the said city of New York, and their successors, without any account thereof to be rendered, made or done, to any of the Lieutenants or Governors of this province, for the time being, or any of their deputies.

11. *And know ye*, That for the better government of the said city, and for the welfare of the said citizens, tradesmen, and inhabitants thereof, I do by these presents, for and on the behalf of his most sacred majesty, his heirs and successors, give and grant to the said Mayor, Aldermen, and Commonalty of the said city, and their successors, that the Mayor, Recorder, and Aldermen, or the Mayor and any three or more of the Aldermen for the time being, shall, from time to time, and all times hereafter, have full power and authority, under the common seal, to make free citizens, of the said city, and liberties thereof; and no person or persons whatsoever, other than such free citizens, shall hereafter use any art, trade, mystery, or manual occupation, within the said city, liberties, and precincts thereof, saving in the times of fairs there to be kept, and during the continuance of such fairs only. And in case any person or persons whatsoever, not being free citizens of the said city, as aforesaid, shall at any time hereafter use or exercise any art, trade, mystery, or manual occupation, or shall, by himself, themselves, or others, sell, or expose to sale, any manner of merchandise or wares whatsoever, by retail, in any house, shop or place, or standing within the said city, or the liberties or precincts thereof, no fair being then kept, in the said city; and shall persist therein after warning to him or them given, or left by the appointment of the Mayor of the said city, for the time being, at the place or places where such person or persons shall so use or exercise any art, trade, mystery, or manual occupation; or shall sell or expose to sale, any wares or merchandize, as aforesaid, by retail; then it shall be lawful for the Mayor of the said city for the time being, to cause such shop windows to be shut up, and also to impose such reasonable fine for such offence, not exceeding five pounds for every respective offence; and the same fine and fines so imposed, to levy and take by warrant under the common seal of the said city, for the time being, by distress and sale of the goods and chattels of the person or persons so offending in the premises, found within the liberties or precincts of the said city, rendering to the party or parties the overplus; or by any other lawful ways or means whatsoever, to the only use of the said Mayor, Aldermen, and Commonalty, of the said city of New York, and their successors, without any account to be rendered, made, or done, to the Lieutenants, Governors, or Commanders-in-Chief, of this province for the same: *Provided*, That no person or persons shall be made free as aforesaid, but such as are his majesty's natural born subjects, or such as shall first be naturalized by act of General Assembly; or shall have obtained letters of denization, under the hand of the Lieutenant Governor or Commander-in-Chief, for the time being, and seal of the province: and that all persons to be made free as aforesaid, shall and do pay for the public use of the said Mayor, Aldermen, and Commonalty, of the said city, such sum and sums of money as heretofore hath been used and accustomed to be paid and received on their being admitted freemen as aforesaid: *Provided*, it is not exceeding the sum of five pounds.

12. *And further*, I do by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, grant to the Mayor, Aldermen, and Commonalty, of the said city, that they and their successors be forever, persons able and capable, and shall have power to purchase, have, take, and possess in fee simple, lands, tenements, rents, and other possessions within or without the said city; to them and their successors forever, so as the same exceed not the yearly value of one thousand pounds per annum, the statute of Mortmain, or any other law to the contrary notwithstanding; and the same lands, tenements, hereditaments, and premises, or any part thereof, to demise, grant, lease, set over, assign, and dispose at their own will and pleasure; and to make, seal and accomplish, any deed or deeds, lease or leases, evidences or writings, for or concerning the same, or any part thereof, which shall happen to be made and granted by the said Mayor, Aldermen, and Commonalty, of the said city, for the time being.

13. *And further*, I do by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, grant to the said Mayor, Aldermen, and Commonalty, that they and their successors shall and may forever hereafter, hold and keep within the said city, in every week of the year, three market days, the one upon Tuesday, the other upon Thursday, and the other upon Saturday, weekly forever.

14. *And also*, I do by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs and successors, grant to the Mayor, Aldermen, and Commonalty, of the said city, that they and their successors and assigns, shall and may at any time or times hereafter, when it to them shall seem fit and convenient, take in, fill, and make up, and lay out, all and singular the lands and ground in and about the said city and Island Manhattan's, and the same to build upon, or make use of, in any other manner or way, as to them shall seem fit, as far into the rivers thereof, and that encompass the same, at low water mark aforesaid.

15. *And I do*, by these presents, for and on the behalf of his most sacred majesty aforesaid, his heirs, and successors, give and grant unto the aforesaid, Mayor, Aldermen, and Commonalty, of the said city of New York, and their successors, that they and their successors shall and may have, hold, and keep, within the said city, and liberties, and precincts thereof, in every week in every year forever, upon Tuesday, one Court of Common Pleas, for all actions of debt, trespass, trespass upon the case, detinue, ejectment, and other personal actions; and the same to be held before the Mayor, Recorder, and Aldermen, or any three of them, whereof the Mayor or Recorder to be one, who shall have power to hear and determine the same pleas and actions, according to the rules of the common law, and acts of general assembly of the said province.

16. *And I do*, by these presents, for and on behalf of his most sacred majesty aforesaid, his heirs, and successors, grant to the said Mayor, Aldermen, and Commonalty, of the said city of New York, and their successors, that the said Mayor, Aldermen, and Commonalty, of the said city, and their successors, shall have and enjoy all the privileges, franchises, and powers, that they have and use, or that any of their predecessors at any time within the space of twenty years last past, had, took, or enjoyed, or ought to have had, by reason, or under any pretence of any former charter, grant, prescription, or any other right, custom, or usage, although the same have been forfeited, lost, or have been ill used, or not used, or abused, or discontinued, albeit they be not particularly mentioned; and that no officer shall disturb them therein under any pretence whatsover, not only for their future, but their present enjoyment thereof; provided always, that the said privileges, franchises, and powers, be not inconsistent with, or repugnant to the laws of his majesty's kingdom of England, or other the laws of the General Assembly of this province as aforesaid. And saving to his most sacred majesty aforesaid, his heirs, successors, and assigns, and the Lieutenants, Governors, and Commanders-in-Chief, and other officers under him and them, in Fort James, in or by the city of New York, and in all the liberties, boundaries, extents, privileges thereof, for the maintenance of the said fort and garrison there, all the right, use, title, and authority, which they or any of them, have had, used, or exercised there; and, also, one messuage or tenement, next the City Hall; and one messuage by the Fort, now in the possession of Thomas Coker, gent. The piece of ground by the gate, called the Governor's Garden, and the land without the gate, called the King's Farm; with the swamp next to the same land, by the fresh water; and saving the several rents and quit rents, reserved, due, and payable, from several persons, inhabiting within the said city, and Island Manhattan's, by virtue of former grants to them made and given, and saving to all other persons, bodies politic and corporate, their heirs, successors, and assigns, all such right, title, and claim, possessions, rents, services, commons, emoluments, interest in and to any thing which is their's (save only the franchises aforesaid) in as ample manner as if this charter had not been made.

17. *And further*, I do appoint and declare, that the incorporation to be founded by this charter, shall not at any time hereafter do or suffer to be done, any thing by means whereof the lands, tenements, or hereditaments, stock, goods, or chattels thereof, or in the hands, custody, or possession of, any of the citizens of the said city, such as have been sett, lett, given, granted, or collected, to, and for pious and charitable uses, shall be wasted or misemployed, contrary to the trust or intent of the founder or giver thereof, and that such and no other construction shall be made thereof, than that which may tend most to advantage religion, justice, and the public good; and to suppress all acts and contrivances to be invented, or put in use, contrary thereunto. *In witness* whereof, I have caused these presents to be entered in the Secretary's office, and the seal of the said Province to be hereunto affixed, this seven and twentieth day of April, in the second year of the reign of his most sacred majesty aforesaid, and in the year of our Lord God, One Thousand Six Hundred and Eighty-six. THOMAS DONGAN.

May it please your Honer,

The Attorney General hath perused this PATTENT, *and finds nothing contained therein prejudicial to his Majestie's interest.* JAMES GRAHAM.

Recorded in Book of Patents No. 1, p. 278 to 309, in the office of the Secretary of State, at Albany.

The recorded copy is in the old fashioned way of writing and spelling.

The ACT of the Colonial Assembly of the Province of New York, which follows Dongan's Charter in chronological order, and the proceedings of the Governor, Council, and Assembly, therein entitled, "An Act for Regulating the Buildings, Streets, Lanes, Wharfs, Docks, and Allies of the City of New York," passed Oct. 1st, 1691, and confirmed by King William III., May 11th, 1697, is to be found in No. 1 of this volume, p. 3, and 3d column.

To his Excell'cy Coll. Henry Houton, Capt. Generall and Commander in Chiefe in and over their Majesties Province of New Yorke and Territories depending thereon.

The Peticon of the Mayor, Aldermen, and Comonalty of New Yorke.

Humbly offers to yo'r Excell'cy—

That Whereas in the time of the Governm't of Kenert and Stevenson, Governors of this Province under the States General. This Citty then called by the name of New Amsterdam was ruled by Burgormasters Schepens, and had all that time the benefit of the Weigh House; and in Governor Nicholls his time, as by the Articles of Surrender, the former priviledges of the Citty were confirmed and the Weigh house granted a Perquestise thereto belonging, and after in the year 1673 and so forward to November 1674, remained in the possession of the Citty, and all proffits arising therefrom accounted to the citty the better to enable them to maintaine there Fortifications; and Whereas by a Charter of Incorporation and Priviledges granted by Coll. Thomas Dongan, bearing date April the 27th, 1686, confirming to the Mayor, Aldermen, and Commonalty of the Citty and their successors, that they shall have and enjoy all the priviledges, ffranchises, That any of their Predecessors att any time within the space of Twenty years last past, had tooke or enjoyed or ought to have held by reason or under pretence of any former Charter, Grant, Prescription, or any other Right, Custome, or Usage, although they have bin at any time since disused or be not particularly mentioned therein.

Yet so it is for severall years past the Citty have not had the benefitt of said Weigh house, or received any of the Proffitts arising therefrom.

Wherefore pray that your Excell'ncy would be pleased to order said Weigh house with the Revenue and Proffitts thereof, for time to come, To be and remaine as of custome and right belong to the Mayor, Aldermen, and Comonalty of this Citty.

And your Petitions shall ever pray, &c.

The following Ordinance was this day Published att the Citty Hall after ye Ringing of three Bells, and ordered to be Recorded.

City of N. Yorke, } ss. An Ordinance of the Mayor, Recorder, and Aldermen, and Assistants, convened in Common Council, for the paveing of ye Streets, Lanes, and Alleys within this City.

For as much as the former Orders made for the paving of ye Streets, within this Citty Hath of late been much neglected, whereby the Citizens and Sojourners within the Citty are much Annoyed, and ye intercourse of trade amongst the Inhabitants thereby much Lessened, for Regulations whereof, The Mayor, Recorder, Aldermen and Assistants convened in Common Councill at the Citty Hall of the s'd Citty, did by these presents ordain, and itt is hereby ordained, that all and every ye Freeholders and Inhabitants that live within this Citty in the respective Streets, Lanes and Alleys hereinafter named and Expressed, shall after the publication hereof, and before the first day of August next ensueing, well and truly pave or cause well and truly (*paved*) to be paved, with good and sufficient pebble stones, suitable for paving at their own proper cost and charges, so much of the Streets, Lanes and Alleys hereinafter named, as shall Front the Respective buildings or lotts of Ground, that belongs to them respectively in the Streets, Lanes and Alleys hereinafter as aforesaid, according to the dimensions, quantity and proportion hereafter mentioned (that is to say) there shall be paved, in manner aforesaid, in the street commonly called ye Bridge Street, beginning at the cornerhouse of Lukes Kerkstead unto the house of Peter D. Lancy's, ten feet English measure from ye front of each house into the street. The whole street, from Peter D. Lancy's to the middle of the Broad street, by Farmers, from Mr. Cortlandt's corner house to the Citty Hall ten feet, ten feet from the Citty Hall to Martin Clock's, ten feet from Ditto corner to the Mayor's, inclusive, ten feet from Mrs. Lewises down to the Citty and so up to the corner of the Broad street, and soe down to the house of Albert Ring's, ten feet, the whole of Church street. The West side of the Broad street from Jacob Monney's up to Ben. Devall's ten feet, that ye Broadway be paved on both sides ten feet, down to Mr. Smith's on one side, and to ——— on the other, and that ye Beaver street be put in good repair ten feet on both sides. That the street going down from the Mayor's to Walkington's, be wholy paved That the street going to the French Church be wholy paved.—That Pearl street be put in good repair, and soe paved down to White Hall ten feet. That the street that Hull lives in be wholy paved. And that Eaght Jans, in the Broad street, pave wholy before her door, and that all ye Pav'd streets of this Citty be put in good and sufficient repair. And for the more Regular paving of the Respective Streets, Lanes, and Alleys, aforesaid, it is hereby Ordained, that an Alderman and one Assistant in each respective Ward within ye said Citty shall supervise and allott ye quantity of each respective pavement aforesaid, and direct that they be regularly done and accomplished within ye time aforesaid, and duly provided with proper decents for water cources, without annoyance to one or other. And it is hereby further Ordained, that if any Citizen, Inhabitant, or Freeholder as aforesaid, shall refuse, delay or neglect to make his or their proportionable pavement before their Buildings and Lotts of Ground, as aforesaid, within ye time aforesaid, shall, for such his default, forfeit the sum of Twenty Shillings Curr't money, to be leveyed by disstress, upon the goods and chattells of each Defaulter: the one half to the Informer, and the other half to the Treasurer, for the use of the Citty; and that the pavement aforesaid, may be more effectually done within the time limited, as aforesaid, be it further Ordained, that if any person or persons shall after such their Default as aforesaid, further neglect, refuse or delay (shall happen shall) to make their proportionable pavements as aforesaid, then, and in such case, the Alderman and Assistant of the Respective Ward where such neglect or Delay shall happen, shall take Care to provide Stones and other things necessary for the said Pavement, and cause the same to be speedily done; and the amount of the same shall be leveyed upon the Goods and Chattells of such further defaulter untill the same shall be sattisfyed, together with ye Costs and Charges that shall arise thereon, and a reasonable allowance to the said Alderman and Assistant for their attendance thereon; and all the Respective Citizens, Inhabitants, and Freeholders are hereby required to render an entire Complyance to accordingly.

—

The following Act was passed by the Assembly of the Colony of New York, in October 1695, was confirmed by King William, May 11, 1697, and continued a Law of the Province during the remainder of the time New York was under the British Government. This Act was confirmed by the Constitution in 1777,—was not repealed by the repealing act of the Legislature of the State of New York in 1787, which confirmed all the Colonial Laws which were not repealed by their titles;—was again confirmed by the Constitution of 1821; and finally repealed with all the Colonial Laws by the Revised Statutes in 1830.

—

An ACT against unlawful By-Laws and unreasonable Forfeitures. Confirmed by the King, 11th May, 1 97.

In all humble manner the representatives of this their Majesties' Province of New York, show and complain unto your Excellency, and their Majesties' Council, That the People of the City of New York, under color and pretext of their Charter, or custom, or both, have taken upon them to make and publish certain by-laws, orders, ordinances or regulations, whereby they forbid the bringing of anye Flour or Bread, for exportation, to New York, under the penalty of forfeiture of the same; which said city being the principal port of this

province for the sending forth the produce and manufacturage thereof, and the Chief Market within the same, they thereby not only prohibit the importation and selling such Flour and Bread at the same city, and obstruct and hinder all bolting of Flour and baking of Bread for exportation, which are lawful mysteries, crafts, and trades in all other parts of the province; but also arrogate to themselves the sole bolting, bakeing, using, making, and selling, of all such flour and bread, raised or to be produced within this Province; and under color and pretence of the said Orders, By-Laws, Ordinances, and regulations, have taken, condemned, and converted to their own uses, divers quantities of flour belonging to several of their Majesties' good subjects of this province—All which being contrary to Law, to the grievous damage and impoverishing of many of their Majesties' good people, and the said By-Laws and orders, are unreasonable, and of evil, dangerous, and pernicious consequence to all of their Majesties' subjects of this province—They therefore most earnestly pray that it may be enacted, and it is hereby enacted, by his Exelencey, the Council, and Representatives of their Majesties' Province, in General Assembly met and assembled, and by authority of the same, That the said pretended By-Laws, orders, ordinances, or regulations of the people of New York, made in the name of Mayor, Aldermen, and Commonalty of the city of New York, or in or by any other name or stile whatsoever, and every claim or thing in the same, or any other rule, order, or ordinance contained, in any wise concerning the restraint of bolting of Flour, Baking of Bread, or importing of Flour or Bread to New York aforesaid, OR CONCERNING OR RELATING TO THE PROHIBITION, OBSTRUCTION, OR HINDRANCE OF THE USEING, PRACTICING, OR ENJOYING OF ANY OTHER LAWFUL TRADE, MYSTERY, OR OCCUPATION, or against the importing in or to, or exporting from the city of New York, or any other lawful port in the province, any Wine, Corn, Flour, Bread, Flesh, Fish, Victuals, Wares, Merchandize, and all other things vendable and not, by the Common Law or Statutes of the realme prohibited; and all process, proceedings, judgements, and executions thereupon hereafter to be issued, ordered, entred, awarded, published, or executed, shall be entirely void and holden for none; and they are hereby declaired void and null to all intents and purposes whatsoever; any pretended by-law, order, ordinance, custom, usage, or practice, to the contrary hereof in any wise notwithstanding.

And further, Be it Enacted, &c., That if any time after the making and publishing this Act, any officer, minister, or other person or persons whatsoever, shall presume, by or under color of any such pretended by-laws, ordinances, or regulations, to take, seize, condem, or convert to his or their own uses, any flour, or other goods or merchandize whatsoever, not by Law prohibited at any time to be imported from the said city of New York, or any other lawful port in this province, *he, and they, and every of them shall forfeit to the owner of such flour, bread, and other goods or merchandize, treble the value of the flour, bread, or other gopds or merchandize, so to be taken, seized, condemned, or converted, as aforesaid, and also his treble costs, to be recovered by action of debt in any of the Majesties' Courts within this province, wherein no essoign protection or wager of Law, nor any more than one impartance shall be allowed,* Provided always, and it is the true intent and meaning of this Act, that no officer, minister, or other person or persons, shall at any time be impeached, prosecuted, condemned, troubled or disquieted, by virtue of this Act, or upon any construction or interpretation of the same, for any fact, matter or thing acted, done, perpetrated or committed at any time before the making or publication hereof; but that such officer, minister, or other person or persons, as to any such fact, matter or thing, heretofore acted, done, perpetrated, or committed, shall be and remain in such plight, state, and condition, as if this Act, and every clause therein contained, had never been made, any thing before herein expressed to the contrary hereof in any wise notwithstanding WM. III., pp 23 and 24, Law 1719, London Edition, Acts passed by the General Assembly of the Colony of New York, in March, July, and October, 1695.

Anne, By the Grace of God, of England, Scotland, France and Ireland, Queen, Defender of the Faith, &c.

To all to whom these presents may in any wise concern, Sendeth Greeting.

WHEREAS the Mayor, Aldermen, and Commonalty of the city of New York, by their petition to our right trusty and well beloved cousin Edward Viscount Cornbury, our Captain-General and Governor-in-Chief, in and over our Province of New York, and territories depending thereon in America and Vice Admiral of the same, &c. preferred in Council; therein setting forth, That they having a right and interest, under divers ancient Charters and Grants, by divers former Governors and Commanders-in-Chief of our said Province of New York, under our noble progenitors, in a certain ferry from the said province of New York, over the East River to Nassau Island, (alias Long Island.) and from the said Island to the said city again, and have possessed the same, and received all the profits, benefits, and advantages thereof, for the space of fifty years and upwards; and perceiving the profits, advantages, and benefits usually issuing out of the same to diminish, decrease, and fall short of what might be reasonably made of the same, for the want of the bounds and limits, to be extended and enlarged on the said island side, whereby to prevent divers persons transporting themselves and goods to and from the said Island Nassau (alias Long Island) over the said river, without coming or landing at the usual and accustomed places, where the ferry boats are usually kept and appointed, to the great loss and damage of the said city of New York; have humbly prayed our grant and confirmation, under the great seal of our said province of New York, of the said ferry, called the Old Ferry, on both sides of the said East River, for the transporting of passengers, goods, horses and cattle, to and from the said city, as the same is now held and enjoyed by the said Mayor, Aldermen, and Commonalty of the said city of New York, or their under tenant, or under tenants; and also of all that, the vacant and unappropriated land, from high-water-mark, to low-water-mark, on the said Nassau Island (alias Long Island) lying contiguous and fronting the said city of New York, from a certain place called The Wall-About, unto the Red-Hook, over against Nutten-Island, for the better improvement and accommodation of the said ferry; with full power, leave, and license to set up, establish, maintain, and keep one or more ferry or ferries, for the ease and accommodation of all passengers and travellers, for the transportation of themselves, goods, horses, and cattle, over the said river, within the bounds aforesaid, as they shall see meet and convenient, and occasion require; and to establish, ordain, and make bye-laws, orders, and ordinances, for the due and orderly regulation of the same: The which Petition we being minded to grant. *Know ye*, That of our especial grace, certain knowledge, and meer motion, we have given, granted, ratified, and confirmed, and in and by these presents, for us, our heirs, and successors, we do give, grant, ratify and confirm, unto the said Mayor, Aldermen, and Commonalty of the city of New York, and to their successors and assigns, All that the said ferry, called the Old Ferry, on both sides of the said East River, for the transportation of passengers, goods, horses, and cattle, over the said river, to and from the said city and island, as the same is now used, held, and enjoyed, by the said Mayor, Aldermen and Commonalty of the city of New York, or their under tenant or under tenants, with all and singular the usual and accustomed ferriage, fees, perquisites, rents, issues, profits, and other benefits and advantages whatsoever, to the said Old Ferry belonging, or therewith used, or thereout arising; and also, all that the aforesaid vacant and unappropriated ground, lying and being on the said Nassau Island (alias Long Island) from high-water-mark to low-water-mark aforesaid, contiguous and fronting the said city of New York, from the aforesaid place called the Wall-About, to Red-Hook aforesaid, *That is to say*, from the east side of the Wall-About, opposite the now dwelling house of James Bobine, to the west side of the Red-Hook, commonly called the Fishing Place, with all and singular the appurtenances and hereditaments to the same, or any part or parcel thereof belonging, or in any wise of right appertaining; together with all and singular the rents, issues, profits, ways, waters, easements, and all other benefits, profits, advantages, and appurtenances, which heretofore have, now are, and which hereafter shall belong to the said ferry, vacant land, and premises, hereinbefore granted and confirmed, or to any or either of them in any wise appertaining, or which heretofore have been, now are, and which hereafter shall belong, be used, held, received, and enjoyed; and all our estate, right, title, and interest, benefit and advantage, claim and demand of, in, or to, the said ferry, vacant land, and premises, or any part or parcel thereof, and the reversion and reversions, remainder and remainders; together with the yearly and other rents, revenues, and profits, of the premises, and of every part and parcel thereof; except and always reserved out of this our present grant and confirmation, free liberty, leave, and license, to and for all and every person or persons, inhabiting or having plantations near the said river, by the water side, within the limits and bounds above mentioned, to transport themselves, goods, horses and cattle, over the said river, to and from the said city of New York, and Nassau Island (alias Long Island) to and from their respective dwellings or plantations, without any ferriage or other account to the said ferry, hereby granted and confirmed to be paid or given; so always as the said person or persons do transport themselves only, and their own goods, and in their own boats only, and nor any stranger, or their goods, horses, or cattle, or in any other boat: *To have and to hold*, All and singular the said ferry, vacant land, and premises, hereinbefore granted, and confirmed, or meant, mentioned, or intended to be hereby granted and confirmed (except as is hereinbefore excepted) and all and singular the rents, issues, profits, rights, members, appurtenances, to the same belonging, or in any wise of right appertaining unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors and assigns for ever; to be holden of us, our heirs and successors, in free and common soccage, as of our manor of East Greenwich, in the county of Kent, within our kingdom of England; yielding, rendering, and paying unto us, our heirs and successors for the same, yearly, at our custom house of New York, to our collector and receiver general there for the time being, at or upon the feast of the nativity of St. John the Baptist, the yearly rent or sum of five shillings, current money of New York.

And we do further, of our especial grace, certain knowledge, and meer motion, for us, our heirs and successors, give and grant unto the said Mayor, Aldermen, and Commonalty, and their successors, full and free leave and license to set up, establish, keep, and maintain one or more ferry or ferries, as they shall from time to time think fit and convenient, within the limits and bounds aforesaid, for the ease and accommodation of transporting of passengers, goods, horses and cattle, between the said city of New York and the said island, (except as is herein before excepted) under such reasonable rates and payments as have been usually paid and received for the same; or which at any time hereafter, shall be by them established by and with the consent and approbation of our Governor and Council of our said province, for the time being. *And we do further*, of our especial grace, certain knowledge, and meer motion, give and grant unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors, full and absolute power and authority, to make, ordain, establish, constitute, and confirm, all manner of bye-laws, orders, rules, ordinances, and directions, for the more orderly keeping, and regularly maintaining the aforesaid ferry that is now kept, or any ferry or ferries which shall at any time or times hereafter, be set up, established, or kept, within the bounds aforesaid, by virtue hereof, or of, for, touching, or concerning, the same, (so always as the same be not contrary to our laws of England, and of our province of New York) and the same at all times hereafter to be put in execution, or abrogate, revoke or change, as they in their good discretion shall think fit, and most convenient, for the due and orderly keeping, regulating, and governing the said ferry or ferries herein before mentioned.

And lastly, our will and pleasure is, and we do hereby declare and grant, that these our letters patent, or the record thereof, in the secretary's office of our said province of New York, shall be good and effectual in the law, to all intents and purposes whatsoever, notwithstanding the not true and well reciting or mentioning of the premises, or any part thereof, or the limits and bounds thereof, or of any former or other letters patents, or grants whatsoever, made or granted; or of any part thereof, by us or any of our progenitors, unto any person or persons whatsoever, bodies politic, or corporate, or any law or other restraint, incertainty, or imperfection whatsoever, to the contrary in any wise notwithstanding, and although express mention of the true yearly value, or certainty, of the premises, or of any of them, or of any other gifts or grants by us or by any of our progenitors, heretofore made to the said Mayor, Aldermen, and Commonalty, of New York, in these pfesents, is not made, or any other matter, cause, or thing, whatsoever to the contrary in any wise notwithstanding. *In testimony* whereof, we have caused these our letters to be made patent, and the seal of our said province of New York, to our said letters

patent to be affixed, and the same to be recorded, in the secretary's office of our said province. *Witness* our right trusty and well beloved cousin, Edward Viscount Cornbury, Captain-General, and Governor-in-Chief, in and over our province of New York, aforesaid, and territories thereon depending in America, and Vice Admiral of the same, &c., in Council, at our fort in New York, the nineteenth day of April, in the seventh year of our reign. *Annoq.; Domini*, One thousand Seven Hundred and Eight.

The following Act is not among the Printed Colonial Laws. We copied it from the Manuscript Laws on file in the office of the Secretary of State, at Albany.

An Act to enable the Mayor, Aldermen, and Commonalty of the City of New York, to raise the sum of Five Hundred Pounds for altering the Course of the Common Sewer at the end of Broad street, and for Cleansing and Scouring the Dock of this City.

WHEREAS in the dock within the city of New York, violent sudden *raines* and the great confluence of water from several streets of the city unto the Broad street, and from thence into the dock, brings such large quantities of dirt, sand, and rubbish, ouze, and mudd which cettles and lodges itself in the Bason of the said dock, occasions an insupportable charge for cleansing and scouring of the same, for the future may be prevented by extending or altering the course of the passage of the said common sewer, to convey the same clear of the said dock into the East river. And, whereas, the public rents and yearly income of the said city are at present so small that they are not sufficient to defray the public and necessary charge thereof—to the end that the same dock, and wharf thereof, may be cleaned, scoured, and repaired, so as to make it serviceable for the receiving and harboring of vessels—Be it therefore Enacted by the Governor, Council, and General Assembly of the Colony, and it is hereby Enacted by the authority of the same, That it shall and may be lawful for the Mayor, Aldermen, and Commonalty of the City of New York, for the time being, in Common Council convened, any nine, whereof the Mayor and Recorder shall be two, to order the raising the sum of Five Hundred Pounds, current money in the Colony, by a tax upon the Freeholders and Inhabitants of the said city and county, within the term of one year next after the publication hereof; to be assessed, collected, and paid on or before the first day of September next ensuing; pursuant to which order of Common Council, so as aforesaid to be made, the Mayor of the said city shall forthwith thereupon issue out his Warrant to the Assessors and Collector of each respective Ward within the said city and county, requiring them to make such assessments and collection, and to pay the same to the Treasurer of the said city, for the time being, or to such other person or persons as the said Mayor, Aldermen, and Commonalty, or any nine of them, whereof the Mayor and Recorder be two, shall think fit to appoint for that purpose, in such convenient times as shall be agreed upon by the said Mayor, Aldermen, and Commonalty, or such nine of them as aforesaid, or such person or persons as shall be so, as aforesaid, appointed to receive the same, be paid to the uses hereinafter mentioned and expressed, and to no other use whatever; and accounted for in such manner and form as other public monies in the hands of former Treasurers of the said city have or ought to be accounted for. And be it further Enacted, by the authority aforesaid, That the said sum of Five Hundred Pounds to be raised by virtue of this act, shall be and is hereby appropriated to and for the carrying the said common sewer from the end of the said Broad street through the side dock into the East river, as the said Mayor, Recorder, Aldermen, and Commonalty shall think convenient; and for cleansing and scouring of the basin of said dock from all rubbish, ouze, *mudd*, and sand, so as to render it useful and serviceable for the harboring and sheltering of vessells, especially in the winter season; and for the repairing and mending of the public wharf of the said city. And be it further Enacted by the authority aforesaid, That it shall be in the power of the said Mayor, Aldermen, and Commonalty, or any nine of them, whereof the Mayor and Recorder be two, to appoint such person or persons as they shall see *fit*, to be overseers of the said work, and to purchase materials necessary, and agree with workmen, and to order the payment of the said money for the uses aforesaid, as they shall think *fit*.

City of New York, Die Sabbat, 27th April, 1717, in the 3d year of his Maj'y's Reign—General Assembly for the Colony of New York. This bill having been read three times, Resolved, The Bill do pass.

By order of the General Assembly.

N. NICOLL,
Speaker.

New York, the fourteenth day of May, 1717. I assent to this Bill enacting the same, and order it to be enrolled.

R. HUNTER.

The Streets and Avenues, up to and including Forty-second Street.

There has been great complaint made by the persons immediately interested in the Lands embraced in that portion of the Island within the limits we have stated above, in relation to the assessment proceedings; and these complaints are well founded, and we believe require legislative investigation.

There is great blame somewhere in these proceedings, and nothing short of a most thorough investigation will be satisfactory to the people.

We give below the Resolution under which these proceedings were commenced, the Report of the Street Committee upon that Resolution, and the subsequent action of the Board of Aldermen and Mayor of New York upon that Report.

This Report states, as will be seen, that the whole proceeding was to be had by one Board of Commissioners, that *nineteen-twentieths of the usual expense of opening streets in detail may be saved, and also to prevent Lots being twice or three times assessed for street opening.*

No authority it appears was given by the resolution for any application to the Supreme Court for the appointment of Commissioners. About thirty different sets, more or less, however, were appointed by that Court on application of officers of the Corporation, and twelve sets of these Commissioners were appointed on petitions filed in June, 1836. It will be recollected that from the 10th day of May to the 1st day of July, 1836, the City of New York was without a Common Council, the Board of Aldermen being at that time equally divided as to political parties, viz., 8 and 8; consequently no President was chosen in the Board of Aldermen, and no organization of that Board could be had until the President should be first chosen. This is a well settled matter—when it happens in Congress that the House of Representatives cannot elect a Speaker, (as was the case last year,) the Senate do no business, and the President withholds his annual message until the House is organized.

The chairman of the Street Committee of the Board of Assistant Aldermen, who signed the report below, has stated to us that the committee, at the time they signed the report, calculated that the whole expense of opening all the streets and avenues contemplated by the report, was estimated by them at about five thousand dollars at the outside.

These streets have been proceeded with in detail, of single streets, and parts of single streets, by which the expenses have been most enormously increased.

In May, 1840, notice was given by the commissioners appointed, as stated above, for an applicatian to the Supreme Court for the confirmation of the reports for the opening 29th, 30th, and 39th streets. These notices were published in *three newspapers, and not in four and in handbills as required by the Act of April* 20, 1839. See No. 1 of this Gazette, p. 15, § 9, of column 2.

Objections were made by two of the parties interested in 29th and 30th streets, to the confirmation of the assessments. These objections were argued before the court at the September special term, by Ward Hunt, Esq., of Utica, on the part of the objectors; and notwithstanding the non-compliance with the Law by the commissioners of 1839, the court confirmed the assessment without note or comment.

Since the confirmation as above, the two Boards composing the Common Council have each acted upon petition of the citizens in relation to this matter; and a committee from each Board met as a joint committee, or rather as two committees, to investigate the subject.—These committees held two meetings in the court room of the Assistant Vice-Chancellor, and Mr. Leonard, a highly respectable citizen, appeared before the committee, and stated that he was one of the commissioners appointed to make the estimate and assessment for opening 29th street, that one of his associates did not attend the meeting of the commissioners at all, that this associate commissioner was allowed the same fees as those who did attend, viz., $4 per day, amounting to several hundred dollars, which sum was included in the assessment. Mr. Leonard also stated the same fact as to the assessment for opening the Second Avenue from 29th to 86th street—that in that proceeding one of the commissioners received more than seven hundred dollars, and did not render a sixpence worth of service; which sum of $700, and more, was assessed upon the property. This is a fair specimen of the whole system.

The chairman of the Street Committee of the Board of Assistant Aldermen, who signed the report which is below, appeared before the committee, and made a lengthy affidavit in relation to this matter, in which he stated that he had proceeded to the office of the Clerk of the Supreme Court, at Albany, to examine the proceedings; and he also amplified and confirmed what is stated in the report, that the whole section was to be opened by one set of commissioners, &c., &c. This committee have not yet reported, and probably will not make a report, inasmuch as in that case they must report against their own officers.

"Board of Assistant Aldermen, April 6th, 1835.
By Mr Holden—
Resolved, That it be referred to the Street Committee to inquire into the expediency of Opening all Avenues and Streets (not all already opened) up to and including Forty Second Street.
Referred to Street Committee."

"JUNE 1st, 1835.

The unfinished business of the old Board was then taken up, and the various papers disposed of and referred to appropriate Committees, as follows:

Resolution to open Avenues and Streets up to and including 42d street. Referred to Street Committee."

"JULY 31st, 1835.

Mr. Townsend presented a report of the Street Committee in favor of the Resolution to open the Streets and Avenues up to and including 42d street, with the following exceptions:

1st, Such parts of the streets and avenues lying within the said limits, as have already been opened, either by deeds of cession from the proprietors thereof or by due course of law.

2d, Such parts of the avenues and streets as are contained within the limits of the public establishments at Bellevue.

3d, Such parts of Fortieth and Forty-first streets as lie between the Fifth and Sixth Avenues—it being understood these lands will be required by the Water Commissioners for uses connected with the Aqueduct.

4th, Such parts of the streets and avenues as are embraced within the lands occupied by the Managers of the House of Refuge for Juvenile Delinquents.

On motion of Mr. Ingraham, the Fourth Exception was stricken out, and the Report and Resolution were adopted and printed. (See Document No. 36.)"

—

The Street Committee to whom was referred the annexed resolution, which proposes to inquire into the expediency of opening all the streets and avenues, (not already opened) up to and including Forty-second street

RESPECTFULLY REPORT:

They have caused public notice to be given, of the pendency of the before-mentioned resolution, in the daily papers, in order that the most extensive information should be given to all parties concerned, as in a contemplated movement of such magnitude, it was desirable to obtain a very general expression of public opinion. The only remonstrances which have been presented against opening these avenues and streets, are but from a very small number of proprietors or lessees, whose interest is either limited in amount or of very short duration, while on the contrary an almost universal opinion is loudly expressed in favor of its consummation.

It is a well known fact, that all the lands, comprised within the limits before mentioned, viz.: up to 42d street, and indeed far beyond it, have for several years past been entirely laid out into town lots, bounded on the avenues and streets, and are at present held mostly in small parcels of a few lots, by a great variety of persons, many of whom are anxious to erect buildings, but are at present prevented from doing so, from their inability to obtain access to their property, without passing over the land of other persons, in consequence of the streets, on which their lots are bounded, not being opened.

This fact in the opinion of the Committee, has a very powerful bearing on this question, and is strongly indicative of the great expediency of an affirmative decision thereon.

No position would appear to be better sustained by reasons of sound public policy, than the constitutional authorities of the city should provide, in reasonable and proper time, that every citizen be furnished with the means of access to and enjoyment of his property, and in no other way can this be effected, than by their taking this legal measure, authorized by the statutes of the state, for the opening of streets and public thoroughfares.

The exceedingly rapid increase of our population, and the measures which have been taken to lay out and form public squares, have so much enhanced the value of lots in their vicinity, as to render it desirable for persons of lesser means, to turn their attention to situations somewhat more removed from the denser parts of the city, where lots can be purchased at such moderate prices as come within their means. And unless facilities by opening the streets are afforded, a very large proportion of those classes in society whose means of subsistence arise from their daily labor, will be compelled to locate themselves on the opposite shores of our rivers, instead of fixing their habitations in our more immediate suburbs.

There is however another very substantial reason offered, why the measure proposed, should embrace at one operation the whole extent contemplated, which is the great saving of expense which will thereby be produced. The amount involved, by proceeding in this business, with one general commission, will probably not exceed one twentieth part of the cost, which must unavoidably be incurred if it be suffered to progress in detail by particular sections, of individual streets; besides the much more reasonable assurance of equal justice being done to all parties, when the commissioners are placed in a situation which will enable them to take a general and comprehensive view of the results to be produced, by opening the streets, in a large section of the city, and their relative bearing each upon the other, than in the method heretofore generally practised, of opening special pieces in detail.

Instances are upon record of the same piece of property having been assessed a second and even a third time, for opening some portions of the street or avenue contiguous to it. Now, it is quite clear, that by substituting the general system of opening, as herein proposed, in lieu of the former practice, the expenses consequent thereon may be very much diminished, and this point is thought to be worthy of particular attention as any mode of proceeding which will lessen the amount of assessment on the property interested, is believed to be entitled to a very favorable consideration.

The Committee having fully discussed this matter, are decidedly in favor of the general proposition, as contained in the resolution; yet they still think that existing circumstances render it proper to make some exceptions from its operation, and these relate to the establishment at Bellevue for the poor, the lands occupied by the managers of the House of Refuge for juvenile delinquents, and the square between the fifth and sixth Avenues, and from 40th to 42d streets, originally intended for a Public Cemetery, but now proposed to be occupied as the site for the distributing reservoir by the Water Commissioners.

The reasons for the exceptions abovementioned are obvious, inasmuch as the opening of the avenues and streets through them will necessarily prevent the possibility of their being used for the purposes now designed.

Besides these properties belonging entirely to the public, these streets and avenues passing through them can be opened at any time free of expense.

In conclusion, the Committee report to the Board, that, in their judgment, it is expedient to open all the streets and avenues (not already opened) up to and including 42d street, with the exceptions abovementioned, and offer the following resolutions:

Resolved, That all the streets and avenues, as laid down on the Commissioners' map of the city, be opened up to and including 42d street, excepting,

1st, Such parts of the streets and avenues lying within the said limits as have already been opened, either by deeds of cession from the proprietors thereof, or by due course of law.

2d, Such parts of the avenues and streets as are contained within the limits of the public establishment at Bellevue.

3d. Such part of 41st street as lie between the fifth and sixth avenues, it being understood this land will be required by the Water Commissioners for uses connected with the aqueduct.

All which is submitted.

BENJ'N TOWNSEND,
M. VAN SCHAICK,
EDWARD CURTIS,
} *Committee on Streets.*

—

"AUGUST 5th, 1835.

BOARD OF ALDERMEN,

From the Board of Assistants.

A Report and Resolution of the Street Committee, That all the streets and avenues, as laid down on the commissioner's map of the city, be opened up to and including 42d street, &c. Referred to the Street Committee."

—

"NOVEMBER 14th, 1835.

The Street Committee, to whom was referred the Report of the Street Committee of the Board of Assistants, in favor of opening all the avenues and streets (not already opened) up to and including 42d street, presented a Report in favor thereof, which was laid on the table, and directed to be printed for the use of the members."

—

Document No. 36.

BOARD OF ALDERMEN,

November 4th, 1835.

The Committee on Streets, to whom was referred the Report from the Board of Assistants, on the subject of opening the Avenues and Streets, up to, and including 42d street, presented the following Report with Amendments thereto, which was laid on the Table, and directed to be printed for the use of the Members.

J. Morton, Clerk.

The Street Committee, to whom was referred a Report from the Street Committee of the Board of Assistant Aldermen, founded on a Resolution to inquire into the expediency of opening all the Streets and Avenues (not already opened) up to, and including 42d street, Respectfully Report:

They have given to the subject embraced by this resolution, that careful consideration which its importance demanded, and have arrived at the same conclusion as is contained in the Report made by the Street Committee of the Board of Assistant Aldermen, viz.: That they are decidedly in favor of the general proposition, as contained in the Resolution, yet they still think that existing circumstances render it proper to make some exceptions from its operations, and these relate to the establishment at Bellevue, for the poor.—The lands occupied by the managers of the House of Refuge, for Juvenile Delinquents, and the Square between the Fifth and Sixth Avenues, and from 40th to 42d streets, originally intended for a public Cemetery, but now proposed to be occupied as the site for the distributing Reservoir, by the Water Commissioners.

The reasons for the exceptions above mentioned, are obvious, inasmuch as the opening of the Avenues and Streets, will necessarily prevent the possibility of their being used for the purposes now designed. Besides these properties belonging entirely to the public, the Streets and Avenues passing through them, can be opened (if required) at any time free of expense. The Resolution as originally and unitedly Reported by the Street Committee of the Board of Assistant Aldermen, embraced all the exceptions recommended in the Report, and which were as follows:

"*Resolved*, That all the Streets and Avenues as laid down on the Commissioners' map of the City, be opened up to, and including 42d street, excepting

First. Such parts of the Streets and Avenues lying within the said limits, as have already been opened, either by deeds of cession from the proprietors thereof, or by due course of law.

Second. Such parts of the Avenues and Streets as are contained within the limits of the public establishment at Bellevue.

Third. Such parts of 41st street as lie between the Fifth and Sixth Avenues, it being understood this land will be required by the Water Commissioners for uses connected with the aqueduct.

Fourth. Such parts of the Streets and Avenues as are embraced within the lands occupied by the Managers of the House of Refuge for Juvenile Delinquents.

Your Committee fully agree in the views and opinions contained in the Report as above recited, and also the Resolutions as originally reported, embracing these four exceptions, three of which having been adopted by the Board of Assistants, the Committee would advise a concurrence therein, and the fourth will form a separate resolution for the decision of this Board, which if favorably entertained, it is believed will promote the public good, and preserve the usefulness of a valuable institution.

The House of Refuge in its operations is much more of a city than a state institution, and ten years of experience has proved its importance.

The subjoined statement, which is obtained from sources fully entitled to belief, will fully establish this opinion. It has received more than sixteen hundred children within its enclosures, fed and clothed them.—The City Authorities, viz.: The Court of Sessions, Police, and Commissioners of the Alms House, have committed more than fourteen hundred of the whole number. The remainder have been received from twenty-two other counties of the State, the United States Courts, and a few from Sing-Sing and Auburn, transferred by authority of the Governor of the State.

There have been indentured to farmers, mechanics, and to sea service, more than fourteen hundred children during the same period.

Towards the erection of buildings and support of the institution, the State Legislature has contributed most liberally, both in funds and the passage of laws in aid of this charity, as will appear from the following statement taken from the books of the institution, viz.:

From the State Treasury, - - -		$12,000
Marine Hospital Fund, passengers payments,		90,400
Tax on Theatres and Circuses, - -		10,250
Tax on Grocers Licenses, (law now repealed,)		9,232
Donations from Citizens of New York, -		21,000
Cash received for Labor of Children, -		25,008
Donation from the Manumission Society, towards building Refuge for Colored Children, - - - - - - - -		5,000
Making, - - - - - - - -		$175,890
From Corporation of New York,		
From Excise Fund, for State Law,	$16,000	
Donation towards Colored Refuge,	5,000	$21,000
		$196,890

It will be perceived by the foregoing account, that the Corporation of the City of New York have not

been called upon for much pecuniary aid; an appropriation of five thousand dollars granted more than a year since, to be paid on the erection and completion of a stone building forty by one hundred and fifty feet, for colored children, has recently been paid by the Comptroller, upon certificates furnished that the building was finished.

Your Committee are farther informed, and believe, that the building alluded to, has cost, including the stone wall enclosing it, upwards of twenty thousand dollars, and is now about to be occupied.

The number of children now upon the premises are two hundred and seventy, being two hundred boys and seventy girls. Your Committee have also been furnished with an official statement from the books of the institution, of the amount of expenditure by the Society for the Reformation of Juvenile Delinquents, for buildings, workshops, walls, &c., &c., upon these premises, amounting to $31,761 90-100, the details of which it has been considered not necessary to append.

Your Committee, attended by several members of the Board, have visited and closely inspected this establishment, and with much satisfaction noted the order, cleanliness, industry, and good discipline prevailing, and the children busily engaged in the workshops and schools.

Under these circumstances, the reflection naturally arises—Where would the 1100 little vagrants and rogues, *committed from this county*, have been, had not a Refuge been established? doubtless, the Penitentiary and State Prison would have been the habitation of most of them. The Committee cannot for a moment believe, that the Common Council would intentionally be the means of destroying this institution, or of materially injuring its usefulness. The Fifth Avenue, 24th and 25th streets would pass through these grounds, if opened, and would cause to be taken down the superintendent's and assistants' houses, a three story brick shop, a stone building 42 by 150 feet, of two stories high, occupied by the boys, about 20 feet of another stone building used for the same purpose, and 30 feet of another stone building occupied by the girls. The grounds thus separated and divided, and several of the buildings destroyed, the institution could not well be continued, or if it were continued, its usefulness must be very materially injured by its then circumscribed limits. Your Committee cannot believe that any greater inconvenience to the public will arise from excepting this site, than the exceptions heretofore made in favor of Washington Square and Union Place; both these enclosures prevent the direct passage of streets through them, and the inconvenience of passing around them, does not counterbalance the good arising from their being enclosed.

Your Committee also think this a proper occasion to state, that the proposition now under consideration before the Committees of Streets, and Public Lands and Places, of this Board, to set apart for public uses a space of ground, which includes the land occupied by the Managers of the House of Refuge, and which proposition appears generally to be very favorably entertained, is another powerful reason for excluding this land from the operation of opening the streets through it: And although the Committee are of opinion the time is not very far distant when it will be expedient to remove this very valuable institution farther from the compact part of the city, yet they still think the public good does not, at this time, require the passage of the Fifth Avenue and 24th and 25th streets through the lands occupied by the Managers of the House of Refuge for Juvenile Delinquents, and beg leave to offer the following resolution:

Resolved, That the Board concur with the Board of Assistants in the resolution adopted by them, viz.: That all the streets and avenues, as laid down on the Commissioner's map of the city, be opened up to and including 42d street, excepting,

1st. Such parts of the streets and avenues lying within the said limits as have already been opened either by deeds of cession from the proprietors, or by due course of law.

2d. Such parts of streets and avenues as are contained within the limits of the public establishment at Bellevue.

3d. Such parts of 41st street as lie between the Fifth and Sixth Avenues, it being understood these lands will be required by the Water Commissioners for uses connected with the aqueduct—and the following additional resolution is offered for the consideration of the Board:

Resolved, If the Board of Assistant Aldermen concur, That such parts of the Streets and Avenues as are embraced within the lands occupied by the Managers of the House of Refuge for Juvenile Delinquents, be excepted from the operation of the order to open all the Streets and Avenues up to and including 42d street.

Respectfully submitted.

FRAS. FICKETT, SAMUEL PURDY, EDWARD TAYLOR, } *Committee on Streets.*

—

DEC. 14th, 1835.

A motion was made that Document, No. 36, be called up, being the report of the Street Committee of the Board of Assistants, relative to opening the streets and avenues up to and including 42d street, amending the same by excepting the streets and avenues occupied by the House of Refuge from said operations, which having been read, a motion was made that the Board go into a committee of the whole, which was agreed to, when Alderman Labagh, by request, took the chair. After considerable debate had thereon, the committee, by the Chairman, asked leave to rise, and reported that they had considered the same and recommended the adoption of the said report without amendment, whereupon the President resumed the chair, and put the question on adopting the report, which was carried in the affirmative, and directed to be sent to the Board of Assistants for concurrence.

—

BOARD OF ASSISTANTS.

Dec. 21st, 1835.

Papers from the Boa d of Aldermen.

Report of the Street Committee relative to opening the streets and avenues up to and including 42d street. Referred to Street Committee.

—

JAN. 25th, 1836.

Mr. Ingraham called up Document, No. 36, being a report of the Street Committee in favor of opening the streets and avenues up to and including 42d street, together with Document, No. 35, of the Board of Aldermen, being a report of the Street Committee of that Board on the same subject, with the following additional resolution, adopted by the Board of Aldermen, and sent to this Board for concurrence.

Resolved, If the Board of Assistant Aldermen concur, that such parts of the streets and avenues as are embraced within the lands occupied by the managers of the House of Refuge for juvenile delinquents, be excepted from the operations of the order to open all the streets and avenues up to and including 42d street.

Mr. Ingraham called for the reading of the Petition of Isaac M. Wooley and others, owners of land on the 5th avenue, requesting to have the avenue opened through the ground of the House of Refuge and up to 129th street. The petition was accordingly read, and referred to the Road Committee.

The Board proceeded to consider the resolution of the Board of Aldermen, in favor of excepting the House of Refuge from the proposed opening of the 5th avenue. Mr. Ward obtained leave to be excused from voting, and the resolution was concurred in.

—

BOARD OF ALDERMEN.

February 1st, 1836.

Papers from Board of Assistants.

A resolution non-concurring in the additional resolution of this Board, to the report of the Street Committee, on opening all the streets and avenues up to and including 42d street, by excepting the ground, &c. occupied by the House of Refuge, adopted by this Board on the 14th Dec. last, was, on motion, laid on the table.

—

FEBRUARY 8th, 1836.

Document, No. 36, of the Board of Assistants which was laid on the table, was called up. It being the report to open the streets and avenues up to and including 42d street, with an additional resolution passed by this Board. A motion was made to lay the same on the table; after some debate, the motion to lay on the table prevailed.

—

"FEBRUARY 15th, 1836.

A motion was made to call up Document No. 36, being the report of the Street Committee of this Board, on the report of the Board of Assistants, on the subject of opening the avenues up to and including 42d street, which report was adopted, together with an additional resolution, and as amended, sent to the Board of Assistants, who non-concurred in the amendment, and come back to this Board, and laid on the table, on the 1st instant, was read, a motion was then made that this Board recede from their additional resolution, which motion was adopted, the report passed, and directed to be sent to His Honor the Mayor for approval.

Approved by

CORNELIUS W. LAWRENCE, Mayor.

Feb. 18th, 1836.

CITY CONVENTION.

The three following articles we have copied from the New York American of 1829. The first is editorial, and the other two over the signature of "Third Ward," were written by our highly esteemed fellow citizen, Samuel Stevens, Esq., the President of the Board of Water Commissioners:—

City Convention, May 4th, 1829.—The Common Council are, it is understood, this evening to discuss the question of a Convention of the people, in order to consider of an alteration of the City Charter. It seems to be conceded on all hands that something is required to be done; but how the proposed object is to be attained is the difficulty. To us the case seems clearly one that, in the true spirit of our institutions, should be referred to the people. Hence we are quite in favor of the Convention proposed to be called, in which delegates chosen from the respective wards shall assemble, and adopt such amendments and alterations as the public good shall require—and be authorized to transmit the result of their proceedings to the Legislature, in order that a law may be passed in conformity thereto. We particularly approve that part of the proposed scheme of a Convention which puts it in direct communication with the Legislature, without the intervention of the Corporation. They should, as a Corporation, have nothing to do with it. When did any body ever consent to curtail its own powers—lessen its own patronage—admit its own insufficiency?

Yet all these things must the Corporation be expected to do before they could approve the propositions which, without doubt, any convention for reforming the City Charter will present, in regard to what are justly deemed defects on those particular points. It is, then, precisely because the Common Council are not to have a voice in the proceedings on this subject, that we think them most likely to lead to the desired results, and therefore most entitled to popular favor.

The above taken from the American, May 4th, 1829.

—

(*For the New York American.*)

THE CONVENTION.

I am one of those who believe that innovations in our institutions have caused the State about as much evil as good, and therefore look at the proceedings of the City Convention with apprehension, lest in their zeal to innovate, they adopt a system not necessary, or adapted to our customs and modes of doing business; and therefore not acceptable to the *legal representatives* of the people nor to the people themselves. The result of which will be, either the rejection of the system, and the consequent loss of the opportunity of benefiting the city, or the adoption of a plan not suited to the wants of this metropolis. I have been led to these remarks by hearing the discussion and adoption of the seventh section to compel "the attendance of absent members, to punish members for disorderly behaviour and to expel members." The provision in the charter of Gov. Dongan, though 140 years old, authorizing the infliction of a fine of twenty shillings on a member who makes default in attendance, when legally noticed, has not only a legal provision, and a provision for carrying it into effect absolutely necessary, but an adaptation to our present wants far exceeding the modern section adopted by the Convention. Let it not be said that the Convention are making a *constitution*, and therefore it is not necessary to go into all its legal provisions. Not so. They are framing a statute for the enactment of the legislature; and if it does not contain the necessary provisions to carry it into effect, the section of the constitution (so called) will be idle and use-

less. How is the first clause of the section to be carried into effect? Is each Board to appoint a Sergeant-at-Arms? Is he to be sent with a mace or warrant to the apprehension of an absent member? To authorize the first, must not a section be introduced giving to the two Boards the common law powers and usages of Parliament, or at least so much of them *as are possessed and exercised by the United States* Congress, or the learned gentlemen supporting this resolution, will not say that a city incorporation possess *these powers* by intendment? Can a warrant be issued? Their corporate seal has never arrested or committed a citizen, and if they have such powers, must they not be conferred by the express letter of the statute? It may be asked, would the Legislature confer such powers, which append of right only to bodies possessing the sovereignty of the people? Is the provision intended to remedy an evil? It cannot be pretended that members do not attend the meetings of the Board; so generally has this duty been performed, that there is no recollection of the fine of twenty shillings ever having been inflicted. But I may be told that Congress have this power by the Constitution!!! Ye Gods! what an argument! The attributes, proper for a tribunal possessing the sovereignty of a nation, compared with those of an incorporation for the enforcement of City regulations, all of which emanate from a State Legislature, who even regulate the hours for opening our markets and the rate of ferriage for eggs. But if we mean to follow the Constitution of the United States, why leave out the concluding clause, "in such manner and under such penalties, as each house may provide?" It would be certainly going the *whole hog*, to have conferred such powers on an incorporation; and the means of enforcing them are, therefore, entirely omitted. We next come to the second clause of the section, "each Board to punish members for disorderly behaviour." If the first section is objectionable for its ambiguity and inoperativeness, much more so is the second. A right to punish! How?—is it to be by stripes or fine, or imprisonment in the Bridewell or Penitentiary, or can the Board introduce any foreign or new mode of punishment? And are these punishments to be in lieu of, or an accumulation of the punishments inflicted by existing statutes against persons guilty of disorderly conduct? Now we venture to predict, that all the statutes of the State may be ransacked, even including those of the *revised* laws, without finding a precedent for such loose legislation, either as to the punishment prescribed (or rather not prescribed) or as to the definition of the crime. We next come to the power "to expel a member," which I apprehend to be the most objectionable feature in the section. It is not called for by the exigencies of the city. Two instances have been referred to—one, of a member committing a crime, and the other some breach of the peace after adjournment. Now, as respects the first instance, the individual fled the city, and thereby vacated his seat, which was supplied by a new election; and in the other, the disturbance was after adjournment, and therefore not affecting the dignity of the Corporation; but supposing it had been during the meetings of the Board, are not the powers of members and magistrates to commit all sufficient? The same power which keeps order in a church or any assembly, is sufficient for all practical purposes—and the theory of the section is not suited to a body like the city Corporation. The power is liable to be abused—warm party times may expel a zealous opposing member of the minority, and perhaps from little other cause than that he fearlessly does his duty. To expel a member for the commission of frauds or of crimes would be constituting the Corporation a legal tribunal for the examination of witnesses, and hearing parties by themselves or by counsel.

The evil is corrected by the almost certain absence of a person really criminal, but if not, a remedy not adverted to in the Convention, a mandamus from the Supreme Court, to show cause why the seat of a member should not be vacated, presents, in some cases, another remedy; and, if you add to this, that *sovereign republican* remedy applied by the people, in the frequent recurrence of elections, you have all that is necessary; and this is done without the necessity of introducing any objectionable feature, the power to expel a representative of the people. But it was said in the Convention that the Corporation have this power, and the section only retains it. But this is not so. Neither charter nor statute ever conferred such powers on them; nor has any member been expelled, and no legal gentleman will pretend that an incorporation has other powers than those expressly conferred. Will it be pretended that the incorporations in Wall street can expel their Directors? It would be at least a new doctrine. The corporation is not a Legislative body. The laws emanate from the State, though they sometimes appear as ordinances of the Corporation, they are in reality the duplicates or counterparts of the State law, authorizing the same; and they can be said no more to make these laws, than a Sergeant-Major can be said to make or give orders, when he communicates the orders of his Colonel. These remarks have already extended to a span beyond their merits. But when all the editors of the city appear to proclaim "*the work goes bravely on*," and when no disposition is manifested to scrutinize the acts of these gentlemen *conventionists*, I cannot but apprehend that some of the changes and alterations may be found highly objectionable. A free discussion, both *in* and *out* of the Convention, will enable the members to draft the best system of laws for the city government. We know the evils of the present system—those of futurity we are yet to experience.

THIRD WARD.

—

For the New York American.

THE CITY CONVENTION.

I offer you again, Mr. Editor, a few remarks on the proceedings of this body. It appears the Recorder is to be excluded from the Council board, and that the Aldermen are to be excluded from the bench of Criminal Courts, and, I suppose also from the bench of the Common Pleas; though I do not perceive that the fact of their being judges of this is adverted to. In relation to the office of Recorder, I cannot but think the Convention legislate against the incumbent, rather than for posterity. The moving spirits at Albany acted on the same principle when they destroyed the late judiciary; and the advantages of a system sunk into insignificance, when weighed with the gratification of removing incumbents. All the municipal charters of the state have their state officers, and ex-officio members; and like officers are introduced into many of our moneyed institutions. The state would probably be unwilling not to be, in some degree, represented; but if they would be satisfied to have the Recorder a sitting member, and not to vote, (like the delegates in Congress) except, perhaps, in case of a tie when presiding, I think there could be no objection to his so remaining. The other members have a right to expect much information from a Recorder; and the plan proposed would divest the office of its electioneering and caucus character, which has stripped it of all its respectability. But I would suggest one query: That as the constitution of the state guarantees to him his office for five years, whether he can be legislated out of office—his being a judge of the Sessions being rather appendant to the office, than the office itself? Against the proposition to deprive the Aldermen of being judges in the Common Pleas, and the Criminal Courts, many good reasons can be offered. It is said the Aldermen legislate, and should not sit in judgment upon their own laws. Now the Aldermen do not legislate. We have but one legislature in the state, and it sits at Albany; and the law adjudicated upon in the Sessions, in relation to the fire limits, (referred to in the Convention) is a state law. No corporation ordinance is ever adjudicated upon in the Sessions, or out of it, by the Aldermen. If this is true, the main argument fails. But there are arguments in favor of the system; and first, it is in conformity to our criminal code as applicable to all parts of the state. No person can be tried and executed in the state, excepting by a court composed of a judge of the Supreme Court or Circuit, and three of the judges of the Common Pleas. Now, these Judges in the incorporated cities are, a first Judge and the Aldermen, and if the Oyer and Terminer is to be composed without them, we shall see a person tried for his life at Brooklyn, by a bench composed of the Circuit or Supreme Court Judge, and the Judges of the Common Pleas, while on this side of the river the court would be differently composed, and probably with but one judge. If it is improper for the city magistrates, the Aldermen, to sit upon the bench of the Criminal Courts, then it is also improper for the county magistrates, the Judges of the County Courts, to compose part of such tribunals. But it is said that the Aldermen are not required to sit on the Sessions. They there divide a very enormous and almost unlimited power, making up the sentences whether the same relate to the amount of a fine or imprisonment, which varies for the same offence from a day in Bridewell to three years in the Penitentiary. In other courts the Judge has but to apply the law to the verdict, but in this court the law vests, I may say, everything in the *Court;* they render the verdict void by a fine of six cents or one day's imprisonment, or they extend the punishment to an imprisonment of three years and a heavy fine. The crimes and misdemeanors here tried are so various, and such different shades, that it leaves much of the duty of a jury to be performed by the court. And many a Judge, learned in the law, might preside in that court totally unfit to perform the duties of apportioning and graduating the punishment for a list of crimes, for mere vagrancy up to forgery and burglary. But again, the Aldermen hold a minor court—Special Sessions, established in all the counties of the state. This court tries vagrants, and persons guilty of petty offences, without a jury; is it proposed also to break up this court? It would not be acceptable to the people if held by one Judge without a jury; introduce a jury, you get rid of all the advantage of a speedy disposal of these cases, and the consequent clearing of the city prison, which is now the peculiar advantage of the court. Seven hundred persons were last year committed as vagrants. No tribunal is more proper to judge of the cases than the Special Sessions as now constituted. Again, the Aldermen, in their character of Judges of the General Sessions, appoint (by the constitution) the Clerks of Oyer and Terminer and General Sessions. And the Aldermen as Judges of the Common Pleas, appoint the District Attorney. Now, the constitution never intended the appointments to be made by a court with a single Judge, but by the Aldermen, the *elected representatives* of the people. The Convention appear to be disposed to frame a government on the plan of an original or first compact, or an organization, of a civilized community, for the first time brought together, and who have no *valuable institutions* of their own. The plan will have all the advantages which novelty can afford to a city government. But if it should ever be matured into a law (of which however at present there appears but little probability, (our poor *Burgomasters and Schepens* will not know whether they stand on their feet or their heads, when they have in their good city of New Amsterdam, one Board, composed of the Mayor and his *veto*—another of the Aldermen—another of the Assistants—and another of "*City Commissioners.*" I make these remarks now, Mr. Editor, and do not wait, as your correspondent of last evening suggests ought to be the case, for the completion, or finishing stroke of the Convention. I make them in the hope that the Convention will not only pause, but *retrograde;* for, if not, they may possibly have amused themselves, but their works will never benefit the community.

Constitute two boards which a vote of the people will approve; the checks and delays of proceedings follow of necessity. The jealousy between the two houses create in the departments all the influence and power which it is proper they should possess. But the attempt of the Convention to break up our system from the foundation, not leaving one stone upon another, will be worse than useless; for it would be riveting on the city the evil of a single body for many years yet to come.

THIRD WARD.

—

PRESIDENT HARRISON'S INAUGURAL.

"But if there is danger to public liberty from the acknowledged defects of the Constitution, in the want of limit to the continuance of executive power in the same hands, there is, I apprehend, not much less from the misconstruction of that instrument, as it regards the powers actually given. I cannot conceive that, by a fair construction, any or either of its provisions would be found to constitute the President a part of the legislative power. It cannot be claimed from the power to recommend, since, although enjoined as a duty upon him, it is a privilege which he holds in common with every other citizen. And although there may be something more of confidence in the propriety of the measures recommended in the one case than in the other, in the obligations of ultimate decision there can be no difference. In the language of the Constitution, 'all the legislative powers' which it grants 'are vested in the Congress of the United States.' It would be a solecism in language to say that any portion of these is not included in the whole.

It may be said, indeed, that the Constitution has given to the Executive the power to annul the acts of the legislative body, by refusing to them his assent. So a similar power has necessarily resulted from that instrument to the Judiciary, and yet the Judiciary forms no part of the Legislature. There is, it is true, this difference between these grants of power; the Executive can put his negative upon the acts of the Legislature for

other cause than that of want of conformity to the Constitution, while the Judiciary can only declare void those which violate that instrument. But the decision of the Judiciary is final in such a case, whereas in every instance where the veto of the Executive is applied, it may be overcome by a vote of two-thirds of both houses of Congress. The negative upon the acts of the Legislative, by the Executive authority, and that in the hands of one individual, would seem to be an incongruity in our system. Like some others of a similar character, however, it appears to be highly expedient, and if used only with the forbearance, and in the spirit which was intended by its authors, it may be productive of great good, and be found one of the best safeguards to the Union.

I consider the veto power, therefore, given by the Constitution to the executive of the United States, solely as a conservative power. To be used only, 1st, to protect the Constitution from violation; 2dly, the people from the effects of hasty legislation, where their will has been probably disregarded or not well understood; and, 3dly, to prevent the effects of combinations violative of the rights of minorities."

To the Commissioners of Estimate and Assessment for opening 29th street. } In the matter of opening 29th street in the 16th Ward of the city of New York.

Gentlemen,

We object to your award for damage and benefit on our property, situate on the 8th avenue and including 29th street, because—

1st, The proceedings have been so long delayed, that a valuation at the present depressed prices of real estate is unjust and inequitable, inasmuch as there are no established data upon which any reasonable calculation can be grounded, and especially where the improvement is not required.

2d, That we are deprived of a piece of ground fronting 60 feet in the public avenue, by 300 in depth, fairly worth, in ordinary times $1000, and are charged $121 in addition, to accommodate with an opening to the 8th avenue, a piece of ground 100 feet in breadth in the rear of our property, inasmuch as the eastern 400 feet of the block can seek its outlet to the 7th avenue.

3d, Because public *necessity* does not require the opening of 29th street.

4th, Because public *convenience* does not require the opening of said street.

5th, Because the persons interested in the property assessed have not applied or petitioned for the opening of 29th street.

6th, Because the opening of 29th street has not been legally authorized by the Mayor, Aldermen, and Commonalty in Common Council convened, as your objectors are informed and believe.

7th, Because the opening of 29th street and the proceedings had in relation thereto by the Board of Aldermen and Board of Assistant Aldermen, possessing the legislative powers of the Corporation of the city of New York, your objectors have been informed, are illegal and not such as is required by the law of the state of New York and the amended charter of the city of New York.

8th, Because the Board of Aldermen and Board of Assistant Aldermen, composing the Common Council of the city of New York, have, as your objectors are informed and believe, proceeded in this matter without having first published the report of the Committees of the respective Boards, which recommended the improvement as required by law and the charter of the city, and without complying with its provisions by calling the ayes and noes in either Board where the report was adopted, recommending, or when the resolution was passed, authorizing the improvement; and that the same was not published in the newspapers employed by the Corporation under the authority of the Common Council.

9th, Because the application by the counsel of the Mayor, Aldermen, and Commonalty of the city of New York to the Supreme Court for the appointment of commissioners, was ex parte, in consequence of the informality of the proceedings of the Board of Aldermen and Board of Assistant Aldermen, as your objectors are informed and believe.

10th, Because the Corporation of the city of New York have no power by the charter of said city to assess private property for public improvements, and that the only power now exercised by the Common Council of the said city is conferred by statute and regulated by statute.

11th, Because the fees of the Commissioners of estimate and assessment are, as your objectors are informed and believe, greater than are allowed by law, and that parts of days have been charged as whole days by some of the said Commissioners.

12th, Because the proceedings of the Common Council in this matter have been dilatory and expensive; the first proceedings had been completed, as your objectors are informed and believe, in the month of February, 1836, more than four years ago.

Signed, } ABEL T. ANDERSON, ISAAC A. JOHNSON.

City and county of New York, ss Abel T. Anderson and Isaac A. Johnson being duly sworn, do depose and say, that in their opinion the foregoing objections are true in substance and matter of fact.

Sworn, this 27th day of May 1840, before me, } Signed } Abel T. Anderson, Isaac A. Johnson.

WATSON VAN BENTHUYSEN,
Commissioner of Deeds.

ASSESSMENT ABUSES.

On the Street Commissioners' sale book of 1838, is to be seen the following statement of sale of thirty-six lots for assessments. We will venture to say, that had this piece of land been assessed as one piece of ground, the amount of assessment would have diminished one half; and had it been sold as one piece of land, the cost of sale, &c., would have been reduced thirty-five thirty-sixths of the amount of costs and fees, and interest on cost and fees.

We procured from the Legislature, at the last session, an alteration in the law as respects advertising and selling lots for unpaid assessments, which remedies the mischief as to advertising and selling, but not as to assessing. See No. 1 of this Gazette, p5. 7 col. 2 sec. 3. This act was passed by a unanimous vote of the Senate and Assembly.

One piece of land, held in one body, and belonging to the same owners, was assessed in Thirty-first street. The assessment was confirmed in 1837, January 9th.

36 lots were assessed	$4 50½ cts. each,	162 18	
4 do. do.	2 44	9 76	
			$171 94
			25 93
			$197 87
The costs made in selling these lots were			
$2 for 1st advertisement, *each lot*,	80		
$3 for 2d do.	120		
$3 for each certificate or rect to each purchaser, -	120		
$4 for each lease, -	160		
	$480		
20 per cent. per annum interest on this, cost for 1 year 11 months and 28 days,	191 50		
	671 50		
13 per cent. extra interest on the assessment of interest due at the time of sale,	87 29		
	$758 79	758 79	
			$956 66

THE CONFISCATED DISTRICT.

The citizens of the city of New York have generally supposed that in all cases where streets have been opened, widened, or extended, they have been done in consequence of the urgent request and petition of those citizens interested. This, however, is not the fact. We will, for the information of the public, state the manner in which this business was done in a large section of the island.

At a special meeting of the board of Assistant Aldermen, April 6th, 1835, Mr. Holden offered the following:

"Resolved, That it be referred to the street committee to inquire into the expediency of opening all the avenues and streets (not already opened) up to and including Forty-second street.

"Referred to the street committee."

On September 12, 1836, Alderman Ingraham presented the following resolution, which was referred to the committee on Roads and Canals.

"Resolved, That the streets from Forty-second street to and including Fifty-seventh street, be opened in the usual manner, and that the necessary legal measures be taken therefor."

The above resolutions, notwithstanding they embraced a large tract of the land on this island, were offered by the above named members of the Common Council, and the resolutions were finally passed by both boards of the Common Council without any petition whatever. Since the passing of the above resolutions, the streets and avenues therein embraced, have not been actually opened, although it is pretended that they are open, and the supreme court have confirmed the reports made by commissioners of estimate and assessment, with two or three exceptions, and the corporation have, in most cases, collected the assessments or sold the lots. By the above stated extraordinary proceedings, the whole district of land is virtually confiscated. Thousands of lots of land owned by some of our oldest and most respectable citizens, have been thus taken from them under the color of law, and those who have been able to retain their land have done so by paying assessments to the full value of their land. It is impossible for any person not acquainted with this odious system in practice of opening, widening, and extending streets, to imagine to what extent citizens have been deprived of their property, or how insecure the title to real estate is under the tyrannical and assumed powers of the Common Council of the city of New York and officers who have acted in these matters.

The assessments for the opening of some of these streets and avenues were confirmed near four years ago by the Supreme Court, and these avenues and streets are not yet opened, and will not be for years and years to come. Where then is the benefit? There is no benefit, and the fees of the officers are the motive, and the whole motive, for the proceeding.

Uncertainty of Title to Real Estate in this City by reason of the loose manner of making Assessments.

The following communication is from one of our most respectable citizens, a large landholder, and a gentleman of great experience; whose opinions in these matters are deserving of great consideration. This gentleman actually made a journey into Virginia and South Carolina, with a view to find a section of the country where he could invest his capital in real estate where destructive assessments would not encumber; and would have sold his property, but a change of times produced so great a depression of price as to prevent it.

The practical system of assessing lots by fictitious numbers, is subject to two great evils, because the map is removed out of sight of the owners of property so that they cannot find what they are assessed, thereby making all title of property on this island precarious, for no purchaser is bound to take or demand possession until twenty years after purchase, and all testimony or other proof is dead or scattered, when they will recover the property, and the possessor bound to pay six years' back rent, even for a building put up on a lot so sold for assessments. There was an instance among others of a person who purchased property on Laurens street, who could not find any assessment until after the money was paid for the property, when he sued for the assessment by the number of his deed of the property, but lost the suit because the number in the deed did not correspond with the number of the assessment, notwithstanding the collector proved the lot to be the same identical lot mentioned in the deed.

COUNSEL FEES, COMMISSIONERS' FEES, SURVEYORS' FEES, ROOM HIRE, &c. &c. IN STREET ASSESSMENTS.

We have before us Document No. 83 of the Comptroller of the city of New York, and Document No. 71 of the Street Commissioners, printed by authority of the Board of Assistants, Oct. 12th, 1840, by which it appears that the amount paid for counsel fees and court charges in 1835, was $3,674 57 on *fifteen* streets, viz.: Pine, Horatio, Platt, Beaver, Amos, Fulton, Wooster, Gold, and Mill streets; also, 24, 27, 87, and 121st streets; and also avenue C, and a new street called Lexington avenue. The Commissioners' fees for mak-

ing the estimates and assessments, were $6,187 60; room hire, &c., $528 52; appraisers' fees, $235; surveyors' fees, $2,136 72.

In 1836 it appears by the same documents, that the amount paid counsel fees and court charges was $10,533 92 on *twelve* streets, viz.: Chapel, *Wooster*, Chatham, Liberty, New, William and Wall streets; also, 38, 84, and 116th streets; and also, second and ninth avenues. The commissioners' fees in these streets are stated at $7,762; appraisers' fees, $505 50; room hire, &c. $556; surveyors' fees, $3,792 52.

In 1837, as per same public documents, it appears that the amount paid counsel fees and court charges was $18,694 12 on *thirty-one* streets, &c. viz.: Centre, Grove, Maiden lane, Sheriff, Bethune, and Stone sts.; also, 22, 26, 28, 42, 45, 49, 50, 57, 59, 79, 81, 83, 86, 118, 119, 120, 122, 124, 125, 155; and also avenues A and B—2d and 5th; also, Burnt District, and closing Fitzroy-road. The commissioners' fees are set down at $16,911 66; room hire, &c. $2,517 70; appraisers' fees $280; surveyors' bill $9,579 05.

In 1838, a continuation of the same public documents, the amount paid counsel fees and court charges are stated at 18,553 58 on *thirty-two* streets, &c. viz.: Lawrence, *Pine*, *Stone*, and Cross streets; also, 11, 23, 24, 27, 31, 32, 41, 43, 44, 46, 47, 48, 53, 54, 56, 88, 89, 109, 110, 116, 117, and 123d streets, and also Centre Market, 5th avenue, Public Place at Art-street, 1st avenue, Murray Hill and 10th avenue. The commissioners' fees are set down at $21,375 37; room hire, &c. $3,257 45; appraisers fees $248; surveyors' fees, $11,096 95.

In 1839, it is also stated in the same public documents, that the amount paid counsel fees and court charges on *twenty-five* streets was $23,319 67, viz.: avenue A, 1st, 2d, 6th and 7th avenues, Art-street, Mount Morris square, Manhattan square; and also 12, 19, 25, 33, 35, 36, 38, 40, 50, 51, 55, 83, 84, 85, and 94th streets. Commissioners' fees $21,391; room hire, &c. $3,886 79; appraisers' fees $126; surveyors' fees $18,083 29; and to this year's proceedings are to be added John-street, confirmed Sept. 4, 1839, and Anthony and William streets, discontinued Sept. 3d, 1839. The counsel fees in John-street were $1,936 92; commissioners' fees $1,272; room hire, &c. $160; appraisers' bill $380; surveyors' bill $938. The commissioners' fees in Anthony and William streets $5,024; counsel fees and court charges in Anthony and William-streets $4,359; room hire, &c. $815; surveyors' fees $2,188 12; appraisers' bill $578.

Thus it will appear that the counsel fees and court charges since 1835, in 123 streets, avenues, and public places, amount to the great sum of $96,571 78; and in addition to this amount the counsel of the corporation have been paid immense sums besides during the same time for other *services*. The court charges and clerks' fees for six months, ending Dec. 31st, 1839, as we are informed by a highly respectable and very intelligent gentleman, who made an examination of the returns of the clerks of the supreme court at Albany and New York, to the state comptroller, amounted to the sum of six dollars and twenty-eight cents, paid by or charged to corporation counsel of New York. If this gentleman should have, by any possibility, made a mistake in examining the records, the two gentlemen holding the office of clerks of the supreme court at New York and Albany will be able to correct the statement, as will also the comptroller of the state, to whom we send the Municipal Gazette. Art-street costs are not included in the six dollars and twenty-eight cents. John-street, Anthony and William streets, 2d avenue, Mount Morris, 55, 46, 38, and 33d streets, were acted upon by the court during that six months, we are informed.

The commissioners' fees in these one hundred and twenty-eight proceedings, amount to $ 2,923 63; room hire, &c. $11,721 16; surveyors' fees $17,814 65; appraisers' fees $2,702 50.

The commissioners' fees for making the estimate and assessment for opening the seventh avenue, are four thousand nine hundred and twenty dollars. The awards amount to $28,141 41; the room hire is $410; the commissioners' fees are on the amount of the award a fraction short of *seventeen and a half per cent*, and the room hire amounts to over one and a quarter per cent.

The commissioners' fees for the John-street estimate and assessment, were $1,272; the awards amounted to about $186,411; the per centage of commissioners' fees on this street is about two-thirds of one per cent.

The room hire alone for the *commissioners to meet in*, in making the assessment for the seventh avenue, is about double the per centage of the whole commissioners' fees in John-street.

The counsel fees and court charges in seventh avenue are almost unmentionable; only $3,976 77 ! ! !

COMMON COUNCIL AND THE CHARTER.

BOARD OF ASSISTANT ALDERMEN.

December 9th, 1839.

The following resolution was offered by Mr. Graham:—

Whereas, It is provided among other things, by the SEVENTH SECTION *of the amended charter of the city of New York*, that "all resolutions and reports of committees, which shall recommend any specific improvement involving the appropriation of public monies, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the Board, under the authority of the Common Council, in all the newspapers employed by the Corporation, and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner."

And *Whereas* the essential interests of the city require a strict adherence to this salutary resolution, therefore

Resolved, (if the Board of Aldermen concur,) That the clerks of the respective Boards cause to be published in the papers employed by the Corporation, as soon as possible after the meeting at which such proceeding shall take place, all reports and resolutions which shall be presented, as well as all votes which shall be taken by ayes and noes, whereby the appropriation of public moneys is to be affected, or the citizens are to be taxed or *assessed*.

Mr. West moved that the resolution be laid upon the table, and the question being taken thereon, the motion was lost by the following vote:

Affirmative—Messrs. Potter, West, Vandervoort, Spader, Pollock—5. *Negative*—Balis, Deming, Anderson, Howe, and Graham—5.

The question recurring on the adoption of the resolution, the ayes and noes were called, and the members voted as follows:

Affirmative—Messrs. Balis, Deming, Anderson, Howe and Graham—5. *Negative*—Messrs. Potter, West, Vandervoort, Spader, and Pollock—5.

Five voting in affirmative and five in the negative, the resolution was lost.

Vol. 15. Pro. Board Ass., page 60.

Thus it will be seen that the Board, by a deliberate vote, decided that they would not comply with the Law or the Charter! ! !

Chancellor Kent, in his Notes on the City Amended Charter, remarks: "As a further check to improvident legislation, no moneys are to be drawn from the city Treasury, but upon previous *specific* appropriations; and the Common Council are prohibited to borrow mone s on the credit of the Corporation, except in anticipation of the Revenue of the year, unless authorized by a special act of the Legislature.

"The checks against improvident expenditure, or injudicious investments of the city Fund, consist specially in the mode in which Ordinances *are to be passed*."

LAND SHAKES—ASSESSMENTS.

There is not a city in any quarter of the Globe where the complaints have been so loud and so just against the odious system of taxation as in this city. We know of no other city where this odious and ruinous system has been adopted and practised, with the exception of some of the cities in this State to a limited extent, which copied after this city. The great fire which laid waste in the short space of twenty-four hours more than six hundred buildings in the business part of our city, together with an immense amount of merchandise, was not as disastrous as this abominable system of assessments, which has existed here for years, which not only destroys the owner's title to houses, but also the very ground on which they stand. Whole estates have been entirely swallowed up by these assessments, and the proprietors utterly ruined by the imposition of arbitrary and illegal assessments. And shall such a system be longer suffered to continue? Shall houses and lands be rendered worthless by such odious taxation? The complaints have been made for years, and we have been put off first by one plea, and then another. The time has now come when these whole proceedings will be sifted. We are perfectly familiar with all the assessment proceedings, and also all the details; and we have the boldness to put them before the public. There has been a course of proceedings pursued in all these assessments—matters which must be made known to everybody. We have no unkind feeling toward individuals in this whole affair from the beginning to the present time, but of the whole wretched, wicked, ruinous system—we have an utter abhorrence. We shall plainly and boldly state facts which have come to our knowledge; proceedings which are matters of record, and decisions which have been given by courts in every reported case; and place these, side by side.

There is a limit to forbearance, as well as to everything else in time, and that limit is now reached. Public opinion will no longer sustain the proceedings which have been carried on to such a destructive extent, the last few years in this assessment system.

We well know that we have to encounter the opposition of interested persons; this we expect, but we do not heed it, and will not. If the members of the Common Council support, tolerate, and patronize this system, let it come out; if they are imposed upon by other officers, then let it appear. It was but a few weeks since, that two committees of the Common Council convened to investigate assessment abuses; but their proceedings may now be reckoned among the things that never have been. Now we ask, are such proceedings creditable to these honorable committees? Will they possess themselves of facts and not report these facts?

When the members of the Common Council and officers of the Corporation are called upon to give testimony in these matters in our courts, as they will be, they will find that they will have to tell the whole story. These assessment abuses have nothing to do with party politics; or rather, they have had everything to do with politics, and both parties are alike to blame. The ayes and noes have been called in some of these questions, and the names of members stand recorded, as witnesses against them. It is true that some of them voted ignorantly, or rather that they were not aware of the merits of the question; but there are others who have not this excuse. We wish for their sakes they could plead ignorance. The abuses, the most of them, in these matters, are confined to a few public men. Such men as these who claim a Corporation to be a sovereignty.

(*From the Evening Post, of the 16th inst.*)

OFFICIAL.

BOARD OF ALDERMEN—March 16, 1841.

Present—Elijah F. Purdy, Esq, President. Aldermen Woodhull, Benson, Pentz, Jones, Ferris, Rich, Chamberlain, Campbell, Hatfield, Jarvis, Smith, Nichols, Graham, Cooper, and Nash.

The minutes of the last meeting were read and approved.

A communication from the acting Mayor, transmitting a letter from the Water Commissioners, with a copy of a memorial presented to the Legislature in relation to the non-payment of drafts made upon the Corporation for work done south of Murray Hill—referred to the Committee on the Croton Aqueduct.

An invitation from Robert H. Morris and others, officers of a convention for making arrangements for the reception of Martin Van Buren, ex-President, to join said convention in the reception—accepted.

PETITIONS.

Of James Phalen, for leave to run an iron railing by the side of house corner of University Place and 13th street—referred to the Alderman and Assistant of 15th Ward, with power.

Of owners of property in Avenue D, 3d, and 4th streets, in favor of a drain in said streets to the East River—referred to the Committee on Streets.

Of E. T. Williams, and others, to have the northeasterly sidewalk in 17th street paved from the 4th avenue to Irving place—referred to the Committee on Streets.

Of John C. Houston, for payment of bill for services rendered—referred to the Committee on Finance.

Of G. Hiltman, for payment of a bill accruing due on account of Registry Law—referred to Special Committee, Ald. Nash, chairman.

Of the Mechanics' Institute, for remission of tax—referred to Committee on Assessments.

Remonstrance of James Timpson, and 363 others, against the petition to remove the rails of the Harlem Rail Road Company—referred to Special Committee, of which Ald. Chamberlain is chairman.

Of C. Vanderbilt, and a large number of others, to have Peck Slip set apart for the use of the Eastern Steamboats—referred to the Committee on Wharves, &c.

Of John Gatfield, and others, against removing the rails of the Harlem Rail Road—referred to the Special Committee, of which Ald. Chamberlain is chairman.

Of 507 merchants and firms, in the vicinity of Peck Slip to set apart that Slip for the use of the Eastern Steamboats—referred to the Committee on Wharves, &c.

Of James Kent, and 500 others, that the petition to remove the rails of the Harlem Rail Road Company, south of 14th street, may not be granted.

Of Martin Silber, to be relieved from a personal tax—referred to the Committee on Assessments.

Of Randolph Martin, and others, for removal of dumping board between Reade and Chamber streets—referred to the Committee on Cleaning Streets.

Of sundry persons, residents of the 3d and 5th Wards, to have the manure removed from the foot of Reade and Duane streets, &c.—referred to Committee on Cleaning Streets.

Of the Collector of the 12th Ward, for extension of time to collect the taxes of said Ward—referred to Committee on Finance.

Of W. W. Coit, for exclusive use of pier No. 4, North River—referred to the Committee on Wharves, &c.

Of G. Montgomery, for transfer of Market stand—referred to the Committee on Markets.

Of S. Tobias, and sixty-six others, for the removal of Harlem Rail Road track south of 14th street—referred to special committee, Alderman Chamberlain, chairman.

Of D. Burtis and J. Conklin, for relief from tax on bulkhead—referred to Committee on Assessments.

Of four hundred firemen, asking the Common Council to take into consideration the propriety of compelling all firemen to do active duty—referred to Committee on Fire and Water.

REPORTS.

Of the Committee on Assessments, in favor of the several petitions of James B. Taylor, the New York and Harlem Rail Road Company, John A. Gilmore.

Of the Committee on Assessments against the petitions of Wm. Sherwood, J. A. Horsington, James Meinell, jr., Samuel Barnett, jr., the New York Benevolent Society, Charles C. Miller, Jacob Mack, Edward J. Hale, and Adolph Backerman, severally, for correction of tax—were adopted.

Of the Finance Committee, in favor of commuting Water grant on petition of Brown & Bell—adopted.

Of the Committee on Roads and Canals, in favor of regulating the 1st Avenue between 123d and 125th streets, against regulating 122d street from 3d Avenue to Harlem River—adopted.

Of the Committee on Wharves, &c., in favor of extending the pier at the foot of Gansevoort street—adopted.

FROM THE BOARD OF ASSISTANTS.

A preamble and resolution to add the Joint Committee on Public Buildings on Blackwell's Island to the Committee on Charity and Alms House, on the consideration of the question on the Lunatic Asylum—referred to the Committee on Charity and Alms House.

A report of the Finance Committee, on petition of J. W. Schoff, a water privilege—referred to Committee on Finance.

An ordinance to give printed volumes of proceedings of the Common Council to the Apprentices' Library—referred to Committee on Arts and Science.

A report of the Committee on Wharve, &c., on the subject of extending pier No. 3, East River, and middle pier, Coenties slip—concurred in.

Resolution adopted, as a substitute for the one passed this Board in regard to the lease of Castle Garden—referred to Committee on Finance.

FROM DEPARTMENTS.

A communication from the Comptroller, enclosing a copy of Winterseen & Myers' contract with the Water Commissioners for 500 tons of water pipes—referred to the Croton Aqueduct Committee.

A communication was presented by the Commissioners of the Alms House, recommending the purchase of land foot of 61st street—referred to Committee on Charity and Alms House.

A communication was received from the Commissioners of the Alms House relative to the addition to the Lunatic Asylum, which was, together with preamble and resolution of Alderman Smith to suspend farther proceedings in the matter—referred to the Committee on Charity and Alms House.

A communication relative to low grounds in 11th and 16th Wards, from the City Inspector—referred to Committee on Ordinances.

Ordinance from same department for filling lots between Avenues D and C, and 9th and 10th streets—referred to Committee on Ordinances.

THE COMMITTEE OF THE WHOLE.

The board went into committee of the whole on the market question, Alderman Graham in the chair. After which the board resumed, and the chairman reported the action of the committee, and asked to be discharged. Whereupon the report was ordered to be engrossed, and was made the special order for the next meeting, and the committee were discharged.

RESOLUTIONS.

By Ald. Cooper, Resolved, If the Board of Assistants concur, That a joint committee be appointed to tender to our fellow citizen Martin Van Buren, Ex-President of the United States, upon his arrival in this city, on the 23d inst. the use of the Governor's room—adopted, and Ald. Cooper, Woodhull, Chamberlain, Benson, and Ferris, appointed committee.

By Ald. Smith, Resolved, That the slip at the foot of Delancey street be cleaned out and the water therein deepened—referred to the Committee on Wharves, &c

By Ald. Benson, In order that the Board may be possessed of and adopt the course alluded to by the Comptroller, in page 102 of his annual report, it is

Resolved, That the Comptroller report to this Board at its next regular meeting, or as soon thereafter as may be, all and which of "the salaries paid to the higher officers of the city government may be materially reduced without injustice to the incumbents," and also the names of such of them as "the incentive and reward which they deserve for the faithful discharge of their respective duties must certainly be far beyond the mere degree of pecuniary compensation they are to receive"—referred to Committee on Application for Office.

By Ald. Pentz, Resolved, That the Committee on Wharves, Piers and Slips, be and are hereby requested to inquire into and report upon the expediency of repairing Pier 29, East River—adopted.

By Ald. Hatfield, Resolved, That the Superintendent of Streets be directed to settle the demands standing against the farmers and boatmen for manure sold under former Superintendents, by compromise or such measures as may be deemed necessary—adopted.

By Ald. Graham, Resolved, That the Committee on Laws and Applications to the Legislature, be instructed to inquire into and report upon the expediency of applying to the Legislature for the return of the auction duties raised in the city and county of New York, or some portion thereof, in conformity with the suggestion of the Comptroller on the 30th page of his report for the present year; and that if they deem such application expedient they report the form of a memorial for that purpose—adopted.

By Ald. Rich, Resolved, That the Committee on Charity and Alms House, be directed to suspend the operation of the resolution for extending the Lunatic Asylum on Blackwell's Island, until they report upon the communication of the Commissioners of the Alms House, and the resolution on the subject referred to them that evening—adopted.

By Ald. Nash, Resolved, if the Board of Assistants concur, That a joint committee of three from each Board be appointed to inquire into and make report as to the number and condition of the militia and volunteer force of the city and county; the arms and artillery which are in the city and fit for use; the condition of our fortifications, and what is required to place them in a proper state of defence. Also a plan for the defence of our city and harbor—adopted, and Aldermen Nash, Jones, and Nichols, appointed committee.

The Board then adjourned until Monday evening next, at 5 o'clock.

SAM'L. J. WILLIS, Clerk.

OFFICIAL.

BOARD OF ALDERMEN, March 22d, 1841.

Present—Elijah F. Purdy, Esq., President. Aldermen Benson, Pentz, Jones, Ferris, Rich, Chamberlain, Campbell, Hatfield, Jarvis, Smith, Nichols, Cooper and Nash.

The minutes of the last meeting were read and approved.

A communication was received from his Honor, the acting Mayor, stating his approval of papers passed the Common Council, which was ordered on file.

Also, a communication from his Honor, the acting Mayor, enclosing a presentment of the Grand Jury against certain evils—of which, so much as related to Madame Restell and Costello, was referred to the committee on Police, &c.—and so much as related to incumbrances in Chatham Square, to the Street committee.

PETITIONS.

Of Robert S. Place, administrator, for an extension of lease—referred to the Committee on Finance.

Of John F. Delaplaine, and four hundred and fifty-nine others, that the rails of the Harlem Railroad may not be taken up—referred to the Special Committee, of which Alderman Chamberlain is chairman.

Of John March, for assistance—referred to Committee on cleaning streets.

Of. Dr. Landesman, for payment of bill—referred to the Committee on Police.

Of sundry persons, against building a sewer in 4th street, near the East River—referred to the Committee on Streets.

Of John March, for compensation for services rendered—referred to the Committee on Police, &c.

Of Isaac Woolsey and others, to have the piers, &c. foot of Harrison, Franklin and North Moore streets, for use of market boats—referred to the Committee on Wharves, &c.

Of James Lozier, and four bundred and seventeen others, residents of Centre street, that the Harlem Railroad rails may not be removed—referred to the Special Committee, of which Alderman Chamberlain is chairman.

Of A. L. Phillips, Joseph C. Luther, H. D. Krack, A. B. Janin, the Trustees of Canon street Baptist Church, severally for correction of tax, were referred to the Committee on Assessments.

Of Holbrook, Nelson & Co. and others, to have ice and snow removed from Pine street—referred to Committee on cleaning streets.

Of Wm. H. Townsend and 362 others, that the rails of the Harlem Railroad may not be removed—referred to the Special Committee, of which Alderman Chamberlain is chairman.

Of sundry persons, against setting apart Peck slip for the exclusive use of steamboats—referred to the Committee on Wharves, &c.

Of Slate, Gardiner & Howell and others, remonstrance against locating steamboats at Peck slip—referred to Committee on wharves, &c.

REPORTS.

Of the committee on wharves, &c. in favor of granting the use of the southerly side of Pier No. 4, Hudson W. W. Coit, for steamboat running to Norwich—lost.

Of the committee on wharves, piers and slips, in favor of the petition of Charles Donnelly, for payment for loss of a horse off one of the public docks—adopted.

Of the market committee, in favor of transferring stands 37 Washington and 31 Fulton markets—adopted.

Of the committee on Assessments, against the petition of Charlotte Kelso, for relief—adopted.

Of the finance committee, against the petition of T. S. Brown, for alteration of lease—adopted.

Of the committee on the Croton Aqueduct, monthly report—ordered on file.

Of the finance committee, on the petition of R. B. Fosdick, for execution of new deed—adopted.

Of the law committee, relative to the Harlem River Canal Co.—accepted.

Of the finance committee, against petitions of Collectors of 12th and 16th Wards, for extension of time to collect taxes—adopted.

Of the committee on Wharves, &c. against the petition of G. DeForest, for permission to drive piles in one of the slips in the Hudson River—committee discharged.

Of the committee on wharves, &c., in favor of granting the use of the bulkhead between Chamber and Warren streets to the tow boats Union and Washington—adopted.

Of the committee on wharves, &c. and laws, recommending that a remonstrance be presented to the Legislature against the passage of a bill relative to altering the exterior line of the East River, on the Brooklyn side—adopted with amendments.

Of the finance committee, in favor of refunding amount of estate of J. Crickard, deceased, paid into the city treasury—adopted.

Of the finance committee, on the law relating to foreign paupers introduced into the Legislature—adopted.

Of the finance committee, in relation to leasing Castle Garden—laid on the table and ordered to be printed.

Of the committee on wharves, in favor of leasing pier foot of Warren street for one year—laid on the table.

FROM THE BOARD OF ASSISTANTS.

A report of the committee on lands and places relative to improving Stuyvesant Square—referred to the committee on lands and places.

A report of the committee on wharves, on building bulkheads across Governeur and Walnut slips, on the line of South street—referred to committee on wharves, &c.

A report of the committee on wharves, &c., in favor of building pier at the foot of Hammersly street—referred to the committee on wharves, &c.

A report of the street committee on the petition of G. W. Bruen, for the use of surplus waters in certain sewers—referred to committee on streets.

A notice from the clerk of non-concurrence in resolution of this board relative to Lunatic Asylum—ordered on file.

FROM DEPARTMENTS.

A communication from the Chief Engineer, enclosing charges preferred by E. Penny, Jr., Foreman of Engine No. 33, against Assistant Engineer Rollins—referred to the committee on fire and water.

A communication from the Commissioners of the Alms House, in relation to the question as to the building the Lunatic Asylum—referred to committee on charity and Alms House.

The Board then adjourned.

SAMUEL J. WILLIS, Clerk.

WIND.

The theory of storms and wind appears to attract considerable attention, and while the public mind seems directed to the subject, intrude a few remarks. We have visited the tops of several mountains for the purpose of making observations and examinations of the rock formation, vegetation, temperature, &c., and do not recollect in all our different excursions ever to have seen a tree that had been prostrated by the wind on the top of any mountain or a very high hill; and from repeated inquiries of persons who resided on the high lands, have been informed that the wind does not blow with such violence on the higher hills, as in the lands the surfaces of which are made up of plain hills and valleys.

HEAT, SOUND, AND LIGHT.

Heat, unaccompanied by moisture, will not produce animal decomposition or putrefaction. Animal flesh in the arctic regions will remain unchanged as long as the frost endures—in the dry and hot regions of South America, animal carcases left exposed upon the earth's surface will not putrefy or decompose, but on the contrary become dry and hard. Meat which is boiled in vessels over a dull slow fire, is apt to become tainted in cooking. The reason is, that the water heats up slowly, and remains a great length of time at a putrefying heat, whereas, if the water is allowed to become at once boiling hot, this difficulty will be entirely obviated.

The inhabitants of cold countries attach the idea of comfort to warmth; and those of hot countries reverse the idea. In this country in former years, churches were not heated by fires or stoves to any extent; in those times clergymen were healthy, and long-lived. Now, when fires are used in churches, clergymen are short-lived and unhealthy. It may be readily imagined that a meeting house heated by stoves and filled with people, must have an atmosphere filled with moisture produced by such numbers of persons breathing into it—and this atmosphere is inspired and respired by unhealthy, as well as healthy lungs; and heated by the fire in the stoves to a temperature which makes it unwholesome A person speaking for a length of time in an atmosphere of this description, must labor harder than to speak in a cold dry atmosphere and it most generally is the case, the speaker is not aware of the difficulty. A full house is addressed by a public speaker with more animation and with greater effort, than a thin and small assembly; consequently, the speaker is not sensible of the labor he performs, nor of the strength which he puts forth. The windows of a large apartment in which one person sleeps a night in cold weather, become frosted by the breath. How much more then will a church filled with persons breathing, affect the atmosphere? Sound in such an atmosphere is lessened to a very great extent.

The human voice can be heard more distinctly in a cold than in a warm atmosphere. Capt. Parry, when he visited the arctic regions, made several experiments upon the force of sound—and he states that in latitude 76, in clear and in still weather, he could hear his men in common conversation one mile distant. A clergyman in speaking into an atmosphere heated and moistened by human breath, and heated by stoves at the same time, labors with increased difficulty and disadvantage. The great abundance of cloth with which pulpits are surrounded of late years, deadens sound by absorbing it. Sound i sin some respects like heat and light, it travels in straight horizontal lines; but in others, it is different; it follows surfaces unless it meets with resistance, in which case it is reverberated. We have made experiments upon the tops of high mountains, by discharging fire-arms; so the discharges produced but one sound, there was no echo, no reverberation. We have also noticed the practice of the boatmen in early times navigating the Ohio and Mississippi rivers during dark nights, when they could not discover the shores—they make a sound upon the boat and watch the echo, and determine the distance from the shore by the time required for the echo to return, as the echo returns from the nearest shore first. We have also made experiments of sound in the mammoth cave; here the atmosphere is of an uniform temperature of 60 degrees the whole year. The atmosphere is perfectly dry, and the sides of the cave solid rock; but sound is not as powerful in the cave as we have found it in the dense forests in high, northern latitudes, in clear cold weather in the night time.

Light, candles, and lamps, are used without any regard to the position in which the blaze is placed to afford or to throw the greatest number of rays upon the object which is desired to be illuminated. The best illustration we can give is the lamps on corner of Centre and Pearl streets, contrasted with those on the corner of Chatham and Pearl streets. The former are about three feet nearer the surface of the pavement than the latter; consequently a greater number of rays of light are thrown upon the pavement in a body. A page printed with large letters could not be read as distinctly by the light of the lamp, if placed on the surface of the pavement at Chatham street, as small letters could be on the surface of the pavement at the corner of Centre and Pearl streets. The angle of reflection ought to be equal to the angle of incidence. Where lamps are placed high up from the pavement, the rays of light are spread, many of these are thown off into space and never return. High candlesticks and lamps are unphilosophical, so also are broad candlesticks. The bottom of the candlestick is illuminated and not the object which is required to be more visible. Place on the table a printed page, raise the candle, the light of which illuminates the page, gradually from the surface of the table and the letters will become more indistinct, and you may continue to raise it until the letters will cease to be visible. A farmer going to his barn in the night with a lantern, if he wishes to see his path distinctly, carries his lantern near to the ground. Raise from the surface of the table a wide bottom candlestick, and the shadow of the bottom will increase in size as the candlestick is raised in height above its surface.

The lamp posts in the streets of New York are three feet higher than they should be: one half the number of lamps that are now used would afford abundance of light to the surface of the pavement, if the lamp was brought three feet nearer its surface. We have referred to this subject before in the city papers, and will refer to it again in the Gazette.

Communication from the Water Commissioners.

Samuel Stevens and others, the present Water Commissioners, made to the Common Council last evening a communication, enclosing the copy of a memorial which they had presented to the Legislature. This memorial sets forth that the whole line of the aqueduct in Westchester county, thirty-two miles in length, is completed, with the exception of forty yards in length, and that the remaining portions of the work, excepting the high bridge and receiving and distributing reservoir, will be completed during the ensuing summer.—*Evening Post, 16th inst.*

ANCIENT STREETS.

The names of most of the streets in the old settled parts of the city, have been changed. Wall street was formerly called Cingall street, or the Wall. William street was called Smith street. Fulton street, on the west side of Broadway, was called Partition street, and on the east side, Fair street. John street was laid out in 1696, and extended from Broad to what is now called William street, beyond that it was called Golden Hill street. This street was extended to Pearl street by an act of the Legislature passed 1793. Anthony street was formerly called Catharine street. Broadway was called the Broad Wagon Way. Greenwich street was made out of the River for a great distance up. Broad street was called The Herre Graffe, or The Broad

Street. The mode of paving streets in the early settlement of this city, was to make the street descending from either side to the centre. Maiden Lane was called the Green, and afterwards the Madjos Path.

CITY EXPENDITURES.

COMPTROLLER'S REPORT.

We give below a synopsis of the various reports of the several Comptrollers, from 1830 to 1840, both inclusive. This we consider the most proper plan to adopt as to both political parties. Our city concerns should have no connection with politics. We begin with

(To be continued.)

STATE LEGISLATURE.

IN SENATE.

March 11.—Mr. Verplanck presented the resolutions of the General Assembly of the Presbyterian Church for the erection of a Board of Missions.

A number of petitions, of a new class, are now daily being received, the object of which is, that the law exempting clergymen from taxation be repealed.

Mr. Taylor reported a bill establishing a *Registry Law* for all the cities in the State. The bill was made the special order of the day for Thursday next. Mr. Verplanck presented the report of the Croton Water Works Commissioners.

March 14.—A petition was received from the American Tract Society, asking for an act of incorporation. Mr. H. A. Livingston reported in favor of the Assembly bill incorporating the St. Nicholas Society in the city of New York. Mr. Root reported an amended resolution providing for furnishing the New York Lyceum and Mercantile Association with the Legislative Documents of 1840 and 1841. After a slight debate, the resolution was laid on the table.

STREET OPENINGS.

It is not generally known that nine tenths of the streets and avenues for which assessments have been made and collected, and are yet collecting, remain in the same plight and condition as before the assessments were made, and will remain in the same state for years to come. Are such proceedings to be countenanced or tolerated? The officers of the Corporation have, in their petitions to the Supreme Court, represented that public convenience required these said streets and avenues should be opened, &c. Is such the fact?—does public convenience require such proceedings? We answer, No. The present state of the whole proceedings is a downright decision upon that point. This is a fair and complete illustration of the doctrine of *discretion.*

Appointments by the President and Senate.

EDWARD CURTIS, Collector of the Port of New York,
THOMAS LORD, Naval Officer,
WILLIAM TAGGARD, Surveyor,
ROBERT C. WETMORE, Navy Agent.

BILL TO BE PASSED BY THE LEGISLATURE.

Our next number will contain the residue of the proposed new Law in relation to opening streets and avenues, regulating and paving streets, building sewers and sinking wells, filling low grounds, and also regulating the sales of lots hereafter to take place for unpaid assessments.

EXTRA SESSIONS.

The following extra sessions of Congress have been called since the organization of our government:—John Adams was inaugurated on the 4th of March, 1797. He convened Congress May 16, 1797. His first annual address was delivered Nov. 23, 1797.—Thomas Jefferson was inaugurated the 4th of March, 1801. He ordered a called session October 17, 1803. James Madison was inaugurated the 4th of March, 1809. He convened Congress May 23, 1809, also on the 25th of May, 1813. Martin Van Buren was inaugurated the 4th of March, 1837, and convened Congress the 4th of September, 1837.

NOTICES OF CORPORATION OFFICERS.

From the Journal of Commerce.

CORPORATION NOTICE.—Public notice is hereby given that a petition has been presented to the Board of Aldermen to pave 9th street, and to flag the side walks in 9th street, 6 feet in width, between avenue C and D.

Persons interested having objections are requested to present them in writing to the Street Commissioner's office, on or by the 16th day of March, 1841.

JOHN EWEN, Street Commissioner.

Street Commissioner's Office, March 5th, 1841.

CORPORATION NOTICE.—Public notice is hereby given that, the following petitions have been presented in the Board of Aldermen, viz:

To build a drain in 15th street, commencing 168 feet westerly from the 3d avenue to run into the 3d avenue.

Sewer—Also to build a Sewer in 24th street, between the 4th and Lexington avenues.

Also to grade and regulate the 5th avenue, between 21st and 28th streets.

Also, to pave the southerly side walks in 28th street, between the 3d and 4th avenues.

Persons interested having objections, are requested to present them in writing to the Street Commissioner's office, on or by the 19th day of March, 1841.

JOHN EWEN, Street Commissioner.

Street Commissioners' Office, March, 1841.

CITY TAXES.—The Collectors of the different Wards are required by law to return their tax books to the Comptroller on the 1st day of April that they may be transferred to the Collectors of Arrears, when all taxes remaining unpaid will be subject to the addition of fourteen per cent interest.

Collectors of Taxes with their places of residence.

1st	Ward,	Oliver Cobb, No. 6 Coenties slip.
2d	"	E. T. Backouse, 15 Fulton st.
3d	"	Garret Forbes, 261 Greenwich st.
4th	"	John V. Coon, 398 Pearl st.
5th	"	E. P. Horton, 110 Reade st.
6th	"	John Layden, 55 Elm st.
7th	"	John Murphy, 596 Water st.
8th	"	H. T. Kiersted, 520 Broadway.

THE NEW YORK MUNICIPAL GAZETTE.

No. 4.] NEW YORK, SATURDAY, APRIL 3, 1841. [Vol. I.

PUBLISHED WEEKLY, ON SATURDAYS,
BY THE
ANTI-ASSESSMENT COMMITTEE.
Edited by E. Merrim.
Office, No. 6½ Wall-street, (up stairs.)

ASSESSMENTS.

The proceedings throughout, in the imposition and confirmation of Assessments, has become so odious and oppressive, that an exposure of the abuses of the whole system has become absolutely necessary to put an immediate and effectual stop to the mischief. The anti-assessment committee deem it a duty that they owe to the public, to give the necessary information as early as possible; and to make it general, they therefore say that this Gazette is sent to the persons to whom we have directed our numbers free of charge, although in doing so they incur a heavy expense.

The Gazette will contain all the Corporation Ordinances now in force, together with the notes of the reviser, W. S. Johnson, Esq., on revising these ordinances in 1838 and 1839, and such information as we deem useful to the tax-paying citizens.

We believe, in this matter of endeavoring to remedy the abuses by exposing the mischiefs, we have ninety-nine hundredths of the community with us.

It will be our purpose to avoid all personal censures and abuse. Our purpose is to convince, and by that means obtain the much-needed abandonment of a most ruinous, odious, and abominable system.

CONFIRMATION OF ASSESSMENTS.

The Common Council confirm assessments for hundreds of thousands of dollars, in fact for millions, without reading the papers, or examining or opening of the bundle containing the assessment lists — these are passed through the respective Boards, in a bundle with a red tape tied around them, and the tape is confirmed with the rest.

This is a judicial proceeding, gone through with in a business-like manner, and the assessment thus confirmed is claimed to be a lein upon the lands of the owner whose name happens to be written opposite some fictitious map number, and on a line with a certain specified number of dollars and cents, in figures.

If the agrieved party happens by chance to find that his property is assessed, the Great Sovereign Corporation of the empire city come up by their Counsel, (who enjoys a most princely salary,) and place themselves in a most unenviable attitude—they plead STATUTE LIMITATIONS, and the power who have the deciding of the matter, possessing DISCRETION, decide that lapse of time is a sufficient bar to all examination into the matter—it is thus things are.

The truth is, these things will not bear investigation. However, the power is with the people, and these matters will be investigated—and most thoroughly, too.

There is a way to obtain justice, and remedy the evil. It is said that "there is no wrong without a remedy." If there is no remedy in dollars and cents, there is in exposing the mischief, —and the doers of the mischief—and this is a most sure and certain means of producing relief.

MEMORIAL TO THE LEGISLATURE,

For an amendment to the Assessment Laws.

In this Gazette, No. 1, page 9, is a copy of the Memorial to the Legislature for an amendment to the Assessment Laws of the city of N. York, with a list of the names of the petitioners. We here give the additional names of the memorialists. We venture to say it is the most substantial list of names ever put to a petition in this city of equal number. Among these Petitioners are the names of four of the ex Mayors of the city of New York, the Recorder of the city of New York, many of the ex Aldermen and Assistants, George B. Smith, Esq., the former able and intelligent Street Commissioner, Dow D. Williamson, the former Comptroller, John Jacob Astor, Peter Lorillard, Stephen Whitney, James Boorman, Peter G. Stuyvesant, the Collector of the Port, and a great number of other highly respectable citizens of the same class, without distinction of party. The members of the Common Council, we believe, are many of them in favor of the change, as also the present acting Mayor.

ADDITIONAL NAMES OF PETITIONERS.

TAXES.

The Taxes of this city have been enormously increased within the last few years. We give below a table compiled from the proceedings of the Legislature.

1801	75,000	1811	120,000	1821	250,000	1831	450,000
1802	75,000	1812	160,000	1822	250,000	1832	550,000
1803	75,000	1813	130,000	1823	300,000	1833	850,000
1804	75,000	1814	160,000	1824	300,000	1834	700,000
1805	100,000	1815	180,000	1825	300,000	1835	800,000
1806	120,000	1816	160,000	1826	350,000	1836	950,000
1807	120,000	1817	180,000	1827	400,000	1837	1,260,000
1808	130,000	1818	250,000	1828	450,000	1838	1,300,000
1809	130,000	1819	250,000	1829	450,000	1839	1,200,000
1810	120,000	1820	250,000	1830	400,000	1840	1,100,000
	$1,020,000		$1,840,000		$3,500,000		$9,160,000

In 1840 there was an act of the Legislature to fund $400,000 of the floating debt, which, added to the $1,100,000 taxes makes $1,500,000.

The taxes for the firs *ten* years are altogether less in amount than the taxes of the *present year* —and the tax of the second ten years less than the *last two years*—and the tax of the third ten years less than the *last three years*.

THE CHARTER
OF THE
CITY OF NEW YORK.

GEORGE the Second, by the grace of God, of Great Britain, France, and Ireland, king, defender of the faith, &c. To all whom these present letters shall come, *greeting:*

Whereas, on the twenty-second day of April, in the year of our Lord one thousand six hundred eighty and six, Thomas Dongan, then lieutenant-governor and vice-admiral of New York and its dependencies, under our predecessor, James (the second) then king of England, &c., did make and execute a certain grant, or instrument in writing under the seal of the province of New York, in these words following:

Here follows Governor Dongan's Charter. *See No.* 3, *page* 35, *of this Gazette.*

By virtue, or under pretext whereof, the said citizens and inhabitants, from the date thereof, hitherto have held, or claimed to hold, and still do hold, or claim to hold and enjoy, all and singular the rights, privileges, franchises, pre-eminences, advantages, jurisdictions, courts, powers, profits, immunities, lands, tenements, hereditaments, and other the premises therein particularly mentioned and thereby intended to be granted. *And whereas* the citizens and inhabitants of the said city of New York, besides the several public buildings, accommodations, conveniencies, and other things in the before recited grant or writing mentioned to have been by them erected, built, and appropriated, have, since the making thereof, built and appropriated, at their own proper costs and charges, several public buildings, accommodations, and conveniencies, for the said city, *that is to say*, the present City Hall and gaols, rooms and places for the sitting of courts of justice, and chambers adjoining, with the ground and appurtenances thereunto belonging, five market houses, the present crane and bridge, with the common sewer leading through the great dock, and a magazine or powder house near the fresh water, and several other public buildings and conveniencies in the said city; and have built the new ferry houses on the island of Nassau, for the reception of travellers, with a barn, stables and pen, or pound for cattle. And whereas our late Royal predecessor, Queen Anne, by her letters patent, under the broad seal of the province of New York made, bearing date the nineteenth day of April, in the seventh year of her reign, did grant, ratify, and confirm, unto the then Mayor, Aldermen, and Commonalty of the city of New York, and to their successors and assigns, in these words following, *to wit:*

Here follows the Charter of Governor Cornbury. *See No.* 3, *page* 39, *of this Gazette.*

By virtue, or under pretext thereof, the said inhabitants and citizens of the city of New York have held and enjoyed, or have claimed to hold and enjoy, and still do hold, or claim to hold, the ferry, vacant land, perquisites, profits, privileges, powers, and other the premises, in the before recited letters patent mentioned and intended to be thereby granted. *And whereas*, besides all the aforesaid particulars in the said grant or instrument, made in the aforesaid year of our Lord One Thousand Six Hundred Eighty and Six, and in the before recited letters patent of Queen Anne, mentioned or intended to be thereby granted, the citizens and inhabitans of the said city of New York have anciently held, or claimed to hold, use, and enjoy, divers and sundry other rights, privileges, franchises, pre-eminences, advantages, jurisdictions, emoluments, powers, profits, immunities, lands, tenements, and other hereditaments, as well by prescription, as by divers grants, and confirmations of and from divers Governors, Lieutenant-governors, and Commanders-in-chief, of the said province, by the name of *Mayor, Aldermen and Commonalty of the city of* New York, and by divers other names, stiles, and titles, and otherwise.

And whereas, divers questions, doubts, opinions, ambiguities, controversies, and debates have arisen and been made as well upon and concerning the validity and force of the said recited grant or writing, dated in the year of our Lord, one thousand six hundred and eighty-six, and the before recited letters patent of Queen Anne, as upon all and every the other grants and confirmations of divers Governors, Lieutenant-governors, and Commanders-in-chief, made to our city of New York, as aforesaid, by reason of the variety of names, stiles, titles, and incorporations aforesaid, and by reason that the before recited grant or instrument, dated in the year of our Lord, one thousand six hundred and eighty-six, and the other grants and confirmations of divers governors, lieutenant-governors, and commanders-in-chief, were made in the governors' own names respectively, when they should have been made in the respective names, stiles and titles of former kings and queens, our royal predecessors, under whom they were governors, lieutenant-governors, or commanders-in-chief respectively, and by reason, as some suggest and say, that the said city, or inhabitants or citizens thereof, never were well, regularly, or legally incorporated, and for want thereof, none of all the said grants, confirmations, instruments, or letters patent, hereinbefore mentioned, could take effect or operate; and for divers other defects in all, some or one of the aforesaid grants, confirmations and writings; and also upon the validity and force of the prescription aforesaid. *And whereas*, our well beloved subjects, the Mayor, Aldermen, and Comonalty of our said city of New York, by their humble petition presented to our trusty and well-beloved John Montgomerie, Esq., our captain-general, and governor-in-chief of our provinces of New York and New Jersey, and territories depending thereon in America, and vice-admiral of the same, &c., in council, reciting among other things, that the city of New York is an ancient city, and the citizens thereof have anciently held and used, and still do hold and use divers and sundry rights, liberties, privileges, franchises, free customs, pre-eminences, advantages, jurisdictions, emoluments, immunities, lands, tenements, public buildings, and hereditaments, as well by the name of the *Mayor, Aldermen, and Commonalty, of the city of* New York, as otherwise, to the advancement of the said city in its number of buildings and inhabitants, whereby the said city is become a considerable seaport, and exceedingly necessary and useful to our kingdom of Great Britain, in supplying our governments in the West Indies with bread, flour, and other provisions; wherefore they prayed, among other things, for our confirmation and grant to the said city, and corporation, by the name, stile, and title, of *The Mayor, Aldermen, and Commonalty of the city of* New York, of all their lands, tenements, public buildings, and hereditaments, wharves, docks, bridges, slips, ferries, cranes, grants, charters, rights, liberties, privileges, franchises, free customs, pre-eminences, advantages, jurisdictions, emoluments, and immunities, now and heretofore by them held and enjoyed; and that they might have the soil four hundred foot beyond low water mark, on Hudson's river, from a certain creek or kill called Bestaver's Killitie, southard to the fort, and from thence, the same number of feet beyond low water mark, round the fort, and along the East river, as far as to the north side of a certain hill called Corlaer's Hook; and also for a grant of such other powers, liberties, franchises, rights, free customs, jurisdictions, privileges, immunities, and things, as may be needful for the good rule and government of the said city. *And we*, considering that the strength and increase of our good subjects, in that our frontier province of New York, does, in a great measure, depend upon the welfare and prosperity of our said city, wherein the trade and navigation thereof are chiefly and principally carried on, promoted, and encouraged; and we affecting the good and happy estate of our said city, and the steady loyalty and integrity of the inhabitants and citizens thereof, are very desirous and willing to give encouragement to the said city, inhabitants, and citizens, and to remove, utterly abolish, and wholly take away all and all manner of causes, occasions, and matters, whereupon such questions, doubts, opinions, ambiguities, controversies, or debates, as aforesaid, or any other questions or doubts may or can arise; and in order thereunto, we have thought fit, them, the said inhabitants and citizens of the said city of New York, (by whatsoever name or names they have been or were incorporated, or whether they have been or were heretofore incorporated or not,) into one body politic and corporate, by the name of *The Mayor, Aldermen, and Commonalty of the city of* New York, by our letters, to make, constitute, confirm, renew, and of new to create. *And we* being also farther willing and fully intending and desiring, that the said inhabitants and citizens of our said city, by the name aforesaid, should have perpetual succession, and should hold, possess, and enjoy, all and singular, the rights, privileges, liberties, franchises, pre-eminences, advantages, jurisdictions, courts, powers, offices, authorities, ferries, fees, fines, perquisites, profits, immunities, rents, possessions, lands, tenements, and other hereditaments, not only which in the before recited grants, confirmations, writings, and letters patent, are mentioned, or intended to be thereby granted, but also, which they have held, or claimed to hold, by prescription or otherwise, with the alterations and enlargements thereof, and additions thereto, in such manner and form as hereinafter is mentioned and contained, notwithstanding the before mentioned, or any other question, doubts, opinions, ambiguities, debates, faults, or imperfections.

1. *Wherefore know ye*, That we of our especial grace, certain knowledge, and meer motion, have willed, ordained, constituted, confirmed, given, and granted, and by these presents, for us, our heirs, and successors do will, ordain, constitute, confirm, give and grant, that our said city of New York, be, and from henceforth forever hereafter shall be and remain a free city of itself; and that the Mayor, Aldermen, and Commonalty of the said city, and their successors, from henceforth and forever hereafter, shall be and remain one body corporate and politic, *in re facto, and nomine*, by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, and them and their successors by the name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, one body corporate, *in re facto, and nomine*, really and fully, we do for us, our heirs and successors, erect, make, ordain, constitute, confirm, declare, and create, by these presents, and that, by that name, they shall and may have perpetual succession; and also, that they and their successors, by the said name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, be, and forever hereafter shall be, persons able in law, and capable to sue and be sued, implead and be impleaded, answer and be answered unto, defend and be defended, in all courts and places before us, our heirs, and successors, and before all and any the judges, justices, officers, and ministers of us, our heirs and successors, and elsewhere in all and all manner of actions, suits, complaints, pleas, causes, matters, and demands, whatsoever, and of what kind or nature soever, in as full and ample manner and form, as any of our other liege subjects of our said province, being persons able and capable in law, can or may sue and be sued, implead and be impleaded, answer and be answered unto, defend and be defended, by any lawful ways and means whatsoever. *And also*, That they and their successors, by the same name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, be and shall be, forever hereafter, persons capable and able in law, to purchase, take, hold, receive, enjoy, and have, any messuages, houses, buildings, lands, tenements, rents, possessions and other he-

reditaments, and real estate, within or without our said province, in fee and forever, or, for time of life, or lives or years, or in any other manner; and also goods, chattels, and all other things, of what kind or quality soever. *And also*, That they and their successors by the same name of, *The Mayor, Aldermen, and Commonalty of the city of* New York, shall and may give, grant, demise, assign, and sell, or otherwise dispose of all or any the messuages, houses, buildings, lands, tenements, rents, possessions, and other hereditaments, and real estate, and all their goods, chattels, and other things aforesaid, as to them shall seem meet, at their own will and pleasure.

And also, That the said Mayor, Aldermen, and Commonalty of the city of *New York*, for the time being, and their successors, shall and may forever hereafter, have and use a common seal for sealing all and singular, deeds, grants, conveyances, contracts, bonds, articles of agreements, assignments, powers, authorities, and all and singular their affairs and things, touching or concerning the said corporation: And, by virtue of these our letters, it shall and may be lawful to and for the said Mayor, Aldermen, and Commonalty of the city of *New York*, and their successors, as they shall see cause, to break, change, and new-make the same, or any other common seal, when, and as often as to them it shall seem convenient.

2. *And we do further*, of our special grace, certain knowledge, and meer motion, for us, our heirs and successors, give, grant, order, and appoint, that the said city of *New York*, and the compass, precincts, circuit, bounds, liberties, and jurisdictions, of the same, do reach, extend, and stretch forth, and shall and may reach, extend and stretch forth, as well in length as in breadth and circuit, in and through the limits and boundaries following, *to wit:* To begin at the river, creek, or run of water, called *Spyt den Duyvel*, over which King's Bridge is built, where the said river or creek empties itself into the North River, on Westchester side thereof, at low water mark, and so to run along the said river, creek, or run, on Westchester side, at low water mark, unto the East River, or Sound, and from thence to cross over to Nassau-Island, to low water mark there, including Great Barn Island, Little Barn Island, and Manning's Island, and from thence all along Nassau Island shore at low water mark, unto the south side of the Red-Hook; and from thence to run a line across the North River, so as to include Nutten Island, Bedlow's Island, Bucking Island, and the Oyster Island, to low water mark on the west side of the North River, or so far as the limits of our said province extended there, and so to run up along the west side of the said river, at low water mark, or along the limits of our said province, until it comes directly opposite to the first mentioned river or creek, and thence to the place where the said boundaries first began. And, also that the said city, within the limits and jurisdictions thereof as aforesaid, be, and forever hereafter shall be, and remain divided into seven wards, to wit: the West Ward, the South Ward, the Dock Ward, the East Ward, the North Ward, Montgomerie Ward, and the Out Ward; each and every of which wards shall contain and comprehend, and reach and extend through the several limits and bounds following, to wit:

The West Ward to begin at the middle of the East end of the street that goes from the Parade to the North River, between the lot of ground now in fence, belonging to Charles Sleigh, and the house and ground late of Thomas Elde; and from thence to run a direct line over the middle of the west end of Beaver street, and so along to the middle of Beaver street, till it comes directly opposite to the middle of the south end of New street, and to run all along the middle of New street, to the north end thereof; and from thence to run to the rear of the dwelling-house, now in the possession of Domine Du Bois, and from thence to run all along the rear of the houses that front the Broad Way, up to the north part of the rear of Spring Garden House; and from thence, to run up a line, as the Broadway runs, to the end thereof, including the said Broadway; and John Harris, his house, and to include all other houses, hereafter to be built fronting the said Broadway, and from the north end of the Broad Way to continue and run a line, as the said street runs, until it comes directly opposite to Bestaver's Killitie, or rivulet, and from thence to run to the said Bestaver's Killitie, and so to continue the said line four hundred foot, beyond low water mark into the North River, and so down the said North River, always keeping four hundred foot beyond low water mark, until it comes directly opposite to the middle of the west end of the first-mentioned street; and so to run to and through the middle of the said street, to the place where the said West Ward first began.

The South Ward to begin at the middle of Wall street, where the line of the West Ward runs across the same, and from thence down the middle of Wall street, until it comes directly opposite to the middle of the north end of Broad street; and from thence down the middle of Broad street to the long bridge; and from thence to the eastward of, and to include the said long bridge, and the market house at the south end of the said street; and from thence to continue and run a south-east line, across the East River to low water mark, on Nassau Island shore; and from thence to run along the said shore at low water mark, to the south side of Red Hook, and from thence to run a line across the North River, so as to include Nutten Island, Bedlow's Island, Bucking Island, and the Oyster Island, to low water mark, on the west side of the North River; and so to run up along the west side of the said river, at low water mark, until it comes directly opposite to Bestaver's Killitie, or rivulet; and from thence to run to the north-westerly corner of the West Ward, at four hundred foot beyond low water mark; and from thence along the bounds of the said West Ward, till it comes to the south-westerly end thereof; and from thence still along the bounds of the West Ward, through the street by the parade, and through Beaver street, and New street, to the place where the said South Ward began.

The Dock Ward to begin at the middle of Wall street, directly opposite to the middle of the North end of Broad street, and from thence down through the middle of Wall street until it comes to the middle of Smith street, to a place called Marten Clock's Corner, including the small street between the house late of the said Marten Clock and the Slip, and so to continue and run a line as the said small street runs, into the East River, four hundred foot below low water mark, thence running westerly, keeping four hundred foot below low water mark, till it comes to the bounds of the South Ward, and from thence along the bounds of the South Ward, up the middle of Broad street, to the place where the said Dock Ward began.

The East Ward to begin at the north-easterly corner of the Dock Ward, in the middle of Smith street, and so run from thence up through the middle of the said street, till it comes directly opposite to the middle of the north-easterly end of Golden Hill street; and from thence to run down through the middle of the said street to the middle of the south-easterly end thereof; and from thence to run through the middle of Rodman's Slip to the East River; and from thence to continue and run a line as the said slip runs, into the East River, four hundred foot below low water mark; thence running westerly, keeping four hundred foot below low water mark, till it comes to the south-easterly end of the Dock Ward, and so along the bounds of the Dock Ward, up through the middle of Smith street, to the place where the East Ward began.

The North Ward, to begin where the East Ward begins, in the middle of Smith street, and so to run from thence through the middle of the said street so far as it runs, and so to continue a line from the end of the said street, as the street runs, to the south side of the creek that runs from fresh water into the East River; and from thence running a north course till it comes to the bounds of the West Ward; and from thence running along the bounds of the said West Ward towards Spring Garden, and all along the rear of the houses fronting the Broad Way, and so still along the bounds of the said West Ward, to the middle of Wall street, where the West Ward runs across the same; and from thence down the middle of Wall street along the bounds of the South Ward, and the Dock Ward, to the place where the said North Ward began, including in the same ward, the Powder-House, the City Hall, and the Presbyterian Meeting House.

Montgomerie Ward to begin at the south-easterly corner of the East Ward, opposite to Rodman's Slip, four hundred foot below low water mark, in the East River, and from thence to run along the bounds of the East Ward, to and through the middle of Rodman's Slip, and all through the middle of Golden Hill street, till it meets with the boundaries of the North Ward and the middle of Smith street, and so along the bounds of the North Ward, through the middle of Smith street to the rivulet that runs from fresh water into the East River; from thence along the said rivulet so far as it goes, till it empties itself in the said East River; and from thence to run a south-east line, four hundred foot beyond low water mark, into the said East River, and from thence running westerly, keeping four hundred foot beyond low water mark, to the place where the said Montgomerie Ward began.

The Out Ward to begin at the north-westerly corner of the South Ward, at low water mark, on the west side of the North River, over against Bestaver's Killitie or rivulet, and from thence to run up along the west side of the said river, at low water mark, until it comes directly opposite to the river, creek, or run of water, called *Spyt den Duyvel*, over which King's Bridge is built; and from thence to run to the said creek or river to the Westchester side thereof, at low water mark, and so to run along the said river, creek or run on West Chester side at low water mark into the East River, or Sound, and from thence to cross over to Nassau Island, to low water mark there, including Great Barn Island, Little Barn Island, and Manning's Island, and from thence along Nassau Island shore, at low water mark, to the bounds of the South Ward; and from thence along the bounds of the South Ward, the Dock Ward, the East Ward, and Montgomerie Ward, to the place where the said Montgomerie Ward and the North Ward meet, at the rivulet that runs from fresh water, and so to run a north course as the said North Ward runs, till it comes to the bounds of the West Ward; and from thence along the bounds of the West Ward to the north-westerly corner thereof, at four hundred foot beyond low water mark, near Bestaver's Killitie, or rivulet; and from thence along the bounds of the South Ward to the place where the said Out Ward began.

3. *And we do further*, of our special grace, certain knowledge, and meer motion, for us, our heirs, and successors, will, ordain, give, and grant, that there be, and forever hereafter shall and may be one *Mayor*, one Recorder, seven Aldermen, seven Assistants, one Sheriff, one Coroner, one Common Clerk, one Chamberlain, one High Constable, sixteen Assessors, seven Collectors, sixteen Constables, and one Marshall, appointed, nominated, elected, chosen, and sworn, in and for the said city of *New York*, and the precincts, and limits thereof; out of the freeholders or freemen, inhabitants of the said city, in manner and form as hereinafter is particularly mentioned: And for the better execution of our will, gift, and grant in this behalf, we have assigned, named, constituted, and made, and by these presents, for us, our heirs, and successors, do assign, name, constitute, and make, our well beloved *Robert Lurthing*, esq. to be the present Mayor of the same city, to do and execute all things, which unto the office of Mayor of the said city, doth or may belong, or in any wise appertain. *And we do moreover*, for us, our heirs, and successors, give, grant, ratify, and confirm unto the said Mayor of our said city of New York, and to his successors, and to the Mayor of the said city, for the time being, and to each of them, forever, full power and authority to depute and appoint one of the Aldermen of the said city, for the time being, to be approved of by the Governor, or Commander-in-Chief of the said province, for the time being, in the place of the Mayor of the said city, for the time being; and as his deputy, in all matters and respects, to act and do all things, which to the office of the Mayor of the said city, within the limits, liberties, and precincts thereof, do, or ought to belong during the sickness, or in the absence of the said Mayor, for the time being.

4. *And we do hereby Will and Grant*, That every such deputy or person so to be appointed and approved of, after having taken such oath, as hereinafter is directed, for every such deputy to take, shall have as full power and authority to act and do, in the sickness or absence of the Mayor of the said city, for the time being, all and singular, those things which to the office of Mayor of the said city belongs, or shall belong, or appertain, to all intents and purposes, as the Mayor of the said city, for the time being, by virtue of these presents, or otherwise, hath, shall, or ought to have. *And we do further*, for us, our heirs, and successors, will, ordain, and grant, that, in case it should happen that the present Mayor of the said city, or any of his successors, or any of the Mayors of the said city, for the time being, should happen to die before any other fit person shall be appointed and sworn Mayor of the said city, in their respective rooms and places, then, and in every such case, upon the death of such Mayor, such Alderman for the time being (who shall have been so appointed and approved of, as aforesaid, to act in the place of, or as deputy to, such Mayor) shall be, and he is hereby appointed and declared Mayor of the said city, and to continue and be continued in, and to execute the same office of Mayor of the said city, from the death of such Mayor so dying, until another fit person shall be appointed and sworn Mayor of the said city

in such manner as in and by these presents is hereafter directed for the respective Mayors of the said city, to, be appointed and sworn, and so as often as such case shall happen.

5. *And further we have assigned*, ordained, named, and constituted, and by these presents do, for us, our heirs, and successors, assign, ordain, name, and constitute, our trusty and well beloved *Francis Harrison*, Esq., (one of our Council of our said province of *New York*,) to be the present Recorder of our said city, to do and execute all things, which unto the office of Recorder of the said city doth or may belong, or in any manner appertain, and to continue, and be continued in, and to execute the said office, until another fit person shall be appointed and sworn in the office. *AND* We do hereby appoint, That the Governor or Commander-in-Chief for the said province, for the time being, at any time or times, when, and as often as they or each of them think fit, may displace and remove the present Recorder, or any other Recorder, hereafter to be appointed.

6. *And we do, for* us, our heirs, and successors, assign, name, constitute, and appoint, John Cruger, Harmanus Van Gelder, Frederick Phillipse, Gerardus Stuyvansant, Anthony Rutgers, John Rosevelt, and Johannes Hardenbrook, Esqrs., citizens and inhabitants of the said city of *New York*, to be the present Aldermen of the said city; and Egbert Van Borssom, Samuel Kip, John Chambers, John Moore, Isaac De Peyster, Petrus Rutgers, and Gerardus Beekman, gents., to be the present Assistants of the said city, to wit: The said John Cruger, to be Alderman, and John Moore, to be Assistant, for the Dock Ward of the said city; Harmanus Van Gelder, to be Alderman, and John Chambers, to be Assistant, for the West Ward of the said city; Col. Frederick Phillipse, to be Alderman, and Isaac De Peyster, to be Assistant, for the South Ward of the said city; Gerardus Stuyvesant, to be Alderman, and Samuel Kip, to be Assistant, for the Out Ward of the said city; Anthony Rutgers, Esq., to be Alderman, and Egbert Van Borssom, to be Assistant, for the North Ward of the said city; John Rosevelt, to be Alderman, and Petrus Rutgers, to be Assistant, for the East Ward of the said city; Johannes Hardenbrook, to be Alderman, and Gerardus Beekman, to be Assistant, for Montgomery Ward of the said city.

7. *And we do*, also, hereby nominate and appoint Cornelius De Peyster, to be the present Chamberlain and Treasurer of the city aforesaid; Colonel Henry Beekman to be the present Sheriff of the said city; Richard Nichols, gent., to be the present Coroner of the said city; Edmund Peers, to be the present High Constable, and Robert Crannel, to be present Marshal of the said city.

8. *And also*, We do hereby nominate and appoint John Le Montes, David Abeel, Assessors, Nicholas Van Taerling, Collector, and John Scott, Constable, for the South Ward of the said city; John Thurman and John Bogart, Assessors, and John Pearse, Collector, for the West Ward of the said city; Gerardus Duyckinck and Simeon Soumain, Assessors, George Brinckerhoof, Collector, and Christopher Nicholson, Constable, of the Dock Ward of the said city; John Brown and Nathaniel Marston, Assessors, Peter Noxen, Collector, and Timothy Bontecou, Constable, of the North Ward of the said city; John Pintard and Peter Van Dyck, Assessors, Ebenezer Grant, Collector, and John Abrahamson, Constable, of the East Ward, of the said city; Jacobus Kip, Assessor, and Cornelius Cousine, Collector, for the Bowery Division of the Out Ward; and Barent Waldren, Assessor, Derick Bensing, Collector, and Arent Bussing, Constable, for the Harlem Division of the said Out Ward.

9. *And we do* hereby appoint, order, and direct, that within forty days after the date hereof, the freemen of the said city being inhabitants in, and the freeholders of each respective ward in the said city, may and shall assemble themselves and meet together, at such time and place, in each of the said wards, as each respective Alderman, for each respective ward, shall appoint, and then and there, by plurality of their voices or votes, to elect and choose out of the inhabitants of each respective ward, being freeholders there, or freemen of the said city, the several officers following, to wit, one other Constable for the South Ward; one other Constable for the West Ward; one other Constable for the Dock Ward; one other Constable for the East Ward; two Assessors, one Collector, and two Constables, for Montgomerie Ward; and two other Assessors, and three other Constables, for the Out Ward, to wit: one other Assessor, and two Constables, for the Bowery Division, and one other Assessor, and one other Constable, for the Harlem Division of the said Out Ward. *And we do* hereby will and ordain, that each and every of the before named Mayor, Aldermen, Assistants, Chamberlain, Coroner, High Constable, and Marshal, and all and every the before named Assessors, Constables, and every other Assessor and Constable, hereafter to be chosen for any ward, or division of a ward, in the said city, before next *Michaelmas* day, on their being respectively sworn into their respective offices, as hereafter is directed, shall continue in their said respective offices, until the fourteenth day of October, next ensuing the date hereof, and from thence until other fit persons be respectively chosen and sworn in their respective rooms and places in manner and form, as is hereinafter directed. *And* we do also further ordain, order, and declare, for us, our heirs, and successors, that as well, the before named Sheriff, as every other person and persons hereafter to be appointed for or to the office of Sheriff of the said city, before he or they be permitted to exercise the said office, shall each of them give and enter into bond, to us, our heirs, and successors, with two or more sufficient sureties, in a penalty not less than one thousand pounds, conditioned for the faithful and due execution of his said office, in such manner as the Governor or Commander-in-Chief of the said province of New York, for the time being, shall think fit and appoint: And the before named Sheriff on his giving such security, and having taken such an oath as hereafter is directed, shall continue in his said office, until the fourteenth day of October, next ensuing, and from thence until another fit person is appointed and sworn into the said office, and has given such security as aforesaid.

10. *And we do hereby further*, for us, our heirs, and successors, appoint, and ordain, that the Governor, or Commander-in-chief of the said province of New-York, for the time being, by and with the advice of the council of us, our heirs, and successors, for the said province, for the time being, from time to time, shall have full power and authority, on the feast day of *St. Michael*, the Arch-Angel, in every year, forever hereafter, to name and appoint, and can, shall and may name and appoint, a discreet and fit person of the freeholders, freemen, or inhabitants of the said city, to be Mayor of the said city; and one other fit and able person, one of the freeholders or freemen, being an inhabitant of the said city, to be sheriff of the said city; and one other such person, to be Coroner of the said city, all for the ensuing year. *And also*, that on the said feast day of *St. Michael*, the Arch-Angel, in every year, forever hereafter, the freemen of the said city, being inhabitants, and the freeholders of each respective ward in the said city, shall and may assemble themselves and meet together, at such time of the day, and such public place in each of the said wards, as each respective Alderman, for each respective ward, for the time being, shall appoint; and then and there, by plurality of their voices and votes, to elect and choose out of the inhabitants of each respective ward, being freeholders thereof, or freemen of the said city, (except the Out Ward) for the ensuing year, one Alderman, and one Assistant, two Assessors, one Collector, and two Constables; and for the said Out Ward, four Assessors, two Collectors, and four Constables, to wit: two Assessors, one Collector, and two Constables, for each division of the said ward. *And also*, That the Mayor of the said city, for the time being, and four or more Aldermen, and four or more of the Assistants of the said city, for the time being, on the feast day of *St. Michael* the Arch-Angel, in every year forever hereafter, shall and may in common council, name and appoint one fit person, being a freeholder, or freeman, and an inhabitant of the said city, to be treasurer or chamberlain of the said city, for the year ensuing; and also that on the same day in every year, forever hereafter, the Mayor of the said city, for the time being, shall name and appoint one other of the said inhabitants, being a freeholder or freeman of the said city, to be High Constable of the said city, for the year ensuing; every of which persons, so to be named for Mayor, Coroner, High Constable, or Chamberlain, or so to be elected for Alderman, Assistant, Assessor, or Constable, on the feast day of *St. Michael*, shall on the fourteenth day of October then next ensuing their nomination, or election respectively, take the respective oaths hereinafter appointed for them respectively to take, in such manner and form as hereinafter is directed, and shall continue in their said respective offices, from their being so respectively sworn, until other fit persons be respectively named or elected, and sworn in their respective rooms and places. *And also*, That every person so to be named for Sheriff, on the said feast day of *St. Michael*, shall on the fourteenth day of October, then next ensuing his nomination, take such oath as is hereafter appointed for each Sheriff to take, and shall give such security as is hereinbefore appointed for each Sheriff to give, and shall remain in the said office, from the time of his being so sworn and giving such security, until another fit person shall be appointed and sworn into the said office, and shall have given such security as aforesaid. *And we do further*, for us, our heirs and successors, appoint and ordain, that if it should happen that either the Mayor, Sheriff, or Coroner, of the said city, for the time being, at any time (before other fit persons be so as aforesaid respectively named and sworn, in their respective rooms) should happen to die, then, and so often as it shall so happen, it shall and may be lawful for the Governor and Commander-in-chief of the said province, for the time being, by and with the advice of the said council for the said province, for the time being, in some convenient time thereafter, to name and appoint some fit and discreet person, being an inhabitant, freeholder, or freeman of the said city, to be Mayor of the said city in the room of such Mayor so dying; and one other fit and able person, as aforesaid, to be Sheriff of the said city, in the room of such Sheriff so dying; and one other fit person as aforesaid, to be Coroner of the said city, in the room of such Coroner so dying; and that every such person, so to be named Mayor, after having taken such oath, as is hereby appointed for each Mayor to take, shall remain in, and execute the said office of Mayor for the said city, until the fourteenth day of October then next ensuing, and until another fit person be named and sworn into the said office of Mayor of the said city; and every such person so to be named Sheriff, after having sworn and given such security, as is hereby appointed for each Sheriff to do, shall have, exercise, and remain in the said office of Sheriff of the said city, until the fourteenth day of October, then next, and until another fit person be named and sworn in the said office of Sheriff, and shall have given such security as hereinbefore is appointed for each Sheriff to give, and every person, so to be named Coroner, after having taken such oath as appointed hereby for each Coroner to take, shall exercise and remain in the said office of Coroner of the said city, until the fourteenth day of October, then next, and until another fit person be named and sworn into the office of Coroner of the said city.

11. *And we do moreover*, for us, our heirs, and successors, will, and by these presents grant to the said Mayor, Aldermen, and Commonalty of the city of New York, and to their successors forever, that if it should happen any of the present named Aldermen, or Assistants, Assessors, Collectors, or Constables, or any one of the Aldermen, Assistants, Assessors, Collectors, or Constables, hereafter to be elected and sworn, or to be sworn in their respective offices aforesaid, shall happen to die, or remove out of the said city, within the time they are, or shall be respectively named or elected for, or before other fit persons be respectively named or elected, and sworn in their respective rooms, it shall and may be lawful for the freemen, being inhabitants in, and the freeholders of each respective ward, for which such Alderman, Assistant, Assessor, Collector, or Constable, so dying or removing, had been named or chosen for, to assemble and meet together, at such time and place, in the said respective ward, as shall be appointed by the Mayor of the said city, for the time being, or his deputy, and then and there, by plurality of voices or votes of the freemen, being inhabitants in, and the freeholders of such ward, to elect one of the inhabitants of, and being a freeholder in such ward, or freeman of the said city, to serve as Alderman, Assistant, Assessor, Collector, or Constable for the said ward, in the room of such Alderman, Assistant, Assessor, Collector or Constable, so dying or removing; and so, as often as such cases shall happen. And in case the present named, or any future Chamberlain, or any High Constable of the said city, hereafter to be appointed, so sworn, or to be sworn in their respective offices aforesaid, should happen to die, or remove out of the said city, within the time they were or shall be respectively appointed for, it shall be lawful for the Mayor of the said city, for the time being, or his deputy, and four or more Aldermen, and four or more Assistants, for the said city, for the time being, in Common Council, to appoint another fit person to be Chamberlain in the room of such Chamberlain so dying or removing; and for the Mayor of the said city, for the time being, to appoint another fit person to be High Constable in the room of such High Constable so dying

or removing, and so as often as such cases shall happen. And all and every such person and persons so to be newly chosen or appointed Alderman, Assistant, Assessor, Collector, Constable, Chamberlain, or High Constable, shall serve in their respective offices, until other fit persons be respectively chosen, or appointed, and sworn, in their respective rooms, each of them (except the Collector) first taking such oaths as hereafter is appointed for each of them respectively to take.

12. *And we do further*, for us, our heirs, and successors, ordain, grant, and confirm, unto the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors, forever, that if any one of the inhabitants of the said city of New York, being a freeholder or freeman, as aforesaid, shall hereafter be elected or chosen to the office of Alderman, Assistant, Assessor, Collector, or Constable, for any ward in the said city, or shall be appointed to be High Constable of the said city, and have notice of his said election, shall refuse, deny, delay, or neglect, to take upon him or them to execute such office, to which he or they shall be so chosen or elected for, that then and so often as it shall happen, it shall and may be lawful for the Mayor, or his Deputy, or Recorder, and any four or more of the Aldermen, and any four or more of the Assistants of the said city, for the time being, in Common Council, to tax, assess, and impose, upon every such person or persons, so refusing, denying, delaying, or neglecting, such reasonable and moderate fine and fines, sum and sums of money, as they the said Mayor, or his Deputy, or Recorder, and any four or more Aldermen, and any four or more Assistants, in Common Council, shall think fit, so as such fine, for each refusal, denial, delay or neglect, shall not exceed the sum of fifteen pounds current money of New York; all which said fines shall and may be levied, by distress and sale of the goods and chattels of such delinquent and delinquents, by warrant under the seal of the said city, signed by the Mayor thereof, for the time being, rendering the surplusage to the owner or owners thereof, (if any be) the necessary charges of making and selling such distresses being first deducted, or, by action of debt, in any court of record, to be prosecuted or any other lawful method to be obtained; and shall be recovered and received by, and to the use of the said Mayor, Aldermen and Commonalty of the city of New York, and their successors forever, without any account thereof to be given to us, our heirs, or successors, or to any of the officers, or ministers of us, our heirs, or successors: And upon every such refusal, or neglect, other fit persons to be elected and chosen, in the room and rooms of such persons so neglecting, or refusing, in such manner, as is before directed or appointed, for electing and choosing of Aldermen, Assistants, Assessors, Collectors and Constables, and for appointing a High Constable, upon the death or removal of any of them respectively; and so as often as such cases shall happen.

And we do hereby, for us, our heirs, and successors, grant, appoint, and ordain, that if it shall happen, that the day or days appointed for the naming, appointing, electing or choosing, or for administering any oath or oaths to any of the officers or ministers of the said corporation, shall happen to fall on a Sunday, then, and in such case, such naming, appointing, electing, or choosing, so to be made, shall be made, and such oath, or oaths, so to be ministered, shall be administered on the next day, and so as often as such case shall happen.

14. *And further we do*, of our especial grace, certain knowledge, and meer motion, for us, our heirs, and successors, give, grant, ratify and confirm, unto the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors, forever, that the Mayor or Recorder, with four or more Aldermen, and four or more Assistants of the said city, for the time being, be, and shall be forever hereafter, called the Common Council of the city of New York: And that the said Common Council of the said city, for the time being, or the major part of them, have and may, and shall have full power, authority, and license, to frame, constitute, ordain, make, and establish, from time to time, all such laws, statutes, rights, ordinances, and constitutions, which to them, or the greater part of them, shall seem to be good, useful, or necessary, for the good rule and government of the body corporate aforesaid; and of all officers, ministers, artificers, citizens, inhabitants and residents of the said city, within the limits thereof, and for declaring how and after what manner and order, the Mayor, Recorder, Aldermen, and Assistants of the said city, for the time being, and all, and every of their officers and ministers, and all officers and ministers, and all artificers, inhabitants, and residents of the same city, and their factors, servants, and apprentices, in their offices, functions, and business, within the said city and the liberties thereof, for the time being, and from time to time, shall use, carry and behave themselves; and for the farther public good, common profit, trade, and better government and rule of the said city, and for the better preserving, governing, disposing, letting, and setting of the lands, tenements, possessions, and hereditaments, goods and chattels, to the aforesaid Mayor, Aldermen, and Commonalty of the said city of New York belonging, or to them and their successors hereafter to belong, and all other things and causes whatsoever touching or concerning the said city, or the state, right, and interest, of the same, (provided that such laws be not contradictory or repugnant to the laws or statutes of that part of our kingdom of Great Britain called England, or of our said province) which laws, statutes, ordinances, and constitutions, so to be made as aforesaid, may be and remain in force for twelve months from the day of the date thereof, and no longer, unless they shall be allowed of, and confirmed by the Governor and Council of the said province, for the time being; and that the said Common Council of the said city, for the time being, or the greater part of them, as often as they shall make, ordain, and establish such laws, statutes, rights, ordinances, and constitutions, in form aforesaid, may make, ordain, limit, and provide, such and the like pains, punishments, penalties, either by fines and amerciaments, or by disfranchising and amoving from the liberties, privileges, immunities, and freedom of the said city, or by either of them, towards and against all and every person that shall offend against such laws, statutes, rights, orders, and constitutions, or any or either of them, or by the said Common Council, or the major part of them, shall be thought necessary and requisite to make, ordain, limit and provide, for the observation and preservation of the same laws, rights, statutes, ordinances, and constitutions; and the same fines and amerciaments shall and may, from time to time, levy, receive, have, and recover, either by distress and sale of the goods and chattels of such delinquent and delinquents, by warrant under the hand and seal of the Mayor or Recorder, or any one of the Aldermen for the time being, rendering the surplusage to the owner or owners thereof (if any be) the necessary charges of making and selling such distress, being first deducted; or by action of debt, in any court of record to be prosecuted, or in any other lawful method to be obtained, and to the use of the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors forever, without any account thereof to be given to us, our heirs and successors, or to any of the officers or ministers of us, or our heirs, or successors: all and singular, which laws, statutes, rights, ordinances, and constitutions, so as aforesaid to be made, we do, for us, our heirs, and successors, will to be observed, under the pains, penalties, and forfeitures, in the same contained. *And we do further*, of our especial grace, certain knowledge, and meer motion, for us, our heirs, and successors, give, grant, ratify, and confirm, unto the said Mayor, Aldermen and Commonalty of the city of New York, and their successors forever, that the Common Council of the said city, for the time being, or the major part of them, shall have the sole power of determining and deciding all elections of all and every their officers and ministers, hereafter to be chosen and elected in, or for the said corporation, or any part thereof.

15. *And we do hereby*, for us, our heirs, and successors, ordain, declare, give, and grant, unto the said Mayor, Aldermen, and Commonalty, and their successors, that the Common Council of the said city shall be summoned, called, and held, from time to time, so often, and at such times and places, as the Mayor, or in case of his sickness or absence, the Recorder of the said city, for the time being, shall think fit to appoint or direct; and that it shall and may be lawful to and for the said Common Council of the said city, or the major part of them, to assess and lay such reasonable fines and amerciaments in and upon every officer and member of the body corporate aforesaid, for the time being, who after having had due notice, or being duly summoned to appear or attend at any such Common Council, to be held for the said city, shall neglect so to do, or make default therein, or shall not appear or attend according to such notice or summons, in that behalf, or show a reasonable cause, by the said Common Council, or the major part of them, at their discretion to be allowed, and so often as such case shall happen, so that no such fine or amerciament for any one default of appearance or attendance of any such officer or member of the body corporate aforesaid, shall exceed the sum of twenty shillings, in the manner and form aforesaid, to be levied, and by, to, and for the use of the Mayor, Aldermen, and Commonalty, of the said city, and their successors, to be recovered and received, without any account thereof to be given to us, our heirs, or successors, or any of our or their officers or ministers. *And we do further*, for us, our heirs, and successors, give, grant, and confirm, unto the Mayor, Aldermen, and Commonalty, of the said city of New York, and their successors forever, that the Common Council of the said city, for the time being, or the major part of them, (but no other person or persons whomsoever, without the consent, grant, or license, of the said Common Council of the said city, for the time being, or the major part of them,) from time to time, and at all times hereafter, shall and may have the sole, full, and whole, power and authority of settling, appointing, establishing, ordering, and directing, and shall and may settle, appoint, establish, order, and direct, such and so many ferries, round Manhattan's Island, alias New York Island, for the carrying and transporting people, horses, cattle, goods, and chattels, from the said Island of Manhattan to Nassau Island, and from thence back to Manhattan's; and, also, from the said Island Manhattan's to any of the opposite shores all round the same Island, in such and so many places as the said Common Council, or the major part of them, shall think fit, who have hereby, likewise, full power to let, set, or otherwise dispose of, all or any of such ferries, to any person or persons whomsoever; and the rents, issues, profits, ferriages, fees, and other advantages arising and accruing from all and every such ferries; we do hereby fully and freely for us, our heirs, and successors, give and grant unto the Mayor, Aldermen, and Commonalty, of the city of New York aforesaid, and to their successors forever, to have, take, hold, and enjoy the same, to their own use, without being accountable to us, our heirs, or successors, for the same or any part thereof.

16. *And we do further*, for us, our heirs, and successors, give, grant, ratify, and confirm, unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors forever, that the Common Council of the said city, for the time being, or the major part of them, have, and from time to time, and at all times hereafter forever, shall have full power, license, and authority, not only to establish, appoint, order, and direct, the making and laying out of all other streets, lanes, alleys, highways, water-courses, and bridges, not already made or laid out, but also the altering, amending, and repairing all such streets, lanes, alleys, highways, water-courses, and bridges, heretofore made or laid out, or hereafter to be made or laid out, in and throughout the said city of New-York, and the Island of Manhattan's, in such manner as the said Common Council, for the time being, or the major part of them, shall think or judge to be necessary and convenient for all inhabitants and travellers there.

17. *And further*, we do hereby, of our especial grace, certain knowledge, and meer motion, for us, our heirs, and successors, give, grant, ratify, and confirm unto the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors, that they and their successors, shall and may have, hold, and keep, markets, at five several places (in the said city of New York, on every day in the week throughout the year, except Sunday) as follows, to wit: One market at Coenties Dock; one other market at the Old Slip, at Burgher's Path; one other market at Countesses Slip: one other market at the lower end of Wall street; and one other market by the Long Bridge. And, also, we do for us, our heirs, and successors, grant unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors forever, that they and their successors shall and may have, hold, and keep such and so many other markets, at such and so many other times and places in the said city of New York, as shall from time to time be ordered, established, erected, and appointed, by the Common Council of the city aforesaid, for the time being, or the greater number of them.

18. *And we do further*, for us, our heirs, and successors, give and grant unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors, that they and their successors, may and shall have the assize and essay of bread, wine, beer, ale, and all other victuals and things whatsoever, set to sale in the said city and the liberties, and limits thereof; and the amending and correcting of the same assize; and all amerciaments, fines and forfeitures to be laid and forfeited, concerning the same, or any part, thereof, without any account thereof to be given to us,

our heirs, or successors; and to perform, do, and act, by themselves or their deputies all and every thing, needful or necessary in, about, or concerning the same.

19. *And we do hereby further*, for us, our heirs and successors, grant and give unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors forever, the office of gauger of and in the said city, to gauge all and singular the wine, rum, brandy, molasses, beer, ale, cider, and other merchandizes and vessels gaugeable or to be gauged within the said city; except such liquors as are to pay duty by virtue of any Act of Assembly, until after they have been gauged by the public officer appointed for that purpose: And the office of measurer of and in the said city, to measure salt, wheat, oats, and other grain, and all other merchandise measurable or to be measured in the said city; and also the offices of surveyor and packer of bread, flour, beef, pork, and other provisions, and all other merchandises, and commodities to be surveyed, or packed in the said city; and also the office of cartage, carriage, and portage, of all goods, wares, merchandises, and other things to be carted or carried in or through the said city or any part thereof; And also the office of garbling of all manner of spices, and other merchandise and things to be garbled in the city aforesaid: To have and to hold the several offices aforesaid, and every of them, and the disposition, ordinances and corrections of the same, and to exercise the same by themselves or their deputies: and to take and receive to themselves all fees, profits and perquisites, to the said offices and every of them, due or to be due, and all the fines, amerciaments and forfeitures to be laid and forfeited concerning the same, or any part thereof, to them the said Mayor, Aldermen, and Commonalty, and their successors, to their own proper use forever, without any account, or any other thing, to us or our heirs, or successors, to be given or made.

20. *And further*, That the Mayor of the said city, or his Deputy, for the time being, and any four or more of the Aldermen, for the time being, shall from time to time, and at all times forever hereafter, have full power and authority, under the common seal of the said city, to make free citizens of the said city and liberties thereof; and that every person so to be made a free citizen shall pay on his being made free, for the use of the said Mayor, Aldermen, and Commonalty of the city aforesaid, and their successors forever, a sum not exceeding five pounds, New York money; and we do, for us, our heirs, and successors, give and grant unto the said Mayor, Aldermen, and Commonalty, and their successors forever, full power to ask, take, demand and receive the same, to their own use and behoof, without any account thereof to be given to us, our heirs, or successors, or any other person or persons whatsoever.

21. *And we do hereby*, for us, our heirs, or successors, constitute, appoint and ordain, that no person whatsoever, not being a free citizen of the said city as aforesaid, shall, at any time hereafter, use any art, trade, mystery, or occupation, within the said city, liberties, and precincts thereof, or shall by himself, themselves, or others, sell, or expose to sale, any manner of goods, wares, merchandises or commodities, by retail, in any house, shop, place, or standing within the said city, or the liberties or precincts thereof, save in the times of public fairs, and that every such person so using any art, trade, mystery, occupation, or so retailing, contrary to the intent and meaning of these our present letters, and shall persist therein after warning to him or them thereof given, or left by the appointment of the Mayor of the said city, for the time being, or dis deputy, at the place or places where such person or persons shall so use any art, trade, mystery, or occupation, or expose to sale, by retail as aforesaid, any goods, wares, merchandises, or commodities, as aforesaid, shall forfeit the sum of five pounds, New York money, to and for the use of the said Mayor, Aldermen and Commonalty of the city of New York, and their successors, for every time that he or she shall so use any trade, mystery or occupation, or expose to sale, by retail, as aforesaid, any goods, wares, merchandises, or commodities, after such warning given or left as aforesaid:—all and every of which same forfeitures shall and may be levied by distress and sale of the goods and chattels of such delinquent and delinquents, by warrant under the seal of the said city, signed by the Mayor thereof, for the time being, or his deputy, rendering the surplusage to the owner or owners thereof (if any be) the necessary charges of making and selling, such distress being first deducted; or by any other lawful method to be obtained; and shall be recovered and received by and to the only use of the Mayor, Aldermen, and Commonalty of the city of New York, and their successors forever, without any account thereof to be given to us, our heirs, or successors, or to any of the officers or ministers of us, our heirs, or successors:—*Provided always*, and we do hereby, for us, our heirs and successors, direct, appoint and order, that no person or persons shall be made free as aforesaid, but such as are or shall be natural born subjects of us, our heirs, or successors, or shall be naturalized or made denizens. *And we do further*, for us, our heirs and successors, ordain and appoint, direct, will, and grant that all and every person and persons, now living, who at any time heretofore, have been admitted free citizens, or into the freedom of the said city of New York, shall be and remain free thereof, and free citizens, and have and enjoy the said freedom, and all the rights and privileges of freemen and free citizens of the said city of New York to all intents and purposes whatsoever.

22. And, for the better preservation of good rule and order in the said city, we do, for us, our heirs and successors, will, ordain, grant, unto the Mayor, Aldermen and Commonalty, of the said city, and their successors, that the Common Council of the said city, for the time being, or the major part of them, shall have full power and authority to license or appoint by warrant, under the common seal of the said city, or otherwise, one or more surveyors of flour, bread, beef, pork, and other provisions, measurers of grain, salt, and all other commodities, gaugers of wine, beer, ale, cider, rum, brandy, and all other saleable and exciseable liquors, garbles, beadles, bell-men, watch-men, bridewell keepers, or keepers of a house or houses of correction, and of alms houses, cryers, and bell ringers, and to displace all or any of them and put others in their room, and to add or diminish the number of them, or any of them, as often as the said Common Council of the said city, or the major part of them, shall think fit.

23. *And further*, we do for us, our heirs and successors, grant unto the said Mayor, Aldermen and Commonalty, and their successors forever, full power and authority to erect and build, or appropriate any other buildings already built, for one or more bridewell or bridewells, house or houses of correction, and work-house or work-houses, together with full power and authority to the said Mayor, Recorder and Aldermen, or any one of them, to take up and arrest, or order to be taken up and arrested, all and any rogues, vagabonds, stragglers, and idle and suspicious persons; and as they the said Mayor, Recorder or Aldermen, or any one of them, shall see cause, to order all or any such rogues, vagabonds, stragglers, and idle and suspicious persons, either to the said work-house, there to remain, and work such work, and so long, not exceeding forty days, or else to bridewell or the house of correction, there to receive such punishment, not extending to the loss of life or limb, as the said Mayor, Recorder and Aldermen, or any one of them, shall think fit. *And also*, that they the said Mayor, Aldermen and Commonalty, and their successors forever, may, and shall have power to build, erect, or appropriate, any of their buildings already built for an alms-house, for relief of the poor; together also with as full and ample power to them, and their successors, to order, direct, and act in and about the said houses of correction, work-houses, and alms-houses, and the persons to be put in and ordered there, as to any city or corporation, in any place of that part of our realm of Great Britain, called England, and the officers or ministers thereof, doth or may belong. *And also*, that they the said Mayor, Aldermen and Commonalty, and their successors forever hereafter, may have one or more gaol or gaols, in such fit place or places, within the said city and limits and jurisdiction thereof, as by the Common Council of the said city, for the time being, or the major part of them, shall be appointed, to imprison and safe keep, all and every person and persons for any treasons, murders, felonies, trespasses, evil doings, and all other matters and causes whatsoever, to be arrested or attached, or to be committed to the gaol or gaols aforesaid, in safe custody, there to remain, until they be delivered by due course of law. And that the Common Council of the city aforesaid, for the time being, or the major part of them, shall, and may have power, from time to time, to choose, constitute and place, one or more fit person or persons, in the office or offices of keeper or keepers of the gaol or gaols aforesaid, to hold the same during the good pleasure of the Common Council of the said city, for the time being, or the major part of them, as aforesaid requiring, and, hereby, for us, our heirs, and successors, impowering and commanding the keeper and keepers of the gaol or gaols aforesaid, for the time being, that all and singular, traitors, murderers, felons, malefactors, disturbers of the peace, and other delinquents, and all others, for any crime or offence, or other reasonable cause or matters, to the gaol or gaols aforesaid, ordered or committed, or to be committed or ordered, from time to time, shall receive, take, keep, and cause to be kept in the same gaol or gaols, until they shall be thence delivered by due course of law.

24. *And we do further*, for us, our heirs, and successors, will, ordain, and grant, that the Mayor of the said city, for the time being, shall forever hereafter, be clerk of the market, of us, our heirs, and successors, within the city aforesaid, and the limits, liberties and precincts thereof; and that the Mayor of the said city, for the time being, by himself or his deputy, may and shall have power and authority to do and execute, and shall and may do and execute forever, within the limits, liberties and precincts of the said city, all and whatsoever to the office of clerk of the market there doth, shall, or may belong, without any hindrance or impediment of us, our heirs, or successors, or any the officers of us, our heirs or successors; and that no other clerk of the market shall intermeddle there. *And also*, that the Mayor of the said city, for the time being, and his successors, during the time of his and their mayoralties, and no other, be and shall be, the bailiff and conservator of the water of the north and east rivers, and shall and may do, exercise and execute, the said office of bailiff and conservator of the waters of the north and east rivers, or water bailiff, by him or themselves, or by his or their sufficient deputy or deputies, in, upon, or about, the same water of the north and east rivers (*that is to say*) in and through all the limits, bounds, and jurisdiction of the said city of New York, upon all and every the banks, shores and wharves of the same water of the north and east rivers, within the limits and bounds aforesaid; and to have, receive, collect and enjoy, all and singular, wages, rewards, fees, and profits, to the same offices of clerk of the market, and water bailiff, or any of them, due or to be due, or belonging to his or their own use, without any account thereof, to us, our heirs, or successors, to be made. *And also*, that the Mayor of the said city, for the time being, shall have full power and authority to license or appoint, by warrant, under his hand and seal, or otherwise, one or more marshal or marshals of the said city, porters, carriers, cartmen, carmen, packers, cullers, common cryers, scavengers, and to displace all or any of them, and to put others in their rooms; and to add to, or diminish the number of them, or any of them, when and as often as the Mayor of the said city, for the time being, shall think fit.

25. *And we do further*, for us, our heirs and successors, grant, ratify and confirm, unto the said Mayor, Aldermen and Commonalty, of the city of N. York, and their successors forever, that the Mayor of the said city for the time being, and no other whatsoever, shall have power to give and grant licenses annually, under the public seal of the said city, to all such persons as he shall think fit to license them, and every of them to keep a tavern inn, ordinary, or victualling-houses, to sell wine, brandy, rum, strong waters, cider, beer, ale, or any other sort of exciseable or strong liquors, within the city of New York, or the liberties and precincts thereof, by retail or the small measure, and that it shall be lawful to and for the said Mayor of the said city, for the time being, to ask, demand, and receive, for every such license, by him to be given and granted, as aforesaid, such sum or sums of money, as he and the person to whom such license shall be given and granted, shall agree for, not exceeding the sum of thirty shillings for each license; all which moneys, as by the said Mayor shall be so received, shall be used and applied to the public use of the said Mayor, Aldermen and Commonalty of the said city of New York, and their successors forever, without any account thereof to be rendered, made or done, to us, our heirs or successors, or any other persons whatsoever; every and each of which license shall continue and be in force for any time, not exceeding one year from the granting thereof, but no longer. *And we do hereby*, for us, our heirs and successors, constitute, direct, order and appoint, that no person or persons whatsoever, without such license being in force, shall at any time hereafter keep any tavern, inn, public ordinaries, or victualling-houses, or sell wine, brandy, rum, strong waters, cider, beer, ale, or any other sorts of exciseable or strong liquors, within the city of New York, or the liberties or precincts thereof, by retail or small measure, under the penalty of five pounds, current money of New York, for every time that any person shall act contrary hereto in any respect, to be forfeited and paid by every person, for every time he or she shall offend or act contrary hereto in any respect, to and for the use of the said Mayor, Aldermen,

and Commonalty of the city of New York, for the time being; all and every of which penalties shall and may be levied by distress and sale of the goods and chattels of such delinquent and delinquents, by warrant under the seal of the said city, signed by the Mayor thereof, for the time being, or his deputy, rendering the surplusage to the owner or owners thereof, if any be, (the necessary charges of making and selling such distress being first deducted,) or by any other lawful method to be obtained; and shall be recovered and received by and to the only use of the Mayor, Aldermen and Commonalty of the city of New York, and their successors forever, without any account thereof to be given to us, our heirs, or successors, or to any of the ministers or officers of us, our heirs or successors.

26. *And further, we*, of our especial grace, certain knowledge, and meer motion, have given, granted, ratified, and confirmed, and by these presents do, for us, our heirs, and successors, give, grant, ratify, and confirm unto the said Mayor, Aldermen, and Commonalty of the city of New York, and to their successors forever, that the Mayor, deputy Mayor, Recorder, and Aldermen, of the said city, for the time being, be, and shall be at all times forever hereafter, and hereby are assigned to be justices, and each of them a justice of us, our heirs and successors, the peace of us, our heirs and successors, within the city aforesaid, and the limits, jurisdiction, and extent thereof, and within the county of New York, to keep: and that they, the said Mayor, deputy Mayor, Recorder and Aldermen, of the said city for the time being, or any four or more of them, (whereof we will the Mayor, or deputy Mayor, or Recorder of the said city, for the time being, to be one,) shall and may forever hereafter hold and keep four courts of general sessions of the peace, in and for the said city and county of New York, to begin at certain times in the year, *to wit:* one of them to begin on the first Tuesday in November; another on the first Tuesday in February; another on the first Tuesday in May; and the other on the first Tuesday in August, in every yaer; each of which sessions of the peace, shall and may last, continue, and be held any time, not exceeding four days. *And also*, that they, the said Mayor, deputy Mayor, Recorder and Aldermen of the said city, for the time being, or any four or more of them, (whereof we will the Mayor, or deputy Mayor, or Recorder of the said city, for the time being, to be one,) shall and may forever hereafter, have full power and authority to enquire of and hear and determine, within the city and county aforesaid, all and all manner of felonies, imprisonments, riots, routs, oppressions, extortions, forestallings, regratings, trespasses, offences, and all and singular other evil deeds and offences whatsoever, within the city and county aforesaid, from time to time perpetrated, done, arising, or happening, which to the office of justices of the peace, are incumbent, or do in any manner belong, or which thereafter shall happen to belong, or be incumbent on them, or which in any manner before justices of the peace ought or may be inquired into, heard and determined, together with the correction and punishment thereof, and to do and execute all other things, within the city and county aforesaid, and the liberties and precincts thereof, as fully, freely, and entirely, and in as ample manner and form as justices of the peace of us, our heirs and successors, any where within that part of our Kingdom of Great Britain, called England, by the laws, statutes, or customs of England, or by any other legal method whatsoever, heretofore had or exercised, or hereafter to be had or exercised, could, might, or can do, and in as ample manner and form, as if the same had been in these our letters particularly, and by special words expressed, contained and mentioned. And that the said justices of the peace, of us, our heirs and successors in the city and county aforesaid, may have and exercise jurisdiction in all causes, matters and things whatsoever, which to justices of the peace of our said city and county, in any manner do, or ought to belong. *And further*, that the Mayor, Recorder and Aldermen, of the said city, for the time being, and every of them from time to time, and at all times for ever hereafter, shall be justices assigned of *Oyer and Terminer*, and of the gaol delivery of all and every the gaols now being, and hereafter to be in the said city and county, and either of them, and shall be named in every commission thereof to be made. *And we do hereby*, for us, our heirs and successors, grant, order, and appoint that the Sheriff and other ministers and officers of the said city, for the time being, shall and may, and they are, and each of them is hereby commanded, authorised, and fully empowered to execute and return all and every the precepts and commands of the Mayor, Recorder and Aldermen, of the said city, for the time being, and either, or any of them, from time to time, at all times, as fully and effectfully as any sheriff, minister, or officer, of any county or city, any where in that part of our kingdom of Great Britain, called England, the mandates or commands of any justice of the peace, justice of *Oyer and Terminer*, of gaol delivery of, or in any county there, hath used to make return or execute, in any manner whatsoever.

27. *And we do further*, of our special grace, certain knowledge, and meer motion, will, and by these presents, for us, our heirs and successors, give, grant, ratify, and confirm, unto the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors forever, that they, and their successors forever, hereafter, shall, can, and may have and hold, in the name of us, our heirs and successors, one court of record, within the city of New York, and the liberties and precincts thereof, upon every Tuesday in every year, before the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city, for the time being, and any three or more of the Aldermen, for the time being, or any four or more of them (whereof we will the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city, for the time being, to be one). And, that the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city, for the time being, and three or more of the Aldermen, and any four or more of them, (whereof we will the said Mayor, or his deputy, or the Recorder, to be one,) shall and may hold, plea, and have cognizance of all and all manner of plaints, actions and pleas, of any lands and tenements, within the said city of New York and the limits and precincts thereof; and also of all actions of trespass with force and arms, and without replevin, ejectment, trover and conversion, trespass upon the case, debt, detinue, covenant, deceits, contracts, contempts, penalties, forfeitures, and all other actions and pleas, as well real as personal, and mixt, arising and accruing within the said city and limits thereof; together with full power and authority to hear and determine all and every the same, and such actions and pleas aforesaid, and judgments thereon, to render, and executions thereof to award and make, and to act and do every thing therein in such manner and form, and by such, and the like methods, process and proceedings, as fully and amply as in our other courts of record, in such or the like cases is used, or can or may be acted and done, according to the laws of that part of our kingdom of Great Britain, called England, and of our said province of New York.

28. *And we do hereby*, for us, our heirs and successors, grant, order, and appoint, that the sheriff and the coroner, and other ministers, and officers of the said city, for the time being, shall and may, and they are, and each of them is hereby commanded, authorised, and fully empowered, to execute and return all and every the precepts and process of the said court to them respectively directed, or to be directed from time to time, and at all times, as fully and effectually as any sheriff, coroner, minister or officer, of or in any city or place within that part of our kingdom of Great Britain, called England, the precepts and processes of any court of record there, hath used, or can or may execute and return, in any manner howsoever; *Provided always*, that the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city, for the time being, and any three or more of the Aldermen of the said city, or any four or more of them (whereof the Mayor or his deputy, or the Recorder, we will to be one) may and by these presents have and shall have full power to adjourn the said court for any time not exceeding twenty-eight days.

29. *And we do further* will, and by these presents, for us, our heirs and successors, give, grant, ratify, and confirm, unto the said Mayor, Aldermen, and Commonalty, of the city of New York, and their successors, that they and their successors, from henceforth forever hereafter, shall and may have within the city aforesaid, a fit and discreet man to be, and who shall be, and be called, the Common Clerk of the city aforesaid, to act and do all those things within the city aforesaid, and the limits and jurisdiction thereof, which to any Common Clerk of or in any city, borough, or town incorporated, any where in that part of our kingdom of Great Britain called England, by virtue of his office, can or ought to do. And also, that forever hereafter, the Common Clerk of the city aforesaid, for the time being, shall also be clerk of the court of record, to be held before the Mayor, or his deputy, or the Recorder, or any three or more of the Aldermen of the said city as aforesaid; and also clerk of our peace, and of the peace of our heirs and successors, and of the sessions of the peace, for and in the city and county of New York, from time to time to be held, and all and singular those things which to the offices of such clerk of the Peace, and of the sessions of the peace, do and shall appertain, to do, act, and execute; and also, shall and may require, demand, take, accept, hold, keep and enjoy, all fees, perquisites and profits, which may to any such common clerk, clerk of the peace, and of the sessions of the peace, do or ought to belong. *And we hereby*, give, grant, ratify, and confirm, for us, our heirs and successors, unto our beloved William Sharpas, Gen. (one of the inhabitants of the city aforesaid) to be the present common clerk of the city of New York aforesaid; and also clerk of the peace, and of the sessions of the peace, for, and in the city and county of New York, to continue in the offices aforesaid, during his life, and to act and execute the same offices and places by himself or his deputy *And we do further*, for us, our heirs and successors, appoint, will, and direct, that the Governor or Commander-in-Chief of the said Province of New York, for the time being, from time to time, and at all times, after the death of the said William Sharpas, when and so often as the office and place of Common Clerk of the said city shall happen to be vacant, shall and may appoint an honest and discreet man, being one of the inhabitants, and a freeman or freeholder of the said city, to be Common Clerk of the said city, during his good behaviour; and so as often as such case shall happen. *And we do further*, for us, our heirs and successors, will and grant, that so often as the said office shall be vacant, the Common Council of the said city, for the time being, shall and may appoint one other honest and discreet citizen, being an inhabitant and freeman, or freeholder of the said city, to be Common Clerk of the said city, and Clerk of the said Court of Record, in and for the said city; and Clerk of the Peace, and of the Sessions of the Peace in and for the said city and county of New York, to act and execute the said offices, and who shall and may execute, do, and receive, all and whatsoever to the said offices, and every of them, belongs, or shall belong or appertain, till in his room, another honest and discreet person, being an inhabitant and freeman, or freeholder of the said city, shall be appointed into and for the said offices, by the Governor or Commander in Chief of the said province for the time being; and shall have taken such an oath as is hereby directed for every such person so to be appointed, to give and take; and so from time to time, and so often as the case may or shall so happen.

30. *And further*, we do hereby constitute, name, and appoint, James Alexander, Joseph Murray, John Chambers, William Smith, George Lurting, William Jamison, Richard Nicolls and Abraham Lodge, gentlemen, to be the present attornies, and each of them to be an attorney of and in the said court of record, for and during the good behaviour of each of them respectively: And we do hereby, for us, our heirs and successors, grant and ordain, that no other attorney or attornies, person or persons whomsoever, (besides the aforenamed attornies, during the time that they shall all remain attornies of the said court) shall be permitted or suffered to practice as an attorney of or in the said court; but all and every other attorney and attornies, person and persons (besides the before named attornies, during the time aforesaid) from being an attorney or attornies of or in the said court, and from all practice as such, shall be, and are and each of them is excluded and debarred. *And we do hereby*, for us, our heirs and successors, give and grant unto the said Mayor, Aldermen and Commonalty of the city of New York, and their successors for ever, that the Mayor of the said city, for the time being, or his deputy, or the Recorder, and any three or more of the Aldermen of the said city for the time being, or any four or more of them, (whereof we will the Mayor or his deputy, or the Recorder of the said city, for the time being, to be one) shall and may (by and with the consent and approbation of our Governor and Commander-in-Chief for the time being) have full power and authority, all or any of the before named attornies of the said court, and all or any other of the persons, hereafter to be appointed or admitted attornies of or in the said court, for their or his evil behaviour, in their or his said duty or place of attornies, or an attorney [illegible]

before named, or hereafter to be admitted, to recommend one other person to the Governor or Commander in Chief of the said province of New York for the time being, for his approbation, in the room of such attorney so dying or being removed; each of which persons, so to be recommended, and approved of, as aforesaid, shall and may be admitted and sworn an attorney of, and in the said court; and so often as the case shall happen. *And we do further*, for us, our heirs and successors, grant and appoint, that no other attorney or person whatsoever, shall, after the death or amoval of any of the before named attornies, be admitted or suffered to practise as an attorney of or in the said court, but what shall be recommended and approved of as aforesaid. *And further*, we do, for us, our heirs and successors, grant, will, and ordain, that the number of attornies of the said court, shall not at any one time after the death or removal of any two or more of the before named attornies, for ever hereafter exceed the number of six:—*Provided*, that nothing herein shall be construed to extend to hinder us, our heirs or successors, from prosecuting or defending, all or any suits, causes, actions, or prosecutions, in the said Mayor's Court, by our attorney or solicitor general for our said province, or the attorney or solicitor general of us, our heirs or successors, for the said province, for the time being; nor to hinder the attorney or solicitor general of us, our heirs or successors, for the said province, for the time being, to practice in the said court as council in any civil cause.

31. *And we do further* of our especial grace, certain knowledge, and meer motion, for us, our heirs, and successors, grant, appoint, and direct, that the Mayor, Recorder, and Aldermen, of the said city, for the time being, and each of them, from time to time, and at all times, forever hereafter, shall have, by these presents, full power and authority to have and take *cognizance* of, and to hear, try, and finally determine, with or without a jury, all pleas, suits, controversies, and trespasses, wherein the value does not exceed the sum of forty shillings, in such manner as they or either of them shall think or judge to be agreeable and according to equity and good conscience; and for the more due proceeding herein, it shall and may be lawful for them or either of them, to administer an oath to the plaintiff or defendant, and also to such witnesses, as shall be produced by each party, if they the said Mayor, Recorder, and Aldermen, or either of them think fit; and in case either of the parties, plaintiff or defendant, shall not perform such order, judgment, or decree, as the said Mayor, Recorder, or Aldermen, for the time being, or any of them, shall make or set down, then it shall and may be lawful for them or any of them, to commit such party or parties to any prison of or in the said city there to remain until he, she, or they, perform such order, and every marshal of the said city for the time being, is hereby commanded and authorized to execute all and any the summonses, precepts, and commands, of them the said Mayor, Recorder, and Aldermen, or any one of them, made, issued, or given in, about, or concerning, such suits, pleas, controversies, and trespasses, or any of them, as shall be to him directed: and every keeper of the gaol for the city of New York, for the time being, is hereby commanded and authorised to receive, and safe keep, in his gaol or custody, all such parties so committed or to be committed to the prison he shall be then the keeper of, until he, she, or they, shall perform such order accordingly.

32. *And we do*, for ourselves, our heirs, and successors, by these our present letters, require and strictly charge and command, and fully empower, the sheriff, common clerk, chamberlain, marshal, gaol keepers, high constable, petty constables, and all other subordinate officers, of and in the said city, now chosen, elected, constituted, or appointed, or that hereafter may be chosen, elected, constituted, or appointed, and every of them respectively, jointly, and severally, as cause shall require, to be obeisant and obedient to, and attend upon the said Mayor, Recorder, and Aldermen, of the said city, and every or any of them, at all times hereafter, according to the duty or obligation of their respective offices and places; and to execute all and every, the commands, precepts, warrants, and processes, to them respectively directed and issued, and given out, and to be issued and given out, by them the said Mayor, Recorder, and Aldermen, or any one of them.

33. *And we do further* hereby will, declare, and ordain, that before the Mayor, deputy Mayor, Recorder, Aldermen, Assistants, Assessors, Sheriff, Coroner, Common Clerk, Chamberlain, High Constable, and Petty Constables, of the said city, such of them as are hereby appointed and named, and all and every such as hereafter are to be appointed, elected, or chosen, shall, before they be respectively permitted to execute their respective offices, or places aforesaid, respectively be sworn as follow, *to wit:* The hereby named Mayor of the said city, and every other person, hereafter to be appointed to, or for that office, to take the proper oath as such, and well and truly to execute the office of Mayor, and all other offices and places, hereby appointed for each Mayor to execute and act in, and the usual oath of a justice of peace, before the Governor or Commander in Chief of the said province of New York, for the time being, in presence of three or more of the Aldermen of the said city of New York, for the time being; or, in case of the absence of the Governor or Commander in Chief, for the time being, then before the oldest counsellor of the said province, for the time being, in the presence of three or more of the Aldermen of the said city for the time being. *And we do hereby*, for us, our heirs and successors, give and grant full power and authority to the Governor or Commander in Chief of the said province for the time being, in the presence of three or more of the Aldermen of the city aforesaid, for the time being, or in case of the absence of the said Governor or Commander in Chief, then to the oldest counsellor of the said province for the time being, in the presence of any three or more of the Aldermen of the said city, for the time being, to administer such oaths accordingly, without any other warrant, commission, or power from us, our heirs, or successors; and so from time to time, as often as the case shall or may require or happen. *And* the above named Recorder of the said city of New York, and every other person hereafter to be appointed to or for that office, to take the proper oath, as such officer ought to take, and an oath, well and truly to execute the office of Recorder, and the proper oath of a justice of peace, before the Mayor of the said city, for the time being, or his deputy; to which same Mayor, for the time being, or his deputy, we do, for us, our heirs, and successors, give full power and authority by these presents, to administer such oaths accordingly, in manner aforesaid, without any other warrant, commission, or power from us, our heirs, and successors; and every deputy Mayor or every Alderman hereafter to be appointed to act as deputy Mayor, for the time being, to take the proper oath as such, an oath, well and truly to execute the office of a deputy Mayor, during the time for which he shall be appointed deputy, if the same Mayor, his constituent, shall so long live: And if the said Mayor shall happen to die within such time, that *thereupon*, and from thenceforth, such deputy Mayor shall well and truly execute the office of Mayor of the said city, until another fit person be appointed and sworn Mayor of the said city, in the manner in these present letters mentioned; and shall also take the proper oath of a justice of the peace, before the Mayor or Recorder, and any three or more of the Aldermen of the said city for the time being. *And we do hereby*, for us, our heirs, and successors, give full power and authority to the Mayor, or Recorder of the said city, and to any three or more of the Aldermen of the said city, for the time being, to administer such oaths, as aforesaid, without any other warrant, commission, or power from us, our heirs, or successors. *And also*, every Alderman hereby appointed, and every person hereafter to be elected to or for the office or place of Alderman of or in the said city, to take an oath, well and truly to execute the office or place of Alderman and the proper oath of a justice of peace, before the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city, for the time being; And also every Assistant, Assessor, Sheriff, Coroner, Common Clerk, Chamberlain, High Constable, and Petty Constable, hereby named, and every person hereafter to be elected or appointed to or for the office or place of an Assistant, Assessor, Coroner, Common Clerk, or Chamberlain, or shall be appointed or elected to or for the office or place of High Constable or Petty Constable of or in the said city, each of them respectively to take the proper oath for his respective office, or place, and well and truly to execute the respective offices or places he is or shall have been respectively elected or named for before the said Mayor of the said city for the time being, or his deputy, or the Recorder of the said city for the time being. *And we do hereby* give full power and authority to the Mayor of the said city, for the time being, or his deputy, or the Recorder of the said city for the time being, to administer such respective oaths to each of the respective persons aforesaid, accordingly, without any other warrant, power, or authority, from us, our heirs, or successors.

34. *And further*, of our especial grace, certain knowledge, and mere motion, we have granted and by these presents do, for ourselves, our heirs, and successors, grant and confirm unto the aforesaid Mayor, Aldermen, and Commonalty of the city of New York aforesaid, and to their successors, that neither they, nor any of them, nor any free citizen of the said city, during the time of their being inhabitants there, shall against their or any of their wills, out of the city aforesaid, be put or empanelled upon or in any assizes, juries, or inquisitions whatsoever, (although it toucheth or doth or shall touch us, our heirs or successors, and although we, or our successors, be, or should, or shall be parties) out of the said city, neither shall they or any one of them be made, elected, or chosen Assessor, Taxer, or Collector of any taxes, duties, imposts, or subsidies, whatsoever, or of any part or parcel of them, or of any of them, out of the said city; nor shall be ordained, elected, assigned or appointed constable, bailiff, or any other officer or minister, without or beyond the city aforesaid, and the liberties and precincts thereof; nor shall be called upon, compelled, or forced, against their or any of their wills, to do, receive, occupy, or discharge, any of the duties or functions above mentioned, or any other office, duty, or function, whatsoever, without the city, liberties, and precincts aforesaid. And although the aforesaid Mayor, Recorder, and Aldermen, Freemen, or free citizens, of the city aforesaid, or any of them, shall, while they are or remain inhabitants of the said city against their, or any of their wills, be put impanelled, or returned upon any assizes, juries, or inquisitions whatsoever, out of the said city and limits thereof; or shall to any of the offices above mentioned, or any other office or function whatsoever, out of the said city, be elected or chosen; and though they, or any of them, being summoned, impanelled, or returned, elected, or chosen, as aforesaid, shall refuse or neglect to come and appear before our justices, or other justices, commissioners, or officers, of us, our heirs, or successors, (before whom such assizes, juries or inquests shall happen to be summoned or returned) or in or upon the same assizes, juries, or inquests, shall refuse or neglect to be sworn or tried, or any of the offices, duties, or functions, aforesaid, shall refuse to do, receive, occupy, or discharge, yet the person or persons so refusing any contempts, fines, amerciaments, penalties, forfeitures or loss whatsoever, by reason of such refusal or neglect, to or towards us, our heirs, or successors, shall not, nor either of them, shall in any wise incur, but therefrom and thereof, as well as before us, our heirs, and successors, as all other the justices, commissioners, and other officers whatsoever of us, our heirs, or successors, shall remain quiet, and forever discharged.

35. *And further*, we do for us, our heirs, and successors, by these present letters give, grant, ratify, and confirm, unto all and every the respective inhabitants and freeholders of the said city of New York, and their several and respective heirs and assigns forever, all and every the several and respective messuages, tenements, lands, and hereditaments, situate, lying and being in the said city, and Manhattan's Island aforesaid, to them severally and respectively granted, conveyed or confirmed, or mentioned or intended to be granted, conveyed, or confirmed, by any of the late Governors, Lieutenant-Governors, or Commanders-in-Chief, of the said province, or by any of the former Mayors, or deputy Mayors, and Aldermen and Commonalty of the said city of New-York, by that or any other name, stile, or title, or by others claiming under any such grant or conveyance, to have and to hold to them respectively, and to their respective heirs and assigns forever; saving and reserving the several rents and quit-rents, reserved and due, and to be due and payable from each of the several persons, to whom by virtue of any former grants to them (or those from or under whom they respectively hold) the same messuages, tenements, lands, or hereditaments were made or given.

36. *And further*, of our special grace, certain knowledge, and meer motion, we do, for us, our heirs, and successors, give, grant, ratify, and confirm to the said Mayor, Aldermen, and Commonalty of our said city of New York, and to their successors forever, full, special and free liberty, license, power and authority, to take, receive, have, hold and enjoy, to them and their successors forever, in fee simple, any manors, messuages, lands, tenements, hereditaments, rents, and other possessions and real estate, within or without the same city, as well of and from us, our heirs and successors, as of and from all and every other person and persons whomsoever; so as the manors, messuages, lands, tenements, hereditaments, rents and other possessions and real estate, which the Mayor, Aldermen, and Commonalty of the city of New York, shall and

may have in their possession and seizen, at any one time, exceed not in the whole, the clear yearly rent or value of three thousand pounds per annum, money of our realm of Great Britain, beyond and above all charges and reprises, without any hindrance of us, our heirs, or successors, or the justices, escheators, sheriffs, coroners, bailiffs, or other the ministers of us, our heirs or successors; and this without any other letters patent, liberty, license, or power from us, our heirs, or successors; the statute of *Mortmain*, or any other act, law or statute, or any other cause, thing, or matter, whatsoever, to the contrary thereof in any wise notwithstanding; and the same manors, messuages, lands, tenements, hereditaments, rents, and other possessions, or any part thereof, to demise, grant, lease, and set over, assign and dispose, at their own will and pleasure, and to make, seal, and accomplish, any deed, or deeds, lease, or leases, evidences, or writings, for or concerning the same or any part thereof.

37. *And we do*, by these presents, of our especial grace, certain knowledge, and meer motion, give, grant, ratify, and confirm, unto the said Mayor, Aldermen and Commonalty, of the city of New York, and their successors forever, all those the now City Hall and gaols, rooms or places, for the courts of justice and chambers adjoining, with the ground and appurtenances thereto belonging, the five market houses, the great dock, the now crane and wharf, with the common sewer leading through the great dock and bridge, and also the Magazine, or Powder-house, near the fresh water, all in the city of New York, and the ferry and ferries on both sides of the East river, and all other ferries now and hereafter to be erected and established all round the Island of Manhattan's; and the management and rue, of, and all fees, ferriages, and perquisites to the same or any part thereof belonging, or to belong; and also the ferry houses on Nassau Island, with the barns, stal bles, penn, or pounds, and lot of ground thereto belonging; and also all the ground, soil or land, between high water and low water mark, on the said Island of Nassau, from the east side of the place called Wallabout to the west side of Red Hook; and also to make laws and rules, for the governing and well ordering of all the ferries now erected or established or hereafter to be erected or established round the said Island Manhattan's; and all the waste, vacant, unpatented, and unappropriated land lying and being within the said city of New York, and on Manhattan's Island aforesaid, extending to low water mark; together with the right, benefit, and advantage, of all docks, wharfs, cranes, and slips, or small docks within this city, with the wharfage, cranage, and dockage, and all issues, rents, profits, and advantages arising, or to arise or accrue by or from all or any of them; and all rivers, rivulets, creeks, coves, ponds, waters, water-courses, fishing, fowling, hunting and hawking, mines and minerals, and other royalties and privileges within the city of New York, and Manhattan's Island; and also all and singular other the rights, privileges, liberties, franchises, pre-eminences, advantages, jurisdictions, courts, powers, offices, authorities, markets, ferries, ferriages, fees, fines, amerciaments, perquisites, profits, immunities, lands, tenements, rents, possessions, and hereditaments, and other real estate, not only which in the before recited grant or writing made or mentioned to be made, in the year of our Lord one thousand six hundred and eighty-six, and in the before recited letters patent of Queen Anne, mentioned or intended to be thereby, or by either of them granted or conveyed, but also, which the Mayor, Aldermen and Commonalty, of the city of New York, or their predecessors, inhabitants, or citizens of the said city of New York, or any part thereof, by whatsoever other name, style or title they or any of them, have been known or called, have held, or claimed to hold by prescription or otherwise, (silver or gold mines excepted) and also, except our Fort George, in our city of New York, and the ground, full boundaries, and extent thereof, or thereto belonging, and also that piece of ground near the English Church, called the Governor's Garden, and the land called the King's Farm, with the swamp next to the same: and saving the several rents, reserved by virtue of former grants, and saving to all other persons, bodies politic and corporate, their respective titles, to any of the said lands or tenements; and saving to the inhabitants, or those that have plantations by the water side, between Wallabout and Red Hook, the right of transporting themselves, and their own goods only, in their own boats, from and to their respective dwellings or plantations, without any ferriage, *to have and to hold* all and singular the premises aforesaid, and every part and parcel thereof (except and saving, as is herein excepted and saved) unto the said Mayor, Aldermen and Commonalty of the city of New York, and their successors forever to their only proper use and behoof forever.

38. *And* also, we do further, of our special grace, certain knowledge, and meer motion, give, grant, ratify and confirm unto the said Mayor, Aldermen and Commonalty, of the city of New York, and to their successors forever, all that space of ground and soil of Hudson's river now lying and being under the water of the same river, to begin at a certain place, near high water mark, at the south end of a piece of upland, which lies between the said river, and a piece of meadow ground or marsh, being the first piece of meadow ground or marsh near Hudson's River, to the southward of Greenwich, and from whence the above named run of water called Bestaver's Killitie, or rivulet, runs into Hudson's River, from which place of beginning to extend or run to the south side of the street which runs from the parade before our fort in New York to Hudson's River, south, eighteen degrees, thirty minutes west, on a straight line, the distance being one hundred and twenty-five chains, from which line to run a perpendicular breadth of, and to comprehend four hundred feet from low water mark, into Hudson's River, the same containing eighty-two acres, and one half acre, or thereabout. And also, all that space of ground and soil of the East River, from the north side of Corlaer's-Hook to Whitehall, beginning at two large stones, set on the south side of a small creek in a marsh on the north side of Corlaer's-Hook; from whence to the easternmost point of Corlaer's-Hook, the distance on a straight line, running south, fifteen degrees thirty minutes east, is forty chains and two rods; from thence to Whitehall, on a straight line, running south, seventy-eight degrees thirty minutes west, the distance is one hundred and fifty-two chains, from which two lines, to run a perpendicular breadth of, and to comprehend four hundred feet from low water mark into the East River, the same containing one hundred and twenty-seven acres, or thereabouts; together with all and singular the benefits, liberties, privileges, ways, water-courses, easements, wharfs, keys, profits, hereditaments, and appurtenances to the same, or any part thereof belonging or appertaining, or to belong or to appertain, or that can in any wise be had, made, used, or enjoyed thereon, or therewith used, with full power and authority at any time or times hereafter to fill, make up, wharf, and lay out, all and every part thereof; and the same to build upon and make use of in such manner as they, the said Mayor, Aldermen, and Commonalty, and their successors, shall think fit; and also all our estate, right, title, interest, benefit, claim and demand whatsoever, of, in, or to the same, and the reversion and reversions, remainder and remainders, and the yearly and other rents, issues and profits, thereof; *To have and to hold*, all and singular the premises aforesaid, unto them the said Mayor, Aldermen, and Commonalty, and their successors, to their own proper use and behoof for ever, and to no other use, intent, or purpose, whatsoever. *Provided always*, that nothing in these presents, shall be construed to empower or entitle the said Mayor, Aldermen, and Commonalty, of the city of New York, or their successors, to wharf out before any persons who have prior grants, from us, or some or one of our predecessors, of keys or wharfs beyond low water mark, without the actual agreement or consent of such persons, their heirs, or assigns, owners of such keys or wharfs. *And also*, that of the wharves to be built or run out, there shall be left towards the East and North rivers, forty feet broad, as well for the greater conveniency of trade, as at any time or times hereafter, for us, our heirs, and successors, to plant batteries thereon, in case of any neccssities; to do which, we do, for us, our heirs, and successors, hereby reserve power; any thing herein contained to the contrary, in any wise notwithstanding; they, the said Mayor, Aldermen, and Commonalty, and their successors, rendering, yielding, and praying, for all and every the rights, privileges, franchises, pre-eminences, advantages, jurisdictions, courts, powers, offices, authorities, fines, amerciaments, perquisites, fees, ferriages, profits, immunities, lands, tenements, rents, possessions, hereditaments, and other real estate, and all other the premises, in and by these letters, before and hereafter granted, or meant, mentioned, or intended to be hereby granted unto us, our heirs, and successors, or unto our or their receiver-general for the said province of New York, for the time being, at the custom-house, in the said city of New York, yearly and every year, on the feast day of St. Michael, the Arch-Angel, the annual rent of thirty shillings, proclamation money, besides and over and above the yearly quit-rent of one Beaver-skin, or the value thereof, in current money of our said province, in and by the aforesaid recited grant, made in the year one thousand six hundred and eighty-six, reserved to be paid on the twenty-fifth day of March, yearly forever; and also the yearly quit-rent of five shillings, current money of New York, in and by the before recited letters patent of Queen Anne, reserved to be paid at or upon the feast day of St. John the Baptist, yearly forever.

39. *And we do further*, of our especial grace, certain knowledge, and meer motion, for us, our heirs, and successors, by these presents, give and grant unto the aforesaid Mayor, Aldermen, and Commonalty of the said city of New York, and their successors forever, that they and their successors, all and singular the rights, privileges, franchises, pre-eminences, advantages, authorities, jurisdictions, liberties, offices, courts, powers, immunities, ferries, ferriages, profits, and perquisites, hereinbefore mentioned, or intended to be hereby granted or confirmed, shall and may forever hereafter, have, hold, enjoy, and use, without the hindrance or impediment of us, our heirs, or successors, or of any of the justices, sheriffs, escheators, coroners, bailiffs, or other officers, or ministers, whatsoever, of us, our heirs, or successors, albeit the same or some, or any one of them, have not been used, or may have been abused, misused, or discontinued, forfeited, or lost, being unwilling, and hereby forbidding, that the said Mayor, Aldermen, and Commonalty, or their successors, or any of them, by reason of the premises aforesaid, or any part thereof, by us, our heirs, or by the justices, sheriffs, escheators, bailiffs, or other officers or ministers of us, our heirs, or successors, be hindered, molested, vexed, or aggrieved, or in any wise disturbed; being willing, and by these presents, for ourselves, our heirs, and successors, commanding as well all the judges, and justices of us, our heirs, and successors, as the attorney and solicitor-general of us, our heirs, and successors, for the said province, for the time being; and also all other officers and ministers whatsoever of us, our heirs, and successors, for the time being, that neither they, nor any of them, do prosecute or continue, or cause to be prosecuted or continued, any information, or any writ, or summons of *Quo Warranto*, or any other writ or writs, prosecution, suit, or processes, whatsoever, against the aforesaid Mayor, Aldermen, and Commonalty of the city of New York, or their successors for the time being, or against any of them, for any causes, things, offences, claims, usurpations, or omissions, or any of them, by them, the said Mayor, Aldermen, and Commonalty, or any of them, or by the predecessors, or any of them, or by any other Mayor, Aldermen, and Commonalty of the city of New York, or any of them, done, attempted, claimed, used, had, usurped, or committed, or omitted at any time before the making of these letters. And we being willing also that the said now Mayor, Aldermen, and Commonalty of the city of New York, and their successors, shall not, nor shall any, or either of them, be molested, or impeached, by or before any judge or judges, justice or justices, sheriffs, officers, or other ministers aforesaid, in or for any use, claim, abuse, usurpation, of any the aforesaid, or of any other liberties, franchises, or jurisdictions, within the city aforesaid, and the liberties and precincts thereof, before the day of the making of these letters, had used, claimed, abused, or usurped, nor to or for them, or any of them, or for any other thing whatsoever, shall be compelled to answer; and also of our more abundant especial grace, certain knowledge, and meer motion, we have given, pardoned, remitted, released, and quit-claimed, and by these presents do, for ourselves, our heirs and successors, give, pardon, remit, release, and quit-claim to the aforesaid Mayor, Aldermen, and Commonalty of the city of New York aforesaid, and to their successors forever, by whatsoever name the same Mayor, Aldermen, and Commonalty may be called, named, or styled, or lately heretofore were called, styled, named, or titled, all and all manner and actions whatsoever, informations and suits of *Quo Warranto* and other informations, suits, and prosecutions; and also, all and singular usages, nonusages, abuses, forfeitures, usurpations, intrusions, omissions, and also, all unjust claims of any rights, privileges, liberties, franchises, jurisdictions, courts, powers, offices, fees, fines, amerciaments, ferries, ferriages, perquisites, rents, possessions, lands, tenements, or hereditaments, whatsoever, by the aforesaid Mayor, Aldermen, and Commonalty of the city aforesaid, or by any of their predecessors, or by any other Mayor, Aldermen and Commonalty of the city of New York, by whatsoever name or names, or incorporation, or by pretext of any incorporation, before the day of the making of these presents, perpetrated, made or claimed;

and, also, all and all manner of fines, amerciaments, penalties, sums of money, and other forfeitures whatsoever, by reason of such usurpation, intrusion, usage, non-usage, omission, abuse, or unjust claim, and that they, the said Mayor, Aldermen, and Commonalty of the city of New York, and their successors, and every of them be, and shall be, and hereby are, thereof fully acquitted and discharged towards us, our heirs and successors forever; being unwilling that they, or any of them, should, by reason of the premises aforesaid, or any part thereof, by us, our heirs and successors, or by any of our justices, sheriffs, ministers, or officers, whatsoever, be troubled, molested, or in any wise vexed.

40. *And further*, We do, of our especial grace, certain knowledge, and meer motion, will, declare and signify, and by these presents, for us, our heirs and successors, do grant unto, and covenant with the said Mayor, Aldermen and Commonalty of the city of New York, and their successors, not only that they and their successors forever hereafter may, and shall, have, hold, use, possess and enjoy all the rights, privileges, liberties, franchises, jurisdictions, courts, powers, offices, authorities, markets, ferries, fees, fines, amerciaments, perquisites, profits, immunities; and also all the rents, possessions, lands, tenements and hereditaments, and all other the premises in these presents mentioned, and intended to be hereby granted and confirmed; but also, that these our letters, being entered upon record, as is hereinafter appointed, and the record or enrollment thereof, and either of them, and all and everything therein contained, from time to time, and at all times hereafter, be, and shall be, firm, valid, good, sufficient, and effectual in law towards and against us, our heirs, and successors, according to the true intention thereof; and in and through all things shall be construed, taken, and expounded most benignly, and in favor, and for the most and greatest advantage, profit, and benefit of the said Mayor, Aldermen and Commonalty of the city of New York, and their successors, as well in all courts as elsewhere, without any confirmation, licenses, tolerations, procured or to be procured, of us, our heirs or successors, notwithstanding that any writ or writs of *ad quod damnum*, hath or have not issued, or is or are not returned, before the making of these presents, and notwithstanding the not reciting, misreciting, or not rightly or certainly reciting, or ill or wrong reciting the said rights, privileges, liberties, franchises, jurisdictions, courts, powers, offices, authorities, markets, ferries, fees, amerciaments, perquisites, profits, immunities, rents, possessions, lands, tenements, hereditaments, and any other the premises, in or by these presents granted, or mentioned, or intended to be hereby granted, or any part or parcel thereof, and notwithstanding the not finding, or ill or not right or certain finding of any office or offices, inquisition or inquisitions of the premises, hereby granted or mentioned, or intended to be hereby granted, or any part or parcel thereof, by which our title in and to the said premises, or any part thereof, might, could, should, or ought to have been found, before the making of these presents; and notwithstanding any defect in not reciting or ill reciting of any lease, grant, or grants of the premises, or any part thereof, being upon record, or not upon record, or otherwise, howsoever; and notwithstanding the ill naming, misnaming, or not right or certain naming any place or precincts, wherein the premises, or any part thereof, are or is; and notwithstanding any defect in not mentioning, or not fully, rightly, or certainly mentioning the name or names of all or any the rights, privileges, liberties, franchises, jurisdictions, courts, powers, offices, authorities, markets, ferries, fees, amerciaments, perquisites, profits, immunities, rents, possessions, lands, tenements, hereditaments, or other the premises, hereby granted, or intended to be granted, or any part or parcel thereof; or of the yearly, or other rent of, or reserved in, and upon the premises, or any part thereof; and notwithstanding any defect, for the want of a computation or declaration, or for the omission of the true value of the premises, in these presents mentioned or intended to be hereby granted, or any part thereof, and notwithstanding any defect in not mentioning our true right, estate, or title of or to the same premises, or any part or parcel of them; and notwithstanding, the not mentioning, or not fully, rightly, or certainly, mentioning the nature, kinds, species, or quantities of the premises, or any of them, or any part or parcel of them; and notwithstanding any act, statute, or ordinance of parliament, or any act of assembly; and notwithstanding any other defects, faults or imperfections, or any other cause or thing whatsoever. And further, that if any fault, mistake, or imperfection, in time to come, shall be found in these presents, or any doubt, scruple or question, be, or shall be made, or shall happen to arise, concerning the premises, or any part thereof, that we, our heirs, and successors, shall and will vouchsafe to make any other grant or assurance, under the great seal of us, our heirs or successors, of the said province of New York, to the Mayor, Aldermen and Commonalty of the city of New York for the time being, and their successors, at their own proper charges, for the better giving, granting and confirming, and for their safe and better enjoying the premises aforesaid, and every part thereof, when it shall be desired by the same Mayor, Aldermen and Commonalty of the city of New York, or their successors. Also, we will, and by these presents grant unto the said Mayor, Aldermen and Commonalty, that they shall and may have these presents, made and sealed under the great seal of our said province of New York, without rendering, paying or making any fine or fee, great or little to us, or to our use, for the same, although no express mention is made of the true yearly or other value, or of the certainty of the premises, or any part thereof, or of the gifts or grants, heretofore by us, or our ancestors, or by any Governor, Lieutenant-governor, or Commander-in-chief of the said province of New York, to the Mayor, Aldermen and Commonalty of the said city of New York, or to the citizens or inhabitants of New York aforesaid, by that or any other name, style or title, or any other statute, act, ordinance, proclamation, provision or restriction, made, published, ordained or provided to the contrary, or any other cause or matter whatsoever, in any wise notwithstanding.

In Testimony whereof, we have caused these our letters to be made patent, and the great seal of our said province to be hereunto affixed, and the same to be entered of record in our secretary's office of our said province, in one of the books of patents there remaining. *Witness* our trusty and well-beloved *John Montgomerie*, Esq., our Captain General and Governor in Chief of our said province of New York, and the province of New Jersey, and territories depending thereon in America, and Vice-Admiral of the same, &c. at our Fort George in New York, the fifteenth day of January, in the fourth year of our reign.

May it please your Excellency,

I have perused this Charter, and find nothing therein prejudicial to the interest of his Majesty.

To his Excellency, R. BRADLEY,
The Governor of the province of
New York, &c. *Attorney General.*
15th January, 1730.

The foregoing Charter of Governor Montgomerie does not appear to have been confirmed by the King, and it is therefore subject to all the objections which it recites as being made to the Charters of Governor Dongan and Cornbury.

Governor Montgomerie died shortly after the time this Charter bears date.

In 1732 the Colonial Legislature passed an Act to confirm the Charter granted by Governor Montgomerie, but this Act does not appear to have been confirmed by the King, as was customary in all public Acts which were approved. This Act was repealed by the Revised Statutes in 1830.

An Act for confirming unto the city of New York, its rights and privileges.

Passed the 14th of October, 1732.

I. *Be it declared and enacted by the Governor, the Council, and the General Assembly of the colony of New York, and it is hereby enacted by the authority of the same*, That the Mayor, Aldermen and Commonalty of the city of New York, shall and may, forever hereafter, remain, continue, and be a body corporate and politic, *in re facto et nomine* by the name of the Mayor, Aldermen and Commonalty of the city of New York; and by that name to sue, plead, and be impleaded, and to answer and to be answered, without any seizure or forejudger, for, or upon any pretence of any forfeiture or misdemeanor at any time heretofore done, committed or suffered.

II. *And be it enacted by the authority aforesaid.* That all and singular letters patent, grants, charters and gifts, sealed under the great seal of the colony of New York, heretofore made and granted unto the Mayor, Aldermen and Commonalty of the city of New York, be, and are hereby declared to be, and shall be good, valid, perfect, authentic and effectual in the law, and shall stand, be taken, reputed, deemed and adjudged good, perfect, sure, available, authentic and effectual in the law, against the King's Majesty, his heirs and successors, and all and every person and persons whomsoever, according to the tenor and effect of the said letters patent, grants, charters and gifts.

III. *And be it enacted by the authority aforesaid*, That all and singular letters patent, grants, charters and gifts, sealed under the great seal of the colony of New York, heretofore made and granted unto the Mayor, Aldermen and Commonalty of the city of New York, be, and are to all intents and purposes, hereby ratified and confirmed.

IV. *And be it enacted by the authority aforesaid*, That the Mayor, Aldermen and Commonalty of the city of New York, and their successors, shall and may forever hereafter, peaceably have, hold, use and enjoy, all and every the rights, gifts, charters, grants, powers, liberties, privileges, franchises, customs, usages, constitutions, immunities markets, duties, tolls, lands, tenements, estates and hereditaments, which have heretofore been given or granted unto the Mayor, Aldermen and Commonalty of the city of New York, by any letters patent, grant, charter or gift, sealed under the seal of the colony of New York.

V. *And be it enacted by the authority aforesaid*, That this present act shall be accepted, taken, and reputed, to be a general and public act of Assembly; of which all and every the judges, and justices of this colony, in all courts, and all other persons, shall take notice on all occasions whatsoever, as if it were a public act of assembly, relating to the whole colony; any thing herein contained to the contrary thereof in any wise notwithstanding.

The following act was passed at the instance of the officers of the Corporation of the city of New York, was published eighteen times at full length in all of the city newspapers, and was then submitted to the people at the next ensuing election, and only six hundred and seventy-seven votes were given in favor of the act, and it was consequently rejected.

ATTEMPTED REORGANIZATION OF THE COMMON COUNCIL, IN 1824.

An act to alter the organization of the Common Council of the City of New York.

Passed April 3, 1824.

Whereas the mayor, aldermen and commonalty of the city of New York, in common council convened, have by their petition under their common seal, prayed for the passage of the following law: Therefore,

I. *Be it enacted by the people of the State of New York, represented in Senate and Assembly*, That the common council of the city of New York shall hereafter consist of two separate boards, to be denominated the board of aldermen and the board of assistants, who together shall constitute the common council of the said city, and be known by the name of the mayor, aldermen and commonalty of the city of New York.

II. *And be it further enacted*, That the said board of aldermen shall consist of one member from each ward, residing in such ward, to be chosen from among the freeholders of the said city; and that in each ward of the said city, the persons residing therein, qualified by the charter of the said city to vote for charter officers, and every person residing therein qualified to vote for members of assembly of this state, shall at the days appointed by law for the election of members of assembly, next ensuing the ratification of this act, as hereinafter provided for, assemble themselves, and meet together in their respective wards, and elect by ballot an alderman for the said ward; and at every succeeding election for members of assembly, and on the same days with such election, the said persons so qualified to vote as aforesaid, residing in any ward of which the office of alderman shall be vacant, (by death, resignation, expiration of the term of office, or other cause) shall elect by ballot, from among the freeholders as aforesaid, a proper person to supply such vacancy; and that the said persons so chosen, shall be the aldermen of the said city, with all the powers of aldermen,

under and by virtue of any authority whatsoever; who together shall constitute the board of aldermen, of the said common council, (a majority of whom shall make a quorum for the transaction of business,) and shall be members of the said common council for two years from the last Monday of December next ensuing their election, as herein provided, when they shall be sworn into and commence the duties of their offices, and shall continue in their offices until other fit persons be elected and sworn in their places; which board of aldermen, as soon as they shall meet after the first election under this act, shall cause themselves to be divided by lot into two classes, to be numbered one and two; the seats of the first class shall be vacated at the end of the first year, and of the second class at the end of the second year, in order that one half may be chosen every year; and that in every case, where by reason of any vacancy occasioned by death, resignation, or otherwise, of any such aldermen, a person shall be chosen in his stead, he shall belong to the class to which his predecessor belonged, and shall only serve for his unexpired term.

III. *And be it further enacted*, That the qualified electors of the said city, shall in like manner annually elect two persons for each ward of the said city, who shall be the assistants of the said city, with all the powers appertaining to the office of assistants, under and by virtue of any authority whatsoever, and shall constitute the board of assistants of the said common council, (a majority of whom shall make a quorum for the transaction of business,) and shall be members of the common council for the said city for the year from the last Monday of December next ensuing their election, when they shall be sworn into and commence the duties of their office, and shall continue in office until other fit persons be elected and sworn in their places; and that the said board of assistants shall appoint one of their own members as president.

IV. *And be it further enacted*, That the whole power of the corporation of the said city, known by the name of the mayor, aldermen and commonalty of the city of New York, whencesoever derived, and now possessed by the said corporation, shall be vested in the said boards of aldermen and assistants, and their successors, forever, by the aforesaid name of the mayor, aldermen and commonalty of the city of New York, who shall perform all legislative and other acts as separate and distinct bodies, with concurrent powers; shall possess a negative on each other's proceedings, and may propose amendments thereto, and shall exercise, possess and enjoy all and singular the legislative and other powers which the mayor, aldermen and commonalty of the city of New York, in common council convened, at present may or can lawfully and of right exercise, possess and enjoy; and that each board shall settle their own rules of proceedings, appoint their own clerk, and judge of the elections, returns and qualifications of their own members.

V. *And be it further enacted*, That the common council or corporation as organized under this act, shall to every intent and purpose whatsoever, (as the mayor, aldermen and commonalty of the city of New York, however organized) have, possess and enjoy all the rights, properties, gifts, charters, grants, powers, liberties, privileges, franchises, customs, usages, constitutions, immunities, markets, ferries, duties, tolls, lands, tenements, estates, and hereditaments, which have heretofore been given or granted unto the mayor, aldermen and commonalty of the city of New York, by any letters patent, grant, charter or gift, sealed under the seal of the colony of New York, or under and by virtue of any act or acts of the legislature of the state of New York, or of the United States; and that they shall also have, and be entitled unto, all and any gifts, grants or contracts, covenants, promises or agreements, deeds or writings, with or from any person or persons whomsoever, as the mayor, aldermen and commonalty of the city of New York, or as their successors, to every intent, and with all the powers and rights possessed by the said mayor, aldermen and commonalty of the city of New York; and that all and singular the acts, proceedings, ordinances, laws, regulations, and doings of the said mayor, aldermen and commonalty of the city of New York, as they may exist, according to law, shall remain unaffected by the provisions of this act, subject to such alterations as may be from time to time made by the common council, when newly organized under this act. *And further*, That the charter of the said city of New York, or any thing therein contained, or any act or acts of the legislature of the state, touching or concerning the same, or the said corporation or common council, or any of the powers of the mayor, aldermen and commonalty of the city of New York, or any of the charter officers of the said city, or the election of charter officers, shall not be deemed or construed as in any respect repealed, altered, affected, modified, or changed, any further than the same are repugnant to the provisions of this act, or than is necessary to carry the provisions of this act into effect; but that the same shall, to every intent and purpose, be deemed and taken to apply to the mayor, aldermen and commonalty of the city of New York, or corporation or common council, to be organized as provided for in and by this act.

VI. *And be it further enacted*, That in all cases of appointments to office, to be made by the said common council hereby organized, under and by virtue of any power or authority whatsoever, if the said two boards shall not agree, they shall meet together and vote by joint ballot, and a majority of such votes shall decide; and that in case of a disagreement between the said boards respecting any other act or acts, thing or things proposed to be done, they may hold a conference, but shall nevertheless meet and vote on the matter in difference as separate and distinct boards.

VII. *And be it further enacted*, That the mayor and recorder of the city of New York, for the time being, shall be members of the board of aldermen, and the mayor shall be president of said board, and in his absence the recorder shall preside, and in the absence of both, one of the said board shall be appointed chairman pro tempore: The mayor or recorder when presiding, shall, in all cases, have a casting vote, and no other.

VIII. *And be it further enacted*, That the said common council, in case of the sickness or absence of the mayor, shall have the power to elect a deputy mayor from among the aldermen; which deputy mayor shall for the remainder of the term of the year for the then mayor, during his inability to act, and until a successor is appointed, be president of the said board of aldermen, and have and exercise all and every the powers, duties and privileges of mayor of the said city, as may be possessed and exercised by the deputy mayor under the charter of the said city, or under or by virtue of any other power or authority.

IX. *And be it further enacted*, That the elections to be held for the charter officers named in this act, and for all the charter officers to be chosen in and for the said city, shall commence on the same day in every year with the election for members of assembly of this state; and shall be notified, held and conducted by the same inspectors, in the same manner, with the like powers, and during the same number of days; and that every person qualified by the charter of the said city to vote for charter officers, and every person qualified to vote in any of the wards of said city, for members of the assembly of this state by the constitution, shall be authorized to vote for such charter officers in the ward where he actually resides, and not elsewhere; and that no other person shall be authorized to vote at any such election.

X. *And be it further enacted*, That all the other charter officers (excepting the collectors) to be chosen in and for the said city, shall be sworn into, and commence the duties of their offices, on the same day with the before mentioned aldermen and assistants; and shall continue in their offices, from their being so sworn, until other fit persons be elected and sworn in their places; and that the collectors of the respective wards of the said city, shall be elected to serve in their respective offices for one year from the second Monday of May next after such election.

XI. *And be it further enacted*, That all and singular the provisions of this act, shall be null and void, to every intent and purpose, as if never herein enacted, unless the same shall be approved by a majority of the votes of the electors of the city of New York; and that the same shall be submitted together, to the decision of the electors of the said city, and if ratified as herein provided, shall go into effect from and including the first Monday of November, one thousand eight hundred and twenty-four, so far as respects the first election of charter officers under this act, and from and including the last Monday in December following, the same shall go into full force and entire effect.

XII. *And be it further enacted*, That the common council of the said city shall, within the usual time before such election, appoint inspectors of an election which shall be held in the several wards in the said city, on the last Monday of May next, and be continued from day to day for three days successively, including the first; at which election the citizens qualified as voters under this act, may vote by ballot for or against the provisions of this law; and on such of the said ballots as are for the provisions of this law; shall be written or printed the word "Yes," and on those which are against the same, "No." And that notice of such election shall be given by the inspectors, and the said election shall, in all things, be held by such inspectors with the like powers, and conducted in like manner, as nearly as may be, as is prescribed in and by the act, entitled "An act for regulating elections," passed April 17th, 1822, or any act amendatory thereof; which laws shall have as full applications, force and effect, with respect to such election, as they would have, provided members of assembly were then to be elected; and that the votes given at such election shall be deposited by the inspectors in proper boxes to be by them provided, and canvassed by the inspectors of the several polls, and returned to the county clerk, and the result certified by the board of canvassers, in like manner, as nearly as may be, as in case of elections for members of the assembly; one copy of which certificate shall be filed in the office of the secretary of state, and another delivered to the common council of the said city, and published; and that in case a majority of such votes shall, by the certificate of the canvassers, appear to have been given in favor of the provisions of this law, it shall be the duty of the inspectors who may be appointed by the common council of the said city to hold next ensuing election for members of assembly, to give notice of the holding of the election for charter officers, under the provisions of this act; and they shall provide the proper ballot boxes for charter officers; and that the ballots for all the charter officers to be voted for by an elector, in each ward of the said city, shall be received on one ticket, and be deposited in one ballot box.

Session Laws of 1824, page 162.

In 1828, April 18th, the above act of 1824 was re-enacted by the Legislature, and was submitted to the people at the next ensuing election, and was rejected; at this time three thousand seven hundred and fifty-three votes were cast in its favor.

In 1829, the citizens elected sixty-five delegates to meet in convention to frame a city charter. After a protracted session of about three months, the Convention adopted the following Bill or Charter, which was submitted to the people for their approval at the then next election, and was by a vote by ballot accepted. At the time this Bill or Charter was submitted, an address was published, signed by the President and fifty-seven members of the Convention, explaining the provisions of the charter. This address is very lengthy: we will in some future number publish it in full.

AMENDMENTS TO THE

CHARTER OF THE CITY OF NEW YORK,

As adopted in Convention, September, 1829.

Sec. 1. The legislative power of the city of New York shall be vested in a board of Aldermen and a board of Assistants, who, together, shall form the Common Council of the city.

Sec. 2. Each ward of the city shall be entitled to elect one person to be denominated the Alderman of the ward, and the persons so chosen, together, shall form the board of Aldermen; and each ward shall also be entitled to elect one person to be denominated Assistant Alderman, and the persons so chosen, together, shall form the board of Assistants.

Sec. 3. The Aldermen and Assistant Aldermen shall be chosen for one year, and no person shall be eligible to either office, who shall not at the time of his election be a resident of the ward for which he is chosen.

Sec. 4. The annual election for charter officers shall commence on the second Tuesday in April, and the officers elected shall be sworn into office on the second Tuesday in May thereafter. And all such elections shall be notified, held and conducted by Inspectors appointed in the same manner, with the like powers, and during the same number of days, as the election for members of Assembly of the state are notified, held and conducted.

Sec. 5. The first election for charter officers after the passage of this law, shall take place on the second Tuesday in April, 1831, and all those persons who shall have been elected under the former laws regulating the election of charter officers, and shall be in office at the time of the passage of this law, shall continue in office, or hold over, until the officers elected under this law shall be entitled to be sworn into office.

Sec. 6. The board of Aldermen shall have power to direct a special election to be held to supply the place of any Alderman whose seat shall become vacant by death, removal from the city, resignation, or otherwise. If a special election be not directed, the vacancy shall be supplied at the next general election. And the board of Assistants shall also have power to direct a special election to supply any vacancy that may occur in the board of Assistants. The person elected to supply such vacancy shall hold his seat only for the residue of the term of office of his immediate predecessor.

Sec. 7. The boards shall meet in separate chambers, and a majority of each shall be a quorum to do business. Each board shall appoint a president from its own body; and shall also choose its clerk and other officers, determine the rules of its own proceedings, and be the judge of the qualifications of its own members. Each board shall keep a journal of its proceedings, and the doors of each shall be kept open, except when the public welfare shall require secrecy: and all resolutions, and reports of committees, which shall recommend any specific improvement, involving the appropriation of public moneys, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the board, under the authority of the Common Council, in all the newspapers employed by the Corporation; and whenever a vote is taken in relation thereto, the ayes and noes shall be called, and published in the same manner.

Sec. 8. Each board shall have authority to compel the attendance of absent members, to punish its members for disorderly behavior, and to expel a member, with the concurrence of two thirds of its members elected to the board, and the member so expelled, shall, by such expulsion, forfeit all his rights and powers as an Alderman or Assistant Alderman.

Sec. 9. The stated and occasional meetings of the Common Council shall be regulated by their own ordinances, and both boards may meet on the same, or on different days, as they may judge expedient.

Sec. 10. Any law, ordinance or resolution of the Common Council, may originate in either board; and when it shall have passed one board, may be rejected or amended by the other.

Sec. 11. No member of either board, shall, during the period for which he was elected, be appointed to, or be competent to hold any office of which the emoluments are paid from the city treasury, or by fees directed to be paid by any ordinance or act of the Common Council, or be directly or indirectly interested in any contract, the expenses or consideration thereof, are to be paid under any ordinance of the Common Council; but this section shall not be construed to deprive any Alderman or Assistant of any emoluments or fees which he is entitled to, by virtue of his office.

Sec. 12. Every act, ordinance or resolution which shall have passed the two boards of the Common Council, before it shall take effect, shall be presented, duly certified, to the Mayor of the city, for his approbation. If he approve, he shall sign it; if not, he shall return it, with his objections, to the board in which it originated, within ten days thereafter, or if the Common Council be not then in session, at their next stated meeting. The board to which it shall be returned, shall enter the objections at large on their journal, and cause the same to be published in one or more of the public newspapers of the city.

Sec. 13. The board to which such act, ordinance or resolution shall have been returned, shall, after the expiration of not less than ten days thereafter, proceed to re-consider the same. If, after such re-consideration, a majority of the members elected to the board shall agree to pass the same, it shall be sent, together with the objections, to the other board, by which it shall be likewise re-considered; and if approved by a majority of all the members elected to such board, it shall take effect, as an act or law of the corporation. In all such cases the votes of both boards shall be determined by yeas and nays, and the names of the persons voting for, and against the passage of the measure re-considered, shall be entered on the journal of each board respectively.

Sec. 14. If the Mayor shall not return any act, ordinance, or resolution so presented to him, within the time above limited for that purpose, it shall take effect in the same manner as if he had signed it.

Sec. 15. Neither the Mayor nor Recorder of the city of New York, shall hereafter be members of the Common Council thereof.

Sec. 16. Whenever there shall be a vacancy in the office of Mayor, and whenever the Mayor shall be absent from the city, or be prevented by sickness, from attending to the duties of his office, the president of the board of Aldermen shall act as Mayor, and shall possess all the rights and powers of the Mayor during the continuance of such vacancy, absence, or disability.

Sec, 17. It shall be the duty of the Mayor—

First. To communicate to the Common Council, at least once a year, and oftener if he shall deem it expedient, a general staetment of the situation and condition of the city, in relation to its government, finances, and improvements.

Second. To recommend to the adoption of the Common Council, all such measures connected with police, security, health, cleanliness, and ornament of the city, and the improvement of its government and finances, as he shall deem expedient.

Third. To be vigilant and active in causing the laws and ordinances for the government of the city, to be duly executed and enforced.

Fourth. To exercise a constant supervision and control over the conduct and acts of all subordinate officers, and to receive and examine into all such complaints as may be preferred against any of them, for violation or neglect of duty; and generally to perform all such duties as may be prescribed to him by the charter and city ordinances, and the laws of this state and the United States.

Sec. 18. Annual and occasional appropriations shall be made by proper ordinances of the Common Council, for every branch and object of city expenditure, nor shall any money be drawn from the city treasury, except the same shall have been previously appropriated to the purpose for which it is drawn.

Sec. 19. The Common Council shall not have authority to borrow any sums of money whatever on the credit of the Corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorized by a special act of the legislature.

Sec. 20. It shall be the duty of the Common Council to publish, two months before the annual election of charter officers, in each year, for the general information of the citizens of New York, a full and detailed statement of the receipts and expenditures of the corporation, during the year ending on the first day of the month in which such publication is made; and

in every such statement the different sources of city revenue, and the amount received from each, the several appropriations made by the Common Council, the objects for which the same were made, and the amount of moneys expended under each, the moneys borrowed on the credit of the corporation, the authority under which each loan was made, and the terms on which the same was obtained, shall be clearly and particularly specified.

Sec. 21. The executive business of the Corporation of New York shall hereafter be performed by distinct departments, which it shall be the duty of the Common Council to organize and appoint for that purpose.

Sec. 22. It shall be the duty of the Common Council to provide for the accountability of all officers, and other persons to whom the receipt or expenditure of the funds of the city shall be entrusted, by requiring from them sufficient security for the performance of their duties or trust, which security shall be annually renewed.

Sec. 23. The clerk of the board of Aldermen shall, by virtue of his office, be clerk of the Common Council, and shall perform all the duties heretofore performed by the clerk of the Common Council, except such as shall be assigned to the clerk of the board of Assistant Aldermen. And it shall be his duty to keep open for inspection, at all reasonable times, the records and minutes of the proceedings of the Common Council, except such as shall be specially ordered otherwise.

Sec. 24. Such parts of the charter of the city of New York, and of the several acts of the legislature amending the same, as are not inconsistent with the provisions of this law, shall not be construed as repealed, modified, or in any manner affected thereby, but shall continue and remain in full force.

In Convention, Sept. 28th, 1829.

Resolved, That the members of this convention who are present, and also those absent, who approve the amendments to the city charter, sign the same as engrossed.

Done in Convention, at the City Hall in the city of New York, the twenty-eighth day of September, in the year one thousand eight hundred and twenty-nine, and of the independence of the United States of America, the fifty-third.

In witness whereof, we have hereunto subscribed our names.

Attest. WILLIAM PAULDING,
President, and Delegate from the fifth ward.

I, Thomas Jeremiah, Clerk of the city and county of New York, do hereby certify, that the preceding is a true copy of the proceedings of the Convention for the purpose of revising and amending the charter of the city of New York, on file in my office.

In testimony whereof, I have hereunto set my hand and affixed my seal of office, the 7th day of September, 1835.
[L. S.

THOMAS JEREMIAH, Clerk.

IN 1830

The Legislature of the state acted upon the Bill agreed upon by the Convention, and after making in it several material amendments, passed it, and it thus became a law. Stephen Allen, Esq., was at that time a member of the Senate of the state, and was a most efficient and able representative. The Bill, as passed by the State Legislature, is to be found in No. 1 of this Gazette, page 8.

LEGISLATION.

That learned and able jurist, JUSTICE STORY, thus discourses on this subject:

"The task of legislation, too, is exceedingly different in a small state, from what it is in a large one; in a state engaged in a single pursuit, or living in pastoral simplicity, from what it is in a state engaged in the infinitely varied employments of agriculture, manufactures and commerce, where enterprise and capital rapidly circulate, and new legislation is constantly required by the new fortunes of society. A single week might suffice for the ordinary legislation of a state of the territorial extent of Rhode Island, while several months would scarcely suffice for that of New York. In Great Britain a half a year is consumed in legislation for its diversified interests and occupations; while a week would accomplish all that belongs to Lapland or Greenland, of the narrow republic of Geneva, or of the subordinate principalities of Germany. Athens might legislate, without obstructing the daily course of common business, for her own meager territory; but when Rome had become the mistress of the world, the year seemed too short for all the exigencies of her sovereignty. When she deliberated for a World, she felt *that Legislation, to be wise or safe, must be slow and cautious*; that *knowledge as well as power was indispensable for the true government of her provinces.* Men, to act with vigor and effect, must have time to mature measures, and judgment and experience as to the best means of applying them. They must not be hurried on to their conclusions by the passions or fears of the multitude. They must deliberate as well as resolve."

The remarks of DR. PALEY, on the same subject, are full of his usual practical good sense. "The first maxim," says he, "of a free State is, that the laws be made by one set of men, and administered by another; in other words, that the legislative and judicial characters be kept separate. When these offices are united in the same person or assembly, particular laws are made for particular cases, springing oftentimes from partial motives, and directed to private ends. Whilst they are kept separate, general laws are made by one body of men, without foreseeing whom they may affect; and when made, they must be applied by the other, let them affect whom they will."

And the FEDERALIST has, with equal point and brevity, remarked, that "the accumulation of all power, legislative, executive and judicial, in the same hands, whether of one, a few, or many, and whether hereditary, self-appointed, or elective, may be justly pronounced *the very definition of tyranny.*"

MR. JEFFERSON, in his notes on Virginia, has expressed the same truth with peculiar fervour and force.—Speaking of the Constitution of the government of his own State, he says,—"all the powers of government, legislative, executive and judiciary, result to the legislative body. *The concentrating these in the same hands is precisely the definition of a despotic Government.* It will be no alleviation, that these powers will be exercised by a plurality of hands, and not by a single one. One hundred and seventy-three despots would surely be as oppressive as one. Let those who doubt it turn their eyes to *the republic of Venice. An elective despotism is not the Government we fought for.*"

In the foregoing quotations we have made, we see the state and condition of our Municipality.

The Common Council of New York publicly claim sovereign power, and actually exercise this power.

Take, for example, the building of a Common Sewer at an expense of Seventy Thousand Dollars, which was about the cost of that of the 2d Avenue. In this case, the Common Council decides upon the measure, direct their own officers to contract for its construction, appoint assessors to apportion the cost among a limited number of citizens, sit as a court to confirm the assessment, appoint a collector to demand the money, and if not paid, direct their own officer to sell the property of the delinquent, and their own officers become the purchasers, and their own officers execute a lease of 5,000 or 10,000 years, a greater estate than any fee simple known to our world.

This is exercising all the various powers by the same body of men. They are in fact legislators, judges, jury and executioners—combining together, what forms an elective despotism, and is in fact the most tyrannical and arbitrary body known in the civilized world. Our City Government is a complete usurpation of power, a violation of all law, an outrage upon the constitution and civil liberty, and a foul blot upon the present age.

That able jurist, Judge Savage, late Chief Justice of the State of New York, in one of his written opinions, makes this very excellent and accurate remark:—

"Much of our difficulty," says he, "arises from judicial legislation. It is the business of the legislature to make laws, and of the courts to expound them."

CORONER'S FEES.

We perceive that Alderman Woodhull introduced into the Board of Aldermen, last evening, a resolution to make application to the Legislature in relation to the fees of the Coroner. This is right.

We also perceive that Aldermen Benson introduced an amendment to the effect that application be also made to the legislature, to authorize the Common Council to appoint four additional Coroners and to assign them certain districts. We beg leave to refer the worthy Alderman to the Municipal Gazette, No. 2, page 21, § 11, for the provisions of the Constitution upon appointing Coroners, and also to § 15 of same page. Coroners are elective officers, and must continue to be elected unless the amending of the Constitution of the State alters that mode. The legislature may order more Coroners to be elected for the county of New York, but cannot authorize the Common Council to appoint Coroners.

PUBLIC OFFICES.

Of late years public offices are eagerly sought after, and anxiously desired by great numbers of our citizens, young and old. Very little advantage is gained by young men in obtaining office, and it more frequently happens that the holding of a public office is to them a great injury—unfitting them for their regular business and occupations. The expense and labor of obtaining public office is oftentimes greater than the amount of salary, and the anxiety to retain place and income keeps the mind of the incumbent in a constant state of excitement and uneasiness. It would be far better if fewer young men were appointed to office, and the offices given to men advanced in years—who have been in active business, and have experience to qualify them to discharge the duties to the advantage of the public, and credit to themselves.

FEES OF PUBLIC OFFICERS.

These, in all cases, whether under the general, state, or city government, should be limited, and whatever is an excess over a fair compensation should be paid into the public treasury. It may be said, as an objection to this plan, that if the fees fall short of a fair compensation, the amount should be made up out of the public treasury—and so it should be.

PLURALITY OF OFFICES.

No citizen ought to hold two public offices at the same time. There is no good reason to sanction such a practice, and it should in all cases be prohibited by law.

THE COLLECTION OF TAXES.

We have been looking at the provisions of the constitution of the state of New York, page 21 of this Gazette, Art. 4, § 15, and find this provision, viz.: "§ 15. *all officers heretofore elective by the people shall continue to be elected.*" It seems therefore that collectors of Taxes are to continue to be elected. This is our present impression, from the examination of this section. Under this state of things, it is competent for the legislature to pass a law, making the taxes hereafter to be raised to be paid to the city Comptroller, or to the Board of Commissioners, and such taxes as shall not be thus paid within the first three months of the year, shall be delivered to the Collector of the Ward, who shall proceed to collect the same, and he shall be paid for his services a commission in proportion to the amount, which commission shall be paid by the delinquent tax payer in addition to the amount assessed as tax.

The salary of Coroner of the city and county of N. York should be fixed by law, and should be a fair and reasonable compensation for his services.

The taxes of the city of New York are daily and continually increasing, and it is important to have every possible retrenchment made throughout, that can be consistently.

High taxes increase the price of rent as well as the price of every article of consumption, and are a canker upon unproductive real estate.

It would seem that a different mode of taxation ought to be adopted, in regard to unproductive property.

President Jackson, in his Proclamation in relation to the Nullification of South Carolina, (which, irrespective of politics, may be justly pronounced an able state paper,) thus remarks—"The wisdom of man never yet contrived a system of taxation that would operate with perfect equality." The apportionment of taxes is not so much complained of, as the lavish expenditure of public money by public officers. This *discretion* which they arrogate to themselves, is the great monster that is trampling down every thing.

TAXES.

In 1801 the taxes of the city of New York were seventy-five thousand dollars, and the population about sixty thousand—an average of about one dollar and twenty-five cents to each person. The taxes the present year amount to eleven hundred thousand dollars, and the population to three hundred and twelve thousand, or thereabouts, which is about three dollars and fifty-two cents to each person.

(To be continued.)

COMMON COUNCIL OF THE CITY OF NEW YORK IN FORMER TIMES.

From the year 1674 to the year 1691, a period of seventeen years, the entire proceedings of the Common Council did not cover five quires of paper closely written, now the business of our present Common Council for a single week; is greater than that of this early period for a whole year.

UNCERTAINTY OF TITLES TO REAL ESTATE ON THE ISLAND OF NEW YORK.

Peter A. Jay, Esq., one of the former Recorders of the city of New York, some short time ago purchased two houses and lots up town. A few days since he ascertained that both of the houses and lots have been sold for a trifling assessment for buiding a sewer in Avenue C; the time of redemption had expired, and the purchaser had obtained a corporation lease. These kind of proceedings are most extraordinary. There is blame somewhere in this. It behoves every person purchasing property to keep a sharp look out for these Land Sharks. There is no safety in titles while such a state of things continue. The books of the Street Commissioners show that many of the corporation officers are purchasers of lots sold for assessments, and from all that appears, and in fact from some particular cases which have occurred, it appears that the corporation favor this system of confiscation. I know of one case, a person in New Jersey, where the Street Commissioner, much to his credit, sent a special message to the owner of a house that the same had been sold, and that the time of redemption was near expiring, and he came and rescued his premises from the fangs of the Land Shark.

GOVERNOR CORNBURY'S CHARTER.

In 1708, during the reign of Queen Anne, a grant was made to the mayor, aldermen, and commonalty of the city of New York, of certain ferries. This charter, as it is called, never received the queen's assent, or confirmation. All the land not before patented on this island, was granted to the mayor, aldermen, and commonalty in 1686, by Governor Dongan, with the exception of certain specified reservations.

The ferries of the North and East Rivers are both across arms of the sea.

We had a conversation with a very intelligent member of the Board of Aldermen a few days since, during which he remarked that the city had some valuable franchises granted in the ancient charters, and named the ferries as one of this class. Since that conversation we have considered the matter with great deliberation, and are of opinion that the grant is not valid.

In Gazette No. 2, page 31, is the copy of an act passed by the Legislature of this State in favor of JOHN FITCH, granting him the exclusive right to navigate the waters of this State by steamboats for fifty years. This act was passed in 1787; but this was decided to be unconstitutional; and the ferry monopoly appears equally as much so. These are first impressions from an examination of the question—and we think we are right. We will return to the subject again.

OPENING STREETS, AVENUES, AND PUBLIC SQUARES.

In our last paper we gave copies of two resolutions for opening all the streets and avenues up to and including 42d street, which had not been previously opened by deeds of session or by due course of law, as laid down on the commissioner's map, under the act of April 3d, 1807; and also all the streets from 42d, to and including 57th street; and now we give another of the same class of resolutions, for opening Manhattan Square.

BOARD OF ALDERMEN, April 18, 1836.

"Alderman Benson presented the following resolution, which was read and referred to the Committee on Lands, &c.

Resolved, That the Committee on Public Lands and Places report on the expediency of *taking* Manhattan Square."—*See Vol. 10, Pro. Board of Aldermen, page* 465.

We shall continue these statements of all the streets, avenues, and public squares, &c., and show who have offered resolutions in either Board for the ruinous proceedings, and to show the citizens that it is not the speculators, as those who buy and sell lots are called, but it is the members of the Common Council and officers of the Corporation who have been the persons who have thus acted. We intend no personal disrespect to the persons who offered these resolutions; they no doubt thought and believed that they were right in the matter; but the true history of these proceedings should be generally known. If the Common Council have usurped power, or abused power, or used it without due consideration, it should be taken from them. The truth is, the Common Council arrogate to themselves power; they exercise power which was never given to them, and have brought, by these means, great losses upon the city and the citizens; and now they say the speculators have done it!!!

DISTRIBUTION OF POWERS.

That eminent jurist, Judge Story, one of the justices of the Supreme Court of the United States, in his excellent Commentary upon the Constitution, thus remarks:

"Every government must include within its scope, at least if it is to possess suitable stability and energy, the exercise of three great powers, upon which all governments are supposed to rest, viz., the executive, the legislative, and the judicial powers. The manner and extent in which these powers are to be exercised, and the functionaries in whom they are to be vested, constitute the great distinctions which are known in the forms of government. In absolute governments, the whole executive, legislative, and judicial powers are, at least in their final results, exclusively confined to a single individual; and such a form of government is denominated a despotism as the whole sovereignty of the state is vested in him.

"The remarks of Montesquieu on this subject will be found in a professed Commentary upon the Constitution of England. 'When,' says he, 'the legislative and executive powers are united in the same person, or in the same body of magistrates, there can be no liberty, because apprehensions may arise, lest the same monarch or senate should enact tyrannical laws, to execute those in tyrannical manner. Again; there is no liberty, if the judiciary power be not separated from the legislative and executive. Were it joined with the legislative, the life and liberty of the subject would be exposed to arbitrary control; for the judge would be the legislator. Were it joined to the executive power, the judge might behave with violence and oppression. There would be an end of everything, were the same man, or the same body, whether of the nobles or of the people, to exercise these three powers, that of enacting laws, that of executing the public resolutions, and of trying the causes of individuals.

"The same reasoning is adopted by Mr. Justice Blackstone in his Commentaries. 'In all tyrannical governments,' says he, 'the supreme magistracy, or the right of both making and enforcing laws, is vested in the same man, or one and the same body of men; and wherever these two powers are united together, there can be no public liberty. The magistrate may enact tyrannical laws, and execute them in a tyrannical manner, since he is possessed, in quality of dispenser of justice, with all the power which he, as legislator, thinks proper to give himself. But where the legislative and executive authority are in distinct hands, the former will take care not to entrust the latter with so large a power as may tend to the subversion of its own independence, and therewith of the liberty of the subject.'

"Again; in this distinct and separate existence, of the judicial power in a peculiar body of men, nominated indeed by, but not removable at, the pleasure of the crown, consists one main preservative of the public liberty, which cannot long subsist in any state, unless the administration of common justice be, in some degree, separated from the legislative, and also the executive power. Were it joined with the legislative, the life, liberty, and property of the subject would be in the hands of arbitrary judges, whose decisions would then be regulated only by their opinions, and not by fundamental principles of law; which, though legislators may depart from, yet judges are bound to observe. Were it joined with the executive, this union might soon be an overbalance for the legislative."

COMPTROLLER'S REPORT.

We give below the preamble to the City Comptroller's Annual Report to the Common Council of the City of New York. It is a most extraordinary document:

The Comptroller speaks of New York being "*a free city of itself.*" In what respect it is free we are unable to discover. It certainly is not free from assessments; for no city on the earth ever suffered from this odious, abominable, ruinous, and detestable system of assessments as has this "*free city of itself;*" and, as for taxes, it is doomed to everlasting taxation, increased and increasing.

The worthy Comptroller says, "the charter of this city is an express contract, containing a covenant for the quiet enjoyment of the municipal powers it confers. It was made before the first shedding of blood in our revolutionary struggle." Now, what does all this amount to? What charter has the worthy Comptroller reference to? There were four charters "*made before the first shedding of blood in our revolutionary struggle;* viz., Governor Stuyvesant's, Governor Dongan's, Governor Cornbury's, and Governor Montgomery's; the last of these was in 1730; and I beg leave to refer the Comptroller to that charter, page 32 of Kent's City Charter, in which it is stated that the validity of the former charters were doubted, because these were not granted by the crown. Now, we ask the Comptroller, if Governor Montgomery's charter was ever ratified by the king, or in any way confirmed by the crown?

No one of the ancient charters of the city of New York was ever confirmed or ratified by the crown; but on the contrary, the king, in 1697, confirmed a very severe law against persons claiming to act under the authority or in the name of the Corporation, which remained in force from 1697 to 1830; a period of one hundred and thirty-three years; during which time this law was twice confirmed by the Constitution of the State of New York, and also by the general repealing act of 1787. This act is to be found in No. 3 of this Gazette, page 38. We have examined Chancellor Kent's notes upon this part of the charter, and find that the Chancellor is silent on this point; but from what he says at the end of the charter in *a mem.*, it appears that he only examined two printed copies furnished by the Corporation; one printed in 1793, and the other in 1832; the latter, the Chancellor says, is not accurate. Why have not the Corporation had a true copy of the charter published? As for the charter being a contract, it was to a certain extent—the Mayor paid three hundred and twenty-four pounds for it to Governor Dongan in 1686, and it was called *a patent;* and Governor Dongan subsequently disputed the validity of this very grant, as appears by the correspondence between him and the Mayor; and besides this, we find in 1692, six years after the date of this charter, that the Common Council passed a resolution, directing the Recorder to draw up an address to the Governor, desiring their Majesty's confirmation of the charter; and more besides this, the King would not do any such thing as grant a charter to the city; for the complaints were, even at that early day, loud and frequent against the officers of the Corporation for usurping power; and the act of 1695 is evidence of this. In 1732, the Corporation of the city of New York applied to the Colonial Legislature for a confirmation of Governor Montgomery's charter—and obtained an act to that effect. This act was not confirmed by the King; and this same act was repealed by the Revised Statutes in 1830.

But the Comptroller says, "*The charter is an express contract, containing a covenant for the quiet enjoyment of the municipal powers it confers.*" All political power was swept by the revolution which the Comptroller speaks of. The charter of New York, we say, was not, in our humble judgment, noticed in the Constitution of 1777 and 1821. We know that that able jurist and distinguished citizen, Chancellor Kent, says in his notes on the Charter, that it was confirmed by the two constitutions; but he says, in the same book, that he had before him a printed copy of the charter; and he did not, we presume, examine the various doings in relation to these charters on record in manuscript, nor the law of 1695; and was probably not aware that the charters were neither of them granted by the King or his predecessors, or confirmed by them; but on the contrary, that they refused their assent.

We do not, for one, for a moment pretend to dispute the title of the Mayor, Aldermen, and Commonalty to the public property; but we do deny them any political power under the old patents, or charters as they call them. A municipal power of such sort is not a vested right. *The Comptroller says further:*

"That charter still stands as much a protection to *her* citizens from State encroachments, as it was before the revolution against the British crown." Well this is so; for it was nothing then, and is the same now.

The Comptroller closes his most extraordinary preface by saying, "Should a continued disposition be manifested to impair its provisions, or to trench upon the undelegated rights of the people of this county, it will become their duty, as well as that of their county representatives, to test the strength of her municipal reservations, by an appeal to the Supreme Judicary of the United States." The Corporation counsel will advise them to keep out of the Supreme Court of the United States; that Court would soon settle the question, in the exercise of sound discretion too. But his Honor the Comptroller may rest easy on this head; the county representatives will not be troubled to go there to ask to have the matter examined. The proceedings, already commenced, are in the way of going there in full speed.

We have a great personal regard for the Comptroller; he is a most excellent citizen, and a worthy public officer; but in this matter of the municipal powers, he is out of his latitude.

CITY OF NEW YORK,
COMPTROLLER'S OFFICE,

January 25, *A. D.* 1811.

To the Mayor, Aldermen and Commonalty of the City of New York.

The people of this city have, with regard to their local government, reserved to themselves the right to, and require from their representatives, a full account of the manner in which their municipal interests are conducted, that they may possess a true knowledge of their responsibilities and prospects. This information is essentially necessary in forming a correct opinion in reference to the general action of their municipal government. It is especially so in matters of such vital importance to the people as the administration of the city finances. Opportunity is thereby afforded them to decide upon the effect that contemplated changes may have upon their pecuniary interests, as also, to ascertain what reforms, if any, are necessary. With this

view, the undersigned has endeavored to make the annexed report as succinct, and at the same time as comprehensive as the means of his office would permit. It will be found to exhibit a complete account of the financial condition of the city government, and in compliance with the charter laws is respectfully presented.

The information it embraces may be considered the more interesting at this time, because of the disposition recently manifested by the State Legislature to interfere with our municipal concerns, the management of which, so far as they are local, is secured to the people of this city by the strongest guarantees. The powers with which the people have invested their State Government are limited by the constitution of the state. The citizens of the several counties, and of this city and county in particular, have, in their local governments, distinct and independent rights, as clearly to be understood as those exercised by the states independently of the general government. With respect to this city and county, these rights are either controlled by the charter, which is our county constitution, or undelegated as yet, remain with its citizens.

The charter of this city is an express contract containing a covenant for the quiet enjoyment of the municipal powers it confers. It was made before the first shedding of blood in our revolutionary struggle, and under the decision of the Supreme Court of the United States, it is one that is protected by the Constitution of the United States from being impaired by any act of state legislation; all infractions of its provisions may be taken to that tribunal for final adjudication. Its charter is a constitution of a body politic, erecting the city of New York into "A FREE CITY OF ITSELF." Her independent sovereignty, in her local matters, is older than that of the state itself, and her representatives in the convention which formed the state constitution, showed they were sensible of its free position, when they procured an express reservation of her local rights under her local constitution. That charter still stands as much a protection to her citizens from state encroachments, as it was before the revolution against the exactions of the British Crown. Should a continued disposition be manifested to impair its provisions, or to trench upon the undelegated rights of the people of this county, it will become their duty, as well as that of their county representatives, to test the strength of her municipal reservations, by an appeal to the supreme judiciary of the United States.

Respectfully,
ALFRED A. SMITH,
Comptroller.

From the Evening Post.

COMMON COUNCIL.

OFFICIAL.

Special meeting of the Board of Aldermen,
March 29, 1841.

Present—Elijah F. Purdy, Esq., President. Aldermen—Bailis, Woodhull, Benson, Pentz, Jones, Ferris, Rich, Chamberlain, Hatfield, Jarvis, Smith, Nichols, Graham, Cooper, and Nash.

The minutes of the last meeting were read and approved.

PETITIONS.

Of the following persons, viz: Freman Rawdon, Charles W. Huntington, James Stoutenburgh, D. Coleman, John Collins, John Rogers and B. B. Edwards, severally for correction of tax or assessment—referred to the Committee on Assessments.

Of E. Cohen, D. N. Freeman and others, inhabitants of Manhattanville, to allow the Harlem Rail Road Company to lay rails through Manhattan street—referred to the Special Committee, of which Alderman Chamberlain is chairman.

Of John Dichett, for the enforcement of the law relative to hawking and peddling in the public streets—referred to the Committee on Police, &c.

Of J. P. Allaire, for lease of pier at the foot of Fulton street, East River—referred to the Committee on Wharves, &c.

Of A. Jackson and others, inhabitants of Fifth street, for the paving the foot-path in that street, from 3d avenue to avenue C—referred to Committee on Streets.

Of residents in the vicinity of avenue B, to have side-walks flagged six feet in width—referred to the Committee on streets.

Of Lane & Mangam, for permission to erect iron stairs in front of No. 121 Broad street—resolution to grant said permission adopted.

Of M. H. Grinnell and 1024 others, that the Harlem Rails may not be removed—referred to Committee of which Alderman Chamberlain is chairman.

Of fishermen in Catherine market, to have their stands regulated—referred to Committe on Markets.

Of J. H. Bennet and others, firemen, to compel fire companies to do general duty—referred to Committee on Fire and Water.

Communications from Pliny Robinson, relative to a machine for cleaning the streets—referred to Committee on Cleaning Streets.

REPORTS.

Of the Committee on Ordinances, in favor of confirming assessments for filling low grounds in the 11th and 16th wards—adopted.

Of the Committee on the Croton Aqueduct, against approving contract entered into by the Water Commissioners, with Wintersteen & Myerst for water pipes—laid on the table and ordered to be printed.

From the Committee on Finance, adverse to the memorial of Frederick De Peyster, to sell a piece of land in Madison Square—adopted.

Of the Committee on Assessments, in favor of the several petitions of H. D. Krack, A. B. Janin, Jonathan Hunt, the Mechanics' Institute, the Baptist church in Cannon street, for the correction of tax, were adopted.

Of the Committee on Assessments, against the petitions of Alfred Atkins and M. Silber, for the correction of tax—adopted.

Of the Street Committee concurring with the Board of Assistants in relation to granting of surplus water from sewers in Second Avenue, &c., to G. W. Bruen—concurred in.

FROM THE BOARD OF ASSISTANTS.

A report of the Street Committee on the communication of the Street Commissioners relative to alterations in the regulations of the streets and avenues between 22d and 42d streets—referred to the Committee on Streets.

A petition to build sewer in the 3d avenue, between 10th and 12th streets, and in 10th street between the 2d and 3d avenues at their own expense—referred to Committee on Streets.

Resolution granting Butcher's License to R. P. Perrin—concurred in.

An amendment to resolution of this Board, relative to salary of Keeper of Upper Police—concurred in.

A resolution that assessors give notice to persons assessed—referred to Committee on Assessments.

FROM DEPARTMENTS.

Communication from the Counsel of the Corporation, stating that the injunction heretofore obtained by the Water Commissioners has been dissolved—ordered on file.

Apportionments of Assessment from the Street Commissioner—passed.

Ordinance to regulate and set curb and gutter stones in 28th street, between the 7th and 8th avenues—passed.

UNFINISHED BUSINESS.

The report of the Committee on Cleaning Streets, in favor of cleaning the streets by contract, which was laid upon the table at a previous meeting, was taken up, and with some alterations adopted.

The report of the Committee on Wharves, &c., in favor of widening the carriage way on the westerly side of Coenties slip, laid upon the table at a previous meeting, was taken up and adopted.

RESOLUTIONS.

By Alderman Woodhull—Whereas, it appears by the report of the Comptroller, that the amount of Coroner's fees paid out of the city treasury for the year 1840, was about $5000;

And whereas, in the opinion of the Common Council, such amount greatly exceeds a just compensation for the services of that officer; therefore,

Resolved, that an application be made to the legislature to reduce the fees of the Coroner of this city, so that the amount, including summoning jurors and subpœnaing and swearing witnesses, shall not exceed the annual sum of $2000; and that the counsel of the corporation prepare and present a suitable memorial to the legislature for that purpose.

Aldrman Benson proposed, as an amendment—and also for permission for the Common Council to increase the number of coroners for the city and county to not exceeding four, and of assigning to each a certain district of said city and county—referred to Committee on Laws, &c.

By Alderman Benson, Resolved, That the Street Commissioner report to this Board the amount of bills paid since the 1st day of January last, for work and labor done on the roads and materials furnished for the repairs thereof, and which work and labor was performed and materials furnished before the said 1st day of January—adopted.

The Board then adjourned until Monday next, 5 o'clock, P. M.

SAMUEL J. WILLIS, Clerk.

CORPORATION NOTICE.—Public notice is hereby given, that a petition has been presented in the board of Assistant Aldermen, to grade and repave Washington-street, between Rector and Morris street.

Persons interested, having objections to the above petition, are requested to present them in writing to the Street Commissioner's office, on or by the 8th of April, 1841. JOHN EWEN, Street Commissioner.

Street Commissioner's Office, March 29th, 1841.

CITY TAXES.—The Collectors of the different Wards are required by law to return their tax-books to the Comptroller on the first day of April, that they may be transferred to the Collectors of Arrears, when all taxes remaining unpaid, will be subject to the addition of fourteen per cent. interest.

Collectors of Taxes, with their places of residence.

1st Ward, Oliver Cobb, No. 6 Coenties slip.
2d " E. T. Backhouse, 15 Fulton st.
3d " Garret Forbes, 261 Greenwich st.
4th " John V. Coon, 298 Pearl st.
5th " E. P. Horton, 110 Reade st.
6th " John Layden, 55 Elm st.
7th " John Murphy, 596 Water st.
8th " H. T. Kiersted, 529 Broadway.
9th " Martin Blanch, 106 Charles st.
10th " Darius Ferry, 98 Allen st.
11th " Moses Fargo, 1 Manhattan st.
12th " Patrick Doherty, 8th avenue and 4th st.
13th " John F. Russell, 34 Norfolk st.
14th " Nelson Sammis, 241 Centre st.
15th " Joseph Britton, 40 Amity st.
16th " John Stewart, cor. 3d avenue and 26th st.
17th " Cornelius Van Benschoten, 64 Stanton st.

For the convenience of the tax payers of the 12th and 16th Wards, the Collectors of those Wards will be at the Comptroller's office, on Saturday, 27th inst., from 10 to 3 o'clock.

(From the Journal of Commerce.)

CORPORATION NOTICE.—Public Notice is hereby given, that a petition has been presented to the Board of Aldermen, to extend Washington street from Gansevoort street to the 10th Avenue. Persons interested, having objections to the above proposition, are desired to present them in writing at the office, on or before the 12th inst. JOHN EWEN, Com.

St. Com. Office, April 1, 1841.

A CONTRAST.

We copy from the Journal of Commerce of 27th ult. the following:

"The FINANCES OF NEW JERSEY.—The expenses for the coming year are estimated at $82.700. The revenue at $53,933 38—leaving about $30,000, to be provided for by taxation or otherwise. The legislative expenditure are put down at $23,000."

The Fees of the Corporation Council paid and payable last year amounted to within less than $8,000 of the whole revenue of the state of New Jersey, and the "Counsel Fees and Court Charges," in confirming twenty-three street assessments by our Supreme Court, in 1839, as appears by the city Comptroller's report of last year, page 102, amount to three hundred and nineteen dollars and sixty-seven cents more than the whole legislative expenditure of the sovereign state of New Jersey! ! !

This grows out of the modern doctrine of discretion.

TO THE ANTI-ASSESSMENT CITIZENS.

We have found it necessary to make our publication day late in the week, and have fixed it on Saturday in place of Thursday in consequence of being under the necessity of being at Albany the early part of next week.

DEATH OF PRESIDENT HARRISON.

The illustrious head of the Government of a great nation has been suddenly called from the scene of his labors and from midst of his people.

On Sabbath morning, April 4th, at 30 minutes before one o'clock, William Henry Harrison, President of the United States, departed this life at the city of Washington, aged 68 years. He had been in office but one month, and sick one week. In the full enjoyment of the highest honors in the gift of his country and in the midst of prosperity, he has ended his course and ceased from his labors. The event is solemn and will make a serious impression upon the minds of his friends, and also upon those of his political opponents.

The bitterness and venom of party spirit has increased to such an extent in our country, that a citizen, to reach an office of dignity and honor, of power and patronage, must have a constitution of iron to withstand the opposition of those who are anxious for the success of their own favorite candidate, and for the defeat of his opponent.

Both political parties are alike in fault in this, and the present solemn event is calculated to produce, in the minds of many, serious reflections.

The present is the sixth death that has taken place of persons who have filled the office of President of these States since the organization of our government; five of these have died within the last few years, and in the death of all these individuals there has been something remarkable, peculiar, and impressive, and calculated to make a lasting impression upon the minds of the citizens of this republic.

John Adams and Thomas Jefferson died on the 4th of July 1826; James Monroe on the 4th day of July 1831; and James Madison on the 28th of June 1836; George Washington died on the 14th December 1799, and William Henry Harrison on the 4th of April 1841.

Thus it will be seen that four of these individuals died on the 4th day of the month, and three of these on the 4th of July, and two of them on the same day and within a few hours of each other. Mr. Madison died within six days of the 4th of July.

There is something remarkable in these events, denoting a particular and remarkable Providence.

President Harrison has shared largely in affliction; has drank deep of the cup of sorrow, which made a deep impression on his mind, and tended much to fit him for the responsible duties he was called to perform.

Into his own beloved family death but recently entered and removed one of his beloved sons.

The patriot, the statesman and the Christian, has now closed his earthly labors; he has left the cares of a great people in other hands; he has passed from a world of trouble, from scenes of peculiar trial, and gone to the bright world of peace, of joy and of everlasting rest.

The following circular, from the Heads of Departments at Washington, announces the death of our venerable President, General Harrison.

City of Washington, April 4, 1841.

An all-wise Providence having suddenly removed from this life, WILLIAM HENRY HARRISON, late President of the United States, we have thought it our duty, in the recess of Congress, and in the absence of the Vice President from the Seat of Government, to make this afflicting bereavement known to the country by this declaration, under our hands.

He died at the President's House, in this city, this fourth day of April, Anno Domini, 1841, at thirty minutes before one o'clock in the morning.

The people of the United States, overwhelmed, like ourselves, by an event so unexpected and so melancholy, will derive consolation from knowing that his death was calm and resigned, as his life has been patriotic, useful and distinguished; and that the last utterance of his lips expressed a fervent desire for the perpetuation of the constitution, and the preservation of its true principles. In death, as in life, the happiness of his country was uppermost in his thoughts.

DANIEL WEBSTER, Secretary of State.
THOMAS EWING, Secretary of Treasury.
JOHN BELL, Secretary of War.
J. J. CRITTENDEN, Attorney General.
FRANCIS GRANGER, Postmaster General.

ARRANGEMENTS FOR THE FUNERAL.

Washington, April 4, 1841.

The circumstances in which we are placed by the death of the President render it indispensable for us, in the recess of Congress, and in the absence of the Vice President, to make arrangements for the Funeral Solemnities. Having consulted with the family and personal friends of the deceased, we have concluded that the funeral be solemnized on Wednesday the 7th inst., at 12 o'clock. The religious services to be performed according to the usage of the Episcopal Church, in which church the deceased most usually worshipped. The body to be taken from the President's House to the Congress Burying Ground, accompanied by a Military and Civic Procession, and deposited in the Receiving Tomb.

The military arrangements to be under the direction of Maj. Gen. Macomb, the General Commanding in Chief the Army of the United States, and Maj. Gen. Walter Jones, of the Militia of the District of Columbia.

Commodore Morris, the senior Captain in the Navy, now in the city, to have the direction of the Naval arrangements.

The Marshal of the District to have the direction of the civic procession, assisted by the Mayors of Washington, Georgetown and Alexandria, the Clerk of the Supreme Court of the United States, and such other citizens as they may see fit to call to their aid.

John Quincy Adams, Ex-President of the United States, members of Congress now in the city or its neighborhood, all the members of the Diplomatic body resident in Washington, all officers of Government, and citizens generally are invited to attend.

And it is respectfully recommended to the officers of Government that they wear the usual badge of mourning.

DANIEL WEBSTER, *Secretary of State.*
THOMAS EWING, *Sec. of the Treasury.*
JOHN BELL, *Secretary of War.*
JOHN J. CRITTENDEN, *Att. General.*
FRANCIS GRANGER, *Postmaster Gen.*

THE COMMON COUNCIL OF THE CITY OF NEW YORK AT THE COMMENCEMENT OF THE PRESENT CENTURY.

January 6, 1800.

Richard Varick, Mayor. Francis Harison, Recorder. Selah Strong, Jotham Post. Richard Furman, John Bogert, John B. Coles, Aldermen. Philip Brashier, Mangle Minthorn, Philip F. Arcularius, John Crolius, John Nitchie, Nicholas Carmer, Assistants.

Not one of the above named persons who composed the Common Council and administered the city government at the commencement of the present century, are now living—all, all are gone! Yes; in the short space of forty-one years these have all passed from time to eternity. When forty-one years more shall have passed away, those who now compose the present Common Council of this city will, in all human probability, have ceased from their labors.

We give below the proceedings of the Common Council on Monday evening, on receipt of the intelligence of the death of William Henry Harrison, President of the United States.

These proceedings were proper and appropriate, and entitle the Common Council to the commendation of the citizens. The expression of respect for the Christian religion by public officers and public bodies on every proper occason, is productive of great good. Every public body which pays a proper regard to these great principles, entitles itself to the good opinion of the people.

The present occasion is one of peculiar solemnity and is calculated to make a very deep, and we trust a durable impression on the minds of public men, and will, of course, have an influence on public measures.

In the death of each of the persons who have filled the office of President of the United States, there has been something unusual and powerfully admonitory, caculated to produce in the minds of the inhabitants of these States serious reflections.

The present is a peculiar time; and at no period has so much gloom pervaded the minds of all classes of citizens as the present. Could party excitement be quieted, and the good men of both political parties unite in endeavoring to promote the good of all, instead of a few, it would be attended with the best results.

It is not saying too much to say, that the violence of party spirit is doing more to weaken the foundation of the Government, the destruction of human happiness, and the business and prosperity of the country, than every other cause combined.

The great ambition and desire of selfish individuals to retain, or obtain public office for the sake of its emoluments or its patronage, is at the bottom of this evil, and the principal cause of it.

The American people have enjoyed great advantages, and have been highly favored. The productions of the earth have been abundant, and every section of our country has been uncommonly free from the scourge of sickness and pestilence.

From the Journal of Commerce.

BOARD OF ALDERMEN.

The following communication was received from the acting Mayor:

Mayor's Office, April 5, 1841.

Gentlemen: It becomes my painful duty to announce to you the melancholy intelligence of the death of General William Henry Harrison, President of the United States; an event sudden, solemn and afflicting to the nation. Of his services, civil and military, it is unnecessary for me to speak—they are identified with the history of our country.

I should do injustice to my own feelings, and the station I temporarily fill, were I not to partake of the general gloom that pervades the community, which mourns the loss of a Chief Magistrate, recently called from peace and retirement to preside over a nation of freemen.

I respectfully suggest, that such measures be taken as will evince the respect and affection due to one who has occupied so exalted a station, and shared so largely in the public confidence.

I am with respect, gentlemen, yours, &c.

ELIJAH F. PURDY, Acting Mayor.

Alderman Smith then offered the following resolutions:

Resolved, If the Board of Assistant Aldermen concur, that the Common Council of the city of N. York, have received with deep emotions the afflicting intelli-

gence of the death of General William Henry Harrison, President of the United States; and that while they sincerely sympathize with the family of the deceased upon the occasion of their sudden and melancholy bereavement; they cordially participate with their fellow citizens throughout the country, in the grief which is felt for the loss of one who was endeared to the nation by the patriotism and fidelity of his public services, by the purity of his private character, and by the exalted station to which he had so recently been called by the voice of the American People.

Resolved, That a suitable demonstration of respect for the memory of the late President, by the adoption of fitting solemnities, should be made by the public authorities and citizens of New York, and that a committee of the Common Council, to consist of six members from each Board, be appointed to make such arrangements in that behalf as they may deem expedient.

Resolved, That the Presidents of both Boards be requested to direct the Chambers of their respective Boards to be hung with black during the remainder of the term of the present Common Council, and that the members of each Board will wear the usual badges of mourning for the same period.

Resolved, That his Honor the acting Mayor be requested to communicate a copy of these Resolutions to the afflicted family of the deceased, and to cause the same to be published in the newspapers of the city of New York and the city of Washington.

These resolutions were seconded by Alderman Benson, in a series of neat, appropriate remarks, and also supported by Alderman Graham in a few judicious observations.

The resolutions were then unanimously adopted, and the President appointed Aldermen Smith, Benson, Graham, Hatfield, Nash, and Woodhull, the committee on the part of this Board.

BOARD OF ASSISTANTS—Monday evening.

Mr. President Lee, upon taking his seat, announced the sad occasion of the meeting as follows:

But a few short months since it became my painful duty to announce to you the decease of one of our associates, the Assistant Alderman of the 14th ward, who, at a good old age, finished his course on earth, and I trust is now receiving the rewards of a well spent life in a brighter and a better world. Scarcely has the gloom which then pervaded this Board been dispelled, before we are again called upon to mourn the loss of the Chief Magistrate of the United States. William Henry Harrison is now no more. Elevated as he was to the highest office in the gift of the people, melancholy indeed is the reflection, that after the short period of one month from the inauguration to the most important situation in the world, millions of free and independent people should be called to mourn his death. This sudden bereavement has cast a gloom throughout the nation which time alone can eradicate. Unexpected as was this event, the only consolation left to his friends is, that their loss is his gain. The last moments of his life were marked by a calmness and resignation to the Divine will. He died as a Christian should die, trusting in the promise of the gospel, and relying upon the merits of a once crucified and now ascended Saviour. He died actively engaged in the public service, closing his mortal labors as the President of the people, appointed by their free election. In his life he was patriotic and useful, and in his death expressed a fervent desire for the preservation of the principles of the constitution.

This is the first instance since the formation of our government that the people have been called upon to mourn the loss of the great head of the nation. An overruling Providence has thought proper for some wise purpose thus to afflict us. "Mysterious are thy ways, O God," and past finding out.

He whose death we now deplore, after serving his country year after year, on the battle field and in the councils of the nation, at a period of life when men are usually desirous of retiring from public duties, when nearly three score years and ten had laid their burthens on his frame, stood at his country's call to take command of a nation that is respected throughout the world, to guide and direct it in the defence of liberty and order. Justly may he be venerated and respected, and justly may his death be universally deplored; with us indeed would it be a disgrace did we not evince our respect for his character, and our gratitude for his services; many done it while their friend was living, and I trust all will show their attachment to the acknowledged head of the government. He has gone to that bourne from whence no traveller returns; the tidings of grief will resound throughout our land, every city, town and county, will re-echo the note of sadness, and will unite in their condolence with the family of the illustrious dead. They indeed need our sympathies and prayers. The ancient partner of his bosom, who shared with him his sorrows and his joys, and fondly anticipated meeting him surrounded by a retinue of friends; but oh! how changed the scene; the solemn mandate has come forth; they meet no more until the second coming of the Redeemer in glorious majesty to judge the world; he has now rested from his labors, and his best eulogium is the universal grief of the American people.

But I have done, and would only add that I have convened the Board at this time in order to enable you to adopt such measures as you may deem necessary upon this mournful occasion.

The resolutions from the other Board, were on motion of Mr. Davies, seconded by Mr. Underwood, unanimously adopted, and Messrs. Davies, Wood, Pollock, Peers, Underwood and Penny, were joined as a committee on the part of this Board.

PRESIDENT HARRISON'S INAUGURAL.

We commenced the publication of extracts from the Inaugural Address of William Henry Harrison in the second number of this Gazette, and ere we had completed these, the lips which uttered them were closed in death. We give below the conclusion of his address, which breathes sentiments and feelings which are worthy to be treasured up by every citizen in all after times. These sentiments are worthy of the man, and befitting the occasion that called them forth.

"I deem the present occasion sufficiently important and solemn to justify me in expressing to my fellow citizens a profound reverence for the CHRISTIAN RELIGION, and a thorough conviction that sound morals, religious liberty, and a just sense of religious responsibility, are essentially connected with all true and lasting happiness; and to that good Being who has blessed us with the gifts of civil and religious freedom; who watched over and prepared the labors of our fathers, and has hitherto preserved to us institutions far exceeding, in excellence, those of any other people; let us unite in fervently commending every interest of our beloved country in all future time."

PRESIDENT TYLER.

John Tyler, Vice-President of the United States, arrived at the seat of Government from Williamsburgh, Virginia, on the 5th instant, and immediately held a Cabinet Council, and subsequently took and subscribed the oath of office as President of the United States before Judge C[illegible]nch. The health of Mr. Tyler is said to be good, although not of a strong constitution. He, no doubt, will pursue the same system of measures laid out by his lamented predecessor. He enters upon the discharge of the duties of President of this Republic under peculiar circumstances, solemn and admonitory. The people of these United States, as a nation, have, by the strongly-marked providences of God, been called to reflect upon the past, to meditate upon the present, and to have an anxious care for the future.

OLDEN TIMES.

The following is a copy of a Petition presented to the Legislature in 1800, and is interesting in a double point of view — FIRST, in showing that the Common Council did not exercise the power of appointing weigh-masters formerly; *and*, SECONDLY, in presenting a long list of highly respectable houses doing business at the commencement of the present century.

There are comparatively few of the numerous commercial houses in large cities that continue forty years in business, and the proportion is decreasing more and more.

Commercial embarrassments, which are oftentimes the result of fluctuating trade, have a powerful influence in shortening the duration of human life. It is a remark we have often heard made by aged citizens, who have been attentive observers of the changes which have taken place around them.

To the Honorable the Legislature of the State of New York, in Senate and Assembly convened.

The Petition of the subscribers, inhabitants of the city of New York, humbly showeth:—

That some of your petitioners have of late experienced great inconvenience with respect to private weighing in this city. And others of your petitioners are fully sensible that such inconvenience doth exist.

Therefore beg leave to represent, that the private weighing has heretofore generally been performed by the Custom-House weigh-masters, who, by a late law of Congress, appear to be prevented from weighing every other save such articles as are necessary to be weighed to ascertain the duties thereon; which has left this city completely destitute of weigh-masters legally appointed for private business.

In his Excellency the Governor's Message to the Honorable the Assembly, of the 17th instant, "it is submitted to the consideration of the Legislature, whether the inspection of provision, potash, lumber, &c., would not be better performed if each of these branches of inspection was committed to a single inspector, who should be allowed competent fees, should appoint and pay his own sub-inspectors or deputies, and should be responsible for the whole."

Your petitioners highly approve of the principle recommended by his excellency the Governor in the aforesaid message.

Your petitioners therefore pray that a law may be passed, authorizing the appointment of a city weigh-master, and who alone shall be responsible, with such compensation and under such regulations and restrictions as to your honorable body in your wisdom shall seem meet.

HIGHLY IMPORTANT DECISION.

IN CHANCERY,

Before the Hon. Murry Hoffman, Assistant Vice-Chancellor.

Jacob Westervelt, et al,
vs.
The Mayor, Aldermen, and Commonalty of the city of New York.

David Codwise *vs.* The same.

These causes involve most of the great questions which have lately given rise to so much litigation respecting the assessments by the Corporation of the city, and the nature and extent of their powers. Every material fact is stated fully in the opinion.

Mr. Lewis H. Sandford and Mr. Holland for the complainants in the suit of Westervelt and Talmadge.

Mr. Theodore Sedgwick, jun., and Mr. D. D. Field for the Complainant, David Codwise.

Mr. P. A. Cowdrey, Counsel of the Board for the Defendants.

The Assistant Vice-Chancellor:—The time of the Court, for nearly a week, has been well employed in listening to copious and able arguments upon the most important and interesting questions that have arisen before me. The two cases in which this argument has taken place, present almost all those weighty topics. I approach their discussion with great distrust. I had hoped that, ere this, a determination of these points would have been made by one of those high Tribunals before which they have been in part investigated. But although opinions have been expressed by Judges, for whose *dicta* even the greatest respect is due, yet I know of no adjudication upon any point involved in these causes which forbids my unfettered examination.

No one can feel more reluctance in bringing to bear the interference of this Court in matters of so purely a legal nature. But whether acting as a ministerial officer to allow a temporary stay of proceedings, or as a Judge, however lowly, to pass upon these subjects, I can take counsel only of what the law of the State and the constitution of this court prescribe; and if I find a breach of the law, and a jurisdiction here to redress it, my duty to the suitor demands that I should interpose.

The question of Jurisdiction will be the last topic I shall discuss; because I find it impossible to decide it without a full view and determination of the nature of the acts complained of, the points of law involved, the situation of these parties, and the application of the remedies at law alleged to be appropriate.

I have entitled my opinion in both of these causes, because the three most important questions are involved in both; and the arguments of the different counsel of the Complainants have so aided and expanded the positions of each other, and the reply of the counsel of the Defendants in the last cause has been so full and pointed upon all the topics, that I cannot do them justice without considering them in common. But in the case of Westervelt there is one question which does not arise in the other, and which I shall first dispose of. I shall examine the causes in this order.

First—As to the effect of the cession of the parcel of 31st street, in exempting the complainants, Westervelt and Talmadge, from any assessment.

Second—The authority of that body, by which the various improvements in each suit were directed. Under this, the point that the Common Council, as now constituted, had no jurisdiction to take any step in reference to opening, making, or repairing streets or sewers, will be examined. The extent and nature of the powers conferred by charters or legislation, will also be inquired into. It is indispensable that the origin and character of the powers should be understood, to judge rightly of the legality of the acts now in question.

Thirdly—If that body has the authority, then, whether it has exercised it according to law, what are the prescriptions of the law, and what are the legal consequences of neglecting them. This point will divide itself into two; the one relating to opening or altering streets, and the other to the paving or regulating them, or the making sewers.

Fourthly—The question of jurisdiction.

I. As to the effect of the cession of part of 31st street. A party, from whom the title to the land through which 31st street runs, from the 9th Avenue to the Hudson River was derived, made a cession to the Corporation of the land necessary for that street. The Corporation accepted it, and have since recognized it as part of a public street. It appears very clearly from the map, abstract, and rule, that the assessment for damage actually commenced on the East side of the 9th Avenue. The petition and rule include, indeed, as part of the land to be taken, a small strip on the Westerly side of the 9th Avenue, of about 89 feet deep. But as this is plainly omitted in the assessment and report, I must suppose that some error occurred.

At any rate, it is clear that no assessment is made upon the Complainants for any damage arising, or expense accruing upon any part between the 9th Avenue and the Hudson River. It is also certain that there was no express agreement as to the cession, defining its operation as to future assessments. The question is only as to its implied effect.

That question is, whether by the cession the party was to be exonerated only from paying anything upon his lots fronting the street along the ceded line for any benefit; or whether he was to be exempted from any charge for the whole line of the street to its final limit?

An owner may, undeniably, be sometimes more benefited by the opening of a street than the amount of the strip of land taken for it. And the good sense of the matter appears to be, that to this extent an agreement is presumable; that is, the land is given up in consideration that the contiguous land along the line should be discharged from any imposition for that opening. Here is a plain contract. The Corporation take the strip of land, and are relieved from the possibility of paying at a future time, in the shape of damages, more than the amount reasonably to be imposed for benefit. The owner gives the land, and is relieved from the chance of paying more thereafter for benefit than its value allowed him for damage. It is true, as has been urged by counsel, that the owners of the property on the other side of the 9th Avenue are thus relieved from contributing anything for the damages which might be given to the persons ceding; and hence it is said should not be allowed to go upon such persons for any part of their own damages. But they get this benefit, not as owners of that property, but as citizens, and in common with every other citizen to whom the street becomes public by reason of the bargain. And if the ceding persons had been benefited beyond damage for their own part of the operation, the other parties would pay nothing. This, I think, shows the true meaning of the transaction. It is—we agree, that the damage and benefit for this part of the opening are equal; and when a farther part of the street is opened, if any benefit accrues to us, we must bear it.

Then as to the statute, (sect. 168,) the first provision (page 172) refers to an agreement with the owners of *all* the property required for the improvement, or benefited by it. The next part of it relates to an agreement with part only of the owners or persons benefited. Then the act directs and authorises the commissioners, *first*, to enter upon or proceed with their estimate and assessment as to the residue of the lands required for the improvements; *next*, as to the residue of the lands to be benefited. In both instances it is to be done of lands concerning which there is no agreement.

I think, therefore, it is clear, that to exempt lands from the assessment for other parts of a street to be opened beyond the limits of the cession, there must be an express agreement; and hence clear, that the implied agreement in this instance does not reach to that extent.

II. The next topic was the authority of the Common Council upon the subject matter of the improvements in question—the origin, nature, and limits of their powers. These topics have been largely dwelt upon, and constantly invoked to bear upon every question that has been raised. The point of the present organization of the Common Council falls under this head. I shall state my views upon these important matters in the first place, and make the application hereafter to the facts in these causes.

In the course of the discussion, the old charters of the city have been repeatedly referred to, and many arguments built upon their provisions as supposed on the one side to exist, or on the other to be repealed and varied. I deem it necessary to state what I regard to be the law upon this head.

In a former work, in examining the history of the Court of Chancery of this state, I came to the conclusion, that every law passed by the Colonial Assembly was valid until repealed by the crown. In the language then used: "Even upon the doctrine of the freedom of the people resulting from the bounty of the king—upon the doctrine of a crown lawyer of the reign of James II., a law passed as prescribed in the Bill of Rights of 1683, and, undisturbed by the king, remained a perfect law until changed by the authority which framed it." (1 Hoffman's Ch. Pr., vii.)

The steps of reasoning through which this conclusion was reached were these:

The patent of the Duke of York of 1664, granted the tract of country with all royalties, and all his majesty's estate, together with the right of government. The commission to Governor Nicolls and that to Governor Dongan authorised them to perform every power which by the letters patent were granted to the duke. The first assembly, which was convened in 1683, passed the bill of rights, which was assented to by Gov. Dongan in Council; and by that it was provided, that all laws agreed upon by the representatives, if approved by the Governor and Council, should be laws, and remain in force *until disallowed by the King*. I then entered into some historical details of legislation, upon this and upon other subjects, to show that this bill of rights had never been disallowed, and was in force. In most other royal charters, there was a clause for the submission of enactments to the king; and hence, in the English edition of colonial laws, the date of the royal confirmation or refusal is affixed.

The argument which was thus applied to the colonial laws seems to me still correct; but whether it is so or not, it is perfectly unanswerable when applied to the city charters.

The old Dutch charter of 1657 is not of consequence, except as an historical monument. The first charter was one granted by Nicolls in 1665, the capitulation being in August, 1664. This charter is recited in a petition of the Corporation made in November, 1668, stating that Governor Nicolls had incorporated by

the charter in question, the inhabitants into a body corporate and politic, under the government of a Mayor, Aldermen and Sheriff. (Records Common Council.) The petition recites the privileges and franchises then granted, and seeks an extension of them.

It is to be remembered that in the interim the Dutch had regained possession of the province, viz. in 1673. In 1674, it was surrendered, and in November of that year, Governor *Andros* issued a proclamation, declaring that all former grants, privileges, or concessions theretofore granted, and all estates theretofore legally possessed by any under his Royal Highness, before the late Dutch government, were thereby confirmed. In October, 1675, *Andros*, by proclamation, and in virtue of the Duke's letters patent, appointed certain persons to be the Mayor, Aldermen and Sheriff, with full power among other things, "*to rule and govern all the inhabitants of this city and corporation, or liberties and all strangers.*" Thus the city government remained until the application before mentioned, in November, 1683. Numerous discussions took place in that year, between the Corporation and Governor Dongan. A part of that application of the Corporation was granted, and other parts referred to the Duke; and at last, in April, 1686, the complete charter was granted by Governor Dongan, Lieutenant-Governor of James II. That monarch came to the throne on the 6th of February, 1685.

I hold it to be immaterial whether, between February, 1685, and April, 1686, Dongan had received a new commission from James as King, or acted under his old commission from the Duke. If the latter, the Duke was the grantee of all royalties and right of government directly from the crown. He had conferred them in the utmost extent upon his Governor. The accession to the throne of the individual patentee never merged or destroyed the patent, so as to affect any rights conferred under it. It is clear that, as King, he could not repeal a charter granted under royal authority. I am aware that it has been urged in old times, that the accession of the Duke to the throne merged what he had done as Duke in his kingly power; and that he could abrogate charters granted by him. The doctrine is equally contrary to reason, justice, and law. The crown cannot revoke or annul a patent issued directly by itself (Burrows, 1656,) nor, consequently, a patent granted by its *fully constituted agent*. When Charles II. assailed the charters of the realm, he did it through the forms of law, by a *quo warranto*, to which the *courts* lent themselves. (Millar's English Government, Vol. 3, p. 58.) Other chartered bodies, intimidated or seduced, accepted new patents from him. In the reign of James II. it was asserted in the House of Commons, "that the compulsory substitution of new for ancient charters, amounts to a dissesin of the subject of his freehold without a trial." (Viscount Lonsdale, May, 1685. 4 Lingard's History, 28.)

In Marshall's History of the Colonies it is stated that ineffectual efforts were long made to induce the General Court of Massachusetts to surrender the charter, but they were resisted, they deeming it better "to die by the hands of another than by their own." See also Pownall's History of the Colonies, 54, 58. It is clear, therefore, that the Charter of Dongan was in full force, when that of Montgomerie confirmed it.

The Colonial Legislature has also been invoked to illustrate these questions.

In April, 1691, an act was passed for confirming unto the cities and towns within the Province, their several grants, patents and rights respectively; and by another act, passed in October, 1732, all the charters, &c., theretofore made under the great seal of the Province, were confirmed, and declared valid, binding and effectual for ever. This was after the last charter of Montgomerie, which was dated the 15th Jan. 1730.

The constitution of 1777 provides, that nothing therein contained should annul any charters to bodies politic, made prior to the 14th of October, 1775. The constitution of 1821 contains the same provision. But by both constitutions, the colonial laws in force on the 19th of April, 1775, (not since repealed, expired or altered,) were to be and continue the law of the State, *subject to such alterations as the Legislature shall make concerning the same.*

On the 10th of December, 1828, the Legislature passed a law "that no statute passed by the Government of the late Colony of New York, shall be considered a law of this State."

The colonial acts recognizing the charter conferred no new powers, nor did they enlarge or abridge existing powers. They were made for the better settlement of the community and quieting men's minds, as one of them recites. They perhaps, also, may have in part arisen from the republican tendency of the city authorities, in rejecting the Crown as the source of their power, and seeking it from the representatives of the people.

Then the question is, how far was colonial Legislation, in respect to the charter of the city, affected by the Statute of 1828? It is just to regard the colonial acts as repeating and expressly granting all the powers of the charters.

It cannot be disputed that these colonial ratifications, treating them even as actual grants, were subject to legislative power, wherever any corporate franchise is subject to it. The King may grant a charter, and neither he nor his successors can repeal it. It must be done by regular process of law. But the Parliament can annul, modify, or enlarge every charter granted by the Crown of a pure municipal character, where no vested rights in property have been bestowed or exist. The people of the state succeeded to all the authority of Parliament, as well as all the privileges of the Crown, and through a convention they delegated the exercise of their power to certain bodies. The transition was effectual and gentle. The political power survived, though the King's authority expired. The maxim of the French Monarchy, *Le Roy meurt, Le Roy vie*, is perfectly applicable. (See 9 Mass. 454.) When the constitution ecognized the colonial laws, as they prevailed in 1775, it recognized them as subject to the alterations of the Legislature. That involves the right to repeal. But the same instrument saves the charters. It does not, however, declare them to be unalterable. It merely provides that nothing therein shall affect them. What effect, then, has the act of 1828 upon the Statute of 1732? That Statute, it must be noticed, contains in the first section, what is equivalent to an express creation of a Corporation; so that if every charter had been plainly abrogated and null at that time, the Corporation would still have been established; its integral parts being the persons then answering the description of the Mayor, Aldermen and Commonalty. All grants and charters before made are declared valid and effectual, and they may for ever peaceably hold all powers, liberties, and franchises before conferred by any letters patent.

Now, although it has been held that a general law of the Legislature respecting the licensing of grocers affecting the whole state, repealed the powers granted in the charter of a village upon the subject, yet I doubt whether the principle could extend to the case considered. (11 Wendell, 232.) It appears to me, some more special legislation would be requisite to destroy a Corporation, or take away all its power and liberties. I am speaking of course of those powers and liberties admittedly municipal or political only, and within the authority to annul. I do not, however, perceive at present, that this question is of moment. If the colonial act is abrogated, the charters remain. If the act is not affected, and it is treated (as a colonial lawyer on the popular side would, I think, have regarded it,) as the true source of the powers, then the charters are to be looked to only for the enumeration of what has been bestowed, as a mere schedule to the statute. But in either view, the question as to the power of subsequent Legislation is the same. Whatever that authority may be, it is as extensive in its application to a previous statute of the colony or the state, as to a Royal charter. It is certainly not more limited as to the latter than the former. The recognition of the charters in the constitution cannot impair that power. The whole provision is, that nothing therein contained shall be construed to annul any charters to bodies politic or corporate made by the King. It gives no new right—it exempts from no previous control. It preserves them as they then existed, unshaken by any of its own provisions, and it leaves them subject to every principle of the law.

Then the question is, what is the power of the Legislature over the Corporation of the city and all its franchises, whether viewed as springing from the Royal bounty or the colonial Statute? It belongs to the Legislature to repeal or modify every right and every power—to abolish or restrict every franchise or liberty now vesting in the Corporation, not coupled with a beneficial interest in property. Any statute rescinding or modifying a provision contained in the charter relating to such a power or franchise; any statute prescribing a new mode of exercising such a power, or varying the former mode; any statutory regulation repugnant to a provision of the charter, is valid, and must prevail. Every statute granting a new power and directing the manner of its exercise, is of course the only rule of action.

It is necessary here to advert to the doctrines of the English law and our own upon this subject.

A subsequent charter of the Crown operates upon a previous one as a grant, as a confirmation, as an enlargement, or as a restriction.

This is the language of the common law. But to have the last effect, it must be accepted; and Lord Mansfield, and Justice Wilmot declared that an acceptance in part, proven by acting under it in a particular case, does not prove acceptance of the whole, so as to supersede entirely the former character. (Rex *vs.* Cambridge, 3 Burrows, 1656.) Here, however, arises a most important difference. The legislature may control these municipal bodies entirely and absolutely. They may take away the right, or modify it, or direct a new mode for its exercise. The king could do neither. (3 Burrows, 1656.) Acceptance of a new charter from him and action under it was proof of a new compact, and went no farther than the acceptance went. But as to an act of the legislature, it does not depend upon the fact that the company has agreed to the change in their former powers, when, but for that agreement, the change could not be made. The change may be made in utter disregard of their wishes and assent. I must repeat that, in these positions, I am considering merely corporations in relation to franchises not involving rights to property.

The following authorities establish the right of the legislature to interfere with every power not involving such vested interests in property.

"Public Corporations which exist for public purposes, such as towns, counties, &c., the legislature may change, enlarge, modify, and restrain, securing, however, the property for the use of those for whom it was intended. (4 Wheaten, 418.) In *Coates* vs. *The Mayor of New York*, (7 Cowen, 585,) a statute had empowered the Corporation to make by-laws regulating, or if found necessary, preventing the interment of the dead. A by-law prohibiting it was found valid as an authority to make police regulations. Necessity was considered synonymous with expediency. It was also said in that case, that the powers of the Corporation depended on statutes which had superseded the original charter, especially as to those things in relation to which a statute makes provision either agreeing with or differing from the charter.

"Political powers conferred upon a Corporation for the local government of a place are not vested rights as against the state, and may therefore be abrogated by the legislature as well by a general law affecting the whole state, or by a special act altering the powers of the Corporation." (The *People* vs. *Morris*, 11 Wendell, 325.) Hence the revised statute as to the licensing grocers suspended the powers given in a village charter.

In *Satterlee* vs. *Sutton*, cited by Chancellor Kent, (notes to the charter, p. 149,) it was held that the statutory provision authorizing the appointment of measures of grain by the state, and regulating the measurement, superseded the power given in the charter to the Corporation to appoint measurers.

And upon the principle of this supremacy of parliament has the important statute called the Municipal Corporation Act been passed. (6 William 4th, c. 76.) By the first section all laws, statutes, usages, charters, grants and letters patent, inconsistent with the provisions of the Act were repealed and annulled. Its provisions are numerous, and its regulations affected many corporate powers. Indeed, as to the income of the property of a vast number of Corporations, it prescribed many new regulations, although the principle was not interfered with. See upon this statute, *The Attorney General* vs. *Aspinwall*, (1 Keen, 513, 2d Mylne and Craig, 613.) *Attorney General* vs. *The Corporation of Pool*, (2 Keen, 190, 4 M., and Craig, 17,) particularly the report in 2 M. and Craig. So the statute of the 6th Geo. 4, c. 91, is a striking illustration of the power of parliament over the king's patent. An express statutory provision was necessary to enable the king in any subsequent patent to make the corporators individually liable in person and property for the debts of the corporation; (section 2,) clearly showing that such a provision, without a statute, would be contrary to the common law and void. And see the recital in the act of 4 and 5 William 4th, c. 94. The following cases will also show the regard to private rights united with the assertion of the power over Municipal Corporations exhibited in that act, (*Regina* vs. *Liverpool Corporation*, 3 Nev and Perry, 280, *Harvey Exparte* ibid 159.)

Another point upon this subject is equally clear and equally important. If the power is one giving a vested right in property, it is beyond the reach of the legisla-

ture. The constitution of the United States has here interposed, treats it as a contract, and has forbidden the state to impair it. Hence, if it is necessary to resort at all to the act of 1732 respecting the charters, the repealing act of 1828 would be wholly void as to *such* powers: and as the constitution of the state has preserved the charters, and these are equally compacts, any legislation, so far as it entrenched upon rights of this description, would be null.

It may be difficult to draw the distinction between these classes of powers with accuracy. The case of a ferry is, in my opinion, an instance of a franchise coupled with a right of property. The cases of improvements relating to the streets and sewers are clearly not so. The opinion of Chancellor Kent on both of these points is conclusive. (Notes to the charter, p. 140. Ibid, p. 142.)

Upon this distinction between the vested rights of corporations in property, which cannot be abridged, and the exercise of powers which may be wholly abrogated, the following cases deserve attention. (*Dartmouth College case*, 4 Wheaton. Cranch 87, 7 John Rep. 477, 2 Gallison, 139, 7 Pick, 344, 2 Greenleaf, 175, 6 Ibid, 474, 9 Wendell, 392.)

Another and most important inquiry is as to the extent of the powers granted by the charter, and what are necessarily implied from the powers bestowed. The distinction between acts of the legislature merely auxiliary, and those essential to the exercise of power, may prove important.

First, every exercise of power must be according to the course of the common law. The king by his charter could not authorize a by-law infringing it. As has been well expressed, if the king in his letters patent of incorporation make ordinances himself, they are subject to the general rules of law. (Hobart, 210.) Hence in *Waltham* vs. *Austin*, (8 Coke, 115,) it was held that a by-law authorizing the seizure of cloth dyed with logwood, by a corporation of dyers, was void as against *magna charta*, although the power was expressly given in the king's patent. And hence a power of seizure and distress cannot be exercised, unless it is expressly granted by an act. (*Clarke* vs. *Turket*, 2 Vent, 128. See also 1 Kenyon's Car: 195.)

In *Kirk* vs. *Nowell*, (1 T. R. 118,) an act of Parliament having granted power to a Corporation to enforce its ordinances by fine and amerciament, it was held that they could not impose a forfeiture.

NEXT, the power to make by-laws is incidental to a Corporation, whether expressly conferred by the charter or not. (*Norris* vs. *Slops. Hob.* 211.) They may be made for the regulation of franchises conferred as well as of the municipality. (*Lenden* vs. *Vanacre*. 12 Mod. 276. See also Strange, 462.) But they must be in subservience to the common law; so that a custom to make them does not sanction any contrary to common right. (*Wilton* vs. *Wilks*. 2 L. Ray, 1131.) And an act of Parliament confirming the customs of a chartered body, only ratifies such as were originally legal. (Hamburgh Comp. Case, 1 Mod. 213 n. *Wilton* vs. *Wilks*, 2 Ld. Kay 1133. *Fazakerly* vs. *Wiltshire*, 1 Strange 466. *York* vs. *Welbench*, 4 B. & Ald. 440.)

In the case of *Hurt* vs. The *Mayor of Albany*, (9 Wendell, 571,) the rule is found that where a Corporation is authorized to enforce its ordinances by fines or any other prescribed mode, it is by implication prohibited from adopting any other mode.

In *Dunham* vs. The *Trustees of Rochester*, (5 Cowen, 462,) the charter of the village gave the trustees power to make prudential by-laws, particularly relating to markets, public streets, taverns, gin-shops, and huckster-shops, not contrary to the laws of the state. A by-law requiring all hucksters to take out a license, and imposing a fine of five dollars for every day's doing business without it, was held against the law and void, as a restraint of trade. For all purposes of jurisdiction they were like inferior courts, and must show the power given them in every case. If this be wanting, their proceedings must be holden void whenever they came in question even collaterally, for they are not judicial, and subject to direct review on certiorari.

The *Mayor of New York* vs. *Ordinaux*, (12 John Rep. 122.) A statute had been passed, April, 1806, for the better government of the city of New York, and to grant certain additional powers to the Corporation; among them to regulate the keeping of gunpowder. The statute also provided that the Corporation might direct the forfeiture of the same, and that they might impose penalties for non-observance of the ordinances, not exceeding $250. An ordinance passed forbidding the keeping of gunpowder exceeding twenty-eight pounds in any one place, and then to be divided and kept in a particular manner; and imposed for a violation, first the forfeiture, and next the penalty of $125, for every hundred-weight of powder not so kept. It was assumed that under the act the forfeiture could be inflicted, and the penalty could be also imposed. It was held clear, however, that the fine could be but $250 for the single offence. Under the by-law, the second count claimed $1375 for the violation in one instance, being regulated by the quantity. Justice Spencer, delivering the opinion of the court, also said that the act must be presumed to have passed on the application of the common council, that being the ordinary course. That if it were conceded that the by-law was authorized by the general powers given by the charter, (upon which we express no opinion,) the application by the Corporation to the Legislature, and the latter having legislated on the subject-matter of the by-law, operated as a limitation of any general and undefined powers in the charter.

And in *The Rail Road Company* vs. *The Canal Company*, (4 Gill & Johnson, 1,) it is laid down that where a Corporation is created to effect a particular object, as to make a river navigable, and no mode of accomplishing it is pointed out, it will be intended that the Legislature designed it to be done in any of the known modes in which the navigation of a river may be improved. And again, that where alternative modes of exercising the power are given, each subject to the will of the Corporation, no experimental trial of one will preclude a resort to the other.

"Whenever a by-law seeks to alter a well-settled and fundamental principle of the common law, or to establish a rule interfering with the rights, or endangering the security of individuals or the public, a statute or other special authority emanating from the creating power must be shown to legalize it." (*Taylor* vs. *Griswold*, 2 Green, N. J. Rep. 235. Hornblower, Ch. Justice.) The question was as to right to make a by-law authorizing a vote by proxy. "The incidental power of making by-laws is limited not only by the terms of the charter, but by the spirit and design of the charter, the purpose for which it was created, the object which the crown or the Legislature had in view, and the general principles and policy of the common law." (*Ibid.*)

It has been held that a by-law to levy a talliage for keeping up beacons and watch-towers in the *Cinque Ports*, was good. (*Winchelsea case*, Thos. Ray's Rep. 449. *Clark's case*, 5 Coke, 64.)

In *Playor* vs. *Vere*, (Thomas Ray, Rep. 328,) the rule was laid down expressly that the levy of any tax was illegal, and a by-law pretending to effect it was void. Neither could the king grant a power of the kind, for it is confined to Parliament alone. A contribution to the general charges of the Corporation was, however, valid.

The right to make by-laws necessary to the execution of its powers thus restricted, was then inherent in the Corporation; and was also expressly conferred with the like restrictions by both charters. The 14th section of Montgomerie's charter is very full. With respect to streets and sewers, the powers given by it are in very ample terms. In that of 1730, the clause is, "not only to establish, appoint, and direct the making and laying out of all other streets, alleys, and highways not already laid out; but also the altering, amending, and repairing of all streets heretofore laid out, or hereafter to be laid out." And the power is also given "to make all laws and ordinances, as shall be deemed necessary for the better government of the city, and to enforce the same by distress and sale of goods, or action of debt, or any other lawful method." Thus an ordinance, or by-law, to carry out this power as to streets, consistent with the common law, the constitution, and the public statutes, would be lawful. Where legality terminates and encroachment begins would be sometimes difficult to define.

An ordinance, however, in restraint of common right or of trade, would be essentially void. An ordinance creating a new officer, except to fill an office granted, would be void. And an ordinance respecting an office not given by the charter but by a special act, must be consistent with the act as well as with the common law, where the act establishes no new rule. Hence the ordinance compelling the weighing of anthracite coal was, in my opinion, illegal, being in restraint of common right respecting an office not granted by the charter but by a new statute, and where no change of the common law was made. The general power to make ordinances was in that case wholly inapplicable. *West* vs. *The Corporation*, Jan., 1841. See *Taylor's, of Ipswich, case*, 1 Rolle, 5; *Sackville College case*, T. Raymond, 178.

An ordinance, then, (if there were no statutory regulations as to streets,) consistent with the common law for the carrying into effect the power to alter, lay out, and establish streets, would be valid. The appointment of officers for the purpose, the regulation of their duties and mode of acting, would be plainly an implied power. And an ordinance, imposing a fine and penalty for neglecting to do an act prescribed for the purpose of regulating or repairing a street, would also be valid. And the charter itself gave this remedy.

But here I consider the power, expressed or implied, terminates. First, there could be no general tax laid upon the citizens for the improvement or operation. It is too clear a proposition to need argument that general taxes could not be levied. The case of *Player* vs. *Vere*, before cited, the bill of rights, with the annual application for a tax law, set this matter at rest. *Next* an ordinance, prescribing the mode of taking land for a street, and of ascertaining the damages payable to the owner, even if it called in a jury, would not be legal. Under Governor Dongan's charter it clearly would not have been so, for it could only be done by consent, or under some known law of the Province, (section 2.) This plainly meant a statute of the legislature; and the legislature did give the authority by an act of October, 1691, hereafter particularly noticed. Of course, no other mode of taxing private property, and fixing the compensation, could be lawfully prescribed.

And again, the principle of assessment upon a portion of the citizens for a public benefit, never could be enforced by an ordinance. Nothing less than an express statute could sanction it.

Thus from the review of the charter and decisions, it may be concluded that the implied powers as to streets were these and these only: to direct what should be done where no private land was taken or no private land was charged, and to appoint the necessary officers; to pay for the works out of the annual revenue of the city; to direct each owner to perform the proportionate part of the work, and to impose a fine for its neglect. Indirectly this would obtain the end.

And the conclusion is also clear that whenever the legislature have made a statutory provision which directly or impliedly extinguishes, modifies, or restricts any power of the charter, it must prevail. Whenever it has established a mode of exercising a power, that mode must be pursued, and none other can be. Of course, where it has conferred a new power, the extent and method of executing it are governed by the statute solely.

The history of the ordinances and colonial legislature upon the subject of streets strikingly corroborates this view.

For example, on the 9th of May, 1676, an ordinance was adopted as follows: "Ordered that all persons living within the street called Here Graft, shall fill up the graft, ditch, or common sewer, and make the same level with the street, and then pave and pitch the same before their doors with stones as far as every inhabitant's house shall be fronting towards the said graft or ditch, upon pain of having such fines inflicted upon them as the court shall see fit."

On the 24th April, 1686, there was the following proceeding of the Common Council: "Adrian Werterhouse making application for satisfaction for his ground that was taken away to make the new street, did consent to convey his right and title therein to the city, and in consideration thereof it is ordered that he be free from all public taxes for the use of the city for a term of years, and also from payment of what has been already taxed."

On the 8th of August, 1687, an ordinance was passed, directing the inhabitants to pave the portions of the street opposite their lots, and imposing a fine for neglect.

On the 1st of October, 1691, an act of the colony was passed empowering the Corporation to appoint a surveyor and supervisor of streets, and providing that the pitching and paving of such streets, or making or amending vaults and sewers should be ordered and directed by such Corporation; and they might impose a reasonable tax upon all houses within the city, in proportion to the benefit received thereby, and levy the same by distress and sale.

And after this act, and on the 11th of February, 1692, an ordinance was passed ordering the inhabitants in the streets to pave, or cause to be paved, at their own

streets. Now, however, a general power is vested in the city authorities. It also appears that the system of imposing the expense upon the parties deemed to be benefited, has generally been adopted or sanctioned in the statutes relating to that city.

In the case of The *Mayor of Baltimore* vs. *Moore*, (6 Hard John, 376,) an act of the Legislature gave the Corporation power to pass ordinances for paving and regulating streets; and to tax any particular part or district of the city, for paving the streets therein, as may appear for the benefit of such particular part or district. An ordinance directing such a pavement, and taxing a particular district, but reciting enough in the preamble to show that it was for public convenience, was held void in an action of assumpsit. (See the language of the Court, page 380.)

The act of 1787 remained in force, with a few alterations, until the statute of April, 1801, which is the foundation of our present system. By that the principle of assessing damages by means of commissioners instead of a jury, the principle of imposing the assessment upon adjoining owners, and the mode of selling the property upon default of payment, were recognized and carried out. The act of 1813 completed the system.

After this examination of the charters and the legislation respecting them, the questions raised as to the corporate powers will be better understood.

I shall now examine the point as to the constitution of the present Common Council.

It is recited in *Dongan's* charter, of April, 1686, that divers lands, liberties, and franchises, had been granted, as well by charter as grants and confirmations, to the inhabitants of "this ancient city," sometimes by the name of Schout, Burgomasters and Schephens of the city of New Amsterdam; sometimes by the name of the Mayor, Aldermen, and Sheriff of the city of New York; sometimes by the name of the Mayor and Aldermen, as by other names. It then proceeds to grant and confirm unto "The Mayor, and Aldermen, and Commonalty of the city of New York," all the privileges and rights which by that name or otherwise they have held.

The fifth section of this charter provided that there should be a Mayor and Recorder, Town Clerk, six Aldermen, and six Assistants, who should thereafter be termed THE MAYOR, ALDERMEN, AND COMMONALTY OF THE CITY OF NEW YORK. The sixth section constituted and declared such Mayor, Recorder, Aldermen, and Assistants, for the time being, a body corporate and politic, and gave to that body all the lands, privileges, franchises, and rights therein mentioned; and confirmed to them every franchise and power. (§ 16.)

The Governor in that charter appointed all the officers—the Mayor, Recorder, Aldermen, Assistants, and Clerk. The right to elect subsequently was given to the citizens.

Then in the 7th section it is provided, that the Mayor, Recorder, Aldermen, and Assistants for the time being, or the Mayor, Recorder, and any three or more of the Aldermen, and any three or more of the Assistants for the time being, shall be and be called, "the Common Council of the said city."

The power conferred upon this body is to make laws, orders, and ordinances for the government of the city and liberties. The power is large, but the words need not at present be cited.

The first and important observation to be made is, that the whole control of the property, the whole execution of every power, the whole management of all the franchises, and the whole police regulations, are vested in this Common Council thus constituted. Except the town clerk, the integral members are the same as the body to which the powers and property were granted. For convenience, the number of the two more numerous classes competent to act was defined.

In theory, therefore, the right might reside in the one body, so that writs or deeds should be in its name. In practice and by express provision, the exercise of every right and the control of all property was in the other body.

Montgomerie's charter of 1730, while reciting disputes and doubts as to the charters and grants, still treats the Mayor, Aldermen, and Commonalty as a subsisting Corporation. The fifteenth section varies only the organization of the Common Council, by providing that the Mayor or Recorder, (before both were necessary,) with *four* or more aldermen, and *four* or more assistants, should be necessary. The power to make laws and ordinances for the government of the *body corporate* and the citizens, is conferred upon this body in the largest terms.

Then follow certain sections as to ferries, as to streets, and as to the other franchises. They are of importance. They grant to the Mayor, Aldermen, and Commonalty, "*that the Common Council at the time being, or the major part of them,* shall establish ferries, establish, order, and direct the laying out of streets, water courses, highways, &c.

Again—the *grant* of offices is, in most cases, made to the Mayor, Aldermen, and Commonalty; the power of appointment of the officers and removal is given to the Common Council, except where the Mayor is designated. (See sections 18, 19, 22, and 24.)

The act of 1813 occasionally employs the phrase The Mayor, &c., in Common Council convened, but rarely. In the 177th section, for example, when referring to the streets and avenues on the map of 1807, it refers to the Mayor, Aldermen, and Commonalty merely. In referring to streets not on that map, the terms in Common Council convened are used.

But with this exception, which I take to be entirely accidental and unimportant, arising from pursuing the words of the ninth section of the act of 1807, the provisions of this statute and many others strikingly corroborate the principle I have stated. Wherever property is vested, rights are bestowed, or obligations are imposed, the phrase is, The Mayor, Aldermen, and Commonalty. Wherever an act, law, ordinance, or resolution is to be done or passed, implying the exercise of a duty or a power, it is generally the Mayor, &c., in Common Council convened. There is an instance of both in the 183d section of the act of 1813. All suits must be by and against the former. The land taken is vested in them. But when assessments are to be ratified, it is done in Common Council convened, (sec. 185.) When a cistern is to be built in a street, the Common Council may order it. (Laws 31st Jan. 1817.) The power bestowed to restrain the mooring of ships, is to be exercised in Common Council. (Law, March 4, 1814; sec. 4.)

I am far from saying that this distinction has, in all instances, been observed. There are, however, frequent cases of its being had in view. Throughout the whole legislation down to the charter of 1830, there is nothing inconsistent with its existence.

Upon the whole, I consider it indisputable, that at that period while all property and all franchises were vested, in contemplation of law, in the Mayor, Aldermen, and Commonalty, the exercise of every power connected with them was in the body termed the Common Council, except where, as in the case of certain officers, it was placed elsewhere. And I hold further, that if the legislature had conferred any new power, or any new office upon the Corporation by its corporate name, (as they did in the case of weighers,) the exercise of the power, and the regulation of the office, must impliedly be in the Common Council. If the legislature prescribed the mode, of course the case would be different.

It follows, from the principles before stated, that the legislature could always change or remove any of the integral members of the body. Hence by an act of the 27th of February, 1807, the common clerk, called town clerk in Dongan's charter, was, as I construe the act, divested of his functions as a member of the Mayor, Aldermen, and Commonalty.

Then the new statute of 1830 provided, that neither the Mayor nor Recorder should be a member of the Common Council after the second Tuesday of May, 1831. It provided, also, that the legislative powers of the Corporation should be vested in a Board of Aldermen, and a Board of Assistants, who, together, should form the Common Council. And it directed that the Board should meet in separate chambers.

Now, in my opinion, it is wholly immaterial whether a given power exercised by the Common Council is of a legislative character, or of any other. The principle I have advocated constitutes that body the organ for exercising every power of every description conferred upon the Corporation in its corporate name, unless there is an express statutory direction of another mode. Although the members act now in almost every case in separate Boards, yet they are still in Common Council convened, as much as the Lords and Commons are in parliament assembled, though sitting apart. And the conclusion is certain, that where the seventh section of the new charter is not imperative, the Boards may act separately or jointly as they think proper. Hence all appointments to office are made (under a mere joint rule, however,) when assembled together, but there is nothing to prescribe this. It is rare that anything else is thus transacted, as the language of the act is broad. But throughout, the two Boards are treated as forming in the aggregate the Common Council. This is the

long-known agent for the execution of all ministerial, administrative, or judicial, as well as legislative power, unless otherwise specially prescribed, or where the Common Council has itself delegated the execution to its own officers. In the case of streets and sewers, no statute has pointed out any other organ. The acts of 1824 and of 1828, and their rejection by the people, have been referred to. The powers which I consider to exist, were expressly conferred upon the Common Council by these proposed statutes. But it is not a just inference that the citizens rejected them because of such a clause. It may have been that the reason was that the proposed charter was prepared by the Corporation itself. The objection raised on this subject is therefore not tenable.

III. The next and most serious question relates to the manner in which the power of the Common Council has been exercised in these cases, and whether the provisions of the law have been complied with. And first as to the force of the seventh section of the act of 1830.

I must here advert to the course of proceeding in relation to opening 31st street, one subject of the Bill of Talmadge and Westervelt.

It is stated in the Bill, and admitted in the answer, that on the 17th day of February, 1836, a resolution which had passed both Boards was approved by the Mayor, which is in the following words: "Resolved, that all the streets and avenues as laid down on the commissioners' map of the city, shall be opened up to and including Forty-second street, excepting such parts of said streets and avenues lying within the said limits as have already been opened by Deed of Cession from the proprietors, or by due course of law."

On the 24th day of June, 1836, a petition was presented to the supreme court in the usual form, stating that the Mayor, &c., in Common Council convened, had deemed it desirable for the public convenience, to open 31st street between the Tenth avenue and the East river. Under this commissioners were appointed, and an assessment made.

Whether the object of the Common Council was attained by the manner of carrying out this resolution, or whether it was a judicious exercise of power to make so sweeping a one, seems to me immaterial. It is not any ground for imputing illegality to the proceedings.

The commissioners having made their report, it was confirmed by the supreme court on the 9th of February, 1838. It is to be assumed that the regular notice of the report and application to confirm it was published as required by the statute. This, therefore, was the first notice the party is to be charged with, and that is constructive, although sufficient. (15 Wendell, 374.)

But it is here proper to remark, that the complainants would not have been permitted to have raised any of these questions, either before the primary commissioners, or the judges sitting as commissioners. The office of the latter, as I understand it, is only to revise the report as to the principles upon which its estimates are made, or as to the legal right to include certain property in it; to send it back in a case of gross error in amount, and to refuse its confirmation where the benefit plainly appears not to be equal to the damage. (19 Wendell, 667. Ibid, 681. Albany-street case, 11. Ibid, 150. Patchin, Mayor of Brooklyn, 13. Ibid, 669. See also the valuable case of Bennet *vs.* the Camden R. R. Company, 2 Green. N. J. Rep. 147.) The case should receive no prejudice from the omission to object.

The report was confirmed in February, 1838, and in May, 1838, a resolution was approved, fixing the actual opening of the street for the 9th of May, 1839. The Bill was filed in June, 1840, pending the advertisement of the premises for sale.

The part of the 7th section involving the question is as follows: "All resolutions and reports of committees, which shall recommend any specific improvement involving the appropriation of the public moneys, or taxing or assessing the citizens of the said city, shall be published immediately after the adjournment of the board, in all the newspapers employed by the Corporation. And whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner."

It is necessary to settle the precise meaning of this clause not only by a philological dissection, but by examining the object of those who adopted it. I shall break it into all the propositions of which it seems susceptible. There are two distinct branches of it. In the first place it may mean, that all resolutions as well as all reports, recommending an improvement involving the application of public moneys, shall be passed and published in the mode directed. This construction has this difficulty: that a resolution properly does not *recommend* an improvement, which a report of a committee does, but enacts it, or directs an inquiry. It is, however, in exact conformity with the section as originally introduced into the convention. (See p. 156 Kent's charter.)

A second reading is this: *First*, all *reports* recommending a specific improvement involving the appropriation of public moneys must be so passed and published. *Next*, all resolutions involving the application of public moneys, must be in like manner passed. If this is the true meaning, then a resolution respecting a specific improvement not leading to the expenditure of public money is not within the clause; but a resolution, whether relating to such improvement or not, is within it, if such expenditure is involved.

The second branch relates to taxing or assessing the citizens. Here, also, there may be several interpretations. One is, that the clause refers to a resolution, or report, or both, recommending an improvement involving *[the]* taxing *or* assessing the citizens. Another, that it refers to a resolution involving such taxing or assessing, irrespective of any improvement. And a third, that it relates only to a resolution directly taxing or assessing citizens.

The last construction cannot be sustained. I have before shown that the power to tax is nowhere specially granted, and that the Bill of Rights forbids it without the assent of the Legislature. An assessment directly laid, is similar in its nature, and is an imposition within the Bill of Rights. The annual application of the Legislature, and the annual law passed authorizing a general tax, show conclusively that this action was not referred to.

But if it is interpreted to mean a resolution *involving* the taxing or assessing the citizens, there are several cases in which it would apply in a broad extent. For example, to the annual resolution to apply for a tax law which specifies the sum to be raised. And two striking illustrations may be adduced of this—one before the new charter, and one afterwards. A resolution was adopted in March, 1821, for erecting a public market between Fulton street and Crane wharf—that $15,000 be raised annually for ten years by tax, which, with the income of the market, should be applied to pay the debt created for the purpose, and that the Legislature be applied to for a law authorizing it. (See Corp. Ordinances, 149 Ed: 1839.) Another was after the Corporation had obtained the Fire Indemnity act, an ordinance was adopted that application be annually made for power to raise $25,000 by tax, for the redemption of the stock.

It may be remarked, that there is certainly less reason for such a provision, where the Legislature is to be applied to for the specific purpose of authorizing a general tax upon all the citizens, than where the Corporation is acting under its ordinary powers. Publicity is obtained in the former instance by the notice required by the act of the Legislature of 1818, re-enacted 1 R. S. 150, § 1.

Nor does it seem consistent with the provision, or the object of its makers, to hold it applicable to cases only of such a general tax upon all the citizens. In the address of the members of the convention, they speak of it thus: "All propositions, involving assessments or burthens upon individuals, will be brought to the knowledge of those interested, so as to give them a chance of being heard."

But in fact, if we adopt the most limited meaning which can be reasonably urged, viz: that the clause applies to resolutions involving the expenditure of public money, or the taxing or assessing the citizens at large for specific improvement, then there is not a case in which in contemplation of law and consequently in fact, an opening or alteration of a street, or pitching and paving it, or the making of a sewer, may not involve such an expenditure or such a charge. In opening streets, if the improvement is below the line of the map of 1807, one third of the value of all buildings on the premises may be assessed upon the Corporation, and if within the map one third of the value of such buildings as existed before it was filed. In every case, property belonging to the city is assessed, where that of individuals would be.

It strikes my mind as too plain for cavil, that the provision covers every resolution relating to an improvement for which public money may be requisite through the effect of an existing law, and every resolution through which the citizens, or any class of them, may be assessed for improvements. I know of no other construction adequate to the object, or consistent with the spirit of the section.

What was that object? In the language of the address before cited, "careful and deliberate legislation, strict accountability, judicious economy, and perfect publicity. These are the remedies which the convention have sought against the evils and abuses to which all wealthy city governments are subject, of which this city has felt its share, and of which the public voice has at different times loudly complained."

And for the securing this object, they provided, that in the cases of such resolutions, they were to be immediately published in all the newspapers employed, and that whenever a vote was taken relating to them, the ayes and noes should be called and published in the same manner. And thus they deemed, "would be secured at once publicity and notice to all concerned, and the strong influence of personal responsibility upon the vote of every individual member."

The framers of this charter had, it is to be supposed, the constitution of the United States in view in a t- ing this provision as to the ayes and noes. By that, the ayes and noes shall, at the desire of one fifth of those present, be entered on the journal. In our own constitution, if a bill is returned with objections, the votes of both houses shall be determined by ayes and noes, and the names shall be entered on the journal. By a rule of the Assembly, upon a division, the names of the voters shall be entered on the minutes upon the requisition of any ten members.

In speaking of this provision of the constitution, Judge Tucker says, "In a representative government it is of the utmost importance that the people should be informed of the conduct of their delegates, individually as well as collectively. This purpose is fully answered by the rule spoken of. But to prevent a call of the ayes and noes too frequently, as is said to have been practised in the former Congress, the constitution has set reasonable limits to the exercise of the power, by requiring one fifth of the members to concur in it." (1 Tucker's Black. 205 App.)

Thus the convention and Legislature were not content with requiring the call, and the usual entry on the minutes which follows; but they also prescribe that the names shall be published. Now can it be possible that this provision was introduced thus expressively and imperatively, only to declare that in these instances the ayes and noes should be called if any member chose to demand them? Is it to be imagined that in these two selected cases, and in these alone, those grave bodies, the convention and the Legislature, meant no more than an admonition to do the act? Again, when this charter thus explicitly directs that every such resolution shall be published in all the newspapers employed by the Corporation, what did it mean? Did it mean that this need not be done unless demanded; that the performance or neglect of it was a matter of pure indifference; that if any member required it, it might be done, and if no demand was made, it might be omitted? Nay further, that if the requisition was made, it might be denied; for the right to refuse stands on the same basis of construction as the right to neglect? Can it be within the range of imagination, much less of argument, that the convention passed through this idle pageantry of legislation, in prescribing this act to be done, and then left its performance at the mercy of custom or caprice? They knew the summary process given by the law for taking away the citizen's property. They knew the vast powers of the Corporation over the subject. They anxiously adopted these provisions as safeguards against neglect, as securities for caution, as methods of publicity, and as restraints upon recklessness: and yet the construction is that they left them to be broken down and contemned by that very body against whose heedlessness or encroachment they were reared. The supposition shocks every doctrine of the common law. It violates every principle governing the action of municipal Corporations, clothed with special powers for special purposes. It tends to the perpetual encroachment of those constituted and inferior bodies upon legislative authority; and it generates disregard and contempt for private property and interests. It begins in convenience, grows into a custom, and terminates in the defence of usurpation as a right.

But it is urged that the clause is only directory. The meaning of this phrase is said to be, that while a particular direction of a statute is proper to be observed, its neglect is not fatal to the act done under it. The omission then not being material, the direction need not be pursued. As has been justly observed by counsel, it is then discretionary. This is a solecism in law as well as in terms. The true solution of the matter is this. Provisions are sometimes not essential, where the sta-

cashiers should give a bond satisfactory to the Board of Directors. A bond was given, the subject of the suit, by a cashier and sureties. He had long acted as cashier. It was objected that there was no record of such satisfaction, and held untenable. This position was approved of by Justice Cowen, in *The Matter of M. & H. R. R. Co.* (19 Wendell, 136,) where it was held that the taking of an oath "*well* and faithfully to perform the duties of the office of inspectors," instead of the oath prescribed by statute, "to execute the duties with strict impartiality, and according to the best of their abilities," was not ground to set aside an election. This oath is prescribed in the general statute, (1 R. S. 605,) not in the charter. The court appear also to adopt the position that if the oath had been omitted, it could not have been taken advantage of; citing several cases where it was held that such an omission shall not prejudice strangers, nor be taken advantage of by strangers. Justice Story says in another case, "that it is an established rule, that where the Legislature mean to impose a positive and absolute duty, and not merely to give a discretionary power, the word *may* should be construed *must.*" (1 Peters, U. S. R. 64.) In Plowden 206 b, it is said, "when a statute limits a thing to be done in a particular manner, it includes in itself a negative, viz. that it shall not be done otherwise."

In The *King* vs. *Bagshaw*, (7 T. R. 363,) it appeared that power was given to trustees of a turnpike company incorporated by act of Parliament to widen and turn any part of the road through private grounds, making satisfaction to the owners, with whom they might contract and agree. The statute then enacted, that if any person interested in such lands, *upon notice* to him given, should, for twenty days, neglect or refuse to treat, or should not agree, *then* the trustees should cause the damage to be inquired into by a jury, and upon the ascertainment by a jury, the amount so assessed was to be paid to the owners," &c. The trustees made a new road through the close of the defendants. They tendered the sum of £100, which was refused, and then summoned a jury, who assessed the damage at £100; upon which the trustees made their order, reciting the dispute, &c., that under the act a jury had been empannelled, who had heard counsel and evidence, and had assessed the damage at £100, which they therefore ordered to be paid to the parties. The proceedings were removed by certiorari. Upon a motion to set the assessment and verdict aside, the court said, that notice to the parties interested was the foundation of the proceedings below; and that, therefore, it should have been stated; for if no notice were given, the trustees had no jurisdiction; and with respect to counsel having been heard, it did not appear that counsel for the *defendants* had been heard. The rule was made absolute.

In the *King* vs. *The Mayor of Liverpool*, (4 Burr, 2244,) the application was made upon a certiorari to quash an inquisition of a jury, under an "act to enable the Corporation of Liverpool to make a grant to Sir Charles Moore for liberty to bring fresh water into the town." The jury had determined that there should be paid to the owners and occupants of the lands mentioned in the inquisition, the sum of £176 in the proportions therein mentioned. The assignee of Sir Charles Moore was the prosecutor. It was objected, among other things, that there was no notice appearing to have been given on the face of the proceedings. The three judges, *Mansfield*, *Aston*, and *Willes*, expressed the clear opinion, that *notice* ought to have been given to the parties interested, and that it ought to have appeared upon the inquisition to show that there was a jurisdiction. Without notice there was none. The inquisition was unanimously quashed. The statute under which this corporation acted, directed that notice should be given twenty days before the inquisition. See also *The King* vs. *The Norwich and Walton Road*, (5, Adol and Ellis, 563.)

In *Rex* vs. *Cooke*, (Couper, 26,) an act of Parliament had given power to the Corporation of London to make a road from Blackfriars' Bridge across St. George's Fields. In case of the owners of the soil refusing to treat, a jury was to be summoned to assess the value of the lands, &c Proceedings were had, and a verdict given, on which the Court of Quarter Sessions gave judgment for a certain sum as the value of the premises and for payment. The judgment was quashed on certiorari on the grounds chiefly, first, that the statute prescribed that "the Mayor, Aldermen, and Commons, in Common Council assembled, had not declared the land to be necessary, as directed in the act, but the Mayor, Commonalty, and citizens. No evidence was admissible to show that the latter were the proper persons. Next, that the statute had prescribed a notice in writing, to be given, while the record stated that *due notice* had been given. Lord Mansfield said, "This is a special authority delegated by act of Parliament to particular persons to take away a man's property and estate against his will; therefore it must be strictly pursued."

In *Wispard* vs. *Wilder*, (1 Burr, 330,) it was held, that under the statute 12 Geo., 1 c. 29, the declaration on a bail bond deed not set forth that there was an affidavit of debt, or that the sum sworn was endorsed on the writ. That the provision in the statute was not in the nature of a condition precedent, but only directory to the sheriff; so that, though the sheriff might be answerable, yet the bond was not void.

But in *Hill* vs. *Heale*, (2 Bos. & Pull, 196,) Sir James Mansfield, speaking of this case, says, "I should have great difficulty in agreeing with the doctrine imputed to the Court of King's Bench, that the statute of 12 Geo. 1, is merely directory. I cannot help entertaining great doubts respecting the dictum. The sheriff must see by the writ whether it be endorsed or not; and I cannot think he could justify an arrest without it. But this was merely a dictum, and not necessary to the opinion of the Court."

In *Hill* vs. *Heale*, (2 Bos & Pull, 196, N. S.,) the question arose under the bankrupt act, 5th Geo. 2 cap. 30. sec. 23. The act provides that no commission shall issue upon the petition of any creditor "unless the single debt of such creditor shall amount to £100 or upwards, or unless the debt of two or more creditors shall amount to £150 or upwards, or unless the debt of three or more creditors so petitioning, shall amount to £200 or upwards. Then the statute proceeded that the creditor or creditors petitioning for such commission, shall make affidavit of the reality of the debt or debts. This direction is not introduced by the word *unless*, but by the word *and*. In an action by the assignee of a bankrupt, the trading and act of bankruptcy was established, *and also debts due* to the petitioning creditors, who were four in number, to the amount of above £200. But in defence the affidavits were produced, in which the petitioners swear respectively; one to a debt of £50 and upwards, another to the same sum and upwards, a third in £60 and upwards, and the fourth £39 and upwards; thus making £199 expressly sworn to; and it was insisted that the commission was void. But it was held that the existence of the debts was a condition precedent, while the provision as to the affidavit was only to regulate the conduct of the Chancellor in issuing the commission. It was irregularly issued, and on that account an application to the great seal could have been made, but it did not render the commission void. The requisition as to the affidavits was but by way of caution, to prevent commissions being hastily issued.

In *Exparte Sneyds & The Bank of Ireland*, (1 Molleys, 261,) it was decided that a Corporation might become a petitioner for a commission in bankruptcy, and that the bond might be given by the petitioner, an officer of the company, but the affidavit be made by another officer.

The statute in force in Ireland is the same as that upon which *Hill* vs. *Heale* was decided. The Lord Chancellor adverted to the impossibility of a Corporation doing some of the things required by the act, such as making the affidavits, and yet that did not prevent them suing out the commission. That the case of Hill vs. Heale was an authority in point, there being a difference between the clauses; one being indispensable, and the other merely formal, which the Chancellor might correct if important. He held the irregularity here unimportant.

I look upon these two cases as plainly illustrating one of the distinctions I have taken. The Statute itself, by the change of its phraseology, in the same section, with respect to two matters, pointed out that the irregularity was not to be fatal, but was the proper subject of correction by the Chancellor.

In *McCall* vs. *The Byram Co.*, (1 Conn. Rep. 428,) the general rule was recognised, that an officer elected for a year, continues in office until another is elected in his place. That the time prescribed for such an election is generally not imperative, but directory, except where there is the expression or implication of a negative.

In the *People* vs. *Runkle*, (9 John. Rep. 156,) it was held that where a Statute directed that one third of the Trustees should be elected annually, and that the election should be at least six days before the vacancies should happen; an election on a moveable holiday was valid, though not a day certain, and it might happen

that the election would not be six days before the vacancy.

In the case of *Wicks* vs. *the town of Lancaster*, (1 Rolls. ab. 512,) was cited, deciding that where an election was to be held within eight days after death or removal, yet an election afterwards was good, for the power of election was incident to the Corporation; and the affirmative power to elect within eight days did not take away the implied power. So a case from Strange (625) is cited with approbation, that though certain Aldermen were to be annually chosen, the words were only directory, and the Aldermen held over. But the distinction was noticed where the Statute was, that the officers should hold for one year only, or the election should be on such a day annually. It was doubted whether, under the peremptory word employed, the one third of the Trustees could hold over. The ground, however, of the decision was, that the two thirds remaining, the Corporation was not dissolved.

The two cases last cited, *McCall* vs. *The Byram Co.*, and *The People* vs. *Runkle*, obviously rest upon one of the principles I have stated; that the Statute itself fairly admitted the construction that the act, or the mode of doing the act was not prescribed as imperative. The appointment in a Statute of the day of election is presumed to be subject to the known law of holding over, and there must be express words to make the case an exception.

In *The People* vs. *Allen*, (1 Wendell, 489,) the act regulating the militia directed that the commanding officer should, on or before the 4th of June in every year, appoint a brigade court martial. A court martial was not appointed until July, and the defendent was then fined an amount which the suit was to recover. The general rule was held to be, that where the Statute prescribes a time for doing any official act, regarding the rights and duties of others, it was *directory* only, unless the contrary was to be gathered from the Statute. The court rely upon *Jackson* vs. *Hooker*, (5 Cowen,) and *Pond* vs. *Negus*, (3 Mass 230.) The Chief Justice observes, "There was nothing in the nature of the power showing that it might not be as effectually exercised after the 1st of June as before; there was no prohibition to exercise it after that period, and the naming the day was a mere direction to the officer. There is nothing in the nature of the power given, or in the manner of giving it, that justifies the inference that the time was mentioned as a limitation."

Test the present case by this principle of the learned Judge. Is there nothing in the direction in question, and nothing in the manner of presenting it, that leads to the inference that it was meant as a limitation? It is too clear for discussion, that it was introduced, canvassed, modified and enacted for that purpose—and that alone.

In the case of *Johnson* vs. *Hooker*, (5 Cowen, 269,) the court held, that a purchaser at a Sheriff's sale who had got his deed, was not to be defeated by the omission of the Sheriff to file a certificate of the sale as prescribed by the Statute. The judgment debtor himself appears to have set up the objection. It is plain, from the Statute, that the intention was to give an opportunity to his creditors, more than himself, to redeem, and to ensure the facility of information to them. He must be presumed cognizant of the proceedings. I apprehend the case would have been different if a creditor, a mortgagee for instance, had got into possession. The answer to the case is, that it may justly be inferred the judgment debtor was not the object of the protection given by the section.

In the case in Massachusetts, (*Pond* vs. *Negus*, Mass. Rep. 230,) assessors were directed to assess a tax for building a school house, within thirty days after a certificate of a Clerk that a vote for the purpose had been passed, was delivered. An assessment was made for such a purpose after the expiration of the thirty days from the reception of that certificate. It was held valid. The Chief Justice said: "Although the assessors are directed to assess the tax within thirty days after the certificate, yet there are no negative words restraining them from making the assessment afterwards, and accidents might happen which would defeat the authority, if it could not be exercised after the expiration of thirty days. The naming of the time must, therefore, be considered as directory to the assessors, and not as a limitation of their power."

Thus it could be gathered from the statute itself, (as the law-makers may have foreseen the possibility that the direction could not be literally fulfilled,) that they meant it as a mere regulation in matter of form, not essential to the imposition.

No case can more fully illustrate this distinction than that of *The King* vs. *The Inhabitants of Birmingham*, (8 B. & Cresswell, 29.) The consent to the marriage of parties under a certain age, was required to be given by certain persons. The language of the section is explicit. But other sections declared the marriage void where certain other provisions of the Statute were not regarded. The want of consent was not among them. Thus the Statute itself exhibited what was meant for the officiating clergyman to require, and what rendered the marriage illegal.

And the case of *The King* vs. *The Justices of Leicester*, (7 Bard Cress. 11,) proceeds upon the distinction that the power to fix the time for holding courts belonged to the Sessions, and an act directing the court to be held at specific times was affirmative and not exclusive.

I have gone through all the important cases cited on the part of the defendants to this point, or which I have discovered. They fall far short of establishing that the provision in question was one that could be neglected without rendering the proceedings illegal. They are all distinguishable upon one or other of the grounds I have mentioned. They arise where there is an implication of a power, and the Statute has not expressly abridged it; where there is just reason for the construction that the Legislature did not mean an imperative rule; or where that body itself, which sets up the omission, was chargeable with the performance. There are, however, a few very important decisions yet to be noticed.

And first, there is the case of *Thurston* vs. *Little*, (3 Mass. 430,) decided by the Supreme Court within two months after its decision of *Pond* vs. *Negus*. A Statute had directed that assessors of taxes were to make a list for invoice and valuation of the property upon which the taxes were to be imposed, and to keep the same in a book for inspection. The amount of tax was stated in such a book without a list of the items and proportions of the tax. It was held void, and judgment given for the defendant who was sued for his tax. The case deserves attention, for it was urged that the defect arose from the party's own act, who was directed by Statute to deliver a list of his taxable estate; that the uniform practice of the town was here pursued; that the law was merely directory to the officers; that a decision against the custom would throw the Commonwealth into confusion.

In *Gilbert* vs. *The Col. Turnpike Co.* (3 John. Co. 107,) an inquisition was quashed for not showing on its face a disagreement between the company and the owner of the land taken, and that the judge who appointed the appraisers was not interested; all which was required by the act to give jurisdiction. The Court say "that this was the case of a special power granted by Statute and affecting the property of individuals, which ought to be strictly pursued, and appear on the face of the proceedings to have been pursued. This was an established rule, and especially to be maintained in cases which so materially interfered with private rights."

In *Van Wikle* vs. *The Rail R. Co.*, (2 Green's N. J. Rep., 125,) the statute authorizing lands to be taken, directed notice to be given in a specified manner. The order stated that the commissioners had proceeded upon proof of *due notice* having been given. It was held insufficient. The power was delegated to persons to take away private property without consent, and must be, and appear to be strictly pursued.

In *Parker* vs. *Rules Lessees*, (9 Cranch, 64,) the question arose upon an ejectment between a purchaser under a sale of land for taxes and the former owner. The case involves the examination of various sections of the act of Congress of July, 1798, (See Story's Laws, vol. i., p. 519,) and is a strong case to show the necessity of pursuing rigorously the directions of a statute which authorizes the sale of property for taxes. It was admitted, says the Chief Justice, that if the preliminary requisites of the law have not been complied with, the collector could have no authority to sell, and the conveyance can pass no title. The advertisements prescribed in some sections were held to be essential before the sale could be made.

In *Williams* vs. *Peyton Lessee*, (4 Wheaton, 77,) the same doctrine was declared, and the marshal's deed was held not even *prima facie* evidence that the prerequisites required by law had been complied with.

It should be noticed that in the statute there is nothing but the ordinary directing words, not a clause avoiding the sale, if the provisions are not complied with.

We must also look at the great distinction prevailing in the books between the case of a company defending itself against a meritorious claim upon the ground of irregularity in its own proceedings, and that company seeking to enforce a demand, the existence and legality of which depends upon the due exercise of its powers. Of the former class are the cases of *Clarke* vs. *The Imperial Gas Company*, (4 Bar & Adol, 315,) *Marshall* vs. *The Corporation of Queensborough*, (1 S. & St. 519,) and *The Queen* vs. *The Trustees of Swansea*, (Reports of cases, &c., 1 Jurist Ed., N. York, p. 126.) The argument of Sir W. Follett in the latter case, contains the true principle well expressed, and is adopted by Chief Justice *Denman*.

"With respect to the cases that have been cited, there is one simple answer to them all, that they were cases of a party setting up a particular claim of right or exercising a particular jurisdiction, of which on its being complained of by another party, the strictest proof has been required. But in the present case the Trustees put the act of Parliament in motion, and now turn round and refuse the payment on account of some alleged informality." Lord Denman said, "It appears that the Trustees are the persons to set the law in motion under this act, and consequently they ought not to be allowed to take the advantage of objections of this nature. I am not prepared to say the proceedings are not sufficiently set out."

The case was this. By an act of Parliament power was given to the Trustees to purchase certain lands of T. and S. Benson for the purposes of the charter, and all questions were to be submitted to a jury. The order recited the summons to the jury, the attendance before them of counsel of the Trustees and of Benson, their verdict in a certain sum, and proceeded to award and adjudge the payment. The objection taken was that it did not appear on the face of the order, that a difference had existed, in which case alone the jury could be summoned. The answer of Sir W. Follett was this: As the jury could only have jurisdiction in such a case, the existence of a difference must be intended. Justice Littledale adopted this in substance.

Now what can be more striking than the comparison of this case with that of *Gilbert* vs. *The Turnpike Co.* before cited. The identical objection that the disagreement did not appear on the record, was taken in each case. In the one it was sustained because the Corporation was proceeding against the owner to enforce the order; in the other it was disallowed, because the Corporation sought to profit by the irregularity, See also *Green* vs. *Kleinhans*, (3 Greens, N. J. Rep. 476.)

And lastly, a glance at other portions of the statute of 1830 will show the extreme danger of tampering with words so express as these. The direction to meet in separate chambers is part of the same section, made in the same form of words, no more prohibitory than the clause in question, of any other manner of exercising power. No one has yet dreamed that an ordinance passed by the boards assembled together would be valid. I know of no right and of no reason to believe that the convention looked upon this security to the public for wise deliberation, as of more importance than upon the provision in question, as a safeguard for the citizens' property. And the necessity of obeying those mandates of the statute, before an assessment for a public improvement can be lawfully made, is established, in my judgment, upon such an immovable foundation that no ability can overthrow or even shake it.

2. There is one question peculiar to the case of the sewers, and the paving and regulating the 9th avenue and 31st and some other streets. It is insisted that the assessment and resolution confirming it are void, because an estimate was not made until the work was completed. The contract price was then taken, with the expenses, and the amount assessed upon the adjoining owners.

The facts are these in the case of regulating 8th street, from avenue B to avenue D, which will be a sufficient example of the course of proceedings. The ordinance is dated the 10th of October, 1835, directing that 8th street be filled and regulated, and appointing assessors to *make an estimate of the expense of conforming to the provisions of this ordinance*, and to make an equitable assessment thereof among the owners intended to be benefited thereby. A contract was entered into to do the work, and it was finished before August, 1838. In that month, the assessors make their estimate and assessment, in which they take the contract price, $6,273, and add certain expenses, and then proceed to assess the benefit upon the parties, according to their opinion of the benefit to accrue.

The frame of the 175th and 176th sections of the act

It is inserted that the complainants have a clear and adequate remedy at law.

First, that upon a *certiorari*, the illegality of these proceedings may be adjudged, and the parties relieved.

The answers to this are very decisive. It appears to me in the first place, that the great question as to the call of the ayes and noes and the publication, cannot be brought up in this manner in a case *of the opening or widening a street*; at least the point is exceedingly doubtful.

The statute provides that when the Mayor, &c., shall be desirous of opening a street, and shall deem the opening thereof necessary and useful, they may cause the same to be opened, that is, by application to the Supreme Court as directed. This is the phraseology as to streets laid down on the map of 1807.

Much argument has been used as to the nature of this power. It is to be observed that after passing a resolution for making this application to the Supreme Court, the Common Council have no authority over the proceedings. Their whole office is at an end, except that they may discontinue the proceedings at their will. (Act of 1859, sec. 7.) And except that upon the confirmation of the report they become vested with the street in trust, and are bound to pay the damages. It appears to me that the action of that body in such case is scarcely to be termed legislative. It is, in truth, not the creation of a new rule of action, but a mere ministerial representation that the case has occurred in which a statute should be applied.

It is still more clear that it is not a judicial act. The exercise of the judgment of the Corporation in determining the necessity or utility of the measure, does not render it so. The true test whether the act is judicial or *quasi judicial*, is whether a *certiorari* would lie to take up the proceedings. I apprehend that the writ could not be had to take up the initiative resolution of the Common Council and the petition.

In none of the English cases cited is there a trace of this writ upon the preparatory proceedings. It is after the verdict and the judgment of the proper tribunal upon the verdict. (See the cases from Cowper.)

And the case of *Parker* vs. *The Mayor &c. of Boston*, (8 Pickering, 218,) so much dwelt upon, confirms this view. The first resolution was a declaration merely that public convenience required that Doane street should be widened, and a reference to a committee as to the expense. After an intermediate resolution, not important here, a resolution was passed that the public safety and convenience required the opening, *and the same is* hereby widened and laid out in manner following; (then describing the courses and measurement,) and notice to be given, &c. The petition was for a *certiorari*, and these proceedings were brought up, and held a judicial act, and as such the fit subject of the writ. In this case also the court said that if the legislature should provide for the expense being borne by the abutters on the line, it would be valid, and not contrary to the tenth article of their bill of rights.

Again, in *Bogart* vs. The *Mayor, &c. of New York*, (7 Cowen, 158,) it was decided that the writ goes to the justices of the supreme court sitting as commissioners, not to the corporation of the city. See also *Livingston* vs. The *Mayor, &c.* 8 Wendell, 87.

In The *State* vs. The *Morris Canal Company*, (2 Green's Rep. 428,) often my guide in this investigation, it was held that the writ could only go to the officer in whose custody the record was in law presumed to be; and the statute having directed that the proceedings should be filed in a particular office, within a certain time, it was to go to the clerk of that office.

The writ then going to the justices of the supreme court after confirmation of the report, would carry, up all that was in their custody, and nothing more, viz. the petition, rule for appointing commissioners, report, and rule of confirmation. The writ is here a common law writ, and the court will look only into the record and proceedings returned. It must find error in these. It has been of late the tendency of our courts to hold that they will enter upon nothing but the question of jurisdiction. *Allyn* vs. The *Commissioners of Highways*, (19 Wendell, 312.) *Prindle* vs. *Anderson*, (10 *ibid.* 174.) *Nicholls* vs. *Williams*, (8 Cowen, 13.) *Wolfe* vs. *Horton*, (3 Caines, 86.) *Birdsall* vs. *Phillips*, (17 Wendell, 464.) If the return is defective, diminution may be alleged, and a new writ be issued; but when the full record is obtained, the court cannot travel out of it. (*Commonwealth* vs. *New Milford*, 4 Mass. 446. *Wood* vs. *Talman*, 1 Cox N. J. Ca. 153.) It appears to me, then, that in no possible way could the minutes of the clerk of either board be carried up upon such a proceeding, relative to a street. Any application for the writ to the corporation would be denied.

Then suppose that the affidavits laid before the judges on the application to confirm could be taken up, (which is doubtful, See 20 Wendell, 104,) and suppose that they established the omission to call the ayes and noes, or to publish, could the supreme court enter upon the question? A plain reason against it seems to be, that it could not adjudge error to have been committed in a point which the justices below could not legally consider. It is the decision below, on what could be and has been there decided, which is the subject of revision; nothing more: and hence the only remaining question would be, whether upon the record as it appeared in the supreme court, the presumption would be that what was legally required to be done preliminarily had been done, the record not contradicting it; or whether the preliminary proceeding should appear upon the record, and if it did not appear, must be inferred to have been omitted. There is a large body of cases in which the legal presumption is made that the necessary preliminary steps have been taken to support an act, where the record does not show the contrary. (See 1 Phillips, 469, and notes.) It is, however, said that this rule does not apply in cases of questions as to acts of inferior courts and judicial proceedings by magistrates, so as to confer jurisdiction. (*Rex* vs. *Inhabitants of All Saints*, 7 Barn & Cress, 79. *Rex* vs. *Hilling*, 1 Str. 7. *Rex* vs. *Hulet*, 6 T. R. 583. *Rex* vs. *Liverpool*, Burr, 2544. *Snediker* vs. *Quick*, 1 Green's N. J. Rep. 308. See also the numerous cases recited by Justice Cowen in his notes to Phillips, vol. iii. p. 1013. Ibid. vol. ii. p. 304.)

I do not deem it necessary to pursue this branch of the case minutely. My impression is, that as the jurisdiction is admittedly in the corporation by former statutes or the charters, and as this is a provision as to the mode of exercising it, the presumption *omnia rite acta* would be made. (See *Voorhies* vs. *Bank U. S.*, 10 Peters 471. *Case of the Schuylkill Falls Road*, 2 Binney, 254.

This view, however, does not apply to the case of sewers, or paving and regulating streets. There the whole proceeding, from the beginning to the end, is before the Common Council. A certiorari could, I presume, be so followed up as to compel the production of the clerk's minutes upon the vote on passing the resolution; and then the argument of Mr. Cowdrey possesses great force. As it would certainly appear that the calling of the ayes and noes was not entered on the record, the inference would be that it was not done. Thus the question would be fairly presented. As I understand the act of 1830, it probably would be necessary to pursue its provisions by the call and publication, first when the resolution is passed for doing the work and appointing the assessors, and next when their report is confirmed.

The course of proceeding under the ordinances will illustrate this question. The application is usually made by petition, for the building of a sewer, for example. The petition is referred, as a matter of course, to a committee. The street commissioner under an ordinance advertises that such an application has been made, and that objections may be handed in to him by a specified day. If there are objections, they are submitted to the committee, who examine them, and usually hear the objectors. If they report in favor of the application, the street commissioner prepares an ordinance. Objections may, through a member, be urged upon the board before which it depends. It then passes or is rejected. If it passes, it goes to the other board; and if it is there passed, the Mayor approves it. Thus, from the beginning to the end, there is no notice provided for but that general one to all persons that the improvement is in consideration.

The resolution of reference merely, of course, does not require the act to be complied with; and it would perhaps be convenient to pursue its directions but once. But such is not the statute; and I take it to be clear that until the confirmation of the assessment by the Common Council, a *certiorari* would not lie. There would, in fact, be no one aggrieved, for no one would know of his being assessed until it was made, and none actually assessed until it was confirmed.

But next, while these considerations show at least doubtfulness as to this remedy, other objections are insuperable.

The application of this writ is addressed in these cases to the discretion of the Court. It may be refused on grounds of public expediency. It is never granted as of course, except upon the application of the people through the Attorney General; and if refused, there is

no redress by writ of error to a higher tribunal. (*Rex* vs. *Bos*, 5 T. R. 252.—*Comstock* vs. *Porter*.—5 Wendell, 97.—*Lee* vs *Child*, 17.—Mass. Rep.—*Monroe* vs. *Baker*.—6 Cowen, 396.—*Lynde* vs. *Noble*, 20.—John. Rep. 84.—*Commonwealth* vs. *Peters*, 2.—Mass. Rep. 125.—*The State* vs. *Woodward*, 4.—Halst. N. J. R. 21. —*Elmendorf* vs. *The Mayor & Sup. Court*, Feb. 1841.)

In the last cited case, the discretion was considered so absolute, that the Court would not allow the writ after the lapse of two years, although there is no statute of limitations in the matter; but it was judged inexpedient to grant it. See also *Trigg* vs. *Boyce*, 2 Hayw. N. C. Rep. 280.

Again—this remedy may be adopted although an action will lie, where the tribunal proceeds without jurisdiction. (6 Wendell, 564.) The converse of the proposition is equally true. The power to resort to a *certiorari* does not prevent any other legal remedy; and the great doctrine which counsel has so strongly urged, that the objections to the proceedings of this body, treating them as *quasi* judicial, must be made by a direct appeal from the decision, is applicable only to a judgment between parties directly. See the leading case of *Voorhees* vs. *Bank of U. States*, (10 Peters, 470.) It has never yet been applied to such summary proceedings, conducted without notice to any one who may be made liable, except the general notice in case of sewers, &c., by publication of the Street Commissioner, and in the case of streets the publication of the notice of the filing and intended confirmation of the report. The individuals assessed are not parties to a single step in one case or the other. In the case of streets, they become bound by the published notice to make objections of one class, viz., as to the amount or principle of the assessment. They can do no more. It would be iniquitous to hold that this confirmation of the report shuts them out from everything else. In the case of sewers, &c., they have no chance of being parties, except if one should deem it probable he will be assessed, he may object before the committee to the work, or to the assessment before the Board.

There is another consideration upon the effect of a *certiorari*. If it is sustained, the judgment acts as an absolute reversal of the proceedings, quashing the record. (*Baldwin* vs. *Calkins*, 10 Wendell, 167.) Hence all the proceedings are void; and hence money voluntarily paid by those who have been assessed, may be recovered back. This effect is stated by the Chief Justice in *Elmendorf* vs. *The Mayor*, &c. I do not understand, however, that without a reversal upon certiorari, an action for money had and received would lie for such assessments paid. The result upon a judgment on certiorari arises from the same principle as sustains an action for money paid under a judgment subsequently reversed. *Clarke* vs. *Pinney* (6 Cowen, 297—*Green* vs. *Stone*, (1 Harr & John, 405)—*Feltham* vs. *Tenny*, Loft. 207.) But I apprehend this is not the rule, if the proceedings stand unaffected by a reversal on certiorari. The action for money had and received lies where the defendant has in his hands money which *ex equo et bono* belongs to the plaintiffs, (C. J. Savage, 6 Cowen, 297.) It lies for money paid upon a consideration which fails, or if obtained by imposition or oppression. It lies if paid upon a mistake; but that mistake must be a mistake of fact, not of law. (*Mowvartt* vs. *Wright*, 1 Wendell, 360.)

In *Knibbs* vs. *Hall*, (1 Esp. 84,) where defendant claimed that his rent was 20 guineas, and the landlord threatening to distrain, the defendant paid the demand, 25 guineas, and attempted to set off the excess in a subsequent action against him. Lord Kenyon held, that this could not be deemed a payment by compulsion, as the defendant, by replevin, could have defended himself.

This case is recognized in *Hall* vs. *Schultz*, (4 John. Rep. 245,) and appears to be sustained in *Mowatt* vs. *Wright*, 1 Wendell, 361.

In *Dillingham* vs. *Swan*, (5 Mass. Rep. 557,) Ch. Justice Parsons, upon the question of the legality of an assessment, said: "If the objection prevail, the conclusion is that the whole assessment and the warrant issued to collect it are illegal; and the collector is not obliged to obey his warrant, or to collect the tax of any person assessed; but if he do he may not be a tresspasser, and he may receive of any person his tax, for *volentia non fit injuria*." And see *Humbtett* vs. *Richardson*, (9 Bingham, 644,). The Chief Justice, in the case of Elmendorf, states his impression, that upon a reversal on *certiorari* new proceedings may be instituted. This was in the case of a sewer. And with respect to sewers and the regulation &c. of streets, it is a most important question whether the Common Council could not now, by a resolution, set aside what has been done, and direct a new assessment. If the view taken of the right to make the work before assessing is correct, I should have little doubt of the existence of this power. In the case of *Cummings* vs. *The Mayor of Brooklyn*, I considered that an authority existed to correct an assessment after confirmation, by the appointment of new assessors, making a new assessment, or correcting the former by inserting definite boundaries. The statute under which the Corporation of Brooklyn acts, does not differ much from that relating to the city of New York. See also *Pond* vs. *Negus*, 3 Mass. 230.

But an examination of the statutes, especially that relative to streets, will show how great embarrassment and difficulty must arise in carrying out a new assessment.

The pressure, however, of such views must be felt where an application is made to the discretion of the court for a *certiorari*. The Court will necessarily look to the fact that such consequences will ensue if the writ is sustained; and that if it is not sustained, the questions are all left open for adjudication in suits with individuals who resist the claim.

The other remedies then, whatever they may be, and the right of resistance to any action to enforce the proceedings, are not forbidden to the party by a neglect to sue out a *certiorari*. What are those modes of redress?

They consist of an action of trespass, a defence to a suit by the Corporation, or to an action of ejectment by the purchaser at the Corporation sale, or to bring such an action if the purchaser gets possession. As to the action of trespass, it might arise if a distress warrant was sought to be enforced, and an entry made to seize any goods. With respect to this suit, I deem it of some moment that it appears to be the law that such an action will not lie against the officer if his warrant is on its face regular, though it would lie against those by whose authority it issued, under the 186th section. See *Saracool* vs. *Boughton*, 5 Wendell, 179, and the mass of cases examined by Justice Cowen, 3 Philips on Er. 1006, 1009—also, 3 Adol. & Ellis, 433.

The action of replevin will not lie in this case, it being one of the statutory exceptions. (2 R. S. 522, § 4—7 Wendell, 453.)

The action of debt or assumpsit which is given by the 186th section of the act, would test all these questions fully in one suit between the two parties. And the same observation applies to the action of trespass. A resort, however, to either of these actions by the Corporation is, I believe, never had, at least since the year 1823, where the assessment is a lien on real estate. By that act the assessment for every improvement became a lien on the property, and the course of selling as prescribed by the act of 1816 for the collection of assessments, was sanctioned. Under that, the collector makes an affidavit of two demands for payment, or that the owner cannot be found in the city. The notice of sale is then published.

In the cases before me, this course has been pursued. The Corporation has given no opportunity to the complainants to try these questions at law, in an action of trespass upon their warrant of distress, or in an action of debt or assumpsit. In both cases a large number of lots are advertised for sale. In general each lot is separately assessed. Each lot so assessed, must be separately sold. There may be a purchaser for each.

I am well satisfied, from all the cases cited, that the owner could set up the various objections noticed in an action of ejectment. See *Parker* vs. *Rubes, Lessee*, 9 Cranch 64. *Williams* vs. *Peyton, Lessee*, (4 Wheaton 177.) Cases of Cowen's Philips on Ev. p. 1289. But the question is, whether there is not power to do that which equity clearly dictates, to prevent a *bona fide* but deceived purchaser intervening, and settling the matter between the parties themselves.

It must strike every man of common sense, that it is immeasurably more just that the legality of these proceedings should be tried in a suit where those alleged to have committed the illegality are a party. It must be felt by all that the situation of a purchaser sways somewhat every question of this nature. But above all, if the action of the party charged with the illegal proceeding and seeking to enforce it, has precluded any mode of trying the question at law between himself and the party aggrieved, when it was entirely in his power to have done it, it does seem the clearest dictate of equity that this court should compel him to such a trial.

And this seems to me the principle which will apply to every case; which will distinguish those where jurisdiction has been refused, and support those in which it has been exercised.

For example, let the cases before Chancellor Kent be examined. *Le Roy* vs. *The Corporation*, (4 Johnson's Rep. 352,) only settled the rule that no bill would lie in this court to rectify an assessment made by commissioners.

Jerome vs. *Ross*, (7 John. Ch. Rep. 315,) established, that where the action of trespass would lie and the mischief was not irreparable, or the property peculiar, this court could not be applied to for an injunction. And it is strongly put by the Chancellor, that he will not suppose that after trial and recovery, there would be repeated trespasses, when the damages could be made exemplary.

The cases which have followed up this doctrine as to trespass, were all cases in which the right could thus be fully tried between the parties. (*Hart* vs. The *Mayor, &c. of Albany*, 3 Paige, 214, 9 Wendell, 579.) So in the instances in which Chancellor Kent granted injunctions (2 John C. R 162. Ibid. 463,) upon the ground of irreparable mischief, for which trespass could not afford a remedy, the case was the same.

So in the late case before the Chancellor, (*Wiggins* vs. The *Mayor, &c.*, Feb. 1841,) the property had not been advertised for sale. The bill was by the owner of several houses and lots on which an assessment had been laid. It stated the proceedings, and alleged that the Corporation were threatening to proceed to raise the money by sale, *or to collect it personally against the complainant*; and the injunction prayed was, that they might be restrained from advertising, or selling, or taking any measures, by suit at law or otherwise, for collecting the amount. I must again remark that the Corporation have the clear right to sue in debt or assumpsit, or to distrain, if they think proper to pursue such a course.

And although in the opinion of the Chancellor it is intimated that the seventh section is directory only, it is not the point upon which the motion for an injunction was denied. The illegality being triable at law between those parties to the bill, is, I apprehend, the ground of the decision.

On the other side, let the two leading cases before Chancellor Walworth be attentively considered. (*Oakley* vs. The *Trustees of Williamsburgh*, 6 Paige, 264, and *Merserole* vs. The *Mayor, &c. of Brooklyn*, MS.) In the former the Trustees of Williamsburgh were authorized by charter to establish the level of certain streets. It was held that upon the true construction of the act, they had exhausted their power after they had once settled the grades, and filed their proceedings as prescribed. They afterwards proceeded to vary the grade of one of such streets. The complainant was the owner of lots which were to be cut down under the new grading, and he owned other lots which would be assessed for that new work. The bill stated that the carrying on the work as prescribed would expose the complainants to heavy assessments, that it would sink the level of the street six feet below the one before settled, and would irreparably injure them. The injunction ultimately granted was to restrain them from digging down the street or altering the grade. The Chancellor said, "The assessments upon the lots for the expenses of the proceedings to alter the gradations of the streets, although they might be so far void as not to affect their legal title to the land, would of themselves be a cloud upon the title, which must necessarily diminish the value of it, if not entirely prevent the sale of the land as village building lots. And as this court sometimes exercises its jurisdiction for the purpose of removing a cloud from the complainant's title to real estate, it may also in a proper case interpose its authority to prevent the illegal act from which such a cloud must necessarily arise."

So in *Merserole* vs. The *Mayor, &c. of Brooklyn*, (June, 1840, MS.) A statute had appointed certain commissioners to lay out streets and avenues in the city of Brooklyn in the new wards. It was held that this power was paramount to that of the city authorities, who had, in general, control in the premises. They had, however, directed the opening of a street; and the commissioners appointed had made an estimate and assessment of benefit, charging, among others, the plaintiff's lots to a large amount. The bill stated other grounds, but this is the one on which the Chancellor proceeded. The bill prayed an injunction restraining the collection of the assessments, and that the property might be decreed to be discharged from them. The Chancellor said the Vice-Chancellor was right in

a chief point in the case. It was decided upon the ground, however, that there was evidence of a fraudulent collusion between the judgment debtor and purchaser prior to the expiration of the ten years, to defeat the judgment. But the Chancellor, after noticing that the party was probably too late in taking the objection at the hearing, said, "As the defendant persisted in her intention of selling the farm upon the execution, notwithstanding the remonstrance of the complainant, I think the objection could not have been sustained even if it had been made in time. The jurisdiction of the court to set aside instruments which are a cloud upon the title, seems now fully established. And if the court would have jurisdiction to set aside a sheriff's deed given on a sale as forming an improper cloud on the title, it seems to follow as a necessary consequence, that it may interpose its aid to prevent such a shade being cast upon the title, when the defendant evinces his determination to proceed to a sale." The defendant was the administratrix of the judgment creditor, and had revived the judgment. He therefore was seeking to enforce what but for the fraud was a spent judgment, and where the defence at law could be perfect.

The cases of negotiating a transfer of negotiable instruments are common, but they stand on a peculiar principle. *In Curtis* vs. *Marquis of Buckingham*, (3 V. and Bea, 108,) where a parole agreement for an exchange had partly been performed, a sale was restrained by injunction.

It may be observed these suits were commenced in June, 1840. The cases have been prepared with every fact and every document which could aid the decision; not one withheld, and not one omitted. It is also a case with which a jury can have nothing to do. It is a mere question of law.

But while I am satisfied there is a clear ground for the interference of this court, the extent of that interference, and the conditions upon which it will be granted, are points of moment.

The questions in these cases are of a strictly legal character, all the fitting subjects of a trial at law, and which could have been properly tried there if the defendants had taken another mode of collecting the money. Now the methods which the English court has adopted of disposing of pure legal questions which arise before it have been various. In former times some of the judges were called in, and heard the argument, in order to aid the Lord Chancellor with advice. Still their opinions were merely advisory; and we accordingly find that in the great case of perpetuities, (3 Ca. in Ch. 1,) the decision of Lord Nottingham was in opposition to the views of the judges who sat with him. Subsequently the course has been to send a case to a court of law for its opinion. The principle of this court is thus stated by Lord Langdale in a late case of great importance. "The question raised is a purely legal question, which, considering the important consequences involved in its decision, cannot be satisfactorily determined without the aid of the opinion of a court of law. Where the circumstances were such as to require the interference of a court of equity without delay, the court would itself decide a question of legal right for the purpose of granting an injunction." The necessity not being pressing, the case was sent to the Common Pleas, and the opinion being obtained, the motion for an injunction was renewed and prevailed. (*Bank of England* vs. *Anderson*, 2 Keen, 362.)

In New Jersey the Chancellor may call in the judges to aid him in hearing a case. But in our state this practice, either by calling upon the judges, or making a case, has not prevailed; and perhaps the fact that the judges of the Supreme Court as members of the Court of Errors, may be called upon to review the decision of the Chancellor, forms a sufficient reason against it.

Another mode, however, of ascertaining the judgment of a court of law upon a purely legal point is by retaining the bill with liberty to bring an action which will test it. The whole doctrine of the court on this head may be thus summed up. That wherever there is a pure legal right in question, but some circumstances exist, especially if growing out of the conduct of the defendant, which raise an equity for this court's interference, and may warrant in the end a perpetual injunction, it will retain the bill, giving an opportunity to try the matter at law; and it will grant or refuse an *interim* injunction according to the nature of the case.

In *Motly* vs. *Dowman*, (3 Mylne & Craig, 1,) Lord Cottingham thus expresses himself: "The court, when it interferes in cases pf this sort, is exercising a jurisdiction over legal rights, and although sometimes in a very strong case it interferes in the first instance by injunction, yet, in a general way, it puts the party upon asserting his right by trying it in an action at law. The court is only acting in aid of, and is only auxiliary to the legal right." The order for an injunction granted by the Vice Chancellor was discharged, with liberty to the plaintiff to bring an action, the defendants not to be prejudiced in the interim, and both parties were at liberty to apply. The Lord Chancellor thought the question on the merits one of considerable nicety.

In the case of *Duval* vs. *Waters*, (1 Bland's Rep. 585,) the Chancellor makes the following judicious observations. "If the plaintiff's bill is denied, and he acquiesces in the denial by refusing to bring an action at law to have it authenticated and sustained, he can have no ground of relief in this court, founded on a claim which he shrinks from having judicially investigated, or put in a course of being legally established."

In the causes before me, the plaintiff has it not in his power to try the case at law. The defendants have the power by a single action of debt or assumpsit. Thus will ample justice be done to all in a legal tribunal between the immediate parties without the intervention of a purchaser, and avoiding perhaps a vast number of suits.

There is, however, one great principle of the court which perhaps must be applied in these cases. It is a maxim that he who seeks equity must do equity. This is frequently applied to usurious agreements. A more pointed example, however, is the jurisdiction exercised upon annuity grants. The English statutes require certain provisions to be observed without which an annuity is void—such as the registration of a memorial, and the insertion of a redemption clause. Yet relief is given against such instruments only upon payment of what has been advanced in purchasing the annuity. *Holbrook* vs. *Sharkey*, 19 Vesey, 131, Exparte Shaw, 5 Vesey, 620.

I have reflected upon this subject, but come to no conclusion, because it has not been argued at all before me, although one of the Counsel slightly glanced at it.—It is too important to justify me in passing upon it without hearing the parties. The defendants have a right to say that if the court finds any ground for interference, it should only put the case in the way of a proper decision at law upon the legal questions; protecting the complainants from the vexation of many suits or risk, by the intervention of purchasers. That they have a right to try the questions at law, although upon such terms as the court will prescribe to secure justice. But they are not compelled to do this. Clearly there could be no justice in allowing them to take the chance at law, and then, if defeated, that the relief here should be only upon terms. If the assessment is adjudged void in an action of law, the decree must set it aside absolutely, as an injurious blemish on the title to real estate.

But the nicer question remains, if they will not proceed at law—is this court to decree relief absolutely by adjudging the assessment void and a perpetual injunction, or upon terms of doing what shall be considered justice; and if the latter, what does equity require and how shall it be ascertained?

These points it is proper should be argued by counsel if they desire it, and it may be done on the settlement of the decree. I shall make some suggestions merely, which may aid counsel upon the subject.

Whether it is to be assumed that in general some benefit has accrued to the parties by these improvements. Whether such amount of benefit as a jury should find truly received should not be paid. The assessments already made, being in pursuance of illegal ordinances, are of no moment.

Again—can the expenses be charged? This must be considered in relation to the cases of paving and regulating streets, and making sewers, and the opening streets separately. Under the statute regulating the streets in Albany, it was held that the costs and expenses could not be included in the assessment. (*Canal Bank* vs. *The Mayor of Albany*, 9 Wendell, 259.) Afterwards a statute was passed, authorizing the addition of the expenses to an assessment, (Laws 56 session, ch. 172. See also 15 Wendell, 387.) The statute had directed that the sum to be allowed *for damage and recompense for the property taken was to be assessed.*

In the law of 1813, (section 175,) the assessors are directed to estimate the expense of conforming to the regulation directed in the ordinance. The fair meaning of this may be nothing but the cost of the work. The regulation is, that a sewer be built. The expense of building it is what is incurred to conform to it. And in the second section of the act of 1823, providing for

the filling up of lots, care has been taken to authorize the levying the amount with all reasonable costs and expenditures attending such proceedings.

But this act of 1823, section 1, in connection with the 270th section, must be examined, to see if they do not sanction the charge of the expenses. By the latter, all reasonable costs and charges attending the proceedings may be collected.

However, the statute relating to opening streets, expressly empowers the assessment of the costs and charges in addition to the damages allowed. Hence it must be decided whether there is an equity to render the owner responsible for a part of the charges of the operation actually paid.

The expenses incurred, being under a void proceeding, are not to form a guide. They may have been reasonable, though large. And there seems some reason, if a party's benefit exceeds his share of the sum allowed for damages and his share of the expenses, that he should bear it. Still the argument deserves notice. These expenses have been incurred upon an illegal and void assessment. The party has the right to resist payment at law, and defeat the action absolutely. He never could have arrested the proceedings in which the charges were incurred. Whatever right he possesses, arises after they are consummated. He comes here, and terms are imposed. He may well contend, that what a jury shall say, is, the just proportion of the damage paid to others shall be borne by him, and no more.

Then arises another and most serious question. The parties assessed for benefit contribute to the damages allowed. These arise from the value of the ground taken. They must be permitted, in ascertaining what they are to pay, to investigate that value. Even where it is clear that the true benefit was beyond the proportion of the sum allowed for damages in these street cases, this result would be the same; for the parties are to pay, not up to the extent of benefit, but so much of it as will pay, in proportion with others, for the improvement.

If the sum allowed for damages was clearly liquidated, so as to be binding on the complainants, would there be any difficulty? The simple question to the jury might be, first, whether the complainants had received any benefit; and if this was answered affirmatively, then whether the amount of benefit was equal to the sum assessed. If equal, there would be an end to the inquiry. That sum must be paid. If not equal, then such sum as the jury should find just shall be paid.

But as the damages are not so liquidated and binding, a question arises.

The benefit to be assessed in these cases is, as before observed, not the extreme actual advantage, but so much of that advantage as, in proportion with that paid by others, will defray the expense of the work. Hence the party has a manifest interest and right to reduce the cost of the work, or damages allowed.

Here, again, in the case of sewers or the regulation of streets, I see very little difficulty. The jury can ascertain the fair price of the work from witnesses.

For example: in the assessment for filling and pitching 9th street, between avenues B and C, the assessment is made on this basis. The contract price was $3,332·25 The number of feet fronting on the street is 66,645, which at five cents a load makes up the price, and there is then added a certain *per centage* to cover the fees, which amount to $73·88. The complainants pay according to their feet of front. There is no difficulty in a jury saying if the price of five cents a load for these lots was reasonable or not.

So as to sewers. The contract price may be testified to by competent witnesses, to show that it was beyond the value. In settling an issue, however, it would be necessary to ascertain the extent to which benefit may be carried. The estimate and assessment of the assessors ought to be before the court.

In the case of grading, regulating, and paving streets, the question may be very much simplified. It may be merely what it would cost the party to have conformed to the regulation opposite to his own lot. This is in accordance with the whole principle of the colonial law and of the act of 1787, upon these matters.

In the instance of opening 31st street also, I see very little difficulty in properly framing an issue to do justice to all upon the trial. It should first be ascertained whether the damage has been properly allowed as to amount, whether there had been grants fronting on the street, excluding the owner from more than nominal damages. If the soil is to be paid for, then an appreciation of the fair value of the ground, as well as any ancient buildings, is to be made. Next, to set the limit at which the supposition of any benefit must be abandoned, whether to the next avenue, or to the next that is opened, or farther. Thus having got the true amount of damages, the property on each side, to the half of each block within the limit taken, is to bear that sum, and the jury can apportion it as they deem right. I can readily see, however, that in some street cases the difficulty before a jury may be excessive. A master's office may then be the best forum.

In the case of 31st street, by looking at the abstract and map, it will be seen that the complainants' property was either assessed for the expenses merely, or for a benefit for the opening eastward of the 8th avenue. The property on the line up to that avenue pays for the opening itself, and there is an excess of benefit of sixty-two dollars.

In all these cases the first great question will be whether any benefit was received. It is impossible not to be aware that in some instances damage has arisen to parties who were assessed for benefit.

In concluding a case of such great interest, upon which the public attention has been often roused, and private rights and interests are so deeply involved, I trust it will not be deemed unbecoming to advert to the considerations respecting the evils to the city, and the impediments to her progress, predicted from a decision that these proceedings are void. I will not dwell upon the fact, that under the mild doctrines of a Court of Chancery, the party who is sheltered from illegality is compelled to justice; that the public agents who have neglected the plain command of law, may yet impose upon the citizen whatever a jury of his fellows shall declare he ought to pay. But were it otherwise, what principle will justify the achievement of the city's greatness at the sacrifice of the slightest right of the lowliest individual? What tribunal of justice may refuse to arrest her, if she forget the limit of her authority, and break through that sacred circle of law, within which she is all powerful—beyond which she is a reed? Can it be conceived that one of her children, nurtured in her bosom, proud of her strength, more proud of her integrity, could willingly do an act to impede her progress? No! May her march be as stately hereafter as heretofore! May a munificent and well-guided policy pour around her prosperity like a river, and plenteousness as a flowing stream. And as her towers of strength are multiplied, and the palaces of beauty cluster upon her surface, may the asylums of indigence, the retreats of suffering, and the sanctuaries of education, spring up abundantly! May the early light be caught by a thousand spires of her religious temples! Then, indeed, will her prosperity rest upon immutable strength, and be crowned with unfading beauty. Then may the fond poetic apostrophe, MATER MEA! MATER PULCHRA! be mingled with the ascription of warm though misdirected devotion, MATER SANCTA! MATER BEATA!

LOOSE LEGISLATION.

The Common Council of the city of New York, pass ordinances, or rather claim to pass them, without opening or reading; and the Mayor signifies his approval by signing his name upon a *loose* wrapper which encloses the pretended ordinance. Merchants who send their customers' notes to the bank for discount, may with equal propriety endorse the wrappers or envelopes which cover the notes, instead of endorsing the notes. Such is the whole system of Common Council proceedings, completely enveloped in a budget of blunders.

AN OLD GENTLEMAN OUT OF EMPLOY.

There are many of our readers who will recollect an old gentleman by the name of Punches, who wrote at the back desk in the Surrogate's office for many years. He is a good penman; slow, but accurate; and would be useful to any person having writing to copy. We meet him often in the street; he is out of employment, and is needy. Perhaps some one who may see this may have occasion for the services of such a person, and would be willing to pay him as much as would support him. The old gentleman is very capable, honest, and deserving.

BOARD OF COMMISSIONERS.

It is proposed that the Legislature of the State shall organize a Board of Commissioners for the city of N. York, and that the Board shall consist of three Commissioners, who shall each receive an annual salary—that the Commissioners shall appoint one or more Surveyors, who shall also be salary officers, and shall also appoint a suitable number of Clerks and other subordinate officers. The Board of Commissioners to be commissioners of the sinking fund—to have the management of all street and other assessment proceedings, and also of the public property.

It is proposed, also, to authorize the Comptroller to receive at his office the City Taxes up to the 1st April each year, and that on that day he deliver to the Tax Collector the books to collect from delinquents, who are to pay the collector's fees in addition to the tax, for his compensation, and to abolish the office of collectors of arrears.

A Board of Commissioners to be selected from among the following named persons, viz: Stephen Allen, Robert C. Cornel, Philip Hone, Myndert Van Schaick, Thomas Lawrence, George B. Smith, Wm. S. Johnson, W. W. Fox, and D. D. Williamson, would give great satisfaction to the citizens, (politics aside,) and would add to the value and intrinsic worth of our City Stocks, give great additional dignity to the city government. and save half a million annually to the city besides.

The time is coming when it will be necessary to ask men to take office, instead of having citizens seeking office for the sake of the fees or patronage of office.

The persons we have named would have the entire confidence of this community.

The city debt is becoming large, and it will be necessary to increase it very much—it is important, therefore, to make the stock acceptable to capitalists, and it is important, also, to economize the city expenses.

The gentlemen we have named are full of experience—capable, honest, and responsible—such men will do right, and are such as will give confidence to the holders of City Stocks.

APPOINTMENTS TO OFFICE.

If changes should be made in the officers employed in the Custom-house in this city, we hope that some old merchants, who may have been unfortunate in business, may find employment. There are some of this class who are needy, and who are also deserving and worthy—who are applicants for employment. These persons may not have that kind of bold confidence which will enable them to insist on having office; and therefore influential citizens, whose prosperity gives them confidence and energy, should make exertions for these individuals.

We are led to make these remarks from knowing the fact that Mr. Hinton, formerly of the firm of Hinton and Moore, is an applicant; Willet Coles, an old merchant, is also an applicant — for places in the Custom-house. We hope Mr. Curtis will remember these old citizens in dispensing his patronage.

ASSESSMENTS.

The odious system of assessments in the city of New York, has developed a state of things of an alarming character. It is not the dollars and cents in these matters that are alone objectionable, but the effort made in various quarters to cloak up these iniquitous proceedings, by sti-

SENATE.

FRIDAY, April 2d, 1841.

MR. VERPLANK presented a Petition of PETER LORILLARD, ROBERT SMITH, STEPHEN ALLEN, JON. THOMPSON, and about two hundred others, landholders in the city of New York, for an entire modification of the Assessment Laws of this city.

Mr. SCOTT presented the Petition of the Mayor, Aldermen and Commonalty of the city of New York, to be vested with the title of lands sold for assessments in certain cases.

This last petition we have not seen, and therefore cannot speak of it understandingly, and consequently not at all.

We are in favor of the Corporation being vested with the real estate sold for assessments, in preference to their surveyors and collectors, and other public officers, who have been heretofore largely engaged in this way, as a great many of our citizens must have noticed who have looked over the books of sale lying on the counter in the Street Commissioners' office.

It is, however, very discreditable to the Corporation, to cause the lands of citizens to be assessed to such a RUINOUS EXTENT that the land will not be taken as a compensation for the *improvement* made upon it—if a *ruinous*, *infamous* and *odious* assessment can be called an improvement.

Such, however, is unfortunately the state of things. The Corporation of the city of New York, and various public officers have depredated upon the lands of the citizens to such an extent, that a knowledge of the evil has aroused the indignation of the people, and they will now seek justice in the matter,—and will obtain it.

The lands now assessed should not be sold for the assessment, but a re-assessment should in all cases be made, and the property be described by its right ownership and occupancy, and by the known street number; or be described with sufficient accuracy to enable the owner to know when his property is assessed. This done, let a book be provided and kept in the office of the Register of Deeds, in which shall be entered all the property assessed, and the particulars of the assessment—let these assessments be a lien upon the property, and bear an interest of eight per cent, and be payable at any time, at the option of the owner, within ten years; and if not redeemed at the end of that time, then let the property be sold absolutely and let the proceeds of the sale be paid into the State Treasury, after deducting the assessments and interest and charges, that the owner may obtain it within twenty years if he applies for it, and otherwise it escheats to the people. Let the Corporation be specially authorized to issue Stock redeemable in ten years, to pay the *awards* and *the contractors*, and let this whole business be done by a Board of Commissioners, to be composed of such men as STEPHEN ALLEN, MYNDERT VAN SCHAICK, PHILIP HONE, W. W. FOX, JACOB DRAKE, ROBERT SMITH, THOMAS LAWRENCE, GEORGE B. SMITH, JONATHAN THOMPSON, ELIJAH F. PURDY, D. D. WILLIAMSON, ROBERT C. CORNELL, STEPHEN WHITNEY and OGDEN EDWARDS.

A Board of Commissioners selected from this list would possess the entire confidence of this community —would give value to the Stock—satisfaction to the people, and add dignity to the city government.

It is to be hoped that our Common Council will not be so anxious to acquire power, as to be unwilling to have a suitable Board organized to manage some of the city concerns.

The time has now arrived when something must be done—large Loans must be contracted, and these are to be negotiated; and in order to be done on favorable terms, the capitalists must have confidence in those who are to manage these affairs.

The Corporation property by no means amounts to that adequate security which it has been, and is represented to be.

We shall, in our next number, commence the schedule of all the public property, with the valuation which has been put upon it, and shall also make an estimate of its real value ourselves, and will submit both at the same time to the public.

From the New York Observer.

POPULATION OF AMERICAN CITIES.— The annexed statement shows the population of various cities and villages according to the census just taken, compared with the population of 1830.

Cities.	1840.	1830.	*Increase.*
New York	312,234	202,589	109,645
Philadelphia	258,832	188,797	70,135
Baltimore	101,378	80,625	21,753
Boston	84,401	61,392	23,319
Brooklyn	36,283	12,403	24,830
Cincinnati	46,382	24,831	21,551
St. Louis	24,585	5,852	18,783
Washington	22,777	18,827	3,950
Pittsburgh	21,296	12,512	8,754
Dover	3,775	3,416	359
Wilmington	8,367	6,663	1,704
Middletown	7,210	6,892	31[illegible]
Bridgeport	4,570	2,800	1,770
Norwich	7,239	5,179	2,060
New London	5,528	4,356	1,172

Troy	19,372	11,405	7,967
Bath	5,000	3,773	1,227
Dover, N. H.	6,438	5,449	989
Providence	22,042	16,832	5,210
Newark	17,202	10,753	6,449

CAUTION.

There have been several petitions recently presented in the Common Council for regulating streets and avenues. Among these is one for regulating a part of 28th street; another for regulating a part of the Seventh avenue; and another for regulating a part of Ninth avenue. The petitions should be examined by persons interested, and the foundation of them looked into. We do not say that the Corporation officers have anything to do with these matters, or any of them, but one thing is certain, these very streets have been proceeded in, in the courts, and we have been informed that in two cases which embrace the assessments for opening the Ninth avenue, the Seventh avenue, the Fifth avenue, 50th street, 22d, 24th, and 25th streets, and several sewers, the Corporation have not put in answers to the Bills, but have procrastinated the proceedings, and that orders were entered

on Thursday in the Court of Chancery to take the Bills as confessed. Persons interested in property on the 5th avenue, 7th avenue, and Twenty-eighth street, will do well to call at the Clerk's office of the Common Council, and examine the petitions above referred to.

CORPORATION ORDINANCES.

We commence the publication of the entire volume of Corporation Ordinances, which have been published in a volume of near four hundred pages, by the authority of the Common Council.

ORDINANCES
OF THE
MAYOR, ALDERMEN AND COMMONALTY
Of the City of New York.

CHAPTER I.
AN ORDINANCE.

Of the powers and duties of the Mayor.

(Passed May 14, 1839.)

The Mayor, Aldermen and Commonalty of the City of New York in Common Council convened, do ordain as follows:

§ 1. It shall be the duty of the Mayor to cause to be employed as many persons as he may deem sufficient from time to time as City Watchmen, for the purpose of preserving the peace, and protecting the city from the acts of incendiaries; and that all expenses incurred thereby be charged to the general appropriation for the Watch Department, and be paid under similar warrants.

§ 2. That the Mayor be, and hereby is authorized to issue his Proclamation, at all times when he may deem it necessary, for the apprehension of any incendiary; and to offer such reward as he may think proper, not to exceed, in any instance, the sum of five hundred dollars.

§ 3. In all cases where the Mayor shall deem it expedient to commute for alien passengers arriving at this port instead of requiring indemnity bonds, he is hereby authorized to receive such sum, in lieu of such bonds, as he shall deem adequate, not less than one dollar, and not more than ten dollars, for each passenger.

CHAPTER II.
OF THE COMMON COUNCIL.

(Passed May 14, 1839.)

The Mayor, Aldermen and Commonalty of the City of New York, in Common Council convened, do ordain as follows:

TITLE I.

Of Committees.

§ 1. The members of the Board of Aldermen who now are, or who may hereafter be, appointed members of the Market Committee, and the members of the Board of Assistant Aldermen who now are, or who may hereafter be, appointed members of the Market Committee, are hereby jointly constituted the Market Committee of the Common Council for all legal purposes.

§ 2. The said Market Committee shall have the entire control, direction and regulation of the respective Public Markets and Market Places in the City of New York.

§ 3. A Committee of the Common Council shall be, from time to time, appointed, to consist of threepersons from each board, to be denominated the Road Committee, whose duty it shall be to examine the state of the roads, streets, avenues, and highways, at least once in every month: and to give the Street Commissioner any and all such information as they may think necessary and proper, relative to regulating and keeping the same in repair.

§ 4. It shall be the duty of the Committees of the Board of Aldermen, and of the Committees of the Board of Assistants, in reporting to their respective Boards upon any subject referred to them, to attach to such reports all resolutions, petitions, remonstrances and other papers in their possession, relative to the matters reported on.

§ 5. Reports of Committees, which shall contain a statement of facts, and the opinion of the Committee thereon, if adopted by the Board where such reports originated, shall be printed under the direction of the Clerk of such Board, and be placed on the files of the members.

TITLE II.

Miscellaneous Provisions and Rules.

§ 1. No donation shall be made to the Vaccine Department of the New York Dispensary, or to the Vaccine Department of the Northern Dispensary, until they respectively shall lay before the Common Council, a statement of the number of males and females vaccinated during the year, designating those vaccinated at the dwellings of the said persons, and those vaccinated at the office of the respective institutions; and no grant shall be made toward the ordinary expenses of the said institutions, until they shall respectively have laid before the Common Council an account of their receipts and expenditures for the year.

§ 2. No donation shall be made to any Charitable Institution, until they shall furnish the Common Council with a statement of the number of persons or families relieved during the year by the institution; and also a statement of their receipts and expenditures for the year.

§ 3. All applications hereafter made to the Common Council, by the owners of lands adjoining to those parts of the Warren, Southampton and Fitzroy roads, and Lowe's lane now closed up, to purchase parts of the said roads, shall be referred to the Comptroller and Street Commissioner for adjustment and settlement, in conformity with the principles which have received the sanction of the Common Council.

§ 4. In all cases where the owner of a lot or piece of the common lands heretofore sold by the Corporation, shall apply to the Common Council for an adjustment of the boundary lines thereof according to the map or plan of the city, such application shall be referred to the Finance Committee of both Boards, with power to treat with the applicant, and to settle by agreement the terms of such adjustment; and in case such settlement cannot be effected by agreement, the said Finance Committee shall have power to appoint an Arbitrator on the part of the Corporation, who, together with such Arbitrator as may be appointed for that purpose by the applicant, shall determine upon what terms, according to the principles of the Report made to the Board of Aldermen on the tenth day of November, eighteen hundred and thirty-four, (being printed Document No. 22,) the said boundary lines shall be adjusted; and in case the Arbitrators so chosen shall not be able to agree upon the matters referred to them, they shall be authorized to appoint an Umpire to determine the same; but a concurrence of two of the three persons, so to be chosen or appointed, shall be necessary to make an award.

§ 5. In all cases of reference, as provided for in the last section, the Street Commissioner shall furnish the Arbitrators with the necessary maps; and all the necessary bonds, deeds, and other instruments, which shall be required for such Arbitrators, or to carry any award into effect, shall be prepared by the Counsel, and executed in the usual manner.

§ 6. All petitions and applications for apportionment of assessments or taxes, shall be referred to the Committee on Assessments of both Boards, with power to said Committees to make the proper apportionment in all cases: Provided, that, in the judgment of said Committees, the case presents no difficulty requiring the special direction of the Common Council.

CHAPTER III.
OF THE OFFICERS OF THE COMMON COUNCIL.

(*Passed May* 2, 1839.)

The Mayor, Aldermen and Commonalty of the City of New York, in Common Council convened, do ordain as follows:

TITLE I.

Of the Clerk of the Common Council.

§ 1. A suitable person shall be appointed, to be known as Clerk of the Common Council of the City of New York.

§ 2. The said Clerk shall, before he enters upon the duties of his office, take and subscribe, before the Mayor of the said city, an oath or affirmation, well and faithfully to execute the said duties.

§ 3. The said Clerk shall execute a bond to the Mayor, Aldermen and Commonalty of the City of New York, with good and sufficient security to be approved by the Finance Committee of each Board, in the penal sum of one thousand dollars, conditioned for the faithful performance of the duties of his office.

§ 4. The said bond shall be renewed on the first day of May, in every year.

§ 5. The said Clerk shall receive a salary of two thousand dollars a year for his services.

§ 6. It shall be the duty of the Clerk of the Common Council to attend all meetings of the Board of Aldermen; also, of the Board of Aldermen and the Board of Assistants, when assembled together for the purpose of joint ballot; also, of the Board of Health, and of the Board of Supervisors of the City of New York; to keep the minutes of all such meetings respectively, and to cause proper records of such minutes to be made and kept in his office, in books to be provided for such purpose.

§ 7. It shall be the duty of the said Clerk to receive all and singular the fees, profits, revenues and emoluments, grante by the Charter of the city to the said Mayor, or which the said Mayor, by virtue of such Charter, or of any law or usage, may be entitled to receive or take; except such fees and perquisites as he may be entitled to by law, as a Judge of the Court of Common Pleas; and except, also, such fees as the said Mayor was entitled to receive as Clerk of the Markets, and for granting tavern and cartmen's licenses.

§ 8. It shall be the duty of the said Clerk to receive all sums paid for commutation by alien passengers; and all fees for licenses to owners and drivers of hackney coaches, carriages, and accommodation stages; also, to butchers, pawnbrokers, dealers in second-hand articles, keepers of junk shops, keepers of intelligence offices, and sweepers of chimneys.

§ 9. It shall be the duty of the said Clerk to enter in a book, to be provided for that purpose, the names of the respective payers of all moneys which he may receive for the Corporation; the amounts received by him, and for what the same has been paid; and to render a faithful and distinct account to the Comptroller, of all such moneys, on the first Thursday of each month, and thereupon to pay over the same to the Chamberlain of the city.

§ 10. It shall be the duty of the said Clerk, on the day succeeding the final passage of any ordinance or resolution directing the payment of any sum of money out of the Public Treasury, to deliver to the comptroller a certified copy of the same; and also, all references made to the said Comptroller by the Common Council, and statements of all subjects connected with the Comptroller's department. And he shall also, without delay, deliver to all other officers in the employ, or under the direction of the Common Council, and to all committees of the Board of Aldermen, all such resolutions and communications as may be referred to them respectively, by such Board.

§ 11. It shall be the duty of the said Clerk to keep under his charge and custody the common seal of the Mayor, Aldermen and Commonalty of the City of New York, and to cause the same to be affixed to all grants, leases, certificates, and other instruments and writings which may, from time to time, be made, granted or issued by order of the Common Council, pursuant to the Charter of the said city, or of any law of the state.

§ 12. It shall be the duty of the said Clerk to keep under his charge and custody the seal commonly called the seal of Mayoralty, and to cause the same, under the direction of the Mayor for the time being, to be affixed to all such writings and instruments as are usually certified under any seal of Mayoralty.

§ 13. It shall be the duty of the said Clerk to issue notices to the respective members of the different committees of the several Boards of which he is Clerk, and to all persons whose attendance may be required before any such committee, when directed so to do by the chairman thereof.

§ 14. It shall be the duty of the said Clerk to deliver, without delay, to the Mayor, all papers or documents under his charge, which may require to be approved or otherwise acted upon by the said Mayor.

§ 15. It shall be the duty of the Clerk of the Common Council, whenever and as often as the fire limits of this city shall be extended by any act of the legislature, to cause the same to be published in the papers employed by the Corporation, for the information of the citizens.

without delay, to the Mayor, all papers or documents under his charge, which may require to be approved or otherwise acted upon by the said Mayor.

(*To be continued.*)

ASST. VICE-CHANCELLOR HOFFMAN'S OPINION.

We publish for the information of the readers of the Gazette, the very important opinion of his Honor Murray Hoffman, Esq., Assistant Vice-Chancellor of the First Circuit, given in two assessment cases recently argued before him, on giving his decision. The opinion is very lengthy, is ably sustained by numerous authorities cited, and is very clear in its conclusion.

The Assistant Vice-Chancellor has not made a Decree in either of these causes, and we understand that Counsel are to be heard before him before settling the Decrees.

As soon as these Decrees are entered we shall endeavor to obtain copies for publication.

The proceedings in these two Causes we deem of such great public interest, that we delayed the putting our paper to press until we obtained a copy of the opinion of the ASSISTANT VICE-CHANCELLOR, which we now give at full length, commencing on the *third page* of this day's paper.

These are the first causes in assessment matters that have been fully argued before any of the courts of our state.

In the Supreme Court, at the Special Terms, several motions have been noticed of application for certioraris to bring up assessments, but the great hurry in which the business of the Special Terms of our Supreme Court is disposed of, gives no opportunity for the deliberate argument of important questions. This we consider a great defect in the judiciary system, inasmuch as there is no appeal from the decisions made in this summary and off-hand system of doing business.

From the Journal of Commerce.

THE DEATH OF PRESIDENT HARRISON, after just a month's service in the high station to which the people had called him, has created a sensation of sorrow in the public mind which is apparent to even the most casual observer. It is the first instance which has occurred, of a President dying during the term of service for which he was elected. In consequence of this event, the colors of our shipping were set at half mast yesterday, and remained so during the day. All the Courts adjourned without doing any business. From the City Hall and other public buildings, the American flag floated at half mast. The Common Council met in the evening, and passed resolutions appropriate to the occasion. [See proceedings.]

Great reliance was placed upon President Harrison and his Cabinet by a majority of the people of this country, and the happiest results were anticipated from his Administration. By his death these expectations are in a measure blasted. It is however to be presumed that the Cabinet will remain as at present,—and although on some points of public policy, the views of Vice-President Tyler, [who now succeeds to the Presidency,) may be different from those of President Harrison, yet in the main his administration will doubtless be satisfactory to those who elected him. It is stated (we know not how correctly,) that he is opposed to a National Bank, and to an increase of the Tariff. Mr. Tyler's own health is said to be very delicate, and fears have been expressed that he will not be able to endure the labor and fatigue incident to his new station. In such a case, the Executive power will devolve upon the Hon. SAMUEL L. SOUTHARD, as President of the Senate *pro tem.* Chancellor Kent, in his Commentaries, thus states the law on the subject:

"In case of the removal of the president from office, or of his death, resignation, or inability to discharge the powers and duties of the office, the same devolve on the vice-president; and, except in cases in which the president is enabled to reassume the office, the vice-president acts as president during the remainder of the term for which the president was elected. Congress are authorized to provide, by law, for the case of removal, death, resignation, or inability, both of the president and vice-president, declaring what officer should then act as president; and the officer so designated is to act until the disability be removed, or a president shall be elected, and who is in that case to be elected on the first Wednesday of the ensuing December, if time will admit of it, and if not, then on the same day in the ensuing year. In pursuance of this constitutional provision, the act of Congress of March 1st, 1792, sec. 9, declared, that in case of a vacancy in the office both of president and vice-president, the president of the Senate *pro tempore*, and in case there should be no president of the Senate, then the speaker of the House of Representatives, for the time being, should act as president, until the vacancy was supplied."

MOUNT MORRIS SQUARE.

The Chief Justice of the Supreme Court has taken the papers prepared for the re-argument of the motion for certiorari in the matter of this assessment, and is to consult his associates as to hearing an argument.

TWENTY-EIGHTH STREET, SECOND AVENUE, SEVENTH AVENUE, AND NINTH AVENUE.

These assessments are before the Chief Justice on motion for the re-argument, the same as Mount Morris.

CORPORATION NOTICES.

In the New Era of the 12th instant is the City Comptroller's notice of the leasing of the public slips on the 19th day of April, at the City Hall, *by auction.* Also a notice that the Interest on the City Stock due May 1st, 1841, will be paid on that day at the Bank of the State of New York, by the City Chamberlain, C. W. Lawrence, Esq.

Also Street Commissioners' notice of assessment for well and pump in 7th street near 2d avenue, embracing both sides of 7th street below 2d and 3d avenues, and west side of 2d avenue between 6th and 8th streets; also for well and pump in 24th street near 2d avenue, embracing both sides of 24th street between 2d and 3d avenues, and both sides 3d avenue between 24th and 28th streets.

Also for well and pump in 49th street, embracing both sides of 49th street, and on the old post road, and on both sides of 3d avenue between 48th and 50th streets.

Also a petition for extending Washington street from Gansevort street to the 10th avenue.

Persons interested will do well to make inquiry into these last proceedings.

We have delayed the publication of the present number of our paper in order to give the important opinion of ASSISTANT VICE-CHANCELLOR HOFFMAN, in the causes argued before him a few weeks since: and also in consequence of the death of our lamented Chief Magistrate, William Henry Harrison, President of the United States, whose funeral solemnities have occupied the attention of all classes of citizens during most of the last week.

CONSTITUTION OF CONNECTICUT.

PREAMBLE.

The people of Connecticut, acknowledging, with gratitude, the good providence of God, in having permitted them to enjoy a free government, do, in order more effectually to define secure, and perpetuate the liberties, rights and privileges, which they have derived from their ancestors, hereby, after a careful consideration and revision, ordain and establish the following Constitution, and form of civil government.

ARTICLE I.

DECLARATION OF RIGHTS.

That the great and essential principles of liberty and free government may be recognized and established,

WE DECLARE,

Sect. 1. That all men, when they form a social compact, are equal in rights; and that no man, or set of men, are entitled to exclusive public emoluments, or privileges, from the community.

Source of political power.

Sect. 2. That all political power is inherent in the people, and all free governments are founded on their authority, and instituted for their benefit; and that they have, at all times, an undeniable and indefeasible right to alter their form of government, in such a manner as they may think expedient.

Religious profession and worship.—Limitation.

Sect. 3. The exercise and enjoyment of religious profession and worship, without discrimination, shall forever be free to all persons in this state; provided, that the right hereby declared and established, shall not be so construed as to excuse acts of licentiousness, or to justify practices inconsistent with the peace and safety of the state.

No preference to be given by law to any christian sect.

Sect. 4. No preference shall be given by law to any christian sect or mode of worship.

Right to freely speak, write and publish sentiments.

Sect. 5. Every citizen may freely speak, write and publish his sentiments on all subjects, being responsible for the abuse of that liberty.

Liberty of speech or of the press not to be restrained.

Sect. 6. No law shall ever be passed to curtail or or restrain the liberty of speech or of the press.

Libel.—Evidence—Right of the Jury.

Sect. 7. In all prosecutions or indictments for libels, the truth may be given in evidence; and the jury shall have the right to determine the law and the facts, under the direction of the court.

Security from searches and seizures.—Restriction as to search warrants.

Sect. 8. The people shall be secure in their persons, houses, papers and possessions from unreasonable searches or seizures; and no warrant to search any place, or to seize any person or things, shall issue, without describing them as nearly as may be, nor without probable cause, supported by oath or affirmation.

Rights of the accused in criminal prosecutions.—Presentment of a grand jury when necessary.

Sect. 9. In all criminal prosecutions, the accused shall have a right to be heard by himself, and by counsel; to demand the nature and cause of the accusation; to be confronted by the witnesses against him; to have compulsory process to obtain witnesses in his favor; and in all prosecutions by indictment or information, a speedy public trial by an impartial jury. He shall not be compelled to give evidence against himself, nor be deprived of life, liberty or property, but by due course of law. And no person shall be holden to answer for any crime, the punishment of which may be death or imprisonment for life, unless on a presentment or an indictment of a grand jury; except in the land or naval forces, or in the militia, when in actual service, in time of war, or public danger.

Security from arrest, &c.

Sect. 10. No person shall be arrested, detained or punished, except in cases clearly warranted by law.

Right of private property.

Sect. 11. The property of no person shall be taken for public use, without just compensation therefor.

Right of redress for injuries.

Sect. 12. All courts shall be open, and every person, for an injury done him in his person, property or reputation, shall have remedy by due course of law, and right and justice administered, without sale, denial or delay.

Excessive bail or fines not to be required.

Sect. 13. Excessive bail shall not be required, nor excessive fines imposed.

Prisoners, in what cases bailable.—Writ of habeas corpus.

Sect. 14. All prisoners shall, before conviction, be liable, by sufficient sureties, except for capital offences, where the proof is evident, or the presumption great; and the privileges of the writ of *habeas corpus* shall not be suspended, unless when in case of rebellion or invasion, the public safety may require it; nor in any case, but by the legislature.

No attainder of treason or felony.

Sect. 15. No person shall be attainted of treason or felony, by the legislature.

Right of the citizens to assemble: and to petition for a redress of grievances.

Sect. 16. The citizens have a right, in a peaceable manner, to assemble for their common good, and to apply to those invested with the powers of government for redress of grievances, or other proper purposes, by petition, address or remonstrance.

Right to bear arms.

Sect. 17. Every citizen has a right to bear arms in defence of himself and the state.

Subordination of the military to the civil power.

Sect. 18. The military shall, in all cases, and at all times, be in strict subordination to the civil power.

Quartering of soldiers.

Sect. 19. No soldier shall, in time of peace, be quartered in any house, without the consent of the owner; nor in time of war, but in a manner to be prescribed by law.

No hereditary emoluments.

Sect. 20. No hereditary emoluments, privileges or honors, shall ever be granted, or conferred, in this state.

Trial by jury.

Sect. 21. The right of trial by jury shall remain inviolate.

ARTICLE II.

OF THE DISTRIBUTION OF POWERS.

The powers of government shall be divided into three distinct departments, and each of them confided to a separate magistracy—to wit—those which are legislative, to one; those which are executive, to another; and those which are judicial, to another.

ARTICLE III.

OF THE LEGISLATIVE DEPARTMENT.

Legislative powers vested in two houses.—General Assembly.

Sect. 1. The legislative power of this state shall be vested in two distinct houses or branches; the one to be styled THE SENATE, the other THE HOUSE OF REPRESENTATIVES, and both together THE GENERAL ASSEMBLY. The style of their laws shall be, *Be it enacted by the Senate and House of Representatives, in General Assembly convened.*

Stated annual session.—Special session.—A different place of meeting, when, and how, to be designated.

Sect. 2. There shall be one stated session of the general assembly, to be holden in each year, alternately at Hartford and New-Haven, on the first Wednesday of May, and at such other times as the general assembly shall judge necessary; the first session to be holden at Hartford: but the person administering the office of governor, may, on special emergencies, convene the general assembly at either of said places, at any other time. And in case of danger from the prevalence of contagious diseases, in either of said places, or other circumstances, the person administering the office of governor may, by proclamation, convene said assembly at any other place in this state.

House of Representatives.—Number of Repreventatives.—Restriction as to new towns.—Right of the towns from which new ones are made.

Sect. 3. The house of representatives shall consist of electors residing in towns from which they are elected. The number of representatives from each town shall be the same as at present practised and allowed. In case a new town shall hereafter be incorporated, such new town shall be entitled to one representative only; and if such new town shall be made from one or more towns, the town or towns from which the same shall be made, shall be entitled to the same number of representatives as at present allowed unless the number shall be reduced by the consent of such town or towns.

Senate.

Sect. 4. The Senate shall consist of twelve members, to be chosen annually by the electors.

Election of Senators.—Duplicate lists.—Return of votes.

Sect. 5. At the meeting of electors, held in the several towns in this state, in April annually, after the election of representatives, the electors present shall be called upon to bring in their *written* ballots for senators. The presiding officer shall receive the votes of the electors, and count and declare them in open meeting. The presiding officer shall also make duplicate lists of the persons voted for, and of the number of votes for each, which shall be certified by the presiding officer; one of which lists shall be delivered to the town clerk, and the other within ten days after said meeting, shall be delivered under seal, either to the secretary, or to the sheriff of the county in which said town is situated; which list shall be directed to the secretary, with a superscription expressing the purport of the contents thereof. And each sheriff, who shall receive such votes, shall within fifteen days after such meeting, deliver them, or cause them to be delivered, to the secretary.

Canvass of votes.—Declaration.—Equality of votes.—Return of votes, and result to be submitted to both houses.

Sect. 6. The treasurer, secretary, and comptroller, for the time being, shall canvass the votes publicly. The twelve persons having the greatest number of votes for senators, shall be declared to be elected. But in cases where no choice is made by the electors, in consequence of an equality of votes, the house of representatives shall designate, by ballot, which of the candidates having such equal number of votes, shall be declared to be elected. The return of votes, and the result of the canvass, shall be submitted to the house of representatives, and also to the senate, on the first day of the session of the general assembly; and each

and highest number of votes, so returned as aforesaid. The general assembly shall, by law, prescribe the manner in which all questions concerning the election of governor, or lieutenant-governor, shall be determined.

Lieutenant-governor.

Sect. 3. At the annual meetings of the electors, immediately after the election of governor, there shall also be chosen, in the same manner as is herein before provided for the election of governor, a lieutenant-governor, who shall continue in office for the same time and possess the same qualifications.

Compensation to governor, &c.

Sect. 4. The compensations of the governor, lieutenant-governor, senators, and representatives, shall be established by law, and shall not be varied so as to take effect until after an election, which shall next succeed the passage of the law establishing said compensations.

Captain-general.

Sect. 5. The governor shall be captain-general of the militia of the state, except when called into the service of the United States.

Governor may require information, &c.

Sect. 6. He may require information in writing from the officers in the executive department, on any subject relating to the duties of their respective offices.

Power as to adjournment of general assembly.

Sect. 7. The governor, in case of a disagreement between the two houses of the general assembly, respecting the time of adjournment, may adjourn them to such time as he shall think proper, not beyond the day of the next stated session.

Duty of governor.

Sect. 8. He shall, from time to time, give to the general assembly, information of the state of the government, and recommend to their consideration such measures as he shall deem expedient.

Sect. 9. He shall take care that the laws be faithfully executed.

Power to grant reprieves. Exception.

Sect. 10. The governor shall have power to grant reprieves after conviction, in all cases, except those of impeachment, until the end of the next session of the general assembly, and no longer.

Commissions.

Sect. 11. All commissions shall be in the name, and by authority of, the State of Connecticut; shall be sealed with the state seal, signed by the governor, and attested by the secretary.

Power and duty of governor in relation to bills.—Proceedings on bills returned by the governor.

Sect. 12 Every bill, which shall have passed both houses of the general assembly, shall be presented to the governor. If he approves, he shall sign and transmit it to the secretary; but if not, he shall return it to the house in which it originated, with his objections, which shall be entered on the journals of the house; who shall proceed to reconsider the bill. If, after such reconsideration, that house shall again pass it, it shall be sent with the objections, to the other house, which shall also reconsider it. If approved, it shall become a law. But in such cases, the votes of both houses shall be determined by yeas and nays; and the names of the members voting for and against the bill, shall be entered on the journals of each house respectively. If the bill shall not be returned, by the governor, within three days, (Sundays excepted,) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it; unless the general assembly, by their adjournment prevents its return, in which case it shall not be a law.

President of the Senate.

Sect. 13. The lieutenant-governor shall, by virtue of his office, be president of the senate, and have, when in committee of the whole, a right to debate, and when the senate is equally divided to give the casting vote.

In what cases, the powers of the governor shall devolve upon the lieutenant-governor.

Sect. 14. In case of the death, resignation, refusal to serve, or removal from office of the governor, or of his impeachment, or absence from the state, the lieutenant-governor shall exercise the powers and authority appertaining to the office of governor, until another be chosen at the next periodical election for governor, and be duly qualified; or until the governor impeached or absent, shall be acquitted or return.

President of the senate pro tempore.

Sect. 15. When the government shall be administered by the lieutenant-governor, or he shall be unable to attend as president of the senate, the senate shall elect one of their members, as president *pro tempore*. And if, during the vacancy of the office of governor, the lieutenant-governor shall die, resign, refuse to serve, or be removed from office, or if he shall be impeached, or absent from the state, the president of the senate *pro tempore*, shall, in like manner, administer the government, until he be superceded by a governor, or lieutenant-governor.

In what case, senate to be convened, to choose a president pro tempore.

Sect. 16. If the lieutenant-governor shall be required to administer the government, and shall while in such administration, die or resign, during the recess of the general assembly, it shall be the duty of the secretary for the time being, to convene the senate for the purpose of choosing a president *pro tempore*.

Treasurer.—Canvass of votes.—Duty of Treasurer.

Sect. 17. A treasurer shall annually be chosen, by the electors, at their meeting in April; and the votes shall be returned, counted, canvassed, and declared, in the same manner as is provided for the election of governor and lieutenant-governor;* but the votes for treasurer shall be canvassed by the secretary and comptroller only. He shall receive all monies belonging to the state, and disburse the same only as he may be directed by law. He shall pay no warrant or order for the disbursement of public money, until the same has been registered in the office of the comptroller.

Secretary.—Canvass of votes.—Duty of Secretary.—Keeper of the seal.

Sect. 18. A secretary shall be chosen next after the treasurer, and in the same manner;* and the votes for secretary shall be returned to, and counted, canvassed, and declared by the treasurer and comptroller. He shall have the safe keeping and custody of the public records and documents, and particularly, of the acts, resolutions and orders of the general assembly, and record the same; and perform all such duties as shall be prescribed by law. He shall be the keeper of the seal of the state, which shall not be altered.

Comptroller.—His duty.

Sect. 19. A comptroller of the public accounts shall be annually appointed, by the general assembly.* He shall adjust and settle all public accounts and demands, except grants and orders of the general assembly He shall prescribe the mode of keeping and rendering all public accounts. He shall, *ex officio*, be one of the auditors of the accounts of the treasurer. The general assembly may assign to him other duties in relation to his office, and to that of the treasurer, and shall prescribe the manner in which his duties shall be performed.

Sheriff.—Term of office.—Bond.—Vacancy, how supplied.

Sect. 20. A sheriff shall be appointed in each county, by the general assembly, who shall hold his office for three years, removeable by said assembly, and shall become bound, with sufficient sureties, to the treasurer of the state, for the faithful discharge of the duties of his office, in such manner as shall be prescribed by law. In case the sheriff of any county shall die or resign, the governor may fill the vacancy occasioned thereby, until the same shall be filled by the general assembly.

Statement of funds of the state.

Sect. 21. A statement of all receipts, payments, funds, and debts of the state, shall be published from time to time, in such manner and at such periods, as shall be prescribed by law.

ARTICLE V.

OF THE JUDICIAL DEPARTMENT.

Courts.

Sect. 1. The judicial power of the state shall be

*Amendments 1836.

vested in a supreme court of errors, a superior court, and such inferior courts as the general assembly shall, from time to time, ordain and establish: the powers and jurisdiction of which courts shall be defined by law.

Justices of the peace.

Sect. 2. There shall be appointed, in each county, a sufficient number of justices of the peace, with such jurisdiction in civil and criminal cases as the general assembly may prescribe.

Mode of appointment.—Tenure of office.—Removeable in what manner.—Limitation of term of office.

Sect. 3. The judges of the supreme court of errors, of the superior and inferior courts, and all justices of the peace, shall be appointed by the general assembly, in such manner as shall by law be prescribed. The judges of the supreme court, and of the superior court shall hold their offices during good behaviour; but may be removed by impeachment; and the governor shall also remove them, on the address of two thirds of the members of each house of the general assembly; all other judges and justices of the peace shall be appointed annually. No judge or justice of the peace shall be capable of holding his office, after he shall arrive at the age of seventy years.

ARTICLE VI.

OF THE QUALIFICATIONS OF ELECTORS.

Electors.

Sect. 1. All persons who have been, or shall hereafter, previous to the ratification of this constitution, be admitted freemen, according to the existing laws of this state, shall be electors.

Qualifications necessary to become electors.

Sect. 2. Every white male citizen of the United States, who shall have gained a settlement in this state, attained the age of twenty-one years, and resided in the town in which he may offer himself to be admitted to the privilege of an elector, at least six months preceding; and have a freehold estate of the yearly value of seven dollars in this state; or having been enrolled in the militia, shall have performed military duty therein, for the term of one year next preceding the time he shall offer himself for admission, or being liable thereto, shall have been, by authority of law, excused therefrom; or shall have paid a state tax within the year next preceding the time he shall present himself for such admission; and shall sustain a good moral character; shall, on his taking such oath as may be prescribed by law, be an elector,

Privileges of an elector, how forfeited.

Sect. 3. The privileges of an elector shall be forfeited by a conviction of bribery, forgery, perjury, duelling, fraudulent bankruptcy, theft, or other offence for which an infamous punishment is inflicted.

Eligibility of electors.

Sect. 4. Every elector shall be eligible to any office in this state, except in cases provided for in this constitution.

Select-men and town clerk to decide on qualifications.

Sect. 5. The select men and town clerk of the several towns, shall decide on the qualifications of electors, at such times, and in such manner as may be prescribed by law.

Laws to be made in support of free suffrage.

Sect. 6. Laws shall be made to support the privilege of free suffrage, prescribing the manner of regulating and conducting meetings of the electors, and prohibiting, under adequate penalties, all undue influence therein, from power, bribery, tumult and other improper conduct.

Votes to be given by ballot.

Sect. 7. In all elections of officers of the state, or members of the general assembly, the votes of the electors shall be by ballot.

Privilege of electors from arrest.

Sect. 8. At all elections of officers of the state, or members of the general assembly, the electors shall be privileged from arrest, during their attendance upon, and going to, and returning from the same, on any civil process.*

*3 C. R. 537.

Annual meeting of the electors.

Sect. 9. The meetings of the electors for the election of the several state officers by law annually to be elected, and members of the general assembly of this state, shall be holden on the first Monday of April in each year.

ARTICLE VII.

OF RELIGION.

Duty and right of worshipping the Supreme Being.—No legal compulsion.—Equal rights of Christians.

Sect. 1. It being the duty of all men to worship the Supreme Being, the Great Creator and Preserver of the Universe, and their right to render that worship, in the mode most consistent with the dictates of their consciences; no person shall, by law, be compelled to join or support, nor be classed with, or associated to, any congregation, church, or religious association. But every person now belonging to such congregation, church, or religious association, shall remain a member thereof, until he shall have separated himself therefrom, in the manner hereinafter provided. And each and every society or denomination of Christians in this state, shall have and enjoy the same and equal powers, rights and privileges; and shall have power and authority to support and maintain the ministers or teachers of their respective denominations, and to build and repair houses for public worship, by a tax on the members of any such society only, to be laid by a major vote of the legal voters assembled at any society meeting, warned and held according to law, or in any other manner.

Secession.

Sect. 2. If any person shall choose to separate himself from the society or denomination of Christians to which he may belong, and shall leave a written notice thereof with the clerk of such society, he shall thereupon be no longer liable for any future expenses which may be incurred by said society.

ARTICLE VIII.

OF EDUCATION.

Charter of Yale College, confirmed.

Sect. 1. The charter of Yale College, as modified by agreement with the corporation thereof, in pursuance of an act of the general assembly, passed in May, 1792, is hereby confirmed.

School fund.—Amount to be ascertained; published and recorded.—Never to be diverted.

Sect. 2. The fund, called the School Fund, shall remain a perpetual fund, the interest of which shall be inviolably appropriated to the support and encouragement of the public, or common schools, throughout the state, and for the equal benefit of all the people thereof. The value and amount of said fund shall, as soon as practicable, be ascertained, in such manner as the general assembly may prescribe, published, and recorded in the comptrollers office; and no law shall ever be made, authorizing said fund to be diverted to any other use than the encouragement and support of public, or common schools, among the several school societies, as justice and equity shall require.

ARTICLE IX.

OF IMPEACHMENTS.

Power of impeachment.

Sect. 1. The house of representatives shall have the sole power of impeaching.

Trial of impeachments.

Sect. 2. All impeachments shall be tried by the senate. When sitting for that purpose, they shall be on oath or affirmation. No person shall be convicted, without the concurrence of two thirds of the members present. When the governor is impeached, the chief justice shall preside

Liability to impeachment.—Limitation of judgment.

Sect. 3. The governor, and all other executive and judicial officers, shall be liable to impeachment; but judgments in such cases shall not extend further than to removal from office, and disqualification to hold any office of honor, trust, or profit under this state. The party convicted, shall, nevertheless, be liable and subject to indictment, trial and punishment according to law.

Treason defined.—Evidence.—Consequences of conviction.

Sect. 4. Treason against the state shall consist only in levying war against it, or adhering to its enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or on confession in open court. No conviction of treason, or attainder, shall work corruption of blood, or forfeiture.

ARTICLE X.

GENERAL PROVISIONS.

Official oath.

Sect. 1. Members of the general assembly, and all officers, executive and judicial, shall, before they enter on the duties of their respective offices, take the following oath or affirmation, to wit:

[Form.]

You do solemnly swear (or affirm, as the case may be) that you will support the constitution of the United States and the constitution of the state of Connecticut, so long as you continue a citizen thereof: and that you will faithfully discharge, according to law, the duties of the office of to the best of your abilities.

So help you God.*

Select-men, &c.

Sect. 2. Each town shall, annually, elect select men, and such officers of local police, as the laws may prescribe.

Effect of constitution upon corporations;—judicial and civil officers;—treasurer and secretary;—military officers;—laws.—Bonds, debts, contracts, &c.—General assembly in October, 1818.

Sect. 3. The rights and duties of all corporations shall remain as if this constitution had not been adopted, with the exception of such regulations and restrictions as are contained in this constitution. All judicial and civil officers now in office, who have been appointed by the general assembly, and commissioned according to law, and all such officers as shall be appointed by the said assembly, and commissioned as aforesaid, before the first Wednesday of May next, shall continue to hold their offices until the first day of June next, unless they shall, before that time, resign, or be removed from office according to law. The treasurer and secretary shall continue in office until a treasurer and secretary shall be appointed under this constitution. All military officers shall continue to hold and exercise their respective offices, until they shall resign, or be removed according to law. All laws not contrary to, or inconsistent with the provisions of this constitution, shall remain in force, until they shall expire, by their own limitation, or shall be altered or repealed, by the general assembly, in pursuance of this constitution. The validity of all bonds, debts, contracts, as well of individuals as of bodies corporate, or the state, of all suits, actions, or rights of action, both in law and equity, shall continue as if no change had taken place. The governor, lieutenant-governor, and general assembly, which is to be formed in October next, shall have and possess, all the powers and authorities, not repugnant to, or inconsistent with this constitution, which they now have and possess, until the first Wednesday of May next.

Public officers excluded from general assembly.

Sect 4. No judge of the superior court, or of the supreme court of errors; no member of congress; no person holding any office under the authority of the United States; no person holding the office of treasurer, secretary, or comptroller; no sheriff, or sheriff's deputy, shall be a member of the general assembly.

ARTICLE XI.

OF AMENDMENTS OF THE CONSTITUTION.

Amendments how to be proposed;—continued and published;—approved, by each house;—presented to the inhabitants;—and adopted.

Whenever a majority of the house of representatives shall deem it necessary to alter, or amend this constitution, they may propose such alterations and amendments; which proposed amendments shall be continued to the next general assembly, and be published with the laws which may have been passed at the same session; and if two thirds of each house, at the next session of said assembly, shall approve the amendments proposed, by yeas and nays, said amendments shall, by the secretary, be transmitted to the town clerk in each town in the state; whose duty it shall be to present the same to the inhabitants thereof, for their consideration, at a town meeting, legally

*5 C. R. 278. 1 Root 83.

the persons so voted for, the house of representatives shall in the manner provided for by the constitution, designate which of such person or persons shall be declared to be duly elected.

ARTICLE IV.

ADOPTED NOVEMBER, 1831.

Election of lieutenant-governor, treasurer and secretary.

There shall annually be chosen and appointed a lieutenant-governor, a treasurer, and secretary, in the same manner as is provided in the second section of the fourth article of the constitution of this state for the choice and appointment of a governor.

ARTICLE V.

ADOPTED NOVEMBER, 1836.

Comptroller how chosen.

A comptroller of public accounts, shall be annually chosen by the electors, in their meeting in April, and in the same manner as the treasurer and secretary are chosen; and the votes for comptroller, shall be returned to, and counted, canvassed, and declared by the treasurer and secretary.

ARTICLE VI.

ADOPTED NOVEMBER, 1836.

State officers how voted for.

The electors in the respective towns, on the first Monday of April in each year, may vote for governor, lieutenant governor, treasurer, secretary, senators and representatives in the general assembly, successively, or for any number of said officers at the same time. And the general assembly shall have power to enact laws, regulating and prescribing the order, and manner of voting for said officers; and also providing for the election of representatives, at some time subsequent to the first Monday of April, in all cases when it shall so happen that the electors in any town, shall fail on that day to elect the representative or representatives to which such town shall be by law entitled.

By written or printed ballots.

Provided, that in all elections of officers of the state, or members of the general assembly, the votes of the electors shall be by ballot, either written or printed.

CONNECTICUT WHEN A COLONY.

We copy from Mr. Justice Story's Commentaries on the Constitution of the United States, the following account of Connecticut as a Colony.

"§ 83. In 1685, a *quo warranto*, was issued by king James against the colony for the repeal of the charter. No judgment appears to have been rendered upon it; but the colony offered its submission to the will of the crown; and Sir Edmund Andros, in 1687, went to Hartford, and in the name of the crown declared the government dissolved. They did not, however, surrender the charter; but secreted it in an oak, which is still venerated; and immediately after the revolution of 1688, they resumed the exercise of all its powers. The successors of the Stuarts silently suffered them to retain it until the American Revolution, without any struggle or resistance. The charter continued to be maintained as a fundamental law of the State, until the year 1818, when a new constitution of government was framed and adopted by the people.

"§ 89. The laws of Connecticut were, in many respects, similar to those of Massachusetts. At an early period after the charter they passed an Act, which may be deemed a bill of rights. By it, it was declared, that 'no man's life shall be taken away; no man's honor or good name shall be stained; no man's person shall be arrested, restrained, banished, dismembered, nor any ways punished; no man shall be deprived of his wife or children; no man's goods or estate shall be taken away from him, nor any way endangered under colour of law, or countenance of authority, unless it be by virtue or equity of some express law of this colony, warranting the same, established by the general court, and sufficiently published; or in case of the defects of a law in any particular case, by some clear and plain rule of the word of God, in which the whole court shall concur.' The trial by jury, in civil and criminal cases, was also secured; and if the court were dissatisfied with the verdict, they might send back the jury to consider the same a second and third time, but not further. The governor was to be chosen, as the charter provided, by the freemen. Every town was to send one or two deputies or representatives to the general assembly; but every freeman was to give his voice in the election of assistants and other public officers. No person was entitled to be made a freeman, unless he owned lands in freehold of forty shillings value per annum, or £40 personal estate.

"§ 90. In respect to offences, their criminal code proceeded upon the same general foundation, as that of Massachusetts, declaring those capital, which were so declared in the Holy Scriptures, and citing them as authority for this purpose. Among the capital offences were idolatry, blasphemy of Father, Son, or Holy Ghost, witchcraft, murder, murder through guile by poisoning or other devilish practices, bestiality, sodomy, rape, man-stealing, false witness, conspiracy against the colony, arson, children cursing or smiting father or mother, being a stubborn or rebellious son, and treason.

"§ 91. In respect to religious concerns, their laws provided that all persons should attend public worship, and that the towns should support and pay the ministers of religion. And at first, the choice of the minister was confided to the major part of the house-holders of the town; the church, as such, having nothing to do with the choice. But in 1730, an act was passed (doubtless by the influence of the clergy), by which the choice of ministers was vested in the inhabitants of the town, who were church members; and the same year the celebrated platform, at Saybrook, was approved, which has continued down to our day to regulate, in discipline and doctrine, the ecclesiastical concerns of the State.

"§ 92. The spirit of toleration was not more liberal here, than in most of the other colonies. No persons were allowed to embody themselves into church estate without the consent of the general assembly, and the approbation of the neighbouring churches, and no ministry or church administration was entertained or authorized separate from, and in opposition to that openly and publicly observed and dispensed by the approved minister of the place, except with the approbation and consent aforesaid. Quakers, Ranters, Adamites, and other notorious heretics (as they were called) were to be committed to prison or sent out of the colony by order of the governor and assistants. Nor does the zeal of persecution appear at all to have abated until, in pursuance of the statutes of I. William and Mary, dissenters were allowed the liberty of conscience without molestation.

"§ 93. In respect to real estate, the descent and distribution was directed to be among all the children, giving the eldest son a double share; conveyances in fraud of creditors were declared void; lands were made liable to be set off to creditors on executions by the appraisement of three appraisers.

"The process in courts of justice was required to be in the name of the reigning king. Persons having no estate might be relieved from prison by two assistants; but if the creditor required it, he should satisfy the debt by service. Depositions were allowed as evidence in civil suits. No person was permitted to plead in behalf of another person on trial for delinquency, except directly to matter of law, a provision somewhat singular in our annals, though in entire conformity to the English law in capital felonies. Bills and bonds were made assignable, and suits allowed in the name of the assignees.

"Magistrates, justices of the peace, and ministers were authorized to many persons; and divorces *a vinculo*, allowed for adultery, fraudulent contract, or desertion for three years. Men and women, having a husband or wife in foreign parts, were not allowed to abide in the colony so separated above two years without liberty from the general court.

"Towns were required to support public schools under regulations similar, for the most part, to those of Massachusetts; and an especial maritime code was enacted, regulating the rights and duties, and authorities, of ship owners, seamen and of others concerned in navigation.

"Such are the principal provisions of the colonial legislation of Connecticut."

☞ **We give next in order the CONSTITUTION OF VERMONT, containing a valuable provision for the preservation of the Constitution by "THE COUNCIL OF CENSORS."**

CONSTITUTION OF VERMONT.

Adapted by the Convention holden at Windsor, July 4th. 1793.

CHAP. I.

A Declaration of Rights of the Inhabitants of the State of Vermont.

ARTICLE 1.

That all men are born equally free and independent, and have certain natural, inherent, and unalienable rights, amongst which are the enjoying and defending life and liberty, acquiring, possessing, and protecting property, and pursuing and obtaining happiness and safety; therefore, no male person, born in this country, or brought from over sea, ought to be holden by law to serve any person as a servant, slave, or apprentice, after he arrives to the age of twenty-one years, nor female, in like manner, after she arrives to the age of eighteen years unless they are bound by their own consent, after they arrive to such age, or bound by law for the payment of debts, damages, fines, costs or the like.

ARTICLE 2.

That private property ought to be subservient to public uses when necessity requires it; nevertheless, when any person's property is taken for the use of the public, the owner ought to receive an equivalent in money.

ARTICLE 3.

That all men have a natural and unalienable right to worship Almighty God according to the dictates of their own consciences and understandings, as in their opinion shall be regulated by the word of God; and that no man ought to, or of right can, be compelled to attend any religious worship, or erect or support any place of worship, or maintain any minister, contrary to the dictates of his conscience; nor can any man be justly deprived or abridged of any civil right as a citizen, on account of his religious sentiments or peculiar mode of religious worship; and no authority can or ought to be vested in, or assumed by, any power whatever, that shall in any case interfere with, or in any manner control, the rights of conscience in the free exercise of religious worship. Nevertheless, every sect or denomination ought to observe the Sabbath, or Lord's day, and keep up some sort of religious worship, which to them shall seem most agreeable to the revealed will of God.

ARTICLE 4.

Every person within this state ought to find a certain remedy, by having recourse to the laws, for all injuries or wrongs which he may receive in his person, property or character: he ought to obtain right and justice freely, and without being obliged to purchase it; completely, and without any denial; promptly, and without delay; conformably to the law.

ARTICLE 5.

That the people of this state by their legal representatives, have the sole, inherent, and exclusive right of governing and regulating the internal police of the same.

ARTICLE 6.

That all power being originally inherent in, and consequently derived from, the people, therefore, all officers of government, whether legislative or executive, are their trustees and servants, and at all times, in a legal way, accountable to them.

ARTICLE 7.

That government is, or ought to be instituted for the common benefit, protection, and security of the people, nation, or community, and not for the particular emolument or advantage of any single man, family, or set of men, who are a part only of that community; and that the community hath an indubitable, unalienable, and indefeasible right to reform or alter government, in such manner as shall be, by that community, judged most conducive to the public weal.

ARTICLE 8.

That all elections ought to be free and without corruption, and that all freemen having a sufficient evidence, common interest with, and attachment to the community, have a right to elect officers, and be elected into office, agreeably to the regulations made in this constitution.

ARTICLE 9.

That every member of society hath a right to be protected in the enjoyment of life, liberty, and property, and therefore is bound to contribute his proportion towards the expense of that protection, and yield his personal service, when necessary, or an equivalent thereto: but no part of any person's property can be justly taken from him, or applied to public uses, without his consent, or that of the representative body of freemen; nor can any man, who is conscientiously scrupulous of bearing arms, be justly compelled thereto, if he will pay such equivalent; nor are the people bound by any law but such as they have in like manner assented to, for their common good; and previous to any law being made to raise a tax, the purpose for which it is to be raised ought to appear evident to the legislature to be of more service to the community than the money would be if not collected.

ARTICLE 10.

That, in all prosecutions for criminal offences, a person hath a right to be heard by himself and his counsel; to demand the cause and nature of his accusation; to be confronted with the witnesses; to call for evidence in his favour, and a speedy public trial, by an impartial jury of his country; without the unanimous consent of which jury, he cannot be found guilty: nor can he be compelled to give evidence against himself; nor can any person be justly deprived of his liberty; except by the laws of the land, or the judgment of his peers.

ARTICLE 11.

That the people have a right to hold themselves, their houses, papers, and possessions, free from search or seizure; and, therefore, warrants without oath or affirmation first made, affording sufficient foundation for them, and whereby any officer or messenger may be commanded or required to search suspected places; or to seize any person or persons, his, her, or their property, not particularly described, are contrary to that right, and ought not be granted.

ARTICLE 12.

That when any issue in fact, proper for the cognizance of jury is joined in a court of law, the parties have a right to trial by jury, which ought to be held sacred.

ARTICLE 13.

That the people have a right to freedom of speech, and of writing and publishing their sentiments, concerning the transactions of government, and therefore the freedom of the press ought not to be restrained.

ARTICLE 14.

The freedom of deliberation, speech, and debate, in the legislature, is so essential to the rights of the people, that it cannot be the foundation of any accusation, or prosecution, action, or complaint, in any other court or place whatsoever.

ARTICLE 15.

The power of suspending laws, or the execution of laws, ought never to be exercised but by the legislature, or by authority derived from it, to be exercised in such particular cases as this constitution, or the legislature shall provide for.

ARTICLE 16.

That the people have a right to bear arms for the defence of themselves and the state; and, as standing armies in time of peace are dangerous to liberty, they ought not to be kept up, and that the military should be kept under strict subordination to, and governed by, the civil power.

ARTICLE 17.

That no person in this state can, in any case, be subjected to law martial, or to any penalties or pains by virtue of that law, except those employed in the army, and the militia in actual service.

ARTICLE 18.

The frequent recurrence to fundamental principles, and firm adherence to justice, moderation, temperance, industry, and frugality, are absolutely necessary to preserve the blessings of liberty, and keep government free; the people ought, therefore, to pay particular attention to these points, in the choice of officers and representatives, and have a right, in a legal way to exact a due and constant regard to them, from their legislators and magistrates, in making and executing such laws as are necessary for the good government of the state.

ARTICLE 19.

That all people have a natural and inherent right to emigrate from one state to another that will receive them.

ARTICLE 20.

That the people have a right to assemble together to consult for their common good: to instruct their representatives: and to apply to the legislature for redress of grievances by address, petition, or remonstrance.

ARTICLE 21.

That no person shall be liable to be transported out of this state for trial for any offence committed within the same.

CHAP. 2.

Plan or Form of Government.

§ 1. The commonwealth or state of Vermont shall be governed hereafter by a governor or lieutenant governor, council, and assembly of the representatives of the freemen of the same in manner and form following:

§ 2. The supreme legislative power shall be vested in a house of representatives, of the freemen of the commonwealth or state of Vermont.

§ 3. The supreme executive power shall be vested in a governor, or, in his absence, a lieutenant governor, and council.

§ 4. Courts of justice shall be maintained in every county in this state, and also in new counties, when formed; which courts shall be open for the trial of all causes proper for their cognizance; and justice shall be therein impartially administered, without corruption or unnecessary delay. The judges of the supreme court shall be justices of the peace throughout the state; and the several judges of the county courts in their respective counties, by virtue of their office, except in the trial of such causes as may be appealed to the county court.

§ 5. A future legislature may, when they shall conceive the same to be expedient and necessary, erect a court of chancery, with such powers as are usually exercised by that court, or as shall appear for the interest of the commonwealth: Provided, they do not constitute themselves the judges of the said court.

§ 6. The legislative, executive, and judiciary departments, shall be separate and distinct, so that neither exercise the powers properly belonging to the other.

§ 7. In order that the freemen of this state might enjoy the benefit of election, as equally as may be, each town within this state, that consists or may consist of eighty taxable inhabitants within one septenary, or seven years next after the establishing this constitution, may hold elections therein, and choose each two representatives; and each other inhabited town in this state may, in like manner, choose each one representative to represent them in general assembly, during the said septenary, or seven years; and after that, each inhabited town may, in like manner, hold such election, and choose each one representative, for ever thereafter.

§ 8. The house of representatives of the freemen of this state shall consist of persons most noted for wisdom and virtue, to be chosen by ballot, by the freemen of every town in this state, respectively, on the first Tuesday in September annually for ever.

§ 9. The representatives so chosen, a majority of whom shall constitute a quorum for transacting any other business than raising a state tax, for which two-thirds of the members elected shall be present, shall meet on the second Thursday of the succeeding October, and shall be styled *The General Assembly of the State of Vermont:* they shall have power to choose their speaker, secretary of state, their clerk, and other necessary officers of the house—sit on their own adjournments—prepare bills, and enact them into laws—judge of the elections and qualifications of their own members; they may expel members, but not for causes known to their own constituents antecedent to their own elections; they may admister oaths and affirmations in matters depending before them, redress grievances, impeach state criminals, grant charters of incorporation, constitute towns, boroughs, cities, and counties; they may, annually, on their first session after their election, in conjunction with the council, or oftener if need be, elect judges of the supreme and several county and probate courts, sheriffs, and justices of the peace; and also with the council may elect major generals and brigadier generals, from time to

their having heretofore taken and subscribed the same, as the following oath or affirmation, viz.

"You, ———, do solemnly swear (or affirm) that, as a member of this assembly, you will not propose or assent to any bill, vote or resolution, which shall appear to you injurious to the people, nor do or consent to any act or thing whatsoever that shall have a tendency to lessen or abridge their rights and privileges, as declared by the constitution of this state; but will in all things, conduct yourself as a faithful, honest representative, and guardian of the people, according to the best of your judgment and abilities: *(in case of an oath)* so help you God. *(And in case of affirmation)* under the pains and penalties of perjury."

§ 13. The doors of the house in which the general assembly of this commonwealth shall sit, shall be be open for the admission of all persons who behave decently; except only when the welfare of the state may require them to be shut.

§ 14. The votes and proceedings of the general assembly shall be printed, when one-third of the members think it necessary, as soon as convenient after the end of each session, with the yeas and nays on any question, when required by any member, except where the votes shall be taken by ballot, in which case every member shall have a right to insert the reasons of his vote upon the minutes.

§ 15. The style of the laws of this state, in future to be passed, shall be: *It is hereby enacted by the general assembly of the State of Vermont.*

§ 16. To the end that laws, before they are enacted, may be more naturally considered, and the inconvenience of hasty determination, as much as possible, prevented, all bills which originate in the assembly shall be laid down before the governor and council for their revision and concurrence, or proposals of amendment; who shall return the same to the assembly, with their proposals of amendment, if any, in writing; and if the same are not agreed to by the assembly, it shall be in the power of the governor and council to suspend the passing of such bill until the next session of the legislature: Provided, that if the governor and council shall neglect or refuse to return any such bill to the assembly, with written proposal of amendment, within five days, or before the rising of the legislature, the same shall become a law.

§ 17. No money shall be drawn out of the treasury, unless first appropriated by act of legislation.

§ 18. No person shall be elected a representative until he has resided two years in this state; the last of which shall be in the town for which he is elected.

§ 19. No member of the council or house of representatives shall, directly or indirectly, receive any fee or reward to bring forward or advocate any bill, petition, or other business to be transacted in the legislature; or advocate any cause, as counsel, in either house of legislation, except when employed in behalf of the state.

§ 20. No person ought, in any case, or in any time, to be declared guilty of treason or felony by the legislature.

§ 21. Every man, of the full age of twenty-one years, having resided in this state for the space of one whole year next before the election of representatives, and is of a quiet and peaceable behaviour, and will take the following oath or affirmation, shall be entitled to all the privileges of a freeman of this state.

"You solemnly swear (or affirm) that whenever you give your vote or suffrage touching any matter that concerns the state of Vermont, you will do it so as in your conscience you shall judge will most conduce to the best good of the same, as established by the constitution, without fear or favour of any man."

§ 22. The inhabitants of this state shall be trained and armed for its defence, under such regulations, restrictions, and exceptions, as congress, agreeably to the constitution of the United States, and the legislature of this state, shall direct. The several companies of militia shall, as often as vacancies happen, elect their captain and other officers, and the captains and subalterns shall nominate and recommend the field officers of their respective regiments, who shall appoint their staff officers.

§ 23. All commissions shall be in the name of the freemen of the state of Vermont, sealed with the state seal, signed by the governor, and in his absence the lieutenant governor, and attested by the secretary; which seal shall be kept by the governor.

§ 24. Every officer of state, whether judicial or executive, shall be liable to be impeached by the general assembly, either when in office or after his resignation or removal, for maladministration. All impeachments shall be before the governor, or lieutenant governor, and council, who shall hear and determine the same, and may award costs; and no trial or impeachment shall be a bar to a prosecution at law.

§ 25. As every freeman, to preserve his independence, if without a sufficient estate, ought to have some profession, calling, trade, or farm, whereby he may honestly subsist, there can be no necessity for, nor use in establishing offices of profit, the usual effects of which are dependence and servility, unbecoming freemen, in the possessors or expectants, and faction, contention and discord among the people. But, if any man is called into public service, to the prejudice of his private affairs, he has a right to a reasonable compensation; and whenever an office, through increase of fees or otherwise, becomes so profitable as to occasion many to apply for it, the profits ought to be lessened by the legislature. And if any officer shall wittingly and wilfully take greater fees than the law allows him, it shall ever after disqualify him from holding any office in this state, until he shall be restored by act of legislation.

§ 26. No person in this state shall be capable of holding or exercising more than one of the following offices at the same time, viz. governor, lieutenant governor, judge of the supreme court, treasurer of the state, member of the council, member of the general assembly, surveyor general, or sheriff. Nor shall any person, holding any office of profit or trust under the authority of congress, be eligible to any appointment in the legislature, or of holding any executive or judiciary office under this state.

§ 27. The treasurer of the state shall, before the governor and council, give sufficient security to the secretary of the state, in behalf of the general assembly; and each high sheriff, before the first judge of the county court to the treasurer of their respective counties, previous to their respectively entering upon the execution of their offices, in such manner, and in such sums, as shall be directed by the legislature.

§ 28. The treasurer's accounts shall be annually audited, and a fair state thereof laid before the general assembly at their session in October.

§ 29. Every officer, whether judicial, executive, or military, in authority under this state, before he enters upon the execution of his office, shall take and subscribe the following oath or affirmation of allegiance to this state, unless he shall produce evidence that he has before taken the same; and also the following oath or affirmation of office, except military officers, and such as shall be exempted by the legislature.

The oath or affirmation of office.

"You do solemnly swear (or affirm) that you will be true and faithful to the state of Vermont, and that you will not, directly or indirectly, do any act or thing injurious to the constitution or government thereof, as established by convention: *(If an oath)* so help you God. *(If an affirmation)* under the pains and penalties of perjury.

The oath or affirmation of office.

"You, ————, do solemnly swear (or affirm) that you will faithfully execute the office of ——— for the ——— of ———; and will therein do equal right and justice to all men, to the best of your judgment and abilities, according to law: *(If an oath)* so help you God. *(If an affirmation)* under the pains and penalties of perjury."

§ 30. No person shall be eligible to the office of governor or lieutenant governor, until he shall have resided in this state four years next preceding the day of his election.

§ 31. Trials of issues, proper for the cognizance of a jury, in the supreme and county courts, shall be by jury, except where parties otherwise agree; and great care ought to be taken to prevent corruption or partiality in the choice and return or appointment of juries.

§ 32. All prosecutions shall commence, *by the authority of the state of Vermont*; all indictments shall conclude with these words; *against the peace and dignity of the state,* And all fines shall be proportioned to the offences.

§ 33. The person of a debtor, where there is not strong presumption of fraud, shall not be continued in prison after delivering up and assigning over, *bona fide,* all his estate, real and personal, in possession, reversion

or remainder, for the use of his creditors, in such manner as shall be hereafter regulated by law. And all prisoners, unless in execution, or committed for capital offences, when the proof is evident or presumption great, shall be bailable by sufficient sureties; nor shall excessive bail be exacted for bailable offences.

§ 34. All elections, whether by the people or the legislature, shall be free and voluntary: and any elector who shall receive any gift or reward for his vote, in meat, drink, moneys, or otherwise, shall forfeit his right to elect at that time, and suffer such other penalty as the law shall direct; and any person who shall, directly or indirectly, give, promise, or bestow, any such rewards, to be elected, shall thereby be rendered incapable to serve for the ensuing year, and be subject to such further punishment as a future legislature shall direct.

§ 35. All deeds and conveyances of land shall be recorded in the town clerk's office in their respective towns; and for want thereof, in the county clerk's office of the same county.

§ 36. The legislature shall regulate entails in such manner as to prevent perpetuities.

§ 37. To deter more effectually from the commission of crimes, by continued visible punishments of long duration, and to make sanguinary punishments less necessary, means ought to be provided for punishing by hard labour those who shall be convicted of crimes not capital, whereby the criminal shall be employed for the benefit of the public, or for the reparation of injuries done to private persons: and all persons, at proper times, ought to be permitted to see them at their labor.

§ 38. The estates of such persons as may destroy their own lives shall not for that offence be forfeited, but descend or ascend in the same manner as if such persons had died in a natural way. Nor shall any article, which shall accidentally occasion the death of any person, be henceforth deemed a deodand, or in any wise forfeited, on account of such misfortune.

§ 39. Every person of good character, who comes to settle in this state, having first taken an oath or affirmation of allegiance to the same, may purchase, or by other just means acquire, hold, and transfer land or other real estate; and, after one year's residence shall be deemed a free denizen thereof, and entitled to all rights of a natural born subject of this state, except that he shall not be capable of being elected governor, lieutenant governor, treasurer, counsellor, or representative in assembly until after two year's residence.

§ 40. The inhabitants of this state shall have liberty, in seasonable times, to hunt and fowl on the lands they hold, and on other lands not enclosed; and in like manner to fish in all boatable and other waters, not private property, under proper regulations, to be hereafter made and provided by the general assembly.

§ 41. Laws for the encouragement of virtue and prevention of vice and immorality, ought to be constantly kept in force, and duly executed: and a competent number of schools ought to be maintained in each town, for the convenient instruction of youth; and one or more grammar schools be incorporated, and properly supported, in each county in this state. And all religious societies or bodies of men, that may be hereafter united or incorporated for the advancement of religion and learning, or for other pious and charitable purposes, shall be encouraged and protected in the enjoyment of the privileges, immunities, and estates, which they in justice ought to enjoy, under such regulations as the general assembly of this state shall direct.

§ 42. The declaration of the political rights and privileges of the inhabitants of this state, is hereby declared to be a part of the constitution of this commonwealth, and ought not to be violated on any pretence whatsoever.

§ 43. In order that the freedom of this commonwealth may be preserved inviolate for ever, there shall be chosen, by ballot, by the freemen of this state on the last Wednesday in March, in the year one thousand seven hundred and ninety-nine, and on the last Wednesday in March, in every seven years thereafter, thirteen persons, who shall be chosen in the same manner the council is chose, except they shall not be out of the council or general assembly, to be called the council of censors: who shall meet together on the first Wednesday in June next ensuing their election, the majority of whom shall be a quorum, in every case, except as to calling a convention, in which two-thirds of the whole number elected shall agree, and whose duty it shall be to inquire, whether the constitution has been preserved inviolate in every part during the last septenary, including the year of their service, and whether the legislative and executive branches of government have performed their duty, as guardians of the people, or assumed to themselves, or exercised, other or greater powers than they are entitled to by the constitution: They are also to inquire, whether the public taxes have been justly laid and collected in all parts of this commonwealth; in what manner the public moneys have been disposed of; and whether the laws have been duly executed. For these purposes, they shall have power to send for persons, papers, and records: they shall have authority to pass public censures, to order impeachments, and to recommend to the legislature the repealing such laws as shall appear to them to have been passed contrary to the principles of the constitution: These powers they shall continue to have for and during the space of one year from the day of their election, and no longer. The said council of censors, shall also have power to call a convention, to meet within two years after their sitting, if there appears to them an absolute necessity of amending any article of this constitution, which may be defective: explaining such as may be thought not clearly expressed: and of adding such as are necessary for the preservation of the rights and happiness of the people: but the articles to be amended, and the amendments proposed, and such articles as are proposed to be added or abolished, shall be promulgated at least six months before the day appointed for the election of such convention, for the previous consideration of the people, that they might have an opportunity of instructing their delegates on the subject.

By order of Convention, July 9th, 1793.

THOMAS CHITTENDEN, *President.*

Attest, LEWIS R. MORRIS, *Secretary.*

EXTRACTS FROM THE CONSTITUTION OF NEW-HAMPSHIRE.

Article 1. All men are born equally free and independent: Therefore, all government, of right, originates from the people, is founded in consent, and instituted for the general good.

2. All men have certain natural, essential, and inherent rights—among which are, the enjoying and defending life and liberty, acquiring, possessing, and protecting property; and, in a word, of seeking and obtaining happiness.

3. When men enter into a state of society, they surrender up some of their natural rights to that society, in order to ensure the protection of others; and without such an equivalent the surrender is void.

4. Among the natural rights, some are in their very nature unalienable, because no equivalent can be given or received for them. Of this kind are the *rights of conscience.*

5. Every individual has a natural and unalienable right to worship God according to the dictates of his own conscience, and reason: and no person shall be hurt, molested, or restrained in his person, liberty, or estate, for worshipping God in the manner most agreeable to the dictates of his own conscience, or for his religious profession, sentiments, or persuasion; provided he doth not disturb the public peace, or disturb others in their religious worship.

6. As morality and piety, rightly grounded on evangelical principles, will give the best and greatest security to government, and will lay, in the hearts of men, the strongest obligations to due subjection; and as the knowledge of these is most likely to be propagated through a society, by the institution of the public worship of the Deity, and of public instruction in morality and religion; therefore, to promote these important purposes, the people of this state have a right to empower, and do hereby fully empower, the legislature, to authorize, from time to time, the several towns, parishes, bodies corporate, or religious societies, within this state, to make adequate provision, at their own expense, for the support and maintenance of public protestant teachers of piety, religion, and morality:

Provided, notwithstanding, That the several towns, parishes, bodies corporate, or religious societies, shall at all times have the exclusive right of electing their own public teachers, and of contracting with them for their support and maintenance: and no person, of any one particular religious sect or denomination, shall ever be compelled to pay towards the support of the teacher or teachers of another persuasion, sect or denomination.

And every denomination of Christians, demeaning themselves quietly, and as good citizens of the state, shall be equally under the protection of the law: and no subordination of any one sect or denomination to another, shall ever be established by law.

And nothing herein shall be understood to affect any former contracts made for the support of the ministry; but all such contracts shall remain, and be in the same state, as if this constitution had not been made.

7. The people of this state have the sole and exclusive right of governing themselves as a free, sovereign, and independent state; and do, and for ever hereafter shall, exercise and enjoy every power, jurisdiction and right, pertaining thereto, which is not, or may not hereafter be, by them expressly delegated to the United States of America in congress assembled.

8. All power residing originally in, and being derived from, the people, all the magistrates and officers of government, are their substitutes and agents, and at all times accountable to them.

9. No office or place whatsoever, in government, shall be hereditary—the abilities and integrity requisite in all, not being transmissible to posterity or relations.

10. Government being instituted for the common benefit, protection, and security, of the whole community, and not for the private interest or emolument of any one man, family, or class of men; therefore whenever the ends of government are perverted, or public liberty manifestly endangered, and all other means of redress are ineffectual, the people may, and of right ought to, reform the old, or establish a new government.

35. It is essential to the preservation of the rights of every individual, his life, liberty, property, and character, that there be an impartial interpretation of the laws and administration of justice. It is the right of every citizen to be tried by judges as impartial as the lot of humanity will admit. It is therefore not only the best policy, but for the security of the rights of the people, that the judges of the supreme judicial court should hold their offices so long as they behave well: subject, however, to such limitations, on account of age as may be provided by the constitution of the state; and that they should have honourable salaries, ascertained and established by standing laws.

36. Economy being a most essential virtue in all states, especially in a young one; no pension shall be granted but in consideration of actual services; and such pensions ought to be granted with great caution by the legislature, and never for more than one year at a time.

37. In the government of this state, the three essential powers thereof, to wit, the legislative, executive, and judicial, ought to be kept as separate from, and independent of, each other, as the nature of a free government will admit, or as is consistent with that chain of connexion that binds the whole fabric of the constitution in one indissoluble bond of unity and amity.

38. A frequent recurrence to the fundamental principles of the constitution, and a constant adherence to justice, moderation, temperance, industry, frugality, and all the social virtues, are indispensably necessary to preserve the blessings of liberty and good government; the people ought, therefore, to have a particular regard to all those principles in the choice of their officers and representatives: And they have a right to require of their lawgivers and magistrates an exact and constant observance of them in the formation and execution of the laws necessary for the good administration of the government.

We have no room for further extracts from the constitution of New-Hampshire, and besides, the constitution of Massachusetts, Connecticut, and Vermont, which we give in full, in the present number of our series, contain substantially all that is omitted in the Constitution of New-Hampshire. The Constitution of Vermont was proposed to be amended and a convention elected for that purpose.

From the Cleveland Herald: The mast of a British vessel in port has been struck by lightning, but no great damage was done. The electric fluid also struck three times on one farm in Brooklyn.

Bristol, R. I. Steam mill was struck by lightning and set on fire. Mr. Wilmarth the night watch of the factory, immediately on the lightning striking, ran to the upper story of the building, and was instantly prostrated to the floor, as is supposed from the effects of the sulphurous air. He was taken up insensible, and shortly recovered his senses.—June 12.

During the severe storm on Saturday week, a man and his wife, residing in Lycoming Creek, Pa., were struck by lightning and instantly killed. The lightning struck a tree adjoining a dwelling in Peekskill, N. Y., on Friday, and passing through the house, killed three women and an infant.—June 14.

The Palmyra (Mo.) Courier of the 1st inst., says: On Saturday last, a small boy about 3 years old and a negro woman were struck by lightning while standing near the kitchen fire of Mr. Briscoe, of Lewis county.—June 15.

We hear that a severe thunder storm passed over Danbury Ct., on Monday afternoon, and that the lightning struck the lumber yard of Messrs. Wildman and Gilbert, and prostrated four persons in the vicinity. A cow belonging to Mr. Samuel Morris, was also killed in the eastern part of the town by another bolt, and a barn in the northern section, owned by Mr. Philo White, was struck and much injured.

On Monday of last week, there was a severe thunder storm in Westfield Society, in this town, accompanied with lightning. Just as a shower came up, Mr. Wm. F. Boardman, while hurrying from one of his barns to the house, felt a smart blow across the small of his back, (as though he had been struck with a cart whip,) accompanied with a slight sensation on one arm and leg. Immediately after, he heard the clap of thunder. The next day he felt sore, the one foot being slightly numb; and there was a red streak across his back. In a shop a few rods N. W. a shoemaker's lapstone was indented about the size of a cent, and a stone in that spot was converted into fine powder, smelling strong of sulphur. In another shop, a boy whittling with a penknife, uttered an exclamation of pain, and on taking the knife, it was found quite warm. A polishing tool lying on a bench in the same shop, emitted electric sparks. Two ladies sitting in a room felt electric shocks. The cattle and other animals exhibited signs of great uneasiness. No one, we believe, was injured.—Middleton (Conn.) Sentinel, June 16th.

Missouri Territory, May 17.—The other night a man was killed by lightning in an encampment of Oregon settlers, a few miles from here.

A man named Poor, residing in the upper part of Queen Anne Co., was recently killed by lightning. The fluid passed down the chimney and killed him.—June 17.

A Mrs. Evelne Feazel of Lacon, Ill., was killed by lightning on the 13th ult., while in the act of setting her dinner table. Three small children were in the room at the time, but they sustained no injury.—June 19.

The dwelling of Hylas T. Currier, Esq., of Fairfield, Kane Co., Ill., was struck by lightning on the evening of the 30th ult., and Mr. Currier instantly killed.

A serious accident occurred during the thunder storm on Saturday last, to Mr. R. Jackson, a farmer of this vicinity, while he, with some others in his employ, was gathering hay to save it from being wet by the rain, they were struck by lightning and all stunned. Mr. Jackson fell between a horse rake and the horse which was attached to it. At the same moment the horse took fright and started off, dragging Mr. Jackson after him in a most perilous situation, being partly in front of the rake and in imminent danger of being impaled by every prong. One prong did pass through his leg below the knee, but before further injury was received he recovered from the shock, and with admirable presence of mind, seized the reins and stopped the horse.—Wilmington (Del.) Journal, May 30.

On Saturday evening, a negro man belonging to Dr. W. W. Wilson, of Springfield, was instantly killed by lightning.—Savannah Republican, June 26.

We regret to learn that during the storm of Wednesday evening, Col. Reid, the stage proprietor, had four valuable horses killed by lightning at his farm at Pittstown.

The wife and child of Henry Bell, of Clay Co., Missouri, were killed by lightning on the morning of the second inst.—July 3.

Two young men were killed by lightning in Caldwell Co., Mo. They were riding over the prairie at the time. Names not known.

At Amboy, near Syracuse, two lads took shelter under a tree which was struck by lightning, and one of them was instantly killed. The dwelling of Gen. J. R. Lawrence, at Syracuse, was struck, and somewhat injured.—June 28.

At Salina, a house, store and salt block, were severally struck: a colored woman had the clothes stripped from her side, and was severely scorched by the lightning, and another woman was rendered insensible for half an hour.

A building was struck at Lafayette, in the same county, two houses at Weedsport, and a house at Cato four corners in Cayuga county.—July 4.

Two houses in the Third Municipality were struck by lightning on Sunday. No personal injury fortunately was sustained.—N. O. June 27.

The Episcopal church at Belvidere, in this State, was considerably injured during a shower on Thursday afternoon. The fluid entered the cupola, passing down the end of the building fronting the public square, tearing off the boards and shattering the timber from top to bottom.—Newark D. Adv. July 6.

There was a severe thunder storm in Plymouth county, Mass., on Saturday night, about 11 o'clock. At Kingston the lightning struck in five different places, but no person was killed.—July 7.

A severe thunder storm was experienced at Quebec and its vicinity on Sunday afternoon, July 2d. At St. Rock the lightning struck the church, while the people were at vespers, and created a great deal of alarm. Fortunately no one experienced injury.

Kingston, Mass., Monday morning, July 3d.—At a quarter before three yesterday morning, our town was visited by a most terrible thunder and lightning squall, which though continuing only 30 minutes, struck in four different places, within the distance of a mile and a half. The first flash struck the house of Mr. Ezra Perkins, and demolishing the chimney on the N. W. side of the house descended to the second story, throwing the plastering over the fire place with great violence to the opposite wall, and cutting off the leg of a dressing table, split off a part of the mantel, threw it round quarterly, and nailed it fast to the table;—and then making its way through the hearth, split the rising of the chimney and distributed an iron fire frame into half a dozen pieces about the room, and dashing in a dozen lights of one window, breaking a looking glass into many pieces—it demolished three glass lamps setting on the mantel piece, and left one on the hearth full of oil untouched, and rolled thunderingly heavy along the floor, cutting through the carpets and shattering the boards; it tore off the casing and descended to the cellar, opening a gap in the wall tumbled into a water hogshead, and driving out the bung, disappeared with the water. Though some half dozen of persons were in the house, in bed, at the time, no one was hurt.

About half an hour afterwards, the house of Mr. Joseph Lovering, Jr., about 20 rods from the former, was struck, the fluid descending the S. E. chimney, shattering the same till it came to the second story, where Mr. L., wife and youngest child were sleeping, the crib touching the chimney wall; and the little one had just, of its own accord, crept into the bed as the whole plastering over the crib was dashed into it, and the bed coverlet set fire to in several places, and one of Mr. L's hands slightly scorched, when it descended to the room below, carrying all the soot in the chimney with it, melting two Brittania lamps on the mantel piece, and giving the fire frame a wrenching, and demolishing a looking glass, took its departuae without any further ceremony. Three other children were sleeping in the house at the time. It also struck a pig stye of Mr. Robert Cushman, in which were two clever sized pigs, and killing one of them, disappeared. A duck pen of Capt. E. Fuller was also struck, and eleven young ducks, intended for the next Thanksgiving, were found dead in the morning. The two last are about a mile and a half from the first, and about the same distance from each other.

During the shower of last Wednesday, a colored man was killed by lightning, in the vicinity of Willow Point, in this county. He was standing near a tree at the moment, and the fluid passed down his back, completely shivering the spine.—Broome Repub.

We regret to learn that during the shower on Sunday afternoon last, the barn of Mr. Jacob F. Cunningham, of Rhinebeck, was struck by lightning and entirely consumed with its contents, together with the building attached.—Poughkeepsie Eagle.

During the thunder storm of the 23th June, a fine pair of oxen, belonging to Mr. Charles Comstock, of this town, were killed by lightning.—Newport N. H.

At Norridgewock, Me., on the 29th June, there was a violent thunderstorm, which struck in several places.

We are informed that during the heavy storm on the evening of the 28th June, a barn belonging to Mr. John Wells, situated in the north part of the town of Schuyler, was struck by lightning and wholly consumed.

In Charleston on Sunday night, St. Paul's church was struck by lightning, but not seriously injured.—July 10.

We learn that Mr. John A. Cook, formerly a clerk in the Post office in this place, was recently killed by lightning in Orange Co. He had been at work in his field, when seeing a storm coming up, he took shelter under a tree. The tree was struck by lightning, a part of the fluid passing down the body of Mr. Cook, and causing his death immediately.—Fayetteville, N. C. July 1st.

During the storm on Sunday the 2d inst., the Sunderland bridge across the Connecticut river, was struck by lightning. No injury was done, however, otherwise than tearing off a few shingles, displacing a number of planks, &c., rendering it impassable on one side at the time. The pig stie adjoining the barn of S. D. Crocker, of the same town, was also struck, killing three out of four swine. It is somewhat remarkable, that the fluid should descend to the ground directly between the barn and a large tree, without touching either, they only 15 or 20 fee t apart.—Northampton (Mass.) Gaz. July 13.

The storm in Adams county, Miss., on the 1st inst., was very severe in the neighborhood of the town of Washington. One gentleman was killed by lightning, and several negroes more or less injured.—July 17.

The following deaths by lightning occurred in Canada, during the shower of the 2d inst. At Sherrington three men were killed on the spot, and the other seriously injured. At St. Antonio, five children were gathering strawberries in a field about half a league from the village, when they were struck by lightning and two of them killed, one of them the son of Mr. Lapierre, aged 10 years, the other a little girl of five years, the daughter of Mr. Archambault. Their clothes were much burned. The three others were struck to the ground, but not seriously injured. They had taken refuge from the storm near a fence where they were struck.

We learn from Mr. Nelson, the proprietor of the Telegraph, that the mast of that establishment was struck by lightning during the thunder gust, on Saturday. In consequence of the mast being protected by a lightning rod, but little damage was done, though the fluid passed through the roof of the telegraph house, tearing away parts of the floor.—Baltimore Patriot, July 19.

A young man by the name of Wm. Nelson Colburn, 22 years of age from Collier Centre, Erie county, was killed by lightning about two miles west of this village. A brother who was sitting near him at the time, was severely stunned, but is recovering.—Geneva Courier, July 21.

On Tuesday forenoon, about 11 o'clock, a severe thunder storm passed over Kingston in this State. A dwelling house was struck by lightning and tore entirely to pieces. A cat which was lying on the door step, was killed. A child 14 months old, was knocked down, but its father having the presence of mind to throw a pail of water upon it, it was immediately resuscitated. There were ten other persons in the house.

LAWS OF MAN AT VARIANCE WITH THE LAWS OF NATURE.

The following extrordinary act is now in force upon the statute books of the State of Connecticut:

BARBERRY BUSHES.

An Act for destroying Barberry Bushes.

Sect. I. Be *it enacted by the Senate and House of Representatives in General Assembly convened*, That any person or persons, with the advice and consent of the civil authority, and select-men of any town, where any *barberry bushes* are, or may be growing, or in pursuance of the vote of such town, passed in legal town meeting, may, at any season of the year, enter on lands on which barberry bushes shall be growing, and dig them up and destroy them, without being liable to an action therefor.

Sec. 2. The select-men of any town, in which such bushes are, or shall be growing, may, in pursuance of a vote of the town, passed in legal meeting, employ any suitable person or persons, to dig up and destroy such bushes, and defray the expense thereof from the treasury of the town.

The objection to Barberry Bushes, we understand to be, that they are destructive to the growth of wheat, and it is said by some persons that wheat will not mature in the same or adjoining field, in which Barberry Bushes are growing, hence this provision of law in Connecticut.

CONSTITUTION
OF
MASSACHUSETTS.

The Constitution of Massachusetts was framed at a time when men's minds were in a suitable condition for such a work. The revolution had brought with it numerous trials and hardships which served to teach the inhabitants of the infant Commonwealth their entire dependence upon the GREAT GOVERNOR OF THE UNIVERSE, and led them to seek that guidance in the framing of a fundamental law which should secure to themselves and their posterity the blessing of civil liberty.

Mankind are creatures of circumstances, and it is often that the human mind is under influences that are produced by the occurrence of important events which abundantly qualify it for usefulness, events which tend to discipline the mind and to exert an influence which spreads from mind to mind until the public mind is formed as the mind of one man.

The individuals who formed the Convention which was entrusted with this important work, have all ceased from their labors and passed to that change which awaits every human being—their labor, and their work, in this, is left behind, a valuable bequest to their posterity, and a rich legacy to millions yet unborn.

The Constitution of Massachusetts, goes much into detail—an important requisite in an act of this description—its language is plain, and of easy construction.

Constitutional law as distinguished from Statute law, presents, among other characteristics, this difference—the former is intended as a more permanent enactment while the latter is subject to alteration by the Legislature, which is annually convened. It is important therefore, that whatever laws are designed to be permanent should be incorporated in the Constitution, hence the greater detail is a matter of great importance.

The Constitution of Massachusetts has been in operation 66 years, and the people of that Commonwealth have been satisfied with its provisions for we find that but few amendments have been made to that instrument.

In presenting a copy of the Constitution of Massachusetts, we have premised it with some extracts from Mr. Justice Story's Commentaries on the Constitution, as follows:

"In the establishment of a free government, the division of the three great powers of government, the executive, the legislative, and the judicial, among different functionaries, has been a favorite policy with patriots and statesmen. It has by many been deemed a maxim of vital importance, that these powers should forever be kept separate and distinct. And accordingly we find it laid down with emphatic care in the bill of rights of several of the State Constitutions. In the Constitution of Massachusetts, for example, it is declared, that in the Government of this Commonwealth, the legislative department shall never exercise the executive and judicial powers, or either of them; the executive shall never exercise the legislative or judicial powers, or either of them; the judicial shall never exercise the legislative and executive powers, or either of them; to the end it may be a government of laws and not of men. Other declarations of a similar character are to be found in other State Constitutions."

"Montesquieu seems to have been the first, who, with a truly philosophical eye, surveyed the political truth involved in the maxim, in its full extent and gave to it a permanent importance and value. As it is tacitly assumed, as a fundamental basis in the Constitution of the United States, in the distribution of its powers, it may be worth enquiry, what is the true nature, object and extent of the maxim, and of the reasoning by which it is supported. The remarks of Montesquieu on this subject will be found in a professed commentary upon the constitution of England, "When," says he, "the legislature and executive powers are vested in the same person, or in the same body of magistrates there can be no public liberty, if the judiciary power be not separated from the legislative and executive. Were it joined to the legislative, the life and liberty of the subject would be exposed to arbitrary control; for the judge would be the legislator. Were it joined to the executive power, the judge might behave with violence and oppression. There would be an end of everything, were the same men, or the same body, whether of nobles or of the people, to exercise these three powers, that of enacting laws, that of executing the public resolutions, and of trying the causes of individuals."

"The same reasoning is adopted by Mr. Justice Blackstone, in his commentaries. "In all tyrannical governments," says he, "the supreme magistracy, or the right of both making and enforcing the laws, is vested in the same man, or in one and the same body of men; and wherever these two powers are united together there can be no public liberty. The magistrate may enact tyrannical laws, and execute them in a tyrannical manner, since he is possessed in quality of dispenser of justice, with all the power, which he, as legislator, thinks proper to give himself. But where the legislative and executive authority are in distinct hands, the former will take care not to entrust the latter with so large a power, as may tend to the subversion of its own independence, and therewith of the liberty of the subject;" again, "in this distinct and separate existence of the judicial power in a peculiar body of men, nominated, indeed, by, but not removeable at, the pleasure of the crown, consists of one main preservation of public liberty; which cannot long subsist in any state, unless the administration of common justice be in some degree separated from the legislative, and also the executive power. Were it joined with the legislative, the life, liberty, and property of the subject would be in the hands of arbitrary judges, whose decisions, would then be regulated only by their opinions, and not by any fundamental principles of law, which though legislators may depart from, yet judges are bound to observe. Were it joined with the executive, this union might soon be an overbalance for the legislative.

"Dr. Paley's remarks on this subject are not the least valuable of his excellent writings. The next security for the impartial administration of justice, especially in decisions, to which government is a party, is the independency of the judges. As protection against every illegal attack upon the rights of the subject by the servants of the crown, is to be sought for from these tribunals, the judges of the land become not unfrequently the arbitrators between the king and the people; on which account they ought to be independent of either; or, what is the same thing equally dependent upon both; that is, if they be appointed by the one, they should be removeable only by the other. This was the policy, which dictated the memorable improvement in our constitution, by which the judges, who before the revolution held their offices during the pleasure of the king, can now be deprived of them only by an address from both houses of parliament; as the most regular, solemn and authentic way, by which the dissatisfaction of the people can be expressed, To make this independency of the judges complete, the public salaries of their office ought not only to be certain both in amount and continuance, but so liberal as to secure their integrity from the temptation of secret bribes; which liberality will answer, also, the further purpose of preserving their jurisdiction from contempt, and their characters from suspicion; as well as of rendering the office worthy of ambition of men of eminence in their profession.

Copy of a letter from PRESIDENT WASHINGTON *to the Chief Justice and Associate Justices of the Supreme Court of the United States.*

UNITED STATES, April 3d, 1790.

"GENTLEMEN:—I have always been persuaded, that the stability and success of the national government, and consequently the happiness of the people of the United States, would depend, in a considerable degree, on the interpretation of its laws. In my opinion, therefore, it is important, that the judiciary system should not only be independent in its operations, but as perfect as possible, in its formation.

"As you are about to commence your first circuit, and many things may occur in such an unexplored field, which it would be useful should be known, I think it proper to acquaint you, that it will be agreeable to me to receive such information and remarks on this subject as you shall from time to time judge it expedient to make.

GEO. WASHINGTON."

"*To the Chief Justice and Associate Justices of the United States.*

societies, shall, at all times, have the exclusive right of electing their public teachers, and of contracting with them for their support and maintenance.

Option as to whom parochial taxes may be paid, unless, &c.

And all monies, paid by the subject to the support of public worship, and of the public teachers aforesaid, shall, if he require it, be uniformly applied to the support of the public teacher or teachers of his own religious sect or denomination, provided there be any on whose instructions he attends: otherwise it may be paid towards the support of the teacher or teachers of the parish or precinct in which the said monies are raised.

All denominations equally protected. Subordination of one sect to another prohibited.

And every denomination of christians, demeaning themselves peaceably, and as good subjects of the Commonwealth, shall be equally under the protection of the law; and no subordination of any one sect or denomination to another shall ever be established by law.

Right of self government secured.

IV. The people of this Commonwealth have the sole and exclusive right of governing themselves, as a free, sovereign, and independent state; and do, and forever hereafter shall, exercise and enjoy every power, jurisdiction, and right, which is not, or may not hereafter, be by them expressly delegated to the United States of America, in congress assembled.

Accountability of all officers, &c.

V. All power residing originally in the people, and being derived from them, the several magistrates and officers of government, vested with authority, whether legislative, executive, or judicial, are their substitutes and agents, and are at all times accountable to them.

Services rendered to the public, being the only title to peculiar privileges, hereditary offices are absurd and unnatural.

VI. No man, nor corporation, or association of men, have any other title to obtain advantages, or particular and exclusive privileges, distinct from those of the community, than what arises from the consideration of services rendered to the public; and this title being in nature neither hereditary, nor transmissible to children, or descendants, or relations by blood, the idea of a man being born a magistrate, lawgiver, or judge, is absurd and unnatural.

Objects of government; right of people to institute and change it.

VII. Government is instituted for the common good; for the protection, safety, prosperity and happiness of the people; and not for the profit, honor, or private interest of any one man, family, or class of men: Therefore the people alone have an incontestible, unalienable, and indefeasible right to institute government; and to reform, alter, or totally change the same, when their protection, safety, prosperity and happiness require it.

Right of people to secure rotation in office.

VIII. In order to prevent those, who are vested with authority, from becoming oppressors, the people have a right, at such periods and in such manner as they shall establish by their frame of government, to cause their public officers to return to private life; and to fill up vacant places by certain and regular elections and appointments.

All, having the qualifications prescribed, equally elegible to office.

IX. All elections ought to be free; and all the inhabitants of this Commonwealth, having such qualifications as they shall establish by their frame of government, have an equal right to elect officers, and to be elected, for public employments.

Right of protection and duty of contribution, correlative. Taxation, founded on consent. Private property not to be taken for public uses, without, &c.

X. Each individual of the society has a right to be protected by it in the enjoyment of his life, liberty and property, according to standing laws. He is obliged, consequently, to contribute his share to the expense of this protection: to give his personal service, or an equivalent, when necessary; but no part of the property of any individual, can, with justice, be taken from him or applied to public uses without his own consent, or that of the representative body of the people. In fine, the people of this Commonwealth are not controllable by any other laws, than those to which their constitutional representative body have given their consent. And whenever the public exigencies require that the property of any individual should be appropriated to public uses, he shall receive a reasonable compensation therefor.

Remedies, by recourse to the law, to be free, complete and prompt.

XI. Every subject of the Commonwealth ought to find a certain remedy, by having recourse to the laws, for all injuries or wrongs which he may receive in his person, property or character. He ought to obtain right and justice freely, and without being obliged to purchase it; completely, and without any denial; promptly and without delay; conformably to the laws.

Prosecutions regulated.

XII. No subject shall be held to answer for any crimes or offence, until the same is fully and plainly, substantially and formally, described to him; or be compelled to accuse, or furnish evidence against himself: and every subject shall have a right to produce all proofs, that may be favorable to him; to meet the witnesses against him face to face, and to be fully heard in his defence by himself, or his counsel at his election: and no subject shall be arrested, imprisoned, despoiled, or deprived of his property, immunities, or privileges, put out of the protection of the law, exiled, or deprived of his life, liberty, or estate; but by the judgment of his peers, or the law of the land.

Right to trial by jury, in criminal cases, except, &c.

And the legislature shall not make any law that shall subject any person to a capital or infamous punishment, excepting for the government of the army and navy, without trial by jury.

Crimes to be proved in the vicinity.

XIII. In criminal prosecutions, the verification of facts in the vicinity where they happen, is one of the greatest securities of the life, liberty, and property of the citizen.

Right of search and seizure regulated.

XIV. Every subject has a right to be secure from all unreasonable searches and seizures of his person, his houses, his papers, and all his possessions. All warrants, therefore, are contrary to this right, if the cause or foundation of them be not previously supported by oath or affirmation; and if the order in the warrant to a civil officer, to make search in suspected places, or to arrest one or more suspected persons, or to seize their property, be not accompanied with a special designation of the persons or objects of search, arrest, or seizure; and no warrant ought to be issued but in cases, and with the formalities, prescribed by the laws.

Right to trial by jury sacred, except, &c.

XV In all controversies concerning property, and in all suits between two or more persons, except in cases in which it has heretofore been otherways used and practised, the parties have a right to a trial by jury; and this method of procedure shall be held sacred, unless, in causes arising on the high seas, and such as relate to mariners' wages, the legislature shall hereafter find it necessary to alter it.

Liberty of the press.

XVI. The liberty of the press is essential to the security of freedom in a state: it ought not, therefore, to be restrained in this Commonwealth.

Right to keep and bear arms. Standing armies, dangerous. Military power subordinate to civil.

XVII. The people have a right to keep and to bear arms for the common defence: and, as in time of peace, armies are dangerous to liberty, they ought not to be maintained without the consent of the legislature; and the military power shall always be held in an exact subordination to the civil authority, and be governed by it.

Moral qualifications for office. Moral obligations of lawgivers and magistrates.

XVIII. A frequent recurrence to the fundamental principles of the constitution, and a constant adherence to those of piety, justice, moderation, temperance, industry, and frugality, are absolutely necessary to preserve the advantages of liberty, and to maintain a free government. The people ought, consequently, to have a particular attention to all those principles, in the choice of their officers and representatives: and they have a right to require of their lawgivers and magistrates, an exact and constant observance of them, in the formation and execution of the laws necessary for the good administration of the Commonwealth.

Right of people to instruct representatives and petition legislature.

The people have a right, in an orderly and peace-

able manner, to assemble to consult upon the common good; give instructions to their representatives; and to request of the legislative body, by the way of addresses, petitions, or remonstrances, redress of the wrongs done them, and of the grievances they suffer.

Power to suspend the laws or their execution.

XX. The power of suspending the laws, or the execution of the laws, ought never to be exercised but by the legislature, or by authority derived from it, to be exercised in such particular cases only as the legislature shall expressly provide for.

Freedom of debate, &c., and reason thereof.

XXI. The freedom of deliberation, speech and debate, in either house of the legislature, is so essential to the rights of the people that it cannot be the foundation of any accusation or prosecution, action or complaint, in any other court or place whatsoever.

Frequent sessions, and objects thereof.

XXII. The legislature ought frequently to assemble for the redress of grievances, for correcting, strengthening, and confirming the laws, and for making new laws, as the common good may require.

Taxation founded on consent.

XXIII. No subsidy, charge, tax, impost, or duties, ought to be established, fixed, laid, or levied, under any pretext whatsoever, without the consent of the people or their representatives in the legislature.

Ex post facto laws prohibited.

XXIV. Laws made to punish for actions done before the existence of such laws, and which have not been declared crimes by preceding laws, are unjust, oppressive, and inconsistent with the fundamental principles of a free government.

Legislature not to convict of treason, &c.

XXV. No subject ought, in any case, or in any time, to be declared guilty of treason or felony by the legislature.

Excessive bail or fines and cruel punishments, prohibited.

XXVI. No magistrate or court of law shall demand excessive bail or sureties, impose excessive fines, or inflict cruel or unusual punishments.

No soldier to be quartered in any house, unless, &c.

XXVII. In time of peace, no soldier ought to be quartered in any house without the consent of the owner; and in time of war, such quarters ought not to be made but by the civil magistrate, in a manner ordained by the legislature.

Citizens exempt from law-martial, unless, &c.

XXVIII. No person can in any case be subjected to law-martial, or to any penalties or pains, by virtue of that law, except those employed in the army or navy, and except the militia in actual service, but by authority of the legislature.

Judges of supreme judicial courts. Tenure of their office. Salaries.

XXIX. It is essential to the preservation of the rights of every individual, his life, liberty, property and character, that there be an impartial interpretation of the laws, and administration of justice. It is the right of every citizen to be tried by judges as free, impartial and independent, as the lot of humanity will admit. It is therefore not only the best policy, but for the security of the rights of the people, and of every citizen, that the judges of the supreme judicial court should hold their offices as long as they behave themselves well; and that they should have honorable salaries ascertained and established by standing laws.

Separation of executive, judicial and legislative departments.

XXX. In the government of this Commonwealth, the legislative department shall never exercise the executive and judicial powers, or either of them: the executive shall never exercise the legislative and judicial powers, or either of them: the judicial shall never exercise the legislative and executive powers, or either of them: to the end it may be a government of laws and not of men.

PART THE SECOND.

The Frame of Government.

The people, inhabiting the territory formerly called the Province of Massachusetts Bay, do hereby solemnly and mutually agree with each other, to form themselves into a free, sovereign, and independent body politic or state, by the name of THE COMMONWEALTH OF MASSACHUSETTS.

CHAPTER I.

THE LEGISLATIVE POWER.

SECTION I.

The General Court.

Legislative department.

Art. I. The department of legislation shall be formed by two branches, a Senate and House of Representatives; each of which shall have a negative on the other.

See amendments, Art. X.

The legislative body shall assemble every year, on the last Wednesday in May, and at such other times as they shall judge necessary; and shall dissolve and be dissolved on the day next preceding the said last Wednesday in May; and shall be styled, THE GENERAL COURT OF MASSACHUSETTS.

Governor's veto. Bill may be passed by two thirds of each house notwithstanding.

II. No bill or resolve of the senate or house of representatives shall become a law, and have force as such, until it shall have been laid before the governor for his revisal: and if he, upon such revision, approve thereof, he shall signify his approbation by signing the same. But if he have any objection to the passing of such bill or resolve, he shall return the same, together with his objections thereto, in writing, to the senate or house of representatives, in whichsoever the same shall have originated; who shall enter the objections sent down by the governor, at large, on their records, and proceed to reconsider the said bill or resolve: but if, after such reconsideration, two thirds of the said senate or house of representatives shall, notwithstanding the said objections, agree to pass the same, it shall together with the objections, be sent to the other branch of the legislature, where it shall also be reconsidered, and if approved by two thirds of the members present, shall have the force of a law: but in all such cases, the votes of both houses shall be determined by yeas and nays; and the names of the persons voting for, or against, the said bill or resolve, shall be entered upon the public records of the Commonwealth.

See amendments, Art. I.

And in order to prevent unnecessary delays, if any bill or resolve shall not be returned by the governor, within five days after it shall have been presented, the same shall have the force of a law.

General court may constitute judicatories, courts of record, &c. Courts, &c., may administer oaths.

III. The general court shall forever have full power and authority to erect and constitute judicatories and courts of record, or other courts, to be held in the name of the Commonwealth, for the hearing, trying, and determining of all manner of crimes, offences, pleas, processes, plaints, actions, matters, causes and things, whatsoever, arising or happening within the Commonwealth, or between or concerning persons inhabiting, or residing, or brought within the same; whether the same be criminal or civil, or whether the said crimes be capital or not capital, and whether the said pleas be real, personal, or mixt; and for the awarding and making out of execution thereupon: to which courts and judicatories are hereby given and granted full power and authority, from time to time, to administer oaths or affirmations, for the better discovery of truth in any matter in controversy, or depending before them.

General court may enact laws, &c. not repugnant to the constitution; may provide for the election or appointment of officers; prescribe their duties; impose taxes; duties and excises; to be disposed of for defence, protection, &c.

IV. And further, full power and authority are hereby given and granted to the said general court, from time to time, to make, ordain, and establish, all manner of wholesome and reasonable orders, laws, statutes, and ordinances, directions and instructions, either with penalties or without; so as the same be not repugnant or contrary to this constitution, as they shall judge to be for the good and welfare of this Commonwealth, and for the government and ordering thereof, and of the subjects of the same, and for the necessary support and defence of the government thereof; and to name and settle annually, or provide by fixed laws, for the naming and settling all civil officers within the said Commonwealth, the election and constitution of whom are not hereafter in this form of government otherwise provided for; and to set forth the several duties, powers and limits, of the several civil and military officers of this Commonwealth, and the forms of such oaths or affirmations as shall be respectively administered unto them for the execution of their several offices and places, so as the same be not repugnant or contrary to this constitution; and to impose and levy proportional and reasonable assessments, rates, and taxes, upon all the inhabitants of, and persons resident, and estates lying, within the said Commonwealth; and also to impose, and levy reasonable duties and excises, upon any produce, goods, wares, merchandize, and commodities whatsoever, brought into, produced, manufactured, or being within the same; to be issued and disposed of by warrant, under the hand of the governor of this Commonwealth for the time being, with the advice and consent of the council, for the public service, in the necessary defence and support of the government of the said Commonwealth, and the protection and preservation of the subjects thereof, according to such acts as are or shall be in force within the same.

Valuation of estates, once in ten years, at least, while, &c.

And while the public charges of government, or any part thereof, shall be assessed on polls and estates, in the manner that has hitherto been practised, in order that such assessments may be made with equality, there shall be a valuation of estates within the Commonwealth taken anew once in every ten years at least, and as much oftener as the general court shall order.

CHAPTER I,

SECTION II.

Senate.

Senate, number of, and by whom elected.

Art. I. There shall be annually elected, by the freeholders and other inhabitants of this Commonwealth, qualified as in this constitution is provided, forty persons to be counsellors and senators, for the year ensuing their election; to be chosen by the inhabitants of the districts, into which the Commonwealth may from time to time be divided by the general court for that purpose: and the general court, in assigning the numbers to be elected by the respective districts shall govern themselves by the proportion of the public taxes paid by the said districts; and timely make known, to the inhabitants of the Commonwealth, the limits of each district, and the number of counsellors and senators to be chosen therein; provided, that the number of such districts shall never be less than thirteen; and that no district be so large as to entitle the same to choose more than six senators.

Counties to be districts until, &c.

And the several counties in this Commonwealth shall, until the general court shall determine it necessary to alter the said districts, be districts for the choice of counsellors and senators, (except that the counties of Dukes county and Nantucket shall form one district for that purpose) and shall elect the following number for counsellors and senators, viz:

Suffolk	six	York	two
Essex	six	Dukes county and Nantucket	one
Middlesex	five		
Hampshire	four	Worcester	five
Plymouth	three	Cumberland	one
Barnstable	one	Lincoln	one
Bristol	three	Berkshire	two

Manner and time of choosing senators and counsellors. See amendments, art. II. and X. See amendments, art. III. Word "inhabitant" defined.

II. The senate shall be the first branch of the legislature; and the senators shall be chosen in the following manner, viz: there shall be a meeting on the first Monday in April annually, forever, of the inhabitants of each town in the several counties of this Commonwealth, to be called by the selectmen, and warned in due course of law, at least seven days before the first Monday in April, for the purpose of electing persons to be senators and counsellors; and at such meetings every male inhabitant of twenty one years of age and upwards, having a freehold estate, within the Commonwealth of the annual income of three pounds, or any estate of the value of sixty pounds, shall have a right to give in his vote for the senators for the district of which he is an inhabitant. And to remove all doubts concerning the meaning of the word "inhabitant," in this constitution, every person shall be considered as an inhabitant, for the purpose of electing

every district of the Commonwealth; and in like manner all vacancies in the senate, arising by death, removal out of the state, or otherwise, shall be supplied as soon as may be after such vacancies shall happen.

Qualifications of a senator.

V. Provided, nevertheless, that no person shall be capable of being elected as a senator, who is not seized in his own right of a freehold within this Commonwealth, of the value of three hundred pounds at least, or possessed of personal estate to the value of six hundred pounds at least, or of both to the amount of the same sum, and who has not been an inhabitant of this Commonwealth for the space of five years immediately preceding his election, and, at the time of his election, he shall be an inhabitant in the district, for which he shall be chosen.

Senate not to adjourn more than two days.

VI. The senate shall have power to adjourn themselves, provided such adjournments do not exceed two days at a time.

Shall choose its officers and establish its rules.

VII. The senate shall choose its own president, appoint its own officers, and determine its own rules of proceeding.

Shall try all impeachments. Oath. Limitation of sentence.

VIII. The senate shall be a court with full authority to hear and determine all impeachments made by the house of representatives, against any officer or officers of the Commonwealth, for misconduct and mal-administration in their offices: but, previous to the trial of every impeachment, the members of the senate shall respectively be sworn, truly and impartially to try and determine the charge in question, according to evidence. Their judgment, however, shall not extend further than to removal from office and disqualification to hold or enjoy any place of honor, trust, or profit, under this Commonwealth: but the party, so convicted, shall be, nevertheless, liable to indictment, trial, judgment and punishment, according to the laws of the land.

Quorum.

IX. Not less than sixteen members of the senate shall constitute a quorum for doing business.

CHAPTER I.

SECTION III.

House of Representatives.

Representation of the people.

Article I. There shall be, in the Legislature of this Commonwealth, a representation of the people, annually elected, and founded upon the principle of equality.

Representatives by whom chosen.

II. And in order to provide for a representation of the citizens of this Commonwealth founded upon the principle of equality, every corporate town, containing one hundred and fifty ratable polls, may elect one representative; every corporate town, containing three hundred and seventy five ratable polls, may elect two representatives; every corporate town, containing six hundred ratable polls, may elect three representatives; and proceeding in that manner, making two hundred and twenty five ratable polls the mean increasing number for every additional representative.

Proviso as to towns having less than 150 ratable polls.

Provided, nevertheless, that each town now incorporated, not having one hundred and fifty ratable polls, may elect one representative; but no place shall hereafter be incorporated with the privilege of electing a representative, unless there are within the same one hundred and fifty ratable polls.

Towns liable to fine in case, &c.

And the house of representatives shall have power, from time to time, to impose fines upon such towns as shall neglect to choose and return members to the same, agreeably to this constitution.

Expense of travelling to and from the general court, how paid.

The expenses of travelling to the general assembly, and returning home, once in every session, and no more, shall be paid by the government, out of the public treasury, to every member who shall attend as seasonably as he can in the judgment of the house, and does not depart without leave.

Qualifications of a representative.

III. Every member of the house of representatives shall be chosen by written votes; and for one year at least next preceding his election, shall have been an inhabitant of, and have been seized in his own right of, a freehold of the value of one hundred pounds, within the town he shall be chosen to represent, or any ratable estate to the value of two hundred pounds; and he shall cease to represent the said town, immediately on his ceasing to be qualified as aforesaid.

Qualifications of a voter. See amendments, Art. III.

IV. Every male person, being twenty one years of age, and resident in any particular town in this Commonwealth, for the space of one year next preceding, having a freehold estate within the same town, of the annual income of three pounds, or any estate of the value of sixty pounds, shall have a right to vote in the choice of a representative or representatives for the said town.

Representatives, when chosen. See amendment, Art. X.

V. The members of the house of representatives shall be chosen annually in the month of May, ten days at least before the last Wednesday of that month.

House alone can impeach.

VI. The house of representatives shall be the grand inquest of this Commonwealth; and all impeachments made by them shall be heard and tried by the senate.

House to originate all money bills.

VII. All money bills shall originate in the house of representatives; but the senate may propose or concur with amendments, as on other bills.

Not to adjourn more than two days.

VIII. The house of representatives shall have power to adjourn themselves; provided such adjournment shall not exceed two days at a time.

Quorum.

IX. Not less than sixty members of the house of representatives shall constitute a quorum for doing business.

House to judge of returns, &c. of its own members. To choose its officers, &c. May punish for certain offences.

X. The house of representatives shall be judge of the returns, elections, and qualifications of its own members as pointed out in the constitution; shall choose their own speaker; appoint their own officers, and settle the rules and orders of proceeding in their own house. They shall have authority to punish by imprisonment, every person, not a member, who shall be guilty of disrespect to the house, by any disorderly, or contemptuous behaviour, in its presence; or who, in the town where the general court is sitting, and during the time of its sitting, shall threaten harm to the body or estate of any of its members, for anything said or done in the house; or who shall assault any of them therefor; or who shall assault, or arrest, any witness, or other person ordered to attend the house, in his way in going, or returning; or who shall rescue any person arrested by the order of the house.

Privileges of members.

And no member of the house of representatives shall be arrested, or held to bail on mean process, during his going unto, returning from, or his attending, the general assembly.

Governor and council may punish. General limitation.

XI. The senate shall have the same powers in the like cases; and the governor and council shall have the same authority to punish in like cases: provided, that no imprisonment, on the warrant or order of the governor, council, senate, or house of representatives, for either of the above described offences, be for a term exceeding thirty days.

Trial may be by committee, or otherwise.

And the senate and house of representatives may try, and determine, all cases where their rights and privileges are concerned, and which, by the constitution, they have authority to try and determine, by committees of their own members, or in such other way as they may respectively think best.

CHAPTER II.

EXECUTIVE POWER.

SECTION I.

Governor.

Governor. His title.

Art. I. There shall be a supreme executive magistrate, who shall be styled, THE GOVERNOR OF THE COMMONWEALTH OF MASSACHUSETTS; and whose title shall be—HIS EXCELLENCY.

To be chosen annually. Qualifications. See amendments, Art. VII.

II. The governor shall be chosen annually; and no person shall be elegible to this office, unless, at the time of his election, he shall have been an inhabitant of this Commonwealth for seven years next preceding, and unless he shall, at the same time, be seized, in his own right, of a freehold within the Commonwealth, of the value of one thousand pounds; and unless he shall declare himself to be of the christian religion.

By whom chosen, if he have a majority of votes. See amendments, Art. II. and X. How chosen when no person has a majority.

III. Those persons, who shall be qualified to vote for senators and representatives, within the several towns of this Commonwealth, shall, at a meeting, to be called for that purpose, on the first Monday of April annually, give in their votes for a governor, to the selectmen, who shall preside at such meetings; and the town clerk, in the presence and with the assistance of the selectmen, shall, in open town meeting, sort and count the votes, and form a list of the persons voted for, with the number of votes for each person against his name; and shall make a fair record of the same in the town books, and a public declaration thereof in the said meeting; and shall in the presence of the inhabitants, seal up copies of the said list, attested by him and the selectmen, and transmit the same to the sheriff of the county, thirty days at least before the last Wednesday in May; and the sheriff shall transmit the same to the secretary's office seventeen days at least before the said last Wednesday in May; or the selectmen may cause returns of the same to be made to the office of the secretary of the Commonwealth seventeen days at least before the said day; and the secretary shall lay the same before the senate and house of representatives, on the last Wednesday in May, to be by them examined; and in case of an election by a majority of all the votes returned, the choice shall be by them declared and published; but if no person shall have a majority of votes the house of representatives shall, by ballot, elect two out of four persons, who had the highest number of votes, if so many shall have been voted for; but, if otherwise, out of the number voted for; and make return to the senate of the two persons so elected; on which, the senate shall proceed, by ballot, to elect one, who shall be declared governor.

Power of governor, and of governor and council.

IV. The governor shall have authority, from time to time, at his discretion, to assemble and call together the counsellors of this Commonwealth for the time being; and the governor, with the said counsellors, or five of them at least, shall, and may, from time to time, hold and keep a council, for the ordering and directing the affairs of the Commonwealth, agreeably to the constitution and the laws of the land.

Same subject. See amendments, art. X.

V. The Governor, with advice of council, shall have full power and authority, during the session of the general court, to adjourn or prorogue the same to any time the two houses shall desire; and to dissolve the same on the day next preceding the last Wednesday in May; and, in the recess of the said court, to prorogue the same from time to time, not exceeding ninety days in any one recess: and to call it together sooner than the time to which it may be adjourned or prorogued, if the welfare of the Commonwealth shall require the same; and in case of any infectious distemper prevailing in the place where the said court is next at any time to convene, or any other cause happening, whereby danger may arise to the health or lives of the members from their attendance, he may direct the session to be held at some other the most convenient place within the state.

See amendments, Art. X.

And the governor shall dissolve the said general court on the day next preceding the last Wednesday in May.

Governor and council may adjourn general court, in cases, &c., but not exceeding 90 days.

VI. In cases of disagreement between the two houses, with regard to the necessity, expediency or time of adjournment, or prorogation, the governor, with advice of the council, shall have a right to adjourn or prorogue the general court, not exceeding ninety days, as he shall determine the public good shall require.

Governor to be commander in chief.

VII. The governor of this Commonwealth, for the time being, shall be the commander in chief of the army and navy, and of all the military forces of the state by sea and land; and shall have full power, by himself, or by any commander, or other officer or officers, from time to time, to train, instruct, exercise and govern the militia and navy; and, for the special defence and safety of the Commonwealth, to assemble in martial array, and put in warlike posture, the inhabitants thereof, and to lead and conduct them, and with them, to encounter, repel, resist, expel and pursue, by force of arms, as well by sea as by land, within or without the limits of this Commonwealth, and also to kill, slay and destroy, if necessary, and conquer, by all fitting ways, enterprizes and means whatsoever, all and every such person, and persons as shall, at any time hereafter, in a hostile manner, attempt or enterprize the destruction, invasion, detriment, or annoyance of this Commonwealth; and to use and exercise, over the army and navy, and over the militia in actual service, the law martial, in time of war or invasion, and also in time of rebellion, declared by the legislature to exist, as occasion shall necessarily require; and to take and surprize by all ways and means whatsoever, all and every such person or persons, with their ships, arms, ammunition and other goods, as shall in a hostile manner, invade, or attempt the invading, conquering, or annoying this Commonwealth; and that the governor be intrusted with all these and other powers, incident to the offices of captain general and commander in chief, and admiral to be exercised agreeably to the rules and regulations of the constitution, and the laws of the land, and not otherwise.

Limitation.

Provided, that the said governor shall not, at any time hereafter, by virtue of any power by this Constitution granted, or hereafter to be granted to him by the legislature, transport any of the inhabitants of this Commonwealth, or oblige them to march out of the limits of the same, without their free and voluntary consent, or the consent of the general court; except so far as may be necessary to march or transport them by land or water, for the defence of such part of the state to which they cannot otherwise conveniently have access.

Governor and council may pardon offences, except, &c. But not before conviction.

VIII. The power of pardoning offences, except such as persons may be convicted of before the senate, by an impeachment of the house, shall be in the governor, by and with the advice of council: but no charter of pardon, granted by the governor, with advice of the council before conviction, shall avail the party pleading the same, notwithstanding any general or particular expressions contained therein, descriptive of the offence, or offences intended to be pardoned.

All judicial officers, &c. how nominated and appointed.

IX. All judicial officers, the attorney general, the solicitor general, all sheriffs, coroners, and registers of probate, shall be nominated and appointed by the governor, by and with the advice and consent of the council; and every such nomination shall be made by the governor, and made at least seven days prior to such appointment.

Militia officers, how elected. See amendments, Art. V. How commissioned.

X. The captains and subalterns of the militia shall be elected by the written votes of the train band and alarm list of their respective companies, of twenty-one years of age and upwards; the field officers of regiments shall be elected by the written votes of the captains and subalterns of their respective regiments; the brigadiers shall be elected in like manner, by the field officers of their respective brigades; and such officers, so elected, shall be commissioned by the governor, who shall determine their rank.

The Legislature shall, by standing laws, direct the time and manner of convening the electors, and of collecting votes, and of certifying to the governor the officers elected.

Major Generals, how appointed and commissioned.

The major generals shall be appointed by the senate and house of representatives, each having a negative upon the other; and be commissioned by the governor.

Vacancies how filled, in case, &c.

And if the electors of brigadiers, field officers, captains or subalterns, shall neglect or refuse to make such elections, after being duly notified, according to the laws for the time being, then the governor, with advice of council, shall appoint suitable persons to fill such offices.

Officers duly commissioned, how removed. See amendments, Art. IV.

And no officer, duly commissioned to command in the militia shall be removed from his office, but by the address of both houses to the governor, or by fair trial in court martial, pursuant to the laws of the Commonwealth for the time being.

Adjutants, &c. how appointed.

The commanding officers of regiments shall appoint their adjutants and quarter masters; the brigadiers their brigade majors; and the major generals their aids; and the governor shall appoint the adjutant general.

The governor, with advice of council, shall appoint all officers of the continental army, whom by the confederation of the United States it is provided that this Commonwealth shall appoint,—as also all officers of forts and garrisons.

Organization of militia.

The divisions of the militia into brigades, regiments and companies, made in pursuance of the militia laws now in force, shall be considered as the proper divisions of the militia of this Commonwealth, until the same shall be altered in pursuance of some future law.

Money, how drawn from the treasury, except, &c.

XI. No monies shall be issued out of the treasury of this Commonwealth and disposed of (except such sums as may be appropriated for the redemption of bills of credit or treasurer's notes, or for the payment of interest arising thereon) but by warrant under the hand of the governor for the time being, with the advice and consent of the council, for the necessary defence and support of the Commonwealth; and for the protection and preservation of the inhabitants thereof, agreeably to the acts and resolves of the general court.

All public boards, &c. to make quarterly returns.

XII. All public boards, the commissary general, all superintending officers of public magazines and stores belonging to this Commonwealth, and all commanding officers of forts and garrisons within the same, shall, once in every three months, officially and without requisition, and at other times, when required by the governor, deliver to him an account of all goods, stores, provisions, ammunition, cannon with their appendages, and small arms with their accoutrements, and of all other public property whatever under their care respectively; distinguishing the quantity, number, quality and kind of each, as particularly as may be; together with the condition of such forts and garrisons; and the said commanding officer shall exhibit to the governor, when required by him, true and exact plans of such forts and of the land and sea, or harbor or harbors, adjacent.

And the said boards, and all public officers, shall communicate to the governor, as soon as may be after receiving the same, all letters, dispatches, and intelligences of a public nature, which shall be directed to them respectively.

Salary of governor.

XIII. As the public good requires that the governor should not be under the undue influence of any of the members of the general court, by a dependence on them for his support—that he should, in all cases, act with freedom for the benefit of the public—that he should not have his attention necessarily diverted from that object to his private concerns—and that he should maintain the dignity of the Commonwealth in the character of its chief magistrate—it is necessary that he should have an honorable stated salary, of a fixed and permanent value, amply sufficient for those purposes, and established by standing laws: and it shall be among the first acts of the general court, after the commencement of this constitution, to establish such salary by law accordingly.

Salaries of justices of supreme judicial court.

Permanent and honorable salaries shall also be established by law for the justices of the supreme judicial court.

Salaries to be enlarged, if insufficient.

And if it shall be found, that any of the salaries aforesaid, so established, are insufficient, they shall, from time to time, be enlarged, as the general court shall judge proper.

power and authority, to do, and execute, all and every such acts, matters and things, as the governor, or the lieutenant governor, might or could, by virtue of this constitution, do or execute, if they, or either of them, were personally present.

Elections, may be adjourned, until, &c. Order thereof.

VII. And whereas the elections appointed to be made by this constitution, on the last Wednesday in May annually, by the two houses of the legislature, may not be completed on that day, the said elections may be adjourned from day to day until the same shall be completed; And the order of elections shall be as follows; the vacancies in the senate, if any, shall first be filled up; the governor and lieutenant governor shall then be elected, provided there should be no choice of them by the people; and afterwards the two houses shall proceed to the election of the council.

CHAPTER II.

SECTION IV.

Secretary, Treasurer, Commissary, &c.

Secretary, &c. by whom and how chosen. See amendments, Art. IV. Treasurer ineligible for more than five successive years.

Art. I. The secretary, treasurer and receiver general, and the commissary general, notaries public, and naval officers, shall be chosen annually by joint ballot of the senators and representatives in one room; and, that the citizens of this Commonwealth may be assured, from time to time, that the monies remaining in the public treasury, upon the settlement and liquidation of the public accounts, are their property, no man shall be elegible as treasurer and receiver general more than five years successively.

Secretary to keep records, to attend the governor and council, &c.

II. The records of the Commonwealth shall be kept in the office of the secretary, who may appoint his deputies, for whose conduct he shall be accountable, and he shall attend the governor and council, the senate and house of representatives, in person, or by his deputies, as they shall respectively require.

CHAPTER III.

JUDICIARY POWER.

Tenure of all commissioned officers to be expressed. Judicial officers to hold office during good behavior, except, &c. But may be removed on address.

Art. I. The tenure, that all commission officers shall by law have in their offices, shall be expressed in their respective commissions. All judicial officers, duly appointed, commissioned and sworn, shall hold their offices during good behavior, excepting such concerning whom there is different provision made in this constitution: provided, nevertheless, the governor, with consent of the council, may remove them upon the address of both houses of the legislature.

Justices of supreme judicial court to give opinions when required.

II. Each branch of the legislature, as well as the governor and council, shall have authority to require the opinions of the justices of the supreme judicial court, upon important questions of law, and upon solemn occasions.

Justices of the peace; tenure of their office.

III. In order that the people may not suffer from the long continuance in place of any justice of the peace, who shall fail of discharging the important duties of his office with ability or fidelity, all commissions of justices of the peace shall expire and become void, in the term of seven years from their respective dates; and, upon the expiration of any commission, the same may, if necessary, be renewed, or another person appointed, as shall most conduce to the well being of the Commonwealth.

Provisions for holding probate courts.

IV. The judges of probate of wills, and for granting letters of administration, shall hold their courts at such place or places, on fixed days, as the convenience of the people shall require; and the legislature shall from time to time, hereafter appoint such times and places; until which appointments, the said courts shall be holden at the time and places which the respective judges shall direct.

Provisions for determining causes of marriage, divorce, &c.

V. All causes of marriage, divorce and alimony, and all appeals from the judges of probate, shall be heard and determined by the governor and council, until the legislature shall, by law, make other provision.

CHAPTER IV.

DELEGATES TO CONGRESS.

The delegates of this Commonwealth to the congress of the United States shall, some time in the month of June annually, be elected by the joint ballot of the senate and house of representatives, assembled together in one room; to serve in congress for one year, to commence on the first Monday in November then next ensuing. They shall have commissions under the hand of the governor, and the great seal of the Commonwealth; but may be recalled at any time within the year, and others chosen and commissioned, in the same manner, in their stead.

CHAPTER V.

THE UNIVERSITY AT CAMBRIDGE, AND THE ENCOURAGEMENT OF LITERATURE, &c.

SECTION I.

The University.

Harvard-College. Powers, privileges, &c. of the president and fellows confirmed.

Art. I. Whereas our wise and pious ancestors, so early as the year one thousand six hundred and thirty six, laid the foundation of Harvard College, in which university many persons of great eminence have, by the blessing of GOD, been initiated in those arts and sciences, which qualified them for public employments, both in church and state; and whereas the encouragement of arts and sciences, and all good literature, tends to the honor of GOD, the advantage of the christian religion, and the great benefit of this, and the other United States of America—it is declared, that the PRESIDENT and FELLOWS of HARVARD COLLEGE, in their corporate capacity, and their successors in that capacity, their officers and servants, shall have, hold, use, exercise and enjoy, all the powers, authorities, rights, liberties, privileges, immunities and franchises, which they now have or are entitled to have, hold, use exercise and enjoy; and the same are hereby ratified and confirmed unto them, the said president and fellows of Harvard College, and to their successors, and to their officers and servants, respectively, forever.

All gifts, grants, &c. confirmed.

II. And whereas there have been, at sundry times, by divers persons, gifts, grants, devises of houses, lands, tenements, goods, chattels, legacies and conveyances, heretofore made, either to Harvard College in Cambridge, in New-England, or to the president and fellows of Harvard College, or to the said college, by some other description, under several charters successively; it is declared, that all the said gifts, grants, devises, legacies and conveyances, are hereby forever confirmed upon the president and fellows of Harvard College and to their successors, in the capacity aforesaid, according to the true intent and meaning of the donor or donors, grantor or grantors, devisor or devisors.

Who shall be overseers, Power of alteration, reserved to the legislature.

III. And whereas by an act of the general court of the colony of Massachusetts Bay, passed in the year one thousand six hundred and forty-two, the governor and deputy governor, for the time being, and all the magistrates of that jurisdiction, were, with the president, and a number of the clergy in the said act described, constituted the overseers of Harvard College; and it being necessary, in this new constitution of government, to ascertain who shall be deemed successors to the said governor, deputy governor, and magistrates; it is declared, that the governor, lieutenant governor, council and senate of this Commonwealth, are, and shall be deemed, their successors; who, with the president of Harvard College, for the time being, together with the ministers of the congregational churches in the towns of Cambridge, Watertown, Charlestown, Boston, Roxbury, and Dorchester, mentioned in the said act, shall be and hereby are, vested with all the powers and authority belonging, or in any way appertaining to the overseers of Harvard College; provided, that nothing herein shall be construed to prevent the legislature of this Commonwealth from making such alterations in the government of the said university,

at shall be conducive to its advantage, and the interest of the republic of letters, in as full a manner as might have been done by the legislature of the late province of Massachusetts Bay.

CHAPTER V.

SECTION II.

The encouragement of literature, &c.

Duty of legislature and magistrates in all future periods.

Wisdom, and knowledge, as well as virtue, diffused generally among the body of the people, being necessary for the preservation of their rights and liberties; and as these depend on spreading the opportunities and advantages of education in the various parts of the country, and among the different orders of the people, it shall be the duty of legislatures and magistrates, in all future periods of this Commonwealth, to cherish the interests of literature and the sciences, and all the seminaries of them; especially the university at Cambridge, public schools, and grammar schools in the towns; to encourage private societies, and public institutions, rewards and immunities, for the promotion of agriculture, arts, sciences, commerce, trades, manufactures, and a natural history of the country; to countenance and inculcate the principles of humanity and general benevolence, public and private charity, industry and frugality, honesty and punctuality in their dealings; sincerity, good humor, and all social affections, and generous sentiments among the people.

CHAPTER VI.

OATHS AND SUBSCRIPTIONS; INCOMPATIBILITY OF AND EXCLUSION FROM OFFICES: PECUNIARY QUALIFICATIONS; COMMISSIONS; WRITS; CONFIRMATION OF LAWS; HABEAS CORPUS; THE ENACTING STYLE; CONTINUANCE OF OFFICERS; PROVISION FOR A FUTURE REVISAL OF THE CONSTITUTION, &C.

Art. I. Any person chosen governor, lieutenant governor, counsellor, senator or representative, and accepting the trust, shall, before he proceed to execute the duties of his place or office, make and subscribe the following declaration, viz:

See amendments, Art. VII.

"I, A. B. do declare, that I believe the christian religion and have a firm persuasion of its truth; and that I am seized and possessed in my own right, of the property required by the constitution, as one qualification for the office or place to which I am elected."

And the governor, lieutenant governor, and counsellors shall make and subscribe the said declaration, in the presence of the two houses of assembly; and the senators and representatives, first elected under this constitution, before the president and five of the council of the former constitution, and, forever afterwards, before the governor and council for the time being.

And every person, chosen to either of the places or offices aforesaid, as also any person appointed or commissioned to any judicial, executive, military, or other office under the government, shall, before he enters on the discharge of the business of his place or office, take and subscribe the following declaration, and oaths or affirmations, viz.—

See amendments, art. VI.

"I, A. B. do truly and sincerely acknowledge, profess, testify and declare, that the Commonwealth of Massachusetts is, and of right ought to be, a free, sovereign and independent state; and I do swear, that I will bear true faith and allegiance to the said Commonwealth, and that I will defend the same against traitorous conspiracies and all hostile attempts whatsoever; and that I do renounce and abjure all allegiance, subjection and obedience to the king, queen or government of Great Britain, (as the case may be) and every other foreign power whatsoever; and that no foreign prince, person, prelate, state or potentate, hath or ought to have, any jurisdiction, superiority, pre-eminence, authority, dispensing or other power, in any matter, civil, ecclesiastical or spiritual, within this Commonwealth; except the authority and power which is or may be vested by their constituents in the congress of the United States; and I do further testify and declare, that no man or body of men hath or can have any right to absolve or discharge me from the obligation of this oath, declaration or affirmation; and that I do make this acknowledgement, profession, testimony, declaration, denial, renunciation and abjuration, heartily and truly, according to the common meaning and acceptation of the foregoing words without any equivocation, mental evasion, or secret reservation whatsoever. So help me GOD."

"I, A. B. do solemnly swear and affirm, that I will faithfully and impartially discharge and perform all the duties incumbent on me as

; according to the best of my abilities and understanding, agreeably to the rules and regulations, of the constitution and the laws of the Commonwealth." "So help me GOD."

Provided always, that when any person, chosen or appointed as aforesaid, shall be of the denomination of the people called Quakers, and shall decline taking the said oaths, he shall make his affirmation in the foregoing form, and subscribe the same, omitting the words "*I do swear*," "*and abjure*," "*oath or*," "*and abjuration*," in the first oath; and in the second oath, the words "*swear and;*" and in each of them the words "*So help me GOD;*" subjoining instead thereof, "*This I do under the pains and penalties of perjury.*"

And the said oaths or affirmations shall be taken and subscribed by the governor, lieutenant governor, and counsellors, before the president of the senate, in the presence of the two houses of assembly; and by the senators and representatives first elected under this constitution, before the president and five of the council of the former constitution; and forever afterwards before the governor and council for the time being; and by the residue of the officers aforesaid, before such persons, and in such manner, as from time to time shall be prescribed by the legislature.

Plurality of offices prohibited to governor, &c., except, &c.

II. No governor, lieutenant governor, or judge of the supreme judicial court, shall hold any other office or place, under the authority of this Commonwealth, except such as by this constitution they are admitted to hold, saving that the judges of the said court may hold the offices of justices of the peace through the state; nor shall they hold any other place or office, or receive any pension or salary from any other state or government or power whatever.

Same subject.

No person shall be capable of holding or exercising at the same time, within this state more than one of the following offices, viz: judge of probate—sheriff—register of probate—or register of deeds; and never more than any two offices, which are to be held by appointment of the governor, or the governor and council, or the senate, or the house of representatives, or by the election of the people of the state at large, or of the people of any county, military offices, and the offices of justices of the peace excepted, shall be held by one person.

Incompatible offices. See amendments, Art. VIII.

No person holding the office of judge of the supreme judicial court—secretary—attorney general—solicitor general—treasurer or receiver general—judge of probate—commissary general—president, professor, or instructor of Harvard College—sheriff—clerk of the house of representatives—register of probate—register of deeds—clerk of the supreme judicial court—clerk of the inferior court of common pleas—or officer of the customs, including in this description naval officers—shall at the same time have a seat in the senate or house of representatives; but their being chosen or appointed to, and accepting the same, shall operate as a resignation of their seat in the senate or house of representatives; and the place so vacated shall be filled up.

Same subject.

And the same rule shall take place in case any judge of the said supreme judicial court, or judge of probate, shall accept a seat in council; or any counsellor shall accept of either of those offices or places.

Bribery, &c., operates disqualification.

And no person shall ever be admitted to hold a seat in the legislature or any office of trust or importance under the government of this Commonwealth, who shall, in the due course of law, have been convicted of bribery or corruption, in obtaining an election or appointment.

Value of money ascertained. Property qualifications may be increased.

III. In all cases, where sums of money are mentioned in this constitution, the value thereof shall be computed in silver at six shillings and eight pence per ounce; and it shall be in the power of the legislature, from time to time, to increase such qualifications, as to property, of the persons to be elected to offices, as the circumstances of the Commonwealth shall require.

Provisions respecting commissions.

IV. All commissions shall be in the name of the Commonwealth of Massachusetts, signed by the governor, and attested by the secretary or his deputy, and have the great seal of the Commonwealth affixed thereto.

Provisions respecting writs.

V. All writs, issuing out of the clerk's office in any of the courts of law, shall be in the name of the Commonwealth of Massachusetts; they shall be under the seal of the court from whence they issue; they shall bear test of the first justice of the court to which they shall be returnable, who is not a party, and be signed by the clerk of such court.

Continuation of former laws, except, &c.

VI. All the laws, which have heretofore been adopted, used, and approved in the province, colony or state of Massachusetts Bay, and usually practised on in the courts of law, shall still remain and be in full force, until altered or repealed by the legislature; such parts only excepted as are repugnant to the rights and liberties contained in this constitution.

Benefit of habeas corpus secured, except, &c.

VII. The privilege and benefit of the writ of *habeas corpus* shall be enjoyed in this Commonwealth in the most free, easy, cheap, expeditious and ample manner; and shall not be suspended by the legislature, except upon the most urgent and pressing occasions, and for a limited time not exceeding twelve months.

The enacting style.

VIII. The enacting style, in making and passing all acts, statutes and laws, shall be—"Be it enacted by the senate and house of representatives, in general court assembled, and by the authority of the same."

Officers of former government continued until, &c.

IX. To the end there may be no failure of justice, or danger arise to the Commonwealth, from a change of the form of government—all officers, civil and military, holding commissions under the government and people of Massachusetts Bay in New England, and all other officers of the said government and people, at the time this constitution shall take effect, shall have, hold, use, exercise and enjoy all the powers and authority to them granted or committed, until other persons shall be appointed in their stead; and all courts of law shall proceed in the execution of the business of their respective departments; and all the executive and legislative officers, bodies and powers shall continue in full force, in the enjoyment and exercise of all their trusts, employments and authority, until the general court and the supreme and executive officers under this constitution are designated and invested with their respective trusts, powers and authority.

Provision for revising constitution.

X. In order the more effectually to adhere to the principles of the constitution, and to correct those violations which by any means may be made therein, as well as to form such alterations as from experience shall be found necessary—the general court, which shall be in the year of our Lord one thousand seven hundred and ninety five, shall issue precepts to the selectmen of the several towns, and to the assessors of the unincorporated plantations, directing them to convene the qualified voters of their respective towns and plantations, for the purpose of collecting their sentiments on the necessity or expediency of revising the constitution, in order to amendments.

Same subject.

And if it shall appear by the returns made, that two thirds of the qualified voters throughout the state, who shall assemble and vote in consequence of the said precepts, are in favor of such revision or amendment, the general court shall issue precepts, or direct them to be issued from the secretary's office to the several towns, to elect delegates to meet in convention for the purpose aforesaid.

The said delegates to be chosen in the same manner and proportion as their representatives in the second branch of the legislature are by this constitution to be chosen.

Provision for preserving and publishing this constitution.

XI. This form of government shall be enrolled on parchment, and deposited in the secretary's office, and be a part of the laws of the land; and printed

panies, as well those under, as those above the age of twenty one years, shall have a right to vote.

Oath to be taken by all officers; or affirmation in case, &c.

Art. 6. Instead of the oath of allegiance prescribed by the constitution, the following oath shall be taken and subscribed by every person chosen or appointed to any office, civil or military, under the government of this Commonwealth, before he shall enter on the duties of his office, to wit:

"I, A. B. do solemnly swear, that I will bear true faith and allegiance to the Commonwealth of Massachusetts, and will support the constitution thereof. So help me God."

Provided, That when any person shall be of the denomination called Quakers, and shall decline taking said oath, he shall make his affirmation in the foregoing form, omitting the word "swear," and inserting, instead thereof, the word "affirm," and omitting the words "so help me God," and subjoining, instead thereof, the words "this I do under the pains and penalties of perjury."

Tests abolished.

Art. 7. No oath, declaration or subscription, excepting the oath prescribed in the preceding article, and the oath of office, shall be required of the governor, lieutenant governor, counsellors, senators or representatives, to qualify them to perform the duties of their respective offices.

Incompatibility of offices.

Art. 8. No judge of any court of this Commonwealth, (except the court of sessions,) and no person holding any office under the authority of the United States, (postmasters excepted,) shall, at the same time, hold the office of governor, lieutenant governor or counsellor, or have a seat in the senate or house of representatives of this Commonwealth; and no judge of any court in this Commonwealth (except the court of sessions,) nor the attorney general, solicitor general, county attorney, clerk of any court, sheriff, treasurer and receiver general, register of probate, nor register of deeds, shall continue to hold his said office after being elected a member of the congress of the United States, and accepting that trust; but the acceptance of such trust, by any of the officers aforesaid, shall be deemed and taken to be a resignation of his said office; and judges of the courts of common pleas shall hold no other office under the government of this Commonwealth, the office of justice of the peace and militia offices excepted.

Amendments to constitution, how made.

Art. 9. If, at any time hereafter, any specific and particular amendment or amendments to the constitution be proposed in the general court, and agreed to by a majority of the senators and two thirds of the members of the house of representatives present and voting thereon, such proposed amendment or amendments shall be entered on the journals of the two houses, with the yeas and nays taken thereon, and referred to the general court then next to be chosen, and shall be published; and if in the general court next chosen, as aforesaid, such proposed amendment or amendments shall be agreed to by a majority of the senators and two thirds of the members of the house of representatives present and voting thereon; then it shall be the duty of the general court to submit such proposed amendment or amendments to the people; and if they shall be approved and ratified by a majority of the qualified voters, voting theron, at meetings legally warned and holden for that purpose, they shall become part of the constitution of this Commonwealth.

Commencement of political year, and termination.

Art. 10. The political year shall begin on the first Wednesday of January instead of the last Wednesday of May, and the general court shall assemble every year on the said first Wednesday of January, and shall proceed, at that session, to make all the elections, and do all the other acts, which are by the constitution required to be made and done at the session which has heretofore commenced on the last Wednesday of May. And the general court shall be dissolved on the day next preceding the first Wednesday of January, without any proclamation or other act of the governor. But nothing herein contained shall prevent the general court from assembling at such other times as they shall judge necessary, or when called together by the governor. The governor, lieutenant governor, and counsellors, shall also hold their respective offices for one year next following the first Wednesday of January, and until others are chosen and qualified in their stead.

Meetings for choice of governor, lieutenant governor, &c. when to be held.

The meeting for the choice of governor, lieutenant governor, senators and representatives, shall be held on the second Monday of November in every year; but meetings may be adjourned, if necessary, for the choice of representatives, to the next day, and again to the next succeeding day, but no further. But in case a second meeting shall be necessary for the choice of representatives, such meetings shall be held on the fourth Monday of the same month of November.

All the other provisions of the constitution, respecting the elections and proceedings of the members of the general court, or of any other officers or persons whatever, that have reference to the last Wednesday of May as the commencement of the political year, shall be so far altered, as to have like reference to the first Wednesday of January.

Article when to go into operation.

This article shall go into operation on the first day of October, next following the day when the same shall be duly ratified and adopted as an amendment of the constitution; and the governor, lieutenant governor, counsellors, senators, representatives, and all other state officers, who are annually chosen, and who shall be chosen for the current year, when the same shall go into operation, shall hold their respective offices until the first Wednesday of January then next following, and until others are chosen and qualified in their stead, and no longer; and the first election of the governor, lieutenant governor, senators and representatives, to be had in virtue of this article, shall be had conformably thereunto, in the month of November following the day on which the same shall be in force and go into operation, pursuant to the foregoing provision.

Inconsistent provisions, anuulled.

All the provisions of the existing constitution, inconsistent with the provisions herein contained, are hereby wholly annulled.

Religious freedom established.

Art. 11. Instead of the third article of the bill of rights, the following modification and amendment thereof is substituted.

As the public worship of God, and instructions in piety, religion, and morality, promote the happiness and prosperity of a people, and the security of a republican government; therefore, the several religious societies of this Commonwealth, whether corporate or unincorporate, at any meeting legally warned and holden for that purpose, shall ever have the right to elect their pastors or religious teachers, to contract with them for their support, to raise money for erecting and repairing houses for public worship, for the maintenance of religious instruction, and for the payment of necessary expenses: And all persons belonging to any religious society shall be taken and held to be members, until they shall file with the clerk of such society a written notice declaring the dissolution of their membership, and thenceforth shall not be liable for any grant or contract which may be thereafter made or entered into by such society: And all religious sects and denominations, demeaning themselves peaceably, and as good citizens of the Commonwealth, shall be equally under the protection of the law; and no subordination of any one sect or denomination to another shall ever be established by law.

[Note.—The constitution of Massachusetts was agreed upon by delegates of the people, in convention, begun and held at Cambridge on the first day of September, 1779, and continued by adjournments to the second day of March, 1780, when the convention adjourned to meet on the first Wednesday of the ensuing June. In the meantime the constitution was submitted to the people, to be adopted by them, provided two thirds of the votes given thould be in the affirmative. When the convention assembled, it was found that the constitution had been adopted by the requisite number of votes, and the convention accordingly resolved, "that the said Constitution or Frame of government shall take place on the last Wednesday of October next, and not before, for any purpose save only for that of making elections agreeable to this resolution." The first legislature assembled at Boston on the twenty fifth day of October, 1780.

The first nine articles of amendment were submitted, by delegates in Convention, assembled, November 15, 1820, to the people and by them approved and adopted, April 9, 1821.

The tenth article of amendment was adopted by the legislatures of the political years 1829—30, and 1830—31, and was approved and ratified by the people, May 11, 1831.

The eleventh article of amendment was adopted by the legislatures of the political years 1832 and 1833, and was approved and ratified by the people, November 11, 1833.]

WILLS OF REAL ESTATE.

We give below the opinion of JUDGE SAVAGE upon that provision of the Revised Statutes which authorize the creation of trusts in real estate by last will and testament. This opinion is highly important coming as it does from one of the ablest jurists in our country, and upon a provision of our Statutes which has excited a great deal of interest. We consider this opinion so valuable that we have felt it our duty to give it to the public. This opinion was written in 1838.

OPINION

Of JOHN SAVAGE *late Chief Justice of the Supreme Court of the State of New-York, touching the validity of a devise to Executors and Trustees to receive the rents and profits of lands and pay over to the* cestui que trust.

"I insist that so much of the will is void as purports to convey certain portions of his estate to his executors in trust to receive the rents and profits *and pay them over.*

"On this point I had occasion to express my views in Lorrilard's case.

"When we approach the doctrine of uses and trusts, we must begin by reading the 45th section 1 R. Stat. 727, the article entitled "of uses and trusts." By that section uses and trusts are abolished. The legislature must have intended that those who were to administer the law should expel from their minds, the abstruse learning found in the books on the subject of uses and trusts—and take the system from the statute which they were about to enact.—We must go back in idea to a period beyond the introduction of uses, when "the original simplicity of the common law admitted of no immediate estate in lands which was not clothed with the legal seizin and possession."

"§ 46. Every estate which is now held as an use, executed under any former statute of this state is confirmed as a legal estate."

"An use at common law consisted in a right to the rents and profits of lands, of which the seizin and possession were in another.

"The former statute of this State, 1 R. L. 72, declared with much circumlocution, that the person entitled to the use should have the possession and seizin. The revised statutes say in plain language that whoever is entitled to the possession and profits shall have the legal estate. § 47 and § 48 declares that in the then existing trusts, trustees who have the power of actual disposition shall not be ousted of their power by the preceding sections.

"The legislature having thus guarded all previous trusts, proceed to lay down rules for future cases and in §49 it is declared that every future disposition of lands shall be made to the person in whom the right to the possession and profits is intended to be invested; and not to any other to the use of, or in trust for, such person; and if made to a trustee he shall take no estate.

"The object of this section was 'the entire abolition of uses and formal trusts.' (See Revisors Notes to this section.)

"The only express trusts authorized are those contained in the 55th section, and the only one there contained is that authorized by the third subdivision, under which there be any pretence of sustaining the trust in question—and before this trust can be supported it must be shown that *paying over money* to a person is *applying it to his use.*

"Now it is perfectly clear that the only reason why this trust was ever authorized to wit, *to apply to the use of any person* was, that the money was to be appropriated to the use of a person who either from minority or coverture, or lunacy, or want of discretion, as a spendthrift, was incapable of applying the money to his or her own use. The revisers have told us so in so many words, and such have been the views of most of the judicial officers who have spoken of the object of this section. The Chancellor, Vice Chancellor, Senators Maisen and Young all agree in this. Mr. Justice Nelson is of opinion that a trust to pay over is a trust to apply, and so I believe the Chancellor has decided. Let me state a case. I lay down the broad proposition that a trust to apply is a trust to pay over. Property is conveyed to a trustee to receive the rents and profits and apply them to the use of a spendthrift: the trustee receives a year's rents and pays them over at once, and they are dissipated in a week, I ask, has that trustee performed his trust? Take the case of a lunatic or even of a *feme covert* who has a wicked husband who takes by force or fraud the money thus paid into the hands of the wife. Yet it is said the trustee has performed his trust. Would not such a proposition in such a case be the heighth of absurdity? And yet if a trust to apply is performed by paying over in one case, is it not in another? Much of our difficulty arises from judicial legislation—from the courts putting a construction upon statutes different from that intended by the Legislature. Let the statute be fairly construed according to its terms.—If other cases of trusts ought to be created, let the legislature authorize it.

In my opinion a trust to pay over is a mere evasion of the statute. The spirit of the statute is, that he who has the beneficial interest in lands, has the legal title. It is against the intention of the legislature that the legal and equitable title shall be separated; the reason is to prevent fraud, every person capable of managing his own property is expected to do so—and the legal and equitable titles are to be separated in such cases only where there exists an actual incompetency for the management of property. If the trust to pay over is lawful the door is as wide open to frauds as it ever was. If a grantor now conveys land to A. in trust or for the use of B., the title vests in B., and the land is liable to B.'s debts So if the land is conveyed to the trustee A. to the intent that B. shall have the possession and profits, the legal title follows the possession and profits: But if the grantor conveys to A. in trust to receive the rents and profits and pay them over to B. then it is said the trust is valid—the legal estate is in A., B.'s creditors cannot touch it. B. receives the rents and profits from the hand of A. and sets his creditors at defiance. Let us see the operation in practice. A., the trustee wishes to avoid the trouble of collecting B.'s rents, and gives B a power as an attorney to receive the rents and profits—the trust becomes a mere formal trust in substance; to wit: a trust to A. to permit B. to receive the rents and profits; or A. may put B. in possession where he enjoys the profits. If such were the trust in terms it would be void, and B, would have the legal estate, but by this contrivance of *nominally* receiving the rents and profits and paying them over, when the cestui que trust does the whole of it himself the statute is evaded. In this way favors may be reciprocated. A. and B. may be trustees for each other, and frauds innumerable may be perpetrated with impunity, and with equal ease as before formal trusts were abolished.

"The case is precisely parallel with the former evasion of the old statute as stated by Mr. Brougham, and quoted by the revisors, thus: 'By the old statute of uses, if land were given to A. for the use of B. the latter was deemed the legal owner. This was evaded by adding *three* words, for it was adjudged by the court of Chancery, that the statute did not apply when land was given to A. for the use of B. *in trust for* C!

"So in this case, I repeat it, if land be given to A. to the use of B. or which is the same thing, in trust that B. may receive the rents and profits, B. has a legal estate. § 49. But now add but little more than three words—land is given to A. in trust, to receive the rents and profits and pay them over to B., and the statute is completely evaded. B. under an authority from A. takes possession and laughs at his creditors, as well as at your laws, and those who administer them. Thus it will be if such a trust shall be declared legal. The only safe course is to adhere to the letter of the statute. I repeat, that it was never intended that a trust should be created for any person who was capable of managing property himself; or of applying money to his own use with discretion.

"This is as explicity declared in the notes of the revisors as any thing can be—and it is the only consistent construction which can be given to the statute.

"On the trust *to pay over* and the trust *to apply* in continuation of §5 of this opinion, p. 18.

"I have previovsly quoted the revised statutes "of uses and trusts." 1 R. Stat. 727. 1 ed. § 46 is as follows: "every estate which is now held as an use, executed under any former statute of this state, is confirmed as a legal estate." An use is said to be executed when three things concur; but before I mention them I will refer to the former statute of uses, 1 R. Laws, 72. By that statute, when any person is seized of any lands, rents, &c., to the use, confidence or trust of any other person, the person entitled to the use, shall be deemed seized of the land; and to have the like estate in the land as he had in the use. Three things were necessary to the operation of the statute;

"1. A person seized to the use of another.

"2. A cestui que use in esse.

"3. A use in esse.

"When these three circumstances concurred, the legal estate and possession of the lands, out of which the use was created, was immediately transferred by force of the statute, from the trustee to the cestui que trust. The estate which was in form a mere equitable estate, thus became a legal estate; and in such case the use or trust was said to be executed under the statute; By the section above quoted all such estates were confirmed as legal estates. The statute of 1813 is precisely similar to the 27th of Henry the 8th, ch. 10. Under that statute there have been many adjudications as to what estates were or were not executed under the statute. In the case of Jones vs. Lord Say and Side, 8 viner. 262, the testator devised lands to trustees: out of the rents and profits to pay several legacies and annuities, and to pay all the rest and residue (after reimbursing their own costs and charges) to her daughter C. F. for life, and after her decease the trustees to be seized to the use of the heirs of her said daughter. Chancellor King was of opinion that the use was executed in the trustees during the life of C. F. and she had only a trust in the surplus of the rents and profits.—Of course this was a trust which was not executed by the statute, in the cestui que trust; as the legal estate was held to remain in the trustees, and not to vest in the cestui que trust. In other words, that a trust to receive the rents and profits and pay them over was a valid trust.

"In South vs. Allaire, in 1 Selk. 228, the testator devised all the rents and profits of certain lands to S. B. during her natural life, to be paid by his executors into her own hands without the intermeddling of her husband.

"The question was, whether by this devise, S. B. had the lands themselves—it was agreed that by the words rents and profits, the lands themselves would pass; but the quere was, whether the words *to be paid by the executors* did not restrain the former words.

"And such was the opinion of Holt, Chief Justice but the other judges were of a different opinion and gave judgment for the Defendant.

In Broughton vs. Langley 2 Ld. Ray 873, the testator devised certain lands to trustees for certain uses, viz. that they should permit G. R. to take the rents and profits during the term of his natural life; and after his death the trustees should stand seized to the use of the heirs of the body of the said G. R. &c.

The court held this to be an use executed by the statute in G. R. and decided in favor of the Defendant who held under G. R. who had suffered a common recovery in favor of himself, and then conveyed to the Defendant. The court said that if a man makes a feoffment in fee to A., in trust to permit B. to take the rents. issues and profits, this will be an use executed, as well as if A. had made use of the word *use*,

"In Shapland vs. Smith, 1 Br. c. c. 75, the devise was to trustees, that they should by quarterly payments, out of the rents and profits, after deducting taxes, repairs and expenses, pay the surplus to C. S. during his natural life, and after his death to the heirs male of his body, &c. Baron Eyre said, "a devise to trustees to permit A. to receive, or to pay profits to A., amounts to a disposition of the land, but one of the masters who sat with him, being of a different opinion, the case stood over to be heard by the chancellor; and he was of opinion that the trustees being to pay the taxes and repairs, must have an interest in the premises, and that the legal estate was in them, and the equitable in C. S. Of course the statute was not executed in this case, because the trustee were to pay the taxes and repairs.

not contain a power to make the application of the money. The cestui que trust in that case makes the application himself, and disburses the money according to his own discretion. I think I have also shown that a trust *to apply* does not contain a power to pay over,—because the person who makes the application exercises *his* discretion in the expenditure, and I further think that I have shown authority as well as reason for the distinction.

"What trusts then have the legislature authorized? We look in vain for any trust *to pay over*, but there is a trust authorised *to apply* the rents and profits of lands to the use of any person during the life of such person. In addition to what has been said to show that *the application* of the money belongs to the trustees, I further remark that by the gramatical construction of the sentence, the same person or persons who are to *receive*, are also to *apply* the rents and profits.

"Besides, the revisors have expressly declared in their note to this section, that the persons intended to be provided for, are such as have no legal or actual discretion of their own to be exercised in the *application* or *expenditure* which terms in this case I consider as synonimous.

"Suppose now that I am right in saying that *application* means *expenditure*; and surely there is no mode by which rents and profits can *be applied* to the use of any person but by expenditure; rents and profits as used here, mean money, and that money must be expended before its equivalent can be applied to any use. Suppose again that the statute read thus: "Express trusts may be created to receive the rents and profits of land and *expend* the same to the use of any person," &c., would a payment over of the money be a compliance with the duty of the trustee? Suppose the cestui que trust to be a spendthrift and a gambler, and to be indebted to various persons for sustenance and clothing and other necessaries furnished him; and the trustee were to pay over the money to the cestui que trust, with the certain knowledge that the money would be squandered in the gratification of his vicious propensities, and the honest creditors defrauded; would such a trustee perform his duty? On the contrary would not a court of equity compel such a trustee to pay the honest debts of his cestui que trust and hold him, the trustee, responsible for the proper expenditure of the money? I cannot doubt that such would be the direction of the court, nor that such is the true meaning of the trust *to apply*. It is sufficient for my present purposes that the trust *to pay over* and the trust *to apply* are and have been considered distinct trusts, the one vests the power and supposes discretion as to expenditure in the cestui que trust:—the other gives the power of expenditure to the trustee and supposes the absence of discretion in the cestui que trust. That both were abolished by the revised statutes, and the trust to *apply only* was subsequently authorized. A trust to pay over is therefore not a valid trust."

WILLS OF PERSONAL ESTATE.

We here give the opinion of JUDGE SAVAGE *upon the existing Statutes, as to the creation of trusts by last Will and Testament, to receive the interest and income of personal property and pay over to the person for whose benefit the trust was created, as follows:*

TRUST OF PERSONAL ESTATE.

"As to trust created of the personal estate.

"The subject of trusts in personal property seems to have escaped the attention of the revisors and the legislature; at the time when trusts of real estate was limited and defined; as they were intended to be kept distinct from trusts of real estate for we find that by an act passed Dec. 10, 1828, the subject was brought before the legislature and passed upon. By that act the ownership of personal property shall not be suspended beyond the termination of two lives in being at the date of the instrument containing the suspension, and if such instrument be a will for not more than two lives in being at the death of the testator. In all other respects limitations of future or contingent interests in personal property shall be subject to the rules prescribed in the first chapter of this act in relation to future estates in land. § 2 above cited.

"Title 4, of chap. 4, of part 2d, of the revised statutes 1 R. Stat. 773, which treats of accumulations of personal property and of expectant estates in such property," does not directly and affirmatively authorize the conveyance of personal property to trustees, such authority seems to be implied: otherwise the ownership of such property could not be limited, so as, with certainty to prevent its alienation until the termination of two lives.

"I think it fair therefore to assume that personal property may be conveyed to trustees for the same period, during which the rents and profits of land may be received and applied under the 55th section sub. 3 of title, "uses and trusts."

"The statute is silent as to the use or benefit of such property, or the disposition to be made of the interest arising from it, on the supposition that it may be money, stocks or other securities for money. The first section merely limits the duration of the suspension of absolute ownership; which is in other words the termination of the trust; and the second section says that in all other respects, such limitations, which, I assume, means trust, shall be governed by the rules in relation to future estates in lands. The subsequent sections of this title relate to the accumulation of the interest or profits arising from personal property; and can only be permitted for the benefit of minors during their minority. As the suspension of absolute ownership mentioned in the first and second sections is evidently not intended to be confined to the accumulation of the interest nor directed to be applied to the use of any cestui que trust, it seems to follow that the interest may be paid over to those intended to be benefitted by it. According to the second section of this title, several successive estates may be created in personal property, viz. a precedent estate, and any number of remainders, either vested or contingent, which may be executed during the two lives for which the absolute ownership may be suspended.

If personal property like real property may pass into the possession of the person who is to have the benefit of it, the purposes of the limitation may be defeated. The person who should be first put in possession of $1000 or any other sum of money, might spend it, and those in remainder would be deprived of their interests or estates therin. I confess, I am unable to devise any mode by which the absolute ownership of personal property can be certainly suspended so as to secure the interest of all parties, without the intervention of trustees, or third persons acting in a fidiciary character.

"I am of opinion, therefore that the trusts of personal property created by the will of * * * * * * * with direction to the executors to pay over the interest, are good. Such trusts were valid before the adoption of the revised statutes, and are not necessarily repealed by the 45th section under the article of "uses and trusts." I say not neccessarily repealed, because in construing statutes we must look particularly at the subject which the legislature were then passing upon—and that subject was "of the nature and qualities of estates in real property, and the alienation thereof."

"In the 45th section uses and trusts are abolished except as authorized and modified in that article, which relates entirely to real property and the same section goes on to declare that "every estate and interest in lands shall be deemed a legal right cognizable in a court of law, except when otherwise provided in this chapter:" That chapter was ch. 1, part 2, Title 2, ar.t 2. The whole of chapter 1, treats "of real property, and of the nature, qualities and alienation of estates therein." The title which treats "of accumulations of personal property and expectant estates in such property is title 4 in chapter 4," which treats "of title to personal property in certain cases." The provisions found here which seem to recognize a trust in personal property ought not to be considered as prohibited by, or inconsistent with the previous enactments relating exclusively to real property: and it may be added, that all the objections to a trust to receive the rents and profits of lands and pay them over, do not apply to a trust to pay over the interest of money. It is unnecessary, however, to discuss that subject, because trusts of personal property as they existed before the revised statutes have not been abolished, if I have rightly construed the section abolishing trusts in relation to lands.

"In answer to the enquiry whether this subject can be raised before the chancellor; or whether proceedings must be instituted before the surrogate? I am of opinion that the jurisdiction of the subject of trusts in relation to personal property belongs to the

chancellor and not to the surrogate. The jurisdiction of surrogate's courts is conferred in 2 R. S. 220. The third subdivision is "to direct and control the conduct and settle the accounts of executors and administrators." This relates to the duties of executors as executors and not to any acts of theirs as trustees. It is not the duty of the office of executor to make investments of money for the benefit of third persons and to receive the interest and pay over.

"The revised statutes, 2 R. St. 91, treat of the duties of executors and administrators in rendering an account and making distribution to the next of kin—and it is therein provided that under certain circumstances an executor or administrator may be required to render an account of his proceedings. He shall produce vouchers for all debts, legacies and funeral charges. He may receive certain allowances—and the final settlement shall be deemed conclusive upon all persons interested in the estate who shall have been cited, as to the correctness of his amount in the particulars specified in § 65, 2 R. St. 94. The 66th section declares that the last preceding section shall not extend to any case where an executor is liable to account to a court of equity by reason of any trust expressly created by any last will or testament."

"There can be no doubt therefore that executors are liable to account in chancery as trustees where they are created trustees by the will.

"These executors may no doubt be called to account generally before the surrogate at the proper time; and it will be a sufficient accounting before the surrogate, as against the next of kin, for the executors to show, that they have paid the debts legacies and funeral charges, and have appropriated the residue as the will directs in the creation of the trusts therein authorized—but if it is alleged that they have failed in their duty as trustees, a court of equity is the proper tribunal to determine that matter.

TRUSTS,

Created by last will and testament, coupled with a power to sell and dispose of real estate and invest the proceeds in stocks and pay over the interest and income to the person or persons for whose benefit the trust was created;

In the matter of the Last Will and Testament of S. S.

"In 1837, S. S. made his Last Will and Testament, as follows:—

"He appoints A. B. his executor and trustee, and directs his trustee to sell, dispose of and convey all his estate, real and personal, at such time and in such manner as the trustee may think proper, and to invest the proceeds in the funded debt of the United States, or other stock or good security, as he may deem advisable.

"That he shall set apart $15,000 in trust for certain specific purposes—and divide the residue into three equal parts, and hold the same separately in trust for certain purposes to be mentioned.

"The testator left five children—three daughters and two sons. His daughters are C. the wife of D.; E. wife of F., and G. wife of A. B. The sons are I. and K. The principal division of the estate is into five parts. The sum of $15,000 into two parts, one of $5,000 the other of $10,000.

"The residue is divided into three parts—the income of one-third is to be applied by the trustee to the use of E. for life—remainder to his lawful issue. If he should die without lawful issue, then remainder to his sisters E. and G., for their lives, each one-half, and remainder over to their lawful issue respectively. The income of the other third of the residue is to be applied to the use of G. for life, and then the principal to her lawful issue.

"The sum of 215,000 is thus disposed of—the income of $5,000 is to be paid to C. for life, provided she survives her husband; and the income of $10,000 is to be paid to I. for life. After their deaths respectively, the sums of which they will have received the income, are to be divided into three parts, and the income to be applied to E. G. and K. severally for life; and at the death of each the principal is to be distributed equally among their respective lawful issue. Should K, die without issue his third of the $15,000 is left undevised, but his third of the residue of the estate is given to his sisters E. and G. for life, with remainder over of one half to their respective issue, severally.

"The question is, whether these devises are in conformity with the "Revised Statutes?"

"It is to be observed here that this will does not create any trust in real estate; nor in the rents and profits of lands. The executors and trustee is authorised to sell all the estate of the testator, and to invest the proceeds; the trustee, however, takes no estate in the realty—his authority to sell is a mere power; and until the power shall be executed, the estate vests in the heirs at law. There is no attempt in this case to render real estate inalienable. The real estate is all to be converted into personal, and as such is devised in trust.

"The provisions of the revised statutes applicable to this case are found in part 2, ch. 4, tit. 4, 1 R. S. 773 sec. 1.

"§ 1. The absolute ownership of personal property shall not be suspended by any limitation or condition whatever for a longer period, than during the continuance and until the termination of not more than two lives in being at the date of the instrument containing such limitation or condition; or if such instrument be a will, for not more than two lives in being at the death of the testator.

"§ 2. In all other respects, limitations of future or contingent interests in personal property shall be subject to the rules prescribed in the first chapter of this act, in relation to future estates in lands.

"The principal, if not the only difference, therefore, between the law relating to future estates in lands, and trusts of personal property, is this:—In respect to future estates in lands, the two lives, during whose continuance the power of alienation may be suspended, must be in being at the creation of the estate.—Part 2, ch. 1, tit. 2, art. 1, § 15. But in respect to personal property, if the instrument containing the limitation be a will, the power of alienation, or as the statute expresses it, the absolute ownership may be suspended for the continuance of two lives, in being at the death of the testator; in all other respects they are subject to the same rules. As all the persons upon the continuance of whose lives, the power of alienation is suspended by the will of S S. appear to have been in being when the will was executed, there is in this case no difference between the rules by which it is to be determined, and those applicable to future estates in lands.

"I will proceed therefore to test the different devises in his will by those rules.

"The first devise to C., or rather to the trustee to pay over to her during her life the interest of $5,000 upon the contingency of her surviving husband; after her death the principal is to be divided into three parts, and the interest paid upon the three several parts to E. G. and K. severally, during their several lives; and upon their respective deaths, such third of the principal is devised absolutely to their lawful issue severally.

"Assuming for the present, that there is no objection to the trust, simply as a trust, there seems to be no objection to the validity of this devise.

"The absolute ownership of the property devised, or any part of it, is not suspended for a longer period than until the termination of two lives in being at the death of the testator—as well as at the creation of the estates. One-third of the $5,000 is suspended during the lives of C. and E.; another third during the lives of C. and G., and the other third during the lives of C. and K. The interest of C. is contingent, depending on the fact of her surviving her husband—and the interests of E. G. and K. contingent, depending on their severally surviving C. But the fact of contingency is no objection. "Future estates are either vested or contingent," part 3, R. S. 723, § 13. "Successive estates for life shall not be limited unless to persons in being *at the creation thereof*," § 17. As regards personal property devised by will, this is to be read, instead of persons in being at the creation thereof, it should be persons in being *at the death of the testator*. But in this case it makes no difference the persons who take successively are all named in the will, and were therefore in being at the creation of the estate.

"I do not perceive that this devise violates any rule prescribed in relation to future estates in lands.

"2. The devise to I. is not distinguishable from that to C., except that it is not contingent but absolute; the income is payable to him at all events.

"3. As to the residue of his estate, after taking out the $15,000 for C. and I., it is to be divided into three parts, and the income of one-third to *be applied to the use* of E. G. and K. respectively for their lives, and after their deaths respectively, the principal of which they have severally received the income is to be divided absolutely between the lawful issue of each. So that the absolute ownership of this part of the estate is suspended for one life only. In the case of K., however, it is directed that, if he should die without lawful issue, then his share of the residue of the estate (but not his interest in the $15,000) shall be divided equally between E. and G. for their several lives, with remainder over to their lawful issue respectively. The absolute ownership is not suspended in any contemplated event, for more than two lives.

"For the purpose of comparing the devises in this will with the rules regulating future estates in lands, I have assumed, that the trusts were valid as trusts—it is proper however to consider that question.

"Previous to the revised statutes, there was no difference between trusts of real and personal estates, so far as respects the period for which they might lawfully be continued—the limit in both cases was that they could not amount to a perpetuity—and a limitation to any number of lives in being at the creation of the trust, was within the line of a perpetuity. In the celebrated case of Thellusion *vs.* Woodford, 4 Vesey, jr. 227, the personal property conveyed to the trustees was estimated at 600,000*l.*, and both real and personal was rendered inalienable and directed to accumulate during the lives of nine persons. The courts in England said that it was immaterial how many lives were inserted, for it was for the life of the survivor, and so for one life only. It was often remarked by the judges that "the candles were all lighted and burning at the same time." Such was the law here before the operation of the revised statutes; and such is the law still, unless such trusts are limited by those statutes.

"In revising the statutes, the Legislature treated of real and personal estates separately. Part 2, ch. 2, tit. 2, treats, "Of the nature and qualities of estates in real property, and the alienation thereof." And the second article of this title treats "Of uses and trusts." The first section of this article, which is § 45, declares that "Uses and trusts, except as authorised and modified in this article, are abolished"—and as a consequence of that enactment, it is added, "And every estate and interest in lands shall be deemed a legal right, &c." Every subsequent section of this article which speaks of the estate which may be held in trust, speaks of the estate in lands, or the possession of lands—and the word "assignment" in the 47th section, was probably inserted to embrace terms for years. The 55th section which enumerates the express trusts authorized by law, speaks only of trusts relating to lanks, viz:—to sell or mortgage or lease lands, and to receive the rents and profits of lands for the purposes specified. If it should be adjudged that by the 45th section, all trusts were abolised as well of personal as of real estate, it would follow that as no trust of personal property has been expressly authorised, all such trusts are void. I, however, cannot so construe the statute. The legislature were regulating real estate, and limiting the period beyond which such estate should not be rendered inalienable. This appears from the language of the statute itself, as well as from the notes of the revisors.

"Had the legislature omitted to limit the inalienability of personal estate it must have been left to the limit of the common law. They were not guilty of such omission, but made the enactment which I have first quoted above, The fact that they have done so is an additional argument in favor of the position assumed by me to wit—that in the article of uses and truts it was not intended to embrace personal estates.

"By the common law the absolute ownership of personal property might be suspended during the continuance of any number of lives in being at the date of the instrument directing such suspension; but by the first section of tit. 4 of ch. 4 of part 2, the suspension of the absolute ownership is limited to two such lives, instead of an indefinite number; and by the second section in all other respects, the limitations of future or contingent interest in personal property are subject to the rules prescribed in relation to future estates in lands.

"It is well understood that limitations of future or

such considerations should have weight with those whose business it is to make laws: but they should not control the opinions of those whose business it is to expound the laws. JOHN SAVAGE."

OWNERSHIP OF THE FEE OF HIGHWAY.

We give the following brief opinion of Judge SAVAGE *as to the right of property in land which has been used as an highway where the highway was subsequently discontinued. In the city of New-York many public roads have been discontinued and the ownership of these lands thus relieved of the public easement is a matter of great importance.*

"Another question arises out of the following facts. When Cornelius Cozine the elder, devised the several parcels of his estate to his several children, he bounded them upon the Bloomingdale road; when that road shall be closed in consequence of opening the several avenues and streets which must be eventually opened, to whom does the land belong, which is now occupied as the Bloomingdale road? It appears that Cornelius Cozine the elder had five children, to wit: Garret Cozine, Cornelius Cozine and Balm Johnson Cozine, sons, Margaret, married to Nicholas Fletcher, and Sarah, married to William Swanzee.

"The testator in his will describes his real estate rather loosely. He gives Garret "one-fifth part of my farm at Bloomingdale, which said fifth part joins on Hans Hopper; thence running down, joins on the north river." Afterwards he gives to each of his children, one-fifth of his farm running to the north river.—He adds after the devise to his daughters, "M. that part of the said farm over the road which joins to the commons is excepted." He then gives to his three sons as follows "all that part of my farm at Bloomingdale which joins on the road and Commons which part is excepted as above from my daughters Margaret and Sarah." He then devises all the rest of his estate to his five children to be equally divided. It is to be observed, that there is no exception in the devises to his sons:—their parts extend the whole length of the farm, and of course include the road. The road is not mentioned in the devise to the daughters only by way of exception of that part *over the road.* The devise of that part to the sons is described as "that part of my farm at Bloomingdale which *joins on the road* and commons, which said part is excepted as above," &c.

"The general rule here is," says Thompson. justice, "that the fee of a highway belongs to the owner of the adjoining ground, and that the sovereign has only a right of passage." 2 John. 363.

"In Jackson vs. Hathaway, 15 John. 447, the defendant claimed to own the road, by showing that he owned the land on both sides of it. Mr. Justice Platt delivered the opinion of the court, and states the facts more particularly than the reporter.

"The defendants deed described a piece of land, beginning at a certain stake by the side of the road; and thence by specified courses and distances, to the place of beginning without crossing the road. The road was afterwards discontinued, and the defendant owning the land on both sides, enclosed it in his fence. The learned judge said that it was perfectly clear that the fee of the land did not pass from the patentee who had given the defendants conveyance—that there was nothing conveyed but the land embraced within the courses and distances, and it was admitted that the road was not embraced. He recognized the common law doctrine, that the public had only an easement, or right of passage upon the road, but the original owner retained the fee. He added that where a farm is bounded upon an highway, or along a highway or running to an highway, there is reason to intend that the parties intended the middle of the highway. This same principle has been often recognized as the general rule, to wit, that the fee of an highway belongs to the owner of the adjoining ground—and that the land bounded upon an highway in general carries the fee to the centre of the highway, if such fee was previously in the grantor. The case of Jackson vs. Hathaway was decided upon the peculiar expressions of the deed describing the boundaries. There is, however, nothing peculiar in the description in the will of Cornelius Cozine the elder: nothing which excludes the road from the conveyance. The general rule therefore governs in this case, and the owners on either side own to the middle of the road: and when the road shall be closed, the ground now covered by it will belong to the owners of the adjoin ground on either side.

BOUNDARIES UPON NAVIGABLE WATERS.

The following is an extract from a written opinion of Judge SAVAGE *as to the ownership of land which has been worn away by the water or which has accrued therefrom:*

"Another question which I am desired to answer arises thus. The land owned by Cornelius Cozine, the elder and of which the property in question is part and parcel, was bounded on the west by the Hudson river (the river being an arm of the sea); the river has encroached upon the land, and worn away the bank by imperceptible degrees to a considerable extent: Can the proprietors claim their length of chain from the present bank of the river eastward; the grounds on the east being commons belonging to the corporation of the city of New-York?

"I have no hesitation in answering this question in the negative. The western boundary was at the date of the grant, a natural object, and the grant was located upon it—that boundary cannot be altered; and it makes no difference that the eastern boundary has never been ascertained. That is to be ascertained by measurement; but the place of beginning must be the bank of the river at high water mark as it was at the date of the grant. If any loss has been sustained by the earth being washed away by the current of the river, it must be sustained by the owner of the bank; and if any addition had been made by alluvion, it would have been the gain of such owner.

"Blackstone in his commentaries says, "and as to the lands gained from the sea, either by alluvion, by the washing up of sand and earth, so as in time to make *terra firma;* or by dereliction, as where the sea shrinks back, below the usual water mark; in these cases, the law is held to be, that if this gain be by little and little, and by small and imperceptible degrees, it shall go to the owner of the land adjoining, for *de minimus non curat lex;* and besides, these owners being often losers, by the breaking in of the sea or at charges to keep it out, this possible gain is therefore a reciprocal consideration for such possible charge or loss. But if the alluvion or dereliction be sudden and considerable it belongs to the King—for as the King is lord of the sea, and so owner of the soil, while it is covered with water, it is but reasonable, he should have the soil when the water has left it dry." 2 Black. com. 261-2.

Chancellor Kent says, "If soil be formed out of the sea or river by slow and imperceptible alluvion and accretion it belongs to the owner of the adjoining land." 3 Kent, 428.

"All writers on this subject and courts in their decisions refer to Sir Mathew Hale's treatise, "Dejure Maius," which may therefore be considered an established text book. In chapter 4, part 1, among other things is the following, "If a subject hath land adjoining the sea, and the violence of the sea swallow it up, but so that there be reasonable marks to continue the notice of it; or though the marks be defaced; yet if by situation and extent of quantity, and bounding upon the firm land, the same can be known, though the sea leave the land again, or it be by art and industry regained, the subject doth not lose his property: and accordingly it was held by Cooke and Foster, M. 7, jur. C. B., though the inundation continue 40 years. If the mark remain or continue, or extent can reasonably be certain, the case is clear." I cite from 6 Cowan 542. I am fully justified therefore in saying that there can be no extension eastward; but the owners may reclaim what has been worn away by the river, if the farm can be duly ascertained.

REMARKS.

The reader will notice on page 97, at the foot of the second column, that Judge Savage refers to so much of the opinion as relates to trusts in real property as was commenced on page 18 of the manuscript, the residue of the opinion commences on page 79 of the manuscript copy and is a further discussion of the same question.

Many of our readers are interested in the question here so ably discussed, and it is therefore that we place these able opinions before them for their examination. Much anxiety has been felt in reference to existing provisions of our Statutes as to the disposition of property in trust—these opinions from the pen of Judge Savage make the whole plain and easy of comprehension by every man of business.

VOL. I.] NEW-YORK, DECEMBER 6, 1843. [No. 7.

TAXATION.

BANKS AND OTHER INCORPORATED INSTITUTIONS.

The Corporation of the City of New-York, at the last Session of the Legislature, and near its close, applied for the passage of a law in relation to taxing incorporated institutions in the city of New-York, as contra distinguished from other incorporated institutions, in all other counties in his State.

They presented with their memorial, a bill, which was referred to the Committee on the Judiciary, in the Senate, which Committee, on the 10th of April, eight days before the termination of the session, reported in its favor, and it was ordered to be printed. Its passage was opposed, and for that reason it did not become a law at the last session, but will no doubt, be called up early at the approaching session, and an attempt made to pass it.

There is a great principle involved in the application for the passage of this bill, which arises from the fact, that the application was made without any notice whatever to the institutions to be effected by it, and the bill is, in its practical effects, an alteration of the Charter of every incorporated Company in the city of New-York.

The bill as reprinted shows the contemplated change, in the words which are printed in italics, in the Sections from 1 to 15 inclusive, of the existing law, which is contained in the Revised Statutes, and which is republished in pages 239 and 240 of this volume, which pages each incorporated company in this city has been furnished with a copy of. The new bill repeals the 8th and 9th sections of the present law, which sections are of the greatest importance.

This bill is to be found in the printed Senate Bills of 1843, and designated as No. No. 66, and is in the words following:

"TITLE II.

Of the Assessment of Taxes on Incorporated Companies, and the commutation or collection thereof.

SECTION 1. All moneyed or stock corporations, deriving an income or profit from their capital, or otherwise, *the principal office or place of business whereof, shall be situated in the city of New York, or the operations of which shall be carried on therein, under which denomination shall be included all persons or associations of persons, formed for the purpose of banking, under the provisions of the act entitled "An act to authorize the business of banking," passed April 13, 1838, and the acts amendatory thereof, and all associations or companies formed, under any general or special law, for the purpose of mutual insurance,* shall be liable to taxation on their capital, in the manner hereinafter prescribed.

§ 2. The president, cashier, secretary, treasurer or other proper officer, of every such company, shall, on or before the first day of *June*, in each year, make and deliver to the assessors, or one of them, of the ward in which such company is liable to be taxed, according to the provisions of the *seventh* section of the *first* title of this *act*, a written statement, specifying,

1st. The real estate, if any, owned by such company, the towns or wards in which the same is situated, and the sums actually paid therefor;

2d. The capital stock actually paid in and secured to be paid in, excepting therefrom the sums paid for real estate, and the amount of such capital stock held by the State, and by any incorporated literary or charitable institution; and,

3d. The ward in which the principal office or place of transacting the financial business of such company is situated; or if there be no principal office, the town or ward in which its operations are carried on, or in which it is liable to be taxed, under the provisions of this *act*.

§ 3. The president, or other proper officer of every such company, shall also deliver to the Comptroller, on or before the first day of *June*, in each year, a written statement, containing the same matters required by the foregoing section, to be specified in the statement to be delivered to the assessors. The statements required by this and the preceding section of this title, shall be certified, under the oath of the said president or other proper officer, to be in all respects, just and true.

§ 4. If the statements above required, or either of them, shall not be furnished by any company to the assessors, and to the Comptroller *of this State*, within thirty days after the time above provided, the company neglecting to furnish such statements, or either of them, shall forfeit to the people of this State, for each statement omitted to be furnished, the sum of two hundred and fifty dollars; and it shall be the duty of the *said* Comptroller, to furnish the Attorney General with an account of all companies that shall neglect to render such lists, that he may prosecute for the penalties hereby imposed.

§ 5. If any company, that shall be prosecuted for any such penalty, shall pay the costs of prosecution, and furnish the statement required, the Comptroller *of the State*, if he shall be satisfied that the omission was not wilful, may, in his discretion, discontinue such suit.

§ 6. The assessors shall enter all incorporated companies from which such statements shall have been received by them, and the property of such companies, and the property of all other incorporated companies, liable to taxation in their respective *wards*, in their assessment rolls, in the following manner:

1st. They shall insert in the first column of their assessment rolls, the name of each incorporated company in their respective wards, liable to taxation on its capital, or otherwise; and under its name they shall specify the amount of its capital stock paid in, and secured to be paid in; the amount paid by such company for real estate, then belonging to such company, wherever the same may be situated; and the amount of its stock, if any, belonging to the State, and to incorporated literary and charitable institutions,

2d. In the second column they shall enter the quantity of real estate owned by such company, and situated within their ward; and in the third column, the actual value thereof, estimated as in other cases.

3d. In the fourth column, they shall enter the capital stock of every incorporated company, excepting manufacturing and turnpike corporations, and marine insurance companies, paid in, and secured to be paid in, after deducting the sums paid out for all the real estate of such company, wherever the same may be situated, and then belonging to it, and the amount of stock, if any, belonging to the people of this State, and to incorporated literary and charitable institutions.

§ 7. The assessors shall insert in the column mentioned in the preceding section, the cash value of the stock of all manufacturing and turnpike corporations, (to be ascertained by the assessor, by the sales of the stock, or in any other manner,) deducting therefrom the items mentioned in the preceding section; which value, thus ascertained, together with the value of the real estate of such corporations, shall constitute the amount on which the tax of such corporations shall be levied.

§ 8. If any such company shall neglect or omit to furnish such statement, within the time and in the manner above prescribed, the assessors shall proceed to estimate, according to the best information which they shall be able to obtain, the capital stock of the said company, paid in or secured to be paid in, and shall assess the said company therefore, which assessment shall be final and conclusive.

§ 9. The capital stock of every company liable to taxation, except such part of it as shall have been excepted in the assessment roll, and by the previous sections of this title, shall be assessed and taxed in the same

The object of the change in substituting the word *June* for "July," in the 2d and 3d sections, is to throw the taxes backward, and make two taxes payable in one year, for to pay off the delinquencies of the Corporation which are now afloat in the shape of unauthorised Corporation Bonds.

The New-York Citizens' Committee, deputed by the meeting at the Merchant's Exchange, held on the 6th of March, 1843, on their arrival at Albany, found a bill had been reported in the Senate, by the Committee on Finance, of which the following is a copy:

—

IN SENATE.

MARCH 21, 1843.

'An act to amend the Revised Statutes in relation to the exemption of incorporated companies from taxation, and for other purposes.

The People of the State of New-York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Section 9, of Title 4, of Chapter 13, of Part 1, of the Revised Statutes, which authorises the exemption of incorporated companies in certain cases from taxation, is hereby repealed.

§ 2. All banks established under the act entitled 'An Act to authorize the business of banking," passed April 18, 1838, shall be subject to taxation on the amount of capital paid in, or secured to be paid in, in the same manner as incorporated banks. And the proper officer or officers of such banks, shall make an annual statement to the Comptroller and the assessors, in the manner provided by the second Section, Title 4, Chapter 13, of the first Part of the Revised Statutes.

§ 3. The act entitled 'An act authorising mortgagees to redeem real estate sold for taxes and assessments," passed May 14, 1840, is hereby repealed.'

REMARKS.

This bill was considered by the Citizens' Committee objectionable, in two of its provisions.

First, In making no provision for the abatement of tax on the lost capital of incorporated companies.

Second, containing the third Section as above, as a rider, which repealed a most salutary law of the State, as to mortgage securities, a provision important to every body but '*Land Sharks.*' To this latter class of persons it was obnoxious, as they could not get the land from the honest owner at an assessment or tax sale, without first giving the mortgagee six months notice, and also the right to redeem.

The Citizens Committee drew up a memorial on the subject of this bill and placed it in the hands of the Hon. E. RHOADES, from Syracuse, which he presented, and moved that the bill be recommitted to the Committee on Finance, and it was so recommitted.

The Committee on Finance, of which Judge Bockee is chairman, was at once convened. Judge Bockee and Judge Porter, present. The Citizens Committee appeared before these two intelligent senators and stated their objections to the details of the bill and proposed two entire new bills as substitutes. The Committee on Finance approved of both these bills, aud after giving the Citizens Committee another hearing, reported both bills to the Senate, and both would undoubtedly have been passed but for the necessary absence of Judge Bockee in consequence of domestic afflictions.

—

IN SENATE,

MARCH 29, 1843.

Brought in by Mr. BOCKEE.

"An act to amend the Revised Statutes in relation to the exemption of incorporated companies from taxation, and for other purposes.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

"Sec. 1. Section 9 of Title 4 of Chapter 13 of Part 1 of the Revised Statutes, which authorizes the exemption of incorporated companies in certain cases from taxation, is hereby repealed.

"§ 2. All banks established under the act entitled "An act to authorise the business of banking," passed April 18, 1838, shall be subject to taxation on the amount of capital paid in, or secured to be paid, in the same manner as incorporated banks.—And the proper officer or officers of such banks shall make an annual statement to the Comptroller and the assessors in the manner provided by the second section, Title 4, Chapter 13, of the first Part of the Revised Statutes.

"3. The provisions of the 15th section of the 2d Title of the 13th Chapter of the first Part of the Revised Statutes shall be extended to all incorporated companies and other associations subject to taxation; and the affidavit in such case may be made by the president, cashier, secretary or treasurer thereof: and such companies or associations shall be assessed on the actual value of their real and personal estate existing at the time the assessment may be made.

"§ 4. This act shall take effect immediately.

—

REMARKS.

The other bill we have loaned the copy of and it cannot be found. We will obtain another copy from Albany and insert in the after pages.

—

The provisions of these bills are argumentative, yet notwithstanding this we will add a few remarks.

First, The bill recommitted contained a a provision for repealing the act requiring notice to mortgagees.

Previous to the passage of this ast requiring notice to mortgagees there was no security in a mortgage against an assessment or tax sale, and a mortgage of one hundred thousand dollars might have been defeated and rendered worthless by a tax or

assessment sale for a few shillings. No good citizen could desire to favor a class of *land-sharks* who seek to get *acres* for *cents*, and thus deprive the honest owner of his habitation and his home. There are two classes of bidders at these sales, one class called "*Shylocks*," who are for getting large interest for their money; another class who hope from the poverty or misfortune of the owner, or from his being ignorant of the sale to get the land or compel him to redeem it at a price equal to a second purchase.—This latter class have been numerous in New-York.

In discussing this subject, before the committee on Finance they became satisfied that there was necessity of reinforcing this act in reference to mortgagees, and to extend the same protection to owners and persons otherwise interested in lands and also to protect them from the rapacious fees of public officers.

It was fortunate that this important subject fell into the hands of the committee on Finance which is composed of able practical men.

Second, The Taxing of Institutions, for capital irretrievably lost is unjust, inequitable and absurd. Such a tax is not contemplated by the existing laws, but some judicial officers think they find an obscurity on this head in the existing statutes. It was therefore deemed important to make the matter so plain that it could not be misunderstood. If the present law had been repealed, a bank with an original capital of one million of dollars that should loose nine hundred ninety nine thousand dollars of its capital would be obliged to pay a tax on the remaining thousand sufficient at once to exhaust the remnant.

The provision which taxes Banking Associations, is objected to by the officers of these institutions, but we cannot agree with them in the conclusion they come to. If they are not already taxable, they should be, for their actual capital existing in stocks or money. Those whose stocks are in bonds and mortgages and the stockholder indebted to the association for the amount of such mortgages, present a question of equitable consideration.

Mutual Insurance Companies it is urged by intelligent business men, should not be taxed. We addressed a letter to the Hon. M. Brimmer, Mayor of Boston on the subject of taxation in that city. In his reply, he states, that mutual Insurance companies are not taxed in Boston.

With respect to such companies, it would seem that if the associations have capital, that capital should be taxed.

Banks are taxable by the existing law, for capital paid in, aud *secured to be paid in.* It would seem from the wording of the law that if a stockholder had subscribed for a hundred shares of Bank Stock, and given his note to the institution, instead of money, that such stock would be taxable as capital stock, "paid in, and *secured to be paid in.*"

The monied institutions of our city, have the whole matter placed before them and when their officers shall have examined the subject the draft of a memorial to the Legislature will be submitted to them to sustain the last bills reported by Judge Bockee in the Senate, and a Remonstrance against the application of the corporation.

This sheet will be sent to all the monied corporations and associations in this State that each may take such action upon the subject as may be deemed by them needful and proper.

DOUBLE TAX,

Or, two taxes to be collected in one and the same year.

It is a matter of very great importance and one that should come to the knowledge of the people, that the public officers are afraid to have the extent of their extravagance known by the Tax payers, hence they contrive every possible way to cover up the waste gates, through which the public money finds an outlet.

During the session of the State Legislature of 1842, the Common Council applied to that body for the passage of a law to authorise the raising of two million and some thousands of dollars by tax, and the application was granted, and an act passed.—This tax was payable on the 10th day of February, 1843.

The Citizens had on the 10th of *February* 1842, paid a tax, of about one million four hundred thousand.

On the 18th March, 1842, Mr. Varian presented in the Senate a memorial from the Mayor, Aldermen and Commonalty, asking for a law to provide for "the earlier collection of taxes."

This application, upon the face of it, appeared plausible enough, but there was concealed beneath the cloak of "*an earlier collection*" a deep and matured plan of laying a double tax, and but for the well timed opposition and exposure, it would have succeeded.

We have only to look back to the message of Mayor Varian to the Common Council in 1839, for the unriddling of the mystery, and follow it down a little while, until we come to the application for the "*earlier collection of the tax.*"

Mr. Varians message was made in May 1839, in which he uses this language:

"The practice which has *within a few years* grown up in the Common Council, of borrowing large sums of money under that provision of the Charter which authorises temporary loans in anticipation of the annual tax, I consider injurious to the financial interests of the City, and not contemplated by provisions of the Charter under which it is done. By a reference to the Comptroller's report, it will be seen that during the year 1838, temporary loans, amounting to Eight Hundred Thousand Dollars were made by him, in addition to the sum of *Four Hundred and Eleven Thousand Nine Hundred and seventy-five dollars and thirty-eight cents borrowed from the City Aqueduct Loans, &c.*"

"*These loans could, by the Charter, only be made in anticipation* of the tax of 1838, as the tax of 1839 was not authorised by the Legislature, and the amount so borrowed was more than the whole tax levied. Of this amount so borrowed in 1838, there still remains unpaid the sum of $204,271.27, and since the commencement of 1839 the borrowing of $300,000 has been authorized by resolution, as a temporary loan, while there remains unpaid of the tax of 1838 comparatively a small amount. Such a system, if continued, must eventually end in direct violation of the provisions of the charter, and in the accumulation of a debt which is paid from one year to another by temporary loans, and which will always be a heavy burden upon the financial department of the city.

"The provision of the charter was expressly intended to *prevent* the Common Council from incurring snch debt, and to confine the expenditures of the city to its annual income; and the authority then given to borrow money in anticipation of the tax, was only intended to defray the *ordinary expenses* of the city, in cases when, from unforseen occurrences, the ordinary collection of taxes had not been made to a sufficient amount."

It will be borne in mind that Mr. Varian is a Democrat and it is the extravagance of the **Whigs** he is taking to task.

The Whigs were in debt when he entered the Mayoralty $504,271.27 as appears from his statement above quoted.

Now on the 14th of January 1840, about eight months after, Mr. Varian, states to the Legislature under his official name and seal, the amount, increased to the enormous sum of **$1,700,460,00.**

The memorial is now on file in the archives of the Senate and contains as follows:

"To the Honorable the Legislature of the State of New York.

"The memorial of the Mayor, Aldermen and Commonalty of New York, *respectfully represent*,

"That by reason of the great expenses which they have incurred in consequence of the various improvements in the said city, they have found the ordinary revenues of the Corporation altogether inadequate to meet the demands which these expenses have produced, and that they have therefore, from time to time, been obliged to issue their bonds under their Corporate Seal, to defray some of these expenses, as a mere means of temporary relief. The amount of this floating debt on the 31st of December last, amounted to *One Million Seven Hundred Thousand Four Hundred and Sixty Dollars*, and can probably be reduced from anticipated sources of revenue to *One Million Three Hundred Thousand.*

"The amount to be raised by the annual tax bill will be required for the ordinaty expenses that will accrue pending its collection, and will therefore furnish no relief in liquidation of the floating debt.

Mr. Franklin, from the Select Committee to whom was referred the memorial of the Mayor, Aldermen and Commonalty of the City of New York, praying for a law for the earlier collection of taxes within the city of New-York,

REPORT:

That they have had the matter set forth in the said memorial under consideration, and have agreed to report a bill pursuant to the prayer thereof. It seems to your committee that the city of New York has very unnecessarily, for many years, labored under great inconvenience arising from the want of any provision of law to compel the payment of taxes within the fiscal year for which they are levied. The taxes for any particular year are not confirmed by the board of Supervisors until about the middle of October, and are placed in the collector's hands in the early part of November.

The law, however, fixes no penalty or charge of interest for any delay in the payment of tax, until the tenth of February in the following year. The consequence is that the wealthiest citizens avail themselves of the longest time which is allowed; and but a very small proportion of the tax is paid until nearly a year after the same is authorised by the Legislature. The city, being thus destitute of the means of defraying its ordinary expenses by its legitimate means, is obliged to resort to its credit for such purpose; and thus becoming a borrower, by temporary loans from the banks, not only descends from the station to which her natural resources entitle her, but materially interferes with the intesests of the trading community, by pre-occupying the means of their accustomed facilities. The city of New-York has, in this way, accumulated a considerable floating debt.

Your committee recommend, as a means of relief, an amendment to the present law, so that the books shall remain in the hands of the assessors, for the inspection of the public, for twenty days after the 20th day of August, and shall be returned to the board of Supervisors on or before the 20th day of September following. The books may thus be placed in the collectors hands by the early part of October.

Your Committee also recommend an amendment in the law, so that the one per cent interest now established by law, should commence on the last day of November, upon all taxes then unpaid. These alterations will enable the city government to effect a much earlier collection of taxes, and within the fiscal year in which the disbursements are made for which the tax is intended to provide. While this change cannot but be regarded as of great importance to the city of New York, your committee are not insensible of the advantages which may shortly accrue to the State, should its own necessities require that it should itself resort to taxation, the proportion of which to be contributed by the city of New York being 5-12 of the whole sum to be raised,

In accordance with the above views, your committee report to the Senate the accompanying bill:

"*An act respecting the Collection of Taxes in the City and County of New York.*

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The assessors annually chosen in each ward of the city of New York, shall on or before the fifth day of June next, after being chosen, proceed to assess the property in their respective wards according to law, and shall complete the assessment according to law on or before the fifteenth day of August next following, and make out one fair copy thereof to be left with one of their number on or before the twentieth day of August next following, and shall thereupon according to law give notice of having completed such assessment. and that a copy thereof is left with one of such Assessors, (naming him,) where the same may be seen and examined by any of the inhabitants from the said twentieth day of August to the tenth day of September following both inclusive; that they will meet at the expiration of the said tenth day of September at a place in said notice to be specified to review their assessment on the application of any person conceiving himself aggrieved, and such proceedings shall thereupon take place as is by law provided. And such assessors shall sign the said assessment roll, and deliver the same on or before the twentieth day of September next ensuing to the Comptroller of the said city, who shall deliver the same to the Supervisors of the said city at their next meeting, and that for any neglect omission or refusal to perform the requirements of this section, the parties offending shall be liable to the penalties mentioned in the eleventh section of the Act, April 23d, 1823, "Entitled An Act for the assessment and collection of Taxes."

§ 2. The first section of the act entitled an act authorising a per centage to be added to unpaid taxes in the city of New York, passed April 13, 1835, is hereby amended, so that the said section shall read asfollows: Whenever any tax of any description of the estates real or personal, of the freeholders and inhabitants of, and situated in the city of New York, shall remain unpaid on the *first day of February* next ensuing, the time prescribed by law for the delivery of the assessment roll to the collectors in said city, it shall be lawful for the collectors whose duty it may be to collect such tax, to charge, receive, and collect in addition to the amount of such tax, one per cent. on the amount thereof, and to charge, receive, and collect upon such tax so remaining unpaid on the last day of each month, between the month of November and the time prescribed by law for the collectors in the said city to make their returns to the chamberlain or treasurer thereof, a further addition or increase of one per cent, on the amount of such tax, and such increase or per centage shall be paid over and accounted for by such collector as a part of the tax collected by him.

§ 3. The act entitled "an act to amend the acts respecting the collection of taxes in the city of New-York, passed April 3d, 1839 is hereby repealed."

—

Page 268.

MONDAY, 10 o'clock, A.M., March 21, 1842.

The bill entled "An act respecting the collection of taxes in the city and county of New York," was read the third time.

On motion of Mr. Scott,

Ordered, That said bill be referred to the committee on the judiciary to report to the Senate whether in the opinion of said committee, the votes of two thirds of all the members elected to the Senate are required to pass the said bill.

—

Page 278.

WEDNESDAY, 10 o'clock A.M. March 23, 1842.

'Mr. Strong from the Committee on the Judiciary, to which was referred the bill entitled "An act respecting the collection of taxes in the city and county of New-York," to report to the Senate whether in the opinion of said committee, the votes of two thirds of all the members elected to the Senate are required to pass the said bill, reported that in the opinion of the committee, the votes of two thirds of all the members elected to the Senate are required to pass the same; which was agreed to by the Senate.

—

"Page 310.

SATURDAY, 10 o'clock, A.M. March 26, 1842.

'The bill entitled an "An act respecting the collection of taxes in the city and county of New-York," was passed; two thirds of all the members elected to the Senate voting in favor thereof, as follows, to wit:

FOR THE AFFIRMATIVE.

Messrs. Bartlit, Bockee, Corning, Denniston, Dixon, Faulkner, Foster, Franklin, Hard, Hawkins, Hunter, Johnson, Nicholas, Paige, Platt, Rhoades, Ruger, Scott, Sherwood, Strong, Varian, Varney.—22.

FOR THE NEGATIVE.

Messrs. DICKINSON, HUNT, ROOT.

Ordered, That the Clerk deliver said bill to the Assembly, and request their concurrence in the same.

—

ASSEMBLY JOURNAL.

Page 661.

SATURDAY, March 26, 1842.

The Senate sent for concurrence, the bill entitled, "An act respecting the collection of taxes in the city and county of New-York," which was read the first time, and by unanimous consent was also read a second time, and referred to the committee on the internal affairs of towns and counties.

—

Page 839.

THURSDAY, April 7, 1842. Half-past 3 o'clock, P.M.

On motion of Mr. D. R. F. Jones, and by unanimous consent,

Resolved, That the engrossed bill from the Senate, entitled "An act respecting the collection of taxes in the city and county of New-York," be taken from the general orders, and ordered to a third reading.

—

Page 941.

MONDAY, April 11, 1842.

The engrossed bill from the Senate, entitled "An act respecting the collection of taxes in the city of New-York," was read the third time.

Mr. Townsend moved that the said bill be recommitted to the committee on the internal affairs of towns and counties, with instructions to report instanter.

'Mr. Speaker put the question, whether the House would agree to the said motion of Mr. Townsend, and it was determined in the affirmative.'

Here commenced an important movement of the Anti-Assessment Committee, in reference to the Ward Collectors. The Corporation had thus far progressed in this sliding tax bill, to saddle the citizens with two taxes in one year, by moving the pay day from 1843 to 1842, under the specious pretext of an earlier collection of taxes; a pretty move this to cover up their wasteful expenditures, but they were caught in the act, and plainly told that the Executive would return the bill, and the manœuvre would be blown.

Mr. Solomon Townsend, of the House of Assembly, a member from the city of New-York, was at once applied to by a delegate of the Anti-Assessment Committee, to arrest this bill, authorising a double tax upon the people of that city, and that indefatigable and uncompromising member, with his characteristic promptness, at once laid hold of the subject, and moved that the bill, which had gone through the Senate with rail road speed, had been in the House by *hocus pocus*, moved out of its place, and ordered to a third reading, be re-committed, and that the committee be required to report again *instanter*.

Mr. ————, from Franklin County, a leading member of the Whig side of the House, sustained Mr. Townsend, and the bill was recommitted, and the following amendment, proposed by the Anti-Assessment Committee, added to the bill:

'§ 4. Any person who may be desirous of paying his tax or taxes, previous to the first of February, shall, on paying the amount thereof, to the Comptroller of the City of New-York, be allowed a deduction therefrom, at the rate of six per cent. per annum.'

Another amendment, proposed by the Anti-Assessment Committee, viz: to substitute 11th of February for 1st of November, was rejected by the Standing Committee!

Page 942.

"Mr. D. R. F. Jones, from the Committee on the internal affairs of towns and counties, to which was re-committed the engrossed bill from the Senate, entitled 'An act respecting the collection of taxes in the City of New York,' reported that the Committee had examined the said bill, and made sundry amendments thereto; with which amendments they saw no reason why the said bill should not be passed into a law.

Ordered that the bill do have its third reading."

Mr. Townsend here moved to strike out the words, 'November first,' and insert in place 'February first.' His motion was sustained by the House, and the bill was thus amended.

"Thereupon,

The said engrossed bill from the Senate, entitled 'An act respecting the collection of taxes, in the city of New York,' having been amended by striking out of the third section the words 'NOVEMBER FIRST,' and inserting 'FEBRUARY FIRST,' was read the third time.

Resolved, That the bill and amendments do pass.

Ordered, That the Clerk return the said bill to the Senate, and inform them that the Assembly have passed the same, with the amendments thereto, therewith delivered.

SENATE JOURNAL,

Page 511.

MONDAY, Half-past three o'clock, P. M. April 11, 1842.

The bill entitled "An act respecting the collection of taxes, in the City and County of New York,' was received from the Assembly, with a message informing that they had passed the same with the amendments therewith delivered.

Resolved, That the Senate do concur in the said amendment; two thirds of all the members elected to the Senate voting in favor thereof, as follows; to wit:

For the AFFIRMATIVE, Messrs. Bartlett, Bockee, Corning, Deniston, Dixon, Faulkner, Foster Franklin, Hard, Hawkins, Hunt, Hunter, Nicholas, Johnson, Paige, Peck, Platt, Root, Ruger, Scott, Sherwood, Strong, Varian, Works, 24.

NEGATIVE, none.

Ordered, That the Clerk return the same to the Assembly."

—

ASSEMBLY JOURNAL.

"Page 949.

Half-past three o'clock, P. M.

A message from the Senate, with the bill and amendments therein mentioned, was received and read, informing that they had concurred with the Assembly in their amendments to the bill entitled 'An act respecting the collection of taxes in the City and County of New York,' and amended the said bill accordingly.

The said amended bill having been examined,

Ordered, That the Clerk return the same to the Senate."

SENATE JOURNAL.

"Page 517.

Seven o'clock, P. M.

The Assembly examined and returned the bill, entitled 'An act respecting the collection of taxes in the City and County of New York.'

rested in real estate, who will file the memorandum required. This bill needs no argument to sustain it, it is of itself argumentative throughout.

As to limiting charges for advertisements, certificates and lease, to the rates charged by the State Comptroller, we will remark: that the expense made by the State Comptroller, for advertising sales, giving certificates, and advertising for redemption, is but 30 cents, while, for advertising sale, giving certificate, advertising to redeem, and granting lease, the officers of the Corporation of the City of New York, charged for about two and a quarter acres of pasture land, which is in one piece, and which they, for the sake of making fees, subdivided on paper into 36 lots, advertised them as 36 distinct pieces, sold it as 36 distinct pieces, give 36 distinct certificates, and 36 distinct leases; there were 36 distinct charges, $16.80 each, making an expense of $604.80 for the services for which Comptroller FLAGG would have charged in all, but EIGHTY CENTS. What a contrast!

"IN SENATE,

MARCH 29, 1843.

Brought in by Mr. BOCKEE.

An act, to amend an act entitled 'An act authorizing mortgagees to redeem real estate sold for taxes and assessments,' passed May 14th, 1840.

The People of the State of New-York, represented in Senate and Assembly, do enact as follows:

Sec. 1. The first section of the act entitled 'An act authorizing mortgagees to redeem real estate sold for taxes and assessments,' passed May 14th, 1840, is hereby amended so as to read as follows:

No sale of real estate for the non-payment of any tax or assessment shall destroy or in any manner affect the lien of any mortgage thereon duly recorded or registered, in any case where the mortgagee shall have filed a written memorandum of his mortgage, with a definite or particular description of the mortgaged premises, in the office of register of deeds, or clerk of the county in which the premises are situate; which memorandum shall also state the residence of such mortgagee or his place of business, and specify where notices shall be directed to him. And it shall be, and is hereby made the duty of the register of deeds and clerk of the county, to prepare and keep in his office, a book in which he shall record such memorandums; and he shall be entitled to six cents per folio for registering and filing such memorandum, and no more; and such book shall contain an index, alphabetically arranged, and shall be subject to the inspection of any person, during office hours, free of charge.

§ 2. In all cases of sale of land for any tax or assessment imposed thereon, in any city or village within the bounds of this State, the charge for advertising notice of sale and notice of redemption, for making and delivering a certificate of sale, and for executing and delivering a lease or deed therefor, shall be the same that is made by the State Comptroller, for advertising and selling lands for taxes, and no more.

§ 3, Owners, lessees, assignees, or persons otherwise interested in land situate within the bounds of this State, who shall file in the office of register of deeds, or in the office of clerk of the county where such land is situate, a written memorandum, stating his place of residence or place of business, and a particular and definite description of his land and where situate, shall be entitled to the same notice as provided in the act entitled 'An act authorizing mortgagees to redeem real estate sold for taxes and assessments,' passed May 14th, 1840, and shall have the same right and privilege to redeem such land from any tax or assessment sale, as is in said act allowed to mortgagees.

§ 4. The memorandums to be filed in pursuance of this act, shall be filed prior to the expiration of the two years allowed by law for the redemption of lands sold for taxes or assessments."

COLLECTION OF TAXES,

FROM BANKS AND OTHER INCORPORATED INSTITUTIONS, IN THE CITY OF NEW YORK.

The Legislature, at the last session, on the application of the Corporation of the city of New York, altered the law as to the collection of taxes from Banks and incorporated Companies. It will be borne in mind that we have been treating of the assessment of taxes upon incorporated Companies. We are now treating of the *collection* of taxes from such institutions.

It will probably be most useful and convenient, to the Banks and other Institutions, to give a full copy of the present law, which is as follows:

"CHAPTER 230.

Passed April 18th, 1843.

ART. 2.

§ 18. The *said receiver* shall demand payment of all taxes assessed on incorporated companies *in the said city*, from the president or other proper officer of such companies, and if not paid, shall proceed in the collection and payment thereof, in the same manner as in other cases, and *his* receipt shall be evidence of the payment of such tax.

§ 19. Such taxes shall be paid out of the funds of the company, and shall be rateably deducted from the dividends of those stockholders whose stock was taxed, or shall be charged upon such stock, if no dividends be afterwards declared.

§ 20. If the *said receiver* shall not be able to collect any tax assessed upon an incorporated company, he shall return the same to the *chamberlain*, and at the same time make affidavit before him, or some other officer authorized to administer oaths, that he had demanded payment thereof from the president, or other proper officer of the com-

pany, and that such officer had refused to pay the same, or that he had not been able to make such demand, as the case may be; and that such company had no personal property from which he could levy such tax.

§ 21. The *chamberlain* shall thereupon certify such facts to the Comptroller *of this State*, who shall pass to the credit of such *chamberlain*, the amount of all taxes so returned and certified, as in the cases of taxes on the lands of non-residents.

§ 22. The Comptroller *of the State* shall furnish the Attorney General with the names of all companies refusing or neglecting to pay the taxes imposed on them, with the amount due from them respectively; and the Attorney General shall thereupon file a bill in the Court of Chancery against every such company, for the discovery and sequestration of its property.

§ 23. The Chancellor, on the filing of such bill, or on the coming in of the answer thereto, shall order such part of the property of such company to be sequestered, as he shall deem necessary for the purpose of satisfying the taxes in arrear, with the costs of prosecution; and he may also, at his discretion, enjoin such company, and the officers thereof, from any other proceedings under their act of incorporation, and may order and direct such other proceedings as he shall deem necessary to compel the payment of such tax and costs.

§ 24. The Attorney General may also recover such tax, with costs, from such delinquent company, by action in any Court of record in this State."

"ARTICLE 4.

Repeal of other provisions, and time when this act shall take effect.

SEC. 1. The provisions of Chapter XIII, of the first Part of the Revised Statutes, regulating the collection of taxes, shall hereafter be inapplicable to the City and County of New York.

§ 2. All former laws, acts and parts of acts, relating to the collection of taxes in the City of New York, or to the officers by whom the same shall be collected, and to the sale of property, real or personal, therefor, or to the redemption of real estate sold for taxes in the said city, and all other acts or parts of acts inconsistent herewith, are hereby repealed.

§ 3. Neither of the two preceding sections, shall in any manner be construed to affect any act done or right accrued, or any proceeding, or any suit of prosecution, for any offence, or for the recovery of any penalty or forfeiture, commenced or pending, under any of the provisions, acts, or parts of acts, thereby repealed, or declared inapplicable to the City and County of New York.

§ 4. This act shall take effect immediately, except the provision to abolish the office of collector of taxes, which provision shall take effect on the first day of April, 1844."

REMARKS.

The above is the only law now in force, for collecting taxes from Banks and other incorporated Companies, in the City of New York. All other laws are repealed.

The interests of incorporated Companies, have not been injured by this new law. As to collecting the tax, it was a necessary change in doing away with the duties of ward collectors and substituting a general receiver.

—

REVIEW OF THE PROPOSED LAW

AS TO INCORPORATED INSTITUTIONS, INCLUDING INCOPORATIONS AND ASSOCIATIONS.

The first section on the title page of this number contains all the words of the first section of Title 2 of Vol. 1 of the Revised Statutes, pg. 403 new edition, and an addition thereto of all the words which are in italic. The bill reported by Judge Bockee on the 24th March, on page 102 of this number covers all the ground which is needful in this, and besides that, the bill reported by Judge Bockee, puts all the institutions throughout the state upon the same footing, whereas the New York city corporation bill, singles out the institutions on this island as to be extra burdened. This is all wrong.

The second section requires the return to be made before the first of *June*, instead of July, with a view to lay a double tax by sliding the tax one year back in the order of time, by which means the Banks and other institutions would be required to pay two annual taxes out of two semi-annual dividends!!

The words '*seventh*,' '*first*,' '*act*,' '*act*,' in section are inserted to make the provision of the particular section apply to this particular bill, instead of the general law, as now existing.

In the third section the word "June" is substituted in the bill for the word "*July*," in the present law, for the reasons stated as to section two as above.

In section 4 and 5 the words "*of this state*,"—"*said*"—"*of the State*"—were inserted to designate the State Comptroller from the City Fiscal.

In section 6 the word "*Ward*" in the proposed bill is substituted for word "*town*" in the existing law.

Sections 7, 8, 9, 10, and 11, in the proposed bill are exact copies of Section 7, 10, 11, 12, and 13 of the present law, omitting and repealing section 8 and 9 of the existing law.

In sec. 12, the word "*ward*" in the proposed bill is substituted for word "*town*," in the existing law.

In sec. 13. The words "*on the third Wednesday of August in each year, accompanied by the receipts of the Chamberlain*," in the proposed bill, are substituted for the words "*annual*" meeting "*within two days from the commencement thereof accompanied with the receipt of the county Treasurer*," in the present law.

The Revised Statutes already require the city Chamberlain to perform the duties of county Treasurer. The substituting the 3d Wednesday in August for the annual meeting of the Board of Supervisors late in October, is for the purpose of sliding back the tax, and collecting two annual taxes from the banks, &c., from the proceeds of two semi-annual dividends. It would be far more creditable to the Corporation to come out at once and ask a tax of Four Million of dollars, than to try thus underhandedly to slip out a couple of millions under the specious pretext of "*an earlier collection of the tax.*

The 142d section, in the proposed bill, corresponds with section 15, in the existing law.

Section 15 of the proposed bill corresponds with section 16 of the existing law, with these exceptions, viz: words "*of this state*" are added to distingnish the state Comptroller from the City Fiscal, and words "*the said City*" are substituted in the bill for words "such County" in the present law.

The proposed Bill also contains these provisions,

"Title 1—Sec. 13. The term incorporated company in this act shall be construed to include all the Banking and other associations having capital stock."

The two sections 8 and 9 of the existing law, proposed to be repealed by this bill are as follows:

"8. The provisions of the 15th section, of the second title of this chapter, shall be, and are hereby extended to the incorporated companies in the two preceding sections named; and the president or other proper officers, may make the affidavit required by said section."

The two preceding sections refered to are sections 6 and 7 on the title page of this number.

§ 9. "If the President or other proper officers of any incorporated company named in the assessment roll, shall show to the satisfaction of the Board of Supervisors, at their annual meeting, within two days from the commencement thereof, by the affidavits of such officer, to be filed with the clerk of the Board, that such company is not in the receipt of any profits or income, the name of such company shall be stricken out of the assessment roll, and no tax shall be imposed upon it. And the assessment of every monied or stock corporation, authorised to make dividends or its capital, from which no such affidavit shall be received, shall be conclusive evidence, that such corporation was liable to taxation and was duly assessed."

Section 15, of title 2, referred to in the above quoted section 8,—allows institutions to be taxed on their actual, instead of their nominal capital. The courts are disposed to think its provisions obscure. Mr. Bockee's bill, on page 10, of this number is declaratory, and to carry out the equity of the provision but the corporation seek to abrogate it altogether, and to collect a tax on sunken capital.

The third section of Mr. Bockee's bill, on page 102 of this number, was substituted by the finance committee for the following section proposed by the Citizens' Committee.

Upon this house I pay the following taxes :

State Tax, 20-100 on the $100, amounting to . . .			$24.00
County Tax, 50-100	do.	do.	60.00
City Tax, 36-100	do.	do.	43.20
Poor Tax, 18-100	do.	do.	21.60
			$148.80
If I use the Schuylkill water in my house, as I do, I pay for household purposes and bath,			8.00
			$156.80

These constitute all the taxes assessed upon that piece of property.

I pay also to the City, to the County, and to the Poor Tax, what is called a personal tax, $2 to each fund ; this is not rated upon personal property, but strictly upon the person, rated I believe upon the trade or occupation, the lowest rate being 20-100, the highest $2.

To the State I pay a tax upon personal property, emoluments of office, &c., which you could not understand without an accurate examination of the law.

These taxes upon my house, are, as I have said, *all* that it pays for the year 1843.

The City Tax pays for watching, lighting, paving, police, City government, cleansing, &c. &c. &c., in fact for all City expenses.

The City is included in, and forms part of the County, and therefore pays a County Tax. This fund pays for roads, bridges, courts, (not including salaries of Judges,) damages, &c.

Poor Tax pays for the support of the poor.

These are the Taxes of the City proper. But the City proper is but a small portion of the City apparent. That includes Corporations called Southwark, Moyamensing, Spring Garden, Penn township, Kensington, each of which sustains its own local operations by its own taxes.

Thus Spring Garden—there a house, value $12.000 would pay the same state tax, county tax, and poor tax, that is paid on my house. It would not pay a *City tax*, but it would pay a Spring Garden tax, laid by the authorities of the district, probably *less* than a city tax. The state of advancement of each district being the indication of the magnitude of the tax.

In some of the districts they *pave* by assessments—upon the holders of the property in front of which the pavement is made—not so in the city.

If you would pay us a visit, and pass an hour with me I would give you more information than by writing a volume.

Very respectfully,
Your ob't servant,
J. M. Scott.

E. Meriam, Esq."

—

Copy of a Letter from Hon. M. Brimmer, Mayor of the City of Boston to E. Meriam.

"Boston, Oct, 23d, 1843.

Sir—I have to acknowledge the receipt of your favor of 17th of Oct., and I now enclose answers to your several inquiries. In answer to the 6th interrogatory I would add, that in building sewers and drains one fourth of the expense is paid by the city; paving is done at the expense of the city. The City own two wharves, all other wharves are private property. I send you the last annual report of the receipts and expenditures of the city of Boston, from which you will gain much information in relation to the taxes of the city.

Respectfully your ob't. s't.
M. Brimmer.

E. Meriam, Esq.

Answers enclosed referred to above.

The questions were drawn by ourselves, the answers written by His Honor the Mayor of Boston.

Question 1st.—Is the tax of the City, and also the tax of the County imposed upon Real and Personal Estate blended together, constitute one tax : or are these imposed separately—if the latter what is the relative proportion of the county, to that of the City tax ?

Answer.—The City ot Boston and the small town of Chelsea, constitute the county of Suffolk, and the taxes are blended together and constitute one tax, of which $56,000 is appropriated to expenses of Courts, repairs &c., constituting about 1-14th of the annual appropriations.

Q. 2d.—Are your Banks and incorporated Companies, taxed upon original nominal capital, paid in, or upon the capital existing at the time the tax is laid ?

A.—The tax assessed by the State on Bank capital, is levied upon the capital as chartered. A Bank with a chartered capital of one million, pays one per cent on that amount without regard to losses.

Q. 3.—Is the State tax an annual imposition of *one per cent.*

A.—The State Tax on the Banks is annual imposition, stockholders *also* pay the city and county tax.

Q. 4th.—Have you Poll tax, how is it imposed, what rate, and is it easy of collection ?

A.—A poll tax of $1.50 is levied upon "every Male inhabitant between the ages of 20 and 70 years, whether a citizen of the U. States or an alien. The poll tax of Minors is assessed to the parent, guardian or Master. It is as easily collected as any other tax.—It gives all persons paying such tax within 2 years, except aliens, a right to vote.

Q. 5th,—Have you any data, by which you can easily determine what the aggregate amount of the tax upon "capacity or income" amounts to annually, or what proportion it bears to the aggregate tax ?

A.—We have no means of ascertaining.

Q. 6th.—Does the expense of building Sewers, Drains, paving Streets and building Wharves, constitute any part of your City tax ?

A.—See letter.

Q. 7th.—Have you any local assessment

for opening, widening, extending or straightening streets, if so, how imposed?

A.—A certain amount is annually appropriated for the widening of streets, and included iu the annual tax like any other appropriation. There is no betterment law in this State.

Q. 8th.—If a merchant engaged in business in your city and having his counting room on one of your wharves, resides with his family at Watham where would he be taxed for his personal property which consisted in debts receivable?

A.—He would be taxed where he resided on the first day of May; a tax must be paid either in Boston or Waltham.

Q. 9th.—If a person owning a house in the city of Boston, and also a house in the town of Waltham, residing in the warm season at Waltham, and in the cold season at Boston, in which place would he be taxed for personal property?

Answered as above in No. 8.

Q. 10th.—What constitutes a residence in your city for the purpose of taxation?

A.—Being in the city on the first day of May and previously with *intention* to reside.

Q. 11th.—In the valuation of real estate, is the opinion of the assessors as to the value of a house and lot, *absolute* and without repeal or review?

A.—The valuation of the Assessors and Assistant Assessors is not final. After Six months an appeal lies to the Mayor and Aldermen. An application of this kind is very unusual and it is not known that they ever granted relief.

Q. 12th.—By what officer is your tax collected; and when unpaid upon real estate, do you sell so much of the real estate as will pay the tax, or how otherwise?

A.—Taxes are collected by the city and county treasurer. So much of real estate as is necessary to pay the tax imposed may be sold at public auction, after being advertised three weeks. The lien on the estate continues two years, even if sold; if not sold, there seems to be no termination to the lien.

Q. 13th.—What provision of law exists in your city to enable your assessors to ascertain persons liable to taxation who reside in hotels?

A.—All Innholders and keepers of boarding houses are required by law to make returns, on application of any assessor, of permanent boarders, under a penalty of twenty dollars for refusing or giving false information. Transient persons are not liable.

Q. 14th.—If a foreign Banker, resident of any of the cities of Europe has funds on deposite in your Banks, or balances in the hands of your Merchants, would such be liable to taxation under your laws?

A.—Funds in Banks or in the hands of Bankers or Commission Merchants belonging to Foreigners are not subject to taxation.

Q. 15th—If a subject or other person, residing in Europe, holds stock in your city debt, standing in the name of a citizen of Boston, on which such citizen receives the interest, to remit the non resident, would that stock be taxed, and to whom?

A.—Persons not resident in the State, holding stock in Banks, city debt, &c., are not liable to be taxed therefor.

Q. 16th.—Does your city pay the salaries of any judicial officers who may be called upon to adjudicate upon matters of a pecuniary character arising between the city corporation and a citizen?

A.—It does not. If questions of dispute be referred to referees the fees of reference are paid as said referees shall direct.

Q. 17th.—If the agent of a foreign manufacturer receiving goods and doing business in your city sells a million of dollars annually of merchandise on which he receives a commission of five per cent. How would he be taxed in Boston?

A.—The facts being satisfactorily established, the merchant would be taxed on an income of $50,000.

If A owns a house worth $12,000 and B has a mortgage on it for $12.000, both A and B are taxed; one for real, the other for personal estate.

—

"Boston, Nov. 4th 1843.

"Sir,

Your favor of first instant is received and I beg to return you my thanks for the documents you have sent me.

The following is the query you have put and the answer.

Q.—When you tax "income," how do you rate it in comparison with real estate or personol property? Suppose for example, A has a house and lot worth $10.000 and debts due him $10.000, making $20,000, and B has an income of $1.000 nett on sales by commission, what would the tax of B amount to at 60 cents on the $100 for A's property!

A.—A's house and lot $10.000 at 60 cts. $60.00
" Debt receivable 10.000 being personal property, 60 cts. $60.00

$120.00

B. Income by commission of $1000, 60 cts. $6.00

B would also be taxed for any capital he might possess at the same rate.

Valuation and Tax of the city of Boston. 1843.

Real Estate,	$67.673.400,	6.20	419.575.08
Personal,	42.372.600,	6.20	262.710.12
	110.046.000		$682.285.20
Polls,	20.063,	1.50,	30.094.50
			$712.379.70

Your ob't servant,
M. Brimmer, Mayor.

E. Meriam Esq."

Early in October, we received a letter from the Hon. M Brimmer, Mayor of the City of Boston, in reply to a letter we addressed to that gentleman, making certain inquiries as to the mode of assessing taxes in that city, and as to what species of property the tax is imposed upon. This letter, we have had the misfortune to lose. We have, however, a recollection of the contents, in general, which are substantially, as follows:

The tax is assessed by three permanent assessors, with salaries, and two assistant assessors in each ward, without salaries, all of which are appointed by the mayor and aldermen.

The tax, is assessed upon real and personal estate.

If A owns a house and lot in Boston, worth, $12,000, and furniture worth $12,000 A would be taxed upon the house and lot, for $12,000, real estate, and for the furniture, (all over 1000) would be legally taxable, but the practice of the assessors is to rate furniture at one-fourth its cost in the tax rolls.—Furniture not exceeding $1000, is exempt from taxation.

Mutual insurance Companies, are not taxed in Boston.

Stocks in incorporated institutions located in other states, owned by inhabitants of Boston, are taxable as personal estate to such stockholder. Also, all goods, merchandize, ships at home and abroad. Debts receivable and income, as personal estate.

Debts payable may be deducted from debts receivable, but from no other personal estate. This is in accordance with the decision of the Supreme Court of Massachusetts.

There is, also a faculty tax, imposed upon capacity or income, from business &c.

Income is taxed as personal estate.

We have obtained from Gerard F. Hallock, Esq, one of the Editors of the Jour. of Commerce, a statement of the system of taxation in the city of New Haven, Connecticut, and that gentleman has also furnished us with an examination of his tax bill.

Real Estate, is estimated in New Haven for the purpose of taxation, at what is supposed to be the fair valuation.

It is there assessed as the basis of estimate for taxation that it yields 3 per cent income per annum.

Money at interest is put down at 6 per cent income per annum. A person who owns real estate $10,000, money at interest $10,000, would be rated for 1843 as follows:

Real estate	10,000	3 per cent,	300.00
Money at inter.	15.000	6 "	900.00
Upon this sum total			1200.00
State tax 1 per cent. on		$1200	12.00
Town do. 3 " "		1200	36.00
City do. 7 " "		1200	84.00
Total tax on income of		$25,000	$132.00

In connecticut the owners of real estate which is encumbered by mortgage pays a tax on the value of such real estate after deducting the mortgage, to be computed the same as above. The mortgagee pays the tax on his mortgage.

In the city of New York the tax is imposed upon real and personal estate.

For example, if A owns a house worth $12.000, and furniture worth $130 00, situ-

value of, and the same as to his personal estate.

The assessors have no discretion as to refusing to accept the oath, but must receive such affidavit, and reduce the assessed value, according to the value fixed in the affidavit.

Persons who are assessed, are allowed twenty days to make objections, viz: from 20th August to the 10th of September, but no proper means are provided for giving the persons assessed, personal notice; and besides, the particular time selected, is a bad one. At that season of the year, very many of our citizens are absent from the city.

Bank stock, and stock in other incorporated companies, in the city of New York, is taxed to the institutions, and is paid out of the earnings of the institutions, and consequently lessens the annual dividend, equal to the amount of such tax.

The Safety Fund Banks, also pay a safety fund tax to the State, which is equal to one half of one per cent. on their capital stock paid in, without regard to losses.

Under the act of April, 1843, the Banks also pay the State Comptroller for registering notes.

The stockholders are allowed by law, to deduct out of their personal estate, the amount of stock they may hold in any incorporated company, for which the institution pays the tax.

In the City of New York, there are a species of local taxes, called ASSESSMENTS. These are imposed on the owners and occupants of houses and lands, for paving streets, opening new streets, widening, straightening, and lengthening old streets; making fancy squares and parks; building riddling sewers and drains; for wells and pumps; fencing vacant lots, and filling up uneven ground. These assessments are vast in amount, and most oppressive and burdensome, and more abuses and corruptions have been practised in the imposition of some of these assessments, than has ever been practised in all the local assessments and general taxes in all the world besides.

In most of the other counties in the State of New York, real estate is assessed at from one quarter to one half its real value, while in the City and County of New York, real estate is generally valued by the assessors at more than its intrinsic worth.

EXTRACTS FROM THE TAX LAWS OF THE STATE OF MASSACHUSETTS.

OF PERSONS AND PROPERTY SUBJECT TO TAXATION.

"§ 1. A poll tax shall be assessed upon every male inhabitant of the Commonwealth, between the ages of sixteen and seventy years, whether a citizen of the United States or an alien, in the manner hereinafter provided, in this chapter.

§ 2. All property, real and personal, of the inhabitants of this State, not expressly exempted by law, shall be subject to taxation, in the manner provided in this chapter.

§ 3. Real Estate shall, for the purposes of taxation, be construed to include all lands within this State, and all buildings and other things erected on or affixed to the same.

§ 4. Personal Estate shall, for the purposes of taxation, be construed to include all goods, chattels, moneys and effects, wheresoever they may be; all ships, and vessels, whether at home or abroad; all moneys at interest, due the persons to be taxed, more than they pay interest for, and all other debts due to them more than they are indebted for; all public stocks and securities, stocks in turnpikes, bridges and all monied corporations, whether within or without the State, and also income from any profession, trade or employment, or from any annuity, unless the capital of such annuity shall be taxed in this State; and all other property returned in the last preceding valuation, for the purpose of taxation."

OF PROPERTY AND PERSONS EXEMPTED FROM TAXATION.

"SEC. 5. The following property and poles shall be exempted from taxation, namely:

Firstly, The property of the United States and of the Commonwealth.

Secondly, The personal property of all literary, benevolent, charitable and scientific institutions, incorporated within this Commonwealth; and such real estate, belonging to such institutions, as shall actually be occupied by them, or by the officers of said institutions, for the purposes for which they were incorporated.

Thirdly, The Bunker Hill Monument.

Fourthly, The household furniture of every person, not exceeding one thousand dollars in value; and also his wearing apparel, farming utensils, and mechanics tools, necessary for carrying on his business.

Fifthly, All houses of religious worship, and the pews and furniture within the same, (except for parochial purposes,) and all tombs and rights of burial.

Sixthly, All mules, horses, and neat cattle, less than one year old; and all swine and sheep less than six months old.

Seventhly, The polls and estates of all Indians.

Eighthly, The polls and estates of persons, who by reason of age, infirmity and poverty, may, in the judgment of the assessors, be unable to contribute towards the public charges."

OF THE TOWNS OR PLACES WHERE POLLS AND PROPERTY SHALL BE ASSESSED.

"SEC. 6. The poll tax shall be assessed upon each taxable person, in the town where he shall be an inhabitant, on the 1st day of May in each year, &c.

§ 7. All taxes on real estate, shall be assessed in the town where the estate lies, to the person who shall be either the owner or in possession thereof, on the 1st day of May; and in cases of mortgaged real estate, the mortgagor shall, for the purposes of taxation, be deemed the owner, until the mortgagee shall take possession, after which, the mortgagee shall be deemed the owner.

§ 9. All personal estate, whether within or without this State, shall, except in the cases enumerated in the following section, be assessed to the owner in the town where he shall be an inhabitant, on the 1st day of May.

§ 10. The excepted cases mentioned in the preceding section, are the following, namely:

Firstly, All goods, wares and merchandize, or any other stock in trade, including stock employed in the business of any of the mechanic arts, in towns within the State, other than where the owners reside, shall be taxed in those towns, if the owners hire or occupy stores, shops or wharves therein, and shall not be taxable where the owners reside.

Secondly, All machinery employed in any branch of manufactures, and belonging to any corporation, shall be assessed to such corporation, in the town or other place where such machinery may be situated or employed; and in assessing the stockholders for their shares in any manufacturing corporation, there shall first be deducted, from the value thereof, the value of the machinery and real estate, belonging to such corporation.

§ 13. Partners in mercantile or other business, whether residing in the same or different towns, may be jointly taxed under their partnership name, in the town where their business is carried on, for all the personal property employed in such business; and if they have places of business in two or more towns, they shall be taxed in those several towns for the proportions of property employed in such towns respectively; and in case of being so jointly taxed, each partner shall be liable for the whole tax."

OF THE MANNER OF ASSESSING TAXES.

"Sec. 35. Any town may, at their annual meeting, allow a discount of such sums as they may think expedient, to those persons who shall make voluntary payment of their taxes, within such periods of time as the town shall prescribe for that purpose; and in such case, the collectors shall make such discount accordingly.

§ 37. Any person aggrieved by the taxes assessed upon him, may apply to the assessors for an abatement thereof; and if he shall make it appear to them that he is taxed at more than his just proportion, they shall make a reasonable abatement to him; and they may, for this purpose, examine upon oath, (which may be administered by either of them,) the person so applying, and any witnesses whom he or they may see fit.

§ 38. If any legal costs shall have accrued before making any such abatement, as is provided for in this chapter, the person applying for the abatement, shall, notwithstanding, pay such costs.

§ 39. If the assessors shall refuse to make an abatement to any person, he may make complaint thereof to the County Commissioners; and if, upon the hearing of such complaint, it shall appear that the complainant is over-rated, the said Commissioners shall make such an abatement of his taxes. as they shall deem reasonable; provided, that the party aggrieved shall, in all cases, file his complaint with the Clerk of the Commissioners, within one month after the refusal of the assessors to allow an abatement.

§ 44. The assessors shall not be responsible for the assessment of any tax, in any town, parish, religious society, or school district, for which they are assessors, when such tax shall have been assessed by them, in pursuance of any vote for that purpose, certified to them by the Clerk or other proper officer of such town, parish, religious society or school district; but they shall, in such case, be responsible only for the want of integrity and fidelity on their own part."

OF THE COLLECTION OF TAXES.

§ 18. Taxes assessed on real estate, shall constitute a lien thereon for two years after they are committed to the collector; and may, together with all incidental costs and expenses, be levied by sale thereof, if the tax is not paid within fourteen days after a demand of payment has been made, either upon the person taxed or upon any person occupying the estate; such sale to be conducted in the manner provided in this chapter, for the sale of lands of non-resident proprietors, for non-payment of taxes: but nothing in this Section shall restrain the Collector from selling any real estate for taxes, after the said term of two years shall have elapsed, unless such estate shall have been alienated in the mean time.

§ 28. If no person shall appear to pay the taxes, at the time and place appointed for the sale of real estate, taken for taxes, the Collector shall sell, by public auction, so much of the real estate as shall be sufficient to discharge such taxes and all necessary intervening charges.

§ 36. Where the inhabitants of a town shall have voted to appoint their Treasurer a Collector, he may issue his warrant to the Sheriff of the County, or his deputy, or any of the constables of the town, returnable in thirty days, requiring them to collect all taxes due; and such warrant shall be in substance the same with that prescribed to be issued by the assessors to the collectors."

OF TAXES ON BANKS.

"Sec. 1. Every Bank which is, or may be, incorporated under the authority of this Commonwealth, shall, within ten days after the first Monday of April and the first Monday of October, in each year, pay to the Treasurer of the Commonwealth, a tax of one half of one per cent. on the amount of its capital stock, actually paid in.

§ 2. If any part of the capital stock of any Bank, shall have been paid in within six months next before either of the said days, the tax on such part shall be paid in proportion to the time that shall have elapsed after such payment.

§ 3. If any Bank shall neglect to make such payment, the Treasurer shall forthwith commence an action of debt, in the name of the Commonwealth, for the recovery of the same with interest."

TAXES.

EXTRACTS FROM THE STATUTES OF CONNECTICUT.

ESTATE TO BE VALUED, DWELLING HOUSES, LANDS, MANUFACTORIES, LANDS SEQUESTERED FOR PUBLIC USE, HORSES AND MULES, STALLIONS, NEAT CATTLE, SHEEP, PLATE AND PLATED WARE, &c.

"Sec. 2. And all real and personal property shall be valued, and set in the list, as follows, to wit: dwelling houses, with the buildings and lots appurtenant thereunto, not exceeding two acres, in any case, shall be valued at the rate which each separate dwelling house and lot, with the appurtenances thereof, are worth in money, and with due regard to the situation, use and income thereof, whether occupied by the owner, or leased; and shall be set in the list of the owner, at three per cent. of such value.

Lands and separate lots, (excepting house lots as aforesaid,) shall be valued and assessed by the acre, at such average rate as each entire tract or lot is worth in money, with reference to the advantages of soil, situation and income; and shall be set in the list, at three per cent. of such value.

Mills, stores, distilleries and buildings, with their improvements, used for manufactories of all kinds, shall be valued with respect to situation and present income; and set in the list, at three per cent of such value.

Lands and dwelling houses, with the appurtenances thereof, which have heretofore been granted or sequestered for the use of schools, or other public or pious uses, and which have been leased or let for terms of time not yet expired, at rents merely nominal, shall be valued and assessed at such rate and proportion, as, regarding the duration of the lease, the rent now actually paid and applied to such public uses, bears to the whole actual value, according to the rules applicable in other cases, as prescribed in this act: and shall be set in the list, at three per cent. of such value.

All horses, asses and mules, one year old, or more, shall be valued, and set in the list at six per cent. of such value. Each stallion, two years old, shall be set in the list at

six per cent.; and each stallion, three years old, or more, shall be set in the list at six per cent.; and neat cattle one year old, or more, shall be valued, and set in the list, at six per cent. of such value; and sheep one year old, and upward, shall be valued and set in the list, at six per cent. of such value.

Silver plate, except spoons, and silver-plated ware, shall be valued, and set in the list, at six per cent. of such value.

Clocks, watches and time-pieces, shall be valued, and set in the list, at six per cent. of such value.

Each coach, chariot, phæton, coachee, curricle, chair, chaise, gig or sulkey, shall be valued, and set in the list, at six per cent. of the value thereof, and every other carriage or waggon, drawn by one or more horses, excepting only such as are exclusively used on farms, or for the transportation of the produce thereof to market, or for the transportation of goods, wares and merchandize, shall be valued, and set in the list, at six per cent. of the value thereof; provided that no carriage or waggon shall be set in the list, which does not exceed twenty dollars in value.

Stock in any turnpike company, shall be set in the list, at six per cent. of the value of such stock in money.

The owner or owners of stock in any bank, or insurance company, in this State, whether such owners reside in this State or elsewhere, and the owner or owners of any stock in any bank or insurance company, in any of the United States, such owner or owners residing in this State, shall be taxed therefor, and such stock shall be valued, and set in the list, at six per cent. of such value; provided it is not taxed in the State where such bank or insurance company is situated. And the cashiers of the several banks, and the secretaries and clerks of the several insurance and turnpike companies, established in this State, shall, by the twelfth day of October, annually, having been previously thereto requested, inform by mail, or otherwise, the assessor or assessors of every town in this State, where the stock in such bank or company may by law be liable to be taxed, the amount of such stock liable to be taxed in such town, with the amount of such stock set to the name of each owner or owners on the books of such bank, or insurance, or turnpike company, on the first day of October, annually; and if any cashier, secretary or clerk, shall neglect or refuse to furnish such information, he shall forfeit and pay to the treasurer of each town where said stock is liable to be taxed, whose assessor or assessors shall not be so informed, the sum of fifty dollars, to be recovered in an action of debt, in the name of the town treasurer. The stock belonging to persons not residing in this State, in any bank, insurance, or turnpike company, shall be taxed as other similar estate; and the amount of all county, town, and society taxes arising on such non-resident's estate, shall be, by the several collectors, paid to the treasurer of this State.

The stock of the United States Bank, and the stock of either of the United States, belonging to residents in this State, shall be assessed at its just value, and set in the list, at six per cent. of such value.

All monies at interest, secured by notes or bonds of responsible persons, resident in this State or elsewhere, except monies loaned to this State, and all monies on interest, secured by mortgage on real estate in this State or elsewhere, more than the owners thereof pay interest for, shall be set in the list at six per cent.

All fisheries, whether appendages of any farm or lot, or block, or wharf made for the purpose of fishing, shall be valued, and set in the list, at three per cent. of such value.

The polls of all white male persons, from twenty-one to seventy years of age, shall be set in the list at twenty dollars each: provided that the assessors and board of relief, may abate the polls of infirm, sick and disabled persons, in their respective towns, not exceeding one tenth part of the number of taxable polls; and they shall give reasonable notice of their time of meeting for that purpose."

PROFESSIONS.

"SEC. 4. Attornies, physicians, surgeons, traders of all kinds, mechanics, taverners, brokers and distillers, shall be assessed, and set in the list of the town where they reside, at the discretion of the assessors, according to the value and income of their business, occupation or profession, and the principles and rules prescribed in this act: provided that attornies, physicians and mechanics shall not be taxed until after two years from the time of commencing such profession or occupation.

§5. All manufacturers, not otherwise assessed by this act, shall be assessed on the same principles, and set in the list in the same manner, as traders and mechanics are, by the preceding section of this act."

NON-RESIDENT PROPRIETORS OF BANK STOCK, &c.

"SEC. 1. *Be it enacted in the Senate and House of Representatives, in General Assembly convened*, That the cashiers of the several banks, and the secretaries or clerks of the several insurance companies established in this State, the stock of which is liable to be taxed, shall annually, on the first day of October, in each year, or within ten days thereafter, make out, under oath, and deliver to the comptroller of public accounts, an accurate list of all persons who were, on the first day of October, or any part of said day, stockholders of their respective companies, residing without this State, together with the number and value of the share or shares, then belonging to each of the said non resident stockholders.

CASHIERS, &c., TO PAY THE TAXES DUE ON STOCK OE NON-RESIDENTS—FINE.

§2. That the said cashiers, or secretaries, or clerks, shall annually, on or before the twentieth day of October, in each year, pay, or cause to be paid, to the treasurer of this State, for the use of the State, a sum equal to two thirds of one per cent. of the value of all the stock of their respective institutions, owned or held on the said first day of October, or on any part of said day, by persons residing without this State, and each institution aforesaid shall have a lien upon the stock of each non-resident stockholder, for the reimbursement of said sum, so required to be paid as aforesaid; and if any such cashier, secretary, or clerk shall neglect or refuse to comply with the requisitions of this act, within the time therein required, he shall forfeit and pay to the treasurer of this State, for the use of the State, one hundred dollars, to be recovered in the name of the treasurer by action on this Statute.

REPEAL.

§3. That so much of an act for the assessment of taxes as provides for the assessment and payment of taxes upon the stock in any bank or insurance company in this State, owned by persons residing without this State, be, and the same is hereby repealed."

PERSONAL ESTATE TAXABLE AT SIX PER CENT.

"SEC. 1. *Be it enacted by the Senate and House of Representatives, in General Assembly convened*, That all personal estate made taxable by virtue of this act, or the act to which this is an addition, shall be valued and set in the list of the owner at six per cent.

WHAT MONIES AND DEBTS SUBJECT TO TAXATION.

§2. That all monies and debts at interest evidenced by bonds, notes or other written obligations of responsible persons resident in this State or elsewhere, except monies loaned to this State, and also all monies on interest secured by mortgage on real estate, in this State or elsewhere: also all monies invested in any stocks issued or created by any city, town or other community; also all stocks in any railroad, canal or bridge incorporation, (except in cases where the charter of said incorporation exempts its stock from taxation,) shall be valued and set in the list of the owner at six per cent."

ABATEMENT ALLOWED TO TOWNS, TO BE APPLIED BY CIVIL AUTHORITY AND SELECT-MEN.

"SEC. 11. On all the warrants issued by the treasurer for the collection of taxes, there shall be allowed to the several towns, an abatement of one eighth part of the amount of the taxes arising on the list of said towns respectively; which eighth part the *civil authority and** select men of the respective towns, shall have power to apply for the relief of the indigent or unfortunate, in the abatement of their particular rates, in whole or in part, in such way and manner as they shall judge most proper, reasonable and just: and on a certificate of such abatement, under the hands of the civil au-

*Repealed by Act of 1828.

thority and select men, the treasurer shall allow the same to the credit of the collector of such tax: and for the residue of the taxes laid on the several town, they shall be holden to pay the full amount, without any further deduction or abatement."

BOARD TO MAKE ABATEMENTS.

"SEC. 2. The select men, or a majority of them, in the several towns, shall constitute a board to make such abatements of State taxes as are allowed by law to be made, by the civil authority and select men."

BOARD OF RELIEF.

"The several towns in the State shall, also, at the town meetings aforesaid, elect a board of relief, to consist of not more than five judicious electors, who shall meet on or before the first Monday of January, in each year, having given ten days notice, at least, of the time and place of such meeting, by posting the same on the public sign-post in such town, or by publishing a notice in some public newspaper, printed in the town to which the said board shall belong; and shall hear and determine all appeals to them made from the doings of the assessors, and shall equalize and adjust the valuations and assessment lists of their respective towns, whether appeals are made, or not, from the doings of said assessors; and said board of relief, in equalizing and adjusting the lists aforesaid, may increase or reduce the list of any person; but before they proceed to increase the list of any person, they shall notify him, or leave a written notice at his last usual place of residence, two days at least, before increasing his list, to appear, and show cause, if any he have, why his list should not be increased."

HOW COLLECTORS SHALL PROCEED IN COLLECTING TAXES, FEES OF COLLECTORS.

"SEC. 19. The constables, appointed to collect the State taxes, and the collectors of town and other taxes, shall appoint a time and place for receiving such taxes, and shall give to every person reasonable warning and opportunity to pay the same; and on failure of payment, they shall make distress therefor; and in case a distress shall be made, such collectors shall distrain goods and chattels, if they can be had, and shall post and sell them, in the same manner as is provided by law in cases of executions; but if no goods or chattels are tendered, or can be found, such collectors may levy their warrants on the real estate, or on the bodies of those against whom they have taxes, and them commit to gaol, there to remain till such taxes and the legal costs are paid, or they are delivered in due course of law; and all collectors of taxes, shall be entitled to the same fees for levying warrants, as sheriffs are by law for levying executions."

MODE OF SELLING LAND.

"SEC. 20. When a collector levies a warrant on real estate, for the payment of taxes, he shall advertise the time and place of sale, three weeks, in some newspaper printed in the county, or an adjoining county, at least six weeks before the time of sale, and then shall sell, at public auction, sufficient to pay the taxes and costs chargeable against the owners, and shall give to the purchaser a deed of warranty thereof, to be lodged in the office of the town clerk, where the land lies, to remain unrecorded twelve months; and if the owner from whom the tax was due, or any purchaser, mortgagee, creditor of such owner, or any person claiming any interest in the land, shall, within twelve months from the time of the sale, pay, or tender to the purchaser from the collector, the purchase money, with twelve per cent. interest, such deed shall be void, and shall be delivered up to the person paying or tendering the money; who shall hold such land or estate as a security, in nature of a mortgage for the money paid, and twelve per cent. interest. But if the purchase money and interest, shall not be paid within such time, then the deed shall be recorded, and title become confirmed in the purchaser, his heirs and assigns, forever."

TAXES A LIEN ON LANDS, FOR ONE YEAR. PROVISO.

"SEC. 21. The real estate, of which any person is seized and possessed, in his own right, in fee, shall stand charged with his lawful taxes, and may be sold for the same, within one year after the taxes become due, notwithstanding any transfer thereof, or attachment thereon: provided, that no real estate, which has been transferred or levied upon as aforesaid, shall be liable to be sold for the payment of any taxes arising upon a list made up after such transfer or levy; nor shall any real estate be liable to be sold for taxes, which has been legally transferred, attached, or taken by execution, where other estate can be found sufficient to pay such taxes, and the legal costs."

EXTRACTS,

FROM THE REVISED STATUTES OF THE STATE OF NEW YORK.

OF PROPERTY LIABLE TO TAXATION.

LAND AND PERSONAL ESTATE.

"SEC. 1. All lands and all personal estate within this State, whether owned by individuals or by corporations, shall be liable to taxation, subject to the exemptions hereinafter specified."

LAND DEFINED.

"SEC. 2. The term 'land,' as used in this Chapter, shall be construed to include the land itself, all buildings and other articles erected upon or affixed to the same, all trees and underwood growing thereon, and all mines, minerals, quarries and fossils, in and under the same, except mines belonging to the State; and the terms 'real estate,' and 'real property,' whenever they occur in this chapter, shall be construed as having the same meaning as the term 'land,' thus defined."

'PERSONAL ERTATE' DEFINED.

"SEC. 3. The terms 'personal estate,' and 'personal property,' whenever they occur in this chapter, shall be construed to include all household furniture; monies; goods; chattels; debts due from solvent debtors, whether on account, contract, note, bond or mortgage; public stocks; and stocks in monied corporations. They shall also be construed to include such portion of the capital of incorporated companies, liable to taxation on their capital, as shall not be invested in real estate."

PROPERTY EXEMPT.

"SEC. 4. The following property shall be exempt from taxation:

1. All property, real or personal, exempted from taxation by the Constitution of this State, or under the Constitution of the United States.

2. All lands belonging to this State, or the United States.

3. Every building erected for the use of a college, incorporated academy, or other seminary of learning; every building for public worship; every school-house, court-house and jail; and the several lots whereon such buildings are situated, and the furniture belonging to each of them.

4. Every poor-house, alms-house, house of industry, and every house belonging to a company incorporated for the reformation of offenders, and the real and personal property belonging to, or connected with the same.

5. The real and personal property of every public library.

6. All stocks owned by the State, or by literary or charitable institutions.

7. The personal estate of every incorporated company not made liable to taxation on its capital, in the fourth title of this chapter.

8. The personal property of every minister of the gospel, or priest of any denomination; and the real estate of such minister or priest, when occupied by him, provided such real and personal estate do not exceed the value of one thousand five hundred dollars: and,

9. All property exempted by law from execution."

MINISTER OR PRIEST.

"SEC. 5. If the real and personal estate, or either of them, of any minister or priest, exceed the value of one thousand five hundred dollars, that sum shall be deducted from the valuation of his property, and the residue shall be liable to taxation."

LAND SOLD BY THE STATE.

"SEC. 6. Lands sold by the State, though not granted, or conveyed, shall be assessed

in the same manner as if actually conveyed."

OWNER OF STOCK.

"SEC. 7. The owner or holder of stock, in any incorporated company liable to taxation on its capital, shall not be taxed as an individual, for such stock."

—

OF THE PLACE IN WHICH PROPERTY IS TO BE ASSESSED.

LAND WHERE TAXED.

"SEC. 1. Every person shall be assessed in the town or ward, where he resides when the assessment is made, for all lands, then owned by him within such town or ward, and occupied by him, or wholly unoccupied.

§ 2. Land owned by a person residing in the town or ward where the same is situated, but occupied by another person, may be assessed in the name of the owner, or occupant.

§ 3. Unoccupied lands, not owned by a person residing in the ward or town where the same are situated, shall be denominated 'lands of non-residents," and shall be assessed as hereinafter provided."

HOW, IF DIVIDED BY TOWN LINE.

"SEC. 4. When the line between two towns or wards divides a farm, or lot, the same shall be taxed, if occupied, in the town or ward where the occupant resides; if unoccupied, each part shall be assessed in the town in which the same shall lie; and this, whether such division line be a town line only, or be also a county line."

PERSONAL ESTATE WHERE TAXED.

"SEC. 5. Every person shall be assessed in the town or ward where he resides, when the assessment is made, for all personal estate owned by him, including all such personal estate in his possession, or under his control as trustee, guardian, executor, or administrator; and in no case shall property so held, under either of those trusts, be assessed against any other person."

PROPERTY OF CORPORATIONS.

"SEC. 6. The real estate of all incorporated companies liable to taxation, shall be assessed in the town or ward in which the same shall lie, in the same manner as the real estate of individuals. All the personal estate of every incorporated company, liable to taxation on its capital, shall be assessed in the town or ward where the principal office, or place for transacting the financial concerns of the company, shall be; or if such company have no principal office, or place for transacting its financial concerns, then in the town or ward where the operations of such company shall be carried on. In the case of toll bridges, the company owning such bridge, shall be assessed in the town or ward in which the tolls are collected; and where the tolls of any bridge, turnpike, or canal company, are collected in several towns or wards, the company shall be assessed in the town or ward, in which the treasurer or other officer authorized to pay the last preceding dividend, resides."

—

OF THE MANNER IN WHICH ASSESSMENTS ARE TO BE MADE, AND THE DUTY OF ASSESSORS.

ASSESSMENT DISTRICTS.

"SEC. 7. The assessors chosen in each town or ward, may divide the same by mutual agreement, into convenient assessment districts, not exceeding the number of assessors in such town or ward."

AFFIDAVIT OF VALUE OF PROPERTY.

"SEC. 15. If any person, whose real or personal estate is liable to taxation, shall at any time before the assessors shall have completed their assessments, make affidavit that the value of his real estate does not exceed a certain sum, to be specified in such affidavit; or that the value of the personal estate owned by him, after deducting his just debts, and his property invested in the stock of incorporated companies, liable under this chapter to taxation on their capital, does not exceed a certain sum to be specified in the affidavit, it shall be the duty of the assessors to value such real or personal estate, or both, as the case may be, at the sums specified in such affidavit, and no more."

AFFIDAVIT BY TRUSTEES, &c.

"SEC. 16. If any trustee, guardian, executor or administrator, shall specify, by affidavit, the value of the property possessed by him, or under his control, by virtue of such trust, after deducting the just debts due from him, and the stock held by him in incorporated companies liable to taxation, in that capacity, the assessors shall in like manner value the same, at the sum specified in such affidavit."

RULE OF VALUATION.

"SEC. 17. All real and personal estate liable to taxation, the value of which shall not have been specified by the affidavit of the person taxed, shall be estimated by the assessors at its full value, as they would appraise the same in payment of a just debt due from a solvent debtor."

QUALIFICATION.

"SEC. 18. The preceding section shall be followed in all assessments made under this chapter, except where the assessors shall be specially required by law, to observe a different rule."

OBJECTION TO ASSESSMENT.

"SEC. 23. If the person objecting to the assessment, can show, by other proof than his own affidavit, to the satisfaction of the assessors, or of a majority of them, that such assessment is erroneous, the assessors shall review and alter the same, without requiring any such affidavit."

AFFIDAVIT BY AGENT.

"SEC. 24. Where any person, in possession of personal property liable to taxation, shall make affidavit, that such property, or any part thereof, specifying what part, is possessed by him as agent for the owner thereof, and shall disclose in such affidavit the name and residence of the owner, the assessors, if it shall appear that such owner is liable to be taxed under this chapter, shall not include such personal estate in the assessment of the property of such possessor."

AFFIDAVITS, BEFORE WHOM MADE.

"SEC. 25. The affidavits specified in this article, shall be made before the assessors, or one of them, either of whom is hereby authorized to administer an oath for that purpose: and the assessors shall cause all such affidavits to be filed in the office of the town clerk."

The law in relation to the collection of taxes in the City of New York, is to be found on page 259, of this volume.

REMARKS.

We have here placed before the reader, the Laws of New York, Connecticut, and Massachusetts, in reference to the assessment and collection of Taxes. We have added thereto, letters from two distinguished public officers, viz: HON. JOHN M. SCOTT, Mayor of the City of Philadelphia, and HON. MARTIN BRIMMER, Mayor of the City of Boston, as to the practical operation of their Tax Laws, in their respective cities.

We have likewise called upon several gentlemen, residents of the State of Connecticut, as to the practice under the Tax Laws of that State, in the Cities of Hartford and New Haven.

A merchant doing business in the City of New Haven, and owning no real estate, and having no other property but a stock of merchandize, would, if he sold $30,000 worth of goods annually, be set down in the Assessment rolls, as follows:

Profession,	$300.00
Poll Tax,	20.00
	$320.00
State Tax on $320, 1 per cent.,	$3.20
Town Tax on 320, 3 per cent.,	9.60
City Tax on 320, 7 per cent.,	22.40
	$35.20

Attorneys, Physicians, Mechanics, &c., are assessed in the same way.

We have here presented the system of taxation, in four Cities of as many different States. That of New Haven, we think, is the most simple, the most equitable, and even.

The system of taxation in the City of Boston, has, in our view, two defects, viz:

First, Taxing the mortgagor; and also the

mortgagee, when there is in reality but one estate possessed by both. The mortgagor has actually no interest in real estate which is mortgaged for its full value, and if mortgaged for only a portion, he has only that which remains after deducting the mortgage.

Second. Taxing goods and Chattels.—Suppose for illustration, that A. has a stock of goods of $10.000 on the 29th of April, which he sells to B. on that day, and on a credit of six months, for which he takes B's note. The assessors will, under the 4th section, on page 110, rate B. for goods and chattels $10.000 on the 1st of May, and A. for $10.000 debts receivable. Thus this property is twice taxed and involves the same principle, as that in which the mortgagor and mortgagee are both taxed. We have not time to address a letter to his Hon. the Mayor of Boston, and receive a reply before this sheet passes through the press, in relation to this point. A careful reading of the 4th section in the third column of page 110 has led us to infer that the law contemplates a tax upon the income of a merchant; and if he is taxed for that, he should not also be taxed for the capital producing that income. The mode of collecting taxes in Boston is preferable to that of New York. The Boston mode of correcting erroneous assessments is also a most excellent system.

The manner of assessing by three permanent assessors, and assistant assessors is also preferable to the New York system, and also in selling land for the payment of taxes to sell so much only as will pay the tax, and of limiting a tax lien to two years in case of alienation of the property.

A county Treasurer is a very appropriate officer to collect taxes. In New York our Democratic Corporation have hitched a Bank to the City Treasury and its President is made City Chamberlain, and by virtue of such office is made County Treasurer. This doctrine was not orthodox when Gen. Jackson removed the deposites. Thus it is, we often find principles contradicted by practices, as in this instance.

In the state of Connecticut, there is a board of relief to apply to, in case of erroneous assessments. In New York, there is no adequate provision for giving notice to a person who is assessed, and only twenty days allowed to hear objections, and during this short period which is fixed at a season of the year when most tax payers are absent, the tax payer must hunt up the assessor, at an inconvenient hour, and at some remote place, should he perchance happen to know that the term of 20 days has commenced running. A citizen who is not taxable, may be put upon the assessment list, and he has no redress but to prosecute the assessors. In Boston, if the assessors refuse relief, there is an appeal to the County Commissioners. In Philadelphia, we perceive by the printed report of the County Commissioners, which his Hon. Mayor Scott was so kind as to send us, that that there is a deduction made by the tax collectors for abatement, &c., which are no doubt in case of erroneous assessments. In the City, County and poor tax, imposed by the City and County of Philadelphia, personal property is not assessed. Real Estate only, besides this, a poll tax of six dollars, is all that is paid, and in some cases, this poll tax is only 60 cts.

In Connecticut, state bonds are not taxable. In New York this species of property is taxed the same as other personal property. We see no reason why such property should be exempt.

During the present year, some measures were taken in the Legislature of Virginia to exempt Virginia State Bonds and Debts from taxation by that Commonwealth.

Household furniture in Connecticut, and also in Pennsylvania, is free from taxation, and in Massachusetts exempt to the extent of one thousand Dollars.

In New York, household furniture is taxable the same as any other property.

In Boston, and also in Philadelphia, local assessments are included in the general tax, In the city of New York, the assessments are in addition to, and distinct from the general tax.

The tax authorised to be raised in the city and county of New York by the State Legislature in 1820 was two hundred and fifty thousand dollars. The population was then 123,000, the apportionment was, therefore, but a fraction more than two dollars for each inhabitant.

The tax authorised to be raised in 1830 was four hundred and fifty thousand dollars, and the population 203,000, which was a little more than two dollars and twenty cents for each inhabitant.

In 1842 the tax was $2050.000 and the population about 330,000, which is upwards of six dollars for every inhabitant.

In 1819 the corporation received $8.500 per annum for the street manure, from Messrs. Hitchcock's. who contracted to pay that sum, and to sweep the streets and to cart away the dirt. In 1842 near $130.000 was paid for sweeping the streets.

In 1830 the Watchmen's wages were but $86,592,29. In 1842, $225,567,62. The prices of provisions were higher in 1830 than in 1842.

In 1841 the democratic Corporation paid for printing the City Comptrollers report of 131 pages, the enormous sum of $1107.76, which is full seven prices for that work, and in 1842 the Whig Corporation paid $400.00 for printing the tax bill, which is full six prices for that work.

The watchmen's wages for the city of Boston in 1842, was $45.765.36, the Boston Watchmen light the lamps. The Watchmen's wages for the city of Philadelphia, including the expense of police in 1842, was $70.476.97.

The expense of cleaning streets of the city of Philadelphia, in 1842, was $9.559.88.

In Boston, the expense of cleaning the streets, carrying away the offals of the houses, cleaning drains, cess pools, aud sewers, building cess pools and drains, and for the purchase of four horses, was in 1842, $19.-065.12.

The expense of public printing, stationery and book-binding in the city of Boston, in 1842, was but $2765.94, in New York $22.-725.38. In New York in 1830, it was but $2.327.09.

The nett expenses for cleaning streets in New York in 1840 was $127.181.47.

One years interest on that sum of seven per cent. is 8.902.70 which is within six hundred and fifty seven dollars and eighteen cents of as much as the entire charge and cost of cleaning the streets of Philadelphia.

LORD BROUGHAM AND THE CORPORATION OF LONDON.

Though the elaborate report of the Commission issued by the British goverment in 1833, for the purpose of inquiring into the state of the municipal corporations throughout the United Kingdom of Great Britain and Ireland, had especial reference to the affairs of the corporation of the city of London, and in terms of unsparing condemnation exposed the abuses resulting from its continued exercise of the many privileges of jurisdiction, incident to its feudal constitution, and though a bill was enacted in pursuance thereof for the reformation of the country municipalties, and the Government promised to introduce a separate measure having reference to the City, nevertheless, owing to the overwhelming influence of the City corporation, combined with the magnitude of the interests involved in the preservation of its extensive powers on the one hand, and the weakness of the Whig Administration on the other, it has remained unmolested to the present hour. But from the prodeedings in the House of Lords, on the evening of the 2d inst., it may be conjectured that this state of things will not be permitted to continue. From its design of an useful and efficient instrument of local government, the great metropolitan corporation has been perverted to "giant abuse"; and so it is denominated. It has lost the confidence of the people. With a view to remodel it, Lord Brougham has moved an address to the Queen, praying for the consideration of the report above alluded to.

His statement of the grievances of the corporation, and the errors into which it has fallen, so obviously shows the necessity of reform, that it may be presumed some of them, particularly those more immediately operating to pervert the administration of justice, will not outlive their exposure.

The expenditure applied exclusively to the government of the City of London, (which constitutes only one fifteenth part of the great metropolis of the British Empire) containing a population of 122,800, amounts annually to more than three millions of dollars. This is upwards of $24 a head. That of Paris, with a population of a million, is a little over seven dollars a head. The cost of the city government of London is very little less than that of the executive government of the State, with a population of 24,-000,000—excluding in both cases the sala-

ries of the judges and officers of justice.—The whole income of the City including the revenue connected with its charities, is $4.-342.602; a great portion of which is very injudiciously disposed of, in the maintenance of a ridiculous pomp and ostentation, designed to give state and dignity to the City monarch. But with all its resources, and notwithstanding the successful experiment of an excellent system of police established by the exertions of Sir Robt. Peel and the Duke of Wellington over the west end of the town, and extended throughout the country, the organization of an efficient and vigorous police in the city of London has been neglected, and the operation of the present system tends only to the encouragement of vice, immorality and crime.

But the most crying abuse under the existing constitution of the City government, appertains to the administration of justice. The corporation consists of a Mayor, Court of Aldermen, and Common council. The Aldermen are chosen for life, and the members of the Common Council annually, by all inhabitant householders, being freemen, that pay thirty shillings to the City rates.—Under this state of things, it follows of course that the civic honors do not always devolve on the great merchants and the most important citizens of London. Yet the corporation not only control the whole revenue of the City, but to a great extent, the administration of justice therein. It holds the appointment of six judicial officers, five of whom are chosen by the Common Council by ballot. They choose the Common-Sergeant, who sits on the bench and administers criminal law, with a jurisdiction over 2,000,000 of people. They choose the judges in the Sheriffs' Court and the assistant judge in the Central Criminal Court.—The Aldermen appoint the Recorder. Two of this body sit as judges in the Central Criminal Court, where two judges form a quorum. To secure the administration of justice is the great object for which men live together in society. But what confidence can be had in the interpetation which unprofessional and unlearned men may put upon the law?

Lord Brougham commented on another species of abuse in the police administration, which hardly has any parallell with us.—This consists in an *ex parte* application for advice to a sitting magistrate, which, whatever may have been its origin, is now chiefly adopted with sinister ends—as a method sometimes of extortion, or with a malicious motive of prejudicing the public mind against an enemy. For this it is a most effectual engine; because the magistrate listens to all the details of the applicant's story, which, with the advice that is given, is reported in the newspapers as part of the proceedings of the Court.

JUDICIAL SALARIES.

It will be seen by a reference to the letter of His Honor J. M. Scott, Mayor of the City of Philadelphia, and also of His Hon. Martin Brimmer, Mayor of the City of Boston, as set forth on pages 109 and 110, of this number, that the salaries of Judicial Officers, who may be called upon to adjudicate upon matters in controversy, in questions which may arise between their respective Corporations and a citizen, are not paid by the Corporation.

This is a matter of very great importance. The Judiciary Department, should be distinct from, and independent of, all the other branches of the Government.

Mr. Justice Story, *that able commentator upon the Constitution, and most enlightened Jurist*, says:

"The independence of the Judiciary, is indispensable, to secure the People against the intentional, as well as the unintentional, usurpations of the Executive and Legislative departments. It has been observed, with great sagacity, that power is perpetually stealing from the many to the few; and the tendency of the Legislative department, to absorb all the other powers of the government, has always been dwelt upon by statesmen and patriots, as a general truth, confirmed by all human experience. If the Judges are appointed at short intervals, either by the Legislative or the Executive department, they will naturally, and indeed, almost necessarily, become mere dependents upon the appointing power. If they have any desire to obtain, or to hold office, they will, at all times, evince a desire to follow, and obey the will of the predominant power in the State. Justice will be administered with a faultering and feeble hand. It will secure nothing, but its own place, and the approbation of those who value, because they control it. It will decree, what best suits the opinions of the day; and it will forget, that the precepts of the law rests on eternal foundations. The rulers and the citizen will not stand on an equal ground in littigations. The favorites of the day, will overcome by their power, or seduce by their influence; and thus the fundamental maxim of a republic, that it is a government of laws and not of men, will be silently disproved or openly abandoned."

Again, he says:

"Few men possess the firmness to resist the torrent of popular opinion, or are content to sacrifice present ease and public favor, in order to earn the slow rewards of a conscientious discharge of duty; the sure, but distant gratitude of the people; and the severe but enlightened award, of posterity."

Mr. Justice Story quotes Mr. (afterwards Judge,) Hopkinson, thus:

"The pure and upright administration of Justice, is of the utmost importance to any people; the other movements of government, are not of such universal concern."

And again, this truly eminent Jurist, remarks:

"Indeed, in a Republic with a limited Constitution, and yet without an independent Judiciary, sufficiently independent to check usurpation, to protect public liberty, and to enforce private rights, would be as visionary and absurd, as a society organized without any restraints of law. It would become a democracy with unlimited powers, exercising through its rulers, a universal despotic sovereignity. The very theory of a balanced Republic of restricted powers, presupposes some organized means of control, and resist any excesses of authority. The people may, if they please, submit all power to their rulers for the time being; but then, the government should receive its true appellation and character. It would be a government of tyrants, elected it is true, but still tyrants; and it would become the more fierce, vindictive and sanguinary, because it would perpetually generate factions in its own bosom, who could succeed only by the ruin of their enemies. It would be alternately characterized as a reign of terror, and a reign of imbecility. It would be as corrupt, as it would be dangerous. It would be another model of that profligate and bloody democracy, which, at one time, in the French Revolution, darkened by its deeds, the fortunes of France, and left to mankind the appalling lesson, that virtue and religion, genius and learning, the authority of wisdom, and the appeals of innocense, are unheard and unfelt in the phrenzy of popular excitement; and that the worst crimes may be sanctioned, and the most desolating principles inculcated under the banners and in the name of liberty. In human governments there are two controlling powers; the power of arms and the power of laws. If the latter are not enforced by a Judiciary above all fear, and above all reproach, the former must prevail; and thus lead to triumph of military over civil institutions."

This learned Jurist quotes the Federalist, No. 78, as follows:

"The complete independence of the Courts of Justice, is peculiarly essential in a limited Constitution. By a limited Constitution, I uuderstand, is one which contains certain specified exceptions to the Legislative authority; such, for instance, as that it shall pass no bills of attainder, no expost facto laws, and the like. Limitations of this kind can be preserved in practice no other way than through the medium of the Courts of Justice; whose duty it shall be to declare all acts, contrary to the manifest tenor of the Constitution, void. Without this, all the reservations of particular rights or privileges, would amount to nothing."

This learned Jurist had previously remarked, that

"Where there is no Judicial department to interpret, pronounce, and execute the law, to decide controversies, and to enforce rights, the government must either perish by its own imbecility, or the other departments of government must usurp powers, for the purpose of commanding obedience, to the destruction of liberty."

AMERICAN SALT.

No. 47 Orange St., Brooklyn,
October 10, 1842.

To the President and Board of Managers of the American Institute.

GENTLEMEN:

I most respectfully take leave to crave your notice of the specimen of Salt Rock from the Salt Mine in Washington county, Virginia, and to the sample of Fine Table Salt from the extensive salt works of that place; and also to samples of salt from the very extensive Works and Salt Fields in the Onondaga valley in this State, and also to the remarks, &c. which are below.

May I ask you, in behalf of the great public interest which this necessary of life sustains, to examine these specimens and samples—not only as respects the quality, but also in regard to the quantity now manufactured in our country and the low price at which it is sold, and the ability of our own citizens to supply the inhabitants of this great and growing country with this important article, which, as will be seen in the sequel, is so extensively used.

Bread is said to be the staff of life—that our soil produces in abundance;—Water comes next in order, and this the clouds shower down upon our earth in rich profusion, supplying its rivers, lakes, springs, wells and aqueducts with that fluid which is the dissolved crystals of that primative stock which had its place in the Creation ere the Solar Orb had moved its terrestrial attendants around it as a centre in this one great system, and which now forms the arctic and antarctic fountains of the great deep, the breaking up of both of which in the same day by the melting of their continents and mountains of ice deluged our earth with a flood of the resulting aqueous fluid from their water crystals!

Next in order comes another crystalized body—

SALT:

An article so necessary to animal life that even the monster Beasts of the Forest travel its rugged paths for immense distances to taste its sweet. In some sections of our globe Salt constitutes the circulating medium. It passes as Money, and truly it may, for it has intrinsic value and extrinsic beauty—for the brightest Gem will not outshine the crystals of the SOLAR SALT OF ONONDAGA!

The importance of the manufacture of Salt from the mines of rock salt and from the waters of the saline springs in the United States as compared with the importation of salt from abroad may be inferred from the following statement:—

I have received from the Hon. McCLINTOCK YOUNG, acting Secretary of the Treasury of the United States, a statement of the Salt imported into the United States from foreign places during a period of ten years from 1832 to 1841, both years inclusive, to which I have appended the rate of duties, which is as follows:

IMPORTS AND RATE OF DUTIES.

In 1832, 5,041,326;	duty	10	cents.
1833, 6,822,672;	"	10	"
1834, 6,058,076;	"	9	" 4 mills.
1835, 5,375,364;	"	9	" 4 "
1836, 5,088,666;	"	8	" 8 "
1837, 6,343,706;	"	8	" 8 "
1838, 7,103,147;	"	8	" 2 "
1839, 6,061,608;	"	8	" 2 "
1840, 8,183,203;	"	7	" 6 "
1841, 6,823,944;	"	7	" 6 "

The bushel is reckoned at 56 pounds, and the duty on the same quantity.

The quantity of Salt manufactured in the United States in 1840, as appears by the returns made by the persons employed to take the census of the United States, was as follows:

Aggregate amount of Domestic Salt manufactured in each of the States of the United States according to the sixth Census.

	Number of bushels produced.	Number of men employed.	Capital invested.
Maine, - - -	50,000	15	25,000
New Hampshire,	1,200	1	2,500
Massachusetts, -	376,596	463	502,980
Connecticut, -	1,500	2	3,000
New York, - -	2,867,884	332	5,601,000
New Jersey, -	500	1	1,500
Pennsylvania, -	549,478	255	191,435
Delaware, - -	1,160	17	200
Maryland, - -	1,200	3	100
Virginia, - - -	1,745,618	624	300,560
North Carolina,	4,493	8	7,090
South Carolina,	2,250	7	1,500
Kentucky, - -	219,695	291	163,585
Ohio, - - - -	297,350	240	113,195
Indiana, - - -	6,400	19	20,050
Illinois, - - -	20,000	22	10,000
Missouri, - -	13,150	36	3,550
Arkansas, - -	8,700	25	20,800
Florida Territory,	12,000	4	30,000
	6,179,174	2,365	6,998,045

The salt made in the State of Maine was manufactured in the county of Washington; that in Massachusetts in the counties of Barnstable, Bristol, Dukes, Norfolk, Suffolk and Plymouth; that in Connecticut in the county of New London; in New Jersey in Atlantic county; in Delaware in the county of Sussex; in Maryland in Worcester county; in Virginia from sea water in the counties of Accomack and Princess Ann; in North Carolina in the counties of Carteret, Currituck and Onslow; in South Carolina in the districts of Beaufort, Charleston and Georgetown; in Florida at Key West.

The salt made from saline springs and wells in the other States as follows: in New York in the counties of Onondaga and Cuyahaga; in Pennsylvania in the counties of Allegany, Armstrong, Beaver, Butler, Fayette, Indiana, McKeon and Westmoreland; in Virginia in the counties of Kanawha, Harrison and Washington; in Ohio in the counties of Athens, Columbia, Guernsey, Jefferson, Lorraine, Meigs, Morgan and Muskingum; in Kentucky in the counties of Adair, Barren, Breathit, Carter, Clay, Cumberland, Floyd, Knox, Perry, Pulaski and Whitley; in Indiana in the counties of Brown, Fountain, Monroe and Montgomery; in Illinois in the counties of Gallatin and Vermilion; in Missouri in the counties of Cooper, Howard, Randolph and Saline; in Arkansas in the counties of Clark and Sevier.

The quantity of salt manufactured in the United States in 1840 added to the quantity imported in that year would make an aggregate of 14,302,377 bushels, which will give to each man, woman and child in the United States a proportion of near seven eighths of a bushel of salt.

The amount of duty on salt imported in 1840 and secured to be paid to the United States that year was $617,363. 42, which is less than four cents each for every inhabitant in the United States.

I have carefully examined the New York Price Current from 1832 to 1841, both years inclusive, to ascertain the price of Turk's Island Salt in the New York market during these years. I selected the months of April and October in each year, as affording a fair sample. The following is the result of my examination:—

	APRIL.		OCTOBER.		
1832	50	cents;	53	cents	per bushel.
1833	42	"	47	"	" "
1834	40	"	41	"	" "
1835	40	"	42	"	" "
1836	39	"	41	"	" "
1837	43	"	41	"	" "
1838	33	"	39	"	" "
1839	41	"	40	"	" "
1840	36	"	37	"	" "
1841	31	"	27	"	" "

About two fifths of the foreign Salt imported into the port of New York in 1841 was Turks Island salt.

The reduction of the price of the foreign salt by the competition of the American salt it will be seen has diminished the price of the foreign article during that period to the consumer 26 cents per measured bushel, which is a saving to every inhabitant of the United States on the proportion allotted to each of about 16 cents: this exceeds their proportion of duty 12 cents ——. Thus each consumer is a gainer by the duty.

The duty on imported salt became reduced to five cents and eight mills per bushel of 56 pounds on the 1st of January, 1842, by the gradual reduction provided for in the Compromise Act of 1832, and this rate of duty continued until the 30th of June of this year. On the 1st of July, 1842, the duty on foreign salt under the same compromise act became fixed at twenty per cent. on the home valuation.

By the Tariff passed by Congress in August, 1842, the duty on foreign salt is fixed at eight cents on the bushel of 56 pounds; and should this tariff remain permanent, capitalists will embark in the manufacture of salt by solar evaporation.

Turks Island Salt is made from sea water evaporated by the rays of the sun. It is delivered on board vessel in sacks of half a

bushel each, and costs about 8 to 10 cents per bushel at the island.

Bonnaire, Curacoa, Cette and many other salts imported from abroad are made in the same manner.

The Bonnaire salt is very heavy, weighing from 80 to 90 pounds to the bushel.

The quantity of Salt imported into the port of New York in 1840 and 1841, and the first quarter of 1842, was as follows:

In 1840 - - - - - - -	1,600,573
1841 - - - - - - -	1,522,333
1842, first quarter, - -	198,545

The quantity of Salt made at the Onondaga salines in the State of New York, which belong to the government or People of this State, during ten years, from 1832 to 1841, both years inclusive, was as follows:

In 1832, 1,652,985.	In 1837, 2,161,287.
1833, 1,838,646	1838, 2,575,632
1834, 1,943,252	1839, 2,864,718
1835, 2,209,867	1840, 2,622,305
1836, 1,912,858	1841, 3,340,769

These bushels are also calculated at 56 pounds each.

The State of New York now collect a duty of six cents per 56 pounds for all the Salt made at the Onondaga salines, which duty was formerly appropriated to the payment of the interest on the Erie Canal Debt, but now it goes into the general fund.

Of the salt manufactured at these salines in 1841, two hundred and twenty thousand bushels was coarse salt made by solar evaporation: the residue was fine salt made by evaporating in iron kettles by heat of fires supplied entirely with wood as fuel.

The number of kettles used for the manufacture of fine salt at Onondaga Salines in 1841 was six thousand seven hundred and forty-eight, containing in all four hundred and ninety thousand and eight gallons.

The number of superficial feet of surface occupied by the vats for solar evaporation were one million four hundred and ninety-eight thousand two hundred and fifty-three.

In the latter estimate is the steam-works of Mr. J. W. Hale, which cover 5,175 superficial feet, from which was made 13,553 bushels of coarse salt.

The ground covered by the salt works is near six hundred acres.

It will be seen that the quantity of salt made at the Onondaga Salines in 1840 and 1841 was about double that imported into the port of New York during the same years.

The brine in the wells at Syracuse is of 78 degrees of strength: 100 degrees being the point of saturation, about 30 gallons of the water make a bushel of salt. At the Saltville wells in Washington county, Virginia, the salt water from the wells when sunk within less than fifty feet of strata of SALT ROCK of 150 feet in thickness was about of the same strength as the water of the Onondaga wells.

The wells at Syracuse are about 270 feet in depth, and yield an inexhaustible supply of water. These wells terminate in a bed of gravel, and the stratas passed through in boring are fine sand and gravel: the lower stratas of the gravel are agglutinated to a considerable extent.

The wells at Salina are of about 170 feet in depth, and yield water of 80 degrees of strength; and those of Liverpool are 80 feet in depth and yield water of 81 degrees of strength.

The stratas passed in boring in these wells last mentioned are clay, rock and sand.

The strongest water lies in a northerly direction from the Syracuse wells first named, and approaches nearer the surface in progressing north from the first well, as will be seen by what is stated above.

The villages of Syracuse, Salina, Liverpool and Geddes skirt the head of the Onondaga lake almost in the form of a crescent, and no doubt will at some future period, not far distant, form one great city.

An examination of this lake in connection with the salt wells led me to the conclusion that the lake has resulted from the dissolving of a strata of salt rock beneath the surface of the earth, and that what once formed the surface of the earth now forms the bottom of the lake.

In company with the State Superintendent of the salines, THOMAS SPENCER, ESQ. and the State Inspector of Salt made at the Salines, HENRY W. ALLEN, ESQ., I made an excursion upon the lake during the month of August last and sounded it with a line in the vicinity of the salt wells. We found the lake for a few rods very shallow, from six inches in depth gradually increasing to three feet in depth, to where the bottom descended quite abruptly for a few feet to the depth of seventy feet: the bottom is of earth, and this abrupt precipice in the water is of the same material.

The nearest well to this sounding, which is one that is now in the process of boring, has been sunk to the depth of 207 feet: the strata of the first few feet is of soil resulting from decomposed vegetation, next a strata of marl of some six feet in thickness, then a thin strata of soil, and below this a body of tough elastic clay of 173 feet in thickness: next, nine feet rock composed of fine gravel cemented with gypsum: next, one foot of tough clay mixed with pebble stones: next, four feet clay, when the auger struck the rock again, and in which the workmen are now boring. It is this strata of clay which I think has settled down, and its surface now forms the bottom of the lake and its fracture the earth precipice which I have mentioned. This lake is about six miles long and one and a half mile wide, and is drained by Seneca river.

The water of these wells is so strong that it is as profitable to raise the water and evaporate it as it would be to raise the salt rock and dissolve it and afterwards evaporate the solution, as very little of the fossil salt can be used without being first dissolved and the solution evaporated.

It seems evident to my mind that the saline properties of the water of the wells at the Onondaga Salines is derived immediately from fossil salt, and that the deposit of this mineral must be near by.

The withdrawing annually from beneath the surface more than three millions of bushels of solid substance must make a mighty void to be filled with air or water somewhere, unless the earth settles down and fills the space: it therefore becomes important to determine where the fossil salt lies, for if it should be found to compose the under stratas on which these towns I have named are so rapidly building, when these become one great city the increased weight upon the surface may be too great for the support which may be underneath and the whole give way and make another lake. This may be said to be speculation, but there is reasonable grounds to found such a speculation upon. At Syracuse where the under strata is sand and gravel this cannot be feared for the reason that fossil salt cannot repose in a bed of sand and gravel: it is an unnatural position, and one which it is impossible it could long occupy in a country where great quantities of water fall from the clouds upon a surface which absorbs it.

The Onondaga salines can be made to furnish salt water sufficient to manufacture ten millions of bushels of salt per annum.

The water, as I before remarked, is from 78 to 81 degrees of strength as denoted by the hydrometer, which is graduated at O for fresh water and 100 for water fully saturated with salt.

Should the State authorities make such arrangements as will result in the condensing the salt water by artificial heat to near the point of saturation, the impurities in the water, which are very trifling, would be precipitated, and the pure brine would then be used in all the vats which are three in a set, instead of one. The manufacturers of solar salt use one vat to precipitate the earthy matter, a second to throw down the sulphate of lime, and the third to crystalize the salt. In the event of first condensing the water by artificial heat, three times the quantity of salt could be crystalized in the same vats; but a large number of large deep vats would be necessary to receive the brine in which the impurities must be precipitated from the boilers heated by terrestrial fire. The result of such a process is a matter of mathematical calculation as to profit: its practicability as a chemical operation is unquestionable. The operation of heat has the effect to cause all earthy particles which are held in suspension in the brine to precipitate, and the concentrating or condensing the salt water to that point at which the impure salt crystalizes, and allowing the fluid to remain quiescent for a few days, the operation of crystalization of the more easily crystalized salts will be completed.

Thomas Spencer, Esq. the State Superintendent of the Onondaga Salines, in a letter which he addressed to the Editors of the Journal of Commerce on the 29th of July, 1842, and which was published in that paper on the 2d of August, states that the vats for solar evaporation to cover an acre of ground cost about $1200, and that one man can attend two acres. One acre will produce on an average about two thousand bushels of solar Salt annually.

If all the salt manufactured in kettles, &c. at the Onondaga Salines, in 1841, had been produced in vats, it would have required as many as would cover sixteen hundred and sixty-seven acres of ground, which would cost about two millions of dollars for the vats a-

lone, which is a large sum of money for capitalists to invest at a time when the provisions of the tariff remain so unsettled in the public mind as to probable permanency.

Taking into account the cost or rental of the ground, the interest of the capital invested in the vats, and the wages of the men employed, it is evident that the manufacture of solar salt can be profitably and extensively carried on in the United States, and that as much salt can be made at a low price as will be required for the consumption of the people if a moderate duty like that of the present tariff is continued.

The samples of salt which are exhibited at the Fair of the American Institute will compare in quality with the same descriptions of salt from any part of the world.

The sample of Onondaga county solar salt is from the works of Messrs. Henry Gifford & Co. of Syracuse. This salt is equal in quality to the Turk's Island Salt. Messrs. Henry Gifford & Co. through the State Superintendent of Salines, Mr. Spencer, have authorised me to say that they will deliver the best Onondaga Solar Salt at the wharves in the city of New York by the boat-load at 31 cents the measured bushel.

The sample of Onondaga common fine salt is from the works of Mr. W. K. Blair. This salt will answer all the purposes for which Liverpool fine salt is used. It is now sold at the Salines at five cents per bushel. Some sales have been made at the Salines at four cents per bushel, but these are ruinous prices. A State duty of six cents is to be added to this price, which will bring it to 11 cents per bushel. If this salt is brought to the banks of the Hudson river the state duty is remitted, which debenture will equal the cost of freight, so that it can be delivered at Albany at 11 cents per bushel, to which is to be added the freight from Albany to New York. This it will be borne in mind is the price in bulk. If packed in barrels the cost will be increased about four cents per bushel, and in bags about nine cents per bushel.

The Liverpool fine salt which is brought to the United States is packed in bags of 224 pounds each, which is equal to four bushels. Ten of these sacks make one ton, and costs delivered on board ship at Liverpool near one pound sterling per ton. The sacks cost fifteen pence sterling each, which is 12s. 6d. per ton in addition. To this is to be added difference in exchange, freight, insurance and duties. The last sales of Liverpool Salt were from $1.57 to $1.60 per sack, equal to 39 to 40 cents per bushel, including sack. The Onondaga works should be furnished with stove-rooms for depriving the salt of all the moisture which it is possible to divest it of by heat.

The sample of dairy salt is from the works of Messrs. D. M. Burnett & Co. This salt is solar salt ground, and in point of quality is superior to most foreign table salt, as will be readily seen by comparison.

The Fine Table Salt is from the works of Mr. S. W. Caldwell. This salt is made by slow terrestrial heat, by boiling the salt water in the back kettles nearest the chimney where there is but little heat: it is a superior article, and its appearance alone is a sufficient recommendation of its quality.

These specimens are exhibited to show the excellent quality of the salt and call public attention to the great extent of the supply.

These Salines are the property of the People of this State—public property—belonging to the great body of the citizens of this great commonwealth. With the monies arising from the duties collected from the manufacture of Onondaga salt, the State has paid a portion of the interest of the Erie Canal Loan: thus have these inexhaustible Salines conferred a double benefit on the people of this State.

During the month of July, 1842, the quantity of salt made at the Onondaga Salines was 363,497 bushels against 558,643 bushels made in the month of July, 1841. This difference in the quantity arose from the suspension of many of the works of the present season in consequence of the low rate of duties on foreign salt. Turk's Island Salt was entered at the New York Custom House in July and August, 1842, as low as 18 to 20 cents per bushel—of course the duty at 20 per cent. on the home valuation was about four cents per bushel—this competition was ruinous to the manufacture of salt at Onondago, hence the stoppage of the works. The price of salt at these works is only the wages of labor: for the price of the wood consumed in boiling is the value of the labor in cutting and transporting: therefore the duty operated to paralize industry by compelling the laborer to be idle. The great Source of wealth is Labor. The price of the produce of labor is governed in the main by the wages of labor. However bounteous the products of the earth may be, they cannot be gathered without labor. Every public measure which has the effect to encourage industry and give employment to labor is a public and also a private benefit.

The sample or specimen of Salt Rock exhibited at the Fair of the American Institute is from the salt mine at Saltville, near Abingdon, Washington county, Virginia, which co. borders upon East Tennessee and North Carolina.

This mine is situate between the Clinch mountain and the Blue ridge, and on the western declivity of the latter. The strata of salt rock is 150 feet in thickness, and lies 220 feet below the surface of the ground. The over stratas are black shale, slate, plaster rock and clay. Shell lime is abundant on the surface near by. This salt rock is of very excellent quality, and is composed almost wholly of the chloride of sodium. The strata was discovered in 1840 in boring for salt water. A well had been sunk in this place a number of years ago from which considerable salt was made, but the well *caved in*, and the proprietors caused it to be sunk deeper. The water obtained was about of the same strength as that now used at the Onondago salines. The quantity, however, was not so abundant as the proprietors desired and they caused the well to be sunk still deeper, and in this boring they struck the salt rock which they continued in for 150 feet, when they reached a strata of slate mixed with plaster rock in which they continued about six feet; but finding the supply of water inconsiderable, the proprietors concluded to sink another well about forty feet from this boring, which they sunk to the depth of 214 feet: in this they obtained an abundance of salt water which was 22¼ to 22½ degrees of strength as indicated by the hydrometer. This hydrometer was graduated at O for fresh water and 25 for salt water fully saturated: 22½° of this hydrometer corresponds with 90° of that used at the Onondaga salines. The manufacturers find it more economical to raise the water and evaporate it, than to raise and dissolve the salt rock and evaporate the solution. My highly respectable correspondent at this mine, Alexander Findlay, Esq. who is one of the partners of a large house engaged in the manufacture of salt, writes me that they can make all the salt which they can find a market for. The sample of table salt which is displayed at the Fair of the American Institute is from Mr. Findlay's Works: it is truly a most beautiful article. The water of this well is the purest and richest in the world. It is from the comparative qualities of the salt water of these two salines, viz. the Onondaga and the Saltville, that I infer that the fossil salt is near the wells in the Onondaga valley.

The salines on the Great Kanhawa in Virginia are extensive. My worthy and valued correspondent, Lewis Ruffner, Esq. who is extensively engaged in the manufacture of salt at these salines, writes me as follows:

KANAWHA SALINES, Jan. 17, 1842.

"Small quantites of salt were made at this place from weak salt water found at the margin of the Kanawha river, in the sand, by the Indians and earlier white inhabitants up to the year 1808, at which time stronger brine was discovered by boring into the sand rock under the bed of the river to the depth of some seventy feet. Since that period probably an hundred wells have been bored along each bank of the river extending for ten miles, to the depth of four to eight hundred feet, not more than half of which are in present use. Each of these wells produces daily a quantity of water sufficient to make 150 to 300 bushels of salt.

"Its strength, tested by a hydrometer graded from O for fresh water and 25 degrees for saturated brine, indicates from 8 to 13 degrees in the different wells—the deepest the strongest. The brine when heated shows a large admixture of earthy matter of a brown color. Boiled in cast iron pans up to a point as near saturation as is safe to avoid caking, the brine is drawn into wooden reservoirs, in which when left undisturbed for 12 hours the sediment is *per se* precipitated; and thence it is drawn into kettles in the hinder part of the furnace for granulation, or into larger wooden reservoirs as is now becoming common, through which the steam is conducted by copper pipes from the pan or boiler, and the brine thus converted into 'steam salt,' a kind of salt well fitted for use, being free from bittering, pure and white. The boiled kettle salt is more or less tinged with the iron, and has no small quantity of bittering when newly made, but which drips away after a few months. This latter salt is celebrated in the West for

its penetrating meat rapidly, and saving it in difficult weather, yet it does not leave so fine a flavor as the steam salt. The Kanawha salt is universally preferred in the West to any other description of domestic salt for preserving meats: it is believed mainly from the fact of its almost entire freedom from lime in any combination.

"When the wells were first bored to the depth of three to four hundred feet, many of them produced petroleum in large quantities; but that substance has long since entirely disappeared.

"Bituminous coal is the fuel exclusively used for twenty years past in salt making here. It is found abundantly in the adjacent mountains, imbedded in horizontal strata of 3 to 6 feet in the stratified shales and sandstones of the country.

"No lime, plaster or slate has as yet been detected in the borings of our wells. White, grey and yellow sand rock, shales and pit coal, are the prevailing substances passed in boring.

"The strength of our brine is not known to be affected in our deep wells by the changes in quantity of superficial waters; although it was formerly imagined that at the depth of three or four hundred feet high water in the river increased the strength and volume of salt water.

"I will add that from one and a half to two million bushels of salt of 50 lbs. weight are annually made here and vended in the West and South-west. The price at Cincinnati by the cargo is now 25 cents per bushel. We could produce, it is believed, five millions if the markets would require so much."

"Our coarse salt when made with care has a translucent crystal resembling alum. I have no doubt myself that alum salt can be made here of unequalled purity to very great advantage, and would be, should Congress give us a reasonable protective duty, and could the requisite capital be commanded, which I doubt whether our own people at present can furnish. In boring recently two salt wells in the neighborhood to the unusual depth of 850 to 950 feet, good brine has been found, which is forced up by streams of gas to the height to which it is usually forced by pumps, say 70 feet above the surface of the river in a constant supply. After doing this work, the gas is set on fire at night and illuminates the whole surrounding valley. The owner of one of the wells is preparing to burn this gas in his furnaces to aid in making salt."

The United States Salines near Shawneetown, Ill. were many years ago very important to that section of the country. In 1813 they were leased from the Government by Charles Wilkins, Esq. of Lexington, and his associates.

In 1814, when I was at these salines, the shakes of earthquakes were quite frequent. In 1811 and 1812, at the time of the disaster at New Madrid, these shakes were very severe.

In a letter recently received from my correspondent, E. Mills, Esq. of Shawneetown, Ill. he remarks, "the Shakes as they are called, are not unfrequent at these salines. The wells average about 130 feet in depth, and are 16 in number—100 gallons of the water make one bushel of salt. Iron ore and lime stone are abundant—clay altogether in the digging to the rock—sand stone plenty—no bituminous coal. Our market for salt is St. Louis and the points on the upper Mississippi."

In another letter which I recently received from my correspondent, Dr. John Croghan, of Locust Grove, Ky. he remarks—

"I formerly owned an extensive body of land denominated 'the Salt Lick Bend of Cumberland,' on which there were strong indications of salt water. The only unfavorable appearance was that of lime stone rock—a rock which is not an associate of the salt formation; and almost invariably when the salt water is found under such circumstances, it (to use the workmen's expression) 'gives out'; or after the introduction of the copper tube, *it blows*, by means of which the whole of the water is thrown with great force out of the cavity which contains it. I have heard of the poles being driven, much to the consternation of the workmen, to a great height in the air. When this is the case, it is unaccompanied by any discharge of water. The gas set free by the introduction of the boring rods into the cavity which contained it, is the carburetted hydrogen, and is found in water springs called 'burning springs.' A well was bored on Green river in the county of Casey or Adair, Ky. in which I am told a terrible explosion occurred, caused by the mixture of atmospheric air with the carburetted hydrogen. Rocks and the largest of trees were torn up, and thrown a considerable distance. There is a salt well on Renwick creek, Cumberland county, Ky. in which the water is contained in a cavity; the salt makers work it until they exhaust the cistern, and renew their operations when it is replenished, which takes (as well as I recollect) two or three months. At the works which I own on Cumberland river, the earth is excavated to the depth of 30 or 40 feet, embracing an area of about half an acre. An incredible number of buffalo and other bones were found here. Salt was manufactured nearly forty years ago at this place, by persons living in the neighborhood. They dug but a few feet in the ground, and obtained water which I understood was very weak. About fifteen years since, I hired some borers and commenced operations in the bottom of the excavated ground, only 30 or 40 yards from the river. In descending to the depth of 80 feet we struck a small vein of very strong salt water, and after going to the depth of 200 feet through solid rock, the auger (to use the language of the borers) 'fell,' and a large stream of water mixed with petroleum poured out of the well. In the course of a short time the petroleum ceased running; the water, though very abundant, was, as I anticipated from the bad company in which the salt rock was found (lime stone), exceedingly weak, so much so that I would not work it, and I rented it to some men in the neighborhood for a term of years. Since steamboats commenced navigating the Cumberland, salt can be purchased at so reduced a price that no one could manufacture it at my works without sustaining a loss."

These weaker salines in the far West, were in former times, and before the white man settled in those regions, the resort of buffalo, deer, &c.

An account was published in the Journal of Commerce of the 9th instant, of the explosion in the well near Elmira, Chemung Co. New York, the week previous, in consequence of a lighted candle being taken down into a well newly dug, which ignited the carburetted hydrogen gas. This must have been abundant, and had become mixed with about an equal volume of atmospheric air, thereby becoming explosive. In this case two men were injured by the explosion, and one killed.

The salt made in Maine, Massachusetts, Connecticut, New Jersey, Delaware, Maryland, North Carolina, South Carolina and Florida Territory, and the sea-shore of Virginia, is from sea water evaporated by solar heat.

All the other salt noted as made in the other States is made from saline springs and wells. The salt mine in Virginia at the period at which the census was taken was not then discovered.

In the United States a limited quantity of salt only is used, but in England and France a cheap means of manufacturing a valuable alkali from it has been discovered. At the present time large quantities of Soda Ash and Sal Soda are made from common salt, and these articles are now being extensively used throughout the world.

The soap manufacturers and glass makers are using soda ash as a substitute for pot ash, which latter article is becoming scarce and dear in consequence of a dimunition in the quantity of wood ashes.

A well has recently been sunk at Montezuma in this State to the depth of 605 feet, yielding water of great specific gravity. This water by the hydrometer denoted 100 degrees, which is full saturation of common salt in hot water. On analyses it yields 1024 grains of common salt and 1088 grains of chloride calcium and magnesium to one pint of water.

Mr. L. P. Rice, who superintended the boring of the well, in his letter to me of June 26, 1842, states—

"At 190 feet struck the first view of salt water, which stands by the hydrometer at 44 degrees; at 245 feet at 48 degrees; at 501 feet at 52 degrees; the last vein, at 598 feet, stands at 100 degrees or full saturation. The boring was through red and blue indurated clay, plaster rock and slate."

His Excellency Governor Seward, in a letter to me of June 22d, remarks—

"The operations at Montezuma are likely to result in the discovery of important Facts bearing on your theory."

Nature has been most bountiful in its provision in the supply of the material for the manufacture of this article of absolute necessity, both in the salt mines and springs of salt water which are to be so abundantly found in various sections of our country.

I will in the course of a few days lay before the public a further statement in relation to the Salines of this State, and also in relation to the Fossil Salt in Virginia.

E. MERIAM.

LIGHTNING CONDUCTORS.

"A way for the Lightning of the Thunder."

The Cities of New York and Brooklyn have, the present year, been uncommonly free from thunder and lightning. Neither the detonations of the one have been felt or heard, nor the coruscations of the other been seen, more than five or six times during the warm season, a circumstance as extraordinary as it is rare.

In other sections of the country, thunder and lightning has been frequent, and the damage great. In our files of the Journal of Commerce, published in the City of New York, we find from May 1st to October 1st, inclusive, the record of eighty-five different disasters, caused by thunder and lightning.

Among these, the death of fifty persons are recorded, as killed by lightning, fifty-seven persons were injured, and three cases of damage, where the number of persons injured are stated as "several."

Eighteen barns, with the contents of each were burnt, and one dwelling house, several barns, and other buildings injured.

Several horses, oxen, cows and swine, are stated to have been killed.

Also, one buzzard, one hen, several ducks, one cat and one dog, *killed.*

Feathers, in these cases, were not a protection. Three buildings are stated to have been struck, which were furnished with lightning rods. The damage in these three cases, was trifling. In one of the cases, the termination of the lightning rod, is said to have been defective. The defect is not stated. In another, the lightning left the rod before reaching its termination. The cause not ascertained. The third case was that of the Telegraph office, at Baltimore, particulars not mentioned.

In one case, it is stated that the lightning followed a tin leader from the house to its termination, and some portion of this *conductor* had the *appearance* of being fused.

A field harrow, which was being drawn over the surface of the ground by a pair of oxen, was rent in pieces. The lightning passed down the chain. The oxen were killed.

Of the persons killed, eight were killed by two bolts, four at each time.

Fourteen were killed by seven bolts, two at each time.

Twenty-eight were killed by as many different bolts.

In 1843, the dwelling house of Mr. B. Skidmore, Franklin street, New York, was struck by lightning, but not much damaged, the inmates were not injured. In the garret was a brass kettle, which had been used. This was fused in several places, and the bail soldered to the kettle. A pair of shoe brushes, which were threaded with brass wire, attracted the lightning, and the wire was fused in several places, and left in small globules. The tin spout attracted the lightning, which passed down that conductor without melting the solder. The lightning passed from the leader to the cellar door hinges and hasp, which were iron, and then skipped from nail to nail, as is seen by the nails, and passed off.

The brass kettle being covered with a black incrustation, and the wire of the shoe brushes with verdegreas corrosion, caused the metal to absorb the heat of the lightning; had these been polished surfaces, I think it may be presumed, that no absorption of heat would have taken place, and consequently no fusion. Bright surfaces reflect all heat, the properties of which we have any experience in, and I know of no reason why a polished surface will not reflect electric heat.

A dwelling house in Cranberry street, Brooklyn, was struck by lightning in 1842. The lightning passed down the tin spout to its termination, which was some distance above the ground, from this it burst through the basement door and followed the copper bell wire. A lady passing through the basement hall at the time, with a tumbler of water in her hand, was knocked down and the water spilt over her body in falling. The tumbler of water restored her.

The soldering of the tin spout was not in the least melted. The concussion appeared to have accompanied the lightning to the basement door, as that door was forced open. The copper bell wire was not melted, although the electric charge was so heavy as to force in the door.

This house was two stories high, and adjoined a three story house, which latter was not struck. There were several trees in front of the house, and other dwellings adjoining it, none of which were injured. The house was painted white.

A dwelling in Duane street, in the City of New York, was struck some years since; the lightning passed down the tin leader and killed a little girl who was holding a tin cup to the spout, catching rain water. The tin cup was much bruised.

In these four cases mentioned, tin was found to be a good conductor, and in but one instance was the heat known to have fused the soldering, and this only apparently.

Bright surfaces may therefore, be presumed to have good conducting properties, and in addition to this, all electricians prefer polished surfaces for the points of lightning conductors. I may therefore infer that experience shows that these surfaces have equal powers of attraction.

We have a common illustration of heat upon polished surfaces, in the use of bright tin to shield wood work from the heat of stoves; if one of these bright surfaces is passed over with paint by a brush, that particular portion will at once absorb heat when in contact with a heated atmosphere. This is an illustration which is brought home to every persons' experience, in high northern lattitudes.

I shall not, in this paper, discuss the material of lightning, or say it is a fluid, or what other matter. It is etherial fire from the great labaratory of Nature, created by the Almighty. We see it sometimes in a ball of fire, at others in the flash of flame, and then that which is the most common, the zig zag crinkled stream of fire.

Thirty-three centuries ago, the penman of the Book of Job, whose extensive knowledge of natural things are evidenced by the language of that sacred poem, in speaking of the works of the Almighty, says: "*He made a way for the Lightning of the Thunder.*" In the ignorance of the dark ages, knowledge has been entombed, and when we regain it, we are apt to consider it as original with ourselves, while in reality it is but the resurrection of the past.

The detonation of the artillery of the clouds, causes the human body that reposes at the bottom of deep water, to arise to the surface, the influence of thunder upon our atmosphere is very great: the observing house-wife notices the milk in the cellar is affected by the thunder's roar: if it then affects animal fluids in a detached state, how much more must they be affected when mingled up with animal life.

I will confine myself, however, in my remarks, to the point which I am anxious the reader should give heed to, viz: that the Almighty "*has made a way for the lightning of the thunder.* The operations of Nature are found to be most simple in their progress and great in their results.

A metalic wire well polished, or a metalic rod without polish, will conduct the lightning of the thunder safely into the bosom of the moist earth, and dissipate it on the surface of water.

It is a small service for man to render, to ensure protection to his person and to his possessions, from the fire of the raging tempest, to raise "*the way the* ALMIGHTY *has made for the lightning of the thunder,*" and a most reasonable service; it is obtaining the protection by a use of the means provided by Him who made both. Learned men have discussed the various kinds of "ways" that shall be reared: some say it must be an iron bolt of an inch in diameter and round, others that it must be square iron, and still another class, that these ways must have side points. I will not dispute with either of these class of advocates for a particular way, but will introduce the testimony of experience in favor of a simple way, a cheap way, one that can be reared for a single dollar, and which will be effectual protection, as I believe, in the heaviest thunder storms that are experienced.

Letter from David Henshaw, Secretary of the U. S. Navy, to E. Meriam:

"NAVY DEPARTMENT,
Aug. 2, 1843.

SIR,

Upon the receipt of your letter of the 25th ult., making inquiry as to the sufficiency of the lightning conductors, used on board our public vessels. I referred it to the chief of one of the Bureaux, for information as to their practical operation.

I am informed that the lightning conductors now and heretofore in use, have been found to answer well. *None of our ships have ever been injured by lightning, if the con-*

ductors were up. Whether the rods may be reduced or enlarged, it would be difficult to say, until experiments have been made to test the point.

I am very resp'y,
Your ob't servant,
DAVID HENSHAW.
E. MERIAM, Brooklyn."

Letter from Capt. S. H. Stringham, Commandant of the U. S. Navy Yard, Brooklyn, to E. MERIAM:

"COMMANDANT'S OFFICE, NAVY YARD,
Brooklyn, Aug. 10, 1843.

SIR,

In reply to your note, I have to state that the iron used for conductors of vessels of war in the Navy, is of the following dimensions, viz:

For sloops of war, one quarter of an inch in diameter.

For frigates and ships of the line, five-sixteenths of an inch.

Resp'y your ob't serv't,
S. H. STRINGHAM.
E. MERIAM, Brooklyn."

A friend has placed in my hands the Army and Navy Chronicle and Scientific Repository, of August 12th and 19th, 1843, which is published at Washington City. Twenty-seven pages of this valuable paper are occupied with the details pertaining to the Report of the Lightning Committee, appointed by the Board of Admiralty, to inquire into the injury to vessels belonging to the British Navy. The Committee consisted of Rear Admiral J. A. Griffiths, Chairman; Rear Admiral Sir J. Gordan, K. C. B.; Captain James Clark Ross, R. N.; Professor Daniell, F. R. S.; Mr. John Finchman, Master Shipwright; Walter Clifton, Esq., Secretary.

In the papers produced before this Committee, by Mr. Snow Harris, (of whom M. Arago, the celebrated French Astronomer, speaks in great commendation,) it appears from the summary made up, by search of the official log books, that there were 174 cases of vessels belonging to the British Navy, damaged by lightning: of these, 47 were line of battle ships, 49 frigates, 17 brigs and a cutter; of which there were struck by lightning on the mainmast 68, mizzen mast 5, foremast 28, bowsprit 1, fore and main 6, main and mizzen 5.

Sixty cases are not specified. In about one hundred of these cases of damage, Mr. Harris found that the number of seamen killed was sixty-two, wounded one hundred and fourteen, exclusive of one instance, to which the number killed is denoted as several, and that of the Resistance of 44 guns, in which only four people were saved. Of the spars damaged or destroyed, ninety-two were lower masts, eighty-two were top-masts, sixty top gallant and royal, and one bowsprit.

Here follow copies of letters addressed to the Lightning Committee.

Copy of a Letter from Capt. Woolrige, to Walter Clifton, Esq., Secretary, dated

"STONEHOUSE, PLYMOUTH,
June 7th, 1839.

SIR,

In answer to yours of the 5th inst, requesting me to state for the information of the Commissioners appointed to inquire into the subject of lightning conductors, the circumstance of the Norge being struck in 1815, and my authority. Her Majesty's ship Norge, when at anchor at Port Royal Harbor, Jamacia, June 1815, then commanded by Capt. now Admiral Sir Charles Dashwood, was at night struck by lightning, which knocked the maintop gallant mast in three pieces, shivered the maintop mast, absolutely forcing the centre out of it, and brought the mizzen topmast and top gallant mast on deck; consequently the ship was a wreck, and detained two or three days from sailing with a valuable convoy for England.

I was a sick passenger on board the Norge at the time of the accident, but so terrific was the shock, that every man was in an instant on deck; therefore I was an eye witness to the damage sustained.

What is more remarkable, (and most fully evinces the great utility of conductors,) is, that among the number of ships which surrounded ours, none were struck but a merchant ship, who, like the Norge, had not her conductor up. The Warrior, of 74 guns, was at anchor close to the Norge, with her conductors up, and did not receive the least injury.

I have, &c.,
THOMAS WOOLRIGE,
Captain, R. N."

The Hastings 74, having returned to Portsmouth, her captain was written to and the following reply, dated 8th June, 1839, was received:

"SIR,

I beg to state for the information of the Committee appointed to inquire into the merits of Mr. Harris' and other lightning conductors, that on the morning of the 8th of March last, a heavy thunder storm came on, which even spread over the town and harbor of Valetta, that at seven o'clock on the same morning, the Ceylon was struck by lightning, her pole foretop mast being shivered, and a piece split out from the side of the foremast, from the mast head to near the deck where the fire engine was, to which the lightning was drawn by the iron work, and dispersed in some water in the bottom of the engine. The Ceylon had no conductor, and was lying in Dock Yard Creek, close to the Talavara and Bellerophon, both of which ships had conductors up and were not struck. The Hastings also had a conductor up, was lying in a direct line with the Ceylon, and only distant a few hundred yards.

An English merchant vessel, which I believe was struck by lightning during the same storm, while off the island of Malta, was brought to Valetta, almost on her beam ends, the lightning having entered her hold and had been attracted to the side by some bolts; the lightning at the same time driving a part of three planks out of the side. This vessel had no conductor.

I have, &c.,
FRANCIS E. COOK,
Captain."

Captain Smith was written to upon the same subject by Mr. Clifton, and returned the subjoined answer, dated

"BEDFORD,
June 7th, 1839.

SIR,

In answer to your letter of the 5th instant, I beg to state, that about the 8th of September, 1824, writing from memory, His Majesty's ships, Phantom and Adventurer, were moored inside the niche of Gibaraltar, when a violent thunderstorm took place; I was writing in my cabin in the evening when I was interrupted by a startling crash, followed by a cry 'the Phantom's on fire!' I instantly ran upon deck, turned up the hands, veered away upon the fasts, hove in the bower cables, and manned the boats: but the flames were quickly extinguished, principally, Captain Sturt told me, by the *cool exertions of one of his men*, who was therefore expressly recommended. Her foremast I understood, was rent from the truck to the deck, some sails and rigging were set on fire and several seamen struck down.

On this occasion the Adventurer's conductor was rigged, but the Phantom's was unprotected. The vessels were about a cable's length apart, and they were the only ships there. Many of my men felt a kind of electric shock, but we did not sustain the slightest damage.

My own opinion of the conducting power of METALIC WIRES, and therefore the vast utility of lightning conductors, indifferent as to their construction and adaptation seemed to be, was very strong in their favor; and I have labored hard to propogate this feeling, in opposition to their being dangereus from attracting the lightning, an opinion which cannot but be deemed absurd, since it infers that the masts, and not the ships, form a point in the electric surface. Indeed, it would be a comfort to the service, as well as an enormous saving in spars, canvass and gear, were the laws and indications of meteorology more strictly attended to.

During many years passed at sea, I have known of several disasters occasioned by lightning, and also of various ships being struck and escaping destruction as if by a miracle. This led me to consider the subject, that in my written orders, the officer of the watch was directed, whenever the weather appeared threatening, whether at sea or in port, to hoist the conductor, which was kept (not in a store room,) in a box fixed to the stool of the after maintop mast back-stay, and both officers and men were carefully instructed to place it, so that the spindle should be well above the truck, and the chain carried into the water, clear of the crosstrees, top and channels *by outriggers.*

Under these precautions, I feel a confidence tantamount to conviction, that at least the spars of His Majesty's ship under my command, were saved in several severe thunder storms which she encountered in the Gulf of Lyons the Adriatic and Ionian seas, and in the Lesser Syrtis, the electric fluid having been seen to descend the chain and pass overboard into the sea, without damage to the ship.

I happened to be on board the Queen, of 74 guns, when an electric discharge shivered her maintop mast to chips, and fatally damaged her main mast in the harbor of Messina, in 1815. On this occasion, I remarked to Sir Charles Penrose, who had his flag flying on board of her, that the amount of the injury now inflicted, *would supply all the ships in commission with lightning conductors.* If I remember rightly, this ship carried the useless and dangerous appendage of a spindle, upon her truck.

I have, &c.,
W. H. SMITH,
Captain R. N."

On the same day, Captain Edward Sparshott, thus addressed Mr. Clifton:

"SIR,

I beg to acknowledge the receipt of your letter of the 5th instant, requesting me to state to the committee, appointed by the Lord's Commissioners of the Admiralty, to inquire into the merits of Mr. Harris' and other lightning conductors, the circumstances of a case of lightning which occurred at Trincomalee, in the year 1837, whilst I was in command of Her Majesty's ship Winchester, &c.

The following are the circumstances which I have the honor to transmit for the information of the Commissioners:

In the month of November, 1837, her Majesty's ship Winchester, under my command, was lying in Trincomalee during a thunder storm, on which occasion, the Cochin tank vessel, moored about two cables length in shore of us, was struck by lightning, and her foremast so much damaged as to require a new one. The electric fluid could be easily traced from the hoop of the masthead to the jaws of the fore gaff, which was lowered down upon the boom, whence it appears to have been attracted by the chain cable, by which the vessel was riding, passing out of the hawser hole into the water. The Cochin was schooner rigged, without a topmast. She had no conductor up. The Winchester had a conductor up, which was made on board, *of small copper wire, of about half the size of that of the established conductors.* It was the largest we could procure; and as the Winchester escaped injury, although the electric fluid was seen to pass down into the water, *it appeared to answer the purpose intended.* No other vessel was near the Cochin or Winchester.

I have, &c.,
E. SPARSHOTT,
Captain, R. N."

THE COMMITTEE, IN THEIR REPORT, state:

"We beg to observe that every search has been made for cases of injury sustained by ships fitted with conductors, and though several statements to that effect have been brought under our notice, not one has been substantiated; and no instance, so far as we are aware of, has ever occurred of a ship sustaining injury when struck by lightning, if the conductor was up to the mast head, and the continuity uninterrupted to the water."

Having laid before the reader this testimony which is that of great experience and what I consider conclusive, I proceed to quote from an old file of newspapers.

I have in my possession a file of ancient newspapers, published in Boston in 1753, in one of which I find a notice, in the words following:

"Those of our readers in this and the neighboring Provinces who may have an opportunity of observing, during the present summer any of the effects of Lightning on Houses, Ships, Trees, &c. are requested to take particular notice of its course and deviation from a straight line, in the Walls or other matter affected by it, its different operations or effects on Wood, Stone, Brick, Glass, Metals, Animal Bodies, &c., and every other circumstance that may tend to discover the Nature and Complete the History of that terrible Meteor. Such observations being put in writing and communicated to *Benjamin Franklin*, in Philadelphia, will be thankfully accepted and acknowledged."

In the same file of papers of June 24th, 1753, I find the following, which I presume was from the pen of BENJAMIN FRANKLIN:

"Philadelphia, June 12. On Sunday, early in the Morning, a Dwelling House and Kitchen, on the western Side of Second Street, were struck by Lightning and considerably damaged; but being untenanted, no person was hurt. The great Fondness that the Matter of Lightning has for Metals, was perhaps never more conspicuous. In its passage downwards, it went considerably out of its nearest Way to the Earth, for the sake of the Leads* of the Windows, and Iron Hooks, Staples, &c., in the Window Frames, which were all in many Places, much melted and stained thereby; several Panes of Glass were also a little melted and stained thereby in a beautiful Manner, round the edges, near where the Leads surrounded them, and those parts of the Leads being thin and not sufficient to conduct the whole of the Flash, were melted; but the thick Parts of the Leads (which separates the Panes from each other) conducted it freely, and without being the least damaged."

In the same files of August 1st, 1753, I find the following:

"On Monday last, the Corporation of *Harvard College* met at *Cambridge*, and taking into consideration the great Genius of BENJAMIN FRANKLIN, of *Philadelphia*, Esq., for Learning, the high Advance he has made in *Natural Philosophy*, more especially in the Doctrine and experiments of ELECTRICITY, whereby he has rendered himself justly famous in the Learned World, unanimously voted him a Degree of *Master of Arts*, which Vote was fully confirmed by the Overseers of that Society, and on Friday, the President presented him a DIPLOMA, therefor."

Gentle reader, of the two, which was the most honored, BENJAMIN FRANKLIN, by the Diploma, or the college in awarding it to him?

These lines were from the pen of Benjamin Franklin who honored the college by receiving a Diploma at the hands of its faculty.

The laws which govern electricity are to be found by observation, as far as these are capable of investigation.

The construction of the lightning rod is a matter of much importance. I examined these on board of American ships of War. These are made fast to the highest point of the mast and extending about a foot above it and then diverge and when reaching a surface nearly even with the railing of the ship are braced out with a wooden outrigger and drop into the water. This mode of construction has been practised and it is sanctioned by experience.

In the putting up of lightning conductors to buildings, I would make fast to the highest point of the roof, letting the rod extend upward as high as its size would afford it a support. If the rod is small I would sustain it by a wooden support ten feet—the support may be a round pole flattened at its lower end so as to nail it to the building. From this fastening I would let the rod diverge from the building, and make it fast by a staple to a fence post letting it extend into the ground from this several feet or into the well or into a cess pool and connect with the water.

The point of the rod should be polished metal or a point of bright tin. Tinned wire for the entire rod would cost but one cent more per pound than common wire. The tinned wire is sold by Messrs. Phelps, Dodge & Co. corner of Cliff and Fulton st., New York, at seven cents per pound and the iron wire at six cents per pound. Size called No. 1, about five feet weigh a pound. Where this wire cannot be had use nail rods. The lightning conductors to ships of war are in pieces of about four feet with a turned eye at each end which connect the pieces together like a chain. When the rod hangs pendant the weight of the rod keeps these parts in close contact. The rolls of iron wire are in long pieces, and only one joint need be made in a rod for a high building and this by means of loose hooks.

It is said by some learned men that the rod will not conduct when corroded by rust. The rods of ships of war get rusty but no injury has yet been found to result.

My object is to call public attention to the risque of buildings being without protectors and to suggest the cheap rod—the effectual metallic policy which is within the

*A century ago lead was used for window sash and then the panes of glass were about four inches in diameter and diamond shaped.
E. M.

means of every one who has life or property to protect.

I would use a wire no larger than a common knitting needle if I could get no other.

PROFESSOR OLMSTED, *in a letter to me dated* YALE COLLEGE Oct. 12th 1842, *remarks, that*:

"Lightning possesses great powers of discrimination, selecting in its course the best conductors with great precision. I think it will very seldom happen that it will strike a vessel below the water line. Still if carried by some good conductor into the hold it may evidently reach the bottom of the vessel."

"I think it not unlikely that the large wire you speak of would in most cases answer well enough for a lightning rod; but still, as it is not accurately ascertained how large a wire the more violent discharges of the fluid are capable of melting or dispersing.—I should prefer a rod ¾ of an inch in diameter for a dwelling house, but would risk a large wire for a barn or out house. The community will be benefitted by making known the cheapest rod that will answer the purpose; for such only can be generally adopted. It is a great objection to some of the new forms of lightning rod that they are too expensive for common use. None but the wealthy will adopt them."

"I have heard that in a mixed forest, pine tress are more likely to be struck by lightning than others. If the fact is so, it is probably owing to the non-conducting properties of the resinous matter of the tree.—Other trees may be struck as often or oftener, but would show less marks of violence, *for lightning does not exhibit its peculiar violence except where its passage is opposed by imperfect conductors.*"

In another letter from the same learned Professor, to myself, dated Yale College July 25th 1843; he remarks,:

"I think a combination of wires such as you propose might if properly united be a cheap and eligible form of rod. The French practiced something of the kind on a larger scale for their ships of war."

"The termination of your rod in the Cess pool is well, unless the pool is made of Hydraulic Lime. This being a worse conductor than the earth itself presents an impediment to the dispersion of the fluid at its termination. M. ARAGO gives an instance of a rod terminating thus which failed."

"I think your wire of 5-16 of an inch, hardly large enough for the most violent charges. The charge would be apt to throw off small portions upon neighboring conductors—not enough however, as I imagine to destroy life. Your point of tin might melt.

"I am of your mind with respect to the *inutility of side points.*

"That Barns are oftener struck than dwelling houses has been noticed by others. Professor SILLIMAN has an article on the subject in one of the earlier numbers of his Journal. He supposes that the steam arising from barns furnishes a conducting medium to the electric fluid."

"*Rusty* nails and hinges are doubtless better conductors than wood, but not so good as when bright."

"Tin spouts and stove pipes are evidently dangerous things unless connected with the conductor or *converted into conductors themselves by a proper connection with the earth.*"

Since the letter last above quoted of the distinguished Professor, was written, I have obtained the testimony of the Secretary of the Navy as to the use of the small wire in the United States Navy on board of ships of war, where the greatest security against lightning is required.

The conductors used on board British ships of War, I understand are of the same kind of wire as described by Capt. Stringham in his letter to E. Meriam as above.

Professor OLMSTED addressed a communication to the editors of the New-York Observer which they published October 23d 1843, on the subject of "Protection from Lightning," which, although brief, is pertinent. It is in the words following.

'PROTECTION FROM LIGHTNING.'

'Messrs. Editors :--I observed in your paper of the last two weeks, a "Reply" to my remarks on Lightning Rods, by Mr. J. E. Strong of Boston, who appears to be interested in supporting the claims of the "improved rods," as constructed by the late Dr. King. Presuming that it would not be agreeable either to yourselves or your readers, to encumber your paper with a lengthened controversy on this subject, I will only submit to the consideration of your respected correspondent one or two brief suggestions :

"The theoretical principles of electricity with which a great part of his paper is occupied, appear to me to have very little bearing on the practical construction of lightning rods. As far as this is concerned, it will make no difference whether electricity consists of two fluids, or only one, or no fluid at all. The construction of conductors must depend on the known and established *properties* (not *hypotheses*) of electricity, and the final appeal must be to experience. Can Mr. Strong point out a case where a lightning rod constructed according to the rules I have prescribed, has in fact failed to afford protection? I do not ask whether according to his views, it *would* fail, but whether it *has* failed? The cases he has adduced are more or less hypothetical, and are therefore inadmissible. I do not assert that no case of failure of the simple Franklin rod constructed as I have directed, *can be* found. None has ever come to my knowledge, either from personal observation or from examining the records of experience for nearly a hundred years. Should he meet with such a case, it certainly concerns the public safety that it should be made known. The importance of such a case will justify us in requiring the most careful investigation of the facts, and the most unequivocal testimony. I do not consider it a point of the greatest importance that rods should be "round" instead of "square :" but believing that round rods are safe when all other things are right, I would not excite unnecessary alarm in any householder because his lightning rod happens to be round. And believing as I do that a single rod is sufficient to protect ordinary dwellings, I would not urge the necessity of arming it with two, three, or half a dozen.

Respectfully,

DENISON OLMSTED."

With regard to side points I have to observe that it is said that in electric discharges from the clouds the lightning has been seen to disperse in its downward course to the earth at the side points of the modern lightning rods. I cannot conceive it possible that the human eye could determine that path by its observation, however near the observer might be to that rod—if some substance which was easily fused was placed upon these points and that should be found melted by the electric fire which should escape from these side ways, then we might begin to indulge such a belief, and then my conclusion would be, the fact being established, that such side points are dangerous. I have in very extensive wilderness journeys had the opportunity of examining a very great number of trees which had been scathed by lightning, and among these I have not met with a single instance where the electric fire escaped by the horizontal limbs. Had such an escape taken place the tender bark would have been scathed and thus discovered such track of the lightning.

I should as soon expect to be able to distinguish the materiality of an idea emanating from the human mind and declare its visibility to the human eye in passing from the mind in which it kindled up, through the arm, the hand of which, guided the pen that with its coloredfluid traced its substance upon the parchment sheet, as to be able to distinguish the minute divirgings of the lightning's fire in its instantaneous passage from the cloud to its terminus.

Some persons assert that the passage of the lightning is from the earth to the clouds, If so then we should not look for thunder and lightning upon the great ocean. This doctrine may be said to be anti-neptunian. Lightning is as frequent upon the water, as upon the land. It seldom happens that lightning does much damage in a vessel below the water line.

In 1817 the ship Pallas, bound from Savannah to Europe was struck by lightning at sea, and put into the port of New-York to examine the damage. In this case, on overhauling, it was found that a hole about the size of a swivel ball had been made through her kelson and that the slivers and splinters left were so numerous as to prevent a leak. The account of this singular phenomenon was published about two years ago in the Journal of Commerce and was well authenticated.

Within the last twelve months I have seen the account of a public vessel in the East India seas having been struck by lightning and blown up, the electric fire entered the magazine and ignited the powder. The destruction of human life was very great, but the vessel being near the land, and several other vessels being near, many lives were saved, as a portion of the vessel was separa-

ted from that immediately surrounding the magazine.

Among the vessels struck by lightning the past year, of which accounts have been published between the months of April and October I find the following:

"The schooner Saul from Boston for Savannah, 22d July, 1842 when off Plymouth was struck and the captain who was at the helm was struck senseless. Shortly after smoke was seen to issue from the hatch way and on removing them the flames burst forth with such fury that the crew had bare time to escape to their boat.—*Journal of Com. Aug. 4th.*

"During the thunder shower yesterday forenoon, the lightning struck the foretop gallant mast of the brig Woodstock, Capt. Tucker, lying on the opposite side of the river. The top-gallant mast was split in pieces. The blocks on the top-sail yard was also split and both clews of the top-sail were set on fire. The rain however, which was falling in torrents at the time, soon extinguished the fire without much damage. The lightning descended down the top sail tie to the top sail sheets, which were of iron and thence to the deck of the vessel, following the chain cable, which was lying across the deck, and passing off at the side. The links of the chain of the top-sail sheet were scattered in all directions over the deck. The captain, mate and another person were in the cabin at the time, but fortunately received no harm."—*Savannah Rep, 27th July* 1842.

"The schooner Maria, Capt. Eldrickson, lying at the new basin, was yesterday struck by lightning about 4 o'clock. It carried away her maintop mast, shivering her mainmast, passed through the center case setting it on fire. It was only through the exertions of the crew that the vessel was saved from being consumed. Capt. E. was at the time leaning against the main mast and was saved by the chain of the center-board attracting the fluid."—*N. O. Pic. July 21st*, 1842.

"Ship Saxon, of Salem, while lying in the port of Havana had two main top masts shivered in the course of ten days."—*Jour. Com.* 26th *July* 1842.

"At New-Haven on Tuesday morning Aug. 8th 1842, the brig Comet was struck with lightning, which passed down the fore mast and then took to the chain cable, following it through the hawser hole into the water. But little damage was done."

"The Ligenia, at Boston for Havana 23d July 1842, sailed in company with brig Ottoman, Hannan, for Boston, and parted company 30th. 1st inst. lattitude 48, 42, lon. 71, 10. At half past 3 A.M. experienced a severe tempest, during which the lightning struck the main mast and shivered it to pieces, together with the main-royal yards; also damaged the main and top gallant masts and yards attached, burnt the main top gallant sails and cut two large holes in the main top sails. It then went between decks, started up three of her between deck planks and split one of her deck planks. During the shock the mate and one man was knocked down and the mate slightly injured."—*Journal of Com. Aug.* 1842.

Vessels should be required by law to carry lightning conductors and to keep them constantly rigged. The melancholy scene which I once saw described of a vessel with a great number of passengers which had been struck by lightning at sea and wholly destroyed will never be effaced from my memory while life continues. The passengers were all obliged to flee the burning ship in open boats on the open ocean and were providentially met with by a vessel which rescued them from a watery grave. One such misfortune is of greater amount than all the money expended for lightning conductors since the earth has commenced its course in the harmonious system of the universe.

Steamboats are rarely struck by lightning and when such misfortune happens, but little damage is done.

I have met with but four accounts altogether of steamboats struck by lightnig.

One of these was about a dozen years ago—the steamboat Philadelphia, on the Delaware. The railing of the boat had a splinter of wood grooved out of it by the lightning and it was the only mark left of the electric fire. I have this account from Capt. Jenkins commander of the steamboat Albany, who also states to me that it is the only case that he has any knowledge of where a steamboat was struck by lightning.

One other in the account I have given above on the waters of the Ohio River the present year.

In 1842, a steamboat in the North River opposite New York, was struck by lightning but no damage done.

In 1841, a steamboat on Lake Erie was struck by lightning but little damage done.

I have never known a ware-house in which iron and steel is stored, to be struck by lightning. I have made extensive enquiries with the same result as to Furnaces, Forges and Blacksmith shops.

Iron Rail-ways which extend for hundred of miles and under various clouds, have never been struck by lightning, or at least I have never been able to find any account of such a phenomenon.

Some sections of country during a series of years are more visited by lightning than others. I have noticed this in extensive forests. I remember that in travelling many years ago on the west side of the Muskingum and Tuscaroras rivers, through what was then a wilderness road that passing up an extensive oak ridge the trees that had been struck by lightning were so numerous that we gave it the name of thunder and lightning ridge, and while upon this particular portion of my essay I will remark that trees growing upon soil filled with minerals, are impregnated with the particular minerals which lies in the soil in which the trees take root, hence such trees have attractions and conducting properties. In the combustion of wood for crude ashes to make into fixed alkalies I have noticed this peculiarity in the color of the Alkalies when fused by intense heat and it may be traced in the color of glass in which the fixed alkalies are used.

It will be noticed in the statement of the 85 cases of damage by lightning, that the proportion of barns are greater than that of dwelling houses. Professor Olmstead quotes the Scientific Journal of Professor Silliman on this head, imputing it to the heat of the hay. I am much inclined to the opinion that the metalic paints on dwelling houses, has much influence upon electric fire, and impute the difference to that cause, The metalic paint covers a broad surface, although very thin; if it had the thickness of tin, the influence would not be disputed, and although thin, I think the influence I suggest, may be presumed.

Persons who drink water which contains mineral properties, are more or less affected by such mineral properties. I have been frequently at the Blue Licks, in Kentucky, and after drinking the water for a week, I found that silver coin in my pockets, and my silver sleeve buttons and watch, were tarnished by the sulphurated hydrogen in the water which I drank. It may be owing to this influence, that persons are more or less affected by electricity.

Professor Olmstead, in one of his letters, which I have quoted, speaks of the liability of a small rod to being fused by the lightning. I have never met with any account of such a result in all my investigations, which have been extensive.

In the house struck by lightning, in Cranberry street, Brooklyn, in 1842, there was a small copper bell wire about the size of No. 17, this conducted the lightning without melting any portion of it, and the charge was so heavy that when it left the tin spout in front of the house, it burst through the basement door to reach the wire, and was finally dissipated in a tumbler of water.

St. Paul's Church, in London, was struck some years since, as I am informed by a gentleman of great scientific attainments; the lightning conductor is large, being at the termination, several bars of iron melted together and painted. This rod was heated to redness, and the heat continued some minutes. The iron being covered with paint, absorbed the heat; had the surface been bright, I think all the heat would have been reflected, and none absorbed.

In case the single wire is thought to be insufficient to convey a heavy charge, then two wires may be put together, or even three, and four if desired, in which latter case the cost of the quadruple rod will be but four dollars.

I see no possible use in confining the rods to the side of the building, it is enough to make it fast to the top. I would prefer conducting the lightning from the building instead of leading it along its surface.

How far lightning is attracted by metals, is not satisfactorily determined. I have known of no case over thirty feet. The case I refer to, is that of the vessel where the lightning left the mast of a vessel and passed on to the chain cable and into the water, here it was thirty feet from the descent it was making. I have known of several in-

stances where it bounded from ten to fifteen feet, to come in contact with a favorite conductor.

Copper is found to be a better conductor than iron, in the proportion of about twelve to one; therefore, if copper is in close contact with an iron lightning conductor, it would invite the electric fire, and thus divert it from the channel designed for it. Care should be taken in this respect.

The disasters by lightning are so numerous, that it would seem we are not justified in neglecting the protection afforded by a metallic rod, when the testimony is so strong as that here introduced, in favor of its adequacy. This, it will be borne in mind, is that of experience, which is the best school master. I am not desirous to establish a new theory, but to sustain the old doctrine, a doctrine which reaches back to the days of the Patriarch Job, who himself declared that the Almighty "made a *way* for the lightning of the thunder." The great expense of erecting large lightning rods, has been an objection to the extensive use of these conductors, and the new fashioned rods with side points, are also expensive. I do not wish to discourage the use of these rods, but at the same time I do not think that there is any merit in a patent that is to protect human life. If such a rod has advantages, these should not be restrained by a patent.

I have made extensive examinations on high mountains as to the effects of lightning in high altitudes, and I have never been able to find a tree scathed by lightning 3000 feet above tide water, and it may be remarked, that the temperature of that altitude comes so near that of the weather in which we have no thunder lightning, that this fact alone may be the cause of this exemption.

It is unnecessary to discuss the composition of the matter of lightning, whether it is a fluid or what else; it is we know "the lightning of the thunder," and we also know that it is destructive to human life, when the human frame is made to feel the force of one of its bolts. That there is provided "a way for the lightning of the thunder," is declared in the Book of Truth, and all that is required, is that man shall rear this Franklin *rail-way* for the ethereal fire of the skies to traverse in its downward course to the earth. The lightning conductors on board of ships of war, are sometimes corroded with rust, but I have never heard of an instance in which one of these conductors has failed to conduct the fire of the thunder to that element in which it finds repose. On board of some of the largest ships, there are sometimes near 1,000 human beings, and beneath their feet tons of gunpowder, which if ignited by an electric spark, would cause instant destruction. Notwithstanding this, the mariner amid the roar of the artillery of the skies, rests with confidence, that if the lightning first descend upon the ship, the conductors will receive it, and convey the electric fire beneath the ocean's wave.

In the celebrated Mammonth Cave of Kentucky, the lightnings' blaze is never seen, nor the thunder's roar ever heard. I have stood within this vast subterranen territory, near thirteen miles distant from the nearest access to the earth's upper surface, during a violent thunder storm, without being conscious of its occurrence. Here the temperature of the atmosphere is 59° of Farenheit, an atmosphere that does not generate electric fire, thus all Nature harmonizes.

I will in subsequent pages, give a detailed account of this vast nether territory.

Professor Olmstead has published in the New York Journal of Commerce and New York Observer, a lengthy Essay on Lightning Conductors. It is an able production, from an able pen, and I hope he will, for the benefit of his race, continue these Essays. Added to his great ability, he possesses great facilities for rendering important services in discussing this great subject.

The atmosphere of the immediate surface is changed by the coruscation of electric fire and by the detonation of the thunder of the raging tempest, and thus Nature, in all her various operations, harmonizes.

There are great numbers of persons who suffer much from fear during the continuance of a thunder tempest, and dread the occurrrnce of thunder storms. Such persons should always protect the buildings in which they reside, by a lightning conductor, which can be reared for the expense of a single dollar.

Steamboats are the safest during the continuance of a thunder storm, of any place that can be selected.

I cannot close these remarks, without endeavoring to impress upon the mind of the reader the great importance of the free use of cold water, to be thrown upon persons who may be prostrated by lightning. Throw it upon the body with great freeness.

The speed of electricity may be compared in velocity to that of thought, and I should as soon expect to see the emanations from the human mind, escaping from the frill of a pen which marks these emanations upon the sheet destined to record them, as to see the escape of lightning from a metalic lightning conductor by side points.

I would not discourage the use of lightning rods such as some gentlemen are anxious to introduce, but I should feel gratified that those gentlemen would lend their labors toward introducing the cheap rod, believing that they would increase the security to human life, and the increase of the number of rods, would give them more pecuniary benefit, if this they seek.

E. Meriam.

FALL OF RAIN.

The fall of water from the clouds varies in quantity in different years, and in different places the same year, same month, week and day.

We here present the reader with the particulars from three different registers kept at three different places of the fall of rain during the months of June, July, August and September of 1843, inclusive. The First is from the rain gauge kept at the Erasmus Hall Institute, at Flattbush, Long Island—the second from the government rain gauge kept at the city of Washington, and the third is from the rain gauge kept at the Onondago Salines for the use of the state of New York.

The gauge kept at the Erasmus Hall Institute is under the supervision of Dr. Strong.

That kept at the City of Washington is under the superintendence of the Bureaux of Ord. and Hydrography of the U. S. Navy Department.

The Gauge kept at Syracuse is under the Superintendence of Lyman W. Conkey, Esq.

These accounts may be relied upon as accurate.

ONONDAGO SALINES.

June,	3.00.100
July,	2.19.100
August,	2.15.100
September,	4.73.100
Total,	12.07.100 *inches.*

The fall of rain on the particular days at the Onondaga Salines in the months of August and September was as follows:

August	7th,	0.70.100
"	14th,	0.20.100
"	21st,	0.60.100
"	22d,	0.15.100
"	27th,	0.50.100
Sept.	1st,	0.05.100
"	7th,	0.60.100
"	15th,	2.30.100
"	18th,	0.90.100
"	21st.	0.30.100
"	23d,	0.10.100
"	24th,	0.30.100
"	25th,	0.18,100

RECAPITULATION.

	June,	July,	Aug.	Sept.
Washington city,	1.295	1.780	6.889	6.496
Onondaga Salines,	3.000	2.190	2.150	4.730
Flatbush,	1.750	1,960	15,760	2,780

From the above statements it appears that nearly twice as much rain fell at Flatbush during these four months as fell during the same time at the Onondago Salines, and more than a third more than fell at Washington city during the same time.

Mr. Conkey in his letter to me dated Syracuse Sept. 18th says: "On the 15th inst., 2.30.100 inches of rain fell which is the greatest fall of rain I have known at any one time in this place for four years. The Barometer fell during the storm 84-100 inch.

Doct. Strong states to me that the fall of rain at Flatbush on the 22d August was the greatest which had taken place since the rain gauge has been kept at that place, viz, about 18 years.

Washington City is in Lat. 38 d. 52 m. 45 sec., Lon. 76 d. 55 m. 30 sec. west from Greenwich observatory. Flatbush L. I. 42 d. 41m. Long. 2 d. 55 m. east Washington city. Onondago Salines are near N. L. 44 d. and about 2d. 30m. E. lon. Washington City.

On the 8th July 1842, at Flatbush, the Barometer rose an inch above the highest gauge, and again on the 23d July and remained up until the 26th July. On the 12th Sept. the Barometer rose at 2 o'clock, to the same height and at 5 o'clock the same afternoon, sunk down to 29.85.100

At a time subsequent to the creation of the heaven and the earth the sacred penman declares in the Book of Truth that, "the Lord God had not caused it to rain upon the earth,"—"but there went up a mist from the earth and watered the whole face of the ground." The sacred record then proceeds to say that "a river went out of Eden and watered the garden" &c. Here then we find a commencement of the falling of rain, and the origin of primitive rivers. The falling of rain was the natural consequence of the ascension of vapor or mist, and the formation of rivers the same result from the falling of rain. Water exists in its solid state, at the Artic and Antartic poles, and periodically in the same state in the temperate zones. It also exists in its fluid and gaseous state, that of vapour or mist.

The solar orb and the satalite of our Earth, are by the inspired penman, stated to have been placed in the system before animated nature was kindled into life, but vegetable life had its begining before that period, and may have had its support from the heat of the light, which was that which was spoke into being in that day in which GOD made the Heaven and the Earth. The seperation of the waters from the DRY land and the gathering of the waters into seas, immediately preceded the bringing forth of herbs, "and grass bearing seed, and trees bearing fruit, whose seed was in itself in the Earth." Thus we have, in the regular order of succession from the begining, a continuance of what was then began, and although the days which immediately succeeded the creation of Heaven and Earth, which were from the begining, are not chronicled as the period of time which we term days, under and near the equator, nor in that period of time which an inhabitant of the arctic extreme would term a day, but as we use that word in speaking of an event which happened in our day.

E. MERIAM.

ICE, ICEBERGS, ICE-ISLANDS, &c.

The year 1842, as contrasted with 1843, presents a striking contrast in the quantity of polar ice which flooded the Atlantic in the former year.

We have extracted from the files of the New York Journal of Commerce of 1843, the following reports of vessels which have arrived at the port of New York, from March 30th, 1842, to Sept. 18th, of the same year, as follows:

Arrived, March 30. 1842, ship Memphis, Knight, 41 days from Liverpool; on the 19th passed large icebergs southeast of the Banks.

Arrived, April 4, packet ship Siddons, Cobb, from Liverpool, Feb. 17th; lat. 43, lon. 46 50, passed an impenetrable field of ice, 90 miles in extent.

April 6th—ship Echo, Sill, from Liverpool 19th Feb.; 14th March, from lat. 44 31, long. 45 57, to lon. 50, saw large quantities of ice, at one time over 200 icebergs were in sight. The Echo was among the ice 18 hours.

April 7th—Packet ship Cambridge, Barstow, from Liverpool, March 28th; fell in with ice in lat. 44 30, lon. 47 20, and left it in lat. 43 20, lon. 50 15. Saw about forty islands, some sixty feet high, besides hundreds of large pieces and fields.

April 10th—Packet ship St. James, Sebor, from London, 23d Feb.; lat. 45 41, lon. 4 50, saw a number of icebergs: lat. 41 lon. 50, passed a large field of ice.

Ship Clifton, Ingersoll, from Liverpool, Feb. 22d; on the Banks passed a large quantity of icebergs, some of them very large, on a run of 100 miles, had from five to seventeen in sight all day from the deck.

April 12—Br. ship Royal Sovereign, Walker, from Liverpool, 47 days. The R.

S. fell in with great quantities of ice between lat. 46 33, and lon. 44 29.

April 13—Packet ship Stephen Whitney, Thompson, from Liverpool 6th March; passed considerable ice south of the Banks.

Packet ship Roscoe, Huttleson, from Liverpool March 5th; April 1st, in lat. 41 50, lon. 48 50, was surrounded by large islands of ice.

April 15—Packet ship Albany, Watson, from Havre 24th Feb.; 1st instant, lat. 42, lon. 47, saw a large island of ice; 2d, lat. 41 44, and from the lon. 48 30 to the lon. 41 11, passed between icebergs, the weather being clear at the time; they were as far North and South as we could see.

April 18th—Steamship Great Western, Hoskin, from Bristol April 2d; 12th passed several bergs and a quantity of floating ice, lat. 44, and from lon. 48 to 49 30.

Packet ship Sheridan, De Peyster, from Liverpool, March 16th; saw much ice on the Banks.

Ship Mary Kingsland, Weare, from Liverpool 24th Feb.; was obliged to run to the southward two days on account of the great quantities of icebergs and field ice.

April 20—Ship Silve de Grasse, (packet,) Burrows, from Havre 12th March; passed in lat. 43 N., and lon. 39 3 West, a number of large icebergs.

April 21—Ship Charles Carroll, Sec, from Havre 12th; 8th inst., lat. 41 30, lon. 59 30, passed several icebergs.

April 22—Ship Benjamin Morgan, Johnson, from Liverpool 17th Feb.; lat 41, lon. 5, saw several large icebergs.

April 25—Ship Nicholas Biddle, Freeman, from Liverpool, 14th March; 9th, lat. 41 9, lon. 28 34, saw a large island of ice; 14th, lat. 41, lon. 49 20, saw great quantities of ice.

April 26—Packet ship Mediator, from London, 13th instant; lat, 43, lon. 50 saw several large ice bergs.

April 27—Packet ship South America, from Liverpool; passed large quantities of ice on the Banks.

April 28—Ship Isabella, from Bremen, 7th instant; lat. 42 36, lon. 41 20, saw large icebergs, one about three miles long and one hundred and fifty feet above the water, one two miles in length and fifty feet high, also passed other icebergs and much field ice.

May 2—Packet ship Duchess d'Orleans, from Havre; saw great quantities of ice between the lat. 44 and 45, and lon. 32 to 52.

May 4—Ship Emblem, from Liverpool; the Emblem fell in with great quantities of ice, and was obliged to steer South to clear it.

Packet ship George Washington, from Liverpool; April 17th and 18th, between lon. 46 and 59, saw forty-seven large icebergs.

Bark Oberlin, from Liverpool; in lat. 43 30, lon. 40 30, saw three very large icebergs.

May 5—Brig Byron, from Wales; lat. 40 18, lon. 50, saw four large islands of ice, one about 200 feet high and three miles long, saw it thirty miles off.

May 7—Ship Franklin from Bremen; lat. 47, lon. 48, passed about 150 islands of ice.

May 9—Packet ship England, from Liverpool; lat. 41 29, lon. 49, saw large numbers of icebergs.

Ship Pauline, from Bremen; April 22d, lat. 43 30, lon. 48 14, saw thirty-two icebergs.

May 10—Ship Rochester, from Liverpool; April 24th, in lat. 43 16, lon. 42 31, saw a large island of ice. The Rochester fell in with great quantities of ice, and was obliged to run to the Southward to clear it.

Ship Agnes, from Amsterdam. The Agnes has been five days among the ice, saw one island over eight miles long.

May 11th—Br. brig Triton, from Panzance, England; lat. 42, lon. 49 38, passed 150 icebergs.

May 13th—Ships Ocean, from Liverpool; 27th April, in lat. 41 23, lon. 48 27, passed several large icebergs.

May 14th—Packet ship Sully, from Havre; 29th April, lat. 42 5, lon. 49 50, was surrounded by ice for three days, and was obliged to run to the Southward in order to clear it.

May 16th—Ship General Parkhill, from Liverpool; the G. P. fell in with large quantities of ice, and was obliged to steer South to clear it.

Bark Cormo, (Br.,) from Bristol; East of the Banks, passed large quantities of ice.

May 18th—Ship Camilla, from Hamburg; April 25th, lat. 42 19, lon. 43 30 and lon. 46 50, passed two icebergs.

Ship Splendid, from Liverpool; April 30th, lat. 41 20, lon. 46 35, saw two icebergs.

May 21—Ship Howard, from Hamburg; lat. 42, lon. 45 to 53, was ten days in the ice.

May 23—Packet ship Oxford, from Liverpool; 11th inst., lat. 45, lon. 48, saw 15 large icebergs.

Packet ship Oneida, from Havre; 12th, lat. 44 10, lon. 49, saw several icebergs.

Ship Sarah and Arsilli, from Liverpool; in lat. 42 30, lon. 48 to 50, saw great quantities of ice, and was surrounded with it for three days.

Ship Hibernia, from Liverpool; passed large quantities of ice on the Banks.

Bark Francia, from Amsterdam. On the 8th, while running the distance of forty miles on the Grand Banks, counted eighty icebergs.

May 26th—Ship Solar, from Liverpool; May 11th, lat. 44, lon. 47 30, saw several icebergs; 12th, was compelled to stand to the Southward to avoid the ice; 13th, lat. 42 10, lon. 49, succeeded in getting clear of the ice.

May 28th—Steam ship British Queen, from Antwerp; passed large quantities of ice on the Banks, was a day and a half going through it.

June 6th—Steam ship Great Western, from Liverpool; on the 30th and 31st, from lat. 48 30, lon. 46, to lat. 46 39, lon. 53, about 32 hours, passed an immense number of icebergs and a quantity of floating ice.

Ship Liberty, from Liverpool; 22d and 23d, lat. 42 50, lon. 48, fell in with large quantities of ice.

June 8th—Packet ship Francis, from Havre; lat. 42 30, lon. 49 to 50 30, for ninety miles, passed through very large islands and fields of ice.

June 16th—Ship England, from Liverpool; lat. 41 30, lon. 46 30, passed large quantities of ice.

June 25—Packet ship Independence, from Liverpool; 13th inst., passed several icebergs.

June 27th—Ship Fairfield, from Liverpool; 13th, lat. 42, passed fifteen icebergs, extending from lon. 49 30, to 51 20.

June 28th—Packet ship Ontario, from London; June 13th, lat. 42 30, lon. 48 30, to lon. 50, passed a number of very large icebergs.

June 30th—Packet ship Virginia, from Liverpool; between lat. 43 20 and 42 20, lon. 48 30 and 51 30, passed forty icebergs.

Ship Nova, from Antwerp; 8th, lat. 27 50, lon. 36 25, passed a large number of icebergs.*

Juiy 1st—Packet ship Toronto, from London; 17th, lat. 43 30, lon. 49, saw several icebergs.

Ship Carroll, from Liverpool; 18th, lat. 43 30, lon. 48, saw forty icebergs.

Ship Manhattan, from Amsterdam; June 14th, lat. 43 41, lon. 49 45, passed close by two large icebergs.

July 4th—Ship Sylvanius, from Liverpool; saw some ice on the Banks.

Ship Isaac Newton, from Liverpool; 18th ult,, lat. 46 40, to lat. 48, and from lon. 47 to 50, passed many icebergs, extending as far as the eye could reach.

July 8th—Packet ship New York, from Liverpool; 24th ult., from lat. 44 20, lon. 47 40, to lat. 43 18, lon. 51 35, saw a large number of icebergs.

July 14th—Packet ship Ville de Lyon, from Havre; 25th, lat. 41 30, lon. 24 23, saw two large islands of ice, two hundred feet high and three hundred feet long.

July 16th—Ship Samuel Hicks, from Liverpool; 28th, lat. 42 40, lon. 49 30, saw a great number of islands of ice, and continued to pass them for twelve hours.

July 22d—Packet ship Westminster, from London; in lat. 44 30, and lon. 46 30, to lon. 39 30, saw a number of icebergs.

Packet ship Siddons, from Liverpool; passed a great number of icebergs.

Bark Lotus, from Bristol; 30th, lat. 45, lon. 48 40, passed a great number of icebergs, some of them of great dimensions.

July 26th—Ship Emma, from Bremen; the Emma passed a great number of icebergs on the Easternmost edge of the Banks.

July 28th—Ship Memphis, from Liver-

* Probably an error in the figures.

pool; the Memphis saw considerable ice on the passage.

August 3d—Ship Sea, from Liverpool; from lat. 43 to lat. 40 30, saw large quantities of ice, thirty islands; was obliged to go two degrees south to clear it.

August 4th—Bark John George, from Bremen; from the 10th to the 15th of July, lat. 43 20, to lat. 42 30, lon. 48 50 to 52 20, saw seventy-five large icebergs from the deck.

August 5th—Packet ship Utica, from Havre; in lat. 42 34, lon. 49 12, saw a quantity of ice.

Ship Franconia, from Havre. Saw a great many icebergs near the banks.

Ship George Wilkinson, from Bristol.—The G. W. saw several large icebergs on the passage.

Ship St. James, from London. On the 19th, 20th, and 21st July, from the lat. of 44 29 to 45 30, and lon. 47 to 52 30, passed 34 icebergs.

August 6th—Packet ship Roscoe, from lon. 45 30 to 53 30, saw numerous icebergs.

Packet ship Cambridge, from Liverpool, July 15th, lat. 46. lon. 43, fell in with great quantities of ice; was surrounded with it for 5 days, most of the time in a dense fog; saw 23 large islands of ice in one day; left the ice in lat 44 30, lon. 42.

Ship American, from Havre, had been detained by the ice. July 21, lat. 43 lon. 48, saw several icebergs.

Aug. 8th—Ship Swanton, from Liverpool. Between lon. 46 and 54 passed upwards of 300 icebergs—came very near being wrecked on them, having run between two large islands in the night before we discovered them.

Ship Richmond, from Havre. The R. passed numerous icebergs on the passage.

August 10th—Ship Metoka, from Liverpool, July 25th and 26th, lat. 42 lon. 47 64 saw 100 icebergs.

August 11—Packet ship Montreal, from London, July 29, lat 44, lon. 47, saw several large icebergs.

August 13th—Bark Clarissa, from Gottebnurg. Saw a great number of icebergs.

August 15th—Packet ship Albany, from Havre, 30th. lat. 44 30, lon. 47, saw three icebergs.

Bark Natchez, from Bordeaux. Saw great quantities on the Banks.

August 16th.—Packet ship Silvie de Grasse, from Havre, lat. 44, lon. 53, saw three icebergs.

Ship Courier, from Palermo, July 28th, lat. 49 30, saw a large island of ice to leeward; at 5 P.M. saw several large icebergs in sight to the S. W.; reported great quantities of ice to the westward; during the night passed large icebergs; 29th, at daylight, saw a large mountain of ice, judged it to be 10 miles long and 300 feet high, two more in sight; 31st, a large iceberg in sight to the windward.

August 17th,—Ship Southerner, from Liverpool, passed several icebergs on the banks.

August 17—Packet ship Gladiator, from London, 4th inst. lat. 44 4, lon. 47 12, boarded a large iceberg and passed several small ones.

Packet ship Columbus, from Liverpool, latitude 48, longitude 45, passed nine large icebergs.

Ship Odraka, from Liverpool. From longitude 46 to 53, saw large quantities of ice.

Bark Emilie, from Norway. In latitude 46, longitude 45, passed several icebergs.

August 19—Brig Wellingsley, from Newcastle, Eng. from 26th to 30th July, from lat. 44 to 43 30, lon. 48 to 52, saw a large number of large islands of ice.

August 22d.—Ship Peter Hattrick, from Newcastle, 1st, lat. 55 26, lon. 45 25, saw several large icebergs. 7th, lat. 43, lon. 57 40, saw several more icebergs.

August 24th—Packet ship Sully, from Havre. The S. passed a number of icebergs to the eastward of the Grand Banks, and on the 12th, lat. 43 26, lon. 53 30, saw two very large icebergs.

August 25th—Ship Agnes, from Amsterdam, August 13th, lat 43 40, lon. 53 30, saw large islands of ice.

August 25.—Packet ship Independence, from Liverpool, 13th inst. passed several icebergs.

Bark Newburyport, from Antwerp; 9th inst., lat. 45, longitude 45, saw a large iceberg.

August 27th—Packet ship George Washington, from Liverpool, August 13th, lat. 42 40, lon. 50, passed a large iceberg.

August 27th—Ship Fairfield, from Liverpool, 13th, lat. 42. passed 15 icebergs, extending from 49 20, to 51 20.

August 28th—Packet ship Ontario, from London, June 13, lat. 42 30, lat. 42 30, lon. 48 30 to lon. 50, passed a number of very large icebergs.

August 30th—Packet ship Virginia, from Liverpool, between lat. 43 20 and 42 20, lon. 30 51 40, passed 40 icebergs.

Ship Neva, from Antwerp, 8th, lat 27 50 lon 36, 25, passed a large number of icebergs.

August 31—Ship Caledonia, from Liverpool. 11th, lat. 43 30, lon. 48, saw a large iceberg.

September 1st—Ship Rochester from Liverpool, 16th, lat. 42 25, lon. 50 45, passed a large iceberg.

September 19th—Steamship Great Western, from Liverpool, passed a small iceberg in lat. 50 N., lon. 42 W.

ICE—1843.

The following is the account of all the vessels which arrived at the Port of New-York in 1843, which reported Ice on the Atlantic as contained in the files of the New York Journal of Commerce of 1843.

Aug. 11th, 1843.—Ar. Packet ship Silvie de Grasse, from Havre, in lat. 46 30, lon. 46, 39, saw two large islands of ice.

August 18th, 1843.—Arrived, Brig Gulnare, from Antwerp, in lon. 42, saw large islands of ice.

August 25th, 1843,—Arrived, ship Camilla, from Rotterdam, on 8th inst. lat. 49 30, fell in with a number of icebergs and a large field being several miles in extent.

Capt. Parry states that in "in 1816 a great change took place in the polar ice.—A portion of about 2000 square leagues of ice drifted out of the Greenland sea, from between the paralels of 74 deg. and 80 deg.

It is also stated, a great change in the position of the ice took place in the beginning of the 15th century, whereby the intercourse between Iceland and the Colonies then established in Greenland was interrupted, and the colonies probably perished; for nothing has been seen or heard of them since. Icebergs have been seen of almost incredible dimensions. Capt. Ross saw one 1200 feet long, and 325 feet high above the water. Another was estimated to weigh 1,292,397,683 tons. Icebergs commonly float on a base much more extended than their upper surface. When two fields of ice meet in rapid motion the concussion is terrible."

The polar ice may be termed the fouatains of the great deep. The sacred penman, in the 11th verse, of the 7th chapter of Genesis, in speaking of the commencement of the universal deluge, says: "*the same day were all the fauntains of the great deep broken up.*" Truly these immense accumulations of chrystalised waters at the poles of our earth are vast store houses, or fountains of the great deep. The penman of the Book of Job, asks: "*Hast thou entered into the treasures of the snow, or hast thou seen the treasures of the hail.*" Ice has taken the place of silver and gold in the commerce of many sections of the globe, and ship loads of ice are exchanged for the product of tropical climes. Truly, the snow and the hail have treasures, and are dealt out by the merchant by weight.

Ice on the tops of high mountains is perpetual. At an altitude of about 9000 feet. In this latitude frost is permanent throughout the year.

The icebergs of the southern hemisphere are of greater height than those of the northern. The ocean is of greater depth, in the southern hemisphere ihan in the northern. Capt. Ross let down the lead 400 fathom without finding soundings. This is about four and a half miles, and nearly equal in depth the altitude of the tops of our largest mountains above the sea.

Icebergs, when permanently fixed, continually increase in height from the accumulations from the atmosphere by refrigerating its fluids.

In 1838, some of the British Government ships met with icebergs from the Antartic in South lat. 18 deg. These Icebergs were of 300 feet altitude above the surface of the ocean and large rocks were visible on these bergs. The water ran down in torrents from the sides—resulting from the ice melted by the suns rays. Icebergs which have grounded in soundings enable navigators to ascertain the proportion of these crystalised bodies that extend beneath the surface of the ocean, and that proportion is thus ascertained to be

two thirds the bulk below the water and one third above. These antartic bergs were therefore allowed to be 900 feet in height, measuring from the base to the summit.—The vessels encountered a severe hail storm when near these immense masses of frozen water. Powerful refrigerators of the atmosphere these.

The force of water in expanding by frost is immense, the frost may be termed the archmides of the atmosphere.

The arctic ice furnishes our section of the country with the material for rain showers, and I have noticed in summer, when the arctic ice was abundant in the Atlantic, that we were at the same time visited by cold northeast rain storms.

The abundance of ice on the Atlantic in 1842 is a singular phenomenon, and it would seem that some powerful natural cause must have operated to produce such a result.

The visit of the polar ice to southern latitudes in August, 1843, was attended by very heavy rains.

The arctic ice, when brought in contact with the heated waters of the Gulf Stream, are soon melted.

I have thought this fact of the departure of the Polar ice of so much importance, that immediately on hearing that Capt. Sir James Ross was about revisiting the arctic seas I at once communicated to him through the Lords Commissioners of the British Board of Admiralty the particulars stated above.

EBEN MERIAM.

BEHEMOTH.

We are often told that this animal, the fossil remains of which are sometimes met with in the excavations made beneath the earth's surface, has been extinct since the Noachian deluge. I was disposed to coincide in this opinion, but having recently visited the remains of a giant beast which have been exhumed in Walkill township, Orange County, New-York, I have come to a different conclusion.

The writer of the Book of Job speaks of the BEHEMOTH as of a beast then alive; and according to the chronology of the Sacred Scriptures, this Book was penned 829 years subsequent to the flood—besides, the writer of the book of Genesis declares in the most positive language that two of every beast entered the ark. Here then the preservation of this race of animals is placed beyond the possibility of doubt.

I have omitted to describe the bones of this monster beast, for the reason, that all the bones belonging to the frame have not yet been found. When the dry season returns, a further examination will be made, and when the whole are obtained, I will give a full and minute description of the whole frame.

I visited the ground in Walkill township, Orange co, where the bones of the great beast of antiquity have recently been exhumed. In order to know something of the geological formation of the section of country in which this monster beast once had his habitation, I walked the distance from Middletown, where the Erie Railroad terminates, to the place of exhumation, about five miles. The surface is undulating, and in some places rising into large swells. The soil is quite various, and the ground very stony. There are many swampy places, which are made into meadow land, and these are also stony.

In these, I noticed the swamp alder and the meadow flag growing. The forest growth on the high land, is chesnut, oak, hickory, &c. Among the vines, I noticed one of peculiar character, which was pointed out to me by D. W. Smith, Esq., Postmaster of Scotchtown, who was so polite and obliging as to accompany me in my examinations of the immediate vicinity. The vine wound around the stalk of the pokeberry, and had its roots in the stalk of this vegetable instead of the earth. We examined several, and found them all in the same way. I had before frequently seen at the West, the misletoe, which is a beautiful evergreen, and which takes root in the bark of trees, at a great height from the ground, presenting in winter its green foliage and white pearly berries, in contrast with the leafless branches of the tree on which it takes root.

We visited the pit, in the diggings of which the bones of the monarch beast were found. It is in a natural basin, and about half a mile from Scotchtown. On the north, about three fourths of a mile distant, is a high hill; to the south at a less distance is a hill of smaller size; to the east, and also to the west, at a distance respectively of about 80 rods, the ground descends rapidly. A small brook runs alongside the pit, which discharges its water to the east; if this brook should be deepened for about eighty rods, it would effectually drain this basin. The pit is about 40 or 50 feet long, and 20 feet or more wide, and about 7 feet deep, is now filled with water within a foot of the surface of the meadow. The meadow was some years since cultivated as a hemp field, but is now in grass. In winter it is flooded with water, and when frozen over is a skating pond. The meadow is rocky. In digging the pit several pieces of wood and small trees were found which had been felled by the Beaver; and here was, as my informant stated, an old Beaver Dam. There is an elasticity in the surface of the ground around the pit. We found by stamping upon it a sensible vibration under our feet. The black earth (very black) which forms the surface, is a strata of about thirty inches in thickness: beneath this is a strata of marl, the extent of which I had not the means of ascertaining. The black earth is very tenacious, of great specific gravity, and is filled with vegetable fibres, small roots, &c., but so solid as to be capable of being made into candlesticks, urns, &c. I brought away several pieces of this composition, considering it a great curiosity, in addition to its being the covering of the Monarch Beast of antiquity. Beneath this impervious strata, at a depth of about seven feet, reposed the head of the giant beast, imbedded in marl. How this animal frame came in this position is more than can be told, although we may guess or form an opinion from the facts stated, but after all it is but conjecture. When I arrived in Orange county, I made diligent enquiry for Salt Springs and licks, supposing that the monster beast had selected this section of the country for the sake of saline waters, but I found no account of any such formation; but after visiting the pit, and then the fossil remains at the house of Mr. Conner, on whose farm the pit is, we visited the high grounds in the north of the pit.

Near the summit of this hill is a well, dug for the use of the cattle pastured here—this well is about 14 feet deep, and is nearly full of water—in this well is a pump. Mr. Smith laid hold of the handle of it, raised some of the water, which gave out to the atmosphere a sulphurous gas. I tasted the water and found it to be a mineral water, and on examining the strata passed in digging the well by the excavation thrown on the surface, I found it a black slate or shale. It was this water which found an outlet in the basin, that doubtless this animal resorted thither for, and thus I account for his bones being found in that basin. The surface would not, I think, at this time, bear the weight of such an animal as the bones indicate this to have been, and when resorting hither for the water, and once beginning to sink the struggles of such a monster, would in his dying agonies sink his body deeper and deeper, and if he had such an appendage as a trunk, would sink deep keeping the extremity of the trunk above the surface by which he would be enabled to sustain life for a considerable period of time. The body would decompose slowly in such a place, for the temperature of the water would exclude that heat which is necessary to decomposition, and besides, the qualities of the water have a powerful influence in aiding the preservation of the frame. When animal life ceases, animal heat also ceases, and a heat produced by decomposition shortly after commences, unless some antiseptic quality in the surrounding atmosphere prevent it.

About two miles from this place is a sulphur spring, and from the account given me of the water by those who have seen it, I presume it contains a large portion of sulphureted hydrogen gas.

I felt a strong desire to examine the locality, which in the progress of time, ere man had dominion in this region, had become the resting place of the bones of one of the race of Behemoth. The Patriarch Job, mentions this race of animals with much particularity, although with great brevity, and that is the only written history of the giant beast now extant; but in the exhumation of this giant's frame, we have the book of nature corroborating the record of the sacred historian. How wondrous, how convincing!

Mr. Smith remarked to me that the hill to the north of the pit, and of which I have spoken above, would afford a fine view of the surrounding country, altho' it would be a great labor to climb it, but labor that results

in attaining an object, is an easy service.—I therefore gladly availed myself of his kindness in offering to go with me to the pinnacle of this terrestial observatory. On arriving at the top, we found a vast area of surface within the compass of vision. I judged this field in our view, to be over one hundred miles in circumference: high lands in the States of Massachusetts, and also in New Jersey, could be distinctly seen, and nearer by the highly cultivated farms in Sullivan, Ulster and Orange Counties, were spread out in all the variety of field, meadows and wood, on the terrestrial carpet. A beautiful spot this for a summer house, or a hotel, and near by its top is the mineral well, and at its foot, the grave of Behemoth. To this terrestrial protuberance, I gave the name of Behemoth Heights, a place worthy of the name, and a name worthy of the place. It has associations that will be as durable as the pages of written record, for from its foundations issued the waters which have embalmed the giant frame of a mute witness of antiquity, bearing testimony of the perfect accuracy of the natural history embodied in the written record of the Book of Truth. I am induced, on examination of sacred chronology, to believe that the representations of this race survived the Noachian deluge, affording another illustration of the accuracy of the account of that extraordinary event.

On a minute examination of the chronology of the Book of Truth, I find that the Deluge occurred 2349 years before the Christian era, and that the Book of Job was written 1520 years before the advent of the Saviour. A period of 829 years, therefore, intervened between these two events. The Patriarch Job gives us a description of the Behemoth, of his make, powers and habits, and speaks of him as a beast then alive. Job, also, in his beautiful poem, gives us light as to the hydrography of the land of Behemoth, its meteorology, its botany and zoology. This written history of the Behemoth is the only one now extant, and its accuracy is corroborated by the mute witness recently exhumed in Wallkill. The bones of this giant beast are a wondrous wonder. I examined with great care the bones of the head, which weigh 449 lbs. The forehead is solid bone, *one foot thick* (I measured and re-measured it with care,) the thickness of the brick wall of a four story house at its foundation, such as are a brick and a half in thickness. With the skin which covered it, it must have presented, when alive, a front of greater solidity than the bulwarks of the largest line-of-battle-ship. Its teeth are in their proper places in the jaws, and are completely sound and perfect. The fore teeth are worn smooth by use. The hinder teeth are grooved very deep, the convex of the upper fitting exactly the concave of the lower, qualifying the animal to crush the limb of a tree, or a stone, with the same facility that the most powerful steam sugar mill crushes the cane with its iron jaws. The animal is of the ruminating species, and not carnivorous, that is, such is my opinion from a careful examination of its mouth and teeth. I measured one of the rib bones, and found it six inches in width. It has been said by some who have examined these bones, that the ribs are not in proportion in size to the head. I think differently. I have examined the bones of this race of animals in various places on this continent, and the ground from which they were respectively taken.

The finding of these bones in Wallkill, on the farm of Mr. W. Conner, half a mile from the village of Scotchtown, was in the month of July, in digging marl in an upland meadow. I call it upland, because it has once been cultivated as a hemp field, and it is rocky. At the depth of about seven feet, the workmen came upon the head imbedded in loose marl, which is filled with shells.

July, it will be recollected, was a very dry month. The bed of marl was then dry, but before all the bones of the animal had been collected, rain came in great abundance and filled the pit with water, and it has continued so ever since, and consequently the labor of the workmen has been suspended. A pump was placed in the pit and the water thus drawn out, but during the succeeding night it filled again. A trench of about eighty rods long and ten feet deep, will be necessary to drain the place before any further progress can be made in obtaining the bones. Some doubt has been expressed as to the probability of finding the residue of the bones, in consequence of the confusion and disorder into which those already exhumed were by some cause found to have been thrown. But I think, from a careful examination of the strata in which the bones were found, that there is no mystery in reference to their scattered position. The marl is loose, and some of it so light as to float in water; and other portions of greater specific gravity, precipitate in water in obedience to the laws of gravity. The frame, in such a bed, which was sometimes saturated with water and sometimes dry, would be liable to fall to pieces, and be carried by the force of the retiring or invading waters, to various sections of the bed, as the particles on which these respectively rested were moved from underneath. I should not, therefore, be surprised to find this frame scattered over several hundred feet. While I was at the pit examining the locality, I perceived several shells rose upon the surface of the water, and the wind wafted these to the shore. In one of the ponds of this State, this same operation has been noticed at periodical intervals, and regarded as an unaccountable phenomenon; but I think it may be accounted for by this illustration—for where a subterranean bed of marl has a strong spring of water boiling up through it, the force of the water, and buoyancy of the shells, will bring them to the surface, and the wind will float them to the shore. The covering, I remarked, was a black earth; geologists would call it indurated peat, I presume. This earth has been saturated with mineral water, and formed into what I term a semi-petrifaction We often see water, in passing through a limestone arch, carry with it fine particles of lime, forming stalactites. Were such a solution to penetrate a bog, it would change it in process of time into a stone, and whatever of a solid body is held imbedded in such a strata would be thus incrusted, and if porous, would be saturated, and thence crystalise. I see no difficulty in supposing that this animal broke through this place, for it is evident from the formation of the ground that it could never, at any time, have held water enough above the surface to drown so large an animal.

The bones already found, I understand from Mr. Conner, he intends shortly to exhibit in New York: the public will therefore have the opportunity and the benefit of comparing the written record with the organic remains, and to see how exactly they agree.

I will here quote a part of the description given by the Patriarch Job, of the Behemoth:

"Behold now Behemoth,
Which I made with thee;
He eateth grass as an ox."

Thus he was a grazing animal, and this the teeth prove, and therefore here is a perfect agreement.

"He moveth his tail like a cedar."

Some of the tail bones have been found, which indicate that it was of very large size. The cedar is the growth of this region.

"His bones are as strong as pieces of brass;
His bones are like bars of iron."

The description I have given of his head, the thickness of the skull and the width of the ribs, are here illustrated.

Iron, copper, zinc and lead, are the products of this region of country.

'He is the chief of the ways of God:
He that made him, can make his sword to approach unto him."

The fiat of the Almighty has made the race of the Behemoth extinct forever in our planet, a verification of the almost prophetic language of the Patriarch.

"Surely the mountains bring him forth food."

In this region, the mountains are in view from the great terrestrial observatory to which I was requested to give a name, and which I called Behemoth Heights, in consideration of the grave of the giant beast of antiquity, the subterranean monument of the perfect accuracy of the natural history of the Book of Truth being at its foot or base.

"He lieth under the shady trees;
Under the covert of the reeds and fens."

Here are these also, a perfectly accurate description of this vicinity.

"The shady trees cover him with their shadow;
The willows of the brook compass him about."

Here also the willows of the brook are now to be seen within a short distance of the grave of this animal giant of antiquity.

"Behold, he drinketh up a river and hasteth not."

Here is the Wallkill, a stream of a size which once, no doubt, would vie with the Jordan. A beast like this, with such a power of frame, would be without fear, for where is the superior among the animal tribes?

"He trusteth that he can draw up Jordan into his mouth;
He taketh it with his eyes;
His nose pierceth the saga snares.

Thus speaketh Job of the Behemoth. Again he says of meteorology:

"As the stream of brooks they pass away;
Which are blackish by reason of the ice,
And wherein the snow is hid:
What time they wax warm they vanish;
When it is hot they are consumed out of their place."

A correct description of the climate of this region. When I speak of region or vicinity, I do not wish to be understood as confining it to the limits of a township or county.

That the general Deluge destroyed vast numbers of the race of Behemoth, there can be no doubt. The bones of that animal have been found in the arctic regions, deeply imbedded in the ice. Lieut. Kotzebue, of the Russian Navy, found the bones of the mammoth in North lat. 66 deg., imbedded in an island of ice. This island was covered with grass and moss, growing luxuriantly on a soil of six inches in thickness. In an ice cliff on one of the rivers of Siberia, which empties into the Arctic sea, the entire body of a mammoth, flesh and all, came in sight in 1799, by the melting of the ice, and five years thereafter became entirely disengaged by the melting of its crystalised casement, and fell down on the sand bank below, where its flesh was fed upon by the white bear, and the Juhuts of that region cut it up to feed their dogs.

In this region of country, round about Wallkill, the Behemoth had his home. Several of his bones have been found in excavating the earth in this immediate vicinity.

When I arrived at Middletown, about five miles distant from the Wallkill, I stopped for the night at the Union Hotel, the landlord of which, learning that I was on the way to Wallkill, to see the organic remains, brought me a piece of the tusk of a mammoth, which had recently been found in a swamp near by, embedded in the earth. This was broken.

This section of the globe may have been inhabited by man when Behemoth was here; but I have never in my travels, met with any remains that indicated the possession of civilized man. I have visited nearly all the ancient fortifications and works of antiquity within the borders of our country, and have visited the burying places of the dead, and the place of sepulture of a human being of antiquity, having her entire wardrobe by her side, in a state of perfect preservation, and none of these indicated the marks of civilization.

I know it is a favorite opinion with some, that this section of the globe was once peopled by a race of men superior to the red men of the forest, which the white man found in its possession, two and a half centuries ago, and we may even go back beyond that period in one instance, with the same result. But I came to a different conclusion.

Some geologists say, that the position in which the bones of the Wallkill giant are found, is not the geological position where they belong. The fact speaks for itself, and therefore theory is, in this case, without place.

Geology is a modern science, and in its infancy fixes arbitrarily the crusts of our globe in chronological order; but we need not go any where else for the science but to the Mosaic record; whatever contradicts that, is unworthy of consideration and undeserving of contradiction.

Cities have been overwhelmed by the elements in obedience to the command of the great Jehovah, and the crusts which cover them, are the growth of a moment.

It is in vain for us to attempt to account for the works of the Almighty Architect. He does what pleaseth him; and man should be silent, and bow reverently, and adore that munificent Being who has made him a candidate for immortality. The works of God, in their beauty and harmony, both gigantic and minute, praise him in their boundless perfections.

The Behemoth is called the Mammoth, and when I use this word, I do so as a distinction of *size* and not of *species*. The elephant is by some travellers termed the mammoth, and if I mistake not it is so called in Russia.

M. Cuvier, in his life time, classified nearly one hundred animals of species now extinct, from the organic remains he procured, and had his valuable life been spared, no doubt would have given to the world information of great value upon this subject.

Governor Rosas, of Buenos Ayres, is making an important collection of organic remains. Those already obtained by him were in that section of the country, the climate of which corresponds nearly with our own, being in south latitude about 38 deg.

The Asiatic and the African Elephant vary considerably from each other, and the organic remains found upon our continent more nearly resemble the Asiatic than the African. The animal frame of Orange County I think, from an examination of its head, was furnished with a proboscis or trunk.

The Patriarch Job describes at much length the Leviathan of the deep—a Mammoth of that order—and as presenting an extraordinary attribute; that its "neesings" were phosphorescent or electric. He thus speaks:

"By his neesings a light doth shine,
"And his eyes are like the eyelids of the morning.
"Out of his mouth go burning lamps,
"And sparks of fire leap out.
"Out of his mouth goeth smoke,
"As out of a seething pot or cauldron,
"His breath kindleth coals,
"And a flame goeth out of his mouth."

Again he says—

"He maketh the path to shine after him;
"One would think the deep to be hoary.

And again he says—

"In his *neck* there remaineth strength."

Again—

"The flakes of his flesh are joined together;
"They are firm in themselves—they cannot be moved,
"His heart is as firm as a stone;
"Yea, as hard as a piece of the nether millstone.
"His scales are his pride,
"Shut up together as with a close seal.
"One is so near to another
"That no air can come between them;
"They are joined one to another,
"They stick together,
"They cannot be sundered.
"He maketh the deep to boil like a pot:
"He maketh the sea like a pot of ointment.
"Sharp stones are under him,
"He spreadeth sharp things upon the mire."

The remains of this monster belong to our earth, and it is possible that the living monarch of the deep may still have his habitation in our planet. I have among my collections an account given by a sea captain some years since, of two monsters having been seen by himself and crew in the Indian Ocean, at a great distance, lying a little beneath the surface of the water giving out a great light, and illuminating the water for a distance around them.

Electricity belongs to the inhabitants of the water. The electric eel will give an electric shock equal in force to the largest machine.

It is true, the Patriarch Job does not speak of the Leviathan as electric or phosporic, altho' that writer was conversant with the natural phenomenon—atmospheric as well as subterranean fire. He says—

"When he made a decree for the rain,
"And a way for the lightning and the thunder."

Again—

"As for the earth out of it cometh forth bread;
"And under it is turned up as it were fire."

The hardness of animal flesh, and the very formations which characterise some organic remains, have induced some very learned men to suppose that our earth had at one time an atmosphere of much higher temperature than that of the tropics at the present day.

I do not think that the geological features of our Earth contradict the Mosaic record—far from it. There is a mutual confirmation; but some modern writers hold that there is a disagreement.

If we begin with Burnet's Theory of the Formation of our Earth, and follow down to that of Werner, Hutton and others, to the present day, we will at length have to go back to that period when

"God divided the waters from the waters;
"Divided the earth which was under the firmament,
"From the waters which were above the firmament,
"God called the firmanent heaven,
"And the *dry* land Earth."

Geology, as I before observed, is still in its infancy; and it is more instructing to

read the Book of Revelation and of Nature than the works of the most learned of our day, for in Revelation and in Nature, the views have an originalty that is instructive —teaching not theory, but fact.

Ice remains in some sections of medium latitude, throughout the year. In the ravines of a mountain, called "Ball Peak," situate in the northeast part of the town of Pittsford, in Rutland County, Vermont, ice has remained permanent throughout the year, since the first settlement of the country, and is most probably the chrystalized waters, which was left on the subsiding of the waters of the universal Deluge. In one of the mountains in the State of Virginia, ice remains throughout the year.

E. MERIAM.

LIGHTNING STRIKING RAIL ROADS.

While the preceding sheet was passing through the press, I met, in travelling in an omnibus, with Ex-Alderman Campbell, of the City of New York, who informed me, that while travelling upon a railroad in the State of Pennsylvania, some time since, the lightning struck the iron rails, and was seen to pass over the iron bars which formed the track, for a great distance. This is the first and only instance I have ever heard of lightning striking a rail way.

THE EARTHQUAKE.

In the Journal of Commerce of January 30th, 1843, I noticed a paragraph from a St. Louis paper, giving an account of a singular phenomenon attending the Earthquake of the evening of the 4th of January, viz: the disappearance of a pond of water, and the producing of what is called in the West, a sink hole, out of which issued steam, and that the temperature of the earth around the surface was such as to cause the snow to melt, while the snow on the ground adjacent remained unaffected.

During the shakes of the Earthquake, in the winter of 1811 and '12, a person walking near the banks of the Muskingum river, in Ohio, discovered smoke issuing from an opening in the ground; he examined the spot, put his cane down in the opening, and it immediately took fire. He was much alarmed, and on his return to town related the circumstance. The Legislature of the State were then in session at Zanesville, and immediately adjourned to afford the members an opportunity to view the phenomenon. The report spread rapidly through the village until it reached the ears of an old gentleman, who immediately explained the matter. He had. the year previous, burnt a kiln of lime on and against the bank of the river, which ignited a vein of bituminous coal, that continued to burn under ground, and the violence of the Earthquake had thrown down so much of the bank of the river as to cause the opening. An examination of the ground, proved that the old gentleman was right in his conjectures. Subterranean fires feeding upon bituminous coal, may have produced the phenomenon spoken of in the St. Louis paper, and the subterranean fuel may have been kindled by electric fire.

Shakes are very frequent near St. Louis, and more particularly near Shawneetown, Illinois. At the United States salines in that neighborhood, shakes are felt almost every year. During the shakes in 1811 and 1812, at New Madrid, bituminous coal was thrown up in large quantities at that place.

Liquid Petroleum, which is very combustible, is found in boring for salt water through the regions of country west of the Alleghany Mountains, and in many places it comes to the surface in the shape of Mineral Tar Springs. Immense quantities of Carburetted Hydrogen Gas, also issue from some of the salt wells of the West, and from numerous springs, termed burning springs. The different Virginia Springs possess every degree of temperature, from that of the heat of boiling water down to the temperature 52 degrees.

The increased temperature is entirely local, as appears from all the investigations which have been made in the Western States.

The Carburetted Hydrogen Gas is set on fire at the Kenhawa Salines, and at the burning Springs in Virginia, by the inhabitants, to afford visitors the opportunity of witnessing the phenomenon.

Beneath the earth's surface in many localities, are vast gasometers of carburetted hydrogen gas, and also burning bodies which have become ignited from chemical causes fully understood. These subterranean fires produce in the course of time, intense heat, displacing vast bodies of solid matter, until perchance a body of water is thus reached, which, on coming in contact with the liquid fire, becomes converted into steam. This must either find vent by some terrific explosion, or be condensed by a force of pressure which must shake the earth for an immense distance around.

The effect of earthquakes are quite various; sometimes the motion is vertical, throwing buildings upward; at other times, the motion is horizontal.

It is a wonder that earthquakes are not more frequent, and more disastrous.

E. MERIAM.

HEAT OF THE INTERIOR OF THE EARTH.

This was one of the subjects discussed in the Convention of American Geologists, recently held at Albany. Some of the members of that body suggest that the heat of the interior of the Earth, increases at the rate of one degree of Farenheit, to every 50 or 60 feet descent. This would be an average of one degree to every fifty-five feet, which I take as a basis for my calculations.

Assuming this theory to be true, it would follow, that the temperature of any given distance below the earth's surface, may be ascertained by mathematical calculations.—Allow the heat at the surface to be 50 degrees, which is near the actual temperature, it would then follow that at the depth of eight thousand nine hundred and ten feet, that point would be reached where the temperature is increased to 212 degrees of Fahrenheit, being that at which water boils under common atmospheric pressure; and at the depth of one million, one hundred and eighty-six thousand two hundred and eighty-five feet, a point would be reached where iron would become liquified; a temperature of twenty-one thousand six hundred and thirty degrees of Fahrenheit's scale, which is the melting point of iron under common atmospheric pressure. This would be a depth of near two hundred and twenty-five miles, (unless I have an error in my figures.) From numerous experiments which I have made in various places, I have found a great variation in the increase of heat in the interior of the earth. I have found in the atmospheric air above the earth's surface a regular and gradual decrease of temperature in proceeding upward. At the height of eight thousand nine hundred and ten feet above the earth's common surface, in this latitude a point would be reached where water would become solid by cold in the hottest day in summer; and at a still higher elevation is that point where all fluids now known to us, become solid. Hence I infer the formation of meteoric stones termed ærolites—and hence our highest mountains are covered with enduring snows. The knowledge we have of our earth is limited in the extreme; and the more we investigate the better satisfied we become of our ignorance. Geology is but a modern science, and one of great and growing importance. If the theory advanced by some of the members of the Geological Convention, and other scientific men, is correct, then it follows that the temporary dwelling place of our race is midway between the regions of enduring frost and those of perpetual fire. What a subject this to contemplate!—what a position this to occupy! The earth has thus continued from the termination of the days of creation, and will no doubt continue so for thousands of years to come.

E. MERIAM.

SUNKEN WELLS.

I visited Mount Prospect on Long Island, September 16th, 1843, to view the opening in the surface of the ground resulting from the sinking of the well and the wood work of the bucket house, on the premises of Mr. Meeks.

The well is about two hundred feet from the main road, in a garden. About the same distance from it, is a natural pond a few hundred feet in circumference, which, I was informed, is permanent. The surface of the ground for about three or four acres, is nearly that of a basin, and the well and pond near-

ly in the centre. The surface water from rain, therefore flows to this common center. The stratifications of the earth which are visible, are compact, made up of earth, stone, soil, &c. Were the upper strata loose, it will readily be seen from the near proximity of the pond to the well, that the latter would drain the former; and this pond may have at some remote period resulted from an indentation made in the surface by the departure of a lower stratum.

The opening where the well was, is about 10 feet in diameter; the sides, solid earth, very hard, and perpendicular: the water is within 12 feet of the surface of the ground.

During the day, Mr. Meeks heard a rumbling sound in the well, but thought little of it. The next morning it was rainy; he raised an umbrella over his head and went into the garden, holding it partly before him, and would at the next step have placed his foot over the opening, when he fortunately discovered that the well-house had disappeared and left the frightful chasm which he thus barely escaped.

The well-house, wheel, rope, and buckets, have all disappeared, as has also the wall of the well. The water in the well is yet turbid from frequent rains since, and the frogs quite numerous on the sticks floating on the water.

The well was 125 feet deep, and was walled with stone. Allowing the well to be 3 feet diameter, and computing the weight of the stone at 500 lbs. for each foot, we have 65,500 lbs. of stone in the entire structure—a great weight to rest on a sand foundation. If this foundation had become so much saturated by the water of the storm as to make it flow like soft mortar, it would, with such a pressure, be forced under the stone into the bottom of the well, and rise in the inner stone curb to a great height; and this wall and the house which rested upon it would sink in the same proportion as the soft earth rose within its curb.

Mount Prospect is a sand hill 200 feet high, and Mr. Meeks' premises are twenty rods or more from the top. Judging from the hydrography of the surrounding country and from the fact that the well of the Mount Prospect house is two hundred feet deep, I conclude that the surface of the water of the adjacent country has its flow in the stratum in which this well terminates. If such is the fact, the looseness of this stratum may have caused a flow of earth and made room for the well-wall, &c., of Mr. Meeks. I shall in a few days sound this well, and also examine that at Fort Hamilton, and be able thereby to gather some facts which may form a basis for a reasonable conclusion. Mr. Meeks on Friday heard a rumbling sound in the well, and his family feel some alarm. I have, in the columns of the Journal of Commerce, heretofore noticed the same phenomnon in other sections of the country, in nearly all of which, the cause was ascertained, and the occurrence therefore was nothing extraordinary. E. MERIAM.

—

Since writing the above, I have visited the location where the well sunk near the Narrows, and visited the well of Mr. Meeks.

At the Narrows, the sunken well is within about eighty rods of Fort Hamilton, and in the rear of that Fortress. This Fort appears to have a solid foundation, for I did not discover any cracks in the walls; hence this conclusion.

The chasm made by the sinking of the well is about ten feet in diameter, and no water visible. The well house is to be seen lying 12 or 15 feet below the surface in the chasm. This well was on the side of a small protuberance, and I presume from the hydrography of the surface which I surveyed with the eye, did not receive any surface water: but in the immediate vicinity are a great number of ponds, or sink-holes—(indentations in the surface). I am of opinion that these ponds are so numerous as to be in the proportion of one pond to every three acres of surface.

The walls of the well have caved in below and thus brought down as much of the top as would fill the excavation originally made in sinking the well.

The owner of this well, I understand, intends to have the chasm cleared of the rubbish, and the cause of the down heave will then be determined.

Mr. Church, the owner of the well, informed me that when the wall sunk, the water ran over the top of the well and then receded and sunk away.

The well of Mr. Meeks, on Mt. Prospect I visited, and again examined. I sounded the water with a line in several places, and found it to be about five feet in depth, and within 12 feet of the surface. The chasm is about 10 feet in diameter at the top, but within two or three feet of the water it is about 16 feet by 12, leaving a crust above which will probably break down. The water in the chasm has become transparent. I raised some of it and examined it in a glass, and found on tasting that it was rain water. The natural pond which I spoke of as being near it, is less than 100 feet from the well. This pond I call a sink-hole; a receiver of surface water, which has existed time out out of mind. Previous to the great rain of August 20th and 21st, the well had sunk a foot. When the well sunk, there were two barrels filled with water, raised for watering plants, standing by the well-house. These barrels have also sunk and disappeared. The well-house, bucket, wheel, rope and stone wall, all have disappeared, and are probably covered by the earth which has fallen from under the crust which now sourrounds the chasm.

I have little doubt from the abundance of rain that fell on the 20th and 21st, being over three-fourths of a foot on a level, that the water of the well and that of the pond met on the surface during the night, as these are both in the same basin of near four acres in extent. This well, I was informed, cost near six hundred dollars, and is the only one in use in that immediate neighborhood. Mr. Meeks is inclined to fill it up, fearing that it will not be permanent if he should re-excavate it. There are several natural ponds in the neighborhood of Mr. Meeks' well, which have existed since the island was first known to white men.

These ponds, the inhabitants believe are the cause of the fever and ague which sometimes afflicts persons living on this elevated ground, if so- the remedy is both easy and cheap; for the water would disappear if the ponds should be tapped, and afterwards the surface of the ponds scraped off, and the covering carried on to the adjoining lands as manure. E. MERIAM.

—

A NIGHT'S RESIDENCE ON KELLINGTON PEAK.

On a very warm summer day, a party of six persons, the writer being one, made a tour to the pinnacle of Kellington Peak, one of the highest points of the Green Mountains. We left Rutland on horseback early in the morning of 27th July, and proceeded to near the foot of the mountain, to the end of the bridle path, where we alighted, and sent our horses back about three miles to a public house. Having arranged our luggage and apparatus in the best way we could to make it portable, we commenced the ascent of the steep mountain, accompanied by a faithful dog. After a few hours tedious labor, we reached the pinnacle, about four thousand feet above tide water, ut 4 o'clock P. M.—Our labors had given us a good appetite for dinner, which we made from the ample stores we had carried on our backs to this mountain height. A delicious spring of pure water issued from the sides of the mountain within about one hundred feet from its summit, of which we partook freely. Our next business was to set about constructing a habitation in which we could pass the night.—Having taken an axe with us, we at once felled brush timber sufficient to make a brush *cabin* which when completed, we furnished with a quantity of soft brush, filled with leaves, to cover the floor, which was to be our couch for the night. Next we commenced making a collection of firewood. We then kindled a rousing fire about one hundred feet from our cabin door, which we kept burning all night.

Having thus provided for the present, we began to look around upon the broad expanse and scenery spread out below us, and upward to the ocean of boundless space which formed the aerial canopy.

Objects could be seen by the naked eye at great distances, with much distinctness. The village of Pittsford which was many miles from us, was as distinctly seen by the naked eye from this pinnacle as it could be by an observer within a mile of it on the same surface with its streets. What this peculiarity arose from, we were unable to determine.—We were inclined to the opinion that the purity of the atmosphere in which we had stationed ourselves was the cause, but it is possible that the peculiar state of the atmosphere on the lower surface may have produced the phenomenon.

The pinnacle of the mountain is a level

of a few hundred feet in extent, which is covered with trees of stinted growth, none of them being more than twelve feet in height, with the limbs inclined downwards. One of these trees is quite large, and we seated ourselves upon its upper branches to make observation. An immense surface of country could be seen in every point of compass, and seemed to rise in the distance in every direction. The sun was visible to us seven minutes, at its evening exit, after the time laid down in the almanac for its setting, and eight minutes in the morning before the time so noted for its rising. The night was beautifully clear, but cold; our thermometer at 9 o'clock in the evening denoted a temperature of 46 degrees of Fahrenheit, while that which we left at the public house whither our horses were sent, denoted 73 degrees at the same hour—a difference of 27 degrees.

A quiet encampment this, for here sound has no echo, voice has no reverberation. We discharged fire arms to observe the force of sound, and were surprised at the little impression which the concussion made upon our ears. The reports of our fire arms were however, heard at a great distance below us, in an echo from a paralell mountain side and valley. Sound produces an echo from the nearest surface, and it is by the echo of sound that experienced boatmen in large rivers, in dark nights, determine their nearness to the shore by the time required for the echo of sound to return. By a little practice, and observation, they are enabled to determine the distance with great accuracy.—The effect of sound on the atmosphere of this mountain peak, contrasts beautifully with the quick echo from the dome of the great room in the granite Exchange in Wall street, and those of arched bridges when passed in railroad cars.

In high northern latitudes, in still and calm weather, sound has great force. Capt. Parry states that he could distinctly hear the common conversation of his men a mile distant. This was in latitude 76°, where silence was almost universal—and the cold intense. The smoke from our fire did not ascend more than ten feet in the air, and as fast as it accumulated a volume, rolled down the mountain side.

Sleep here was sweet and refreshing.—Fatigue had prepared us for repose. The bright shining of the blaze of our fire, and the faithful watching of our dog, who took his position at our cabin door, secured us from the depredations of any brute whose industry should enable him to reach this elevated point.

In the morning view which we were greeted with on this height, we feasted our eyes for three hours. The windings of the Connecticut River in the East, and of Lake Champlain in the West, were distinctly visible, being marked by the fogs which were rising from their waters. All below us became covered with a mantle of thick vapour, and presented a surface in appearance like an ocean transformed into one great and mighty cateract. This gradually rose in the atmosphere, until all that was so beauteous below us had gone far away, to form the clouds of distant places.

In this latitude, at an elevation of four thousand feet in midsummer, we found an atmosphere within fourteen degrees of the freezing point, and two degrees below that in which water in its fluid state and water in its chrystalized state, fill the same or an equal volume.

About four thousand feet above this mountain peak, the air in the hottest day in summer, is of the temperature of winter—and proceeding still upward, we should find that point not far distant where all fluids would become solids.

This mountain peak, although exposed to the rays of the sun and the action of the winds, never suffers from drought; on the contrary, it feeds a living spring by the refrigerating condensing powers of its chrystalized material from the surrounding atmosphere. There is spirit in animal life, when breathing such an atmosphere, so light, so pure—for here is the sweetness of quiet, the harmony of repose; here the mind expands, while contemplating the grandeur of nature's works, admiring and adoring the infinite wisdom which formed, and the power which controls them.

The winds here are mild; not a tree is found uprooted, or a limb broken by its blasts.

We engraved our initials and the date of our visit in the bark of the growing trees, and at ten o'clock commenced our downward march. E. MERIAM.

PRIMITIVE GEOLOGY.

The formation and the subsequent arrangement of our material world is a matter of history.

The Book of Truth, written by a pen which was obedient to the source of all knowledge, has with great brevity, yet with much particularity, chronicled the gathering together the waters under the heaven into one place, and thus the dry earth became seperated.

The language of the inspired penman is in these words:

"In the beginning GOD created the heaven and the earth:"—Gen. Chap. 1, v. 1.

Here then, is the whole account of creation. In the fourth verse of the second chapter of the same book, the sacred penman thus speaks:

"These *** the generations of the heavens and of the earth when they were created, in THE DAY that the LORD GOD made the Earth and the Heavens."

Thus "*the day*" is an epoch, a portion of time not marked by the diurnal revolution of our earth upon its axis, nor such a period of time as an inhabitant living under the equator, or at the extreme pole, would call a day, but such a period of time as "HE with whom a thousand years, are as one day," terms "the day which the LORD GOD made the Earth and the Heavens."

Thus we have the brief history of the creation. We come next to the description of the earth. It is thus:

"And the earth was without form, and void; and darkness *,* upon the face of the deep." Gen. Chap. i, v. 2.

The material of our globe was in being the first day of what is termed one of the six days of creation, but it was without form, and darkness was upon the face of the abyss, and this darkness constituted the primitive night.

Of its density we can form no adequate conception, but we may infer that it had acquired that state which caused it to approach the orbit designed for it to occupy by HIM who is the fountain of all power, and whose works are those of system and order.

In the book of JOB are these words:

"As the stream of brooks they pass away;
"Which are blackish by reason of the ice."

The sacred historians thus proceeds:

"And the spirit of GOD moved upon the face of the waters."
"And GOD said, let there be light; and there was light."

"No man can by searching find out GOD to perfection," says the Book of Truth.

The spirit of GOD. the power of JEHOVAH, moved upon the face of the waters, and by his Almighty Word, he permitted light to appear. A flow of light.

Water may, I think, be presumed to have been at this period, in its chrystalized state, that of ice, for after the introduction of light there was a separation of the waters from the dry, and a gathering of the waters into seas. There are various kinds of light.—Zodaical, Electric, Solar, Terestical, Phosphorescent, &c. Light, with the exception of the phosphorescent, is accompanied with heat.

"And GOD saw the light, that *,* good: and GOD divided the light from the darkness."

The light, as here spoken of, can have no reference to aggregated solar light, for the sun and moon had not then been placed in their orbits.

"And GOD called the light day, and the darkness he called night. And the evening and the morning were the first day.—Gen. Chap. i, v. 5.

Thus the first day, or epoch, is marked by the introduction of light by the permission of the source of all light, and a separation of that light from the darkness, and the night which was constitued by the presence of darkness, is placed thus in order of precedence.

This darkness, which was upon the face of the deep, constituted the primitive night, a period of repose in nature which was succeeded by the birth of that light which formed the primitive day, which consisted of the primitive evening and morning that succeeded the Heaven and the Earth which were created in the beginning.

The term day, as used in this connection has no reference whatever to that period of time, which mark the present diurnal revolution of our Earth upon its axis. The Scriptures are records designed for the whole human family, and is not like many other books calculated only for a particular meridian. It is alike the word of life to the inhabitant of the extreme frigid pole, as well as to him who lives under the burning sun of the equatorial regions.

At this period there was no sea. The separation of the waters had not taken place, and yet our globe was in being, a shapeless mass.

We come next to the 6th, 7th and 8th verses of the first chapter of Genesis.

"And GOD said let there be a firmament, in the midst of the waters, and let it divide the waters from the waters. And GOD made the firmament, and divided the waters which *.* under the firmament, from the waters which *.* above the firmament; and it was so. And GOD called the firmament heaven."

The division or separation of the waters was therefore a work subsequent to the introduction of light. Whether the light here spoken of was accompanied by heat, the sacred historian has not mentioned, and it does not become us to be wise above that which is written.

The term heaven, is here used to denote a portion of the universe. We speak of Heaven, as the dwelling place of JEHOVAH, as the home of the blessed, as that celestial world, into which flesh cannot enter. I forbear to indulge my pen in discussing the place of the HOLY of HOLIES.

I continue my quotations from the record of the inspired penman, who wrote as he was moved by the HOLY GHOST.

"And the evening and the morning were the second day."

No solar orb, such as now known to our system, had assumed the dominion, which the darkness had acquired, but it was the light of the word of JEHOVAH.

At this period the waters must have become fluid, and covered the whole face of the earth, and as much as this is indicated by the various marine formations which we see and find in the excavations among our highest mountains.

Vegetable remains are found in the lowermost and most ancient stratas of the earth unmixed with animal remains.

I next quote the 9th and 10th verses of the same chapter and book.

"And God said, let the waters under the heaven be gathered together unto one place, and let the dry *.* appear; and it was so. And GOD called the dry *.* earth, and the gathering together of the waters called he seas: and GOD saw that *.* good."

Here we have the declaration of a fact, and the record of an event, we need not look beyond this. It is sufficient for us that it was an emanation from the lips of truth. It matters not, whether it accords with our philosophy, or that it is an act beyond the comprehension of the mind of feeble man.

The 11th, 12th and 13th verses of chapter 1, are as follows:

"And GOD said, let the earth bring forth grass, the herb yielding seed, the fruit tree yielding fruit after his kind, whose seed *.* in itself, upon the earth, and it was so. And the earth brought forth grass, herb yielding seed after his kind, and the tree yielding fruit whose seed *.* in itself after his kind, and GOD saw that *.* good. And the evening and the morning were the third day."

The solar orb had not at this period become a member of the celestial system, neither had the satelite of our earth, the Moon, been placed in the firmament.

Animal life, had not then become visible on our earth. Vegetable life had, however, commenced its germination, the seeds of which were in the Earth, the great terrestrial store house of Nature.

The shape of our Earth at this period, had not been influenced by the position of the Solar orb, or by the diurnal revolutions of the Earth upon its axis, or its annual revolution around the Sun.

From the commencement of the 14th to the end of the 19th verse, inclusive, is the history of the creation of the lights in the firmament of the Heavens, as follows:

"And GOD said, let there be lights in the firmament of the Heaven, to divide the day from the night: and let them be for signs and for seasons, and for days and years; and let them be for lights in the firmament of the Heaven, to give light upon the Earth, and it was so. And GOD made two great lights; the greater light to rule the day, and the lesser light to rule the night: *.* the stars also. And GOD set them in the firmament of the Heaven, to give light upon the Earth. And to rule over the day and over the night, and to divide the light from the darkness: and God saw that *.* good. And the evening and the morning were the fourth day."

The distinction in the 14th verse, first above quoted, from the 3d verse in the same chapter, previously quoted, is, that the former is spoken of the introduction of LIGHT, and the latter as the creation of LIGHTS. These '*lights*,' are declared to be for specified objects, viz: to divide the day from the night, for signs, for seasons, for days and years, to be lights in the firmament, and to give light upon the Earth; to rule over the day and over the night, and to divide the light from the darkness. Twenty-five hundred and fifty-three years subsequent to this period, 'the Sun and Moon stood still, and hasted not to go down for nearly a whole day." This extraordinary event, is recorded in the 10th chapter, 12th verse, of the Book of Joshua, and it is there mentioned, as being recorded also, in the Book of *Jasher*. This event was preceded by the falling of great stones, which caused great destruction of human life, and these stones are, in the same verse, called hail-stones. This latter account is in the 11th verse of the same chapter.

At this period, which is the begining of the Solar System, our Earth must have acquired a shape corresponding with its motion, and the waters have become influenced by the Sun and Moon, and thus the tides had a beginning.

Thirty two hundred and ninety-one years after the creation of Adam, our great common ancestor, according to Scripture chronology, the shadow of the Sun's going down, was brought backwards in the dial of *Ahaz* 10 degrees. This event is recorded in the 11th verse of the 20th chapter of 2d Kings.

Between these two events, a period of seven hundred and thirty-eight years intervened, and the first event was eight hundred and ninety-seven years subsequent to the commencement of the general Deluge.

The seasons are controled by the solar orb, the great treasury of Nature; the days and years are marked by its influence with unerring exactness, and the light of these bodies fill a vast firmament, and give light upon the earth. The light is divided from the darkness by the Sun and Moon, in accordance with the will of the GREAT CREATOR. In the beginning, or first day, light was divided from the darkness by the immediate act of JEHOVAH, here it is divided by the means he put in operation.

From the 20th to the 23d verse, both inclusive, I quote as follows:

"And GOD said, let the waters bring forth abundantly the moving creatures that hath life, and fowl *.* may fly above the Earth in the open firmament of Heaven. And GOD created great whales, and every living creature that moveth, which the waters brought forth abundantly after their kind, and every winged fowl after his kind; and GOD saw that *.* good. And GOD blessed them, saying, be fruitful and multiply, and fill the waters in the seas, and let fowl multiply in the Earth. And the evening and the morning were the fifth day."

Thus, animal life was made to succeed the placing of the solar orb in the centre of our system, which was to rule over the days. Vegetable life had preceded this epoch.

From the 24th to the 31st verse, inclusive, we have the history of the completion of all things, as follows:

"And GOD said, let the Earth bring forth the living creature after his kind; cattle, and creeping things and beast of the Earth after his kind, and it was so. And GOD made the beast of the Earth after his kind, and cattle after their kind, and every thing that creepeth upon the Earth, after his kind, and GOD saw that *.* good. And GOD said, let us make man in our image, after our likeness, and let them have dominion over the fish of the sea, and over the fowl of the air; and over the cattle, and over all the Earth, and over every creeping thing that creepeth upon the Earth. So GOD created Man in His *.* image; in the image of GOD created He him; male and female created He them. And GOD blessed them, and GOD said unto them, be fruitful and multiply and RE-PLENISH the Earth, and subdue it; and have dominion over the fish of the sea, and over the fowl of the air, and over every living thing that moveth upon the Earth. And GOD said, behold I have given you every herb bearing seed, which, *.* upon the face of all the Earth, and every tree, in the which the fruit of a tree yielding seed; to you it shall be for meat, and to every beast of the Earth, and to every fowl of the air, and to every thing that creepeth upon the Earth, wherein *.* life, *.* every green herb for meat, and it was so. And GOD saw every thing that he had made, and behold *.* very good. And the evening and the morning were the sixth day."

Before proceeding to remark upon the last foregoing quotation, I will quote the three first verses of the 2d chapter of Gen., as follows:

"Thus the Heavens and the Earth were finished, and all the host of them. And on the seventh day GOD ended His work, which He had made; and he rested on the seventh day from all His work which He had made; and GOD blessed the seventh day, and sanctified it: because, that in it He had rested from all His work, which GOD created and made."

This completes the brief history of the commencement of time. The Earth at first was without form, and void. The first change was in that of the Spirit of God, moving upon the face of the waters; the introduction of light, the dividing of the light from the darkness, the dividing of the waters which were above the firmament, from the waters which were below the firmament, the gathering of the waters together into seas, and the separation of the dry earth.

Here concludes the second epoch as to what pertains to primitive geology, unless we pass forward to the period denoted as the fourth epoch, when the Solar Orb and the Satalite of our Earth, were placed in

the firmament. The solar and lunar influence of which is great, upon all solids, as well as all fluids; therefore, we must concede to this period, a powerful change. If we look forward to the latter portion of the 5th and all of the 6th verse, of the 2d chapter Genesis, we shall find these words: "*For the* LORD GOD *had not caused it to rain upon the Earth, and * not a man to till the ground. But there went up a mist from the Earth and watered the whole face of the ground.*" It would seem by this language, that rain descended upon the Earth subsequent to the gathering of the waters into seas, and previous to the creation of Man. In the 10th verse of the same chapter, we find these words: "*And a river went out of Eden to water the garden.*" This is spoken of as an event subsequent to the fall of rain, which resulted from the ascension of a mist from the Earth, which rain was so abundant as to water the whole face of the ground, and thus become the primitive fountain of the river of Eden. Here, then, are other changes, which may have had an influence upon the material of our Earth.

The seventh verse of the same chapter, contains these words:

"And the LORD GOD formed Man, *,* the dust of the ground, and breathed into his nostrils the breath of life; and Man became a living soul."

Thus Man was of the dust of the Earth, an offspring, in his mortal frame, of the material world; but his soul became a living spirit by the breath of the Almighty being breathed into his nostrils.

The material world was a shapeless mass. The subsequent charges are stated with great brevity, but with particularity. We are unable to determine the consequence of these changes from what we now see, for the crusts of our earth are made up of aggregates, we know of no simple substance which predominates, and these aggregates are constantly acting upon each other, and producing new substances.

I see nothing in the Mosaic record, to contradict the opinion that our Earth had its existence long prior to the separation of light from the darkness, as recorded in the 2d verse, of chapter 1, of Gen., and I see nothing, therefore, to contradict the Plutonic and Neptunian theory. The material of our Earth is now influenced by heat, as well as water, and each, and both, are producing continual changes.

The interior of our Earth, is, without doubt, a sea of liquid fire, of more than 2,500 miles in diameter, and above its surface, is a region of cold, so intense, that all fluids known to us, would become solids.

Modern Geologists have introduced theories in reference to the substances which compose the crusts of our Earth, but I will not detain the reader to discuss them, with the exception of one, viz: the coal formation. This formation, they nearly all agree in pronouncing of vegetable origin, because, they say, they find vegetable remains incrusted by it, and imprinted and imbedded in it.

We might, with as much propriety, insist that water is of vegetable origin, for the reason that we find vegetable matter incrusted by ice and embedded in it.

I have examined a great number of coal formations, bituminous springs, oil springs, gas springs, &c.

Petrolium, in an intense cold climate, has all the properties of bituminous coal. The carburetted hydrogen gas, when condensed, forms the mineral oil, the mineral oil the gas, &c. Many earthy substances, dissolved in heated petrolium, would, on cooling, become chrystalized, and form an anthracite coal.

The bituminous Lake, in the Island of Trinidad, would, in the climate of the arctic regions, become a coal field. A similar Lake, in the province of Texas, is, in winter, so hard as to bear the weight of persons passing over it; in summer, it is almost fluid. If, in its fluid state, it should penetrate a bed of pressed hay, and remain in it for centuries, the hay would become chrystalized with it, and form a solid body.

Coal, therefore, is a production resulting from the internal fires of our Earth, and one of those bounties provided by the Creator, for the use of Man, in accordance with the progressive increase of his wants.

We speak of the age of the world, as from the creation of Heaven and Earth, whereas, we should reckon chronology from the creation of Adam, who was formed of the dust of a world which may have previously undergone such a change as the Scriptures declare our Earth shall at some period undergo, before man shall be awakened by the last trump, and put on the robes of immortality.

I will recur to this subject again, in the subsequent pages of this number.

E. MERIAM.

AMERICAN SALT.

To the PRESIDENT and BOARD OF MANAGERS of the AMERICAN INSTITUTE.

GENTLEMEN—When I had last the honor of addressing you, I concluded by saying that in the course of a few days I would lay before the public a farther statement relative to the fossil salt in Virginia.

I have not been able to do so as fully as I desired until the present time.

During the month of May last, I received from my correspondent at the Saltville mines in Virginia a letter from which I make the following extract:

"When we reached the salt rock at a distance of 220 feet from the surface, we still continued digging, say about 8 or 9 feet square for about 50 feet. We then quit digging and bored about 110 feet. When we quit the well entirely having gotten water in an auger hole at 214 feet and we believe it cheaper to work the water than raise the salt rock. We are not of opinion that we even got through the body of the salt rock, we think that we were still in it. Our supply of salt water still continues abundant and the specific gravity about the same; if any change it is increased. We have never required water enough to use for our manufactory to ascertain the increase of the quantity. We have no doubt but our well would supply enough to manufacture from three to five times as much as we make.—Our Salt Water when first first drawn from the well looks clear, but we are aware there is sediment in it of sulphate of lime and have it drawn into large cisterns where some portion of the sediment settles. When drawn into the kettles it appears to be as clear as any lime stone water, but after being boiled a while, or pretty highly heated for some time, it becomes very clear, and is the most transparent and beautiful water I have ever seen, much surpassing any other water I have met with that has passed through the same process."

I have received during the present month another letter from my correspondent dated December 13th, 1843 in which he says:

"Nothing new has taken place with us. Our wells continue pretty much the same, no new ones have been dug, the old ones being sufficient to supply double the demand we have for salt.

My correspondent in his letter of May 24th, 1843 states that he had received the Diploma awarded to the house of FINDLEY, MITCHELL & Co., in which he is a partner, by the American Institute, at their Fair in October 1842, and adds that it is very beautiful.

Saltville is on the north fork of Holstein, which discharges its waters into the State of Tennessee, and the town is situated a long distance inland, and in a mountainous country. Nature in the profusion of her bounties has placed for the use of man this mineral salt treasured up in its great terestial storehouse in remote places where it may be needed as the human family extend their settlements in the wilderness regions and in exact proportion as the wants of the human family are increased the means of supply are developed to satisfy this demand.

It is a singular fact that in the perforating of the earth as stated to the depth of 414 feet no water should be found while in the prefaration at a distance of but 40 feet, it is found in great abundanee at the depth of 214 feet. My opinion is that this volume of water will increase precisely in the same ratio, as it is drawn from the well for the reason that every gallon of water must displace about three pounds of salt rock, and the water will fill the place of the displaced mineral.

During the present year a well has been sunk in the town of Galen in the County of Wayne, in this State, near the Cayuga Marshes, the location is 54 rods south of the Great Canal leading to lake Erie, six miles west of Montezuma, about 40 miles west of Syracuse, and about 18 miles from the waters of Lake Ontario.

I have received from my correspondent Mr. John Mead, the gentleman who sunk the well, two letters in reference therto; and also a bottle of salt water raised from the well, which has been sunk to the depth of

330 feet. Also a sample of salt, and some specimens of a chrystalized substance, which is continually forming in needles in the well. The water is of great specific gravity, weighing about 11 lbs. to the gallon. I have not had time to analyze the water, but will do so, soon. The last fifty feet passed in boring this well, the auger struck several stratas of mineral salt. These stratas were thin. Thus we have at length obtained the fossil salt in this state, and I have no doubt that the supply of this mineral below the surface of that region of country in and round about Wayne and Onondago will be found to be inexhaustible. The water raised from the well yield 3 lbs. salt per gallon.—Mr. Findley one of the proprietors of the Saltville mines, in his letter to me of Dec. 13th, 1843, says:

"The water Mr. Mead has procured must be fully equal, if not superior, to ours.—Ours is, so far as I have been able to ascertain, the best ever found, until Mr. Mead's. I presume from the account we have of his, there can be but little, if any difference, in the specific gravity of them."

Mr. Findley will forward to me a bottle of the water of the Saltville wells and also speciments of Salt Rock, Clay stratas, Plaster &c., &c. Saltville is far from this, and inland, and intercourse in winter much interrupted, therefore some time will elapse before these come to hand.

Mr. Findlay has sent me a printed communication of C. B. Hayden, Esq., of Abingdon, Va., addressed to the Editor of the Abingdon Banner, a paper published near the Salt Mines. The Editor of the Banner, accompanies this communication with prefaratory remarks, in which he says: "We may venture to state, upon the authority of Governor Campbell, that Professor Rogers, who is intimately acquainted with Mr. Hayden, regards him as an accomplished geologist."

"The Salines of the Holston, are in the shales belonging to the lower portion of the *carboniferous* series. These Salines, therefore, occupy a medial geological position in relation to the other Salines of the United States. Those of Kanawha, and the West generally, being higher up in the carboniferous rocks, and those of New York, according to *Messrs. Conrad & Vanuxem, belong to the Wenlock limestone group, of the Silurian system. With the exception of the Brine Springs, near Durham, (which are also in the carboniferous rocks,) they are, (geologically,) lower than those of Europe. These Salines are situated in a valley, the bounding hills of which here assume an amphitheatrical arrangement, rendering the topography highly favorable, by its drainage, to the formation of those subterraneous reservoirs of water, which, by solution of the Saline matter of the adjacent strata, furnish the wells with brine, and to this local topography they are indebted for their copious, constant and uniform supply. This amphitheatrical valley, to which the discovery of brine has been confined, is about ½ of a mile in breadth, and one in length. The centre of this valley, consists of an earthy alluvium, with a few interspersed pebbles and small boulders, forming a flat, through which the salt wells are sunk. This alluvium is generally from eighteen to twenty feet in thickness, and reposes immediately upon the gypseous rocks, which are here in an advanced state of decomposition, consisting generally, of blue and red clay, derived respectively from the blue and red shales with which the gypsum is associated. Undecomposed rocks are rarely met with *in situ* in the wells and borings, The existence of Salt Licks and Salt Springs, induced a successful search for salt water, early in the history of the country, but it is understood that the wells were shallow, and the brine both weak and limited in amount, although sufficient to meet the then limited demand. † The wells of the present establishments, are six in number, but two of which are now in operation. The wells vary in depth from 200 to 386 feet. All the wells at the present site, are within an area of 300 feet; to this area and the original wells, one mile northeast of the former, the discovery of salt water has been confined. The same general section is presented in all the wells and borings; the upper eighteen or twenty feet, consisting of the before mentioned alluvium, to which succeeds alternating strata of red and blue clay, and gypsum, the latter generally predominating, and which continue to the depth at which water is found, usually about two hundred feet. Throughout the valley already described, gypsum is found at the general depth of from eighteen to twenty feet. Further East the gypsum crops out, being underlayed with blue and red shales; immediately overlaying the gypsum, is a fœted crystalline limestone, of a dark color and quite cellular, the cells being filled with crystals of carbonate of lime. At times the gypsum is separated from this rock by a thin seam of black pyritous slate. The gypsum is laminated, the plane of lamination having a general parallelism with that of its dip, which corresponds with that of the associated rocks, which are here highly inclined, showing that the deposition of the gypsum, was anterior to the present disturbed condition of the rocks. The exposed portion of the gypsum, is from twelve to twenty feet in thickness. The gypsum, unlike that of New York, is a pure sulphate of lime, sometimes chrystalline, sometimes granular, usually white, except when exposed to infiltration from the shales, when it has a slight ferruginous tinge, which is usually the case in the upper part, which is also more distinctly crystalline. Occasionally it contains thin seams of a dark smoky color, and sometimes radiating crystals, of the same hue. Running through the mass, are frequently seams of beautiful fibrous gypsum. Well defined plates of selenite, are rare. Gypsum, of this general character, occurs over a region of country, of about half a mile in breadth and fifteen miles in length; it is generally worked to the depth of from twelve to twenty-five feet, without being passed through; at several localities, it has been ascertained to extend to the depth of two and three hundred, and in one case, over four hundred feet.

In 1840, in sinking a shaft at Saltville, after passing through the usual thickness of alluvium and alternating strata of red and blue clay and gypsum, nearly forty feet of which was solid gypsum; salt rock was met with at the depth of two hundred and twenty feet, and continued to the bottom of the shaft, two hundred and seventy-three feet, and was ascertained, by boring, to extend to the depth of three hundred and eighty-six feet, without being passed through. In this well no water was met with. Nothing is known respecting the shape or extent of this deposit, except what is learned from the above mentioned shaft, that it is there over one hundred and sixty-six feet in thickness; it is, however, local in some directions, as it is not found in the neighboring shafts: if, however, as most probably it is, the source of the brine which has been worked for so many years, undiminished in strength and quantity, it must be quite extensive. Much interest is imparted to this salt, by its being the only fossil salt yet discovered in the United States. The salt is irregularly intermixed with red and blue clay, and small fragments of shales; the salt usually predominating, occasionally the former are absent. These impurities, mechanically intermixed with the salt, were found to be much more abundant in the upper portion of the salt, which, when the borings were discontinued, was almost entirely free from impurities. The salt is compact, semi-crystalline, generally of a deep ferruginous color, though occasionally of a delicate flesh tint, and more rarely it is entirely free from coloring matter. The planes of the shales intermixed with the salt, have not that parallelism with each other, which gravity would impart to them, if deposited under quiet circumstances, and their irregular distribution through the salt, making with each other every conceivable angle, indicates an agitated condition of circumstances, at the period of their deposition. Gypsum is occasionally interlaminated with the salt, and sometimes occurs in it in fibrous crystals, more or less impregnated with salt. The salt is *anhydrous* and nearly a pure chloride of sodium as the following analysis will show:

Peroxide of Iron,	0.470
Sulphate of Lime,	0.446
Chloride of Calcium,	a trace
" of Sodium,	99.084
Total,	100,000

The local occurrence of a fault, the generally disturbed condition of the rocks, and the anhydrous nature of the salt, all argue the action of heat cotemporaneously, or subsequently to the deposition of the latter. Not having freshly quarried specimens, I have been unable to ascertain whether the

* Vide State Report, for 1841.

† Saltville, Washington County, Va.

gypsum overlying the salt, or that associated with it, is anhydrous. The solution of this rock salt, is undoubtedly the source of the brine, which, like that of Droitwich and Cheshire, derived from the solution of fossil salt, is saturated. This origin of the brine, will explain its general uniformity, in strength and composition, in the different wells, when unaffected by infiltrated fresh water, as well as its slight variation in strength, by continual working; it being well known that when the salt exists in the rocks instertially, the brine is soon weakened by the exhaustion of the saline matter, rendering it necessary to deepen the shafts from time to time. Does not this origin explain the singularly low temperature of the wells? which, in one of them, is the same as that of the Springs of the vicinity, and in the others, but one or two degrees above them. The temperatures of the respective wells, are as follows:

Anthony's Well,	226 feet	
in depth,	- - -	54½ deg.
King's Well,	206 feet	
in depth,	- - -	53½ deg.
New Well,	214 feet	
in depth,	- - -	55½ deg.
Mrs. Preston's Spring,	- -	53¾ deg.
(Average temperature of Springs of the country.)		
Springs at Salt works,	-	52½ deg.

This slight elevation of the temperature of the wells, is less than is due to their depth, and may, perhaps, be owing to the refrigerating effects of saline solution. The brine differs in composition from the rock salt only in the absence of the peroxide of iron, and its containing a larger proportion of sulphate of lime; the former existing in the rock salt in the state of an insoluble peroxide, is not dissolved, and the latter is derived from the associated gypseous strata. The annexed analysis, is of the brine of the New Artesian Well, bored a few months since to the depth of two hundred and fourteen feet, water having been obtained at the depth of one hundred and ninety-three feet:

1,000 grains of the brine, contains.	Chloride of Sodium,	240,52
	" " Calcium,	000,08
	Sulphate of Lime,	005,35
	Water,	754,05
	Alumina,	a trace

This brine, therefore, contains about 25 per cent. of solid matter, 24 per cent. of which is pure chloride of sodium, the richest of the New York brines, according to Dr. Beck, contains but about 15 per cent. of this ingredient, which is also associated with the Magnesian Salts, in addition to the other ingredients contained in this brine. A wine pint of this brine, yielded of saline matter, 2432.25 grains, equal in a gallon, to 19,458 grains, or 2.77 avoird pounds; therefore, by the ordinary process of direct evaporation, hereafter to be described, eighteen gallons of the brine will produce one bushel of salt, weighing fifty pounds. As the object of this experiment was to determine the practical value of the brine, the salt was not reduced to absolute dryness, but to the ordinary dryness of the salt of commerce. The annexed table from Van Rensselaer, with Dr. Beck's additions, to which I have added the result of my experiments upon the Holston brine, will afford a comparison of the strength of the different brines of the United States. At Nantucket, 350 gallons of sea water, yield one bushel of salt.

Boon's Lick, (Mo.)	450	gallons of brine give 1 bush. salt.	
Conemaugh, (Pa.)	300	do.	do.
Shawneetown, (Ill.)	280	do.	do.
Jackson, (Ohio)	213	do.	do.
Lockharts, (Miss.)	180	do.	do.
Shawneetown, (2d saline,)	123	do.	do.
St. Catherines, (U. C.)	120	do.	do.
Zanesville, (Ohio)	95	do.	do.
Kanawha, (Va.)	75	do.	do.
Grand River, (Ark.)	80	do.	do.
Illinois River, (Ark.)	80	do.	do.
Muskingum, [Ohio]	50	do.	do.
Onondaga, [N. Y.]	41 to 45	do.	do.
Holston, [Va.]	18	do,	do.

The entire absence from this brine, of the Magnesian Salts, so prejudicial in other brines, and the extremely minute proportion of the other salts present, precludes the necessity of those preliminary operations practised at other works, for the separation of these impurities. The water is first pumped into large reservoirs, where the impurities, held in mechanical suspension, are deposited, it is thence conveyed to the kettles and evaporated by rapid ebulition. As the salt is deposited, it is removed in wicker baskets and suspended over the kettles, until it is dry. The kettles are cast iron segments of spheres, of a general capacity of forty gallons; these are arranged in pairs, in parallel rows over an oblong furnace heated by wood, the heat being applied directly to the bottom of the kettles. In the arrangement of the kettles, and the construction of the furnace, little regard is paid to the economy of fuel or heat. By this direct evaporation at this high temperature, salt of a superior character is expeditiously made; but the process is attended with the serious inconvenience of the formation of a hard saline incrustation on the bottom of the kettles, owing to the intense heat to which the salt, as it is deposited, is subjected. This incrustation, called by the workmen, blocking, is sometimes fused into a vitreous mass, and is generally chrystalline, adhering with such tenacity to the sides of the kettles, that the pickaxe is required for its removal. This blocking, by the necessary interruption for its removal, and the rapidly increased corrosion of the kettles, caused by its protecting them from the cooling influence of the water, to acquire a temperature destructive to them, becomes a serious expense.

That this incrustation is not owing to the deposition of the more insoluble impurities of the brine, as is generally supposed, will be seen from the following analysis of two specimens, selected by the proprietors, as representing the average character of the blocking, which these analysis show to be nearly pure salt. The specimens were of a snowy whiteness, compact, hard, laminated, highly crystalized and anhydrous:

	No. 1.	No. 2.
Carbonate of Lime,	0,126 grs.	a trace
Sulphate of do.	9,314 "	4,892
Chloride of Calcium,	0,050 "	.064
" " Sodium,	90,510 "	95.044
Total,	100,000	100,000

The annoyance and expense of the blocking, would, I conceive, be entirely obviated by evaporation at a lower temperature, which would also improve the character of the salt; as the slower the evaporation, the more perfect the crystallization. At Cheshire, where the brine is similar to this, the water is evaporated at a temperature below ebullition in shallow-wrought iron pans, of an area of from eight to twenty square feet, which last for several years. A pan of this description, brought over from England by the Hon. Wm. C. Preston, was burned out in a few years at Saltville. The requisite low and uniform temperature, could be readily attained by the use of either steam or hot water, as a heating agent, applied in the manner so frequently done in the manufacture of sugar, and similar departments of the arts. This modification in the manufacture, besides avoiding the blocking and improving the salt, would econimize fuel, and the latter consideration should urge itself with serious force upon the proprietors, occupying as they do, a region whose forests must soon be exhausted, and whose geology forbids the hope of the discovery of coal.

A large proportion of the salt manufactured at Saltville, is made by the process of direct evaporation, already described. A whiter and purer salt is made, by first concentrating the brine in a wooden cistern, through which steam is conducted in a cast iron pipe, which sufficiently concentrates the brine to produce a deposition of most of the sulphate of lime; the concentrated brine is then conveyed to the kettles and evaporated, as in the other process. The salt thus manufactured is purer, more distinctly crystalline, and has a white satin lustre.

The following analysis of the two varieties of salt, will show the difference in their composition:

No. 1, is the salt made by the last described process.

No. 2, is that made by the process of direct evaporation, first described.

	No. 2.	No. 1.
Sulphate of Lime,	1,820 grs.	1,444 grs.
Chloride of Calcium,	.034 "	.016 "
" Sodium,	98.146 "	98.540 "
Total,	100 grs.	100 grs.

The two establishments at Saltville, manufacture annually, two hundred thousand bushels of salt.

I have received from Thomas Spencer Esq., the former Superintendent of the Onondago Salines, the Western State Journal containing the following:

fication and generates or invites carbonic acid gas.

A letter from an officer of the U. S. Army dated East Washita, Red River, August 25, 1843, published in a Cincinnatti paper contains the following statement:

"I informed you in a hasty letter of my departure from Fort Gibson to overtake Captain Greene. We travelled about seventy miles up the north side of the Arkansas, where the 'cross timbers' come against that stream. These cross timbers got their name from being a continuos belt of timber, of twenty or thirty miles in width, running north and south, from the Red river to the Arkansas, and some distance beyond it, separating the grand prairies of the West from the east side of it. It is composed of black-jack oak, principally, and filled in with grape vines and plum bushes, making the passage of it very difficult for the most part. We crossed the Arkansas river above this, and kept up the south bank until we came within one hundred miles from Fort Gibson we came to the great Salt plain.—This was one object of our journey, and the sight was truly gratifying. The bed of the river (the Nescutanga) was widened, being near six miles in width, and ten in length; the river running by one side of it, through a small channel in the sand, while this upper plain throughout was covered with a crust of salt as white as snow. We approached it through sand hills, and when within four or five miles of it, the plain looked like an immense salt lake which had dried up and left the salt in its bed. We found the salt to have a local origin; it comes to the river in a creek which is very salt. This overflows the plain and leaves the water to chrystalize on the surface. Heavy rains will wash the salt away; but the overflow from the creek comes at the same time to bring more salt for chrystalization.

"Within two days' journey of the Great Salt Plain we came to the great salt rock, as it is called. We found it to be the bed of the Semirone, a stream south of the one the Great Plain is on, and is an immense spring of salt water, rising at the base of a high clay hill, and boils up over a space of 160 acres, chrystalizing as fast as it reaches the surface, forming a rock of salt all over the cove, so hard that we broke one mattock in vain attempts to get a mass of it. The holes where the water comes out are lined with salt as far down as the arm could reach.

"After leaving the salt region we turned our bridles homewards, came S. E. for two hundred miles, mostly on the south side of the Canadian. Here Capt. Boone separated from me to find our way to this post. He told us that he were about 100 miles from Fort Washita; it proved in the end to be much farther; and being misinformed by two Kickapoos, whom Col. Hasney (as we afterwards found out) had imprisoned at this post, we were led astray, and before we discovered our error ran out of provisions.—This was a severe blow to us all; yet we got in safely."

Mr. Mead in his letter to me of Nov. 10th, says:

"The well is sunk in the woods a few rods from the Canandagua outlet. The strata first passed was soil resulting from vegetable decomposition, three feet. Of clay and marl, forty six feet, containing brackish water.—Indurated clay and plaster 36 feet, here struck a vein of salt water which raised and ran over the shaft at the rate of about five gallons per minute, continued on in the same kind of rock 50 feet further, when I struck another vein of salt water. Double the quantity ran over the top of the shaft. The water tested 8 degrees. The point of saturation of the instrument is graduated to 25 degrees—it soon fell to 6 degrees—continued on in the same kind of rock (with now and then passing a strata of white earth or marl in passing which the water was rendered as white as milk) eighty three feet from the last mentioned vein, where the augur reached another vein of salt water and gas, which came up with great force and fury and increased the flow over the top of the shaft to 100 or more gallons per minute for about four hours, it then subsided and ran over but a very little and continued quiescent for 30 or 40 minutes and then recommenced rising and discharging with great force and still has periodical and occasional rising.

"At this point the augur dropped having, as I presume, struck a subterranean water course, of large volume and strong current, and of a specific gravity equal to the water of the Dead Sea, the current of which caused a visible vibration of the stem of the augur. Below this for 18 feet the rock appeared of a darkish colored gypsum, after this a strata of red rock 2 feet thick, and then the red rock again, which continued on for 90 feet. The last 50 feet the water increased in strength very fast. Passed a number of thin stratas of salt which were broken and raised up with the sand pump and mixed with the drillings. The water raised in the sand pump, was, at this point 25 degrees or full saturation and yielded 3 lbs. salt to the gallon.—The temperature of the water is 52° of Fahrenheit."

Mr. Mead in his letter to me of December 9th states that the Cayuga Marshes are 14 miles long, and from 6 to 7 broad, and contains about 63,000 acres. These marshes are wet. Cattle however, graze upon them in summer. The Lakes of Cayuga Seneca, and Canandagua have their outlet through these marshes. There is about 152 feet of fall from the head of these marshes to the waters of Lake Ontario. The well is five miles from the village of Clyde. No limestone within ten miles. No mineral Coal, petroleum or mineral oil. Sulphur Spring near by. Carbureted hydrogen gas issues from a salt well recently sunk at Clyde. Iron ore abundant about 16 miles distant. No sand stone. Boulders weighing from half a ton to 4 tons, scattered over the surface upon the high grounds near the marshes.

You will perceive by this the importance of a continuance of the present duty on foreign salt. This duty will afford a protection to those who may make larger outlays in the bringing into use the mineral salt of our own country.

I have received from the HON. JOHN C. SPENCER, Sec. of the Treasury Department of U. S., a letter dated Washington City, December 27th, 1843, containing a statement of the importation of salt into the United States in the year 1842.

Import 1842, 6.178.743 bushels of 56 lbs. to a bushel, valued at $841.682. The accounts for 1843 are not yet made out.

The import of foreign salt into the port of New York in 1842 from January 1st to November 30th inclusive, is 1.511.609 bush. Import in 1842 in corresponding months 1.568.920 bushels.

I shall be obliged to close this communication without finishing the subject. I will resume it again.

VOL. 1. NEW YORK, APRIL 9, 1842. No. IX.

IMPOSITIONS.

WE give below the Memorial of ANSON G. PHELPS, Esq., one of our most estimable citizens, and also a part of the papers attached thereto, the others will be found in the previous numbers of this volume on the page to which he refers.

Some of the property of Mr. Phelps *is assessed to such an extent that the interest of the assessment nearly equals the value of the land assessed!!!*

From Senate Doc. No. 100, *p.* 306.

Memorial of Anson G. Phelps, for an investigation into the proceedings relative to an assessment.

To the Honorable the Legislature of the State of New York.

The undersigned represents to your honorable body, that he is the owner in fee of certain lands on the island of New York, situated between the Third avenue and the East river, and between Twenty-eighth street and Fortieth street, as laid out by the commissioners appointed by the act of the Legislature of the State of New York, passed April 3, 1807, which land is under cultivation.

The undersigned also represents that divers public officers appointed by the Supreme Court of the State of New York, or some of the Justices thereof, and divers other public officers appointed by the common council of the city of New York, or claiming to be so appointed, have, under the color or pretext of law or authority, imposed various and large assessments upon the said lands of the undersigned for pretended public improvements, which assessments, exclusive of interest, amount to the sum of five thousand five hundred and sixteen dollars and seventy-one cents, as per bills of the corporation collector hereto annexed.

The undersigned states, his said property is in no respect benefitted by the said proceedings, and should not be thus imposed upon.

The undersigned further represents, that the proceedings here complained of, were wholly unauthorized, and therefore illegal, and consequently void, yet his Honor the Chancellor of the State does not feel himself authorized to interfere and arrest the proceedings, but has stated, in an opinion he gave in a somewhat analagous case, that legislative interference is a proper remedy. The case alluded to by the undersigned, is that of Meserole *vs.* the Mayor, &c. of Brooklyn, recently decided in the Court for the Correction of Errors. The undersigned therefore complains to your honorable body, that the proceedings of the said officers, in the present instance, is an attempt to take private property for public use, without making just compensation therefor, and is therefore a violation of the constitution of the State, and such a violation as calls for legislative interference.

The Supreme Court having already been actors in some of the preliminary and also in the subsequent proceedings, are not a proper tribunal to review their own acts, and leaves the question almost without jurisdiction, except in the Legislature of the commonwealth.

The sacredness of private property is involved in the fundamental principles upon which all good governments are based, and without this, liberty would exist but in name. The value of real estate depends upon the goodness of the title and the security guaranteed to that title by the government of the people.

Some of the property of the undersigned is assessed more than double its actual value, and even the interest on the assessments approximates nearer to the actual value of the ground assessed, than the amount of the assessment itself. Such a state of things as these abuses complained of, is a great public evil, as well as individual wrong, and operates more to depreciate the value of real estate on the island than any other cause.

When public necessity makes it necessary to take private property for public use, full compensation is always expected to be paid, and by no good government ever is withheld, and as such ought to be looked for when public convenience requires the taking of private property for public use; but in the absence of both these, there should be no power given to invade private property, without the consent of the owner.

The proceedings of which your memorialist complains, are of an extraordinary character and are matters of record.

The annexed printed papers, on pages 40, 41 and 42, contain a full history of the proceedings of the board of assistant aldermen, the board of aldermen, and of the mayor of the city of New York, in the years 1835 and 1836, in this matter, by which it will be seen that the section of the island designated as "all the streets and avenues up to and including Forty-second street, not previously opened by due course of law, or by deeds of cession," were to be proceeded in with by one set of competent commissioners, instead of the practice theretofore practised of opening single streets, or small portions of streets in detail. The street committee estimated that the whole proceedings would not cost more than about five thousand dollars, and they calculated by this mode of proceedings "*nineteen twentieths of the expense* usually made in proceedings with single streets in detail, would be saved, and besides the lots would not be assessed but once for opening a street or part of a street or avenue."

The proceedings adopted by the common council and approved by the mayor, did not authorize any application to the Supreme Court for the appointment of commissioners of estimate and assessments. The affidavit of Benjamin Townsend, Esq. chairman of the street committee, which is hereto annexed states that fact.

The undersigned represents that it appears, from the official documents on file in the office of the clerk of the Supreme Court, at Albany, that application was made to the Supreme Court for the appointment of *eighty-one* commissioners of estimate and assessments, being twenty-seven sets instead of one set, as was the only decision of the common council, and the said *eighty-one* commissioners were accordingly appointed by the Supreme Court, and of which the owners of the property to be affected by it were not informed, the application being entirely *ex parte*. Many of the persons thus appointed were incompetent to perform the duties assigned them; this is a fact of general notoriety, and is admitted by the corporation officers. These appointments took place in 1836, and the reports of these said commissioners have been from time to time presented to the supreme court, and have been confirmed by that tribunal. In the presentation of the most of the reports, no such notice as is required by the ninth section of the act passed April 20th, 1839, and no such taxation of the costs and expenses as is required by the twelfth section of the said act, were ever given or made. Thus the whole proceeding from beginning to end has been *ex parte*, and without notice to the parties interested, whose estates were to be affected to the extent of hundreds of thousands of dollars.

The lands of the undersigned are so situate, that both the streets and avenues, as laid out by the commissioners under the act of 1807, intersect and pass through them and take up as much of his land as would equal his full quota to contribute; and had one set of commissioners, of competent abilities, proceeded in this business according to the only plan of the common council, the assessments of the lands of the undersigned would have amounted, in all probability, to less than one hundred dollars in all.

The making of costs, fees and expenses, to fill the pockets of the commissioners, attorney, surveyors, &c. was the motive which prompted the extraordinary proceedings complained of; the attorney's bill alone amounts to somewhere about twenty thousand dollars, as appears by document No. 71, in the hands of the select committee of the Senate. Many of the assessments in this district, as now made, are in effect a total confiscation of the land.

The undersigned also states that he apprehends that his said lands are probably heavily assessed for the pretended opening of Twenty-ninth, Thirtieth and Thirty-ninth streets, but to what amount he is unable to state.

The proceedings in relation to Twenty-ninth and Thirtieth streets, in addition to the other proceedings complained of, are also of an extraordinary character, and he refers to the printed statement annexed hereto, page 45, first column, for the objections made by two citizens interested, to the confirmation of the report of the commissioners, and notwithstanding said objections, the court confirmed the said report.

Subsequent to the confirmation of these two

have in consideration of the public inconvenience, denied the application, and the law does not allow of any appeal from such decision, however large the amount involved, or however aggravated the circumstances of the particular case. For such a state of things, the undersigned asks your honorable body, in their wisdom, to provide a remedy.

The undersigned respectfully submits to your honorable body whether the doctrine of public inconvenience thus set up by the Court shall be paramount to the majesty of the laws and the stern demands of justice, and the sacredness of private property.

With all due respect to the opinions of the learned Judges of the Supreme Court, the undersigned is constrained to say that they have taken an incorrect view of the question, as in the opinion of practical business men, who are conversant with the public and private interests of the city, the value of one hundred and fifty millions of real estate, which the city assessors return as liable to taxes, is affected injuriously to an extent by such proceedings as there complained of—to such an extent as to amount to a great public calamity, producing great individual suffering and injustice, and producing a depreciation in the value of real estate amounting to tens of millions of dollars.

The undersigned takes leave to call the attention of your honorable body to the former laws, which were in force previous to the year 1800, in relation to public improvements in the city of New York, as being more guarded and more cautiously framed, and as affording more adequate protection to private property, and affording less opportunity to public officers to depredate upon the property of owners of real estate.

The undersigned states that in addition to the large assessments imposed on his said land, that all of his said land which lies in the streets and avenues has been taken for the same, and no award or compensation made therefor.

The undersigned further states that the streets and avenues for which the openings of which the assessments have been made have not been opened, and will not be improved for a great many years to come, and probably not until the interest of the assessments will greatly exceed the value of the land. The undersigned conceives that it is important such action be had by the Legislature in the premises as will prevent expensive and vexatious litigation.

And as in duty bound, &c.

ANSON G. PHELPS.

The street committee to whom was referred the annexed papers from the board of aldermen relative to fixing the time for the actual opening of Twenty-ninth and Thirtieth streets, respectfully report: That they have considered the same, and recommend a concurrence with the board of aldermen in their resolution.

CHARLES J. DODGE,
ALFRED ASHFIELD,
WM. SHALER,
Street Committee.

(Endorsed.)

Report of the street committee relative to fixing the time for the actual opening of Twenty-ninth and Thirtieth streets.

Board of assistants, January 31, 1842.—Adopted and concurred in.

EDWARD PATTERSON, Clerk.

Approved February 4, 1842.

ELIJAH F. PURDY, Act. Mayor.

Correct. D. T. VALENTINE, Ass. Clk. C. C.

City and County of New York, ss.

Benjamin Townsend, of the said city, being duly sworn, deposes and says: That he was an assistant alderman representing the Fourth ward of the city of New York, from May, 1835, to May, 1836, and was chairman of the committee on streets in the said board; that on the proposition for opening the streets and avenues in the said city, up to and including Forty-second street, except such as had been opened, &c. being referred to the said committee, the said committee, and this deponent particularly, took great pains to investigate the expenses of opening streets, and the amount which might reasonably be expected to be saved by prosecuting the said opening up to Forty-second street, in one proceeding; that with this view it was stated to all who appeared before the said committee while the subject was pending before them, (they having given public notice requesting persons interested to appear and present their views) that it was the object of the resolution to have the whole of the said streets and avenues opened in one proceeding, one application to the Supreme Court, and by one set of commissioners; and that a ward map of the Sixteenth ward, which extended to Fortieth street, had been ordered to be made, and also a grade map of the said ward, and that therefore there would be very little expense for surveying and opening the said streets; that this deponent ascertained this while investigating the necessary expenses of such proposed opening; that on such investigation the said committee ascertained to their satisfaction the necessary expenses attendant upon such proposed general opening, with the exception of the counsel fees and court charges; that this deponent was entirely unable to learn or ascertain how much those fees and expenses would be, or should of right be; and that in consequence of being thus unable to learn the extent of those expenses, the committee determined to take the subject of the court proceedings into the hands of the common council, and with that view, and for that purpose, they withheld from the said resolution, in reporting the same to the board, the usual clause which had been inserted in resolutions for street openings, directing the counsel for the corporation to take the necessary legal measures for carrying into effect the resolution; that the said resolution was reported by the said committee, and adopted by the said board, with the object, purpose and intent, as expressed by this committee, and as this deponent believes, understood by the whole board, of having the streets and avenues therein resolved to be opened, opened by one proceeding, on one single application to the court, and by a single board of commissioners of estimate and assessment; and that it was the intention of the committee, and of the board also, as deponent believes, that the counsel of the corporation should not by such resolution be authorized to apply to the

Supreme Court. And this deponent further says: That he has no doubt but that the said resolution would have been rejected without hesitation if it had been supposed or thought by the members of the board that the said streets and avenues, or any of them, were to be opened in detail by separate commissioners, and on separate applications to the Supreme Court for each street.

BENJAMIN TOWNSEND.

Sworn the 26th day of October, 1841, before me, D. CODWISE, *Master in Chancery.*

CLINTON HALL.

NEW YORK, Sept. 21, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK, and
Mr. SCOTT.

The chairman submitted a letter which he had this afternoon received from Hon. Robert H. Morris, mayor, &c.

The committee informed the memorialists they were ready to hear them further upon the matter complained of: whereupon

William M. Holland stated that it will much facilitate the inquiries of this committee by classifying. The subjects of complaint are:

1. That the corporation have imposed ruinous assessments on private property for uncalled for and unnecessary public improvements, which is a great abuse of their power or of their officers. It is a matter of inquiry, whether these abuses grow or spring from an infraction of existing laws, or from an imperfection in the law itself.

The assessment laws in this city are more arbitrary than any laws in any other country, under either the civil or common law. The few barriers in these laws have been disregarded; malconstructions have been placed upon those arbitrary laws, and many of the evils complained of have arisen from that cause; but those abuses have not been confined to any political party in power, but all have been equally loose in their constructions.

The street powers are first found in Dongan's charter of 1686, in second section of that charter. There is no power to lay any assessments for these streets or sewers; but that power was ineffectual unless the consent of the owner, or under some known law of the Province. Act of October 1, 1691, confirming that charter of Dongan, is in Smith and Livingston, for making streets, wharves, &c. Under this act the expense of lands taken for streets, was by general assessments on the whole city; so for sewers the assessments were to be upon all the houses of the city. This act was approved by William 3d, and continued to be the law until the year 1787.

Montgomerie's charter in 1730, is the next grant of street power, (p. 58, 59, Kent's Notes to Charter.

In 1697, 4,302 inhabitants was the population of the city; in 1731, 8,622; in 1756, 10,381, so that assessments upon all the houses or city at large, would be, in fact, upon all benefitted by the improvement.

Montgomerie's charter gives no power to take private property for streets, but it was done under the act of 1691, and by that charter no assessments, general or local, could be laid.

The act confirming Montgomerie's charter in 1732, closes all the powers with the foregoing charters of the corporation to open streets, make sewers and lay assessments, down to the period of the American revolution. The power to take private property for public purposes, streets, sewers, make the same, and lay assessments for the same, are all statutory grants, and are therefore subject to the action of the Legislature after the revolution. The first enactment for streets is act April 16, 1787, 1 Greenleaf, 441; 2 Webster, 92. (See Municipal Gazette, No. 1. p. 5.) This act follows the act of 1691. This and all previous acts require, that the corporation should attempt to treat with owners. The great importance of this attempt is, that it gives notice to the owner of the proceeding; and one of the greatest causes of complaint under the existing law is, that the proceedings are frequently gone through, or so far that the same cannot be prevented before the owner has any notice.

All proceedings for any matter relating to streets (except the opening or widening), are conducted by the corporation without the intervention of the supreme court, or the appointment of commissioners by any court; the assessment is confirmed by the corporation, and then becomes a lien on property assessed.

The first power to sell land was for filling up vacant lots for the preservation of the health of the city, was in 6th section of act of 1787.

To 3d April, 1801, (3 Webster, 126,) there is no act: on which day is passed an act for opening and regulating streets, reviving in effect the act of 1691. No power to sell yet, except for filling vacant lots. 2d April, 1806, (4 Webster, 514, 17th section,) extends the power to sell for assessments vacant lots, for pitching, paving and regulating *streets;* no power to sell for opening streets or sewers.

5 Webster, 155, act of 1307, for laying out the upper part of the city by commissioners—all above Houston street. The 9th section of the act first provides for the introduction of three commissioners in place of a jury; they must attempt to agree first, before such proceeding for opening streets. Down to this act of 1807, the jury of twelve men had existed from 1691. There was no power yet to sell for assessments for opening streets.

6 Webster, 518, in 1812, act passed almost identical with the act in revision of 1813, now existing law. This act introduced local assessments in place of general assessments, in discretion of Commissioners—no power to sell; (2 Revised Laws, 1813, 407.) This act requires in its true construction, that the assessments for benefit should be irrespective of the expense of opening the streets. It might be that a street opened through a bed of rock would cost more than the benefit to be derived from the making of such improvement to the adjoining land. The act itself shows such to have been the intention by providing that where the expense exceeded the benefit, the surplus expense should be assessed on an extended district, by three freeholders, different from the commissioners.

Section 259 of this act of 1813, contains a sweeping power to sell for *all* assessments; and is the present law, and the origin of it.

Laws of 1816, p. 114, the power to sell is made more explicit, and under that act the sales are now made.

The Supreme Court checked the proceedings, on the ground of being premature.

Kent's Notes on Charter, 283, 297, 310, 311, 330 and 331, the question of assessments was brought before the city convention, and there was a proposition to restore the old jury method.

Municipal Gazette, No. 1, p. 2; New York American, 30th Oct., 1829; showing that the convention deemed two great safeguards, to be in publishing all propositions for assessments, and imposing burthens on individuals, in all the corporation newspapers, and, in also publishing the ayes and nays, as is shown in the address of the convention. The corporation have not complied with these provisions. (See proceedings in the Common Council.) Municipal Gazette No. 3, p. 45; and they have from 1830, violated the law requiring those publications, by their constant practice.

Augustus could not extend the Roman Forum, because he could not compel a private citizen to sell his house. The power of eminent domain, the right to take private property is the highest power which can be exercised by any civilized government. And yet this power may be exercised by this corporation, without the petition of a single individual, and at any time when they may deem it for the public good.

In England, in cities, the streets are generally, if not entirely, opened under act of Parliament, and upon assessments of jury.

Municipal Gazette No. 5, p. 70; Vice Chancellor Hoffman's opinion, showing the laws in Boston, Philadelphia and Baltimore, in opening streets.

1. Upon those evils which have arisen from intrinsic defects in the law.

Up to 1839, no consent was necessary on the part of owners in the upper part of the city, laid out in 1807; but still, evils may arise under such petitions got up for the purpose.

Before such determination to open street, the owners on each side of street should have an opportunity to be heard before common council; the commissioners of estimate to give a 14 days' notice of making their assessments.

Another evil is an ex parte appointment of the three commissioners. Notice should be given of the intention to make such application. Are three commissioners sufficient? they have no regular office, or settled place of doing their business, and you know not where to go. A standing board of commissioners would be better. The mode of appointment is bad, it should be made here, by Supreme Court, Recorder, Vice Chancellor, or by the common council themselves.

3. The ineffectual notice of these proceedings before the commissioners is another evil. For opening streets out of that part of the city not laid out in 1807, the commissioners are not confined in their assessments to the streets, and may extend the same over a large extent of the city, and on property of which the owners would not think of examining the commissioners' report.

These commissioners are not obliged to meet together: it is sufficient they sign the report. The commissioners report can only be opposed in Supreme Court upon facts, and not upon opinions; they would not set aside an assessment as erroneous if fifty persons should swear that in their opinion it was erroneous.

Another evil is that the actual opening of a street may be suspended for fifteen months, but this actual opening is only an act in paper, for the street is not in fact opened and graded so as to be used for years.

It is erroneous to distribute in all cases, the amount of awards and expenses in the shape of assessments for benefit upon the land on each side, to half the extent of the next street; the statute only intended those owners should pay their actual benefit.

In streets graded, paved or repaired in the old part of the city, no allowance can be made for injury done to houses, in which the law is defective.

It is a grievance to impose these assessments entirely upon real estate. Many think the owners of large personal estate should bear some portion of the expense.

Another evil is in construction of sewers. No notice is required to be given of any part of the proceedings unless under the act of 1830 requiring the ayes and noes, &c. to be published; the corporation do in fact publish a notice, although not required to do so. Such an assessment is not and should not be binding unless notice be brought home to the person assessed. The whole proceeding is ex parte. No petition is required, or sometimes where it is made, it is upon the petition of persons no way interested in the property to be assessed.

As to remedies and appeals—

Should there not be some appeal from the decision of the Supreme Court, in cases of confirmation of commissioners' reports, in opening streets?

Should there not be some way devised for trying the question of the legality of the proceedings of the corporation? The Supreme Court have declined to examine the question of the legality of these proceedings upon certiorari, by reason of the great and important interests of the city, which may be affected; and leave the party to his remedy in ejectment, where the stake on the part of the owner is so great as to operate as a penalty. That where the application is in equity for an injunction, and the erroneous nature of the proceeding made out, the court has declined to grant the remedy sought, on the ground that the complainant had a remedy at law.

Another great error is, in the amount of the expenses in opening streets, surveyors' fees, &c. which have arisen in some instances, from the want of some proper auditing board.

The 300 petitioners pay one ninth of the taxes of the city; and of the previous year, were liable for one sixth of the assessments. 7,000 lots in this city were advertised for sale last year, and 30,000 lots advertised for sale this year, for payment of assessments. These lots are sometimes sold for 100, 200, 300, 500, 1000 and 2000 years. And in some instances, the property has been offered for sale on lease for the longest of those periods, and has not met with a purchaser who would take the same, and pay the amount of benefit assessed by three sworn commissioners.

On part of the memorialists, the following witnesses were produced and sworn: (see oath.)

John Leonard being duly sworn, says—he was one of the commissioners of estimate and assessment, in opening Second avenue from Twenty-eighth to Eighty-sixth streets; was associated with Henry P. Robertson and Andrew Mills. Mr. Robertson and the witness were the only two who did any work on such estimate and assessments. Mr. Mills was there once or twice. Mr. Mills may have been there oftener than that, but he never did any thing, except to sign the report. Mr. Mills may have been there three or four times, but witness does not recollect distinctly of his being there more than twice; there was work enough for him to do, if he had attended to it, and had been capable of doing it. Mr. Mills signed the report. He made the same charge for his services that was made by other commissioners; he received the amount of his charge from the comptroller of the city, through the witness. The witness was the chairman of the commissioners, and it was usual for the chairman to receive the whole of the compensation. Mr. Robertson's compensation was not received by the witness; but he believes it was received by his, Mr. Robertson's, assignee, Mr. Francis Fickett. The witness gave his receipt for such compensation, to the comptroller. The witness does not recollect distinctly, but thinks the report of estimate and assessment was confirmed about August or September, 1839. The witness always made it a practice to give all the notice in relation to presenting such report that the law required; and in order to make sure of that, the witness consulted with Mr. Emmett, the corporation counsel, who then had charge of those street proceedings. The witness does not recollect that any notice was given of presenting such report, by posting handbills in the vicinity of the contemplated improvement; nor in how many newspapers the said notice was published; that was left to the counsel of the corporation, who then had charge of the proceedings.

At the time the witness made that report, he was not aware of the existence of any law which required such notice to be posted up in handbills.

The witness thinks the amount charged by each commissioner in that case was over seven hundred dollars, being about seven hundred and fifty dollars. The charge for room hire was a separate charge. The allowance to the commissioners is four dollars per day. None of the fees of the commissioners or surveyors were taxed previous to being paid to the witness's knowledge. Those fees were assessed upon the property supposed to be benefitted by the improvement. The fees were not paid until some time after the confirmation of the report. Mr. Robertson served the same number of days that the witness served. To make that report was a very long piece of work. From four to eight hours were considered a day's service; from five to six hours was the general length of time in a day. The room of the commissioners was in the witness's house. The report of the commissioners was drawn up by the witness. The witness examined the avenues so to be opened personally. The elevation of the ground on the Second avenue between Twenty-eighth and Eighty-sixth streets, was very irregular, some points very high above the city grade, and the soil rocky, and some points wet and below that grade. On some parts, it would be exceedingly difficult to reduce that avenue between those streets to the city grade, and would cost a large amount of money. The said avenue, when the commissioners went over it for the purpose of making their estimate and assessment, could not be travelled by carriages without being graded, by reason of its unequal surface. By awards, the commissioners understand the amounts due to the parties interested for the land taken. In making this assessment, the lots were estimated as to their respective value, in order to put upon each a regular per centage of the benefit to be derived. Corner lots were generally charged a third more than intermediate lots. In estimating the value of the lot, they took into consideration whether the lot was to be dug down or filled up, and upon ascertaining the value of the lots, a regular per centage was laid upon each, to the amount of the awards and expenses; so that the assessments for benefit equalled the whole amount of the awards and expenses. Such has always been the practice of the witness, and he has acted frequently as such commissioner of estimate and assessment. The witness recollects the old Kip's Bay road, which terminated near the line of the Second avenue, on a ledge or precipice of rocks, and that the same could not be travelled farther by reason of those rocks. If the witness owned land in the neighborhood of Kip's bay, he would not thank any body to open the Second avenue for his accommodation. If two commissioners done the work, it was always the practice to charge for the same compensation for the third commissioner, although he was absent. Witness always understood such to be the practice. The witness made out the bill in the case of Mr. Mills. Witness thinks he mentioned the case of Mr. Mills to Mr. Emmet the counsel of the corporation who had charge of these proceedings. JNO. LEONARD.

Adjourned to September 22d, 1841, at 7 o'clock, P. M.—*Senate Doc. No.* 100, *p.* 28.

Martha Amory and others *vs.* The Mayor, Aldermen, &c. of the City of New York.

This case is, in its leading particulars, similar to that of Stuyvesant vs. The Corporation, before noticed. It is distinctly charged as to the proceedings in relation to the Sixth avenue, that when the first publication of the notice of motion to confirm the report was made the act of 20th April, 1839, was in force the rule of confirmation being made on the 6th of June, 1839. Here also the question under the 12th section is of great importance as the costs of the opening exceeds $10,000. Some questions may arise under this section; but this at least is clear: no part of the costs can be levied upon the party or his property, nor can a sale be made to pay them until the taxation has been made.

NEW YORK MUNICIPAL GAZETTE.

Published by the Anti-Assessment Committee for GRATUITOUS distribution.--Edited by E. Meriam.

Nos. 10, 11, 12.] NEW YORK, SATURDAY, APRIL 16, 1842. [Vol. I.

MORTGAGEES.

The following Memorials to the Legislature show the very great importance of the enactment of a law to prevent mortgagees being divested of their securities by want of proper notice of sales made of the mortgaged premises for taxes or assessments. In every part and portion of this State, *except the city and county of New York*, the purchaser at an assessment or tax sale, is obliged to give notice to the mortgagee of a sale and purchase of the mortgaged premises for taxes or assessment, and the mortgagee has the right to redeem within six months thereafter by paying the tax or assessment, interest, and expenses, &c. &c.

In the city of New York, there is one hundred and fifty millions of dollars in value of real estate returned by the assessors, which is now UNPROTECTED.

Property on the ocean can be insured against piracy and plunder, but no companies have ever been incorporated to insure real estate against the modern system of land piracy, miscalled assessments, which has depreciated the value of real estate, and decreased the safety of real estate securities.

In the year 1840, the Hon. the Legislature of this State, on the application of Wm. Bard, Esq., President of the New York Life and Trust Co., enacted the following most salutary law :—

An Act authorizing mortgagees to redeem real estate sold for taxes and assessments.

[Passed May 14, 1840.]

The People of the State of New York, represented in Senate and Assembly, do enact as follows :—

§ 1. No sale of real estate hereafter made for the non-payment of any tax or assessment shall destroy, or in any manner affect the lien of any mortgage thereon duly recorded or registered at the time of such sale, except as hereinafter provided.

§ 2. It shall be the duty of the purchaser at such sale to give to the mortgagee a written notice of such sale, requiring him to pay the amount of the purchase money, with the interest at the rate allowed by law thereon, within six months after the giving of such notice.

§ 3. If such payment shall be made, the sale shall be of no further effect, and the mortgagee shall have a lien on the premises, for the amount paid, with the interest which may thereafter accrue thereon, at the rate of seven per cent. per annum, in like manner as if the same had been included in his mortgage.

§ 4. In case the mortgagee shall fail to make such payment, within the time so limited, he shall not be entitled to the benefit of the first section of this act.

§ 5. The term "mortgagee," as used in this act, shall be construed to include assignees whose assignment shall be duly recorded, and personal representatives; and the term "purchaser" shall be construed to include assignees, and real or personal representatives, as the case may be.

§ 6. The notice required by this act may be given either personally or in the manner required by law in respect to notices of non-acceptance or non-payment of notes or bills of exchange; and a notatrial certificate thereof shall be presumptive evidence of the fact of such notice; such certificates may be recorded in the county in which the mortgage was recorded, in the same manner, and with same effect, as is by law prescribed in respect to deeds or other evidences of title of real estate.—*Laws of New York, 63d session*, 1840.

During the session of the Legislature of 1841, the following memorial was presented in the Legislature for a repeal of that law as to the city of New York :—

Memorial of the Mayor, Aldermen, and Commonalty of the city of New York.

To the Honorable the Legislature of the State of New York :—

The memorial of the mayor, aldermen and commonalty of the city of New York respectfully represents—That by the act entitled "An act authorizing mortgagees to redeem real estate sold for taxes and assessments," passed May 14, 1840, it is made the duty of purchasers at sales for taxes and assessments, to give to the mortgagees of the premises sold, notice of such sale, in order that they may be enabled to redeem; and in case of neglect to give such notice, the mortgagees are not affected by such sale.

On sales for taxes and assessments in the city of New York, in case the premises are not redeemed within two years after such sale, by the payment to the purchaser of the amount of his bid, together with interest at the rate of **ten per cent.** per annum, the purchaser becomes entitled to a lease of the premises for the number of years at which they were struck off to him. At the last sale for assessments in the city of New York, the amount to be raised was ***three hundred and twenty-nine thousand dollars.*** This amount was assessed upon *six thousand* separate lots. In a great proportion of the cases, the amount charged upon each lot varied from ***two to six dollars.*** This is a fair example of the sales occurring in the city of New York every year. It will readily be perceived by your honorable body, that the expense of searching the records to ascertain the names of mortgagees will, in most cases, far exceed not only the interest to be received by the purchaser, but also the principal amount of the assessment; and the purchaser, in case of redemption, will lose the whole of this amount. In many cases too, it will be impossible where the lots are vacant, to arrive at any certainty from searching, by reason of the name of the owner being unknown. These difficulties and incumbrances thus thrown in the way of ***purchasers*** will render the sales nugatory, and disable the corporation from reimbursing themselves for advances which they are obliged by law to make. In consequence of the burthens thus imposed upon purchasers, and to prevent the entire failure of the sale above referred to, your memorialists were in that instance obliged to ***guaranty*** on their own part the giving of the requisite notices, in case the ***repeal of the law*** could not in the mean time be obtained; your memorialists well hoping that when the consequences of the provisions of the said law were made known to your honorable body, the same would be speedily repealed.

Your memorialists do therefore pray that the act above referred to may be repealed, and your memorialists will ever pray, &c.

By the common council.

ELIJAH F. PURDY, Act. Mayor.

Sam'l J. Willis, Clerk.

[*Doc. No.* 100 : *in Senate, April* 9, 1842.]

Which resulted in the following act :—

CHAPTER 170.

An ACT in relation to the redemption of land sold for taxes or assessments in the city of New York.—(Passed May 6th, 1841.)

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

§ 1. In cases of sales of real estate for the non-payment of taxes and assessments in the city of New York, it shall be the duty of the street commissioner of the said city, sixty days before the time limited by law for the redemption of any real estate from the effect of such sales, to cause notice to be given to all mortgagees of the real estate so sold, their assignees or personal representatives, who shall at any time at least *one month* before the time for the giving of such notice, have filed in the office of the register of the city and county of New York, a memorandum of such mortgage, containing a brief abstract, designating the property, with the street numbers, if there be any, or such definite description or diagram as will enable the said street commissioner to designate the said premises upon the city maps, and the name and residence of such mortgagee, assignee or personal representatives.

§ 2. Such notice shall be given by putting the same in the post office in the city of New York, directed to such mortgagee, assignee or personal representatives, with such description and place of residence as shall be contained in such memorandum, and such notice shall require such mortgagee, assignee or personal representatives, to pay the amount of such tax or assessment with all interest and expenses allowed by law before the time limited for the redemption as aforesaid.

§ 3. An affidavit of the service of such notice as is above required, before any officer authorised to take affidavits to be read in a court of record and filed in the office of the said register of deeds, or a certified copy thereof under the signature of such register, shall be evidence of the fact of such notice.

§ 4. It shall be the duty of the said register of deeds to keep in his office a book alphabetically arranged for the registering of all such

tain the amount of the taxes due, and whether they have been paid or not by the mortgagor, which is increased by the distance of the mortgaged premises from the residence of the lender. And your petitioners further represent that the fact of a mortgage creditor having sustained a loss of over $8,000 for money lent, by a sale of the mortgaged premises for the sum of $24, by a collusion between the purchaser and the mortgagor; and also of other large losses on sales for taxes, taken in connection with the large funds loaned by the State in distant counties, exposed to similar risks, which furnish the fraudulent with opportunities of fraud, first attracted the attention of the Legislature to the necessity of enacting said law, and that the said law has had a benign influence in favor of the honest debtor and creditor, and as your petitioners believe, can produce no serious inconvenience to either.

And your petitioners further represent that other States, perceiving the beneficial effects of that law, for the promotion of the ends of justice, and for the purpose of inviting the introduction of foreign capital in their respective States, have adopted that law from the statute book of this State. And your petitioners are informed, and believe, that the honorable the corporation of this city have, by resolution, assumed upon themselves the duty of giving the requisite notice to mortgagees, under the said act of May 14, 1840, and to absolve the purchasers from all obligations arising under said law, as appears in the following notice published in the Evening Post:—

"We are requested by the street commissioner to state, in reference to the sale for assessments to take place on the 16th instant, that the corporation, by a resolution of the common council, take upon themselves the duty of giving the requisite notice to mortgagees, under the act of 14th May, 1840, so as to absolve purchasers from all obligations on that account."

And your petitioners believe that one of the objects of the petition of the honorable the corporation of this city in asking for the repeal of the said law, is to relieve themselves from the responsibility and labor that they, without any sufficient reason, have voluntarily assumed; and your petitioners will ever pray, &c.

Remonstrance of John A. Schuyler and R. V. R. Schuyler, heirs at law of John Schuyler deceased, against the passage of any law authorizing the corporation to purchase lands at their own sales for unpaid assessments, and also, asking that the corporation of the city of New York, may be prohibited from thus confiscating landed estates.

To the Honorable the Legislature of the State of New York:—

Your Memorialists beg leave most respectfully, to represent to your honorable body, that an application has been made to the Legislature of the State, by the corporation of the city of New York, for the passage of a law authorizing said corporation to become purchasers of lands at their own sales, for the non-payment of assessments.

Your memorialists beg leave most respectfully to remonstrate against the passage of such a law; and also, to represent to your honorable body, that the proceedings of the corporation of the city of New York, in imposing oppressive and extraordinary assessments upon real estate on the island of New York, have become of that character, that legislative protection to the owners of lands, has become absolutely necessary.

Your memorialists have to state an instance of an assessment upon the estate of their deceased father, made upon a piece of ground culivated as a garden, and situate on the corner of Twenty-eighth street and the Seventh avenue. This piece of ground is ninety-six feet ten inches in length, on Twenty-eighth street, and fifty-eight feet ten inches in width, on the Seventh avenue. The commissioners appointed to make an estimate of the expense of opening Twenty-eighth street, and to assess the amount as benefitted on the adjoining property, assessed this piece of ground for benefit,

ten hundred and thirty-nine dollars and five cents; as will be seen by referring to the street commissioner's advertisement, which is annexed to one of the memorials, presented to the Senate by Mr. Verplanck, (page 38, of that pamphlet.) This piece of ground was offered for sale, for the term of a thousand years, and then for five thousand years, to any person who would take it for that term of time, and pay the assessment and charges; but no one could be found willing to accept it on these terms, or for any other number of years to the end of time. This same piece of land has been again assessed for the pretended opening of the Seventh avenue; and the commissioners appointed to make an estimate of the expense of opening the Seventh avenue, and to assess the same upon adjoining property, assessed this same lot or piece of ground for benefit of opening the Seventh avenue, two hundred and nine dollars and ninety-eight cents; which added to the other assessment, makes the sum of one thousand two hundred and forty-seven dollars and three cents, exclusive of interest; and also of two dollars which is charged in addition for a single advertisement, of a fraction over one line.

The commissioners for making the estimate of the expense of opening the Seventh avenue have included in their estimate, some expenses of a most extraordinary character, viz:

Commissioner's fees, - -	$4,920 00
Room hire for do. - - - -	410 00
Carriage hire, - - - - -	30 00
Clerk hire, - - - - - -	250 00
Stationery, &c. &c. - - - -	48 00
Counsel fees, - - - - -	3,977 77
Surveyor's fees, - - - -	2,801 00
Collector's fees, - - - -	1,115 00
	$13,550 77

The total amount of awards for lands required to be taken for opening the Seventh avenue is $28,141 41.

Your memorialists further represent, that the commissioners have thus allowed to themselves pay at the rate of four dollars each, per day, for the period of sixteen months, and one dollar per day for room hire during that time, (exclusive of Sundays.)

Your memorialists further state, that this large sum of money has been paid to the commissioners, corporation counsel, and surveyor, by the officers of the corporation of the city of New York, without being furnished any bill of items, or particulars, and without having ever been taxed by any officer whatever, without auditing, and without any action upon the same, by the common council of said city.

Your memorialists believe, the whole expense of these proceedings, ought not to have been one-twentieth part of the sum stated above.

Your memorialists, further state that the Seventh avenue, has not been opened nor has Twenty-eighth street, and will not be for many years to come, and that the said piece of land is in no respect benefitted by those pretended openings.

Your memorialists further state, that in their opinion, this piece of land is not worth one thousand dollars, and that it could not be sold for that amount.

Your memorialists insist that those assessments are in violation of the Constitution of the State; that it is in effect, and in fact, taking private property for public use, without just compensation, and without any compensation; and that the proceedings, if sanctioned by any legislative enactment, amount to absolute confiscation of the property.

Your memorialists further state, that the report of the commissioners, in both cases, is on file in the clerk's office of the Supreme Court at Albany, and can be placed before the Senate without any delay.

Your memorialists ask that this memorial may be printed, and that relief in the premises, may be granted, and that no law may be passed giving legislative sanction to the proceedings complained of; and that the sale of the premises may be suspended until a full and complete investigation shall be had in the matter, and that this memorial may be referred to a special committee with power to send for persons and papers.

Your memorialists state that the property in question, is described by two different arbitrary map numbers in the assessment list of the commissioners. And in duty bound, &c.

JOHN A. SCHUYLER,
R. V. R. SCHUYLER.

New York, May 14, 1841.

Remonstrance of Peter A. Jay, Robert C. Cornell and others.

To the Legislature of the State of N. York:

The undersigned, citizens of the city of New York, beg leave respectfully to represent to your honorable body, that they have understood that an application has been made to the Legislature to repeal the *seventh section* of the act of May 6th, 1841, and the act passed May 14th, 1840, which act requires that notice shall be given to mortgagees of lands sold for assessments and taxes, by the person purchasing such lands before he can obtain a lease, by which means the mortgagee has the opportunity to redeem the land from such sale by paying that tax or assessment, and by that means preserve his mortgage security.

Your memorialists represent, that the practice of corporation officers to assess houses and lots by an arbitrary map number, instead of the known street number, and by as many different numbers as there may chance to be different assessments, leads to great difficulty, and that the property is oftentimes assessed in the name of a wrong owner, and the loose manner in which the whole proceedings are carried on, and the very inadequate mode of giving notice of the assessment to the persons interested, lead to great difficulties and troubles, and require to be remedied by legislative enactments.

Your memorialists represent, that assessments upon private property for what are oftentimes miscalled public improvements, have been excessive and oppressive, and are a drawback upon security which real estate upon this island would otherwise afford, as it is most evident that the power to assess land to an amount beyond its value, must render a mortgage upon such land of little value; in fact, oftentimes of no value.

Your memorialists represent, that various public improvements are undertaken by the corporation of the city of New York, under the authority contained in the 175th section of the act of April 9th, 1813; (see 2d vol. Revised Laws, page 407); and that those who are by that section required to pay the expense, have no voice in the matter, and no adequate or sufficient notice of the proceedings.

Your memorialists ask, that it may be provided by law, that in all such cases as authorized or contemplated by the 175th section above referred to, that a majority of the persons to be assessed for the work, shall consent thereto, or apply therefor, before it can be undertaken.

Your memorialists beg leave to refer your honorable body to the proceedings of the Revised Statutes, as respects lands sold for taxes by the Comptroller of the State of New York, as respects notice required to be given by the purchaser to owners and occupants of lands which have been so sold, and of the deed, and requiring the same to be redeemed, and of the service provided for of such notice, and ask for the like provisions to be extended to the city of New York, in the sales by the corporation. (See 1st vol. Revised Statutes, page 400, sec. 84 and 85.)

Your memorialists most respectfully remonstrate against the repeal of any portion of the mortgagee law of May 14th, 1840, and also against the repeal of the *seventh section* of the act of May 6th, 1841, or of any portion thereof; and against the passage of any law in the premises, which will impair real estate securities. And your memorialists, in duty bound, &c.

Peter Lorillard,	James W. Beekman,
Robert C. Cornell,	J. Boorman,
Jn. Rathbone, jun.	P. A. Jay,
Wm. Browning,	David C. Colden,
Maturin Livingston.	

Memorial and remonstrance of John R. Murray, Benjamin Townsend and others, for protection to landed estates in the city of New York, from ruinous and oppressive assessments; and against the passage of any law authorizing the corporation of the city of New York to purchase lands at their own sales, assessed by themselves more than the value of such lands.

To the Honorable the Legislature of the State of New York:

The undersigned, citizens of the city of New York, most respectfully represent to your honorable body that they understand that an application has been made to the State Legislature for an act authorize the corporation of the city of New York to purchase lands advertised for sale for non-payment of assessments imposed thereon by said corporation, or by their means.

Your memorialists most respectfully insist that the imposition of assessments upon real estate by the corporation to so great an amount that the purchaser cannot be found, even for a lease of ten thousand years, who is willing to pay the assessment, is most conclusive and indisputable evidence that the power to assess private property has been most shockingly abused by the corporation, and ought not to receive legislative sanction or indulgence.

CHAPTER 230.

An ACT in addition to the acts respecting the collection of taxes and assessments in the city and county of New York. [Passed May 25th, 1841.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:—

§ 1. All owners, lessees or persons otherwise interested in any lands or tenements sold for taxes or assessments in the city of New York, who shall file in the manner and within the time specified in the act entitled "An act in relation to the redemption of land sold for taxes and assessments in the city of New York" passed May 6th, 1841: a memorandum containing a like description of such lands and tenements and of the name and residence of such owners, lessee, or persons otherwise interested therein, or their legal representatives, as is required in and by the said last mentioned act with regard to mortgagees, assignees or their personal representatives, shall be notified in the same manner as such mortgagees, assignees or their personal representatives are required to be notified in and by the provisions of the said last mentioned act.

§ 2. No person shall be entitled to the benefit of the provisions of the first, second and sixth sections of the act entitled "An act authorizing mortgagees to redeem real estate sold for taxes and assessments," passed May 14th, 1840, or of the act entitled, "An act in relation to the redemption of lands sold for taxes and assessments in the city of New York," passed May 6th, 1841, for any land or tenements in the city of New York sold for assessments, unless the memorandum required by the first section of *the act last mentioned* shall have been filed as therein required, and in such case it shall only be necessary to give the notice mentioned in the manner designated in the last mentioned act.

§ 3. Whenever any land or tenement sold for assessments or taxes in the city of New York and conveyed in the manner provided by law, shall at the time of conveyance be in the actual occupancy of any person, the grantee, to whom the same shall have been conveyed, or the person claiming under him shall serve a written notice on the person occupying such land or tenements, and the person last assessed as owner stating in substance the sale and conveyance, the person to whom made, and the amount of consideration money mentioned in the conveyance, with the addition of forty-two per cent. on such amount as the said lands or tenements were struck off for at the time of the sale, and the further addition of the sum paid for the lease *and advertisements*, and stating also that unless such consideration money and the said forty-two per cent. together with the sum paid for the lease, shall be paid to the street commissioners for the benefit of the grantee, in case the said premises shall have been sold for assessments, or to the Comptroller if the same shall have been sold for taxes within six months after the service of such notice that the said conveyance will become absolute, and the occupant and all others interested in the land or tenements be barred from all right or title thereto during the term of years for which such lands or tenements shall have been conveyed.

§ 4. Such notice shall be served personally or by leaving the same at the dwelling house of the occupant or person last assessed as owner, with any person of suitable age or discretion belonging to his family.

§ 5. The occupant or any other person, may at any time within the six months mentioned in such notice, redeem the said land or tenements in the same manner as now provided by law for the redemption of land sold for taxes and assessments in the city of New York, by paying such purchase money with the addition of forty-two per cent. thereon, and the amount that shall have been paid for the lease, and every such redemption shall be as effectual as if made before the conveyance of the lands or tenements sold.

§ 6. In every such case of actual occupancy the grantee, or the person claiming under him, in order to complete his title to the land conveyed shall file with the street commissioner if sold for assessments, and with the comptroller if sold for taxes the affidavit of some person who shall be certified as credible by the officer before whom such affidavit shall be taken, that such notice as is above required was duly served, specifying the mode of service, and a copy of such notice shall be attached thereto.

§ 7. If the street commissioner in case of a conveyance on account of assessments, or the comptroller in a case of conveyance on the account of taxes shall be satisfied by such affidavit that the notice has been duly served, and if the moneys required to be paid for the redemption of such lands or tenements shall not have been paid as herein before provided, they shall respectively certify to the fact, and the conveyance shall thereupon become absolute, and the occupant and all others interested in the land or tenements shall be barred of all right or title thereto, during the term of years for which the same shall have been conveyed.

§ 8. In cases of sales of any lands, tenements or real estate for taxes in the city of New York, the comptroller of said city shall do and perform all the acts and duties required by law of the street commissioner of said city in cases of the sale of any lands for assessments in the said city.

§ 9. This act shall be construed to authorize the computing of the forty-two per cent. named therein on the amount of sale and expenses authorized by law and not to be in addition to or upon the interest accruing after the sale.

1—

Remonstrance and Memorial of Stephen Whitney and others.

To the Honorable the Legislature of the State of New York:—

The undersigned, citizens of the city of New York, having learned that the officers of the corporation of said city are applying to the Legislature for the repeal of the law passed May 14th, 1840, requiring notice to be given to mortgagees of the sale of lands for taxes and assessments, and also for the repeal of the seventh section of the act of May 6th, 1841, which section leaves the act of May 14th, 1840, in force, in favor of those who cannot record abstracts of their mortgages:

We do most specially remonstrate against

the repeal of the said seventh section, and also against the repeal of the act of May 14th, 1840, or any part thereof; and against the passage of any law in the premises impairing real estate securities.

We do most respectfully ask that the provisions of the Revised Statutes as respects land sold for taxes by the Comptroller of the State, may be extended to the city of New York, and applied to lands sold for taxes or assessments by order of the corporation; and that no lot shall in any case be advertised for sale for assessments or taxes, unless the same is described by the known street or ward number.

And as in duty bound, &c.

Stephen Whitney,	James I. Jones,
Edgar Harriott,	Edmund H. Pendleton,
Smith Harriott,	B. Skidmore,
L. W. Kip & Isaac Young,	H. R. Dunham,
	John Anthon,
James Fellows,	J. Phillips Phœnix,
Gerardus Clark,	Lewis H. Sandford,
Jacob Drake,	Nevins & Townsend,
Wm. M. Holland,	W. W. Chester & Co.,
Anthony Lamb,	Geo. C. Thorburn,
Hamilton Fish,	E. R. Tillou,
R. Whiley,	John H. Cornell,
D. Codwise,	D. D. Williamson,
James Lovett,	Peter Pinckney,
John Ridley,	Wm. C. Rhinelander.
P. G. Stuyvesant,	

(Senate Document, No. 100, page 302.)

We have thus given the memorials and remonstrances in relation to the mortgagee law—that of Stephen Whitney and others should have preceded the Act of 25th May, 1841, in its order, in these pages.

The memorials were all presented in the Senate of this State in the months of April and May, 1841, except that of the Acting Mayor, which was presented first in order.

There was also a memorial of the acting mayor presented to the Senate in 1841, asking for a provision of law to authorize the Mayor, Aldermen and Commonalty to become purchasers at their own assessment sales of lands, which were not bid for by others.

The presentation of the two petitions of the acting mayor were accompanied each by a brief bill, one of which is the Act of May 6, 1841, herein set forth, the other a bill merely authorizing the Mayor, Aldermen and Commonalty to purchase without furnishing them the means to pay for the land thus attempted to be acquired.

On the presentation of these two memorials, one was referred to a committee of which Mr. Verplanck was a member, the mortgagee petition to some other committee.

Wm. Bard, Esq., the President of the New York Life and Trust Co., addressed a letter to Mr. Verplanck asking that these two subject matters might be retained under consideration until a delegate of the Anti-assessment Committee should be in attendauce at Albany to explain to the Committee objections which were making to these two measures of the corporation. The proceedings were suspended accordingly.

Subsequently, one of the delegates of the Anti-assessment committee proceeded to Albany, and placed in the hands of Mr. Verplanck a printed bill and the memorial of Robert O. Cornell and others asking that the provision of the Revised Statutes in relation to notices to owners and occupants of lands sold for taxes by the State Comptroller, should be extended to owners, &c. of lands sold for taxes and assessments in the city of New York, and from which resulted the bill which constitutes the Act of May 25th, 1841, herein set forth.

Subsequently, three delegates from the Anti-assessment Committee attended at Albany, and were there met by Mr. Bedient, the deputy comptroller, and Mr. Ewen, the street commissioner.

Both parties attended before a Committee of the Senate a short time. The street commissioner then and there stated to the Senate Committee that a committee from each board composing the Common Council had been appointed to investigate assessment abuses in the city of New York, that these committees had met several times, and that the then delegates from the Anti-assessment Committee had attended before the committees of the Common Council, and that these committees of the Common Council had found on investigation that there existed no cause of complaint.

The delegates from the Anti-assessment Committee did not deem it their business to engage in a personal controversy with the per son making this statement, they therefore drew up the following memorial, which was presented to the Senate:—

Memorial of Benjamin Townsend and others for a reference of all the remonstrances and memorials in relation to assessments in the city of New York, which have been presented in the Senate, may be referred to the special committee appointed on the 18th inst.

To the Honorable the Legislature of the State of New York:—

Your memorialists, delegates from the Anti-assessment Committee of the city of New York, having in charge the numerous memorials and remonstrances which have been presented to the Senate, in relation to the repeal of the mortgagee law of 1840, and the *seventh* section of the law of May 6th, 1841, and in relation to the amendments of the existing laws as to assessments and taxes in the city of New York; and also the remonstrances against the passage of a law authorizing the corporation of the city of New York to become purchasers of lands sold for assessments at their own sales, most respectfully ask that all the said remonstrances and memorials, and the public documents accompanying the same, may be referred to one and the same committee.

And your memorialists, &c.,

EBEN. MERIAM,
BURTIS SKIDMORE,
BENJA. TOWNSEND.

(Senate Doc. No. 100, page 299.)

This memorial was presented in the Senate in May , 1841, and the prayer of the memorialists granted by a unanimous vote.

Subsequently, one of the Delegates from the Anti-assessment Committee called on the respective chairman of the committees of the Common Council referred to by the street commissioner in his testimony [*See Senate Document, No. 100, page 270*] for a disavowal of the verbal statement of the Street Commissioner, in relation to their Committees, made before the Committee from the Senate, which they signed, and which is as follows:—

TO THE LEGISLATURE OF THE STATE OF NEW YORK.

Your memorialists, citizens of the city of New York, most respectfully pray your Honorable Body to empower the Special Committee, to whom was referred the numerous memorials and remonstrances from the citizens of the city of New York in relation to assessment abuses, *to sit after the termination of the present session of the Legislature, and that they have power to send for persons and papers, and that the said committee be authorized to examine into all the abuses in the premises which the memorialists or any of them may bring before them* or to their notice.

Your memorialists believe that abuses and impositions have been practised in these matters, and the consequences will be highly injurious to the public welfare, the safety of titles to real estate, and the sacredness of private property, unless remedied by legislative enactments, and require legislative action.

And your memorialists, &c.

John A. Underwood,	Robert Jones,
Dow D. Williamson,	Abel T. Anderson,
Robert Smith,	Samuel G. Raymond,
John A. Schuyler,	Eben. Meriam,

on behalf of the Anti-assessment Committee.

(Senate Doc. No. 100, page 275.)

The above memorial was presented in the Senate by the Hon. GULIAN C. VERPLANCK, a distinguished member of that body, on the 22d day of May, 1842.

THE PRAYER OF THE MEMORIAL WAS GRANTED BY THE UNANIMOUS VOTE OF THE SENATE.

ROBERT JONES, Esq., one of the memorialists, was at that time and is now a member of the Board of Aldermen of the city of New York, and at the time that he signed this memorial was chairman of a special committee appointed by the President of the Board, Hon. Elijah F. Purdy, on the *25th of January*, 1841 [See printed proceedings of the Board of Aldermen, vol. 20], *to investigate assessment abuses.*

JOHN A. UNDERWOOD, Esq., another of the memorialists, was at the time he signed the memorial a member of the Board of Assistant Aldermen, and chairman of the Assessment Committee, to which committee was referred a memorial asking for an *investigation into assessment abuses.* Mr. Underwood is now a member of the Board of Aldermen.

The special committee appointed by the Board of Aldermen, and the Assessment Committee of the Board of Assistants, met as one committee, and commenced an investigation, but finding that they had not the power of compelling the attendance of witnesses, the chairman of the respective committees *signed the above memorial to the Legislature for the appointment of a committee* WITH POWER *to send for persons and papers.*

The Committees of the common council did not make a report, but their opinions can be gathered from the recitals in this memorial, which are in part that—

"*They believe that abuses and imposition.*

case, for he had paid assessments on all that property made out to him. Witness then went to street commissioner's office to see if he could not find out anything of this Mr. Paulding, and when witness got there, there were a number of people looking over maps, and when an opportunity offered witness looked at map and saw on the assessment roll, that Mr. Gantley was put down for a dozen or fifteen lots on that block, for the sewer in Thirteenth street, and in looking over the map witness noticed that the lot which he had thus bought was put down as unknown owner. It being adjoining Mr. Mollan's and Mr. Gillepsie's lot, witness saw that their lots were in the same situation, and put down on that map to unknown owners. After that, witness looked at the sales book and there he found the lot put down to Mr. McIlvaine or Mr. McIlbaine, as the owner of that property, and George Paulding was the purchaser at such assessment sale. Mr. Ewen was not in the office at the time, Mr. Smith was in, who represents him, and he said that Mr. George Paulding was alderman Paulding, and he thought witness could make an easy settlement with Mr. Paulding, he was a man who bought a great deal of property of the corporation, and he knew him very well, and he called in there very frequently. In the evening, witness called in on Mr. Mollan, being a neighbor of his, and told him, his, Mr. Mollan's property had been sold; and witness told him what it was sold for. The next day witness called again at street commissioner's office and saw Mr. Ewen, and stated his case to him. He said it was a hard case, and as he was acquainted with Mr. Paulding, and as he had promised Mr. Mollan that he would write to the man who had purchased his property, he would also write to Mr. Paulding who had purchased witness's property, to see if some arrangement could not be made; and that witness should call again to see him on the subject. Witness told Mr. Ewen, that he would go and see the comptroller, to get him to withhold the leases for some days; witness being under the impression that the leases were made out. And Mr. Ewen told witness that the leases must go through him; and that Mr. Paulding, when he got his lease, must get it through him. Witness then said if arrangements could not be made with Mr. Paulding, it was his intention to get an injunction laid upon the corporation, to withhold that lease. And witness requested Mr. Ewen, if it should be made out, that he would withhold it for two or three days, to see if such arrangement could not be made; and if not, to get such injunction laid. And he said he had no authority to withhold it; but yet, under this case he would accommodate witness; he said, said lease was not made out, and it probably would be some days before it would be made out. Witness then left the office; and the next day he called again, Mr. Ewen was not in. The following day witness thinks he called again, and saw Mr. Ewen, and asked him what arrangement could be made with Mr. Paulding. He said Mr. Paulding had got the lease. "Why," says I, "Mr. Ewing did you not tell me that he would have to get it through your hands?" He replied that Mr. Paulding had been to the corporation counsel and got it himself, and got it signed by the mayor himself. Witness asked where corporation counsel lived, or had his office, as witness was not acquainted with Mr. Cowdrey then. Witness left street commissioner's office to see if he could find out how Mr. Paulding got possession of that lease. Before witness got out of the building he met Mr. Cowdrey; witness did not know him, but seeing him make his way towards street commissioner's office, witness followed after him, and found it was Mr. Cowdrey; and asked him how Mr. Paulding got that lease. He said he could not tell, but that Mr. Paulding was entitled to it. Witness told Mr. Cowdrey that was a quick way of taking a man's property. He said witness could afford to lose it. And that expression has stuck in witness's crop ever since then, and he well remembers it. Witness left the office then. Witness called on Mr. Mollan, his neighbor, after that, and told him how the witness had been defeated in attempting to stop that lease, in order that he might be more cautious on his part. Witness compromised with Mr. Paulding, ***and finally paid him two hundred dollars.*** The lot of witness was assessed for five dollars. Witness paid $1,000 for the vacant lot, and with the buildings witness put on it is worth $2,000; and rents for the annual sum of $200.

RICHARD MORTIMER.

Cross examined by counsel for the corporation.—The lot was on Twelfth street, next to stable of Mr. Gillespie. There were other lots on Twelfth street, that Mr. Gantley owned, besides that of witness's. There was no other lot but this on Twelfth street, which had belonged to Mr. Gantley, assessed for sewer in Thirteenth street. Witness does not think Mr. Paulding was an alderman at the time of that purchase; witness never knew he had been an alderman; but on enquiry, ascertained he had been assistant alderman of the eighth ward. Mr. Paulding bought witness's lot for nine years. When witness first heard of his purchase, the time for redemption had actually expired. Witness understood that in point of time, Mr. Paulding was entitled to his lease when witness first heard of the assessment. Witness had no conversation with, nor left any word at the office of the counsel for the corporation, before the lease was delivered to Mr. Paulding. Witness could never find out how Mr. Paulding got that lease. Witness asked the counsel for corporation, and he replied he did not know how he got it, but that he was entitled to it. There were very few words between the witness and said counsel; witness thinks he has stated all the words he heard him say. The said counsel did not go with the witness, to the street commissioner's office. It was in the hall of the hall of records, that witness first saw the corporation counsel, and he followed the counsel into the street commissioner's office. The conversation alluded to, was in that office. The remark of the said counsel, was not that "it was fortunate the witness could afford to lose it." It was rather sharply said; it was that the witness could afford to lose it. The witness left the office with considerable feeling. Witness thinks Mr. Ewen was present at the time of that conver-

sation. The witness cannot say whether the lease was endorsed as approved by the counsel, he had the lease at home, and will produce it. RICHARD MORTIMER.

September 30, 1841, the witness, Richard Mortimer, produces the lease referred to in his annexed testimony. And upon the inspection of which, it appears that said lease is not endorsed as having been approved of by the counsel, which is customary, before the delivery of such leases to the purchasers. It also appears by inspection of said lease, that the premises were assessed to James McIllvaine. It is dated December 20, 1840, and signed by Elijah Purdy acting mayor, and under seal of the city.—*Senate Doc. No.* 100, *p.* 56.

—

(Senate Doc. No. 100, p. 86, 87.)

November 1, 1841.

The committee met pursuant to adjournment, at the Clinton Hall in the city of New York, upon notice of the chairman.

Present, Mr. FURMAN,
Mr. VERPLANCK, and
Mr. SCOTT.

Alexander T. Stewart being called on the part of the memorialists, and duly sworn, says he is a citizen of New York; on or about the 25th of February last, received a letter signed T. Valentine, corner of Grand and Governeur streets, stating, that understanding he was owner of a stable No. 181 Ninth street, between Second and Third avenues, on the south side; that property had been sold for assessment for Avenue C. sewer, and time for redemption had passed and lease had been given to purchaser, which was the first intimation witness had of any assessment on that property, which property was in the sole occupation of witness from 20th September, 1836, to date of letter; the assessment appears, by lease to purchaser, to have been confirmed May 31, 1837; no demand was ever made on witness for that assessment, and no notice did he ever receive until said letter from Valentine. No other building on said lot but the stable. The amount of the assessment for which the property was sold was $3.94, as appears by the lease; the whole amount the property was sold for was $16.37, for the term of three years; ***witness paid Valentine 175 Dollars to transfer his said purchase to the witness***; witness resides now, and when the assessment was made, upon Eighth street, and paid an assessment for same sewer on his house in Eighth street.

ALEX. T. STEWART.

—

James S. Carpentier, having been called upon the part of the memorialists, and duly sworn, says that he is a counsellor at law in the city of New York; while examining papers in the office of the clerk of the common council and of street commissioner, in June, 1840, for the purpose of obtaining necessary information to file a bill on behalf of the owners of property on the island of New York, on Irving Place and Seventeenth street, witness found that resolutions had been introduced and passed for regulating and grading Seventeenth street, between Third and Fourth avenues, and setting curb and gutter stones; that an ordinance had passed thereon and a contract made by the street commissioner with George A. Furst to do the work previous to December 1, 1837, and which by a report appeared to have been done before that time. The assessors named in the assessment roll were the street commissioner, **Mr. Ewen, Jacob Warner and M. D. L. Gaines; from witness' examination he could not ascertain that they had taken any oath for the faithful performance of their duties as required by the one hundred and seventy-fifth section of the Act of April 9, 1813, at any time previous to entering upon the duties of that appointment. They made their report as assesors upon that matter on or about December 1, 1837**; the assessment was confirmed and approved by the mayor, December 6, 1837, as appeared by the paper; witness found a printed oath signed by those assessors and purporting to have been sworn on January 6, 1838, either before the mayor or recorder, which the witness does not now recollect.

It was charged in the bill prepared by witness as counsel, that the assessors never took any oath until after the expiration of more than one month after all their duties as such assessors had been performed, and a month after the consummation of such assessment. The answer of the corporation to that bill was sworn to by Mr. Ewen, the street commissioner, and admits the fact which the witness has above stated as to the want of an oath and all the matters charged in the bill, except that the bill charged that an ordinance did not exist, and it was afterwards found to be in existence.

J. S. CARPENTIER.

Cross-examined by the street commissioner on the part of the corporation.—If the assessors had complied with their duties faithfully in making such assessment under their general oath of office as officers of the corporation, it would not probably have induced them to perform their duties with more faithfulness, by taking such additional oath; but the law requires them to take such oath as assessors previous to entering upon their duties as such.

J. S. CARPENTIER.

Direct examination on the part of the memorialists resumed.—The bill charged that no estimate or assessment had been made previous to the work having been done; which fact was admitted by the corporation in their answer, and that it had not been the practice to make such estimate and assessment previous to the work having been done. The contract contained a provision that the work should not be paid for until the assessment should be made and the moneys collected, and all interests accruing on such assessments should be deemed to accrue for the benefit of the contractor and paid over to him; and witness regards this provision as operating injuriously on the interests of the owners of real estate, as contractors would not engage to do the work on such favorable terms where they were compelled to wait a long time for their pay, as they would if they were to be paid when the work should be completed; and this allegation was substantially charged in said bill sufficiently so to appear as one of the matters of complaint. And such has also been a frequent matter of complaint, as the witness has heard from others. J. S. CARPENTIER.

—

John A. Schuyler having been called on the part of the memorialists, and duly sworn, says: That he resides in the city of New York; that his father's estate is the owner of a piece of land on corner of Twenty-eighth street and Seventh avenue in said city; the deed is for 50 feet by 100 feet. They have examined the property, and ***find there is but thirty-seven feet six inches instead of the fifty feet,*** the other portion being probably ***cut off*** in the street. The deed is dated in the year 1814. That piece of land is assessed for opening Twenty-eighth street, $1,037 5-100ths; and for opening the Seventh avenue, $209 98-100ths. Those assessments have not been paid, and are now drawing interest and have been for some time as witness believes. The said street and avenue are ***not actually opened,*** or were not when witness was there last summer. The heirs have made up their minds to let the piece of land go, as *THEY DO NOT CONSIDER IT WORTH THE ASSESSMENTS* with the interest. It is assessed as 58 feet 10 inches. J. A. SCHUYLER.

Cross-examined by the street commissioner on the part of the corporation.—Witness does not know who the commissioners of estimate and assessment were. Witness, when he heard of the assessments, supposed there was some mistake about it and went to the collector, and he referred witness to the street commissioner's office; and he went there, ***and some person in that office took down a map and then told witness*** that *THERE WAS NO HELP FOR HIM.* He does not know who it was he saw in that office. Witness may have signed a petition to the common council, but he does not now recollect. J. A. SCHUYLER.

[The commissioners names in Twenty-eighth street appeared by document to be C. Dusenbury, Thomas Dolan and John Colvil. This is one of the streets opened under the resolution of Holden up to and including Forty-second street.]

Direct examination on the part of the memorialists resumed.—Has understood from the auctioneer who put up that property for sale for that assessment, that he offered it *FOR ONE THOUSAND OR TEN THOUSAND YEARS*, which witness does not now recollect, and could not obtain a bidder. That sale was the sale previous to that now making by the corporation, which was about a year ago. It is now advertised again for sale at the present sale. J. A. SCHUYLER.

Adjourned to November 8th, instant at 7, P. M.—(Sen. Doc. No. 100, p. 115, 116.)

—

Andrew Warner, having been called on the part of the memorialists, and duly sworn, says—That he resides in the city of New York, and is assistant clerk of the county of New York; he was one of the commissioners of estimate and assessment in the opening of

brance would be paid if notice was given previous to the delivery of deed, or of a certain day which had not passed. Witness took with abstract of title, deed and other papers, with street number of property, containing a full description of the premises. Witness's client went with him. They made the enquiry whether any assessments remained unpaid or there were any incumbrances on that property in that office, of the person in office who was pointed as the proper person who appeared to have charge of the books and maps, and who exhibited them and examined them; after being there half an hour or more, measuring over the map and looking at the book, they were informed there was nothing against the premises in question. It was necessary to make this inquiry of persons in the office, because they have numbers of their own differing from those of the streets, and marks of their own which will render it difficult for counsel to find very readily, whether premises are incumbered or not. And on another occasion witness asked for a certificate from that office, that property was not incumbered by assessment, and they refused to give it, saying it was not customary or usual to do so; which the witness regards as a great grievance, as they have charge of the maps and books, and have numbers and marks of their own. After receiving the aforesaid information and relying upon it, they called at the master's office, paid the money, between $4 and $5,000, and got their deed. Shortly after that, they received information that the house had been sold for twenty years, for an assessment remaining unpaid, and that the time for redemption had expired; but fortunately that the lease to the purchaser had not been delivered. He remarks it is fortunate, as the delivery of the lease covers all previous defects in the transaction. In this case there were several gross errors which the witness will specify. Not deeming it prudent to make any application to any of the officers of the corporation, witness filed a bill in chancery, against the corporation, praying among other things for an injunction restraining the delivery of the lease, which was granted, and served on the purchaser; but thinks not on the mayor. It appeared that the property was assessed to the wrong person, and that the affidavit required by law, of the service of notice, &c., was irregular and informal. The assessment witness thinks, was about $300, to the best of his recollection. The annual rent of the property was, he thinks, $600; there was a front and back building on the lot. The purchaser became a little frightened when served with the injunction and subpœna, judging from his appearance; came to the house of witness's client, and after a long conversation compromised for $500, perhaps a little more, he thinks it was $500. He then assigned his rights to witness's client. Witness thinks the assessment was about Chapel street. J. B. PURROY.

The Act of May 25th 1841, it will be seen extends the time of redemption six months beyond the two years previously allowed by law for all such lands, &c. as are occupied. The 42 per. cent is in lieu of all charges and all interest accruing after the sale.

MORTGAGEES

By a careful perusal of these eight pages, will see the necessity of applying for the repeal of the act passed May 6, 1841, and the two first sections of the act passed May 25, 1841, leaving the law of 1840 in full force, which affords security to mortgagees against any sale for assessments or taxes.

The present Numbers, 10, 11 and 12, contain in all fifty-two pages; of these we publish fifteen hundred, and we also publish one hundred additional of the first eight pages for the immediate perusal of those interested as mortgages, &c., with a view to call public attention to the necessity of **an immediate repeal** of the present law as to the city of New York, **leaving the law as it was passed in 1840** as to mortgagees, and making such a change as to that of owners of **unoccupied lands** as will give all needed protection. The value of lands depends on the sacredness of title, and the security of loans depends upon the sacredness of private property and the notice of all proceedings which may affect the title to the land and thereby affect the security upon such lands.

Persons who have need to obtain loans have also need of these guards to facilitate, and those who grant the loans require these provisions.

The Municipal Gazette is circulated GRATUITOUSLY. The desire is to give information to gentlemen in our own immediate community —to eminent men throughout the civilized globe—that, in the language of that distinguished American lawyer, GEORGE WOOD, OF OUR CITY, "*mind may influence mind.*"

These humble sheets are forwarded to all distinguished Jurists in this country and in Europe, and to several of the great public Libraries, and to distinguished individuals at the head and in the administration of the civil governments throughout the world. Our object is the greatest good to the greatest number. It is well said that the best of men have need to be put in remembrance of what they already know.

WILLIAM M. HOLLAND.

This worthy and accomplished citizen, who has for some time been one of the legal advisers of the Anti-assessment Committee, has recently returned from the island of St. Cruz, where he has been staying some months for the benefit of his health.

We are pained to say that his health is not improved.

Mr. Holland bids fair to become one of the brightest ornaments of the American bar, and should good health return to him, will fill an important sphere in our community.

With the Anti-assessment Committee, the casual opportunity of an interview with him, was so convincing, that it was his introduction to the place he filled with so much credit to himself and so much advantage to the people—for it is the public's interest we serve—and such are the strongest recommendations which any individual can offer. The surest commendation to employment is the ability to discharge the required duties or services.

(J. B. Purroy's examination continued.)

Cross examined by counsel for the corporation.—Witness don't know how long before the sale was made by the master, that Chapel street was widened. Witness knew Chapel street had been widened, and particularly called the attention of the officers of the corporation to that matter of Chapel street. When witness goes to the register's office, if his client requires him to examine the title, he examines the records himself; whether he makes this personal examination depends upon various circumstances. Witness has found errors in the certificates of the register, one recently where a certificate was given of no mortgages, and there was a mortgage, which error was made by one of the best examiners. This search was made at witness's request in a hasty manner, but the examiner called the next morning and stated that he had made an error, and corrected. Witness in the register's office does not depend entirely on the clerk's examination, but also examines himself. He pursued the same course in the street commissioner's office, and looked over the books and maps at the same time that the clerks went over them. It would be impossible for a person without very minute and extensive knowledge, to make such examination in the street commissioners office. If the witness was then showed the map of Anthony, and Chapel street, and it was accurate, he thinks he could have pointed out the lot, and provided they would show the map, which they would not always do, *for they are at times quite bearish; they point out to a parcel of assessment maps of various parts of the city, and say there are the maps, look at it. It is not the complaint alone of the witness, but of the profession generally. Mr. John Anthon has also agreed with the witness on this subject of complaint. It is the most difficult office in which to make examinations, and should probably be the easiest, if things were properly organized.* To answer particularly, whether witness asked for the Chapel street map, at this distance of time, he cannot do. He went there and asked whether there were any assessments or incumbrances on that property, and he called their attention especially to Chapel street, as he feared that; and they showed him books and maps which they said contained all the information, and they examined the same with the witness. The lot in question was pointed out upon some map, it had a different number from the street number; witness did not ask particularly for the assessment book of Chapel street, he did not go upon any particular inquiry in the first place. The witness cannot recollect whether he examined the assessment book for the number of property he found upon the assessment map, and he examined over all the books which were shown to witness upon his inquiry whether there were any assessments upon that property for Chapel street, and he was told there were no assessments upon the same, after an examination of about three-quarters of an hour. Witness does not recollect whether he found the map number in any of the assessment lists, if any were shown to him. Thinks it was in 1839, or 1840, that this examination was made, but cannot recollect which. Witness believes the clerks in the office of the street commissioner receive no fees for such services, witness never paid any. Witness does not now recollect what the defect in the affidavit was, but the same is set forth in the bill now on file. J. B. PURROY.

Adjourned to Sept. 28th, inst. at 10, A. M. —(*Senate Doc. No.* 100, *page* 55.)

September 27th, 1841.

The committee met pursuant to adjournment. Present, Mr. FURMAN,
Mr. VERPLANCK, and
Mr. SCOTT.

James Gillespie being called, and duly sworn on the part of the memorialists, says—the witness is owner of a lot on the north-east corner of Twelfth street and Broadway; has owned it for eight years. On Twelfth street, it is 90 feet, on north-east side it is 120 feet, with stable on rear in Twelfth street. Witness was absent a year ago last summer in Europe. On his return was told by a neighbor that the rear of his said lot with the rears of other lots had been sold for an assessment for a sewer in Thirteenth street. Witness was very much surprised, having paid an assessment for that sewer and having a receipt for the same. Witness was told in the street commissioner's office, that he had only paid the assessment on that part of the lot fronting on Broadway, that the rear part of the lot had been a separate assessment, and of which last assessment the witness had no notice. The witness went with Mr. Wallis, the lawyer, to the street commissioner's office. Mr. Ewen was not present, some of his subordinates were, and they told witness and Mr. Wallace, that they ought to know what assessment they had paid for, and that they should have come up to the office and looked at the map. They subsequently saw Mr. Ewen; he said it was a hard case, and he would afford them every facility to obtain redress; witness asked whether the lease had been made to the purchaser, and was told it was not; and then witness and Mr. Wallace said they wanted time to have the case laid before the common council. Also, called on Mr. ———, and heseemed to give them assurance that he would grant all the facilities in his power, to obtain justice. They also called on the acting mayor, Mr. Purdy, and stated the case to him, and he said he would stay signing the lease until they had had a hearing before the common council; and he stated that this lease had to be returned to Mr. ———, the counsel for the corporation, previous to its delivery. Upon which, the witness apprised Mr. Purdy that they had seen Mr. ———. They rested then secure, supposing that they were fortified on all points, until the action of the common council should be had. In the meantime witness called on the chairman of that committee, alderman Benson, and he examined the witness and Mr. Mollan who was concerned in the same assessment, and they were led to believe they would have a report in their favor. During this time, while the matter was thus pending, the witness understood that the purchaser, Mr. ———, had obtained his lease, notwithstanding all these promises. This —— ——— is a contractor under the corporation. After having understood that the lease was thus delivered, the witness called upon Mr. Purdy, and complained to him of the act. Witness afterwards called on alderman Benson, and told him that the attorney of Mr. ——— had written to him and told him that a suit would be commenced unless peaceable possession was given of the premises thus purchased by said ———, and urged the necessity of the committee reporting immediately, whether for or against the petitioners; and that if they were to pay the purchaser what he demanded, the sooner he knew it the better; and that witness expected a report, in not to exceed one week. Alderman Benson told witness he considered that a threat, and he would not report at all. Witness told him he did not intend it as a threat, he merely wanted to show him the urgency of the case, as they were threatened with a law-suit, and wanted the matter settled so far as the common council were concerned, and that they might make the best bargain they could with the purchaser. No report was ever made by the chairman of that committee or by the committee, and the witness has settled with Mr. ——— the purchaser, under that assessment sale. The amount of the assessment was ten dollars for each lot, which they paid. ***The witness paid to said purchaser One hundred and twenty Dollars.*** The ordinary assessment for city taxes, was for the whole of witness's said property, one lot, and was assessed in the witness's name. It was bought as one lot, and always taxed as one lot, and witness could not know it was cut in two, as two lots. It was assessed to a Mr. McIllvaine, who never owned it or any part of it. The premises were sold for said assessment for ten years. Witness understood the time for redemption had expired some months before he first heard of said assessment; in fact he never heard of it or of said sale, until the purchaser called for possession. Witness receives for his said stable, $125 per annum. And he would value such stable and premises at $2,500. The witness believes the assessment and expenses at the time of sale, was from $18 to $22. JAMES GILLESPIE.

Cross examined by counsel for the corporation.—The rear of the two lots of witness and his neighbor Mollan, were occupied by two stables; the stables were adjoining each other, but separate, as the dwellings were on Broadway. There were nothing but stables on the rear of the lots. There was a partition fence between the two lots from front to rear. There was a fence across the rear of the two lots between Broadway and the stables, with a door leading from the yard of each house to the stables; there is a space between the fence and the stables. That fence across said lots, witness and his neighbor Mollan put up on their respective lots after their purchase. Standing on Twelfth street, a man cannot see the doors leading through those fences across the said lots, because the fence on Twelfth street is too high for any man to see over it. Witness owns the corner lot, it is 17 feet 10 inches wide in front, on Broadway, it is wider in rear than in front, and longer on north than south side. Stewart Mollan owns adjoining lot, it is 25 feet 1 inch wide on Broadway, by 120 feet deep, one stable is on rear of witness's lot, and one on rear of Mollan's lot. Witness did not pu

To the Honorable the Legislature of the city of New York:

Your petitioner a citizen of the city of New York, states that some years since he purchased a lot of ground in Fourth street, near the Second avenue, in said city, upon which he erected a three story brick house, in which he has since resided with his family.

In the month of February, 1840, a person by the name of Reed, called on your petitioner, at his said house, and after many preliminary remarks, stated to your petitioner that he owned the said house, that he had purchased it at a corporation sale for an assessment, for the term of years, and wanted possession.

Your petitioner stated to him that he had paid all the assessments on said property which had ever been demanded of him by the corporation, and that he would look into the matter, Your petitioner on enquiry and examination, ascertained that his said property had been assessed for building a sewer in avenue C., a great comparative distance from his premises, the sum of $5,98, that it had been described by a fictitious number, and not by the true street number, was assessed in the name of "***Reed***," and no christian name mentioned, and so advertised, to be redeemed, in one newspaper of limited circulation, which he never saw; and had he seen it, would not have supposed it was his premises.

Your petitioner, also found, that the corporation had made ***Sixteen dollars and eighty cents cost,*** on this assessment, which was made up in the following manner, viz: four dollars for the lease, three dollars for the certificate, ***and Five Dollars for advertising,*** and four dollars and eighty cents interests on these costs.

Your petitioner is informed that the State Comptroller charges eighty cents for the same services in which the city corporation officers demand sixteen dollars and eighty cents.

Your petitioner further represents, that the said purchasers demand of him one half the rent of the house for the term of ten years or possession of the premises.

Your petitioner further states that the assessments and all the proceedings in relation to said sewer are illegal, but that the Supreme Court refuse to give relief in these matters, on account of the inconvenience it will give the corporation of the city of New York, and that the Chancellor is unwilling to interfere for the same reason.

Your petitioner represents that such a state of things is injurious to the value of real estate in the city of New York; injurious to titles, and a great public evil and requires immediate redress.

Your memorialist asks that his case may be investigated, and that he may be protected in his possessions, and saved from vexatious and expensive litigation, and that the corporation of the city of New York may be required, in all cases, to give personal notice of the imposition of assessments, to both owners and occupants, and that the fees of advertising may be limited by law to the price charged by the Comptroller of the State for similar services.

And your memorialist, &c.,

DANIEL VAN REED.

(Senate Document, No. 100, page 316.)

(Senate Doc. 100, pages 322–'24.)

Petition of Martha Amory for relief from assessments.

To the Honorable the Senate of the State of New York:

The petition of Martha Amory, of the city of New York, widow, respectfully showeth; that her late husband, James Amory, deceased, was the owner of certain real estate in the 12th ward, of the city of New York, lying adjacent to the Sixth and Seventh avenues, between, the income and use of which, he gave to your petitioner, for the support of herself and family.

That since his death, and sometime in February, 1835, an application was made to the corporation of the city of New York, by certain persons not being a majority of the land owners, on the line on the proposed improvement, to have the Sixth avenue opened, and worked up to One hundred and twenty-ninth street, in the said city, and that in June, of that year, the said corporation adopted a resolution to open the said avenue, from Thirty-fourth street, to One hundred and twenty-ninth street, and commissioners of estimate and assessment were appointed accordingly.

That your petitioner did not take part in the said application ***and had no knowledge or notice thereof, or of the proceedings thereupon until after the report of the*** *Commissioners had been confirmed by the Supreme Court.*

That in adopting the said resolution, the said corporation acted arbitrarily, and in direct violation of the seventh section of the amended city charter, and wholly neglected to publish the said resolution, in the city newspapers, and also omitted to call and publish the aves and noes, as by said charter, and by law, they are bound to do, and as ought to have been done.

That the said commissioners of estimate and assessment, caused a map to be made of the land supposed to be benefitted or damaged by the opening of the said Sixth avenue; that that part of the estate of the said James Amory, thereon known as lots Nos. 183, 184, 187, 188, 190, 191, 192, and 194, was assessed four thousand eight hundred and sixteen dollars, and lots Nos. 189, 193, and 197, awarded one thousand eight hundred and eighty-three dollars for said proposed opening.

That the said commissioners adopted a most unjust, unreasonable and arbitrary principle (if any at all was followed by them) in determining whether property was benefitted or damaged by said proposed improvement, and imposed on the estate of James Amory enormous and unnecessary assessments, for what has been of no advantage whatever.

That in illustration of their oppressive proceedings, your petitioner states that two of the said lots, i. e. Nos. 190 and 191 lie directly opposite of each other, on the said avenue, between Sixty-ninth and Seventieth streets, in front on the said avenue about two hundred feet, and are each assessed six hundred and one dollars, making more than one thousand dollars assessment for an imaginary benefit, in a distance of two hundred feet, and both sides of the street belonging to the same proprietor.

That lots Nos. 188, and 199, on the said avenue, between Sixty-eighth and Sixty-ninth streets, lie directly opposite each other, and

are equally affected by the said proposed opening; yet the said commissioners assessed upon lot No. 188, six hundred and three dollars for benefit, and awarded six hundred and one dollars to lot No. 189, for injury. That lots No. 192 and 193 are similarly situated, between Seventieth and Seventy-first streets, and an assessment of six hundred and three dollars is imposed on No. 192, and an award of six hundred and one dollars given to No. 193. And that in other respects, the proceedings of the said commissioners were grossly inequitable and improper.

That the expenses attending the said assessment amounted to ten thousand five hundred and sixty-eight dollars and seventy-seven cents; a sum vastly greater than could be honestly expended for the same; that the charge for the surveyor's bill alone, is almost twenty-five hundred dollars, and the counsel fees and court charges exceed three thousand five hundred dollars.

That all the expenses charged are enormously high, and your petitioner believes, that it will appear upon inquiry that the same has been fraudulently swelled and increased much beyond what would be a fair and reasonable compensation for the services rendered.

That the costs of such alleged opening of Sixth avenue were never taxed in the manner, and after giving the notice required by the act of April 20th, 1839, as ought to have been done.

That the said Sixth avenue has not been actually opened, although the said corporation have collected a considerable portion of the said assessments, and insist upon the payment of the aforesaid assessments, on the estate of the said James Amory, and have advertised said land for sale, to realize said assessment with interest.

That other, and equally unjust and fraudulent assessments have been imposed on the estate of the said James Amory, for the pretended opening of the Seventh avenue and Manhattan square; the whole amount of the sums assessed on the said estate being upwards of eight thousand dollars, and leaving at least **SIX THOUSAND DOLLARS TO BE PAID IN CASH**, after all the awards have been allowed, and for which large sum of money, your petitioner states, no adequate or corresponding benefit, indeed no benefit whatever, has resulted to the said estate.

Your petitioner further states, that she has been informed, and believes, that her only hope of relief in the premises, is by the interference of the Legislature; and she therefore prays your honorable body to take her case into consideration, and grant to her, and the freeholders of the said city, who may be in the same unfortunate condition with her, such relief as under circumstances will be right and proper.

And your petitioner as in duty bound will ever pray, &c. MARTHA AMORY.

New York, February 10, 1842.

(From Senate Doc. No. 100, page 313.)

Memorial of Garrit H. Striker, for relief from exorbitant assessment.

To the Honorable the Legislature of the State of New York:

The undersigned respectfully represents to your honorable body that he is the owner of landed estate upon the island of New York, which he inherited from his ancestors, which estate has been in the family about one hundred and sixty years, and has ever been and is now cultivated as a farm; this land is situated about four miles from the City Hall and borders on the Hudson river.

That in the year 1836 the corporation of the city of New York, upon the application of eighteen individuals who had no interest in the opening of the avenue, and who were not awarded or assessed therefor, ordered the Ninth avenue opened so far as to apply to the Supreme Court for the appointment of commissioners to make awards and assessment for the same Forty-fifth street to the B'oomingdale road, a distance of about three quarters of a mile. The application to the Supreme Court was ex parte and without notice to the owners of land on and near said avenue; the persons appointed as commissioners were either unacquainted with the property, or in other respects disqualified to make the proper assessments.

That your memorialist's property, designated on the map accompany this petition (and colored red) was assessed by said commissioners for benefit to the same in consequence of opening the said Ninth avenue, the sum of $3, 927 00; that, together with the costs and interest at the present time amounts to about $6,686 54, and for the payment of said sum it has been sold by said corporation for the term of 1000 years, a term equal to the fee.

That your memorialist's said property so assessed, does not any of it lie within two hundred feet of the said Ninth avenue; the Tenth avenue on one side, and the Eighth avenue on the other side being opened and worked, supersede entirely the necessity of the opening of the Ninth avenue.

And your memorialist further represents that Fifty-first, Fifty-second, Fifty-third and Fifty-fourth streets have also been ordered open by the said corporation, for which your memorialist's property on the westerly side of Ninth avenue and marked on the accompanying map in red and blue has been further assessed the sum of $1,109 96, besides costs and interest; this last assessment was over and above the land necessarily taken for said streets. That the whole of your memorialist's said lands have been sold for said assessments for the term of 1000 years; that the time of redemption of the first mentioned assessment has expired.

And your memorialist further represents that his said pieces of land have not in the least been benefitted by the said assessments, or the pretended opening of the said streets or avenue; nor would the same be benefitted if the said avenue and streets were actually opened and worked; and that the costs and charges of commissioners' fees, attorneys' fees, surveyors' fees and contingent expenses constituted a very large portion of the said assessments, which your memorialist represents was illegal and wrongfully assessed upon his said property.

Your memorialist further represents, that his said property would not bring more than the said assessments.

And your memorialist further represents, that the opening of said streets and avenue was not called for by any persons affected, or owning lands on said streets or avenue, or any person affected by the assessments, or for the use and convenience of the citizens of the city of New York, and that these enormous assessments amount to a total confiscation of his said lands, and it is believed that the opening of said avenue and streets will not be required or called for, for public use, for a great many years to come.

And your memorialist further represents, from the advice of eminent counsel who have examined the proceedings of the common council in the matter, that the actings and doings of the common council are in strict violation of law, and that an application has been made to the Supreme Court for a certiorari to review the proceedings of the opening of the Ninth avenue, and which was refused upon the ground that the granting a certiorari was entirely within the discretion of the court, and notwithstanding the corporation may have acted illegally and oppressively in the matter, the court would not interfere to set aside the proceedings of the corporation. That your memorialist has since instituted proceedings in the Court of Chancery for relief, which last tribunal withholds its aid, if it has any, for fear of transcending its jurisdiction, or for fear it may bring into said court such a multiplicity of business as to block it. And your memorialist further represents as an evidence of the fact, that the opening of the said avenue was not called for or necessary. He refers your honorable body to the document hereunto annexed, being Document No. 12, of the board of assistant aldermen, which contains the veto of the mayor.

And that the selling of his property for one thousand years, is equal to selling the fee simple absolute; and is in fact taking private property for public purposes, without "just compensation," and therefore a violation of the Constitution.

That such an excess of power by the corporation of the city of New York over the property of the citizens, is destructive to its value, and ruinous to its interests, possession, and owners, and a great and alarming public evil, requiring legislative interference.

Your memorialist has no doubt, that had the Supreme Court granted a certiorari in the case, the assessment would have been properly reviewed and corrected, and that entire relief would have been given in these matters. But your memorialist believes he could be restored to his rights, if the Court of Chancery could be vested with jurisdiction in the case.

Your memorialist now asks your honorable body to protect him in the right and possession

To the Honorable the Legislature of the State of New York:

The undersigned complains to your honorable body of various public officers, who, claiming to act under the authority of the laws of this State, have imposed the lands belonging to the heirs of the estate of the father of your memorialist, two several most arbitrary and extraordinary, and (if legal) most ruinous assessments for the pretended opening of streets and avenues, which together far exceed in amount the value of the land assessed.

Your memorialist states that one of the assessments is for the pretended opening of Twenty-eighth street, and a piece of ground cultivated as a garden, measuring 58 10-12 feet by 96 feet, is assessed for benefit the sum of *one thousand and thirty-seven dollars and five cents.*

The same piece of ground is assessed for the pretended opening of the Seventh avenue from Twenty-first street to One hundred and twenty-ninth street, the sum of *two hundred and nine dollars and ninety-eight cents*, making together the sum of *twelve hundred and forty-eight dollars and three cents.* The interest on these two assessments will increase the amount to about *fifteen hundred dollars.*

In order that your honorable body may be able to form an opinion of the reckless manner in which these assessments are constituted, the undersigned refers you to an official document of the common council of the city of New York, known as Document No. 45, of the board of aldermen of 1839, which states that the commissioners' fees for making the assessment for opening the Seventh avenue, are four thousand nine hundred and twenty dollars, which is for three commissioners $1,640 each, and at the highest rate allowed by law, which is four dollars per day, it is pay for four hundred and ten working days, near one year and one-third of a year.

The amount paid commissioners for room hire was four hundred and ten dollars, which is equal to the rent of any mansion on that part of the island for two years; two hundred and fifty dollars for clerk hire; thirty dollars for carriage hire, and forty-eight dollars for contingencies; three thousand nine hundred and seventy-six dollars and seventy-six cents for counsel fees; twenty-eight hundred and one dollars for surveyor's fees; and eleven hundred and fifteen dollars for collector's fees; amounting for fees to the enormous sum of $13,550 76 for services not worth a thousand dollars.

Your memorialist refers to the report of the commissioners on file in the clerk's office of the Supreme Court at Albany, for the amount of the assessments and awards, and the particulars of this assessment stated in avenue report as No. 44, and in the street report as No. 101½. The fees, &c. do not appear in the reports, but have been paid by the street commissioner as appears by the receipts in his office. No bills of items were rendered by the officers to whom these enormous fees were paid; the same were not taxed by any officer, or audited or approved, yet the corporation of the city of New York seek to collect these fees out of the lands assessed, and have advertised the same for sale therefor.

The undersigned states that no such services to the extent for which these enormous fees were paid, were ever rendered.

Your memorialist further states that the proceedings in the matter of Twenty-eighth street are also of an extraordinary character, and the fees proportionably exorbitant; and moreover, that no application was ever authorized by the common council of the city of New York to the Supreme Court for the appointment of the commissioners who made the assessment, and therefore the said proceeding is a high-handed usurpation of power, and one of the most dangerous character, and demanding of summary proceeding by the representatives of the people. The property of the citizens is not safe under such a state of things.

Your memorialist refers to the papers and documents laid before your honorable body by Anson G. Phelps, Esq. in relation to that portion of the island of New York in which Twenty-eighth street is located.

Your memorialist complains of the Supreme Court in confirming such assessments, and more particularly in their refusal of an application for a certiorari requiring the proceedings to be brought up for review.

Your memorialist complains that the Supreme Court urge as an objection, the doctrine of "public inconvenience." Surely such a doctrine ought not to be pleaded in such a case, to take the lands of citizens from them in such a way as here set forth, and then deny them any redress.

Your memorialist most respectfully asks that your honorable body will interpose, that the representatives of the people, who are the guardians of the commonwealth, may vouchsafe to him the safeguards of the constitution, which holds private property sacred even in cases of public necessity, and will not permit it to be taken from the owner but on making him just compensation; and that the Supreme Court may be required by the Legislature to review these extraordinary proceedings.

Your memorialist represents that the said street and the said avenue are in the same plight and condition as they were before the assessments were thus shamefully imposed.

Your memorialist insists that said piece of ground should not in the event of the actual opening of the said street and avenue, be assessed as many shillings for benefit as the assessments complained of are hundreds of dollars.

Your memorialist complains of the corporation of the city of New York for attempting to enforce the collection of such an odious and atrocious assessment, and begs that the Legislature will not permit such an act to be proceeded in.

This assessment is not alone an error of judgement in the excessive amount of the assessment, but it is a seizing of the lands of a citizen and converting the same to the use of public officers in a most extraordinary manner. Such a proceeding will scarcely find a parallel in the jurisprudence of any government on the habitable globe.

This property is worth very little more than double the amount of the interest of the assessments.

Your memorialist states that other parties

who have suffered from these same proceedings made application to the Chancellor for relief, but that officer has refused to interfere, on the ground that inconvenience will result to the corporation.

Your memorialist submits that the position assumed by the Supreme Court in this case, is exercising the legislative powers of this State vested in the Senate and Assembly.

And as in duty bound, &c.

JOHN A. SCHUYLER.

—

The following is a certified copy of one of the rules entered in Street cases in the Supreme Court, as certified by the clerk, evidencing that these important doings, involving hundreds of thousands of dollars, need some more systematic mode of proceeding:—

(From Senate Doc. No. 100, *p.* 312.)

IN SUPREME COURT,

JANUARY 4, 1841,

In the matter of the application of the Mayor, Aldermen and Commonalty of the city of New York, relative to opening Twenty-ninth street from the East river to the Hudson river, in the Sixteenth ward of said city.—R. Emmet, Attorney.

On filing the report of John Leonard and Lovell Purdy, two of the commissioners of estimate and assessment, duly appointed in the above entitled matter, made to this Court and signed by them, and bearing date the 18th day of May, 1840, which said report is in the words and figures following, to wit: (Here take in report.) And on filing the additional report of said two commissioners of estimate and assessment, made to this court and signed by them, and bearing date the 3d day of June, 1840, which said additional report is in the words and figures following, to wit: (Here take in additional report.) And on filing the usual affidavits of publication of notice of this motion; and on filing the usual affidavits of publication of notice of this motion; and on filing certain objections to the confirmation of said report; and on motion of Mr. Emmet of counsel for the mayor, aldermen and commonalty of the city of New York; and after hearing counsel opposed, It is ordered that said report of estimate and assessment be and the same is hereby confirmed. (Copy.)

JNO. KEYES PAIGE, Cl'k.

—

(From Senate Doc. No. 100, *p.* 85.)

October 14, 1841.

At the request of the committee of citizens on the assessment laws of the city of New York, this committee met this day at the call of the chairman, in the committee room of the Senate chamber in the city of Albany, having previously, October 10th, inst., written to said committee of citizens, and directed them to notify the mayor of the city of New York and the counsel for the corporation of said city of this meeting.

Present, Mr. FURMAN,
Mr. VERPLANCK, and
Mr. SCOTT.

John Keyes Paige being called and duly sworn on the part of the memorialists, says, he is clerk of the Supreme Court in the city of Albany. Witness produced the report and additional report of the commissioners of estimate and assessment in the matter of opening Sixth avenue in the city of New York, which was filed in his office June 6, 1839, and appears by endorsement to have been confirmed on that day. It appears by affidavits annexed to said report, that notice of presenting said report for confirmation was published daily in the New York Evening Star and Evening Post, respectively, commencing on the 18th day of May, and continuing to the 3d day of June, 1839 inclusive, Sundays excepted; and in the New York Times and Commercial Intelligencer daily, from the 20th day of May to the 3d day of June, 1839 inclusive, Sundays excepted. There does not appear to be any evidence that said notice of presenting such report for confirmation was published in handbills, annexed to said report, or additional report. Witness never knew any bill of items of the expenses in opening streets or avenues, or public squares in the city of New York, presented to the Supreme Court for taxation when the reports of the commissioners of estimate and assessment were presented to that court for confirmation, though it is possible when such confirmation was opposed, such bills of items may have been presented to the court with the the report and other papers, and the judge may have passed upon them; but the witness never saw any such bills, and none have fallen under his observation in his office. There is an endorsement on this report to the following effect: "Deposited in county clerk's office 18th May, 1839."

There is a charge upon each opening street, avenue or square, for the extended rule, including the whole report of the commissioners of estimate and assessment, with a certified copy thereof, which extended rules have not yet been entered in many cases, and in making witness' return to the Comptroller he would not include the fees for the prospective services in making out such extended rule and the certified copy thereof.

Witness produced the reports of the commissioners of estimate and assessment in the opening of the Seventh avenue from Twenty-first to One Hundred and Twenty-ninth street, which is on file in his office, filed and confirmed February 9, 1839. There does not seem to be any endorsement upon it of having been filed in the county clerk's office in New York. Witness never knew a case of opening a street or avenue where the proof of publication did not accompany the presentation of the report; such proof is not attached to this report, but witness has no doubt it is upon some other paper in his office. There is no abstract or summary accompanying said reports so far as the witness has examined the same. The report of estimate and assessment in the Seventh avenue contains, as numbered, eleven hundred and ninety-six pages. Sixth avenue about nine hundred pages.

JOHN KEYES PAIGE.

Upon closing the examination of the preceding witness, John Keyes Paige, the committee adjourned to meet at Clinton Hall, in the city of New York, on such day as shall be fixed by the chairman thereof in his notice to the members of said committee.

From printed proceedings of the Board of Assistants, vol. 16, page 341.

November 9th, 1840.

BOARD OF ASSISTANTS.

By Mr. Adams—The following resolution, to wit:—

Resolved, That the counsel of the Corporation, in the matter of opening the Seventh avenue, from Twenty-first street to One Hundred Twenty-ninth street, furnish this board with a bill of the items constituting his bill of Three thousand nine hundred seventy-six dollars and seventy-seven cents, counsel fees and court charges in said proceedings; also that he furnish a bill of the charges of the commissioner of estimate and assessments, and the surveyor's bill in said matter, and that he furnish said papers at the next meeting of the board. Adopted.

—

(From Senate Doc. No. 100, p. 278.)

New York, November 12, 1840.

To WILLIAM ADAMS, ESQ.

Asst. of the Fifth Ward.

SIR—I have received a copy of a resolution offered by you and passed by the board of assistants on the 9th inst. requiring me to furnish that board with the items of the bill for counsel fees and court charges, in the matter of opening the Seventh avenue; also a bill of the charges of the commissioners of estimate and assessment and the surveyor's bill in the same matter. I had determined to send back the copy of the resolution, enclosed in a short communication, to the president of the board of assistants, respectfully denying the right of that board, or of the common council, to require any such information from me; but being informed that the resolution was not drawn by you, and believing that you might not have well considered its fitness or propriety, when you introduced it, I have thought it due to you to make this personal communication to yourself on the subject.

A very brief statement will, I think, satisfy you that as a matter of *strict right* the common council are not entitled to make any such demand; and I can hardly suppose that any member of that body could desire that its aid should, *without right*, be made subservient to the investigating spirit, however laudable it may be deemed, which may have suggested this resolution in any other quarter.

The proceedings for opening the Seventh avenue, were conducted and concluded under the act of April 9th, 1813, the 189th section of which provides that the commissioners of estimate and assessment (who are appointed by, and are the officers of the Supreme Court,) shall be entitled to receive the sum of not more than four dollars for each day actually employed by them in their duties, besides all reasonable expenses for maps, surveys and plans, clerk-hire and other necessary expenses and disbursements. The law directs that these expenses shall be paid by the corporation, and included in the assessment, by the subsequent collection of which, it was intended that the corporation should be reimbursed. There is no provision in this act for the taxation of these expenses, or for regulating them by any other rule than the discretion and good faith of the commissioners who are authorized to incur

avenues, and about five miles from the City Hall;

That your memorialist, Joseph Alexander, owns a piece of land of about two acres, on Seventy-ninth street between the Ninth and Tenth avenues, and about five miles from the City Hall; and

That your memorialist, John H. Tallman, owns a piece of land of about two acres, between the Sixty-seventh and Sixty-ninth streets and between the Seventh avenue and the Hudson river, and near five miles from the City Hall.

That on the 18th day of April, 1836, Ald. Benson, of the Second ward of the city of New York, offered a resolution in the board of aldermen to open a public square called the Manhattan square, on the island of New York, between Seventy-seventh street on the south and Eighty-first street on the north and the Eighth avenue on the east and the Ninth avenue on the west, which forms a space of fifteen acres of land; that said resolution was pretended to be adopted by the common council, and received the sanction of the mayor on or about the 4th day of April, 1836. That in pursuance of said proceedings of the common council, an application was made to the Supreme Court for the appointment of three commissioners to make a just and equitable estimate and assessment of the benefit and injury in consequence of the opening of said square; that said commissioners did make a report of the estimate and assessment, which was confirmed by the Supreme Court, on an *ex parte* application, on the eleventh day of March, 1839; that said commissioners estimated the value of the land so taken for the said square at $47,449 00, and which was assessed by them, on your memorialists and others owning lands in the vicinity of the said square, together with $7,100 52, being for costs and expenses in the making of said estimate and assessments, as follows, to wit:

Commissioners' fees, - -	$1,582 00
Room hire, - - - - - - -	186 00
Carriage hire - - - - - -	3 00
Clerk hire, - - - - - - - -	20 00
Surveyors' fees, - - - - -	3,070 39
Attorneys' fees, - - - - -	1,449 13
Collectors' fees, - - - - -	800 00
	$7,100 52

The whole amount of the said assessment is $54,549 42.

That your memorialist, James McBride's said property, has been assessed for the opening of the said square the sum of $790 50, which is more than the value of the land;

That your memorialists, L. and V. Kirby's said property has been assessed for the opening of said square, $1,674 50;

That your memorialist, John H. Tallman's said lands have been assessed for the opening of the said square the sum of $270 00; and

That your memorialist, Joseph Alexander's said property has been assessed for the opening of said square the sum of $418 00.

And your memorialists further represent, their said lands are now and have been for many years used for farming and grazing purposes, and are not in any way benefitted by the pretended opening of the said square.

That said square is not opened, or any thing done therein, since the confirmation of said report, except an attempt on the part of the common council to force the collection of the said assessments.

And your memorialists further represent, that according to the natural and legitimate course of improvements, and the growth of the city, their said lands cannot be benefitted by an actual opening of said square in fifty years to come. That said lands so taken for a public square, are now an open common in connection with many hundred acres adjoining the same and of the same quality.

That said land so taken for said square presents a very haggard, rough and uneven surface, and is a field or ledge of rocks, and is unfit for a public square or any other purpose, without a much greater sum being laid out upon it than the land is worth; that the said land is not worth for farming or any other purpose as many hundred dollars as the owner was paid thousands, and so assessed upon your memorialists and others.

That your memorialists further represent, that said commissioners acted without proper judgment, or with great partiality, in the making of said estimate and assessment, and in the allowing of said fees and costs; and that from the advice of respectable counsel who have examined the proceedings of the common council in the matter, they believe the proceedings in the said opening of said square are illegal and void; and that your memorialists have caused an application to be made to the Court of Chancery for an injunction restraining the corporation of the city of New York from selling their said property, which had been advertised for sale for the payment of said assessments, which application the Chancellor denied, on the ground that the proceedings of the common council being void, he had no jurisdiction in the matter, not even to relieve them from the cloud which the pretended although illegal proceedings of the common council had cast upon their rights and property.

And your memorialists further represent, that almost every tribunal in the State having jurisdiction in the county of New York have been applied to for relief in assessment cases, and while the different courts have held the proceedings of the common council illegal, each court has shrunk from the responsibility of the case, and declared that some other tribunal entertained the proper jurisdiction. Your memorialists believe that the only court which could give the adequate relief in these assessment cases, is the Court of Equity, provided it is or could be vested with proper jurisdiction.

Your memorialists now appeal to your honorable body for relief, and to protect them in their rights, possession and property, so guaranteed to each citizen by the constitution of the State, and for such other and further relief as the Legislature in their wisdom shall see fit to grant.

And your memorialists shall ever pray, &c.

James McBride, John H. Tallman,
Joseph Alexander, L. & V. Kirby.

Dated New York, February 4th, 1842.

(From Senate Doc., No. 100, page 87 to 89.)

Philip Milledoler being called on the part

of the memorialists, and duly sworn, says that the witness now resides in the city of New York, and is a minister of the gospel; that he has been charged on his property a series of assessments, commencing about the year 1837, which is a small tract of land at Harlem, in the city of New York, about thirty-three acres in all, bounded by Harlem river, opposite Barn Island; it is and has been rented to a gardener for many years, for $200 dollars per annum, the corporation tax falling upon the witness. In the year 1840 the property was taxed as one house and twenty-four acres, valued at $43,000, and the tax $198 23. The tax in 1837 was $165 24; in this year it is assessed as one house and twenty-seven acres, valued at 45,000. In 1839 it is taxed as one house and twenty-four acres, valued at $43,000; tax $191 89. The house is a small farm-house with a barn. In 1840 the property rented for $300, and this year the rent is reduced to $250. October 4, 1838, witness paid on that property, for regulating One hundred and twenty-second street from Third avenue to Harlem river, an assessment of $1,852 62, with interest $66 99, making a total of $1,919 61.

The Evening Post of July 23, 1841, contains an advertisement of lands, advertised by the corporation of New York, to be sold for assessments, in which advertisement is the following: March 28, 1838. 107. Piece of land: Philip Mildollar; regulating One hundred and twenty-second street from Third avenue to Harlem river; One hundred and twenty-second street south to Second and Third avenue, 56 6; 104 68."... Witness called at the collectors' office in the hall of records to inquire about that advertisement and was told the book was not there; that Mr. Sharpe had it. and witness was directed to call upon him; witness examined the map in that office, and also the map made by Brydges of witness's property and could not ascertain by that comparison what the situation of the witness's property was; he made the examination several times, and could derive no satisfactory information from it.

The assessments imposed upon the said property of the witness and paid by him are as follows, viz:

Sept. 23, 1836—Feb. 14, 1837. Opening 2d avenue from 109th to 123d street,	$44 00
April 5, 1837—Oct. 4, 1838. Opening 119th street from 4th avenue to Harlem river,	741 00
Interest,	22 00
June 28, 1837—Aug. 19, 1837. Opening 122d street from 3d avenue to Harlem river,	313 00
Nov. 28, 1837—Jan. 27, 1838. Regulating 114th street from 5th avenue to Harlem river,	37 81
Jan. 26, 1838—March 16, 1838. Curb and gutter for 114th street from 3d avenue to avenue A,	93 81
Feb. 9, 1838—Jan. 3, 1839. Opening 117th street from 4th avenue to Harlem river,	192 54
April 26, 1838—Oct. 4, 1838. Opening 123d street from 3d avenue to Harlem river,	317 45
Interest,	7 90
Carried forward,	$
Brought forward,	$
May 1, 1838—Oct. 4, 1838. Opening 120th street from 4th avenue to Harlem river,	235 50
Interest,	7 06
July 1, 1838—Oct. 4, 2838. Opening 118th street from 4th avenue to Harlem river,	600 00
Interest,	17 85
Dec. 6, 1838—Jan. 3, 1839. Building a sewer in 122d street from 3d avenue to Harlem river,	2,064 92
March 14, 1839—April 16, 1839. Regulating 2d avenue from 109th to 123d street,	210 99
Nov. 1, 1839—March 6, 1840. Opening 1st avenue from 109th to 123d street,	1,405 00
Interest,	32 78
Nov. 4, 1836. Opening 116th street from 4th avenue to Harlem river,	630 00
Oct. 4, 1838. Regulating 122d street from 3d avenue to Harlem river,	1,852 62
Interest,	66 99
	$8,994 30

By the assessment and award for opening First avenue from One hundred and ninth to One hundred and twenty-third street, witness was entitled to an award of $2,107, and charged with an assessment of $1,547 78, leaving a balance of award coming to the witness of $669 22; the witness called to receive that balance and was told that he could not receive it, that he must pay the whole assessment of $1,437 78 and wait until some future time to receive his said award; and when at some future period the witness called to receive his said award he was charged with and paid interest on his said assessment, from the time it was said to be payable, although less in amount than the award that was so coming to him: witness does not recollect that any reason was given for so doing; the witness was then residing out of the city of New York, at New Brunswick in New Jersey, where he had a heavy charge of a public nature, which necessarily occupied his time and prevented him from investigating those matters as he otherwise would have done. Owing to witness's non-residence he cannot tell whether all the streets, which have been thus paid for, have been opened and regulated or not; the witness could not lease or sell any part of said premises, and has been obliged to take up, by mortgage on the same, money to pay said assessments, the interest of which now amounts to about $500 per annum, which amount is nearly all sunk every year, as the ordinary corporation tax swallows up almost the whole of the yearly rent. The witness has not to his recollection ever been consulted in any one case as to the making of said improvements, for which said assessments were so imposed; One hundred and sixteenth street was opened one hundred feet wide through witness's property, taking the best part of it, and for which they awarded the witness $21 over and above his assessment. ***No use is made of those roads or streets thus opened; the lots in the vicinity of One hundred and twenty-second street the witness would be willing to give away to any one who would take take them and fill them up, they are so much below the level Of the sewer.*** Mr. Brydges, the surveyor, made a map of witness's property and laid it out in town lots for the witness; he probably suggested it to the witness and he consented to it; a copy of this map is on file in the City Hall. When the witness was so referred to Mr. Sharpe, as he has before stated, he was directed to him at his house and out of the City Hall. P. MILLEDOLER.

Cross-examined by street commissioner on part of corporation.—The map made by Mr. Brydges for the witness laid out the property in town lots. Witness believes the map in the collector's office had on it lots and streets. The witness tried, but he cannot tell to this day, whether he may not, in some instances, have paid assessments on other people's property or not; the collector examined the map, and told witness it was all correct, and he paid the assessments. ☞ *When witness found his property advertised for sale, for assessments which he believes he has paid, he called at the collector's office, and they told him IT WAS A MISTAKE AND SHOULD BE CORRECTED; but he afterwards found, to his surprise, it was still advertised for sale, and he believes it is for an assessment which he has paid.* ☜ Witness has never sold any of the lots laid out on Brydges' map; but he has given several of them to his sons and daughters, and he believes they have sold some of them, but what prices they brought witness does not know. The award which the witness thus applied for was in the same proceeding that the assessment was made. The sewer of One hundred and twenty-second street was made partly over a salt marsh nearly on a level with high tide. When witness was told to call on Mr. Sharpe, he was not told he was removed from office, but was told he had the books, and that he must call on him.

P. MILLEDOLER.

Direct examination on the part of the memorialists resumed.—The witness has owned this property for thirty or forty years; he inherited it, and it has been in the family for nearly a hundred years. The value of that property as town lots depends upon contingencies. Now it is only valuable for farm property.

P. MILLEDOLER.

We ask the reader to carefully peruse the testimony of the Rev. Dr. Milledoler. This venerable divine was one of the professors of the College of New Brunswick, New Jersey. The annual taxes upon his estate, it will be seen, are within a few dollars of the annual rental, and the money to pay the assessments he was under the necessity of borrowing, the interest of which he paid out of his salary which he received as a professor of the college.

It is easy to see that the assessments and the interest will soon equal the value of the land, so that the venerable sufferer will soon, at this rate, be divested of both his land and his money.

The corporation, and their officers, in this case, indirectly take the "Lion's Share" of this good old gentleman's estate.

the City Hall, on the east and west side of the Ninth avenue; that your memorialist's property, situated on the east side of the Ninth avenue, and marked in blue on the accompanying map, contains one acre and three perches of ground, and has been assessed by the common council of the city of New York, the sum of $1,800, including interest, for the pretended opening of the Ninth avenue, for the payment of which your memorialist's said property has been sold for ONE THOUSAND YEARS.

That your memorialist's said property, situated on the west side of the Ninth avenue, and marked on the accompanying map in yellow, contains three acres and thirty-one perches, and has been assessed by the common council of the city of New York, for the pretended opening of Fifty-third and Fifty-fourth streets, the sum of $635 28, and that a small piece on the Hudson river has been assessed the sum of $233 for the pretended opening of Fifty-fifth street.

And your memorialist further represents, that the said Ninth avenue and said streets have not been opened, nor has any thing been done therein since the assessment was made; nor is it necessary, in the opinion of your memorialist, that said avenue and streets should be opened.

That the opening of said avenues and streets, and the working and grading of the same, if done by the corporation, will cost more than all the land is worth that can be assessed for the same.

That your memorialist's said land, situate on the east side of the Ninth avenue, is at the nearest point 170 feet from said avenue; and in the firm belief of your memorialist, it would not bring, at public or private sale, the amount of the assessment.

That her said other lands have not been benefitted by said assessments; and your memorialist further says, that the said opening of said streets and avenue, and said assessments, were opposed, but without any effect.

And that your memorialist has applied both to the Supreme Court and the Court of Chancery for relief, but without success. The Supreme Court say they have no power, by certiorari, to interfere; nor will the Court of Chancery give any redress by injunction, for want of jurisdiction, the proceedings of the common council being void.

Therefore your memorialist appeals to your honorable body for relief, in hopes she will find protection and be restored to her rights, guaranteed to her and every other citizen, by the Constitution of the State.

And your memorialists will ever pray, &c.

WINIFRED MOTT.

New York, Feb. 10th, 1842.

Preamble and Resolutions for paying contractors and applying to the Legislature for act to buy under sales for assessments.

Whereas, there are large amounts due several persons, contractors for building sewers, regulating streets and avenues, and paving and setting curb and gutters, and also for filling low and sunken grounds, as set forth in the original schedule, prepared by the street commissioner, and which improvements were made, and work done in pursuance of the several respective ordinances of the common council, and which were to be paid for by assessments on the property benefitted, and as soon as the amounts of said assessments were collected.

And whereas, the assessments levied in pursuance of said ordinances have been for some time confirmed, but collection of the same only in part made, and most of them returned as unpaid and uncollected, and the property liable thereto, and on which, the same were a lien, agreeable to the laws of the state, advertised, and offered for sale by the street commissioner, at the recent sale of property for assessments; but the amount due on said assessments could not be realized, by reason of their being no bids at such sales for said property, *THE AMOUNT OF SAID ASSESSMENTS BEING MORE THAN THE PRESENT MARKET VALUE OF SAID PROPERTY SO LIABLE*, in consequence whereof the said contractors are still unpaid; the common council, in order to relieve them, and anticipating the collection of said assessment, and which may hereafter be made, and trusting that they may be authorized by the Legislature, to raise by tax the amount which they may so advance, and to secure themselves and city treasury, from any loss, by being authorized to purchase in at any sale, such property, for which there may be no bids; do adopt the following resolutions:

1. *Resolved*, that the counsel prepare a law, under the direction of the law committee, to be applied for, to the Legislature, authorizing the corporation to become purchasers of property which may hereafter be offered for sale, for payment of assessments agreeable to law; to refund them for any advances which may have been made them, to contractors or others, for the improvement for which, such assessments were imposed. Such law to contain all needful provisions to secure the rights of parties interested therein, and that such property be held as a trust fund to repay such advances.

2. *Resolved*, that the comptroller be authorized to pay the several contractors the amounts respectively due them, for the several improvements made in pursuance of the ordinances of the common council, in all cases where the property assessed therefor, was benefitted by such improvement, has been offered for sale, and could not be sold by reason for the want of any bid, at the recent sale of property for assessments, or in cases in which the sale of such property has been enjoined by the Court of Chancery, such payment to be made on the first day of October next.

3. *Resolved*, that the comptroller include the estimated amount required for the above payment, in the amount of the next annual tax bill, to be applied for to the next Legislature.

4, *Resolved*, that the counsel to the corporation, under the direction of the law committee, **take measures to obtain a revision of assessments**, mentioned in the annexed schedule as may be judged expedient, and agreeable to law.

Adopted by board of ass'ts Feb. 25, 1841, by board of aldermen Feb. 22, 1841, and approved by the acting mayor Feb. 25th, 1841.—*Sen. Doc.* 100, *p.* 276.

SUPREME COURT.

JANUARY TERM OF 1823.

Le Roy and others against The Mayor, Aldermen, and Commonalty of the City of New York.

This Court has a general superintending power to award a certiorari, not only to inferior Courts, but to persons invested by the legislature with power over the property and rights of others, for the purpose of supervising their proceedings, even in cases where they are authorized finally to hear and determine.

As where the Corporation of the City of New York were authorized by statute, to cause sewers to be made in the city, and to make a just and equitable assessment of the expence thereof, on the owners and occupants of houses and lots intended to be benefitted thereby: though the commissioners, appointed for the purpose of making such assessment, have a discretion in determining the quantum of benefit which each owner or occupier of a house or lot, within the district, may derive from the common sewer, and with the exercise of which discretion this Court cannot interfere; yet, as to the persons who are to be assessed, which must depend on the sound construction of the law, as applied to the circumstances of the case, the Court has power to establish the principle on which the assessment is to be made, and to compel the Corporation to act on such principle.

A WRIT of *certiorari* was issued, directed to the Mayor, Aldermen, and Commonalty of the city of *New York*, returnable in *August* term, 1820. The certiorari recited, that the Corporation of *New York*, by virtue of the "Act to reduce the several laws relative to the city of *New York*, into one statute," passed *April* 9, 1813, (2 *N. R. L.* 342—460,) had caused a common sewer to be made in *Canal street*, in the said city, from *Washington street* to *Collect street*, for the purpose of receiving the water from a large and extensive district, or section of the city, (particularly described,) and conveying the same to the *Hudson* river, and appointed *Peter Hawes*, *Roger Strong*, and *John Targee*, to make a just and equitable assessment of the expense thereof, (amounting, with the incidental charges, to about 98,000 dollars,) among the owners and occupiers of all the houses and lots intended to be benefitted thereby, in proportion, or as nearly as might be, to the advantage which each should be deemed to acquire That the commissioners named, accordingly proceeded to make the assessment, by which they assessed the whole expense of building the sewer on the plaintiffs, the owners and occupiers of houses and lots upon *Canal street*, and within about four hundred feet thereupon, being a small part of the houses and lots within the district or section of the city from whence the water is to be received into the sewer, to be conveyed by it to the *Hudson* river; to which assessment, objections, in writing, were made by the plaintiffs; but the assessment had, nevertheless, been confirmed by the Corporation, and a collector appointed to collect the sums assessed upon the parties named therein. That the district or section of the city, from which, by the permanent regulation of the streets and grounds, the water was to run into the sewer, and be conveyed to the river, contained about 500 acres; and the sewer was intended for the use and benefit of all the lots and grounds, to which such permanent system of regulation extended. But the assessment made for building such sewer, has been made upon a small part only of the houses and lots, and owners of lots, within such district. That *Canal street*, in which the sewer was to be built, was intended, laid out, and opened, for the purpose of forming a common outlet and passage way for the water from the said district to the *Hudson* river; and that street, and the sewer therein, conjointly, form the place of such outlet for the water, and are both necessary for its accomplishment. That the cost and expense of the ground, forming the street for that purpose, was assessed upon and paid by the owners and occupants of all the houses and lots within the district or section; that the sewer was necessarily made of its present dimensions, at a very great and increased expense, for the very purpose of giving to it a sufficient capacity to receive and carry off the vast quantity of water which must collect from the extensive district the sewer was intended to drain. That common sewers have been made under the direction of the Corporation, at different times, in other parts of the city, where the regulation of the grounds rendered them necessary, and the uniform rule and practice, in such cases, had been, to assess the expense of building the sewer among the owners and occupants of all the houses and lots from whence the water was received into the sewer. That such assessments have been made by persons appointed by the Corporation, who have confirmed such assessments; and that this rule and principle had been applied and acted upon, not only before the assessment in question, but subsequently, in cases which were mentioned, &c. The writ of certiorari *commanded* the Corporation to certify and return the assessment made by the persons above named, the objections in writing thereto, and all the proceedings respecting the same, with all the estimates and assessments of the expense of making the sewer, and all acts and proceedings touching the same, before the Corporation, or in their possession, custody, or power, &c.; and all and singular the acts, orders, minutes, reports, process, and proceedings, relating to the forming, laying out, and opening of *Canal street*; and all estimates and assessments of the expense of forming and opening that street, or of acquiring the ground for that purpose; and all minutes, orders, reports, acts, and proceedings, touching the same, before the Corporation, or in their possession, custody, or power; together with the maps, profiles, documents, and papers, in their possession, custody, or power, designating and describing the district or part of the city from whence, by the permanent and existing regulation thereof, the water runs and is conveyed into the sewer in *Canal street*, to be conveyed through it to *Hudson* river, with the time when these regulations were adopted and made, and all things required of them by the exigency of the said writ, in the premises, &c., before the Justices, &c.

In *August* term, 1820, *Edwards*, in behalf of the Corporation, moved to quash or supersede the *certiorari*, on the grounds stated in affidavits, which he read: 1. Because, of *laches* in the plaintiffs; the assessment having been confirmed by the Common Council in *November*, 1819, and no *certiorari* was sued out until *July* following. (6 *Johns. Rep.* 131.) 2. Because, a bill had been filed by the plaintiffs in the Court of Chancery for an injunction, which was refused by the Chancellor, (see 4 *Johns. Ch. Rep.* 352.) from whose decree an appeal had been entered, which was pending. 3. Because, the *certiorari* was irregular, on the face of it, requiring the defendants to return, not only all matters relating to the sewer, but proceedings which took place ten years ago, relative to *Canal street*. 4. Because, many of the persons assessed had paid to the amount of about 20,000 dollars. He said, that this was an application to the sound discretion of the Court; that a *certiorari* was not a writ of right; but the Court might quash the writ, if before them, or supersede it, if it was not returned. (2 *Atk.* 318, 319. *Sayre's Rep.* 156. 4 *Term Rep.* 499. 7 *Mod.* 18. 8 *Mod.* 331. *Viner's Abr.* tit. *Certiorari*, B. C. 5 *Term Rep.* 251.) The Corporation were not parties in these proceedings, but judges merely; and as long as the *commissioners* appointed to make the assessment acted within the scope of their authority, their judgment was final and conclusive. The statute left the matter to the judgment and discretion of the commissioners; and where that discretion had been exercised according to the act, no Court of law or equity could properly interfere to overhale their judgment. (1 *Johns. Ch. Rep.* 21. 2 *Comyn's Dig.* 487. *Finch's Rep.* 320. 2 *Atk.* 144.)

S. Jones, and *D. B. Ogden*, for the plaintiffs, to show that this Court had a superintending power over these proceedings, and that it ought to be exercised in this case, cited 2 *Caines' Rep.* 179. 15 *Johns. Rep.* 538. 16 *Johns. Rep.* 50. 1 *Lord Raym.* 469. 580. 1 *Salk.* 145. 2 *Term Rep.* 234. 1 *Bac. Abr.* tit. *Certiorari*, (B.) *Styles's Rep.* 13. 3 *Maule & Selw.* 447. *Callis' on Sewers*, 1[illegible]. 223, 224. 151. 161.

The Court denied the motion to quash or supersede the writ, with costs, and ordered a return to be made to it. The Corporation, afterwards, made a return to the *certiorari*, but the plaintiffs not deeming it sufficiently full, applied to the Court, on a notice of a motion and affidavits, in *January* term, 1821, for an order upon the defendants to make a new or further return to the writ. This motion was opposed by the counsel for the Corporation, who cited 2 *Johns. Cases*, 108. 2 *Caines' Rep.* 106. 2 *Burr.* 1042. 3 *Maule & Selw.* 447.

VAN NESS, J., delivered the opinion of the Court. The objects of this application, as stated in the *notice* of the plaintiffs, are, 1. That the return on file be taken off the file. 2. That the rule entered to assign errors, be vacated for irregularity. 3. For a rule that the defendants make a further return, in the following particulars: (1) That the defendants set forth, state, and describe the district or section of the city of *New York*, and the bounds and limits of the said district or section of the said city, from which the water runs, and is received, or, by the permanent or the existing regulation thereof, is to run and be received into the common sewer in *Canal street*, to be conveyed and carried to the river. (2) That they state the time when such permanent or existing regulation was adopted or made, and the nature and cause thereof, with the maps, profiles, documents, or papers in the possession, custody, power, or control of the defendants, designating, describing, or showing such said district or part of the said city, or

formity with that which the plaintiffs contend ought to have been pursued in this case, and it requires a return of the proceedings in such cases. To this, I am inclined to think, the defendants are not bound to make any return. Whether the Corporation has adopted a wrong principle of assessment in this case, is not to be determined by their practice, even in former analogous cases, but by the law under which they acted. The rule is justly stated by the defendants' counsel, that nothing is to be returned but what can be legally required to be returned, without reference to the command of the *certiorari*.

We, therefore, direct a rule to be entered, that the defendants make a further return to the *certiorari*, as to the first and second points stated in the notice; and that in the mean time, the proceedings on the rule for the plaintiffs to assign errors, be stayed, until twenty days after such further return is made. We give no costs of this application. They must abide the final event.

The defendants, accordingly, made a further return, which being objected to by the plaintiffs as insufficient, the counsel for both parties, to obviate the necessity of any further application to the Court on the subject, agreed to an additional statement, to be annexed to, and taken as part of the return. And in *May* term, 1822, the cause came before the Court, on the returns to the *certiorari* and the proceedings thereon, and upon a *notice* from the plaintiffs to the defendants of an application to the Court, that the estimate and assessment of the expense of making the common sewer in *Canal street*, mentioned in the return, be set aside, vacated, and annulled, with costs, or that such other order be made, or judgment rendered, by the Court in the premises, as justice might require.

The argument of the cause was commenced in *May* term, but, for want of time, was continued to *August* term last.

S. Jones, and *D. B. Ogden*, for the plaintiffs, contended, that the defendants, and the commissioners acting under their direction, had not conformed to the authority and direction of the act, or to the rule of assessment given by it. The 175th section, (2 *N. R. L.* 407.) says, they are "to cause estimates of the expense to be made, and a just and equitable assessment thereof among all the owners or occupants of *all the houses and lots intended to be benefitted thereby*, in proportion, as nearly as may be, to the *advantage* which each shall be deemed to acquire." They have no arbitrary discretion on the subject. The law is imperative. The only discretion to be exercised by them is in apportioning the amount of the assessment among the persons intended to be benefitted by the improvement. This act, in regard to the powers given to the Corporation, is very similar to the *English* statutes relative to the *Commissioners of Sewers*, in regard to whom, it has been decided, that they are bound to exercise a *legal* discretion, that is, the exercise of given powers. (*Callis on Sewers*, 112, 113. 145. 223, 224. 3 *Maule & Selw.* 447. 2 *Str.* 11. 47.) Then, who were the persons intended to be benefitted by this common sewer? Certainly, *all* those from whose grounds the water is carried off to the river, by means of the sewer. They are persons intended by the Corporation to be benefitted, when they directed the improvement to be made, not those intended by the commissioners.

Edwards, and *H. Bleecker*, contra, insisted, that the proceedings of the defendants had been, in all respects, in conformity to the act; and that the Court had no power to vacate or control the proceedings under it, unless they were irregular or fraudulent. The Court cannot take notice of any matter that does not appear in the return to the *certiorari;* nor of any thing which the defendants were not legally bound to return. And if any matters have been improperly returned, or ought not to have been returned, the Court will disregard them. (5 *Term. Rep.* 341. 6 *Mod.* 90. 4 *Viner's Abr.* 356. pl. 11. 2 *Salk.* 493. 5 *Mod.* 159. 7 *Johns. Rep.* 23. *Cases temp. Hardw.* 169. 2 *Johns. Cases*, 108.)

The office of a writ of *certiorari*, is to remove, or bring up from an inferior jurisdiction, a matter of record, or something in the nature of a record. When it is brought up, this Court do not look into the merits of the case, but merely whether it appears on the face of the proceedings, that the inferior tribunal has exceeded its jurisdiction. They do not interfere with the exercise of any power within the acknowledged jurisdiction of the inferior Court. If the return is false, the party may have an action for a false return, or an action of trespass. (1 Comyn's Rep. 80. Tidd's Pr. 455. 3 Maule & Selwin, 447. 2 Bl. Rep. 717. March's Rep. 196. 2 Caine's Rep. 182. 4 Mod. 66. 165. 1 Ch. Cas. 309. 1 Vesey, 58. 1 Vernon, 58. 1 Johns. Ch. Rep. 21. 1 Sid. 296. 3 Atk. 673. Skinner, 480. 14 Johns. Rep. 111, 112. 2 Vernon, 390. Prec. in Ch. 530. Bull. N. P. 75. Peake's Evid. 294, 295. 4 Johns. Ch. Rep. 352.

Woodworth, Judge, delivered the opinion of the Court.

A return having been made to the *certiorari*, directed to the defendants, application is now made to set aside the assessment of the expense of making a common sewer in Canal street, on the ground that it has not been made in conformity with the 175th section of the act relating to the city of New York. (2 *N. R. L.* 407.)

The general superintending power of the Court to award a *certiorari*, not only to inferior courts, but to persons invested by the legislature with power to decide on the property or rights of the citizen, even in cases where they are authorised by statute finally to hear and determine, has been frequently exercised, is considered as well established by the common law, and can only be taken away by express words. (2 *Caines' Rep.* 182. 8 *Term Rep.* 542.) The question of jurisdiction came up, when the defendant moved to quash the *certiorari*. The Court then decided that they had a supervisory power in cases of this description. This power will be exercised when the duty to be performed, and the manner of executing it, is clearly pointed out by the law, and there shall appear to be an essential de-

parture from it. On the application for a further return, we considered it indispensably necessary to have before us the whole of the proceedings in the possession of the defendants, to enable the Court to settle a principle, upon which an assessment of the expense ought to be made. On examining the return, it does not contain more than a fair compliance with the rule; it is admitted that the Court will only notice what can legally be returned, and will reject extraneous matter.

By the 175th section of the act the Corporation are authorised to cause common sewers to be made, and a just and equitable assessment thereof among the owners or occupants of all houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantages which each shall be deemed to acquire. In order to determine on what principles the assessments in the present case ought to be made, it is necessary to look into various regulations of the Corporation, in relation to improvements in this part of the city, and notice in what manner the inhabitants of the district, whose waters are carried off, are connected together, in respect to such improvements. It appears that there was an original outlet of the water from the grounds comprising the district in question, from time immemorial, a considerable part of which was along the present route of the common sewer. Had this part of the city remained unimproved, those who owned property in the lower part of the district, must have submitted to the consequences arising from the flow of the water, in its course to the natural outlet, and could not have supported a claim for damage sustained or for contribution against the owners of the lots lying in the upper or higher parts of the district.

The present question arises on a very different state of facts. The City of New York, within a very few years past, has extended rapidly; a waste and barren territory has been laid out into streets which have been paved and drained. Houses have been erected, forming an integral part of the city; the spirit of improvement is progressing; acts of the Legislature have been passed from time to time to enable the Corporation to regulate and conduct the necessary operations incident to such a state of things, and without which, disorder, irregularity, and great public inconvenience, would be the inevitable consequence. Persons owning property, which is to be diverted from its original destination, or applied for the purpose of building up a city, stand in a new relation to each other, arising from new interests, and a necessity of taking a comprehensive view of the whole in order to legislate wisely and discreetly as to a part. Laws for these purposes are procured to have been passed with the express or tacit consent of those whose interests may be affected. When improvements are directed, and expenses incurred which are required by a peculiar situation of a part of a district, and such improvements are essential to protect a part, from injuries growing out of the change from vacant lots to streets and houses, they ought to be considered as in some measure, beneficial to all, although not equally so. The quantum of benefit rests in the discretion of the assessors, with which the Court cannot interfere. Who are to be comprehended in an assessment, depends on the principle on which it is made; that must be determined by a sound construction of the law, applied to the facts. It does not rest in the discretion of those who are to execute the law. The superintending power of this Court is competent to establish the principle, and compel the inferior authority to be governed by it, leaving to its discretion, the manner of levying and the amount of contribution, to be exacted from each individual. It is no answer to this view of the subject, to say, that the waters which are now carried off through the present covered common sewer were as effectually carried off by the open drain that was previously used. To the inhabitants on the high grounds it may not be material in what manner the water is discharged into the river, but when streets are paved, the water descending on the surface, from the high ground, must necessarily expose those in the valley to inconvenience and injury. It being the common right and duty of all, to cause the water to be conveyed through the streets, so as to occasion as little injury as possible to the inhabitants near it. The expense becomes a common charge on all; from this it results that owners of lots on the high grounds, are benefitted by a sewer rendered indispensably necessary to protect the inhabitants on the low grounds. The benefit thereby is, that those on or near Canal street, are not incommoded or annoyed by the water. This protection to them, is a discharge of the duty previously existing, and obligatory on the whole districts, and, consequently, those owning property in the district and not included in the assessments are benefitted by this sewer.

It appears that the regulations of the city for carrying the water from this district into the river, through Canal street, by making a common sewer, and taking the ground for making Canal street, were made prior to 1809, that this street was laid out and opened for the purpose of making a common outlet and passage way for the water, and as a substitute for the original outlet; that the expense and cost of the ground purchased for forming the street, was assessed upon the owners and occupants of all the houses and lots from whence it was supposed the water was, by the permanent regulation, to run, and be received into the common sewer, as being benefitted thereby. There was an open drain, before 1815, through Canal street, which was designed mostly for a temporary passage, and continued until the common sewer in question was made. The whole of the proceeding in relation to Canal street appears to be one continued operation for the original laying out, building the sewer, and covering it.

The principle of the assessment, adopted by the Corporation in purchasing the ground for Canal street, I consider as applicable to this case, and ought to be pursued. It is stated, in the return, that the covered sewer was constructed, as well for carrying off the waters, as for correcting the nuisance, which existed during the time the drain or open sewer remained, and which was caused by it, but that it was not necessary in draining off the water. Admitting that the covered sewer became necessary, in order to correct the nuisance, it would not change the principle of assessment. The permanent regulations respecting this district required the purchase of ground and a common sewer. An open drain was used for several years; it was found materially to affect the health and comfort of those whom the waters passed, in its passage to the river: to remove this nuisance, the covered sewer was built; the canal was a part of the plan of operations for this section or district, and made for the benefit of all. The whole district were bound to make it as little prejudicial as possible. When found to endanger the health of the inhabitants, it was the duty of all to contribute toward the expense of removing it. The covered sewer was constructed for that purpose. How far the nuisance extended does not appear; its removal may have been beneficial to the whole district; but I do not rest the principle on that ground; it is enough that all are bound to protect, to a reasonable and necessary extent, those who were exposed.

When grounds, owned by various individuals, became the subject of regulation, in respect to laying out streets, and making improvements, which are considered by the proper authority necessary for carrying into effect the plan adopted for a particular district, as a whole, regard must be had to the rights, privileges and advantages of every part, and all are liable to share in the burthen which may be thrown on a part.

We are clearly of opinion, that by a just construction of the act, the assessment ought to have been made upon all the owners or occupants of houses and lots included within the district, designated on the map, from whence the water flowed into the sewer, and consequently that the assessment made ought to be set aside and vacated. Rule accordingly.—20 *Johnson*, 430.

SUPREME COURT,

OCTOBER TERM, 1829.

Ross and others vs. the Mayor, Aldermen, &c., of New York.

Under an ordinance of the corporation of New York, directing the filling up, altering or amending a public slip, the assessment should be made under the 269th section of the act relative to that city; and property in the vicinity belonging to the corporation is equally liable to assessment as the property of individuals, notwithstanding that the statute directs that one third of the expense of the improvement shall be borne by the corporation.

The corporation of New York, by an ordinance passed the 5th May, 1828, ordained "that a bulk-head be built in and across the slip or basin at the foot of Spring street, on the westerly line of West street; and that the space between the present bulk-head and the one to be built, be filled in under such directions as shall be given by the street commissioner and one of the city surveyors," and appointed assessors to make an estimate of the expense, and to make a just and equitable assessment thereof, among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion as nearly as might be to the advantages which each should be deemed to acquire. An assessment was made, which was apportioned amongst the owners of lots on Spring street, as far east as Clark street, and amongst the owners of lots on the streets intersecting Spring street, half

tation in lieu of all other charges and assessments, and established to prevent disputes as to the extent of their liability.

The common council have a right to make an alteration in a slip, as well for the benefit of navigation as for the promotion of the public health. If not done solely for the promotion of the public health, it does not necessarily follow that *all property equally near to the slip* should be assessed. The property in Canal street was exempted because it had its *own burthens* to bear of a similar character, to defray which the property in Spring street contributed nothing.

By the Court. The assessment in this case was correctly made under the 269th section of the act, (2 *R. L. p.* 445,) but in the application of the principle the assessors erred. By this section it is directed that in all cases where the by-laws or ordinances (of the common council) shall require any thing to be done in relation to the filling up, altering, or amending any of the public slips in the city, the corporation shall cause the expense of such works to be estimated and assessed in the same manner as is directed by the act with respect to the paving or regulating the public streets in the city, except that one third of the expense attending the same is to be borne by the corporation, and the residue by the persons in the vicinity who may be benefitted thereby. The manner of estimating and assessing the expense of paving and regulating the public streets is to make "a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion as nearly as may be to the advantage which each shall be deemed to acquire." (§ 275.) The direction given to the assessors by the ordinance of the corporation was in conformity to this provision of the statute, but the assessors did not obey it when they omitted to assess a proportion of the expense on the lot owned by the corporation, on which the market is built. The property of the corporation, if benefitted by the improvement, is as much the subject of assessment as the property of individuals. The intention of the legislature is manifest, that the property in the vicinity shall contribute two thirds of the expense, and whether that property belongs to the corporation of the city, or any other body corporate, or to individuals, is immaterial. The charge of one third of the expense to the corporation in improvements of this kind is made by the statute, without reference to the owning of property by the corporation in the vicinity. It is a charge upon the funds of the city generally, in consequence of the general benefit derived from the improvement, and the profits accruing to the corporation from warfage, &c. In this respect, therefore, the assessment is erroneous, and must be set aside. As to the lot lying upon *West* street, in the north corner of Spring street, returned as belonging to George Watkins, the relators have mistaken the fact. That lot *is assessed* as No. 10, fronting on *West* street, and therefore is properly omitted from the assessment, as fronting on *Spring* street; on that street it is designated in the map as No. 11, and no assessment appears in return to have been made on it as No. 11, which probably misled the relators; but the lot having been assessed as No. 10, *it* would have been erroneous to have made a second assessment upon it.—3 *Wendell*, 334.

End of non-enumerated cases of October term, 1829.*

* Mr. Justice SUTHERLAND was prevented by indisposition from attending court during the greater part of this term.

EQUITY COURT.

BEFORE THE CHANCELLOR.

JANUARY TERM, 1837

Oakley vs. The Trustees of Williamsburgh and Moore.

The trustees of the village of Williamsburgh are not authorized by the village charter to alter the grade of a street, after the grade thereof has been regulated and established by them as directed in the act of incorporation. And where such trustees were proceeding to dig down and alter the grade of a street, which had been regularly graded and regulated; HELD, that the owner of adjoining lands, whose property would be seriously injured by an alteration of the grade, was entitled to an injunction to restrain such illegal proceedings of the trustees.

The Court of Chancery *has* jurisdiction to interfere by injunction to restrain the defendant from proceeding in an illegal act which will necessarily cast a cloud upon the complainant's title to real estate, and will naturally diminish its value.

THIS was an appeal from the vice chancellor of the first circuit, refusing to grant an injunction. The bill of complaint in this case, *which was filed by the complainants in behalf of themselves and all others having a common interest with them*, after setting out that part of the act of incorporation of the village of Williamsburgh which made it the duty of the trustees to cause a survey and map of the village to be made, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting on such map all the gradations and regulations which might or should be required in the *roads*, alleys and streets, accompanied by such remarks and explanations as the nature of the subject might require, to be kept by the clerk, subject to the inspection of the freeholders and inhabitants of the village, so that no person could plead ignorance of the plan to be adopted for opening, laying out, levelling and regulating the streets of such village, (*Laws of* 1827, *p.* 276, § 19,) stated that, in pursuance of their act of incorporation, the trustees of the village caused such survey and map to be made, signed and filed, as directed by the act, except that the gradations of the streets were not exhibited on the map; that such gradations were omitted on the map because the formation of the surface of the ground rendered it impossible o comply with that part of the provisions of the statute immediately; for which reason the grading of the streets was left to be established by actual survey from time to time, as it should become necessary to open such streets; that in 1828, the trustees caused a survey and profile to be made of the southerly section of *First* street, running from Grand street along the margin of the East river to the south bounds of the village; and caused such survey and profile to be filed with their clerk, and caused the street to be graded and levelled in conformity thereto; and setting out the certiorari, &c. in the Supreme Court upon which these proceedings of the trustees were confirmed; (See Coles v. The Trustees of Williamsburgh, 10 Wend. Rep. 659;) and that the trustees subsequently caused similar sections of Second and Fourth streets and several other streets intersecting the same to

be laid out, and surveys and maps and profiles thereof to be made and filed in the same manner, and caused the said streets, or certain sections thereof, to be levelled in conformity with such surveys; and that one of them, South Second street, had been paved and the assessment therefor had been made and collected or paid. The complainants then charged or alleged, in their bill, that one of them owned large and valuable tracts of land on the southerly section of First street, and on the other streets which had been so graded and levelled; and that others of the complainants respectively owned lands on such other streets; some of which lands had been purchased since the regulation and surveys of the said streets, and upon the faith thereof as the permanent plan for the grading and levelling of those streets; and that no change or alteration in the gradation of such streets could now be made without serious detriment to the rights and interests of the complainants in relation to their lands; but that the trustees of the village, upon the petition of the majority of the land owners on the south easterly section of First street, in June, 1836, passed an ordinance or resolution to alter the grade of that street as thus permanently settled, and to re-regulate and pave the street; and that they had employed the defendant Moore to cut down and alter the grade of the street about six feet; which, if permitted, would require a corresponding alteration of the grading of the other streets, upon which some of the complainants' property was situate, and which intersect the south section of First street; and that the re-grading of First street, if carried into effect in the manner contemplated in the ordinance, would materially impair and injure the value of the complainants' property. They therefore asked for an injunction to restrain the defendants from proceeding to alter the grade of the street as theretofore established, and from digging down the street or removing the earth therefrom. An order to show cause why an injunction should not issue having been granted, the defendants introduced affidavits showing that the alteration of the grades of the streets was necessary for the benefit of the village, and more particularly for the convenient use of the waters of the East river for commercial purposes; whereupon the Vice Chancellor made an order denying the application for an injunction.

J. H. Lee & D. B. Ogden, for complainants.

Ebenezer Griffin, for the defendants.

The Chancellor. If the trustees of the village of Williamsburgh have the power, under their act of incorporation, to alter the grade of the streets of the village, after it has been once regulated and established by them as required by the 19th section of that act, the case before me is not one in which it would be proper for this court to interfere; as there is no pretence that the trustees are acting in bad faith, and without reference to what they honestly believe to be for the interest of the inhabitants of the village. On the other hand, however, if they have no such power as they have assumed to exercise by the ordinance in question, then this appears to be a very proper case for the allowance of an injunction, to restrain an illegal proceeding by them to dig down and alter the grading of the street as originally established, which, as alleged in the bill, will be a material injury to the value of the property of these complainants. The assessments upon their lots for the expenses of the proceedings to alter the gradations of the streets, although they might be so far void as not to affect their legal title to the land, would of themselves be a cloud upon that title which must necessarily diminish the value, if it did not entirely prevent the sale of such lands as village building lots; ***as a prudent man would not be likely to buy a city or village lot for the purpose of building thereon, and pay the full value of the lot, while a cloud like this was hanging over the title,*** *which might thereafter subject him to litigation if not to actual loss of the property.* And as this court sometimes exercises its jurisdiction for the purpose of removing a cloud from the complainant's title to real estate, it may also, in a proper case, interpose its authority to prevent the illegal act from which such a cloud must necessarily arise. (Petit v. Shepherd, 5 Paige's Rep. 493.) The decision of the present case, therefore, depends upon the question whether the trustees of Williamsburgh have the right, as claimed by them, to alter the regulation and grading of their streets after it has been once adopted and established. For it is judicially settled by the decision of the Supreme Court, in reference to this particular street, that the grade thereof had been legally established by the trustees, before the institution of the proceedings now in question to re-regulate the street and to grade the same anew.

The object of the legislature, by the 19th section of the statute, appears to have been to have a permanent plan of the village made and adopted by the trustees, not only as to the location of the streets, roads and alleys, but also as to the regulation or gradations thereof; to which plan all subsequent proceedings should conform. Hence, it was made the duty of the trustees to cause a survey and map of the village to be made and filed, as soon as conveniently might be, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting all the gradations and regulations which would be required in such roads, alleys and streets. And it appears to me that the making of this survey and map of the locations and gradations of the streets, roads, &c. of the village was not only a useless proceeding, but was also calculated to deceive those who might thereafter become the owners of village property, if it was not intended to confine the proceedings of the trustees to the opening and improving the streets, &c. according to the locations and gradations as thus established. And I think there could not have existed a reasonable doubt as to the intention of the legislature thus to restrict the power of the trustees, if it had not been for the introduction of the word *altering* into the subsequent sections of the act.

The 21st section of the act provides that it shall be lawful for the trustees to order and direct the pitching, regulating and paving the streets according to the map and survey, and the *altering*, amending and cleansing any street, vault, sink, &c.; and to cause estimates of the expense to be made, assessed and collected, &c. And the 24th section contains a similar power as to the widening and altering streets and highways already laid out, and as to the laying out and making other roads and streets, conformable to the map, as the trustees might think necessary and convenient; with a provision for compensating the owners of lands for the property thus taken for new streets, or the alteration of the old ones, and for raising the amount by assessment upon the owners of lands benefitted thereby. It is under the power of altering streets, as given in the 21st and 24th sections, that the counsel for the defendants claim the right to change the location or to alter the grade of streets which have been located or graded, in conformity to the general map and plan of improvements, subsequent to the act of incorporation. In this I think the trustees have entirely mistaken the meaning of the legislature in relation to the alterations which they were, by these sections, authorized to make. At the time when this act of incorporation was passed, there were roads or streets already existing within the chartered limits of the village. And as a general plan of improvements was to be made and adopted by the trustees, both as to the location and the grade of every street, alley and road in the village, it was anticipated by the legislature that it might become necessary for the trustees to alter the grades and locations of the old roads and streets, so as to render them conformable to the general and permanent plan of the village, as well as to pitch, regulate, pave and open the new streets, according to the map and survey. Hence the necessity for providing for the alteration of streets in the 21st section, which relates to the pitching, regulating and paving, as well as in the subsequent section regulating the manner of altering and widening old streets and opening new ones. The word *altering*, therefore, in both of these sections, related to the old streets and roads which existed at the time of passing the act of incorporation, and not to the new streets which might thereafter be laid out, opened or graded in conformity to the map and survey, and to the grade as first adopted by the trustees. And these trustees have no power or authority to change or alter the grade or location of any such new street after it has been once established by them, in conformity to the map and survey and gradation first established, or of any of the old streets after they have been made to conform to such general plan. The defendants have no legal power therefore to alter the grade of this southerly section of First street, or of the adjacent streets which have been thus regulated and graded.

The inhabitants of this village, however, are not without remedy if the interest of the public requires a correction of any mistake which the trustees may have made either in laying out streets or in fixing the gradations thereof. For it is perfectly competent for the legislative power which directed a general plan of the village to be adopted and adhered to by the trustees, to authorize them to make such alter-

Chapel street by taking off twenty-five feet from both sides, commencing at a point about half way between Leonard and Franklin street and extending to Reed street, a distance of about one thousand feet, and on the easterly side from Reed street to Murray street by taking off twenty-five feet from the said easterly side. This latter distance is about seven hundred feet. Application was subsequently made to the Supreme Court for the appointment of Commissioners of Estimate and Assessment for to make an estimate of the expense of the widening, and assess the same upon the owners and occupants of houses deemed to be benefitted thereby. One of the Commissioners, Peter Stagg, Esq., refused to serve alleging as a reason that the property could not be found benefitted sufficient to pay the expense. Another person was appointed Commissioner in his place. The Commissioners were appointed on an exparte application to the Supreme Court. This application was made by the Counsel of the Corporation, who subsequently received $3,443 00 in fees for his services, which sum was assessed upon the property deemed by the Commissioners to be benefitted, &c.

In December, 1835, the Commissioners gave notice in two newspapers that they had completed their assessment and had lodged their report in the office of the Clerk of the County for examination of those who are interested, and that it would remain there ten days for such examination. The report was very voluminous, was destitute of any index or abstract, and was a perfect wilderness to explore. The houses were described by arbitrary map numbers, of which the owners had no knowledge whatever, nor any body else except the Commissioners and Surveyor. No map or design accompanied the report, and a person might have to look through near one thousand pages of manuscript to find his name and the description of his property. The total amount of the assessment thus made was $210,810 40, about one $100,000 of which was for buildings destroyed. The Commissioners had a right by law to assess one third of the amount of the buildings upon the Corporation of the city of New York, but were prevented from so doing by an intimation from public officers that if they did so, the proceedings would be suspended. The provisions of the statute are, that when a street is to be widened, &c., the Commissioners shall be furnished by the Corporation with a profile of the intended change of grade of the street and the intersecting streets affected thereby, that the Commissioners may be able to judge of the damages to buildings erected conformable to a former grade. No profile was furnished the commissioners in this case. The Report of the Commissioners was presented to the Supreme Court at Albany at the January term, and was on the 5th day of that month confirmed by the court. The objections to the confirmation were confined to two persons, we believe. Very few persons who were assessed had any knowledge of the assessment until after the confirmation. Had the notice of the assessment been as extensive as the assessment itself, its confirmation would have been successfully opposed before the court.

We have thus briefly passed over the proceedings as to the widening of Chapel street, and now come to the following most extraordinary proceedings in relation to the changing of the grade of Chapel and adjoining and neighboring streets.

On the 18th of January, 1836, a few days subsequent to the confirmation of the report of the commissioners of the assessment for widening Chapel street, a member of the Board of Aldermen offered a resolution in the following words:

Resolved, That the Committee on Streets, with the Street Commissioners, be requested to inquire into, and report upon the expediency of altering the present grade of Chapel street, and that the same be done when the said improvement is carried into effect, with a plan or profile of the same."—*Pro. Bd. Ald., vol.* 10, *page* 158.

On the 25th of April, 1836, the Street Committee of the Board made a report in favor of changing the grade of Chapel street from Read to Canal street, and the adjoining streets from Duane to York streets, both inclusive. In this report the committee suggest "the present sewer be taken up and reconstructed of a proper size and form;" that "it is consequently much too small in size for the free delivery of the water which it necessarily has to receive." The committee also state, "and although this branch of the subject was not *specially* referred to them," &c. The committee include, as a part of their report, the following resolutions:

Resolved, That the graduation of Chapel street be changed by filling up and elevating the surface thereof from Read street to Leonard street, according to the blue lines drawn on the accompanying profile marked No. 1, and from Leonard street to Canal street by filling up and elevating the surface thereof according to the red lines drawn on the same profile.

Resolved, That the graduation of all such portions of the intersecting streets, from Duane street to York street, both inclusive, be changed in conformity with the proposed change of Chapel street, by filling up and elevating the surface thereof according to the lines drawn on the accompanying profile marked No. 2, that is to say, according to the blue lines drawn for Duane, Thomas and Anthony streets, and according to the red lines drawn for Leonard and the other intersecting streets up to York street.

Resolved, That the present sewer in Chapel street be taken up, and that a new sewer of *proper size and form*, according to the recent improvements, be constructed in Chapel street, from Duane street to Canal street, with lateral culverts at such of the cross streets as may be required, and with proper receiving basins at all the corners, the expense to be incurred by the before mentioned alterations of gradations and constructing the sewers, culverts and basins, to be assessed in the usual manner on the property benefitted, according to the provisions of the statute of the State in such cases made and provided.

Resolved, That the Street Commissioner prepare and present for passage the ordinances

necessary and proper to carry into effect the object of the preceding resolutions.

Adopted by the Board of Aldermen April 25th, 1836; by the Board of Assistants, May 2d, 1836.

Approved by the Mayor May 4th, 1836.

(Signed,) J. MORTON, Clerk.

—

This report was adopted, and resolutions passed the same day and the same evening, without suspending the rule, sent to the Board of Assistants for concurrence, and was the same evening referred by that Board to the Street Committee, which at the next meeting reported upon the report of the street committee of the other Board, which was at once adopted, and was subsequently sent to the Mayor for approval, and by that officer signed as approved.

On the 10th of May, which was the second Tuesday of May, 1836, the members of the Board of Aldermen and of the Board of Assistant Aldermen, elected to office on the 2d Tuesday of April, 1835, for one year, and sworn into office on the 2d Tuesday of May, 1835, convened in the respective chambers, and notwithstanding that their previous terms of office had expired with the last moment of the day previous, actually proceeded to business in defiance of the laws of the State, and pretended to pass, among other matters, two ordinances in the following words:

Be it ordained, by the Mayor, Aldermen and Commonalty of the city of New York, in Common Council, *convened*, this sixteenth day of May, One thousand, eight hundred and thirty-six, That the graduation of Chapel street and adjoining streets be changed agreeably to lines drawn on the profiles in the Street Commissioner's office, and that the streets be repaved in conformity to the same, under such directions as shall be given by the Street Commissioner and one of the City Surveyors.

And be it further ordained, That John Ewen, junior, J. S. Warner, and M. D. L. Gaines, be, and they are hereby appointed to make an estimate of the expense of conforming to the provisions of this ordinance, and to make a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantages which each shall be deemed to acquire.

—

CITY OF NEW YORK, ss.:

We whose names are hereunto subscribed, do severally swear that we will make the estimate and assessment directed by the above ordinance, fairly and impartially, according to the best of our skill and judgment.

JOHN EWEN,
J. W. WARNER,
M. D. L. GAINES, } Assessors.

Sworn to by John Ewen, Jr., J. S. Warner, and M. D. L. Gaines, on the 28th day of January, 1837, before me,

C. W. LAWRENCE.

—

Be it ordained, By the Mayor, Aldermen, and Commonalty of the city of New York, in Common Council convened, this 10th day of May, 1836, that the present sewer in Chapel street be removed, and that a new sewer be constructed from Duane to Canal street with lateral culverts, &c., under such directions as shall be given by the Street Commissioner, and one of the City Surveyors.

And be it further ordained, That Lovell Purdy, Joseph N. Lord, and Richard B. Fosdick, be, and they are hereby appointed to make an estimate of the expense of conforming to the provisions of this ordinance, to make a just and equitable assessment thereof, among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantages which each shall be deemed to acquire.

—

City of New York, ss.

We, whose names are hereunto subscribed, do severally swear, that we will make the estimate and assessment directed by the above Ordinance, fairly and impartially, according to the best of our skill and judgment.

LOVELL PUBDY,
JOSEPH N. LORD,
RICH. B. FOSDICK, } Assessors.

Passed the Board of Aldermen, May 10, 1836.

Passed the Board of Assistants, May 10, 1836.

Approved by the Mayor, May 16, 1836.

J. MORTON, Clerk.

Sworn before me, this 31st day of October, 1836, by Lovell Purdy and Richard B. Fosdick; Joseph N. Lord, sworn November 1st, 1836. C. W. LAWRENCE, Mayor.

—

The resolution of the 18th of January, the report and resolutions of the 25th of April in the Board of Aldermen, the vote of concurrence in the Board of Assistants of the second May; the ordinances of the 10th May, in both boards, were all pretended to be passed by the respective boards at the several times here named without calling the ayes and noes and publishing the same, and without publishing the resolutions, or reports, or the said ordinances, in all *or any* of the newspapers employed by the Corporation, as required by law.

The persons interested were therefore without notice, and were wholly ignorant of all these said proceedings.

The members of the Board of Aldermen, of the Board of Assistants and the Mayor of the city, who were elected to office on the 2d Tuesday of April, 1835, were on the first moment of the 2d Tuesday of May, 1836, *functus officio*, the new members being at that moment entitled to their seats.

The act of 1830 provides that the members then in office should continue in office until their successors should be elected and entitled to be sworn into office, and they shall be elected on the 2d Tuesday of April, 1831, and sworn into office on the 2d Tuesday of May of the same year. Their successors were on that day elected, and were sworn into office on the day designated, and were elected for one year.

The law knows no division of a day in the computation of years.

The ordinances claimed to have been so passed by both boards, were, on the 16th day of the said May, sent to Cornelius W. Lawrence, Mayor of the city of New York, who had been elected to office as Mayor on the second Tuesday of the month of April, immediately preceding. And the said Cornelius W. Lawrence signified his approval of the said ordinances by signing his name on the back of the following communication, which are claimed to have been envelopes to the said respective ordinances:—

The Street Commissioner herewith covers the draft of an ordinance for removing the present and constructing a new sewer in Chapel street, from Duane to Canal street, with lateral culverts, &c., in order that it may be passed and assessors appointed thereto.

Respectfully submitted.

JOHN EWEN, Street Commissioner.

Street Commissioner's Office, May 10, 1836.

Approved, May 16th, 1836.

C. W. LAWRENCE.

—

On or about the 20th day of the said month of May, an advertisement, purporting to be of the Street Commissioner of the city of New York, was published in the Evening Post, inviting proposals to contract for removing the then existing sewer in Chapel street, and for constructing a new sewer over or on the bottom

of the former, and of less size. By means of this said advertisement, the proceedings of the Common Council and officers of the Corporation, in these matters, first became known to the owners and occupants of property to be affected thereby, and inquiry was at once set on foot which developed the mischief.

A remonstrance was immediately drawn up against the proceedings in question, stating that the advertisement for a contract was the first information that the parties interested had in the matter; that the then existing sewer in Chapel street was of the very best, large and well built, of the best of hammered stone laid in cement; that it was then in good condition and answered every needed purpose, and the pavement was also good and required neither alteration nor repair, and also stated that the grade required no change. The remonstrance further stated that all the persons interested were opposed to the changes of grade —the destruction of the sewer and pavement; that it would damage the property of the citizens at least one hundred thousand dollars, and cause an expense of fifty thousand dollars in addition. The remonstrants complained of the act of the Corporation in the premises as being illegal, arbitrary, oppressive and unjust, and asked the Common Council forthwith to repeal the obnoxious ordinances. This remonstrance was signed by E. Meriam and fifty-seven others, owners of property affected by the proceedings, and was, on the 15th day of June, presented in the Board of Assistants by Mr. Tallman—as follows:—"Memorial of E. Meriam and others against building a new sewer in Chapel street. Referred to the Street Committee." (See Pro. B. Asssistants vol. 8 p. 36.) The Street Committee had two meetings: the remonstrants appeared before them and objected to the proceedings. One of the officers of the Corporation, who was also one of the assessors also one of the members of the Common Council, stated at one of these meetings to the remonstrants that they would be at little or no expense, inasmuch as the owners in the burnt district had a surplus of earth which would raise the grade of the street, and that they would pay a large sum for the privilege of placing it in Chapel street; that this sum would pay the expense of the sewer, and that the paving belonged to be paid for by the Corporation. This statement was made *in bad faith*, for the Corporation had already contracted to pay about fifty thousand dollars for the materials and work, and to pay for it when the money should be collected from the citizens, for which an assessment was to be aid, as appears by the following contract:—

SPECIAL CONTRACT.

Street Commissioners's Office.

This agreement, made and concluded this 21st day of June, 1836, between the Mayor, Aldermen and Commonalty of the city of New York, by their Street Commissioner John Ewen Jun. of the first part, and Thompson Price of the second part, Witnesseth, that the said party of the second part hath agreed, and doth hereby agree, under the penalties expressed in a bond this day given to the parties of the first part, to furnish materials and build a sewer with the requisite culverts and receiving basins, in Chapel street, from Thomas street to the sewer in Canal street—said sewer to be built on or over the bottom of the old sewer, and so much of the old sewer to be taken up as may be essential to construct the new, also a latteral sewer with culverts and necessary basins in Thomas street, to connect with the sewer in Chapel street—the whole to be placed at the depths as represented by the plan in the Street Commissioners' office, for the consideration herein after named.

1. The sewer and culverts to be built as follows: To be of circular form, the main to be one brick or eight inches, four feet eight inches in the clear, and about 1790 feet long. The latteral sewer to be one brick or eight inches thick, three feet six inches in diameter in the clear, and about 175 feet long.

2. The brick used must be of the best kind of hard brick and laid on good lime and sand mortar, and the upper part to be keyed with slate and grouted with lime and sand mortar. The stone used must be good blue building stone, laid in such manner as to form a solid bed to receive the brick of the sewer agreeable to the plan in the Street Commissioners' office.

3. Openings of eight inches square to be inserted in the wall, at the distance of 25 feet apart, to receive the house drains; these openings to be made one foot above the bottom of the sewer inside, and to be be covered with a flat stone, to prevent the earth from going into the same.

4. The openings to be worked in the top of the intersections of the streets, as they cross from the east side, and midway between the intersections, to be 20 inches square, and finished with four hammered, wrought, blue, cut stone, to be covered with a blue flagging stone four inches thick, and projecting on all sides at least three inches, then are to be filled over to the heighth of the street, and have four strong blue curb stones set on edge to designate where the opening may be found.

5. The lower part of the sewer, for the distance of 200 feet, to be built and time allowed for the mortar to set before the upper part is worked on.

6. Two or more culverts, as shown in the plan, to extend from the sewer to the circular corner of the curb; the culverts to be underlaid with a course of small-sized blue building stone, laid in lime and sand mortar, and are to be two feet six inches in diameter. The receiving basins are to be built conformable to the model to be seen at the Street Commissioners' office.

7. For completing the main sewer, including all the materials and workmanship, the excavating, filling up the trench and ramming the earth, the sum of $4, 97 per lineal foot.—For completing the latteral sewer, in like manner as the main sewer, the sum of $3, 30 per foot. Openings in the top of the arch, $7,75 each. Receiving basins complete, $87.

8. All the materials shall be of the best quality, and every thing shall be supplied, whether mentioned in this contract or not, that shall be required for the construction of the sewer.—The whole shall be done under the direction of the Street Commissioner, or such person as he shall appoint as Inspector, who shall cause any material or work which he may disapprove to be done over, and other material and other work to be substituted.

9. Payments shall be made as soon as the money is collected on the assessment to be laid for that purpose, and all interest money paid in by the collector in the assessment shall be laid for the benefit and account of the contractor.

10. The said contractor doth hereby further agree, that he will not sub-let or contract any part of the above mentioned work to any other person, but that he will keep the whole solely under his own control.

11. The said contractor hereby further agrees that he will commence the said work on or by the 15th July, and complete the same by the 1st October, 1836.

In witness whereof, the parties to these presents set their hands and seals, the day and year first above written. Signed,

THOMSON PRICE.

Sealed and signed in presence of
J. S. WARNER.

—

CONTRACT FOR PAVING CHAPEL AND ADJOINING STREETS.

This contract was made in June, 1836, with Messrs. Pettigrews. The work was to be completed by the 15th November, 1836, and Ten dollars forfeiture for every day which should elapse beyond that time that the work should remain incomplete. The price for *paving* to be forty cents per square yard, curb fifty-eight cents per foot, gutter stones forty-six, bridge stone twenty-eight cents, corners Eight dollars, filling in six cents per load; the rubbish, &c., to be removed from off the ground by the contractors. The work to be paid for when the money is collected from an assessment to be laid for that purpose. We have detailed the price of the curb, gutter, bridge and corner stone from memory. The prices of these may differ two cents, not more. The substance of the contract is stated, which is all that is material for our present purpose.

—

The Street Committee subsequently made a report, which is to be found in the documents of the Board of Assistants vol. 8, p. 58, as follows: "By Mr. Woodhull. Report of the Street Committee, adverse to the petition of E. Meriam and others, for a REPEAL OF THE ORDINANCE FOR GRADING CHAPEL STREET—adopted" (See Doc. 19.) The title is stated in the preamble of the report thus—"The Street Committee to whom was referred the memorial of E. Meriam and others for a repeal of the ordinance for the raising and grading of Chapel street, and for constructing a new sewer through the same."

The Committee among other things say—"That it would be extremely improper and unsafe as a *precedent*, and altogether unnecessary and unwise in point of fact, or in reference to its results, to open anew the subject of a law, and commence a review of its merits, immediately after its passage."

This report was adopted by the Board of Assistants. The Board of Aldermen not having been able, in consequence of being equally divided 8 to 8, to elect a President, from the first meeting on the 2d Tuesday of May until the month of July.

In July, the contractors for removing the then existing sewer and building a new sewer, for re-grading the street, &c., commenced the work of destruction. When the workmen had reached the stone sewer, the Superintendant, John Shephard Jun. Esq., forbid them to proceed—insisting that the sewer was then far better than any new sewer could be made, and that it would be both a sin and a shame to destroy it. The Street Commissioner was sent for, and came, and said such was the profile, such the contract, and such was the ordinance, and the sewer must be taken up.

The sewer, which at that time was demolished, was in perfect good condition: it was examined when broken up by Smith Bloomfield Esq., by whom it was constructed, by John Shepherd Esq., the inspector of the building of the new sewer, and by others. This said sewer, thus destroyed, was six feet wide in the clear at Canal street, and five feet wide in the clear at the corner of Franklin street. The height at Canal street was six feet in the clear, and at Franklin street 4 feet high in the clear. The bottom or floor was laid with best Connecticut blue flagging stone, four inches thick, laid sloping, two inches to the foot, from the sides to the centre. The walls were made of best hammered stone, two feet thick at the bottom and twenty inches thick at the top, sloping to the springing of the arch. The arch was thirteen inches thick, and keyed with slate. The openings for the house-drains were eight inches from the bottom of the inside. The foundation on which this structure laid, was heavy and substantial stone masonry. The whole was a piece of work of extraordinary good quality, and would have lasted for a thousand years. The specifications here given can easily be compared with those of the contract herein before set forth, as to size, materials and workmanship of the new sewer. It will be seen by a reference to width and height of the former sewer that, as the sewer continued toward Canal street, as it increased in length it increased proportionally in size. The shape of this sewer for an under-drain is preferable to a circular sewer, inasmuch as a greater quantity of water will run in the sewer below the openings for the house-drains, below eight inches from the bottom of the inside, and eleven inches from the centre, than below the first twelve inches in the lower part of a circular sewer of the specified size of the new sewer, besides, take the capacity in feet of measurement of the inside of the two sewers as herein specified, and it will be seen that the former sewer was *double* the size of the present one! A circular sewer cannot be advantageously entered by an under-drain below its centre—to perforate such a sewer below the centre would be like perforating the lower part of a barrel with a view to filling it.

We will state as a complete illustration of the comparative usefulness of the two sewers, some facts as to Mr. Riley's cellars, at the corner of Chapel and Franklin streets.

At this point the former sewer was four feet deep in the clear, the centre of the floor of the sewer two and a half inches lower still, making four feet two and a half inches; the thickness of the arch was thirteen inches, the covering of earth and pavement over all, 16 inches: thus we have from the surface of the street to the surface of the floor of the sewer in the centre, in all, six feet seven and a half inches. The new grade of Chapel street is raised at this point three feet and one inch: therefore, had the former sewer been left as it was, and the street raised as it is, the bottom of the sewer would have been nine feet eight and a half inches below the surface of the present pavement.

The top of the arch of the present sewer is now sixteen inches below the surface of the pavement; the contract states that the wall is eight inches thick, and the sewer four feet eight inches in diameter; all these added together make a total of six feet eight inches. Thus it is from the surface of the present pavement to the bottom of the inside of the present sewer, six feet eight inches; and this calculation agrees, within an inch, with the actual measurement by an iron rod inserted in the crown of the arch of this sewer, through the perforations made in the iron ventilators at this point. *Thus we have a mathematical demonstration.* The openings for the house-drains in the former sewer were four inches lower than in the present sewer; add to this the difference between six feet eight inches and nine feet eight and a half inches, and the result is, three feet four and a half inches in favor of the *former sewer*, and against the *present sewer*. Mr. Riley could therefore have a cellar three feet four and a half inches deeper with the former than with the present sewer. Since the present sewer has been in use, Mr. Riley's premises have been inundated with water, whereas with the former sewer, they were not troubled with the water at all. The damage to his premises by the raising of the street, and removing the sewer, is at least FIVE THOUSAND DOLLARS, and for this *so-called improvement* he has been assessed near one thousand dollars.

Mr. Andrew Lockwood is the owner of fourteen houses on the next block, toward Canal street, which are also damaged several thousand dollars; he also has been assessed, and near two thousand dollars, for this so-called improvement. A very great number of others were also damaged to a very great amount, and instead of being awarded for such damages as they should have been, were assessed for a pretended benefit.

We have rather departed from our stating of the proceedings to make these remarks, and will now proceed with the entire stating part, until we have finished up to the time of applying for the certioraris.

As we before observed, the contractors commenced work in July, and the sewer was completed in October following, but the grading and pavement were not finished until the month of June, in the year following. The streets remained in an unfinished and almost impassable state during the fall of 1836 and winter and spring of 1837.

Subsequent to the completing of the sewer, the surveyor, as it now appears, made out a certificate of the measurement, &c. of the sewer &c., as follows:—

This certifies that the length of the sewer in Thomas street is 362 feet, with six openings—$3. 30.

The length of the sewer in Chapel street, south of the north side of White street, 1622 feet—$4. 97.

The length of same from White street where it enters the sewer in Canal street, 782 feet—$5. 37.

There are fifteen openings in Chapel street sewer—7. 75.

There are twenty-eight receiving basins in both sewers—$87.

550 feet culverts in both sewers—$2. 55.

DANIEL EWEN, City Surveyor.

New York, Oct. 20, 1836.

—

The surveyor also made out an assessment list and map, all but extending the columns of dollars and cents.

The assessors append to this an abstract in the words following:—

Abstract of assessment for building a sewer in Chapel and Thomas streets.

Sewer in Thomas street—362 feet, at $3. 30 per foot - - - -	$1194. 60
Six openings in top of sewer in Thomas street, at $7. 75 - -	46. 50
Sewer in Chapel street south of the north side of White street—1022 feet, at $4. 97 per foot - -	5079. 34
Sewer in Chapel street from White street to sewer in Canal street—782 feet, at $5. 37 per foot -	4199. 34
Fifteen openings in sewer in Chapel street, at $7. 75 - - - -	116. 25
28 receiving basins, at $87. 00—these openings on both sewers	2436. 00
550 feet of culverts on both sewers, at $2. 55 per foot - - -	1402. 50

March 27th, 1837

"For a sewer in Chapel and Thomas street. Warrant to issue to Asher Martin, Collector." p. 447.

"A petition of A. Lockwood and others, to have the sewer in Chapel street examined and repaired, was referred to the Committee on Roads and Canals."—*Page* 468.

—

Same volume, page 593.

In the report of the Committee on the Petition of A. Lockwood and others, they ask to be discharged from the further consideration of the subject. They say, among other things in the said report, as follows:

"The new sewer was placed upon the bottom of the old one, where the same has not settled, and is elevated but eight inches above it. *The Street Commissioner* has made an examination into the cause of the complaint, and has found that the WHOLE difficulty proceeded from neglect, on the part of the owners, to construct drains from their cellars to the sewer, the sewer being dry and two feet below the level of the cellars."

—

In the month of June the surveyor made an assessment map and an assessment list, for the grading, paving, &c., and a certificate which makes the caption of the list, was made by two of the assessors who signed their names at the end of the list. It is in the words following:

WE THE SUBSCRIBERS, the persons appointed by the Mayor, Aldermen and Commonalty of the city of New York, in Common Council convened, by an ordinance passed on the sixteenth day of May, one thousand eight hundred and thirty-six, to make an estimate of the expense of conforming to a certain order and direction of the said Common Council for grading, regulating and repairing Chapel street, and the adjoining streets from Murray to Canal street, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire, having taken the oath required by law, which is filed in the Street Commissioners' office—

Do hereby certify to the said Mayor, Aldermen and Commonalty in Common Council convened, that we have, according to law, estimated the expense of conforming to the aforesaid order and direction of the Common Council, for grading, regulating and repaving Chapel street, and the adjoining streets between Murray and Canal streets, at the sum of thirty-three thousand six hundred and thirteen dollars and forty-six cents, as follows, that is to say:—

CONTRACT,	$31,979. 28
Surveying,	603. 61
Advertising,	3. 00
Inspecting,	452. 00
Collecting,	259. 77
Profiles,	272, 00
Cleansing privies,	43. 80
	$33,613. 46

And that we have, according to law, made a just and equitable assessment, as follows that is to say.

JOHN EWEN,
M. D. L. GAINES, } Assessors.

The assessment list embraced that part of Varick street which lies between North Moore and Franklin streets, and St. John's lane, which lies between Leight street and Beach street. Varick street and St. John's lane run nearly parallel with Chapel street, but *do not intersect it or adjoin it.* The list also embraced that part of Chapel street extending from Duane street to Murray street. The amount of work stated to be done in these sections is about six thousand dollars.

The assessment list shows that several persons owning lots &c. on the north side of Leonard street near Chapel, and also several persons on the north side of Franklin, east of Chapel street, were not charged any sum whatever for filling in, the profiles showing however that the streets opposite these respective premises were filled in near three feet. The amount of contracts, it will be seen, is stated in gross, and thus apportioned.

Portions of Chapel street had been re-paved at the expense of the owners subsequent to 1824, and was by the following ordinance exempt from further assessment for paving or re-paving.

—

November 21th, 1824.

"Whenever the carriage-way of any of the streets in the city of New York, or part of the same, not less than the space or distance between and including the intersection of two streets, shall be re-paved or newly paved, and the cross-streets and side-walks laid, and the side-walks extended to the width required by law, at the expense of the individual owners of the lots on the same, and the work approved by the Street Commissioner, such streets, or parts of streets, shall forever thereafter be paved, repaired and repaved, at the expense of the Common Council."

It shall be the duty of the Street Commissioner to prepare and keep in his office a book alphabetically arranged, in which shall be entered the names of the streets so paved or repaved and accepted by the Corporation.

—

Chapel street had most of it been repaved in 1820 and 1822, at an expense of about *nine cents* the square yard and not 40 cents.

Same volume, page 176.

By Mr. Hyde. "Report of the same committee, in favor of confirming the assessment for regulating and paving Chapel street.—Adopted."

—

The Committee on Assessments of the Board of Assistant Aldermen, to whom was referred the annexed assessment lists for filling, grading and paving Chapel street and intersections, together with remonstrances and objections, beg leave respectfully to report—

That your committee have carefully examined the subject, having duly notified the parties to appear before your committee, in order to obtain all necessary information touching the premises. The Contractors and Superintendents of the said work were severally examined as to the manner and time in which it was completed. Their evidence given was satisfactorily conclusive that the delay in the completion of said work was caused by unavoidable circumstances, over which the contractor had no control, and that the work was as well done as the nature of the ground would admit of. Although your committee had notice sent to several of the remonstrants, yet but one of them appeared before us, viz. Andrew Lockwood, Esq., who stated that he was proprietor and owner of thirteen houses, situated on the premises, and that he suffered in loss of rents about several hundred dollars in consequence of water running into the lower part of his houses. Furthermore, that he filled in his sidewalks at his own expense. Your committee have also made enquiries of Mr. Ewen, Street Commissioner, who states that in his judgment the completion of said contract was protracted by unavoidable circumstances. Mr. Bolster, Superintendent of Pavements, has given his certificate, certifying that the pavement was as well done as the nature of circumstances would admit of. Your committee have, therefore, under consideration of all the facts that they have been able to elicit, come to the conclusion to recommend the following resolution:

Resolved, If the Board of Aldermen concur, that the assessment for filling, grading and paving Chapel street, be, and the same is hereby confirmed.

WM. F. HYDE,
WM. WELLS HOLLY,
PHILIP SNEDICOR, } Committee on Assessments.

—

Proceedings of the Board of Aldermen, vol. 13, *page* 400.

October 4th, 1837.

From the Board of Assistants. "A report of the Committee on Assessments relative to an assessment for filling, grading and paving Chapel street, was referred to the Committee on Assessments."

—

November 27th, 1837.

The Committee on Assessments, to whom was referred the accompanying remonstrance against confirming the assessment for regulating and paving Chapel street, and the streets intersecting the same, respectfully report—

That Chapel street has been widened between Murray and Leonard streets; that, subsequently, resolutions and ordinances were passed by the Common Council to build a sewer therein, and elevate the grade of Chapel street, between Reed and Canal streets, about three feet, and so much of the intersecting streets, intermediate, as were affected thereby; that, in pursuance of these resolutions and ordinances, contracts were made the Street Commissioner to carry into effect these improvements.

The contract for regulating and paving Chapel, and adjoining streets, contemplated the work to be finished in November last. It was not, however, fully completed until the

early part of the succeeding summer, and then not in as satisfactory manner as could have been desired.

The committee have been attended by a large number of persons on this subject, some of whom object to the confirmation of the assessment on the ground that the work has not been well and faithfully done, and within the time limited by the contract. They complain that the pavement has partially settled in many places between Leonard and Canal streets, occasioned, as they believe, by improper filling; that the bridge stones are unusually rough, and that, in consequence of delay in the filling, they were, in some instances, obliged to fill in their own sidewalks to get access to their premises.

Mr. Lockwood, who owns several houses situate on Chapel, North Moore and Varick streets, also complains that the work, being left in an unfinished state during the winter, exposed his premises so that his cellars were partially filled with water, and he was deprived of their use. The greater number of persons who oppose the assessment state that their object, in opposing the same, is not to prevent the contractor from being paid for the work, but to shield themselves from the expense which, they contend, ought to be borne by the corporation, they having been already heavily assessed for widening the street, and for building the sewer, improvements which the public were greatly interested in, and benefitted by, and which were effected without cost to the city, and in opposition to some of them.

The committee consider that the question referred to them is as to the manner in which the contract has been performed, and whether or not the contractor is fairly entitled to be paid for his work. It was stated by Mr. McKibbon, jun., that a portion of the filling was done previous to his being placed on the street as Inspector; that the filling done by Mr. Pettigrew, the contractor, under his superintendence, was good and wholesome; that earth of an improper character was frequently placed on the street during the night by cartmen unknown, which was always carted off by the contractor at his own cost; that the materials used for paving were of a good quality, and were placed down according to contract; that the partial settling of the pavement, in some places, was occasioned by being paved immediately over the new filling; and that the work was, under the circumstances, well done. Alderman Banks stated that he was upon the works daily during the progress; that the contractors were imposed upon by individuals placing improper earth in the streets during the night, which they, in the instances noticed by him, removed at their own expense; that the contractors are probably delayed by the difficulty of obtaining earth, and by buildings remaining in the street which ought to have been removed, and that the filling was, under all the circumstances, as good as could have been expected.

The present Superintendent of Paving informed the Committee that there were ridges in the pavement in front of the houses on Chapel street, and in some places it was sunken, occasioned, as he supposed, by drains being placed across the street which he required to be altered previous to giving a certificate approving of the work, although it strictly might not have belonged to the contractor to do it.

The committee have fully considered this subject, and, under all the circumstances, recommend the assessment to be confirmed.

It amounts to about $34,000, the greater portion of which the contractor has out of one year and upwards.

—

March 25th, 1839.

"The report of the Committees on Assessment and Laws, on the petition of sundry owners of property in Chapel street, and its vicinity, for relief from the payment of assessments for regrading and repaving said streets, and building a sewer therein, being the special order of the day, was called up by Mr. Anderson.

"SPECIAL ORDERS.

"The report of the Committees on Assessments and Laws, on the petition of sundry owners of property in Chapel street, and its vicinity, for relief from the payment of assessments for regrading and repaving said street, and building a sewer therein, being the special order of the day, was called up by Mr. Anderson.

The committee, after giving at large the features of the case, offer the following as a summary of their conclusions:—

1. That the widening, grading and paving Chapel street, is essentially more a public benefit than a benefit to the individuals assessed.

2. That, as such, the charge upon the city treasury of one third the value of the buildings, ought, in justice and equity, to have been made.

3. That though the time has elapsed when this could have been made a legal charge, it is never too late to do justice, and that a mistake in the judgment of the commissioners, when palpable, should not be allowed to work an injury to any citizen.

4. That the neglect of the contractor to fill in the street within the time fixed by his contract, has caused large losses to the petitioners; and that the corporation having failed to collect these damages from the contractor, is bound, in justice and equity, to indemnify the petitioners.

5. That the petitioners were informed, by those who necessarily are the most competent authority on such subjects, that the improvement would cost them nothing, and acted differently under this information from what they would have done, had they anticipated these assessments.

6. That the old sewer was, in all respects, snfficient, requiring only some few repairs, and that the new sewer does not answer the same purpose as effectually.

7. That the corporaton having, in the year 1820, constructed, at the expense of the neighborhood, a good and sufficient sewer, it is a question whether its power was not thereafter limited to *alterations and amendments only*, at their expense, and that therefore the taking up the old sewer and constructing a new one in its place, has become a city charge.

8. That it is a matter of doubt whether, under the 175th and 176th sections of the act of 1813, an assessment should not have been made before the improvement was commenced, as is always done in the opening and extending of streets, in order that the common council might accurately judge whether the improvement would be beneficial or not.

9. That the widening of Chapel street, the regrading and repairing of the same, and the building a sewer therein, though done under different ordinances, *is but one whole improvement*, and that under the act of April 16th, 1836, the owners of the property affected by the regrading of the wide part of Chapel street, should have been allowed the damages sustained by them in consequence of such regrading.

Your committee therefore recommend the fellowing resolutions:—

Resolved, That the Comptroller draw his warrants in favor of the owners of property on Chapel street, between Canal street and the centre of the block between Franklin and Leonard streets, and also on the intersecting streets intermediate, for the sums paid by them for the building of the new sewer, and the recent regulations and paving of Chapel streets and the streets intersecting the same.

Resolved, That the assessments upon property as above, which have not been paid, be remitted, and that the Comptroller draw his warrant for the amount in favor of the contractor.

DANIEL F. TIEMANN,
C. C. CROLIUS, jun.,
FREEMAN CAMPBELL,
DAVID GRAHAM, jun.,
ABEL T. ANDERSON,
M. B. HART,
} Committee on Assessm'ts and Laws.

—

"The Report being read, Mr. Potter opposed the adoption of the resolution as recommended by the committee. Alderman Graham advocated the adoption of the resolution at considerable length. Mr. Tiemann called for the AYES AND NAYS, upon the passage of the resolution as recommended by the committee, when the same was adopted, ELEVEN members voting in favor, and two opposed, as follows:

"AFFIRMATIVE—Messrs. Sparks, Anderson, Crolius, Barnes, Campbell, Howe, Hart, Bunting, Graham, Tiemann, Nash.

"NEGATIVE—Caleb S. Woodhull, Ellis Potter."—*Pro. Bd. Assist., vol.* 13, *page* 211.

July 17th.

The Street Commissioner presented a communication relative to the advertisement and sale of property for assessments, which was referred to the committee on finance, together with the petition of E. Meriam and others for relief from assessment for re-grading Chapel street.

—

Proceedings Board Aldermen, vol. 17. *p.* 228.

July 22d.

The Committee on Finance, to whom was referred the communication of the Street Commissioner, relative to the sale of property for unpaid assessments, presented the following report thereon:

The Finance Committee, to whom was referred the annexed communication of the Street Commissioner, with the accompanying list of final delinquents on assessments, on which sixty days have expired since confirmation, respectfully report:

That the returns involve a large sum of money, part of which is due to contractors, and part to the city.

The Committee have considered the subject, and recommend for adoption the following resolution.

Resolved, That the Street Commissioner be, and he is hereby directed to take proper measures, in pursuance of law, for the advertisement and sale of the property described in the accompanying returns for unpaid assessments.

THOMAS G. TALLMADGE,
EGBERT BENSON.

A motion was made to lay the subject on the table, which was lost.

Alderman Tiemann moved to amend the same by adding the following:

"Provided, such sale shall not take place before the first of February next," which was lost on a division called by him.

AFFIRMATIVE—Ald. Smith, Ferris, Willis, and Tiemann—4.

NEGATIVE—Alderm'n Woodhull, Benson, Guion, Ferris, Tallmadge, Hart, Cook, and Nichols—7.

The question was then taken on the resolution as reported, and the same was adopted, on a division called by Ald. Tiemann.

AFFIRMATIVE—Alder. Woodhull, Benson, Guion, Ferris. Tallmadge, Hart, Cook, and Nichols—8.

NEGATIVE—Ald. Smith, Willis, and Tiemann.

And the same was directed to be sent to the Board of Assistants.

—

Proceedings of the Board of Assistants, vol. 14, *page* 223.

July 29th.

From the Board of Aldermen. Report of the Finance Committee, on the communication of the Street Commissioner, relative to the advertisement and sale of property for improvements, accompanied by the following resolution, to wit:

Resolved, That the street commissioner be, and he is hereby directed to take the proper measures in pursuance of law, for the advertisement and sale of the property described in the accompanying returns of unpaid assessments.

Mr. Balis moved that the whole subject be referred to the committee on finance, and the ayes and noes being called, the motion was carried by the following vote:

Affirmative: Messrs. Balis, Deming, O'Neill, Connor, Vandevoort, Campbell, Dodge, the President, 8.

Negative: Potter, Timpson, Pollock, Lee, 4.

So the resolution and accompanying documents were referred to the Committee on Finance.

On motion a recess was ordered for thirty minutes.

Mr. O'Neil moved to reconsider the vote of the Board, referring to the Committee on Finance the reports and resolution of the Board of Aldermen, in relation to sales of property for unpaid assessments, and the motion prevailed.

Mr. Campbell moved to amend the Resolutions by adding the words "except the assessments for regulating Chapel street."

The ayes and noes being called, on the motion to amend, the same was lost by the following vote:

Affirmative—Messrs. Vandevoort, Campbell, and Dodge—3.

Negative—Messrs. Balis, Deming, Potter, O'Neil, the President, Pollock, Lee—7.

The question then recurring on the motion to concur in the resolution, the ayes and noes were called, and the members voted as follows:

Affirmative—Messrs. Balis, Deming, Potter, O'Neil, the President, Pollock, Lee.

Negative—Messrs. Vandevoort, Campbell, Dodge—seven voting in the affirmative and three in the negative. The resolution was concurred in.

—

Pro. Bd. Ald., vol. 17, *page* 253.

August 7th.

Petition of sundry owners of property in Chapel street, praying relief from erroneous assessments for re-paving Chapel street.

Alderman Robert Smith presented the following resolution in relation thereto, viz.:

Resolved, That the assessment for re-grading Chapel street be stricken from the list of property directed to be advertised and sold for the non-payment of assessments, and that the Comptroller draw his warrant in favor of the contractor for the amount thereof, at the time when the other contractors shall be paid by a sale of the property assessed.

Alderman Lawrence moved to refer the whole to the committee on assessments and laws, which was adopted, on a division called by Alderman Tiemann.

Affirmative—The President, Ald. Phœnix, Woodhull, Benson, Tallmadge, Cook, Lawrence, and Nash—8.

Negative—Ald. Guion, Smith, Ferris, Willis, Chamberlain, and Tiemann—6.

—

Proceedings of the Board of Assistants, vol. 16, *page* 230.

By Mr. Anderson. Petition of sundry owners of property in Chapel street, and intersecting streets, for relief from erroneous assessment.

Mr. Anderson with the petition offered the following resolution, to wit:

Resolved, That the Street Commissioner be directed to withhold from advertising and sale the property assessed for grading and repaving Chapel street until further orders of the common council.

After a discussion between Mr. Anderson, in favor of adopting, and Mr. Potter, opposed, the ayes and noes being called, the members voted as follows:

Affirmative—Anderson, Conner, Vandevoort, Campbell, Howe, Dodge, the President, Spader—8.

Negative—Balis, Deming, Potter, O'Neil, Pollock, Lee—7.

Eight members voting in affirmative, and seven in the negative. The resolution was adopted and directed to be sent to the other board for concurrence.

—

Proceedings of the Board of Aldermen, vol. 17, *page* 280.

From the Board of Assistants. Petitions of several owners of property in Chapel street, for relief from assessments, accompanied with the following resolution:

Resolved, That the Street Commissioner be directed to withhold from advertising and sale the property assessed for grading and repaving Chapel street, until further orders of the common council—which was laid on the table.

—

We have thus at length, and in detail, given the heads of the proceedings in the two boards composing the common council, in relation to these assessments, by which it will be seen that the committees in three successive reports *unanimously* admitted the *equity, legality, and justice* of the claim made by the Chapel street sufferers to INDEMNITY, and the Board of Assistants, by a vote of 11 to 2, *sustained* the report, which was the last of the series, and the most extensive, thereby sustaining all the others. These reports would no doubt have been concurred in by the other board, but for the intentional neglect of the chairman of the assessment committee to call that committee together to act upon the report of the committee of the other board, before the session of the common council for which they were elected terminated, as it was his duty to have done. Subsequent to this, application was made to the Board of Aldermen, composing a part of the next succeeding common council, to exclude the Chapel street property from the list of delinquents of the property to be advertised for sale for unpaid assessments, and this application and the assessment list were both referred to the finance committee, of which the chairman of the previous assessment committee of the previous common council was a member, and here again he exerted his power to defeat the application. The committee reported against the Chapel street application, and the report was adopted by the Board of Aldermen. (It was not, however, a unanimous report; Alderman TIEMANN, much to his credit, refused to sign it.) The report was sent to the Board of Assistants for concurrence, and was referred to the finance committee by a vote of 8 to 4.

Subsequently, *and after the Chapel street citizens had left the hall*, a member of the board moved a re-consideration of the vote of reference; the motion for re-consideration prevailed; the same member then moved that the board concur with the board of aldermen, which motion also prevailed. The next Monday night both boards convened, at which time a memorial was presented to the Board of Aldermen by the Chapel street sufferers, asking to have Chapel street property struck out of the list of delinquents of property to be advertised for sale for the non-payment of assessments, and it was moved by Alderman Robert Smith that the subject should at once be disposed of, and without being referred to a committee; but a previous motion having been made to refer, the motion to refer was first in order: it was accordingly referred, and a vote was taken on the previous motion, and carried by a vote of 8 to 7. A duplicate memorial was then at once presented in the Board of Assistants, and was by that board promptly acted upon the same evening, and by vote of 8 to 7 Chapel street assessments were ordered to be struck out of the list of delinquents, and the Board ordered the papers to be sent immediately to the Board of Aldermen for concurrence. The papers were accordingly sent at once to the other board, which, at the time the papers were announced, was not full, and consequently, Alderman Smith moved to lay the papers on the table, and they were laid on the table accordingly. Shortly after, the members who were absent from their seats, returned, whereupon, Alderman Guion moved, that the Chapel street papers be taken up. Alderman Benson opposed the motion, but his opposition did not avail, which being seen by Alderman Tallmadge, he immediately moved an adjournment, which motion, by the rules, has preference. The President put the question, and decided at once, without a moment's hesitation, that it was carried, and jumped out of his seat before a member could ask for the ayes and noes. Had the vote been taken that night in the Board of Aldermen, the Chapel street sufferers would have had a majority of two.

Finding matters thus situated in the Common Council, Alderman Robert Smith advised the Chapel street sufferers to apply to the Supreme Court for redress.

In the month of August, 1839, the Chairman of the Chapel street Committee proceeded to Utica, and made a full statement of the whole matter to Judge Savage, late distinguished Chief Justice of the Supreme Court of the State of New York. After making a verbal statement to Judge Savage, which occupied a whole day, the chairman of the committee placed the papers in the hands of two able legal gentlemen in Utica, HIRAM DENIO AND WARD HUNT, Esqs., for the purpose of making out an application to the Supreme Court for two writs of certioraris. These gentlemen examined the papers, and gave a written opinion that a motion for a certiorari is a proper remedy for the parties complaining. Murray Hoffman, Esq., had previously been applied to by the committee, and he gave a written opinion in the following words:—

In relation to the claim of the parties assessed for the sewer in Chapel street, and for repaving and regrading said st., I am of opinion--

That, as to the latter, the claim upon the Corporation for repayment is well founded and legal; and that those who have not paid cannot be compelled to pay.

That, as to the sewer, there is a very strong legal objection to the recovery of the amount assessed, and I am inclined to think no action can be sustained against those who have not paid.

And that the claim upon the Corporation for repayment, by those who have paid, is just and equitable.

MURRAY HOFFMAN.

New York. January 28, 1839.

Affidavits were made by the relators, and a copy of the same, with a notice of motion for the first Tuesday in December, were *served upon His Honor, the Mayor, in the month of October*, 1839, *in twenty-two months after the confirmation of the assessment.* The affidavit as to the sewer was made by James H. Sayre, and as to the paving and grading by Eben. Meriam, Andrew Lockwood, and Rienier Wortendyke, who, altogether, were assessed about $2500 for paving, grading, &c., exclusive of interest, which at this time amounts to $500 more. The affidavits were very full, and the notice of motion was, that a writ of certiorari would be moved for, and also a stay of proceedings. The motion was most ably argued on the part of the relators by WARD HUNT, Esq., of Utica, and was strenuously opposed by Peter A. Cowdrey, Esq., counsel for the Mayor and Common Council. The court was held by Judge Bronson. The court, after a full argument, took the papers, and after advisement and deliberation, during the session of the full bench of the Supreme Court in January, granted the writ in the paving and grading case, and denied the motion in the sewer case. The order made by the court in the case is embraced in the writ as follows:—

THE PEOPLE OF THE STATE OF NEW YORK:

To the Mayor, Aldermen and Commonalty of the city of New York—GREETING:

Whereas we have understood, on the complaint of Eben. Meriam, Rienier Wortendyke and Andrew Lockwood, that lately certain proceedings have been before you, the said Mayor, Aldermen and Commonalty of the city of New York, in relation to the regrading, repaving, or repairing of CHAPEL STREET, in the city of New York, in the year Eighteen hundred and thirty-six and the year Eighteen hundred and thirty-seven, and being willing for certain reasons that speedy justice should be done to the said Eben Meriam, Rienier Wortendyke, Andrew Lockwood, and all other persons interested in the said proceedings, and being willing for certain reasons that the said proceedings before you remaining should be certified and returned by you into our supreme court of judicature, before our justices thereof: DO COMMAND YOU, that you do certify and return to our justices of our supreme court, before our justices thereof, all and every *ordinance* of the Common Council of the said city of New York passed in the year Eighteen hundred and thirty-six, or at any time since, for repaving, repairing, or regrading Chapel street, in the said city, from Duane street to Canal street, or any portion of said Chapal street, and all and every ordinance of said Common Council, passed in the year eighteen hundred and thirty-six, or at any time since, for repaving, repairing, or regrading St. John's *lane* or Varick street, in the said city, or any portion thereof: and all and every ordinance of the said Common Council for procuring estimates of the expense of making each and every of the said improvements, and the estimates thereupon made: and all and every ordinance of the said Common Council for the appointment of Commissioners of Estimate and Assessment for assessing the benefits or expenses of the said improvements, or either of them, on the owners or occupants of any property, and the assessment thereupon made, together with all the papers and documents, before the said Mayor, Aldermen and Commonalty of the city of New York, previous to the time of ratifying or confirming such assessments tending to show the principle on which the said assessments were made: and all and every ordinance of the said Common Council ratifying or confirming the said assessments, or directing the collection of the monies assessed: and also that you, the Mayor, Aldermen and Commonalty, certify and return, whether any and what part of Chapel street included in the above mentioned improvements, or any of them, was repaved in the year eighteen hundred and twenty-nine at the expense of the owners or occupants of property upon said Chapel street: and also all and every ordinance of the said Mayor, Aldermen and Commonalty, passed or recognized between the year eighteen hundred and twenty-nine and the year eighteen hundred and thirty-six, providing, or showing, or tending to show that such owners or occupants upon Chapel street that were or ought to be exempt from any assessment or expense for the improvement of Chapel street, or any of them, ordered by the said Mayor, Aldermen and Commonalty to be made in the year eighteen hundred and thirty-six: and that the said Mayor, Aldermen and Commonalty certify and return all such maps and profiles of the said streets and improvements as may be necessary to the full understanding and explanation of the matters therein before mentioned, and each and every of them, before our justices of our supreme court, at the capitol, in the city of Albany, on the Tuesday of March next, so that our said justices may further act thereon as of right and according to law ought to be done, and have then there this writ.

Witness SAMUEL NELSON, CHIEF JUSTICE at the Capitol, in the city of Albany, this eighteenth day of January, eighteen hundred and forty. J. K. PAIGE, Clerk.

WARD HUNT, Attorney.

I certify the above certiorari has been ordered and allowed by the Court.

JNO. KEYES PAIGE, Clerk.

Proceedings of the Board of Aldermen, vol. 17, *page* 280.

New York, February 3, 1840.

The undersigned reports to the common council that Supreme Court have decided against the application of Eben Meriam and others for a certiorari to remove the proceedings in relation to the widening of Chapel street and rebuilding the sewer therein, and have granted a certiorari in relation to the repaving and regrading of said street, for the purpose of a more full investigation, but have refused in the mean time to stay proceedings of the Common Council.

Respectfully submitted,

P. A. COWDREY.

Shortly after this communication, the Street Commissioner advertised the property in Chapel and neighboring streets for sale, for the non-payment of this same assessment.

The relators made immediate application to the Supreme Court, for *an attachment*, as for contempt, for proceeding to advertise the property after the due service of the writ of certiorari. The motion was argued by WARD HUNT, Esq., for the relators, and Peter A. Cowdrey, Esq., for the Mayor, &c., on the 1st day of March special term, and on the 16th day of March the court made the following order:—

On motion of Ward Hunt, counsel for the relators, and P. A. Cowdrey, for the Mayor, &c., Ordered, That the advertisements of the property assessed for the regrading, &c., of Chapel street, be discontinued the service of the certiorari, being *per se* a stay of proceedings.

The corporation officers thereupon discontinued the advertisement of sale by taking Chapel street assessments out of the list, as also that for 20th sewer, in which case also a certiorari had been granted.

Three of the persons interested in the sewer; made affidavits in relation to that assessment, and copies of these affidavits, with a notice that a motion would be made by Ward Hunt, Esq., on the part of the relators, on the first Tuesday of the April term, for a writ of certiorari, were served upon the mayor, &c.

The motion was made by Mr. Hunt, and by him argued for the relators, and opposed by Mr. Cowdrey, for the Mayor, &c. The motion was allowed at once by Judge Bronson, who held the court.

THE PEOPLE OF THE STATE OF NEW YORK:

To the Mayor, Aldermen, and Commonalty of the City of New York—GREETING:

Whereas, we have understood on the complaint of James Agnew, Eli B. Budd, and Thomas Riley, that lately certain proceedings have been had before you, the said Mayor, Aldermen, and Commonalty of the city of New York, in relation to the removing of the then existing sewer, and constructing a new sewer in Chapel street, from Duane to Canal streets, in the year 1836, and also in relation to the building a sewer in Thomas street, in the same year, and being willing, for certain reasons, that speedy justice should be done to the said James Agnew, Eli B. Budd, and Thomas Riley, and all other persons interested in the said proceedings, and being willing, for certain reasons, that the said proceedings before you remaining should be certified and returned by you into our supreme court of judicature, before our justices thereof, do command you, that you do certify and return to our justices of our supreme court of judicature before our justices thereof:

All and every ordinance for removing the then existing sewer, and constructing a new sewer in Chapel street from Duane to Canal street, passed by the common council of the said city of New York, in the month of May, in the year 1836; all and every ordinance for building a sewer in Thomas street, passed by the said common council of the said city of New York, in the same month and year; all contracts made in the year 1836, or afterwards, for the building of the said sewer in Chapel

street or Thomas street; all reports, or certificates, or returns of assessors, inspectors, or surveyors made in relation to the construction of the said sewers, or either of them, in the same year or since; all assessment lists, or assessment maps, or assessments made or recommended or imposed for the payment of the expense of constructing the said sewers, and all maps, profiles, papers and documents tending to show what was done under and by virtue of the ordinance above referred to, and also what was done under, and by virtue, or by claim thereof, by the said Mayor, Aldermen, and Commonalty, or their officers, agents, or servants; and all and every ordinance of the said Mayor, Aldermen, and Commonalty, ratifying or confirming the said assessments, or directing the collection of the monies assessed, before our justices of our supreme court, at the city hall, in the city of New York, on the first Monday of May next, so that our said justices may further act thereon, as of right and according to law ought to be done, and have then there this Writ.

Witness Samuel Nelson, Esq., Chief Justice at the Capitol, in the city of Albany, this 7th day of April, 1840.

J. K. PAIGE, Clerk.

WARD HUNT, Attorney.

SUPREME COURT.

The Mayor, Aldermen, and Commonalty of the city of New York, adsm. The People ex rel. Eben Meriam and others.

IN COMPLIANCE WITH THE REQUIREMENTS OF THE ANNEXED WRIT OF CERTIORARI, the Mayor, Aldermen, and Commonalty of the city of New York, do certify and return to the justices of the supreme court of judicature of the People of the State of New York, under their seal, in a certain schedule hereto annexed, the following proceedings, viz.—all and every ordinance of the common council of the said city of New York, passed in the year Eighteen hundred and thirty-six, or at any time since, for repaving, repairing, or regrading Chapel street, in the said city, from Duane street to Canal street, *or any other portion of the said Chapel street;* and all and every ordinance of the said common council passed in the year Eighteen hundred and thirty-six, or at any time since, for repaving, repairing, or regrading *St. John's lane or Varick street*, in the said city, *or any portion* thereof; and all and every ordinance of the said common council for procuring *estimates of the expense* of making each and every of the said improvements, *and estimates thereupon made*; and all and every ordinance of said common council for the appointment of commissioners of estimate and assessment for assessing the benefit or expenses of said improvements, or either of them, on the owners or occupants of any property, and the assessment thereupon made, together with all the papers and documents before the said mayor, aldermen, and commonalty of the city of New York, previous to the time of ratifying or confirming such assessments, tending to show the principle on which the said assessments were made; and all and every ordinance of the said common council ratifying or confirming the said assessment, or directing the collection of the monies assessed, and also what part of Chapel street, included in the above mentioned improvements, or any of them, was repaved in the year Eighteen hundred and twenty-nine at the expense of the owners or occupants of property upon said Chapel street; and also all and every ordinance of the said mayor, aldermen, and commonalty, passed or recognized, between the year Eighteen hundred and twenty-nine and thirty-six, providing, or showing, or tending to show that such owners or occupants upon Chapel street were, or ought to be exempt from any assessment or expense for the improvements of Chapel street, or any of them, ordered by the said mayor, aldermen, and commonalty, to be made in the year One thousand, eight hundred and thirty-six, and all such maps and profiles of such streets as are necessary to the full understanding and explanation of the matters aforesaid.

[L. S.] D. T. VALENTINE.
Assist. Clerk C. C.

The following resolution for widening Chapel street:—

Resolved, That Chapel street be widened twenty-five feet on the N. W. side thereof, beginning at N. W. side of the lot now in the possession of Lawrence Ackerman, about ninety-one feet northerly from Leonard street, and extending thence to Reed; and also that Chapel street be widened twenty-five feet on the N. E. side thereof, beginning on the northerly end of the lot now occupied by Charles D. B. Voise, which said lot is at the southerly corner of Leonard and Chapel streets, and extending thence south-westerly to Murray street.

Resolved, That the counsel of the Board take the proper measures to carry into effect the preceding resolution.

Adopted by the Board of Aldermen, November 2, 1833.

Adopted by the Board of Assistant Aldermen, December 30, 1833.

Approved by the Mayor, Decem. 31, 1833.

Report confirmed, January 5, 1836.

Actual widening, ordered on the 15th May, 1836.

The Mayor, Aldermen, &c., not having made a return to the certiorari in the paving and grading case, a certificate of the clerk of the supreme court was served upon the Mayor, &c., together with a notice of a motion for an attachment as for contempt. On the 7th of April, 1840, the Counsel produced, at Albany, a partial return, and agreed to furnish such other return as the writ called for and the counsel for the relators required, wherefore the motion was not made. This return was taken back to New York by the counsel for the Mayor, &c., the papers were subsequently filed in the office of the clerk of the supreme court, at Albany, and were afterwards removed by the counsel of the Mayor, &c., to the clerk's office in New York, by consent of the clerk at Albany and one of the relators. The affidavit here given is of a date subsequent to the motion at Albany, and is not the same affidavit that was there submitted, although it is contended that the substance is the same. This, however, was a matter of no consequence, as this affidavit should not in fact form any part of the return. The counsel for the relators passing through the city of New York, on his way to Washington, served the counsel of the Mayor and Aldermen with a replicaion.

Subsequently, application was made to the said counsel, to complete his return, which he declined doing, saying that he was not bound to do so, and that the replication had been put in. One of the officers of the corporation, whose affidavit constituted a part of the return, had agreed to alter a clause in the affidavit, by way of explanation, but refused afterwards to do so. This affidavit was that which was withdrawn from the papers after the papers had been submitted to the relators' counsel at Albany, but before the papers were filed.

A notice of a motion, to compel a further return, was served on the Mayor as for the August term. This term was held by Mr. Chief Justice Nelson. There was also a motion for an attachment, or such other order as the Court should think proper to grant as to proceedings of the street commissioner in advertising, that unless the relators in the sewer case, in which a certiorari has been issued, paid the assessments, leases would be executed to the purchaser, for lots, &c., previously sold for the assessments, on a certain day which would arrive before a decision on the certiorari. This motion as to the sewer the relators' counsel considered was within the order made by Chief Justice Nelson, on the 16th March, which is set forth above, that a service of certiorari is *per se* A STAY OF PROCEEDINGS, and the motion was made solely with this view. These motions were both argued by Mr. Hunt, for the relators, and Mr. Cowdrey for the mayor, &c.

The affidavit referred to, is in the words following:—

SUPREME COURT.

The Mayor, Aldermen, and Commonalty of the city of New York, adsm. the People ex rel. Eben. Meriam and others.

City and County of New York ss. John Ewen, Street Commissioner of the city of New York, being duly sworn, doth depose and say that the annexed return contains a full statement of all the ordinances referred to in the certiorari hereunto annexed that have been passed by the common council of the said city, and all the papers and documents before the said Mayor, Aldermen, and Commonalty, previous to the time of ratifying or confirming such assessments, tending to show the principle on which the said assessments were made, and also all such maps and profiles of the said streets and improvements as are necessary to the full understanding and explanation of the matters in the said certiorari mentioned, or any of them, and this deponent further saith that Chapel street, in the said city, from Murray to Chamber, was paved at the expense of the owners or occupants of property upon said Chapel street, in the year one thousand, eight hundred and twenty-nine, and that Chapel street was widened on about the month of May, in the year one thousand, eight hundred and thirty-six, pursuant to the annexed resolution passed December 31st, 1833, and the repaving of such street was rendered indispensable in consequence of such widening, and this deponent further *saith that the expense of repaving Chapel street, between Murray and Reade streets, was charged upon the owners of prop-*

erty within those limits, and did not in any respect affect the property not included therein. And this deponent further saith, according to the best of his knowledge and belief, the practice always has been under the ordinance hereunto annexed, in relation to the expense of repaving streets, passed in the year 1824, to construct the same as not applying to any case where there was a radical change in the street, either by altering the grade or increasing the width thereof, but only to such cases where the pavement was worn or defaced by the ordinary wear and tear of the streets.

JOHN EWEN.

Sworn before me, this 9th day of April, 1840.
S. F. COWDREY, Com. of Deeds.

—

Paving Case.

Mr. Chief Justice Nelson took the papers, and in the month of September made the following orders:—

The motion is made on a misapprehension of the facts. The first affidavit contained the clause proposed to be stricken out, the matter is therefore all right. The motion must be denied with costs. S. N.

Filed Sept. 1, 1840.

—

Sewer Case.

All reasonable means were taken to terminate the advertisement of the Chapel street property. The *legal notices* were in fact stopped, and those beyond this ceased as far as practicable. The parties concerned seem unreasonably sensative in the matter. The advertisements on the service of that rule were put an end to. Denied with costs. S. N.

At the October special term, held by Mr. Justice Cowen, the motion for a further return in the paving and grading case was renewed, and the motion was, without argument, at once granted by the court, upon which the order in the following words was made:—

The People ex rel. Eben Meriam and others, } Ward Hunt, Attorney.
vs.
The Mayor, Aldermen, &c.

A motion having been made in this cause, on the part of the plaintiffs, for a further return to the certiorari heretofore issued in this cause, in regard to the assessment of the expense of repairing or repaving Chapel street, between Duane and Murray streets, or any part thereof mentioned in the proceedings in this cause upon the owners and occupants of property in Chapel street, between Duane and Canal st., and having been argued by Mr. L. H. Sandford for the plaintiffs, and Mr. S. F. Cowdrey for the defendants.

ORDERED, That the defendants do return to the court, as a part of the return to the said certiorari, whether or not any part, and what part of the said expenses were assessed upon the owners and occupants last mentioned, or any part of them. Rule, 7th October, 1840.

—

In January, the counsel for the relators gave notice of a motion to be made at the next special term, of February, for an order to compel the corporation to take a copy of a map off the files which constituted a part of the return in the paving and grading case, in consequence of its not being a true copy of the original; and also that a part of the return made to the order of the court, entered at the October term, should be struck out as being irrelevant. This return is in the words following:—

SUPREME COURT.

The Mayor, Aldermen, and Commonalty of the city of New York, adsm., The People ex rel. Eben Meriam and others.

In compliance with the requirements of the annexed rule, made and entered in the above cause, the mayor, aldermen, and commonalty of the city of New York do certify and return to the justices of the supreme court of judicature of the State of New York, under their seal, that no part of the expense of *repairing* or *repaving* Chapel street, between Duane and Murray streets, in the said city, was assessed upon the owners or occupants of property between Duane and Canal streets, but that the full amount of all the expense of *repairing* and *repaving* Chapel street, between Murray and Duane streets, was assessed upon the owners and occupants of property within these limits, and that no more than the amount of the expense of repairing and repaving Chapel street, between Duane and Canal streets, was assessed upon the owners of property within those limits. And they further say, *that although some of the particular items of expenditure incurred in the repairing and repaving Chapel street, between Murray and Duane streets, may have been in part included in the assessment upon the property between Duane and Canal streets*, yet that other items of expenditure incurred in the repairing and repaving Chapel street aforesaid, between Duane and Canal streets, were in part included in the assessment upon the property between Murray and Duane streets, and that the amount of such expenditure, as first above mentioned and charged upon the property between Duane and Canal street, was less than the amount of such expenditure as last above mentioned and charged upon the property between Murray and Duane streets.

In witness whereof, we, the Mayor, Aldermen, and Commonalty of the city of New York, have caused our common Seal to be hereunto affixed the 15th day of October, in the year of our Lord, One thousand, eight hundred and forty. ISAAC L. VARIAN, Mayor.

By the Common Council,
SAMUEL J. WILLIS, Clerk. [L. S.]

—

At the January term, pending this notice of motion, the counsel of the Mayor noticed the causes for argument, the counsel of the relators applied to Judge Gridley, and obtained a stay of proceedings.

Notwithstanding this stay of proceedings, the counsel for the Mayor persisted in bringing on the argument, which was opposed by the counsel for Relators. The court sustained the counsel for relators, and refused then to hear the arguments.

At the February special term the motion in relation to the paving and grading return was made on the part of the relators, and opposed on the part of the mayor, &c. The court stated, in substance, as follows:—

First, as to the map, that the court would not be misled by it, sufficient appearing to show the true map.

Second, as to the return made in pursuance of the rule of October 7th, relative to assessing north of Duane street certain expenses for paving, &c., south of that street, that the return admitted the only material fact, and it could not be important HOW MUCH or *how little* was assessed.

The judge denied the motion, without costs, as there was, he said, colorable grounds for making it.

—

The motion in relation to the sewer was not made. At the May term of the Supreme Court both causes were noticed for argument by the counsel of the respective parties.

The causes were most ably argued on the part of the relators by Wm. M. Holland and Lewis H. Sandford, Esquires (Mr. Hunt being obliged to leave town at the commencement of the argument), and by Peter A. Cowdrey, Esq. for the mayor, &c. On the returns made by the mayor, &c. to the writ issued in this cause—

The court took the papers, and in the month of November made the following decision in the paving and grading case:—

SUPREME COURT.

The People ex rel. Eben Meriam and *others*, *vs.* The Mayor, Aldermen, and Commonalty of the city of New York.

BRONSON, J. This case depends on the same principles as that on the relation of Agnew and others, in relation to the sewer.—*Certiorari quashed.*

—

The opinion, &c., in the sewer case, will be found next in order, page 181.

—

The returns made in the matter of the assessment for paving and grading Chapel street, from Murray to Canal street, and the adjoining streets, including that portion of Varick street between Franklin and North Moore st. and St. John's lane, between Beach and Laight street, are as follows, viz.—

1. The certificate of David T. Valentine, Assistant Clerk of the Board of Aldermen, under the common seal of the mayor, aldermen, and commonalty of the city of New York, which certificate recites the rule of court entered in this cause, and states that all the papers, documents, &c., as recited, are returned, and that a schedule is annexed. This certificate is without date, and not accompanied with any schedule.

2. The Resolution of the Board of Aldermen and Board of Assistant Aldermen, in relation to the widening of portions of Chapel street, passed in 1833.

3. Resolutions for changing the grade of Chapel street from Read to Canal street, and the intersecting streets from Duane to York street, both inclusive, agreeable to certain lines drawn on certain profiles referred to, which profiles are also returned as to Chapel street, from Read to Canal street, and as to Duane, Thomas, Anthony, Leonard, Franklin, White, North Moore, Beach, Walker, Lispenard, and York, being all the streets which intersect Chapel street from Duane to York street, both inclusive.

4. Resolutions for removing the then existing sewer in Chapel street, and for constructing a new sewer in Chapel street, from Duane

to connect with the sewer in Canal street, with lateral culverts, &c.; and also a resolution that the street commissioner be directed to prepare and present a suitable ordinance for carrying the preceding resolutions into effect. These resolutions are in the form and shape herein before set forth.

5. An ordinance purporting to be passed by the mayor, aldermen, and commonalty of the city of New York, in common council convened the 16th day of May, 1836. This ordinance directs "that the graduation of Chapel street be changed agreeable to lines drawn on the profiles in the street commissioner's office, and that the streets be repaved in conformity to the same." At the foot of an ordinance is an oath, signed John Ewen, J. S. Warner, and M. D. L. Gaines. and sworn to by the persons above named, before Cornelius W. Lawrence, the 28th day of January, 1837. This ordinance is not signed by the mayor, as required by the 12th section of the act of April 7th, 1830; and also an assessment list, to which is attached a certificate signed by two of the assessors, which recites that they had been appointed by an ordinance passed May 16, 1836, to make an estimate of the expense of conforming to a certain order and direction of the said common council for grading, regulating and repairing Chapel street, and the adjoining streets from *Murray* to Canal street, and to make an equitable assessment thereof, &c. Murray street is some hundred feet *south* of Read street, and beyond that district included in Chapel street from Duane to Canal street, Canal street being nearly due *north* of Duane street. Then follows the assessment list which contains the names of 353 persons assessed for the repaving of Chapel street from Murray to Canal street, and the adjoining streets, and embraces an assessment for filling in earth and repaving, and for curb, gutter and bridge stone in Varick street, between Franklin and North Moore; and also for the same items in St. John's lane, between Laight and Beach streets. Also for the same items in Lispenard, Walker, White, Anthony, Thomas, Duane, North Moore, Beach, York, Hudson and Chapel streets, between Duane and Canal streets; and also for excavating earth, repaving, curb, gutter and bridge stone, between Read and Murray streets, and Read, Chamber, Warren, and Murray streets. Likewise for repaving, curb, gutter and bridge stone, and FILLING IN, on the opposite side of the same streets, which were of the same grade before, and now the same grade as the opposite side not charged with any filling. The certificate states the amount of the contract in a gross sum of $33,979 28, and then afterwards specifies the apportionments of it as above. An item of "$43 80 for cleaning privies" is stated in the certificate. The amount of the assessment for that portion of the district embraced in the assessment list, and not authorised by the ordinances, about $6000. Opposite the number of each lot are the feet front of such lot; then, in separate columns, a certain number of loads of filling where the grade is raised, and loads of excavating where the grade is lowered, square yards repaving, feet of curb, gutter and bridge stone; then the expenses of surveying, inspecting, collecting and cleaning two privies between Reed street and Murray street, added together, is spread over the whole district. The more the street was filled in opposite buildings, thereby injuring the basements, the greater was the amount of assessment imposed, and no allowance made for damages as required by the act of April 16th, 1816. The profiles returned show the change of grade, and what description of buildings were affected by it, and to what extent.

6. A communication, dated at the street commissioner's office, May 10, 1836, which states that he encloses an ordinance for changing the grade of Chapel and adjoining streets, and for paving the same, agreeable to such alteration, from Duane street to Canal, that it may be passed, and assessors appointed thereto, and nominates himself as one of the assessors. On this communication is endorsed the substance of the communication, to which is added these words:—

"Passed the Board of Aldermen, May 10, 1836. J. Morton, Clerk.—Passed the Board of Assistants. Concurred in. J. Haggerdon, Clerk.—Approved, May 16th, 1336. C. W. Lawrence.

7. A report of the Assessment Committee in favor of confirming the assessment for repaving Chapel street and adjoining streets, from Murray to Canal street, which was adopted by the Board of Assistants, October 2, 1837.

8. Report of the Assessment Committee of the Board of Aldermen in favor of concurring with the assessment committee of the board of assistants in confirming the assessment for repaving, &c., Chapel and adjoining streets from Murray street to Canal street, which was adopted by the Board of Aldermen, December 22, 1837, and both reports approved by the Mayor, December 23, 1837.

9. The ordinance of November 24, 1824, and three subsequent ordinances, exempting streets and parts of streets newly paved or repaved, subsequent to the date of the passage of the respective ordinances, from any further charge for repaving, paving, or repairing.

10. An imperfect copy of the original assessment map showing the district embraced by the assessment.

11. The original writ served on the Mayor.

12. Affidavit of John Ewen, Street Commissioner.

DENIAL OF A CERTIORARI.

In December, 1840, a motion was argued at the special term of the Supreme Court on behalf of J. B. Elmendorf, Sampson Moore, William Giffing, and Moses Barnwell, relators, on an application to the court for a Writ of Certiorari to be directed to the *Mayor, Aldermen and Commonalty of the city of New York*, requiring the said mayor &c. to certify and return certain proceedings of the said mayor, ald. and com. and their officers, in relation to regrading and paving of Chapel and adjoining streets, and to certify and return certain facts set forth by the relators. Mr. Chief Justice Nelson held the court. He took the papers, and held the matter under advisement until during the general term in January, 1841, when he delivered the following opinion, which Mr. Justice Cowen, in a subsequent opinion given by him in the Mount Morris case, says was the opinion of the whole court. This application was made in consequence of the intimation given by Mr. Justice Cowen at the October special term in the same assessment proceeding in which other persons were relators, that the corporation should return the *Facts* instead of bundles of papers.

SUPREME COURT.

The People ex rel. Jacob B. Elmendorf, et al.

vs.

The Mayor, Aldermen, and Commonalty of the City of New York.

Motion for certiorari to bring up assessment for regrading Chapel street from Duane to Canal street.

NELSON, C. J.—It appears that as early as the 25th of April, 1836, the Board of Aldermen adopted a resolution directing the Street Commissioner to report an ordinance for regrading Chapel street from Duane to Canal street, and also the intersecting streets between Duane and York, according to lines drawn on a profile, there referred to as on file in said commissioner's office. The same was sent to the board of assistants, and adopted by them soon afterwards.

That on the 10th of May, both boards adopted the ordinance reported by the commissioners for changing the grade of said streets, and paving same, and appointed three assessors to make the necessary estimate and assessments.

In May, 1836, the relator and others remonstrated to the Common Council against the contemplated improvement, but were induced to give up their opposition in consequence of representations made by the commissioners or some of them, that the expense would be trifling, &c.

A written contract was made and entered into by the street commissioner for the work previous to June, 1836, and before the estimate and assessment was *formally* made.

It further appears that the expense of regulating and paving Chapel street between Murray and Duane streets, and also a part of Varick street and St. John's lane, was included in the estimate and assessments not embraced in the ordinance of the common council. The amount however is comparatively trifling. The assessors made their estimate and assessment sometime in the *summer of* 1836, and reported to the Board (the amount $33,613 46), which was duly confirmed. In *June*, 1837, the common council were applied to by a number of persons interested for relief and to vacate the assessment—the board of assistants adopted resolutions granting the application, but the same were never acted upon by the board of aldermen.

There are many other matters detailed in the affidavits on which the motion for a *Certiorari* is founded, not material to notice from the view I have taken of it.

The opposing affidavit shows, that *ten days notice of the application for confirmation* of the report or estimate and assessment was given in some ten of the city papers, inviting objections; and further, that about two thirds of the assessments have been already paid by the owners.

From the above history of the proceedings, it appears that nearly five years have elapsed

since they were commenced by the common council, and *three and a half since the confirmation of the* ESTIMATE *and assessment* of the commissioners. In the mean time, the several streets have been graded and paved, the sewers made, and two thirds of the tax paid by the owners.

The objections relied upon for obtaining the certiorari extend *to almost every step from the adoption of the original ordinance, 10th of May*, 1836, *to the confirmation of the assessment*, JUNE, 1837; AND NO SATISFACTORY REASON IS GIVEN FOR SUCH GREAT DELAY IN APPLYING FOR THIS REMEDY.

Having a DISCRETION OVER IT, *we are bound to regard the consequences that must press upon the city at this late day, if allowed, and regulate our* JUDGMENT *in some measure accordingly.* It would be unjust and oppressive to interfere if they have been greatly aggravated *by the delay.* We should also look into the probable effect of QUASHING the proceedings upon the parties themselves, for if the error is technical and nothing substantial will be gained, the certiorari should be withheld. In the exercise of a sound DISCRETION OVER IT, we cannot grant it where the fruits may be little more than a multiplication of costs and expenses, in addition to serious PUBLIC INCONVENIENCE.

What, then, would be the legal effect of setting aside the assessment at this late day?

1. The loss of the costs and expenses of making it, and of the collection of two-thirds of the amount which ordinarily is no inconsiderable sum, but I concede if the remedy be *promptly* sought this should not constitute a decisive objection.

2. The city, for aught I see, would immediately become subject to a suit by each person who has already paid his assessment. A somewhat formidable consequence when we see that the list of tax payers embraces about ONE THOUSAND persons.

3. The city *must* also be subjected to the entire expense of the improvement, unless a new assessment can be made consistent with the law.

What benefit would the persons assessed obtain?

If a re-assessment could not be made, they would of course obtain exemption from payment of any part of the tax. But on looking at the act [R. S. of City, p. 131] I am inclined to think this might be done, though it is unnecessary to express a definitive opinion here; *an estimate of the expense should doubtless be made before the contracts were entered into or the work commenced;* but I do not perceive the *importance* of the assessment before that period; and there is nothing in the act making it *expressly*, or of *necessity*, a condition precedent.

The streets have been already graded and paved, and the common sewers made; these, of course, would remain undisturbed.

I am aware the counsel also insist, that the original ordinance passed by the common council 1st May, 1836, is void and should be quashed—

1. Because the *ayes and noes were not taken, nor the journal of the proceedings published, according to the 7th section of the charter.* (R. S. of N. Y., p. 512. And 2. *Because the Boards* of Aldermen and Assistant Aldermen *were out of office*, their term having expired on the 9th of May.

As to the first ground, I am inclined to think the statute *merely directory*, and not imperative, *or a condition to the validity of the ordinance;* and as to the second, it is *by no means certain* that the board might not act *on the 10th.*

By the 4th section (R. S. of city, p. 512) the election takes place on the second Tuesday of April, and the aldermen are to be sworn into office on the second Tuesday of May thereafter.

In 1836 this was the 10th day—they are chosen for one year, section 3. The general rule is to exclude the day on which an act is to be done from which time is to be computed IN A STATUTE. These officers are elected for a year, and are to be sworn into office on a certain day, from which time their term begins; *till then they are not aldermen. Even fractions of a day may be regarded*, and by common usage the old board may go out at noon of the 10th, when the new are qualified. In the absence of such usage I APPREHEND THEY HOLD TO THE END OF THAT DAY.

I do not mean, however, to put this case on any view I might take of these objections. They are FUNDAMENTAL, and if sound, show that the whole proceeding is without authority, and all concerned TRESPASSERS; to which *remedy* the parties may resort if they think proper.

I place my refusal upon the UNREASONABLE DELAY IN THE APPLICATION for the certiorari, and the *serious consequences to the city* which must necessarily follow the granting of it, after such a lapse of time, after the improvement has been finished and two thirds of the assessments paid by the owners. *Even writs of error cannot be issued after two years* from the rendition of the judgment, (2 R. S. 49. § 21.)

In analogy to this statute we should refuse a certiorari after the lapse of this period in an ordinary case; MUCH MORE ought we in this one. The right to exercise a DISCRETION and the principles upon which it should be regulated, in these cases, will be found at large in the People *vs.* Supervisors of Alleghany. (15 Wend. 198.

Motion denied without costs.

VETO OF MAYOR MORRIS,

Document No. 9—Board of Aldermen, June 14, 1841.—The following Message was received from his Honor the Mayor, and ordered on file—SAMUEL J. WILLIS, Clerk.

MAYOR'S OFFICE,
New York, June 14, 1841.

To the Board of Aldermen of the City of New York.

Gentlemen—I return to your body the accompanying reports and resolutions and ordinances, viz: Report of the Street Committee in favor of flagging, &c., in Seventeenth street, between Irving place and Union place, and resolution. Report of same committee in favor of paving Ninth street from avenue C to avenue D and resolution. An ordinance to regulate and pave Washington street. An ordinance to build a sewer in Morris street. An ordinance for deepening Storm's basin. An ordinance to pave, &c., southerly sidewalk of Twenty-eighth street, between the Third and Fourth avenues. An ordinance for a well and pump in Twenty-third street.

These were originated in your Board; they have been concurred in by the Board of Assistant Aldermen; and by that body sent to me for my approbation. These direct improvements involving an expenditure of public moneys, or requiring assessments upon citizens, and have been passed without calling or taking the ayes and noes in either branch of the Municipal Legislature. For this omission I am constrained to withhold my approval of them, although there is no objection to the improvements contemplated.

The seventh section of the amended Charter of the City of New York requires, that, "all resolutions and reports of committees which shall recommend any specific improvement involving the appropriation of public moneys, or taxing or assessing the citizens of the said city, shall be published immediately after the adjournment of the board, under the authority of the common council, in all the newspapers employed by the corporation; *and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.*"

Although some of the legal tribunals of the State have decided that the omission to take the ayes and noes upon the passage of such reports and resolutions, and ordinances, does not make them void, while others have maintained a contrary doctrine, still the directions contained in the section of the Charter referred to are obligatory upon the common council, and under no circumstances should they be disregarded.

These provisions were intended to protect the interests of the citizens, by ensuring deliberation and integrity in their representatives, upon subjects involving either taxation, assessment, or an appropriation of public moneys. The authors of the section referred to, wisely determined that the most effectual method to ensure deliberation and honest action on the part of the agent, was to compel him to record and publish his vote; thereby giving to the constituent knowledge of the agent's acts, and exposing each agent to the animadversion of his constituents, when he voted incorrectly.

These provisions of the Charter, if strictly enforced, cannot but prove beneficial to the citizen. It cannot be denied that there are individuals, who may be elevated to office, so singularly constituted as to be influenced in their conduct more by the fear of public censure than by an internal conviction of right, who will vote improperly, and even corruptly, if they can do so without detection and exposure.

To protect the public against the acts of such persons, and to inform the constituents of such acts of the representative, the seventh section of the amended Charter was framed. I conceive it to be the duty of all of us, strictly to enforce observance of every requirement of the City Charter, that uniformly correct precedents may be established; and we may avoid all measures which we have not a clear right to effectuate. That community is most scrupulous in its obedience to the laws, whose officers and legislators are strict in their observance of constitutional and legal requirements.

Example from those in authority is more important than their adjudications or their precepts. We therefore should not only enforce, but obey the law. The City Charter is a Constitution, which we as agents of the people, are bound to obey strictly, not only in its letter, but in its spirit. ROBT. H. MORRIS.

JOHN STREET CASE,

IN SUPREME COURT.

The People ex rel. JAMES FELLOWS, vs. The Mayor, Aldermen and Commonalty of the city of New York, in the matter of widening and straightening John street, in the city of New York.

John W. Edmonds, Esq. for the Relator.

William Inglis, Esq. for the persons in favor of widening John street.

Peter A. Cowdrey, Esq. for the Mayor and Common Council.

At the March special term of 1840 of this Court, Chief Justice Nelson presiding, a motion was made by John W. Edmonds, Esq. on the part of the Relator, for a writ of certiorari to be directed to the Mayor, Aldermen and Commonalty of the city of New York, commanding the said mayor, &c., to certify and return to the said court all the proceedings of the Mayor and Common Council of the city of New York directing the widening and straightening of John street, and in authorising an application to be made to the Supreme Court for the appointment of three Commissioners of Estimate and Assessment.

The affidavit on which the motion was founded set forth that in the adopting the Report of the Committee recommending the widening, &c. of John street, and in the passage of the resolution for carrying the same into effect, the ayes and noes were not taken in either Board composing the Common Council, and the Report and the vote upon the same were not published in any of the newspapers employed by the Corporation under the authority of the Common Council.

The Report of the Commissioners in this case had been confirmed the fourth day of September, 1839, and without any public notice whatever being given of the presentation of the *COMMISSIONERS' REPORT AT THE TERM OF THE COURT.*

Various irregularities, as well as illegalities, were set forth in the papers.

Mr. Inglis proposed to read affidavits of some of the persons who were in favor of the improvement, which Mr. Edmonds objected to. The Chief Justice allowed the affidavits to be read, the substance of which is recited in the opinion of the Court.

Mr. Inglis made an eloquent argument as to the expediency, &c. of widening the street, and stated the street had become of bad repute in consequence of its then bad condition.

Mr. Edmonds replied to him, and fully sustained the position he had taken, that the proceedings were absolutely illegal, and, in addition, the proceedings were irregular, and that the widening of the street at a cost of about two hundred thousand dollars, exclusive of the expense of subsequent improvements, was an **EXPENSE altogether TOO GREAT to be expedient.**

The court took time for advisement, and in the course of about ten days decided and denied the motion, at the same time giving the following brief Opinion :—

Nelson, Chief Justice.—The Writ of Certiorari asked for in this case does not issue ex debito justitiare, but upon cause shown, and rests in the sound discretion of the court. 15 Wend. 198. The object of it is to bring up the proceedings of the common council of the city of New York in the years 1835, '6, '7, directing their counsel to take the necessary measures for widening, &c. John street, alleging certain irregularities and errors therein. No steps have been taken by the relators for the purpose of reviewing these errors till now, March, 1840. In the mean time measures for widening said street have been taken and completed, and an ordinance passed directing the buildings to be removed along the line of improvement by the first of May next. It is quite obvious, even without the affidavits before us, if the proceedings are now to be interrupted, great and serious damage must necessarily result to the owners and tenants. Since the *confirmation of the report*, which was some time previous, they have acted with the understanding and belief that the improvement would certainly be perfected, and have made the necessary arrangements accordingly. The property has not been rented. Other places of residence and business have been procured in the mean time. Contracts and preparations have been made to carry out the alterations of the streets, &c. Unless, therefore, the court is compelled to grant the writ, it seems to me the considerations are strong and decisive against interfering. The relators should not have slept upon their rights for some three years. The court cannot yield to the suggestion that they were ignorant of the proceedings, or of the assessments made by the commissioners.

Besides, I have serious doubts if the remedy would avail them. The confirmation of the report, unless reversed, is made final and conclusive *upon all parties interested* by the terms of the statute. 2 R. Laws, 413, § 178. I do not see how a party could be permitted to question collaterally the conclusiveness of the judgment of confirmation by going behind it. While that stands, he is estopped upon the act, —and if so, were the resolutions of the board annulled directing the institution of these proceedings, they would still be left in full force, as much as a judgment rendered in a suit commenced by attachment or writ, where the latter only are set aside.

Upon the whole, I am clear that the court should withhold its assent to the allowance of the certiorari.—Motion denied without costs.

[From the Saratoga Sentinel—Extra of July 20, 1841.]

IN CHANCERY.

BEFORE THE CHANCELLOR.

Samuel Vandervoort *vs.* the Trustees of the village of Astoria.—J. B. SCOLES, for complainant; G. WINTER, for defendants.

In this case the Chancellor decided that injunctions to stay public improvements should not be granted *ex parte* by Injunction Masters, out of court where there is no immediate danger of irreparable damages being done before the defendants can have an opportunity of being heard. That the Master, in all such cases, instead of granting the injunction in the first instance, should direct an order, to show cause before the court why an injunction should not be granted.

Injunction dissolved with costs to the defendants, without reference to the denial of any matters of the bill by the answer.

IN CHANCERY.

BEFORE THE ASSISTANT VICE CHANCELLOR.

STREET ASSESSMENTS.

Peter G. Stuyvesant and others, vs. The Mayor, Aldermen and Commonalty of the city of N. York.

Opinion of Murray Hoffman, Esq. Injunction Master.

The bill is brought before me as Injunction Master. I have been obliged by my sense of duty to grant an injunction in this and several cases on the eve of the sale advertised to take place on the 27th inst. I am sensible of the inconvenience to the city from an interference at this time, and do it with unfeigned reluctance.

But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterizes the proceedings complained of. I have a deep-rooted conviction that ultimately the decision must be against the corporation; and I believe that the jurisdiction exists in this court to compel the corporation to try the question fairly in a single action at law between them and the complaining party. I think it is within the province of this court to prevent an innocent purchaser being deluded into litigation and probable loss, and to confine the controversy to the alleged wrong-doer and the injured party. This strikes me as the plain, just, and common sense view of the matter. There are in this bill a number of complainants, the several owners of various parcels of property. They may all be bound by the result of one action. Thus, with perfect justice to the corporation, these questions may be tried in the most simple and satisfactory matter, and a contest with a third party averted.

There has been no opinion as yet expressed by the chancellor upon the point of jurisdiction, and I am at liberty to act upon the assumption and my own conviction that it exists.

I may, in a case of such moment, briefly advert to the reasons which led me on a former occasion to consider the neglect of the corporation to call the ayes and noes, and make the publication prescribed by the charter of 1830 a fatal omission.

But in the present bill a new point is taken of much consequence. The proceedings for opening Art street commenced in April, 1837. The report was completed, and the advertisement announcing that it would be presented to the court for confirmation began on the 18th day of May, 1839. The report was filed on the 5th of June, 1839, and confirmed in the ensuing August. It is stated in the bill that, from the examination of the affidavits of publication, and the advertisement, it appears that the publication was made in but three papers,

and does not appear that any notice was affixed in a public place contiguous to the premises. It is charged as a fact that the advertisement was only in three papers, and that no such notice was put up.

By the ninth section of the act of 20th April, 1839, it is provided that all motions (except as before provided) made under the act thereby amended, shall be, upon giving previous notice of the trial, place, and object thereof, published for at least fourteen days in four of the public newspapers, and by copies of such notice in handbills, to be posted up for the same space of time in three conspicuous places adjacent to the property to be affected. (See section 2 for this last clause.) It admits of no doubt that a motion for the confirmation of the report of commissioners falls within the ninth section.

The act repeals the amended act as far as it is inconsistent with the provisions of the new act; and it is directed to take effect on its passage (the 20th of April, 1839), but it expressly provided that no part of it except the *ninth* and *twelfth* sections shall affect any proceedings under the act thereby amended, which had been commenced previously to its going into effect.

It is an irresistible inference that the ninth and twelfth sections *do affect* prior proceedings, if those sections, when applied to such proceedings, are constitutional.

Of that I cannot entertain the slightest doubt. Both the Chancellor and Supreme Court have held that the Revised Statutes are applicable to all existing cases, so far as they affect merely the forms and modes of proceedings. (*The People* v. *Livingston*, 6 Wendell, 526.) Every future proceeding in the assertion of a right or prosecution of a suit is to be governed by the new statutes. In this case, if the advertisement had been begun before the 20th of April, 1839, that would have been a proceeding already commenced, and would not have been affected by the ninth section. But as it was a proceeding commenced after that date, it necessarily falls within it.

In *Aymar* vs. *Gault* (2 Paige, 284) the doctrine was applied to the case of an absent party. The reference under the revised statutes was ordered, to take proof of the claim, although the suit was commenced before they went into operation.

In *Larkin* vs. *Mann* (2 Paige, 27) the rule was applied to the partition suits previously commenced. See also *Parsons* vs. *Browne*, (7 Paige, 359).

This being the law, then it is clear that the present complainants are not bound by the proceedings at all; that they are now at liberty to take every objection of fact or law which they could have taken before the Supreme Court, as well as those which they could not then have taken.

I speak on the supposition that they did not actually attend and contest the confirmation. Without saying whether this would cure the defect or not, it is plain an argument might be raised upon it. But no principle of our law is more sacred than this, that no man shall be affected in person or property without the opportunity of being heard in the proper tribunal. From necessity, perhaps, personal notice has been dispensed with in many cases; these street proceedings among the number. The party who is assessed for benefit merely (no part of his property being taken), is never summoned before the commissioners. He has no notice of the proceedings except by that publication for fourteen days which the old act prescribed, or by the publication under the new act. His property and himself are bound upon the assumption that he has seen that notice. The law therefore must be observed to a scruple. No judge has a right to say that from great publicity, or from the actual taking of one paper containing the notice, or from any thing short of the absolute fulfilment of the requisitions of the statute, the party is to be bound.

What absurdity is it to imagine that the clear command of the Legislature that notice must be given in four papers, and by posting up copies in three adjacent places, is to be fulfilled by any other mode of notice!

I pass over another most important question in this bill, viz: the carrying Art street through a part of the city included in the map of 1807. It is needless to discuss it, in the view I have already taken.

I have, however, had my doubts since the decision of the Chancellor in Vandevoort *vs.* The Village of Astoria whether in these cases I ought, as injunction master, to do more than grant an order to show cause. Certainly the case here is very different; the Trustees of Astoria being in the act of making the improvement complained of. Here it is to prevent a recovery in this mode of the sum assessed for the improvement. I have concluded, however, that it is most proper for me to grant an order to show cause, with a temporary injunction.

I doubt whether I have a right to impose terms upon granting an injunction. Otherwise I should direct that the injunction be on the condition of the complainants filing a written consent with the bill, or endorsed upon it, submitting to abide the decision of an action to be had in a court of law by the corporation against one of the parties, the form and other particulars attending the bringing such action, to be settled by this Court.

John Haggerty and others, *vs.* The Mayor, Aldermen, &c.

The complainants in the bill, who are numerous, seek an injunction against selling their property assessed for the improvement of John street, and advertised for sale on the 27th inst.

I refer to my opinion in the case of Stuyvesant, vs. the Corporation, for the reasons upon which I have allowed a temporary injunction. It is however peculiarly incumbent upon me in this instance, to see that the case before me is substantially different from that of Wiggins, vs. the Corporation, heretofore decided by the Chancellor, and in which an injunction was refused.

In the *first* place, the delay referred to by the Chancellor in the last clause of his opinion is fully accounted for in this bill; and as the Corporation never sued at law, and never advertised until the present notice of sale, there never was an opportunity for the complainants to resist he demand or to apply to this court. I have before held that until an advertisement was begun there was no jurisdiction.

Next, in the case of Wiggins no proceedings to sell the property had been taken.

Again, in that case the statements on the bill did not exclude the supposition that on the record of the proceedings it may have appeared that the ayes and noes were called. That difficulty is fully met in the present case.

Again, the bill was there defective upon the point of the complainant being the actual owner of the property assessed when he filed the bill.—The present bill is in this particular unobjectionable.

And lastly, a new and very important point is here introduced. The report was brought before the Supreme Court in ————, 1838. It was sent back for correction, and the motion for final confirmation made and the rule entered in September, 1839. At that time the 12th section of the act of 20th April, 1839, was in force. The costs were never taxed under that 12th section. The amount is added to the sum assessed, and each of the complainants' property is liable for and was to pay a proportion of such costs. The sale is to raise that proportion as well as the assessments for benefit. Now the section, as I have shown in my opinion in Stuyvesant vs. the Corporation, affects proceedings subsequently taken. It is wholly illegal to charge the costs upon any party until they were taxed. Notice of the taxation is directed to be given in a public manner, and certainly without such notice and taxation the parties assessed cannot be bound to pay them.

It has been decided, from reasons of convenience and in the absence of any peremptory provision of the statute, that costs may be included in the assessment, and imposed prospectively by the Commissioners; and that an inconsiderable variation in the amount taxed from the amount imposed, will not affect the validity of the proceedings, nor prevent the confirmation of the report (Wiggins vs. The Mayor &c. in Chancery, March 6, 1841).

But if the section prescribing a taxation applies to this John st. case at all, it is apparent that no party can be called upon to pay any portion of the costs until a due taxation has been had.—Without such taxation there can be no obligations to pay, and no lien on the party's property. What will be the consequence of this, and whether it may not be corrected by a taxation now and proportionate abatement, I need not inquire. The property is advertised to be sold for a debt, some of which at least is illegally imposed upon it.

By adverting to my opinion in the case of Westervelt & Codwise vs. the Corporation, it will be seen that it is settled law that the costs of the proceedings cannot be assessed upon the property without an express statute; that in a case in Albany, an assessment was set aside for want of such statutory provision; and that in the instance of opening streets in New York, the old act admitted the addition of costs. Now I think the case will appear very clear if we suppose that it had been part of the old act that the cost must be taxed upon notice before they could be added to the assessment for benefit. Certainly they could not be recovered until taxed. I may add that, as the supreme court is empowered to make rules for carrying the act into effect, all inconveniences may readily be avoided.

MURRAY HOFFMAN,
Assistant Vice Chancellor.

CHAPEL STREET SEWER.

We give below the proceedings of the Supreme Court in this matter, and premise them with quotations made from the Reports of the Assessment Committee of one of the Boards composing the Common Council of the City of New York, to be found in Document No. 9 of Volume of proceedings of the Board of Assistants of 1838 as to the merits of the Sewer Question.

"That the Committee have devoted much time and labor in examining the subject committed to them—that they have had before them several persons who have fully set forth all the facts and circumstances connected with this subject, and have fully established the fact that the laying of the new sewer was entirely unnecessary, and consequently an expenditure without any possible good to the parties interested, who are now called upon to pay large sums of money without receiving the *least equivalent therefor.*" This Report was signed by all the members of the committee; and in a subsequent Report they use these words: "Mr. Shepherd, the superintendent to the building of the new sewer in Chapel-street, appeared before your committee and stated that the old sewer was as good when it was taken up as any new one could be made. It was larger than the new one now is, being six feet square, and the new one but four feet six inches in diameter, consequently was an unnecessary expense of $16,571."

SUPREME COURT.

The People ex rel. James Agnew and others,
vs.
The Mayor, Aldermen and Commonalty of the city of New York.

This cause came on for argument at the May term of this court upon the return made to the certiorari. William M. Holland and Lewis H. Sandford, Esqs. counsel for the Relators, and Peter A. Cowdrey, Esq. counsel for the Mayor, &c.

The papers returned by the Mayor, &c. consisted of—

1st. An ordinance for removing the present sewer in Chapel-street, and coustructing a new sewer therein from Duane-street, to connect with the sewer in Canal-street, with lateral culverts, &c. Lovell Purdy, Joseph N. Lord, and Richard B. Fosdick, Assessors.

Upon this ordinance was noted a memorandum in these words: "Passed Board of Aldermen May 10th, 1836. Passed Board of Assistants May 10th, 1836. Approved by the Mayor May 16th, 1836." It was also underwritten as being signed by the Assessors and sworn to by the Assessors Nov. 1st, 1836.

2d. A contract made by the Street Commissioner with Thomson Price in June, 1836, for constructing a sewer in Chapel-street from Duane-street to Canal-street, and a lateral sewer in Thomas-street, together with the necessary culverts at the corners of each street, with receiving basins, &c., and for removing the then existing sewer—the work to be paid for when completed and the money collected from an assessment to be laid for that purpose—the price of the main sewer to be $4 97 per lineal foot—lateral sewer $3 30 per foot—receiving basins $87 each—opening $7 75—all to be completed by the 15th of October following.

3d. Seven assessment maps, setting forth the district embraced in the assessment list, and each particular lot assessed, with the size in feet and inches—and also the profiles of Chapel-street and the intermediate streets from Duane to York-street, both inclusive.

4th. The assessment list, signed by the three assessors named in the ordinance, to which is appended a certificate of the assessors, which recited that they, the said assessors, were appointed by the Mayor, Aldermen and Commonalty of the city of New York, *in Common Council convened*, on the 16th day of May, 1836, to make an estimate and assessment of the expense of removing the present sewer in Chapel-street, and constructing a new sewer therein from Duane-street, to connect with the sewer in Canal-street, with lateral culverts, &c. The abstract, which is signed by the Assessors, and made a part of the assessment, is in these words:

"Abstract of assessment for building a sewer in Chapel and Thomas Streets.

Sewer in *Thomas*-street, 362 feet, at $3 30 per foot,	$1194 60
6 openings at top of sewer in Thomas-street, at $7 75,	46 50
Sewer in Chapel-street, south of the north of White-street, 1022 feet, at $4 97,	5079 34
Sewer in Chapel-street from White-street to sewer in Canal-street, 782 feet, at *five dollars thirty-seven cents*,	4199 34
15 openings sewer in Chapel-street, $7 75,	116 25
28 receiving basins in *both* sewers, $87,	2436 00
550 feet culverts in *both* sewers, $2 55,	1402 50
	$14,474 53

Contract, $14,474 53; Surveying, $585; Inspecting, $291; Advertising, $5; Assessors, $560; Collecting, $473 89; Surveying, $585; Damage to water pipes, 181 66.

5th. The Minutes of the Common Council in these words: "Assessment for constructing a sewer in Chapel and *Thomas* streets, and the appointment of Asher Martin Collector, was confirmed by the Board of Aldermen January 4th, 1837—by the Board of Assistants January 9th, 1837. Approved by the Mayor January 11th, 1837."

6th. Copies of receipts of the Surveyor, Inspector, Assessors, and of payment of damage done to water pipes, and an affidavit of the Street Commissioner, and a certificate under seal of the Corporation that they had returned all the proceedings.

1. The ordinance does not show upon its face that it had been passed by calling the ayes and noes in either branch of the Common Council, as required by law.

2. The contract shows that the assessment was not to be made until the work was completed.

3. The maps show that the Park at the junction of Beach and Chapel streets was omitted to be assessed, and that the Park at the junction of Duane and Hudson streets was assessed. See 3d Wend., Ross vs. the Mayor, &c. of New York.

4. The assessment lists show that it is not an estimate and assessment, as required by the 175th and 176th sections of the Act of April 9, 1813, (2 R. L., p. 407,) but that it is an apportionment of cost, according to the square feet of surface, without any reference to benefit or advantage. The assessment list, which closes with the abstract, shows it is for building a sewer in Chapel-street and *Thomas-street*, whereas the ordinance only authorizes the constructing a sewer in Chapel-street. The expense of building a sewer *in Thomas-street* is spread over the whole assessment district. The abstract shows that forty cents more per foot for 782 feet of the main sewer was assessed (by Assessors) than the price contracted for, making $312 of excess, and that $181 66 was awarded as damage to water pipes, which the Assessors had no authority by law to award or assess. The assessment also shows that there were *two* sewers included in the assessment, and the ordinance authorizes but *one*. The abstract shows that five hundred and sixty dollars fees to the Assessors was included in the assessment, which is for three Assessors, at the rate of four dollars per day each, pay for seven and a half weeks for each Assessor. No such time being required for assessing this amount, it being, as made out, a mere mathematical calculation by apportionment. The law does not authorise assessors appointed by the Common Council to assess any fees upon the owners and occupants of property deemed to be benefitted by a sewer.

The contract also shows that the sewer was to be built on or over the bottom of the former sewer, that its walls were to be eight inches thick, and that the dimensions of the sewer were to be four feet eight inches in diameter and circular form, and that the openings for the house drains were placed fourteen inches from the inside of the bottom. The shape of the sewer shows at once conclusively that it could be no benefit, affording no capacity, because the opening for the house drains for water, and being on the bottom of the former sewer, must consequently raise it the thickness of its walls at least above the surface of the former sewer, affording less drainage for the cellars, and of course a damage instead of a benefit.

This cause was fully argued before the full bench. The Court took time to deliberate and advise, and at the October term *quashed the writ*, which afforded the Relators no opportunity of appealing to the Court for the Correction of Errors.

Bronson, J.—The writ of certiorari, when issued for the purpose of enabling this court to exercise its supervisory power over inferior tribunals, removes nothing but the record—or other entry in the nature of a record—of the proceedings in the court below; and if the return contains any thing more, it cannot be regarded. The record is examined to see whether the subordinate tribunal has kept within the limits of its jurisdiction; but we cannot look beyond it for the purpose of a review on the merits. Such is the settled doctrine of this court, and it disposes of several of the questions which have been made by the relators. The return in this case contains nothing in the nature of a record, beyond the ordinance for constructing the sewer, the estimate and assessment made by the persons appointed for that purpose, and the confirmation of the assessment by the Common Council. Those are the only documents upon which any question can properly be made.

Most, if not all, of the objections urged against these proceedings admit of a satisfactory answer: but I shall not give them a particular examination, for the reason, that I think the certiorari ought not to be issued; and that, should some of the points happen to be well taken, it is the writ, and not the proceedings, which ought to be quashed.

The powers exercised by the Common Council of the city of New York are, for the most part, either legislative, executive, or ministerial; and a certiorari only lies to inferior courts and officers who exercise judicial powers. If it were not for a few modern cases, I should be of opinion that we have no authority to supervise in this way the acts, ordinances, and proceedings of the corporation of the city of New York, or indeed of any other corporation, public or private. I have searched in vain for a precedent for such a course in the land of the Common Law; and the first case I have met with any where, in which a certiorari was awarded to a corporation for the purpose of reviewing its proceedings, is that of *Le Roy* vs. *The Mayor, &c. of New York*, 20 *John.*,

430; and there, the grounds on which the writ usually issues, rather than the inquiry whether it would lie to a corporation, was the question discussed at the bar and considered by the court. See, also, *Parks* vs. *The Mayor, &c. of Boston*, 8 *Pick.*, 218. All our city, and many of our village corporations have been vested with very large powers within their respective limits; and if a certiorari will lie to remove into this court an ordinance for constructing a sewer, it is difficult to see where we can stop short of reviewing all their acts in the same way, which looks to me like a great stretch of jurisdiction.

But if a certiorari will lie, it does not follow that it should be awarded in every case where the relator may have some ground for complaint. The allowance of the writ rests in the sound discretion of the court, and it has often been denied where the power to issue it was unquestionable, and where there was apparent error in the proceeding to be reviewed. And if it has been improperly awarded, it is not too late to correct the error after a return and hearing of the merits. *The People* vs. *Supervisors of Alleghany*, 15 *Wend.* 298. And see *The People* vs. *Supervisors of Queens* [Feb. 1841]. There are, I think, few if any cases where an ordinance or assessment for constructing a common sewer, or making any other city improvement, should be removed into this court by certiorari. It is better that persons having cause for complaint should be left to such redress as they may have by action. The case falls within the principle of those which have just been cited; and in the first of those cases a certiorari which had been issued to remove an assessment for county charges was quashed after a return and a hearing on the merits; and there, too, the relator had no other remedy. Great *public inconvenience* must necessarily ensue if we attempt in this way to review assessments for city improvements, which are not unfrequently as extensive in their influence as assessments for county taxes. The principal objections which have been urged against these proceedings are, 1. that the ordinance for constructing the sewer is void, because it does not appear affirmatively that the ayes and noes were called on taking the vote upon it in the two Boards; 2. that the order confirming the assessment is void for the same reason; 3. that the confirmation could only be made by the whole Corporation assembled in one body, and not by the Common Council in two Boards, as organised under the act of 1830; and 4. that no confirmation appears—there being no ordinance or resolution for that purpose, but only an extract from the minutes of the Common Council.

Now, without considering what answers there may be to these objections, they seem to prove too much for this form of remedy. If the points are well taken, there has been no ordinance for constructing the sewer, nor has the assessment ever been confirmed, and there is nothing to be reached by the certiorari. If the relators have suffered under color of proceedings which never had any legal existence, their remedy is by action. All the other questions which arise upon the record—and we cannot look beyond it—may, for aught I see, be as well tried in some other form as in that which the relators have selected, and we shall do them no harm by withholding this extraordinary remedy. I must not be understood as intimating that a certiorari should be allowed whenever the question can be reached in no other form. There may be many cases where the public inconvenience, which would be likely to result from this mode of review, would greatly outweigh the importance of correcting some legal, though, perhaps, not very grievous, error in the proceedings.

The relators in this case have taken no objection which is not equally applicable to all the other persons who have been taxed, and the whole assessment must stand or fall together. It is also important to notice, that the ordinance for making the improvement was passed, the work done, and the assessment made and confirmed, more than three years before the certiorari was sued out. The time of bringing a writ of error from a final judgment is limited by law to two years; and I think a case can rarely happen where it would be proper to allow a certiorari after the lapse of a longer period. This is a sufficient ground for quashing the writ, aside from other considerations tending to the same results.

Certiorari quashed.

MOUNT MORRIS SQUARE.

The opening of this Square was founded upon the resolution of an alderman, which was referred to a committee, who reported in favor; the report was adopted, and a resolution passed to carry it into effect, but the report was not published, nor were the ayes and noes called on taking the vote, nor was the same published, as required by the charter. The resolution thus passed by the two Boards was approved by the Mayor on the 20th October, 1836, and on the 4th of September, 1839, the commissioners made their report—a delay of near three years.

The place designated as Mount Morris Square is on a rocky hill or ledge near Hurlgate, about seven miles or more from the City Hall. We have examined the place, and should think it about one hundred feet high, and that it would require an outlay of more than two millions of dollars to reduce it to the city grade. The Catskill Mountains are full as well calculated for a public square as Mount Morris. The award made for Mount Morris is $22,000; the expense of making it and assessing the amount is $.

When the reports of the commissioners were deposited in the clerk's office for examination, no bill of expense accompanied the same. The reports are a mere recital of metes and bounds of the property awarded for or assessed, and the names of the supposed owners, and the amount of the particular award or assessment. There is no addition of the awards, and of the amount of assessments—no summary, schedule, or abstract—no diagram, or map, accompanies it. The property is described by map numbers, and the whole report a perfect wilderness to explore.

A map, with a list of names of the persons assessed, and of those to whom awards are made, with each of their respective amounts extended in two columns, and each added up, with a statement of the expenses, would be intelligible, but such a report as this is only calculated to confuse and mislead.

SUPREME COURT.

The People ex rel. Michael Floy, et al. vs. The Mayor, Aldermen and Commonalty of the City of New York. } Opening of Mount Morris Square in the City of New York. Points of Relators.

The motion is in the alternative.

First. To set aside the confirmation of the Report of Commissioners of Estimate and Assessment, which was confirmed Sept. 4, 1839.

This is asked for, on the ground, that no notice of the motion for confirmation was published or posted, as is required by the 9th section of the act of April 20, 1839. Laws of 1839, p. 182.

And the charges and expenses, which are enormous and unjust, were never taxed or allowed, as is required by section 12, of the same act.

The act of 1839 is general, and all its provisions would apply to all the then pending proceedings, but for the 14th section, which limits all except the 9th and 12th sections to future proceedings.

1. As to Notice.—There is *no* pretence that any notice was given in four newspapers; *or that any was posted*,—(see fore part of section 2, in connection with section 9, as to the manner of posting, Folio 23 to 26.)

2. Nor is there any pretence of taxation of the expenses.

As to this, *it is said*, that there is nothing in the section to require it to be done *before the Commissioners report*. This is clearly wrong. The charges are all "*allowed*" so far as the *payers are* concerned, when they are put into the report and confirmed. They then become a lien and charge on the lands assessed, and if the proceedings are regular, nothing but *payment in full* can remove them. There is no provision in any statute for a modification of the assessment, or a recovery back of part of it, on those charges being taxed afterwards and reduced. Nor is there any remedy, except to pursue *the terms of* the law and have them taxed, before assessing them on the land. The intent of the law *is* plain. The only "allowance" in the case, is that made by including them in the report. The Corporation itself never *allows* them, except in that mode. The Corporation pays the charges as thus included, *out of the assessments imposed for the same charges* on the adjacent lands.

Again. This court had made provision previous to this motion for confirmation, viz. in July 1839, for these taxations. But, if the court had not, it was the duty of the Commissioners to wait until they did. The law was imperative, that *they should be taxed.*

On both these grounds, therefore, the confirmation was irregular and illegal, and being made a *rule* of this court, it should be set aside.

3. Another ground for setting aside the confirmation, is the entire ignorance and want of actual notice in the relators, the great wrong and injustice of the estimate and assessment. See 19 Wend. 659, John street and Cherry street, per J. Cowen, 1 Cowen 74, Dover street.

The occasion is favorable for such action. The awards to parties for the lands proposed to be taxed, *are not yet payable*. None of them have been paid. Folio 39.

The confirmation being set aside, one of two things will ensue.

1. The Corporation will doubtless be induced to abandon this *improvement*, which is a century and a half in advance of the times. They will prefer paying and losing whatever *is justly* due to the Commissioners &c. who acted in the matter, to the odium and injustice of proceeding.

2. If otherwise, the parties can have the expenses taxed and reduced, the lands taken valued at 1-6 of the present estimate, and the lands omitted brought into the assessment; and thus be relieved from the gross and oppressive charges which are now imposed upon them.

Should the court conclude to set aside the confirmation, then it will be needless for them to examine the remaining points here presented.

Second. The second alternative of our motion, (which is sought only in case the court declines to set aside the confirmation of the report), is the issuing of writs of certiorari, to bring up for review all the proceedings for the opening of the square in question; it being alleged that they are without authority or jurisdiction, illegal and void.

It is asked that the whole, if granted, *be carried on as one proceeding*, both to save expense and the better to attain the justice of the case.

I. As to the issuing of writs of certiorari.

1. To the Justices of this Court acting as Commissioners on the confirmation, the allowance of the writ

is "a matter of course."—20 Wend., 685, matter of Carlton street; and see 7 Cow. 158, Bogert vs. The Mayor &c.; 13 Wend. 668 Patchen vs. Brooklyn.

2. To the Corporation of the City in reference to the proceedings before them. See 6 Wend. 564 Starr. vs. Trustees of Rochester, and 8 Pick. infra.

Although the issuing of these writs is a matter of "discretion," yet such discretion is a regulated, not an arbitrary discretion. See the remarks in 5 Rep. 100, Rooke's case.

Here, we expect to show that besides the manifest wrongs and intolerable injustice of the assessment, the proceedings are null and void.

We are not bound *on this motion*, to show this. That, we are to accomplish on arguing the return. We are only to show, that there is *probable cause* for presenting the points.

Then what is there to stay the writs? Not inconvenience? The awards are not paid, nor the square opened. Nothing is done.

But is *inconvenience* to *the Corporation*, by whose authority, this great wrong has been occasioned to us, to prevent the redress due to that wrong? Is *our inconvenience*—the confiscation of our property, nothing?

There is no imputation of laches. The confirmation was in Sept. 1839. These parties, ignorant that any thing was on foot till last summer, and ignorant of the irregularities *till Feb. last.*

Next, as to the probable cause for reviewing these proceedings.

II. The resolution for taking and opening Mount Morris Square is *illegal and void*, for the following causes, viz.

1. It was a judicial act or power exercised by the Common Council and the Mayor, as separate and distinct bodies, passing upon it separately. Whereas the Common Council cannot under such an organization exercise any such power.

Subd. 1. That this power is in its nature *judicial* and *not legislative.* 8 Pick. 218, Park vs. Mayor &c. of Boston; 2 R. L. 408 §. 177; 1 R. Stat. 513, 515, Commissioners of Highways in towns; Stat. 23. Hen. 8, ch. 5; Stat. of Sewers'; Callis. on Sewers, 216, 7; id. 185. id. 163; Com. Dig.—Sewers, D. s. p.

6 Ad. & Ell. 807—Pocock vs. O'Shannessey, per Patterson, J.

8 Taunt. 602—D. of Newcastle vs. Clark.

Subd. 2.—The Corporation assumes to exercise this power under the *act of* 1813.—2 R. L. 408, § 177, &c.

They have no such power by their *charter*, and they have no prescriptive powers.

The statute of 1813 gave the power to *The Mayor, &c. in Common Council convened.*

It was a judicial power, to be exercised by the persons, or *officers*, then composing *The Mayor*, &c. See 1 Willcocks Mun. C. 40, s. 54.

That is, the Mayor, Recorder, Aldermen and Assistants, convened and acting together—as one body —"in Common Council convened."

No other class of officers—no combination of these classes, omitting one or more classes—could exercise the power.—1 Willc. 42, s. 57–8. Id. p. 68, s, 125; p. 101, s. 233 and 235. 7 Cowen, 533; note to Exparte Rogers, and the cases there collected.

Subd. 3.—The resolution in question was not adopted by the classes, or in the manner authorized by the act of 1813.

It was *legislated through* in the form prescribed by the act of 1830.—(Laws 1830, p. 125.)

This act does not extend to the exercise of *judicial* or *ministerial* powers. It applies solely to "the *legislative power* of the 'Corporation of the City'—(see s. 1)—and to the delegation of sundry *executive* powers"—s. 21.

As to *all other powers* of the Corporation, the existing laws were unaffected. They were to be exercised in the manner pointed out by the various laws conferring them.

The statute itself is plain enough, as to what powers were to be exercised under the act of 1830. Its history corroborates our view.

See acts of 1824 and 1828, which were severally rejected by the people of the city by immense majorities. Laws of 1824, age 162 128, page 317. In s. 4 and 5 of those acts, the language is the most comprehensive possible—"The *whole power* of the Corporation"—"Legislative *and other powers*," &c. &c.

Then see Kent's City Charter, p. 231, sec. 11th, 236, 264, 349—showing the history of the 1st s. of the act of 1830, in its passage through the Convention of the people. The sweeping clauses as to the *powers* were reduced to the sect. as now existing, except that the Legislature limited the s. to the legislative power of the "*Corporation*" instead of the "*City.*"

7 Dowl. & Ryl. 684—The King vs. Tremayne.

4 East, 17—Rex vs. Morris, and vs. Stanard.

3 Johns. Cases, 107—Gilbert vs. Columbia Turnpike Company; a strong case.

2 Cowen, 419—Sprague vs. Birdsall. A statute in favor of corporations, and in derogation of common right, is to be strictly construed.

5 id., 188—Malcom vs. Rogers. "Shall or may" is to be construed "*shall*," when public interests and rights are concerned.—19 Wend. 38; Long Island R. R. Co.

It seems to be abhorrent to common sense to say, that when the Legislature provided that this Corporation "*shall*" exercise this mighty power in a prescribed mode, it intended that the Corporation might do as they pleased about it—that they might construe "shall" to mean "won't."

4. The omission to publish the reports of committees and the votes, as is expressly required by the 7th sect. of the act of 1830.

See the foregoing head.

We will also remark, that this omission estops the corporation from charging us with delay or laches, in moving the court.

The grand object of the provision was, to give *notice, publicity*, to these proceedings.

See Kent's C. C. 257—286–7—and the Address of the Convention, pursuant to resolution at p. 346.

5. The resolution itself was never signed by the Mayor, or authenticated by any officer of either board. In other words, no such resolution exists.

III. There was no regular, legal or valid authority to the Mayor to apply to the Court for the appointment of Commissioners of estimate and assessment.

It will be perceived that the *resolutions* contain no such authority, and it is one as essential as that for the opening itself. See sec. 178 of the act of 1813.

IV. The assessment is illegal, because it indirectly takes private property for public use, without compensation.

A *public square* in a large City is for the health, the recreation, the convenience of all its citizens—as well as of strangers.

Whatever *pretence* there might be for assessing persons fronting on the square, for a part of the expense, there can be none in justice or equity as to owners who are many hundred feet distant.

2 B. & B. 691. Spofford vs. Harrison.

3 Ad. & Ellis, 248. Loady vs. Wilson. Callis. 8.

11 Wend, 154. Canal street extension.

V. The assessment on the relators and others was thus erroneous in principle, unjust, partial and oppressive.

See fol. 21 and 28 to 38—and the diagram.

Many of these errors are such as come within the purview of a certiorari.

Thus, the entire omission of large tracts coming within the bounds of the district assessed—viz:

1. The block between 5th and 6th Avenues and 125th and 126th streets—only one block removed from the square itself, and nearer than any of the relators' lands.

2. The block between 114th and 115th streets, and 4th and 5th Avenues.

3. Ten entire blocks between 5th and 7th Avenues, and 114th and 119th streets. A considerable part of which is nearer than our property.

4. The lands of the Corporation, on which is the House of Detention.

That these are to be corrected on certiorari, see

20 John's. 430—Le Roy vs. Mayor, &c. of N. Y.

3 Wend, 333—Ross vs. same.

10 id. 167—Baldwin vs. Calkings.

2 Wend 395, 398—Bouton vs. Brooklyn, recognizes the principle.

See also 5 Rep. 100—Rooke's case, s. p.

As to the oppression, see the illegal charges of Commissioners and Counsel, at fol. 21 and 29 to 31.

VI. The assessment, &c. is also erroneous and void, because it was not made *by all the three Commissioners.* Only one of them actually made it, and *only two* of them ever met or acted together in regard to it.

By s. 178 all the Commissioners *must act in the premises*, although only two need sign the report.

7 Cowen 526—Exparte Rogers, and the valuable note at p. 530.

8 Cowen 544—Sinclair vs. Jackson.

6 Johns. R. 39—Green vs. Miller.

This principle is incorporated in the Rev. Stat. See 2 R. S. 555, s 27.

VII. The report of the Commissioners and its confirmation are also erroneous and void for the want of the taxation of the costs and charges of the Commissioners, Counsel, Surveyor, &c., and for the neglect to give notice of the motion to confirm the report; pursuant to the 9th and 12th sections of the act of 1839.

Sufficient has been stated on this subject in the two first pages hereof.

VIII. Fifteen months from the confirmation of the report having elapsed, and the square not being opened, the Corporation cannot now proceed to open it, and have lost all jurisdiction of the subject matter.

Laws of 1818, page 196, shows that they cannot suspend the opening "exceeding in the whole 15 months."

If it were otherwise, they can *collect the assessments, and delay the opening a century.* Because if they can suspend one day beyond the 15 months, there is nothing to prevent their doing it 1000 years, if they think proper.

These corporations take nothing by implication. If they claim power they must show an express grant of it;—Willc. p. 100; p. 99, s. 226;—and as the Court says in the cases of John street and Cherry street, "the argument is just as good for a 'county, town or village,' as for this great city."—19 Wend. 659.

('The argument on this first head (third subd.) is too extended to be by any possibility compressed into the requisite brevity for these points, and much of it is omitted.)

2. The resolution is illegal, because it was made without any petition therefor.

S. 177, above cited, requires not only the *judgment* of the Mayor, &c., but also the *petition of three-fourths of the land owners* fronting on the Square to be opened.

This Square is in the part of the city laid out by the Commissioners under the act of 1807. It was authorized by act of May 10th, 1836, p. 395.

The act of 1813 left these matters to be set on foot by those who would have to bear the expense.

Unless such is the construction, "*and also*" in the 9th line of the s. must be read "*or.*"

The Corporation had no jurisdiction to act without such petition of three-fourths.

It is like the case of a Sewer rate, assessed by the Commissioners of Sewers without the presentment of a jury—on which it was held that the commissioners acquired no jurisdiction, and that the warrant to collect it was void.

2 Binn. 250—Schuylkill Falls Road.

All these are Sewer cases.

3. The resolution is also illegal and void, because the *ayes and noes were not called* or taken on its passage in either Board—(supposing it to be upheld as a proper act under the organization of 1830.)

Section 7 of that act expressly requires it. The vote cannot be taken in any other manner. The law permits it in no other mode or form.

The Counsel of the city says this is merely "*directory.*" It is no more so than the provisions in 12th, 13th, and 14th sect., and the one can be disregarded as much as the other.

This is a power granted to a *mere corporation*, by which the lands of citizens may be taxed, and those lands confiscated, and their personal property distrained.

It must be construed strictly. It cannot be tolerated that the donee of the power is to execute it as he pleases, or in any manner save that provided in the grant.

(This point also is of great magnitude, and can scarcely be presented in this place. Among the host of authorities, we will refer to these only :)

7 Barc. Abr. 448—Statute, G. the general rule, as to a stat. directing a thing to be done *in a certain manner.*

SUPREME COURT.

The Mayor, Aldermen, and Commonalty of the City of New York, *adsm.*	Opening of Mount Morris Square.
The People ex rel. Michael Floy, et al.	Defts. Points.

First as to the motion to set aside the Report of the Commissioners.

1. This motion will not be entertained because the Report was confirmed by the Judges of the Supreme Court, acting as Commissioners, and the only mode of bringing the question before the Supreme Court is by certiorari, 11 Wend. 154.

2. The relators are too late in making any such application. The Report was confirmed Sept. 4, 1839. The affidavit states that the party had no actual notice of these proceedings "until some time during the summer of 1840." This was sufficient to have enabled him to make inquiry and present his objections months ago.

3. The notice of presenting the report for confirmation was given pursuant to the Act of 1813, as appears by the report itself, and the accompanying papers. The objection is, that the notice was not given as required by the *4th section* of the act of 1839, p. 183.

These proceedings were commenced anterior to the passage of the act of 1839.

The 4th section, by the express enactment of the 14th section, does not apply to proceedings previously commenced.

The 9th section applies only to motions, *other than those therein before provided.* The notice of making the report is expressly provided for by the 4th section and is excluded from the provisions of the 9th.

4. The question of taxation of costs should have been raised on the motion to confirm. But is was necessary for the Commissioners to insert in their report, an amount sufficient to meet the costs and expenses. This amount must necessarily have been prospective and could not have been ascertained on taxation. The costs, however, may and must yet be taxed,

Such has been the decision of Judge Bronson in the case (I believe) of 29th street, and such was the late decision of the Chancellor in the case of Wiggin vs. The Corporation.

5. The relators, waving their other objections, seek to set aside the report, on the ground of ignorance of the proceedings.

This is attempted to be proved by the testimony of one person, who swears to his ignorance, until *last summer.* And he has been assessed in the enormous amount of $52.

The rights of various persons have become interested in this question since the confirmation of the report. And the annulling of the proceedings is calculated to prejudice the public interests. It would lead to a draw upon the City Treasury.

Second.—As to the granting of certiorari.

1. The allowance of this writ to the justices of this court as Commissioners, is only a matter of course to enable the relators to carry the case to the Court of Errors. This court will affirm its own act as Commissioners. There is nothing, however, upon which to found o writ of error. The Court of Errors will only review such questions as were raised in the court below.

When no doubt exists as to the correctness of the decision, this court will not grant a certiorari without annexing as a condition that it *shall not operate as a stay of proceedings*, 13 Wend. 664.

2. The granting of a com. law certiorari is only done in the exercise of a sound discretion. People vs. The Supervisors of Allegany, 15 Wend. 206.

In this case, on the confirmation of the report, Sept. 4, 1839, the title to the land became vested in the public, 2 R. S. 413.

On the 1st April 1841, parties become entitled to awards. They have lost their land, and have made calculations on the money to be paid therefor.

The amount of assessments is $25,743, Benj. Townsend who makes the affidavit represents about the one five-hundreth part of this.

The proceedings of the Common Council which are the subject of complaint took place in September and October 1836, nearly five years since.

3. The resolution for taking and opening Mount Morris Square was a valid and effectual ordinance of the Corporation.

I. The stat. 2 R. S. 408, § 177, conferred the power in relation to streets &c. upon "the Mayor, Aldermen, and Commonalty of the City of New-York." That is their corporated name. Charter of 1730 § 1.

They constitute the municipal government of the City of New York and their functions are either legislative or executive.

Congress and the Legislature both lay out roads and highways, their acts are all legislative, although they may have an effect which resembles the exercise of a judicial power.

The Common Council of the City of New York is not "*the*" Corporation, nor is it any body separate and distinct from the Corporation. It is the Corporation assembled in its legislative capacity. The Corporation acts in Common Council, except when it performs an act merely executive.

The Corporation itself, aud by its corporate name, is vested with all the powers, franchises, property, and immunities conferred by its charter. Charter 1730, § 1, 37. &c. &c.

It was not correct, therefor, in the loose language sometimes used, to confer all the corporate franchises upon the Common Council. The Convention of 1820 subdivided the ordinary powers of the Corporation into legislative and executive, the former, by the 1st section of the act of 1830, p. 125, they conferred upon the Common Council the latter, by the 21st section, they ordered to be performed by distinct departments to be organised by the Common Council.

The learned counsel for the relators finds that provision is thus made for the legislative and executive power; but being anxious to discover something *not provided for*, calls the power which he is contending against judicial.

I pray your Honor not so to decree it, through apprehension of the quo warranto of the Attorney General.

But it is the act of 1813, and not that of 1830, which confers the power. And the counsel for the relator agrees that it must be exercised by the Common Council as then organized. I have as great an attachment to our old Recorder as he can have. But the 15th section of the act forbids his being a member of the Common Council any longer. The act of 1830 did not change the power which was to act, it only altered the form of its action. Both before and since the amended charter, it was the Mayor, Aldermen, &c. who acted in Common Council.

II. The first part of the 177th sec. 2 R. S. 408, and of the 178th sect. p. 409, especially vest the discretion in the Corporation, unmoved by any petition, to take proceedings for the opening of a street, &c. It was the intention of the act to make it their duty on the application of three-fourths of the owners. This has always been the construction of the act.

III. The requirement of the 7th section as to the ayes and noes is directory, and not peremptory. It is not of the essence of the thing required to be done so as to constitute the resolution a valid ordinance. These requirements are contained in the 12th and 13th sections, and were complied with.

The object of the 7th section was to make the members answerable to their constituents. It was not to make the taking of the ayes and noes an indispensable requisite to the validity of the proceeding. The words, "before it shall take effect," in the 12th section, are not to be found in the 7th section. There are no negative words, or words of exclusion.

It would operate to make an act, valid by the 12th and 13th sections, invalid by the non-compliance with a requirement as to an act *subsequently* to be done. No time of limitation is fixed, within which to determine the validity or invalidity of an ordinance.—5 Cowen, 269; 6 Wend. 486; 3 Mass. 230.

IV. The relator is grossly in error in stating the resolution not to have been signed by the Mayor, or authenticated by any officer of either Board. The affidavit of the Clerk shows the resolution to have been regularly passed, authenticated and approved.

4. The application for the appointment of Commissioners, as appears from the paper on file, is under the common seal of the Corporation, and regularly authenticated. The resolution, as set forth in the affidavit of the relator, directs the counsel to take the necessary measures to carry the resolution into effect.

The seal imports authority. The resolution expressly directed the application. The official act of the counsel in representing the Corporation on the application for the appointment of Commissioners cannot be controverted.

5. The constitutional question as to the taking of private property for improvements, as in this case, has been repeatedly settled by this court. That question does not arise here. This is an assessment for a benefit conferred. All experience shows that improvements of this nature greatly enhance the value of property in their neighborhood.

6. Whatever may have been the reason for the omission to include certain blocks in the assess-

CASES IN CHANCERY.

The following cases in the Equity Court show a great fluctuation in a very brief space of time:

The opinions given by HIS HONOR CHANCELLOR WALWORTH, subsequent to the decision in the case of the *infant children* of J. Meserole, deceased, will be found in the proper place, in this number, in chronological order, after the decision of that case by the Court for the Correction of Errors.

The court of the last resort, in that case, decided that the proceedings of the Corporation of Brooklyn in imposing that assessment "ARE ILLEGAL AND VOID."

IN CHANCERY.

BEFORE THE CHANCELLOR.

Oakley *vs.* the Trustees of Williamsburgh and Moore.

The trustees of the village of Williamsburgh are not authorized by the village charter to alter the grade of a street, after the grade thereof has been regulated and established by them as directed in the act of incorporation. And where such trustees were proceeding to dig down and alter the grade of a street, which had been regularly graded and regulated; *held*, that the owner of adjoining lands, whose property would be seriously injured by an alteration of the grade, was entitled to an injunction to restrain such illegal proceedings of the trustees.

The Court of Chancery has jurisdiction to interfere by injunction to restrain the defendant from proceeding in an illegal act which will necessarily cast a cloud upon the complainant's title to real estate, and will naturally diminish its value.

This was an appeal from the Vice Chancellor of the first circuit, refusing to grant an injunction.—The bill of complaint in this case, which was filed by the complainants in behalf of themselves and all OTHERS having a common interest with them, after setting out that part of the act of incorporation of the village of Williamsburgh which made it the duty of the trustees to cause a survey and map of the village to be made, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting on such map all the gradations and regulations which might or should be required in the roads, alleys and streets, accompanied by such remarks and explanations as the nature of the subject might require, to be kept by the clerk, subject to the inspection of the freeholders and inhabitants of the village, so that no person could plead ignorance of the plan to be adopted for opening, laying out, levelling and regulating the streets of such village, (Laws of 1827, p. 276, § 19,) stated that, in pursuance of their act of incorporation, the trustees of the village caused such survey and map to be made, signed, and filed, as directed by the act, except that the gradations of the streets were not exhibited on the map; that such gradations were omitted on the map because the formation of the surface of the ground rendered it impossible to comply with that part of the provisions of the statute immediately; for which reason the grading of the streets was left to be established by actual survey from time to time, as it should become necessary to open such streets; that in 1828, the trustees caused a survey and profile to be made of the southerly section of First street, running from Grand street along the margin of the East river to the south bounds of the village; and caused such survey and profile to be filed with their clerk, and caused the street to be graded and levelled in conformity thereto; and setting out the certiorari, &c., in the supreme court upon which these proceedings of the trustees were confirmed; (See Coles v. the Trustees of Williamsburgh, 10 Wend. Rep. 659;) and that the trustees subsequently caused similar sections of Second and Fourth streets, and several other streets intersecting the same to be laid out, and surveys and maps and profiles thereof to be made and filed in the same manner, and caused the said streets, or certain sections thereof, to be levelled in conformity with such surveys; and that one of them, South Second street, had been paved and the assessment therefor had been made and collected or paid. The complainants then charged or alleged, in their bill, that one of them owned large and valuable tracts of land on the southerly section of First street, and on the other streets which had been so graded and levelled; and that others of the complainants respectively owned lands on such other streets; some of which lands had been purchased since the regulation and surveys of the said streets, and upon the faith thereof as the permanent plan for the grading and levelling of those streets; and that no change or alteration in the gradation of such streets could now be made without serious detriment to the rights and interests of the complainants in relation to their lands; but that the trustees of the village, upon the petition of the majority of the landowners on the south-easterly section of First street, in June, 1836, passed an ordinance or resolution to alter the grade of that street as thus permanently settled, and to re-regulate and pave the street; and that they had employed the defendant Moore to cut down and alter the grade of the street about six feet; which, if permitted, would require a corresponding alteration of the grading of the other streets, upon which some of the complainants property was situate, and which intersect the south section of First street; and that the re-grading of First street, if carried into effect in the manner contemplated in the ordinance, would materially impair and injure the value of the complainants property. They therefore asked for an injunction to restrain the defendants from proceeding to alter the grade of the street as theretofore established, and from digging down the street or removing the earth therefrom. An order to show cause why an injunction should not issue having been granted, the defendants introduced affidavits showing that the alteration of the grades of the streets was necessary for the benefit of the village, and more particularly for the convenient use of the waters of the East river for commercial purposes; whereupon the Vice Chancellor made an order denying the application for an injunction.

J. H. Lee and D. B. Ogden, for complainants.

Ebenezer Griffin, for the defendants.

THE CHANCELLOR.—If the trustees of the village of Williamsburgh have the power, under their act of incorporation, to alter the grade of the streets of the village after it has been once regulated and established by them as required by the 19th section of that act, the case before me is not one in which it would be proper for this court to interfere; as there is no pretence that the trustees are acting in bad faith, and without reference to what they honestly believe to be for the interest of the inhabitants of the village. On the other hand, however, if they have no such power as they have assumed to exercise by the ordinance in question, then this appears to be a very proper case for the allowance of an injunction, to restrain an illegal proceeding by them to dig down and alter the grading of the street as originally established, which, as alleged in the bill, will be a material injury to the value of the property of these complainants. The assessments upon their lots for the expenses of the proceedings to alter the gradations of the streets, although they might be so far void as not to affect their legal title to the land, would of themselves be a *cloud* upon that title which must necessarily diminish the value if it did not entirely prevent the sale of such lands as village building lots; *as a prudent man would not be likely to buy* a city or village lot for the purpose of building thereon, and pay the full value of the lot, while a cloud like this was hanging over the title, which might thereafter subject him to litigation if not to actual loss of the property. And as this court sometimes exercises its jurisdiction for the purpose of removing a *cloud* from the complainant's title to real estate, it may also, in a proper case, interpose its authority to prevent the illegal act from which such a *cloud* must necessarily arise. (*Petit* v. *Shepherd*, 5 *Paige's Rep.* 493.) The decision of the present case, therefore, depends upon the question whether the trustees of Williamsburgh have the right, as claimed by them, to alter the regulation and grading of their streets after it has been once adopted and established. For it is judicially settled by the decision of the Supreme Court, in reference to this particular street, that the grade thereof had been legally established by the trustees, before the institution of the proceedings now in question to re-regulate the street and to grade the same anew.

The object of the legislature, by the 19th section of the statute, appears to have been to have a permanent plan of the village made and adopted by the trustees, not only as to the location of the streets, roads and alleys, but also as to the regulation or gradations thereof; to which plan all subsequent proceedings should conform. Hence, it was made the duty of the trustees to cause a survey and map of the village to be made and filed, as soon as conveniently might be, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting all the gradations and regulations which would be required in such roads, alleys and streets. And it appears to me that the making of this survey and map of the locations and gradations of the streets, roads, &c., of the village was not only a useless proceeding, but was also calculated to deceive those who might thereafter become the owners of village property, if it was not intended to confine the proceedings of the trustees to the opening and improving the streets, &c., according to the locations and gradations as thus established. And I think there could not have existed a reasonable doubt as to the intention of the legislature thus to restrict the power of the trustees if it had not been for the introduction of the word *altering* into the subsequent sections of the act.

The 21st section of the act provides that it shall be lawful for the trustees to order and direct the pitching, regulating and paving the streets according to the map and survey, and the *altering* amending and cleaning any street, vault, sink, &c.; and to cause estimates of the expense to be made, assessed and collected, &c. And the 24th section contains a similar power as to the widening and altering streets and highways already laid out, and as to the laying out and making other roads and streets, conformable to the map, as the trustees might think necessary and convenient; with a provision for compensating the owners of lands for the property thus taken for new streets, or the alteration of the old ones, and for raising the amount by assessments upon the owners of lands benefitted thereby. It is under the power of altering streets, as given in the 21st and 24th sections, that the counsel for the defendants claim the right to change the location or to alter the grade of streets which have been located or graded, in conformity to the general map and plan of improvements, subsequent to the act of incorporation. In this I think the trustees have entirely mistaken the meaning of the legislature in relation to the alterations which they were, by these sections, authorized to make. At the time when this act of incorporation was passed there were, roads or streets already existing within within the chartered limits of the village. And as a general plan of improvements was to be made and adopted by the trustees, both as to the location and the grade of every street, alley and road in the village, it was anticipated by the legislature that it might become necessary for the trustees to alter the grades and locations of the old roads and streets, so as to render them conformable to the general and permanent plan of the village, as well as to pitch, regulate, pave and open the new streets, according to the map and survey. Hence the necessity of providing for the alteration of streets in the 21st section, which relates to the pitching, regulating and paving, as well as in the subsequent section regulating the manner of altering and widening old streets and opening new ones. The word *altering*, therefore, in both of these sections, related to the old streets and roads which existed at the time of passing the act of incorporation, and not to the new streets which might thereafter be laid out, opened or graded in conformity to the map and survey, and to the grade as first adopted by the trustees. And these trustees have no power or authority to change or alter the grade or location of any such new

street after it has been once established by them, in conformity to the map and survey and gradation first established, or of any of the old streets after they have been made to conform to such general plan.—The defendants have no legal power therefore to alter the grade of this southerly section of First street, or of the adjacent streets which have been thus regulated and graded.

The inhabitants of this village, however, are not without remedy if the interest of the public requires a correction of any mistake which the trustees may have made either in laying out streets, or in fixing the gradations thereof. For it is perfectly competent for the legislative power which directed a general plan of the village to be adopted and adhered to by the trustees, to authorize them to make such alterations in the plan as may be found necessary either in regard to this particular street, or as to the streets of the village generally. And if the legislature shall think proper to authorize such alterations, it will be for the same power to prescribe the proper mode of ascertaining who are injured by such alterations, and of compensating them for such injury.

There is no ground for the objection in this case, that the complainants have waived their rights by delay, or by any acquiescence in the proceedings of the trustees. They protested against the alteration of the grade of the street the first opportunity they had for that purpose: and they followed it up with an application to this court for redress when they found that the defendants were determined to proceed notwithstanding such protest.

The order of the Vice Chancellor must therefore be reversed, with costs, and an injunction must be granted to restrain the defendants from proceeding with the proposed alteration of the former gradation of the street as originally established by the trustees. (See 6 Paige, 262)

DECISION IN THE MATTER OF WIDENING JOHN STREET.

IN CHANCERY.

BEFORE THE CHANCELLOR.

Timothy Wiggin

vs.

The Mayor, &c., of the city of New York.

This was an application for an injunction to restrain the collection of an assessment for the widening, straightening, and improving John street, in the city of New York, between Broadway and Pearl street. From the bill it appeared that the ordinance of the Common Council authorizing and directing this improvement, was passed in February, 1836; that shortly afterwards the Supreme Court appointed commissioners of estimate and assessment, who made their report in 1838, and the same was presented to that court for confirmation, but was afterwards sent back to the commissioners for revisal and correction; that the amended report was confirmed by the court in September, 1839, and that the order for the making of the improvement was carried into effect in May, 1840. The complainant charged in his bill upon information derived from E. Meriam, that the ayes and noes were not called upon the adoption of the resolution of the Common Council, authorizing the making of the improvement; nor were the votes of the Aldermen and Assistants, and the report of the committee on streets, upon which the ordinance was founded, published in any of the newspapers employed by the corporation. Various objections were stated in the bill as to the equity and justice of the assessment upon property which was supposed by the commissioners to be benefited by the improvement, which objections are noticed in the opinion of the court. The complainant also stated in his bill that the improvement was not within the part of the city as to which a permanent map and plan were required to be made by the commissioners under the act of April, 1807, and he therefore insisted that the Common Council, as organized under the act of 1830, amending the charter of the city, had no jurisdiction or authority to widen or alter John street.

W. Hunt and L. H. Sandford, for the complainant.

Peter A. Cowdrey, for the defendants.

THE CHANCELLOR.—The language of the bill in this case, leaves it doubtful whether the complainant, at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law.—The bill, instead of alleging in the usual manner, that the complainant was at a particular date, and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the first of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they did not sustain, does not appear to be one which in any manner concerns this complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the rise of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant, or otherwise, according as the interest of the one or the other will be affected hy the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforeseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. the Mayor, &c., of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment, made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure this complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widensng of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Meserole vs. the Mayor, &c., of Brooklyn, (in Chan. April 7, 1840,) referred to on the argument, the commissioners had not erred in judgment as to what property was to be benefited by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend., 618.) There the court held that if the proceedings had been regular, and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed, would actually be benefited by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alledging that the fronts on William street would be benefited by the improvement.

The same answer is applicable to the objection that $100 was included in the assessments for surveying and grading the triangle opposite to Cliff street under the resolution of May, 1837.

As the bill alledges that the cost of the proceeding have not yet been taxed, it cannot now be known whether the amount of the assessment will be more or less than the amount allowed for damages, and the costs and expenses of making the improvement. The mode of conducting these

proceedings, as prescribed by law, is such, that the assessments must be made and confirmed before the whole expense and costs of the proceedings can be ascertained, the commissioners, after having ascertained the damages for property taken, must necessarily proceed upon mere estimates of some of the costs, &c., which will probably be incurred thereafter in completing the proceedings. A mistake of a few dollars, therefore, one way or the other in estimating the amount of the expenses cannot vitiate the whole assessment, and take from the Supreme Court the power to confirm a report founded upon a reasonable estimate of the prospective costs. The act of April, 1839, only requires the costs and charges of commissioners, and attorney and counsel, &c., to be taxed before they are paid, and not that they should be taxed before the assessment is made and confirmed, as that could not be done. It is no objection, therefore, to the collection of the assessment, that those costs had not been taxed when this bill was filed.

The objection that the corporation, as at present organized, has not the right to lay out new streets, or to alter old ones, in that part of the city which was not embraced in the permanent plan of improvements adopted by the commissioners appointod under the act of the 3d April, 1807, is one which, if well taken, would render the whole proceeding under the ordinance for the widening of John street, absolutely void. The power to open new streets, or to alter old ones, in this part of the city, is claimed by the corporation under the second clause of the 177th section of the act of the 9th of April, 1813, to reduce the several laws relating particularly to the city of New York into one act, (2 R. S. of 1813, p. 409.) By that clause the power was expressly given to the corporation, whever, or as often as it should, in the opinion of the Mayor, Aldermen, and Commonalty, *in Common Council convened*, be necessary or desirable for the public convenience or health to lay out, form and open new streets, &c., in that part of the city, or to extend, enlarge, straighten, alter, or otherwise improve, streets, &c., already laid out, or thereafter to be laid out.

It is not pretended that previous to the act of April, 1830, to amend the charter of the city of New York, the corporation, when convened in Common Council, under the charter and the laws then in force, would not have been authorized to pass an ordinance for the making of this improvement; but this act for the amendment of the city charter directs that neither the Mayor nor the Recorder shall be a member of the Common Council after the second Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the Common Council of the city; which boards are to meet in separate chambers, &c. And the complainant's counsel therefore insist that the Mayor, Aldermen, and Commonalty can no longer convene in Common Council, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in Common Council, according to the provisions of its charter, and not to the partioular officers who, at that time, represented the corporation in Common Council. And the act of 1830 having excluded the Mayor and Recorder from the Common Council, and directed the Aldermen and Assistants to convene as a Common Council in two separate boards, the Mayor, Aldermen, and Commonalty of the city, that is the corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorizing the opening of a new street, or the alteration of a new one, under the 177th section of the act of 1813, was strictly a legislative power given to the corporation represented in its Common Council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen, and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to a preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law.—And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot *would not even create a cloud upon his title.* For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a CLOUD upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should expresse my opinion at this time upon the question. Whether the 7th section of the act of April, 1830, requiring the ayes and noes to be taken, and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property, benefited by the proposed improvement, are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefited by the improve-rather than by a general tax upon the city at large. A court of equity, therefore, at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefited thereby, and upon those who have not.

It is true, the complainant alledges in his bill that his property is not benefited by the improvement. But that-allegation is not sworn to by any one, and it is, of course, contradicted by the report, under oath, of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

(Copy.) JOHN M. DAVISON, Register.

[From the Saratoga Sentinel–Extra of July 20, 1841.]

IN CHANCERY.

BEFORE THE CHANCELLOR.

Samuel Vandervoort
vs.
The Trustees of the village of Astoria.

J. B. SCOLES, for Complainant. G. WINTER, for Defendants.

In this case the Chancellor decid d that injunctions to stay public improvements should not be granted *ex parte* by Injunction Masters, out of court, where there is no immediate danger of irreparable damages being done before the defendants can have an opportunity of being heard. That the Master, in all such cases, instead of granting the injunction in the first instance, should direct an order, to show cause before the court why an injunction should not be granted.

Injunction dissolved with costs to the defendants, without reference to the denial of any matters of the bill by the answer.

IN CHANCERY.

BEFORE THE ASSISTANT VICE CHANCELLOR.

Street Assessments.

Peter G. Stuyvesant and others,
vs.
The Mayor, Aldermen, and Commonalty of the city of New York.

Opinion of Murray Hoffman, Esq., Injunction Master.

The bill is brought before me as Injunction Master. I have been obliged by my sense of duty to grant an injunction in this and several cases on the eve of the sale advertised to take place on the 27th inst. I am sensible of the inconvenience to the city from an interference at this time, and do it with unfeigned reluctance.

But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterizes the proceedings complained of. I have a deep-rooted conviction that ultimately the decision must be against the corporation; and I believe that jurisdiction exists in this court to compel the corporation to try the question fairly in a single action at law between them and a complaining party. I think it is within the province of this court to prevent an innocent purchaser being deluded into litigation and probable loss, and to confine the controversy to the alleged wrong-doer and the injured party. This strikes me as the plain, just, and common-sense view of the matter. There are in this bill a number of complainants, the several owners of various parcels of property. They may all be bound by the result of one action. Thus, with perfect justice to the corporation, these questions may be tried in

the most simple and satisfactory manner, and a contest with a third party averted.

There has been no opinion as yet expressed by the Chancellor upon the point of jurisdiction, and I am at liberty to act upon the assumption and my own conviction that it exists.

I may, in a case of such moment, briefly advert to the reasons which led me on a former occasion to consider the neglect of the corporation to call the ayes and noes, and make the publication prescribed by the charter of 1830 a fatal omission.

[The assistant Vice Chancellor states some facts of his opinion in the case of Codwise vs. the Corporation, which it was intended shonld appear in this paper, but are crowded out for want of room.]

But in the present bill a new point is taken of much consequence. The proceedings for opening Art street commenced in April 1837. The report was completed, and the advertisement announcing that it would be presented to the Court for confirmation began on the 18th day of May, 1839. The report was filed on the 5th of June, 1839, and confirmed in the ensuing August. It is stated in the bill that, from the examination of the affidavits of publication, and the advertisement, it appears that the publication was made in but three papers, and does not appear that any notice was affixed in a public place contiguous to the premises. It is charged as a fact that the advertisement was only in three papers, and that no such notice was put up.

By the ninth section of the act of 20th April, 1839, it is provided that all motions (except as before provided) made under the act thereby amended, shall he, upon giving previous notice of the trial, place, and object thereof, published for at least fourteen days in four of the public newspapers, and by copies of such notice in handbills, to be posted up for the same space of time in three conspicuous places adjacent to the property to be affected. (See section 2 for this last clause.) It admits of no doubt that a motion for the confirmation of the report of commissioners falls within the ninth section.

The act repeals the amended act as far as it is inconsistent with the provisions of the new act; and it is directed to take effect on its passage, (the 20th of April, 1839,) but it expressly provided that no part of it except the *ninth* and *twelfth* sections shall affect any proceedings under the act thereby amended, which had been commenced previously to its going into effect.

It is an irresistible inference that the ninth and twelfth sections *do affect* prior proceedings, if those sections, when applied to such proceedings, are constitutional.

Of that I cannot entertain the slightest doubt. Both the Chancellor and Supreme Court have held that the Revised Statutes are applicable to all existing cases, so far as they affect merely the forms and modes of proceedings. (*The People* vs. *Livingston*, 6 Wendell, 526.) Every future proceeding in the assertion of a right or prosecution of a suit is to be governed by the new statutes. In this case, if the advertisement had been begun before the 20th of April, 1839, that would have been a proceeding already commenced, and would not have been affected by the ninth section. But as it was a proceeding commenced after that date, it necessarily falls within it.

In *Aymar* vs. *Gault* (2 Paige, 284) the doctrine was applied to the case of an absent party. The reference under the Revised Statutes was ordered, to take proof of the claim, although the suit was commenced before they went into operation.

In *Larkin* vs. *Mann* (2 Paige, 27) the rule was applied to the partition suits previously commenced. See also *Parsons* vs. *Browne* (7 Paige, 359).

This being the law, then it is clear that the present complainants are not bound by the proceedings at all; that they are now at liberty to take every objection of fact or law which they could have taken before the Supreme Court, as well as those which they could not then have taken.

I speak on the supposition that they did not actually attend and contest the confirmation. Without saying whether this would cure the defect or not, it is plain an argument may be raised upon it. But no principle of our law is more sacred than this, that no man shall be affected in person or property without the opportunity of being heard in the proper tribunal. From necessity, perhaps, personal notice has been dispensed with in many cases; these street proceedings among the number. The party who is assessed for benefit merely (no part of his property being taken), is never summoned before the Commissioners. He has no notice of the proceedings except by that publication for 14 days which the old act prescribed, or by the publication under the new act. His property and himself are bound upon the assumption that he has seen that notice. The law therefore must be observed to a scruple. No judge has a right to say that from great publicity, or from the actual taking of one paper containing the notice, or from any thing short of the absolute fulfilment of the requisitions of the statute, the party is to be bound.

What absurdity is it to imagine that the clear command of the Legislature that notice must be given in four papers, and by posting up copies in three adjacent places, is to be fulfilled by any other mode of notice!

I pass over another most important question in this bill viz: the carrying Art-street through a part of the city included in the map of 1807. It is needless to discuss it, in the view I have already taken.

I have, however, had my doubts since the decision of the Chancellor in Vandevoort vs. The Village of Astoria whether in these cases I ought, as injunction master, to do more than grant an order to show cause. Certainly the case here is very different; the Trustees of Astoria being in the act of making the improvement complained of. Here it is to prevent a recovery in this mode of the sum assessed for the improvement. I have concluded, however, that it is most proper for me to grant on order to show cause, with a temporary injunction.

I doubt whether I have a right to impose terms upon granting an injunction. Otherwise I should direct that the injunction be on the condition of the complainants filing a written consent with the bill, or endorsed upon it, submitting to abide the decision of an action to be had in a court of law by the Corporation against one of the parties, the form and other particulars attending the bringing such action, to be settled by this Court.

Martha Amory and others,
vs.
The Mayor, Aldermen, &c.

This case is, in its leading particulars, similar to that of Stuyvesant vs. The Corporation, before noticed. It is distinctly charged as to the proceedings in relation to the 6th avenue, that when the first publication of the notice of motion to confirm the report was made the act of 20th of April, 1839, was in force the rule of confirmation being made on the 6th of June, 1839. Here also the question under the 12th section is of great importance as the costs of the opening exceeds $10,000. Some questions may arise under this section; but this at least is clear: No part of the costs can be levied upon the party or his property, nor can a sale be made to pay them until the taxation has been made. How far if this were the only neglect, it would affect the whole assessment, I need not now enquire. I am clear that it justifies an interference with the present sale, which is to raise the whole amount, including the costs, provided this court has any jurisdiction at all; a point before examined.

John Haggerty and others,
vs.
The Mayor, Aldermen, &c.

The complainants in the bill, who are numerous, seek an injunction against selling their property assessed for the improvement of John street, and advertised for sale on the 27th inst.

I refer to my opinion in the case of Stuyvesant, vs. The Corporation, for the reasons upon which I have allowed a temporary injunction. It is however peculiarly incumbent upon me in this instance, to see that the case before me is substantially different from that of Wiggins, vs. The Corporation heretofore decided by the Chancellor, and in which an injunction was refused.

In the *first* place, the delay referred to by the Chancellor in the last clause of his opinion is fully accounted for in this bill; and as the Corporation never sued at law, and never advertised until the present notice of sale, there never was an opportunity for the complainants to resist the demand or to apply to this court. I have before held that until an advertisement was begun there was no jurisdiction.

Next, in the case of Wiggins no proceedings to sell the property had been taken.

Again, in that case the statements on the bill did not exclude the supposition that on the record of the proceedings it may have appeared that the ayes and noes were called. That difficulty is fully met in the present case.

Again, the bill was there defective upon the point of the complainant being the actual owner of the property assessed when he filed the bill.—The present bill is in this particular unobjectionable.

And lastly, a new and very important point is here introduced. The report was brought before the Supreme Court in ————, 1838. It was sent back for correction, and the motion for final confirmation made and the rule entered in September, 1839. At that time the 12th section of the act of 20th April, 1839, was in force. The costs were never taxed under that 12th section. The amount is added to the sum assessed, and each of the complainants' property is liable for and was to pay a proportion of such costs. The sale is to raise that proportion as well as the assessments for benefit. Now the section, as I have shown in my opinion in Stuyvesant vs. The Corporation affects proceedings subsequently taken. It is wholly illegal to charge the costs upon any party until they were taxed. Notice of the taxation is directed to be given in a public manner, and certainly without such notice and taxation the parties assessed cannot be bound to pay them.

It has been decided, from reasons of convenience and in the absence of any peremptory provision of the statute, that costs may be included in the assessment, and imposed prospectively by the Commissioners; and that an inconsiderable variation in the amount taxed from the amount imposed, will not affect the validity of the proceedings, nor prevent the confirmation of the report (Wiggin vs. The Mayor, &c, in Chancery, March 6, 1841.)

But if the section prescribing a taxation applies to this John street case at all, it is apparent that no party can be called upon to pay any portion of the costs until a due taxation has been had.—Without such taxation there can be no obligations to pay, and no lien on the party's property. What will be the consequence of this, and whether it may not be corrected by a taxation now and proportionate abatement, I need not inquire. The property is advertised to be sold for a debt, some of which at least is illegally imposed upon it.

By adverting to my opinion in the case of Westervelt & Codwise vs, the Corporation, it will be seen that it is settled law that the costs of the proceedings cannot be assessed upon the property without an express statute; that in a case in Albany, an assessment was set aside for want of such statutory provision; and that in the instance of opening streets in New York, the old act admitted the addition of the costs. Now I think the case will appear very clear if we suppose that it had been part of the old act that the cost must be taxed upon notice before they could be added to the assessment for benefit. Certainly they could not be recovered until taxed. I may add that, as the Supreme Court is empowered to make rules for carrying the act into effect, all inconveniences may readily be avoided.

M. HOFFMAN, Assistant Vice Chancellor.

VOL. I.] NEW-YORK, FEBRUARY 28, 1844. [No. 12

THE ASSESSMENT COSTS.

DECISION.

The motions made at the December Special Term of the Supreme Court, were by Mr. Emmet, one of the Ex-Counsel of the Corporation of the City of New-York, for the confirmation of the Reports of the Commissioners of Estimate and Assessment, for opening 37th street, 39th street, 128th street, 11th avenue, and Madison avenue.

Thirty-seventh and thirty-ninth street Assessments were commenced near eight years ago, viz: in June, 1836. The Common Council have never at any time, passed any resolution for to authorize an application to the Supreme Court for the appointment of Commissioners for opening these two streets. Yet notwithstanding this, an application was made to the Supreme Court, on a petition signed by the Mayor and Clerk of the Common Council, and Commissioners were appointed on the 24th June, 1836. The Report of the Street Committee of the Board of Assistants, stating the reasons why these streets were not to be opened by Commissioners, in detail, and the affidavit of the Chairman of the Committee, stating the reason why no resolution was introduced to authorize the application to the Supreme Court, are to be found in this volume, pages 141 and 142.

Andrew Warner, one of the Commissioners of Estimate and Assessment, in the 37th street proceeding, was examined as a witness in 1841, before the Select Committee of the Senate, appointed to investigate Assessment abuses in the City of New-York, and stated that he was sworn into office on the 24th of October, 1836, as one of the Commissioners for 37th street; that the Commissioners had completed their Report twelve or eighteen months previous to that time, and that it had not been presented to the Court for confirmation; has not heard Mr. Emmet state why he has not presented the report for confirmation. The witness also stated that the Commissioners were not all in the habit of attending the meetings, but were allowed compensation, the same as if they did attend.

The Report was finished, it appears, in 1840, and lay dormant after that time near four years before it was presented for confirmation.

Notice was given for taxing the fees of the Commissioners, Counsel and Surveyors, in these cases, before William Paxson Hallett, Esq., Clerk of the Supreme Court, who had himself acted as Commissioner in several streets, where the charges had been exorbitant. The Costs, &c., were taxed at more than TEN THOUSAND DOLLARS, to be assessed upon the land.

Objections were made to the taxation of the costs by Mr. Hallett, by the Counsel for the sufferers before the Court, on the ground that Mr. Emmet divided the fees with some of the Clerks of the Supreme Court, in Assessment matters, and read from Senate document No. 86, of 1843, a Report of a Clerk of the Supreme Court, to that effect.

In thirty-ninth street, Anson G. Phelps, Esq., was assessed on a piece of ground for the opening of this street; the same piece of ground had already been assessed for the pretended opening of fortieth street, $575, and also for the pretended opening of the 1st avenue, from 28th to 42d street, the further sum of $312, besides appropriating one third of the land for the avenue. This made $887, exclusive of the 39th street assessment; the interest of these two first assessments, exceed the value of the land assessed. Had the streets and avenues been opened by one sett of competent Commissioners, as was all that was authorized by the Common Council, the assessment on this piece of ground, would not have amounted to more than a few shillings, instead of exceeding more than FOUR TIMES THE VALUE OF THE LAND.

The Counsel for the sufferers, RICHARD MOTT, ESQ., on the motion for confirmation, objected to the competency of the Court to act in these matters, under that provision of the Constitution which prohibits a Judge from holding any other office or trust, and insisted, that in appointing these Commissioners of Estimate and Assessments, and confirming their Reports, the Judges did not act as a Court, but acted as Commissioners. This the Courts have all held, as did also the Hon. Select Committee of the Senate, who examined into the assessment outrages. Chief Justice SPENCER and Chief Justice SAVAGE, have both held that the power exercised by the Court in Street matters, was in the capacity of a Commissioner and not as a Court.

Mr. Mott read from the Constitution of 1777, and also of 1823; section 25 of the former, and Sec. 7 of Article 5 of the latter, on the prohibiting Judges of the Supreme Court from holding any other office or trust.

He also read the respective letters of the Judges of the Circuit Court of the U. S., for the districts of North Carolina, Maryland, and Pennsylvania, addressed to the President of the United States, in 1792, in which they refused to serve under an Act of Congress imposing duties upon them in reference to invalid pensioners, on the ground of constitutional disability. He also read a letter from the Judges of the Circuit Court of the U. States, for the district of New York, in which they consented to act as COMMISSIONERS, but not as a Court. In these cases the Judges admitted that the duties required by the Act of Congress were of a meritorious character, and they therefore regretted their inability to act, considering the duty inconsistent with their oaths of office and the Constitution of the United States. These letters are to be found in the Municipal Gazette, No. 16, of Nov 17th, 1843, page 286, in connection with the other objections urged by the Counsel in these cases.

Mr. Mott also urged the provisions of the Constitution of 1777 and 1823, in connection with the Colonial law of 1691, which are set forth and discussed, on page 199, of the Municipal Gazette.

The provisions of the Constitution refered to, are Section 41, of the Constitution of 1777, and Sec. 7, of Article 4, of the Constitution of 1823; also, Section 2, of Article 7.

This great Constitutional Question, was most ably argued by Mr. Mott, and he has gained for himself a well earned fame, in the success which has attended his efforts.

Mr. Mott also placed before the Court, such public documents as conclusively show that these assessment proceedings are notoriously of a scandalous character, and did not commend themselves to the favorable consideration of the Court.

The Counsel moving for a confirmation, indulged in the use of very abusive language against citizens who had publicly opposed these assessment abuses, but was made to take his seat, and was deservedly rebuked by the Court.

This decision will relieve citizens from the payment of arbitrary and disgraceful assessments, for sham improvements, and will also release all lands sold for such assessments. Those who have paid assessments more than six years ago, are barred by the Statutes, as the Corporation will not hesitate to plead Statute limitation.

The streets on the agricultural part of the island, will not be harmed by this decision.

Those who have sold land bordering on a street or avenue, as laid out in 1807, have, by the Act, dedicated the land in the street or avenue, to public use, whether they owned on both or only on one side of the street, as the conveyance sweeps all the land they owned in the street or avenue opposite the ground conveyed.

Those who own both sides of the street or avenue, have nothing to do but to put up fences, and the street is made without the use of Surveyor, Counsel, or Commissioner, and in those cases where the above will not apply, the several owners may negotiate or the Corporation can do so, and if no ar-

430; and there, the grounds on which the writ usually issues, rather than the inquiry whether it would lie to a corporation, was the question discussed at the bar and considered by the court. See, also, *Parks* vs. *The Mayor, &c. of Boston*, 8 *Pick.*, 218. All our city, and many of our village corporations have been vested with very large powers within their respective limits; and if a certiorari will lie to remove into this court an ordinance for constructing a sewer, it is difficult to see where we can stop short of reviewing all their acts in the same way, which looks to me like a great stretch of jurisdiction.

But if a certiorari will lie, it does not follow that it should be awarded in every case where the relator may have some ground for complaint. The allowance of the writ rests in the sound discretion of the court, and it has often been denied where the power to issue it was unquestionable, and where there was apparent error in the proceeding to be reviewed. And if it has been improperly awarded, it is not too late to correct the error after a return and hearing of the merits. *The People* vs. *Supervisors of Alleghany*, 15 *Wend.* 298. And see *The People* vs. *Supervisors of Queens* [Feb. 1841]. There are, I think, few if any cases where an ordinance or assessment for constructing a common sewer, or making any other city improvement, should be removed into this court by certiorari. It is better that persons having cause for complaint should be left to such redress as they may have by action. The case falls within the principle of those which have just been cited; and in the first of those cases a certiorari which had been issued to remove an assessment for county charges was quashed after a return and a hearing on the merits; and there, too, the relator had no other remedy. Great *public inconvenience* must necessarily ensue if we attempt in this way to review assessments for city improvements, which are not unfrequently as extensive in their influence as assessments for county taxes. The principal objections which have been urged against these proceedings are, 1. that the ordinance for constructing the sewer is void, because it does not appear affirmatively that the ayes and noes were called on taking the vote upon it in the two Boards; 2. that the order confirming the assessment is void for the same reason; 3. that the confirmation could only be made by the whole Corporation assembled in one body, and not by the Common Council in two Boards, as organised under the act of 1830; and 4. that no confirmation appears—there being no ordinance or resolution for that purpose, but only an extract from the minutes of the Common Council.

Now, without considering what answers there may be to these objections, they seem to prove too much for this form of remedy. If the points are well taken, there has been no ordinance for constructing the sewer, nor has the assessment ever been confirmed, and there is nothing to be reached by the certiorari. If the relators have suffered under color of proceedings which never had any legal existence, their remedy is by action. All the other questions which arise upon the record—and we cannot look beyond it—may, for aught I see, be as well tried in some other form as in that which the relators have selected, and we shall do them no harm by withholding this extraordinary remedy. I must not be understood as intimating that a certiorari should be allowed whenever the question can be reached in no other form. There may be many cases where the public inconvenience, which would be likely to result from this mode of review, would greatly outweigh the importance of correcting some legal, though, perhaps, not very grievous, error in the proceedings.

The relators in this case have taken no objection which is not equally applicable to all the other persons who have been taxed, and the whole assessment must stand or fall together. It is also important to notice, that the ordinance for making the improvement was passed, the work done, and the assessment made and confirmed, more than three years before the certiorari was sued out. The time of bringing a writ of error from a final judgment is limited by law to two years; and I think a case can rarely happen where it would be proper to allow a certiorari after the lapse of a longer period. This is a sufficient ground for quashing the writ, aside from other considerations tending to the same results.

Certiorari quashed.

MOUNT MORRIS SQUARE.

The opening of this Square was founded upon the resolution of an alderman, which was referred to a committee, who reported in favor; the report was adopted, and a resolution passed to carry it into effect, but the report was not published, nor were the ayes and noes called on taking the vote, nor was the same published, as required by the charter. The resolution thus passed by the two Boards was approved by the Mayor on the 20th October, 1836, and on the 4th of September, 1839, the commissioners made their report—a delay of near three years.

The place designated as Mount Morris Square is on a rocky hill or ledge near Hurlgate, about seven miles or more from the City Hall. We have examined the place, and should think it about one hundred feet high, and that it would require an outlay of more than two millions of dollars to reduce it to the city grade. The Catskill Mountains are full as well calculated for a public square as Mount Morris. The award made for Mount Morris is $22,000; the expense of making it and assessing the amount is $.

When the reports of the commissioners were deposited in the clerk's office for examination, no bill of expense accompanied the same. The reports are a mere recital of metes and bounds of the property awarded for or assessed, and the names of the supposed owners, and the amount of the particular award or assessment. There is no addition of the awards, and of the amount of assessments—no summary, schedule, or abstract—no diagram, or map, accompanies it. The property is described by map numbers, and the whole report a perfect wilderness to explore.

A map, with a list of names of the persons assessed, and of those to whom awards are made, with each of their respective amounts extended in two columns, and each added up, with a statement of the expenses, would be intelligible, but such a report as this is only calculated to confuse and mislead.

SUPREME COURT.

The People ex rel. Michael Floy, et al. vs. The Mayor, Aldermen and Commonalty of the City of New York.	Opening of Mount Morris Square in the City of New York. Points of Relators.

The motion is in the alternative.

First. To set aside the confirmation of the Report of Commissioners of Estimate and Assessment, which was confirmed Sept. 4, 1839.

This is asked for, on the ground, that no notice of the motion for confirmation was published or posted, as is required by the 9th section of the act of April 20, 1839. Laws of 1839, p. 182.

And the charges and expenses, which are enormous and unjust, were never taxed or allowed, as is required by section 12, of the same act.

The act of 1839 is general, and all its provisions would apply to all the then pending proceedings, but for the 14th section, which limits all except the 9th and 12th sections to future proceedings.

1. As to Notice.—There is no pretence that any notice was given in four newspapers; *or that any was posted*,—(see fore part of section 2, in connection with section 9, as to the manner of posting, Folio 23 to 26.)

2. Nor is there any pretence of taxation of the expenses.

As to this, *it is said*, that there is nothing in the section to require it to be done *before the Commissioners report*. This is clearly wrong. The charges are all "*allowed*" so far as the *payers* are concerned, when they are put into the report and confirmed. They then become a lien and charge on the lands assessed, and if the proceedings are regular, nothing but *payment in full* can remove them. There is no provision in any statute for a modification of the assessment, or a recovery back of part of it, on those charges being taxed afterwards and reduced. Nor is there any remedy, except to pursue the terms of the law and have them taxed, before assessing them on the land. The intent of the law is plain. The only "allowance" in the case, is that made by including them in the report. The Corporation itself never *allows* them, except in that mode. The Corporation pays the charges as thus included, *out of the assessments imposed for the same charges* on the adjacent lands.

Again. This court had made provision previous to this motion for confirmation, viz. in July 1839, for *these taxations*. But, if the court had not, it was the duty of the Commissioners to wait until they did. The law was imperative, that *they should be taxed*.

On both *these grounds*, therefore, the confirmation was irregular and illegal, and being made a rule of this court, it should be set aside.

3. Another ground for setting aside the confirmation, is the entire ignorance and want of actual notice in the relators, the great wrong and injustice of the estimate and assessment. See 19 Wend. 659, John street and Cherry street, per J. Cowen, 1 Cowen 74, Dover street.

The occasion is favorable for such action. The awards to parties for the lands proposed to be taxed, *are not yet payable*. None of them have been paid. Folio 39.

The confirmation being set aside, one of two things will ensue.

1. The Corporation will doubtless be induced to abandon this *improvement*, which is a century and a half in advance of the times. They will prefer paying and losing whatever is *justly* due to the Commissioners &c. who acted in the matter, to the odium and injustice of proceeding.

2. If otherwise, the parties can have the expenses taxed and reduced, the lands taken valued at 1-6 of the present estimate, and the lands omitted brought into the assessment; and thus be relieved from the gross and oppressive charges which are now imposed upon them.

Should the court conclude to set aside the confirmation, then it will be needless for them to examine the remaining points here presented.

Second. The second alternative of our motion, (which is sought only in case the court declines to set aside the confirmation of the report), is the issuing of writs of certiorari, to bring up for review all the proceedings for the opening of the square in question; it being alleged that they are without authority or jurisdiction, illegal and void.

It is asked that the whole, if granted, *be carried on as one proceeding*, both to save expense and the better to attain the justice of the case.

I. As to the issuing of writs of certiorari.

1. To the Justices of this Court acting as Commissioners on the confirmation, the allowance of the writ

is "a matter of course."—20 Wend., 685, matter of Carlton street; and see 7 Cow. 158, Bogert vs. The Mayor &c.; 13 Wend. 668 Patchen vs. Brooklyn.

2. To the Corporation of the City in reference to the proceedings before them. See 6 Wend. 564 Starr. vs. Trustees of Rochester, and 8 Pick. infra.

Although the issuing of these writs is a matter of "discretion," yet such discretion is a regulated, not an arbitrary discretion. See the remarks in 5 Rep. 100, Rooke's case.

Here, we expect to show that besides the manifest wrongs and intolerable injustice of the assessment, the proceedings are null and void.

We are not bound *on this motion*, to show this. That, we are to accomplish on arguing the return. We are only to show, that there is *probable cause* for presenting the points.

Then what is there to stay the writs? Not inconvenience? The awards are not paid, nor the square opened. Nothing is done.

But is *inconvenience* to *the Corporation*, by whose authority, this great wrong has been occasioned to us, to prevent the redress due to that wrong? Is *our inconvenience*—the confiscation of our property, nothing?

There is no imputation of laches. The confirmation was in Sept. 1839. These parties, ignorant that any thing was on foot till last summer, and ignorant of the irregularities *till Feb. last.*

Next, as to the probable cause for reviewing these proceedings.

II. The resolution for taking and opening Mount Morris Square is *illegal and void*, for the following causes, viz.

1. It was a judicial act or power exercised by the Common Council and the Mayor, as separate and distinct bodies, passing upon it separately. Whereas the Common Council cannot under such an organization exercise any such power.

Subd. 1. That this power is in its nature *judicial* and *not legislative*. 8 Pick. 218, Park vs. Mayor &c. of Boston; 2 R. L. 408 § 177; 1 R. Stat. 513, 515, Commissioners of Highways in towns; Stat. 23. Hen. 8, ch. 5; Stat. of Sewers'; Callis. on Sewers, 216, 7; id. 185. id. 163; Com. Dig.—Sewers, D. s. p.

6 Ad. & Ell. 807—Pocock vs. O'Shannessey, per Patterson, J.

8 Taunt. 602—D. of Newcastle vs. Clark.

Subd. 2.—The Corporation assumes to exercise this power under the *act of* 1813.—2 R. L. 408, § 177, &c.

They have no such power by their *charter*, and they have no prescriptive powers.

The statute of 1813 gave the power to *The Mayor, &c. in Common Council convened.*

It was a judicial power, to be exercised by the persons, or *officers*, then composing *The Mayor*, &c. See 1 Willcocks Mun. C. 40, s. 54.

That is, the Mayor, Recorder, Aldermen and Assistants, convened and acting together—as one body—"in Common Council convened."

No other class of officers—no combination of these classes, omitting one or more classes—could exercise the power.—1 Willc. 42, s. 57–8. Id. p. 68, s, 125; p. 101, s. 233 and 235. 7 Cowen, 533; note to Exparte Rogers, and the cases there collected.

Subd. 3.—The resolution in question was not adopted by the classes, or in the manner authorized by the act of 1813.

It was *legislated through* in the form prescribed by the act of 1830.—(Laws 1830, p. 125.)

This act does not extend to the exercise of *judicial* or *ministerial* powers. It applies solely to "the *legislative power* of the 'Corporation of the City'—(see s. 1)—and to the delegation of sundry *executive* powers"—s. 21.

As to *all other powers* of the Corporation, the existing laws were unaffected. They were to be exercised in the manner pointed out by the various laws conferring them.

The statute itself is plain enough, as to what powers were to be exercised under the act of 1830. Its history corroborates our view.

See acts of 1824 and 1828, which were severally rejected by the people of the city by immense majorities. Laws of 1824, age 162 128, page 317. In s. 4 and 5 of those acts, the language is the most comprehensive possible—"The *whole power* of the Corporation"—"Legislative *and other powers*," &c. &c.

Then see Kent's City Charter, p. 231, sec. 11th, 236, 264, 349—showing the history of the 1st s. of the act of 1830, in its passage through the Convention of the people. The sweeping clauses as to the *powers* were reduced to the sect. as now existing, except that the Legislature limited the s. to the legislative power of the "*Corporation*" instead of the "*City.*"

7 Dowl. & Ryl. 684—The King vs. Tremayne.

4 East, 17—Rex vs. Morris, and vs. Stanard.

3 Johns. Cases, 107—Gilbert vs. Columbia Turnpike Company; a strong case.

2 Cowen, 419—Sprague vs. Birdsall. A statute in favor of corporations, and in derogation of common right, is to be strictly construed.

5 id., 188—Malcom vs. Rogers. "Shall or may" is to be construed "*shall*," when public interests and rights are concerned.—19 Wend. 38; Long Island R. R. Co.

It seems to be abhorrent to common sense to say, that when the Legislature provided that this Corporation "*shall*" exercise this mighty power in a prescribed mode, it intended that the Corporation might do as they pleased about it—that they might construe "shall" to mean "won't."

4. The omission to publish the reports of committees and the votes, as is expressly required by the 7th sect. of the act of 1830.

See the foregoing head.

We will also remark, that this omission estops the corporation from charging us with delay or laches, in moving the court.

The grand object of the provision was, to give *notice, publicity*, to these proceedings.

See Kent's C. C. 257—286–7—and the Address of the Convention, pursuant to resolution at p. 346.

5. The resolution itself was never signed by the Mayor, or authenticated by any officer of either board. In other words, no such resolution exists.

III. There was no regular, legal or valid authority to the Mayor to apply to the Court for the appointment of Commissioners of estimate and assessment.

It will be perceived that the *resolutions* contain no such authority, and it is one as essential as that for the opening itself. See sec. 178 of the act of 1813.

IV. The assessment is illegal, because it indirectly takes private property for public use, without compensation.

A *public square* in a large City is for the health, the recreation, the convenience of all its citizens—as well as of strangers.

Whatever *pretence* there might be for assessing persons fronting on the square, for a part of the expense, there can be none in justice or equity as to owners who are many hundred feet distant.

2 B. & B. 691. Spofford vs. Harrison.

3 Ad. & Ellis, 248. Loady vs. Wilson. Callis. 8.

11 Wend, 154. Canal street extension.

V. The assessment on the relators and others was thus erroneous in principle, unjust, partial and oppressive.

See fol. 21 and 28 to 38—and the diagram.

Many of these errors are such as come within the purview of a certiorari.

Thus, the entire omission of large tracts coming within the bounds of the district assessed—viz:

1. The block between 5th and 6th Avenues and 125th and 126th streets—only one block removed from the square itself, and nearer than any of the relators' lands.

2. The block between 114th and 115th streets, and 4th and 5th Avenues.

3. Ten entire blocks between 5th and 7th Avenues, and 114th and 119th streets. A considerable part of which is nearer than our property.

4. The lands of the Corporation, on which is the House of Detention.

That these are to be corrected on certiorari, see

20 John's. 430—Le Roy vs. Mayor, &c. of N. Y.

3 Wend, 333—Ross vs. same.

10 id. 167—Baldwin vs. Calkings.

2 Wend 395, 398—Bouton vs. Brooklyn, recognizes the principle.

See also 5 Rep. 100—Rooke's case, s. p.

As to the oppression, see the illegal charges of Commissioners and Counsel, at fol. 21 and 29 to 31.

VI. The assessment, &c. is also erroneous and void. because it was not made *by all the three Commissioners.* Only one of them actually made it, and *only two* of them ever met or acted together in regard to it.

By s. 178 all the Commissioners *must act in the premises*, although only two need sign the report.

7 Cowen 526—Exparte Rogers, and the valuable note at p. 530.

8 Cowen 544—Sinclair vs. Jackson.

6 Johns. R. 39—Green vs. Miller.

This principle is incorporated in the Rev. Stat. See 2 R. S. 555, s 27.

VII. The report of the Commissioners and its confirmation are also erroneous and void for the want of the taxation of the costs and charges of the Commissioners, Counsel, Surveyor, &c., and for the neglect to give notice of the motion to confirm the report; pursuant to the 9th and 12th sections of the act of 1839.

Sufficient has been stated on this subject in the two first pages hereof.

VIII. Fifteen months from the confirmation of the report having elapsed, and the square not being opened, the Corporation cannot now proceed to open it, and have lost all jurisdiction of the subject matter.

Laws of 1818, page 196, shows that they cannot suspend the opening "exceeding in the whole 15 months."

If it were otherwise, they can *collect the assessments, and delay the opening a century.* Because if they can suspend one day beyond the 15 months, there is nothing to prevent their doing it 1000 years, if they think proper.

These corporations take nothing by implication. If they claim power they must show an express grant of it;—Willc. p. 100; p. 99, s. 226;—and as the Court says in the cases of John street and Cherry street, "the argument is just as good for a 'county, town or village,' as for this great city."—19 Wend. 659.

(The argument on this first head (third subd.) is too extended to be by any possibility compressed into the requisite brevity for these points, and much of it is omitted.)

2. The resolution is illegal, because it was made without any petition therefor.

S. 177, above cited, requires not only the *judgment* of the Mayor, &c., but also the *petition of three-fourths of the land owners* fronting on the Square to be opened.

This Square is in the part of the city laid out by the Commissioners under the act of 1807. It was authorized by act of May 10th, 1836, p. 395.

The act of 1813 left these matters to be set on foot by those who would have to bear the expense.

Unless such is the construction, "*and also*" in the 9th line of the s. must be read "*or.*"

The Corporation had no jurisdiction to act without such petition of three-fourths.

It is like the case of a Sewer rate, assessed by the Commissioners of Sewers without the presentment of a jury—on which it was held that the commissioners acquired no jurisdiction, and that the warrant to collect it was void.

4th London Jurist, 860. (3 Oct. 1840.)

Styles' R. 179, 185, 191—Custodes Libertat. &c. vs. Inhabitants of Outwell, on certiorari, proc. quash.

ed, because it did not appear that the jury was of the Hundred, &c.

3 Cow. & P. 63—Birkott vs. Crozier, on similar grounds.

And as to acquiring jurisdiction—see Style 13—Whitley vs. Fawcett, and id. 85. Rex vs. Apsley.

7 Ad. & Ell. R. 266—Emmerson vs. Saltmarshe—4 Lond. Jurist, 790, 793.—Att. Gen. vs. Daniel.

2 Binn. 250—Schuylkill Falls Road.

All these are Sewer cases.

3. The resolution is also illegal and void, because the *ayes and noes were not called* or taken on its passage in either Board—(supposing it to be upheld as a proper act under the organization of 1830.)

Section 7 of that act expressly requires it. The vote cannot be taken in any other manner. The law permits it in no other mode or form.

The Counsel of the city says this is merely "*directory.*" It is no more so than the provisions in 12th, 13th, and 14th sect., and the one can be disregarded as much as the other.

This is a power granted to a *mere corporation*, by which the lands of citizens may be taxed, and those lands confiscated, and their personal property distrained.

It must be construed strictly. It cannot be tolerated that the donee of the power is to execute it as he pleases, or in any manner save that provided in the grant.

(This point also is of great magnitude, and can scarcely be presented in this place. Among the host of authorities, we will refer to these only :)

7 Barc. Abr. 448—Statute, G. the general rule, as to a stat. directing a thing to be done *in a certain manner.*

SUPREME COURT.

The Mayor, Aldermen, and Commonalty of the City of New York, *adsm.*	Opening of Mount Morris Square.
The People ex rel. Michael Floy, et al.	Defts. Points.

First as to the motion to set aside the Report of the Commissioners.

1. This motion will not be entertained because the Report was confirmed by the Judges of the Supreme Court, acting as Commissioners, and the only mode of bringing the question before the Supreme Court is by certiorari, 11 Wend. 154.

2. The relators are too late in making any such application. The Report was confirmed Sept. 4, 1839. The affidavit states that the party had no actual notice of these proceedings "until some time during the summer of 1840." This was sufficient to have enabled him to make inquiry and present his objections months ago.

3. The notice of presenting the report for confirmation was given pursuant to the Act of 1813, as appears by the report itself, and the accompanying papers. The objection is, that the notice was not given as required by the *4th section* of the act of 1839, p. 183.

These proceedings were commenced anterior to the passage of the act of 1839.

The 4th section, by the express enactment of the 14th section, does not apply to proceedings previously commenced.

The 9th section applies only to motions, *other than those therein before provided.* The notice of making the report is expressly provided for by the 4th section and is excluded from the provisions of the 9th.

4. The question of taxation of costs should have been raised on the motion to confirm. But is was necessary for the Commissioners to insert in their report, an amount sufficient to meet the costs and expenses. This amount must necessarily have been prospective and could not have been ascertained on taxation. The costs, however, may and must yet be taxed,

Such has been the decision of Judge Bronson in the case (I believe) of 29th street, and such was the late decision of the Chancellor in the case of Wiggin vs. The Corporation.

5. The relators, waving their other objections, seek to set aside the report, on the ground of ignorance of the proceedings.

This is attempted to be proved by the testimony of one person, who swears to his ignorance, until *last summer.* And he has been assessed in the enormous amount of $52.

The rights of various persons have become interested in this question since the confirmation of the report. And the annulling of the proceedings is calculated to prejudice the public interests. It would lead to a draw upon the City Treasury.

Second.—As to the granting of certiorari.

1. The allowance of this writ to the justices of this court as Commissioners, is only a matter of course to enable the relators to carry the case to the Court of Errors. This court will affirm its own act as Commissioners. There is nothing, however, upon which to found o writ of error. The Court of Errors will only review such questions as were raised in the court below.

When no doubt exists as to the correctness of the decision, this court will not grant a certiorari without annexing as a condition that it *shall not operate as a stay of proceedings*, 13 Wend. 664.

2. The granting of a com. law certiorari is only done in the exercise of a sound discretion. People vs. The Supervisors of Allegany, 15 Wend. 206.

In this case, on the confirmation of the report, Sept. 4, 1839, the title to the land became vested in the public, 2 R. S. 413.

On the 1st April 1841, parties become entitled to awards. They have lost their land, and have made calculations on the money to be paid therefor.

The amount of assessments is $25,743, Benj. Townsend who makes the affidavit represents about the one five-hundreth part of this.

The proceedings of the Common Council which are the subject of complaint took place in September and October 1836, nearly five years since.

3. The resolution for taking and opening Mount Morris Square was a valid and effectual ordinance of the Corporation.

I. The stat. 2 R. S. 408, § 177, conferred the power in relation to streets &c. upon "the Mayor, Aldermen, and Commonalty of the City of New-York." That is their corporated name. Charter of 1730 § 1.

They constitute the municipal government of the City of New York and their functions are either legislative or executive.

Congress and the Legislature both lay out roads and highways, their acts are all legislative, although they may have an effect which resembles the exercise of a judicial power.

The Common Council of the City of New York is not "*the*" Corporation, nor is it any body separate and distinct from the Corporation. It is the Corporation assembled in its legislative capacity. The Corporation acts in Common Council, except when it performs an act merely executive.

The Corporation itself, aud by its corporate name, is vested with all the powers, franchises, property, and immunities conferred by its charter. Charter 1730, § 1, 37. &c. &c.

It was not correct, therefor, in the loose language sometimes used, to confer all the corporate franchises upon the Common Council. The Convention of 1820 subdivided the ordinary powers of the Corporation into legislative and executive, the former, by the 1st section of the act of 1830, p. 125, they conferred upon the Common Council the latter, by the 21st section, they ordered to be performed by distinct departments to be organised by the Common Council.

The learned counsel for the relators finds that provision is thus made for the legislative and executive power; but being anxious to discover something *not provided for*, calls the power which he is contending against judicial.

I pray your Honor not so to decree it, through apprehension of the quo warranto of the Attorney General.

But it is the act of 1813, and not that of 1830, which confers the power. And the counsel for the relator agrees that it must be exercised by the Common Council as then organized. I have as great an attachment to our old Recorder as he can have. But the 15th section of the act forbids his being a member of the Common Council any longer. The act of 1830 did not change the power which was to act, it only altered the form of its action. Both before and since the amended charter, it was the Mayor, Aldermen, &c. who acted in Common Council.

II. The first part of the 177th sec. 2 R. S. 408, and of the 178th sect. p. 409, especially vest the discretion in the Corporation, unmoved by any petition, to take proceedings for the opening of a street, &c. It was the intention of the act to make it their duty on the application of three-fourths of the owners. This has always been the construction of the act.

III. The requirement of the 7th section as to the ayes and noes is directory, and not peremptory. It is not of the essence of the thing required to be done so as to constitute the resolution a valid ordinance. These requirements are contained in the 12th and 13th sections, and were complied with.

The object of the 7th section was to make the members answerable to their constituents. It was not to make the taking of the ayes and noes an indispensable requisite to the validity of the proceeding. The words, "before it shall take effect," in the 12th section, are not to be found in the 7th section. There are no negative words, or words of exclusion.

It would operate to make an act, valid by the 12th and 13th sections, invalid by the non-compliance with a requirement as to an act *subsequently* to be done. No time of limitation is fixed, within which to determine the validity or invalidity of an ordinance.—5 Cowen, 269; 6 Wend. 486; 3 Mass. 230.

IV. The relator is grossly in error in stating the resolution not to have been signed by the Mayor, or authenticated by any officer of either Board. The affidavit of the Clerk shows the resolution to have been regularly passed, authenticated and approved.

4. The application for the appointment of Commissioners, as appears from the paper on file, is under the common seal of the Corporation, and regularly authenticated. The resolution, as set forth in the affidavit of the relator, directs the counsel to take the necessary measures to carry the resolution into effect.

The seal imports authority. The resolution expressly directed the application. The official act of the counsel in representing the Corporation on the application for the appointment of Commissioners cannot be controverted.

5. The constitutional question as to the taking of private property for improvements, as in this case, has been repeatedly settled by this court. That question does not arise here. This is an assessment for a benefit conferred. All experience shows that improvements of this nature greatly enhance the value of property in their neighborhood.

6. Whatever may have been the reason for the omission to include certain blocks in the assess-

CASES IN CHANCERY.

The following cases in the Equity Court show a great fluctuation in a very brief space of time:

The opinions given by His Honor Chancellor Walworth, subsequent to the decision in the case of the *infant children* of J. Meserole, deceased, will be found in the proper place, in this number, in chronological order, after the decision of that case by the Court for the Correction of Errors.

The court of the last resort, in that case, decided that the proceedings of the Corporation of Brooklyn in imposing that assessment "ARE ILLEGAL AND VOID."

IN CHANCERY.

Before the Chancellor.

Oakley *vs.* the Trustees of Williamsburgh and Moore.

The trustees of the village of Williamsburgh are not authorized by the village charter to alter the grade of a street, after the grade thereof has been regulated and established by them as directed in the act of incorporation. And where such trustees were proceeding to dig down and alter the grade of a street, which had been regularly graded and regulated; *held*, that the owner of adjoining lands, whose property would be seriously injured by an alteration of the grade, was entitled to an injunction to restrain such illegal proceedings of the trustees.

The Court of Chancery has jurisdiction to interfere by injunction to restrain the defendant from proceeding in an illegal act which will necessarily cast a cloud upon the complainant's title to real estate, and will naturally diminish its value.

This was an appeal from the Vice Chancellor of the first circuit, refusing to grant an injunction.—The bill of complaint in this case, which was filed by the complainants in behalf of themselves and all others having a common interest with them, after setting out that part of the act of incorporation of the village of Williamsburgh which made it the duty of the trustees to cause a survey and map of the village to be made, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting on such map all the gradations and regulations which might or should be required in the roads, alleys and streets, accompanied by such remarks and explanations as the nature of the subject might require, to be kept by the clerk, subject to the inspection of the freeholders and inhabitants of the village, so that no person could plead ignorance of the plan to be adopted for opening, laying out, levelling and regulating the streets of such village, (Laws of 1827, p. 276, § 19,) stated that, in pursuance of their act of incorporation, the trustees of the village caused such survey and map to be made, signed, and filed, as directed by the act, except that the gradations of the streets were not exhibited on the map; that such gradations were omitted on the map because the formation of the surface of the ground rendered it impossible to comply with that part of the provisions of the statute immediately; for which reason the grading of the streets was left to be established by actual survey from time to time, as it should become necessary to open such streets; that in 1828, the trustees caused a survey and profile to be made of the southerly section of First street, running from Grand street along the margin of the East river to the south bounds of the village; and caused such survey and profile to be filed with their clerk, and caused the street to be graded and levelled in conformity thereto; and setting out the certiorari, &c., in the supreme court upon which these proceedings of the trustees were confirmed; (See Coles v. the Trustees of Williamsburgh, 10 Wend. Rep. 659;) and that the trustees subsequently caused similar sections of Second and Fourth streets, and several other streets intersecting the same to be laid out, and surveys and maps and profiles thereof to be made and filed in the same manner, and caused the said streets, or certain sections thereof, to be levelled in conformity with such surveys; and that one of them, South Second street, had been paved and the assessment therefor had been made and collected or paid. The complainants then charged or alleged, in their bill, that one of them owned large and valuable tracts of land on the southerly section of First street, and on the other streets which had been so graded and levelled; and that others of the complainants respectively owned lands on such other streets; some of which lands had been purchased since the regulation and surveys of the said streets, and upon the faith thereof as the permanent plan for the grading and levelling of those streets; and that no change or alteration in the gradation of such streets could now be made without serious detriment to the rights and interests of the complainants in relation to their lands; but that the trustees of the village, upon the petition of the majority of the landowners on the south-easterly section of First street, in June, 1836, passed an ordinance or resolution to alter the grade of that street as thus permanently settled, and to re-regulate and pave the street; and that they had employed the defendant Moore to cut down and alter the grade of the street about six feet; which, if permitted, would require a corresponding alteration of the grading of the other streets, upon which some of the complainants property was situate, and which intersect the south section of First street; and that the re-grading of First street, if carried into effect in the manner contemplated in the ordinance, would materially impair and injure the value of the complainants property. They therefore asked for an injunction to restrain the defendants from proceeding to alter the grade of the street as theretofore established, and from digging down the street or removing the earth therefrom. An order to show cause why an injunction should not issue having been granted, the defendants introduced affidavits showing that the alteration of the grades of the streets was necessary for the benefit of the village, and more particularly for the convenient use of the waters of the East river for commercial purposes; whereupon the Vice Chancellor made an order denying the application for an injunction.

J. H. Lee and D. B. Ogden, for complainants.

Ebenezer Griffin, for the defendants.

The Chancellor.—If the trustees of the village of Williamsburgh have the power, under their act of incorporation, to alter the grade of the streets of the village after it has been once regulated and established by them as required by the 19th section of that act, the case before me is not one in which it would be proper for this court to interfere; as there is no pretence that the trustees are acting in bad faith, and without reference to what they honestly believe to be for the interest of the inhabitants of the village. On the other hand, however, if they have no such power as they have assumed to exercise by the ordinance in question, then this appears to be a very proper case for the allowance of an injunction, to restrain an illegal proceeding by them to dig down and alter the grading of the street as originally established, which, as alleged in the bill, will be a material injury to the value of the property of these complainants. The assessments upon their lots for the expenses of the proceedings to alter the gradations of the streets, although they might be so far void as not to affect their legal title to the land, would of themselves be a *cloud* upon that title which must necessarily diminish the value if it did not entirely prevent the sale of such lands as village building lots; *as a prudent man would not be likely to buy* a city or village lot for the purpose of building thereon, and pay the full value of the lot, while a cloud like this was hanging over the title, which might thereafter subject him to litigation if not to actual loss of the property. And as this court sometimes exercises its jurisdiction for the purpose of removing a *cloud* from the complainant's title to real estate, it may also, in a proper case, interpose its authority to prevent the illegal act from which such a *cloud* must necessarily arise. (*Petit* v. *Shepherd*, 5 *Paige's Rep.* 493.) The decision of the present case, therefore, depends upon the question whether the trustees of Williamsburgh have the right, as claimed by them, to alter the regulation and grading of their streets after it has been once adopted and established. For it is judicially settled by the decision of the Supreme Court, in reference to this particular street, that the grade thereof had been legally established by the trustees, before the institution of the proceedings now in question to re-regulate the street and to grade the same anew.

The object of the legislature, by the 19th section of the statute, appears to have been to have a permanent plan of the village made and adopted by the trustees, not only as to the location of the streets, roads and alleys, but also as to the regulation or gradations thereof; to which plan all subsequent proceedings should conform. Hence, it was made the duty of the trustees to cause a survey and map of the village to be made and filed, as soon as conveniently might be, exhibiting the streets, roads and alleys to be permanently laid out, and also exhibiting all the gradations and regulations which would be required in such roads, alleys and streets. And it appears to me that the making of this survey and map of the locations and gradations of the streets, roads, &c., of the village was not only a useless proceeding, but was also calculated to deceive those who might thereafter become the owners of village property, if it was not intended to confine the proceedings of the trustees to the opening and improving the streets, &c., according to the locations and gradations as thus established. And I think there could not have existed a reasonable doubt as to the intention of the legislature thus to restrict the power of the trustees if it had not been for the introduction of the word *altering* into the subsequent sections of the act.

The 21st section of the act provides that it shall be lawful for the trustees to order and direct the pitching, regulating and paving the streets according to the map and survey, and the *altering* amending and cleaning any street, vault, sink, &c.; and to cause estimates of the expense to be made, assessed and collected, &c. And the 24th section contains a similar power as to the widening and altering streets and highways already laid out, and as to the laying out and making other roads and streets, conformable to the map, as the trustees might think necessary and convenient; with a provision for compensating the owners of lands for the property thus taken for new streets, or the alteration of the old ones, and for raising the amount by assessments upon the owners of lands benefitted thereby. It is under the power of altering streets, as given in the 21st and 24th sections, that the counsel for the defendants claim the right to change the location or to alter the grade of streets which have been located or graded, in conformity to the general map and plan of improvements, subsequent to the act of incorporation. In this I think the trustees have entirely mistaken the meaning of the legislature in relation to the alterations which they were, by these sections, authorized to make. At the time when this act of incorporation was passed there were, roads or streets already existing within within the chartered limits of the village. And as a general plan of improvements was to be made and adopted by the trustees, both as to the location and the grade of every street, alley and road in the village, it was anticipated by the legislature that it might become necessary for the trustees to alter the grades and locations of the old roads and streets, so as to render them conformable to the general and permanent plan of the village, as well as to pitch, regulate, pave and open the new streets, according to the map and survey. Hence the necessity of providing for the alteration of streets in the 21st section, which relates to the pitching, regulating and paving, as well as in the subsequent section regulating the manner of altering and widening old streets and opening new ones. The word *altering*, therefore, in both of these sections, related to the old streets and roads which existed at the time of passing the act of incorporation, and not to the new streets which might thereafter be laid out, opened or graded in conformity to the map and survey, and to the grade as first adopted by the trustees. And these trustees have no power or authority to change or alter the grade or location of any such new

street after it has been once established by them, in conformity to the map and survey and gradation first established, or of any of the old streets after they have been made to conform to such general plan.—The defendants have no legal power therefore to alter the grade of this southerly section of First street, or of the adjacent streets which have been thus regulated and graded.

The inhabitants of this village, however, are not without remedy if the interest of the public requires a correction of any mistake which the trustees may have made either in laying out streets, or in fixing the gradations thereof. For it is perfectly competent for the legislative power which directed a general plan of the village to be adopted and adhered to by the trustees, to authorize them to make such alterations in the plan as may be found necessary either in regard to this particular street, or as to the streets of the village generally. And if the legislature shall think proper to authorize such alterations, it will be for the same power to prescribe the proper mode of ascertaining who are injured by such alterations, and of compensating them for such injury.

There is no ground for the objection in this case, that the complainants have waived their rights by delay, or by any acquiescence in the proceedings of the trustees. They protested against the alteration of the grade of the street the first opportunity they had for that purpose: and they followed it up with an application to this court for redress when they found that the defendants were determined to proceed notwithstanding such protest.

The order of the Vice Chancellor must therefore be reversed, with costs, and an injunction must be granted to restrain the defendants from proceeding with the proposed alteration of the former gradation of the street as originally established by the trustees. (See 6 Paige, 262)

DECISION IN THE MATTER OF WIDENING JOHN STREET.

IN CHANCERY.

BEFORE THE CHANCELLOR.

Timothy Wiggin

vs.

The Mayor, &c., of the city of New York.

This was an application for an injunction to restrain the collection of an assessment for the widening, straightening, and improving John street, in the city of New York, between Broadway and Pearl street. From the bill it appeared that the ordinance of the Common Council authorizing and directing this improvement, was passed in February, 1836; that shortly afterwards the Supreme Court appointed commissioners of estimate and assessment, who made their report in 1838, and the same was presented to that court for confirmation, but was afterwards sent back to the commissioners for revisal and correction; that the amended report was confirmed by the court in September, 1839, and that the order for the making of the improvement was carried into effect in May, 1840. The complainant charged in his bill upon information derived from E. Meriam, that the ayes and noes were not called upon the adoption of the resolution of the Common Council, authorizing the making of the improvement; nor were the votes of the Aldermen and Assistants, and the report of the committee on streets, upon which the ordinance was founded, published in any of the newspapers employed by the corporation. Various objections were stated in the bill as to the equity and justice of the assessment upon property which was supposed by the commissioners to be benefited by the improvement, which objections are noticed in the opinion of the court. The complainant also stated in his bill that the improvement was not within the part of the city as to which a permanent map and plan were required to be made by the commissioners under the act of April, 1807, and he therefore insisted that the Common Council, as organized under the act of 1830, amending the charter of the city, had no jurisdiction or authority to widen or alter John street.

W. Hunt and L. H. Sandford, for the complainant.

Peter A. Cowdrey, for the defendants.

THE CHANCELLOR.—The language of the bill in this case, leaves it doubtful whether the complainant, at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law.—The bill, instead of alleging in the usual manner, that the complainant was at a particular date, and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the first of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they did not sustain, does not appear to be one which in any manner concerns this complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the rise of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant, or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforeseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. the Mayor, &c., of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment, made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure this complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widensng of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Meserole vs. the Mayor, &c., of Brooklyn, (in Chan. April 7, 1840,) referred to on the argument, the commissioners had not erred in judgment as to what property was to be benefited by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend., 618.) There the court held that if the proceedings had been regular, and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed, would actually be benefited by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alledging that the fronts on William street would be benefited by the improvement.

The same answer is applicable to the objection that $100 was included in the assessments for surveying and grading the triangle opposite to Cliff street under the resolution of May, 1837.

As the bill alledges that the cost of the proceeding have not yet been taxed, it cannot now be known whether the amount of the assessment will be more or less than the amount allowed for damages, and the costs and expenses of making the improvement. The mode of conducting these

proceedings, as prescribed by law, is such, that the assessments must be made and confirmed before the whole expense and costs of the proceedings can be ascertained, the commissioners, after having ascertained the damages for property taken, must necessarily proceed upon mere estimates of some of the costs, &c., which will probably be incurred thereafter in completing the proceedings. A mistake of a few dollars, therefore, one way or the other in estimating the amount of the expenses cannot vitiate the whole assessment, and take from the Supreme Court the power to confirm a report founded upon a reasonable estimate of the prospective costs. The act of April, 1839, only requires the costs and charges of commissioners, and attorney and counsel, &c., to be taxed before they are paid, and not that they should be taxed before the assessment is made and confirmed, as that could not be done. It is no objection, therefore, to the collection of the assessment, that those costs had not been taxed when this bill was filed.

The objection that the corporation, as at present organized, has not the right to lay out new streets, or to alter old ones, in that part of the city which was not embraced in the permanent plan of improvements adopted by the commissioners appointod under the act of the 3d April, 1807, is one which, if well taken, would render the whole proceeding under the ordinance for the widening of John street, absolutely void. The power to open new streets, or to alter old ones, in this part of the city, is claimed by the corporation under the second clause of the 177th section of the act of the 9th of April, 1813, to reduce the several laws relating particularly to the city of New York into one act, (2 R. S. of 1813, p. 409.) By that clause the power was expressly given to the corporation, whever, or as often as it should, in the opinion of the Mayor, Aldermen, and Commonalty, *in Common Council convened*, be necessary or desirable for the public convenience or health to lay out, form and open new streets, &c., in that part of the city, or to extend, enlarge, straighten, alter. or otherwise improve, streets, &c., already laid out, or thereafter to be laid out.

It is not pretended that previous to the act of April, 1830, to amend the charter of the city of New York, the corporation, when convened in Common Council, under the charter and the laws then in force, would not have been authorized to pass an ordinance for the making of this improvement; but this act for the amendment of the city charter directs that neither the Mayor nor the Recorder shall be a member of the Common Council after the second Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the Common Council of the city; which boards are to meet in separate chambers, &c. And the complainant's counsel therefore insist that the Mayor, Aldermen, and Commonalty can no longer convene in Common Council, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in Common Council, according to the provisions of its charter, and not to the partioular officers who, at that time, represented the corporation in Common Council. And the act of 1830 having excluded the Mayor and Rocorder from the Common Council, and directed the Aldermen and Assistants to convene as a Common Council in two separate boards, the Mayor, Aldermen, and Commonalty of the city, that is the corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorizing the opening of a new street, or the alteration of a new one, under the 177th section of the act of 1813, was strictly a legislative power given to the corporation represented in its Common Council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen, and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to a preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law.—And if the whole proceedings in relation to the opening of tne street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot *would not even create a cloud upon his title.* For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a CLOUD upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should expresse my opinion at this time upon the question. Whether the 7th section of the act of April, 1830, requiring the ayes and noes to be taken, and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property, benefited by the proposed improvement, are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefited by the improve-rather than by a general tax upon the city at large. A court of equity, therefore, at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefited thereby, and upon those who have not.

It is true, the complainant alledges in his bill that his property is not benefited by the improvement. But that-allegation is not sworn to by any one, and it is, of course, contradicted by the report, under oath, of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

(Copy.) JOHN M. DAVISON, Register.

[From the Saratoga Sentinel–Extra of July 20, 1841.]

IN CHANCERY.

BEFORE THE CHANCELLOR.

Samuel Vandervoort
vs.
The Trustees of the village of Astoria.

J. B. SCOLES, for Complainant. G. WINTER, for Defendants.

In this case the Chancellor decid d that injunctions to stay public improvements should not be granted *ex-parte* by Injunction Masters, out of court, where there is no immediate danger of irreparable damages being done before the defendants can have an opportunity of being heard. That the Master, in all such cases, instead of granting the injunction in the first instance, should direct an order, to show cause before the court why an injunction should not be granted.

Injunction dissolved with costs to the defendants, without reference to the denial of any matters of the bill by the answer.

IN CHANCERY.

BEFORE THE ASSISTANT VICE CHANCELLOR.

Street Assessments.

Peter G. Stuyvesant and others,
vs.
The Mayor, Aldermen, and Commonalty of the city of New York.

Opinion of Murray Hoffman, Esq., Injunction Master.

The bill is brought before me as Injunction Master. I have been obliged by my sense of duty to grant an injunction in this and several cases on the eve of the sale advertised to take place on the 27th inst. I am sensible of the inconvenience to the city from an interference at this time, and do it with unfeigned reluctance.

But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterizes the proceedings complained of. I have a deep-rooted conviction that ultimately the decision must be against the corporation; and I believe that jurisdiction exists in this court to compel the corporation to try the question fairly in a single action at law between them and a complaining party. I think it is within the province of this court to prevent an innocent purchaser being deluded into litigation and probable loss, and to confine the controversy to the alleged wrong-doer and the injured party. This strikes me as the plain, just, and common-sense view of the matter. There are in this bill a number of complainants, the several owners of various parcels of property. They may all be bound by the result of one action. Thus, with perfect justice to the corporation, these questions may be tried in

the most simple and satisfactory manner, and a contest with a third party averted.

There has been no opinion as yet expressed by the Chancellor upon the point of jurisdiction, and I am at liberty to act upon the assumption and my own conviction that it exists.

I may, in a case of such moment, briefly advert to the reasons which led me on a former occasion to consider the neglect of the corporation to call the ayes and noes, and make the publication prescribed by the charter of 1830 a fatal omission.

[The assistant Vice Chancellor states some facts of his opinion in the case of Codwise vs. the Corporation, which it was intended shonld appear in this paper, but are crowded out for want of room.]

But in the present bill a new point is taken of much consequence. The proceedings for opening Art street commenced in April 1837. The report was completed, and the advertisement announcing that it would be presented to the Court for confirmation began on the 18th day of May, 1839. The report was filed on the 5th of June, 1839, and confirmed in the ensuing August. It is stated in the bill that, from the examination of the affidavits of publication, and the advertisement, it appears that the publication was made in but three papers, and does not appear that any notice was affixed in a public place contiguous to the premises. It is charged as a fact that the advertisement was only in three papers, and that no such notice was put up.

By the ninth section of the act of 20th April, 1839, it is provided that all motions (except as before provided) made under the act thereby amended, shall be, upon giving previous notice of the trial, place, and object thereof, published for at least fourteen days in four of the public newspapers, and by copies of such notice in handbills, to be posted up for the same space of time in three conspicuous places adjacent to the property to be affected. (See section 2 for this last clause.) It admits of no doubt that a motion for the confirmation of the report of commissioners falls within the ninth section.

The act repeals the amended act as far as it is inconsistent with the provisions of the new act; and it is directed to take effect on its passage, (the 20th of April, 1839,) but it expressly provided that no part of it except the *ninth* and *twelfth* sections shall affect any proceedings under the act thereby amended, which had been commenced previously to its going into effect.

It is an irresistible inference that the ninth and twelfth sections *do affect* prior proceedings, if those sections, when applied to such proceedings, are constitutional.

Of that I cannot entertain the slightest doubt. Both the Chancellor and Supreme Court have held that the Revised Statutes are applicable to all existing cases, so far as they affect merely the forms and modes of proceedings. (*The People* vs. *Livingston*, 6 Wendell, 526.) Every future proceeding in the assertion of a right or prosecution of a suit is to be governed by the new statutes. In this case, if the advertisement had been begun before the 20th of April, 1839, that would have been a proceeding already commenced, and would not have been affected by the ninth section. But as it was a proceeding commenced after that date, it necessarily falls within it.

In *Aymar* vs. *Gault* (2 Paige, 284) the doctrine was applied to the case of an absent party. The reference under the Revised Statutes was ordered, to take proof of the claim, although the suit was commenced before they went into operation.

In *Larkin* vs. *Mann* (2 Paige, 27) the rule was applied to the partition suits previously commenced. See also *Parsons* vs. *Browne* (7 Paige, 359).

This being the law, then it is clear that the present complainants are not bound by the proceedings at all; that they are now at liberty to take every objection of fact or law which they could have taken before the Supreme Court, as well as those which they could not then have taken.

I speak on the supposition that they did not actually attend and contest the confirmation. Without saying whether this would cure the defect or not, it is plain an argument may be raised upon it. But no principle of our law is more sacred than this, that no man shall be affected in person or property without the opportunity of being heard in the proper tribunal. From necessity, perhaps, personal notice has been dispensed with in many cases; these street proceedings among the number. The party who is assessed for benefit merely (no part of his property being taken), is never summoned before the Commissioners. He has no notice of the proceedings except by that publication for 14 days which the old act prescribed, or by the publication under the new act. His property and himself are bound upon the assumption that he has seen that notice. The law therefore must be observed to a scruple. No judge has a right to say that from great publicity, or from the actual taking of one paper containing the notice, or from any thing short of the absolute fulfilment of the requisitions of the statute, the party is to be bound.

What absurdity is it to imagine that the clear command of the Legislature that notice must be given in four papers, and by posting up copies in three adjacent places, is to be fulfilled by any other mode of notice!

I pass over another most important question in this bill viz: the carrying Art-street through a part of the city included in the map of 1807. It is needless to discuss it, in the view I have already taken.

I have, however, had my doubts since the decision of the Chancellor in Vandevoort vs. The Village of Astoria whether in these cases I ought, as injunction master, to do more than grant an order to show cause. Certainly the case here is very different; the Trustees of Astoria being in the act of making the improvement complained of. Here it is to prevent a recovery in this mode of the sum assessed for the improvement. I have concluded, however, that it is most proper for me to grant on order to show cause, with a temporary injunction.

I doubt whether I have a right to impose terms upon granting an injunction. Otherwise I should direct that the injunction be on the condition of the complainants filing a written consent with the bill, or endorsed upon it, submitting to abide the decision of an action to be had in a court of law by the Corporation against one of the parties, the form and other particulars attending the bringing such action, to be settled by this Court.

Martha Amory and others,
vs.
The Mayor, Aldermen, &c.

This case is, in its leading particulars, similar to that of Stuyvesant vs. The Corporation, before noticed. It is distinctly charged as to the proceedings in relation to the 6th avenue, that when the first publication of the notice of motion to confirm the report was made the act of 20th of April, 1839, was in force the rule of confirmation being made on the 6th of June, 1839. Here also the question under the 12th section is of great importance as the costs of the opening exceeds $10,000. Some questions may arise under this section; but this at least is clear: No part of the costs can be levied upon the party or his property, nor can a sale be made to pay them until the taxation has been made. How far if this were the only neglect, it would affect the whole assessment, I need not now enquire. I am clear that it justifies an interference with the present sale, which is to raise the whole amount, including the costs, provided this court has any jurisdiction at all; a point before examined.

John Haggerty and others,
vs.
The Mayor, Aldermen, &c.

The complainants in the bill, who are numerous, seek an injunction against selling their property assessed for the improvement of John street, and advertised for sale on the 27th inst.

I refer to my opinion in the case of Stuyvesant, vs. The Corporation, for the reasons upon which I have allowed a temporary injunction. It is however peculiarly incumbent upon me in this instance, to see that the case before me is substantially different from that of Wiggins, vs. The Corporation heretofore decided by the Chancellor, and in which an injunction was refused.

In the *first* place, the delay referred to by the Chancellor in the last clause of his opinion is fully accounted for in this bill; and as the Corporation never sued at law, and never advertised until the present notice of sale, there never was an opportunity for the complainants to resist the demand or to apply to this court. I have before held that until an advertisement was begun there was no jurisdiction.

Next, in the case of Wiggins no proceedings to sell the property had been taken.

Again, in that case the statements on the bill did not exclude the supposition that on the record of the proceedings it may have appeared that the ayes and noes were called. That difficulty is fully met in the present case.

Again, the bill was there defective upon the point of the complainant being the actual owner of the property assessed when he filed the bill.—The present bill is in this particular unobjectionable.

And lastly, a new and very important point is here introduced. The report was brought before the Supreme Court in ————, 1838. It was sent back for correction, and the motion for final confirmation made and the rule entered in September, 1839. At that time the 12th section of the act of 20th April, 1839, was in force. The costs were never taxed under that 12th section. The amount is added to the sum assessed, and each of the complainants' property is liable for and was to pay a proportion of such costs. The sale is to raise that proportion as well as the assessments for benefit. Now the section, as I have shown in my opinion in Stuyvesant vs. The Corporation affects proceedings subsequently taken. *It is wholly illegal* to charge the costs upon any party until they were taxed. Notice of the taxation is directed to be given in a public manner, and certainly without such notice and taxation the parties assessed cannot be bound to pay them.

It has been decided, from reasons of convenience and in the absence of any peremptory provision of the statute, that costs may be included in the assessment, and imposed prospectively by the Commissioners; and that an inconsiderable variation in the amount taxed from the amount imposed, will not affect the validity of the proceedings, nor prevent the confirmation of the report (Wiggin vs. The Mayor, &c, in Chancery, March 6, 1841.)

But if the section prescribing a taxation applies to this John street case at all, it is apparent that no party can be called upon to pay any portion of the costs until a due taxation has been had.—Without such taxation there can be no obligations to pay, and no lien on the party's property. What will be the consequence of this, and whether it may not be corrected by a taxation now and proportionate abatement, I need not inquire. The property is advertised to be sold for a debt, some of which at least is illegally imposed upon it.

By adverting to my opinion in the case of Westervelt & Codwise vs, the Corporation, it will be seen that it is settled law that the costs of the proceedings cannot be assessed upon the property without an express statute; that in a case in Albany, an assessment was set aside for want of such statutory provision; and that in the instance of opening streets in New York, the old act admitted the addition of the costs. Now I think the case will appear very clear if we suppose that it had been part of the old act that the cost must be taxed upon notice before they could be added to the assessment for benefit. Certainly they could not be recovered until taxed. I may add that, as the Supreme Court is empowered to make rules for carrying the act into effect, all inconveniences may readily be avoided.

M. HOFFMAN, Assistant Vice Chancellor.
